THE
HISTORY
OF
WAUKESHA COUNTY,
WISCONSIN,

CONTAINING

AN ACCOUNT OF ITS SETTLEMENT, GROWTH, DEVELOPMENT AND RESOURCES: AN EXTENSIVE AND
MINUTE SKETCH OF ITS CITIES, TOWNS AND VILLAGES—THEIR IMPROVEMENTS, INDUSTRIES,
MANUFACTORIES, CHURCHES, SCHOOLS AND SOCIETIES; ITS WAR RECORD, BIOGRAPH-
ICAL SKETCHES, PORTRAITS OF PROMINENT MEN AND EARLY SETTLERS: THE
THE WHOLE PRECEDED BY A HISTORY OF WISCONSIN, STATISTICS
OF THE STATE, AND AN ABSTRACT OF ITS LAWS AND CON-
STITUTION AND OF THE CONSTITUTION
OF THE UNITED STATES.

ILLUSTRATED.

PREFACE

IT is with no little pride that the publishers present this work to the citizens of Waukesha County, knowing that, with whatever inaccuracies it may be found to contain, it will prove one of the most valuable books ever added to their libraries. It is a book wholly unlike any other ever published, being exclusively for and concerning the people of this county, and is of such size, completeness and comprehensiveness as could never have been furnished had the community been less advanced in civilization, culture and wealth than it now is.

Had the publication of this history been delayed five years, many facts now contained in it could not have been rescued from oblivion. The index shows what the book attempts to preserve. That it contains errors would be foolhardy to deny; for the very nature of all historical publications, depending, as they do, upon oft-repeated and oft-mangled stories, imperfect newspaper accounts and memories weakened by the toils and sorrows of many decades, renders perfect accuracy absolutely impossible. However, let the public take these prefatory remarks as a pledge that the publishers have spared no means, and the historian no labor or patience, to make every account as near perfect as possible; and let every reader remember also, as he notes the contents of the hundreds of subjects the book contains, that, wherever the historian has been led in the least astray, it was due to the citizens of Waukesha County, for whom the work was undertaken, and from whom he obtained the least and the greatest of the facts necessary in its compilation.

To those who have taken particular pains to aid in making this a valuable book, sincere thanks are here returned; and, as years roll on, and the work becomes more and more cherished and valuable, the thanks of the future will be still more sincere than ours; sincere not only, but entirely universal.

WESTERN HISTORICAL COMPANY.

MAP OF WAUKESHA CO.

HISTORY OF WISCONSIN.

BY C. W. BUTTERFIELD.

I.—WISCONSIN ANTIQUITIES.

The first explorers of the valleys of the Great Lakes and the Mississippi and its tributaries, seem not to have noticed, to any considerable extent, the existence within these vast areas of monuments of an extinct race. Gradually, however, as the tide of emigration broke through the barriers of the Alleghanies and spread in a widely extended flow over what are now the States of the Northwest, these prehistoric vestiges attracted more and more the attention of the curious and the learned, until, at the present time, almost every person is presumed to have some general knowledge, not only of their existence, but of some of their striking peculiarities. Unfortunately, these signs of a long since departed people are fast disappearing by the never ceasing operations of the elements, and the constant encroachments of civilization. The earliest notices of the animal and vegetable kingdom of this region are to be found in its rocks; but Wisconsin's earliest records of men can only be traced in here and there a crumbling earth-work, in the fragment of a skeleton, or in a few stone and copper implements—dim and shadowy relics of their handicraft.

The ancient dwellers in these valleys, whose history is lost in the lapse of ages, are designated, usually, as the Mound-Builders; not that building mounds was probably their distinctive employment, but that such artificial elevations of the earth are, to a great extent, the only evidences remaining of their actual occupation of the country. As to the origin of these people, all knowledge must, possibly, continue to rest upon conjecture alone. Nor were the habitations of this race confined to the territory of which Wisconsin now forms a part. At one time, they must have been located in many ulterior regions. The earth-works, tumuli, or "mounds," as they are generally designated, are usually symmetrically raised and often inclosed in mathematical figures, such as the square, the octagon, and the circle, with long lines of circumvallation. Besides these earth-works, there are pits dug in the solid rock; rubbish heaps formed in the prosecution of mining operations; and a variety of implements and utensils, wrought in copper or stone, or moulded in clay. Whence came the inhabitants who left these evidences to succeeding generations? In other words, who were the Mound-Builders? Did they migrate from the Old World, or is their origin to be sought for elsewhere? And as to their manners and customs and civilization—what of these things? Was the race finally swept from the New World to give place to Red men, or was it the one from which the latter descended? These momentous questions are left for the ethnologist, the archæologist, and the antiquarian of the future to answer—if they can.

Inclosures and mounds of the prehistoric people, it is generally believed, constituted but parts of one system; the former being, in the main, intended for purposes of defense or religion; the latter, for sacrifice, for temple sites, for burial places, or for observatories. In selecting sites for many of these earth-works, the Mound-Builders appear to have been influenced by motives which prompt civilized men to choose localities for their great marts; hence, Cincinnati, St. Louis, Chicago, Milwaukee and other cities of the West are founded on ruins of pre-existing structures. River terraces and river bottoms seem to have been the favorite places for these earth-works. In such localities, the natural advantages of the country could be made available with much less trouble than in portions of the country lying at a distance from water-courses. In Wisconsin, therefore, as in other parts, the same general idea of selecting points contiguous to the principal natural thoroughfares is found to have prevailed with the Mound-Builders; for their works are seen in the basin of the Fox river of the Illinois, in that of Rock river and its branches, in the valley of Fox river of Green bay, in that of the Wisconsin, as well as near the waters of the Mississippi.

While a few circumvallations and immense mounds, such as are common to certain other portions of the United States, are discoverable in Wisconsin, yet by far the largest number of earthworks have one peculiarity not observable, except in a few instances, outside the State. This characteristic is a very striking one. The fact is revealed that they are imitative in form—resembling beasts, reptiles, birds, fish, man. All these, for convenience, are usually classed under the general name of “animal mounds,” although some are in the similitude of trees, some of war clubs, others of tobacco pipes. Generally, these figures are in groups, though sometimes they are seen alone. For what purpose these earth-works were heaped up—they rise above the surface two, four, and sometimes six feet—or what particular uses they were intended to subserve, is unknown. It is, however, safe to affirm that they had some significance. A number resemble the bear; a few, the buffalo; others, the raccoon. Lizards, turtles, and even tadpoles, are outlined in the forms of some. The war eagle, and the war club has each its representative. All this, of course, could not have been a mere happening—the work of chance. The sizes of these mounds are as various as their forms. One near Cassville, in Grant county, very complete in its representation of an animal, supposed to be of the elephant species, was found, upon measurement, to have a total length of one hundred and thirty-five feet. Another in Sauk county, quite perfect in its resemblance to the form of a man, was of equal length—a veritable colossus; prone, it is true, and soon to disappear, if it has not already been destroyed, by ravages of a superior civilization.

In portions of Wisconsin, as well as in a few places outside the State, are found earth-works of another kind, but quite as remarkable as the “animal mounds,” which, from their supposed use, have been styled “garden beds.” They are ridges, or beds, about six inches in height and four feet in width, ranged, with much apparent method, in parallel rows, sometimes rectangular in shape, sometimes of various but regular and symmetrical curves, and occupying fields of from ten to a hundred acres.

The Mound-Builders have left many relics, besides their earthworks, to attest their presence in Wisconsin in ages past. Scattered widely are found stone and copper axes, spear-heads, and arrow-heads, also various other implements—evidently their handiwork. As these articles are frequently discovered many feet beneath the surface, it argues a high antiquity for the artificers. Whether they had the skill to mould their copper implements is doubtful. Such as plainly show the work of hammering, indicate an art beyond that possessed by the Red men who peopled America upon its first discovery by Europeans. In a few instances, fragments of human skulls have been found so well preserved as to enable a comparison to be drawn between the crania of

this ancient race and those of modern ones; the results, however, of these comparisons throw little, if any, light upon "the dark backward and abysm" of mound-building times.

The evidences of an extinct people of superior intelligence is very strikingly exhibited in the ancient copper mines of the Lake Superior region. Here are to be found excavations in the solid rock; heaps of rubble and dirt; copper utensils fashioned into knives, chisels, and spear and arrow-heads; stone hammers; wooden bowls and shovels; props and levers for raising and supporting the mass copper; and ladders for ascending and descending the pits. These mines were probably worked by people not only inhabiting what is now the State of Wisconsin, but territory farther to the southward. The copper was here obtained, it is believed, which has been found in many places, even as far away as the northern shore of the Gulf of Mexico, wrought into various implements and utensils. But there are no traces in Wisconsin of a "copper age" succeeding a "stone age," discernible in any prehistoric relics. They all refer alike to one age—the indefinite past; to one people—the Mound-Builders.

II.—THE INDIAN TRIBES OF WISCONSIN.

When, as early, it is believed, as 1634, civilized man first set foot upon the territory now included within the boundaries of Wisconsin, he discovered, to his surprise, that upon this wide area met and mingled clans of two distinct and wide-spread families—the Algonquins and Sioux. The tribes of the former, moving westward, checked the advance of the latter in their excursions eastward. As yet there had been no representatives of the Huron-Iroquois seen west of Lake Michigan—the members of this great family, at that date dwelling in safety in the extensive regions northward and southward of the Erie and Ontario lakes. Already had the French secured a foot-hold in the extensive valley of the St. Lawrence; and, naturally enough, the chain of the Great Lakes led their explorers to the mouth of Green bay, and up that water-course and its principal tributary, Fox river, to the Wisconsin, an affluent of the Mississippi. On the right, in ascending this bay, was seen, for the first time, a nation of Indians, lighter in complexion than neighboring tribes, and remarkably well formed, now well known as the **MENOMONEES**.

This nation is of Algonquin stock, but their dialect differed so much from the surrounding tribes of the same family, it having strange guttural sounds and accents, as well as peculiar inflections of verbs and other parts of speech, that, for a long time, they were supposed to have a distinct language. Their traditions point to an emigration from the East at some remote period. When first visited by the French missionaries, these Indians subsisted largely upon wild rice, from which they took their name. The harvest time of this grain was in the month of September. It grew spontaneously in little streams with slimy bottoms, and in marshy places. The harvesters went in their canoes across these watery fields, shaking the ears right and left as they advanced, the grain falling easily, if ripe, into the bark receptacle beneath. To clear it from chaff and strip it of a pellicle inclosing it, they put it to dry on a wooden lattice above a small fire, which was kept up for several days. When the rice was well dried, it was placed in a skin of the form of a bag, which was then forced into a hole, made on purpose, in the ground. They then tread it out so long and so well, that the grain being freed from the chaff, was easily winnowed. After this, it was pounded to meal, or left unpounded, and boiled in water seasoned with grease. It thus became a very palatable diet. It must not be inferred that this was the only food of the Menomonees; they were adepts in fishing, and hunted with skill the game which abounded in the forests.

For many years after their discovery, the Menomonees had their homes and hunting

grounds upon, or adjacent to, the Menomonee river. Finally, after the lapse of a century and a quarter, down to 1760, when the French yielded to the English all claims to the country, the territory of the Menomonees had shifted somewhat to the westward and southward, and their principal village was found at the head of Green bay, while a smaller one was still in existence at the mouth of their favorite stream. So slight, however, had been this change, that the country of no other of the surrounding tribes had been encroached upon by the movement.

In 1634, the Menomonees probably took part in a treaty with a representative of the French, who had thus early ventured so far into the wilds of the lake regions. More than a score of years elapsed before the tribe was again visited by white men,—that is to say, there are no authentic accounts of earlier visitations. In 1660, Father René Menard had penetrated the Lake Superior country as far, at least, as Kewenaw, in what is now the northern part of Michigan, whence some of his French companions probably passed down the Menomonee river to the waters of Green bay the following year; but no record of the Indians, through whose territory they passed, was made by these voyagers. Ten years more—1670—brought to the Menomonees (who doubtless had already been visited by French fur-traders) Father Claudius Allouez, to win them to Christianity. He had previously founded a mission upon the bay of Chegoimegon, now Chaquamegon, or Ashland bay, an arm of Lake Superior, within the present State of Wisconsin, in charge of which, at that date, was Father James Marquette. Proceeding from the “Sault” on the third of November, Allouez, early in December, 1669, reached the mouth of Green bay, where, on the third, in an Indian village of Sacs, Pottawattamies, Foxes and Winnebagoes, containing about six hundred souls, he celebrated the holy mass for the first time upon this new field of his labors,—eight Frenchmen, traders with the Indians, whom the missionary found there upon his arrival, taking part in the devotions. His first Christian work with the Menomonees was performed in May of the next year. Allouez found this tribe a feeble one, almost exterminated by war. He spent but little time with them, embarking, on the twentieth of that month, after a visit to some Pottawattamies and Winnebagoes, “with a Frenchman and a savage to go to Sainte Mary of the Sault.” His place was filled by Father Louis André, who, not long after, erected a cabin upon the Menomonee river, which, with one at a village where his predecessor had already raised the standard of the cross, was soon burned by the savages; but the missionary, living almost constantly in his canoe, continued for some time to labor with the Menomonees and surrounding tribes. The efforts of André were rewarded with some conversions among the former; for Marquette, who visited them in 1673, found many good Christians among them.

The record of ninety years of French domination in Wisconsin—beginning in June, 1671, and ending in October, 1761—brings to light but little of interest so far as the Menomonees are concerned. Gradually they extended their intercourse with the white fur traders. Gradually and with few interruptions (one in 1728, and one in 1747 of a serious character) they were drawn under the banner of France, joining with that government in its wars with the Iroquois; in its contests, in 1712, 1729, 1730, and 1751, with the Foxes; and, subsequently, in its conflicts with the English.

The French post, at what is now Green Bay, Brown county, Wisconsin, was, along with the residue of the western forts, surrendered to the British in 1760, although actual possession of the former was not taken until the Fall of the next year. The land on which the fort stood was claimed by the Menomonees. Here, at that date, was their upper and principal village, the lower one being at the mouth of the Menomonee river. These Indians soon became reconciled to the English occupation of their territory, notwithstanding the machinations of French traders who endeavored to prejudice them against the new comers. The Menomonees, at this time, were very much reduced, having, but a short time previous, lost three hundred of their warriors

by the small pox, and most of their chiefs in the late war in which they had been engaged by the then French commander there, against the English. They were glad to substitute English for French traders; as they could purchase supplies of them at one half the price they had previously paid. It was not long before the sincerity of the Menomonees was put to the test. Pontiac's War of 1763 broke out, and the post of Mackinaw was captured. The garrison, however, at Green bay was not only not attacked by the savages, but, escorted by the Menomonees and other tribes, crossed Lake Michigan in safety to the village of L'Arbre Croche; thence making their way to Montreal. The Menomonees continued their friendship to the English, joining with them against the Colonies during the Revolution, and fighting on the same side during the war of 1812-15.

When, in July, 1816, an American force arrived at Green bay to take possession of the country, the Menomonees were found in their village near by, very peaceably inclined. The commander of the troops asked permission of their chief to build a fort. "My Brother!" was the response, "how can we oppose your locating a council-fire among us? You are too strong for us. Even if we wanted to oppose you we have scarcely got powder and ball to make the attempt. One favor we ask is, that our French brothers shall not be disturbed. You can choose any place you please for your fort, and we shall not object." No trouble had been anticipated from the Menomonees, and the expectations of the government of the United States in that regard were fully realized. What added much to the friendship now springing up between the Menomonees and the Americans was the fact that the next year—1817—the annual contribution, which for many years had been made by the British, consisting of a shirt, leggins, breech-clout, and blanket for each member of the tribe, and for each family a copper kettle, knives, axes, guns and ammunition, was withheld by them.

It was found by the Americans, upon their occupation of the Menomonee territory, that some of the women of that tribe were married to traders and boatmen who had settled at the head of the bay, there being no white women in that region. Many of these were Canadians of French extraction; hence the anxiety that they should be well treated, which was expressed by the Menomonees upon the arrival of the American force. At this period there was a considerable trade carried on with these Indians at Prairie du Chien, as many of them frequently wintered on the Mississippi. The first regular treaty with this tribe was "made and concluded" on the thirtieth day of March, 1817, "by and between William Clark, Ninian Edwards, and Auguste Chouteau, commissioners on the part and behalf of the United States of America, of the one part," and the chiefs and warriors, deputed by the Menomonees, of the other part. By the terms of this compact all injuries were to be forgiven and forgotten; perpetual peace established; lands, heretofore ceded to other governments, confirmed to the United States; all prisoners to be delivered up; and the tribe placed under the protection of the United States, "and of no other nation, power, or sovereign, whatsoever." The Menomonees were now fully and fairly, and for the first time, entitled to be known as "American Indians," in contradistinction to the term which had been so long used as descriptive of their former allegiance—"British Indians."

The territory of the Menomonees, when the tribe was taken fully under the wing of the General Government, had become greatly extended. It was bounded on the north by the dividing ridge between the waters flowing into Lake Superior and those flowing south into Green bay and the Mississippi; on the east, by Lake Michigan; on the south, by the Milwaukee river, and on the west by the Mississippi and Black rivers. This was their territory; though they were practically restricted to the occupation of the western shore of Lake Michigan, lying between the mouth of Green bay on the north and the Milwaukee river on the south, and to a somewhat indefinite area west. Their general claim, as late as 1825, was north to the Chippewa country;

east to Green bay and Lake Michigan; south to the Milwaukee river, and west to Black river. And what is most surprising is that the feeble tribe of 1761 had now, in less than three quarters of a century, become a powerful nation, numbering between three and four thousand.

The Menomonee territory, as late as 1831, still preserved its large proportions. Its eastern division was bounded by the Milwaukee river, the shore of Lake Michigan, Green bay, Fox river, and Winnebago lake; its western division, by the Wisconsin and Chippewa rivers on the west; Fox river on the south; Green bay on the east, and the high lands whence flow the streams into Lake Superior, on the north. This year, however, it was shorn of a valuable and large part by the tribe ceding to the United States all the eastern division, estimated at two and one half million acres. The following year, the Menomonees aided the General Government in the Black Hawk war.

That the Menomonees might, as much as possible, be weaned from their wandering habits, their permanent home was designated to be a large tract lying north of Fox river and east of Wolf river. Their territory farther west, was reserved for their hunting grounds until such time as the General Government should desire to purchase it. In 1836, another portion, amounting to four million acres, lying between Green bay on the east and Wolf river on the west, was disposed of to the United States, besides a strip three miles in width from near the portage north, on each side of the Wisconsin river and forty-eight miles long—still leaving them in peaceable possession of a country about one hundred and twenty miles long, and about eighty broad.

Finally, in 1848, the Menomonees sold all their lands in Wisconsin to the General Government, preparatory to their movement to a reservation beyond the Mississippi of six hundred thousand acres; but the latter tract was afterward re-ceded to the United States; for, notwithstanding there were treaty stipulations for the removal of the tribe to that tract, there were obstacles in the way of their speedy migration, resulting, finally, in their being permitted to remain in Wisconsin. Lands, to the amount of twelve townships, were granted them for their permanent homes, on the upper Wolf river, in what is now Shawano and Oconto counties—a portion, but a very small one, of what was once their extensive possessions. To this reservation they removed in October, 1852. Thus are the Menomonees, the only one of the original tribes of Wisconsin who, as a whole, have a local habitation within its limits. This tribe refused to join the Sioux in their outbreak in 1861, and several of their warriors served as volunteers in the United States army during the late civil war.

It is now over two centuries since the civilized world began to gain knowledge of the existence, in the far West, of a tribe of Indians known as the WINNEBAGOES—that is, *men of the sea*; pointing, possibly, to their early migration from the shores of the Mexican gulf, or the Pacific. The territory now included within the limits of Wisconsin, and so much of the State of Michigan as lies north of Green bay, Lake Michigan, the Straits of Mackinaw and Lake Huron were, in early times, inhabited by several tribes of the Algonquin race, forming a barrier to the Dakotas, or Sioux, who had advanced eastward to the Mississippi. But the Winnebagoes, although one of the tribes belonging to the family of the latter, had passed the great river, at some unknown period, and settled upon the head waters of Green bay. Here, this “sea-tribe,” as early, it is believed, as 1634, was visited by an agent of France and a treaty concluded with them. The tribe afterward called themselves Hochungara, or Ochunkoraw, but were styled by the Sioux, Hotanke, or Sturgeon. Nothing more is heard of the Ouenibigoutz, or Winnebougouk (as the Winnebagoes were early called by the Jesuit missionaries, and the Algonquin tribes, meaning men from the fetid or salt water, translated by the French, Puants) for the next thirty-five years, although there is no doubt that the tribe had been visited meanwhile by adventurous Frenchmen, when on the second of December, 1669, some of that nation were noted at a Sac (Sauk or Saukis) village on Green bay, by Father Allouez.

As early at least as 1670, the French were actively engaged among the Winnebagoes trading. "We found affairs," says one of the Jesuit missionaries, who arrived among them in September of that year, "we found affairs there in a pretty bad posture, and the minds of the savages much soured against the French, who were there trading; ill-treating them in deeds and words, pillaging and carrying away their merchandise in spite of them, and conducting themselves toward them with insupportable insolences and indignities. The cause of this disorder," adds the missionary, "is that they had received some bad treatment from the French, to whom they had this year come to trade, and particularly from the soldiers, from whom they pretended to have received many wrongs and injuries." It is thus made certain that the arms of France were carried into the territory of the Winnebagoes over two hundred years ago.

The Fox river of Green bay was found at that date a difficult stream to navigate. Two Jesuits who ascended the river in 1670, had "three or four leagues of rapids to contend with," when they had advanced "one day's journey" from the head of the bay, "more difficult than those which are common in other rivers, in this, that the flints, over which" they had to walk with naked feet to drag their canoes, were so "sharp and so cutting, that one has all the trouble in the world to hold one's self steady against the great rushing of the waters." At the falls they found an idol that the savages honored; "never failing, in passing, to make him some sacrifice of tobacco, or arrows, or paintings, or other things, to thank him that, by his assistance, they had, in ascending, avoided the dangers of the waterfalls which are in this stream; or else, if they had to ascend, to pray him to aid them in this perilous navigation." The devout missionaries caused the idol "to be lifted up by the strength of arm, and cast into the depths of the river, to appear no more" to the idolatrous savages.

The mission of St. Francis Xavier, founded in December, 1669, by Allouez, was a roving one among the tribes inhabiting the shores of Green bay and the interior country watered by the Fox river and its tributaries, for about two years, when its first mission-house was erected at what is now Depere, Brown county. This chapel was soon after destroyed by fire, but was rebuilt in 1676.

The Winnebagoes, by this time, had not only received considerable spiritual instruction from the Jesuit fathers, but had obtained quite an insight into the mysteries of trading and trafficking with white men; for, following the footsteps of the missionaries, and sometimes preceding them, were the ubiquitous French fur traders. It is impossible to determine precisely what territory was occupied by the Winnebagoes at this early date, farther than that they lived near the head of Green bay.

A direct trade with the French upon the St. Lawrence was not carried on by the Winnebagoes to any great extent until the beginning of the eighteenth century. As early as 1679, an advance party of La Salle had collected a large store of furs at the mouth of Green bay, doubtless in a traffic with this tribe and others contiguous to them; generally, however, the surrounding nations sold their peltries to the Ottawas, who disposed of them, in turn, to the French. The commencement of the eighteenth century found the Winnebagoes firmly in alliance with France, and in peace with the dreaded Iroquios. In 1718, the nation numbered six hundred. They were afterward found to have moved up Fox river, locating upon Winnebago lake, which stream and lake were their ancient seat, and from which they had been driven either by fear or the prowess of more powerful tribes of the West or Southwest. Their intercourse with the French was gradually extended and generally peaceful, though not always so, joining with them, as did the Menomonees, in their wars with the Iroquois, and subsequently in their conflicts with the English, which finally ended in 1760.

When the British, in October, 1761, took possession of the French post, at the head of

Green bay, the Winnebagoes were found to number one hundred and fifty warriors only; their nearest village being at the lower end of Winnebago lake. They had in all not less than three towns. Their country, at this period, included not only that lake, but all the streams flowing into it, especially Fox river; afterward extended to the Wisconsin and Rock rivers. They readily changed their course of trade—asking now of the commandant at the fort for English traders to be sent among them. In the Indian outbreak under Pontiac in 1763, they joined with the Menomonees and other tribes to befriend the British garrison at the head of the bay, assisting in conducting them to a place of safety. They continued their friendship to the English during the Revolution, by joining with them against the colonies, and were active in the Indian war of 1790-4, taking part in the attack on Fort Recovery, upon the Maumee, in the present State of Ohio, in 1793. They fought also on the side of the British in the war of 1812-15, aiding, in 1814, to reduce Prairie du Chien. They were then estimated at 4,500. When, in 1816, the government of the United States sent troops to take possession of the Green bay country, by establishing a garrison there, some trouble was anticipated from these Indians, who, at that date, had the reputation of being a bold and warlike tribe. A deputation from the nation came down Fox river and remonstrated with the American commandant at what was thought to be an intrusion. They were desirous of knowing why a fort was to be established so near them. The reply was that, although the troops were armed for war if necessary, their purpose was peace. Their response was an old one: "If your object is peace, you have too many men; if war, you have too few." However, the display of a number of cannon which had not yet been mounted, satisfied the Winnebagoes that the Americans were masters of the situation, and the deputation gave the garrison no farther trouble. On the 3d of June, 1816, at St. Louis, the tribe made a treaty of peace and friendship with the General Government; but they continued to levy tribute on all white people who passed up Fox river. English annuities also kept up a bad feeling. At this time, a portion of the tribe was living upon the Wisconsin river, away from the rest of the nation, which was still seated upon the waters flowing into Green bay. In 1820, they had five villages on Winnebago lake and fourteen on Rock river. In 1825, the claim of the Winnebagoes was an extensive one, so far as territory was concerned. Its southeast boundary stretched away from the source of Rock river to within forty miles of its mouth, in Illinois, where they had a village. On the west it extended to the heads of the small streams flowing into the Mississippi. To the northward, it reached Black river and the upper Wisconsin, in other words, to the Chippewa territory, but did not extend across Fox river, although they contended for the whole of Winnebago lake. In 1829, a large part of their territory in southwest Wisconsin, lying between Sugar river and the Mississippi, and extending to the Wisconsin river, was sold to the General Government; and, three years later all the residue lying south and east of the Wisconsin and the Fox river of Green bay; the Winnebago prophet having before that date supported the Sacs in their hostility. Finally, in the brief language of the treaty between this tribe (which had become unsettled and wasteful) and the United States, of the first of November, 1837, "The Winnebago Nation of Indians" ceded to the General Government "all their lands east of the Mississippi." Not an acre was reserved. And the Indians agreed, that, within eight months from that date, they would move west of "the great river." This arrangement, however, was not carried out fully. In 1842, there were only 756 at Turkey river, Iowa, their new home, with as many in Wisconsin, and smaller bands elsewhere. All had become lawless, and roving. Some removed in 1848; while a party to the number of over eight hundred left the State as late as 1873. The present home of the tribe is in Nebraska, where they have a reservation north of and adjacent to the Omahas, containing over one hundred thousand acres. However, since their first removal beyond the Mississippi, they have several times

changed their place of abode. Their number, all told, is less than twenty-five hundred.

When the territory, now constituting the northern portion of Wisconsin, became very generally known to the civilized inhabitants of the eastern part of the United States, it was found to be occupied by Indians called the CHIPPEWAS. Their hunting-grounds extended south from Lake Superior to the heads of the Menomonee, the Wisconsin and Chippewa rivers; also farther eastward and westward. At an early day they were engaged in a war with the Sioux—a war indeed, which was long continued. The Chippewas, however, persistently maintained their position—still occupying the same region when the General Government extended its jurisdiction over the whole country south of the Great Lakes and west to the Mississippi.

By treaties with the Chippewas at different periods, down to the year 1827, the General Government had recognized them as the owners of about one quarter of which is now the entire State. The same policy was pursued toward this tribe as with neighboring ones, in the purchase of their lands by the United States. Gradually they parted with their extensive possessions, until, in 1842, the last acre within what is now Wisconsin was disposed of. It was the intention of the General Government to remove the several bands of the Chippewas who had thus ceded their lands to a tract reserved for them beyond the Mississippi; but this determination was afterward changed so as to allow them to remain upon certain reservations within the limits of their old-time hunting grounds. These reservations they continue to occupy. They are located in Bay-field, Ashland, Chippewa and Lincoln counties. The clans are known, respectively, as the Red Cliff band, the Bad River band, the Lac Courte Oreille band, and the Lac de Flambeau band.

Of all the tribes inhabiting what is now Wisconsin when its territory was first visited by white men, the SACS (Sauks or Sankies) and FOXES (Outagamies) are, in history, the most noted. They are of the Algonquin family, and are first mentioned in 1665, by Father Allouez, but as separate tribes. Afterward, however, because of the identity of their language, and their associations, they were and still are considered as one nation. In December, 1669, Allouez found upon the shores of Green bay a village of Sacs, occupied also by members of other tribes; and early in 1670 he visited a village of the same Indians located upon the Fox river of Green bay, at a distance of four leagues from its mouth. Here a device of these Indians for catching fish arrested the attention of the missionary. "From one side of the river to the other," he writes, "they made a barricade, planting great stakes, two fathoms from the water, in such a manner that there is, as it were, a bridge above for the fishes, who by the aid of a little bow-net, easily take sturgeons and all other kinds of fish which this pier stops, although the water does not cease to flow between the stakes." When the Jesuit father first obtained, five years previous, a knowledge of this tribe, they were represented as savage above all others, great in numbers, and without any permanent dwelling place. The Foxes were of two stocks: one calling themselves Outagamies or Foxes, whence our English name; the other, Musquakink, or men of red clay, the name now used by the tribe. They lived in early times with their kindred the Sacs east of Detroit, and as some say near the St. Lawrence. They were driven west, and settled at Saginaw, a name derived from the Sacs. Thence they were forced by the Iroquois to Green bay; but were compelled to leave that place and settle on Fox river.

Allouez, on the twenty-fourth of April, 1670, arrived at a village of the Foxes, situated on Wolf river, a northern tributary of the Fox. "The nation," he declares, "is renowned for being numerous; they have more than four hundred men bearing arms; the number of women and children is greater, on account of polygamy which exists among them—each man having commonly four wives, some of them six, and others as high as ten." The missionary found that the Foxes had retreated to those parts to escape the persecutions of the Iroquois. Allouez established among these Indians his mission of St. Mark, rejoicing in the fact that in less than

two years he had baptized "sixty children and some adults." The Foxes, at the summons of De la Barre, in 1684, sent warriors against the Five Nations. They also took part in Denonville's more serious campaign; but soon after became hostile to the French. As early as 1693, they had plundered several on their way to trade with the Sioux, alleging that they were carrying arms and ammunition to their ancient enemies—frequently causing them to make portages to the southward in crossing from Lake Michigan to the Mississippi. Afterward they became reconciled to the French; but the reconciliation was of short duration. In 1712, Fort Detroit, then defended by only a handful of men, was attacked by them in conjunction with the Mascoutens and Kickapoos. However, in the end, by calling in friendly Indians, the garrison not only protected themselves but were enabled to act on the offensive, destroying the greater part of the besieging force.

The nation continued their ill will to the French. The consequence was that their territory in 1716 had been invaded and they were reduced to sue for peace. But their friendship was not of long continuance. In 1718, the Foxes numbered five hundred men and "abounded in women and children." They are spoken of at that date as being very industrious, raising large quantities of Indian corn. In 1728, another expedition was sent against them by the French. Meanwhile the Menomonees had also become hostile; so, too, the Sacs, who were now the allies of the Foxes. The result of the enterprise was, an attack upon and the defeat of a number of Menomonees; the burning of the wigwams of the Winnebagos (after passing the deserted village of the Sacs upon the Fox river), that tribe, also, at this date being hostile; and the destruction of the fields of the Foxes. They were again attacked in their own country by the French, in 1730, and defeated. In 1734, both the Sacs and Foxes came in conflict with the same foe; but this time the French were not as successful as on previous expeditions. In 1736, the Sacs and Foxes were "connected with the government of Canada;" but it is certain they were far from being friendly to the French.

The conflict between France and Great Britain commencing in 1754, found the Sacs and Foxes allied with the former power, against the English, although not long previous to this time they were the bitter enemies of the French. At the close of that contest so disastrous to the interests of France in North America, these tribes readily gave in their adhesion to the conquerors, asking that English traders might be sent them. The two nations, then about equally divided, numbered, in 1761, about seven hundred warriors. Neither of the tribes took part in Pontiac's war, but they befriended the English. The Sacs had migrated farther to the westward; but the Foxes—at least a portion of them—still remained upon the waters of the river of Green bay, which perpetuates their name. A few years later, however, and the former were occupants of the upper Wisconsin; also, to a considerable distance below the portage, where their chief town was located. Further down the same stream was the upper village of the Foxes, while their lower one was situated near its mouth at the site of the present city of Prairie du Chien. At this date, 1766, the northern portion of what is now Wisconsin, including all that part watered by the streams flowing north into Lake Superior, was the home of the Chippewas. The country around nearly the whole of Green bay was the hunting ground of the Menomonees. The territory of Winnebago lake and Fox river was the seat of the Winnebagoes. The region of the Wisconsin river was the dwelling place of the Sacs and Foxes.

During the war of the Revolution, the Sacs and Foxes continued the firm friends of the English. At the commencement of the nineteenth century, only a small part of their territory was included in what is now Wisconsin, and that was in the extreme southwest. In 1804, they ceded this to the United States; so that they no longer were owners of any lands within this State. From that date, therefore, these allied tribes can not be considered as belonging to the

Indian nations of Wisconsin. A striking episode in their subsequent history — the Black Hawk War — comes in, notwithstanding, as a part, incidentally, of the annals of the State.

Deserving a place in a notice of the Indian tribes of Wisconsin is the nation known as the POTTAWATTAMIES. As early as 1639, they were the neighbors of the Winnebagoes upon Green bay. They were still upon its southern shore, in two villages, in 1670; and ten years subsequent to that date they occupied, at least in one village the same region. At the expiration of the first quarter of the eighteenth century, a part only of the nation were in that vicinity — upon the islands at the mouth of the bay. These islands were then known as the Pottawattamie islands, and considered as the ancient abode of these Indians. Already had a large portion of this tribe emigrated southward, one band resting on the St. Joseph of Lake Michigan, the other near Detroit. One peculiarity of this tribe — at least of such as resided in what is now Wisconsin — was their intimate association with neighboring bands. When, in 1669, a village of the Pottawattamies, located upon the southeast shore of Green bay, was visited by Allouez, he found with them Sacs and Foxes and Winnebagoes. So, also, when, many years subsequent to that date, a band of these Indians were located at Milwaukee, with them were Ottawas and Chippewas. These “united tribes” claimed all the lands of their respective tribes and of other nations, giving the United States, when possession was taken of the western country by the General Government, no little trouble. Finally, by a treaty, held at Chicago in 1833, their claims, such as they were, to lands along the western shore of Lake Michigan, within the present State of Wisconsin, extending westward to Rock river, were purchased by the United States, with permission to retain possession three years longer of their ceded lands, after which time this “united nation of Chippewas, Ottawas and Pottawattamies” began to disappear, and soon were no longer seen in southeastern Wisconsin or in other portions of the State.

Besides the five tribes — Menomonees, Winnebagoes, Chippewas, Sacs and Foxes, and Pottawattamies — many others, whole or in part, have, since the territory now constituting the State was first visited by white men, been occupants of its territory. Of these, some are only known as having once lived in what is now Wisconsin; others — such as the Hurons, Illinois, Kickapoos, Mascoutens, Miamis, Noquets, Ottawas and Sioux, are recognized as Indians once dwelling in this region; yet so transitory has been their occupation, or so little is known of their history, that they scarcely can be claimed as belonging to the State.

Commencing in 1822, and continuing at intervals through some of the following years, was the migration to Wisconsin from the State of New York of the remains or portions of four tribes: the Oneidas, Stockbridges, Munsees and Brothertowns. The Oneidas finally located west of Green Bay, where they still reside. Their reservation contains over 60,000 acres, and lies wholly within the present counties of Brown and Outagamie. The Stockbridges and Munsees, who first located above Green Bay, on the east side of Fox river, afterward moved to the east side of Winnebago lake. They now occupy a reservation joining the southwest township of the Menominee reservation, in Shawano county, and are fast becoming citizens. The Brothertowns first located on the east side of Fox river, but subsequently moved to the east side of Winnebago lake, where, in 1839, they broke up their tribal relations and became citizens of Wisconsin territory.

III.—PRE-TERRITORIAL ANNALS OF WISCONSIN.

When, in 1634, the first white man set foot upon any portion of the territory now constituting the State of Wisconsin, the whole country was, of course, a wilderness. Its inhabitants, the aboriginal Red men, were thinly but widely scattered over all the country. JEAN NICOLET, a Frenchman, who had been in Canada since 1618, and had spent several years among the

Indians, was the first of civilized men to unlock the mystery of its situation and people. French authorities upon the St. Lawrence sent him as an ambassador to the Winnebagoes, of whom he had heard strange stories. On his outward voyage he visited the Hurons—allies of the French—a tribe seated upon the eastern side of the lake which bears their name, and Nicolet was empowered to negotiate a peace with them. "When he approached the Winnebago town, he sent some of his Indian attendants to announce his coming, put on a robe of damask, and advanced to meet the expectant crowd with a pistol in each hand. The squaws and children fled, screaming that it was a manito, or spirit, armed with thunder and lightning; but the chiefs and warriors regaled him with so bountiful a hospitality, that a hundred and twenty beavers were devoured at a single feast." Such was the advent of the daring Frenchman into what is now the State of Wisconsin.

"Upon the borders of Green bay," wrote the Jesuit, Paul le Jeune, in 1640, "are the Menomonees; still farther on, the Winnebagoes, a sedentary people, and very numerous. Some Frenchmen," he continues, "call them the 'Nation of the Stinkards,' because the Algonquin word Winipeg signifies 'stinking water.' Now they thus call the water of the sea; therefore, these people call themselves 'Winnebagoes,' because they came from the shores of a sea of which we have no knowledge; consequently we must not call them the 'Nation of Stinkards,' but the 'Nation of the Sea.'" From these Men of the Sea, Nicolet passed westward, ascended Fox river of Green Bay, until nigh the portage to the Wisconsin, down which stream he could have floated easily to the Mississippi, the "great water" of his guides, which he mistook for the sea. This adventurous Frenchman, when so near re-discovering the river which has given immortality to De Soto, turned his face to the eastward; retraced his steps to Green bay, and finally returned in safety to Quebec. This was the first exploration of what is now Wisconsin—only fourteen years after the landing of the Pilgrims upon the wild shores of New England.

Wisconsin, for twenty-four years after its discovery, was left to its savage inhabitants. At length, in 1658, two daring fur traders penetrated to Lake Superior, and wintered there. They probably set foot upon what is now Wisconsin soil, as they made several trips among the surrounding tribes. They saw, among other things, at six days' journey beyond the lake, toward the southwest, Indians that the Iroquois had driven from their homes upon the eastern shores of Lake Huron. These Frenchmen heard of the ferocious Sioux, and of a great river—not the sea, as Nicolet had supposed—on which they dwelt. This was the Mississippi; and to these traders is the world indebted for a knowledge of its existence; as De Soto's discovery was never used, and soon became well-nigh, if not entirely, forgotten. From these upper countries, in the Summer of 1660, the two returned to Quebec, with three hundred Indians in sixty canoes, laden with peltry. This was, indeed, the dawn—though exceedingly faint—of what is now the commerce of the great Northwest. Nineteen years after flashed a more brilliant light; for, in 1679, the "Griffin," laden with furs, left one of the islands at the mouth of Green bay, on its return—spreading her sails for Niagara, but never more to be heard of.

Following in the footsteps of the fur traders came the Jesuit missionaries to Lake Superior; one of them, Father Menard, as early as 1660, reaching its southern shore as far to the westward, probably, as Kewenaw, in the present State of Michigan. There is no positive evidence, however, that he or his French companions, visited any portion of what is now Wisconsin; although the next year, 1661, some of his associates probably passed down the Menomonee river to Green bay. Following Menard came Father Claude Allouez, arriving on the first day of October, 1665, at "Chagowamigong," or "Chegoimegon," now Chequamegon, or Ashland Bay, "at the bottom of which," wrote the missionary, "is situated the great villages of the savages, who there plant their fields of Indian corn, and lead a stationary life." Near by he erected a small chapel of bark—the

first structure erected by civilized man in Wisconsin. At La Pointe, in the present Ashland county, he established the mission of the Holy Ghost.

The next Catholic mission in what is now Wisconsin was that of St. Francis Xavier, founded also by Allouez. Upon the second of December, 1669, he first attended to his priestly devotions upon the waters of Green bay. This mission, for the first two years of its existence, was a migratory one. The surrounding tribes were all visited, including the Pottawattamies, Menomonees, Winnebagoes, and Sacs and Foxes. However, in 1671, one hundred and five years before the Declaration of Independence, there was erected, at what is now Depere, Brown county, a chapel for the mission of St. Francis Xavier. Thus early did the Jesuit Fathers, in their plain garbs and unarmed, carry the cross to many of the benighted heathen occupying the country circumscribed by Lakes Michigan, Huron and Superior, and the "great river"—the Mississippi.

French domination in Wisconsin dates from the year 1671, the very year in which it seems the indomitable LaSalle, upon his first expedition, passed the mouth of Green bay, but did not enter it. France then took formal possession of the whole of the country of the upper lakes. By this time, the commerce with the western tribes had so attached them to her interests that she determined to extend her power to the utmost limits—vague and indeterminate as they were—of Canada. An agent—Daumont de St. Luson—was dispatched to the distant tribes, proposing a congress of Indian nations at the Falls of Ste. Mary, between Lake Huron and Lake Superior. The invitation was extended far and near. The principal chiefs of Wisconsin tribes, gathered by Nicolas Perrot in Green bay, were present at the meeting. Then and there, with due ceremony, it was announced that the great Northwest was placed under the protection of the French government. And why not? She had discovered it—had to a certain extent explored it—had to a limited extent established commerce with it—and her missionaries had proclaimed the faith to the wondering savages. But none of her agents—none of the fur-traders—none of the missionaries—had yet reached the Mississippi, the "great river," concerning which so many marvels had been heard, although it is claimed that, in 1669, it had been seen by the intrepid La Salle. But the time for its discovery, or properly re-discovery, was at hand, if, indeed, it can be called, with propriety, a re-discovery, since its existence to the westward was already known to every white man particularly interested in matters appertaining to the Northwest. Now, however, for the first time, its upper half was to be, to a certain extent, explored. For the first time, a white man was to behold its vast tribute, above the Illinois river, rolling onward toward the Mexican gulf. Who was that man? His name was Louis Joliet; with him was Father James Marquette.

Born at Quebec, in 1645, educated by the Jesuits, and first resolving to be a priest, then turning fur-trader, Joliet had, finally, been sent with an associate to explore the copper mines of Lake Superior. He was a man of close and intelligent observation, and possessed considerable mathematical acquirements. At this time, 1673, he was a merchant, courageous, hardy, enterprising. He was appointed by French authorities at Quebec to "discover" the Mississippi. He passed up the lakes to Mackinaw, and found at Point St. Ignace, on the north side of the strait, Father James Marquette, who readily agreed to accompany him. Their outfit was very simple: two birch-bark canoes and a supply of smoked meat and Indian corn. They had a company of five men with them, beginning their voyage on the seventeenth of May, 1673. Passing the straits, they coasted the northern shores of Lake Michigan, moved up Green bay and Fox river to the portage. They crossed to the Wisconsin, down which they paddled their frail canoes, until, on the seventeenth of June, they entered—"discovered"—the Mississippi. So the northern, the eastern and the western boundary of what is now Wisconsin had been reached at this date; therefore, it may be said that its territory had been explored sufficiently for the forming of a

pretty correct idea of its general features as well as of its savage inhabitants. After dropping down the Mississippi many miles, Joliet and Marquette returned to Green bay, where the latter remained to recruit his exhausted strength, while Joliet descended to Quebec, to report his "discoveries" to his superiors.

Then followed the expedition of LaSalle to the west, from the St. Lawrence, when, in 1679, he and Father Louis Hennepin coasted along the western shore of Lake Michigan, frequently landing; then, the return of Henri de Tonty, one of LaSalle's party down the same coast to Green bay, in 1680, from the Illinois; the return, also, the same year, of Hennepin, from up the Mississippi, whither he had made his way from the Illinois, across what is now Wisconsin, by the Wisconsin and Fox rivers to Green bay, in company with DuLhut, or DuLuth, who, on his way down the "great river" from Lake Superior, had met the friar; and then, the voyage, in 1683, from Lake Michigan to the Mississippi river, by the same route, of LeSueur, and his subsequent establishment at La Pointe, in what is now Ashland county, Wisconsin, followed several years after by a trip up the Mississippi. The act of Daumont de St. Luson, at the Sault Sainte Mary, in 1671, in taking possession of the country beyond Lake Michigan, not being regarded as sufficiently definite, Nicolas Perrot, in 1689, at Green bay, again took possession of that territory, as well as of the valleys of the Fox and Wisconsin rivers, and extending the dominion of New France over the country on the Upper Mississippi, and "to other places more remote." The voyage of St. Cosme, in 1699, when he and his companions frequently landed on the west coast of Lake Michigan, upon what is now territory of Wisconsin, completed the explorations in the west for the seventeenth century.

Following in the footsteps of early explorations, of self sacrificing attempts of the Jesuits to carry the cross to the wild tribes of the West, of the first visits of the lawless *coureurs de bois*, was the military occupation—if such it can be called—of what is now Wisconsin by the French. The ninety years of domination by France in this region were years of only nominal possession. The record of this occupation is made up of facts concerning the Indian policy of the French rulers; their contests with the Sacs and Foxes; their treaties, at various times, with different tribes; their interest in, and protection of, the fur trade, and kindred subjects. The Indian tribes were, at most, only the allies of France. Posts—mere stockades without cannon, more for protection to fur-traders than for any other purpose—were erected upon the Mississippi at two points at least, upon what is now territory of Wisconsin. On the west side of Fox river of Green bay, "half a league from its mouth," was a French post, as early as 1721, where resided, besides the commandant and an uncouth squad of soldiers, a Jesuit missionary; and near by were collected Indians of different tribes. Of course, the omnipresent fur-trader helped to augment the sum-total of its occupants. This post was, not long after, destroyed, but another was established there. When, however, France yielded her inchoate rights in the West to Great Britain—when, in 1761, the latter took possession of the country—there was not a French post within what is now Wisconsin. The "fort" near the head of Green bay, had been vacated for some years; it was found "rotten, the stockade ready to fall, and the houses without cover;" emblematic of the decay—the fast-crumbling and perishing state—of French supremacy, at that date, in America. Wisconsin, when England's control began, was little better than a howling wilderness. There was not within the broad limits of what is now the State, a single *bona fide* settler, at the time the French Government yielded up its possession to the English; that is to say, there were none according to the present acceptation of the term "settler."

The military occupation of Wisconsin by the British, after the Seven Years' War, was a brief one. La Bay—as the post at what is now the city of Fort Howard, Brown county, was called—was, on the twelfth of October, 1761, taken possession of by English troops, under Captain Belfour, of the Eightieth regiment. Two days after, that officer departed, leaving Lieutenant

James Gorrell, in command, with one sergeant, one corporal and fifteen privates. There also remained at the post a French interpreter and two English traders. The name of the fortification was changed to Fort Edward Augustus. This post was abandoned by the commandant on the twenty-first of June, 1763, on account of the breaking out of Pontiac's War and the capture of the fort at Mackinaw by the savages. The cause of this war was this: The Indian tribes saw the danger which the downfall of the French interests in Canada was sure to bring to them. They banded together under Pontiac to avert their ruin. The struggle was short but fierce—full of "scenes of tragic interest, with marvels of suffering and vicissitude, of heroism and endurance;" but the white man conquered. The moving incidents in this bloody drama were enacted to the eastward of what is now Wisconsin, coming no nearer than Mackinaw, which, as just mentioned, the savages captured; but it resulted in the evacuation of its territory by British troops, who never after took possession of it, though they continued until 1796 a nominal military rule over it, after Mackinaw was again occupied by them.

An early French Canadian trading station at the head of Green bay assumed finally the form of a permanent settlement—the first one in Wisconsin. To claim, however that any French Canadian is entitled to the honor of being the first permanent white settler is assuming for him more than the facts seem to warrant. The title of "The Father and Founder of Wisconsin" belongs to no man.

After Pontiac's War, one of the noted events in this region was the journey of Jonathan Carver, who, in 1766, passed up Fox river to the portage, and descended the Wisconsin to the Mississippi. He noticed the tumbling-down post at what is now Green Bay, Brown county. He saw a few families living in the fort, and some French settlers, who cultivated the land opposite, and appeared to live very comfortably. That was the whole extent of improvements in what is now Wisconsin. The organization of the Northwest Fur Company; the passage of an act by the British Parliament by which the whole Northwest was included in the Province of Quebec; the joining of the Indians in this region with the British, against the Americans, in the War of the Revolution; the exploration of the lead region of the Upper Mississippi by Julian Dubuque; the passage of the ordinance of 1787; the first settlement of the territory northwest of the River Ohio; and the Indian war which followed, are all incidents, during British occupation, of more or less interest for the student of Wisconsin history. He will find that, by the treaty of 1783 and of 1795, with Great Britain, all the inhabitants residing in this region were to be protected by the United States in the full and peaceable possession of their property, with the right to remain in, or to withdraw from it, with their effects, within one year. All who did not leave were to be deemed American citizens, allowed to enjoy all the privileges of citizenship, and to be under the protection of the General Government. He will also find that less than two years was the whole time of actual military occupation of what is now Wisconsin by British soldiers, and that English domination, which should have ended at the close of the Revolution, was arbitrarily continued until the Summer of 1796, when the western posts, none of which were upon territory circumscribed by Lakes Michigan and Superior and the Mississippi river, were delivered into the keeping of the United States. Thus the supremacy of Great Britain over the Northwest was, after an actual continuance of thirty-five years, at an end.

Although the General Government did not get possession of the region northwest of the Ohio, throughout its full extent, for thirteen years subsequent to its acquirement by the treaty of peace of 1783 with Great Britain, nevertheless, steps were taken, very soon, to obtain concessions from such of the colonies as had declared an ownership in any portion of it. None of the claimants, seemingly, had better rights than Virginia, who, by virtue of conquests, largely her own, of the Illinois settlements and posts, extended her jurisdiction over that country, erecting into a county

so much of the region northwest of the Ohio, as had been settled by Virginians or might afterward be settled by them. But as, previous to her yielding all rights to territory beyond that river, she had not carried her arms into the region north of the Illinois or made settlements upon what is now the soil of Wisconsin, nor included any portion of it within the bounds of an organized county, it follows that her dominion was not actually extended over any part of the area included within the present boundaries of this State; nor did she then claim jurisdiction north of the Illinois river, but on the other hand expressly disclaimed it.

Virginia and all the other claimants finally ceded to the United States their rights, such as they were, beyond the Ohio, except two reservations of limited extent; and the General Government became the undisputed owner of the "Great West," without any internal claims to possession save those of the Indians. Meanwhile, the United States took measures to extend its jurisdiction over the whole country by the passage of the famous ordinance of 1787, which established a government over "the territory of the United States, northwest of the River Ohio." But this organic law was, of course, nugatory over that portion of the region occupied by the British, until their yielding possession in 1796, when, for the first time, Anglo-American rule commenced, though nominally, in what is now Wisconsin. By the ordinance just mentioned, "the United States, in congress assembled," declared that the territory northwest of the Ohio should, for the purposes of temporary government, be one district, subject, however, to be divided into districts, as future circumstances might, in the opinion of Congress, make it expedient. It was ordained that a governor, secretary and three judges should be appointed for the Territory; a general assembly was also provided for; and it was declared that religion, morality, and knowledge, being necessary to good government and the happiness of mankind, schools and the means of education should forever be encouraged. It was also ordained that there should be neither slavery nor involuntary servitude in the said Territory, "otherwise than in the punishment of crimes whereof the party shall have been duly convicted." Thus was established the first Magna Charta for the five great States since that time formed out of "the territory northwest of the River Ohio," and the first rules and regulations for their government.

Under this act of Congress, Arthur St. Clair was appointed governor of the Northwestern Territory, as it was called, and Samuel H. Parsons, James M. Varnum, and John Armstrong, judges,—the latter not accepting the office, John Cleves Symmes was appointed in his place. Winthrop Sargeant was appointed secretary. At different periods, counties were erected to include various portions of the Territory. By the governor's proclamation of the 15th of August, 1796, one was formed to include the whole of the present area of Northern Ohio, west of Cleveland; also, all of what is now the State of Indiana, north of a line drawn from Fort Wayne "west-northerly to the southern part of Lake Michigan;" the whole of the present State of Michigan, except its extreme northwest corner on Lake Superior; a small corner in the northeast, part of what is now Illinois, including Chicago; and so much of the present State of Wisconsin as is watered by the streams flowing into Lake Michigan, which of course included an extensive portion, taking in many of its eastern and interior counties as now constituted. This vast county was named Wayne. So the few settlers then at the head of Green bay had their local habitations, constructively at least, in "Wayne county, Northwestern Territory." It was just at that date that Great Britain vacated the western posts, and the United States took quiet possession of them. But the western portion of what is now Wisconsin, including all its territory watered by streams flowing northward into Lake Superior, and westward and southwestward into the Mississippi, was as yet without any county organization; as the county of St. Clair, including the Illinois country to the southward, reached no farther north than the mouth of Little Mackinaw creek, where it empties into the River Illinois, in what is now the State of Illinois. The

A. W. Randall

(DECEASED) WAUKESHA.

EX GOVERNOR OF WISCONSIN.

"law of Paris," which was in force under French domination in Canada, and which by the British Parliament in 1774, had been continued in force under English supremacy, was still "the law of the land" west of Lake Michigan, practically at least.

From and after the fourth day of July, 1800, all that part of the territory of the United States northwest of the Ohio river, which lay to the westward of a line beginning upon that stream opposite to the mouth of Kentucky river and running thence to what is now Fort Recovery in Mercer county, Ohio; thence north until it intersected the territorial line between the United States and Canada, was, for the purposes of temporary government, constituted a separate territory called INDIANA. It included not only the whole of the present State of Illinois and nearly all of what is now Indiana, but more than half of the State of Michigan as now defined, also a considerable part of the present Minnesota, and the whole of what is now Wisconsin.

The seat of government was established at "Saint Vincennes on the Wabash," now the city of Vincennes, Indiana. To this extensive area was added "from and after" the admission of Ohio into the Union, all the territory west of that State, and east of the eastern boundary line of the Territory of Indiana as originally established; so that now all "the territory of the United States, northwest of the River Ohio," was, excepting the State of Ohio, included in Indiana Territory. On the thirtieth day of June, 1805, so much of Indiana Territory as lay to the north of a line drawn east from the southerly bend or extreme of Lake Michigan to Lake Erie, and east of a line drawn from the same bend through the middle of the first mentioned lake to its northern extremity, and thence due north to the northern boundary of the United States, was, for the purpose of temporary government, constituted a separate Territory called MICHIGAN. Of course no part of the present State of Wisconsin was included therein; but the whole remained in the Territory of Indiana until the second day of March, 1809, when all that part of the last mentioned Territory which lay west of the Wabash river, and a direct line drawn from that stream and "Post Vincennes," due north to the territorial line between the United States and Canada, was, by an act approved on the third of February previous, constituted a separate Territory, called ILLINOIS. Meanwhile jurisdiction had been extended by the authorities of Indiana Territory over the country lying west of Lake Michigan, to the extent, at least, of appointing a justice of the peace for each of the settlements of Green Bay and Prairie du Chien. All of what is now Wisconsin was transferred to the Territory of Illinois, upon the organization of the latter, except a small portion lying east of the meridian line drawn through Vincennes, which remained a part of Indiana Territory. This fraction included nearly the whole area between Green bay and Lake Michigan.

When, in 1816, Indiana became a State, "the territory of the United States northwest of the River Ohio," contained, besides Ohio and Indiana, the Territories of Illinois and Michigan, only; so the narrow strip, formerly a part of Indiana Territory, lying east of a line drawn due north from Vincennes, and west of the western boundary line of Michigan Territory, belonged to neither, and was left without any organization. However, upon the admission of Illinois into the Union, in 1818, all "the territory of the United States, northwest of the River Ohio," lying west of Michigan Territory and north of the States of Indiana and Illinois, was attached to and made a part of Michigan Territory; by which act the whole of the present State of Wisconsin came under the jurisdiction of the latter. During the existence of the Territory of Illinois, a kind of jurisdiction was had over the two settlements in what is now Wisconsin—rather more ideal than real, however.

In 1834, Congress greatly increased the limits of the Territory of Michigan, by adding to it, for judicial purposes, a large extent of country west of the Mississippi—reaching south as far as

the present boundary line between the present States of Iowa and Missouri; north, to the territorial line between the United States and Canada; and west, to the Missouri and White Earth rivers. It so continued down to the fourth of July, 1836.

A retrospective glance at the history of this region for forty years previous to the last mentioned year, including the time which elapsed after the surrender of the western posts, in 1796, by the British, discloses many facts of interest and importance.

The Anglo-Americans, not long after the region of country west of Lake Michigan became a part of Indiana Territory, began now and then to cast an eye, either through the opening of the Great Lakes or the Mississippi, upon its rolling rivers, its outspread prairies, and its dense forests, and to covet the goodly land; but the settlers at Green Bay and Prairie du Chien were mostly French Canadians at this date, although a few were Americans. The General Government, however, began to take measures preparatory to its occupation, by purchasing, in 1804, a tract in what is now the southwest portion of the State, of the Indians, and by holding the various tribes to a strict account for any murders committed by them on American citizens passing through their territories or trading with them. Comparative peace reigned in the incipient settlements at the head of Green bay and at the mouth of the Wisconsin, which was changed by the breaking out of the war of 1812, with Great Britain.

The English early succeeded in securing the Wisconsin Indian tribes as their allies in this war; and the taking of Mackinaw by the British in July, 1812, virtually put the latter in possession of what is now the eastern portion of the State. Early in 1814, the government authorities of the United States caused to be fitted out at St. Louis a large boat, having on board all the men that could be mustered and spared from the lower country, and sent up the Mississippi to protect the upper region and the few settlers therein. The troops landed at Prairie du Chien, and immediately proceeded to fortify. Not long after, Colonel McKay, of the British army, crossing the country by course of the Fox and Wisconsin rivers, with over five hundred British and Indians, received the surrender of the whole force. The officers and men were paroled and sent down the river. This was the only battle fought upon Wisconsin soil during the last war with England. The post at Prairie du Chien was left in command of a captain with two companies from Mackinaw. He remained there until after the peace of 1815, when the place was evacuated by the British.

When it became generally known to the Indian tribes in what is now Wisconsin, that the contest between the United States and Great Britain was at an end, they generally expressed themselves as ready and willing to make treaties with the General Government—eager, in fact, to establish friendly relations with the power they had so recently been hostile to. This was, therefore, a favorable moment for taking actual possession of the country between the Mississippi and Lake Michigan; and United States troops were soon ordered to occupy the two prominent points between Green Bay and Prairie du Chien. At the former place was erected Fort Howard; at the latter Fort Crawford. At Green Bay, half a hundred (or less) French Canadians cultivated the soil; at Prairie du Chien, there were not more than thirty houses, mostly occupied by traders, while on the prairie outside the village, a number of farms were cultivated. Such was Wisconsin when, at the close of the last war with Great Britain, it began in earnest to be occupied by Americans. The latter were few in number, but in 1818, they began to feel, now that the country was attached to Michigan Territory and the laws of the United States were extended over them, that they were not altogether beyond the protection of a government of their own, notwithstanding they were surrounded by savage tribes. Their happiness was increased upon the erection, by proclamation of Lewis Cass, governor of the Territory of Michigan, of three Territorial counties: Michilimackinac, Brown and Crawford. Their establishment dates

the twenty-sixth of October, 1818. The county of Michilimackinac not only included all of the present State of Wisconsin lying north of a line drawn due west from near the head of the Little Noquet bay, but territory east and west of it, so as to reach from Lake Huron to the Mississippi river. Its county seat was established "at the Borough of Michilimackinac." The whole area in Michigan Territory south of the county of Michilimackinac and west of Lake Michigan formed the two counties of Brown and Crawford: the former to include the area east of a line drawn due north and south through the middle of the portage between the Fox river of Green bay and the Wisconsin; the latter to include the whole region west of that line. Prairie du Chien was designated as the county seat of Crawford; Green Bay, of Brown county. On the 22d of December, 1826, a county named Chippewa was formed from the northern portions of Michilimackinac, including the southern shores of Lake Superior throughout its entire length, and extending from the straits leading from that lake into Lake Huron, west to the western boundary line of Michigan Territory, with the county seat "at such point in the vicinity of the Sault de Ste. Marie, as a majority of the county commissioners to be appointed shall designate." Embraced within this county,—its southern boundary being the parallel $46^{\circ} 31'$ north latitude,—was all the territory of the present State of Wisconsin now bordering on Lake Superior.

Immediately upon the erection of Brown and Crawford counties, they were organized, and their offices filled by appointment of the governor. County courts were established, consisting of one chief and two associate justices, either of whom formed a quorum. They were required to hold one term of court annually in their respective counties. These county courts had original and exclusive jurisdiction in all civil cases, both in law and equity, where the matter in dispute exceeded the jurisdiction of a justice of the peace, and did not exceed the value of one thousand dollars. They had, however, no jurisdiction in ejectment. They had exclusive cognizance of all offenses the punishment whereof was not capital, and the same power to issue remedial and other process, writs of error and mandamus excepted, that the supreme court had at Detroit. Appeals from justices of the peace were made to the county courts.

The establishing of Indian agencies by the General Government; the holding of treaties with some of the Indian tribes; the adjustment of land claims at Green Bay and Prairie du Chien; the appointment of postmasters at these two points, were all indications of a proper interest being taken by the United States in the affairs of the country. But a drawback to this region, was the fact that, in all civil cases of over a thousand dollars, and in criminal cases that were capital, as well as in actions of ejectment, and in the allowance of writs of error, and mandamus, recourse must be had to the supreme court at Detroit; the latter place being the seat of government of Michigan Territory. However, in January, 1823, an act of congress provided for a district court, and for the appointment of a judge, for the counties of Brown, Crawford, and Michilimackinac. This court had concurrent jurisdiction, civil and criminal, with the supreme court of the Territory, in most cases, subject, however, to have its decisions taken to the latter tribunal by a writ of error. The law provided for holding one term of court in each year, in each of the counties named in the act; so, at last, there was to be an administration of justice at home, and the people were to be relieved from all military arbitrations, which frequently had been imposed upon them. James Duane Doty was appointed judge of this court at its organization. A May term of the court was held in Prairie du Chien; a June term in Green Bay; a July term in "the Borough of Michilimackinac," in each year. In 1824, Henry S. Baird, of Brown county, was appointed district attorney. Doty held the office of judge until May, 1832, when he was succeeded by David Irvin. This court continued until 1836, when it was abrogated by the organization of the Territory of Wisconsin.

For a long time it had been known that there were lead mines in what is now the south-

western portion of the State; but it was not until the year 1825, and the two following years, that very general attention was attracted to them, which eventuated in the settlement of different places in that region, by Americans, who came to dig for lead ore. This rapid increase of settlers awakened the jealousy of the Winnebago Indians, at what they deemed an unauthorized intrusion upon their lands, which, with other causes operating unfavorably upon their minds, aroused them in June, 1827, to open acts of hostility. Murders became frequent. Finally, the militia of Prairie du Chien were called out. On the twenty-ninth of August, Brigadier-General Henry Atkinson, of the United States army, with a strong force of regulars, ascended the Wisconsin river to put an end to any further spread of Winnebago disturbances. He was joined on the first of September, by one hundred and thirty Galena volunteers, mounted, and under command of General Henry Dodge. The Winnebagoes were awed into submission. Thus ended the "Winnebago War." It was followed by the erection at the portage of Fort Winnebago, by the United States.

After the restoration of tranquillity, the United States proceeded by treaty with the Indians, to secure the right to occupy the lead regions. This was in 1828. The next year, the General Government purchased of the Winnebagoes, Southwestern Wisconsin, which put an end to all trouble on account of mining operations. On the ninth of October, 1829, a county was formed, by the legislative council of the Territory of Michigan, comprising all that part of Crawford county lying south of the Wisconsin river. This new county was called Iowa. The county seat was temporarily established at Mineral Point. Following this was a treaty in 1831, with the Menomonees, for all their lands east of Green bay, Winnebago lake, and the Fox and Milwaukee rivers.

There was now a crisis at hand. The most prominent event to be recorded in the pre-Territorial annals of Wisconsin is known as the Black Hawk War. This conflict of arms between the Sacs and Foxes and the United States arose from a controversy in regard to lands. By a treaty made at Fort Harmar, just across the River Muskingum from Marietta, Ohio, in January, 1789, the Pottawattamie and Sac tribes of Indians, among others, were received into the friendship of the General Government, and a league of peace and unity established between the contracting parties. On the third of November, 1804, a treaty at St. Louis stipulated that the united Sac and Fox tribes should be received into the friendship of the United States, and also be placed under their protection. These tribes also agreed to consider themselves under the protection of the General Government and of no other power whatsoever. At this treaty lands were ceded which were circumscribed by a boundary beginning at a point on the Missouri river opposite the mouth of the Gasconade, and running thence in a direct course so as to strike the River Jefferson at the distance of thirty miles from its mouth, and down that stream to the Mississippi. It then ran up the latter river to the mouth of the Wisconsin, and up that stream to a point thirty-six miles in a direct line from its mouth; thence by a straight course to a point where the Fox river of the Illinois leaves the small lake then called Sakaegan, and from that point down the Fox to the Illinois, and down the latter to the Mississippi. The consideration for this cession was the payment of goods to the value of two thousand two hundred and thirty-four dollars and fifty cents, and a yearly annuity of one thousand dollars—six hundred to be paid to the Sacs and four hundred to the Foxes—to be liquidated in goods valued at first cost. Afterward, Fort Madison was erected just above the Des Moines rapids in the Mississippi, on the territory ceded at the last mentioned treaty. Then followed the war with Great Britain, and the Sacs and Foxes agreed to take no part therein. However, a portion afterward joined the English against the Americans along with other Western tribes. At the restoration of peace the Sacs and Foxes held treaties with the United States. There was a renewal of the treaty of 1804.

Such in brief is a general outline of affairs, so far as those two tribes were concerned, down to the close of the last war with England. From this time, to the year 1830, several additional treaties were made with the Sacs and Foxes by the General Government: one in 1822, by which they relinquished their right to have the United States establish a trading house or factory at a convenient point at which the Indians could trade and save themselves from the imposition of traders, for which they were paid the sum of one thousand dollars in merchandise. Again, in 1824, they sold to the General Government all their lands in Missouri, north of Missouri river, for which they received one thousand dollars the same year, and an annuity of one thousand dollars for ten years. In 1830, they ceded to the United States a strip of land twenty miles wide from the Mississippi to the Des Moines, on the north side of their territory. The time had now come for the two tribes to leave the eastern shore of the Mississippi and retire across the "great water." Keokuk, the Watchful Fox, erected his wigwam on the west side of the river, and was followed by a large part of the two tribes. But a band headed by Ma-ka-tai-me-she-kia-kiah, or the Black Sparrow Hawk, commonly called Black Hawk, refused to leave their village near Rock Island. They contended that they had not sold their town to the United States; and, upon their return early in 1831, from a hunt across the Mississippi, finding their village and fields in possession of the whites, they determined to repossess their homes at all hazards. This was looked upon, or called, an encroachment by the settlers; so the governor of Illinois took the responsibility of declaring the State invaded, and asked the United States to drive the refractory Indians beyond the Mississippi. The result was, the Indian village was destroyed by Illinois volunteers. This and the threatened advance across the river by the United States commander, brought Black Hawk and his followers to terms. They sued for peace—agreeing to remain forever on the west side of the Mississippi. But this truce was of short duration.

Early in the Spring of 1832, Black Hawk having assembled his forces on the Mississippi, in the vicinity of the locality where Fort Madison had stood, crossed that stream and ascended Rock river. This was the signal for war. The governor of Illinois made a call for volunteers; and, in a brief space of time, eighteen hundred had assembled at Beardstown, Cass county. They marched for the mouth of Rock river, where a council of war was held by their officers and Brigadier-General Henry Atkinson, of the regular forces. The Indians were sent word by General Atkinson that they must return and recross the Mississippi, or they would be driven back by force. "If you wish to fight us, come on," was the laconic but defiant reply of the Sac chief. When the attempt was made to compel these Indians to go back across the "great river," a collision occurred between the Illinois militia and Black Hawk's braves, resulting in the discomfiture of the former with the loss of eleven men. Soon afterward the volunteers were discharged, and the first campaign of Black Hawk's War was at an end. This was in May, 1832.

In June following, a new force had been raised and put under the command of General Atkinson, who commenced his march up Rock river. Before this, there had been a general "forting" in the lead region, including the whole country in Southwest Wisconsin, notwithstanding which, a number of settlers had been killed by the savages, mostly in Illinois. Squads of volunteers, in two or three instances, had encountered the Indians; and in one with entire success—upon the Pecatonica, in what is now Lafayette county, Wisconsin—every savage (and there were seventeen of them) being killed. The loss of the volunteers was three killed and wounded. Atkinson's march up Rock river was attended with some skirmishing; when, being informed that Black Hawk and his force were at Lake Koshkonong, in the southwest corner of what is now Jefferson county, Wisconsin, he immediately moved thither with a portion of his army, where the whole force was ordered to concentrate. But the Sac chief with his people had flown. Colonels Henry Dodge and James D. Henry, with the forces under them, discovered the

trail of the savages, leading in the direction of the Wisconsin river. It was evident that the retreating force was large, and that it had but recently passed. The pursuing troops hastened their march. On the twenty-first of July, 1832, they arrived at the hills which skirt the left bank of that stream, in what is now Roxbury town (township), Dane county. Here was Black Hawk's whole force, including women and children, the aged and infirm, hastening by every effort to escape across the river. But that this might now be effected, it became necessary for that chief to make a firm stand, to cover the retreat. The Indians were in the bottom lands when the pursuing whites made their appearance upon the heights in their rear. Colonel Dodge occupied the front and sustained the first attack of the Indians. He was soon joined by Henry with his force, when they obtained a complete victory. The action commenced about five o'clock in the afternoon and ended at sunset. The enemy, numbering not less than five hundred, sustained a loss of about sixty killed and a large number wounded. The loss of the Americans was one killed and eight wounded. This conflict has since been known as the battle of Wisconsin Heights.

During the night following the battle, Black Hawk made his escape with his remaining force and people down the Wisconsin river. The women and children made their way down stream in canoes, while the warriors marched on foot along the shore. The Indians were pursued in their flight, and were finally brought to a stand on the Mississippi river, near the mouth of the Bad Axe, on the west boundary of what is now Vernon county, Wisconsin. About two o'clock on the morning of the second of August, the line of march began to the scene of the last conflict in the Black Hawk War. Dodge's command formed the advance, supported by regular troops, under Colonel Zachary Taylor, afterward president of the United States. Meanwhile an armed steamboat had moved up the Mississippi and lay in front of the savages; so they were attacked on all sides by the exasperated Americans. The battle lasted about two hours, and was a complete victory for the whites. Black Hawk fled, but was soon after captured. This ended the war.

The survey of public lands by the General Government; the locating and opening of land offices at Mineral Point and Green Bay; the erection of Milwaukee county from a part of Brown, to include all the territory bounded on the east and south by the east and south lines of the present State, on the north by what is now the north boundary of Washington and Ozaukee counties and farther westward on the north line of township numbered twelve, and on the west by the dividing line between ranges eight and nine; and the changing of the eastern boundary of Iowa county to correspond with the western one of Milwaukee county; — are some of the important events following the close of the Black Hawk war. There was an immediate and rapid increase of immigration, not only in the mining region but in various other parts of what is now Wisconsin, more especially in that portion bordering on Lake Michigan. The interior was yet sparsely settled. By the act of June 28, 1834, congress having attached to the Territory of Michigan, for judicial purposes, all the country "west of the Mississippi river, and north of the State of Missouri," comprising the whole of what is now the State of Iowa, all of the present State of Minnesota west of the Mississippi river, and more than half of what is now the Territory of Dakota, the legislative council of Michigan Territory extended her laws over the whole area, dividing it on the 6th of September, 1834, by a line drawn due west from the lower end of Rock island to the Missouri river into two counties: the country south of that line constituting the county of Des Moines; north of the line, to be known as the county of Dubuque. This whole region west of the Mississippi was known as the Iowa district. Immediately after the treaty of 1832 with the Sacs and Foxes, the United States having come into ownership of a large tract in this district, several families crossed the Mississippi, and settled on the purchase, but as

the time provided for the Indians to give possession was the first of June, 1833, these settlers were dispossessed by order of the General Government. So soon, however, as the Indians yielded possession, settlements began, but, from the date just mentioned until September, 1834, after the district was attached, for judicial purposes, to Michigan Territory, it was without any municipal law whatever. The organization of the counties of Dubuque and Des Moines on the sixth of that month, secured, of course a regular administration of justice. In 1835, in order to facilitate intercourse between the two remote military posts of Fort Howard at Green Bay, and Fort Crawford at Prairie du Chien, a military road was commenced to connect the two points; so, one improvement followed another. On the 9th of January, 1836, a session (the first one) of the seventh legislative council of Michigan Territory — that is, of so much of it as lay to the westward of Lake Michigan—was held at Green Bay, and a memorial adopted, asking Congress for the formation of a new Territory west of that lake; to include all of Michigan Territory not embraced in the proposed State of Michigan. Congress, as will now be shown, very soon complied with the request of the memorialists.

IV.—WISCONSIN TERRITORY.

The establishing of a separate and distinct Territory west of Lake Michigan, was the result of the prospective admission of Michigan into the Union (an event which took place not until the twenty-sixth of January, 1837), as the population, in all the region outside of the boundaries determined upon by the people for that State, would otherwise be left without a government, or, at least, it would be necessary to change the capital of the old Michigan Territory farther to the westward; so it was thought best to erect a new territory, to be called WISCONSIN (an Indian word signifying wild rushing water, or channel, so called from the principal eastern tributary of the Mississippi within its borders), which was done by an act of congress, approved April 20, 1836, to take effect from and after the third day of July following. The Territory was made to include all that is now embraced within the States of Wisconsin, Iowa, Minnesota, and a part of the Territory of Dakota, more particularly described within boundaries commencing at the northeast corner of the State of Illinois, running thence through the middle of Lake Michigan to a point opposite the main channel of Green bay; thence through that channel and the bay to the mouth of the Menomonee river; thence up that stream to its head, which is nearest the lake of the Desert; thence to the middle of that lake; thence down the Montreal river to its mouth; thence with a direct line across Lake Superior to where the territorial line of the United States last touches the lake northwest; thence on the north, with the territorial line, to the White Earth river; on the west by a line drawn down the middle of the main channel of that stream to the Missouri river, and down the middle of the main channel of the last mentioned stream to the northwest corner of the State of Missouri; and thence with the boundaries of the States of Missouri and Illinois, as already fixed by act of congress, to the place or point of beginning. Its counties were Brown, Milwaukee, Iowa, Crawford, Dubuque, and Des Moines, with a portion of Chippewa and Michilimackinac left unorganized. Although, at this time, the State of Michigan was only engaged, so to speak, to the Union, to include the two peninsulas (many of its citizens preferring in lieu thereof the lower one only, with a small slice off the northern boundary of the State of Ohio as now constituted), yet the marriage ceremony was performed, as has been stated, a few months afterward.

The act of congress establishing the Territorial government of Wisconsin was very full and complete. It first determined its boundaries; then it declared that all authority of the government of Michigan over the new Territory should cease on the fourth day of July, 1836, with a

proper reservation of rights in favor of the Indians. It provided for subsequently dividing the Territory into one or more, should congress deem it wise so to do. It also declared that the executive power and authority in and over the Territory should be vested in a governor, at the same time defining his powers. It provided for the appointment of a secretary, stating what his duties should be. The legislative power was vested in the governor and legislative assembly, the latter to consist of a council and house of representatives, answering respectively to the senate and assembly, as states are usually organized. There was a provision for taking the census of the several counties, and one giving the governor power to name the time, place, and manner of holding the first election, and to declare the number of members of the council and house of representatives to which each county should be entitled. He was also to determine where the first legislative assembly should meet, and a wise provision was that the latter should not be in session in any one year more than seventy-five days.

One section of the act declared who should be entitled to vote and hold office; another defined the extent of the powers of the legislature, and a third provided that all laws should be submitted to congress for their approval or rejection. There was a section designating what offices should be elective and what ones should be filled by the governor. There were others regulating the judiciary for the Territory and declaring what offices should be appointed by the United States, providing for their taking the proper oaths of office and regulating their salaries. One, perhaps the most important of all, declared that the Territory should be entitled to and enjoy all the rights, privileges, and advantages granted by the celebrated ordinance of 1787. There was also a provision for the election of a delegate to the house of representatives of the United States; and a declaration that all suits and indictments pending in the old courts should be continued in the new ones. Five thousand dollars were appropriated for a library for the accommodation of the legislative assembly of the Territory and of its supreme court.

For the new Territory, Henry Dodge was, on the 30th of April, 1836, by Andrew Jackson, then President of the United States, commissioned governor. John S. Horner was commissioned secretary; Charles Dunn, chief justice; David Irvin and William C. Frazer, associate judges; W. W. Chapman, attorney, and Francis Gehon, marshal. The machinery of a territorial government was thus formed, which was set in motion by these officers taking the prescribed oath of office. The next important step to be taken was to organize the Territorial legislature. The provisions of the organic act relative to the enumeration of the population of the Territory were that previously to the first election, the governor should cause the census of the inhabitants of the several counties to be taken by the several sheriffs, and that the latter should make returns of the same to the Executive. These figures gave to Des Moines county, 6,257; Iowa county, 5,234; Dubuque county, 4,274; Milwaukee county, 2,893; Brown county, 2,706; Crawford county, 850. The entire population, therefore, of Wisconsin Territory in the summer of 1836, as given by the first census was, in precise numbers, twenty-two thousand two hundred and fourteen, of which the two counties west of the Mississippi furnished nearly one half. The apportionment, after the census had been taken, made by the governor, gave to the different counties thirteen councilmen and twenty-six representatives. Brown county got two councilmen and three representatives; Crawford, two representatives, but no councilmen; Milwaukee, two councilmen and three representatives; Iowa, Dubuque and Des Moines, each three councilmen; but of representatives, Iowa got six; Dubuque, five, and Des Moines, seven. The election was held on the tenth of October, 1836, exciting considerable interest, growing out, chiefly, of local considerations. The permanent location of the capital, the division of counties, and the location of county seats, were the principal questions influencing the voters. There were elected from the county of Brown, Henry S. Baird and John P. Arndt, members of the council; Ebenezer Childs, Albert

G. Ellis and Alexander J. Irwin, members of the house of representatives; from Milwaukee, the councilmen were Gilbert Knapp and Alanson Sweet; representatives, William B. Sheldon, Madison W. Cornwall and Charles Durkee: from Iowa, councilmen, Ebenezer Brigham, John B. Terry and James R. Vineyard; representatives, William Boyles, G. F. Smith, D. M. Parkinson, Thomas McKnight, T. Shanley and J. P. Cox: from Dubuque, councilmen, John Foley, Thomas McCraney and Thomas McKnight; representatives, Loring Wheeler, Hardin Nowlin, Hosea T. Camp, P. H. Engle and Patrick Quigley: from Des Moines, councilmen, Jeremiah Smith, Jr., Joseph B. Teas and Arthur B. Inghram; representatives, Isaac Leffler, Thomas Blair, Warren L. Jenkins, John Box, George W. Teas, Eli Reynolds and David R. Chance: from Crawford, representatives, James H. Lockwood and James B. Dallam.

Belmont, in the present county of LaFayette, then in Iowa county, was, by the governor, appointed the place for the meeting of the legislature; he also fixed the time—the twenty-fifth of October. A quorum was in attendance in both branches at the time decided upon for their assembling, and the two houses were speedily organized by the election of Peter Hill Fagle, of Dubuque, speaker of the house, and Henry S. Baird, of Brown, president of the council. Each of the separate divisions of the government—the executive, the judicial, and the legislative—was now in working order, except that it remained for the legislature to divide the Territory into judicial districts, and make an assignment of the judges; and for the governor to appoint a Territorial treasurer, auditor and attorney general. The act of congress establishing the Territory required that it should be divided into three judicial districts. The counties of Crawford and Iowa were constituted by the legislature the first district, to which was assigned Chief Justice Dunn. The second district was composed of the counties of Des Moines and Dubuque; to it was assigned Associate Judge Irvin. The third district was formed of the counties of Brown and Milwaukee, to which was assigned Associate Judge Frazer.

Governor Dodge, in his first message to the Territorial legislature, directed attention to the necessity for defining the jurisdiction and powers of the several courts, and recommended that congress should be memorialized to extend the right of pre-emption to actual settlers upon the public lands and to miners on mineral lands; also, to remove the obstructions in the rapids of the Upper Mississippi, to construct harbors and light-houses on Lake Michigan, to improve the navigation of Fox river and to survey the same from its mouth to Fort Winnebago, to increase the amount of lands granted to the Territory for school purposes, and to organize and arm the militia for the protection of the frontier settlements. The first act passed by the legislature was one privileging members from arrest in certain cases and conferring on themselves power to punish parties for contempt. The second one established the three judicial districts and assigned the judges thereto. One was passed to borrow money to defray the expenses of the session; others protecting all lands donated to the Territory by the United States in aid of schools, and creating a common school fund. A memorial to congress was adopted requesting authorization to sell the school-section in each township, and appropriate the money arising therefrom for increasing the fund for schools.

During this session, five counties were "set off" west of the Mississippi river: Lee, Van Buren, Henry, Louisa, Muscatine, and Cook; and fifteen east of that stream: Walworth, Racine, Jefferson, Dane, Portage, Dodge, Washington, Sheboygan, Fond du Lac, Calumet, Manitowoc, Marquette, Rock, Grant and Green.

The principal question agitating the legislature at its first session was the location of the capital. Already the people west of the Mississippi were speculating upon the establishment of a Territory on that side the river, prospects for which would be enhanced evidently, by placing the seat of government somewhat in a central position east of that stream, for Wisconsin

Territory. Now, as Madison was a point answering such requirements she triumphed over all competitors; and the latter numbered a dozen or more—including, among others, Fond du Lac, Milwaukee, Racine, Belmont, Mineral Point, Green Bay, and Cassville. The struggle over this question was one of the most exciting ever witnessed in the Territorial legislature. Madison was fixed upon as the seat of government, but it was provided that sessions of the legislature should be held at Burlington, in Des Moines county, until the fourth of March, 1839, unless the public buildings in the new capital should be sooner completed. After an enactment that the legislature should thereafter meet on the first Monday of November of each year, both houses, on the ninth day of December, 1836, adjourned *sine die*.

In the act of congress establishing the Territory of Wisconsin it was provided that a delegate to the house of representatives of the United States, to serve for the term of two years, should be elected by the voters qualified to elect members of the legislative assembly; and that the first election should be held at such time and place or places, and be conducted in such manner as the governor of the Territory should appoint and direct. In pursuance of this enactment, Governor Dodge directed that the election for delegate should be at the time and places appointed for the election of members of the legislative assembly—the 10th of October, 1836. The successful candidate for that office was George W. Jones, of Sinsinawa Mound, Iowa county—in that portion which was afterward “set off” as Grant county. Jones, under the act of 1819, had been elected a delegate for Michigan Territory, in October, 1835, and took his seat at the ensuing session, in December of that year. By the act of June 15, 1836, the constitution and State government which the people of Michigan had formed for themselves was accepted, ratified and confirmed, and she was declared to be one of the United States of America, so that the term of two years for which Jones had been elected was cut short, as, in the nature of the case, his term could not survive the existence of the Territory he represented. But, as he was a candidate for election to represent the new Territory of Wisconsin in congress, as a delegate, and was successful, he took his seat at the commencement of the second session of the twenty-fourth congress—December 12, 1836, notwithstanding he had been elected only a little over two months.

The first term of the supreme court of the Territory was held at Belmont on the 8th day of December. There were present, Charles Dunn, chief justice, and David Irvin, associate judge. John Catlin was appointed clerk, and Henry S. Baird having previously been commissioned attorney general for the Territory by Governor Dodge, appeared before the court and took the oath of office. Causes in which the United States was party or interested were looked after by the United States attorney, who received his appointment from the president; while all cases in which the Territory was interested was attended to by the attorney general, whose commission was signed by the governor. The appointing of a crier and reporter and the admission of several attorneys to practice, completed the business for the term. The annual term appointed for the third Monday of July of the following year, at Madison, was not held; as no business for the action of the court had matured.

At the time of the complete organization of the Territory of Wisconsin, when the whole machinery had been put fairly in motion; when its first legislature at its first session had, after passing forty-two laws and three joint resolutions, in forty-six days, adjourned;—at this time, the entire portion west of the Mississippi had, in round numbers, a population of only eleven thousand; while the sparsely settled mineral region, the military establishments—Fort Crawford, Fort Winnebago, and Fort Howard—and the settlements at or near them, with the village of Milwaukee, constituted about all there was of the Territory east of that river, aggregating about twelve thousand inhabitants. There was no land in market, except a narrow strip along

the shore of Lake Michigan, and in the vicinity of Green bay. The residue of the country south and east of the Wisconsin and Fox rivers was open only to preëmption by actual settlers. The Indian tribes still claimed a large portion of the lands. On the north and as far west as the Red river of the north were located the Chippewas. The southern limits of their possessions were defined by a line drawn from a point on that stream in about latitude $46^{\circ} 30'$ in a southeasterly direction to the head of Lake St. Croix; thence in the same general direction to what is now Stevens Point, in the present Portage county, Wisconsin; thence nearly east to Wolf river; and thence in a direction nearly northeast to the Menomonee river. The whole country bounded by the Red river and Mississippi on the east; the parallel of about 43° of latitude on the south; the Missouri and White Earth river on the west; and the Territorial line on the north, was occupied by the Sioux. In the southwest part of the Territory, lying mostly south of latitude 43° — in the country reaching to the Missouri State boundary line south, and to the Missouri river west — were the homes of the Pottawattamies, the Iowas, and the Sacs and Foxes. Between the Wisconsin river and the Mississippi, and extending north to the south line of the Chippewas was the territory of the Winnebagoes. East of the Winnebagoes in the country north of the Fox river of Green bay were located the Menomonees, their lands extending to Wolf river. Such was the general outline of Indian occupancy in Wisconsin Territory at its organization. A portion of the country east of Wolf river and north of Green bay and the Fox river; the whole of the area lying south of Green bay, Fox river and the Wisconsin; and a strip of territory immediately west of the Mississippi, about fifty miles in width, and extending from the Missouri State line as far north as the northern boundary of the present State of Iowa, constituted the whole extent of country over which the Indians had no claim.

The second session of the first legislative assembly of the Territory began at Burlington, now the county seat of Des Moines county, Iowa, on the 6th of November, 1837. The governor, in his message, recommended a codification of the laws, the organization of the militia, and other measures of interest to the people. An act was passed providing for taking another census, and one abolishing imprisonment for debt. By a joint resolution, congress was urged to make an appropriation of twenty thousand dollars in money, and two townships of land for a "University of the Territory of Wisconsin." The money was not appropriated, but the land was granted — forty-six thousand and eighty acres. This was the fundamental endowment of the present State university, at Madison. A bill was also passed to regulate the sale of school lands, and to prepare for organizing, regulating and perfecting schools. Another act, which passed the legislature at this session, proved an apple of discord to the people of the Territory. The measure was intended to provide ways and means whereby to connect, by canals and slack-water, the waters of Lake Michigan with those of the Mississippi, by way of Rock river, the Catfish, the four lakes and the Wisconsin, by the incorporation of the Milwaukee and Rock river canal company. This company was given authority to apply to congress for an appropriation in money or lands to aid in the construction of the work, which was to have its eastern outlet in the Milwaukee river, and to unite at its western terminus with Rock river, near the present village of Jefferson, in Jefferson county. The result was that a grant of land of odd-numbered sections in a strip of territory five miles on each side of the line of the proposed canal was secured, and in July, 1839, over forty thousand acres were sold at the minimum price of two dollars and fifty cents per acre. However, owing mainly to the fact that purchasers were compelled to pay double the government price for their lands — owing also to the circumstance of an antagonism growing up between the officers of the canal company and the Territorial officers intrusted with the disposition of the lands, and to conflicts between the beneficiaries of

the grant and some of the leading politicians of the time—the whole scheme proved a curse and a blight rather than a blessing, and eventuating, of course, in the total failure of the project. There had been much Territorial and State legislation concerning the matter; but very little work, meanwhile, was done on the canal. It is only within the year 1875 that an apparent quietus has been given to the subject, and legislative enactments forever put at rest.

Fourteen counties were set off during this session of the legislature at Burlington—all west of the Mississippi. They were Benton, Buchanan, Cedar, Clinton, Delaware, Fayette, Jackson, Johnson, Jones, Keokuk, Linn, Slaughter, Scott and Clayton. One hundred and five acts and twenty joint resolutions were passed. On the 20th of January, 1838, both houses adjourned until the second Monday of June following.

The census of the Territory having been taken in May, the special session of the first legislature commenced on the eleventh of June, 1838, at Burlington, pursuant to adjournment, mainly for the purpose of making a new apportionment of members of the house. This was effected by giving twelve members to the counties east of the Mississippi, and fourteen to those west of that stream, to be contingent, however, upon the division of the Territory, which measure was not only then before congress, but had been actually passed by that body, though unknown to the Territorial legislature. The law made it incumbent on the governor, in the event of the Territory being divided before the next general election, to make an apportionment for the part remaining,—enacting that the one made by the act of the legislature should, in that case, have no effect. Having provided that the next session should be held at Madison, the legislative body adjourned *sine die* on the twenty-fifth of June, 1838, the public buildings at the new capital having been put under contract in April, previous. Up to this time, the officers of the Territory at large, appointed by the president of the United States at its organization, had remained unchanged, except that the secretary, John S. Horner, had been removed and his place given to William B. Slaughter, by appointment, dated February 16, 1837. Now there were two other changes made. On the nineteenth of June, Edward James was commissioned marshal, and on the fifth of July, Moses M. Strong was commissioned attorney of the United States for the Territory. By an act of congress, approved June 12, 1838, to divide the Territory of Wisconsin, and to establish a Territorial government west of the Mississippi, it was provided that from and after the third day of July following, all that part of Wisconsin Territory lying west of that river and west of a line drawn due north from its headwaters or sources to the Territorial line, for the purposes of a Territorial government should be set apart and known by the name of Iowa. It was further enacted that the Territory of Wisconsin should thereafter extend westward only to the Mississippi. It will be seen therefore that all that portion of the present State of Minnesota, extending eastward from the Mississippi to the St. Croix and northward to the United States boundary line, was then a part of Wisconsin Territory, even after the organization of the Territory of Iowa. The census taken in May, just previous to the passage of this act, gave a total population to the several counties of the Territory, east of the Mississippi, of 18,149.

On the third Monday of July, 1838, the annual terms of the supreme court—the first one after the re-organization of the Territory of Wisconsin—was held at Madison. There were present Chief Justice Dunn and Associate Judge Frazer. After admitting five attorneys to practice, hearing several motions, and granting several rules, the court adjourned. All the terms of the Supreme Court thereafter were held at Madison.

At an election held in the Territory on the tenth day of September, 1838, James Duane Doty received the highest number of votes for the office of delegate to congress, and was declared by Governor Dodge duly elected, by a certificate of election, issued on the twenty-seventh day of October following. Upon the commencement of the third session of the twenty-fifth congress

on Monday, December 10, 1838, Isaac E. Crary, member from Michigan, announced to the chair of the house of representatives that Doty was in attendance as delegate from Wisconsin Territory, and moved that he be qualified. Jones, the former delegate, then rose and protested against Doty's right to the seat, claiming that his (Jones') term had not expired. The basis for his claim was that under the act of 1817, a delegate must be elected only for one congress, and not for parts of two congressional terms; that his term as a delegate from Wisconsin did not commence until the fourth of March, 1837, and consequently would not expire until the fourth of March, 1839. The subject was finally referred to the committee of elections. This committee, on the fourteenth of January, 1839, reported in favor of Doty's right to his seat as delegate, submitting a resolution to that effect which passed the house by a vote of one hundred and sixty-five to twenty-five. Whereupon Doty was qualified as delegate from Wisconsin Territory, and took his seat at the date last mentioned.

On the 8th of November, Andrew G. Miller was appointed by Martin Van Buren, then president of the United States, associate judge of the supreme court, to succeed Judge Frazer, who died at Milwaukee, on the 18th of October. During this year, Moses M. Strong succeeded W. W. Chapman as United States attorney for the Territory.

On the 26th day of November, 1838, the legislature of the re-organized Territory of Wisconsin—being the first session of the second legislative assembly—met at Madison. Governor Dodge, in his message, recommended an investigation of the banks then in operation, memorializing congress for a grant of lands for the improvement of the Fox river of Green bay and the Wisconsin; the revision of the laws; the division of the Territory into judicial districts; the justice of granting to all miners who have obtained the ownership of mineral grounds under the regulations of the superintendent of the United States lead mines, either by discovery or purchase, the right of pre-emption; and the improvement of the harbors on Lake Michigan.

The attention of this Legislature was directed to the mode in which the commissioners of public buildings had discharged their duties. There was an investigation of the three banks then in operation in the Territory—one at Green Bay, one at Mineral Point, and the other at Milwaukee. A plan, also, for the revision of the laws of the Territory was considered. A new assignment was made for the holding of district courts. Chief Justice Dunn was assigned to the first district, composed of the counties of Iowa, Grant and Crawford; Judge Irvin to the second, composed of the counties of Dane, Jefferson, Rock, Walworth and Green; while Judge Miller was assigned to the third district, composed of Milwaukee, Brown and Racine counties—including therein the unorganized counties of Washington and Dodge, which, for judicial purposes, were, when constituted by name and boundary, attached to Milwaukee county, and had so remained since that date. The legislature adjourned on the 22d of December, to meet again on the 21st of the following month. "Although," said the president of the council, upon the occasion of the adjournment, "but few acts of a general character have been passed, as the discussions and action of this body have been chiefly confined to bills of a local nature, and to the passage of memorials to the parent government in behalf of the great interests of the Territory; yet it is believed that the concurrent resolutions of the two houses authorizing a revision of the laws, is a measure of infinite importance to the true interests of the people, and to the credit and character of the Territory."

The census of the Territory having been taken during the year 1838, showed a population of 18,130, an increase in two years of 6,447.

The second session of the second legislative assembly commenced on the twenty-first day of January, 1839, agreeable to adjournment. The most important work was the revision of the laws which had been perfected during the recess, by the committee to whom the work was intrusted,

consisting of three members from each house: from the council, M. L. Martin, Marshall M. Strong, and James Collins; from the house of representatives, Edward V. Whiton, Augustus Story, and Barlow Shackelford. The act legalizing the revision, took effect on the fourth day of July following. The laws as revised, composed the principal part of those forming the Revised Statutes of 1839, a valuable volume for all classes in the territory—and especially so for the courts and lawyers—during the next ten years. The *sine die* adjournment of this legislature took place on the 11th of March, 1839.

On the 8th of March of this year, Henry Dodge, whose term for three years as governor was about to expire, was again commissioned by the president of the United States, as governor of the Territory of Wisconsin. At the July term of the supreme court, all the judges were present, and several cases were heard and decided. A seal for the court was also adopted. The attorney general of the Territory at this time was H. N. Wells, who had been commissioned by Governor Dodge, on the 30th of March previous, in place of H. S. Baird, resigned. Wells not being in attendance at this term of the court, Franklin J. Munger was appointed by the judge attorney general for that session. The clerk, John Collin having resigned, Simeon Mills was selected by the court to fill his place. From this time, the supreme court met annually, as provided by law, until Wisconsin became a State.

The next legislature assembled at Madison, on the second of December, 1839. This was the third session of the second legislative assembly of the Territory. The term for which members of the house were elected, would soon expire; it was therefore desirable that a new apportionment should be made. As the census would be taken the ensuing June, by the United States, it would be unnecessary for the Territory to make an additional enumeration. A short session was resolved upon, and then an adjournment until after the completion of the census. One of the subjects occupying largely the attention of the members, was the condition of the capitol, and the conduct of the commissioners intrusted with the money appropriated by congress to defray the cost of its construction. The legislature adjourned on the thirteenth of January, 1840, to meet again on the third of the ensuing August. The completion of the census showed a population for the Territory of thirty thousand seven hundred and forty-four, against eighteen thousand one hundred and thirty, two years previous. Upon the re-assembling of the legislature—which is known as the extra session of the second legislative assembly—at the time agreed upon, some changes were made in the apportionment of members to the house of representatives; the session lasted but a few days, a final adjournment taking place on the fourteenth of August, 1840. At the July term of the supreme court, Simeon Mills resigned the office of clerk, and La Fayette Kellogg was appointed in his place. Kellogg continued to hold the position until the state judiciary was organized. At the ensuing election, James Duane Doty was re-elected Territorial delegate, taking his seat for the first time under his second term, on the eighth day of December, 1840, at the commencement of the second session of the twenty-sixth congress.

The first session of the third legislative assembly commenced on the seventh of December, 1840, with all new members in the house except three. All had recently been elected under the new apportionment. Most of the session was devoted to the ordinary routine of legislation. There was, however, a departure, in the passage of two acts granting divorces, from the usual current of legislative proceedings in the Territory. There was, also, a very interesting contested election case between two members from Brown county. Such was the backwardness in regard to the building of the capitol, at this date, that a large majority of the members stood ready to remove the seat of government to some other place. However, as no particular point could be agreed upon, it remained at Madison. The legislature adjourned on the nineteenth of February,

1841, having continued a term of seventy-five days, the maximum time limited by the organic act.

Francis J. Dunn, appointed by Martin Van Buren, was commissioned in place of William B. Slaughter, as secretary of the Territory, on the 25th of January, 1841, but was himself superseded by the appointment of A. P. Field, on the 23d day of April following. On the 15th of March, Daniel Hugunin was commissioned as marshal in place of Edward James, and on the 27th of April, Thomas W. Sutherland succeeded Moses M. Strong as United States attorney for the Territory. On the 26th of June, Governor Dodge commissioned as attorney general of the Territory, M. M. Jackson. On the 13th of September following, Dodge was removed from office by John Tyler, then president of the United States, and James Duane Doty appointed in his place. The appointment of Doty, then the delegate of the Territory in congress, by the president of the United States as governor, and the consequent resignation of the latter of his seat in the house of representatives, caused a vacancy which was filled by the election of Henry Dodge to that office, on the 27th of September, 1841; so that Doty and Dodge changed places. Dodge took his seat for the first time, at the commencement of the second session of the twenty-fifth congress—Monday, December 7, 1841.

About this time, the Milwaukee and Rock river canal imbroglio broke out afresh. The loan agent appointed by the governor to negotiate a loan of one hundred thousand dollars for the work, reported that he had negotiated fifty-six thousand dollars of bonds, which had been issued; but he did not report what kind of money was to be received for them. Now, the canal commissioners claimed that it was their right and duty not to recognize any loan which was to be paid in such currency as they disapproved of. This dispute defeated the loan, and stopped all work on the canal. During the year 1841, Thomas W. Sutherland succeeded Moses M. Strong as United States attorney. The second session of the third legislative assembly began at Madison, on the sixth of December, 1841. Governor Doty, in his message to that body, boldly avowed the doctrine that no law of the Territory was effective, until expressly approved by congress. "The act," said he, "establishing the government of Wisconsin, in the third section, requires the secretary of the Territory to transmit annually, on or before the first Monday in December, 'two copies of the laws to the speaker of the house of representatives, for the use of congress.' The sixth section provides that 'all laws of the governor and legislative assembly shall be submitted to, and, if disapproved by the congress of the United States, the same shall be null and of no effect.'" "These provisions," he added, "it seems to me, require the laws to be actually submitted to congress before they take effect. They change the law by which this country was governed while it was a part of Michigan. That law provided that the laws should be reported to congress, and that they should 'be in force in the district until the organization of the general assembly therein, unless disapproved of by congress.'" The governor concluded in these words: "The opinion of my predecessor, which was expressed to the first legislature assembled after the organization of this government, in his message delivered at Belmont on the twenty-sixth day of October, 1836, fully sustains this view of the subject which I have presented. He said: 'We have convened under an act of congress of the United States establishing the Territorial government of Wisconsin, for the purpose of enacting such laws as may be required for the government of the people of this Territory, after their approval by congress.'" This construction of the organic act resulted in a lengthy warfare between the governor and the legislative assembly.

At this session, the Milwaukee and Rock river canal again raised a tumult. "Congress had made a valuable grant of land to the Territory in trust. The Territory was the trustee; the canal company the *cestui que trust*. The trust had been accepted, and a large portion of the lands had been sold, one tenth of the purchase money received, and ample securities held

for the balance." The Territory now, by its legislature, repealed all the laws authorizing a loan, and all which contemplated the expenditure of any money on its part in constructing the canal. The legislature resolved that all connection ought to be dissolved, and the work on the canal by the Territory abandoned, and that the latter ought not further to execute the trust. They resolved also that the congress be requested to divert the grant to such other internal improvements as should be designated by the Territory, subject to the approval of congress; and that, if the latter should decline to make this diversion, it was requested to take back the grant, and dispose of the unsold lands. On the eleventh of February, 1842, a tragedy was enacted in the legislative council, causing great excitement over the whole Territory. On that day, Charles C. P. Arndt, a member from Brown county, was, while that body was in session, shot dead by James R. Vineyard, a member from Grant county. The difficulty grew out of a debate on motion to lay on the table the nomination of Enos S. Baker to the office of sheriff of Grant county. Immediately before adjournment of the council, the parties who had come together, after loud and angry words had been spoken, were separated by the by-standers. When an adjournment had been announced, they met again; whereupon Arndt struck at Vineyard. The latter then drew a pistol and shot Arndt. He died in a few moments. Vineyard immediately surrendered himself to the sheriff of the county, waived an examination, and was committed to jail. After a short confinement, he was brought before the chief justice of the Territory, on a writ of *habeas corpus*, and admitted to bail. He was afterward indicted for manslaughter, was tried and acquitted. Three days after shooting Arndt, Vineyard sent in his resignation as member of the council. That body refused to receive it, or to have it read even; but at once expelled him. The second and last session of the third legislative assembly came to a close on the eighteenth of February, 1842.

The first session of the fourth legislative assembly commenced on the fifth day of December, 1842. The members had been elected under a new apportionment based upon a census taken in the previous June, which showed a total population for the Territory of forty-six thousand six hundred and seventy-eight—an increase of nearly ten thousand in two years. A political count showed a decided democratic majority in each house. Governor Doty's political proclivities were with the whig party. The contest between him and the legislature now assumed a serious character. He refused to "hold converse" with it, for the reason that, in his opinion, no appropriation had been made by congress to defray the expenses of the session, and, as a consequence, none could be held. The legislature made a representation to congress, then in session, of the objections of the governor, and adjourned on the tenth of December, to meet again on the thirteenth of January, 1843. It was not until the fourth of February following that a quorum in both houses had assembled, when the legislature, through a joint committee, waited on the governor, and informed him that they had again met according to adjournment, and were then ready to proceed to business. Previous to this time, congress had made an appropriation to cover the expenses of the legislature now in session, which it was supposed would remove all conflict about its legality. But the governor had, on the thirtieth day of January previous, issued a proclamation, convening a special session of the legislature on the sixth of March, and still refused to recognize the present one as legal. Both houses then adjourned to the day fixed by the executive. A final adjournment took place on the seventeenth of April following.

The term of two years for which Henry Dodge was elected as delegate, having expired at the close of the third session of the twenty-seventh congress, he was, on the twenty-fifth of September, 1843, re-elected, taking his seat for the first time on his second term at the commencement of the first session of the twenty-eighth congress, Monday, December 4, 1843. On the thirtieth of October of this year, George Floyd was commissioned by President Tyler as

WILLIAM A. BARSTOW.
(DECEASED)
EX GOVERNOR OF WISCONSIN.

secretary of the Territory, in place of A. P. Field.

The second session of the fourth legislative assembly of the Territory, commencing on the fourth of December, 1843, and terminating on the thirty-first of January, 1844—a period of fifty-nine days—accomplished but little worthy of especial mention, except the submission of the question of the formation of a State government to a vote of the people, to be taken at the general election to be held in September following. The proposition did not succeed at the ballot-box. The third session of the fourth legislative assembly did not commence until the sixth of January, 1845, as the time had been changed to the first Monday in that month for annual meetings. Governor Doty having persisted in spelling Wisconsin with a “k” and an “a”—*Wis-konsan*—and some of the people having adopted his method, it was thought by this legislature a matter of sufficient importance to be checked. So, by a joint resolution, the orthography—*Wisconsin*—employed in the organic act, was adopted as the true one for the Territory, and has ever since been used. Before the commencement of this session Doty's term of office had expired. He was superseded as governor of the Territory by N. P. Tallmadge, the latter having been appointed on the twenty-first of June, 1844. On the thirty-first of August, Charles M. Prevost was appointed marshal of the Territory, in place of Daniel Hugunin. There was the utmost harmony between Governor Tallmadge and the legislature of the Territory at its session in 1845.

His message, which was delivered to the two houses in person, on the seventeenth of January, was well received. Among other items of interest to which he called the attention of the legislative assembly, was one concerning the construction of a railroad to connect Lake Michigan with the Mississippi. “The interests of the Territory,” said he, “seem imperiously to demand the construction of a railroad, or other communication, from some suitable point on Lake Michigan to the Mississippi river. Much difference of opinion seems to exist as to what it shall be, and how it is to be accomplished. There is a general impression,” continued the governor, “that the construction of the Milwaukee and Rock river canal, which was intended to connect those waters, is abandoned. It remains to be seen what shall be substituted for it.” The session terminated on the twenty-fourth of February, 1845.

James K. Polk having been inaugurated president of the United States on the fourth of March, 1845, Henry Dodge was again put into the gubernatorial chair of the Territory, receiving his appointment on the eighth of April, 1845. Other changes were made by the president during the same year, John B. Rockwell being, on the fourteenth of March, appointed marshal, and W. P. Lynde, on the fourteenth of July, United States attorney for the Territory, Governor Tallmadge, on the twenty-second of January of this year, having commissioned the latter also as attorney general. On the twenty-second of September, Morgan L. Martin was elected delegate to the twenty-ninth congress, as the successor of Henry Dodge.

The fourth and last session of the fourth legislative assembly was organized on the fifth of January, 1846. This session, although a short one, proved very important. Preliminary steps were taken for the formation of a State government. The first Tuesday in April next succeeding was the day fixed upon for the people to vote for or against the proposition. When taken it resulted in a large majority voting in favor of the measure. An act was passed providing for taking the census of the Territory, and for the apportionment by the governor of delegates to form a State constitution, based upon the new enumeration. The delegates were to be elected on the first Monday in September, and the convention was to assemble on the first Monday in October, 1846. The constitution when formed was to be submitted to the vote of the people for adoption or rejection, as, at the close of the session, the terms of members of the council who had been elected for four years, and of the house, who had been elected for two years, all ended. The legislature

re-organized the election districts, and conferred on the governor the power and duty of making an apportionment, based on the census to be taken, for the next legislative assembly, when, on the third of February, 1846, both houses adjourned *sine die*. On the twenty-second of January, Governor Dodge appointed A. Hyatt Smith attorney general of the Territory. On the twenty-fourth of February, John Catlin was appointed Territorial secretary by the president. •

The census taken in the following June showed a population for the Territory of one hundred and fifty-five thousand two hundred and seventy-seven. Delegates having been elected to form a constitution for the proposed new State, met at Madison on the fifth day of October. After completing their labors, they adjourned. This event took place on the sixteenth of December, 1846. The constitution thus formed was submitted to a popular vote on the first Tuesday of April, 1847, and rejected. The first session of the fifth legislative assembly commenced on the fourth of January of that year. But little was done. Both houses finally adjourned on the eleventh of February, 1847. John H. Tweedy was elected as the successor of Morgan L. Martin, delegate to the thirtieth congress, on the sixth of September following. On the twenty-seventh of that month, Governor Dodge issued a proclamation for a special session of the legislature, to commence on the eighteenth of the ensuing month, to take action concerning the admission of Wisconsin into the Union. The two houses assembled on the day named in the proclamation, and a law was passed for the holding of another convention to frame a constitution; when, after nine days' labor, they adjourned. Delegates to the new convention were elected on the last Monday of November, and that body met at Madison on the fifteenth of December, 1847. A census of the Territory was taken this year, which showed a population of two hundred and ten thousand five hundred and forty-six. The result of the labors of the second constitutional convention was the formation of a constitution, which, being submitted to the people on the second Monday of March, 1848, was duly ratified.

The second and last session of the fifth legislative assembly—the last legislative assembly of Wisconsin Territory—commenced on the seventh of February, 1848, and adjourned *sine die* on the thirteenth of March following. On the twentieth of the same month, J. H. Tweedy, delegate from Wisconsin, introduced a bill in congress for its admission into the Union. The bill was finally passed; and on the twenty-ninth of May, 1848, Wisconsin became a State. There had been seventeen sessions of the legislative assembly of the Territory, of an average duration of forty days each: the longest one lasted seventy-six days; the shortest, ten days. So long as the Territory had an existence, the apportionment of thirteen members for the council, and twenty-six for the house of representatives, was continued, as provided in the organic act. There had been, besides those previously mentioned, nine additional counties “set off” by the legislative assembly of the Territory, so that they now numbered in all twenty-eight: Milwaukee, Waukesha, Jefferson, Racine, Walworth, Rock, Green, Washington, Sheboygan, Manitowoc, Calumet, Brown, Winnebago, Fond du Lac, Marquette, Sauk, Portage, Columbia, Dodge, Dane, Iowa, La Fayette, Grant, Richland, Crawford, Chippewa, St. Croix, and La Pointe.

V.—WISCONSIN AS A STATE.

FIRST ADMINISTRATION. — NELSON DEWEY, GOVERNOR—1848, 1849.

The boundaries prescribed in the act of congress, entitled “An Act to enable the people of Wisconsin Territory to form a Constitution and State Government, and for the admission of such State into the Union,” approved August 6, 1846, were accepted by the convention which formed the constitution of Wisconsin, and are described in that instrument as “beginning at the north-east corner of the State of Illinois—that is to say, at a point in the center of Lake Michigan

where the line of forty-two degrees and thirty minutes of north latitude crosses the same; thence running with the boundary line of the State of Michigan, through Lake Michigan [and] Green bay to the mouth of the Menomonee river; thence up the channel of the said river to the Brule river; thence up said last mentioned river to Lake Brule; thence along the southern shore of Lake Brule, in a direct line to the center of the channel between Middle and South islands, in the Lake of the Desert; thence in a direct line to the head waters of the Montreal river, as marked upon the survey made by Captain Cram; thence down the main channel of the Montreal river to the middle of Lake Superior; thence through the center of Lake Superior to the mouth of the St. Louis river; thence up the main channel of said river to the first rapids in the same, above the Indian village, according to Nicollett's map; thence due south to the main branch of the River St. Croix; thence down the main channel of said river to the Mississippi; thence down the center of the main channel of that river to the northwest corner of the State of Illinois; thence due east with the northern boundary of the State of Illinois to the place of beginning." The territory included within these lines constitutes the STATE OF WISCONSIN, familiarly known as the "Badger State." All that portion of Wisconsin Territory, as formerly constituted, lying west of so much of the above mentioned boundary as extends from the middle of Lake Superior to the mouth of the St. Croix river, not being included in Wisconsin, the limits of the State are, of course, not identical with those of the Territory as they previously existed.

The State of Wisconsin, thus bounded, is situated between the parallel of forty-two degrees thirty minutes and that of forty-seven degrees, north latitude, and between the eighty-seventh and ninety-third degrees west longitude, nearly. For a portion of its northern border it has Lake Superior, the largest body of fresh water in the world; for a part of its eastern boundary it has Lake Michigan, almost equal in size to Lake Superior; while the Mississippi, the largest river in the world but one, forms a large portion of its western boundary. The State of Michigan lies on the east; Illinois on the south; Iowa and Minnesota on the west. Wisconsin has an average length of about two hundred and sixty miles; an average breadth of two hundred and fifteen miles.

The constitution of Wisconsin, adopted by the people on the second Monday of March, 1848, provided for the election of a governor, lieutenant governor, secretary of state, treasurer, attorney general, members of the State legislature, and members of congress, on the second Monday of the ensuing May. On that day—the 8th of the month—the election was held, which resulted in the choice of Nelson Dewey, for governor; John E. Holmes, for lieutenant governor; Thomas McHugh, for secretary of state; Jairus C. Fairchild, for state treasurer; and James S. Brown, for attorney general. The State was divided into nineteen senatorial, and sixty-six assembly districts, in each of which one member was elected; it was also divided into two congressional districts, in each of which one member of congress was elected—William Pitt Lynde in the first district, composed of the counties of Milwaukee, Waukesha, Jefferson, Racine, Walworth, Rock, and Green; Mason C. Darling, in the second district, composed of the counties of Washington, Sheboygan, Manitowoc, Calumet, Brown, Winnebago, Fond du Lac, Marquette, Sauk, Portage, Columbia, Dodge, Dane, Iowa, La Fayette, Grant, Richland, Crawford, Chippewa, St. Croix, and La Pointe—the counties of Richland, Chippewa and La Pointe being unorganized.

The first session of the legislature of Wisconsin commenced at Madison, the seat of government for the State, on Monday, the 5th day of June, 1848. Nicanor E. Whiteside was elected speaker of the assembly, and Henry Billings president of the senate, *pro tempore*. The democrats were largely in the majority in both houses. The legislature, in joint convention, on the 7th of June, canvassed, in accordance with the provisions of the constitution, the votes given on the 8th of May previous, for the State officers and the two representatives in congress. On the same

day, the governor, lieutenant governor, secretary of state, treasurer, and attorney general, were sworn into office in presence of both houses. All these officers, as well as the representatives in congress, were democrats. Dewey's majority over John H. Tweedy, whig, was five thousand and eighty-nine. William P. Lynde's majority in the first district, for congress, over Edward V. Whiton, whig, was two thousand four hundred and forty-seven. Mason C. Darling's majority in the second district, over Alexander L. Collins, whig, was two thousand eight hundred and forty-six. As the thirtieth congress, to which Lynde and Darling were elected would expire on the 4th of March, 1849, their terms of office would, of course, end on that day. The former took his seat on the 5th of June, the latter on the 9th of June, 1848.

The constitution vested the judicial power of the State in a supreme court, circuit courts, courts of probate, and in justices of the peace, giving the legislature power to vest such jurisdiction as should be deemed necessary in municipal courts; also, conferring upon it the power to establish inferior courts in the several counties, with limited civil and criminal jurisdiction. The State was divided into five judicial circuits; and judges were to be elected at a time to be provided for by the legislature at its first session. It was provided that there should be no election for a judge or judges, at any general election for State or county officers, nor within thirty days either before or after such election.

On the 8th of June, 1848, Governor Dewey delivered his first message to a joint convention of the two houses. It was clear, concise, and definite upon such subjects as, in his opinion demanded immediate attention. His views were generally regarded as sound and statesmanlike by the people of the State. "You have convened," said he, "under the provisions of the constitution of the State of Wisconsin, to perform as representatives of the people, the important duties contemplated by that instrument." "The first session of the legislature of a free people," continued the governor, "after assuming the political identity of a sovereign State, is an event of no ordinary character in its history, and will be fraught with consequences of the highest importance to its future welfare and prosperity. Wisconsin possesses the natural elements, fostered by the judicious system of legislation," the governor added, "to become one of the most populous and prosperous States of the American Union. With a soil unequaled in fertility, and productive of all the necessary comforts of life, rich in mineral wealth, with commercial advantages unsurpassed by any inland State, possessing extensive manufacturing facilities, with a salubrious climate, and peopled with a population enterprising, industrious, and intelligent, the course of the State of Wisconsin must be onward, until she ranks among the first of the States of the Great West. It is," concluded the speaker, "under the most favorable auspices that the State of Wisconsin has taken her position among the families of States. With a population numbering nearly one quarter of a million, and rapidly increasing, free from the incubus of a State debt, and rich in the return yielded as the reward of labor in all the branches of industrial pursuits, our State occupies an enviable position abroad, that is highly gratifying to the pride of our people." Governor Dewey then recommended a number of measures necessary, in his judgment, to be made upon changing from a Territorial to a State government.

The first important business of the legislature, was the election of two United States senators. The successful candidates were Henry Dodge and Isaac P. Walker, both democrats. Their election took place on the 8th of June, 1848, Dodge taking his seat in the senate on the 23d of June, and Walker on the 26th of June, 1848. The latter drew the short term; so that his office would expire on the 4th day of March, 1849, at the end of the thirtieth congress: Dodge drew the long term, his office to expire on the 4th day of March, 1851, at the end of the thirty-first congress. The residue of the session was taken up in passing such acts as were deemed necessary to put the machinery of the new State government, in all its branches, in fair

running order. One was passed providing for the annual meeting of the legislature, on the second Wednesday of January of each year; another prescribing the duties of State officers; one dividing the State into three congressional districts. The first district was composed of the counties of Milwaukee, Waukesha, Walworth, and Racine; the second, of the counties of Rock, Green, La Fayette, Grant, Dane, Iowa, Sauk, Richland, Crawford, Adams, Portage, Chippewa, La Pointe, and St. Croix; the third, of the counties of Washington, Sheboygan, Manitowoc, Brown, Winnebago, Calumet, Fond du Lac, Marquette, Dodge, Jefferson, and Columbia. Another act provided for the election of judges of the circuit courts, on the first Monday of August, 1848. By the same act, it was provided that the first term of the supreme court should be held in Madison on the second Monday of January, 1849, and thereafter at the same place on the same day, yearly; afterward changed so as to hold a January and June term in each year. An act was also passed providing for the election, and defining the duties of State superintendent of public instruction. That officer was to be elected at the general election to be holden in each year, his term of office to commence on the first Monday of January succeeding his election. Another act established a State university; another exempted a homestead from a forced sale; another provided for a revision of the statutes. The legislature, after a session of eighty-five days, adjourned *sine die* on the twenty-first of August, 1848.

The State, as previously stated, was divided into five judicial circuits: Edward V. Whiton being chosen judge at the election on the first Monday in August, 1848, of the first circuit, composed of the counties of Racine, Walworth, Rock, and Green, as then constituted; Levi Hubbell of the second, composed of Milwaukee, Waukesha, Jefferson, and Dane; Charles H. Larrabee, of the third, composed of Washington, Dodge, Columbia, Marquette, Sauk, and Portage, as then formed; Alexander W. Stow, of the fourth, composed of Brown, Manitowoc, Sheboygan, Fond du Lac, Winnebago, and Calumet; and Mortimer M. Jackson, of the fifth circuit, composed of the counties of Iowa, LaFayette, Grant, Crawford and St. Croix, as then organized; the county of Richland being attached to Iowa county; the county of Chippewa to the county of Crawford; and the county of LaPointe to the county of St. Croix, for judicial purposes.

In the ensuing Fall there was a presidential election. There were then three organized political parties in the State: whig, democratic, and free-soil—each of which had a ticket in the field. The democrats were in the majority, and their four electors cast their votes for Lewis Cass and William O. Butler. At this election, Eleazer Root was the successful candidate for State superintendent of public instruction. In his election party politics were not considered. There were also three members for the thirty-first congress chosen: Charles Durkee, to represent the first district; Orsamus Cole, the second; and James D. Doty, the third district. Durkee was a free-soiler; Cole, a whig; Doty, a democrat—with somewhat decided Doty proclivities.

The act of the legislature, exempting a homestead from forced sale of any debt or liability contracted after January 1, 1849, approved the twenty-ninth of July previous, and another act for a like exemption of certain personal property, approved August 10, 1848, were laws the most liberal in their nature passed by any State of the Union previous to those dates. It was prophesied that they would work wonderful changes in the business transactions of the new State—for the worse; but time passed, and their utility were soon evident: it was soon very generally acknowledged that proper exemption laws were highly beneficial—a real good to the greatest number of the citizens of a State.

So much of Wisconsin Territory as lay west of the St. Croix and the State boundary north of it, was, upon the admission of Wisconsin into the Union, left, for the time being, without a government—unless it was still “Wisconsin Territory.” Henry Dodge, upon being elected to the United States senate from Wisconsin, vacated, of course, the office of governor of this fraction. John H. Tweedy, delegate in congress at the time Wisconsin became a State, made a formal

resignation of his office, thus leaving the fractional Territory unrepresented. Thereupon John Catlin, secretary of the Territory of Wisconsin as a whole, and now claiming, by virtue of that office, to be acting governor of the fractional part, issued a proclamation as such officer for an election on the thirtieth of October, 1848, of a delegate in congress. Nearly four hundred votes were polled in the district, showing "Wisconsin Territory" still to have a population of not less than two thousand. H. H. Sibley was elected to that office. On the fifteenth of January, 1849, he was admitted to a seat as "delegate from Wisconsin Territory." This hastened the formation of the Territory of Minnesota—a bill for that purpose having become a law on the third of March, when "Wisconsin Territory" ceased finally to exist, being included in the new Territory.

The year 1848—the first year of the existence of Wisconsin as a State—was one of general prosperity to its rapidly increasing population. The National Government effected a treaty with the Menomonee Indians, by which their title was extinguished to the country north of the Fox river of Green bay, embracing all their lands in the State. This was an important acquisition, as it opened a large tract of country to civilization and settlement, which had been for a considerable time greatly desired by the people. The State government at the close of the year had been in existence long enough to demonstrate its successful operation. The electric telegraph had already reached the capital; and Wisconsin entered its second year upon a flood tide of prosperity.

Under the constitution, the circuit judges were also judges of the supreme court. An act of the legislature, approved June 29, 1848, providing for the election of judges, and for the classification and organization of the judiciary of the State, authorized the election, by the judges, of one of their number as chief justice. Judge Alexander W. Stow was chosen to that office, and, as chief justice, held, in conjunction with Associate Judges Whiton, Jackson, Larrabee, and Hubbell, the first session of the supreme court at Madison, commencing on the eighth day of January, 1849.

The second session of the State legislature commenced, according to law, on the tenth of January, 1849, Harrison C. Hobart being elected speaker of the assembly. Governor Dewey, in his message, sent to both houses on the 11th, referred to the rapidly increasing population of the State, and the indomitable energy displayed in the development of its productive capacity. He recommended the sale of the university lands on a long credit, the erection of a State prison, and the modification of certain laws. On the seventeenth of January, the two houses met in joint convention to elect an United States senator in place of Isaac P. Walker, who had drawn the short term. The democrats had a small majority on joint ballot. Walker was re-elected; this time, for a full term of six years, from the 4th of March, 1849. The legislature at this session passed many acts of public utility; some relating to the boundaries of counties; others, to the laying out of roads; eighteen, to the organization of towns. The courts were cared for; school districts were organized; special taxes were authorized, and an act passed relative to the sale and superintendence of the school and university lands, prescribing the powers and duties of the commissioners who were to have charge of the same. These commissioners, consisting of the secretary of state, treasurer of state, and attorney general, were not only put in charge of the school and university lands held by the State, but also of funds arising from the sale of them. This law has been many times amended and portions of it repealed. The lands at present subject to sale are classified as school lands, university lands, agricultural college lands, Marathon county lands, normal school lands, and drainage lands, and are subject to sale at private entry on terms fixed by law. Regulations concerning the apportionment and investment of trust funds are made by the commissioners in pursuance of law. All lands now the property of the State subject to sale, or that have been State lands and sold, were derived from the Gen-

eral Government. Lands owned by the State amount, at the present time, to about one and one half million acres.

A joint resolution passed the legislature on the 31st of March, 1849, instructing Isaac P. Walker to resign his seat as United States senator, for "presenting and voting for an amendment to the general appropriation bill, providing for a government in California and New Mexico, west of the Rio Grande, which did not contain a provision forever prohibiting the introduction of slavery or involuntary servitude" in those Territories. The senator refused to regard these instructions. The legislature adjourned on the second of April, 1849, after a session of eighty-three days.

In July, 1848, the legislature of Wisconsin elected M. Frank, Charles C. Jordan, and A. W. Randall, commissioners to collate and revise all the public acts of the State, of a general and permanent nature in force at the close of the session. Randall declining to act, Charles M. Baker was appointed by the governor in his place. The commissioners commenced their labors in August, 1848, and were engaged in the revision the greater part of the time until the close of the session of the legislature of 1849. It was found impossible for the revisers to conclude their labors within the time contemplated by the act authorizing their appointment; so a joint select committee of the two houses at their second session was appointed to assist in the work. The laws revised by this committee and by the commissioners, were submitted to, and approved by, the legislature. These laws, with a few passed by that body, which were introduced by individual members, formed the Revised Statutes of Wisconsin of 1849—a volume of over nine hundred pages.

At the general election held in November of this year, Dewey was re-elected governor. S. W. Beall was elected lieutenant governor; William A. Barstow, secretary of state; Jairus C. Fairchild was re-elected treasurer; S. Park Coon was elected attorney general; and Eleazer Root, re-elected superintendent of public instruction. All these officers were chosen as democrats, except Root, who ran as an independent candidate, the term of his office having been changed so as to continue two years from the first day of January next succeeding his election. By the revised statutes of 1849, all State officers elected for a full term went into office on the first of January next succeeding their election.

The year 1849 developed in an increased ratio the productive capacity of the State in every department of labor. The agriculturist, the artisan, the miner, reaped the well-earned reward of his honest labor. The commercial and manufacturing interests were extended in a manner highly creditable to the enterprise of the people. The educational interest of the State began to assume a more systematic organization. The tide of immigration suffered no decrease during the year. Within the limits of Wisconsin, the oppressed of other climes continued to find welcome and happy homes.

SECOND ADMINISTRATION.—NELSON DEWEY, GOVERNOR (SECOND TERM)—1850, 1851.

On the first day of January, 1850, Nelson Dewey took the oath of office, and quietly entered upon his duties as governor, for the second term. The third legislature convened on the ninth. Moses M. Strong was elected speaker of the assembly. Both houses had democratic majorities. Most of the business transacted was of a local character. By an act approved the fifth of February, the "January term" of the supreme court was changed to December. The legislature adjourned after a session of only thirty-four days. An act was passed organizing a sixth judicial circuit, from and after the first Monday in July, 1850, consisting of the counties of Crawford, Chippewa, Bad Axe, St. Croix and La Pointe, an election for judge to be holden on the same day. Wiram Knowlton was elected judge of that circuit.

The first charitable institution in Wisconsin, incorporated by the State, was the "Wisconsin Institute for the Education of the Blind." A school for that unfortunate class had been opened in Janesville, in the latter part of 1859, receiving its support from the citizens of that place and vicinity. By an act of the legislature, approved February 9, 1850; this school was taken under the care of the Institute, to continue and maintain it, at Janesville, and to qualify, as far as might be, the blind of the State for the enjoyment of the blessings of a free government; for obtaining the means of subsistence; and for the discharge of those duties, social and political, devolving upon American citizens. It has since been supported from the treasury of the State. On the seventh of October, 1850, it was opened for the reception of pupils, under the direction of a board of trustees, appointed by the governor. The Institute, at the present time, has three departments: in one is given instruction such as is usually taught in common schools; in another, musical training is imparted; in a third, broom-making is taught to the boys,—sewing, knitting and various kinds of fancy work to the girls, and seating cane-bottomed chairs to both boys and girls. On the thirteenth of April, 1874, the building of the Institute was destroyed by fire. A new building has since been erected.

The taking of the census by the United States, this year, showed a population for Wisconsin of over three hundred and five thousand—the astonishing increase in two years of nearly ninety-five thousand! In 1840, the population of Wisconsin Territory was only thirty thousand. This addition, in ten years, of two hundred and seventy-five thousand transcended all previous experience in the settlement of any portion of the New World, of the same extent of territory. It was the result of a steady and persistent flow of men and their families, seeking permanent homes in the young and rising State. Many were German, Scandinavian and Irish; but the larger proportion were, of course, from the Eastern and Middle States of the Union. The principal attractions of Wisconsin were the excellency and cheapness of its lands, its valuable mines of lead, its extensive forests of pine, and the unlimited water-power of its numerous streams.

By the Revised Statutes of 1849, Wisconsin was divided into three congressional districts—the second congressional apportionment—each of which was entitled to elect one representative in the congress of the United States. The counties of Milwaukee, Waukesha, Walworth and Racine constituted the first district; the counties of Rock, Green, La Fayette, Grant, Iowa, Dane, Sauk, Adams, Portage, Richland, Crawford, Chippewa, St. Croix and La Pointe, the second district; the counties of Washington, Sheboygan, Manitowoc, Brown, Winnebago, Calumet, Fond du Lac, Marquette, Columbia, Dodge and Jefferson, the third district. At the general election in the Autumn of this year, Charles Durkee, of the first district; Benjamin C. Eastman, of the second; and John B. Macy, of the third district, were elected to represent the State in the thirty-second congress of the United States. Durkee, it will be remembered, represented the same district in the previous congress: he ran the second time as an independent candidate. Eastman and Macy were elected upon democratic tickets. The General Government this year donated to the State all the swamp and overflowed lands within its boundaries.

The year 1850 to the agriculturist of Wisconsin was not one of unbounded prosperity, owing to the partial failure of the wheat crop. In the other branches of agriculture there were fair returns. The State was visited during the year by cholera; not, however, to a very alarming extent.

The fourth session of the legislature of the State commenced on the 8th of January, 1851. Frederick W. Horn was elected speaker of the assembly. The majority in the legislature was democratic. Governor Dewey, in his message, referred to the death of the president of the United States, Zachary Taylor; said that the treasury and finances of the State were in a

sound condition; and then adverted to many topics of interest and importance to the people of Wisconsin. It was an able document. One of the important measures of the session was the election of an United States senator, in the place of Henry Dodge, whose term of office would expire on the 4th of March, next ensuing. In joint convention of the legislature held on the 20th of January, Dodge was re-elected for a full term of six years. On the 22d, the governor approved a joint resolution of the legislature, rescinding not only so much of the joint resolution of the legislative assembly of Wisconsin, passed March 31, 1849, as censured Isaac J. Walker, but also the instructions in those resolutions relative to his resigning his seat in the senate of the United States.

Among the important bills passed at this session of the legislature was one providing for the location and erection of a State prison. Another one—the apportionment bill—was vetoed by the governor, and having been passed on the last day of the session, failed to become a law. The legislature adjourned on the eighteenth of March, 1851, after a session of seventy days.

On the 1st day of January, 1851, Timothy O. Howe took his seat as one of the associate judges of the supreme court, he having been elected judge of the fourth circuit in place of Alexander W. Stow. The office of chief justice of the supreme court, which had been filled by Judge Stow, therefore became vacant, and so remained until the commencement of the next term—June 18, 1851—when Levi Hubbell, judge of the second circuit, was, by the judges present, pursuant to the statute, elected to that office.

By an act of the legislature approved March 14, 1851, the location and erection of a State prison for Wisconsin was provided for—the point afterward determined upon as a suitable place for its establishment being Waupun, Dodge county. By a subsequent act, the prison was declared to be the general penitentiary and prison of the State for the reformation as well as for the punishment of offenders, in which were to be confined, employed at hard labor, and governed as provided for by the legislature, all offenders who might be committed and sentenced according to law, to the punishment of solitary imprisonment, or imprisonment therein at hard labor. The organization and management of this the first reformatory and penal State institution in Wisconsin, commenced and has been continued in accordance with the demands of an advanced civilization and an enlightened humanity.

On the 29th of September, 1851, Judge Hubbell was re-elected for the full term of six years as judge of the second judicial circuit, to commence January 1, 1852.

At the general election in November, 1851, Leonard J. Farwell was chosen governor; Timothy Burns, lieutenant governor; Charles D. Robinson, secretary of State; E. H. Janssen, State treasurer; E. Estabrook, attorney general; and Azel P. Ladd, superintendent of public instruction. All these officers were elected as democrats except Farwell, who ran as a whig; his majority over D. A. J. Upham, democrat, was a little rising of five hundred.

THIRD ADMINISTRATION.—L. J. FARWELL, GOVERNOR—1852—1853.

Governor Farwell's administration commenced on the fifth day of January, 1852. Previous to this—on the third day of the month—Edward V. Whiton was chosen by the judges of the supreme court, chief justice, to succeed Judge Hubbell. On the fourteenth of that month, the legislature assembled at Madison. This was the beginning of the fifth annual session. James McM. Shafter was elected speaker of the assembly. In the senate, the democrats had a majority; in the assembly, the whigs. The governor, in his message, recommended the memorializing of congress to cause the agricultural lands within the State to be surveyed and brought into market; to cause, also, the mineral lands to be surveyed and geologically examined, and offered for sale; and to make liberal appropriations for the improvement of rivers and harbors. The question of "bank or no bank" having been submitted to the people in November previous,

and decided in favor of banks, under the constitution, the power was thereby given to the legislature then in session to grant bank charters, or to pass a general banking law. Farwell recommended that necessary measures be taken to carry into effect this constitutional provision. A larger number of laws was passed at this session than at any previous one. By a provision of the constitution, the legislature was given power to provide by law, if they should think it expedient and necessary, for the organization of a separate supreme court, to consist of one chief justice and two associate justices, to be elected by the qualified electors of the State, at such time and in such manner as the legislature might provide. Under this authority, an act was passed at this session providing for the election of a chief justice and two associates, on the last Monday of the September following, to form a supreme court of the State, to supplant the old one, provision for the change being inserted in the constitution. There was also an act passed to apportion and district anew the members of the senate and assembly, by which the number was increased from eighty-five to one hundred and seven: twenty-five for the senate; eighty-two for the assembly. An act authorizing the business of banking passed the legislature and was approved by the governor, on the 19th of April. By this law, the office of bank-comptroller was created—the officer to be first appointed by the governor, and to hold his office until the first Monday in January, 1854. At the general election in the Fall of 1853, and every two years thereafter, the office was to be filled by vote of the people. Governor Farwell afterward, on the 20th of November, appointed James S. Baker to that office. The legislature adjourned on the nineteenth of April, 1852.

The second charitable institution incorporated by the State was the "Wisconsin Institute for the Education of the Deaf and Dumb." It was originally a private school for deaf mutes, near, and subsequently in, the village of Delavan, Walworth county. By an act of the legislature approved April 19, 1852, it was made the object and duty of the corporation to establish, continue and maintain this school for the education of the deaf and dumb, "at or near the village of Delavan, to qualify, as near as might be, that unfortunate class of persons for the enjoyment of the blessings of a free government, obtaining the means of subsistence, and the discharge of those duties, social and political, devolving upon American citizens." It has since been supported by annual appropriations made by the legislature. A complete organization of the school was effected in June, 1852, under the direction of a board of trustees appointed by the governor of the State. The institute has for its design the education of such children of the State as, on account of deafness, can not be instructed in common schools. Instruction is given by signs, by the manual alphabet, by written language, and to one class by articulation. Two trades are taught: cabinet-making and shoe-making.

During this year, considerable interest was manifested in the projecting of railroads. At the September election, E. V. Whiton was elected chief justice of the new supreme court and Samuel Crawford and Abram D. Smith associate justices. Under the law, the chief justice was to serve a term of four years from the first day of June next ensuing; while the two associates were to cast lots—one to serve for six years, the other for two years, from June 1, 1853. Crawford drew the short term—Smith the long term. At the subsequent general election for members to the thirty-third congress, Daniel Wells, Jr., was chosen from the first district, B. C. Eastman from the second: and J. B. Macy from the third district. All were democrats. A democratic electoral ticket was chosen at the same time. The electors cast their votes for Pierce and Butler.

During 1852, the citizens of Wisconsin enjoyed unusual prosperity in the ample products and remuneration of their industry and enterprise. Abundant harvests and high markets; an increase in moneyed circulation, and the downward tendency of the rates of interest; a prevailing confidence among business men and in business enterprises; a continual accession to the

population of the State by immigration; the energetic prosecution of internal improvements under the skillful management of companies; the extension of permanent agricultural improvements; and the rapid growth of the various cities and villages; were among the encouraging prospects of the year.

The sixth session of the Wisconsin legislature commenced on the twelfth of January, 1853. On the twenty-sixth of the same month, William K. Wilson, of Milwaukee, preferred charges in the assembly against Levi Hubbell, judge of the second judicial circuit of the State, of divers acts of corruption and malfeasance in the discharge of the duties of his office. A resolution followed appointing a committee to report articles of impeachment, directing the members thereof to go to the senate and impeach Hubbell. Upon the trial of the judge before the senate, he was acquitted. An act was passed to provide for the election of a State prison commissioner by the legislature at that session—to hold his office until the first day of the ensuing January. The office was then to be filled by popular vote at the general election in November, 1853—and afterwards biennially—the term of office to be two years from the first day of January next succeeding the election by the people. On the 28th of March, the legislature, in joint convention, elected John Taylor to that office. The legislature adjourned on the fourth day of April until the sixth of the following June, when it again met, and adjourned *sine die* on the thirteenth of July, both sessions aggregating one hundred and thirty-one days.

By an act of the legislature approved February 9, 1853, the "Wisconsin State Agricultural Society," which had been organized in March, 1851, was incorporated, its object being to promote and improve the condition of agriculture, horticulture, and the mechanical, manufacturing and household arts. It was soon after taken under the fostering care of the State by an appropriation made by the legislature, to be expended by the society in such manner as it might deem best calculated to promote the objects of its incorporation; State aid was continued down to the commencement of the rebellion. No help was extended during the war nor until 1873; since which time there has been realized annually from the State a sum commensurate with its most pressing needs. The society has printed seventeenvolumes of transactions and has held annually a State fair, except during the civil war. Besides these fairs, its most important work is the holding annually, at the capital of the State, a convention for the promotion of agriculture generally. The meetings are largely participated in by men representing the educational and industrial interests of Wisconsin.

By an act of the legislature approved March 4, 1853, the "State Historical Society of Wisconsin" was incorporated—having been previously organized—the object being to collect, embody, arrange and preserve in authentic form, a library of books, pamphlets, maps, charts, manuscripts, papers, paintings, statuary and other materials illustrative of the history of the State; to rescue from oblivion the memory of its early pioneers, and to obtain and preserve narratives of their exploits, perils, and hardy adventures; to exhibit faithfully the antiquities, and the past and present condition, and resources of Wisconsin. The society was also authorized to take proper steps to promote the study of history by lectures, and to diffuse and publish information relating to the description and history of the State. The legislature soon after took the society under its fostering care by voting a respectable sum for its benefit. Liberal State aid has been continued to the present time. The society, besides collecting a library of historical books and pamphlets the largest in the West, has published eight volumes of collections and a catalogue of four volumes. Its rooms are in the capitol at Madison, and none of its property can be alienated without the consent of the State. It has a valuable collection of painted portraits and bound newspaper files; and in its cabinet are to be found many prehistoric relics.

On the first day of June, 1853, the justices of the new supreme court went into office: Associate

Justice Crawford, for two years; Chief Justice Whiton, for four years, Associate Justice Smith for six years as previously mentioned. The first (June) term was held at Madison. La Fayette Kellogg was appointed and qualified as clerk. On the 21st of September, Timothy Burns, lieutenant governor of Wisconsin, died at La Crosse. As a testimonial of respect for the deceased the several State departments, in accordance with a proclamation of the governor, were closed for one day—October 3, 1853. In the Fall of this year, democrats, whigs and free-soilers, each called a convention to nominate candidates for the various State offices to be supported by them at the ensuing election in November. The successful ticket was, for governor, William A. Barstow; for lieutenant governor, James T. Lewis, for secretary of State, Alexander T. Gray, for State treasurer, Edward H. Janssen; for attorney general, George B. Smith; for superintendent of public instruction, Hiram A. Wright; for State prison commissioner, A. W. Starks; and for bank comptroller, William M. Dennis. They were all democrats.

The year 1853 was, to the agriculturists of the State, one of prosperity. Every branch of industry prospered. The increase of commerce and manufactures more than realized the expectations of the most sanguine.

FOURTH ADMINISTRATION.—WILLIAM A. BARSTOW, GOVERNOR—1854-1855.

On Monday, the second of January, 1854, William A. Barstow took the oath of office as governor of Wisconsin.

The legislature commenced its seventh regular session on the eleventh of January. Frederick W. Horn was elected speaker of the assembly. Both houses were democratic. The legislature adjourned on the 3d of April following, after a session of eighty-three days.

In the early part of March, a fugitive slave case greatly excited the people of Wisconsin. A slave named Joshua Glover, belonging to B. S. Garland of Missouri, had escaped from his master and made his way to the vicinity of Racine. Garland, learning the whereabouts of his personal chattel, came to the State, obtained, on the 9th of March, 1854, from the judges of the district court of the United States for the district of Wisconsin, a warrant for the apprehension of Glover, which was put into the hands of the deputy marshal of the United States. Glover was secured and lodged in jail in Milwaukee. A number of persons afterward assembled and rescued the fugitive. Among those who took an active part in this proceeding was Sherman M. Booth, who was arrested therefor and committed by a United States commissioner, but was released from custody by Abram D. Smith, one of the associate justices of the supreme court of Wisconsin, upon a writ of *habeas corpus*. The record of the proceedings was thereupon taken to that court in full bench by a writ of *certiorari* to correct any error that might have been committed before the associate justice. At the June term, 1854, the justices held that Booth was entitled to be discharged, because the commitment set forth no cause for detention.

Booth was afterward indicted in the United States district court and a warrant issued for his arrest. He was again imprisoned; and again he applied to the supreme court—then, in term time—for a writ of *habeas corpus*. This was in July, 1854. In his petition to the supreme court, Booth set forth that he was in confinement upon a warrant issued by the district court of the United States and that the object of the imprisonment was to compel him to answer an indictment then pending against him therein. The supreme court of the State held that these facts showed that the district court of the United States had obtained jurisdiction of the case and that it was apparent that the indictment was for an offense of which the federal courts had exclusive jurisdiction. They could not therefore interfere; and his application for a discharge was denied.

Upon the indictment, Booth was tried and convicted, fined and imprisoned, for a violation of the fugitive slave law. Again the prisoner applied to the supreme court of Wisconsin,—his

last application bearing date January 26, 1855. He claimed discharge on the ground of the unconstitutionality of the law under which he had been indicted. The supreme court held that the indictment upon which he had been tried and convicted contained three counts, the first of which was to be considered as properly charging an offense within the act of congress of September 18, 1850, known as the "fugitive slave law," while the second and third counts did not set forth or charge an offense punishable by any statute of the United States; and as, upon these last-mentioned counts he was found guilty and not upon the first, he must be discharged.

The action of the supreme court of Wisconsin in a second time discharging Booth, was afterward reversed by the supreme court of the United States; and, its decision being respected by the State court, Booth was re-arrested in 1860, and the sentence of the district court of the United States executed in part upon him, when he was pardoned by the president.

By an act of the legislature, approved March 30, 1854, a "State Lunatic Asylum" was directed to be built at or in the vicinity of Madison, the capital of the State, upon land to be donated or purchased for that purpose. By a subsequent act, the name of the asylum was changed to the "Wisconsin State Hospital for the Insane." This was the third charitable institution established by the State. The hospital was opened for patients in July, 1860, under the direction of a board of trustees appointed by the governor. All insane persons, residents of Wisconsin, who, under the law providing for admission of patients into the hospital for treatment, become residents therein, are maintained at the expense of the State, provided the county in which such patient resided before being brought to the hospital pays the sum of one dollar and fifty cents a week for his or her support. Any patient can be supported by relatives, friends or guardians, if the latter desire to relieve the county and State from the burden, and can have special care and be provided with a special attendant, if the expense of the same be borne by parties interested. The hospital is beautifully located on the north shore of Lake Mendota, in Dane county, about four miles from Madison.

At the general election in the Fall of 1854, for members from Wisconsin to the thirty-fourth congress, Daniel Wells, Jr. was chosen from the first district; C. C. Washburn, from the second, and Charles Billingshurst from the third district. Billingshurst and Washburn were elected as republicans—that party having been organized in the Summer previous. Wells was a democrat.

The year 1854 was one of prosperity for Wisconsin, to all its industrial occupations. Abundant crops and increased prices were generally realized by the agriculturist. It was a year also of general health. It was ascertained that the amount of exports during the year, including lumber and mineral, exceeded thirteen millions of dollars.

The eighth regular session of the State legislature commenced on the 10th of January, 1855. C. C. Sholes was elected speaker of the assembly. The senate was democratic; the assembly, republican. On joint ballot, the republicans had but one majority. On the 1st of February, Charles Durkee, a republican, was elected United States senator for a full term of six years from the 4th of March next ensuing, to fill the place of Isaac P. Walker whose term would expire on that day. Among the bills passed of a general nature, was one relative to the rights of married women, providing that any married woman, whose husband, either from drunkenness or profligacy, should neglect or refuse to provide for her support, should have the right, in her own name, to transact business, receive and collect her own earnings, and apply the same for her own support, and education of her children, free from the control and interference of her husband. The legislature adjourned *sine die* on the second of April, after a session of eighty-three days. Orsamus Cole having been elected in this month an associate justice of the supreme court in place of Judge Samuel Crawford, whose term of office would expire on the thirty-first of May of that year, went into office on the first day of June following, for a term of six years. His office would therefore end on the thirty-first of May, 1861.

On the 27th of May, 1855, Hiram A. Wright, superintendent of public instruction, died at Prairie du Chien. On the 18th of June following, the governor appointed A. Constantine Barry to fill his place. On the 5th of July, Garland, the owner of the rescued fugitive slave Glover, having brought suit in the United States district court for the loss of his slave, against Booth, the trial came on at Madison, resulting in the jury bringing in a verdict under instructions from the judge, of one thousand dollars, the value of a negro slave as fixed by act of congress of 1850.

The constitution of the State requiring the legislature to provide by law for an enumeration of the inhabitants in the year 1855, an act was passed by that body, approved March 31, of this year, for that purpose. The result showed a population for Wisconsin of over five hundred and fifty-two thousand. In November, at the general election, the democratic ticket for State officers was declared elected: William A. Barstow, for governor; Arthur McArthur, for lieutenant governor; David W. Jones, for secretary of State; Charles Kuehn, for State treasurer; William R. Smith, for attorney general; A. C. Barry, for superintendent of public instruction; William M. Dennis, for bank comptroller; and Edward McGarry for State prison commissioner. The vote for governor was very close; but the State canvassers declared Barstow elected by a small majority. The opposing candidate for that office was Coles Bashford, who ran as a republican.

The year 1855 was a prosperous one to the farmers of Wisconsin as well as to all industrial occupations. There were abundant crops and unexampled prices were realized.

FIFTH ADMINISTRATION.—COLES BASHFORD, GOVERNOR—1856-1857.

On the seventh day of January, 1856, William A. Barstow took and subscribed an oath of office as governor of Wisconsin, while Coles Bashford, who had determined to contest the right of Barstow to the governorship, went, on the same day, to the supreme court room, in Madison, and had the oath of office administered to him by Chief Justice Whiton. Bashford afterward called at the executive office and made a formal demand of Barstow that he should vacate the gubernatorial chair; but the latter respectfully declined the invitation. These were the initiatory steps of "Bashford *vs.* Barstow," for the office of governor of Wisconsin.

The fight now commenced in earnest. On the eleventh, the counsel for Bashford called upon the attorney general and requested him to file an information in the nature of a *quo warranto* against Barstow. On the fifteenth that officer complied with the request. Thereupon a summons was issued to Barstow to appear and answer. On the twenty-second, Bashford, by his attorney, asked the court that the information filed by the attorney general be discontinued and that he be allowed to file one, which request was denied by the court. While the motion was being argued, Barstow, by his attorneys, entered his appearance in the case.

On the second of February, Barstow moved to quash all proceedings for the reason that the court had no jurisdiction in the matter. This motion was denied by the court; that tribunal at the same time deciding that the filing of the motion was an admission by Barstow that the allegations contained in the information filed by the attorney general were true.

On the twenty-first of February, the time appointed for pleading to the information, Barstow, by his attorneys, presented to the court a stipulation signed by all the parties in the case, to the effect that the board of canvassers had determined Barstow elected governor; that the secretary of State had certified to his election; and that he had taken the oath of office. They submitted to the court whether it had jurisdiction, beyond the certificates, of those facts and the canvass so made to inquire as to the number of votes actually given for Barstow,—Bashford offering to prove that the certificates were made and issued through mistake and fraud, and that he, instead of Barstow, received the greatest number of votes. This stipulation the court declined to entertain or to pass upon the questions suggested; as they were not presented in legal form. Barstow

was thereupon given until the twenty-fifth of February to answer the information that had been filed against him by the attorney general.

On the day appointed, Barstow filed his plea to the effect that, by the laws of Wisconsin regulating the conducting of general election for State officers, it was the duty of the board of canvassers to determine who was elected to the office of governor; and that the board had found that he was duly elected to that office. It was a plea to the jurisdiction of the court. A demurrer was interposed to this plea, setting forth that the matters therein contained were not sufficient in law to take the case out of court; asking, also, for a judgment against Barstow, or that he answer further the information filed against him. The demurrer was sustained; and Barstow was required to answer over within four days; at the expiration of which time the counsel for Barstow withdrew from the case, on the ground, as they alleged, that they had appeared at the bar of the court to object to the jurisdiction of that tribunal in the matter, and the court had determined to proceed with the case, holding and exercising full and final jurisdiction over it; and that they could take no further steps without conceding the right of that tribunal so to hold. Thereupon, on the eighth of March, Barstow entered a protest, by a communication to the supreme court, against any further interference with the department under his charge by that tribunal, "either by attempting to transfer its powers to another or direct the course of executive action." The counsel for Bashford then moved for judgment upon the default of Barstow.

A further hearing of the case was postponed until March 18, when the attorney general filed a motion to dismiss the proceedings; against which Bashford, by his counsel, protested as being prejudicial to his rights. It was the opinion of the court that the attorney general could not dismiss the case, that every thing which was well pleaded for Bashford in his information was confessed by the default of Barstow. By strict usage, a final judgment ought then to have followed; but the court came to the conclusion to call upon Bashford to bring forward proof, showing his right to the office. Testimony was then adduced at length, touching the character of the returns made to the State canvassers; after hearing of which it was the opinion of the court that Bashford had received a plurality of votes for governor and that there must be a judgment in his favor and one of ouster against Barstow; which were rendered accordingly.

The ninth regular session of the legislature of Wisconsin commenced on the ninth of January, 1856. William Hull was elected speaker of the assembly. The senate had a republican majority, but the assembly was democratic. On the eleventh Barstow sent in a message to a joint convention of the two houses. On the twenty-first of March he tendered to the legislature his resignation as governor, giving for reasons the action of the supreme court in "*Bashford vs. Barstow*," which tribunal was then hearing testimony in the case. On the same day Arthur McArthur, lieutenant governor, took and subscribed an oath of office as governor of the State, afterwards sending a message to the legislature, announcing that the resignation of Barstow made it his duty to take the reins of government. On the twenty-fifth, Bashford called on McArthur, then occupying the executive office, and demanded possession—at the same time intimating that he preferred peaceable measures to force, but that the latter would be employed if necessary. The lieutenant governor thereupon vacated the chair, when the former took the gubernatorial seat, exercising thereafter the functions of the office until his successor was elected and qualified. His right to the seat was recognized by the senate on the twenty-fifth, and by the assembly on the twenty-seventh of March, 1856. This ended the famous case of "*Bashford vs. Barstow*," the first and only "war of succession" ever indulged in by Wisconsin.

The legislature, on the thirty-first of March, adjourned over to the third of September, to dispose of a congressional land grant to the State. Upon re-assembling, an important measure was taken up—that of a new apportionment for the legislature. It was determined to increase the

number of members from one hundred and seven to one hundred and twenty-seven. The session closed on the thirteenth of October. The general election for members to the thirty-fifth congress, held in November, resulted in the choice of John H. Potter, from the first district; C. C. Washburn from the second; and Charles Billingham, from the third district. They were all elected as republicans. The presidential canvass of this year was an exciting one in the State. The republicans were successful. Electors of that party cast their five votes for Fremont and Dayton.

The year 1856 was not an unprosperous one, agriculturally speaking, although in some respects decidedly unfavorable. In many districts the earlier part of the season was exceedingly dry, which materially diminished the wheat crop. Other industrial interests were every where in a flourishing condition.

The legislature commenced its tenth regular session at Madison, on the fourteenth day of January, 1857, with a republican majority in both houses. Wyman Spooner was elected speaker of the assembly. For the first time since the admission of the State into the Union, a majority of the members of both houses, together with the governor, were opposed to the democratic party. On the twenty-third the senate and assembly met in joint convention, for the purpose of electing a United States senator in place of Henry Dodge, whose term of office would expire on the fourth of March next ensuing. James R. Doolittle, republican, was the successful candidate for that office, for a full term of six years, from the fourth of March, 1857. The legislature adjourned on the ninth of March, 1857. At the Spring election, Judge Whiton was re-elected chief justice of the supreme court for a term of six years.

The second reformatory State institution established in Wisconsin, was, by an act of the legislature, approved March 7, 1857, denominated a House of Refuge for Juvenile Delinquents, afterward called the State Reform School, now known as the Wisconsin Industrial School for Boys, and is located at Waukesha, the county seat of Waukesha county. The courts and several magistrates in any county in Wisconsin may, in their discretion, sentence to this school any male child between the ages of ten and sixteen years, convicted of vagrancy, petit larceny, or any misdemeanor; also of any offense which would otherwise be punishable by imprisonment in the State prison; or, of incorrigible or vicious conduct in certain cases. The term of commitment must be to the age of twenty-one years.

At the State election held in November of this year, the republicans elected A. W. Randall governor; S. D. Hastings, State treasurer, and Edward M. McGraw, State prison commissioner. The democrats elected E. D. Campbell, lieutenant governor; D. W. Jones, secretary of State; Gabriel Bouck, attorney general; L. C. Draper, superintendent of public instruction, and J. C. Squires, bank comptroller.

The year 1857 was a disastrous one to Wisconsin, as well as to the whole country, in a financial point of view. Early in the Fall a monetary panic swept over the land. A number of prominent operators in the leading industrial pursuits were obliged to succumb. Agriculturally the year was a fair one for the State.

SIXTH ADMINISTRATION.—ALEXANDER W. RANDALL, GOVERNOR—1858—1859.

Randall's administration began on the fourth day of January, 1858, when for the first time he was inaugurated governor of the State. On the eleventh of January the legislature commenced its eleventh regular session, with a republican majority in both houses. Frederick S. Lovell was elected speaker of the assembly. The legislature adjourned *sine die* on the seventeenth of March, after an unusually long session of one hundred and twenty-five days. "That a large majority of the members were men of integrity, and disposed for the public weal, can not

Wm Blair

(DECEASED)
WAUKESHA.

be doubted; but they were nearly all new members, and without former legislative experience. They set out to accomplish a great good, by holding up to public scorn and execration the wholesale briberies and iniquities of the immediate past; but they lacked concentration of effort, and, for want of union and preconcerted action, they failed to achieve the great triumph they sought, by providing a 'sovereign remedy' for the evils they exposed."

At the regular session of the legislature of 1856, an act was passed for a general revision of the laws of the State. Under this, and a subsequent act of the adjourned session of that year, three commissioners—David Taylor, Samuel J. Todd, and F. S. Lovell—were appointed "to collect, compile and digest the general laws" of Wisconsin. Their report was submitted to the legislature of 1858, and acted upon at a late day of the session. The laws revised, which received the sanction of the legislature, were published in one volume, and constitute what is known as the Revised Statutes of 1858.

At the Fall election, John F. Potter from the first district, and C. C. Washburn from the second district, both republicans, were elected to the thirty-sixth congress; while C. H. Larrabee, democrat, was elected to represent the third district.

The twelfth regular session of the Wisconsin legislature commenced on the twelfth of January, 1859, with a republican majority in both houses. William P. Lyon was elected speaker of the assembly. The legislature adjourned *sine die* on the twenty-first of March, 1859, after a session of sixty-nine days. At the regular spring election, Byron Paine was chosen associate justice of the supreme court, for a full term of six years, as the successor of Associate Justice Smith. As it was a question when the term of the latter ended—whether on the 31st day of May, 1859, or on the first Monday in January, 1860—he went through with the formality of resigning his office, and the governor of appointing Paine as his successor, on the 20th of June, 1859. On the twelfth of April, 1859, Edward V. Whiton, chief justice of the supreme court, died at his residence in Janesville. The office was filled by executive appointment on the 19th of the same month—the successor of Judge Whiton being Luther S. Dixon. Late in the Summer both political parties put into the field a full state ticket. The republicans were successful—electing for governor, Alexander W. Randall; for lieutenant governor, B. G. Noble; for secretary of state, L. P. Harvey; for state treasurer, S. D. Hastings, for attorney general, James H. Howe; for bank comptroller, G. Van Steenwyck; for superintendent of public instruction, J. L. Pickard; for state prison commissioner, H. C. Heg.

SEVENTH ADMINISTRATION.—ALEXANDER W. RANDALL, GOVERNOR (SECOND TERM), 1860—1861.

Alexander W. Randall was inaugurated the second time as governor of Wisconsin, on Monday, January 2, 1860. One week subsequent, the thirteenth regular session of the legislature commenced at Madison. For the first time the republicans had control, not only of all the State offices, but also of both branches of the legislature. William P. Lyon was elected speaker of the assembly. A new assessment law was among the most important of the acts passed at this session. The legislature adjourned on the second of April. At the spring election, Luther S. Dixon, as an independent candidate, was elected chief justice of the supreme court for the unexpired term of the late Chief Justice Whiton. In the presidential election which followed, republican electors were chosen—casting their five votes, in the electoral college, for Lincoln and Hamlin. At the same election, John F. Potter, from the first district; Luther Hanchett, from the second, and A. Scott Sloan, from the third district, were elected members of the thirty-seventh congress. Hanchett died on the twenty-fourth of November, 1862, when, on the twentieth of December following, W. D. McIndoe was elected to fill the vacancy. All these congressional representatives were republicans. Wisconsin, in 1860, was a strong repub-

lican State. According to the census of this year, it had a population of over seven hundred and seventy-seven thousand.

On the ninth of January, 1861, the fourteenth regular session of the State legislature commenced at Madison. Both branches were republican. Amasa Cobb was elected speaker of the assembly. On the tenth, both houses met in joint convention to hear the governor read his annual message. It was a remarkable document. Besides giving an excellent synopsis of the operations of the State government for 1860, the governor entered largely into a discussion of the question of secession and disunion, as then proposed by some of the southern states of the Union. These are his closing words :

“The right of a State to secede from the Union can never be admitted. The National Government can not treat with a State while it is in the Union, and particularly while it stands in an attitude hostile to the Union. So long as any State assumes a position foreign, independent and hostile to the government, there can be no reconciliation. The government of the United States can not treat with one of its own States as a foreign power. The constitutional laws extend over every State alike. They are to be enforced in every State alike. A State can not come into the Union as it pleases, and go out when it pleases. Once in, it must stay until the Union is destroyed. There is no coercion of a State. But where a faction of a people arrays itself, not against one act, but against all laws, and against all government, there is but one answer to be made: ‘*The Government must be sustained; the laws shall be enforced!*’”

On the twenty-third of January the legislature met in joint convention to elect a United States senator to fill the place of Charles Durkee, whose term of office would expire on the fourth of March next ensuing. The successful candidate was Timothy O. Howe, republican, who was elected for a full term of six years from the 4th of March, 1861. One of the important acts passed at this session of the legislature apportioned the State into senate and assembly districts, by which the whole number of members in both houses was increased from one hundred and twenty-seven to one hundred and thirty-three. Another act apportioned the State into six congressional districts instead of three. By this — the third congressional apportionment — each district was to elect one representative. The first district was composed of the counties of Milwaukee, Waukesha, Walworth, Racine, and Kenosha; the second, of the counties of Rock, Jefferson, Dane, and Columbia; the third, of Green, La Fayette, Iowa, Grant, Crawford, Richland, and Sauk; the fourth, of Ozaukee, Washington, Dodge, Fond du Lac, and Sheboygan; the fifth, Manitowoc, Calumet, Winnebago, Green Lake, Marquette, Waushara, Waupaca, Outagamie, Brown, Kewaunee, Door, Oconto, and Shawano; and the sixth, of the counties of Bad Axe, La Crosse, Monroe, Juneau, Adams, Portage, Wood, Jackson, Trempealeau, Buffalo, Pepin, Pierce, St. Croix, Dunn, Eau Claire, Clark, Marathon, Chippewa, Dallas, Polk, Burnett, Douglas, La Pointe, and Ashland. The legislature adjourned on the seventeenth of April, 1861.

At the spring elections of this year, Orsamus Cole was re-elected as associate justice of the supreme court. On the ninth of May following, Governor Randall issued a proclamation convening the legislature in extra session on the fifteenth of the same month. “The extraordinary condition of the country,” said he, “growing out of the rebellion against the government of the United States, makes it necessary that the legislature of this State be convened in special session, to provide more completely for making the power of the State useful to the government and to other loyal States.” The fifteenth or extra session began on the fifteenth of May, as designated in the governor’s proclamation. The message of the governor was devoted entirely to the war. “At the close of the last annual session of the legislature,” said he, “to meet a sudden emergency, an act was passed authorizing me to respond to the call of the president of the United States, ‘for aid in maintaining the Union and the supremacy of the laws, or to suppress rebellion

or insurrection, or to repel invasion within the United States,' and I was authorized, and it was made my duty, to take such measures as, in my judgment, should provide in the speediest and most efficient manner for responding to such call: and to this end I was authorized to accept the services of volunteers for active service, to be enrolled in companies of not less than seventy-five men each, rank and file, and in regiments of ten companies each. I was also authorized to provide for uniforming and equipping such companies as were not provided with uniforms and equipments." "The first call of the president for immediate active service," continued the governor, "was for one regiment of men. My proclamation, issued immediately after the passage of the act of the legislature, was answered within less than ten days, by companies enough, each containing the requisite number of men, to make up at least five regiments instead of one. I then issued another proclamation, announcing the offers that had been made, and advising that thereafter companies might be enrolled to stand as minute men, ready to answer further calls, as they might be made, but without expense to the State, except as they were mustered into service. In less than one month from the date of my first proclamation, at least five thousand men, either as individuals or enrolled companies, have offered their services for the war, and all appear anxious for active service in the field." "The time for deliberation," concludes the governor, "must give way to the time for action. The constitution of the United States must be sustained in all its first intent and wholeness. The right of the people of every State to go into every other State and engage in any lawful pursuit, without unlawful interference or molestation; the freedom of speech and of the press; the right of trial by jury; security from unjustifiable seizure of persons or papers, and all constitutional privileges and immunities, must receive new guarantees of safety."

The extra session of the legislature passed, with a single exception, no acts except such as appertained to the military exigencies of the times. Both houses adjourned *sine die* on the twenty-seventh of May, 1861. As the administration of Governor Randall would close with the year, and as he was not a candidate for re-election, there was much interest felt throughout the State as to who his successor should be. Three State tickets were put in nomination: union, republican, and democratic. The republican ticket was successful, electing Louis P. Harvey, governor; Edward Salomon, lieutenant governor; James T. Lewis, secretary of state; S. D. Hastings, state treasurer; James H. Howe, attorney general; W. H. Ramsey, bank commissioner; J. L. Pickard, superintendent of public instruction; and A. P. Hodges, state prison commissioner.

THE WAR OF SECESSION—LAST YEAR OF RANDALL'S ADMINISTRATION.

When Wisconsin was first called upon to aid the General Government in its efforts to sustain itself against the designs of the secession conspirators, the commercial affairs of the State were embarrassed to a considerable degree by the depreciation of the currency. The designs of the secessionists were so far developed at the ending of the year 1860 as to show that resistance to the national authority had been fully determined on. It is not a matter of wonder, then, that Governor Randall in his message to the legislature, early in January, 1861, should have set forth the dangers which threatened the Union, or should have denied the right of a State to secede from it. "Secession," said he, "is revolution; revolution is war; war against the government of the United States is treason." "It is time," he continued, "now, to know whether we have any government, and if so, whether it has any strength. Is our written constitution more than a sheet of parchment? The nation must be lost or preserved by its own strength. Its strength is in the patriotism of the people. It is time now that politicians became patriots; that men show their love of country by every sacrifice, but that of principle, and by

unwavering devotion to its interests and integrity." "The hopes," added the governor, most eloquently, "of civilization and Christianity are suspended now upon the answer to this question of dissolution. The capacity for, as well as the right of, self-government is to pass its ordeal, and speculation to become certainty. Other systems have been tried, and have failed; and all along, the skeletons of nations have been strewn, as warnings and land-marks, upon the great highway of historic government. Wisconsin is true, and her people steadfast. She will not destroy the Union, nor consent that it shall be done. Devised by great, and wise, and good men, in days of sore trial, it must stand. Like some bold mountain, at whose base the great seas break their angry floods, and around whose summit the thunders of a thousand hurricanes have rattled—strong, unmoved, immovable—so may our Union be, while treason surges at its base, and passions rage around it, unmoved, immovable—here let it stand forever." These are the words of an exalted and genuine patriotism. But the governor did not content himself with eloquence alone. He came down to matters of business as well. He urged the necessity of legislation that would give more efficient organization to the militia of the State. He warned the legislators to make preparations also for the coming time that should try the souls of men. "The signs of the times," said he, "indicate that there may arise a contingency in the condition of the government, when it will become necessary to respond to a call of the National Government for men and means to maintain the integrity of the Union, and to thwart the designs of men engaged in organized *treason*. While no unnecessary expense should be incurred, yet it is the part of wisdom, both for individuals and States, in revolutionary times, to be prepared to defend our institutions to the last extremity." It was thus the patriotic governor gave evidence to the members of both houses that he "scented the battle afar off."

On the 16th of January, a joint resolution of the legislature was passed, declaring that the people of Wisconsin are ready to co-operate with the friends of the Union every where for its preservation, to yield a cheerful obedience to its requirements, and to demand a like obedience from all others; that the legislature of Wisconsin, profoundly impressed with the value of the Union, and determined to preserve it unimpaired, hail with joy the recent firm, dignified and patriotic special message of the president of the United States; that they tender to him, through the chief magistrate of their own State, whatever aid, in men and money, may be required to enable him to enforce the laws and uphold the authority of the Federal Government, and in defense of the more perfect Union, which has conferred prosperity and happiness on the American people. "Renewing," said they, "the pledge given and redeemed by our fathers, we are ready to devote our lives, our fortunes, and our sacred honors in upholding the Union and the constitution."

The legislature, in order to put the State upon a kind of "war footing," passed an act for its defense, and to aid in enforcing the laws and maintaining the authority of the General Government. It was under this act that Governor Randall was enabled to organize the earlier regiments of Wisconsin. By it, in case of a call from the president of the United States to aid in maintaining the Union and the supremacy of the laws to suppress rebellion or insurrection, or to repel invasion within the United States, the governor was authorized to provide, in the most efficient manner, for responding to such call—to accept the services of volunteers for service, in companies of seventy-five men each, rank and file, and in regiments of ten companies each, and to commission officers for them. The governor was also authorized to contract for uniforms and equipments necessary for putting such companies into active service. One hundred thousand dollars were appropriated for war purposes; and bonds were authorized to be issued for that amount, to be negotiated by the governor, for raising funds. It will be seen, therefore, that the exigencies of the times—for Fort Sumter had not yet been surrendered—

were fully met by the people's representatives, they doing their whole duty, as they then understood it, in aid of the perpetuity of the Union.

Having defended Fort Sumter for thirty-four hours, until the quarters were entirely burned, the main gates destroyed, the gorge-wall seriously injured, the magazine surrounded by flames, and its door closed from the effects of the heat, four barrels and three cartridges of powder only being available, and no provisions but pork remaining, Robert Anderson, major of the first artillery, United States army, accepted terms of evacuation offered by General Beauregard, marched out of the fort on Sunday afternoon, the fourteenth of April, 1861, with colors flying and drums beating, bringing away company and private property, and saluting his flag with fifty guns. This, in brief, is the story of the fall of Sumter and the opening act of the War of the Rebellion.

"Whereas," said Abraham Lincoln, president, in his proclamation of the next day, "the laws of the United States have been for some time past, and now are, opposed, and the execution thereof obstructed, in the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, by combinations too powerful to be suppressed by the ordinary course of judicial proceedings, or by the powers vested in the marshals by law." Now, in view of that fact, he called forth the militia of the several States of the Union, to the aggregate number of seventy-five thousand, in order to suppress those combinations, and to cause the laws to be duly executed. "A call is made on you by to-night's mail for one regiment of militia for immediate service," telegraphed the secretary of war to Randall, on the same day.

In Wisconsin, as elsewhere, the public pulse quickened under the excitement of the fall of Sumter. "The dangers which surrounded the nation awakened the liveliest sentiments of patriotism and devotion. For the time, party fealty was forgotten in the general desire to save the nation. The minds of the people soon settled into the conviction that a bloody war was at hand, and that the glorious fabric of our National Government, and the principles upon which it is founded, were in jeopardy, and with a determination unparalleled in the history of any country, they rushed to its defense. On every hand the National flag could be seen displayed, and the public enthusiasm knew no bounds; in city, town, and hamlet, the burden on every tongue was war." "We have never been accustomed," said Governor Randall, "to consider the military arm as essential to the maintenance of our government; but an exigency has arisen that demands its employment." "The time has come," he continued, "when parties and platforms must be forgotten, and all good citizens and patriots unite together in putting down rebels and traitors." "What is money," he asked, "what is life, in the presence of such a crisis?" Such utterances and such enthusiasm could but have their effect upon the legislature, which, it will be remembered, was still in session; so, although that body had already voted to adjourn, *sine die*, on the fifteenth of April, yet, when the moment arrived, and a message from the governor was received, announcing that, owing to the extraordinary exigencies which had arisen, an amendment of the law of the thirteenth instant was necessary, the resolution to adjourn was at once rescinded. The two houses thereupon not only increased the amount of bonds to be issued to two hundred thousand dollars, but they also passed a law exempting from civil process, during the time of service, all persons enlisting and mustering into the United States army from Wisconsin. When, on the seventeenth, the legislature did adjourn, the scene was a remarkable one. Nine cheers were given for the star spangled banner and three for the Governor's Guard, who had just then tendered their services—the first in the State—under the call for a regiment of men for three months' duty.

"For the first time in the history of this federal government," are the words of the governor, in a proclamation issued on the sixteenth of April, "organized treason has manifested itself within several States of the Union, and armed rebels are making war against it." "The treasuries of the country," said he, "must no longer be plundered; the public property must be

protected from aggressive violence; that already seized must be retaken, and the laws must be executed in every State of the Union alike." "A demand," he added, "made upon Wisconsin by the president of the United States, for aid to sustain the federal arm, must meet with a prompt response." The patriotism of the State was abundantly exhibited in their filling up a regiment before some of the remote settlements had any knowledge of the call. On the twenty-second, Governor Randall reported to the secretary of war that the First regiment was ready to go into rendezvous. The place designated was "Camp Scott," at Milwaukee; the day, the twenty-seventh of April. Then and there the several companies assembled—the regiment afterward completing its organization.

With a wise foresight, Governor Randall ordered, as a reserve force and in advance of another call for troops by the president, the formation of two more regiments—the Second and Third, and, eventually, the Fourth. Camps at Madison, Fond du Lac, and Racine, were formed for their reception, where suitable buildings were erected for their accommodation. Companies assigned to the Second regiment were ordered to commence moving into "Camp Randall," at Madison, on the first day of May. On the seventh, the secretary of war, under call of the president of the United States for forty-two thousand additional volunteers—this time for three years, or during the war—telegraphed Governor Randall that no more three months' volunteers were wanted; that such companies as were recruited must re-enlist for the new term or be disbanded.

At the extra session of the legislature of Wisconsin, which, as already mentioned, commenced on the fifteenth of May, called by Governor Randall immediately upon his being notified of the second call of the president for troops, on the third of May, the law hurriedly passed at the close of the regular session, and under which the governor had organized the First regiment, was found inadequate to meet the second call for troops. "A bill was introduced, and became a law, authorizing the governor to raise six regiments of infantry, inclusive of those he had organized or placed at quarters. When the six regiments were mustered into the United States service, he was authorized to raise two additional regiments, and thus to keep two regiments continually in reserve to meet any future call of the General Government. He was authorized to quarter and subsist volunteers at rendezvous—to transport, clothe, subsist and quarter them in camp at the expense of the State. Arms and munitions were to be furnished by the United States. Recruits were to be mustered into State service, and into United States service, for three years. Two assistant surgeons to each regiment were to be appointed, and paid by the State. The regiments, as they came into camp, were to be instructed in drill and various camp duties, to secure efficiency in the field. The troops, so called in, were to be paid monthly by the State, the same pay and emoluments as the soldiers in the United States army, from the date of enlistment. The paymaster general was authorized to draw funds from the State treasury for the payment of the State troops, and the expense incurred in subsisting, transporting and clothing them. The governor was authorized to purchase military stores, subsistence, clothing, medicine, field and camp equipage, and the sum of one million dollars was appropriated to enable the governor to carry out the law."

Other laws were passed relating to military matters. One authorized the governor to purchase two thousand stand of arms; and fifty thousand dollars were appropriated to pay for the same. Another authorized counties, towns, cities and incorporated villages to levy taxes for the purpose of providing for the support of families of volunteers residing in their respective limits. The one passed at the previous session, exempting volunteers from civil process while in the service, was amended so as to include all who might thereafter enlist. One granted five dollars per month as extra pay to enlisted volunteers having families dependent upon them for support, payable to their families. Another authorized the governor to employ such aids, clerks and

messengers, as he deemed necessary for the public interests. Still another authorized the payment of those who had enlisted for three months, but had declined to go in for three years. The expenses of the extra session were ordered to be paid out of the "war fund." One million dollars in bonds were authorized to be issued for war purposes to form that fund. The governor, secretary of state and state treasurer were empowered to negotiate them. By a joint resolution approved the twenty-first of May, the consent of the legislature was given to the governor to be absent from the State during the war, for as long a time as in his discretion he might think proper or advisable, in connection with the military forces of the State. For liberality, zeal and genuine patriotism, the members of the Wisconsin legislature, for the year 1861, deserve a high commendation. All that was necessary upon their final adjournment at the close of the extra session to place the State upon a "war footing," was the organization by the governor of the various military departments. These he effected by appointing Brigadier General William L. Utley, adjutant general; Brigadier General W. W. Tredway, quartermaster general; Colonel Edwin R. Wadsworth, commissary general; Brigadier General Simeon Mills, paymaster general; Brigadier General E. B. Wolcott, surgeon general; Major E. L. Buttrick, judge advocate; and Colonel William H. Watson, military secretary.

On the seventeenth of May, the First regiment, at "Camp Scott," was mustered into the United States service, and the war department informed that it awaited marching orders. The regimental officers were not all in accordance with the law and mode adopted afterwards. On the seventh of the month Governor Randall had appointed Rufus King a brigadier general, and assigned the First, Second, Third and Fourth regiments to his command as the Wisconsin brigade; although at that date only the First and Second had been called into camp. This brigade organization was not recognized by the General Government. The secretary of war telegraphed the governor of Wisconsin that the quota of the State, under the second call of the president, was two regiments—so that the whole number under both calls was only three—one (the First) for three months, two (the Second and Third) for three years. Notwithstanding this, Governor Randall proceeded to organize the Fourth.

As a number of the companies ordered into "Camp Randall" on the first day of May to form the Second regiment had only enlisted for three months, the order of the secretary of war of the seventh of that month making it imperative that all such companies must re-enlist for three years or during the war, or be disbanded, the question of extending their term of enlistment was submitted to the companies of the regiment, when about five hundred consented to the change. The quota of the regiment was afterward made up, and the whole mustered into the service of the United States for three years or during the war, under the president's second call for troops. This was on the eleventh of June, 1861. The Third regiment having had its companies assigned early in May, they were ordered in June into "Camp Hamilton" at Fond du Lac, where the regiment was organized, and, on the twenty-ninth of June, mustered into the United States' service as a three years regiment. This filled Wisconsin's quota under the second call of President Lincoln. By this time war matters in the State began to assume a systematic course of procedure—thanks to the patriotism of the people, the wisdom of the legislature, and the untiring energy and exertions of the governor and his subordinates.

The determination of the secretary of war to accept from Wisconsin only two three-years regiments under the second call for troops was soon changed, and three more were authorized, making it necessary to organize the Fourth, Fifth and Sixth. The Fourth was called into "Camp Utley" at Racine on the sixth of June, and was mustered into the service of the United States on the ninth of the following month. By the twenty-eighth of June, all the companies of the Fifth had assembled at "Camp Randall," and on the thirteenth of July were mustered in as

United States troops. By the first of July, at the same place, the complement for the Sixth regiment had been made up, and the companies were mustered for three years into the service of the General Government, on the sixteenth of the same month. Governor Randall did not stop the good work when six regiments had been accepted, but assigned the necessary companies to form two more regiments—the Seventh and Eighth; however, he wisely concluded not to call them into camp until after harvest, unless specially required to do so. “If they are needed sooner,” said the governor, in a letter to the president on the first of July, “a call will be immediately responded to, and we shall have their uniforms and equipments ready for them.” “By the authority of our legislature,” added the writer, “I shall, after the middle of August, keep two regiments equipped and in camp ready for a call to service, and will have them ready at an earlier day if needed.”

About the latter part of June, W. P. Alexander, of Beloit, a good marksman, was commissioned captain to raise a company of sharpshooters for Berdan's regiment. He at once engaged in the work. The company was filled to one hundred and three privates and three officers. It left the State about the middle of September under Captain Alexander, and was mustered into the service at Wehawken on the twenty-third day of that month, as Company “G” of Berdan's regiment of sharpshooters. On the twenty-sixth of July, a commission was issued to G. Van Deutsch, of Milwaukee, to raise a company of cavalry. He succeeded in filling his company to eighty-four men. He left the State in September, joining Fremont. The company was afterward attached to the fifth cavalry regiment of Missouri.

About the 20th of August, Governor Randall was authorized to organize and equip as rapidly as possible five regiments of infantry and five batteries of artillery, and procure for them necessary clothing and equipments according to United States regulations and prices, subject to the inspection of officers of the General Government. The five regiments were to be additional to the eight already raised. One regiment was to be German. During the last week of August the companies of the Seventh regiment were ordered into “Camp Randall,” at Madison. They were mustered into the service soon after arrival. On the 28th of August orders were issued for the reorganization of the First regiment for three years, its term of three months having expired. The secretary of war having signified his acceptance of the regiment for the new term, its mustering into the service was completed on the nineteenth of October. This made six infantry regiments in addition to the eight already accepted, or fourteen in all. On the same day orders were issued assigning companies to the Eighth regiment,—the whole moving to “Camp Randall,” at Madison, the first week in September, where their mustering in was finished on the thirteenth.

The Ninth, a German regiment, was recruited in squads, and sent into camp, where they were formed into companies, and the whole mustered in on the 26th of October, 1861, at “Camp Sigel,” Milwaukee. Companies were assigned the Tenth regiment on the 18th of September, and ordered into camp at Milwaukee, where it was fully organized about the first of October, being mustered into the service on the fourteenth of that month. The Tenth infantry was enlisted in September, 1861, and mustered in on the fourteenth of October, 1861, at “Camp Holton,” Milwaukee. The Eleventh regiment was called by companies into “Camp Randall” the latter part of September and first of October, 1861, and mustered in on the eighteenth. The Twelfth was called in to the same camp and mustered in by companies between the twenty-eighth of October and the fifth of November, 1861. The Thirteenth rendezvoused at “Camp Treadway,” Janesville, being mustered into the United States service on the seventeenth of October, 1861. These thirteen regiments were all that had been accepted and mustered into the United States service while Randall was governor.

From the commencement of the rebellion a great desire had been manifested for the organ-

ization of artillery companies in Wisconsin, and this desire was finally gratified. Each battery was to number one hundred and fifty men, and, as has been shown, five had been authorized by the General Government to be raised in Wisconsin. The First battery was recruited at La Crosse, under the superintendence of Captain Jacob T. Foster, and was known as the "La Crosse Artillery." It rendezvoused at Racine, early in October, 1861, where on the tenth of that month, it was mustered into the United States service. The Second battery, Captain Ernest Herzberg, assembled at "Camp Utley," Racine, and was mustered in with the First battery on the tenth. The Third, known as the "Badger Battery," was organized by Captain L. H. Drury, at Madison and Berlin, and was mustered into the service on the same day and at the same place as the First and Second. The Fourth battery, recruited and organized at Beloit, under the supervision of Captain John F. Vallee, was mustered in on the first of October, 1861, at Racine. The Fifth battery was recruited at Monroe, Green county, under the superintendence of Captain Oscar F. Pinney, moving afterward to "Camp Utley," Racine, where, on the first of October, it was mustered in, along with the Fourth. So brisk had been the recruiting, it was ascertained by the governor that seven companies had been raised instead of five, when the secretary of war was telegraphed to, and the extra companies—the Sixth and Seventh accepted; the Sixth, known as the "Buena Vista Artillery," being recruited at Lone Rock, Richland county, in September, Captain Henry Dillon, and mustered in on the second of October, 1861, at Racine; the Seventh, known as the "Badger State Flying Artillery," having organized at Milwaukee, Captain Richard R. Griffiths, and mustered in on the fourth of the same month, going into camp at Racine on the eighth. This completed the mustering in of the first seven batteries, during Governor Randall's administration; the whole mustered force being thirteen regiments of infantry; one company of cavalry; one of sharpshooters; and these seven artillery companies. "Wisconsin," said the governor, in response to a request as to the number of regiments organized, "sent one regiment for three months,—officers and men eight hundred and ten. The other regiments for the war up to the Thirteenth (including the First, re-organized), will average one thousand men each; one company of sharpshooters for Berdan's regiment, one hundred and three men; and seven companies of light artillery." Of cavalry from Wisconsin, only Deutsch's company had been mustered into the United States, although three regiments had been authorized by the General Government before the close of Randall's administration. The governor, before the expiration of his office, was empowered to organize more artillery companies—ten in all; and five additional regiments of infantry—making the whole number eighteen. On the tenth of December, he wrote: "Our Fourteenth infantry is full and in camp. * * * Fifteenth has five companies in camp, and filling up. Sixteenth has eight companies in camp, and will be full by the 25th of December. Seventeenth has some four hundred men enlisted. Eighteenth will be in camp, full, by January 1. Seven maximum companies of artillery in camp. * * * Three regiments of cavalry—two full above the maximum; the third, about eight hundred men in camp." It will be seen, therefore, that a considerable number of men in the three branches of the service was then in camp that had not been mustered into the service; and this number was considerably increased by the 6th of January, 1862, the day that Randall's official term expired; but no more men were mustered in, until his successor came into office, than those previously mentioned.

The First regiment—three months'—left "Camp Scott," Milwaukee, on the ninth of June, 1861, for Harrisburg, Pennsylvania—eight hundred and ten in number; John C. Starkweather, colonel. The regiment returned to Milwaukee on the seventeenth of August, 1861, and was mustered out on the twenty-second.

The First regiment re-organized at "Camp Scott," Milwaukee. Its mustering into the service, as previously mentioned, was completed on the nineteenth of October. On the twenty-

eighth, it started for Louisville, Kentucky—nine hundred and forty-five strong—under command of its former colonel, John C. Starkweather. The Second regiment, with S. Park Coon as colonel, left "Camp Randall, Madison, for Washington city, on the eleventh of June, 1861—numbering, in all, one thousand and fifty-one. The Third regiment started from "Camp Hamilton," Fond du Lac, for Harrisburg, Pennsylvania, under command of Charles S. Hamilton, as colonel, on the twelfth of July, 1861, with a numerical strength of nine hundred and seventy-nine. The Fourth regiment—Colonel Halbert E. Payne—with a numerical strength of one thousand and fifty-three, departed on the fifteenth of July, 1861, from "Camp Utley," Racine, for Baltimore, Maryland. The Fifth regiment left "Camp Randall," Madison, one thousand and fifty-eight strong, commanded by Colonel Amasa Cobb, on the twenty-fourth of July, 1861, for Washington city. On the twenty-eighth of July, 1861, the Sixth regiment, numbering one thousand and eighty-four, moved from Madison, having been ordered to Washington city. It was commanded by Colonel Lysander Cutter. The Seventh regiment—Joseph Van Dor, Colonel—with a numerical strength of one thousand and sixteen men—officers and privates, received orders, as did the Fifth and Sixth, to move forward to Washington. They started from Madison on the morning of the twenty-first of September, 1861, for active service. The Eighth infantry, nine hundred and seventy-three strong, commanded by Colonel Robert C. Murphy, left Madison, *en route* for St. Louis, Missouri, on the morning of the twelfth of October, 1861. The Ninth, or German regiment, with Frederick Salomon in command as colonel, did not leave "Camp Sigel," for active service, while Randall was governor. The Tenth infantry moved from "Camp Holton," Milwaukee, commanded by Colonel Alfred R. Chapin, on the ninth of November, 1861, destined for Louisville, Kentucky, with a total number of nine hundred and sixteen officers and privates. On the twentieth of November, 1861, the Eleventh regiment "broke camp" at Madison, starting for St. Louis, under command of Charles L. Harris, as colonel. Its whole number of men was nine hundred and sixteen. The Twelfth regiment, at "Camp Randall," Madison—Colonel George E. Bryant, and the Thirteenth, at "Camp Tredway," Janesville—Colonel Maurice Maloney—were still in camp at the expiration of the administration of Governor Randall: these, with the Ninth, were all that had not moved out of the State for active service, of those mustered in previous to January 6, 1861,—making a grand total of infantry sent from Wisconsin, up to that date, by the governor, to answer calls of the General Government, for three years' service or during the war, of nine thousand nine hundred and ninety-one men, in ten regiments, averaging very nearly one thousand to each regiment. Besides these ten regiments of infantry for three years' service, Wisconsin had also sent into the field the First regiment, for three months' service, numbering eight hundred and ten men; Alexander's company of sharpshooters, one hundred and six; and Deutsch's company of cavalry, eighty-four: in all, one thousand. Adding these to the three years' regiments, and the whole force, in round numbers, was eleven thousand men, furnished by the State in 1861.

EIGHTH ADMINISTRATION.—LOUIS P. HARVEY AND EDWARD SALOMON, GOVERNORS—1862—1863.

Louis P. Harvey was inaugurated governor of Wisconsin on the sixth of January, 1862. The fifteenth regular session of the legislature of the State began on the eighth of the same month. In the senate, the republicans were in the majority; but in the assembly they had only a plurality of members, there being a number of "Union" men in that branch—enough, indeed, to elect, by outside aid, J. W. Beardsley, who ran for the assembly, upon the "Union" ticket, as speaker. Governor Harvey, on the tenth, read his message to the legislature in joint convention. "No previous legislature," are his opening words, "has convened under equal incentives to a disinterested zeal in the public service. . . . The occasion," he adds, "pleads

with you in rebuke of all the meaner passions, admonishing to the exercise of a conscientious patriotism, becoming the representatives of a Christian people, called in God's providence to pass through the furnace of a great trial of their virtue, and of the strength of the Government." On the seventh of April following, the legislature adjourned until the third of June next ensuing. Before it again assembled, an event occurred, casting a gloom over the whole State. The occasion was the accidental drowning of Governor Harvey.

Soon after the battle of Pittsburgh Landing, on the seventh of April, 1862, the certainty that some of the Wisconsin regiments had suffered severely, induced the governor to organize a relief party, to aid the wounded and suffering soldiers from the State. On the tenth, Harvey and others started on their tour of benevolence. Arriving at Chicago, they found a large number of boxes had been forwarded there from different points in the State, containing supplies of various kinds. At Mound City, Paducah, and Savannah, the governor and his party administered to the wants of the sick and wounded Wisconsin soldiers. Having completed their mission of mercy, they repaired to a boat in the harbor of Savannah, to await the arrival of the *Minnehaha*, which was to convey them to Cairo, on their homeward trip. It was late in the evening of the nineteenth of April, 1862, and very dark when the boat arrived which was to take the governor and his friends on board; and as she rounded to, the bow touching the *Dunleith*, on which was congregated the party ready to depart, Governor Harvey, by a misstep, fell overboard between the two boats, into the Tennessee river. The current was strong, and the water more than thirty feet deep. Every thing was done that could be, to save his life, but all to no purpose. His body was subsequently found and brought to Madison for interment. Edward Salomon, lieutenant governor, by virtue of a provision of the constitution of the State, upon the death of Harvey, succeeded to the office of governor of Wisconsin. On the third day of June, the legislature re-assembled in accordance with adjournment on the seventh of April previous, Governor Salomon, in his message of that day, to the senate and assembly, after announcing the sad event of the death of the late governor, said: "The last among the governors elected by the people of this State, he is the first who has been removed by death from our midst. The circumstances leading to and surrounding the tragic and melancholy end of the honored and lamented deceased, are well known to the people, and are, with his memory, treasured up in their hearts." He died," added Salomon, "while in the exercise of the highest duties of philanthropy and humanity, that a noble impulse had imposed upon him." The legislature, on the thirteenth of June, by a joint resolution, declared that in the death of Governor Harvey, the State had "lost an honest, faithful, and efficient public officer, a high-toned gentleman, a warm-hearted philanthropist, and a sincere friend." Both houses adjourned *sine die*, on the seventeenth of June, 1862.

Business of great public importance, in the judgment of the governor, rendering a special session of the legislature necessary, he issued, on the twenty-ninth of August, 1862, his proclamation to that effect, convening both houses on the tenth of September following. On that day he sent in his message, relating wholly to war matters. He referred to the fact that since the adjournment of the previous session, six hundred thousand more men had been called for by the president of the United States, to suppress the rebellion. "It is evident," said he, "that to meet further calls, it is necessary to rely upon a system of drafting or conscription, in Wisconsin." The governor then proceeded to recommend such measures as he deemed necessary to meet the exigencies of the times. The legislature levied a tax to aid volunteering, and passed a law giving the right of suffrage to soldiers in the military service. They also authorized the raising of money for payment of bounties to volunteers. The legislature adjourned on the twenty-sixth of September, 1862, after a session of sixteen days, and the enacting of seventeen laws.

On the 7th of October, James H. Howe, attorney general, resigned his office to enter the army. On the 14th of that month, Winfield Smith was appointed by the governor to fill the vacancy.

At the general election in the Fall of this year, six congressmen were elected to the thirty-eighth congress: James S. Brown from the first district; I. C. Sloan, from the second; Amasa Cobb, from the third; Charles A. Eldredge, from the fourth; Ezra Wheeler, from the fifth; and W. D. McIndoe, from the sixth district. Sloan, Cobb, and McIndoe, were elected as republicans; Brown, Eldridge, and Wheeler, as democrats.

The sixteenth regular session of the Wisconsin legislature, commenced on the fourteenth of January, 1863. J. Allen Barber was elected speaker of the assembly. The majority in both houses was republican. Governor Salomon read his message on the fifteenth, to the joint convention, referring, at length, to matters connected with the war of the rebellion. A large number of bills were passed by the legislature for the benefit of soldiers and their families. On the twenty-second, the legislature re-elected James R. Doolittle, to the United States senate for six years, from the fourth of March next ensuing. The legislature adjourned *sine die* on the second of April following. In the Spring of this year, Luther S. Dixon was re-elected chief justice of the supreme court, running as an independent candidate.

By a provision of the Revised Statutes of 1858, as amended by an act passed in 1862, and interpreted by another act passed in 1875, the terms of the justices of the supreme court, elected for a full term, commence on the first Monday in January next succeeding their election.

At the Fall election there were two tickets in the field: democratic and union republican. The latter was successful, electing James T. Lewis, governor; Wyman Spooner, lieutenant governor; Lucius Fairchild, secretary of state; S. D. Hastings, state treasurer; Winfield Smith, attorney general; J. L. Pickard, state superintendent; W. H. Ramsay, bank controller; and Henry Cordier, state prison commissioner.

WAR OF SECESSION—HARVEY AND SALOMON'S ADMINISTRATION.

When Governor Randall turned over to his successor in the gubernatorial chair, the military matters of Wisconsin, he had remaining in the State, either already organized or in process of formation, the Ninth infantry, also the Twelfth up to the Nineteenth inclusive; three regiments of cavalry; and ten batteries—First to Tenth inclusive. Colonel Edward Daniels, in the Summer of 1861, was authorized by the war department to recruit and organize one battalion of cavalry in Wisconsin. He was subsequently authorized to raise two more companies. Governor Randall, in October, was authorized to complete the regiment—the First cavalry—by the organization of six additional companies. The organization of the Second cavalry regiment was authorized in the Fall of 1861, as an "independent acceptance," but was finally turned over to the State authorities. Early in November, 1861, the war department issued an order discontinuing enlistments for the cavalry service, and circulars were sent to the different State executives to consolidate all incomplete regiments. Ex-Governor Barstow, by authority of General Fremont, which authority was confirmed by the General Government, had commenced the organization of a cavalry regiment—the Third Wisconsin—when Governor Randall received information that the authority of Barstow had been revoked. The latter, however, soon had his authority restored. In October, Governor Randall was authorized by the war department to raise three additional companies of artillery—Eighth to Tenth inclusive. These three batteries were all filled and went into camp by the close of 1861. Governor Randall, therefore, besides sending out of the State eleven thousand men, had in process of formation, or fully organized, nine regiments of infantry, three regiments of cavalry, and ten companies of artillery, left behind in

various camps in the State, to be turned over to his successor.

The military officers of Wisconsin were the governor, Louis P. Harvey, commander-in-chief; Brigadier General Augustus Gaylord, adjutant general; Brigadier General W. W. Tredway, quartermaster general; Colonel Edwin R. Wadsworth, commissary general; Brigadier General Simeon Mills, paymaster general; Brigadier General E. B. Wolcott, surgeon general; Major M. H. Carpenter, judge advocate; and Colonel William H. Watson, military secretary. As the General Government had taken the recruiting service out of the hands of the executives of the States, and appointed superintendents in their place, the offices of commissary general and paymaster general were no longer necessary; and their time, after the commencement of the administration in Wisconsin of 1862, was employed, so long as they continued their respective offices, in settling up the business of each. The office of commissary general was closed about the first of June, 1862; that of paymaster general on the tenth of July following. On the last of August, 1862, Brigadier General Tredway resigned the position of quartermaster general, and Nathaniel F. Lund was appointed to fill his place.

Upon the convening of the legislature of the State in its regular January session of this year—1862, Governor Harvey gave, in his message to that body, a full statement of what had been done by Wisconsin in matters appertaining to the war, under the administration of his predecessor. He stated that the State furnished to the service of the General Government under the call for volunteers for three months, one regiment—First Wisconsin; under the call for volunteers for three years, or the war, ten regiments, numbering from the First re-organized to the Eleventh, excluding the Ninth or German regiment. He gave as the whole number of officers, musicians and privates, in these ten three-year regiments, ten thousand one hundred and seventeen. He further stated that there were then organized and awaiting orders, the Ninth, in "Camp Sigel," Milwaukee, numbering nine hundred and forty men, under Colonel Frederick Salomon; the Twelfth, in "Camp Randall," one thousand and thirty-nine men, under Colonel George E. Bryant; the Thirteenth, in "Camp Tredway," Janesville, having nine hundred and nineteen men, commanded by Colonel M. Maloney; and the Fourteenth, at "Camp Wood," Fond du Lac, eight hundred and fifty men, under Colonel D. E. Wood.

The Fifteenth or Scandinavian regiment, Colonel H. C. Heg, seven hundred men, and the Sixteenth, Colonel Benjamin Allen, nine hundred men, were at that time at "Camp Randall," in near readiness for marching orders. The Seventeenth (Irish) regiment, Colonel J. L. Doran, and the Eighteenth, Colonel James S. Alban, had their full number of companies in readiness, lacking one, and had been notified to go into camp—the former at Madison, the latter at Milwaukee. Seven companies of artillery, numbering together one thousand and fifty men, had remained for a considerable time in "Camp Utley," Racine, impatient of the delays of the General Government in calling them to move forward. Three additional companies of artillery were about going into camp, numbering three hundred and thirty-four men. Besides these, the State had furnished, as already mentioned, an independent company of cavalry, then in Missouri, raised by Captain Von Deutsch, of eighty-one men; a company of one hundred and four men for Berdan's sharpshooters; and an additional company for the Second regiment, of about eighty men. Three regiments of cavalry—the First, Colonel E. Daniels; the Second, Colonel C. C. Washburn; and the Third, Colonel W. A. Barstow; were being organized. They numbered together, two thousand four hundred and fifty men. The Nineteenth (independent) regiment was rapidly organizing under the direction of the General Government, by Colonel H. T. Sanders, Racine. Not bringing this last regiment into view, the State had, at the commencement of Governor Harvey's administration, including the First, three-months' regiment, either in the service of the United States or organizing for it, a total of twenty-one thousand seven hundred and eighty-three men.

The legislature at its regular session of 1862, passed a law making it necessary to present all claims which were made payable out of the war fund, within twelve months from the time they accrued; a law was also passed authorizing the investment of the principal of the school fund in the bonds of the state issued for war purposes; another, amendatory of the act of the extra session of 1861, granting exemption to persons enrolled in the military service, so as to except persons acting as fiduciary agents, either as executors or administrators, or guardians or trustees, or persons defrauding the State, or any school district of moneys belonging to the same; also authorizing a stay of proceedings in foreclosures of mortgages, by advertisements. "The State Aid Law" was amended so as to apply to all regiments of infantry, cavalry, artillery and sharpshooters, defining the rights of families, fixing penalties for the issue of false papers, and imposing duties on military officers in the field to make certain reports. These amendments only included regiments and companies organized up to and including the Twentieth, which was in process of organization before the close of the session. A law was also passed suspending the sale of lands mortgaged to the State, or held by volunteers; another defining the duties of the allotment commissioners appointed by the president of the United States, and fixing their compensation. One authorized the issuing of bonds for two hundred thousand dollars for war purposes; one authorized a temporary loan from the general fund to pay State aid to volunteers; and one, the appointment of a joint committee to investigate the sale of war bonds; while another authorized the governor to appoint surgeons to batteries, and assistant surgeons to cavalry regiments.

The legislature, it will be remembered, took a recess from the seventh of April to the third of June, 1862. Upon its re-assembling, an act was passed providing for the discontinuance of the active services of the paymaster general, quartermaster general and commissary general. Another act appropriated twenty thousand dollars to enable the governor to care for the sick and wounded soldiers of the State. There was also another act passed authorizing the auditing, by the quartermaster general, of bills for subsistence and transportation of the Wisconsin cavalry regiments. At the extra session called by Governor Salomon, for the tenth of September, 1862, an amendment was made to the law granting aid to families of volunteers, by including all regiments of cavalry, infantry, or batteries of artillery before that time raised in the State, or that might afterward be raised and mustered into the United States service. It also authorized the levying of a State tax of two hundred and seventy-five thousand dollars to be placed to the credit of the war fund and used in the payment of warrants for "State Aid" to families of volunteers. Another law authorized commissioned officers out of the State to administer oaths and take acknowledgments of deeds and other papers. One act authorized soldiers in the field, although out of the State, to exercise the right of suffrage; and another gave towns, cities, incorporated villages and counties the authority to raise money to pay bounties to volunteers.

On the fifth of August, 1862, Governor Salomon received from the war department a dispatch stating that orders had been issued for a draft of three hundred thousand men to be immediately called into the service of the United States, to serve for nine months unless sooner discharged; that if the State quota under a call made July 2, of that year, for three hundred thousand volunteers, was not filled by the fifteenth of August, the deficiency would be made up by draft; and that the secretary of war would assign the quotas to the States and establish regulations for the draft. On the eighth of that month, the governor of the State was ordered to immediately cause an enrollment of all able-bodied citizens between eighteen and forty-five years of age, by counties. Governor Salomon was authorized to appoint proper officers, and the United States promised to pay all reasonable expenses. The quota for Wisconsin, under the call for nine months' men, was eleven thousand nine hundred and four. The draft was made by the governor in obedience to the order he had received from Washington; but such had been the volunteering under the stim-

ulus caused by a fear of it, that only four thousand five hundred and thirty-seven men were drafted. This was the first and only draft made in Wisconsin by the State authorities. Subsequent ones were made under the direction of the provost marshal general at Washington.

The enlisting, organization and mustering into the United States service during Randall's administration of thirteen regiments of infantry—the First to the Thirteenth inclusive, and the marching of ten of them out of the State before the close of 1861, also, of one company of cavalry under Captain Von Deutsch and one company of sharpshooters under Captain Alexander, constituted the effective aid abroad of Wisconsin during that year to suppress the rebellion. But for the year 1862, this aid, as to number of organizations, was more than doubled, as will now be shown.

The Ninth regiment left "Camp Sigel," Milwaukee, under command of Colonel Frederick Salomon, on the twenty-second of January, 1862, numbering thirty-nine officers and eight hundred and eighty-four men, to report at Fort Leavenworth, Kansas.

The Twelfth infantry left Wisconsin under command of Colonel George E. Bryant, ten hundred and forty-five strong, the eleventh of January, 1862, with orders to report at Weston, Missouri.

The Thirteenth regiment—Colonel Maurice Maloney—left "Camp Tredway," Janesville, on the eighteenth of January, 1862, nine hundred and seventy strong, under orders to report at Leavenworth, Kansas, where it arrived on the twenty-third.

The Fourteenth regiment of infantry departed from "Camp Wood," Fond du Lac, under command of Colonel David E. Wood, for St. Louis, Missouri, on the eighth of March, 1862, it having been mustered into the United States service on the thirtieth of January previous. Its total strength was nine hundred and seventy officers and men. It arrived at its destination on the tenth of March, and went into quarters at "Benton Barracks."

The Fifteenth regiment, mostly recruited from the Scandinavian population of Wisconsin, was organized at "Camp Randall," Madison—Hans C. Heg as colonel. Its muster into the United States service was completed on the fourteenth of February, 1862, it leaving the State for St. Louis, Missouri, on the second of March following, with a total strength of eight hundred and one officers and men.

The Sixteenth regiment was organized at "Camp Randall," and was mustered into the service on the last day of January, 1862, leaving the State, with Benjamin Allen as colonel, for St. Louis on the thirteenth of March ensuing, having a total strength of one thousand and sixty-six.

The regimental organization of the Seventeenth infantry (Irish), Colonel John L. Doran, was effected at "Camp Randall," and the mustering in of the men completed on the fifteenth of March, 1862, the regiment leaving the State on the twenty-third for St. Louis.

The Eighteenth regiment organized at "Camp Trowbridge," Milwaukee—James S. Alban, colonel—completed its muster into the United States service on the fifteenth of March, 1862, and left the State for St. Louis on the thirtieth, reaching their point of destination on the thirty-first.

The Nineteenth infantry rendezvoused at Racine as an independent regiment, its colonel, Horace T. Sanders, being commissioned by the war department. The men were mustered into the service as fast as they were enlisted. Independent organizations being abolished, by an order from Washington, the Nineteenth was placed on the same footing as other regiments in the State. On the twentieth of April, 1862, the regiment was ordered to "Camp Randall" to guard rebel prisoners. Here the mustering in was completed, numbering in all nine hundred and seventy-three. They left the State for Washington on the second of June.

The muster into the United States service of the Twentieth regiment—Bertine Pinckney, colonel—was completed on the twenty-third of August, 1862, at "Camp Randall," the original strength being nine hundred and ninety. On the thirtieth of August the regiment left the State for St. Louis.

The Twenty-first infantry was organized at Oshkosh, being mustered in on the fifth of September, 1862, with a force of one thousand and two, all told—Benjamin J. Sweet, colonel—leaving the State for Cincinnati on the eleventh.

The Twenty-second regiment—Colonel William L. Utley—was organized at "Camp Utley," Racine, and mustered in on the second of September, 1862. Its original strength was one thousand and nine. It left the State for Cincinnati on the sixteenth.

On the thirtieth of August, 1862, the Twenty-third regiment—Colonel Joshua J. Guppy—was mustered in at "Camp Randall," leaving Madison for Cincinnati on the fifteenth.

The Twenty-fourth infantry rendezvoused at "Camp Sigel," Milwaukee. Its muster in was completed on the twenty-first of August, 1862, the regiment leaving the State under Colonel Charles H. Larrabee, for Kentucky, on the fifth of September, one thousand strong.

On the fourteenth of September, 1862, at "Camp Salomon," LaCrosse, the Twenty-fifth regiment was mustered into the service—Milton Montgomery, colonel. They left the State on the nineteenth with orders to report to General Pope, at St. Paul, Minnesota, to aid in suppressing the Indian difficulties in that State. Their entire strength was one thousand and eighteen. The regiment, after contributing to the preservation of tranquillity among the settlers, and deterring the Indians from hostilities, returned to Wisconsin, arriving at "Camp Randall" on the eighteenth of December, 1862.

The Twenty-sixth—almost wholly a German regiment—was mustered into the service at "Camp Sigel," Milwaukee, on the seventeenth of September, 1862. The regiment, under command of Colonel William H. Jacobs, left the State for Washington city on the sixth of October, one thousand strong.

The Twenty-seventh infantry was ordered to rendezvous at "Camp Sigel," Milwaukee, on the seventeenth of September, 1862; but the discontinuance of recruiting for new regiments in August left the Twenty-seventh with only seven companies full. An order authorizing the recruiting of three more companies was received, and under the supervision of Colonel Conrad Krez the organization was completed, but the regiment at the close of the year had not been mustered into the service.

On the twenty-fourth of October, 1862, the Twenty-eighth regiment—James M. Lewis, of Oconomowoc, colonel—was mustered into the United States service at "Camp Washburn," Milwaukee. Its strength was nine hundred and sixty-one. In November, the regiment was employed in arresting and guarding the draft rioters in Ozaukee county. It left the State for Columbus, Kentucky, on the twentieth of December, where they arrived on the twenty-second; remaining there until the fifth of January, 1863.

The Twenty-ninth infantry—Colonel Charles R. Gill—was organized at "Camp Randall," where its muster into the United States service was completed on the twenty-seventh of September, 1862, the regiment leaving the State for Cairo, Illinois, on the second of November.

The Thirtieth regiment, organized at "Camp Randall" under the supervision of Colonel Daniel J. Dill, completed its muster into the United States service on the twenty-first of October, 1862, with a strength of nine hundred and six. On the sixteenth of November, one company of the Thirtieth was sent to Green Bay to protect the draft commissioner, remaining several weeks. On the eighteenth, seven companies moved to Milwaukee to assist in enforcing the draft in Milwaukee county, while two companies remained in "Camp Randall" to guard Ozaukee rioters.

Veruon Tichenor
WAUKESHA.

On the twenty-second, six companies from Milwaukee went to West Bend, Washington county, one company returning to "Camp Randall." After the completion of the draft in Washington county, four companies returned to camp, while two companies were engaged in gathering up the drafted men.

The final and complete organization of the Thirty-first infantry—Colonel Isaac E. Messmore—was not concluded during the year 1862.

The Thirty-second regiment, organized at "Camp Bragg," Oshkosh, with James H. Howe as colonel, was mustered into the service on the twenty-fifth of September, 1862; and, on the thirtieth of October, leaving the State, it proceeded by way of Chicago and Cairo to Memphis, Tennessee, going into camp on the third of November. The original strength of the Thirty-second was nine hundred and ninety-three.

The Thirty-third infantry—Colonel Jonathan B. Moore—mustered in on the eighteenth of October, 1862, at "Camp Utley," Racine, left the State, eight hundred and ninety-two strong, moving by way of Chicago to Cairo.

The Thirty-fourth regiment, drafted men, original strength nine hundred and sixty-one—Colonel Fritz Anneke—had its muster into service for nine months completed at "Camp Washburn," Milwaukee, on the last day of the year 1862.

Of the twenty-four infantry regiments, numbered from the Twelfth to the Thirty-fourth inclusive, and including also the Ninth, three—the Ninth, Twelfth, and Thirteenth—were mustered into the United States service in 1861. The whole of the residue were mustered in during the year 1862, except the Twenty-seventh and the Thirty-first. All were sent out of the State during 1862, except the last two mentioned and the Twenty-fifth, Thirtieth, and Thirty-fourth.

The First regiment of cavalry—Colonel Edward Daniels—perfected its organization at "Camp Harvey," Kenosha. Its muster into the United States service was completed on the eighth of March, 1862, the regiment leaving the State for St. Louis on the seventeenth, with a strength of eleven hundred and twenty-four.

The muster of the Second Wisconsin cavalry was completed on the twelfth of March, 1862, at "Camp Washburn," Milwaukee, the regiment leaving the State for St. Louis on the twenty-fourth, eleven hundred and twenty-seven strong. It was under the command of Cadwallader C. Washburn as colonel.

The Third Wisconsin cavalry—Colonel William A. Barstow—was mustered in at "Camp Barstow," Janesville. The muster was completed on the 31st of January, 1862, the regiment leaving the State on the 26th of March for St. Louis, with a strength of eleven hundred and eighty-six.

The original project of forming a regiment of light artillery in Wisconsin was overruled by the war department, and the several batteries were sent from the State as independent organizations.

The First battery—Captain Jacob T. Foster—perfected its organization at "Camp Utley," where the company was mustered in, it leaving the State with a strength of one hundred and fifty-five, on the 23d of January, 1862, for Louisville, where the battery went into "Camp Irvine," near that city. The Second battery—Captain Ernest F. Herzberg—was mustered into the service at "Camp Utley," October 10, 1861, the company numbering one hundred and fifty-three. It left the State for Baltimore, on the 21st of January, 1862. The Third battery—Captain L. H. Drury—completed its organization of one hundred and seventy at "Camp Utley," and was mustered in October 10, 1861, leaving the State for Louisville, on the 23d of January, 1862. The Fourth battery—Captain John F. Vallee—rendezvoused at "Camp Utley." Its muster in was completed on the 1st of October, 1861, its whole force being one hundred and fifty one. The company left the State for Baltimore on the 21st of January, 1862. The Fifth bat-

tery, commanded by Captain Oscar F. Pinney, was mustered in on the 1st of October, 1861, at "Camp Utley," leaving the State for St. Louis, on the 15th of March, 1862, one hundred and fifty-five strong. The Sixth battery—Captain Henry Dillon—was mustered in on the 2d of October, 1861, at "Camp Utley," leaving the State for St. Louis, March 15, 1862, with a numerical strength of one hundred and fifty-seven. The Seventh battery—Captain Richard R. Griffiths—was mustered in on the 4th of October, 1861, at "Camp Utley," and proceeded on the 15th of March, 1862, with the Fifth and Sixth batteries to St. Louis. The Eighth battery, commanded by Captain Stephen J. Carpenter, was mustered in on the 8th of January, 1862, at "Camp Utley," and left the State on the 18th of March following, for St. Louis, one hundred and sixty-one strong. The Ninth battery, under command of Captain Cyrus H. Johnson, was organized at Burlington, Racine county. It was mustered in on the 7th of January, 1862, leaving "Camp Utley" for St. Louis, on the 18th of March. At St. Louis, their complement of men— one hundred and fifty-five—was made up by the transfer of forty-five from another battery. The Tenth battery—Captain Yates V. Bebee—after being mustered in at Milwaukee, on the 10th of February, 1862, left "Camp Utley," Racine, on the 18th of March for St. Louis, one hundred and seventeen strong. The Eleventh battery—Captain John O'Rourke—was made up of the "Oconto Irish Guards" and a detachment of Illinois recruits. The company was organized at "Camp Douglas," Chicago, in the Spring of 1862. Early in 1862, William A. Pile succeeded in enlisting ninety-nine men as a company to be known as the Twelfth battery. The men were mustered in and sent forward in squads to St. Louis. Captain Pile's commission was revoked on the 18th of July. His place was filled by William Zickrick. These twelve batteries were all that left the State in 1862. To these are to be added the three regiments of cavalry and the nineteen regiments of infantry, as the effective force sent out during the year by Wisconsin.

The military officers of the State, at the commencement of 1863, were Edward Salomon, governor and commander-in-chief; Brigadier General Augustus Gaylord, adjutant general; Colonel S. Nye Gibbs, assistant adjutant general; Brigadier General Nathaniel F. Lund, quartermaster general; Brigadier General E. B. Wolcott, surgeon general; and Colonel W. H. Watson, military secretary. The two incomplete regiments of 1862—the Twenty-seventh and Thirty-first volunteers—were completed and in the field in March, 1863. The former was mustered in at "Camp Sigel"—Colonel Conrad Krez—on the 7th of March, and left the State, eight hundred and sixty-five strong, on the 16th for Columbus, Kentucky; the latter, under command of Colonel Isaac E. Messmore, with a strength of eight hundred and seventy-eight, left Wisconsin on the 1st of March, for Cairo, Illinois. The Thirty-fourth (drafted) regiment left "Camp Washburn," Milwaukee, on the 31st of January, 1863, for Columbus, Kentucky, numbering nine hundred and sixty-one, commanded by Colonel Fritz Anneke. On the 17th of February, 1863, the Twenty-fifth regiment left "Camp Randall" for Cairo, Illinois. The Thirtieth regiment remained in Wisconsin during the whole of 1863, performing various duties—the only one of the whole thirty-four that, at the end of that year, had not left the State.

On the 14th of January, 1863, the legislature of Wisconsin, as before stated, convened at Madison. Governor Salomon, in his message to that body, gave a summary of the transactions of the war fund during the calendar year; also of what was done in 1862, in the recruiting of military forces, and the manner in which the calls of the president were responded to. There were a number of military laws passed at this session. A multitude of special acts authorizing towns to raise bounties for volunteers, were also passed.

No additional regiments of infantry besides those already mentioned were organized in 1863, although recruiting for old regiments continued. On the 3d of March, 1863, the congress of the United States passed the "Conscription Act." Under this act, Wisconsin was divided

into six districts. In the first district, I. M. Bean was appointed provost marshal; C. M. Baker, commissioner; and J. B. Dousman, examining surgeon. Headquarters of this district was at Milwaukee. In the second district, S. J. M. Putnam was appointed provost marshal; L. B. Caswell, commissioner; and Dr. C. R. Head, examining surgeon. Headquarters of this district was at Janesville. In the third district, J. G. Clark was appointed provost marshal; E. E. Byant, commissioner; and John H. Vivian, examining surgeon. Headquarters at Prairie du Chien. In the fourth district, E. L. Phillips was appointed provost marshal; Charles Burchard, commissioner; and L. H. Cary, examining surgeon. Headquarters at Fond du Lac. In the fifth district, C. R. Merrill was appointed provost marshal; William A. Bugh, commissioner; and H. O. Crane, examining surgeon. Headquarters at Green Bay. In the sixth district, B. F. Cooper was appointed provost marshal; L. S. Fisher, commissioner; and D. D. Cameron, examining surgeon. Headquarters at LaCrosse. The task of enrolling the State was commenced in the month of May, and was proceeded with to its completion. The nine months' term of service of the Thirty-fourth regiment, drafted militia, having expired, the regiment was mustered out of service on the 8th of September.

The enrollment in Wisconsin of all persons liable to the "Conscription" amounted to 121,202. A draft was ordered to take place in November. Nearly fifteen thousand were drafted, only six hundred and twenty-eight of whom were mustered in; the residue either furnished substitutes, were discharged, failed to report, or paid commutation.

In the Summer of 1861, Company "K," Captain Langworthy, of the Second Wisconsin infantry, was detached and placed on duty as heavy artillery. His company was designated as "A," First Regiment Heavy Artillery. This was the only one organized until the Summer of 1863; but its organization was effected outside the State. Three companies were necessary to add to company "A" to complete the battalion. Batteries "B," "C" and "D" were, therefore, organized in Wisconsin, all leaving the State in October and November, 1863.

NINTH ADMINISTRATION—JAMES T. LEWIS, GOVERNOR—1864—1865.

James T. Lewis, of Columbia county, was inaugurated governor of Wisconsin on the fourth of January, 1864. In an inaugural address, the incoming governor pledged himself to use no executive patronage for a re-election; declared he would administer the government without prejudice or partiality; and committed himself to an economical administration of affairs connected with the State. On the thirteenth the legislature met in its seventeenth regular session. W. W. Field was elected speaker of the assembly. The republican and union men were in the majority in this legislature. A number of acts were passed relative to military matters.

On the 1st day of October, J. L. Pickard having resigned as superintendent of public instruction, J. G. McMynn was, by the governor, appointed to fill the vacancy. On the fifteenth of November, Governor Lewis appointed Jason Downer an associate justice of the supreme court, to fill a vacancy caused by the resignation of Judge Byron Paine, who had resigned his position to take effect on that day, in order to accept the position of lieutenant colonel of one of the regiments of Wisconsin, to which he had been commissioned on the tenth of August previous. The November elections of this year were entered into with great zeal by the two parties, owing to the fact that a president and vice president of the United States were to be chosen. The republicans were victorious. Electors of that party cast their eight votes for Lincoln and Johnson. The members elected to the thirty-ninth congress from Wisconsin at this election were: from the first district, H. E. Paine; from the second, I. C. Sloan; from the third, Amasa Cobb; from the fourth, C. A. Eldredge; from the fifth, Philetus Sawyer; and

from the sixth district, W. D. McIndoe. All were republicans except Eldredge, who was elected as a democrat.

The Eighteenth regular session of the Wisconsin legislature began in Madison on the eleventh of January, 1865. W. W. Field was elected speaker of the assembly. The legislature was, as to its political complexion, "Republican Union." On the tenth of April, the last day of the session, Governor Lewis informed the legislature that General Lee and his army had surrendered. "Four years ago," said he, "on the day fixed for adjournment, the sad news of the fall of Fort Sumter was transmitted to the legislature. To-day, thank God! and next to Him the brave officers and soldiers of our army and navy, I am permitted to transmit to you the official intelligence, just received, of the surrender of General Lee and his army, the last prop of the rebellion. Let us rejoice, and thank the Ruler of the Universe for victory and the prospects of an honorable peace." In February preceding, both houses ratified the constitutional amendment abolishing slavery in the United States. At the Spring election, Jason Downer was chosen associate justice of the supreme court for a full term of six years. The twentieth of April was set apart by the governor as a day of thanksgiving for the overthrow of the rebellion and restoration of peace. At the Fall election both parties, republican and democratic, had tickets in the field. The republicans were victorious, electing Lucius Fairchild, governor; Wyman Spooner, lieutenant governor; Thomas S. Allen, secretary of state; William E. Smith, state treasurer; Charles R. Gill, attorney general; John G. McMynn, superintendent of public instruction; J. M. Rusk, bank comptroller; and Henry Cordier, state prison commissioner.

WAR OF SECESSION — LEWIS' ADMINISTRATION.

The military officers for 1864 were besides the governor (who was commander-in-chief) Brigadier General Augustus Gaylord, adjutant general; Colonel S. Nye Gibbs, assistant adjutant general; Brigadier General Nathaniel F. Lund, quartermaster and commissary general, and chief of ordnance; Brigadier General E. B. Wolcott, surgeon general; and Colonel Frank H. Firmin, military secretary. The legislature met at Madison on the 13th of January, 1864. "In response to the call of the General Government," said the governor, in his message to that body, "Wisconsin had sent to the field on the first day of November last, exclusive of three months' men, thirty-four regiments of infantry, three regiments and one company of cavalry, twelve batteries of light artillery, three batteries of heavy artillery, and one company of sharpshooters, making an aggregate of forty-one thousand seven hundred and seventy-five men."

Quite a number of laws were passed at this session of the legislature relative to military matters: three were acts to authorize towns, cities and villages to raise money by tax for the payment of bounties to volunteers; one revised, amended and consolidated all laws relative to extra pay to Wisconsin soldiers in the service of the United States; one provided for the proper reception by the State, of Wisconsin volunteers returning from the field of service; another repealed the law relative to allotment commissioners. One was passed authorizing the governor to purchase flags for regiments or batteries whose flags were lost or destroyed in the service: another was passed amending the law suspending the sale of lands mortgaged to the State or held by volunteers, so as to apply to drafted men; another provided for levying a State tax of \$200,000 for the support of families of volunteers. A law was passed authorizing the governor to take care of the sick and wounded soldiers of Wisconsin, and appropriated ten thousand dollars for that purpose. Two other acts authorized the borrowing of money for repelling invasion, suppressing insurrection, and defending the State in time of war. One act prohibited the taking of fees for procuring volunteers' extra bounty; another one defined the residence of certain soldiers from this State in the service of the United States, who had received

local bounties from towns other than their proper places of residence.

At the commencement of 1864, there were recruiting in the State the Thirty-fifth regiment of infantry and the Thirteenth battery. The latter was mustered in on the 29th of December, 1863, and left the State for New Orleans on the 28th of January, 1864. In February, authority was given by the war department to organize the Thirty-sixth regiment of infantry. On the 27th of that month, the mustering in of the Thirty-fifth was completed at "Camp Washburn" — Colonel Henry Orff — the regiment, one thousand and sixty-six strong, leaving the State on the 18th of April, 1864, for Alexandria, Louisiana. The other regiments, recruited and mustered into the service of the United States during the year 1864, were: the Thirty-sixth—Colonel Frank A. Haskell; the Thirty-seventh—Colonel Sam Harriman; the Thirty-eighth—Colonel James Bintliff; the Thirty-ninth—Colonel Edwin L. Buttrick; the Fortieth—Colonel W. Augustus Ray; the Forty-first—Lieutenant Colonel George B. Goodwin; the Forty-second—Colonel Ezra T. Sprague; the Forty-third—Colonel Amasa Cobb.

The regiments mustered into the service of the United States during the year 1865 were: the Forty-fourth—Colonel George C. Symes; the Forty-fifth—Colonel Henry F. Belitz; Forty-sixth—Colonel Frederick S. Lovell; Forty-seventh—Colonel George C. Ginty; Forty-eighth—Colonel Uri B. Pearsall; Forty-ninth—Colonel Samuel Fallows; Fiftieth—Colonel John G. Clark; Fifty-first—Colonel Leonard Martin; Fifty-second—Lieutenant Colonel Hiram J. Lewis; and Fifty-third—Lieutenant Colonel Robert T. Pugh.

All of the fifty-three regiments of infantry raised in Wisconsin during the war, sooner or later moved to the South and were engaged there in one way or other, in aiding to suppress the rebellion. Twelve of these regiments were assigned to duty in the eastern division, which constituted the territory on both sides of the Potomac and upon the seaboard from Baltimore to Savannah. These twelve regiments were: the First (three months), Second, Third, Fourth, Fifth, Sixth, Seventh, Nineteenth, Twenty-sixth, Thirty-sixth, Thirty-seventh, and Thirty-eighth. Ten regiments were assigned to the central division, including Kentucky, Tennessee, Northern Alabama, and Georgia. These ten were: the Tenth, Twenty-first, Twenty-second, Twenty-fourth, Thirtieth, Forty-third, Forty-fourth, Forty-fifth, Forty-sixth, and Forty-seventh. Added to these was the First (re-organized). Thirty-one regiments were ordered to the western division, embracing the country west and northwest of the central division. These were: the Eighth, Ninth, Eleventh, Twelfth, Thirteenth, Fourteenth, Fifteenth, Sixteenth, Seventeenth, Eighteenth, Twentieth, Twenty-third, Twenty-fifth, Twenty-seventh, Twenty-eighth, Twenty-ninth, Thirty-first, Thirty-second, Thirty-third, Thirty-fourth, Thirty-fifth, Thirty-ninth, Fortieth, Forty-first, Forty-second, Forty-eighth, Forty-ninth, Fiftieth, Fifty-first, Fifty-second, and Fifty-third. During the war several transfers were made from one district to another. There were taken from the eastern division, the Third and Twenty-sixth, and sent to the central division; also the Fourth, which was sent to the department of the gulf. The Twelfth, Thirteenth, Fifteenth, Sixteenth, Seventeenth, Eighteenth, Twenty-fifth, Thirtieth, Thirty-first and Thirty-second were transferred from the western to the central department.

The four regiments of cavetry were assigned to the western division — the First regiment being afterward transferred to the central division. Of the thirteen batteries of light artillery, the Second, Fourth, and Eleventh, were assigned to the eastern division; the First and Third, to the central division; the Fifth, Sixth, Seventh, Eighth, Ninth, Tenth, Twelfth, and Thirteenth, to the western division. During the war, the First was transferred to the western division; while the Fifth, Sixth, Eighth, Tenth, and Twelfth, were transferred to the central division. Of the twelve batteries of the First regiment of heavy artillery — "A," "E," "F," "G," "H," "I," "K," "L," and "M," were assigned to duty in the eastern division; "B" and "C," to the central

division; and "D," to the western division. Company "G," First regiment Berdan's sharpshooters, was assigned to the eastern division.

The military officers of the State for 1865 were the same as the previous year, except that Brigadier General Lund resigned his position as quartermaster general, James M. Lynch being appointed in his place. The legislature of this year met in Madison on the 11th of January. "To the calls of the Government for troops," said Governor Lewis, in his message, "no State has responded with greater alacrity than has Wisconsin. She has sent to the field, since the commencement of the war, forty-four regiments of infantry, four regiments and one company of cavalry, one regiment of heavy artillery, thirteen batteries of light artillery, and one company of sharpshooters, making an aggregate (exclusive of hundred day men) of seventy-five thousand one hundred and thirty-three men."

Several military laws were passed at this session: one authorizing cities, towns, and villages to pay bounties to volunteers; another, incorporating the Wisconsin Soldiers' Home; two others, amending the act relative "to the commencement and prosecution of civil actions against persons in the military service of the country." One was passed authorizing the payment of salaries, clerk hire, and expenses, of the offices of the adjutant general and quartermaster general from the war fund; another, amending the act authorizing commissioned officers to take acknowledgment of deeds, affidavits and depositions; another, amending the act extending the right of suffrage to soldiers in the field. One act provides for correcting and completing the records of the adjutant general's office, relative to the military history of the individual members of the several military organizations of this State; another fixes the salary of the adjutant general and the quartermaster general, and their clerks and assistants; another prohibits volunteer or substitute brokerage. One act was passed supplementary and explanatory of a previous one of the same session, authorizing towns, cities, or villages, to raise money to pay bounties to volunteers; another, amending a law of 1864, relating to the relief of soldiers' families; and another, providing for the establishment of State agencies for the relief and care of sick, wounded, and disabled Wisconsin soldiers. There was an act also passed, authorizing the borrowing of money for a period not exceeding seven months, to repel invasion, suppress insurrection, and defend the State in time of war,—the amount not to exceed \$850,000.

On the 13th of April, 1865, orders were received to discontinue recruiting in Wisconsin, and to discharge all drafted men who had not been mustered in. About the first of May, orders were issued for the muster out of all organizations whose term of service would expire on or before the first of the ensuing October. As a consequence, many Wisconsin soldiers were soon on their way home. State military officers devoted their time to the reception of returning regiments, to their payment by the United States, and to settling with those who were entitled to extra pay from the State. Finally, their employment ceased—the last soldier was mustered out—the War of the Rebellion was at an end. Wisconsin had furnished to the federal army during the conflict over ninety thousand men, a considerable number more than the several requisitions of the General Government called for. Nearly eleven thousand of these were killed or died of wounds received in battle, or fell victims to diseases contracted in the military service, to say nothing of those who died after their discharge, and whose deaths do not appear upon the military records. Nearly twelve million dollars were expended by the State authorities, and the people of the several counties and towns throughout the State, in their efforts to sustain the National Government.

Wisconsin feels, as well she may, proud of her record made in defense of national existence. Shoulder to shoulder with the other loyal States of the Union, she stood—always ranking among the foremost. From her workshops, her farms, her extensive pineries, she poured forth stalwart

men, to fill up the organizations which she sent to the field. The blood of these brave men drenched almost every battle-field from Pennsylvania to the Rio Grande, from Missouri to Georgia. To chronicle the deeds and exploits—the heroic achievements—the noble enthusiasm—of the various regiments and military organizations sent by her to do battle against the hydra-headed monster secession—would be a lengthy but pleasant task; but these stirring annals belong to the history of our whole country. Therein will be told the story which, to the latest time in the existence of this republic, will be read with wonder and astonishment. But an outline of the action of the State authorities and their labors, and of the origin of the various military organizations, in Wisconsin, to aid in the suppression of the rebellion, must needs contain a reference to other helps employed—mostly incidental, in many cases wholly charitable, but none the less effective: the sanitary operations of the State during the rebellion.

Foremost among the sanitary operations of Wisconsin during the war of the rebellion was the organization of the surgeon general's department—to the end that the troops sent to the field from the State should have a complete and adequate supply of medicine and instruments as well as an efficient medical staff. In 1861, Governor Randall introduced the practice of appointing agents to travel with the regiments to the field, who were to take charge of the sick. The practice was not continued by Governor Harvey. On the 17th of June, 1862, an act of the legislature became a law authorizing the governor to take care of the sick and wounded soldiers of Wisconsin, and appropriated twenty thousand dollars for that purpose. Under this law several expeditions were sent out of the State to look after the unfortunate sons who were suffering from disease or wounds. Soldiers' aid societies were formed throughout the State soon after the opening scenes of the rebellion. When temporary sanitary operations were no longer a necessity in Wisconsin, there followed two military benevolent institutions intended to be of a permanent character: the Soldiers' Home at Milwaukee, and the Soldiers' Orphans' Home at Madison. The latter, however, has been discontinued. The former, started as a State institution, is now wholly under the direction and support of the General Government.

Whether in the promptitude of her responses to the calls made on her by the General Government, in the courage or constancy of her soldiery in the field, or in the wisdom and efficiency with which her civil administration was conducted during the trying period covered by the war of the rebellion, Wisconsin proved herself the peer of any loyal State.

TABULAR STATEMENT.

We publish on the following pages the report of the Adjutant General at the close of the war, but before all the Wisconsin organizations had been mustered out. It shows how many brave men courageously forsook homes, friends and the comforts of peaceful avocations, offering their lives in defense of their country's honor. Twenty-two out of every hundred either died, were killed or wounded. Thirteen out of every hundred found a soldier's grave, while only 60 per cent of them marched home at the end of the war. Monuments may crumble, cities fall into decay, the tooth of time leave its impress on all the works of man, but the memory of the gallant deeds of the army of the Union in the great war of the rebellion, in which the sons of Wisconsin bore so conspicuous a part, will live in the minds of men so long as time and civilized governments endure.

Table showing total number of Volunteers originally in the several organizations from the State, and numerical strength at the close of war.

Remaining in service Nov. 1, 1865.....																										

* November 1, 1865. † October 1, 1865.

‡ Drafted men who paid commutation; volunteers, substituted and drafted men, mustered out before assignment; musters in the field reported by the War Department, with out stating organization.

‡ To the number of 615 remaining in the service, November 1, 1865, should be added 145 transferred from the Twentieth and Twenty-third Regiments.

TENTH ADMINISTRATION.—LUCIUS FAIRCHILD, GOVERNOR—1866-1867.

The inauguration of the newly elected State officers took place on Monday, January 1, 1866. The legislature, in its nineteenth regular session, convened on the tenth. H. D. Barron was elected speaker of the assembly. The "Union" and "Republican" members were in a majority in both branches of the legislature. "Our first duty," said Governor Fairchild in his message, "is to give thanks to Almighty God for all His mercies during the year that is past." "The people of no nation on earth," he continued, "have greater cause to be thankful than have our people. The enemies of the country have been overthrown in battle. The war has settled finally great questions at issue between ourselves." Among the joint resolutions passed at this session was one submitting the question of a constitutional convention to frame a new constitution for the State, to the people. The legislature adjourned on the twelfth of April, having been in session ninety-three days. At the general election in November of this year, there were elected to the Fortieth congress: H. E. Paine, from the first district; B. F. Hopkins, from the second; Amasa Cobb, from the third; C. A. Eldredge, from the fourth; Philetus Sawyer, from the fifth, and C. C. Washburn, from the sixth district. All were republicans except Eldredge, who was elected as a democrat. The proposition for a constitutional convention was voted upon by the people at this election, but was defeated.

The twentieth session of the legislature commenced on the ninth of January, 1867. Angus Cameron was elected speaker of the assembly. The legislature was strongly "Republican-Union." The message of Governor Fairchild was read by him in person, on the tenth. On the twenty-third, the two houses, in joint convention, elected Timothy O. Howe United States senator for the term of six years, commencing on the fourth of March next ensuing. This legislature passed an act submitting to the people at the next Fall election an amendment to section twenty-one of article four of the constitution of the State, providing for paying a salary of three hundred and fifty dollars to each member of the legislature, instead of a *per diem* allowance, as previously given. A *sine die* adjournment took place on the eleventh of April, after a service of ninety-three days.

To provide for the more efficient collection of license fees due the State, an act, approved on the day of adjournment, authorized the governor to appoint an agent of the treasury, to superintend and enforce the collection of fees due for licenses fixed by law. This law is still in force, the agent holding his office at the pleasure of the executive of the State.

On the 27th of March, Chief Justice Dixon resigned his office, but was immediately appointed by the governor to the same position. At the election in April following, associate Justice Cole was re-elected, without opposition, for six years from the first Monday in January following. On the 16th of August, Associate Justice Downer having resigned, Byron Paine was appointed by the governor in his place.

The republican State ticket, in the Fall, was elected over the democratic—resulting in the choice of Lucius Fairchild for governor; Wyman Spooner, for lieutenant governor; Thomas S. Allen, Jr., secretary of state; William E. Smith, for state treasurer; Charles R. Gill, for attorney general; A. J. Craig, for superintendent of public instruction; Jeremiah M. Rusk, for bank comptroller, and Henry Cordier, for state prison commissioner. Except Craig, all these officers were the former incumbents. The amendment to section 21 of article 4 of the constitution of the State, giving the members a salary instead of a *per diem* allowance, was adopted at this election. As it now stands, each member of the legislature receives, for his services, three hundred and fifty dollars per annum, and ten cents for every mile he travels in going to and returning from the place of the meetings of the legislature. on the most

usual route. In case of any extra session of the legislature, no additional compensation shall be allowed to any member thereof, either directly or indirectly.

ELEVENTH ADMINISTRATION.—LUCIUS FAIRCHILD, GOVERNOR (SECOND TERM)—1868—1869.

The Eleventh Administration in Wisconsin commenced at noon on the 6th day of January, 1868. This was the commencement of Governor Fairchild's second term. On the eighth of January, 1868, began the twenty-first regular session of the legislature of Wisconsin. A. M. Thomson was elected speaker of the assembly. Of the laws of a general nature passed by this legislature, was one abolishing the office of bank comptroller, transferring his duties to the state treasurer, and another providing for the establishing of libraries in the various townships of the State. A visible effect was produced by the constitutional amendment allowing members a salary, in abbreviating this session, though not materially diminishing the amount of business transacted. A *sine die* adjournment took place on the sixth of March.

At the election in April, 1868, Chief Justice Dixon was chosen for the unexpired balance of his own term, ending on the first Monday of January, 1870. At the same election, Byron Paine was chosen associate justice for the unexpired balance of Associate Justice Downer's term, ending the 1st day of January, 1872.

At the Fall election in this year, republican electors were chosen over those upon the democratic ticket, for president and vice president; and, as a consequence, Grant and Colfax received the vote of Wisconsin. Of the members elected at the same time, to the forty-first congress, all but one were republicans—Eldredge being a democrat. The successful ticket was: H. E. Paine, from the first district; B. F. Hopkins, from the second; Amasa Cobb, from the third; C. A. Eldredge, from the fourth; Philetus Sawyer, from the fifth, and C. C. Washburn, from the sixth district. These were all members, from their respective districts, in the previous congress—the only instance since Wisconsin became a State of a re-election of all the incumbents.

On the thirteenth of January, 1869, began the twenty-second regular session of the State legislature. A. M. Thomson was elected speaker of the assembly. A very important duty imposed upon both houses was the election of a United States senator in the place of James R. Doolittle. The republicans having a majority in the legislature on joint ballot, the excitement among the members belonging to that party rose to a high pitch. The candidates for nomination were Matthew H. Carpenter and C. C. Washburn. The contest was, up to that time, unparalleled in Wisconsin for the amount of personal interest manifested. Both gentlemen had a large lobby influence assembled at Madison. Carpenter was successful before the republican nominating convention, on the sixth ballot. On the twenty-seventh of January, the two houses proceeded to ratify the nomination by electing him United States senator for six years, from the fourth of March following. One of the most important transactions entered into by the legislature of 1869 was the ratification of the suffrage amendment to the constitution of the United States. Both houses adjourned *sine die* on the eleventh of March—a very short session. At the spring election, on the 6th of April, Luther S. Dixon was re-elected without opposition, chief justice of the supreme court, for a term of six years, from the first Monday in January next ensuing. In the Fall, both democrats and republicans put a State ticket in the field for the ensuing election: the republicans were successful, electing Lucius Fairchild, governor; Thaddeus C. Pound, lieutenant governor; Llywelyn Breese, secretary of state; Henry Baetz, state treasurer; S. S. Barlow, attorney general; George F. Wheeler, state prison commissioner; and A. L. Craig, superintendent of public instruction. The office of bank comptroller expired on the 31st day of December, 1869, the duties of the office being transferred to the state treasurer.

At this election, an amendment to sections 5 and 9 of article five of the constitution of the State was ratified and adopted by the people. Under this amendment, the governor receives, during his continuance in office, an annual compensation of five thousand dollars, which is in full for all traveling or other expenses incident to his duties. The lieutenant governor receives, during his continuance in office, an annual compensation of one thousand dollars.

TWELFTH ADMINISTRATION.—LUCIUS FAIRCHILD, GOVERNOR (THIRD TERM)—1870—1871.

On the third of January, 1870, commenced the twelfth administration in Wisconsin, Governor Fairchild thus entering upon his third term as chief executive of the State; the only instance since the admission of Wisconsin into the Union, of the same person being twice re-elected to that office. It was an emphatic recognition of the value of his services in the gubernatorial chair. On the twelfth of January, the twenty-third regular session of the legislature of the State commenced at Madison. James M. Bingham was elected speaker of the assembly. Before the expiration of the month, Governor Fairchild received official information that over two hundred thousand dollars of the war claim of Wisconsin upon the General Government had been audited, considerable more than one hundred thousand having the previous year been allowed. In the month of March, an energetic effort was made in the legislature, by members from Milwaukee, to remove the seat of government from Madison to their city; but the project was defeated by a considerable majority in the assembly voting to postpone the matter indefinitely. According to section eight of article one of the constitution, as originally adopted, no person could be held to answer for a criminal offense unless on the presentment or indictment of a grand jury, except in certain cases therein specified. The legislature of 1869 proposed an amendment against the "grand jury system" of the constitution, and referred it to the legislature of 1870 for their approval or rejection. The latter took up the proposition and agreed to it by the proper majority, and submitted it to the people at the next election for their ratification. The *sine die* adjournment of both houses took place on the seventeenth of March, 1870. On the first day of January, previous, the member of congress from the second district of the State, B. F. Hopkins, died, and David Atwood, republican, was elected to fill the vacancy on the fifteenth of February following.

Early in 1870, was organized the "Wisconsin Academy of Sciences, Arts and Letters." By an act of the legislature approved March 16, of that year, it was incorporated, having among its specific objects, researches and investigations in the various departments of the material, metaphysical, ethical, ethnological and social sciences; a progressive and thorough scientific survey of the State, with a view of determining its mineral, agricultural and other resources; the advancement of the useful arts, through the application of science, and by the encouragement of original invention; the encouragement of the fine arts, by means of honors and prizes awarded to artists for original works of superior merit; the formation of scientific, economical and art museums; the encouragement of philological and historical research; the collection and preservation of historic records, and the formation of a general library; and the diffusion of knowledge by the publication of original contributions to science, literature and the arts. The academy has already published four volumes of transactions, under authority of the State.

The fourth charitable institution established by Wisconsin was the "Northern Hospital for the Insane," located at Oshkosh, Winnebago county. It was authorized by an act of the legislature approved March 10, 1870. The law governing the admission of patients to this hospital is the same as to the Wisconsin State Hospital.

On the third day of July, 1870, A. J. Craig, superintendent of public instruction, died of consumption, and Samuel Fallows was, on the 6th of that month, appointed by the governor to fill the place made vacant by his death. The census taken this year by the General Government, showed the population of Wisconsin to be over one million sixty-four thousand. At the Fall election for members to the forty-second congress, Alexander Mitchell was chosen to represent the first district; G. W. Hazelton, the second; J. A. Barber, the third; C. A. Eldredge, the fourth; Philetus Sawyer, the fifth; and J. M. Rusk, the sixth district. Mitchell and Eldredge were democrats; the residue were republicans. The amendment to section 8, of article 7 of the constitution of the State, abolishing the grand jury system was ratified by a large majority. Under it, no person shall be held to answer for a criminal offense without due process of law, and no person, for the same offense, shall be put twice in jeopardy of punishment, nor shall be compelled in any criminal case to be a witness against himself. All persons shall, before conviction, be bailable by sufficient sureties, except for capital offenses when the proof is evident and the presumption great; and the privilege of the writ of *habeas corpus* shall not be suspended unless, when in cases of rebellion or invasion, the public safety may require it.

Governor Fairchild, in his last annual message to the legislature, delivered to that body at its twenty-fourth regular session beginning on the eleventh of January, 1871, said that Wisconsin State polity was so wisely adapted to the needs of the people, and so favorable to the growth and prosperity of the commonwealth, as to require but few changes at the hands of the legislature, and those rather of detail than of system. At the commencement of this session, William E. Smith was elected speaker of the assembly. A very carefully-perfected measure of this legislature was one providing for the trial of criminal offenses on information, without the intervention of a Grand Jury. A state commissioner of immigration, to be elected by the people, was provided for. Both bodies adjourned *sine die* on the twenty-fifth of March. On the thirteenth of January preceding, Associate Justice Byron Paine, of the supreme court, died; whereupon the governor, on the 20th of the same month, appointed in his place, until the Spring election should be held, William Penn Lyon. The latter, at the election in April, was chosen by the people to serve the unexpired time of Associate Justice Paine, ending the first Monday of January, 1872, and for a full term of six years from the same date. On the 3d of April, Ole C. Johnson was appointed by the governor state commissioner of immigration, to serve until his successor at the next general election could be chosen by the people. To the end that the administration of public charity and correction should thereafter be conducted upon sound principles of economy, justice and humanity, and that the relations existing between the State and its dependent and criminal classes might be better understood, there was, by an act of the legislature, approved March 23, 1871, a "state board of charities and reform" created—to consist of five members to be appointed by the governor of the State, the duties of the members being to investigate and supervise the whole system of charitable and correctional institutions supported by the State or receiving aid from the State treasury, and on or before the first day of December in each year to report their proceedings to the executive of the State. This board was thereafter duly organized and its members have since reported annually to the governor their proceedings and the amount of their expenses, as required by law.

The "Wisconsin State Horticultural Society," although previously organized, first under the name of the "Wisconsin Fruit Growers' Association," was not incorporated until the 24th of March, 1871—the object of the society being to improve the condition of horticulture, rural adornment and landscape gardening. By a law of 1868, provision was made for the publication of the society's transactions in connection with the State agricultural society; but by the act

of 1871, this law was repealed and an appropriation made for their yearly publication in separate form; resulting in the issuing, up to the present time, of nine volumes. The society holds annual meetings at Madison.

At the November election both republicans and democrats had a full ticket for the suffrages of the people. The republicans were successful, electing for governor, C. C. Washburn; M. H. Pettitt, for lieutenant governor; Llywelyn Breese, for secretary of state; Henry Baetz, for state treasurer; Samuel Fallows, for superintendent of public instruction; S. S. Barlow, for attorney general; G. F. Wheeler, for state prison commissioner; and O. C. Johnson, for state commissioner of immigration. At this election an amendment to article four of the constitution of the State was ratified and adopted by the people. As it now stands, the legislature is prohibited from enacting any special or private laws in the following cases: 1st. For changing the names of persons or constituting one person the heir-at-law of another. 2d. For laying out, opening, or altering highways, except in cases of State roads extending into more than one county, and military roads to aid in the construction of which lands may be granted by congress. 3d. For authorizing persons to keep ferries across streams, at points wholly within this State. 4th. For authorizing the sale or mortgage of real or personal property of minors or others under disability. 5th. For locating or changing any county seat. 6th. For assessment or collection of taxes or for extending the time for the collection thereof. 7th. For granting corporate powers or privileges, except to cities. 8th. For authorizing the apportionment of any part of the school fund. 9th. For incorporating any town or village, or to amend the charter thereof. The legislature shall provide general laws for the transaction of any business that may be prohibited in the foregoing cases, and all such laws shall be uniform in their operation throughout the State.

Industrially considered, the year 1871 had but little to distinguish it from the average of previous years in the State, except that the late frosts of Spring and the drouth of Summer diminished somewhat the yield of certain crops. With the exception of slight showers of only an hour or two's duration, in the month of September, no rain fell in Wisconsin from the eighth of July to the ninth of October—a period of three months. The consequence was a most calamitous event which will render the year 1871 memorable in the history of the State.

The great drouth of the Summer and Fall dried up the streams and swamps in Northern Wisconsin. In the forests, the fallen leaves and underbrush which covered the ground became very ignitable. The ground itself, especially in cases of alluvial or bottom lands, was so dry and parched as to burn readily to the depth of a foot or more. For many days preceding the commencement of the second week in October fires swept through the timbered country, and in some instances over prairies and "openings." Farmers, saw-mill owners, railroad men and all others interested in exposed property, labored day and night in contending against the advance of devouring fires, which were destroying, notwithstanding the ceaseless energies of the people, an occasional mill or house and sweeping off, here and there, fences, haystacks and barns. Over the counties lying upon Green bay and a portion of those contiguous thereto on the south, southwest and west, hung a general gloom. No rain came. All energies were exhausted from "fighting fire." The atmosphere was every where permeated with smoke. The waters of the bay and even Lake Michigan, in places, were so enveloped as to render navigation difficult and in some instances dangerous. It finally became very difficult to travel upon highways and on railroads. Time drew on—but there came no rain. The ground in very many places was burned over. Persons sought refuge—some in excavations in the earth, others in wells.

The counties of Oconto, Brown, Kewaunee, Door, Manitowoc, Outagamie and Shawano were all more or less swept by this besom of destruction; but in Oconto county, and for some distance into Menomonee county, Michigan, across the Menomonee river, on the west shore of

the bay and throughout the whole length and breadth of the peninsula,—that is, the territory lying between the bay and Lake Michigan,—the fires were the most devastating. The first week in October passed; then came an actual whirlwind of fire—ten or more miles in width and of indefinite length. The manner of its progress was extraordinary. It destroyed a vast amount of property and many lives. It has been described as a tempestuous sea of flame, accompanied by a most violent hurricane, which multiplied the force of the destructive element. Forests, farm improvements and entire villages were consumed. Men, women and children perished—awfully perished. Even those who fled and sought refuge from the fire in cleared fields, in swamps, lakes and rivers, found, many of them, no safety there, but were burned to death or died of suffocation.

This dreadful and consuming fire was heralded by a sound likened to that of a railroad train—to the roar of a waterfall—to the noise of a battle at a distance. Not human beings only, but horses, oxen, cows, dogs, swine—every thing that had life—ran to escape the impending destruction. The smoke was suffocating and blinding; the roar of the tempest deafening; the atmosphere scorching. Children were separated from their parents, and trampled upon by crazed beasts. Husbands and wives rushed in wild dismay, they knew not where. Death rode triumphantly upon that devastating, fiery flood. More than one thousand men, women and children perished. More than three thousand were rendered destitute—utterly beggared. Mothers were left with fatherless children; fathers with motherless children. Every where were homeless orphans. All around lay suffering, helpless humanity, burned and maimed. Such was the sickening spectacle after the impetuous and irresistible wave of fire swept over that portion of the State. This appalling calamity happened on the 8th and 9th of October. The loss of property has been estimated at four million dollars.

At the tidings of this fearful visitation, Governor Fairchild hastened to the burnt district, to assist, as much as was in his power, the distressed sufferers. He issued, on the 13th of the month, a stirring appeal to the citizens of Wisconsin, for aid. It was promptly responded to from all portions of the State outside the devastated region. Liberal contributions in money, clothing and provisions were sent—some from other States, and even from foreign countries. Northwestern Wisconsin also suffered severely, during these months of drouth, from large fires.

A compilation of the public statutes of Wisconsin was prepared during the year 1871, by David Taylor, and published in two volumes, generally known as the Revised Statutes of 1871. It was wholly a private undertaking; but the legislature authorized the secretary of state to purchase five hundred copies for the use of the State, at its regular session in 1872.

THIRTEENTH ADMINISTRATION. — C. C. WASHBURN, GOVERNOR — 1872-1873.

The thirteenth gubernatorial administration in Wisconsin commenced on Monday, January 1, 1872. The only changes made, in the present administration from the previous one, were in the offices of governor and lieutenant governor.

The twenty-fifth regular session of the legislature began on the 10th of January, with a republican majority in both houses. Daniel Hall was elected speaker of the assembly. The next day the governor delivered to a joint convention of the legislature his first annual message—a lengthy document, setting forth in detail the general condition of State affairs. The recent great conflagrations were referred to, and relief suggested. The work of this session of the Legislature was peculiarly difficult, owing to the many general laws which the last constitutional amendment made necessary. The apportionment of the State into new congressional districts was another perplexing and onerous task. Eight districts were formed instead of six, as at the commencement of the last decade. By this, the fourth congressional apportionment, each district

elects one member. The first district consists of the counties of Rock, Racine, Kenosha, Walworth, and Waukesha; the second, of Jefferson, Dane, Sauk, and Columbia; the third, of Grant, Iowa, LaFayette, Green, Richland, and Crawford; the fourth, of Milwaukee, Ozaukee, and Washington; the fifth, of Dodge, Fond du Lac, Sheboygan and Manitowoc; the sixth, of Green Lake, Waushara, Waupaca, Outagamie, Winnebago, Calumet, Brown, Kewaunee and Door; the seventh, of Vernon, La Crosse, Monroe, Jackson, Trempealeau, Buffalo, Pepin, Pierce, St. Croix, Eau Claire, and Clark; the eighth, of Oconto, Shawano, Portage, Wood, Juneau, Adams, Marquette, Marathon, Dunn, Chippewa, Barron, Polk, Burnett, Bayfield, Douglas, and Ashland. To this district have since been added the new counties of Lincoln, Taylor, Price, Marinette and New.

After a session of seventy-seven days, the legislature finished its work, adjourning on the twenty-seventh of March. At the ensuing November election, the republican ticket for president and vice president of the United States was successful. The ten electors chosen cast their votes in the electoral college for Grant and Wilson. In the eight congressional districts, six republicans and two democrats were elected to the forty-third congress; the last mentioned from the fourth and fifth districts. C. G. Williams represented the first district; G. W. Hazleton the second; J. Allen Barber the third; Alexander Mitchell the fourth; C. A. Eldredge the fifth; Philetus Sawyer the sixth; J. M. Rusk the seventh; and A. G. McDill the eighth district.

Throughout Wisconsin, as in all portions of the Union outside the State, a singular pestilence prevailed among horses in the months of November and December, 1872, very few escaping. Horses kept in warm, well ventilated stables, avoiding currents of air, with little or no medicine, and fed upon nutritious and laxative food, soon recovered. Although but few died, yet the loss to the State was considerable, especially in villages and cities, resulting from the difficulty to substitute other animals in the place of the horse during the continuance of the disease.

The twenty-sixth regular session of the State legislature commenced on the eighth day of January, 1873, with a republican majority in both houses. Henry D. Barron was elected speaker of the assembly. On the ninth, Governor Washburn's message—his second annual one—was delivered to the two houses. It opened with a brief reference to the abundant returns from agricultural pursuits, to the developments of the industries of the state, to the advance in manufacturing, to the rapid extension in railways, and to the general and satisfactory progress in education, throughout Wisconsin. He followed with several recommendations—claiming that “many vast and overshadowing corporations in the United States are justly a source of alarm,” and that “the legislature can not scan too closely every measure that should come before it which proposed to give additional rights and privileges to the railways of the state.” He also recommended that the “granting of passes to the class of state officials who, through their public office, have power to confer or withhold benefits to a railroad company, be prohibited.” The message was favorably commented upon by the press of the state, of all parties. “If Governor Washburn,” says one of the opposition papers of his administration, “is not a great statesman, he is certainly not a small politician.” One of the first measures of this legislature was the election of United States senator, to fill the place of Timothy O. Howe, whose term of office would expire on the fourth of March next ensuing. On the twenty-second of January the two houses met in joint convention, when it was announced that by the previous action of the senate and assembly, Timothy O. Howe was again elected to that office for the term of six years. On the twentieth of March, the legislature adjourned *sine die*, after a session of seventy-two days.

Milton H. Pettitt, the lieutenant governor, died on the 23d day of March following the adjournment. By this sudden and unexpected death, the State lost an upright and conscientious public officer.

H. H. Huntkin S.
(DECEASED) WAUKESHA.

Among the important acts passed by this legislature was one providing for a geological survey of the State, to be begun in Ashland and Douglas counties, and completed within four years, by a chief geologist and four assistants, to be appointed by the governor, appropriating for the work an annual payment of thirteen thousand dollars. An act providing for a geological survey, of the State, passed by the legislature, and approved March 25, 1853, authorized the governor to appoint a state geologist, who was to select a suitable person as assistant geologist. Their duties were to make a geological and mineralogical survey of the State. Under this law Edward Daniels, on the first day of April, 1853, was appointed state geologist, superseded on the 12th day of August, 1854, by James G. Percival, who died in office on the 2d of May, 1856, at Hazel Green. By an act approved March 3, 1857, James Hall, Ezra Carr and Edward Daniels were appointed by the legislature geological commissioners. By an act approved April 2, 1860, Hall was made principal of the commission. The survey was interrupted by a repeal, March 21, 1862, of previous laws promoting it. However, to complete the survey, the matter was reinstated by the act of this legislature, approved March 29, the governor, under that act, appointing as chief geologist Increase A. Lapham, April 10, 1873.

Another act changed the management of the state prison — providing for the appointment by the governor of three directors; one for two years, one for four years, and one for six years, in place of a state prison commissioner, who had been elected by the people every two years, along with other officers of the State.

At the Spring election, Orsamus Cole, who had been eighteen years upon the bench, was re-elected, without opposition, an associate justice of the supreme court, for a term of six years from the first Monday in January following. The two tickets in the field at the Fall election were the republican and the people's reform. The latter was successful; the political scepter passing out of the hands of the republicans, after a supremacy in the State continuing unbroken since the beginning of the seventh administration, when A. W. Randall (governor for a second term) and the residue of the State officers were elected — all republicans.

The general success among the cultivators of the soil throughout the state during the year, notwithstanding "the crisis," was marked and satisfactory; but the financial disturbances during the latter part of the Fall and the first part of the Winter, resulted in a general depreciation of prices.

FOURTEENTH ADMINISTRATION. — WILLIAM R. TAYLOR, GOVERNOR — 1874-75.

The fourteenth administration of Wisconsin commenced at noon on Monday, the fifth day of January, 1874, by the inauguration of William R. Taylor as governor; Charles D. Parker, lieutenant governor; Peter Doyle, secretary of state; Ferdinand Kuehn, state treasurer; A. Scott Sloan, attorney general; Edward Searing, superintendent of public instruction; and Martin J. Argard, state commissioner of immigration. These officers were not elected by any distinctive political party as such, but as the representatives of a new political organization, including "all Democrats, Liberal Republicans, and other electors of Wisconsin, friendly to genuine reform through equal and impartial legislation, honesty in office, and rigid economy in the administration of affairs." Among the marked characteristics of the platform agreed upon by the convention nominating the above-mentioned ticket was a declaration by the members that they would "vote for no candidate for office whose nomination is the fruit of his own importunity, or of a corrupt combination among partisan leaders;" another, "that the sovereignty of the State over corporations of its own creation shall be sacredly respected, to the full extent of protecting the people against every form of monopoly or extortion," not denying, however, an encouragement to wholesome enterprise on the part of aggre-

gated capital—this “plank” having special reference to a long series of alleged grievances assumed to have been endured by the people on account of discriminations in railroad charges and a consequent burdensome taxation upon labor—especially upon the agricultural industry of the State.

The twenty-seventh regular session of the Wisconsin legislature commenced at Madison on the fourteenth of January. The two houses were politically antagonistic in their majorities; the senate was republican, while the assembly had a “reform” majority. In the latter branch, Gabriel Bouck was elected speaker. Governor Taylor, on the fifteenth, met the legislature in joint convention and delivered his message. “An era,” said he, “of apparent prosperity without parallel in the previous history of the nation, has been succeeded by financial reverses affecting all classes of industry, and largely modifying the standard of values.” “Accompanying these financial disturbances,” added the governor, “has come an imperative demand from the people for a purer political morality, a more equitable apportionment of the burdens and blessings of government, and a more rigid economy in the administration of public affairs.”

Among the important acts passed by this legislature was one generally known as the “Potter Law,” from the circumstance of the bill being introduced by Robert L. D. Potter, senator, representing the twenty-fifth senatorial district of the state. The railroad companies for a number of years had, as before intimated, been complained of by the people, who charged them with unjust discriminations and exorbitantly high rates for the transportation of passengers and merchandize. All the railroad charters were granted by acts at different times of the State legislature, under the constitution which declares that “corporations may be formed under general laws, but shall not be created by a special act, except for municipal purposes and in cases where, in the judgment of the legislature, the objects of the corporations can not be attained under general laws. All general laws, or special acts, enacted under the provisions of this section, may be altered or repealed by the legislature at any time after their passage.” The complaints of the people seem to have remained unheeded, resulting in the passage of the “Potter Law.” This law limited the compensation for the transportation of passengers, classified freight, and regulated prices for its transportation within the State. It also required the governor on or before the first of May, 1874, by and with the consent of the senate, to appoint three railroad commissioners; one for one year, one for two years, and one for three years, whose terms of office should commence on the fourteenth day of May, and that the governor, thereafter, on the first day of May, of each year, should appoint one commissioner for three years. Under this law, the governor appointed J. H. Osborn, for three years; George H. Paul, for two years; and J. W. Hoyt, for one year. Under executive direction, this commission inaugurated its labors by compiling, classifying, and putting into convenient form for public use for the first time, all the railroad legislation of the State.

At the outset the two chief railroad corporations of the State—the Chicago, Milwaukee and St. Paul, and the Chicago and Northwestern—served formal notice upon the governor of Wisconsin that they would not respect the provisions of the new railroad law. Under his oath of office, to support the constitution of the State, it was the duty of Governor Taylor to expedite all such measures as should be resolved upon by the legislature, and to take care that the laws be faithfully executed. No alternative, therefore, was left the chief executive but to enforce the law by all the means placed in his hands for that purpose. He promptly responded to the notification of the railroad companies by a proclamation, dated May 1, 1874, in which he enjoined compliance with the statute, declaring that all the functions of his office would be exercised in faithfully executing the laws, and invoking the aid of all good citizens thereto. “The law of the land,” said Governor Taylor, “must be respected and obeyed.” “While none,” continued he,

"are so weak as to be without its protection, none are so strong as to be above its restraints. If provisions of the law be deemed oppressive, resistance to its mandates will not abate, but rather multiply the anticipated evils." "It is the right," he added, "of all to test its validity through the constituted channels, but with that right is coupled the duty of yielding a general obedience to its requirements until it has been pronounced invalid by competent authority."

The railroad companies claimed not merely the unconstitutionality of the law, but that its enforcement would bankrupt the companies, and suspend the operation of their lines. The governor, in reply, pleaded the inviolability of his oath of office and his pledged faith to the people. The result was an appeal to the courts, in which the State, under the direction of its governor, was compelled to confront an array of the most formidable legal talent of the country. Upon the result in Wisconsin depended the vitality of much similar legislation in neighboring States, and Governor Taylor and his associate representatives of State authority were thus compelled to bear the brunt of a controversy of national extent and consequence. The contention extended both to State and United States courts, the main question involved being the constitutional power of the State over corporations of its own creation. In all respects, the State was fully sustained in its position, and, ultimately, judgments were rendered against the corporations in all the State and federal courts, including the supreme court of the United States, and establishing finally the complete and absolute power of the people, through the legislature, to modify or altogether repeal the charters of corporations.

Another act of the session of 1874 abolished the office of State commissioner of immigration, "on and after" the first Monday of January, 1876. The legislature adjourned on the twelfth of March, 1874, after a session of fifty-eight days.

The office of state prison commissioner having, by operation of law, become vacant on the fifth day of January, 1874, the governor, on the twenty-third of that month, appointed for State prison directors, Joel Rich, for two years; William E. Smith, for four years; and Nelson Dewey, for six years: these to take the place of that officer.

On the sixteenth of June, Chief Justice Dixon, whose term of office would have expired on the first Monday in January, 1876, resigned his seat upon the bench of the supreme court, Governor Taylor appointing Edward G. Ryan in his place until his successor should be elected and qualified. At the November election of this year, the members chosen to the forty-fourth congress were—Charles G. Williams, from the first district; Lucian B. Caswell, from the second; Henry S. Magoon, from the third; William Pitt Lynde, from the fourth; Samuel D. Burchard, from the fifth; A. M. Kimball, from the sixth; Jeremiah M. Rusk, from the seventh, and George W. Cate, from the eighth district. Lynde, Burchard and Cate were "reform;" the residue were republican.

At the same election, an amendment to section 3 of article 11 of the constitution of the State was duly ratified and adopted by the people. Under this section, as it now stands, it is the duty of the legislature, and they are by it empowered, to provide for the organization of cities and incorporated villages, and to restrict their power of taxation, assessment, borrowing money, contracting debts, and loaning their credit, so as to prevent abuses in assessments and taxation, and in contracting debts, by such municipal corporations. No county, city, town, village, school district, or other municipal corporation, shall be allowed to become indebted in any manner, or for any purpose, to any amount, including existing indebtedness in the aggregate, exceeding five per centum on the value of the taxable property therein, to be ascertained by the last assessment for State and county taxes previous to the incurring of such indebtedness. Any county, city, town, village, school district, or other municipal corporation, incurring any indebtedness as aforesaid, shall, before, or at the time of doing so, provide for the collection of a direct

annual tax sufficient to pay the interest on such debt as it falls due, and also to pay and discharge the principal thereof within twenty years from the time of contracting the same.

In 1872, the first appropriation for fish culture in Wisconsin was made by the legislature, subject to the direction of the United States commissioner of fisheries. In 1874, a further sum was appropriated, and the governor of the State authorized to appoint three commissioners, whose duties were, upon receiving any spawn or fish, by or through the United States commissioner of fish and fisheries, to immediately place such spawn in the care of responsible pisciculturists of the State, to be hatched and distributed in the different waters in and surrounding Wisconsin. Two more members have since been added by law to the commission; their labors have been much extended, and liberal appropriations made to further the object they have in view—with flattering prospects of their finally being able to stock the streams and lakes of the State with the best varieties of food fish.

The year 1874, in Wisconsin, was characterized as one of general prosperity among farmers, excepting the growers of wheat. The crop of that cereal was light, and, in places, entirely destroyed by the chinch-bug. As a consequence, considerable depression existed in business in the wheat-growing districts. Trade and commerce continued throughout the year at a low ebb, the direct result of the monetary crisis of 1873.

The legislature commenced its twenty-eighth regular session on the thirteenth of January, 1875, with a republican majority in both houses. F. W. Horn was elected speaker of the assembly. The governor delivered his message in person, on the fourteenth, to the two houses. "Thanking God for all His mercies," are his opening words, "I congratulate you that order and peace reign throughout the length and breadth of our State. Our material prosperity has not fulfilled our anticipations. But let us remember that we bear no burden of financial depression not common to all the States, and that the penalties of folly are the foundation of wisdom." In regard to the "Potter Law," the governor said, "It is not my opinion that this law expressed the best judgment of the legislature which enacted it. While the general principles upon which it is founded command our unqualified approbation, and can never be surrendered, it must be conceded that the law is defective in some of its details. . . . The great object sought to be accomplished by our people," continued the speaker, "is not the management of railroad property by themselves, but to prevent its mismanagement by others." Concerning the charge that Wisconsin was warring upon railways within her limits, the governor added, "She has never proposed such a war. She proposes none now. She asks only honesty, justice and the peace of mutual good will. To all men concerned, her people say in sincerity and in truth that every dollar invested in our State shall be lawfully entitled to its just protection, whencesoever the danger comes. In demanding justice for all, the State will deny justice to none. In forbidding mismanagement, the State will impose no restraints upon any management that is honest and just. In this, the moral and hereditary instincts of our people furnish a stronger bond of good faith than the judgments of courts or the obligations of paper constitutions. Honest capital may be timid and easily frightened; yet it is more certain to seek investment among a people whose laws are at all times a shield for the weak and a reliance for the strong—where the wholesome restraints of judicious legislation are felt alike by the exalted and the humble, the rich and the poor."

The first important business to be transacted by this legislature was the election of a United States senator, as the term for which M. H. Carpenter had been elected would expire on the fourth of March ensuing. Much interest was manifested in the matter, not only in the two houses, but throughout the State. There was an especial reason for this; for, although the then

incumbent was a candidate for re-election, with a republican majority in the legislature, yet it was well known that enough members of that party were pledged, before the commencement of the session, to vote against him, to secure his defeat, should they stand firm to their pledges. The republicans met in caucus and nominated Carpenter for re-election; but the recalcitrant members held themselves aloof. Now, according to usual precedents, a nomination by the dominant party was equivalent to an election; not so, however, in this case, notwithstanding the friends of the nominee felt sanguine of his election in the end. The result of the first ballot, on the twenty-sixth of January, was, in the senate, thirteen for the republican candidate; in the assembly, forty-six votes, an aggregate of only fifty-nine. He lacked four votes in the assembly and an equal number in the senate, of having a majority in each house. On the twenty-seventh, the two houses, in joint convention, having met to compare the record of the voting the day previous, and it appearing that no one person had received a majority of the votes in each house for United States senator, they proceeded to their first joint ballot. The result was, no election. The balloting was continued each day, until the third of February, when, on the eleventh joint ballot, Angus Cameron, of LaCrosse, having received sixty-eight votes, to Carpenter's fifty-nine, with five scattering, was declared elected.

As in the previous session so in this,—one of the most absorbing subjects before the legislature was that of railroads; the "Potter Law" receiving a due share of attention in both houses. The result was an amendment in some important particulars without changing the right of State control: rates were modified. The law as amended was more favorable to the railroad companies and was regarded as a compromise. The legislature adjourned *sine die* on the 6th of March. This was the shortest session ever held in the State except one of twenty-five years previous.

On the 16th of February, O. W. Wight was appointed by the governor chief geologist of Wisconsin, in place of I. A. Lapham, whose appointment had not been acted upon by the Senate. On the 24th of the same month, J. W. Hoyt was appointed railroad commissioner for three years from the first day of May following, on which day his one-year term in the same office would expire. At the regular Spring election on the 6th of April following, Edward G. Ryan was elected, without opposition, chief justice of the supreme court for the unexpired term of Chief Justice Dixon, ending the first Monday in January, 1876, and for a full term of six years from the last mentioned date; so that his present term of office will expire on the 1st Monday in January, 1882. An act providing for taking the census of Wisconsin on or before the 1st of July, 1875, was passed by the legislature and approved the 4th of March previous. It required an enumeration of all the inhabitants of the State except Indians, who were not entitled to the right of suffrage. The result of this enumeration gave a total population to Wisconsin of one million two hundred and thirty-six thousand seven hundred and twenty-nine.

At the November election, republican and "reform" tickets were in the field for State officers, resulting in the success of the latter, except as to governor. For this office Harrison Ludington was chosen by a majority, according to the State board of canvassers, over William R. Taylor, of eight hundred and forty-one. The rest of the candidates elected were: Charles D. Parker, lieutenant governor; Peter Doyle, secretary of state; Ferdinand Kuehn, treasurer of state, A. Scott Sloan, attorney general; and Edward Searing, superintendent of public instruction. The act abolishing the office of state commissioner of immigration was to take effect "on and after" the close of this administration; so, of course, no person was voted for to fill that position at the Fall election of 1875.

During this administration the principle involved in a long-pending controversy between the State and Minnesota relating to valuable harbor privileges at the head of Lake Superior, was successfully and finally settled in favor of Wisconsin. The influence of the executive was largely

instrumental in initiating a movement which resulted in securing congressional appropriations amounting to \$800,000 to the Fox and Wisconsin river improvement. A change was inaugurated in the whole system of timber agencies over State and railroad lands, by which the duties of agents were localized, and efficiency was so well established that many important trespasses were brought to light from which over \$60,000 in penalties was collected and paid into the Treasury, while as much more was subsequently realized from settlements agreed upon and proceedings instituted. By decisive action on the part of the governor an unsettled printing claim of nearly a hundred thousand dollars was met and defeated in the courts. During this period also appropriations were cut down, and the rate of taxation diminished. Governor Taylor bestowed unremitting personal attention to details of business with a view of promoting the public interests with strict economy, while his countenance and support was extended to all legitimate enterprises. He required the Wisconsin Central railroad company to give substantial assurance that it would construct a branch line from Stevens Point to Portage City as contemplated by congress, before issuing certificates for its land grants.

The closing year of the century of our national existence—1875, was one somewhat discouraging to certain branches of the agricultural interests of Wisconsin. The previous Winter had been an unusually severe one. A greater breadth of corn was planted than in any previous year in the State, but the unusually late season, followed by frosts in August and September, entirely ruined thousands of acres of that staple.

FIFTEENTH ADMINISTRATION.—HARRISON LUDINGTON, GOVERNOR—1876—1877.

The fifteenth administration of Wisconsin commenced at noon on Monday, January 3, 1876, by the inauguration of State officers—Harrison Ludington, as previously stated, having been elected upon the republican ticket, to fill the chief executive office of the State; the others, to the residue of the offices, upon the democratic reform ticket: the governor, like three of his predecessors—Farwell, Bashford, and Randall (first term)—having been chosen by a majority less than one thousand; and, like two of his predecessors—Farwell and Bashford—when all the other State officers differed with him in politics.

The twenty-ninth regular session of the legislature of Wisconsin began on the 12th of January, 1876, at Madison. The republicans were in the majority in both houses. Samuel S. Fifield was elected speaker of the assembly. On the 13th, Governor Ludington delivered in person, to a joint convention of that body, his message, communicating the condition of affairs of the State, and recommending such matters for the consideration of the legislators as were thought expedient: it was brief; its style condensed; its striking peculiarity, a manly frankness. "It is not the part of wisdom," said he, in his concluding remarks, "to disguise the fact that the people of this State, in common with those of all sections of the Union, have suffered some abatement of the prosperity that they have enjoyed in the past." "We have entered," he continued, "upon the centennial of our existence as an independent nation. It is fit that we should renew the spirit in which the Republic had its birth, and our determination that it shall endure to fulfill the great purposes of its existence, and to justify the noble sacrifices of its founders." The legislature adjourned *sine die* on the 14th of March, 1876, after a session of sixty-three days. The chief measures of the session were: The amendment of the railroad laws, maintaining salutary restrictions while modifying those features which were crippling and crushing an important interest of the State; and the apportionment of the State into senate and assembly districts. It is a provision of the constitution of the State that the number of the members of the assembly shall never be less than fifty-four, nor more than one hundred; and that the senate shall consist of a number not more than one-third nor less than one-fourth of the number of the members of the

assembly. Since the year 1862, the aggregate allotted to both houses had been one hundred and thirty-three, the maximum allowed by the constitution; one hundred in the assembly and thirty-three in the senate. The number of this representation was not diminished by the apportionment of 1876. One of the railroad laws abolished the board of railroad commissioners, conferring its duties upon a railroad commissioner to be appointed by the governor every two years. Under this law, Dana C. Lamb was appointed to that office, on the 10th of March, 1876. On the 2d day of February, previous, George W. Burchard was by the governor appointed state prison director for six years, in place of Joel Rich, whose term of office had expired. On the same day T. C. Chamberlin was appointed chief geologist of Wisconsin in place of O. W. Wight.

The application of Miss Lavinia Goodell, for admission to the bar of Wisconsin, was rejected by the supreme court of the State, at its January term, 1876. "We can not but think," said Chief Justice Ryan, in the decree of refusal, "we can not but think the common law wise in excluding women from the profession of the law." "The profession," he added, "enters largely into the well-being of society, and, to be honorably filled, and safely to society, exacts the devotion of life. The law of nature destines and qualifies the female sex for the bearing and nurture of the children of our race, and for the custody of the homes of the world, and their maintenance in love and honor. And all life-long callings of women inconsistent with these radical and social duties of their sex, as is the profession of the law, are departures from the order of Nature, and, when voluntary, are treason against it." By a law since passed, no person can be denied admission to any court in the State on account of sex; and Miss Goodell has been admitted to practice in the Supreme Court.

By an act of the legislature, approved March 13, 1876, a State board of health was established, the appointment of a superintendent of vital statistics, was provided for, and certain duties were assigned to local boards of health. The State board was organized soon after; the governor having previously appointed seven persons as its members. The object of the organization, which is supported by the State, is, to educate the people of Wisconsin into a better knowledge of the nature and causes of disease, and a better knowledge and observance of hygienic laws.

By a law passed in 1868, as amended in 1870 and 1873, the secretary of state, state treasurer, and attorney general, were constituted a State board of assessment, to meet in the city of Madison, on the third Wednesday in May, 1874, and biennially thereafter, to make an equalized valuation of the property in the State, as a guide to assessment for taxation. In the tables of equalized valuations compiled by this board in 1876, the whole amount of taxable property in Wisconsin, is set down at \$423,596,290; of which sum \$337,073,148, represents real estate and \$86,523,142 personal property.

This being the year for the election of president and vice president of the United States, the two political parties in Wisconsin—republican and democratic—had tickets in the field. At the election on Tuesday, November 7, the republican presidential electors received a majority of the votes cast in the State, securing Wisconsin for Hayes and Wheeler. The eight congressional districts elected the same day their members to the forty-fifth congress, whose terms of office would expire on the 4th of March, 1879. Charles G. Williams was elected in the first district; Lucien B. Caswell, in the second; George C. Hazelton, in the third; William P. Lynde, in the fourth; Edward S. Bragg, in the fifth; Gabriel Bouck, in the sixth; H. L. Humphrey, in the seventh; and Thad. C. Pound, in the eighth district. A majority of the delegation was republican, the representatives from the fourth, fifth and sixth districts only, being democrats.

There was a general and spontaneous exhibition of patriotic impulses throughout the length and breadth of Wisconsin, on the part of both native and foreign-born citizens, at the commencement of the centennial year, and upon the fourth of July. The interest of the people of the State generally, in the Exposition at Philadelphia, was manifested in a somewhat remarkable manner from its inception to its close. By an act of congress, approved March 3, 1871, provision was made for celebrating the one hundredth anniversary of American Independence, by holding in that city, in 1876, an exhibition of arts, manufactures, and the products of the soil and mines of the country. A centennial commission, consisting of one commissioner and one alternate commissioner, from each State and Territory, was authorized to be appointed, to carry out the provisions of the act. David Atwood, as commissioner, and E. D. Holton, as alternate, were commissioned by the president of the United States, from Wisconsin. This commission gradually made progress in preparing for an international exposition. "The commission has been organized," said Governor Washburn, in his message to the legislature in January, 1873, "and has made considerable progress in its work. The occasion will be one to which the American people can not fail to respond in the most enthusiastic manner." The president of the United States, by proclamation, in July, 1873, announced the exhibition and national celebration, and commended them to the people of the Union, and of all nations. "It seems fitting," said Governor Taylor, in his message to the Wisconsin legislature in 1874, "that such a celebration of this important event, should be held, and it is hoped it will be carried out in a manner worthy of a great and enlightened nation." By the close of 1874, a large number of foreign governments had signified their intention to participate in the exhibition.

The legislature of Wisconsin, at its session in 1875, deeming it essential that the State, with its vast resources in agricultural, mineral, lumbering, manufacturing, and other products and industries, should be fully represented at Philadelphia, passed an act which was approved March 3, 1875, to provide for a "Board of State Centennial Managers." Two thousand dollars were appropriated to pay its necessary expenses. The board was to consist of five members to be appointed by the governor; and there were added thereto, as ex-officio members, the United States centennial commissioner and his alternate. The duties of the members were to disseminate information regarding the Exhibition; to secure the co-operation of industrial, scientific, agricultural, and other associations in the State; to appoint co-operative local committees, representing the different industries of the State; to stimulate local action on all measures intended to render the exhibition successful, and a worthy representation of the industries of the country; to encourage the production of articles suitable for the Exhibition; to distribute documents issued by the centennial commission among manufacturers and others in the State; to render assistance in furthering the financial and other interests of the exhibition; to furnish information to the commission on subjects that might be referred to the board; to care for the interests of the State and of its citizens in matters relating to the exhibition; to receive and pronounce upon applications for space; to apportion the space placed at its disposal among the exhibitors from the State; and to supervise such other details relating to the representation of citizens of Wisconsin in the Exhibition, as might from time to time be delegated by the United States centennial commission.

The board was required to meet on the first Wednesday of April, 1875, at the capitol, in Madison, to organize and adopt such by-laws and regulations as might be deemed necessary for the successful prosecution of the work committed to their charge. Governor Taylor appointed Eli Stilson, J. I. Case, J. B. Parkinson, T. C. Pound, and E. A. Calkins, members of the board. Its organization was perfected, at the appointed time, by the election of J. B. Parkinson as president, and W. W. Field, secretary. The ex-officio members of the board, were David Atwood,

United States commissioner, and E. D. Holton, alternate From this time forward, the board was untiring in its efforts to secure a full and proper representation of the varied interests of Wisconsin in the centennial exhibition of 1876. E. A. Calkins having resigned his position as member of the board, Adolph Meinecke took his place by appointment of the governor July 24, 1875. Governor Ludington, in his message to the legislature in January, 1876, spoke in commendation of the coming exhibition. "The occasion," said he, "will afford an excellent opportunity to display the resources and products of the State, and to attract hither capital and immigration."

Soon after the organization of the United States centennial commission, a national organization of the women of the country was perfected. A lady of Philadelphia was placed at its head; and a presiding officer from each State was appointed. Mrs. A. C. Thorp assumed the duties of chairman for Wisconsin, in March, 1875, appointing assistants in various parts of the State, when active work was commenced. This organization was efficient in Wisconsin in arousing an interest in the general purposes and objects of the exhibition.

By an act of the legislature, approved March 3, 1876, the sum of twenty thousand dollars was appropriated to the use of the board of centennial managers, for the purpose of arranging for, and making a proper exhibition of, the products, resources, and advantages of the State at the exposition. The treasurer of Wisconsin was, by this act, made an ex-officio member of the board. By this and previous action of the legislature—by efforts put forth by the board of managers—by individual enterprise—by the untiring labors of the "Women's Centennial Executive Committee," to whom, by an act of the legislature, approved the 4th of March, 1875, one thousand dollars were appropriated—Wisconsin was enabled to take a proud and honorable position in the Centennial Exposition—a gratification not only to the thousands of her citizens who visited Philadelphia during its continuance, but to the people generally, throughout the State.

In Wisconsin, throughout the centennial year, those engaged in the various branches of agriculture and other useful avocations, were reasonably prosperous. The crop of wheat and oats was a light yield, and of poor quality; but the corn crop was the largest ever before raised in the State, and of superior quality. The dairy and hog product was large, and commanded remunerative prices. Fruits were unusually plenty. Trade and business enterprises, however, generally remained depressed.

By section five of article seven of the constitution of Wisconsin, the counties of the State were apportioned into five judicial circuits: the county of Richland being attached to Iowa, Chippewa to Crawford, and La Pointe to St. Croix. In 1850, the fifth circuit was divided, and a sixth circuit formed. In 1864, Crawford and Richland were made part of the fifth circuit. By an act which took effect in 1854, a seventh circuit was formed. On the first day of January, 1855, the sixth circuit was divided, and an eighth and ninth circuit formed, the county of Columbia being made a part of the last mentioned one. In the same year was also formed a tenth circuit; and, in 1858, Winnebago county was attached to it; but, in 1870, that county was attached to the third circuit. In 1858, Kewaunee county was attached to the fourth circuit. An eleventh circuit was formed in 1864, from which, in 1865, Dallas county was detached, and made part of the eighth. By an act which took effect on the first day of January, 1871, the twelfth circuit was formed. In 1876, a thirteenth circuit was "constituted and re-organized."

At that time, the whole sixty counties of the State stood apportioned in the thirteen judicial circuits as follows: First circuit, Walworth, Racine, and Kenosha; second circuit, Milwaukee, and Waukesha; third circuit, Green Lake, Dodge, Washington, Ozaukee, and Winnebago; fourth circuit, Sheboygan, Calumet, Kewaunee, Fond du Lac, and Manitowoc; fifth circuit,

Grant, Iowa, La Fayette, Richland, and Crawford; sixth circuit, Clark, Jackson, Monroe, La Crosse, and Vernon; seventh circuit, Portage, Marathon, Waupaca, Wood, Waushara, Lincoln, and Taylor; eighth circuit, Dunn, Pepin, Pierce, and St. Croix; ninth circuit, Adams, Columbia, Dane, Juneau, Sauk and Marquette; tenth circuit, Outagamie, Oconto, Shawano, Door, and Brown; eleventh circuit, Ashland, Barron, Bayfield, Burnett, Chippewa, Douglas, and Polk; twelfth circuit, Rock, Green, and Jefferson; and the thirteenth circuit, Buffalo, Eau Claire, and Trempeleau, Marinette and New are now in the tenth; Price is in the seventh circuit.

The thirtieth regular session of the legislature of Wisconsin commenced, pursuant to law, on the 10th of January, 1877. The republicans had working majorities in both houses. J. B. Cassoday was elected Speaker of the Assembly. Governor Ludington delivered his message to the joint convention of the legislature the following day. "We should not seek," said he, in his concluding remarks, "to conceal from ourselves the fact that the prosperity which our people have enjoyed for a number of years past, has suffered some interruption. Agriculture has rendered less return; labor in all departments has been less productive, and trade has consequently been less active, and has realized a reduced percentage of profit." "These adverse circumstances," continued the governor, "will not be wholly a misfortune if we heed the lesson that they convey. This lesson is the necessity of strict economy in public and private affairs. We have been living upon a false basis; and the time has now come when we must return to a solid foundation." The legislature adjourned *sine die* on the 8th of March, after a session of fifty-eight days, passing three hundred and one acts—one hundred and thirteen less than at the session of 1876. The most important of these, as claimed by the dominant party which passed it, is one for the maintenance of the purity of the ballot box, known as the "Registry Law." On the 3d day of April, at the regular Spring election, William P. Lyon was re-elected, without opposition, an associate justice of the supreme court for six years from the first Monday in January, 1878, his term of office expiring on the first Monday of January, 1884.

Under a law of 1876, to provide for the revision of the statutes of the State, the justices of the supreme court were authorized to appoint three revisors. The persons receiving the appointment were David Taylor, William F. Vilas and J. P. C. Cottrill. By an amendatory law of 1877, for the purpose of having the revision completed for the session of 1878, the justices of the supreme court were authorized to appoint two additional revisors, and assign them special duties on the commission. H. S. Orton was appointed to revise the criminal law and proceedings, and J. H. Carpenter to revise the probate laws.

Governor Ludington declined being a candidate for renomination. His administration was characterized as one of practical efficiency. As the chief executive officer of Wisconsin, he kept in view the best interests of the State. In matters coming under his control, a rigid system of economy prevailed.

There were three tickets in the field presented to the electors of Wisconsin for their suffrages at the general election held on the sixth of November, 1877: republican, democratic, and the "greenback" ticket. The republicans were successful, electing William E. Smith, governor; James M. Bingham, lieutenant governor; Hans B. Warner, secretary of state; Richard Guenther, treasurer; Alexander Wilson, attorney general; and William C. Whitford, state superintendent of public instruction. At the same election two amendments to the constitution of the State were voted upon and both adopted. The first one amends section four of article seven; so that, hereafter, "the supreme court shall consist of one chief justice and four associate justices, to be elected by the qualified electors of the State. The legislature shall, at its first session after the adoption of this amendment, provide by law for the election of two associate justices of said court, to hold their offices respectively for terms ending two and four years, respectively after the

end of the term of the justice of the said court then last to expire. And thereafter the chief justices and associate justices of said court shall be elected and hold their offices respectively for the term of ten years." The second one amends section two of article eight; so that, hereafter, "no money shall be paid out of the treasury except in pursuance of an appropriation by law. No appropriation shall be made for the payment of any claim against the State, except claims of the United States, and judgments, unless filed within six years after the claim accrued."

The year 1877, in Wisconsin, was notable for excellent crops. A depression in monetary matters continued, it is true, but not without a reasonable prospect of a change for the better within the near future.

SIXTEENTH ADMINISTRATION.—WILLIAM E. SMITH, GOVERNOR—1878—1879.

At noon, on Monday, January 7, 1878, began the sixteenth administration of Wisconsin, by the inauguration of the State officers elect. On the 9th of the same month, commenced the thirty-first regular session of the Legislature. A. R. Barrows was elected Speaker of the Assembly. On the day following, Governor Smith delivered his message—a calm, business-like document—to the Legislature. Both Houses adjourned *sine die* on the 21st of March following. On the 1st day of April, Harlow S. Orton and David Taylor were elected Associate Justices of the Supreme Court; the term of the first named to expire on the first Monday of January, 1888; that of the last mentioned, on the first Monday of January, 1886. In obedience to a proclamation of the Governor, the Legislature convened on the 4th day of June, A. D. 1878, in extra session, to revise the statutes, A. R. Barrows was elected Speaker of the Assembly. The Legislature adjourned *sine die* on the 7th of the same month. In November following, the members chosen to the Forty-sixth Congress were C. G. Williams, in the First District; L. B. Caswell, in the Second; George C. Hazelton, in the Third; P. V. Deuster, in the Fourth; E. S. Bragg, in the Fifth; Gabriel Bouck, in the Sixth; H. L. Humphrey, in the Seventh; and T. C. Pound, in the Eighth. The thirty-second regular session of the Legislature commenced on the 8th day of January, 1879. D. M. Kelly was elected Speaker of the Assembly; the next day, the message of the Governor—a brief, but able State paper—was delivered to both Houses. On the 21st, Matthew H. Carpenter was elected United States Senator for six years, from the 4th of March thereafter, in place of Timothy O. Howe. The Legislature adjourned *sine die* on the 5th of March, 1879. On the 1st day of April following, Orsamus Cole was elected Associate Justice of the Supreme Court, for a term of ten years.

Wisconsin has many attractive features. It is a healthy, fertile, well-watered and well-wooded State. Every where within its borders the rights of each citizen are held sacred. Intelligence and education are prominent characteristics of its people. All the necessaries and many of the comforts and luxuries of life are easily to be obtained. Agriculture, the chief source of wealth to so many nations, is here conducted with profit and success. Generally speaking, the farmer owns the land he cultivates. Here, the laboring man, if honest and industrious, is most certain to secure a competence for himself and family. Few States have made more ample provisions for the unfortunate—the deaf and dumb, the blind, and the insane—than has Wisconsin. Nor has she been less interested in her reformatory and penal institutions. In her educational facilities, she already rivals the most advanced of her sister States. Her markets are easily reached by railways and water-navigation, so that the products of the country find ready sale. Her commerce is extensive; her manufactures remunerative; her natural resources great and manifold. In morality and religion, her standard is high. Her laws are lenient, but not lax, securing the greatest good to those who are disposed to live up to their requirements. Wisconsin has, in fact, all the essential elements of prosperity and good government. Exalted and noble, therefore, must be her future career.

TOPOGRAPHY AND GEOLOGY.

By T. C. CHAMBERLIN, A. M., STATE GEOLOGIST.

The surface features of Wisconsin are simple and symmetrical in character, and present a configuration intermediate between the mountainous, on the one hand, and a monotonous level, on the other. The highest summits within the state rise a little more than 1,200 feet above its lowest surfaces. A few exceptional peaks rise from 400 to 600 feet above their bases, but abrupt elevations of more than 200 or 300 feet are not common. Viewed as a whole, the state may be regarded as occupying a swell of land lying between three notable depressions; Lake Michigan on the east, about 578 feet above the mean tide of the ocean, Lake Superior on the north, about 600 feet above the sea, and the valley of the Mississippi river, whose elevation at the Illinois state line is slightly below that of Lake Michigan. From these depressions the surface slopes upward to the summit altitudes of the state. But the rate of ascent is unequal. From Lake Michigan the surface rises by a long, gentle acclivity westward and northward. A similar slope ascends from the Mississippi valley to meet this, and their junction forms a north and south arch extending nearly the entire length of the state. From Lake Superior the surface ascends rapidly to the watershed, which it reaches within about thirty miles of the lake.

If we include the contiguous portion of the upper peninsula of Michigan, the whole elevation may be looked upon as a very low, rude, three-sided pyramid, with rounded angles. The apex is near the Michigan line, between the headwaters of the Montreal and Brule rivers. The northern side is short and abrupt. The southeastward and southwestward sides are long, and decline gently. The base of this pyramid may be considered as, in round numbers, 600 feet above the sea, and its extreme apex 1,800 feet.

Under the waters of Lake Michigan the surface of the land passes below the sea level before the limits of the state are reached. Under Lake Superior the land-surface descends to even greater depths, but probably not within the boundaries of the state. The regularity of the southward slopes is interrupted in a very interesting way by a remarkable diagonal valley occupied by Green bay and the Fox and Wisconsin rivers. This is a great groove, traversing the state obliquely, and cutting down the central elevation half its height. A line passing across the surface, from Lake Michigan to the Mississippi, at any other point, would arch upward from about 400 to 1,000 feet, according to the location, while along the trough of this valley it would reach an elevation barely exceeding 200 feet. On the northwest side of this trough, in general, the surface rises somewhat gradually, giving at most points much amplitude to the valley, but on the opposite side, the slope ascends rapidly to a well marked watershed that stretches across the state parallel to the valley. At Lake Winnebago, this diagonal valley is connected with a scarcely less notable one, occupied by the Rock river. Geologically, this Green-bay-Rock-

river valley is even more noticeable, since it lies along the trend of the underlying strata, and was in large measure plowed out of a soft stratum by glacial action. Where it crosses the watershed, near Horicon marsh, it presents the same general features that are seen at other points, and in an almost equally conspicuous degree. Except in the southern part of the state, this valley is confined on the east by an abrupt ascent, and, at many points, by a precipitous, rocky acclivity, known as "The Ledge"—which is the projecting edge of the strata of the Niagara limestone. On the watershed referred to—between the St. Lawrence and Mississippi basins—this ledge is as conspicuous and continuous as at other points, so that we have here again the phenomenon of a valley formed by excavation, running up over an elevation of 300 feet, and connecting two great systems of drainage.

On the east side of this valley, as already indicated, there is a sharp ascent of 200 feet, on an average, from the crest of which the surface slopes gently down to Lake Michigan. The uniformity of this slope is broken by an extended line of drift hills, lying obliquely along it and extending from Kewaunee county southward to the Illinois line and known as the Kettle range. A less conspicuous range of similar character branches off from this in the northwest corner of Walworth county and passes across the Rock river valley, where it curves northward, passing west of Madison, crossing the great bend in the Wisconsin river, and bearing northeastward into Oconto county, where it swings round to the westward and crosses the northern part of the state. As a general topographical feature it is not conspicuous and is rather to be conceived as a peculiar chain of drift hills winding over the surface of the state, merely interrupting in some degree the regularity of its slopes. There will be occasion to return to this feature in our discussion of the drift. It will be observed that the southeastward slope is interrupted by valleys running *across* it, rudely parallel to Lake Michigan, and directing its drainage northward and southward, instead of directing it down the slope into the lake.

The Mississippi slope presents several conspicuous ridges and valleys, but their trend is *toward* the great river, and they are all due, essentially, to the erosion of the streams that channel the slope. One of these ridges constitutes the divide south of the Wisconsin river, already referred to. Another of these, conspicuous by reason of its narrowness and sharpness, lies between the Kickapoo and the Mississippi, and extends through Crawford, Vernon and Monroe counties. Still another is formed by the quartzite ranges of Sauk county and others of less prominence give a highly diversified character to the slope.

Scattered over the surface of the state are prominent hills, some swelling upward into rounded domes, some rising symmetrically into conical peaks, some ascending precipitously into castellated towers, and some reaching prominence without regard to beauty of form or convenience of description. A part of these hills were formed by the removal by erosion of the surrounding strata, and a part by the heaping up of drift material by the glacial forces. In the former case, they are composed of rock; in the latter, of clay, sand, gravel and boulders. The two forms are often combined. The highest peak in the southwestern part of the state is the West Blue mound, which is 1,151 feet above Lake Michigan; in the eastern part, Lapham's peak, 824 feet, and in the central part, Rib hill, 1263 feet. The crest of Penokee range in the northern part of the state rises 1,000 feet, and upwards, above Lake Michigan.

The drainage systems correspond in general to these topographical features, though several minor eccentricities are to be observed. The streams of the Lake Superior system plunge rapidly down their steep slopes, forming numerous falls, some of them possessing great beauty, prominent among which are those of the Montreal river. On the southern slope, the rivers, in the upper portion of their courses, likewise descend rapidly, though less so, producing a succession of rapids and cascades, and an occasional cataract. In the lower part of their courses, the

descent becomes much more gentle and many of them are navigable to a greater or less extent. The rivers west of the Wisconsin pursue an essentially direct course to the Mississippi, attended of course with minor flexures. The Wisconsin river lies, for the greater part of its course, upon the north and south arch of the state, but on encountering the diagonal valley above mentioned it turns southwestward to the "Father of Waters." The streams east of the Wisconsin flow southerly and southeasterly until they likewise encounter this valley when they turn in the opposite direction and discharge northeasterly into Lake Michigan, through Green bay. Between the Green-bay-Rock-river valley and Lake Michigan, the drainage is again in the normal southeasterly direction. In the southern part of the state, the rivers flow in a general southerly direction, but, beyond the state, turn westward toward the Mississippi.

If the courses of the streams be studied in detail, many exceedingly interesting and instructive features will be observed, due chiefly to peculiarities of geological structure, some of which will be apparent by inspecting the accompanying geological map. Our space, however, forbids our entering upon the subject here.

The position of the watershed between the great basins of the Mississippi and the St. Lawrence is somewhat peculiar. On the Illinois line, it lies only three and one half miles from Lake Michigan and about 160 feet above its surface. As traced northward from this point, it retires from the lake and ascends in elevation till it approaches the vicinity of Lake Winnebago, when it recurves upon itself and descends to the portage between the Fox and the Wisconsin rivers, whence it pursues a northerly course to the heights of Michigan, when it turns westward and passes in an undulating course across the northern part of the state. It will be observed that much the greater area of the state is drained by the Mississippi system.

The relationship which the drainage channels have been observed to sustain to the topographical features is partly that of cause and partly that of effect. The general arching of the surface, giving rise to the main slopes, is due to deep-seated geological causes that produce an upward swelling of the center of the state. This determined the general drainage systems. On the other hand, the streams, acting upon strata of varying hardness, and presenting different attitudes, wore away the surface unequally and cut for themselves anomalous channels, leaving corresponding divides between, which gave origin to the minor irregularities that diversify the surface. In addition to this, the glacier—that great ice stream, the father of the drift—planed and plowed the surface and heaped up its *debris* upon it, modifying both the surface and drainage features. Looked at from a causal standpoint, we see the results of internal forces elevating, and external agencies cutting down, or, in a word, the face of the state is the growth of geologic ages furrowed by the teardrops of the skies.

GEOLOGICAL HISTORY OF WISCONSIN.

In harmony with the historical character of this atlas, it may be most acceptable to weave our brief sketch of the geological structure of the state into the form of a narrative of its growth.

THE ARCHÆAN AGE.

LAURENTIAN PERIOD.

The physical history of Wisconsin can be traced back with certainty to a state of complete submergence beneath the waters of the ancient ocean, by which the material of our oldest and deepest strata were deposited. Let an extensive but shallow sea, covering the whole of the present territory of the state, be pictured to the mind, and let it be imagined to be depositing

mud and sand, as at the present day, and we have before us the first authentic stage of the history under consideration. Back of that, the history is lost in the mists of geologic antiquity. The thickness of the sediments that accumulated in that early period was immense, being measured by thousands of feet. These sediments occupied of course an essentially horizontal position, and were, doubtless, in a large degree hardened into beds of impure sandstone, shale, and other sedimentary rock. But in the progress of time an enormous pressure, attended by heat, was brought to bear upon them laterally, or edgewise, by which they were folded and crumpled, and forced up out of the water, giving rise to an island, the nucleus of Wisconsin. The force which produced this upheaval is believed to have arisen from the cooling and consequent contraction of the globe. The foldings may be imaged as the wrinkles of a shrinking earth. But the contortion of the beds was a scarcely more wonderful result than the change in the character of the rock which seems to have taken place simultaneously with the folding, indeed, as the result of the heat and pressure attending it. The sediments, that seem to have previously taken the form of impure sandstone and shale for the most part, underwent a change, in which re-arrangement and crystalization of the ingredients played a conspicuous part. By this metamorphism, granite, gneiss, mica schist, syenite, hornblende rocks, chloritic schists and other crystalline rocks were formed. These constitute the Laurentian formation and belong to the most ancient period yet distinctly recognized in geology, although there were undoubtedly more ancient rocks. They are therefore very fittingly termed Archæan—ancient—rocks (formerly Azoic.) No remains of life have been found in this formation in Wisconsin, but from the nature of rocks elsewhere, believed to be of the same age, it is probable that the lowest forms of life existed at this time. It is not strange that the great changes through which the rocks have passed should have so nearly obliterated all traces of them. The original extent of this Laurentian island can not now be accurately ascertained, but it will be sufficiently near the truth for our present purposes to consider the formation as it is now exposed, and as it is represented on the maps of the geological survey, as showing approximately the original extent. This will make it include a large area in the north-central portion of the state and a portion of the Upper Peninsula of Michigan. All the rest of the state was beneath the ocean, and the same may be said of the greater portion of the United States. The height of this island was doubtless considerable, as it has since been very much cut down by denuding agencies. The strata, as now exposed, mostly stand in highly inclined attitudes and present their worn edges to view. The tops of the folds, of which they are the remnants, seem to have been cut away, and we have the nearly vertical sides remaining.

HURONIAN PERIOD.

As soon as the Laurentian island had been elevated, the waves of the almost shoreless ocean began to beat against it, the elements to disintegrate it, and the rains of the then tropical climate to wash it; and the sand, clay and other *debris*, thus formed, were deposited beneath the waters around its base, giving rise to a new sedimentary formation. There is no evidence that there was any vegetation on the island: the air and water were, doubtless, heavily charged with carbonic acid, an efficient agent of disintegration: the climate was warm and doubtless very moist—circumstances which combined to hasten the erosion of the island and increase the deposition in the surrounding sea. In addition to these agencies, we judge from the large amount of carbonaceous matter contained in some of the beds, that there must have been an abundance of marine vegetation, and, from the limestone beds that accumulated, it is probable that there was marine animal life also, since in later ages that was the chief source of limestone strata. The joint accumulations from these several sources gave rise to a series of shales, sandstones and limestones, whose combined thickness was several thousand feet.

At length the process of upheaval and metamorphism that closed the Laurentian period was repeated, and these sandstones became quartzites; the limestones were crystallized, the shales were changed to slates or schists, and intermediate grades of sediments became diorites, quartz-porphyrines and other forms of crystalline rocks. The carbonaceous matter was changed in part to graphite. There were also associated with these deposits extensive beds of iron ore, which we now find chiefly in the form of magnetite, hematite and specular ore. These constitute the Huronian rocks. From the amount of iron ore they contain, they are also fittingly termed the iron-bearing series. As in the preceding case, the strata were contorted, flexed and folded, and the whole island was further elevated, carrying with it these circumjacent strata, by which its extent was much enlarged. The area of the island after receiving this increment was considerably greater than the surface represented as Laurentian and Huronian on the accompanying map, since it was subsequently covered to a considerable extent by later formations. Penokee range, in Ashland county, is the most conspicuous development of the Huronian rocks in the state. The upturned edge of the formation forms a bold rampart, extending across the country for sixty miles, making the nearest approach to a mountain range to be found within the state. A belt of magnetic schist may be traced nearly its entire length. In the northern part of Oconto county, there is also an important development of this formation, being an extension of the Menomonee iron-bearing series. A third area is found in Barron county, which includes deposits of pipestone. In the south central part of the state there are a considerable number of small areas and isolated outliers of quartzite and quartz-porphyrine, that, without much doubt, belong to this series. The most conspicuous of these are the Baraboo quartzite ranges, in Sauk and Columbia counties, and from thence a chain of detached outliers extends northeasterly through several counties. The most southerly exposure of the formation is near Lake Mills, in Jefferson county.

THE COPPER-BEARING SERIES.

Previous to the upheaval of the Huronian strata, there occurred in the Lake Superior region events of peculiar and striking interest. If we may not speak with absolute assurance, we may at least say with reasonable probability, that the crust of the earth was fissured in that region, and that there issued from beneath an immense mass of molten rock, that spread itself over an area of more than three hundred miles in length and one hundred miles in width. The action was not confined to a single overflow, but eruption followed eruption, sometimes apparently in quick succession, sometimes evidently at long intervals. Each outpouring, when solidified, formed a stratum of trap rock, and where these followed each other without any intervening deposit, a series of trappean beds were formed. In some cases, however, an interval occurred, during which the waves, acting upon the rock previously formed, produced a bed of sand, gravel and clay, which afterward solidified into sandstone, conglomerate and shale. The history of these beds is lithographed on their surface in beautiful ripple-marks and other evidences of wave-action. After the cessation of the igneous eruptions, there accumulated a vast thickness of sandstone, shale and conglomerate, so that the whole series is literally miles in thickness.

The eruptive portions have been spoken of as traps, for convenience; but they do not now possess the usual characteristics of igneous rocks, and appear to have undergone a chemical metamorphism by which the mineral ingredients have been changed, the leading ones now being an iron chlorite and a feldspar, with which are associated, as accessory minerals, quartz, epidote, prenite, calcite, laumontite, analcite, datolite, magnetite, native copper and silver, and, more rarely, other minerals. The rock, as a whole, is now known as a melaphyr. The upper portion of each bed is usually characterized by almond-sized cells filled with the minerals above mentioned, giving to the rock an amygdaloidal nature. The native copper was not injected in a

John A. Savage

(DECEASED) WAUKESHA.

molten state, as has very generally been supposed, but was deposited by chemical means after the beds were formed and after a portion of the chemical change of the minerals above mentioned had been accomplished. The same is true of the silver. The copper occurs in all the different forms of rock—the melaphyrs, amygdaloids, sandstones, shales and conglomerates, but most abundantly in the amygdaloids and certain conglomerates.

This series extends across the northern portion of the state, occupying portions of Ashland, Bayfield, Douglas, Burnett and Polk counties. When the Huronian rocks were elevated, they carried these up with them, and they partook of the folding in some measure. The copper-bearing range of Keweenaw Point, Michigan, extends southwestward through Ashland, Burnett and Polk counties, and throughout this whole extent the beds dip north-northwesterly toward Lake Superior, at a high angle; but in Douglas and Bayfield counties there is a parallel range in which the beds incline in the opposite direction, and undoubtedly form the opposite side of a trough formed by a downward flexure of the strata.

PALEOZOIC TIME—SILURIAN AGE.

POTSDAM SANDSTONE.

After the great Archæan upheaval, there followed a long period, concerning which very little is known—a “lost interval” in geological history. It is only certain that immense erosion of the Archæan strata took place, and that in time the sea advanced upon the island, eroding its strata and redepositing the wash and wear beneath its surface. The more resisting beds withstood this advance, and formed reefs and rocky islands off the ancient shore, about whose bases the sands and sediments accumulated, as they did over the bottom of the surrounding ocean. The breakers, dashing against the rocky cliffs, threw down masses of rock, which imbedded themselves in the sands, or were rolled and rounded on the beach, and at length were buried, in either case, to tell their own history, when they should be again disclosed by the ceaseless gnawings of the very elements that had buried them. In addition to the accumulations of wash and wear that have previously been the main agents of rock-formations, abundant life now swarms in the ocean, and the sands become the great cemetery of its dead. Though the contribution of each little being was small, the myriad millions that the waters brought forth, yielded by their remains, a large contribution to the accumulating sediments. Among plants, there were sea-weeds, and among animals, protozoans, radiates, mollusks and articulates, all the sub-kingdoms except the vertebrates. Among these, the most remarkable, both in nature and number, were the trilobites, who have left their casts in countless multitudes in certain localities. The result of the action of these several agencies was the formation of extensive beds of sandstone, with interstratified layers of limestone and shale. These surrounded the Archæan nucleus on all sides, and reposed on its flanks. On the Lake Superior margin, the sea acted mainly upon the copper and iron-bearing series, which are highly ferruginous, and the result was the red Lake Superior sandstone. On the opposite side of the island, the wave-action was mainly upon quartzites, porphyries and granites, and resulted in light-colored sandstones. The former is confined to the immediate vicinity of Lake Superior; the latter occupies a broad, irregular belt bordering the Archæan area on the south, and, being widest in the central part of the state, is often likened to a rude crescent. The form and position of the area will be best apprehended by referring to the accompanying map. It will be understood from the foregoing description, that the strata of this formation lie in a nearly horizontal position, and repose unconformably upon the worn surface of the crystalline rocks. The close of this period was not marked by any great upheaval; there

was no crumpling or metamorphism of the strata, and they have remained to the present day very much as they were originally deposited, save a slight arching upward in the central portion of the state. The beds have been somewhat compacted by the pressure of superincumbent strata and solidified by the cementing action of calcareous and ferruginous waters, and by their own coherence, but the original character of the formation, as a great sand-bed, has not been obliterated. It still bears the ripple-marks, cross-lamination, worm-burrows, and similar markings that characterize a sandy beach. Its thickness is very irregular, owing to the unevenness of its Archæan bottom, and may be said to range from 1,000 feet downward. The strata slope gently away from the Archæan core of the state and underlie all the later formations, and may be reached at any point in southern Wisconsin by penetrating to a sufficient depth, which can be calculated with an approximate correctness. As it is a water-bearing formation, and the source of fine Artesian wells, this is a fact of much importance. The interbedded layers of limestone and shale, by supplying impervious strata, very much enhance its value as a source of fountains.

LOWER MAGNESIAN LIMESTONE.

During the previous period, the accumulation of sandstone gave place for a time to the formation of limestone, and afterward the deposit of sandstone was resumed. At its close, without any very marked disturbance of existing conditions, the formation of limestone was resumed, and progressed with little interruption till a thickness ranging from 50 to 250 feet was attained. This variation is due mainly to irregularities of the upper surface of the formation, which is undulating, and in some localities, may appropriately be termed billowy, the surface rising and falling 100 feet, in some cases, within a short distance. This, and the preceding similar deposit, have been spoken of as limestones simply, but they are really dolomites, or magnesian limestones, since they contain a large proportion of carbonate of magnesia. This rock also contains a notable quantity of silica, which occurs disseminated through the mass of the rock; or, variously, as nodules or masses of chert; as crystals of quartz, filling or lining drusy cavities, forming beautiful miniature grottos; as the nucleus of oölitic concretions, or as sand. Some argillaceous matter also enters into its composition, and small quantities of the ores of iron, lead and copper, are sometimes found, but they give little promise of value. The evidences of life are very scanty. Some sea-weeds, a few mollusks, and an occasional indication of other forms of life embrace the known list, except at a few favored localities where a somewhat ampler fauna is found. But it is not, therefore, safe to assume the absence of life in the depositing seas, for it is certain that most limestone has originated from the remains of animals and plants that secrete calcareous material, and it is most consistent to believe that such was the case in the present instance, and that the distinct traces of life were mostly obliterated. This formation occupies an irregular belt skirting the Potsdam area. It was, doubtless, originally a somewhat uniform band swinging around the nucleus of the state already formed, but it has since been eroded by streams to its present jagged outline.

ST. PETER'S SANDSTONE.

At the close of this limestone-making period, there appears to have been an interval of which we have no record, and the next chapter of the history introduces us to another era of sand accumulation. The work began by the leveling up of the inequalities of the surface of the Lower Magnesian limestone, and it ceased before that was entirely accomplished in all parts of the State, for a few prominences were left projecting through the sand deposits. The material laid down consisted of a silicious sand, of uniform, well-rounded—doubtless well-rolled—grains. This was evidently deposited horizontally upon the uneven limestone surface, and so rests in a sense

unconformably upon it. Where the sandstone abuts against the sides of the limestone prominences, it is mingled with material derived by wave action from them, which tells the story of its formation. But aside from these and other exceptional impurities, the formation is a very pure sandstone, and is used for glass manufacture. At most points, the sandstone has never become firmly cemented and readily crumbles, so that it is used for mortar, the simple handling with pick and shovel being sufficient to reduce it to a sand. Owing to the unevenness of its bottom, it varies greatly in thickness, the greatest yet observed being 212 feet, but the average is less than 100 feet. Until recently, no organic remains had ever been found in it, and the traces now collected are very meager indeed, but they are sufficient to show the existence of marine life, and demonstrate that it is an oceanic deposit. The rarity of fossils is to be attributed to the porous nature of the rock, which is unfavorable to their preservation. This porosity, however, subserves a very useful purpose, as it renders this pre-eminently a water-bearing horizon, and supplies some of the finest Artesian fountains in the state, and is competent to furnish many more. It occupies but a narrow area at the surface, fringing that of the Lower Magnesian limestone on the south.

TRENTON LIMESTONE.

A slight change in the oceanic conditions caused a return to limestone formation, accompanied with the deposit of considerable clayey material, which formed shale. The origin of the limestone is made evident by a close examination of it, which shows it to be full of fragments of shells, corals, and other organic remains, or the impressions they have left. Countless numbers of the lower forms of life flourished in the seas, and left their remains to be comminuted and consolidated into limestone. A part of the time, the accumulation of clayey matter predominated, and so layers of shale alternate with the limestone beds, and shaly leaves and partings occur in the limestone layers. Unlike the calcareous strata above and below, a portion of these are true limestone, containing but a very small proportion of magnesia. A sufficient amount of carbonaceous matter is present in some layers to cause them to burn readily. This formation is quite highly metalliferous in certain portions of the lead region, containing zinc especially, and considerable lead, with less quantities of other metals. The formation abounds in fossils, many of them well preserved, and, from their great antiquity, they possess uncommon interest. All the animal sub-kingdoms, except vertebrates, are represented. The surface area of this rock borders the St. Peter's sandstone, but, to avoid too great complexity on the map, it is not distinguished from the next formation to which it is closely allied. Its thickness reaches 120 feet.

THE GALENA LIMESTONE.

With scarcely a change of oceanic conditions, limestone deposit continued, so that we find reposing upon the surface of the Trenton limestone, 250 feet, or less, of a light gray or buff colored highly magnesian limestone, occurring in heavy beds, and having a sub-crystalline structure. In the southern portion of the state, it contains but little shaly matter, but in the northeastern part, it is modified by the addition of argillaceous layers and leaves, and presents a bluish or greenish-gray aspect. It receives its name from the sulphide of lead,—galena, of which it contains large quantities, in the southwestern part of the state. Zinc ore is also abundant, and these minerals give to this and the underlying formation great importance in that region. Elsewhere, although these ores are present in small quantities, they have not developed economic importance. This limestone, though changing its nature, as above stated, occupies a large area in the southwestern part of the state, and a broad north and south belt in east-central Wisconsin. It will be seen that our island is growing apace by concentric additions, and that, as the several formations sweep around the central nucleus of Archæan rocks, they swing off into adjoining states, whose formation was somewhat more tardy than that of Wisconsin.

CINCINNATI SHALES.

A change ensued upon the formation of the Galena limestone, by virtue of which there followed the deposition of large quantities of clay, accompanied by some calcareous material, the whole reaching at some points a thickness of more than 200 feet. The sediment has never become more than partially indurated, and a portion of it is now only a bed of compact clay. Other portions hardened to shale or limestone according to the material. The shales are of various gray, green, blue, purple and other hues, so that where vertical cliffs are exposed, as along Green bay, a beautiful appearance is presented. As a whole, this is a very soft formation, and hence easily eroded. Owing to this fact, along the east side of the Green-bay-Rock-river valley, it has been extensively carried away, leaving the hard overlying Niagara limestone projecting in the bold cliffs known as "The Ledge." The prominence of the mounds in the southwestern part of the state are due to a like cause. Certain portions of this formation abound in astonishing numbers of well preserved fossils, among which corals, bryozoans, and brachiopods, predominate, the first named being especially abundant. A little intelligent attention to these might have saved a considerable waste of time and means in an idle search for coal, to which a slight resemblance to some of the shales of the coal measures has led. This formation underlies the mounds of the lead region, and forms a narrow belt on the eastern margin of the Green-bay-Rock-river valley. This was the closing period of the Lower Silurian Age.

CLINTON IRON ORE.

On the surface of the shales just described, there were accumulated, here and there, beds of peculiar lenticular iron ore. It is probable that it was deposited in detached basins, but the evidence of this is not conclusive. In our own state, this is chiefly known as Iron Ridge ore, from the remarkable development it attains at that point. It is made up of little concretions, which from their size and color are fancied to resemble flax seed, and hence the name "seed ore," or the roe of fish, and hence oölitic ore. "Shot ore" is also a common term. This is a soft ore occurring in regular horizontal beds which are quarried with more ease than ordinary limestone. This deposit attains, at Iron Ridge, the unusual thickness of twenty-five feet, and affords a readily accessible supply of ore, adequate to all demands for a long time to come. Similar, but much less extensive beds, occur at Hartford, and near Depere, besides some feeble deposits elsewhere. Large quantities of ore from Iron Ridge have been shipped to various points in this and neighboring States for reduction, in addition to that smelted in the vicinity of the mines.

NIAGARA LIMESTONE.

Following the period of iron deposit, there ensued the greatest limestone-forming era in the history of Wisconsin. During its progress a series of beds, summing up, at their points of greatest thickness, scarcely less than eight hundred feet, were laid down. The process of formation was essentially that already described, the accumulation of the calcareous secretions of marine life. Toward the close of the period, reefs appeared, that closely resemble the coral reefs of the present seas, and doubtless have a similar history. Corals form a very prominent element in the life of this period, and with them were associated great numbers of mollusks, one of which (*Pentamerus oblongus*) sometimes occurs in beds not unlike certain bivalves of to-day, and may be said to have been the oyster of the Silurian seas. At certain points, those wonderful animals, the stone lilies (*Crinoids*), grew in remarkable abundance, mounted on stems like a plant, yet true animals. Those unique crustaceans, the trilobites, were conspicuous in numbers and variety, while the gigantic cephalopods held sway over the life of the seas. In the vicinity of the reefs,

there seem to have been extensive calcareous sand flats and areas over which fine calcareous mud settled, the former resulting in a pure granular dolomite, the latter in a compact close-textured stone. The rock of the reefs is of very irregular structure. Of other portions of the formation, some are coarse heavy beds, some fine, even-bedded, close-grained layers, and some, again, irregular, impure and cherty. All are highly magnesian, and some are among the purest dolomites known. The Niagara limestone occupies a broad belt lying adjacent to Lake Michigan.

LOWER HELDERBERG LIMESTONE.

On Mud creek, near Milwaukee, there is found a thin-bedded slaty limestone, that is believed to represent this period. It has neglected, however, to leave us an unequivocal record of its history, as fossils are extremely rare, and its stratigraphical relations and lithographical character are capable of more than one interpretation. Near the village of Waubeka in Ozaukee county, there is a similar formation, somewhat more fossiliferous, that seems to represent the same period. The area which these occupy is very small and they play a most insignificant part in the geology of the state. They close the record of the Silurian age in Wisconsin. During its progress the land had been gradually emerging from the ocean and increasing its amplitude by concentric belts of limestone, sandstone and shale. There had been no general disturbance, only those slight oscillations which changed the nature of the forming rock and facilitated deposition. At its close the waters retired from the borders of the state, and an interval supervened, during which no additions are known to have been made to its substructure.

DEVONIAN AGE.

HAMILTON CEMENT ROCK.

After a lapse of time, during which the uppermost Silurian and the lowest Devonian strata, as found elsewhere, were formed, the waters again advanced slightly upon the eastern margin of the state and deposited a magnesian limestone mingled with silicious and aluminous material, forming a combination of which a portion has recently been shown to possess hydraulic properties of a high degree of excellence. With this deposition there dawned a new era in the life-history of Wisconsin. While multitudes of protozoans, radiates, mollusks and articulates swarmed in the previous seas, no trace of a vertebrate has been found. The Hamilton period witnessed the introduction of the highest type of the animal kingdom into the Wisconsin series. But even then only the lowest class was represented—the fishes. The lower orders of life, as before, were present, but the species were of the less ancient Devonian type. Precisely how far the deposit originally extended is not now known, as it has undoubtedly been much reduced by the eroding agencies that have acted upon it. That portion which remains, occupies a limited area on the lake shore immediately north of Milwaukee, extending inland half a dozen miles. The cement rock proper is found on the Milwaukee river just above the city. At the close of the Hamilton period the oceanic waters retired, and, if they ever subsequently encroached upon our territory, they have left us no permanent record of their intrusion.

The history of the formation of the substructure of the state was, it will be observed, in an unusual degree, simple and progressive. Starting with a firm core of most ancient crystalline rocks, leaf upon leaf of stony strata were piled around it, adding belt after belt to the margin of the growing island until it extended itself far beyond the limits of our state, and coalesced with the forming continent. An ideal map of the state would show the Archæan nucleus surrounded by concentric bands of the later formations in the order of their deposition. But during all the

vast lapse of time consumed in their growth, the elements were gnawing, carving and channeling the surface, and the outcropping edges of the formations were becoming more and more jagged, and now, after the last stratum had been added, and the whole had been lifted from the waters that gave it birth, there ensued perhaps, a still vaster era, during which the history was simply that of surface erosion. The face of the state became creased with the wrinkles of age. The edges of her rocky wrappings became ragged with the wear of time. The remaining Devonian periods, the great Carboniferous age, the Mesozoic era, and the earlier Tertiary periods passed, leaving no other record than that of denudation.

THE GLACIAL PERIOD.

With the approach of the great Ice Age, a new chapter was opened. An immense sheet of ice moved slowly, but irresistibly, down from the north, planing down the prominences, filling up the valleys, polishing and grooving the strata, and heaping up its rubbish of sand, gravel, clay and boulders over the face of the country. It engraved the lines of its progress on the rocks, and, by reading these, we learn that one prodigious tongue of ice plowed along the bed of Lake Michigan, and a smaller one pushed through the valley of Green bay and Rock river, while another immense ice-stream flowed southwestward through the trough of Lake Superior and onward into Minnesota. The diversion of the glacier through these great channels seems to have left the southwestern portion of the state intact, and over it we find no drift accumulations. With the approach of a warmer climate, the ice-streams were melted backward, leaving their *debris* heaped promiscuously over the surface, giving it a new configuration. In the midst of this retreat, a series of halts and advances seem to have taken place in close succession, by which the drift was pushed up into ridges and hills along the foot of the ice, after which a more rapid retreat ensued. The effect of this action was to produce that remarkable chain of drift hills and ridges, known as the Kettle range, which we have already described as winding over the surface of the state in a very peculiar manner. It is a great historic rampart, recording the position of the edge of the glacier at a certain stage of its retreat, and doubtless at the same time noting a great climatic or dynamic change.

The melting of the glacier gave rise to large quantities of water, and hence to numerous torrents, as well as lakes. There occurred about this time a depression of the land to the northward, which was perhaps the cause, in part or in whole, of the retreat of the ice. This gave origin to the great lakes. The waters advanced somewhat upon the land and deposited the red clay that borders Lakes Michigan and Superior and occupies the Green bay valley as far up as the vicinity of Fond du Lac. After several oscillations, the lakes settled down into their present positions. Wherever the glacier plowed over the land, it left an irregular sheet of commingled clay, sand, gravel and boulders spread unevenly over the surface. The depressions formed by its irregularities soon filled with water and gave origin to numerous lakelets. Probably not one of the thousands of Wisconsin lakes had an existence before the glacial period. Wherever the great lakes advanced upon the land, they leveled its surface and left their record in lacustrine clays and sandy beach lines.

With the retreat of the glacier, vegetation covered the surface, and by its aid and the action of the elements our fertile drift soils, among the last and best of Wisconsin's formations, were produced. And the work still goes on.

CLIMATOLOGY OF WISCONSIN.

By PROF. H. H. OLDENHAGE.

The climate of a country, or that peculiar state of the atmosphere in regard to heat and moisture which prevails in any given place, and which directly affects the growth of plants and animals, is determined by the following causes: 1st. Distance from the equator. 2d. Distance from the sea. 3d. Height above the sea. 4th. Prevailing winds; and 5th. Local influences, such as soil, vegetation, and proximity to lakes and mountains.

Of these causes, the first, distance from the equator, is by far the most important. The warmest climates are necessarily those of tropical regions where the sun's rays are vertical. But in proceeding from the equator toward the poles, less and less heat continues to be received by the same extent of surface, because the rays fall more and more obliquely, and the same amount of heat-rays therefore spread over an increasing breadth of surface; while, however, with the increase of obliquity, more and more heat is absorbed by the atmosphere, as the amount of air to be penetrated is greater. If the earth's surface were either wholly land or water, and its atmosphere motionless, the gradations of climate would run parallel with the latitudes from the equator to the poles. But owing to the irregular distribution of land and water, and the prevailing winds, such an arrangement is impossible, and the determination of the real climate of a given region, and its causes, is one of the most difficult problems of science.

On the second of these causes, distance from the sea, depends the difference between oceanic and continental climates. Water is more slowly heated and cooled than land; the climates of the sea and the adjacent land are therefore much more equable and moist than those of the interior.

A decrease of temperature is noticeable in ascending high mountains. The rate at which the temperature falls with the height above the sea is a very variable quantity, and is influenced by a variety of causes, such as latitude, situation, moisture, or dryness, hour of the day and season of the year. As a rough approximation, however, the fall of 1° of the thermometer for every 300 feet is usually adopted.

Air in contact with any part of the earth's surface, tends to acquire the temperature of that surface. Hence, winds from the north are cold; those from the south are warm. Winds from the sea are moist, and winds from the land are usually dry. Prevailing winds are the result of the relative distribution of atmospheric pressure blowing *from* places where the pressure is highest, *toward* places where it is lowest. As climate practically depends on the temperature and moisture of the air, and as these again depend on the prevailing winds which come charged with the temperature and moisture of the regions they have traversed, it is evident that charts showing the mean pressure of the atmosphere give us the key to the climates of the different regions of the world. The effect of prevailing winds is seen in the moist and equable climate of Western Europe, especially Great Britain, owing to the warm and moist southwest winds; and in the extremes of the eastern part of North America, due to the warm and moist winds prevailing in summer and the Arctic blasts of winter.

Among local influences which modify climate, the nature of the soil is one of the most important. As water absorbs much heat, wet, marshy ground usually lowers the mean temperature. A sandy waste presents the greatest extremes. The extremes of temperature are also modified by extensive forests, which prevent the soil from being as much warmed and cooled as it would be if bare. Evaporation goes on more slowly under the trees, since the soil is screened from the sun. And as the air among the trees is little agitated by the wind, the vapor is left to accumulate, and hence the humidity of the air is increased. Climate is modified in a similar manner by lakes and other large surfaces of water. During summer the water cools the air and reduces the temperature of the locality. In winter, on the other hand, the opposite effect is produced. The surface water which is cooled sinks to lower levels; the warmer water rising to the surface, radiates heat into the air and thus raises the temperature of the neighboring region. This influence is well illustrated, on a great scale, in our own state by Lake Michigan.

It is, lastly, of importance whether a given tract of country is diversified by hills, valleys and mountains. Winds with their warm vapor strike the sides of mountains and are forced up into higher levels of the atmosphere, where the vapor is condensed into clouds. Air coming in contact, during the night or in winter, with the cooled declivities of hills and rising grounds becomes cooled and consequently denser and sinks to the low-lying grounds, displacing the warmer and lighter air. Hence, frosts often occur at these places, when no trace of them can be found at higher levels. For the same reason the cold of winter is generally more intense in ravines and valleys than on hill tops and high grounds, the valleys being a receptacle for the cold-air currents which descend from all sides. These currents give rise to gusts and blasts of cold wind, which are simply the out-rush of cold air from such basins. This is a subject of great practical importance to fruit-growers.

In order to understand the principal features of the climate of Wisconsin, and the conditions on which these depend, it is necessary to consider the general climatology of the eastern United States. The chief characteristic of this area as a whole is, that it is subject to great extremes—to all those variations of temperature which prevail from the tropical to the Arctic regions. This is principally due to the topographical conditions of our continent. The Rocky mountains condensing the moisture of the warm winds from the Pacific and preventing them from reaching far inland, separate the climate of the Mississippi valley widely from that of the Pacific slope. Between the Gulf of Mexico and the Arctic sea there is no elevation to exceed 2,000 feet to arrest the flow of the hot southerly winds of summer, or the cold northerly winds of winter. From this results a variation of temperature hardly equaled in any part of the world.

In determining the climates of the United States, western Europe is usually taken as the basis of comparison. The contrast between these regions is indeed very great. New York is in the same latitude with Madrid, Naples and Constantinople. Quebec is not so far north as Paris. London and Labrador are equi-distant from the equator; but while England, with her mild, moist climate, produces an abundance of vegetation, in Labrador all cultivation ceases. In the latitude of Stockholm and St. Petersburg, at the 60th parallel, we find in eastern North America vast ice-fields which seldom melt. The moist and equable climate of western Europe in high latitudes is due to the Gulf Stream and the southwest winds of the Atlantic, which spread their warmth and moisture over the western coast. Comparison, however, shows that the climate of the Pacific coast of North America is quite as mild as that of western Europe; and this is due to the same kind of influences, namely, to the warm, moist winds and the *currents* of the Pacific. And to continue the comparison still further, in proceeding on both continents from west to east, or from ocean into the interior, we find a general resemblance of climatic conditions, modified greatly, it is true, by local influences.

The extreme summer climate of the eastern United States is owing to the southerly and southwesterly winds, which blow with great regularity during this season, and, after traversing great areas of tropical seas, bear the warmth and moisture of these seas far inland, and give this region the peculiar semi-tropical character of its summers. The average temperature of summer varies between 80° for the Gulf states, and 60° for the extreme north. While in the Gulf states the thermometer often rises to 100° , in the latitude of Wisconsin this occurs very seldom. During winter the prevailing winds are from the northwest. These cold blasts from the Arctic sea are deflected by the Rocky mountains, sweep down unopposed into lower latitudes, and produce all the rigors of an arctic winter. The mean temperature for this season varies between 60° for the Gulf coast and 15° for the extreme northern part of Wisconsin. In the northern part of the valley the cold is sometimes so intense that the thermometer sinks to the freezing point of mercury.

The extreme of heat and cold would give a continental climate if this extreme were not accompanied by a profusion of rain. The southerly winds, laden with moisture, distribute this moisture with great regularity over the valley. The amount of rainfall, greater in summer than in winter, varies, from the Gulf of Mexico to Wisconsin, from 63 inches to 30 inches. On the Atlantic coast, where the distribution is more equal throughout the year on account of its proximity to the ocean, the amount varies, from Florida to Maine, from 63 to 40 inches. The atmospheric movements on which, to a great extent, the climatic conditions of the eastern United States depend, may be summed up as follows:

"1. That the northeast trades, deflected in their course to south and southeast winds in their passage through the Caribbean Sea and the Gulf of Mexico, are the warm and moist winds which communicate to the Mississippi valley and the Atlantic slope their fertility.

"2. That the prevalence of these winds from May to October communicates to this region a sub-tropical climate.

"3. That in the region bordering on the Gulf of Mexico, the atmospheric disturbances are propagated from south to north; but in the northern and middle states, owing to a prevailing upper current, from west to east.

"4. That while this upper current is cool and dry, and we have the apparent anomaly of rain storms traveling from west to east, at the same time the moisture supplying them comes from the south.

"5. That, in the winter, the south and southeast winds rise into the upper current, while the west and northwest winds descend and blow as surface winds, accompanied by an extraordinary depression of temperature, creating, as it were, an almost arctic climate.

"6. That the propagation of the cold winds from west to east is due to the existence of a warmer and lighter air to the eastward.

"7. That in summer the westerly currents seldom blow with violence, because, in passing over the heated plains, they acquire nearly the same temperature as the southerly currents, but in winter the conditions are reversed."

The line of conflict of these aerial currents, produced by unequal atmospheric pressure, shift so rapidly that the greatest changes of temperature, moisture, and wind, are experienced within a few hours, these changes usually affecting areas of great extent. In the old world, on the other hand, the mountain systems, generally running from east to west, offer an impediment, especially to the polar currents, and the weather is therefore not so changeable.

Wisconsin, situated in the upper and central part of the Mississippi valley, is subject to the same general climatic conditions which give this whole area its peculiar climate.

The highest mean summer temperature is 72° Fahrenheit in the southwestern part of the

state, and the lowest 64° at Bayfield, Lake Superior. During the months of June, July and August, the thermometer often rises as high as 90° , seldom to 100° . In 1874 the mercury reached this high point twice at LaCrosse, and three times at Dubuque, Iowa. There are usually two or three of these "heated terms" during the summer, terminated by abrupt changes of temperature.

The isotherm of 70° (an isotherm being a line connecting places having the same mean temperature) enters this state from the west, in the northern part of Grant county, touches Madison, takes a southerly direction through Walworth county, passes through southern Michigan, Cleveland, and Pittsburg, reaching the Atlantic ocean a little north of New York city. From this it is seen that southern Wisconsin, southern and central Michigan, northern Ohio, central Pennsylvania, and southern New York have nearly the same summer temperature. Northwestward this line runs through southern Minnesota and along the Missouri to the foot of the mountains. Eastern Oregon, at $47^{\circ} 30'$ north latitude, has the same average summer temperature; the line then returns and touches the Pacific coast at San Diego.

The remarkable manner in which so large a body of water as Lake Michigan modifies the temperature has been carefully determined, so far as it relates to Wisconsin, by the late Dr. Lapham, of Milwaukee. It is seen by the map that the average summer temperature of Racine is the same as that of St. Paul. The weather map for July, 1875, in the signal service report for 1876, shows that the mean temperature for July was the same in Rock county, in the southern part of the state, as that of Breckenridge, Minn., north of St. Paul. The moderating effect of the lake during hot weather is felt in the adjacent region during both day and night.

Countries in the higher latitudes having an extreme summer temperature are usually characterized by a small amount of rain-fall. The Mississippi valley, however, is directly exposed in spring and summer to the warm and moist winds from the south, and as these winds condense their moisture by coming in contact with colder upper currents from the north and west, it has a profusion of rain which deprives the climate largely of its continental features. As already stated, the average amount of rain-fall in Wisconsin is about 30 inches annually. Of this amount about one-eighth is precipitated in winter, three-eighths in summer, and the rest is equally distributed between spring and autumn — in other words, rain is abundant at the time of the year when it is most needed. In Wisconsin the rainfall is greatest in the southwestern part of the state; the least on and along the shore of Lake Michigan. This shows that the humidity of the air of a given area can be greater, and the rainfall less, than that of some other.

In comparison with western Europe, even where the mean temperature is higher than in the Mississippi valley, the most striking fact in the climatic conditions of the United States is the great range of plants of tropical or sub-tropical origin, such as Indian corn, tobacco, etc. The conditions on which the character of the vegetation depends are temperature and moisture, and the mechanical and chemical composition of the soil.

"The basis of this great capacity (the great range of plants) is the high curve of heat and moisture for the summer, and the fact that the measure of heat and of rain are almost or quite tropical for a period in duration from one to five months, in the range from Quebec to the coast of the Gulf." Indian corn attains its full perfection between the summer isotherms 72° and 77° , in Illinois, Iowa, Missouri, and Kansas; but it may be grown up to the line of 65° , which includes the whole of Wisconsin. The successful cultivation of this important staple is due to the intense heat of summer and a virgin soil rich in nitrogen.

While Milwaukee and central Wisconsin have a mean annual temperature of 45° , that of southern Ireland and central England is 50° ; the line of 72° , the average temperature for July, runs from Walworth county to St. Paul, while during the same month Ireland and England have a mean temperature of only 60° . In Wisconsin the thermometer rises as high as 90° and above,

while the range above the mean in England is very small. It is the tropical element of our summers, then, that causes the grape, the corn, etc., to ripen, while England, with a higher mean temperature, is unable to mature them successfully. Ireland, where southern plants may remain out-doors, unfrosted, the whole winter, can not mature those fruits and grasses which ripen in Wisconsin. In England a depression of 2° below the mean of 60° will greatly reduce the quantity, or prevent the ripening of wheat altogether, 60° being essential to a good crop. Wheat, requiring a lower temperature than corn, is better adapted to the climate of Wisconsin. This grain may be grown as far north as Hudson bay.

Autumn, including September, October and November, is of short duration in Wisconsin. North of the 42d parallel, or the southern boundary line of the state, November belongs properly to the winter months, its mean temperature being about 32° . The decrease of heat from August to September is generally from 8° to 9° ; 11° from September to October, and 14° from October to November. The average temperature for these three months is about 45° . A beautiful season, commonly known as Indian summer, frequently occurs in the latter part of October and in November. This period is characterized by a mild temperature and a hazy, calm atmosphere. According to Loomis, this appears to be due to "an uncommonly tranquil condition of the atmosphere, during which the air becomes filled with dust and smoke arising from numerous fires, by which its transparency is greatly impaired." This phenomenon extends as far north as Lake Superior, but it is more conspicuous and protracted in Kansas and Missouri, and is not observed in the southern states.

Destructive frosts generally occur in September, and sometimes in August. "A temperature of 36° to 40° at sunrise is usually attended with frosts destructive to vegetation, the position of the thermometer being usually such as to represent less than the actual refrigeration at the open surface." In 1875, during October, at Milwaukee, the mercury fell seven times below the freezing point, and twice below zero in November, the lowest being 14° .

The winters are generally long and severe, but occasionally mild and almost without snow. The mean winter temperature varies between 23° in the southeastern part of the state, and 16° at Ashland, in the northern. For this season the extremes are great. The line of 20° is of importance, as it marks the average temperature which is fatal to the growth of all the tender trees, such as the pear and the peach. In the winter of 1875 and 1876, the mean temperature for December, January and February, in the upper lake region, was about 4° above the average mean for many years, while during the previous winter the average temperature for January and February was about 12° below the mean for many years, showing a great difference between cold and mild winters. In the same winter, 1875-'76, at Milwaukee, the thermometer fell only six times below zero, the lowest being 12° , while during the preceding winter the mercury sank thirty-six times below zero, the lowest being 23° . In the northern and northwestern part of the state the temperature sometimes falls to the freezing point of mercury. During the exceptionally cold Winter of 1872-3, at La Crosse, the thermometer sank nearly fifty times below zero; on December 24, it indicated 37° below, and on January 18, 43° below zero, averaging about 12° below the usual mean for those months. The moderating effect of Lake Michigan can be seen by observing how the lines indicating the mean winter temperature curve northward as they approach the lake. Milwaukee, Sheboygan, Manitowoc, Two Rivers, and the Grand Traverse region of Michigan, have the same average winter temperature. The same is true regarding Galena, Ill., Beloit, and Kewaunee. A similar influence is noticed in all parts of the state. Dr. Lapham concludes that this is not wholly due to the presence of Lake Michigan, but that the mountain range which extends from a little west of Lake Superior to the coast of Labrador (from 1,100 to 2,240 feet high) protects the lake region in no inconsiderable degree from the excessive cold of winter.

According to the same authority, the time at which the Milwaukee river was closed with ice, for a period of nine years, varied between November 15 and December 1; the time at which it became free from ice, between March 3 and April 13. In the lake district, snow and rain are interspersed through all the winter months, rain being sometimes as profuse as at any other season. In the northwestern part the winter is more rigid and dry. Northern New York and the New England states usually have snow lying on the ground the whole winter, but in the southern lake district it rarely remains so long. In 1842-'43, however, sleighing commenced about the middle of November, and lasted till about the same time in April — five months.

The average temperature for the three months of spring, March, April and May, from Walworth county to St. Paul, is about 45°. In central Wisconsin the mean for March is about 27°, which is an increase of nearly 7° from February. The lowest temperature of this month in 1876 was 40° above zero. April shows an average increase of about 9° over March. In 1876 the line of 45° for this month passed from LaCrosse to Evanston, Ill., touching Lake Erie at Toledo, showing that the interior west of Lake Michigan is warmer than the lake region. The change from winter to spring is more sudden in the interior than in the vicinity of the lakes. "In the town of Lisbon, fifteen miles from Lake Michigan," says Dr. Lapham, "early spring flowers show themselves about ten days earlier than on the lake. In spring vegetation, in places remote from the lakes, shoots up in a very short time, and flowers show their petals, while on the lake shore the cool air retards them and brings them more gradually into existence." The increase from April to May is about 15°. In May, 1876, Pembina and Milwaukee had nearly the same mean temperature, about 55°.

The extremes of our climate and the sudden changes of temperature no doubt have a marked influence, both physically and mentally, on the American people. And though a more equable climate may be more conducive to perfect health, the great range of our climate from arctic to tropical, and the consequent variety and abundance of vegetable products, combine to make the Mississippi valley perhaps one of the most favorable areas in the world for the development of a strong and wealthy nation.

During the months of summer, in the interior of the eastern United States, at least three-fourths of the rain-fall is in showers usually accompanied by electrical discharges and limited to small areas. But in autumn, winter, and spring nearly the whole precipitation takes place in general storms extending over areas of 300, 500 and sometimes over 1,000 miles in diameter, and generally lasting two or three days. An area of low atmospheric pressure causes the wind to blow toward that area from all sides, and when the depression is sudden and great, it is accompanied by much rain or snow. On account of the earth's rotation, the wind blowing toward this region of low pressure is deflected to the right, causing the air to circulate around the center with a motion spirally inward. In our latitude the storm commences with east winds. When the storm center, or area of lowest barometer, is to the south of us, the wind gradually veers, as the storm passes from west to east with the upper current, round to the northwest by the north point. On the south side of the storm center, the wind veers from southeast to southwest, by the south point. The phenomena attending such a storm when we are in or near the part of its center are usually as follows: After the sky has become overcast with clouds, the wind from the northeast generally begins to rise and blows in the opposing direction to the march of the storm. The clouds which are now moving over us, discharge rain or snow according to circumstances. The barometer continues to fall, and the rain or snow is brought obliquely down from the northern quarter by the prevailing wind. After a while the wind changes slightly in direction and then ceases. The thermometer rises and the barometer has reached its lowest point. This is the center of the storm. After the calm the wind has changed its direction to northwest or west. The

wind blows again, usually more violently than before, accompanied by rain or snow, which is now generally of short duration. The sky clears, and the storm is suddenly succeeded by a temperature 10 or 20 degrees below the mean. Most of the rain and snow falls with the east winds, or before the center passes a given point. The path of these storms is from west to east, or nearly so, and only seldom in other directions. These autumn, winter, and spring rains are generally first noticed on the western plains, but may originate at any point along their path, and move eastward with an average velocity of about 20 miles an hour in summer and 30 miles in winter, but sometimes attaining a velocity of over 50 miles, doing great damage on the lakes. In predicting these storms, the signal service of the army is of incalculable practical benefit, as well as in collecting data for scientific conclusions.

A subject of the greatest importance to every inhabitant of Wisconsin is the influence of forests on climate and the effects of disrobing a county of its trees. The general influence of forests in modifying the extremes of temperature, retarding evaporation and the increased humidity of the air, has already been mentioned. That clearing the land of trees increases the temperature of the ground in summer, is so readily noticed that it is scarcely necessary to mention it; while in winter the sensible cold is never so extreme in woods as on an open surface exposed to the full force of the winds. "The lumbermen in Canada and the northern United States labor in the woods without inconvenience, when the mercury stands many degrees below zero, while in the open grounds, with only a moderate breeze, the same temperature is almost insupportable." "In the state of Michigan it has been found that the winters have greatly increased in severity within the last forty years, and that this increased severity seems to move along even-paced with the destruction of the forests. Thirty years ago the peach was one of the most abundant fruits of that State; at that time frost, injurious to corn at any time from May to October, was a thing unknown. Now the peach is an uncertain crop, and frost often injures the corn." The precise influence of forests on temperature may not at present admit of definite solution, yet the mechanical screen which they furnish to the soil often far to the leeward of them, is sufficiently established, and this alone is enough to encourage extensive planting wherever this protection is wanting.

With regard to the quantity of rain-fall, "we can not positively affirm that the total annual quantity of rain is even locally diminished or increased by the destruction of the woods, though both theoretical considerations and the balance of testimony strongly favor the opinion that more rain falls in wooded than in open countries. One important conclusion, at least, upon the meteorological influence of forests is certain and undisputed: the proposition, namely, that, within their own limits, and near their own borders, they maintain a more uniform degree of humidity in the atmosphere than is observed in cleared grounds. Scarcely less can it be questioned that they tend to promote the frequency of showers, and, if they do not augment the amount of precipitation, they probably equalize its distribution through the different seasons."

There is abundant and undoubted evidence that the amount of water existing on the surface in lakes and rivers, in many parts of the world, is constantly diminishing. In Germany, observations of the Rhine, Oder, Danube, and the Elbe, in the latter case going back for a period of 142 years, demonstrate beyond doubt, that each of these rivers has much decreased in volume, and there is reason to fear that they will eventually disappear from the list of navigable rivers.

"The 'Blue-Grass' region of Kentucky, once the pride of the West, has now districts of such barren and arid nature that their stock farmers are moving toward the Cumberland mountains, because the creeks and old springs dried up, and their wells became too low to furnish water for their cattle." In our own state "such has been the change in the flow of the Milwau-

kee river, even while the area from which it receives its supply is but partially cleared, that the proprietors of most of the mills and factories have found it necessary to resort to the use of steam, at a largely increased yearly cost, to supply the deficiency of water-power in dry seasons of the year." "What has happened to the Milwaukee river, has happened to all the other water courses in the state from whose banks the forest has been removed; and many farmers who selected land upon which there was a living brook of clear, pure water, now find these brooks dried up during a considerable portion of the year."

Districts stripped of their forest are said to be more exposed than before to loss of harvests, to droughts and frost. "Hurricanes, before unknown, sweep unopposed over the regions thus denuded, carrying terror and devastation in their track." Parts of Asia Minor, North Africa, and other countries bordering on the Mediterranean, now almost deserts, were once densely populated and the granaries of the world. And there is good reason to believe "that it is the destruction of the forests which has produced this devastation." From such facts Wisconsin, already largely robbed of its forests, should take warning before it is too late.

TREES, SHRUBS AND VINES.

By P. R. HOY, M.D.

It is not the purpose of this article to give a botanical description, but merely brief notes on the economical value of the woods, and the fitness of the various indigenous trees, shrubs and vines for the purpose of ornament, to be found in Wisconsin.

WHITE OAK—*Quercus Alba*.—This noble tree is the largest and most important of the American oaks. The excellent properties of the wood render it eminently valuable for a great variety of uses. Wherever strength and durability are required, the white oak stands in the first rank. It is employed in making wagons, coaches and sleds; staves and hoops of the best quality for barrels and casks are obtained from this tree; it is extensively used in architecture, ship-building, etc.; vast quantities are used for fencing; the bark is employed in tanning. The domestic consumption of this tree is so great that it is of the first importance to preserve the young trees wherever it is practicable, and to make young plantations where the tree is not found. The white oak is a graceful, ornamental tree, and worthy of particular attention as such; found abundantly in most of the timbered districts.

BURR OAK—*Q. Macrocarpa*.—This is perhaps the most ornamental of our oaks. Nothing can exceed the graceful beauty of these trees, when not crowded or cramped in their growth, but left free to follow the laws of their development. Who has not admired these trees in our extensive burr oak openings? The large leaves are a dark green above and a bright silvery white beneath, which gives the tree a singularly fine appearance when agitated by the wind. The wood is tough, close-grained, and more durable than the white oak, especially when exposed to frequent changes of moisture and drying; did the tree grow to the same size, it would be preferred for most uses. Abundant, and richly worthy of cultivation, both for utility and ornament.

SWAMP WHITE OAK—*Q. Bicolor*.—Is a valuable and ornamental tree, not quite so large or as common as the burr oak. The wood is close-grained, durable, splits freely, and is well worthy of cultivation in wet, swampy grounds, where it will thrive.

POST OAK—*Q. Obtusiloba*.—Is a scraggy, small tree, found sparingly in this state. The timber is durable, and makes good fuel. Not worthy of cultivation.

SWAMP CHESTNUT OAK—*Q. Prinus*.—This species of chestnut oak is a large, graceful tree, wood rather open-grained, yet valuable for most purposes to which the oaks are applied; makes the best fuel of any of this family. A rare tree, found at Janesville and Brown's lake, near Burlington. Worthy of cultivation.

RED OAK—*Q. Rubra*.—The red oak is a well-known, common, large tree. The wood is coarse-grained, and the least durable of the oaks, nearly worthless for fuel, and scarcely worthy of cultivation, even for ornament.

PIN OAK—*Q. Palustris*.—This is one of the most common trees in many sections of the state. The wood is of little value except for fuel. The tree is quite ornamental, and should be sparingly cultivated for this purpose.

SHINGLE OAK—*Q. Imbricaria*.—Is a tree of medium size, found sparingly as far north as Wisconsin. It is ornamental, and the wood is used for shingles and staves.

SCARLET OAK—*Q. Coccinea*.—This is an ornamental tree, especially in autumn, when its leaves turn scarlet, hence the name. Wood of little value; common.

SUGAR MAPLE—*Acer Saccharium*.—This well-known and noble tree is found growing abundantly in many sections of the state. The wood is close-grained and susceptible of a beautiful polish, which renders it valuable for many kinds of furniture, more especially the varieties known as bird's-eye and curled maples. The wood lacks the durability of the oak; consequently is not valuable for purposes where it will be exposed to the weather. For fuel it ranks next to hickory. The sugar manufactured from this tree affords no inconsiderable resource for the comfort and even wealth of many sections of the northern states, especially those newly settled, where it would be difficult and expensive to procure their supply from a distance. As an ornamental tree it stands almost at the head of the catalogue. The foliage is beautiful, compact, and free from the attacks of insects. It puts forth its yellow blossoms early, and in the autumn the leaves change in color and show the most beautiful tints of red and yellow long before they fall. Worthy of especial attention for fuel and ornament, and well adapted to street-planting.

RED MAPLE—*A. Rubrum*.—Is another fine maple of more rapid growth than the foregoing species. With wood rather lighter, but quite as valuable for cabinet-work — for fuel not quite so good. The young trees bear transplanting even better than other maples. Though highly ornamental, this tree hardly equals the first-named species. It puts forth, in early spring, its scarlet blossoms before a leaf has yet appeared. Well adapted to street-planting.

MOUNTAIN MAPLE—*A. Spicatum*.—Is a small branching tree, or rather shrub, found growing in clumps. Not worthy of much attention.

SILVER MAPLE—*A. Dasyarpum*.—This is a common tree growing on the banks of streams, especially in the western part of the state, grown largely for ornament, yet for the purpose it is the least valuable of the maples. The branches are long and straggling, and so brittle that they are liable to be injured by winds.

BOX MAPLE—*Negundo Aceroides*.—This tree is frequently called box elder. It is of a rapid growth and quite ornamental. The wood is not much used in the arts, but is good fuel. Should be cultivated. It grows on Sugar and Rock rivers.

WHITE ELM—*Ulmus Americana*.—This large and graceful tree stands confessedly at the head of the list of ornamental deciduous trees. Its wide-spreading branches and long, pendulous branchlets form a beautiful and conspicuous head. It grows rapidly, is free from disease and the destructive attacks of insects, will thrive on most soils, and for planting along streets, in public grounds or lawns, is unsurpassed by any American tree. The wood is but little used in the arts; makes good firewood; should be planted along all the roads and streets, near every dwelling, and on all public grounds.

SLIPPERY ELM—*V. Fulva*.—This smaller and less ornamental species is also common. The wood, however, is much more valuable than the white elm, being durable and splitting readily. It makes excellent rails, and is much used for the framework of buildings; valuable for fuel; should be cultivated.

WILD BLACK CHERRY—*Cerasus Serotina*.—This large and beautiful species of cherry is one of the most valuable of American trees. The wood is compact, fine-grained, and of a brilliant reddish color, not liable to warp, or shrink and swell with atmospheric changes; extensively employed by cabinet-makers for every species of furnishing. It is exceedingly durable, hence is valuable for fencing, building, etc. Richly deserves a place in the lawn or timber plantation.

BIRD CHERRY—*C. Pennsylvanica*.—Is a small northern species, common in the state and worthy of cultivation for ornament.

CHOKE CHERRY—*C. Virginiana*.—This diminutive tree is of little value, not worth the trouble of cultivation.

WILD PLUM—*Prunus Americana*.—The common wild plum when in full bloom is one of the most ornamental of small flowering trees, and as such should not be neglected. The fruit is rather agreeable, but not to be compared to fine cultivated varieties, which may be engrafted on the wild stock to the very best advantage. It is best to select small trees, and work them on the roots. The grafts should be inserted about the middle of April.

HACKBERRY—*Celtis Occidentalis*.—This is an ornamental tree of medium size; wood hard, close-grained and elastic; makes the best of hoops, whip-stalks, and thills for carriages. The Indians formerly made great use of the hackberry wood for their bows. A tree worthy of a limited share of attention.

AMERICAN LINDEN OR BASSWOOD—*Tilia Americana*.—Is one of the finest ornamental trees for public grounds, parks, etc., but will not thrive where the roots are exposed to bruises; for this reason it is not adapted to planting along the streets of populous towns. The wood is light and tough, susceptible of being bent to almost any curve; durable if kept from the weather; takes paint well, and is considerably used in the arts; for fuel it is of little value. This tree will flourish in almost any moderately rich, damp soil; bears transplanting well; can be propagated readily from layers.

WHITE THORN—*Crataegus Coccinea*, and DOTTED THORN—*C. Punctata*.—These two species of thorn are found everywhere on the rich bottom lands. When in bloom they are beautiful, and should be cultivated for ornament. The wood is remarkably compact and hard, and were it not for the small size of the tree, would be valuable.

CRAB APPLE—*Pyrus Coronaria*.—This common small tree is attractive when covered with its highly fragrant rose-colored blossoms. Wood hard, fine, compact grain, but the tree is too small for the wood to be of much practical value. Well worthy of a place in extensive grounds.

MOUNTAIN ASH—*P. Americana*.—This popular ornament to our yards is found growing in the northern part of the state and as far south as 43°. The wood is useless.

WHITE ASH—*Fraxinus Acuminata*.—Is a large, interesting tree, which combines utility with beauty in an eminent degree. The wood possesses strength, suppleness and elasticity, which renders it valuable for a great variety of uses. It is extensively employed in carriage manufacturing; for various agricultural implements; is esteemed superior to any other wood for oars; excellent for fuel. The white ash grows rapidly, and in open ground forms one of the most lovely trees that is to be found. The foliage is clean and handsome, and in autumn turns from its bright green to a violet purple hue, which adds materially to the beauty of our autumnal sylvan scenery. It is richly deserving our especial care and protection, and will amply repay all labor and expense bestowed on its cultivation.

James Weaver

SUSSEX.

BLACK ASH—*F Sambucifolia*.—This is another tall, graceful and well-known species of ash. The wood is used for making baskets, hoops, etc.; when thoroughly dry, affords a good article of fuel. Deserves to be cultivated in low, rich, swampy situations, where more useful trees will not thrive.

BLACK WALNUT—*Juglans Nigra*.—This giant of the rich alluvial bottom lands claims special attention for its valuable timber. It is among the most durable and beautiful of American woods; susceptible of a fine polish; not liable to shrink and swell by heat and moisture. It is extensively employed by the cabinet-makers for every variety of furniture. Walnut forks, are frequently found which rival in richness and beauty the far-famed mahogany. This tree, in favorable situations, grows rapidly; is highly ornamental, and produces annually an abundant crop of nuts.

BUTTERNUT—*J. Cinerea*.—This species of walnut is not as valuable as the above, yet for its beauty, and the durability of its wood, it should claim a small portion of attention. The wood is rather soft for most purposes to which it otherwise might be applied. When grown near streams, or on moist side-hills, it produces regularly an ample crop of excellent nuts. It grows rapidly.

SHELL-BARK HICKORY—*Carya Alba*.—This, the largest and finest of American hickories, grows abundantly throughout the state. Hickory wood possesses probably the greatest strength and tenacity of any of our indigenous trees, and is used for a variety of purposes, but, unfortunately, it is liable to be eaten by worms, and lacks durability. For fuel, the shell-bark hickory stands unrivaled. The tree is ornamental and produces every alternate year an ample crop of the best of nuts.

SHAG-BARK HICKORY—*C. Inclata*.—Is a magnificent tree, the wood of which is nearly as valuable as the above. The nuts are large, thick-shelled and coarse, not to be compared to the *C. alba*. A rare tree in Wisconsin; abundant further south.

PIGNUT HICKORY—*C. Glabra*.—This species possesses all the bad and but few of the good qualities of the shell-bark. The nuts are smaller and not so good. The tree should be preserved and cultivated in common with the shell-bark. Not abundant.

BITTERNUT—*C. Amara*.—Is an abundant tree, valuable for fuel, but lacking the strength and elasticity of the preceding species. It is, however, quite as ornamental as any of the hickories.

RED BEECH—*Fagus Ferruginea*.—This is a common tree, with brilliant, shining light-green leaves, and long, flexible branches. It is highly ornamental, and should be cultivated for this purpose, as well as for its useful wood, which is tough, close-grained and compact. It is much used for plane-stocks, tool handles, etc., and as an article of fuel is nearly equal to maple.

WATER BEECH—*Carpinus Americana*.—Is a small tree, called hornbeam by many. The wood is exceedingly hard and compact, but the small size of the tree renders it almost useless.

IRON WOOD—*Ostrya Virginica*.—This small tree is found disseminated throughout most of our woodlands. It is, to a considerable degree, ornamental, but of remarkably slow growth. The wood possesses valuable properties, being heavy and strong, as the name would indicate; yet, from its small size, it is of but little use.

BALSAM POPLAR—*Populus Candicans*.—This tree is of medium size, and is known by several names: Wild balm of Gilead, cottonwood, etc. It grows in moist, sandy soil, on river bottoms. It has broad, heart-shaped leaves, which turn a fine yellow after the autumn frosts. It grows more rapidly than any other of our trees; can be transplanted with entire success when eight or nine inches in diameter, and makes a beautiful shade tree—the most ornamental of poplars. The wood is soft, spongy, and nearly useless.

QUAKING ASPEN—*P. Tremuloides*.—Is a well-known, small tree. It is rather ornamental, but scarcely worth cultivating.

LARGE ASPEN—*P. Grandidentata*.—Is the largest of our poplars. It frequently grows to the height of sixty or seventy feet, with a diameter of two and one-half feet. The wood is soft, easily split, and used for frame buildings. It is the most durable of our poplars.

COTTON WOOD—*P. Monolifera*.—This is the largest of all the poplars; abundant on the Mississippi river. Used largely for fuel on the steamboats. The timber is of but little use in the arts.

SYCAMORE OR BUTTONWOOD—*Platanus Occidentalis*.—This, the largest and most majestic of our trees, is found growing only on the rich alluvial river bottoms. The tree is readily known, even at a considerable distance, by its whitish smooth branches. The foliage is large and beautiful, and the tree one of the most ornamental known. The wood speedily decays, and when sawed into lumber warps badly; on these accounts it is but little used, although susceptible of a fine finish. As an article of fuel it is of inferior merit.

CANOE BIRCH—*Betula Papyracea*.—Is a rather elegant and interesting tree. It grows abundantly in nearly every part of the state. The wood is of a fine glossy grain, susceptible of a good finish, but lacks durability and strength, and, therefore, is but little used in the mechanical arts. For fuel it is justly prized. It bears transplanting without difficulty. The Indians manufacture their celebrated bark canoes from the bark of this tree.

CHERRY BIRCH—*B. Lenta*.—This is a rather large, handsome tree, growing along streams. Leaves and bark fragrant. Wood, fine-grained, rose-colored; used largely by the cabinet-makers.

YELLOW BIRCH—*B. Lutea*.—This beautiful tree occasionally attains a large size. It is highly ornamental, and is of value for fuel; but is less prized than the preceding species for cabinet work.

KENTUCKY COFFEE TREE—*Gymnocladus Canadensis*.—This singularly beautiful tree is only found sparingly, and on rich alluvial lands. I met with it growing near the Peccatonica, in Green county. The wood is fine-grained, and of a rosy hue; is exceedingly durable, and well worth cultivating.

JUNE BERRY—*Amelanchier Canadensis*.—Is a small tree which adds materially to the beauty of our woods in early spring, at which time it is in full bloom. The wood is of no particular value, and the tree interesting only when covered with its white blossoms.

WHITE PINE—*Pinus Strobus*.—This is the largest and most valuable of our indigenous pines. The wood is soft, free from resin, and works easily. It is extensively employed in the mechanical arts. It is found in great profusion in the northern parts of the state. This species is readily known by the leaves being in *fives*. It is highly ornamental, but in common with all pines, will hardly bear transplanting. Only small plants should be moved.

NORWAY OR RED PINE—*P. Resinosa*, and YELLOW PINE—*P. Mitis*.—These are two large trees, but little inferior in size to the white pine. The wood contains more resin, and is consequently more durable. The leaves of both these species are in *twos*. Vast quantities of lumber are yearly manufactured from these two varieties and the white pine. The extensive pineries of the state are rapidly diminishing.

SHRUB PINE—*P. Banksiana*.—Is a small, low tree; only worthy of notice here for the ornamental shade it produces. It is found in the northern sections of the state.

BALSAM FIR—*Abies Balsamea*.—This beautiful evergreen is multiplied to a great extent on the shores of Lake Superior, where it grows forty or fifty feet in height. The wood is of but

little value The balsam of fir, or Canadian balsam, is obtained from this tree.

DOUBLE SPRUCE—*A. Nigra*.—This grows in the same localities with the balsam fir, and assumes the same pyramidal form, but is considerably larger. The wood is light and possesses considerable strength and elasticity, which renders it one of the best materials for yards and top-masts for shipping. It is extensively cultivated for ornament.

HEMLOCK—*A. Canadensis*.—The hemlock is the largest of the genus. It is gracefully ornamental, but the wood is of little value. The bark is extensively employed in tanning.

TAMARACK—*Larix Americana*.—This beautiful tree grows abundantly in swampy situations throughout the state. It is not quite an evergreen. It drops its leaves in winter, but quickly recovers them in early spring. The wood is remarkably durable and valuable for a variety of uses. The tree grows rapidly, and can be successfully cultivated in peaty situations, where other trees would not thrive.

ARBOR VITÆ—*Thuja Occidentalis*.—This tree is called the white or flat cedar. It grows abundantly in many parts of the state. The wood is durable, furnishing better fence posts than any other tree, excepting the red cedar. Shingles and staves of a superior quality are obtained from these trees. A beautiful evergreen hedge is made from the young plants, which bear transplanting better than most evergreens. It will grow on most soils if sufficiently damp.

RED CEDAR — *Juniperus Virginiana*.—Is a well known tree that furnishes those celebrated fence posts that "last forever." The wood is highly fragrant, of a rich red color, and fine grained; hence it is valuable for a variety of uses. It should be extensively cultivated.

DWARF JUNIPER — *J. Sabina*.—This is a low trailing shrub. Is considerably prized for ornament. Especially worthy of cultivation in large grounds.

SASSAFRAS — *Sassafras officinale*.—Is a small tree of fine appearance, with fragrant leaves bark. Grows in Kenosha county. Should be cultivated.

WILLOWS.—There are many species of willows growing in every part of the state, several of which are worthy of cultivation near streams and ponds.

WHITE WILLOW — *Salix alba*.—Is a fine tree, often reaching sixty feet in height. The wood is soft, and makes the best charcoal for the manufacture of gun-powder. Grows rapidly.

BLACK WILLOW — *S. Nigra*.—This is also a fine tree, but not quite so large as the foregoing. It is used for similar purposes.

There are many shrubs and vines indigenous to the state worthy of note. I shall, however, call attention to only a few of the best.

DOGWOODS.—There are several species found in our forests and thickets. All are ornamental when covered with a profusion of white blossoms. I would especially recommend: *cornus sericea*, *C. stolonifera*, *C. paniculata*, and *C. alternifolia*. All these will repay the labor of transplanting to ornamental grounds.

VIBURNUMS.—These are very beautiful. We have *viburnum lentago*, *V. prunifolium*, *V. nudum*, *V. dentatum*, *V. pubescens*, *V. acerifolium*, *V. pauciflorum*, and *V. opulus*. The last is known as the cranberry tree, and is a most beautiful shrub when in bloom, and also when covered with its red, acid fruit. The common snow-ball tree is a cultivated variety of the *V. opulus*.

WITCH HAZEL — *Hamamelis Virginica*.—Is an interesting, tall shrub that flowers late in autumn, when the leaves are falling, and matures the fruit the next summer. It deserves more attention than it receives.

BURNING BUSH — *Euonymus atropurpureus*.—This fine shrub is called the American strawberry, and is exceedingly beautiful when covered with its load of crimson fruit, which remains during winter.

SUMACH—*Rhus typhina*.—Is a tall shrub, well known, but seldom cultivated. When well grown it is ornamental and well adapted for planting in clumps.

HOP TREE—*Ptelea trifoliata*.—This is a showy shrub with shining leaves, which should be cultivated. Common in rich, alluvial ground.

BLADDER NUT—*Staphylea trifolia*.—Is a fine, upright, showy shrub, found sparingly all over the state. Is ornamental, with greenish striped branches and showy leaves.

VINES.

VIRGINIA CREEPER—*Ampelopsis quinquefolia*.—This is a noble vine, climbing extensively by disc-bearing tendrils, so well known as to require no eulogy. Especially beautiful in its fall colors.

BITTER SWEET—*Celastrus scandens*.—Is a stout twining vine, which would be an ornament to any grounds. In the fall and early winter it is noticeable for its bright fruit. Common.

YELLOW HONEYSUCKLE—*Lonicera flava*.—Is a fine native vine, which is found climbing over tall shrubs and trees. Ornamental. There are several other species of honeysuckle; none, however, worthy of special mention.

FROST GRAPE—*Vitæ cordifolia*.—This tall-growing vine has deliciously sweet blossoms, which perfume the air for a great distance around. For use as a screen, this hardy species will be found highly satisfactory.

FAUNA OF WISCONSIN.

By P. R. HOV, M.D.

FISH AND FISH CULTURE.

Fish are cold blooded aquatic vertebrates, having fins as organs of progression. They have a two-chambered heart; their bodies are mostly covered with scales, yet a few are entirely naked, like catfish and eels; others again are covered with curious plates, such as the sturgeon. Fish inhabit both salt and fresh water. It is admitted by all authority that fresh-water fish are more universally edible than those inhabiting the ocean. Marine fish are said to be more highly flavored than those inhabiting fresh waters; an assertion I am by no means prepared to admit. As a rule, fish are better the colder and purer the water in which they are found, and where can you find those conditions more favorable than in the cold depths of our great lakes? We have tasted, under the most favorable conditions, about every one of the celebrated salt-water fish, and can say that whoever eats a whitefish just taken from the pure, cold water of Lake Michigan will have no reason to be envious of the dwellers by the sea.

Fish are inconceivably prolific; a single female deposits at one spawn from one thousand to one million eggs, varying according to species.

Fish afford a valuable article of food for man, being highly nutritious and easy of digestion; they abound in phosphates, hence are valuable as affording nutrition to the osseous and nervous system, hence they have been termed, not inappropriately, brain food—certainly a very desirable article of diet for some people. They are more savory, nutritious and easy of digestion when just taken from the water; in fact, the sooner they are cooked after being caught the better. No fish should be more than a few hours from its watery element before being placed upon the table. For convenience, I will group our fish into families as a basis for what I shall offer. Our bony fish,

having spine rays and covered with comb-like scales, belong to the perch family—a valuable family; all take the hook, are gamey, and spawn in the summer.

The yellow perch and at least four species of black or striped bass have a wide range, being found in all the rivers and lakes in the state. There is a large species of fish known as Wall-eyed pike (*Leucoperca americana*) belonging to this family, which is found sparingly in most of our rivers and lakes. The pike is an active and most rapacious animal, devouring fish of considerable size. The flesh is firm and of good flavor. It would probably be economical to propagate it to a moderate extent.

The six-spined bass (*Pomoxys hexacanthus*, Agas.) is one of the most desirable of the spine-rayed fish found in the State. The flesh is fine flavored, and as the fish is hardy and takes the hook with avidity, it should be protected during the spawning season and artificially propagated. I have examined the stomachs of a large number of these fish and in every instance found small crawfish, furnishing an additional evidence in its favor. Prof. J. P. Kirtland, the veteran ichthyologist of Ohio, says that this so-called “grass bass” is the fish for the million.

The white bass (*Roccus chrysops*) is a species rather rare even in the larger bodies of water, but ought to be introduced into every small lake in the State, where I am certain they would flourish. It is an excellent fish, possessing many of the good qualities and as few of the bad as any that belong to the family. There is another branch of this family, the sunfish, *Pomotis*, which numbers at least six species found in Wisconsin. They are beautiful fish, and afford abundant sport for the boys; none of them, however, are worth domesticating (unless it be in the *aquarium*) as there are so many better.

The carp family (*Cyprinidae*) are soft finned fish without maxillary teeth. They include by far the greater number of fresh-water fish. Some specimens are not more than one inch, while others are nearly two feet in length. Our chubs, silversides and suckers are the principal members of this family. Dace are good pan-fish, yet their small size is objectionable; they are the children's game fish. The *Cyprinidae* all spawn in the spring, and might be profitably propagated as food for the larger and more valuable fish.

There are six or seven species of suckers found in our lakes and rivers. The red horse, found every where, and at least one species of the buffalo, inhabiting the Mississippi and its tributaries, are the best of the genus *Catostomus*. Suckers are bony, and apt to taste suspiciously of mud; they are only to be tolerated in the absence of better. The carp (*Cyprinius carpo*) has been successfully introduced into the Hudsonriver.

The trout family (*Salmonidae*) are soft-finned fish with an extra dorsal adipose fin without rays. They inhabit northern countries, spawning in the latter part of fall and winter. Their flesh is universally esteemed. The trout family embrace by far the most valuable of our fish, including, as it does, trout and whitefish. The famous speckled trout (*Salmo fontinalis*) is a small and beautiful species which is found in nearly every stream in the northern half of the State. Wherever there is a spring run or lake, the temperature of which does not rise higher than sixty-five or seventy in the summer, there trout can be propagated in abundance. The great salmon trout (*Sal. amethystus*) of the great lakes is a magnificent fish weighing from ten to sixty pounds. The *Siscowit salmo siscowit* of Lake Superior is about the same size, but not quite so good a fish, being too fat and oily. They will, no doubt, flourish in the larger of the inland lakes.

The genus *Coregonus* includes the true whitefish, or lake shad. In this genus, as now restricted, the nose is square and the under jaw short, and when first caught they have the fragrance of fresh cucumbers. There are at least three species found in Lake Michigan. In my

opinion these fish are more delicately flavored than the celebrated Potomac shad; but I doubt whether they will thrive in the small lakes, owing to the absence of the small *crustacea* on which they subsist. The closely allied genus *Argyrosomus* includes seven known species inhabiting the larger lakes, and one, the *Argyrosomus sisco*, which is found in several of the lesser lakes. The larger species are but little inferior to the true whitefish, with which they are commonly confounded. The nose is pointed, the under jaw long, and they take the hook at certain seasons with activity. They eat small fish as well as insects and *crustaceans*.

Of the pickerel family, we have three or four closely allied species of the genus *Esox*, armed with prodigious jaws filled with cruel teeth. They lie motionless ready to dart, swift as an arrow, upon their prey. They are the sharks of the fresh water. The pickerel are so rapacious that they spare not their own species. Sometimes they attempt to swallow a fish nearly as large as themselves, and perish in consequence. Their flesh is moderately good, and as they are game to the backbone, it might be desirable to propagate them to a moderate extent under peculiar circumstances.

The catfish (*Siluridæ*) have soft fins, protected by sharp spines, and curious fleshy barbels floating from their lips, without scales, covered only with a slimy coat of mucus. The genus *Pimlodus* are scavengers among fish, as vultures among birds. They are filthy in habit and food. There is one interesting trait of the catfish—the vigilant and watchful motherly care of the young by the male. He defends them with great spirit, and herds them together when they straggle. Even the mother is driven far off; for he knows full well that she would not scruple to make a full meal off her little black tadpole-like progeny. There are four species known to inhabit this State—one peculiar to the great lakes, and two found in the numerous affluents of the Mississippi. One of these, the great yellow catfish, sometimes weighs over one hundred pounds. When in good condition, stuffed and well baked, they are a fair table fish. The small bull-head is universally distributed.

The sturgeons are large sluggish fish, covered with plates instead of scales. There are at least three species of the genus *Acipenser* found in the waters of Wisconsin. Being so large and without bones, they afford a sufficiently cheap article of food; unfortunately, however, the quality is decidedly bad. Sturgeons deposit an enormous quantity of eggs; the roe not unfrequently weighs one fourth as much as the entire body, and numbers, it is said, many millions. The principal commercial value of sturgeons is found in the roe and swimming bladder. The much prized caviare is manufactured from the former, and from the latter the best of isinglass is obtained.

The gar-pikes (*Lepidosteus*) are represented by at least three species of this singular fish. They have long serpentine bodies, with jaws prolonged into a regular bill, which is well provided with teeth. The scales are composed of bone covered on the outside with enamel, like teeth. The alligator gar, confined to the depths of the Mississippi, is a large fish, and the more common species, *Lepidosteus bison*, attains to a considerable size. The *Lepidosteus*, now only found in North America, once had representatives all over the globe. Fossils of the same family of which the gar-pike is the type, have been found all over Europe, in the oldest fossiliferous beds, in the strata of the age of coal, in the new red sandstone, in oölitic deposits, and in the chalk and tertiary formations—being one of the many living evidences that North America was the first country above the water. For all practical purposes, we should not regret to have the gar-pikes follow in the footsteps of their aged and illustrious predecessors. They could well be spared.

There is a fish (*Lota maculose*) which belongs to the cod-fish family, called by the fishermen the “lawyers,” for what reason I am not able to say—at any rate, the fish is worthless. There are a great number of small fish, interesting only to the naturalist, which I shall omit to mention here.

Fish of the northern countries are the most valuable, for the reason that the water is colder and purer. Wisconsin, situated between forty-two thirty, and forty-seven degrees of latitude, bounded on the east and north by the largest lakes in the world, on the west by the "Great river," traversed by numerous fine and rapid streams, and sprinkled all over with beautiful and picturesque lakes, has physical conditions certainly the most favorable, perhaps of any State, for an abundant and never-failing supply of the best fish. Few persons have any idea of the importance of the fisheries of Lake Michigan. It is difficult to collect adequate data to form a correct knowledge of the capital invested and the amount of fish taken; enough, however, has been ascertained to enable me to state that at Milwaukee alone \$100,000 are invested, and not less than two hundred and eighty tons of dressed fish taken annually. At Racine, during the entire season of nine months, there are, on an average, one thousand pounds of whitefish and trout, each, caught and sold daily, amounting to not less than \$16,000. It is well known that, since the adoption of the gill-net system, the fishermen are enabled to pursue their calling ten months of the year.

When the fish retire to the deep water, they are followed with miles of nets, and the poor fish are entangled on every side. There is a marked falling off in the number and size of whitefish and trout taken, when compared with early years. When fish were only captured with seines, they had abundant chance to escape and multiply so as to keep an even balance in number. Only by artificial propagation and well enforced laws protecting them during the spawning season, can we hope now to restore the balance. In order to give some idea of the valuable labors of the state fish commissioners, I will state briefly that they have purchased for the state a piece of property, situated three miles from Madison, known as the Nine Springs, including forty acres of land, on which they have erected a dwelling-house, barn and hatchery, also constructed several ponds, in which can be seen many valuable fish in the enjoyment of perfect health and vigor. As equipped, it is, undoubtedly, one of the best, if not *the best*, hatchery in the states. In this permanent establishment the commission design to hatch and distribute to the small lakes and rivers of the interior the most valuable of our indigenous fish, such as bass, pike, trout, etc., etc., as well as many valuable foreign varieties. During the past season, many fish have been distributed from this state hatchery. At the Milwaukee Water Works, the commission have equipped a hatchery on a large scale, using the water as pumped directly from the lake. During the past season there was a prodigious multitude of young trout and whitefish distributed from this point. The success of Superintendent Welcher in hatching whitefish at Milwaukee has been the best yet gained, nearly ninety per cent. of the eggs "laid down" being hatched. Pisciculturists will appreciate this wonderful success, as they well know how difficult it is to manage the spawn of the whitefish.

I append the following statistics of the number of fish hatched and distributed from the Milwaukee hatchery previous to 1878:

Total number of fish hatched, 8,000,000—whitefish, 6,300,000; salmon trout, 1,700,000.

They were distributed as follows, in the month of May, 1877: Whitefish planted in Lake Michigan, at Racine, 1,000,000; at Milwaukee, 3,260,000; between Manitowoc and Two Rivers 1,000,000; in Green bay, 1,000,000; in Elkhart lake, 40,000.

Salmon trout were turned out as follows: Lake Michigan, near Milwaukee, 600,000; Brown's lake, Racine county, 40,000; Delavan lake, Walworth county, 40,000; Troy lake, Walworth county, 40,000; Pleasant lake, Walworth county, 40,000; Lansdale lake, Walworth county, 40,000; Ella lake, Milwaukee county, 16,000; Cedar lake, Washington county, 40,000; Elkhart lake, Sheboygan county, 40,000; Clear lake, Rock county, 40,000; Ripley lake,

Jefferson county, 40,000; Mendota lake, Dane county, 100,000; Fox lake, Dodge county, 40,000; Swan and Silver lakes, Columbia county, 40,000; Little Green lake, Green Lake county, 40,000; Big Green lake, Green Lake county, 100,000; Bass lake, St. Croix county, 40,000; Twin lakes, St. Croix county, 40,000; Long lake, Chippewa county, 40,000; Oconomowoc lake, Waukesha county, 100,000; Pine lake, Waukesha county, 40,000; Pewaukee lake, Waukesha county, 100,000; North lake, Waukesha county, 40,000; Nagawicka lake, Waukesha county, 40,000; Okanche lake, Waukesha county, 40,000.

LARGE ANIMALS.—TIME OF THEIR DISAPPEARANCE.

Fifty years ago, the territory now included in the state of Wisconsin, was nearly in a state of nature, all the large wild animals were then abundant. Now, all has changed. The ax and plow, gun and dog, railway and telegraph, have metamorphosed the face of nature. Most of the large quadrupeds have been either exterminated, or have hid themselves away in the wilderness. In a short time, all of these will have disappeared from the state. The date and order in which animals become extinct within the boundaries of the state, is a subject of great interest. There was a time when the antelope, the woodland caribou, the buffalo, and the wild turkey, were abundant, but are now no longer to be found.

The Antelope, *Antilocarpa Americana*, now confined to the Western plains, did, two hundred years ago, inhabit Wisconsin as far east as Michigan. In October, 1679, Father Hennepin, with La Salle and party, in four canoes, coasted along the Western shore of Lake Michigan. In Hennepin's narrative, he says; "The oldest of them" (the Indians) "came to us the next morning with their calumet of peace, and brought some *wild goats*." This was somewhere north of Milwaukee. "Being in sore distress, we saw upon the coast a great many ravens and eagles" (turkey vultures), "from whence we conjectured there was some prey, and having landed upon that place, we found above the half of a fat *wild goat*, which the wolves had strangled. This provision was very acceptable to us, and the rudest of our men could not but praise the Divine Providence which took so particular care of us." This must have been somewhere near Racine. "On the 16th" (October, 1679), "we met with abundance of game. A savage we had with us; killed several stags (deer) and *wild goats*, and our men a great many turkeys, very fat and big." This must have been south of Racine. These *goats* were undoubtedly antelopes. Schoolcraft mentions antelopes as occupying the Northwest territory.

When the last buffalo crossed the Mississippi is not precisely known. It is certain they lingered in Wisconsin in 1825. It is said there was a buffalo shot on the St. Croix river as late as 1832, so Wisconsin claims the last buffalo. The woodland caribou—*Rangifer caribou*—were never numerous within the limits of the state. A few were seen not far from La Pointe in 1845. The last wild turkey in the eastern portion of the state, was in 1846. On the Mississippi, one was killed in 1856. I am told by Dr. Walcott, that turkeys were abundant in Wisconsin previous to the hard winter of 1842-3, when snow was yet two feet deep in March, with a stout crust, so that the turkeys could not get to the ground. They became so poor and weak, that they could not fly, and thus became an easy prey to the wolves, foxes, wild cats, minks, etc., which exterminated almost the entire race. The Doctor says he saw but one single individual the next winter. Elk were on Hay river in 1863, and I have little doubt a few yet remain. Moose are not numerous, a few yet remain in the northwestern part of the state. I saw moose tracks on the Montreal river, near Lake Superior, in the summer of 1845. A few panthers may still inhabit the wilderness of Wisconsin. Benjamin Bones, of Racine, shot one on the headwaters of

Black river, December, 1863. Badgers are now nearly gone, and in a few years more, the only badgers found within the state, will be two legged ones. Beavers are yet numerous in the small lakes in the northern regions. Wolverines are occasionally met with in the northern forests. Bears, wolves, and deer, will continue to flourish in the northern and central counties, where underbrush, timber, and small lakes abound.

All large animals will soon be driven by civilization out of Wisconsin. The railroad and improved firearms will do the work, and thus we lose the primitive denizens of the forest and prairies.

PECULIARITIES OF THE BIRD FAUNA.

The facts recorded in this paper, were obtained by personal observations within fifteen miles of Racine, Wisconsin, latitude $42^{\circ} 46'$ north, longitude $87^{\circ} 48'$ west. This city is situated on the western shore of Lake Michigan, at the extreme southern point of the heavy lumbered district, the base of which rests on Lake Superior. Racine extends six miles further into the lake than Milwaukee, and two miles further than Kenosha. At this point the great prairie approaches near the lake from the west. The extreme rise of the mercury in summer, is from 90° to 100° Fahrenheit. The isothermal line comes further north in summer, and retires further south in winter than it does east of the great lakes, which physical condition will sufficiently explain the remarkable peculiarities of its animal life, the overlapping, as it were, of two distinct faunas. More especially is this true of birds, that are enabled to change their locality with the greatest facility. Within the past thirty years, I have collected and observed over three hundred species of birds, nearly half of all birds found in North America. Many species, considered rare in other sections, are found here in the greatest abundance. A striking peculiarity of the ornithological fauna of this section, is that southern birds go farther north in summer, while northern species go farther south in winter than they do east of the lakes. Of summer birds that visit us, I will enumerate a few of the many that belong to a more southern latitude in the Atlantic States. Nearly all nest with us, or, at least, did some years ago.

Yellow-breasted chat, *Icteria virdis*; mocking bird, *Mimus polyglottus*; great Carolina wren, *Thriothorus ludovicianus*; prothonotary warbler, *Protonotaria citrea*; summer red bird, *Pyrangia aestiva*; wood ibis, *Tantalus loculator*.

Among Arctic birds that visit us in winter are:

Snowy owl, *Nyctea nivea*; great gray owl, *Syrnium cineris*; hawk owl, *Surnia ulula*; Arctic three-toed woodpecker, *Picoides arcticus*; banded three-toed woodpecker, *Picoides hirsutus*; magpie, *Pica hudsonica*; Canada jay, *Perisoreus canadensis*; evening grosbeak, *Hesperiphona vespertina*; Hudson titmouse, *Parus hudsonicus*; king eider, *Somateria spectabilis*; black-throated diver, *Colymbus arcticus*; glaucous gull, *Laurus glaucus*.

These examples are sufficient to indicate the rich avi fauna of Wisconsin. It is doubtful if there is another locality where the Canada jay and its associates visit in winter where the mocking bird nests in summer, or where the hawk owl flies silently over the spot occupied during the warmer days by the summer red bird and the yellow-breasted chat. But the ax has already leveled much of the great woods, so that there is now a great falling off in numbers of our old familiar feathered friends. It is now extremely doubtful if such a collection can ever again be made within the boundaries of this state, or indeed, of any other.

EDUCATIONAL HISTORY.

BY PROF. EDWARD SEARING, STATE SUPERINTENDENT OF PUBLIC INSTRUCTION.

From the time of the earliest advent of the families of French traders into the region now known as Wisconsin, to the year 1818, when that region became part of Michigan territory, education was mostly confined to private instruction, or was sought by the children of the wealthier in the distant cities of Quebec, Montreal, and Detroit. The early Jesuit missionaries, and—subsequently to 1816, when it came under the military control of the United States—representatives of various other religious denominations, sought to teach the Indian tribes of this section. In 1823, Rev. Eleazar Williams, well known for his subsequent claim to be the Dauphin of France, and who was in the employ of the Episcopal Missionary Society, started a school of white and half-breed children on the west side of Fox river, opposite "Shanty-Town." A Catholic mission school for Indians was organized by an Italian priest near Green Bay, in 1830. A clause of the treaty with the Winnebago Indians, in 1832, bound the United States to maintain a school for their children near Prairie du Chien for a period of twenty-seven years.

THE ORIGINAL SCHOOL CODE.

From 1818 to 1836, Wisconsin formed part of Michigan territory. In the year 1837, Michigan was admitted into the Union as a state, and Wisconsin, embracing what is now Minnesota, Iowa, and a considerable region still further westward, was, by act of congress approved April 20th of the year previous, established as a separate territory. The act provided that the existing laws of the territory of Michigan should be extended over the new territory so far as compatible with the provisions of the act, subject to alteration or repeal by the new government created. Thus with the other statutes, the school code of Michigan became the original code of Wisconsin, and it was soon formally adopted, with almost no change, by the first territorial legislature, which met at Belmont. Although modified in some of its provisions almost every year, this imperfect code continued in force until the adoption of the state constitution in 1848. The first material changes in the code were made by the territorial legislature at its second session, in 1837, by the passage of a bill "to regulate the sale of school lands, and to provide for organizing, regulating, and perfecting common schools." It was provided in this act that as soon as twenty electors should reside in a surveyed township, they should elect a board of three commissioners, holding office three years, to lay off districts, to apply the proceeds of the leases of school lands to the payment of teachers' wages, and to call school meetings. It was also provided that each district should elect a board of three directors, holding office one year, to locate school-houses, hire teachers for at least three months in the year, and levy taxes for the support of schools. It was further provided that a third board of five inspectors should be elected annually in each town to examine and license teachers and inspect the schools. Two years subsequently (1839) the law was revised and the family, instead of the electors, was made the basis of the town organization. Every town with not less than ten families was made a school district and required to provide a competent teacher. More populous towns were divided into two or more districts. The office of town commissioner was abolished, its duties with certain others being transferred to the inspectors. The rate-bill system of taxation, previously in existence, was repealed, and a tax on the whole county for building school-houses and support-

ing schools was provided for. One or two years later the office of town commissioners was restored, and the duties of the inspectors were assigned to the same. Other somewhat important amendments were made at the same time.

In 1840, a memorial to congress from the legislature represented that the people were anxious to establish a common-school system, with suitable resources for its support. From lack of sufficient funds many of the schools were poorly organized. The rate-bill tax or private subscription was often necessary to supplement the scanty results of county taxation. Until a state government should be organized, the fund accruing from the sale of school lands could not be available. Congress had made to Wisconsin, as to other new states, for educational purposes, a donation of lands. These lands embraced the sixteenth section in every township in the state, the 500,000 acres to which the state was entitled by the provisions of an act of congress passed in 1841, and any grant of lands from the United States, the purposes of which were not specified. To obtain the benefits of this large fund was a leading object in forming the state constitution.

AGITATION FOR FREE SCHOOLS.

Shortly before the admission of the state the subject of free schools began to be quite widely discussed. In February, 1845, Col. M. Frank, of Kenosha, a member of the territorial legislature, introduced a bill, which became a law, authorizing the legal voters of his own town to vote taxes on all the assessed property for the full support of its schools. A provision of the act required its submission to the people of the town before it could take effect. It met with strenuous opposition, but after many public meetings and lectures held in the interests of public enlightenment, the act was ratified by a small majority in the fall of 1845, and thus the first free school in the state was legally organized. Subsequently, in the legislature, in the two constitutional conventions, and in educational assemblies, the question of a free-school system for the new state soon to be organized provoked much interest and discussion. In the constitution framed by the convention of 1846, was provided the basis of a free-school system similar to that in our present constitution. The question of establishing the office of state superintendent, more than any other feature of the proposed school system, elicited discussion in that body. The necessity of this office, and the advantages of free schools supported by taxation, were ably presented to the convention by Hon. Henry Barnard, of Connecticut, in an evening address. He afterward prepared, by request, a draft of a free-school system, with a state superintendent at its head, which was accepted and subsequently embodied in the constitution and the school law. In the second constitutional convention, in 1848, the same questions again received careful attention, and the article on education previously prepared, was, after a few changes, brought into the shape in which we now find it. Immediately after the ratification by the people, of the constitution prepared by the second convention, three commissioners were appointed to revise the statutes. To one of these, Col. Frank, the needed revision of the school laws was assigned. The work was acceptably performed, and the new school code of 1849, largely the same as the present one, went into operation May first of that year.

THE SCHOOL SYSTEM UNDER THE STATE GOVERNMENT.

In the state constitution was laid the broad foundation of our present school system. The four corner stones were: (1) The guaranteed freedom of the schools; (2) the school fund created; (3) the system of supervision; (4) a state university for higher instruction. The school fund has five distinct sources for its creation indicated in the constitution: (1) Proceeds from the sale of lands granted to the state by the United States for educational purposes; (2)

all moneys accruing from forfeiture or escheat; (3) all fines collected in the several counties for breach of the penal laws; (4) all moneys paid for exemption from military duty; (5) five per cent. of the sale of government lands within the state. In addition to these constitutional sources of the school fund, another and sixth source was open from 1856 to 1870. By an act of the state legislature in the former year, three-fourths of the net proceeds of the sales of the swamp and overflowed lands, granted to the state by congress, Sept. 28, 1850, were added to the common-school fund, the other fourth going into a fund for drainage, under certain circumstances; but if not paid over to any town for that purpose within two years, to become a part of the school fund. The following year one of these fourths was converted into the normal-school fund, leaving one-half for the common-school fund. In 1858, another fourth was given to the drainage fund, thus providing for the latter one-half the income from the sales, and leaving for the school fund, until the year 1865, only the remaining one-fourth. In the latter year this was transferred to the normal-school fund, with the provision, however, that one-fourth of the income of this fund should be transferred to the common-school fund until the annual income of the latter fund should reach \$200,000. In 1870 this provision was repealed, and the whole income of the normal fund left applicable to the support of normal schools and teachers' institutes.

At the first session of the state legislature in 1848, several acts were passed which carried out in some degree the educational provisions of the constitution. A law was enacted to provide for the election, and to define the duties, of a state superintendent of public instruction. A district board was created, consisting of a moderator, director, and treasurer; the office of town superintendent was established, and provision was made for the creation of town libraries, and for the distribution of the school fund. The present school code of Wisconsin is substantially that passed by the legislature of 1848, and which went into operation May 1, 1849. The most important change since made was the abolition of the office of town superintendent, and the substitution thereof of the county superintendency. This change took effect January 1, 1862.

THE SCHOOL-FUND INCOME.

The first annual report of the state superintendent, for the year 1849, gives the income of the school fund for that year as \$588, or eight and three-tenth mills per child. Milwaukee county received the largest amount, \$69.63, and St. Croix county the smallest, twenty-four cents. The average in the state was forty-seven cents per district. The following table will show at a glance the quinquennial increase in the income of the fund, the corresponding increase in the number of school children, and the apportionment per child, from 1849 to 1875, inclusive; also, the last published apportionment, that for 1878. It will be seen that since 1855 the increase of the fund has not kept pace with the increase of school population:

YEAR.	NO. CHILDREN OF SCHOOL-AGE.	INCOME OF SCHOOL FUND	RATE PER CHILD.	YEAR.	NO. CHILDREN OF SCHOOL-AGE.	INCOME OF SCHOOL FUND	RATE PER CHILD.
1849..	70,457	\$588 00	\$0.0083	1865..	335,582	151,816 34	.46
1850..	92,105	47,716 00	.518	1870..	412,481	159,271 38	.40
1855..	186,085	125,906 02	.67	1875..	450,304	184,624 64	.41
1860..	288,984	184,949 76	.64	1878..	478,692	185,546 01	.39

The amount of productive school fund reported September 30, 1878, was \$2,680,703.27. The portion of the fund not invested at that date, was \$58,823.70.

THE STATE UNIVERSITY.

In his message to the first territorial legislature, in 1836, Governor Dodge recommended asking from congress aid for the establishment of a state educational institution, to be governed by the legislature. This was the first official action looking to the establishment of a state university. The same legislature passed an act to establish and locate the Wisconsin university at Belmont, in the county of Iowa. At its second session, the following year, the legislature passed an act, which was approved January 19, 1838, establishing "at or near Madison, the seat of government, a university for the purpose of educating youth, the name whereof shall be 'The University of the Territory of Wisconsin.'" A resolution was passed at the same session, directing the territorial delegate in congress to ask of that body an appropriation of \$20,000 for the erection of the buildings of said university, and also to appropriate two townships of vacant land for its endowment. Congress accordingly appropriated, in 1838, seventy-two sections, or two townships, for the support of a "seminary of learning in the territory of Wisconsin," and this was afterward confirmed to the state for the use of the university. No effectual provision, however, was made for the establishment of the university until ten years later, when the state was organized. Congress, as has been said, had made a donation of lands to the territory for the support of such an institution. but these lands could not be made available for that purpose until the territory should become a state. The state constitution, adopted in 1848, declared that provision should be made for the establishment of a state university, and that the proceeds of all lands donated by the United States to the state for the support of a university should remain a perpetual fund, the interest of which should be appropriated to its support.

The state legislature, at its first session, passed an act, approved July 26, 1848, establishing the University of Wisconsin, defining its location, its government, and its various departments, and authorizing the regents to purchase a suitable site for the buildings, and to proceed to the erection of the same, after having obtained from the legislature the approval of plans. This act repealed the previous act of 1838. The regents were soon after appointed, and their first annual report was presented to the legislature, January 30, 1849. This report announced the selection of a site, subject to the approval of the legislature, announced the organization of a preparatory department, and the election of a chancellor or president. The university was thus organized, with John H. Lathrop, president of the University of Missouri, as its first chancellor, and John W. Sterling as principal of the preparatory department, which was opened February 5, 1849. Chancellor Lathrop was not formally inaugurated until January 16, 1850.

Owing to the short-sighted policy of the state in locating without due care, and in appraising and selling so low the lands of the original grant, the fund produced was entirely inadequate to the support of the institution. Congress, therefore, made, in 1854, an additional grant of seventy-two sections of land for its use. These, however, were located and sold in the same inconsiderate and unfortunate manner, for so low a price as to be a means of inducing immigration, indeed, but not of producing a fund adequate for the support of a successful state university. Of the 92,160 acres comprised in the two grants, there had been sold prior to September 30, 1866, 74,178 acres for the sum of \$264,570.13, or at an average price of but little more than \$3.50 per acre.* Besides this, the state had allowed the university to anticipate its income to the extent of over \$100,000 for the erection of buildings. By a law of 1862 the sum of \$104,339.43 was taken from its fund (already too small) to pay for these buildings. The resulting embarrassment made necessary the re-organization of 1866, which added to the slender resources of the institution the agricultural college fund, arising from the sale of lands donated to the state by the congressional act of 1862.

*Compare the price obtained for the lands of the University of Michigan. The first sale of those lands averaged \$22.85 per acre, and brought in a single year (1837) \$150,447.90. Sales were made in succeeding years at \$15, \$17, and \$19 per acre.

The first university building erected was the north dormitory, which was completed in 1851. This is 110 feet in length by 40 in breadth, and four stories in height. The south dormitory, of the same size, was completed in 1855. The main central edifice, known as University Hall, was finished in 1859. The Ladies' College was completed in 1872. This latter was built with an appropriation of \$50,000, made by the legislature in 1870—the first actual donation the university had ever received from the state. The legislature of 1875 appropriated \$80,000 for the erection of Science Hall, a building to be devoted to instruction in the physical sciences. This was completed and ready for occupancy at the opening of the fall term of 1877.

The growth of this institution during the past fourteen years, and especially since its reorganization in 1866, has been rapid and substantial. Its productive fund on the 30th day of September, 1877, aside from the agricultural college fund, was \$223,240 32. The combined university and agricultural funds amounted, at the same date, to \$464,032 22. An act of the legislature in 1867 appropriated to the university income for that year, and annually for the next ten years, the sum of \$7,303.76, being the interest upon the sum taken from the university fund by the law of 1862 for the erection of buildings, as before mentioned. Chapter 100 of the general laws of 1872 also provided for an annual state tax of \$10,000 to increase the income of the university. Chapter 119 of the laws of 1876 provides for an annual state tax of one-tenth of one mill on the taxable property of the state for the increase of the university fund income, this tax to be "*in lieu* of all other appropriations before provided for the benefit of said fund income," and to be "deemed a full compensation for all deficiencies in said income arising from the disposition of the lands donated to the state by congress, in trust, for the benefit of said income." The entire income of the university from all sources, including this tax (which was \$42,359.62), was, for the year ending September 30, 1878, \$81,442.63. The university has a faculty of over thirty professors and instructors, and during the past year—1877-8—it had in its various departments 388 students. The law department, organized in 1868, has since been in successful operation. Ladies are admitted into all the departments and classes of the university.

AGRICULTURAL COLLEGE.

The agricultural college fund, granted to the state by the congressional act of 1862, was by a subsequent legislative enactment (1866) applied to the support, not of a separate agricultural college, but of a department of agriculture in the existing university, thus rendering it unnecessary for the state to erect separate buildings elsewhere. Under the provisions of chapter 114, laws of 1866, the county of Dane issued to the state, for the purpose of purchasing an experimental farm, bonds to the amount of \$40,000. A farm of about 200 acres, adjoining the university grounds, was purchased, and a four years' course of study provided, designed to be thorough and extensive in the branches that relate to agriculture, in connection with its practical application upon the experimental farm.

The productive agricultural college fund has increased from \$8,061.86, in 1866, to \$244,263.18, in 1878.

NORMAL SCHOOLS.

The propriety of making some special provision for the instruction of teachers was acknowledged in the very organization of the state, a provision for normal schools having been embodied in the constitution itself, which ordains that after the support and maintenance of the

common schools is insured, the residue of the school fund shall be appropriated to academies and normal schools. The state legislature, in its first session in 1848, in the act establishing the University of Wisconsin, declared that one of the four departments thereof should be a department of the theory and practice of elementary instruction. The first institution ever chartered in the state as a normal school was incorporated by the legislature at its second session — 1849 — under the title of the “Jefferson County Normal School.” This, however, was never organized.

The regents, when organizing the university, at their meeting in 1849, ordained the establishment of a normal professorship, and declared that in organizing the normal department it was their fixed intention “to make the University of Wisconsin subsidiary to the great cause of popular education, by making it, through its normal department, the nursery of the educators of the popular mind, and the central point of union and harmony to the educational interests of the commonwealth.” They declared that instruction in the normal department should be free to all suitable candidates. Little was accomplished, however, in this direction during the next ten years. In 1857 an act was passed by the legislature appropriating twenty-five per cent. of the income of the swamp-land fund “to normal institutes and academies under the supervision and direction of a board of regents of normal schools,” who were to be appointed in accordance with the provisions of the act. Distribution of this income was made to such colleges, academies, and high schools as maintained a normal class, in proportion to the number of pupils passing a successful examination conducted by an agent of the board. In 1859, Dr. Henry Barnard, who had become chancellor of the university, was made agent of the normal regents. He inaugurated a system of teachers’ institutes, and gave fresh vigor to the normal work throughout the state. Resigning, however, on account of ill-health, within two years, Professor Chas. H. Allen, who had been conducting institutes under his direction, succeeded him as agent of the normal regents, and was elected principal of the normal department of the university, entering upon his work as the latter in March, 1864. He managed the department with signal ability and success, but at the end of one or two years resigned. Meantime the educational sentiment of the state had manifested itself for the establishment of separate normal schools.

In 1865, the legislature passed an act repealing that of two years before, and providing instead that one-half of the swamp-land fund should be set apart as a normal-school fund, the income of which should be applied to establishing and supporting normal schools under the direction and management of the board of normal regents, with a proviso, however, that one-fourth of such income should be annually transferred to the common-school fund income, until the latter should amount annually to \$200,000. This proviso was repealed by the legislature of 1870, and the entire income of one-half the swamp-land fund has since been devoted to normal-school purposes. During the same year proposals were invited for aid in the establishment of a normal school, in money, land, or buildings, and propositions from various places were received and considered. In 1866, the board of regents was incorporated by the legislature. In the same year Platteville was conditionally selected as the site of a school, and as there was already a productive fund of about \$600,000, with an income of over \$30,000, and a prospect of a steady increase as the lands were sold, the board decided upon the policy of establishing several schools, located in different parts of the state. In pursuance of this policy, there have already been completed, and are now in very successful operation, the Platteville Normal School, opened October 9, 1866; the Whitewater Normal School, opened April 21, 1868; the Oshkosh Normal School, opened September 19, 1871, and the River Falls Normal School, opened September 2, 1875. Each assembly district in the state is entitled to eight representatives in the normal schools. These are nominated by county and city superintendents. Tuition is free to all normal students. There are in the normal schools two courses of study — an

elementary course of two years, and an *advanced course* of four years. The student completing the former, receives a certificate; the one completing the latter, a diploma. The certificate, when the holder has successfully taught one year after graduation, may be countersigned by the superintendent of public instruction, when it becomes equivalent to a five-years' state certificate. The diploma, when thus countersigned, after a like interval, is equivalent to a permanent state certificate.

It is believed that the normal-school system of Wisconsin rests upon a broader and more secure basis than the corresponding system of any other state. That basis is an independent and permanent fund, which has already reached a million dollars. The precise amount of this securely invested and productive fund, September 30, 1878, was \$1,004,907.67, and the sum of \$33,290.88 remained uninvested.

TEACHERS' INSTITUTES.

In addition to the work of the normal schools, the board of regents is authorized to expend \$5,000 annually to defray the expenses of teachers' institutes. A law of 1871, amended in 1876, provides for normal institutes, which shall be held for not less than two consecutive weeks, and appropriates from the state treasury a sum not exceeding \$2,000 per annum for their support. There were held in the State, in 1878, sixty-six institutes, varying in length from one to two weeks. The total number of persons enrolled as attendants was 4,944

GRADED SCHOOLS.

Including those in the cities, the graded schools of the State number about four hundred. The annual report of the State superintendent for 1878 gives the number with two departments as 207, and the number with three or more as 225.

A law of March, 1872, provided that "all graduates of any graded school of the state, who shall have passed an examination at such graded school satisfactory to the faculty of the university for admission into the sub-freshman class and college classes of the university, shall be at once and at all times entitled to free tuition in all the colleges of the university." A considerable number of graduates of graded schools entered the university under this law during the next four years, but it being deemed an unwise discrimination in favor of this class of students, in 1876, in the same act which provided for the tax of one tenth of one mill, the legislature provided that from and after the 4th of July of that year no student, except students in law and those taking extra studies, should be required to pay any fees for tuition. Few graded schools of the state are able as yet to fully prepare students for entrance into the regular classes of the classical department of the university. The larger number prepared by them still enter the scientific department or the sub-freshman class.

THE TOWNSHIP SYSTEM.

In 1869 the legislature passed a law authorizing towns to adopt by vote the "township system of school government." Under this system each town becomes one school district, and the several school districts already existing become sub-districts. Each sub-district elects a clerk, and these clerks constitute a body corporate under the name of the "board of school directors," and are invested with the title and custody of all school houses, school-house sites, and other property belonging to the sub-districts, with power to control them for the best interests of the schools of the town. The law provides for an executive committee to execute the orders of the

Stephen Warren

HARTLAND.

board, employ teachers, etc., and for a secretary to record proceedings of the board, have immediate charge and supervision of the schools, and perform other specified duties. But few towns have as yet made trial of this system, although it is in successful operation in Pennsylvania, Massachusetts, and some other states, and where fully and fairly tried in our own, has proved entirely satisfactory. It is the general belief of our enlightened educational men that the plan has such merits as ought to secure its voluntary adoption by the people of the state.

FREE HIGH SCHOOLS.

In 1875 the legislature enacted that any town, incorporated village, or city, may establish and maintain not more than two free high schools, and provided for an annual appropriation of not to exceed \$25,000, to refund one-half of the actual cost of instruction in such schools, but no school to draw in any one year more than \$500. At the session of 1877 the benefits of the act were extended to such high schools already established as shall show by a proper report that they have conformed to the requirements of the law. If towns decline to establish such a school, one or more adjoining districts in the same have the privilege of doing so. The law has met with much favor. For the school year ending August 31, 1876 (the first year in which it was in operation), twenty such schools reported, and to these the sum of \$7,466.50 was paid, being an average of \$373.32 per school. For the year ending August 31, 1878, eighty-five schools reported and received a pro rata division of the maximum appropriation. The high school law was primarily designed to bring to rural neighborhoods the twofold advantages of (1) a higher instruction than the common district schools afford, and (2) a better class of teachers for these schools. It was anticipated, however, from the first that the *immediate* results of the law would be chiefly the improvement of existing graded schools in the larger villages and in cities.

SCHOOL OFFICERS.

The school officers of Wisconsin are, a state superintendent of public instruction, sixty-four county superintendents, twenty-eight city superintendents, and a school board in each district, consisting of a director, treasurer, and clerk. The state and county superintendents hold office two years, the district officers three years. In each independent city there is a board of education, and the larger cities have each a city superintendent, who in some cases is also principal of the high school. He is appointed for one year. The county board of supervisors determine, within certain limits, the amount of money to be raised annually in each town and ward of their county for school purposes, levy an additional amount for the salary of the county superintendents, may authorize a special school tax, and may under certain circumstances determine that there shall be two superintendents for their county. The town board of supervisors have authority to form and alter school districts, to issue notice for first meeting, to form union districts for high school purposes, and appoint first boards for the same, to locate and establish school-house sites under certain circumstances, to extinguish districts that have neglected to maintain school for two years, and to dispose of the property of the same. The district clerks report annually to the town clerks, the town clerks to the county superintendents, and the county and city superintendents to the state superintendent, who in turn makes an annual report to the governor.

STATE TEACHERS' CERTIFICATES.

The state superintendent is authorized by law "to issue state certificates of high grade to teachers of eminent qualifications." Two grades of these are given, one unlimited, and the other good for five years. The examination is conducted by a board of three examiners, appointed annually by the state superintendent, and acting under rules and regulations prescribed by him.

TEACHERS' ASSOCIATIONS.

Besides the Wisconsin State Teachers' Association, holding its annual session in the summer and a semi-annual or "executive" session in the winter, there are, in several parts of the state, county or district associations, holding stated meetings. The number of such associations is annually increasing.

LIBRARIES.

The utility of public libraries as a part of the means of popular enlightenment, was early recognized in this state. The constitution, as set forth in 1848, required that a portion of the income of the school fund should be applied to the "purchase of suitable libraries and apparatus" for the common schools. The same year the legislature of the state, at its first session, enacted that as soon as this income should amount to \$60,000 a year (afterwards changed to \$30,000), each town superintendent might devote one tenth of the portion of this income received by his town annually, to town library purposes, the libraries thus formed to be distributed among the districts, in sections, and in rotation, once in three months. Districts were also empowered to raise money for library books. The operation of this discretionary and voluntary system was not successful. In ten years (1858) only about one third of the districts (1,121) had libraries, embracing in all but 38,755 volumes, and the state superintendent, Hon. Lyman C. Draper, urged upon the legislature a better system, of "town libraries," and a state tax for their creation and maintenance. In 1857, the legislature enacted that ten per cent. of the yearly income of the school fund should be applied to the purchase of town school libraries, and that an annual tax of one tenth of one mill should be levied for the same purpose. The law was left incomplete, however, and in 1862, before the system had been perfected, the exigencies of the civil war led to the repeal of the law, and the library fund which had accumulated from the ten per cent. of the school fund income, and from the library tax, amounting in all to \$88,784.78, was transferred to the general fund. This may be considered a debt to the educational interests of the state that should be repaid. Meanwhile the single district library system languishes and yearly grows weaker. The re-enacting of a town library system, in which local effort and expenditure shall be stimulated and supplemented by State aid, has been recommended by the State Teachers' Association, and will, it is hoped, be secured, at no distant day, as a part of a complete town system of schools and of public education.

LIST OF STATE SUPERINTENDENTS.

The act creating the office was passed at the first session of the state legislature, in 1848. The incumbents up to the present time have been as follows :

NAME OF INCUMBENT.	DURATION OF INCUMBENCY.
Hon. E. Root.....	Three years—1849-50-51.
Hon. A. P. Ladd.....	Two years—1852-53.
Hon. H. A. Wright*.....	One year and five months—1854-55.
Hon. A. C. Barry.....	Two years and seven months—1855-56-57.
Hon. L. C. Draper.....	Two years—1858-59.
Hon. J. L. Pickard†.....	Three years and nine months—1860-61-62-63.
Hon. J. G. McMynn.....	Four years and three months—1863-64-65-66-67.
Hon. A. J. Craig‡.....	Two years and six months—1868-69-70.
Hon. Samuel Fallows.....	Three years and six months—1870-71-72-73.
Hon. Edward Searing.....	Four years—1874-75-76-77.
Hon. W. C. Whitford.....	Two years—1878-79.

* Died, May 29, 1845.

† Resigned, October 1, 1863.

‡ Died, July 3, 1870.

SKETCHES OF COLLEGES IN WISCONSIN.*

Beloit College was founded in 1847, at Beloit, under the auspices of the Congregational and Presbyterian churches of Wisconsin and northern Illinois. In 1848, Rev. Joseph Emerson and Rev. J. J. Bushnell were appointed professors, and in 1849, Rev. A. L. Chapin was appointed president, and has continued such until the present time. The institution has had a steady growth, has maintained a high standard of scholarship and done excellent work, both in its preparatory and college departments. Two hundred and thirty-six young men have graduated. Its lands and buildings are valued at \$78,000, and its endowments and funds amount to about \$122,000.

Lawrence University, at Appleton, under the patronage of the Methodist church, was organized as a college in 1850, having been an "institute" or academy for three years previous, under the Rev. W. H. Sampson. The first president was Rev. Edward Cook; the second, R. Z. Mason; the present one is the Rev. George M. Steele, D. D. It is open to both sexes, and has graduated 130 young men, and 68 young women. It still maintains a preparatory department. It has been an institution of great benefit in a new region of country, in the northeastern part of the state. Receiving a liberal donation at the outset from the Hon. Amos A. Lawrence, of Boston, it has land and buildings valued at \$47,000, at Appleton, and funds and endowments amounting to \$60,000.

Milton College, an institution under the care of the Seventh Day Baptists, was opened as a college in 1867, having been conducted as an academy since 1844. Rev. W. C. Whitford, the president, was for many years the principal of the academy. The institution has done much valuable work, particularly in preparing teachers for our public schools. The college has graduated 38 young men and women, having previously graduated 93 academic students. It has lands, buildings and endowments to the amount of about \$50,000.

Ripon College, which was known till 1864 as Brockway College, was organized in 1853, at Ripon, and is supported by the Congregational church. Since its re-organization, in 1863, it has graduated 77 students (of both sexes) in the college courses, and has always maintained a large and flourishing preparatory department. Under its present efficient head, the Rev. E. H. Merrell, A. M., it is meeting with continued success. Its property amounts to about \$125,000.

Racine College was founded by the Episcopal Church, at Racine, in 1852, under the Rev. Roswell Park, D. D., as its first President. It was for a long time under the efficient administration of Rev. James De Koven, D. D., now deceased, who was succeeded by Rev. D. Stevens Parker. It maintains a large boys' school also, and a preparatory department. It was designed, in part, to train young men for the Nashotah Theological Seminary. It has property, including five buildings, to the amount of about \$180,000, and has graduated ninety-nine young men. Its principal work, in which it has had great success, is that of a boys' school, modeled somewhat after the English schools.

The Seminary of St. Francis of Sales, an ecclesiastical school, was established at St. Francis Station, near Milwaukee, chiefly by the combined efforts of two learned and zealous priests, the Rev. Michael Heiss, now bishop of La Crosse, and the Rev. Joseph Salzmänn. It was opened in January, 1856, with Rev. M. Heiss as rector, and with 25 students. Rev. Joseph Salzmänn was rector from September, 1868, to the time of his death, January 17, 1874, since which time Rev. C. Wapelhorst has held the rectorship. The latter is now assisted by twelve professors, and the students number 267, of whom 105 are theologians, 31 students of philosophy, and the rest classical students.

Pio Nono College is a Roman Catholic institution, at St. Francis Station, in the immediate neighborhood of the Seminary of St. Francis. It was founded in 1871, by Rev. Joseph Salzmänn,

* The statistics in this division were obtained in 1877, and are for the previous year.

who was the first rector. He was succeeded in 1874 by the present rector, Rev. Thomas Brue-ner, who is assisted by a corps of seven professors. Besides the college proper, there is a normal department, in which, in addition to the education that qualifies for teaching in common and higher schools, particular attention is given to church music. There is also, under the same management, but in an adjoining building, an institution for the instruction of the deaf and dumb. The pupils in the latter, both boys and girls, numbering about 30, are taught to speak by sounds, and it is said with the best success.

An institution was organized in 1865, at Prairie du Chien, under the name of Prairie du Chien College, and under the care of J. T. Lovewell, as principal. In the course of two or three years it passed into the hands of the Roman Catholic church, and is now known as St. John's College. It has so far performed principally preparatory work.

Sinsinawa Mound College, a Roman Catholic institution, was founded in 1848, through the labors of Father Mazzuchelli, but after doing a successful work, was closed in 1863, and in 1867 the St. Clara academy was opened in the same buildings.

The Northwestern University, which is under the Lutheran church, was organized in 1865, at Watertown, under Rev. August F. Ernst, as president. It has graduated 21 young men, and has a preparatory department. Its property is valued at \$50,000.

Galesville University was organized in 1859, under the patronage of the Methodist church at Galesville, in the northwest part of the state. The first president was the Rev. Samuel Fal-lows, since state superintendent. It has graduated ten young men and eight young women, its work hitherto having been mostly preparatory. It is now under the patronage of the Presby-terian denomination, with J. W. McLaury, A. M., as president. It has property valued at \$30,000, and an endowment of about \$50,000.

Carroll College was established at Waukesha, by the Presbyterian church, in 1846. Prof. J. W. Sterling, now of the state university, taught its primary classes that year. Under President John A. Savage, D.D., with an able corps of professors, it took a high rank and graduated classes; but for several years past it has confined its work principally to academic studies. Under W. L. Rankin, A. M., the present principal, the school is doing good service.

Wayland University was established as a college, by the Baptists, at Beaver Dam, in 1854, but never performed much college work. For three years past, it has been working under a new charter as an academy and preparatory school, and is now known as Wayland Institute.

In 1841, the Protestant Episcopal church established a mission in the wilds of Waukesha county, and, at an early day, steps were taken to establish in connection therewith an institution of learning. This was incorporated in 1847, by the name of Nashotah House. In 1852 the classical school was located at Racine, and Nashotah House became distinctively a theological seminary. It has an endowment of one professorship, the faculty and students being otherwise sustained by voluntary contributions. It has a faculty of five professors, with Rev. A. D. Cole, D.D., as president, buildings pleasantly situated, and has graduated 185 theological students.

FEMALE COLLEGES.

Two institutions have been known under this designation. The Milwaukee Female College was founded in 1852, and ably conducted for several years, under the principalship of Miss Mary Mortimer, now deceased. It furnished an advanced grade of secondary instruction. The Wis-consin Female College, located at Fox Lake, was first incorporated in 1855, and re-organized in 1863. It has never reached a collegiate course, is now known as Fox Lake Seminary, and admits both sexes. Rev. A. O. Wright, A. M., is the present principal.

ACADEMIES AND SEMINARIES.

The following institutions of academic grade, are now in operation: Albion Academy; Benton Academy; Big Foot Academy; Elroy Seminary; Fox Lake Seminary; two German and English academies in Milwaukee; Janesville Academy; Kemper Hall, Kenosha; Lake Geneva Seminary, Geneva; Lakeside Seminary, Oconomowoc; Marshall Academy, Marshall; Merrill Institute, Fond du Lac; Milwaukee Academy; Racine Academy; River Falls Institute; Rochester Seminary; St. Catherine's Academy, Racine; St. Clara Academy; Sinsinawa Mound; St. Mary's Institute, Milwaukee; Sharon Academy; and Wayland Institute, Beaver Dam. Similar institutions formerly in operation but suspended or merged in other institutions, were: Allen's Grove Academy; Appleton Collegiate Institute; Baraboo Collegiate Institute; Beloit Female Seminary; Beloit Seminary; Brunson Institute, Mount Hope; Evansville Seminary; Janesville Academy (merged in the high school); Kilbourn Institute; Lancaster Institute; Milton Academy; Platteville Academy; Southport Academy (Kenosha); Waterloo Academy; Waukesha Seminary; Wesleyan Seminary, Eau Claire; and Patch Grove Academy. The most important of these were the Milton and Platteville Academies, the former merged in Milton College, the latter in the Platteville Normal School. Of the others, several were superseded by the establishment of public high schools in the same localities.

COMMERCIAL SCHOOLS.

Schools of this character, aiming to furnish what is called a business education, exist in Milwaukee, Janesville, Madison, LaCrosse, Green Bay, Oshkosh and Fond du Lac. The oldest and largest is in Milwaukee, under the care of Prof. R. C. Spencer, and enrolls from two to three hundred students annually.

AGRICULTURE.

BY W. W. DANIELLS, M.S., PROF. OF CHEMISTRY AND AGRICULTURE AT THE UNIVERSITY OF WISCONSIN.

The trend of the earliest industries of a country, is the result of the circumstances under which those industries are developed. The attention of pioneers is confined to supplying the immediate wants of food, shelter, and clothing. Hence, the first settlers of a country are farmers, miners, trappers, or fishermen, according as they can most readily secure the means of present sustenance for themselves and their families. In the early history of Wisconsin this law is well exemplified. The southern part of the state, consisting of alternations of prairie and timber, was first settled by farmers. As the country has developed, wealth accumulated, and means of transportation have been furnished, farming has ceased to be the sole interest. Manufactories have been built along the rivers, and the mining industry of the southwestern part of the state has grown to one of considerable importance. The shore of Lake Michigan was first mainly settled by fishermen, but the later growth of agriculture and manufactures has nearly overshadowed the fishing interest; as has the production of lumber, in the north half of the state, eclipsed the trapping and fur interests of the first settlers. That the most important industry of Wisconsin is farming, may be seen from the following statistics of the occupation of the people as given by the United States census. Out of each one hundred inhabitants, of all occupations, 68 were

farmers, in 1840; 52 in 1850; 54 in 1860; 55 in 1870. The rapid growth of the agriculture of the state is illustrated by the increase in the number of acres of improved land in farms, and in the value of farms and of farm implements and machinery, as shown by the following table, compiled from the United States census :

YEAR.	ACRES IMPROVED LAND IN FARMS.		VALUE OF FARMS, INCLUDING IMPROV- ED AND UNIMPROV- ED LANDS.	VALUE OF FARM IMPLEMENTS AND MACHINERY.
	TOTAL.	TO EACH INHAB.		
1850	1,045,499	3.4	\$ 28,528,563	\$ 1,641,568
1860	3,746,167	4.8	131,117,164	5,758,847
1870	5,899,343	5.6	300,414,064	14,239,364

Farming, at the present time, is almost entirely confined to the south half of the state, the northern half being still largely covered by forests. A notable exception to this statement is found in the counties on the western border, which are well settled by farmers much farther north. The surface of the agricultural portion of the state is for the most part gently undulating, affording ready drainage, without being so abruptly broken as to render cultivation difficult. The soil is varied in character, and mostly very fertile. The southern portion of the state consists of undulating prairies of variable size—the largest being Rock prairie—alternating with oak openings. The prairies have the rich alluvial soil so characteristic of the western prairies, and are easily worked. The soil of the “openings” land is usually a sandy loam, readily tilled, fertile, but not as “strong” as soils having more clay. The proportion of timber to prairie increases passing north from the southern boundary of the state, and forests of maple, basswood and elm, replace, to some extent, the oak lands. In these localities, the soil is more clayey, is strong and fertile, not as easily tilled, and not as quickly exhausted as are the more sandy soils of the oak lands. In that portion of the state known geologically as the “driftless” region, the soil is invariably good where the surface rock is limestone. In some of the valleys, however, where the lime-rock has been removed by erosion, leaving the underlying sandstone as the surface rock, the soil is sandy and unproductive, except in those localities where a large amount of alluvial matter has been deposited by the streams. The soils of the pine lands of the north of the state, are generally sandy and but slightly fertile. However, where pine is replaced by maple, oak, birch, elm and basswood, the soil is “heavier” and very fertile, even to the shores of Lake Superior.

The same natural conditions that make Wisconsin an agricultural state, determined that during its earlier years the main interest should be grain-growing. The fertile prairies covering large portions of the southern part of the state had but to be plowed and sowed with grain to produce an abundant yield. From the raising of cereals the pioneer farmer could get the quickest returns for his labor. Hence in 1850, two years after its admission to the Union, Wisconsin was the ninth state in order in the production of wheat, while in 1860 this rank was raised to third, Illinois and Indiana only raising more. The true rank of the state is not shown by these figures. Were the number of inhabitants and the number of acres of land in actual cultivation taken into account in the comparison, the state would stand still higher in rank than is here indicated. There is the same struggle for existence, and the same desire for gain the world over, and hence the various phases of development of the same industry in different civilized countries is mainly the result of the widely varying economical conditions imposed upon that industry. Land is thoroughly cultivated in Europe, not because the Europeans have any inherent love for good cultivation, but because there land is scarce and costly, while labor is superabundant and cheap. In America, on the other hand, and especially in the newer states,

land is abundant and cheap, while labor is scarce and costly. In its productive industries each country is alike economical in the use of the costly element in production, and more lavish in the use of that which is cheaper. Each is alike economically wise in following such a course, when it is not carried to too great extremes. With each the end sought is the greatest return for the expenditure of a given amount of capital. In accordance with this law of economy, the early agriculture of Wisconsin was mere land-skimming. Good cultivation of the soil was never thought of. The same land was planted successively to one crop, as long as it yielded enough to pay for cultivation. The economical principle above stated was carried to an extreme. Farming as then practiced was a quick method of land exhaustion. It was always taking out of the purse, and never putting in. No attention was paid to sustaining the soil's fertility. The only aim was to secure the largest crop for the smallest outlay of capital, without regard to the future. Manures were never used, and such as unavoidably accumulated was regarded as a great nuisance, often rendering necessary the removal of stables and outbuildings. Straw-stacks were invariably burned as the most convenient means of disposing of them. Wheat, the principal product, brought a low price, often not more than fifty cents a bushel, and had to be marketed by teams at some point from which it could be carried by water, as this was, at an early day, the only means of transportation. On account of the sparse settlement of the country, roads were poor, and the farmer, after raising and threshing his wheat, had to spend, with a team, from two to five days, marketing the few bushels that a team could draw. So that the farmer had every obstacle to contend with except cheap and very fertile land, that with the poorest of cultivation gave a comparatively abundant yield of grain. Better tillage, accompanied with the use of manures and other fertilizers, would not, upon the virgin soils, have added sufficiently to the yield to pay the cost of applying them. Hence, to the first farmers of the state, *poor* farming was the only profitable farming, and consequently the only *good* farming, an agriculturo-economical paradox from which there was no escape. Notwithstanding the fact that farmers could economically follow no other system than that of land-exhaustion, as described, such a course was none the less injurious to the state, as it was undermining its foundation of future wealth, by destroying the fertility of the soil, that upon which the permanent wealth and prosperity of every agricultural community is first dependent. Besides this evil, and together with it, came the habit of loose and slovenly farming acquired by pioneers, which continued after the conditions making that method a necessity had passed away. With the rapid growth of the northwest came better home markets and increased facilities for transportation to foreign markets, bringing with them higher prices for all products of the farm. As a consequence of these better conditions, land in farms in the state increased rapidly in value, from \$9.58 per acre in 1850, to \$16.61 in 1860, an increase of 62 per cent., while the total number of acres in farms increased during the same time from 2,976,658 acres to 7,893,587 acres, or 265 per cent. With this increase in the value of land, and the higher prices paid for grain, should have come an improved system of husbandry which would prevent the soil from deteriorating in fertility. This could have been accomplished either by returning to the soil, in manures and fertilizers, those ingredients of which it was being rapidly drained by continued grain-growing, or by the adoption of a system of mixed husbandry, which should include the raising of stock and a judicious rotation of crops. Such a system is sure to come. Indeed, it is now slowly coming. Great progress upon the earlier methods of farming have already been made. But so radical and thorough a change in the habits of any class of people as that from the farming of pioneers to a rational method that will preserve the soil's fertility and pay for the labor it demands, requires many years for its full accomplishment. It will not even keep pace with changes in those economical conditions which

favor it. In the rapid settlement of the northwestern states this change has come most rapidly with the replacement of the pioneer farmers by immigrants accustomed to better methods of culture. In such cases the pioneers usually "go west" again, to begin anew their frontier farming upon virgin soil, as their peculiar method of cultivation fails to give them a livelihood. In Wisconsin as rapid progress is being made in the system of agriculture as, all things considered, could reasonably be expected. This change for the better has been quite rapid for the past ten years, and is gaining in velocity and momentum each year. It is partly the result of increased intelligence relating to farming, and partly the result of necessity caused by the unprofitableness of the old method.

The estimated value of all agricultural products of the state, including that of orchards, market gardens, and betterments, was, in 1870, as given in the census of that year, \$79,072,967, which places Wisconsin twelfth in rank among the agricultural states of the Union. In 1875, according to the "Report of the Commissioner of Agriculture," the value of the principal farm crops in this state was \$58,957,050. According to this estimation the state ranks ninth in agricultural importance. As has been before stated, Wisconsin is essentially a grain-growing state. This interest has been the principal one, not because the soil is better adapted to grain-growing than to general, stock, or dairy farming, but rather because this course, which was at an early day most immediately profitable, has been since persistently followed from force of habit, even after it had failed to be remunerative.

The following table shows the bushels of the different grains raised in the state for the years indicated :

YEAR.	WHEAT.	RYE.	CORN.	OATS.	BARLEY.	BUCK-WHEAT.
1850.....	4,286,131	81,253	1,988,979	3,414,672	209,672	79,878
1860.....	15,657,458	888,544	7,517,300	11,059,260	707,307	38,987
1870.....	25,606,344	1,325,294	15,033,988	20,180,016	1,645,019	408,897
1875*....	25,200,000	1,340,000	15,200,000	26,600,000	2,200,000	275,000

From these statistics it will be seen that the increase in the production of grain was very rapid up to 1870, while since that time it has been very slight. This rapid increase in grain raising is first attributable to the ease with which this branch of farming was carried on upon the new and very rich soils of the state, while in the older states this branch of husbandry has been growing more difficult and expensive, and also to the fact that the war in our own country so increased the demand for grain from 1861 to 1866 as to make this course the most immediately profitable. But with the close of the war came a diminished demand. Farmers were slow to recognize this fact, and change the character of their productions to accord with the wants of the market, but rather continued to produce the cereals in excess of the demand. The chinch bug and an occasional poor season seriously injured the crops, leaving those who relied principally upon the production of grain little or nothing for their support. Hard times resulted from these poor crops. More wheat and corn was the farmer's usual remedy for hard times. So that more wheat and corn were planted. More crop failures with low prices brought harder times, until gradually the farmers of the state have opened their eyes to the truth that they can succeed in other branches of agriculture than grain growing, and to the necessity of catering to the

*Estimated in report of commissioner of agriculture.

demands of the market. The value in 1869 of all farm products and betterments of the state was \$79,072,967. There were raised of wheat the same year 25,606,344 bushels, which at \$1.03 per bushel, the mean price reported by the Milwaukee board of trade, for No. 2 wheat (the leading grade), for the year ending July 31, 1870, amounts to \$26,374,524, or one third the value of all agricultural products and betterments. The average production per acre, as estimated by the commissioner of agriculture, was 14 bushels. Hence there were 1,829,024 acres of land devoted to this one crop, nearly one third of all the improved land in the state. Of the wheat crop of 1869 24,375,435 bushels were spring wheat, and 1,230,909 bushels were winter wheat, which is 19.8 bushels of spring to 1 bushel of winter wheat. The latter is scarcely sown at all on the prairies, or upon light opening soils. In some of the timbered regions hardy varieties do well, but it is not a certain crop, as it is not able to withstand the winters, unless covered by snow or litter. It is not injured as seriously by the hard freezing, as by the alternate freezing and thawing of February and March.

The continued cropping of land with grain is a certain means of exhausting the soil of the phosphates, and of those nitrogenous compounds that are essential to the production of grain, and yet are present even in the most fertile soils in but small quantities. To the diminished yield, partly attributable to the overcropping of the land, and partially to poor seasons and chinch bugs, and to the decline in prices soon after the war, owing to an over production of wheat, may largely be attributed the hard times experienced by the grain growing farmers of Wisconsin from 1872 to 1877. The continued raising of wheat upon the same land, alternated, if any alternation occurred, with barley, oats, or corn, has produced its sure results. The lesson has cost the farmers of the state dearly, but it has not been altogether lost. A better condition of affairs has already begun. Wheat is gradually losing its prestige as the farmers' sole dependence, while stock, dairy, and mixed farming are rapidly increasing. The number of bushels of wheat raised to each inhabitant in the state was in 1850 fourteen, in 1860 twenty-three and eight tenths, in 1870 twenty-four, and in 1875 twenty and four tenths. These figures do not indicate a diminished productiveness of the state, but show, with the greatly increased production in other branches of husbandry, that farmers are changing their system to one more diversified and rational. Straw stacks are no longer burned, and manure heaps are not looked upon as altogether useless. Much more attention is now paid to the use of fertilizers. Clover with plaster is looked upon with constantly increasing favor, and there is a greater seeking for light upon the more difficult problems of a profitable agriculture.

Corn is raised to a large extent, although Wisconsin has never ranked as high in corn, as in wheat growing. Sixteen states raised more corn in 1870 than this state, and in 1875, seventeen states raised more. Corn requires a rich, moist soil, with a long extended season of warm sunshine. While this crop can be raised with great ease in the larger portion of the state, it will always succeed better farther south, both on account of the longer summers and the greater amount of rainfall. According to the statistics of the commissioner of agriculture, the average yield per acre for a period of ten years, is about 30 bushels. Corn is an important crop in the economy of the farmer, as from it he obtains much food for his stock, and it is his principal dependence for fattening pork. On these accounts it will, without doubt, retain its place in the husbandry of the state, even when stock and dairy farming are followed to a much greater extent than at present. Barley is cultivated largely throughout the state, but five states produced more in 1870, than Wisconsin. The great quantity of beer brewed here, furnishes a good home market for this grain. Barley succeeds best in a rather moist climate, having a long growing season. The dry, short summers of Wisconsin, are not well adapted to its growth. Hence the average

yield is but a medium one, and the quality of the grain is only fair. According to the returns furnished the commissioner of agriculture, the average yield for a period of ten years, is 22 bushels per acre.

Next to wheat, more bushels of oats are raised than of any other grain. Wisconsin was, in 1860, fifth in rank among the oat-growing states; in 1870, sixth. The rich soils of the state raise an abundant crop of oats with but little labor, and hence their growth in large quantities is not necessarily an indication of good husbandry. They will bear poor cultivation better than corn, and are frequently grown upon land too weedy to produce that grain. It is a favorite grain for feeding, especially to horses. With the best farmers, oats are looked upon with less favor than corn, because it is apt to leave land well seeded with weeds which are difficult to exterminate. In the production of rye, Wisconsin ranked seventh in 1860, and fourth in 1870. It is a much surer crop in this state than winter wheat, as it is less easily winter-killed when not protected by snow, than is that grain. Besides, it ripens so early as not to be seriously injured by drouth in summer, and succeeds well even upon the poorer soils. The average yield per acre is about 16 bushels.

But few hops were grown in Wisconsin, up to 1860, when owing to an increased demand by the breweries of the state, there was a gradual but healthful increase in hop culture. A few years later the advent of the hop louse, and other causes of failure at the east, so raised the price of hops as to make them a very profitable crop to grow. Many acres were planted in this state from 1863 to 1865, when the total product was valued at nearly \$350,000. The success of those engaged in this new branch of farming, encouraged others to adopt it. The profits were large. Wheat growing had not for several years been remunerative, and in 1867 and 1868, the "hop fever" became an epidemic, almost a plague. The crop of Sauk county alone was estimated at over 4,000,000 pounds, worth over \$2,000,000. The quality of the crop was excellent, the yield large, and the price unusually high. The secretary of the State Agricultural society says, in his report for that year, "Cases are numerous in which the first crop has paid for the land and all the improvements." To many farmers hop raising appeared to offer a sure and speedy course to wealth. But a change came quickly. The hop louse ruined the crop, and low prices caused by over production, aided in bringing ruin to many farmers. In 1867, the price of hops was from 40 to 55 cents per pound, while in 1869 it was from 10 to 15 cents, some of poor quality selling as low as 3 cents. Many hop yards were plowed up during 1869 and 1870. The area under cultivation to this crop in 1875, was, according to the "Report of the Secretary of State," 10,932 acres.

The production of tobacco has greatly increased since 1860, when there were raised in the state 87,340 pounds. In 1870, the product was 960,813 pounds. As is well known, the quality of tobacco grown in the northern states is greatly inferior for chewing and smoking, to that grown in the south, although varieties having a large, tough leaf, suitable for cigar wrappers, do well here. The variety principally grown is the Connecticut seed leaf. Tobacco can only be grown successfully on rich, fertile soils, and it is very exhausting to the land. Of the amount produced in 1870, there were raised in Rock county 645,408 pounds, and in Dane county, 229,568 pounds; the entire remaining portion of the state raised but 85,737 pounds. According to the report of the secretary of state, the whole number of acres planted to tobacco in 1875, was 3,296. Of this amount Rock county planted 1,676 acres, and Dane county, 1,454 acres, leaving for the remainder of the state but 166 acres. While the crop has been fairly productive and profitable, these statistics show that up to the present time tobacco-raising has been a merely local interest.

The production of flax is another merely local industry, it being confined principally to the

counties of Kenosha, Grant, Iowa and LaFayette. Of flax fibre, Kenosha county raised in 1869, nearly four fifths of the entire amount grown in the state, the total being 497,398 pounds. With the high price of labor and the low price of cotton now ruling, it is scarcely possible to make the raising of flax fibre profitable. Flax seed is raised to a small extent in the other counties mentioned. The present price of oil makes this a fairly profitable crop. If farmers fully appreciated that in addition to the oil, the oil cake is of great value as a food for cattle and sheep, and also that the manure made by the animals eating it, is of three times the value of that made by animals fed upon corn, doubtless much more flax seed would be raised than is at present. American oil-cake finds a ready market in England, at prices which pay well for its exportation. If English farmers can afford to carry food for their stock so far, American farmers may well strive to ascertain if they can afford to allow the exportation of so valuable food. When greater attention is paid in our own country to the quality of the manure made by our stock, more oil-cake will be fed at home, and a much smaller proportion of that made here will be exported.

The amount of maple sugar produced diminishes as the settlement of the state increases, and is now scarcely sufficient in amount to be an item in the state's productions. The increase in the price of sugar from 1861 to 1868 caused many farmers to try sorghum raising. But the present low prices of this staple has caused an abandonment of the enterprise. Two attempts have been made in Wisconsin to manufacture beet-root sugar, the first at Fond du Lac in 1867 the second at Black Hawk, Sauk county, in 1870. The Fond du Lac company removed their works to California in 1869, not having been successful in their efforts. The Black Hawk company made, in 1871, more than 134,000 pounds of sugar, but have since abandoned the business. Both these failures may be attributed to several causes, first of which was the want of sufficient capital to build and carry on a factory sufficiently large to enable the work to be done economically; secondly, the difficulty of sufficiently interesting farmers in the business to induce them to raise beets on so large a scale as to warrant the building of such a factory; and, thirdly, the high price of labor and the low price of sugar. The quality of beets raised was good, the polarization test showing in many instances as high as sixteen per cent. of sugar. The larger proportion of hay made in the state is from the natural meadows, the low lands or marshes, where wild grasses grow in abundance, and hay only costs the cutting and curing. Cultivated grasses do well throughout the state, and "tame hay" can be made as easily here as elsewhere. The limestone soils, where timber originally grew, are of the uplands, most natural to grass, and, consequently, furnish the richest meadows, and yield the best pasturage. The only soils where grasses do not readily grow, are those which are so sandy and dry as to be nearly barrens. Clover grows throughout the state in the greatest luxuriance. There is occasionally a season so dry as to make "seeding down" a failure, and upon light soils clover, when not covered with snow, is apt to winter-kill. Yet it is gaining in favor with farmers, both on account of the valuable pasturage and hay it affords, and on account of its value as a soil renovator. In wheat-growing regions, clover is now recognized to be of the greatest value in a "rotation," on account of its ameliorating influence upon the soil. Throughout the stock and dairy regions, clover is depended upon to a large extent for pasturage, and to a less extent for hay.

There has been a growing interest in stock raising for the past ten years, although the increase has not been a rapid one. Many of the herds of pure-blood cattle in the state rank high for their great excellence. The improvement of horses has been less rapid than that of cattle, sheep, and swine; yet this important branch of stock farming is improving each year. The most attention is given to the improvement of draught and farm horses, while roadsters and fast horses are not altogether neglected. There are now owned in the state a large number of horses of the heavier English and French breeds, which are imparting to their progeny their own characteristics

of excellence, the effects of which are already visible in many of the older regions of the state. Of the different breeds of cattle, the Short-horns, the Ayrshires, the Devons, and the Jerseys are well represented. The Short-horns have met with most favor with the general farmer, the grades of this breed being large, and possessing in a high degree the quiet habits and readiness to fatten, so characteristic of the full-bloods. Without doubt, the grade Short-horns will continue in the high favor in which they are now held, as stock-raising becomes a more important branch of the husbandry of the state. Of pure blood Short-horns there are many herds, some of which are of the very highest excellence. At the public sales of herds from this state, the prices have ranked high universally, and in a few cases have reached the highest of "fancy" prices, showing the estimate placed by professional breeders upon the herds of Wisconsin. The Ayrshires are increasing in numbers, and are held in high esteem by many dairymen. They are not yet, however, as generally disseminated over the state, as their great merit as a milking breed would warrant. The rapid growth of the dairy interest will doubtless increase their numbers greatly, at least as grades, in the dairying region. Of pure bred Devons and Jerseys, there are fewer than of the former breeds. The latter are principally kept in towns and cities to furnish milk for a single family. The following table shows the relative importance of stock raising in the state for the years mentioned. The figures are an additional proof to those already given, that the grain industry has held sway in Wisconsin to the detriment of other branches of farming, as well as to the state's greatest increase in wealth.

YEAR.	WHOLE NUMBER OF NEAT CATTLE.	NO. TO EACH 100 ACRES OF IMPROVED LAND.	WHOLE NUMBER OF SHEEP.	NUMBER TO EACH 100 ACRES OF IMPROVED LAND.	POUNDS OF WOOL PRODUCED.	POUNDS OF WOOL PER HEAD.
1850-----	183,433	17	124,896	12	253,963	2.03
1860-----	521,860	14	332,954	9	1,011,933	3.04
1870-----	693,294	12	1,069,282	18	4,090,670	3.82
1875*-----	922,900	11	1,162,800	14	(?)	(?)

* Estimated in report of commissioner of agriculture.

The growth and present condition of sheep husbandry, compare much more favorably with the general development of the state than does that of cattle raising. In a large degree this may be accounted for by the impetus given to wool raising during our civil war by the scarcity of cotton, and the necessary substitution to a great extent, of woolen for cotton goods. This great demand for wool for manufacturing purposes produced a rapid rise in the price of this staple, making its production a very profitable branch of farming. With the close of the war came a lessened demand, and consequently lower prices. Yet at no time has the price of wool fallen below that at which it could be profitably produced. This is the more notably true when the value of sheep in keeping up the fertility and productiveness of land, is taken into account. The foregoing table shows the improvement in this branch of husbandry since 1850

Although many more sheep might profitably be kept in the state, the above figures show that the wool interest is fairly developed, and the average weight of fleece is an assurance of more than ordinarily good stock. The fine-wooled sheep and their grades predominate, although there are in the state some excellent stock of long-wools—mostly Cotswold—and of South-downs.

Of all the agricultural interests of the state, no other has made as rapid growth during the last ten years, as has that of dairying. With the failure of hop-growing, began the growth of the factory system of butter and cheese making, and the downfall of the one was scarcely more rapid than has been the upbuilding of the other. The following statistics of the production of butter and cheese illustrate this rapid progress. It will be remembered that for the years 1850,

1860, and 1870 the statistics are from the U. S. census, and hence include all the butter and cheese made in the state, while for the remaining years, only that made by factories and professional dairymen as reported to the secretary of the State Dairymen's Association, is included. It has been found impossible to obtain the statistics of butter, except for the census years.

YEAR.	BUTTER.	CHE. SE.
	lbs.	lbs.
1850.....	3,633,750	400,283
1860.....	13,611,328	1,104,300
1870.....	22,473,036	1,591,798
1874.....	-----	13,000,000
1875.....	-----	15,000,000
1876.....	-----	17,000,000

The quality of Wisconsin dairy products is excellent, as may be judged by the fact that, at the Centennial Exhibition, Wisconsin cheese received twenty awards, a larger number than was given to any other state except New York, and for butter Wisconsin received five awards. No state received more, and only New York and Illinois received as many. Wisconsin received one award for each fourteen cheeses on exhibition. No other state received so large a proportion. New York received the largest number of awards, viz., twenty-one, but only secured one award for each thirty cheeses on exhibition. The number of cheese and butter factories is increasing each year, and there is being made in the better grazing regions of the state, as rapid a transition from grain to dairy-farming as is consistent with a healthful growth. This interest, which is now an important one in the state's industrial economy, has before it a promising future, both in its own development, and in its indirect influence upon the improvement of the agriculture of the state.

The history of the earlier attempts in fruit raising in Wisconsin would be little more than a record of failures. The pioneers planted apple, peach, plum, and cherry trees, but they gathered little or no fruit. As was natural, they planted those varieties that were known to do well in the older states of the same latitude. Little was known of the climate, and there was no apparent reason why those varieties should not do well here. The first orchards died. The same varieties were replanted, and again the orchards died. Gradually, through the costly school of experience, it was learned that the climate was different from that of the eastern states, and that to succeed here varieties of fruit must be such as were adapted to the peculiar climate of this state. These peculiarities are hot, and for the most part, dry summers, cold and dry winters. The dryness of the climate has been the greatest obstacle to success, as this is indirectly the cause of the great extremes of temperature experienced here. The summers are often so dry that the growth of the trees is not completed, and the wood sufficiently well ripened to enable it to withstand the rigors of winter. And the clear, dry atmosphere of winter allows the sun's rays to pass through it so unobstructedly as to warm the body of the tree upon the sunny side, above the freezing point, even though the temperature of the air is much lower. The alternate thawing and freezing ruptures the tender cells connecting the bark and wood, producing a complete separation of these parts, and often besides bursts the bark. The separation of bark and wood destroys the circulation of the sap upon that side of the tree, thus enfeebling the entire plant. The tree is not able to form new bark over the ruptured part, and a diseased spot results. Such a plant makes but a feeble growth of poorly ripened wood, and soon dies

altogether. Besides the above cause, the extreme cold weather occasionally experienced will kill healthy trees of all varieties not extremely hardy. Notwithstanding these natural obstacles, a good degree of success has been attained in the raising of apples and grapes. This success has been the result of persevering effort upon the part of the horticulturists of the state, who have sought the causes of failure in order that they might be removed or avoided. It is thus by intelligent observation that the fruit growers have gained the experience which brings with it a creditable success. The first requisite to success is the planting of varieties sufficiently hardy to withstand our severe winters. This has been accomplished by selecting the hardiest of the old varieties, and by raising seedlings, having besides hardiness, qualities sufficiently valuable to make them worthy of cultivation. The second requisite to success is in the selection of a situation having suitable soil and exposure, and thirdly, proper care after planting. Among the hardy varieties of apples regarded with greatest favor are Tetofski, Red Astrachan, and Duchess of Oldenberg, all Russian varieties, and Fameuse from Canada. Besides these there are a few American varieties so hardy as to prove reliable in the south half of the state. Among these are a few seedlings that have originated in Wisconsin. Apple trees are less apt to be injured by the winter upon a site sloping to the northeast or north, where they are less directly exposed to the rays of the winter's sun. High ground is much better than low, and a good, strong, not too rich soil is best. Apples do better upon soils where timber originally grew than on the prairies, and they are grown more easily along the border of Lake Michigan than in the interior of the state. Pears are raised to but a slight extent, as only a few of the hardiest varieties will succeed at all, and these only in favorable situations. Grapes are grown in great abundance, and in great perfection, although not of the more tender varieties. The Concord, on account of its hardiness and excellent bearing qualities, is cultivated most generally. Next to this comes the Delaware, while many other varieties, both excellent and prolific, are raised with great ease. The season is seldom too short to ripen the fruit well, and the only precaution necessary to protect the vines during the winter is a covering of earth or litter. Cranberries grow spontaneously upon many marshes in the interior of the state. Within a few years considerable attention has been given to improving these marshes, and to the cultivation of this most excellent fruit. Doubtless within a few years the cranberry crop will be an important one among the fruit productions of the state. All of the small fruits adapted to this latitude are cultivated in abundance, and very successfully, the yield being often times exceedingly large. Altogether, the horticultural interests of the state are improving, and there is a bright prospect that in the near future fruit growing will not be looked upon with the disfavor with which it has been regarded heretofore.

Of the associations for advancing the agricultural interests of the state, the first organized was the "State Agricultural Society." The earliest efforts to establish such an organization were made at Madison in December, 1846, during the session of the first constitutional convention of the territory. A constitution was adopted, but nothing further was done. In February, 1849, another meeting was held in Madison, at which it was "Resolved, That in view of the great importance of agriculture in the west, it is expedient to form a state agricultural society in Wisconsin." Another constitution was adopted, and officers were elected, but no effectual organization resulted from this second attempt. The "Wisconsin State Agricultural Society"—the present organization—had its inception in a meeting held at Madison, March 8, 1851, at which a committee was appointed to report a constitution and by-laws, and to nominate persons to fill the various offices of said society. At its organization, the society was composed of annual members, who paid one dollar dues each year, and of life members, who, upon the payment of ten dollars, were exempt from the annual contribution. The annual membership was afterward

abolished, and in 1869 the fee constituting one a life member was raised to twenty dollars. The first annual fair of the society was held in Janesville, in October, 1851. Fairs have been held annually since, except during the years 1861, 1862 and 1863. In 1851 premiums were paid to the amount of only \$140, while at the present time they amount to nearly \$10,000. In 1851 there were five life members. At the present time there are over seven hundred, representing all the various industries of the state. The fairs held under the auspices of this society have been of excellent character, and have been fruitful of good to all the industries of the state, but more especially to the farmers. The state has been generous in aid of this society, having furnished commodious rooms for its use in the capitol building, printed the annual report of the secretary, a volume of about 500 pages, and donated annually, for many years, \$2,000 toward its support. Besides its annual fairs, for the past five years there has been held an annual convention, under the auspices of this society, for the reading and discussing of papers upon topics of interest to farmers, and for a general interchange of ideas relating to farming. These conventions are held in high esteem by the better class of farmers, and have added greatly to the usefulness of the society. The "Wisconsin State Horticultural Society" was originally the "Wisconsin State Fruit Growers' Association," which was organized in December, 1853, at Whitewater. Its avowed object was "the collecting, arranging, and disseminating facts interesting to those engaged in the culture of fruits, and to embody for their use the results of the practice and experiments of fruit growers in all parts of the state." Exhibitions and conventions of the association were held annually up to 1860, after which the society was disorganized, owing to the breaking out of the war of the rebellion. A volume of "Transactions" was published by the association in 1855. In 1859 its transactions were published with those of the state agricultural society. From 1860 to 1865 no state horticultural association was in existence. In September of the latter year the "Wisconsin Fruit Growers' Association" was reorganized as the "Wisconsin State Horticultural Society." The legislature had previously provided for the publication of the proceedings of such a society, in connection with those of the State Agricultural Society. The new society has held annual exhibitions, usually in connection with those of the State Agricultural Society, and annual conventions for the reading of papers upon, and the discussion of, horticultural subjects. In 1871 an act was passed by the legislature incorporating the society, and providing for the separate printing of 2,000 copies annually of its transactions, of which there are now seven volumes. The most active, intelligent, and persevering of the horticulturists of the state are members of this association, and to their careful observation, to their enthusiasm and determined persistence in seeking means to overcome great natural difficulties, the state is largely indebted for the success already attained in horticulture. Besides these state associations, there are many local agricultural and horticultural societies, all of which have been useful in aiding the cause for which they were organized. Farmers' clubs and granges of the "Patrons of Husbandry" have also done much, both directly and indirectly, to promote the industrial interests of the state. By their frequent meetings, at which discussions are held, views compared, and experiences related, much valuable intelligence is gained, thought is stimulated, and the profession of farming advanced. As agriculture, like all kindred professions, depends upon intelligence to direct its advancement, all means intended to stimulate thought among farmers will, if wisely directed, aid in advancing this most complex of all industries. To those above named, and to other like associations, is in a large degree to be attributed the present favorable condition of the agriculture of the state.

Wisconsin is yet, comparatively, a new State. It was mainly settled by men who had little moneyed capital. Markets were distant, and means of transportation poor. The early settlers had consequently to struggle for a livelihood in the face of the greatest difficulties. When these opposing

circumstances are taken into account, and the improvement in methods of culture, and changes from grain to stock and dairy-farming that are now being made, are given their due weight, it must be acknowledged that the present condition of the agriculture of the state is excellent, and that the future of this most important industry is rich in promise of a steady, healthful growth, toward a completer development of all the agricultural resources of the state.

MINERAL RESOURCES.

BY ROLAND D. IRVING, PROFESSOR OF GEOLOGY, ETC., AT THE UNIVERSITY OF WISCONSIN.

The useful mineral materials that occur within the limits of the state of Wisconsin, come under both of the two grand classes of such substances: the *metallic ores*, from which the metals ordinarily used in the arts are extracted; and the *non-metallic substances*, which are used in the arts for the most part without any preliminary treatment, or at least undergo only a very partial alteration before being utilized. Of the first class are found in Wisconsin the ores of *lead, zinc, iron and copper*, besides minute traces of the precious metals; of the second class, the principal substances found are *brick-clay, kaolin, cement-rock, limestone for burning into quick-lime, limestone for flux, glass sand, peat and building stone*.

LEAD AND ZINC.

These metals are considered together because they are found occurring together in the same region and under exactly the same circumstances, being even obtained from the same openings. Lead has for many years been the most important metallic production of Wisconsin, and, together with zinc, whose ores have been utilized only since 1860, still holds this prominent position, although the production is not so great as formerly. Small quantities of lead and zinc ores have been found in the crystalline (Archæan) rocks of the northern part of the state and in the copper-bearing rocks of the Lake Superior country, but there are no indications at present that these regions will ever produce in quantity. All of the lead and zinc obtained in Wisconsin comes then from that portion of the southwestern part of the state which lies west of Sugar river and south of the nearly east and west ridge that forms the southern side of the valley of the Wisconsin, from the head of Sugar river westward. This district is commonly known in Wisconsin as the "Lead Region," and forms the larger part of the "Lead Region of the Upper Mississippi," which includes also smaller portions of Iowa and Illinois.

What European first became acquainted with the deposits of lead in the upper portion of valley of the Mississippi is a matter of some doubt. Charlevoix (*Histoire de la Nouvelle France*, III, 397, 398.) attributes the discovery to Nicolas Perrot, about 1692; and states that in 1721 the deposits still bore Perrot's name. Perrot himself, however, in the only one of his writings that remains, makes no mention of the matter. The itinerary of Le Sueur's voyage up the Mississippi, 1700-1701, given in La Harpe's *History of Louisiana*, which was written early in the 18th century, shows that the former found lead on the banks of the Mississippi, not far from

Thomas Sargent

NORTH PRARIE STA.

the present southern boundary of Wisconsin, August 25, 1700. Captain Johathan Carver, 1766, found lead in abundance at the Blue Mounds, and found the Indians in all the country around in possession of masses of galena, which they had obtained as "float mineral," and which they were incapable of putting to any use. There is no evidence of any one mining before Julien Dubuque, who, 1788 to 1809, mined in the vicinity of the flourishing city which now bears his name. After his death in 1809 nothing more was done until 1821, when the attention of American citizens was first drawn to the rich lead deposits of this region. By 1827, the mining had become quite general and has continued to the present time, the maximum production having been reached, however, between the years 1845 and 1847.

The following table, prepared by the late Moses Strong, shows the mineral production of southwestern Wisconsin for the years 1860 to 1873 in pounds:

YEARS.	GALENA.	SMITHSONITE.	YEAR.	GALENA.	SMITHSONITE.	BLENDE.
1860	-----	320,000	1867	13,820,784	5,181,445	841,310
1861	-----	266,000	1868	13,869,619	4,302,383	3,078,435
1862	17,037,912	-----	1869	13,426,721	4,547,971	6,252,420
1863	15,105,577	1,120,000	1870	13,754,159	4,429,585	7,414,022
1864	13,014,210	3,173,333	1871	13,484,210	16,618,160	9,303,625
1865	14,337,895	4,198,200	1872	11,622,668	27,021,383	16,256,970
1866	14,029,192	7,373,333	1873	9,919,734	18,528,906	15,074,664

Until within the last decade the lead mines of the Mississippi valley, including now both the "Upper" and the "Lower" regions—the latter one of which lies wholly within the limits of the state of Missouri—have far eclipsed the rest of the United States in the production of lead, the district being in fact one of the most important of the lead districts in the world. Of late years, however, these mines are far surpassed in production by the "silver-lead" mines of Utah and other Rocky Mountain regions, which, though worked especially for their silver, produce incidentally a very large amount of lead. Nevertheless, the mines of the Mississippi valley will long continue to be a very important source of this metal. The lead ore of the Wisconsin lead region is of one kind only, the sulphide known as *galena*, or *galenite*. This ore, when free from mechanically mingled impurities, contains 86.6 per cent. of lead, the balance being sulphur. Small quantities of other lead ores are occasionally found in the uppermost portions of the deposits, having been produced by the oxidizing influence of the atmosphere. The chief one of these oxidation products is the earthy carbonate known as *cerussite*. Galena almost always contains some silver, commonly enough to pay for its extraction. The Wisconsin galenas, however, are unusually free from silver, of which they contain only the merest trace.

The zinc ores are of two kinds, the most abundant being the ferruginous sulphide, or the "black-jack" of the miners. The pure sulphide, *sphalerite*, contains 67 per cent. of zinc, but the iron-bearing variety, known mineralogically as *marmatite*, generally contains 10 per cent. or more of iron. A ferruginous variety of the carbonate, *smithsonite*, also occurs in abundance, and is known to the miners as "dry-bone," the name being suggested by the peculiar structure of the ore.

Both lead and zinc ores occur in limited deposits in a series of limestone beds belonging to the Lower Silurian series. The lead region is underlaid by a nearly horizontal series of strata, with an aggregate thickness of 2,000 feet, which lie upon an irregular surface of ancient crystalline rocks (gneiss, granite, etc.). The names and order of succession of the several strata are indicated in the following scheme, the last named being the lowest in the series:

	<i>Formation,</i>	<i>Thickness.</i>	
	Niagara dolomitic limestone.....	300— 300 feet.	
	Cincinnati shales.....	60— 100 "	
Lead Horizon	}	Galena dolomitic limestone.....	250— 275 "
		Blue limestone.....	50— 75 "
		Buff dolomitic limestone.....	15— 20 "
		Lower Magnesian (dolomitic) limestone.....	250 "
		Potsdam sandstone series.....	800—1000 "

The first two of these layers, in the Wisconsin part of the lead region, are met with only in a few isolated peaks and ridges. The prevailing surface rock is the Galena limestone, through which, however, the numerous streams cut in deep and narrow valleys which not unfrequently are carved all the way into the Lower Magnesian.

The lead and zinc ores are entirely confined to the Galena, Blue and Buff limestones, an aggregate vertical thickness of some 350 to 375 feet. The upper and lower strata of the series are entirely barren. Zinc and lead ores are found in the same kind of deposits, and often together; by far the larger part of the zinc ores, however, come from the Blue and Buff limestones, and the lowest layers of the Galena, whilst the lead ores, though obtained throughout the whole thickness of the mining ground, are especially abundant in the middle and upper layers of the Galena beds.

The ore deposits are of two general kinds, which may be distinguished as vertical crevices and flat crevices, the former being much the most common. The simplest form of the vertical crevice is a narrow crack in the rock, having a width of a few inches, an extension laterally from a few yards to several hundred feet, and a vertical height of 20 to 40 feet, thinning out to nothing in all directions, and filled from side to side with highly crystalline, brilliant, large-surfaced galena, which has no accompanying metallic mineral, or gangue matter. Occasionally the vertical extension exceeds a hundred feet, and sometimes a number of these sheets are close together and can be mined as one. Much more commonly the vertical crevice shows irregular expansions, which are sometimes large caves, or openings in certain layers, the crevice between retaining its normal character, while in other cases the expansion affects the whole crevice, occasionally widening it throughout into one large opening. These openings are rarely entirely filled, and commonly contain a loose, disintegrated rock, in which the galena lies loose in large masses, though often adhering to the sides of the cavity in large stalactites, or in cubical crystals. The vertical crevices show a very distinct arrangement parallel with one another, there being two systems, which roughly trend east and west, and north and south. The east and west crevices are far the most abundant and most productive of ore. The vertical crevices are confined nearly altogether to the upper and middle portions of the Galena, and are not productive of zinc ores. They are evidently merely the parallel joint cracks which affect every great rock formation, filled by chemical action with the lead ore. The crevices with openings have evidently been enlarged by the solvent power of atmospheric water carrying carbonic acid, and from the way in which the ore occurs loose in the cavities, it is evident that this solving action has often been subsequent to the first deposition of lead ore in the crevice.

The "flat crevices," "flat sheets," and "flat openings," are analogous to the deposits just described, but have, as indicated by the names, a horizontal position, being characteristic of certain layers, which have evidently been more susceptible to chemical action than others, the dissolving waters having, moreover, been directed along them by less pervious layers above and below. The flat openings differ from the vertical crevices also, in having associated with the

galena much of either the black-jack or dry-bone zinc ores, or both, the galena not unfrequently being entirely wanting. Cleavable calcite also accompanies the ores in these openings in large quantities, and the same is true of the sulphide of iron, which is the variety known as *marcasite*. These materials have sometimes a symmetrical arrangement on the bottom and top of the opening, the central portion being empty. The flat openings characterize the Blue and Buff and lower Galena beds, and from them nearly all the zinc ore is obtained.

It is not possible, in the limits of this short paper, even to mention the various mining districts. It may merely be said that the amount of galena raised from single crevices has often been several hundred thousand, or even over a million pounds, and that one of the principal mining districts is in the vicinity of Mineral Point, where there are two furnaces constantly engaged in smelting. Between the years 1862 and 1873, these two establishments have produced 23,903,260 pounds of metallic lead, or an average of 1,991,938 pounds, the maximum being, in 1869, 2,532,710 pounds, the minimum, in 1873, 1,518,888 pounds.

The zinc ores were formerly rejected as useless, and have only been utilized since 1860. An attempt to smelt them at Mineral Point was not successful, because the amount needed of fuel and clay, both of which have to come from a distance, exceeding even the amount of ore used, caused a very heavy expense for transportation. The ores are therefore now taken altogether to LaSalle, Illinois, where they meet the fuel and clay, and the industry at that place has become a flourishing one. The amount of zinc ore in the Wisconsin lead region is, beyond doubt, very great, and will be a source of wealth for a long time to come.

Since the ores of zinc and lead in this region are confined to such a small thickness of strata greatly eroded by the atmospheric waters, the entire thickness having frequently been removed, it becomes a matter of great importance to know how much of the mining ground remains at every point throughout the district. The very excellent topographic-geological maps of the region, made by Mr. Moses Strong, and since published by the State in the Report of the Geological Survey, make this knowledge accessible to all.

IRON.

Iron mining in Wisconsin is yet in its infancy, although some important deposits are producing a considerable quantity of ore. A number of blast furnaces have sprung up in the eastern part of the state, but these smelt Michigan ores almost entirely. Much remains yet to be done in the way of exploration, for the most promising iron fields are in the heavily timbered and unsettled regions of the north part of the state, and are as yet imperfectly known. It appears probable, however, that iron ores will, in the near future, be the most important mineral production of Wisconsin. The several ores will be noted in the order of their *present* importance.

RED HEMATITES.

The iron in these ores exists as an anhydrous sesquioxide, which is, however, in an earthy condition, and entirely without the brilliant metallic luster that characterizes the specular hematites. Pure hematite contains seventy per cent. of metallic iron, but the red hematites, as mined, are always so largely mingled with mechanical impurities that they rarely contain more than fifty per cent. The most important red hematite mined in Wisconsin is that known as the *Clinton iron ore*, the name coming from the formation in which the ore occurs. This formation is a member of the Upper Silurian series, and is named from a locality in Oneida county, New York, where it was first recognized. Associated with its rocks, which are limestones and shales, is constantly found a peculiar red hematite, which is so persistent in its characters, both physical and

and chemical, that one familiar with it from any one locality can hardly fail to recognize it when coming from others. The iron produced from it is always "cold-short," on account of the large content of phosphorus; but, mingled with siliceous ores free from phosphorus, it yields always a most excellent foundry iron. It is mined at numerous points from New York to Tennessee, and at some points reaches a very great total thickness. In Wisconsin the Clinton rocks merge into the great Niagara limestone series of the eastern part of the state, but at the bottom of the series, in a few places, the Clinton ore is found immediately overlying the Cincinnati shales. The most important locality is that known as Iron Ridge, on sections twelve and thirteen in the town of Hubbard, in Dodge county. Here a north-and-south ledge of Niagara limestone overlooks lower land to the west. Underneath, at the foot of the ridge, is the ore bed, fifteen to eighteen feet in thickness, consisting of horizontally bedded ore, in layers three to fourteen inches thick. The ore has a concretionary structure, being composed of lenticular grains, one twenty-fifth of an inch in diameter, but the top layer is without this structure, having a dark purplish color, and in places a slight metallic appearance. Much of the lower ore is somewhat hydrated. Three quarters of a mile north of Iron Ridge, at Mayville, there is a total thickness of as much as forty feet. According to Mr. E. T. Sweet, the percentages of the several constituents of the Iron Ridge ore are as follows: iron peroxide, 66.38; carbonate of lime, 10.42; carbonate of magnesia, 2.79; silica, 4.72; alumina, 5.54; manganese oxide, 0.44; sulphur, 0.23; phosphoric acid, 0.73; water, 8.75 = 100: metallic iron, 46.66.

Two small charcoal furnaces at Mayville and Iron Ridge smelt a considerable quantity of these ores alone, producing an iron very rich in phosphorus. An analysis of the Mayville pig iron, also by Mr. Sweet, shows the following composition: iron, 95.784 per cent; phosphorus, 1.675; carbon, 0.849; silicon, 0.108 = 100.286. The average furnace yield of the ore is forty-five per cent. By far the larger part of the ore, however, is sent away to mingle with other ores. It goes to Chicago, Joliet and Springfield, Ill., St. Louis, Mo., Wyandotte and Jackson, Mich., and Appleton, Green Bay and Milwaukee, Wis. In 1872, the Iron Ridge mines yielded 82,371 tons. The Clinton ore is found at other places farther north along the outcrop of the base of the Niagara formation in Wisconsin, but no one of these appears to promise any great quantity of good ore. Red hematite is found at numerous places in Wisconsin, highly charging certain layers of the Potsdam sandstone series, the lowest one of the horizontal Wisconsin formations. In the eastern part of the town of Westfield, Sauk county, the iron ore excludes the sandstone, forming an excellent ore. No developments have been made in this district, so that the size of the deposit is not definitely known.

BROWN HEMATITES.

These ores contain their iron as the hydrated, or brown, sesquioxide, which, when pure, has about sixty per cent. of the metal; the ordinary brown hematites, however, seldom contain over forty per cent. *Bog iron ore*, a porous brown hematite that forms by deposition from the water of bogs, occurs somewhat widely scattered underneath the large marshes of Portage, Wood and Juneau counties. Very excellent bog ore, containing nearly 50 per cent. of iron, is found near Necedah, Juneau county, and near Grand Rapids, Wood county, but the amount obtainable is not definitely known. The Necedah ore contains: silica, 8.52; alumina, 3.77; iron peroxide, 71.40; manganese oxide, 0.27; lime, 0.58; magnesia, trace; phosphoric acid, 0.21; sulphur, 0.02; organic matter, 1.62; water, 13.46 = 99.85; metallic iron, 49.98—according to Mr. E. T. Sweet's analysis. An ore from section 34, twp. 23, range 6 east, Wood county, yielded, to Mr. Oliver Matthews, silica, 4.81; alumina, 1.00; iron peroxide, 73.23; lime, 0.11, magnesia, 0.25; sulphuric acid, 0.07; phosphoric acid, 0.10; organic matter, 5.88; water,

14.24 ; =99.69: metallic iron, 51.26.

Brown hematite, mingled with more or less red ore, occurs also in some quantity filling cracks and irregular cavities in certain portions of the Potsdam series in northwestern Sauk county and the adjoining portion of Richland. A small charcoal furnace has been in operation on this ore at Ironton, Sauk county, for a number of years, and recently another one has been erected at Cazenovia in the same district.

MAGNETIC ORES AND SPECULAR HEMATITES.

These are taken together here, because their geological occurrence is the same, the two ores occurring not only in the same group of rocks, but even intimately mingled with one another. These ores are not now produced in Wisconsin; but it is quite probable that they may before many years become its principal mineral production. In magnetic iron ore, the iron is in the shape of the mineral *magnetite*, an oxide of iron containing 72.4 per cent of iron when pure, and this is the highest percentage of iron that any ore can ever have. Specular hematite is the same as red hematite, but is crystalline, has a bright, metallic luster, and a considerable hardness. As mined the richest magnetic and specular ores rarely run over 65 per cent., while in most regions where they are mined they commonly do not reach 50 per cent. The amount of rich ores of this kind in the northern peninsula of Michigan is so great, however, that an ore with less than 50 per cent. finds no sale; and the same must be true in the adjoining states. So largely does this matter of richness affect the value of an ore, that an owner of a mine of 45 per cent. "hard" ore in Wisconsin would find it cheaper to import and smelt Michigan 65 per cent. ore, than to smelt his own, even if his furnace and mine were side by side.

The specular and magnetic ores of Wisconsin occur in two districts — the Penokee iron district, ten to twenty miles south of Lake Superior, in Bayfield, Ashland and Lincoln counties, and the Menomonee iron district, near the head waters of the Menomonee river, in township 40, ranges 17 and 18 east, Oconto county. Specular iron in veins and nests is found in small quantities with the quartz rocks of the Baraboo valley, Sauk county, and Necedah, Juneau county; and very large quantities of a peculiar quartz-schist, charged with more or less of the magnetic and specular iron oxides, occur in the vicinity of Black River Falls, Jackson county; but in none of these places is there any promise of the existence of valuable ore.

In the Penokee and Menomonee regions, the iron ores occur in a series of slaty and quartzose rocks known to geologists as the Haronian series. The rocks of these districts are really the extensions westward of a great rock series, which in the northern Michigan peninsula contains the rich iron ores that have made that region so famous. In position, this rock series may be likened to a great elongated parabola, the head of which is in the Marquette iron district and the two ends in the Penokee and Menomonee regions of Wisconsin. In all of its extent, this rock series holds great beds of lean magnetic and specular ores. These contain large quantities of quartz, which, from its great hardness, renders them very resistant to the action of atmospheric erosion. As a result, these lean ores are found forming high and bold ridges. Such ridges of lean ores have deceived many explorers, and not a few geologists. In the same rock series, for the most part occupying portions of a higher layer, are found, however, ores of extraordinary richness and purity, which, from their comparative softness, very rarely outcrop. The existence in quantity of these very rich ores in the Menomonee region has been definitely proven. One deposit, laid open during the Summer of 1877, shows a width of over 150 feet of first class specular ore; and exceeding in size the greatest of the famous deposits of Michigan. In the Penokee region, however, though the indications are favorable, the existence of the richer ores is as yet an inference only. The Penokee range itself is a wonderful development of

lean ore, which forms a continuous belt several hundred feet in width and over thirty miles in length. Occasionally portions of this belt are richer than the rest, and become almost merchantable ores. The probability is, however, that the rich ores of this region will be found in the lower country immediately north of the Penokee range, where the rocks are buried beneath heavy accumulations of drift material.

COPPER.

The only copper ore at present raised in Wisconsin is obtained near Mineral Point, in the lead region of the southwestern part of the state, where small quantities of *chalcopyrite*, the yellow sulphide of copper and iron, are obtained from pockets and limited crevices in the Galena limestone. Copper pyrites is known to occur in this way throughout the lead region, but it does not appear that the quantity at any point is sufficient to warrant exploration.

Copper occurs also in the northernmost portions of Wisconsin, where it is found under altogether different circumstances. The great copper-bearing series of rocks of Keweenaw point and Isle Royale stretch southwestward into and entirely across the state of Wisconsin, in two parallel belts. One of these belts enters Wisconsin at the mouth of the Montreal river, and immediately leaving the shore of Lake Superior, crosses Ashland and Bayfield counties, and then widening greatly, occupies a large area in Douglas, St. Croix, Barron and Chippewa counties. The other belt forms the backbone of the Bayfield peninsula, and crosses the northern part of Douglas county, forming a bold ridge, to the Minnesota line. The rocks of this great series appear to be for the most part of igneous origin, but they are distinctly bedded, and even interstratified with sandstone, shales, and coarse boulder-conglomerate, the whole series having generally a tilted position. In veins crossing the rock-beds, and scattered also promiscuously through the layers of both conglomerates and igneous rocks, pure metallic copper in fine flakes is often found. Mining on a small scale has been attempted at numbers of points where the rivers flowing northward into Lake Superior make gorges across the rock series, but at none of them has sufficient work been done to prove or disprove the existence of copper in paying quantity.

GOLD AND SILVER.

Small traces of gold have been detected by the writer in quartz from the crystalline rocks of Clark county, but there is no probability that any quantity of this metal will ever be found in the state. Traces of silver have also been found in certain layers of the copper series in Ashland county. Judging from the occurrence of silver in the same series not far to the east in Michigan, it seems not improbable that this metal may be found also in Wisconsin.

BRICK CLAYS.

These constitute a very important resource in Wisconsin. Extending inland for many miles from the shores of Lakes Michigan and Superior are stratified beds of clay of lacustrine origin, having been deposited by the lakes when greatly expanded beyond their present sizes. All of these clays are characterized by the presence of a large amount of carbonate of lime. Along Lake Superior they have not yet been utilized, but all through the belt of country bordering Lake Michigan they are dug and burned, fully 50,000,000 bricks being made annually in this region. A large proportion of these bricks are white or cream-colored, and these are widely known under the name of "Milwaukee brick," though by no means altogether made at Milwaukee. Others are ordinary red brick. The difference between the light-colored and red bricks is ordinarily attributed to the greater amount of iron in the clay from which the latter are

burned, but it has been shown by Mr. E. T. Sweet that the white bricks are burned from clay which often contains more iron than that from which the red bricks are made, but which also contains a very large amount of carbonate of lime. The following analyses show (1) the composition of the clay from which cream-colored brick are burned at Milwaukee, (2) the composition of a red-brick clay from near Madison, and (3) the composition of the unutilized clay from Ashland, Lake Superior. Nos. 1 and 2 are by Mr. E. T. Sweet, No. 3 by Professor W. W. Daniells:

At Milwaukee 24,000,000 cream-colored brick are made annually; at Racine, 3,500,000; at Appleton and Menasha, 1,800,000 each; at Neenah, 1,600,000; at Clifton, 1,700,000; at Waterloo, 1,600,000; and in smaller quantities at Jefferson, Ft. Atkinson, Edgerton, Whitewater, Geneva, Ozaukee, Sheboygan Falls, Manitowoc, Kewaunee, and other places. In most cases the cream-colored bricks are made from a bright-red clay, although occasionally the clay is light-colored. At Whitewater and other places tile and pottery are also made from this clay.

Although these lacustrine clays are much the most important in Wisconsin, excellent brick clays are also found in the interior of the state. In numbers of places along the Yahara valley, in Dane county, an excellent stratified clay occurs. At Madison this is burned to a red brick; at Stoughton and Oregon to a fine cream-colored brick. At Platteville, Lancaster, and other points in the southwestern part of the state, red bricks are made from clays found in the vicinity.

KAOLIN (PORCELAIN - CLAY — FIRE - CLAY).

The word "kaolin" is applied by geologists to a clay-like material which is used in making chinaware in this country and in Europe. The word is of Chinese origin, and is applied by the Chinese to the substance from which the famous porcelain of China is made. Its application to the European porcelain-clay was made under the mistaken idea—one which has prevailed among scientists until very recently—that the Chinese material is the same as the European. This we now know to be an error, the Chinese and Japanese wares being both made altogether from a solid rock.

True kaolin, using the word in its European sense, is unlike other ordinary clays, in being the result of the disintegration of felspathic crystalline rocks "in place," that is without being removed from the place of its first formation. The base of kaolin is a mineral known as *kaolinite*, a compound of silica, alumina and water, which results from a change or decay of the feldspar of feldspar-bearing rocks. Feldspar contains silica, alumina, and soda or potash, or both. By percolation through the rocks of surface water carrying carbonic acid, the potash and soda are removed and kaolinite results. Mingled with the kaolinite are, however, always the other ingredients of the rock, quartz, mica, etc., and also always some undecomposed, or only partly decomposed feldspar. These foreign ingredients can all, however, be more or less perfectly removed by a system of levigation, when a pure white clay results, composed almost wholly of the scales of

the mineral kaolinite. Prepared in this way the kaolin has a high value as a refractory material, and for forming the base of fine porcelain wares.

The crystalline rocks, which, by decomposition, would produce a kaolin, are widely spread over the northern part of Wisconsin; but over the most of the region occupied by them there is no sign of the existence of kaolin, the softened rock having apparently been removed by glacial action. In a belt of country, however, which extends from Grand Rapids on the Wisconsin, westward to Black river, in Jackson county, the drift is insignificant or entirely absent; the glacial forces have not acted, and the crystalline rocks are, or once were, overlaid by sandstone, along whose line of junction with the underlying formation numerous water-courses have existed, the result being an unusual amount of disintegration. Here we find, in the beds of the Wisconsin, Yellow, and Black rivers, large exposures of crystalline rocks, which between the rivers are overlaid by sandstone. The crystalline rocks are in distinct layers, tilted at high angles, and in numerous places decomposed into a soft white kaolin. Inasmuch as these layers strike across the country in long, straight lines, patches of kaolin are found ranging themselves into similar lines. The kaolin patches are most abundant on the Wisconsin in the vicinity of the city of Grand Rapids, in Wood county. They vary greatly in size, one deposit even varying from a fraction of an inch to a number of feet in thickness. The kaolin varies, also, greatly in character, some being quite impure and easily fusible from a large content of iron oxide or from partial decomposition only, while much of it is very pure and refractory. There is no doubt, however, that a large amount of kaolin exists in this region, and that by selection and levigation an excellent material may be obtained, which, by mingling with powdered quartz, may be made to yield a fire-brick of unusual refractoriness, and which may even be employed in making fine porcelain ware.

The following table gives the composition of the raw clay, the fine clay obtained from it by levigation, and the coarse residue from the same operation, the sample having been taken from the opening on the land of Mr. C. B. Garrison, section 5, town 22, range 6 east, Wood county:

	RAW CLAY.	LEVIGATION PRODUCTS.			RAW CLAY.	LEVIGATION PRODUCTS

CEMENT - ROCK.

Certain layers of the Lower Magnesian limestone, as at Ripon, and other points in the eastern part of the state, are known to produce a lime which has in some degree the hydraulic property, and the same is true of certain layers of the Blue limestone of the Trenton group, in the southwestern part of the state; the most valuable material of this kind, however, that is as yet known to exist in Wisconsin, is found near Milwaukee, and has become very recently somewhat widely known as the "Milwaukee" cement-rock. This rock belongs to the Hamilton formation, and is found near the Washington street bridge, at Brown Deer, on the lake shore at Whitefish

bay, and at other points in the immediate vicinity of Milwaukee. The quantity attainable is large, and a very elaborate series of tests by D. J. Whittemore, chief engineer of the Milwaukee and St. Paul railroad, shows that the cement made from it exceeds all native and foreign cements in strength, except the famous English "Portland" cement. The following are three analyses of the rock from different points, and they show that it has a very constant composition :

LIMESTONE FOR MAKING QUICK - LIME.

Quick-lime is made from all of the great limestone formations of Wisconsin, but more is burnt from the Lower Magnesian and Niagara formations, than from the others. The Lower Magnesian yields a very strong mortar, but the lime burned from it is not very white. It is burned largely in the region about Madison, one of the largest quarries being on the south line of section 33 of that town, where some 20,000 bushels are produced annually, in two kilns. The lime from this place has a considerable local reputation under the name of "Madison lime." The Trenton limestone is burned at a few points, but yields an inferior lime. The Galena is not very generally burned, but yields a better lime than the Trenton. In the region about Watertown and White-water, some 40,000 to 50,000 barrels are made annually from this formation.

The Niagara, however, is the great lime furnisher of the northwest. From its purity it is adapted to the making of a most admirable lime. It is burned on a large scale at numbers of points in the eastern part of the state, among which may be mentioned, Pellon's kilns, Pewaukee, where 12,000 barrels are made weekly and shipped to Chicago, Grand Haven, Des Moines, etc.; and Holick & Son's kilns, Racine, which yield 60,000 to 75,000 barrels annually. A total of about 400,000 barrels is annually made from the Niagara formation in eastern Wisconsin.

LIMESTONE FOR FLUX IN IRON SMELTING.

The limestones of Wisconsin are rarely used as a flux, because of their prevalent magnesian character. The stone from Schoonmaker's quarry, near Milwaukee, is used at the Bay View iron works, and is one of the few cases. There are certain layers, however, in the Trenton limestone, widely spread over the southern part of the state, which are non-magnesian, and frequently sufficiently free from earthy impurities to be used as a flux. These layers deserve the attention of the iron masters of the state.

GLASS SAND.

Much of the St. Peter's sandstone is a purely siliceous, loose, white sand, well adapted to the making of glass. It is now being put to this use at points in the eastern part of the state.

PEAT.

Peat exists in large quantities and of good quality underneath the numerous marshes of the eastern and central parts of the state. Whether it can be utilized in the future as a fuel, will depend altogether upon the cost of its preparation, which will have to be very low in order that it may compete with superior fuels. As a fertilizer, peat has always a great value, and requires no preliminary treatment.

BUILDING STONES.

All the rocky formations of Wisconsin are used in building, and even the briefest synopsis of the subject of the building stones of the state, would exceed the limits of this paper. A few of the more prominent kinds only are mentioned.

Granite occurs in protruding masses, and also grading into gneiss, in the northern portions of the state, at numerous points. In many places on the Wisconsin, Yellow, and Black rivers, and especially at Big Bull Falls, Yellow river, red granites of extraordinary beauty and value occur. These are not yet utilized, but will in the future have a high value.

The handsomest and most valuable sandstone found in Wisconsin, is that which extends along the shore of Lake Superior, from the Michigan to the Minnesota line, and which forms the basement rock of the Apostle islands. On one of these islands a very large quarry is opened, from which are taken masses of almost any size, of a very close-grained, uniform, dark brown stone, which has been shipped largely to Chicago and Milwaukee. At the latter place, the well known court house is built of this stone. An equally good stone can be obtained from the neighboring islands, and from points on the mainland. A very good white to brown, indurated sandstone is obtained from the middle portions of the Potsdam series, at Stevens Point, Portage county; near Grand Rapids, Wood county; at Black River Falls, Jackson county; at Packwaukee, Marquette county; near Wautoma, Waushara county; and at several points in the Baraboo valley, Sauk county. A good buff-colored, calcareous sandstone is quarried and used largely in the vicinity of Madison, from the uppermost layers of the Potsdam series.

All of the limestone formations of the state are quarried for building stone. A layer known locally as the "Mendota" limestone, included in the upper layers of the Potsdam series, yields a very evenly bedded, yellow, fine-grained rock, which is largely quarried along the valley of the lower Wisconsin, and also in the country about Madison. In the town of Westport, Dane county, a handsome, fine-grained, cream-colored limestone is obtained from the Lower Magnesian. The Trenton limestone yields an evenly bedded, thin stone, which is frequently used for laying in wall. The Galena and Niagara are also utilized, and the latter is capable, in much of the eastern part of the state, of furnishing a durable, easily dressed, compact, white stone.

In preparing this paper, I have made use of Professor Whitney's "Metallic Wealth of the United States," and "Report on the Geology of the Lead Region;" of the advance sheets of Volume II of the Reports of the State Geological Survey, including Professor T. C. Chamberlin's Report on the Geology of Eastern Wisconsin, my own Report on the Geology of Central Wisconsin, and Mr. Strong's Report on the Geology of the Lead Region; Mr. E. T. Sweet's account of the mineral exhibit of the state at the Centennial Exposition; and of my unpublished reports on the geology of the counties bordering Lake Superior.

WISCONSIN RAILROADS.

BY HON. H. H. GILES.

The territory of Wisconsin offered great advantages to emigrants. Explorers had published accounts of the wonderful fertility of its soil, the wealth of its broad prairies and forest openings, and the beauty of its lakes and rivers. Being reached from the older states by way of the lakes and easily accessible by a long line of lake coast, the hardships incident to weeks of land travel were avoided. Previous to 1836 but few settlements had been made in that part of the then territory of Michigan, that year organized into the territory of Wisconsin, except as mining camps in the southwestern part, and scattered settlers in the vicinity of the trading posts and military stations. From that time on, with the hope of improving their condition, thousands of the enterprising yeomanry of New England, New York and Ohio started for the land of promise. Germans, Scandinavians and other nationalities, attracted by the glowing accounts sent abroad, crossed the ocean on their way to the new world; steamers and sail-craft laden with families and their household goods left Buffalo and other lake ports, all bound for the new Eldorado. It may be doubted if in the history of the world any country was ever peopled with the rapidity of southern and eastern Wisconsin. Its population in 1840 was 30,749; in 1850, 304,756; in 1860, 773,693; in 1870, 1,051,351; in 1875, 1,236,729. With the development of the agricultural resources of the new territory, grain raising became the most prominent interest, and as the settlements extended back from the lake shore the difficulties of transportation of the products of the soil were seriously felt. The expense incurred in moving a load of produce seventy or eighty miles to a market town on the lake shore frequently exceeded the gross sum obtained for the same. All goods, wares and merchandise, and most of the lumber used must also be hauled by teams from Lake Michigan. Many of our early settlers still retain vivid recollections of trying experiences in the Milwaukee woods and other sections bordering on the lake shore, from the south line of the state to Manitowoc and Sheboygan. To meet the great want—better facilities for transportation—a valuable land grant was obtained from congress, in 1838, to aid in building a canal from Milwaukee to Rock river. The company which was organized to construct it, built a dam across Milwaukee river and a short section of the canal; then the work stopped and the plan was finally abandoned. It was early seen that to satisfy the requirements of the people, railroads, as the most feasible means of communication within their reach, were an indispensable necessity.

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY.

Between the years 1838 and 1841, the territorial legislature of Wisconsin chartered several railroad companies, but with the exception of the "Milwaukee & Waukesha Railroad Company," incorporated in 1847, none of the corporations thus created took any particular shape. The commissioners named in its charter met November 23, 1847, and elected a president, Dr. L. W. Weeks, and a secretary, A. W. Randall (afterward governor of Wisconsin). On the first Monday of February, 1848, they opened books of subscription. The charter of the company provided

that \$100,000 should be subscribed and five per cent. thereof paid in before the company should fully organize as a corporation. The country was new. There were plenty of active, energetic men, but money to build railroads was scarce, and not until April 5, 1849, was the necessary subscription raised and percentage paid. A board of directors was elected on the 10th day of May, and Byron Kilbourn chosen president. The charter had been previously amended, in 1848, authorizing the company to build a road to the Mississippi river, in Grant county, and in 1850, its name was changed to the "Milwaukee & Mississippi Railroad Company." After the company was fully organized, active measures were taken to push the enterprise forward to completion. The city of Milwaukee loaned its credit, and in 1851 the pioneer Wisconsin railroad reached Waukesha, twenty miles out from Milwaukee. In the spring of 1852, Edward H. Broadhead, a prominent engineer, from from the state of New York, was put in charge of the work as chief engineer and superintendent. Under his able and energetic administration the road was pushed forward in 1852 to Milton, in 1853 to Stoughton, in 1854 to Madison, and in 1856 to the Mississippi river, at Prairie du Chien. In 1851 John Catlin of Madison, was elected president in place of Kilbourn.

The proposed length of this article will not admit of any detailed statement of the trials, struggles and triumphs of the men who projected, and finally carried across the state, from the lake to the river, this first Wisconsin railroad. Mitchell, Kilbourn, Holton, Tweedy, Catlin, Walker, Broadhead, Crocker and many others, deserve to be remembered by our people as benefactors of the state. In 1859 and 1860, the company defaulted in the payment of the interest on its bonds. A foreclosure was made and a new company, called the "Milwaukee & Prairie du Chien," took its place, succeeding to all its rights and property.

The "Southern Wisconsin Railway Company" was chartered in 1852, and authorized to build a road from Milton to the Mississippi river. When the Milwaukee and Mississippi road reached Milton in 1852, it was not authorized by its charter to go to Janesville, but, under the charter of the Southern Wisconsin, a company was organized that built the eight miles to Janesville in 1853. Under a subsequent amendment to the charter, the Milwaukee and Mississippi company was authorized to build from Milton to the Mississippi river. The Janesville branch was then purchased and extended to Monroe, a distance of about thirty-four miles, or forty-two miles west of Milton. Surveys were made and a line located west of Monroe to the river. The people of La Fayette and Grant counties have often been encouraged to expect a direct railroad communication with the city of Milwaukee. Other and more important interests, at least so considered by the railroad company, have delayed the execution of the original plan, and the road through the counties mentioned still remains unbuilt.

The "LaCrosse & Milwaukee Railroad Company" was chartered in 1852, to construct a road from LaCrosse to Milwaukee. During the year in which the charter was obtained, the company was organized, and the first meeting of the commissioners held at LaCrosse. Among its projectors were Byron Kilbourn and Moses M. Strong. Kilbourn was elected its first president. No work was done upon this line until after its consolidation with the "Milwaukee, Fond du Lac & Green Bay Railroad Company" in 1854. The latter company was chartered in 1853, to build a road from Milwaukee *via* West Bend to Fond du Lac and Green Bay. It organized in the spring of 1853, and at once commenced active operations under the supervision of James Kneeland, its first president. The city of Milwaukee loaned its credit for \$200,000, and gave city bonds. The company secured depot grounds in Milwaukee, and did considerable grading for the first twenty-five miles out. Becoming embarrassed in January, 1854, the Milwaukee, Fond du Lac & Green Bay consolidated with the LaCrosse & Milwaukee company. Work was at once resumed on the partially graded line. In 1855 the road was completed to Horicon, fifty miles.

The Milwaukee & Watertown company was chartered in 1851, to build from Milwaukee to Watertown. It soon organized, and began the construction of its line from Brookfield, fourteen miles west of Milwaukee, and a point on the Milwaukee & Mississippi road leading through Oconomowoc to Watertown. The charter contained a provision that the company might extend its road by way of Portage to La Crosse. It reached Watertown in 1856, and was consolidated with the LaCrosse & Milwaukee road in the autumn of the same year.

In the spring of 1856 congress made a grant of land to the state of Wisconsin, to aid in the building of a railroad from Madison, or Columbus, *via* Portage City, to the St. Croix river or lake, between townships 25 and 31. and from thence to the west end of Lake Superior, and to Bayfield. An adjourned session of the Wisconsin legislature met on September 3 of that year, to dispose of the grant. The disposal of this grant had been generally discussed by the press, and the public sentiment of the state seemed to tend toward its bestowal upon a new company. There is little doubt but that this was also the sentiment of a large majority of the members of both houses when the session commenced. When a new company was proposed a joint committee of twenty from the senate and assembly was appointed to prepare a bill, conferring the grant upon a company to be created by the bill itself. The work of the committee proceeded harmoniously until the question of who should be incorporators was to be acted upon, when a difference of opinion was found to exist, and one that proved difficult to harmonize. In the meantime the LaCrosse and Watertown companies had consolidated, and a sufficient number of the members of both houses were "propitiated" by "pecuniary compliments" to induce them to pass the bill, conferring the so called St. Croix grant upon the LaCrosse & Milwaukee railroad company. The vote in the assembly in the passage of the bill was, ayes 62, noes 7. In the senate it stood, ayes 17, noes 7.

At the session of the legislature of 1858 a committee was raised to investigate the matter, and their report demonstrated that bonds were set apart for all who voted for the LaCrosse bill; to members of assembly \$5,000 each, and members of senate \$10,000 each. A few months after the close of the legislative session of 1856 the land grant bonds of the LaCrosse road became worthless. Neither the LaCrosse company nor its successors ever received any portion of the lands granted to the state. During the year 1857 the LaCrosse company completed its line of road through Portage City to LaCrosse, and its Watertown line to Columbus.

The "Milwaukee & Horicon Railroad Company" was chartered in 1852. Between the years 1855 and 1857 it built through Waupun and Ripon to Berlin, a distance of forty-two miles. It was, in effect, controlled by the LaCrosse & Milwaukee company, although built as a separate branch. This line was subsequently merged in the LaCrosse company, and is now a part of the northern division of the Chicago, Milwaukee & St. Paul railway.

The "Madison, Fond du Lac & Lake Michigan Railroad Company" was chartered in 1855, to build a road from Madison *via* Fond du Lac to Lake Michigan. In 1857 it bought of the LaCrosse company that portion of its road acquired by consolidation with the Milwaukee & Watertown company. Its name was then changed to "Milwaukee & Western Railroad Company." It owned a line of road from Brookfield to Watertown, and branches from the latter place to Columbus and Sun Prairie, in all about eighty miles in length.

In 1858 and 1859 the La Crosse & Milwaukee and the Milwaukee & Horicon companies defaulted in the payment of the interest on their bonded debts. In the same years the bondholders of the two companies instituted foreclosure proceedings on the different trust deeds given to secure their bonds. Other suits to enforce the payment of their floating debts were also commenced. Protracted litigation in both the state and federal courts resulted in a final settlement in 1868, by a decision of the supreme court of the United States. In the meantime, in 1862 and

1863, both roads were sold, and purchased by an association of the bondholders, who organized the "Milwaukee & St. Paul Railway Company." The new company succeeded to all the rights of both the La Crosse and Horicon companies, and soon afterward, in 1863, purchased the property of the Milwaukee & Western company, thus getting control of the roads from Milwaukee to La Crosse, from Horicon to Berlin, from Brookfield to Watertown, and the branches to Columbus and Sun Prairie. In 1864 it built from Columbus to Portage, from Brookfield to Milwaukee, and subsequently extended the Sun Prairie branch to Madison, in 1869. It also purchased the Ripon & Wolf River road, which had been built fifteen miles in length, from Ripon to Omro, on the Fox river, and extended it to Winneconne on the Wolf river, five miles farther, and twenty miles from Ripon. In 1867 the Milwaukee & St. Paul railway company obtained control of the Milwaukee & Prairie du Chien railroad. The legislature of 1857 had passed an act, authorizing all stock-holders in all incorporated companies to vote on shares of stock owned by them. The directors of the Milwaukee & St. Paul company had secured a majority of the common stock, and, at the election of 1867, elected themselves a board of directors for the Prairie du Chien company. All the rights, property and interests of the latter company came under the ownership and control of the former.

In 1865, Alexander Mitchell, of Milwaukee, was elected president, and S. S. Merrill general manager of the Milwaukee & St. Paul railway company. They were retained in their respective positions by the new organization, and still continue to hold these offices, a fact largely owing to the able and efficient manner that has characterized their management of the company's affairs. The company operates eight hundred and thirty-four miles of road in Wisconsin, and in all two thousand two hundred and seven miles. Its lines extend to St. Paul and Minneapolis in Minnesota, and to Algona in Iowa, and over the Western Union to Savanna and Rock Island in the State of Illinois.

The "Oshkosh & Mississippi Railroad Company" was chartered in 1866 to build a road from the city of Oshkosh to the Mississippi river. Its construction to Ripon in 1872 was a move on the part of citizens of Oshkosh to connect their town with the Milwaukee & St. Paul road. It is twenty miles in length and leased to the Chicago, Milwaukee & St. Paul company.

In 1871 and 1872 the "Wisconsin Union Railroad Company," of which John W. Cary was president, built a road from Milwaukee to the state line between Wisconsin and Illinois, to connect with a road built from Chicago to the state line of Illinois. This new line between Milwaukee and Chicago was built in the interest of, and in fact by, the Milwaukee & St. Paul company to afford a connection between its Wisconsin, Iowa and Minnesota system of roads, and the eastern trunk lines centering in Chicago. It runs parallel with the shore of Lake Michigan and from three to six miles from it, and is eighty-five miles in length.

THE CHICAGO & NORTHWESTERN RAILWAY.

The territorial legislature of 1848 chartered the "Madison & Beloit Railroad Company" with authority to build a railroad from Beloit to Madison only. In 1850, by an act of the legislature, the company was authorized to extend the road to the Wisconsin river and La Crosse, and to a point on the Mississippi river near St. Paul, and also from Janesville to Fond du Lac. Its name was changed, under legislative authority, to the "Rock River Valley Union Railroad Company." In 1851, the line from Janesville north not being pushed as the people expected, the legislature of Illinois chartered the "Illinois & Wisconsin Railroad Company" with authority to consolidate with any road in Wisconsin. In 1855, an act of the Wisconsin legislature consolidated the Illinois and Wisconsin companies with the "Rock River Valley Union Railroad Company," and the new organization took the name of the "Chicago, St. Paul & Fond du Lac Rail-

road Company." In 1854, and previous to the consolidation, the company had failed and passed into the hands of the bondholders, who foreclosed and took stock for their bonds. The old management of A. Hyatt Smith and John B. Macy was superseded, and Wm. B. Ogden was made president. Chicago was all along deeply interested in reaching the rich grain fields of the Rock river valley, as well as the inexhaustible timber and mineral wealth of the northern part of Wisconsin and that part of Michigan bordering on Lake Superior, called the Peninsula. It also sought a connection with the upper Mississippi region, then being rapidly peopled, by a line of railroad to run through Madison to St. Paul, in Minnesota. Its favorite road was started from Chicago on the wide (six feet) gauge, and so constructed seventy miles to Sharon on the Wisconsin state line. This was changed to the usual (four feet, eight and one-half inches) width, and the work was vigorously pushed, reaching Janesville in 1855 and Fond du Lac in 1858. The Rock River Valley Union railroad company had, however, built about thirty miles from Fond du Lac south toward Minnesota Junction before the consolidation took place. The partially graded line on a direct route between Janesville and Madison was abandoned. In 1852 a new charter had been obtained, and the "Beloit & Madison Railroad Company" had been organized to build a road from Beloit *via* Janesville to Madison. A subsequent amendment to this charter had left out Janesville as a point, and the Beloit branch was pushed through to Madison, reaching that city in 1864.

The "Galena and Chicago Union Railroad Company" had built a branch of the Galena line from Belvedere to Beloit previous to 1854. In that year, it leased the Beloit & Madison road, and from 1856 operated it in connection with the Milwaukee & Mississippi, reaching Janesville by way of Hanover Junction, a station on its Southern Wisconsin branch, eight miles west of Janesville. The consolidation of the Galena & Chicago Union and the Chicago, St. Paul & Fond du Lac companies was effected and approved by legislative enactment in 1855, and a new organization called the "Chicago & Northwestern Railway Company" took their place.

The "Green Bay, Milwaukee & Chicago Railroad Company" was chartered in 1851 to build a road from Milwaukee to the state line of Illinois to connect with a road from Chicago, called the Chicago & Milwaukee railroad. Both roads were completed in 1855, and run in connection until 1863, when they were consolidated under the name of the "Chicago & Milwaukee Railroad Company." To prevent its falling into the hands of the Milwaukee & St. Paul, the Chicago & Northwestern secured it by perpetual lease, May 2, 1866, and it is now operated as its Chicago division.

The "Kenosha & Beloit Railroad Company" was incorporated in 1853 to build a road from Kenosha to Beloit, and was organized soon after its charter was obtained. Its name was afterward changed to the "Kenosha, Rockford & Rock Island Railroad Company," and its route changed to run to Rockford instead of Beloit. The line starts at Kenosha, and runs through the county of Kenosha and crosses the state line near the village of Genoa in the county of Walworth, a distance of thirty miles in the state of Wisconsin, and there connects with a road in Illinois running to Rockford, and with which it consolidated. Kenosha and its citizens were the principal subscribers to its capital stock. The company issued its bonds, secured by the usual mortgage on its franchises and property. Failing to pay its interest, the mortgage was foreclosed, and the road was sold to the Chicago & Northwestern company in 1863, and is now operated by it as the Kenosha division. The line was constructed from Kenosha to Genoa in 1862.

The "Northwestern Union Railway Company" was organized in 1872, under the general railroad law of the state, to build a line of road from Milwaukee to Fond du Lac, with a branch to Lodi. The road was constructed during the years 1872 and 1873 from Milwaukee to Fond du Lac. The Chicago & Northwestern company were principally interested in its being built, to

shorten its line between Chicago and Green Bay, and now uses it as its main through line between the two points.

The "Baraboo Air-Line Railroad Company" was incorporated in 1870, to build a road from Madison, Columbus, or Waterloo *via* Baraboo, to La Crosse, or any point on the Mississippi river. It organized in the interest of the Chicago & Northwestern, with which company it consolidated, and the work of building a connecting line between Madison and Winona Junction was vigorously pushed forward. Lodi was reached in 1870, Baraboo in 1871, and Winona Junction in 1874. The ridges between Elroy and Sparta were tunneled at great expense and with much difficulty. In 1874 the company reported an expenditure for its three tunnels of \$476,743.32, and for the 129 1-10 miles between Madison and Winona Junction of \$5,342,169.96, and a large expenditure yet required to be made on it. In 1867 the Chicago & Northwestern company bought of D. N. Barney & Co. their interest in the Winona & St. Peters railway, a line being built westerly from Winona in Minnesota, and of which one hundred and five miles had been built. It also bought of the same parties their interest in the La Crosse, Trempealeau & Prescott railway, a line being built from Winona Junction, three miles east of La Crosse, to Winona, Minn. The latter line was put in operation in 1870, and is twenty-nine miles long. With the completion of its Madison branch to Winona junction, in 1873, it had in operation a line from Chicago, *via* Madison and Winona, to Lake Kampeska, Minn., a distance of six hundred and twenty-three miles.

In the year 1856 a valuable grant of land was made by congress to the state of Wisconsin to aid in the construction of railroads. The Chicago, St. Paul & Fond du Lac company claimed that the grant was obtained through its efforts, and that of right it should have the northeastern grant, so-called. At the adjourned session of the legislature of 1856, a contest over the disposition of the grant resulted in conferring it upon the "Wisconsin & Superior Railroad Company," a corporation chartered for the express purpose of giving it this grant. It was generally believed at the time that the new company was organized in the interest of the Chicago, St. Paul & Fond du Lac company, and at the subsequent session, in the following year, it was authorized to consolidate with the new company, which it did in the spring of that year, and thus obtained the grant of 3,840 acres per mile along its entire line, from Fond du Lac northerly to the state line between Wisconsin and Michigan. It extended its road to Oshkosh in 1859, to Appleton in 1861, and in 1862 to Fort Howard, forming a line two hundred and forty-two miles long. The line from Fort Howard to Escanaba, one hundred and fourteen miles long, was opened in December, 1872, and made a connection with the peninsular railroad of Michigan. It now became a part of the Chicago & Northwestern, extending from Escanaba to the iron mines, and thence to Lake Superior at Marquette. Albert Keep, of Chicago, is president, and Marvin Hughitt, a gentleman of great railroad experience, is general superintendent. The company operates five hundred and sixty-seven miles of road in Wisconsin, and in all sixteen hundred and sixteen miles. Its lines extend into five different states. Over these lines its equipment is run in common, or transferred from place to place, as the changes in business may temporarily require.

WISCONSIN CENTRAL RAILROAD.

The "Milwaukee & Northern Railway Company" was incorporated in 1870, to build a road from Milwaukee to some point on the Fox river below Winnebago lake, and thence to Lake Superior, with branches. It completed its road to Menasha, one hundred and two miles from Milwaukee, with a branch from Hilbert to Green Bay, twenty-seven miles, in 1873, and in that year leased its line to the "Wisconsin Central Railroad Company," which is still operating it. In

Amos Putnam

BIG BEND.

1864 congress made a grant of land to the state of Wisconsin to aid in the construction of a railroad from Berlin, Doty's Island, Fond du Lac, or Portage, by way of Stevens Point, to Bayfield or Superior, granting the odd sections within ten miles on each side of the line, with an indemnity limit of twenty miles on each side. The legislature of 1865 failed to dispose of this grant, but that of 1866 provided for the organization of two companies, one to build from Portage City by way of Berlin to Stevens Point, and the other from Menasha to the same point, and then jointly to Bayfield and Lake Superior. The former was called the "Winnebago and Lake Superior Railroad Company," and the latter the "Portage & Superior Railroad Company." In 1869 an act was passed consolidating the two companies, which was done under the name of the "Portage, Winnebago & Superior Railroad Company." In 1871 the name of the company was changed to the "Wisconsin Central Railroad Company." The Winnebago & Lake Superior company was organized under Hon. George Reed as president, and at once commenced the construction of its line of road between Menasha and Stevens Point. In 1871 the Wisconsin Central consolidated with the "Manitowoc & Mississippi Railroad Company." The articles of consolidation provided that Gardner Colby, a director of the latter company, should be president, and that George Reed, a director of the former, should be vice president of the new organization; with a further provision that Gardner Colby, George Reed, and Elijah B. Phillips should be and remain its executive committee.

In 1871, an act was passed incorporating the "Phillips and Colby Construction Company," which created E. B. Phillips, C. L. Colby, Henry Pratt, and such others as they might associate with them, a body corporate, with authority to build railroads and do all manner of things relating to railroad construction and operation. Under this act the construction company contracted with the Wisconsin Central railroad company, to build its line of road from Menasha to Lake Superior. In November, 1873, the Wisconsin Central leased of the Milwaukee & Northern company its line of road extending from Schwartzburg to Menasha, and the branch to Green Bay, for the term of nine hundred and ninety-nine years, and also acquired the rights of the latter company to use the track of the Chicago, Milwaukee & St. Paul company between Schwartzburg and Milwaukee, and to depot facilities in Milwaukee. The construction of the land grant portion of this important line of road was commenced in 1871, and it was completed to Stevens Point in November of that year. It was built from Stevens Point north one hundred miles to Worcester in 1872. During 1872 and 1873, it was built from Ashland south to the Penoka iron ridge, a distance of thirty miles. The straight line between Portage City and Stevens Point, authorized by an act of the legislature of 1875, was constructed between October 1, 1875, and October, 1876, seventy-one miles in length. The gap of forty-two miles between Worcester and Penoka iron ridge was closed in June, 1877. E. B. Phillips, of Milwaukee, is president and general manager. This line of road passes through a section of our state hitherto unsettled. It has been pushed through with energy, and opened up for settlement an immense region of heavily timbered land, and thus contributed to the growth and prosperity of the state.

THE WESTERN UNION RAILROAD.

The "Racine, Janesville & Mississippi Railroad Company" was chartered in 1852, to build a road from Racine to Beloit, and was organized the same year. The city of Racine issued its bonds for \$300,000 in payment for that amount of stock. The towns of Racine, Elkhorn, Delavan and Beloit gave \$190,000, and issued their bonds, and farmers along the line made liberal subscriptions and secured the same by mortgages on their farms. The road was built to Burlington in 1855, to Delavan early in 1856, and to Beloit, sixty-eight miles from Racine, during the same year. Failing to meet the interest on its bonds and its floating indebtedness, it was sur-

rendered by the company to the bond-holders in 1859, who completed it to Freeport during that year, and afterward built to the Mississippi river at Savannah, and thence to Rock Island. The bond-holders purchased and sold the road in 1866, and a new organization was had as the "Western Union Railroad Company," and it has since been operated under that name. In 1869, it built a line from Elkhorn to Eagle, seventeen miles, and thus made a connection with Milwaukee over the Chicago, Milwaukee & St. Paul line. The latter company owns a controlling interest in its line. Alexander Mitchell is the president of the company, and D. A. Olin, general superintendent.

WEST WISCONSIN RAILROAD.

The lands granted by congress in 1856 to aid in the construction of a railroad in Wisconsin, from Tomah to Superior and Bayfield, were disposed of as mentioned under the history of the Chicago, Milwaukee & St. Paul company. The La Crosse company, as we have seen, prevailed in the legislature of 1856, and secured legislation favorable to its interests; but it failed to build the line of road provided for, and forfeited its right to lands granted. In 1863, the "Tomah & Lake St. Croix Railroad Company" was incorporated, with authority to construct a railroad from some point in the town of Tomah in Monroe county, to such point on Lake St. Croix, between townships 25 and 31 as the directors might determine. To the company, by the act creating it, was granted all the interest and estate of this state, to so much of the lands granted by the United States to the state of Wisconsin, known as the St. Croix grant, as lay between Tomah and Lake St. Croix. A few months after its organization, the company passed substantially into the hands of D. A. Baldwin and Jacob Humbird, who afterward built a line of road from Tomah, *via* Black River Falls, and Eau Claire to Hudson, on Lake St. Croix, one hundred and seventy-eight miles. Its name was afterward changed to the "West Wisconsin Railroad Company." In 1873, it built its road from Warren's Mills *via* Camp Douglass, on the St. Paul road to Elroy, and took up its track from the first-named place, twelve miles, to Tomah. A law-suit resulted, which went against the railroad company, and the matter was finally compromised by the payment of a sum of money by the company to the town of Tomah. The road was built through a new and sparsely settled country, and its earnings have not been sufficient to enrich its stock-holders. It connects at Camp Douglass with the Chicago, Milwaukee & St. Paul road, and at Elroy with the Chicago & Northwestern railway company's line, which gives the latter a through line to St. Paul. It is operated in connection with the Chicago & Northwestern railway, and managed in its interest. It is now in the hands of Wm. H. Ferry, of Chicago, as receiver; H. H. Potter, of Chicago, as president; and E. W. Winter, of Hudson, superintendent.

THE MILWAUKEE, LAKE SHORE & WESTERN RAILWAY.

In 1870, the "Milwaukee, Manitowoc & Green Bay Railroad Company" was chartered to build a road from Milwaukee to Green Bay by way of Manitowoc. It built its line from Milwaukee to Manitowoc in 1873, when its name was changed to "Milwaukee, Lake Shore & Western Railroad Company." Under a decree of foreclosure, it was sold Dec. 10, 1875, and its name was changed to "Milwaukee, Lake Shore & Western Railway Company," by which name it is still known.

In 1866, the "Appleton & New London Railroad Company" was incorporated to build a road from Appleton to New London, and thence to Lake Superior. A subsequent amendment to its charter authorized it to extend its road to Manitowoc. It built most of the line from Appleton to that city, and then, under legislative authority, sold this extension to the Milwau-

kee, Lake Shore & Western railroad company. The last-named company extended it to New London, on the Wolf river, twenty-one miles, in 1876, where it connects with the Green Bay & Minnesota road. It now operates one hundred and forty-six miles of road, extending from Milwaukee to New London, passing through Sheboygan, Manitowoc and Appleton, which includes a branch line six miles in length from Manitowoc to Two Rivers. F. W. Rhineland, of New York, is its president, and H. G. H. Reed, of Milwaukee, superintendent.

THE GREEN BAY & MINNESOTA RAILROAD.

The line of road operated by this company extends from Fort Howard to the Mississippi river, opposite Winona, Minnesota. It is two hundred and sixteen miles in length, and was built through a sparsely settled and heavily timbered section of the state. It began under most discouraging circumstances, yet was pushed through by the energy of a few men at Green Bay and along its line. It was originally chartered in 1866 as the "Green Bay & Lake Pepin Railroad Company" to build a road from the mouth of the Fox river near Green Bay to the Mississippi river opposite Winona. But little was done except the making of preliminary surveys in 1870. During 1870 and 1871, forty miles were constructed and put in operation. In 1872, one hundred and fourteen miles were graded, the track laid, and the river reached, sixty-two miles farther, in 1873. In 1876, it acquired the right to use the "Winona cut-off" between Winona and Onalaska, and built a line from the latter point to La Crosse, seven miles, thus connecting its road with the chief city of Wisconsin on the Mississippi river. The city of La Crosse aided this extension by subscribing \$75,000 and giving its corporation bonds for that amount. Henry Ketchum, of New London, is president of the company, and D. M. Kelly, of Green Bay, general manager.

WISCONSIN VALLEY ROAD.

The "Wisconsin Valley Railroad Company" was incorporated in 1871 to build a road from a point on or near the line of the Milwaukee & La Crosse railroad, between Kilbourn City and the tunnel in said road to the village of Wausau, in the county of Marathon, and the road to pass not more than one mile west of the village of Grand Rapids, in the county of Wood. The road was commenced at Tomah, and graded to Centralia in 1872, and opened to that village in 1873, and during 1874 it was completed to Wausau, ninety miles in its whole length. Boston capitalists furnished the money, and it is controlled in the interest of the Dubuque & Minnesota railroad, through which the equipment was procured. The lumber regions of the Wisconsin river find an outlet over it, and its junction with the Chicago, Milwaukee & St. Paul road at Tomah enables a connection with the railroads of Iowa and Minnesota. It gives the people of Marathon county an outlet long needed for a large lumber traffic, and also enables them to receive their goods and supplies of various kinds for the lumbering region tributary to Wausau. James F. Joy, of Detroit, is president, and F. O. Wyatt, superintendent.

SHEBOYGAN & FOND DU LAC RAILROAD.

The "Sheboygan & Mississippi Railroad Company" was incorporated in 1852, to build a road from Sheboygan to the Mississippi river. It was completed from Sheboygan to Plymouth in 1858, to Glenbeulah in 1860, to Fond du Lac in 1868, and to Princeton in 1872. The extension from Fond du Lac to Princeton was built under authority of an act passed in 1871.

Under a foreclosure in 1861 the line from Sheboygan to Fond du Lac was sold, and the name of the company changed to "Sheboygan & Fond du Lac Railroad Company." The length of

the line is seventy-eight miles, and it passes through a fertile agricultural country. The city of Sheboygan, county, city and town of Fond du Lac, and the towns of Riverdale, Ripon, Brooklyn, Princeton, and St. Marie, aided in its building to an amount exceeding \$250,000. D. L. Wells is president, and Geo. P. Lee, superintendent.

THE MINERAL POINT RAILROAD.

The "Mineral Point Railroad Company" was chartered in 1852, to build a road from Mineral Point, in the county of Iowa, to the state line, in township number one, in either the county of Green or La Fayette. It was completed to Warren, in the state of Illinois, thirty-two miles, in 1855, making a connection at that point with the Illinois Central, running from Chicago to Galena. Iowa county loaned its credit and issued its bonds to aid in its construction. It was sold under foreclosure in 1856. Suits were brought against Iowa county to collect the amount of its bonds, and judgment obtained in the federal courts. Much litigation has been had, and ill feeling engendered, the supervisors of the county having been arrested for contempt of the decree of the court. Geo. W. Cobb, of Mineral Point, is the general manager.

The Dubuque, Platteville & Milwaukee railroad was completed in July, 1870, and extends from Calamine, a point on the Mineral Point railroad, to the village of Platteville, eighteen miles, and is operated by the Mineral Point railroad company.

MADISON & PORTAGE RAILROAD.

The legislature of 1855 chartered the "Sugar River Valley Railroad Company" to build a road from a point on the north side of the line of the Southern Wisconsin road, within the limits of Green county, to Dayton, on the Sugar river. In 1857 it was authorized to build south to the state line, and make its northern terminus at Madison. In 1861 it was authorized to build from Madison to Portage City, and from Columbus to Portage City, and so much of the land grant act of 1856, as related to the building of the road from Madison, and from Columbus to Portage City, was annulled and repealed, and the rights and privileges that were conferred upon the LaCrosse company were given to the Sugar River Valley railroad company, and the portion of the land grant, applicable to the lines mentioned, was conferred upon the last named company. Under this legislation about twenty miles of the line between Madison and Portage were graded, and the right of way secured for about thirty of the thirty-nine miles. The LaCrosse company had done considerable grading before its right was annulled. In 1866 the company was relieved from constructing the road from Columbus to Portage City. In 1870 the purchasers of that part of the Sugar River Valley railroad lying between Madison and Portage City were incorporated as the "Madison & Portage Railroad Company," and to share all the rights, grants, etc., that were conferred upon the Sugar River railroad company by its charter, and amendments thereto, so far as related to that portion of the line.

Previous to this time, in 1864 and 1865, judgments had been obtained against the Sugar River Valley company; and its right of way, grading and depot grounds sold for a small sum. James Campbell, who had been a contractor with the Sugar River Valley company, with others, became the purchasers, and organized under the act of 1870, and, during the year 1871, completed it between Madison and Portage City, and in March, 1871, leased it to the Milwaukee & St. Paul company, and it is still operated by that corporation. In 1871 the Madison & Portage company was authorized to extend its road south to the Illinois state line, and north from Portage City to Lake Winnebago. The same year it was consolidated with the "Rockford Central

Railroad Company," of Illinois, and its name changed to the "Chicago & Superior Railroad Company," but still retains its own organization. The Madison & Portage railroad company claims a share in the lands granted by acts of congress in 1856, and have commenced proceedings to assert its claim, which case is still pending in the federal courts.

NORTH WISCONSIN RAILROAD.

The "North Wisconsin Railroad Company" was incorporated in 1869, to build a road from Lake St. Croix, or river, to Bayfield on Lake Superior. The grant of land by congress in 1856, to aid in building a road from Lake St. Croix to Bayfield on Lake Superior, under the decision of the federal court, was yet at the disposal of the state. This company, in 1871, built a short section of its line of road, with the expectation of receiving the grant. In 1873, the grant was conferred upon the Milwaukee & St. Paul company, but under the terms and restrictions contained in the act, it declined to accept it. The legislature of 1874 gave it to the North Wisconsin company, and it has built forty miles of its road, and received the lands pertaining thereto. Since 1876, it has not completed any part of its line, but is trying to construct twenty miles during the present year. The company is authorized to construct a road both to Superior and to Bayfield, but the act granting the lands confers that portion from Superior to the intersection of the line to Bayfield upon the Chicago & North Pacific air-line railroad. This last-named company have projected a line from Chicago to the west end of Lake Superior, and are the owners of an old grade made through Walworth and Jefferson counties, by a company chartered in 1853 as the "Wisconsin Central," to build a road from Portage City to Geneva, in the county of Walworth. The latter company had also graded its line between Geneva and the state line of Illinois. This grade was afterward appropriated by the Chicago & Northwestern, and over it they now operate their line from Chicago to Geneva.

PRAIRIE DU CHIEN & MCGREGOR RAILROAD.

This is a line two miles in length, connecting Prairie du Chien in Wisconsin, with McGregor in Iowa. It is owned and operated by John Lawler, of the latter-named place. It extends across both channels of the Mississippi river, and an intervening island. The railroad bridge consists of substantial piling, except a pontoon draw across each navigable channel. Each pontoon is four hundred feet long and thirty feet wide, provided with suitable machinery and operated by steam power. Mr. Lawler has secured a patent on his invention of the pontoon draw for railroad bridges. His line was put in operation in April, 1874.

THE CHIPPEWA FALLS & WESTERN RAILROAD.

This road was built in 1874, by a company organized under the general law of the state. It is eleven miles in length, and connects the "Falls" with the West Wisconsin line at Eau Claire. It was constructed by the energetic business men and capitalists of Chippewa Falls, to afford an outlet for the great lumber and other interests of that thriving and prosperous city. The road is substantially built, and the track laid with steel rails.

NARROW GAUGE RAILROADS.

The "Galena & Southern Wisconsin Railroad Company" was incorporated in 1857. Under its charter, a number of capitalists of the city of Galena, in the state of Illinois, commenced

the construction of a narrow (three feet) gauge road, running from that city to Platteville, thirty-one miles in length, twenty miles in Wisconsin. It runs through a part of La Fayette county to Platteville, in Grant county, and was completed to the latter point in 1875. Surveys are being made for an extension to Wingville, in Grant county.

The "Fond du Lac, Amboy & Peoria Railway Company" was organized under the general law of the state, in 1874, to build a narrow gauge road from the city of Fond du Lac to the south line of the state in the county of Walworth or Rock, and it declared its intention to consolidate with a company in Illinois that had projected a line of railroad from Peoria, in Illinois, to the south line of the state of Wisconsin. The road is constructed and in operation from Fond du Lac to Iron Ridge, a point on the Chicago, Milwaukee & St. Paul railway, twenty-nine miles from Fond du Lac.

The "Pine River & Steven's Point Railroad Company" was organized by the enterprising citizens of Richland Center, and has built a narrow gauge road from Lone Rock, a point on the Chicago, Milwaukee & St. Paul road, in Richland county, to Richland Center, sixteen miles in length. Its track is laid with wooden rails, and it is operated successfully.

The "Chicago & Tomah Railroad Company" organized under the general railroad law of the state, in 1872, to construct a narrow gauge road from Chicago, in Illinois, to the city of Tomah, in Wisconsin. Its president and active manager is D. R. Williams, of Clermont, Iowa, and its secretary is L. M. Culver, of Wauzeka. It has graded about forty-five miles, extending from Wauzeka up the valley of the Kickapoo river, in Crawford county, Wisconsin. It expects to have fifty-four miles in operation, to Bloomingdale, in Vernon county, the present year (1877). The rolling stock is guaranteed, and the president is negotiating for the purchase of the iron. South of Wauzeka the line is located to Belmont, in Iowa county. At Wauzeka it will connect with the Chicago, Milwaukee & St. Paul line.

The public-spirited citizens of Necedah, in Juneau county, have organized under the general law of the state, and graded a road-bed from their village to New Lisbon, on the Chicago, Milwaukee & St. Paul company's line. The latter company furnish and lay the iron, and will operate the road. It is thirteen miles in length.

CONCLUSION.

The railroads of Wisconsin have grown up under the requirements of the several localities that have planned and commenced their construction, and without regard to any general system. Frequently the work of construction was begun before adequate means were provided, and bankruptcy overtook the roads in their early stages. The consolidation of the various companies, as in the cases of the Chicago, Milwaukee & St. Paul, the Chicago & Northwestern, and others, has been effected to give through lines and the public greater facilities, as well as to introduce economy in management. At times the people have become apprehensive, and by legislative action prohibited railroads from consolidating, and have sought to control and break down the power of these corporations and to harmonize the interests of the companies and the public. The act of 1874, called the "Potter law," was the assertion, by the legislative power of the state, of its right to control corporations created by itself, and limit the rates at which freight and passengers should be carried. After a long and expensive contest, carried through the state and federal courts, this right has been established, being finally settled by the decision of the supreme court of the United States.

Quite all the railroads of Wisconsin have been built with foreign capital. The plan pursued after an organization was effected, was to obtain stock subscriptions from those immediately

interested in the enterprise, procure the aid of counties and municipalities, and then allure the farmers, with the prospect of joint ownership in railroads, to subscribe for stock and mortgage their farms to secure the payment of their subscriptions. Then the whole line was bonded and a mortgage executed. The bonds and mortgages thus obtained, were taken to the money centers of New York, London, Amsterdam and other places, and sold, or hypothecated to obtain the money with which to prosecute the work. The bonds and mortgages were made to draw a high rate of interest, and the earnings of these new roads, through unsettled localities, were insufficient to pay more than running and incidental expenses, and frequently fell short of that. Default occurring in the payment of interest, the mortgages were foreclosed and the property passed into the hands and under the control of foreign capitalists. Such has been the history of most of the railroads of our state. The total number of farm mortgages given has been 3,785, amounting to \$4,079,433; town, county and municipal bonds, amounting to \$6,910,652. The total cost of all the railroads in the state, as given by the railroad commissioner in his report for 1876, has been \$98,343,453.67. This vast sum is, no doubt, greatly in excess of what the cost should have been, but the roads have proved of immense benefit in the development of the material resources of the state.

Other lines are needed through sections not yet traversed by the iron steed, and present lines should be extended by branch roads. The questions upon which great issues were raised between the railway corporations and the people, are now happily settled by securing to the latter their rights; and the former, under the wise and conciliatory policy pursued by their managers, are assured of the safety of their investments. An era of good feeling has succeeded one of distrust and antagonism. The people must use the railroads, and the railroads depend upon the people for sustenance and protection. This mutuality of interest, when fully recognized on both sides, will result in giving to capital a fair return and to labor its just reward.

LUMBER MANUFACTURE.

By W. B. JUDSON.

Foremost among the industries of Wisconsin is that of manufacturing lumber. Very much of the importance to which the state has attained is due to the development of its forest wealth. In America, agriculture always has been, and always will be, the primary and most important interest; but no nation can subsist upon agriculture alone. While the broad prairies of Illinois and Iowa are rich with a fertile and productive soil, the hills and valleys of northern Wisconsin are clothed with a wealth of timber that has given birth to a great manufacturing interest, which employs millions of capital and thousands of men, and has peopled the northern wilds with energetic, prosperous communities, built up enterprising cities, and crossed the state with a network of railways which furnish outlets for its productions and inlets for the new populations which are ever seeking for homes and employment nearer to the setting sun.

If a line be drawn upon the state map, from Green Bay westward through Stevens Point, to where it would naturally strike the Mississippi river, it will be below the southern boundary of the pine timber regions, with the single exception of the district drained by the Yellow river, a tributary of the Wisconsin, drawing its timber chiefly from Wood and Juneau counties. The territory north of this imaginary line covers an area a little greater than one half of the state. The pine timbered land is found in belts or ridges, interspersed with prairie openings, patches of hardwood and hemlock, and drained by numerous water-courses. No less than seven large

rivers traverse this northern section, and, with their numerous tributaries, penetrate every county, affording facilities for floating the logs to the mills, and, in many instances, the power to cut them into lumber. This does not include the St. Croix, which forms the greater portion of the boundary line between Wisconsin and Minnesota, and, by means of its tributaries, draws the most and best of its pine from the former state. These streams divide the territory, as far as lumbering is concerned, into six separate and distinct districts: The Green bay shore, which includes the Wisconsin side of the Menomonee, the Peshtigo and Oconto rivers, with a number of creeks which flow into the bay between the mouths of the Oconto and Fox rivers; the Wolf river district; the Wisconsin river, including the Yellow, as before mentioned; the Black river; the Chippewa and Red Cedar; and the Wisconsin side of the St. Croix.

Beginning with the oldest of these, the Green bay shore, a brief description of each will be attempted. The first saw-mill built in the state, of which there is now any knowledge, was put in operation in 1809, in Brown county, two or three miles east from Depere, on a little stream which was known as East river. It was built by Jacob Franks, but probably was a very small affair. Of its machinery or capacity for sawing, no history has been recorded, and it is not within the memory of any inhabitant of to-day. In 1829, John P. Arndt, of Green Bay, built a water-power mill on the Pensaukee river at a point where the town of Big Suamico now stands. In 1834, a mill was built on the Wisconsin side of the Menomonee, and, two years later, one at Peshtigo. Lumber was first shipped to market from this district in 1834, which must be termed the beginning of lumbering operations on the bay shore. The lands drained by the streams which flow into Green bay are located in Shawano and Oconto counties, the latter being the largest in the state. In 1847, Willard Lamb, of Green Bay, made the first sawed pine shingles in that district; they were sold to the Galena railroad company for use on depot buildings, and were the first of the kind sold in Chicago. Subsequently Green Bay became one of the greatest points for the manufacture of such shingles in the world. The shores of the bay are low, and gradually change from marsh to swamp, then to level dry land, and finally become broken and mountainous to the northward. The pine is in dense groves that crowd closely upon the swamps skirting the bay, and reach far back among the hills of the interior. The Peshtigo flows into the bay about ten miles south of the Menomonee, and takes its rise far back in Oconto county, near to the latter's southern tributaries. It is counted a good logging stream, its annual product being from 40,000,000 to 60,000,000 feet. The timber is of a rather coarse quality, running but a small percentage to what the lumbermen term "uppers." About ten per cent. is what is known as Norway pine. Of the whole amount of timber tributary to the Peshtigo, probably about one third has been cut off to this date. The remainder will not average of as good quality, and only a limited portion of the land is of any value for agricultural purposes after being cleared of the pine. There are only two mills on this stream, both being owned by one company. The Oconto is one of the most important streams in the district. The first saw-mill was built on its banks about the year 1840, though the first lumbering operations of any account were begun in 1845 by David Jones. The business was conducted quite moderately until 1856, in which year several mills were built, and from that date Oconto has been known as quite an extensive lumber manufacturing point. The timber tributary to this stream has been of the best quality found in the state. Lumber cut from it has been known to yield the extraordinarily high average of fifty and sixty per cent. uppers. The timber now being cut will not average more than half that. The proportion of Norway is about five per cent. It is estimated that from three fourths to four fifths of the timber tributary to the Oconto has been cut away, but it will require a much longer time to convert the balance into lumber than was necessary to cut its equivalent in amount, owing to its remote location. The annual production

of pine lumber at Oconto is from 50,000,000 to 65,000,000 feet. The whole production of the district, exclusive of the timber which is put into the Menomonee from Wisconsin, is about 140,000,000 feet annually.

The Wolf river and its tributaries constitute the next district, proceeding westward. The first saw logs cut on this stream for commercial purposes were floated to the government mill at Neenah in 1835. In 1842, Samuel Farnsworth erected the first saw-mill on the upper Wolf near the location of the present village of Shawano, and in the following spring he sent the first raft of lumber down the Wolf to Oshkosh. This river also rises in Oconto county, but flows in a southerly direction, and enters Winnebago lake at Oshkosh. Its pineries have been very extensive, but the drain upon them within the past decade has told with greater effect than upon any other district in the state. The quality of the timber is very fine, and the land is considered good for agricultural purposes, and is being occupied upon the lines of the different railways which cross it. The upper waters of the Wolf are rapid, and have a comparatively steady flow, which renders it a very good stream for driving logs. Upon the upper river, the land is quite rolling, and about the head-waters is almost mountainous. The pine timber that remains in this district is high up on the main river and branches, and will last but a few years longer. A few years ago the annual product amounted to upward of 250,000,000 feet; in 1876 it was 138,000,000. The principal manufacturing points are Oshkosh and Fond du Lac; the former has 21 mills, and the latter 10.

Next comes the Wisconsin, the longest and most crooked river in the state. It rises in the extreme northern sections, and its general course is southerly until, at Portage City, it makes a grand sweep to the westward and unites with the Mississippi at Prairie du Chien. It has numerous tributaries, and, together with these, drains a larger area of country than any other river in the state. Its waters flow swiftly and over numerous rapids and embryo falls, which renders log-driving and raft-running very difficult and even hazardous. The timber is generally near the banks of the main stream and its tributaries, gradually diminishing in extent as it recedes from them and giving place to the several varieties of hard-woods. The extent to which operations have been carried on necessitates going further up the stream for available timber, although there is yet what may be termed an abundant supply. The first cutting of lumber on this stream, of which there is any record, was by government soldiers, in 1828, at the building of Fort Winnebago. In 1831, a mill was built at Whitney's rapids, below Point Bass, in what was then Indian territory. By 1840, mills were in operation as high up as Big Bull falls, and Wausau had a population of 350 souls. Up to 1876, the product of the upper Wisconsin was all sent in rafts to markets on the Mississippi. The river above Point Bass is a series of rapids and eddies; the current flows at the rate of from 10 to 20 miles an hour, and it can well be imagined that the task of piloting a raft from Wausau to the dells was no slight one. The cost of that kind of transportation in the early times was actually equal to the present market price of the lumber. With a good stage of water, the length of time required to run a raft to St. Louis was 24 days, though quite frequently, owing to inability to get out of the Wisconsin on one rise of water, several weeks were consumed. The amount of lumber manufactured annually on this river is from 140,000,000 to 200,000,000 feet.

Black river is much shorter and smaller than the Wisconsin, but has long been known as a very important lumbering stream. It is next to the oldest lumber district in the state. The first saw-mill west of Green Bay was built at Black River Falls in 1819 by Col. John Shaw. The Winnebago tribe of Indians, however, in whose territory he was, objected to the innovation of such a fine art, and unceremoniously offered up the mill upon the altar of their outraged

solitude. The owner abruptly quitted that portion of the country. In 1839 another attempt to establish a mill on Black river was more successfully made. One was erected at the same point by two brothers by the name of Wood, the millwright being Jacob Spaulding, who eventually became its possessor. His son, Mr. Dudley J. Spaulding, is now a very extensive operator upon Black river. La Crosse is the chief manufacturing point, there being ten saw-mills located there. The annual production of the stream ranges from 150,000,000 to 225,000,000 feet of logs, less than 100,000,000 feet being manufactured into lumber on its banks. The balance is sold in the log to mills on the Mississippi. It is a very capricious river to float logs in, which necessitates the carrying over from year to year of a very large amount, variously estimated at from 150,000,000 to 200,000,000 feet, about equal to an entire season's product. This makes the business more hazardous than on many other streams, as the loss from depreciation is very great after the first year. The quality of the timber is fine, and good prices are realized for it when sold within a year after being cut.

The Chippewa district probably contains the largest and finest body of white pine timber now standing, tributary to any one stream, on the continent. It has been claimed, though with more extravagance than truth, that the Chippewa pineries hold one-half the timber supply of the state. The river itself is a large one, and has many tributaries, which penetrate the rich pine district in all directions. The character of the tributary country is not unlike that through which the Wisconsin flows. In 1828 the first mill was built in the Chippewa valley, on Wilson's creek, near its confluence with the Red Cedar. Its site is now occupied by the village of Menomonee. In 1837 another was built on what is the present site of the Union Lumbering Company's mill at Chippewa Falls. It was not until near 1865 that the Chippewa became very prominent as a lumber-making stream. Since that date it has been counted as one of the foremost in the northwest. Upon the river proper there are twenty-two saw-mills, none having a capacity of less than 3,500,000 feet per season, and a number being capable of sawing from 20,000,000 to 25,000,000. The annual production of sawed lumber is from 250,000,000 to 300,000,000 feet; the production of logs from 400,000,000 to 500,000,000 feet. In 1867 the mill-owners upon the Mississippi, between Winona and Keokuk, organized a corporation known as the Beef Slough Manufacturing, Log-Driving and Transportation Company. Its object was to facilitate the handling of logs cut upon the Chippewa and its tributaries, designed for the Mississippi mills. At the confluence of the two rivers various improvements were made, constituting the Beef Slough boom, which is capable of assorting 200,000,000 feet of logs per season. The Chippewa is the most difficult stream in the northwest upon which to operate. In the spring season it is turbulent and ungovernable, and in summer, almost destitute of water. About its head are numerous lakes which easily overflow under the influence of rain, and as their surplus water flows into the Chippewa, its rises are sudden and sometimes damaging in their extent. The river in many places flows between high bluffs, and, under the influence of a freshet, becomes a wild and unmanageable torrent. Logs have never been floated in rafts, as upon other streams, but are turned in loose, and are carried down with each successive rise, in a jumbled and confused mass, which entails much labor and loss in the work of assorting and delivering to the respective owners. Previous to the organization of the Eagle Rapids Flooding Dam and Boom Company, in 1872, the work of securing the stock after putting it into the river was more difficult than to cut and haul it. At the cities of Eau Claire and Chippewa Falls, where most of the mills are located, the current, under the influence of high water, is very rapid, and for years the problem was, how to stop and retain the logs, as they would go by in great masses and with almost resistless velocity. In 1847 is recorded one of the most sudden and disastrous floods in the history of log-running streams. In the month of June the Chippewa rose twelve feet in a single night,

and, in the disastrous torrent that was created, piers, booms, or "pockets" for holding logs at the mills, together with a fine new mill, were swept away, and the country below where Eau Claire now stands was covered with drift-wood, saw-logs, and other *debris*. Such occurrences led to the invention of the since famous sheer boom, which is a device placed in the river opposite the mill boom into which it is desired to turn the logs. The sheer boom is thrown diagonally across the river, automatically, the action of the current upon a number of ingeniously arranged "fins" holding it in position. By this means the logs are sheered into the receptacle until it is filled, when the sheer boom, by closing up the "fins" with a windlass, falls back and allows the logs to go on for the next mill to stop and capture its pocket full in like manner. By this method each mill could obtain a stock, but a great difficulty was experienced from the fact that the supply was composed of logs cut and owned by everybody operating on the river, and the process of balancing accounts according to the "marks," at the close of the season, has been one prolific of trouble and legal entanglements. The building of improvements at Eagle Rapids by the company above mentioned remedied the difficulty to some extent, but the process of logging will always be a difficult and hazardous enterprise until adequate means for holding and assorting the entire log product are provided. Upon the Yellow and Eau Claire rivers, two important branches of the Chippewa, such difficulties are avoided by suitable improvements. The entire lumber product of the Chippewa, with the exception of that consumed locally, is floated in rafts to markets upon the Mississippi, between its mouth and St. Louis. The quality of the timber is good, and commands the best market price in the sections where it seeks market.

West of the Chippewa district the streams and timber are tributary to the St. Croix, and in all statistical calculations the entire product of that river is credited to Minnesota, the same as that of the Menomonee is given to Michigan, when in fact about one half of each belongs to Wisconsin. The important branches of the St. Croix belonging in this state are the Apple Clam, Yellow, Namekogan, Totagatic and Eau Claire. The sections of country through which they flow contain large bodies of very fine pine timber. The St. Croix has long been noted for the excellence of its dimension timber. Of this stock a portion is cut into lumber at Stillwater, and marketed by rail, and the balance is sold in the log to mills on the Mississippi.

Such is a brief and somewhat crude description of the main lumbering districts of the state. Aside from these, quite extensive operations are conducted upon various railway lines which penetrate the forests which are remote from log-running streams. In almost every county in the state, mills of greater or less capacity may be found cutting up pine or hard-woods into lumber, shingles, or cooperage stock. Most important, in a lumbering point of view; of all the railroads, is the Wisconsin Central. It extends from Milwaukee to Ashland, on Lake Superior, a distance of 351 miles, with a line to Green Bay, 113 miles, and one from Stevens Point to Portage, 71 miles, making a total length of road, of 449 miles. It has only been completed to Ashland within the last two years. From Milwaukee to Stevens Point it passes around to the east and north of Lake Winnebago, through an excellent hard-wood section. There are many stave mills in operation upon and tributary to its line, together with wooden-ware establishments and various manufactories requiring either hard or soft timber as raw material. From Stevens Point northward, this road passes through and has tributary to it one of the finest bodies of timber in the state. It crosses the upper waters of Black river and the Flambeau, one of the main tributaries of the Chippewa. From 30,000,000 to 50,000,000 feet of lumber is annually manufactured on its line, above Stevens Point. The Wisconsin Valley railroad extends from Tomah to Wausau, and was built to afford an outlet, by rail, for the lumber produced at the latter point.

The extent of the timber supply in this state has been a matter of much speculation, and

is a subject upon which but little can be definitely said. Pine trees can not be counted or measured until reduced to saw-logs or lumber. It is certain that for twenty years the forests of Wisconsin have yielded large amounts of valuable timber, and no fears are entertained by holders of pine lands that the present generation of owners will witness an exhaustion of their supply. In some sections it is estimated that the destruction to the standing timber by fires, which periodically sweep over large sections, is greater than by the axes of the loggers. The necessity for a state system of forestry, for the protection of the forests from fires, has been urged by many, and with excellent reason; for no natural resource of the state is of more value and importance than its wealth of timber. According to an estimate recently made by a good authority, and which received the sanction of many interested parties, there was standing in the state in 1876, an amount of pine timber approximating 35,000,000,000 feet.

The annual production of lumber in the districts herein described, and from logs floated out of the state to mills on the Mississippi, is about 1,200,000,000 feet. The following table gives the mill capacity per season, and the lumber and shingles manufactured in 1876 :

DISTRICT.	SEASON CAPACITY.	LUMBER MANUFACTURED IN 1876.	SHINGLES MANUFACTURED IN 1876.
Green Bay Shore.....	206,000,000	138,250,000	85,400,000
Wolf River.....	258,500,000	138,645,077	123,192,000
Wisconsin Central Railroad.....	72,500,000	31,530,000	132,700,000
Green Bay & Minnesota Railroad.....	34,500,000	17,700,000	10,700,000
Wisconsin River.....	222,000,000	139,700,000	106,250,000
Black River.....	101,000,000	70,852,747	37,675,000
Chippewa River.....	311,000,000	255,866,999	79,250,000
Mississippi River—using Wisconsin logs..	509,000,000	380,067,000	206,977,000
Total.....	1,714,500,000	1,172,611,823	782,144,000

If to the above is added the production of mills outside of the main districts and lines of railway herein described, the amount of pine lumber annually produced from Wisconsin forests would reach 1,500,000,000 feet. Of the hard-wood production no authentic information is obtainable. To cut the logs and place them upon the banks of the streams, ready for floating to the mills, requires the labor of about 18,000 men. Allowing that, upon an average, each man has a family of two persons besides himself, dependent upon his labor for support, it would be apparent that the first step in the work of manufacturing lumber gives employment and support to 54,000 persons. To convert 1,000,000 feet of logs into lumber, requires the consumption of 1,200 bushels of oats, 9 barrels of pork and beef, 10 tons of hay, 40 barrels of flour, and the use of 2 pairs of horses. Thus the fitting out of the logging companies each fall makes a market for 1,800,000 bushels of oats, 13,500 barrels of pork and beef, 15,000 tons of hay, and 60,000 barrels of flour. Before the lumber is sent to market, fully \$6,000,000 is expended for the labor employed in producing it. This industry, aside from furnishing the farmer of the west with the cheapest and best of materials for constructing his buildings, also furnishes a very important market for the products of his farm.

The question of the exhaustion of the pine timber supply has met with much discussion during the past few years, and, so far as the forests of Wisconsin are concerned, deserves a brief notice. The great source of supply of white pine timber in the country is that portion of the northwest between the shores of Lake Huron and the banks of the Mississippi, comprising the

northern portions of the states of Michigan, Wisconsin and Minnesota. For a quarter of a century these fields have been worked by lumbermen, the amount of the yearly production having increased annually until it reached the enormous figure of 4,000,000,000 feet. With all of this tremendous drain upon the forests, there can be pointed out but one or two sections that are actually exhausted. There are, however, two or three where the end can be seen and the date almost foretold. The pineries of Wisconsin have been drawn upon for a less period and less amount than those of Michigan, and, it is generally conceded, will outlast them at the present proportionate rate of cutting. There are many owners of pine timber lands who laugh at the prospect of exhausting their timber, within their lifetime. As time brings them nearer to the end, the labor of procuring the logs, by reason of the distance of the timber from the water-courses, will increase, and the work will progress more slowly.

In the future of this industry there is much promise. Wisconsin is the natural source of supply for a very large territory. The populous prairies of Illinois and Iowa are near-by and unfailing markets. The broad plains of Kansas and the rich valleys of Nebraska, which are still in the cradle of development, will make great drafts upon her forests for the material to construct cities in which the first corner-stone is yet unlaid. Minnesota, notwithstanding the fact that large forests exist within her own confines, is even now no mean customer for Wisconsin lumber, and the ambitious territory of Dakota will soon clamor for material to build up a great and wealthy state. In the inevitable progress of development and growth which must characterize the great west, the demand for pine lumber for building material will be a prominent feature. With the growth of time, changes will occur in the methods of reducing the forests. With the increasing demand and enhancing values will come improvements in manipulating the raw material, and a stricter economy will be preserved in the handling of a commodity which the passage of time only makes more valuable. Wisconsin will become the home of manufactories, which will convert her trees into finished articles of daily consumption, giving employment to thousands of artisans where it now requires hundreds, and bringing back millions of revenue where is now realized thousands. Like all other commodities, lumber becomes more valuable as skilled labor is employed in its manipulation, and the greater the extent to which this is carried, the greater is the growth in prosperity, of the state and its people.

BANKING IN WISCONSIN.

By JOHN P. MCGREGOR.

Wisconsin was organized as a territory in 1836, and the same year several acts were passed by the territorial legislature, incorporating banks of issue. Of these, one at Green Bay and another at Mineral Point went into operation just in time to play their part in the great panic of 1837. The bank at Green Bay soon failed and left its bills unredeemed. The bank at Mineral Point is said to have struggled a little longer, but both these concerns were short lived, and their issues were but a drop in the great flood of worthless wild-cat bank notes that spread over the whole western country in that disastrous time. The sufferings of the people of Wisconsin, from this cause, left a vivid impression on their minds, which manifested its results in the legislation of the territory and in the constitution of the state adopted in 1848. So jealous were the legislatures of the territory, of banks and all their works, that, in every act of incorporation for any purpose, a clause was inserted to the effect that nothing in the act contained should be

taken to authorize the corporation to assume or exercise any banking powers; and this proviso was even added to acts incorporating church societies. For some years there can hardly be said to have been any banking business done in the territory; merchants and business men were left to their own devices to make their exchanges, and every man was his own banker.

In the year 1839 an act was passed incorporating the "Wisconsin Marine and Fire Insurance Company," of Milwaukee. This charter conferred on the corporation, in addition to the usual powers of a fire and marine insurance company, the privilege of *receiving deposits, issuing certificates of deposit* and lending money,—and wound up with the usual prohibition from doing a banking business. This company commenced business at once under the management of George Smith as president and Alexander Mitchell as secretary. The receiving deposits, issuing certificates of deposit and lending money, soon outgrew and overshadowed the insurance branch of the institution, which accordingly gradually dried up. In fact, the certificates of deposit had all the appearance of ordinary bank notes, and served the purposes of an excellent currency, being always promptly redeemed in coin on demand. Gradually these issues attained a great circulation all through the west, as the people gained more and more confidence in the honesty and ability of the managers; and though "runs" were several times made, yet being successfully met, the public finally settled down into the belief that these bills were good beyond question, so that the amount in circulation at one time, is said, on good authority, to have been over \$2,000,000.

As the general government required specie to be paid for all lands bought of it, the Wisconsin Marine and Fire Insurance company, by redemption of its "certificates of deposit," furnished a large part of the coin needed for use at the Milwaukee land office, and more or less for purchases at land offices in other parts of the state, and its issues were of course much in request for this purpose. For many years this institution furnished the main banking facilities for the business men of the territory and young state, in the way of discounts and exchanges. Its right to carry on the operations it was engaged in, under its somewhat dubious and inconsistent charter, was often questioned, and, in 1852, under the administration of Governor Farwell, some steps were taken to test the matter; but as the general banking law had then been passed by the legislature, and was about to be submitted to the people, and as it was understood that the company would organize as a bank under the law, if approved, the legal proceedings were not pressed. While this corporation played so important a part in the financial history and commercial development of Wisconsin, the writer is not aware of any available statistics as to the amount of business transacted by it before it became merged in the "Wisconsin Marine and Fire Insurance Company's Bank."

In 1847, the foundation of the present well-known firm of Marshall & Ilsley was laid by Samuel Marshall, who, in that year, opened a private banking office in Milwaukee, and was joined in 1849 by Charles F. Ilsley. This concern has always held a prominent position among the banking institutions of our state. About this time, at Mineral Point, Washburn & Woodman (C. C. Washburn and Cyrus Woodman) engaged in private banking, as a part of their business. After some years they were succeeded by Wm. T. Henry, who still continues the banking office. Among the early private bankers of the state were Mr. Kellogg, of Oshkosh; Ulmann and Bell, of Racine; and T. C. Shove, of Manitowoc. The latter still continues his business, while that of the other firms has been wound up or merged in organized banks.

In 1848, Wisconsin adopted a state constitution. This constitution prohibited the legislature from incorporating banks and from conferring banking powers on any corporation; but provided the question of "banks or no banks" might be submitted to a vote of the electors, and, if the decision should be in favor of banks, then the legislature might charter banks or might enact a

general banking law, but no such special charter or general banking law should have any force until submitted to the electors at a general election, and approved by a majority of votes cast on that subject. In 1851, the legislature submitted this question to the people, and a majority of the votes were cast in favor of "banks." Accordingly the legislature, in 1852, made a general banking law, which was submitted to the electors in November of that year, and was approved by them. This law was very similar to the free banking law of the state of New York, which had then been in force about fifteen years, and was generally approved in that state. Our law authorized any number of individuals to form a corporate association for banking purposes, and its main provisions were intended to provide security for the circulating notes, by deposit of state and United States stocks or bonds with the state treasurer, so that the bill holders should sustain no loss in case of the failure of the banks. Provision was made for a bank comptroller, whose main duty it was to see that countersigned circulating notes were issued to banks only in proper amounts for the securities deposited, and upon compliance with the law, and that the banks kept these securities good.

The first bank comptroller was James S. Baker, who was appointed by Governor Farwell.

The first banks organized under the new law were the "State Bank," established at Madison by Marshall & Ilsley, and the "Wisconsin Marine and Fire Insurance Company's Bank," established at Milwaukee under the old management of that company. These banks both went into operation early in January, 1853, and, later in that year, the "State Bank of Wisconsin" (now Milwaukee National Bank of Wisconsin), and the "Farmers' and Millers' Bank" (now First National Bank of Milwaukee), were established, followed in January, 1854, by the "Bank of Milwaukee" (now National Exchange Bank of Milwaukee). From this time forward banks were rapidly established at different points through the state, until in July, 1857, they numbered sixty — with aggregate capital, \$4,205,000; deposits, \$3,920,238; and circulation, \$2,231,829. In October, the great revulsion and panic of 1857 came on, and in its course and effects tried pretty severely the new banks in Wisconsin. Some of them succumbed to the pressure, but most of them stood the trial well.

The great source of loss and weakness at that time was found in the rapid decline of the market value of the securities deposited to protect circulation, which were mostly state bonds, and largely those of the southern states; so that this security, when it came to be tried, did not prove entirely sufficient. Another fault of the system, or of the practice under it, was developed at this time. It was found that many of the banks had been set up without actual working capital, merely for the purpose of issuing circulating notes, and were located at distant and inaccessible points in what was then the great northern wilderness of the state; so that it was expensive and in fact impracticable to present their issues for redemption. While these evils and their remedies were a good deal discussed among bankers, the losses and inconveniences to the people were not yet great enough to lead to the adoption of thorough and complete measures of reform. The effect of these difficulties, however, was to bring the bankers of the state into the habit of consulting and acting together in cases of emergency, the first bankers' convention having been held in 1857. This was followed by others from time to time, and it would be difficult to overvalue the great good that has resulted, at several important crises from the harmonious and conservative action of the bankers of our state. Partly, at least, upon their recommendations the legislature, in 1858, adopted amendments to the banking law, providing that no bank should be located in a township containing less than two hundred inhabitants; and that the comptroller should not issue circulating notes, except to banks doing a regular discount deposit and exchange business in some inhabited town, village, city, or where the ordinary business of inhabited towns, villages and cities was carried on. These amendments were approved by the people at the fall

election of that year.

Banking matters now ran along pretty smoothly until the election in 1860, of the republican presidential ticket, and the consequent agitation in the southern states threatening civil war, the effects of which were speedily felt; first, in the great depreciation of the bonds of the southern states, and then in a less decline in those of the northern states. At this time (taking the statement of July, 1860,) the number of banks was 104, with aggregate capital, \$6,547,000; circulation, \$4,075,918; deposits, \$3,230,252.

During the winter following, there was a great deal of uneasiness in regard to our state currency, and continuous demand upon our banks for the redemption of their circulating notes in coin. Many banks of the wild-cat sort failed to redeem their notes, which became depreciated and uncurrent; and, when the rebellion came to a head by the firing on Fort Sumter, the banking interests of the state were threatened with destruction by compulsory winding up and enforced sale at the panic prices then prevailing, of the securities deposited to secure circulation. Under these circumstances, on the 17th of April, 1861, the legislature passed "an act to protect the holders of the circulating notes of the authorized banks of the state of Wisconsin." As the banking law could not be amended except by approval of the electors, by vote at a general election, a practical suspension of specie payment had to be effected by indirect methods. So this act first directed the bank comptroller to suspend all action toward banks for failing to redeem their circulation. Secondly, it prohibited notaries public from protesting bills of banks until Dec 1, 1861. Thirdly, it gave banks until that date to answer complaints in any proceeding to compel specie payment of circulating notes. This same legislature also amended the banking law, to cure defects that had been developed in it. These amendments were intended to facilitate the presentation and protest of circulating notes, and the winding up of banks failing to redeem them, and provided that the bank comptroller should not issue circulating notes except to banks having actual cash capital; on which point he was to take evidence in all cases; that after Dec. 1, 1861, all banks of the state should redeem their issues either at Madison or Milwaukee, and no bonds or stocks should be received as security for circulation except those of the United States and of the state of Wisconsin.

Specie payment of bank bills was then practically suspended, in our state, from April 17 to December 1, 1861, and there was no longer any plain practical test for determining which were good, and which not. In this condition of things, bankers met in convention, and, after discussion and inquiry as to the condition and resources of the different banks, put forth a list of those whose issues were to be considered current and bankable. But things grew worse, and it was evident that the list contained banks that would never be able to redeem their circulation, and the issues of such were from time to time thrown out and discredited without any concert of action, so that the uneasiness of people in regard to the financial situation was greatly increased. The bankers finally met, gave the banks another sifting, and put forth a list of seventy banks, whose circulating notes they pledged themselves to receive, and pay out as current, until December 1. There had been so many changes that this pledge was thought necessary to allay the apprehensions of the public. But matters still grew worse instead of better. Some of the banks in the "current" list closed their doors to their depositors, and others were evidently unsound, and their circulation so insufficiently secured as to make it certain that it would never be redeemed. There was more or less sorting of the currency, both by banks and business men, all over the state, in the endeavor to keep the best and pay out the poorest. In this state of things, some of the Milwaukee banks, without concert of action, and acting under the apprehension of being loaded up with the very worst of the currency, which, it was feared, the country banks and merchants were sorting out and sending to Milwaukee, revised the list again, and

Leonard Martin

VERNON

threw out ten of the seventy banks whose issues it had been agreed should be received as current. Other banks and bankers were compelled to take the same course to protect themselves. The consequence was a great disturbance of the public mind, and violent charges of bad faith on the part of the banks, which culminated in the bank riots of June 24, 1861. On that day, a crowd of several hundred disorderly people, starting out most probably only with the idea of making some sort of demonstration of their dissatisfaction with the action of the banks and bankers and with the failure to keep faith with the public, marched through the streets with a band of music, and brought up at the corner of Michigan and East Water streets.

The banks had just sufficient notice of these proceedings to enable them to lock up their money and valuables in their vaults, before the storm broke upon them. The mob halted at the place above mentioned, and for a time contented themselves with hooting, and showed no disposition to proceed to violence; but, after a little while, a stone was thrown through the windows of the Wisconsin Marine and Fire Insurance Company's Bank, situated at one corner of the above streets, and volley of stones soon followed, not only against that bank, but also against the State Bank of Wisconsin, situated on the opposite corner. The windows of both these institutions and of the offices in the basements under them were effectually demolished. The mob then made a rush into these banks and offices, and completely gutted them, offering more or less violence to the inmates, though no person was seriously hurt. The broken furniture of the offices under the State Bank of Wisconsin was piled up, and the torch was applied by some of the rioters, while others were busy in endeavoring to break into the safes of the offices and the vaults of the banks. The *debris* of the furniture in the office of the Wisconsin Marine and Fire Insurance Company's Bank, was also set on fire, and it was plain that if the mob was not immediately checked, the city would be given up to conflagration and pillage—the worst elements, as is always the case with mobs, having assumed the leadership. Just at that juncture, the Milwaukee zouaves, a small military company, appeared on the scene, and with the help of the firemen who had been called out, the mob was put to flight, and the incipient fire was extinguished.

The damage so far done was not great in amount, and the danger for the moment was over; but the situation was still grave, as the city was full of threats, disturbance and apprehension. By the prompt action of the authorities, a number of companies of volunteers were brought from different places in the state, order was preserved, and, after muttering for three or four days, the storm died away. The effect of that disturbance and alarm was, however, to bring home to the bankers and business men the conviction that effectual measures must be taken to settle our state currency matters on a sound and permanent basis, and that the issues of all banks that could not be put in shape to meet specie payment in December, must be retired from circulation and be got out of the way. A meeting of the bankers was held; also of the merchants' association of Milwaukee, and arrangements were made to raise \$100,000, by these two bodies, to be used in assisting weak and crippled banks in securing or retiring their circulation. The bankers appointed a committee to take the matter in charge.

It happened that just at this time Governor Randall and State Treasurer Hastings returned from New York City, where they had been making unsuccessful efforts to dispose of \$800,000 of Wisconsin war bonds, which had been issued to raise funds to fit out Wisconsin volunteers.

Our state had never had any bonds on the eastern market. For other reasons, our credit was not high in New York, and it had been found impossible to dispose of these bonds for over sixty cents on the dollar. The state officers conferred with the bankers to see what could be done at home; and it was finally arranged that the bankers' committee should undertake to get the state banks to dispose of their southern and other depreciated state bonds on deposit to

secure circulation, for what they would bring in coin, in New York, and replace these bonds with those of our own state, which were to be taken by our banks nominally at par — seventy per cent. being paid in cash, and the different banks purchasing bonds, giving their individual obligation for the thirty per cent. balance, to be paid in semi-annual installments, with an agreement that the state should deduct these installments from the interest so long as these bonds should remain on deposit with the state. By the terms of the law, sixty per cent. of the proceeds of the bonds had to be paid in coin. The bankers' committee went to work, and with some labor and difficulty induced most of the banks to sell their southern securities at the existing low prices in New York, and thus produce the coin required to pay for our state bonds. From the funds provided by the merchants and bankers, they assisted many of the weaker banks to make good their securities with the banking department of the state. By the 19th of July, six of the ten rejected banks that had been the occasion of the riot, were made good, and restored to the list. The other four were wound up, and their issues redeemed at par, and, before the last of August, the value of the securities of all the banks on the current list were brought up to their circulation, as shown by the comptroller's report.

Wisconsin currency at the time of the bank riot was at a discount of about 15 per cent., as compared with gold or New York exchange. At the middle of July the discount was 10 to 12 per cent., and early in August it fell to 5 per cent. The bankers' committee continued their work in preparation for the resumption of specie payment on December 1. While the securities for the bank circulation had been made good, it was, nevertheless, evident that many of the banks on the current list would not be equal to the continued redemption of their bills in specie, and that they would have to be wound up and got out of the way in season. Authority was got from such institutions, as fast as possible, for the bankers' committee to retire their circulation and sell their securities. The Milwaukee banks and bankers took upon themselves the great burden of this business, having arranged among themselves to sort out and withhold from circulation the bills of these banks,—distributing the load among themselves in certain defined proportions. Instead of paying out these doubted bills, the different banks brought to the bankers' committee such amounts as they accumulated from time to time, and received from the committee certificates of deposit bearing seven per cent. interest, and these bills were locked up by the committee until the securities for these notes could be sold and the proceeds realized. Over \$400,000 of this sort of paper was locked up by the committee at one time; but it was all converted into cash, and, when the first of December came, the remaining banks of this state were ready to redeem their issues in gold or its equivalent, and so continued to redeem until the issue of the legal-tender notes and the general suspension of specie payment in the United States.

In July, 1861, the number of our banks was 107, with capital, \$4,607,000; circulation, \$2,317,907; deposits, \$3,265,069.

By the contraction incident to the preparations for redemption in specie, the amount of current Wisconsin bank notes outstanding December 1, 1861, was reduced to about \$1,500,000. When that day came, there was quite a disposition manifested to convert Wisconsin currency into coin, and a sharp financial pinch was felt for a few days; but as the public became satisfied that the banks were prepared to meet the demand, the call for redemption rapidly fell off, and the banks soon began to expand their circulation, which was now current and in good demand all through the northwestern states. The amount saved to all the interests of our state, by this successful effort to save our banking system from destruction, is beyond computation. From this time our banks ran along quietly until prohibitory taxation by act of congress drove the bills of state banks out of circulation.

The national banking law was passed in 1863, and a few banks were soon organized under it in different parts of the country. The first in Wisconsin was formed by the re-organization of the Farmers' and Millers' Bank, in August, 1863, as the First National Bank of Milwaukee, with Edward D. Holton as president, and H. H. Camp, cashier. The growth of the new system, however, was not very rapid; the state banks were slow to avail themselves of the privileges of the national banking act, and the central authorities concluded to compel them to come in; so facilities were offered for their re-organization as national banks, and then a tax of ten per cent. was laid upon the issues of the state banks. This tax was imposed by act of March, 1865, and at once caused a commotion in our state. In July, 1864, the number of Wisconsin state banks was sixty-six, with capital \$3,147,000, circulation \$2,461,728, deposits \$5,483,205, and these figures were probably not very different in the spring of 1865. The securities for the circulating notes were in great part the bonds of our own state, which, while known by our own people to be good beyond question, had never been on the general markets of the country so as to be currently known there; and it was feared that in the hurried retirement of our circulation these bonds would be sacrificed, the currency depreciated, and great loss brought upon our banks and people. There was some excitement, and a general call for the redemption of our state circulation, but the banks mostly met the run well, and our people were disposed to stand by our own state bonds.

In April, 1861, the legislature passed laws, calling in the mortgage loans of the school fund, and directing its investment in these securities. The state treasurer was required to receive Wisconsin bank notes, not only for taxes and debts due the state, but also on deposit, and to issue certificates for such deposits bearing seven per cent. interest. By these and like means the threatened panic was stopped; and in the course of a few months Wisconsin state currency was nearly all withdrawn from circulation. In July, 1865, the number of state banks was twenty-six, with capital \$1,087,000, circulation \$192,323, deposits \$2,284,210. Under the pressure put on by congress, the organization of national banks, and especially the re-organization of state banks, under the national system, was proceeding rapidly, and in a short time nearly every town in our own state of much size or importance was provided with one or more of these institutions.

In the great panic of 1873, all the Wisconsin banks, both state and national (in common with those of the whole country), were severely tried; but the failures were few and unimportant; and Wisconsin went through that ordeal with less loss and disturbance than almost any other state.

We have seen that the history of banking in Wisconsin covers a stormy period, in which great disturbances and panics have occurred at intervals of a few years. It is to be hoped that a more peaceful epoch will succeed, but permanent quiet and prosperity can not rationally be expected in the present unsettled condition of our currency, nor until we have gone through the temporary stringency incidental to the resumption of specie payment.

According to the last report of the comptroller of the currency, the number of national banks in Wisconsin in November, 1876, was forty, with capital \$3,400,000, deposits \$7,145,360, circulation \$2,072,869.

At this time (July, 1877) the number of state banks is twenty-six, with capital \$1,288,231, deposits \$6,662,973. Their circulation is, of course, merely nominal, though there is no legal obstacle to their issuing circulating notes, except the tax imposed by congress.

COMMERCE AND MANUFACTURES.

BY HON. H. H. GILES.

The material philosophy of a people has to do with the practical and useful. It sees in iron, coal, cotton, wool, grain and the trees of the forest, the elements of personal comfort and sources of material greatness, and is applied to their development, production and fabrication for purposes of exchange, interchange and sale. The early immigrants to Wisconsin territory found a land teeming with unsurpassed natural advantages; prairies, timber, water and minerals, inviting the farmer, miner and lumberman, to come and build houses, furnaces, mills and factories. The first settlers were a food-producing people. The prairies and openings were ready for the plow. The ease with which farms were brought under cultivation, readily enabled the pioneer to supply the food necessary for himself and family, while a surplus was often produced in a few months. The hardships so often encountered in the settlement of a new country, where forests must be felled and stumps removed to prepare the soil for tillage, were scarcely known, or greatly mitigated.

During the decade from 1835 to 1845, so great were the demands for the products of the soil, created by the tide of emigration, that the settlers found a home market for all their surplus products, and so easily were crops grown that, within a very brief time after the first emigration, but little was required from abroad. The commerce of the country was carried on by the exchange of products. The settlers (they could scarcely be called farmers) would exchange their wheat, corn, oats and pork for the goods, wares and fabrics of the village merchant. It was an age of barter; but they looked at the capabilities of the land they had come to possess, and, with firm faith, saw bright promises of better days in the building up of a great state.

It is not designed to trace with minuteness the history of Wisconsin through the growth of its commercial and manufacturing interests. To do it justice would require a volume. The aim of this article will be to present a concise view of its present status. Allusion will only be incidentally made to stages of growth and progress by which it has been reached.

Few states in the Union possess within their borders so many, and in such abundance, elements that contribute to the material prosperity of a people. Its soil of unsurpassed fertility; its inexhaustible mines of lead, copper, zinc and iron; its almost boundless forests; its water-powers, sufficient to drive the machinery of the world; its long lines of lake shore on two sides, and the "Father of waters" on another,—need but enterprise, energy and capital to utilize them in building an empire of wealth, where the hum of varied industries shall be heard in the music of the sickle, the loom and the anvil.

The growth of manufacturing industries was slow during the first twenty-five years of our history. The early settlers were poor. Frequently the land they tilled was pledged to obtain means to pay for it. Capitalists obtained from twenty to thirty per cent. per annum for the use of their money. Indeed, it was the rule, under the free-trade ideas of the money-lenders for them to play the Shylock. While investments in bonds and mortgages were so profitable, few were ready to improve the natural advantages the country presented for building factories and work-shops.

For many years, quite all the implements used in farming were brought from outside the state. While this is the case at present to some extent with the more cumbersome farm machinery, quite a proportion of that and most of the simpler and lighter implements are made at home, while much farm machinery is now manufactured for export to other states.

FURS.

The northwest was visited and explored by French *voyageurs* and missionaries from Canada at an early day. The object of the former was trading and gain. The Jesuits, ever zealous in the propagation of their religion, went forth into the unknown wilderness to convert the natives to their faith. As early as 1624, they were operating about Lake Huron and Mackinaw. Father Menard, it is related, was with the Indians on Lake Superior as early as 1661. The early explorers were of two classes, and were stimulated by two widely different motives—the *voyageurs*, by the love of gain, and the missionaries, by their zeal in the propagation of their faith. Previous to 1679, a considerable trade in furs had sprung up with Indian tribes in the vicinity of Mackinaw and the northern part of "Ouisconsin." In that year more than two hundred canoes, laden with furs, passed Mackinaw, bound for Montreal. The whole commerce of this vast region then traversed, was carried on with birch-bark canoes. The French used them in traversing wilds—otherwise inaccessible by reason of floods of water at one season, and ice and snow at another—also lakes and morasses which interrupted land journeys, and rapids and cataracts that cut off communication by water. This little vessel enabled them to overcome all difficulties. Being buoyant, it rode the waves, although heavily freighted, and, of light draft, it permitted the traversing of small streams. Its weight was so light that it could be easily carried from one stream to another, and around rapids and other obstructions. With this little vessel, the fur trade of the northwest was carried on, as well as the interior of a vast continent explored. Under the stimulus of commercial enterprise, the French traders penetrated the recesses of the immense forests whose streams were the home of the beaver, the otter and the mink, and in whose depths were found the martin, sable, ermine, and other fur-bearing animals. A vast trade in furs sprung up, and was carried on by different agents, under authority of the French government.

When the military possession of the northwestern domain passed from the government of France to that of Great Britain in 1760, the relationship of the fur trade to the government changed. The government of France had controlled the traffic, and made it a means of strengthening its hold upon the country it possessed. The policy of Great Britain was, to charter companies, and grant them exclusive privileges. The Hudson bay company had grown rich and powerful between 1670 and 1760. Its success had excited the cupidity of capitalists, and rival organizations were formed. The business of the company had been done at their trading-stations—the natives bringing in their furs for exchange and barter. Other companies sent their *voyageurs* into every nook and corner to traffic with the trappers, and even to catch the fur-bearing animals themselves. In the progress of time, private parties engaged in trapping and dealing in furs, and, under the competition created, the business became less profitable. In 1815, congress passed an act prohibiting foreigners from dealing in furs in the United States, or any of its territories. This action was obtained through the influence of John Jacob Astor. Mr. Astor organized the American fur company in 1809, and afterward, in connection with the Northwest company, bought out the Mackinaw company, and the two were merged in the Southwest company. The association was suspended by the war of 1812. The American re-entered the field in 1816. The fur trade is still an important branch of traffic in the northern part of the state, and, during eight months of the year, employs a large number of men.

LEAD AND ZINC.

In 1824, the lead ore in the southwestern part of Wisconsin began to attract attention. From 1826 to 1830, there was a great rush of miners to this region, somewhat like the Pike's Peak excitement at a later date. The lead-producing region of Wisconsin covers an area of about 2,200 square miles, and embraces parts of Grant, Iowa and La Fayette counties. Between 1829 and 1839, the production of lead increased from 5,000 to 10,000 tons. After the latter year it rose rapidly, and attained its maximum in 1845, when it reached nearly 25,000 tons. Since that time the production has decreased, although still carried on to a considerable extent.

The sulphate and carbonate of zinc abound in great quantities with the lead of southwest Wisconsin. Owing to the difficulty of working this class of ores, it was formerly allowed to accumulate about the mouths of the mines. Within a few years past, metallurgic processes have been so greatly improved, that the zinc ores have been largely utilized. At La Salle, in the state of Illinois, there are three establishments for smelting zinc ores. There is also one at Peru, Ill. To smelt zinc ores economically, they are taken where cheap fuel is available. Hence, the location of these works in the vicinity of coal mines. The works mentioned made in 1875, from ores mostly taken from Wisconsin, 7,510 tons of zinc. These metals are, therefore, important elements in the commerce of Wisconsin.

IRON.

The iron ores of Wisconsin occur in immense beds in several localities, and are destined to prove of great value. From their product in 1863, there were 3,735 tons of pig iron received at Milwaukee; in 1865, 4,785 tons; in 1868, 10,890 tons. Of the latter amount, 4,648 tons were from the iron mines at Mayville. There were shipped from Milwaukee, in 1868, 6,361 tons of pig iron. There were also received 2,500 tons of ore from the Dodge county ore beds. During 1869, the ore beds at Iron Ridge were developed to a considerable extent, and two large blast furnaces constructed in Milwaukee, at which place there were 4,695 tons of ore received, and 2,059 tons were shipped to Chicago and Wyandotte. In 1870, 112,060 tons of iron ore were received at Milwaukee, 95,000 tons of which were from Iron Ridge, and 17,060 tons from Escanaba and Marquette, in Michigan. The total product of the mines at Iron Ridge in 1871 was 82,284 tons. The Milwaukee iron company received by lake, in the same year, 28,094 tons of Marquette iron ore to mix with the former in making railroad iron. In 1872, there were received from Iron Ridge 85,245 tons of ore, and 5,620 tons of pig iron. Much of the metal made by the Wisconsin iron company in 1872 was shipped to St. Louis, to mix with the iron made from Missouri ore.

The following table shows the production of pig iron in Wisconsin, for 1872, 1873 and 1874, in tons:

FURNACES.	1872.	1873.	1874.
Milwaukee Iron Company, Milwaukee.....	21,818	29,326	33,000
Minerva Furnace Company, Milwaukee.....		5,822	
Wisconsin Iron Company, Iron Ridge.....	3,350	4,155	3,306
Northwestern Iron Company, Mayville.....	5,033	4,137	3,000
Appleton Iron Company, Appleton.....	4,888	8,044	6,500
Green Bay Iron Company, Green Bay.....	6,910	6,141	6,000
National Iron Company, Depere.....	3,420	7,999	6,500
Fox River Iron Company, W. Depere.....	5,600	6,832	7,000
Ironton Furnace, Sauk county.....	1,780	1,528	1,300
	52,797	73,980	66,600

The Milwaukee iron company, during the year 1872, entered into the manufacture of merchant iron — it having been demonstrated that the raw material could be reduced there cheaper than elsewhere. The Minerva furnace company built also during the same year one of the most compact and complete iron furnaces to be found any where in the country. During the year 1873, the iron, with most other material interests, became seriously prostrated, so that the total receipts of ore in Milwaukee in 1874 amounted to only 31,993 tons, against 69,418 in 1873, and 85,245 tons in 1872. There were made in Milwaukee in 1874, 29,680 tons of railroad iron. In 1875, 58,868 tons of ore were received at Milwaukee, showing a revival of the trade in an increase of 19,786 tons over the previous year. The operation of the works at Bay View having suspended, the receipts of ore in 1876, at Milwaukee, were less than during any year since 1869, being only 31,119 tons, of which amount only 5,488 tons were from Iron Ridge, and the total shipments were only 498 tons.

LUMBER.

The business of lumbering holds an important rank in the commerce of the state. For many years the ceaseless hum of the saw and the stroke of the ax have been heard in all our great forests. The northern portion of the state is characterized by evergreen trees, principally pine; the southern, by hard-woods. There are exceptional localities, but this is a correct statement of the general distribution. I think that, geologically speaking, the evergreens belong to the primitive and sandstone regions, and the hard wood to the limestone and clay formations. Northern Wisconsin, so called, embraces that portion of the state north of forty-five degrees, and possesses nearly all the valuable pine forests. The most thoroughly developed portion of this region is that lying along the streams entering into Green bay and Lake Michigan, and bordering on the Wisconsin river and other streams entering into the Mississippi. Most of the pine in the immediate vicinity of these streams has been cut off well toward their sources; still, there are vast tracts covered with dense forests, not accessible from streams suitable for log-driving purposes. The building of railroads into these forests will alone give a market value to a large portion of the pine timber there growing. It is well, perhaps, that this is so, for at the present rate of consumption, but a few years will elapse before these noble forests will be totally destroyed. Most of the lumber manufactured on the rivers was formerly taken to a market by being floated down the streams in rafts. Now, the railroads are transporting large quantities, taking it directly from the mills and unloading it at interior points in Iowa, Illinois and Wisconsin, and some of it in eastern cities. From five to eight thousand men are employed in the pineries in felling the trees, sawing them into logs of suitable length, and hauling them to the mills and streams during every winter in times of fair prices and favorable seasons. The amount of lumber sawed in 1860, as carefully estimated, was 355,055,155 feet. The amount of shingles made was 2,272,061, and no account was made of the immense number of logs floated out of the state, for manufacture into lumber elsewhere. The amount of logs cut in the winter of 1873 and 1874 was 987,000,000 feet. In 1876 and 1877 the Black river furnished 188,344,464 feet. The Chippewa, 90,000,000; the Red Cedar, 57,000,000. There passed through Beef Slough 129,384,000 feet of logs. Hon. A. H. Eaton, for fourteen years receiver of the United States land office at Stevens Point, estimated the acreage of pine lands in his district at 2,000,000, and, taking his own district as the basis, he estimated the whole state at 8,000,000 acres. Reckoning this at 5,000 feet to the acre, the aggregate pine timber of the state would be 40,000,000,000 feet. The log product annually amounts to an immense sum. In 1876, 1,172,611,823 feet were cut. This is about the average annual draft that is made on the pine lands. There seems to be no remedy for the

wholesale destruction of our pine forests, except the one alluded to, the difficulty of transportation, and this will probably save a portion of them for a long time in the future. At the rate of consumption for twenty years past, we can estimate that fifty years would see northern Wisconsin denuded of its pine forests; but our lumber product has reached its maximum, and will probably decrease in the coming years as the distance to be hauled to navigable streams increases. In the mean time lumber, shingles and lath will form an important factor in our commerce, both state and inter-state, and will contribute millions to the wealth of our citizens.

GRAIN.

Up to 1841, no grain was exported from Wisconsin to be used as food; but, from the time of its first settlement in 1836 to 1840, the supply of bread stuffs from abroad, upon which the people depended, was gradually diminished by the substitution of home products. In the winter of 1840 and 1841, E. D. Holton, of Milwaukee, purchased a small cargo of wheat (about 4,000 bushels), and in the spring of 1841, shipped it to Buffalo. This was the beginning of a traffic that has grown to immense proportions, and, since that time, wheat has formed the basis of the commerce and prosperity of the state, until the city of Milwaukee has become the greatest primary wheat mart of the world.

The following table gives the exports of flour and grain from Milwaukee for thirty-two years, commencing in 1845:

YEARS.	FLOUR, bbls.	WHEAT, bus.	CORN, bus.	OATS, bus.	BARLEY, bus.	RYE, bus.
1845	7,550	95,510	-----	-----	-----	-----
1846	15,756	213,448	-----	-----	-----	-----
1847	34,840	598,411	-----	-----	-----	-----
1848	92,732	602,474	-----	-----	-----	-----
1849	136,657	1,136,023	2,500	4,000	15,000	-----
1850	100,017	297,570	5,000	2,100	15,270	-----
1851	51,889	317,285	13,828	7,892	103,840	-----
1852	92,995	564,404	2,220	363,841	322,261	54,692
1853	104,055	956,703	270	131,716	291,890	80,365
1854	145,032	1,809,452	164,908	404,999	339,338	113,443
1855	181,568	2,641,746	112,132	13,833	63,379	20,030
1856	188,455	2,761,976	218	5,433	10,398	-----
1857	228,442	2,581,311	472	2,775	800	-----
1858	298,668	3,994,213	43,958	562,067	63,178	5,378
1859	282,956	4,732,957	41,364	299,002	53,216	11,577
1860	457,343	7,568,608	37,204	64,682	28,056	9,735
1861	674,474	13,300,495	1,485	1,200	5,220	29,810
1862	711,405	14,915,680	9,489	79,094	44,800	126,301
1863	603,525	12,837,620	88,989	831,600	133,449	84,047
1864	414,833	8,992,479	140,786	811,634	23,479	18,210
1865	567,576	10,479,777	71,203	326,472	29,597	51,444
1866	720,365	11,634,749	480,408	1,636,595	18,988	255,329
1867	921,663	9,598,452	266,249	622,469	30,822	106,795
1868	1,017,598	9,867,029	342,717	536,539	95,036	91,443
1869	1,220,058	14,272,799	93,806	351,768	120,662	78,035
1870	1,225,941	16,127,838	103,173	210,187	469,325	62,494
1871	1,211,427	13,409,467	419,133	772,929	576,453	208,896
1872	1,232,036	11,570,505	1,557,953	1,323,234	931,725	209,751
1873	1,805,200	24,994,266	197,920	990,525	688,455	255,928
1874	2,217,579	22,255,380	556,563	726,035	464,837	79,879
1875	2,163,346	22,681,020	226,895	1,160,450	867,970	98,923
1876	2,654,028	16,804,394	96,908	1,377,560	1,235,481	220,964

Up to 1856, the shipments were almost wholly of Wisconsin products ; but with the completion of lines of railroad from Milwaukee to the Mississippi river, the commerce of Wisconsin became so interwoven with that of Iowa and Minnesota, that the data furnished by the transportation companies, give us no definite figures relating to the products of our own state.

DAIRY PRODUCTS.

Wisconsin is becoming largely interested in the dairy business. Its numerous springs, streams, and natural adaptability to grass, make it a fine grazing country, and stock thrives remarkably well. Within a few years, cheese-factories have become numerous, and their owners are meeting with excellent success. Wisconsin cheese is bringing the highest price in the markets, and much of it is shipped to England. Butter is also made of a superior quality, and is extensively exported. At the rate of progress made during the last few years, Wisconsin will soon take rank with the leading cheese and butter producing states. The counties most largely interested in dairying, are Kenosha, Walworth, Racine, Rock, Green, Waukesha, Winnebago, Sheboygan, Jefferson and Dodge. According to estimates by experienced dairymen, the manufacture of butter was 22,473,000 pounds in 1870; 50,130,000 in 1876; of cheese, 1,591,000 pounds in 1870, as against 17,000,000 in 1876, which will convey a fair idea of the increase of dairy production. The receipts of cheese in Chicago during 1876, were 23,780,000 pounds, against 12,000,000 in 1875; and the receipts of butter were 35,384,184, against 30,248,247 pounds in 1875. It is estimated that fully one-half of these receipts were from Wisconsin. The receipts of butter in Milwaukee were, in 1870, 3,779,114 pounds; in 1875, 6,625,863; in 1876, 8,938,137 pounds; of cheese, 5,721,279 pounds in 1875, and 7,055,573 in 1876. Cheese is not mentioned in the trade and commerce reports of Milwaukee until 1873, when it is spoken of as a new and rapidly increasing commodity in the productions of the state.

PORK AND BEEF.

Improved breeds, both of swine and cattle, have been introduced into the state during a few years past. The grade of stock has been rapidly bettered, and stock raisers generally are striving with commendable zeal to rival each other in raising the finest of animals for use and the market.

The following table shows the receipts of live hogs and beef cattle at Milwaukee for thirteen years :

YEARS.	LIVE HOGS.	BEEF CATTLE.	YEARS.	LIVE HOGS.	BEEF CATTLE.
1876-----	254,317	36,802	1869-----	52,296	12,521
1875-----	144,961	46,717	1868-----	48,717	13,200
1874-----	242,326	22,748	1867-----	76,758	15,527
1873-----	241,099	17,262	1866-----	31,881	12,955
1872-----	138,106	14,172	1865-----	7,546	14,230
1871-----	126,164	9,220	1864-----	42,250	18,345
1870-----	66,138	12,972	1863-----	56,826	14,655

The following table shows the movement of hog products and beef from Milwaukee since 1862.

Shipments by Rail and Lake.	PORK, HAMS, MIDDLES AND SHOULDERS.				LARD.		BEEF.

Hops.

The culture of hops, as an article of commerce, received but little attention prior to 1860. In 1865, 2,864 bales only were shipped from Milwaukee. In addition, a large amount was used by the brewers throughout the state. In 1866, the amount exported was increased, and 5,774 bales were shipped to eastern markets. The price, from forty-five to fifty-five cents per pound, stimulated production, and the article became one of the staple products of the counties of Sauk, Columbia, Adams and Juneau, besides being largely cultivated in parts of some other counties. In 1867, 26,562 bales were received at Milwaukee, and the prices ranged from fifty to seventy cents per pound. The estimated crop of the state for 1867 was 35,000 bales, and brought over \$4,200,000. In 1868, not less than 60,000 bales were grown in the state. The crop everywhere was a large one, and in Wisconsin so very large that an over-supply was anticipated. But few, however, were prepared for the decline in prices, that far exceeded the worst apprehensions of those interested. The first sales were made at twenty-five to thirty-five cents per pound, and the prices were reluctantly accepted by the growers. The price continued to decline until the article was unsalable and unavailable in the market. Probably the average price did not exceed ten cents per pound. Notwithstanding the severe check which hop-growing received in 1868, by the unprofitable result, growers were not discouraged, and the crop of 1869 was a large one. So much of the crop of 1868 remained in the hands of the growers, that it is impossible to estimate that of 1869. The new crop sold for from ten to fifteen cents, and the old for from three to five cents per pound. Hop-cultivation received a check from over-production in 1868, from which it did not soon recover. A large proportion of the yards were plowed under in 1870. The crop of 1869 was much of it marketed during 1870, at a price of about two and one-half to three and one-half cents per pound, while that of 1870 brought ten to twelve and a half cents. During the year 1871, a great advance in the price, caused by the partial failure of the crop in some of the eastern states, and the decrease in price causing a decrease in production, what was left over of the crop of 1870 more than doubled in value before the new reached the market. The latter opened at thirty cents, and steadily rose to fifty and fifty-five for prime

qualities. The crop of 1872 was of good quality, and the market opened at forty to fifty-five cents as the selling price, and fell fifteen to twenty cents before the close of the year. A much larger quantity was raised than the year previous. In 1873 and 1874, the crop was fair and prices ruled from thirty-three to forty-five cents, with increased production. About 18,000 bales were reported as being shipped from the different railway stations of the state. Prices were extremely irregular during 1875, and, after the new crop reached market, fell to a point that would not pay the cost of production. In 1876, prices ruled low at the opening of the year, and advanced from five to ten cents in January to twenty-eight to thirty in November. Over 17,000 bales were received at Milwaukee, over 10,000 bales being of the crop of the previous year. Over 13,000 bales were shipped out of the state.

TOBACCO.

Tobacco raising is comparatively a new industry in Wisconsin, but is rapidly growing in importance and magnitude. It sells readily for from four to ten cents per pound, and the plant is easily raised. It is not regarded as of superior quality. It first appears as a commodity of transportation in the railway reports for the year 1871, when the Prairie du Chien division of the St. Paul road moved eastward 1,373,650 pounds. During the four years ending with 1876, there were shipped from Milwaukee an average of 5,118,530 pounds annually, the maximum being in 1874, 6,982,175 pounds; the minimum in 1875, 2,743,854 pounds. The crop of 1876 escaped the early frosts, and netted the producer from five to seven cents per pound. The greater part of it was shipped to Baltimore and Philadelphia. Comparatively little of the leaf raised in the state is used here or by western manufacturers. The crop of the present year, 1877, is a large one, and has been secured in good order. It is being contracted for at from four to six cents per pound.

CRANBERRIES.

The cranberry trade is yet in its infancy. But little, comparatively, has been done in developing the capabilities of the extensive bodies of marsh and swamp lands interspersed throughout the northern part of the state. Increased attention is being paid to the culture of the fruit; yet, the demand will probably keep ahead of the supply for many years to come. In 1851, less than 1,500 barrels were sent out of the state. In 1872, the year of greatest production, over 37,000 barrels were exported, and, in 1876, about 17,000 barrels. The price has varied in different years, and taken a range from eight to fifteen dollars a barrel.

SPIRITUOUS AND MALT LIQUORS.

The production of liquors, both spirituous and malt, has kept pace with the growth of population and with the other industries of the state. There were in Wisconsin, in 1872, two hundred and ninety-two breweries and ten distilleries. In 1876, there were two hundred and ninety-three of the former and ten of the latter, and most of them were kept running to their full capacity. Milwaukee alone produced, in 1876, 321,611 barrels of lager beer and 43,175 barrels of high wines. In 1865, it furnished 65,666 barrels of beer, and in 1870, 108,845 barrels. In 1865, it furnished 3,046 barrels of high wines; in 1870, 22,867 barrels; and in 1875, 39,005. A large quantity of the beer made was shipped to eastern and southern cities. The beer made in 1876 sold at the rate of ten dollars per barrel, the wholesale price of the brewers bringing the sum of \$3,216,110. The fame of Milwaukee lager beer is widely extended. This city has furnished since 1870, 1,520,308 barrels which, at the wholesale price, brought \$15,203,170. The total production of beer by all the two hundred and ninety-three breweries of the state for 1876, was 450,508 barrels.

In 1876, Milwaukee produced 43,175 barrels of high wines, or distilled spirits, and the state of Wisconsin 51,959 barrels. In 1870, the former produced 108,845 barrels of beer and 22,867 barrels of distilled spirits, and in the same year the state of Wisconsin produced 189,664 barrels of beer and 36,145 barrels of distilled spirits.

MISCELLANEOUS.

Porcelain clay, or kaolin, is found in numerous places in Wood and Marathon counties. The mineral is found in but few places in the United States in quantities sufficient to justify the investment of capital necessary to manufacture it. In the counties mentioned, the deposits are found in extensive beds, and only capital and enterprise are needed to make their development profitable. Clay of superior quality for making brick and of fair quality for pottery, is found in numerous localities. The famous "Milwaukee brick," remarkable for their beautiful cream color, is made from a fine clay which is abundant near Milwaukee, and is found in extensive beds at Watertown, Whitewater, Edgerton, Stoughton, and several places on the lake shore north of Milwaukee. At Whitewater and some other places the clay is used with success for the making of pottery ware. Water-lime, or hydraulic cement, occurs in numerous places throughout the state. An extensive bed covering between one and two hundred acres, and of an indefinite depth, exists on the banks of the Milwaukee river, and not over one and a half miles from the city limits of Milwaukee. The cement made from the rock of this deposit is first-class in quality, and between twenty and thirty thousand barrels were made and sold last year. The capacity of the works for reducing the rock to cement has been increased to 500 barrels per day. Stones suitable for building purposes are widely distributed throughout the state, and nearly every town has its available quarry. Many of these quarries furnish stone of fine quality for substantial and permanent edifices. The quarry at Prairie du Chien furnished the stone for the capital building at Madison, which equals in beauty that of any state in the Union. At Milwaukee, Waukesha, Madison, La Crosse, and many other places are found quarries of superior building stone. Granite is found in extensive beds in Marathon and Wood counties, and dressed specimens exhibited at the "Centennial" last year, attracted attention for their fine polish. Marbles of various kinds are likewise found in the state. Some of them are beginning to attract attention and are likely to prove valuable. The report of Messrs. Foster & Whitney, United States geologists, speaks of quarries on the Menomonee and Michigamig rivers as affording beautiful varieties and susceptible of a high polish. Richland county contains marble, but its quality is generally considered inferior.

WATER POWERS.

Wisconsin is fast becoming a manufacturing state. Its forests of pine, oak, walnut, maple, ash, and other valuable woods used for lumber, are well-nigh inexhaustible. Its water-power for driving the wheels of machinery is not equaled by that of any state in the northwest. The Lower Fox river between Lake Winnebago and Green Bay, a distance of thirty-five miles, furnishes some of the best facilities for manufacturing enterprise in the whole country. Lake Winnebago as a reservoir gives it a great and special advantage, in freedom from liability to freshets and droughts. The stream never varies but a few feet from its highest to its lowest stage, yet gives a steady flow. The Green Bay and Mississippi canal company has, during the last twenty-five years, constructed numerous dams, canals and locks, constituting very valuable improvements. All the property of that company has been transferred to the United States government, which has entered upon a system to render the Fox and Wisconsin rivers navigable to the Mississippi. The fall between the lake and Depere is one hundred and fifty feet, and the water can be utilized

in propelling machinery at Neenah, Menasha, Appleton, Cedar, Little Chute, Kaukauna, Rapid Croche, Little Kaukauna and Depere. The water-power at Appleton in its natural advantages is pronounced by Hon. Hiram Barney, of New York, superior to those at Lowell, Paterson and Rochester, combined. The water-power of the Fox has been improved to a considerable extent, but its full capacity has hardly been touched. Attention has been drawn to it, however, and no doubt is entertained that in a few years the hum of machinery to be propelled by it, will be heard the entire length of the thirty-five miles. The facilities presented by its nearness to timber, iron, and a rich and productive agricultural region, give it an advantage over any of the eastern manufacturing points.

The Wisconsin river rises in the extreme northern part of the state, and has its source in a great number of small lakes. The upper portion abounds in valuable water privileges, only a few of which are improved. There are a large number of saw-mills running upon the power of this river. Other machinery, to a limited extent, is in operation.

The "Big Bull" falls, at Wausau, are improved, and a power of twenty-two feet fall is obtained. At Little Bull falls, below Wausau, there is a fall of eighteen feet, partially improved. There are many other water-powers in Marathon county, some of which are used in propelling flouring-mills and saw-mills. At Grand Rapids, there is a descent of thirty feet to the mile, and the water can be used many times. Each time, 5,000 horse-power is obtained. At Kilbourn City a large amount of power can be obtained for manufacturing purposes.

Chippewa river has its origin in small streams in the north part of the state. Explorers tell us that there are a large number of water powers on all the upper branches, but as the country is yet unsettled, none of them have been improved, and very few even located on our maps. Brunette falls and Ameger falls, above Chippewa Falls city, must furnish considerable water-power, but its extent is not known. At Chippewa Falls is an excellent water-power, only partially improved. The river descends twenty-six feet in three-fourths of a mile. At Duncan creek at the same place, there is a good fall, improved to run a large flouring mill. At Eagle Rapids, five miles above Chippewa Falls, \$120,000 has been expended in improving the fall of the Chippewa river. The city of Eau Claire is situated at the confluence of the Chippewa and Eau Claire rivers, and possesses in its immediate vicinity water-powers almost unrivaled. Some of them are improved. The citizens of Eau Claire have, for several years, striven to obtain legislative authority to dam the Chippewa river, so as to improve the water-power of the Dells, and a lively contest, known as the "Dells fight," has been carried on with the capitalists along the river above that town. There are immense water-powers in Dunn county, on the Red Cedar, Chippewa and Eau Galle rivers, on which there are many lumbering establishments. In Pepin county also there are good powers. The Black river and its branches, the La Crosse, Buffalo, Trempealeau, Beaver, and Tamaso, furnish many valuable powers. The St. Croix river is not excelled in the value of its water privileges by any stream in the state, except the Lower Fox river. At St. Croix Falls, the water of the river makes a descent of eighty-five feet in a distance of five miles, and the volume of water is sufficient to move the machinery for an immense manufacturing business, and the banks present good facilities for building dams, and the river is not subject to freshets. The Kinnekinnick has a large number of falls, some of them partially improved. Within twenty-five miles of its entrance into Lake St. Croix, it has a fall of two hundred feet, and the volume of water averages about three thousand cubic feet per minute. Rock river affords valuable water-privileges at Watertown (with twenty-four feet fall), and largely improved; at Jefferson, Indian Ford and Janesville, all of which are improved. Beloit also has an excellent water-power, and it is largely improved. Scattered throughout the state are many other water-powers, not alluded

to in the foregoing. There are several in Manitowoc county; in Marquette county, also. In Washington county, at West Bend, Berlin, and Cedar Creek, there are good water-powers, partly utilized. At Whitewater, in Walworth county, is a good power. In Dane county, there is a water-power at Madison, at the outlet of Lake Mendota; also, a good one at Stoughton, below the first, or Lake Kegonsa; also at Paoli, Bellville, Albany and Brodhead, on the Sugar river. In Grant county there are not less than twenty good powers, most of them well-developed. In Racine county, three powers of fine capacity at Waterford, Rochester and Burlington, all of which are improved. The Oconto, Peshtigo and Menomonee rivers furnish a large number of splendid water-powers of large capacity. The Upper Wolf river has scores of water-powers on its main stream and numerous branches; but most of the country is still a wilderness, though containing resources which, when developed, will make it rich and prosperous. There are numerous other streams of less consequence than those named, but of great importance to the localities they severally drain, that have had their powers improved, and their waterfalls are singing the songs of commerce. On the rivers emptying into Lake Superior, there are numerous and valuable water-powers. The Montreal river falls one thousand feet in a distance of thirty miles.

MANUFACTURES.

The mechanical and manufacturing industries of Wisconsin demonstrate that the people do not rely wholly upon agricultural pursuits, or lumbering, for subsistence, but aim to diversify their labors as much as possible, and to give encouragement to the skill and ingenuity of their mechanics and artisans. All our cities, and most of our villages, support establishments that furnish wares and implements in common use among the people. We gather from the census report for 1870 a few facts that will give us an adequate idea of what was done in a single year, remembering that the data furnished is six years old, and that great advancement has been made since the statistics were gathered. In 1870, there were eighty-two establishments engaged in making agricultural implements, employing 1,387 hands, and turning out products valued at \$2,393,400. There were one hundred and eighty-eight furniture establishments, employing 1,844 men, and making \$1,542,300 worth of goods. For making carriages and wagons there were four hundred and eighty-five establishments, employing 2,184 men, and their product was valued at \$2,596,534; for clothing, two hundred and sixty-three establishments, and value of product \$2,340,400; sash, doors and blinds, eighty-one shops, and value of product \$1,852,370; leather, eighty-five tanneries, employing 577 men, and value of products \$2,013,000; malt liquors, one hundred and seventy-six breweries, 835 men, and their products valued at \$1,790,273.

At many points the business of manufacturing is carried on more or less extensively; indeed, there is hardly a village in the state where capital is not invested in some kind of mechanical industry or manufacturing enterprise, and making satisfactory returns; but for details in this respect, the reader is referred to the department of local history.

The principal commodities only, which Wisconsin contributes to trade and commerce, have been considered. There remains quite a number of minor articles from which the citizens of the state derive some revenue, such as flax and maple sugar, which can not be separately considered in this paper.

CONCLUDING REMARKS.

Statistics are usually dry reading, but, to one desiring to change his location and seeking information regarding a new country and its capabilities, they become intensely interesting and of great value. The farmer wishes to know about the lands, their value and the productiveness of the soil; the mechanic about the workshops, the price of labor, and the demand for such wares

as he is accustomed to make; the capitalist, concerning all matters that pertain to resources, advantages, and the opportunities for investing his money. Our own people want all the information that can be gained by the collection of all obtainable facts. The sources of such information are now various, and the knowledge they impart fragmentary in its character.

Provision should be made by law, for the collection and publication of reliable statistics relating to our farming, manufacturing, mining, lumbering, commercial and educational interests. Several of the states of the Union have established a "Bureau of Statistics," and no more valuable reports emanate from any of their state departments than those that exhibit a condensed view of the material results accomplished each year. Most of the European states foster these agencies with as much solicitude as any department of their government. Indeed, they have become a social as well as a material necessity, for social science extends its inquiries to the physical laws of man as a social being; to the resources of the country; its productions; the growth of society, and to *all* those facts or conditions which may increase or diminish the strength, growth or happiness of a people. Statistics are the foundation and corner-stone of social science, which is the highest and noblest of all the sciences.

A writer has said that, "If God had designed Wisconsin to be chiefly a manufacturing state, instead of agricultural, which she claims to be, and is, it is difficult to see more than one particular in which He could have endowed her more richly for that purpose." She has all the material for the construction of articles of use and luxury, the means of motive power to propel the machinery, to turn and fashion, weave, forge, and grind the natural elements that abound in such rich profusion. She has also the men whose enterprise and skill have accomplished most surprising results, in not only building up a name for themselves, but in placing the state in a proud position of independence.

It is impossible to predict what will be the future growth and development of Wisconsin. From its commercial and manufacturing advantages, we may reasonably anticipate that she will in a few years lead in the front rank of the states of the Union in all that constitutes real greatness. Her educational system is one of the best. With her richly endowed State University, her colleges and high schools, and the people's colleges, the common schools, she has laid a broad and deep foundation for a great and noble commonwealth. It was early seen what were the capabilities of this their newly explored domain. The northwestern explorer, Jonathan Carver, in 1766, one hundred and thirteen years ago, after traversing Wisconsin and viewing its lakes of crystal purity, its rivers of matchless utility, its forests of exhaustless wealth, its prairies of wonderful fertility, its mines of buried treasure, recorded this remarkable prediction of which we see the fulfillment: "To what power or authority this new world will become dependent after it has arisen from its present uncultivated state, time alone can discover. But as the seat of empire from time immemorial has been gradually progressive toward the west, there is no doubt but that at some future period mighty kingdoms will emerge from these wildernesses, and stately palaces and solemn temples with gilded spires reaching to the skies supplant the Indian huts, whose only decorations are the barbarous trophies of their vanquished enemies."

" Westward the course of empire takes its way ;
The four first acts already passed,
A fifth shall close the drama with the day ;
Time's noblest offspring is the last."

THE PUBLIC DOMAIN.

By D. S. DURRIE.

In the early part of the seventeenth century, all the territory north of the Ohio river, including the present state of Wisconsin, was an undiscovered region. As far as now known, it was never visited by white men until the year 1634, when Jean Nicolet came to the Green bay country as an ambassador from the French to the Winnebagoes. The Jesuit fathers in 1660 visited the south shore of Lake Superior; and, soon after, missions were established at various points in the northwest.

The French government appreciating the importance of possessing dominion over this section, M. Talon, intendant of Canada, took steps to carry out this purpose, and availed himself of the good feelings entertained toward the French by a number of the Indian tribes, to establish the authority of the French crown over this remote quarter. A small party of men led by Daumont de St. Luson, with Nicolas Perrot as interpreter, set out from Quebec on this mission, in 1670, and St. Luson sent to the tribes occupying a circuit of a hundred leagues, inviting the nations, among them the Wisconsin tribes inhabiting the Green bay country, by their chiefs and ambassadors, to meet him at the Sault Sainte Marie the following spring.

In the month of May, 1671, fourteen tribes, by their representatives, including the Miamis, Sacs, Winnebagoes, Menomonees, and Pottawattamies, arrived at the place designated. On the morning of the fourteenth of June, "St. Luson led his followers to the top of the hill, all fully equipped and under arms. Here, too, in the vestments of their priestly office were four Jesuits: Claude Dablon, superior of the mission on the lakes, Gabriel Druillettes, Claude Allouez, and André. All around, the great throng of Indians stood, or crouched, or reclined at length with eyes and ears intent. A large cross of wood had been made ready. Dablon, in solemn form, pronounced his blessing on it; and then it was reared and planted in the ground, while the Frenchmen, uncovered, sang the *Vexilla Regis*. Then a post of cedar was planted beside it, with a metal plate attached, engraven with the royal arms; while St. Luson's followers sang the *exaudiat*, and one of the priests uttered a prayer for the king. St. Luson now advanced, and, holding his sword in one hand, and raising with the other a sod of earth, proclaimed in a loud voice "that he took possession of all the country occupied by the tribes, and placed them under the king's protection.

This act, however, was not regarded as sufficiently definite, and on the eighth of May, 1689, Perrot, who was then commanding for the king at the post of Nadouesieux, near Lake Pepin on the west side of the Mississippi, commissioned by the Marquis de Denonville to manage the interests of commerce west of Green bay took possession, in the name of the king, with appropriate ceremonies, of the countries west of Lake Michigan as far as the river St. Peter. The papers were signed by Perrot and others.

By these solemn acts, the present limits of Wisconsin with much contiguous territory, came under the dominion of the French government, the possession of which continued until October, 1761—a period of ninety years from the gathering of the chiefs at the Sault Ste. Marie in 1671.

From the commencement of French occupancy up to the time when the British took possession, the district of country embraced within the present limits of this state had but few white inhabitants besides the roaming Indian traders; and of these few, the locations were separated by a distance of more than two hundred miles in a direct line, and nearly double that distance by

Allen Clinton
(DECEASED) PEWAUKEE

the usual water courses. There was no settlement of agriculturists; there were no missionary establishments; no fortified posts at other points, except at Depere and Green bay on Fox river, and perhaps at Prairie du Chien, near the junction of the Wisconsin and the Mississippi.

The French government made no grant of lands; gave no attention to settlers or agriculturists, and the occupation of the country was strictly military. There were, indeed, a few grants of lands made by the French governors and commanders, previous to 1750, to favored individuals, six of which were afterward confirmed by the king of France. There were also others which did not require confirmation, being made by Cardillac, commanding at Detroit, under special authority of the king; of this latter kind, one for a small piece of thirty acres bears with it, says a writer, "so many conditions, reservations, prohibitions of sale, and a whole cavalcade of feudal duties to be performed by the grantee, that in itself, it would be a host in opposition to the agricultural settlement of any country."

The grants just referred to, relate to that part of the French possessions outside the limits of the present state of Wisconsin. Within its limits there was a grant of an extensive territory including the fort at the head of Green bay, with the exclusive right to trade, and other valuable privileges, from the Marquis de Vaudreuil, in October, 1759, to M. Rigaud. It was sold by the latter to William Gould and Madame Vaudreuil, to whom it was confirmed by the king of France in January, 1760, at a very critical period, when Quebec had been taken by the British, and Montreal was only wanting to complete the conquest of Canada. This grant was evidently intended as a perquisite to entrap some unwary persons to give a valuable consideration for it, as it would be highly impolitic for the government to make such a grant, if they continued masters of the country, since it would surely alienate the affections of the Indians. The whole country had already been virtually conquered by Great Britain, and the grant of course was not confirmed by the English government.

Of the war between the French and English governments in America, known as the French and Indian war, it is not necessary to speak, except in general terms. The English made a determined effort to obtain the possessions claimed by the French. The capture of Quebec in 1759, and the subsequent capitulation of Montreal in 1760, extinguished the domination of France in the basin of the St. Lawrence; and by the terms of the treaty of Paris, concluded February 10, 1763, all the possessions in, and all the claims of the French nation to, the vast country watered by the Ohio and the Mississippi were ceded to Great Britain.

Among the first acts of the new masters of the country was the protection of the eminent domain of the government, and the restriction of all attempts on the part of individuals to acquire Indian titles to lands. By the King of England's proclamation of 1763, no more grants of land within certain prescribed limits could be issued, and all private persons were interdicted the liberty of purchasing lands from the Indians, or of making settlements within those prescribed limits. The indulgence of such a privilege as that of making private purchases of the natives, conduced to the most serious difficulties, and made way for the practice of the most reprehensible frauds. The policy pursued by the English government has been adopted and acted upon by the government of the United States in the extinguishment of the Indian title to lands in every part of the country.

In face of the proclamation of 1763, and within three years after its promulgation, under a pretended purchase from, or voluntary grant of the natives, a tract of country nearly one hundred miles square, including large portions of what is now northern Wisconsin and Minnesota, was claimed by Jonathan Carver, and a ratification of his title solicited from the king and council. This was not conceded; and the representatives of Carver, after the change of government had

brought the lands under the jurisdiction of the United States, for a series of years presented the same claims before congress, and asked for their confirmation. Such a demand under all the circumstances, could not justify an expectation of success; and, of course, has often been refused. But notwithstanding the abundant means which the public have had of informing themselves of the true nature and condition of Carver's claim, bargains and sales of portions of this tract have been made among visionary speculators for more than half a century past. It is now only a short period since the maps of the United States ceased to be defaced by a delineation of the "Carver Grant."

The mere transfer of the dominion over the country from the French to the English government, and the consequent occupation of the English posts by the new masters, did not in any great degree affect the social condition of the inhabitants. By the terms of capitulation, the French subjects were permitted to remain in the country, in the full enjoyment of their civil and religious privileges.

The English, however, did not hold peaceable possession of the territory acquired. The war inaugurated by Pontiac and his Indian allies on the military posts occupied by the English soon followed, and in the month of May, 1763, nine posts were captured with much loss of life. In the spring of 1764, twenty-two tribes who were more or less identified in the outbreak, concluded a treaty of peace with General Bradstreet at Niagara.

The expedition of Colonel George Rogers Clark to the Illinois country, and the conquest of the British posts in 1778 and 1779, had the effect to open the way for the emigration of the Anglo-American population to the Mississippi valley; and at the close of the revolutionary war, Great Britain renounced all claim to the whole territory lying east of the Mississippi river. The dominion of the English in the Illinois and Wabash countries, ceased with the loss of the military posts which commanded the Northwestern territory of the United States. As a result of the enterprise and success of Clark, Virginia obtained possession of the Illinois country; his expedition having been undertaken and carried forward under the auspices of that state.

Several of the eastern states under their colonial charters, laid claim to portions of the land comprised in the territory northwest of the Ohio river. The claim of Massachusetts was derived from a grant from King James of November 3, 1620; and included from lat. $42^{\circ} 2'$ to about lat. 45° , extending to the south sea; Connecticut claimed from lat. 41° north to $42^{\circ} 2'$. The claims of Virginia were from grants from King James, bearing date, respectively, April 10, 1606, May 23, 1609, and March 12, 1611, and an additional claim for the territory conquered by Clark in the Illinois country; but they extended no farther north than the southern end of Lake Michigan.

It is a popular impression that the territory of the present state of Wisconsin was comprehended in the lands northwest of the river Ohio, over which Virginia exercised jurisdiction, and, consequently, was included in her deed of cession of lands to the United States. This opinion so generally entertained by writers on American history, is a statement which does not appear to have any solid foundation in fact. Virginia never made any conquests or settlements in Wisconsin, and at no time prior to the proffer of her claims to the general government had she ever exercised jurisdiction over it. In fact, there were no settlements in Wisconsin except at Green Bay and Prairie du Chien before that time, and these were made by French settlers who were in no wise interfered with while the revolution continued. In Illinois it was otherwise; and the possession of its territory by Virginia was an undisputed fact. During the revolution the title of the sovereignty in Wisconsin was actually in Great Britain, and so remained until the definite treaty of peace in 1783; at which date England yielding her right constructively to the United States, retaining possession, however, until 1796; at which time the western posts were transferred to the United States.

All the claiming states finally ceded their interests to the general government, giving the latter a perfect title, subject only to the rights of the Indians. The deed of cession from Virginia was dated March 1, 1784. The other states ceded their claims, some before this date, others subsequent thereto.

Virginia made a number of stipulations in her deed of cession; among others, that the French and Canadian inhabitants and the neighboring villages who had professed themselves citizens of Virginia, should have their possessions and title confirmed to them, and be protected in the enjoyment of their rights and liberties; that 150,000 acres of land near the rapids of the Ohio, should be reserved for that portion of her state troops which had reduced the country; and about 3,500,000 acres between the rivers Scioto and Little Miami be reserved for bounties to her troops on the continental establishment.

In consequence of certain objectionable stipulations made by Virginia as to the division of the territory into states, the deed of cession was referred back to that state with a recommendation from congress that these stipulations should be altered. On the 30th of December, 1788, Virginia assented to the wish of congress, and formally ratified and confirmed the fifth article of compact which related to that subject, and tacitly gave her consent to the whole ordinance of 1787. The provisions of this ordinance have since been applied to all the territories of the United States lying north of the 36° 40'. After the adoption of the constitution of the United States the new congress, among its earliest acts, passed one, recognizing the binding force of the ordinance of 1787.

Of this ordinance it has been said: "It was based on the principles of civil liberty, maintained in the magna charta of England, re-enacted in the bill of rights, and incorporated in our different state constitutions. It was the fundamental law of the constitution, so to speak, of the great northwest, upon which were based, and with which harmonized all our territorial enactments, as well as our subsequent state legislation, and, moreover, it is to that wise, statesman-like document that we are indebted for much of our prosperity and greatness."

After the close of the revolutionary war, enterprising individuals traversed the whole country which had been ceded to the government, and companies were formed to explore and settle the fertile and beautiful lands beyond the Ohio; but the determination of the British cabinet not to evacuate the western posts, was well known, and had its effect on the people who were disposed to make settlements.

The western tribes were also dissatisfied and threatened war, and efforts were made by the government to settle the difficulties. A grand council was held at the mouth of Detroit river in December, 1787, which did not result favorably, and two treaties were subsequently held, which were not respected by the savages who were parties to them. Soon an Indian war ensued, which resulted at first disastrously to the American troops under Generals Harmar and St. Clair, but finally with success to the American arms under General Wayne. The treaty of Greenville followed. It was concluded August 3, 1795. At this treaty there were present eleven hundred and thirty chiefs and warriors. It was signed by eighty-four chiefs and General Anthony Wayne, sole commissioner of the United States. One of the provisions of the treaty was that in consideration of the peace then established, and the cessions and relinquishments of lands made by the tribes of Indians, and to manifest the liberality of the United States as the great means of rendering this peace strong and perpetual, the United States relinquished their claims to all other Indian lands northward of the river Ohio, eastward of the Mississippi, and westward and southward of the great lakes and the waters united by them, except certain reservations and portions before purchased of the Indians, none of which were within the present limits of this state. The Indian title to the whole of what is now Wisconsin, subject only to certain restrictions, became

absolute in the various tribes inhabiting it. By this treaty it was stipulated that, of the lands relinquished by the United States, the Indian tribes who have a right to those lands, were quietly to enjoy them; hunting, planting, and dwelling thereon so long as they pleased; but, when those tribes or any of them should be disposed to sell them, or any part of them, they were to be sold only to the United States, and until such sale, the United States would protect all of the tribes in the quiet enjoyment of their lands against all citizens of the United States, and all other white persons who might intrude on the same. At the same time all the tribes acknowledged themselves to be under the protection of the United States, and no other person or power whatsoever.

The treaty also prohibited any citizen of the United States, or any other white man, settling upon the lands relinquished by the general government; and such person was to be considered as out of the protection of the United States; and the Indian tribe on whose land the settlement might be made, could drive off the settler, or punish him in such manner as it might see fit.

It will be seen that the Indians were acknowledged to have an unquestionable title to the lands they occupied until that right should be extinguished by a voluntary cession to the general government; and the constitution of the United States, by declaring treaties already made, as well as those to be made, to be the supreme law of the land, adopted and sanctioned previous treaties with the Indian nations, and consequently admitted their rank among those powers who are capable of making treaties.

The several treaties which had been made between commissioners on the part of the United States and various nations of Indians, previous to the treaty of Greenville, were generally restricted to declarations of amity and friendship, the establishment and confirming of boundaries, and the protection of settlements on Indian lands; those that followed were generally for a cession of lands and provisions made for their payment. It is proposed to notice the several treaties that took place after that held at Greenville, showing in what way the territory of the present state, came into possession of the government. As will be seen hereafter, it required treaties with numerous tribes of Indians to obtain a clear, undisputed title, as well as many years before it was fully accomplished.

1. A treaty was held at St. Louis, November 3, 1804, between the Sacs and Foxes and the United States. William Henry Harrison was acting commissioner on the part of the government. By the provisions of the treaty, the chiefs and head men of the united tribes ceded to the United States a large tract on both sides of the Mississippi, extending on the east from the mouth of the Illinois to the head of that river, and thence to the Wisconsin; and including on the west considerable portions of Iowa and Missouri, from the mouth of the Gasconade northward. In what is now the state of Wisconsin, this grant embraced the whole of the present counties of Grant and La Fayette and a large portion of Iowa and Green counties. The lead region was included in this purchase. In consideration of this cession, the general government agreed to protect the tribes in the quiet enjoyment of their land, against its own citizens and all others who should intrude on them. The tribes permitted a fort to be built on the upper side of the Wisconsin river, near its mouth, and granted a tract of land two miles square, adjoining the same. The government agreed to give them an annuity of one thousand dollars per annum. The validity of this treaty was denied by one band of the Sac Indians, and this cession of land became, twenty-eight years after, the alleged cause of the Black Hawk war.

2. Another treaty was held at Portage des Sioux, now a village in St. Charles county, Missouri, on the Mississippi river, September 13, 1815, with certain chiefs of that portion of the Sac nation then residing in Missouri, who, they said, were compelled since the commencement of

the late war, to separate themselves from the rest of their nation. They gave their assent to the treaty made at St. Louis in 1804, and promised to remain separate from the Sacs of Rock river, and to give them no aid or assistance, until peace should be concluded between the United States and the Foxes of Rock river.

3. On the 14th of September, a treaty was made with the chiefs of the Fox tribe at the same place. They agreed that all prisoners in their hands should be delivered up to the government. They assented to, recognized, re-established and confirmed the treaty of 1804, to the full extent of their interest in the same.

4. A treaty was held at St. Louis, May 13, 1816, with the Sacs of Rock river, who affirmed the treaty of 1804, and agreed to deliver up all the property stolen or plundered, and in failure to do so, to forfeit all title to their annuities. To this treaty, Black Hawk's name appears with others. That chief afterward affirmed that though he himself had "touched the quill" to this treaty, he knew not what he was signing, and that he was therein deceived by the agent and others, who did not correctly explain the nature of the grant; and in reference to the treaty of St. Louis in 1804, and at Portage des Sioux in 1815, he said that he did not consider the same valid or binding on him or his tribe, inasmuch as by the terms of those treaties, territory was described which the Indians never intended to sell, and the treaty of 1804, particularly, was made by parties who had neither authority in the nation, nor power to dispose of its lands. Whether this was a true statement of the case, or otherwise, it is quite certain that the grant of lands referred to was often confirmed by his nation, and was deemed conclusive and binding by the government. The latter acted in good faith to the tribes, as well as to the settlers, in the disposition of the lands.

5. A treaty of peace and friendship was made at St. Louis, June 3, 1816, between the chiefs and warriors of that part of the Winnebagoes residing on the Wisconsin river. In this treaty the tribe state that they have separated themselves from the rest of their nation; that they, for themselves and those they represent, confirm to the United States all and every cession of land heretofore made by their nation, and every contract and agreement, as far as their interest extended.

6. On the 30th of March, 1817, the Menomonee tribe concluded a treaty of peace and friendship at St. Louis with the United States, and confirmed all and every cession of land before made by them within the limits of the United States.

7. On the 19th of August, 1825, at Prairie du Chien, a treaty was made with the Sioux, Chippewas, Sacs and Foxes, Winnebagoes, Ottawas and Pottawattamies, by which the boundary between the two first nations was agreed upon; also between the Chippewas, Winnebagoes and other tribes.

8. Another treaty was held August 5, 1826, at Fond du Lac of Lake Superior, a small settlement on the St. Louis river, in Itaska county, Minn., with the same tribes, by which the previous treaty was confirmed in respect to boundaries, and those of the Chippewas were defined, as a portion of the same was not completed at the former treaty.

9. A treaty was made and concluded August 1, 1827, at Butte des Morts, between the United States and the Chippewa, Menomonee and Winnebago tribes, in which the boundaries of their tribes were defined; no cession of lands was made.

10. A treaty was made at Green Bay, August 25, 1828, with the Winnebagoes, Pottawattamies and other tribes. This treaty was made to remove the difficulties which had arisen in consequence of the occupation by white men of that portion of the mining country in the southwestern part of Wisconsin which had not been ceded to the United States. A provisional

boundary was provided, and privileges accorded the government to freely occupy their territory until a treaty should be made for the cession of the same. This treaty was simply to define the rights of the Indians, and to give the United States the right of occupation.

11. Two treaties were made at Prairie du Chien, on the 29th of July, 1829, and August 1, 1829: at the first date, with the Chippewas, Ottawas and Pottawattamies, by which these nations ceded all their lands which they claimed in the northwestern part of Illinois; and at the latter date with the Winnebagoes, by which that nation ceded and relinquished all their right, title and claim to all their lands south of the Wisconsin river, thus confirming the purchase of the lead-mine region. Certain grants were made to individuals, which grants were not to be leased or sold by the grantees.

By this important treaty, about eight millions of acres of land were added to the public domain. The three tracts ceded, and forming one whole, extended from the upper end of Rock river to the mouth of the Wisconsin, from latitude $41^{\circ} 30'$ to latitude $43^{\circ} 15'$, on the Mississippi. Following the meanderings of the river, it was about two hundred and forty miles from west to east, extending along the Wisconsin and Fox rivers, affording a passage across the country from the Mississippi to Lake Michigan. The south part of the purchase extended from Rock Island to Lake Michigan.

12. Another important treaty was made at Green Bay, February 8, 1831, between the Menomonee Indians and the United States. That nation possessed an immense territory. Its eastern division was bounded by the Milwaukee river, the shore of Lake Michigan, Green bay, Fox river, and Lake Winnebago; its western division, by the Wisconsin and Chippewa rivers on the west, Fox river on the south, Green bay on the east, and the high lands which flow the streams into Lake Superior on the north. By this treaty all the eastern division, estimated at two and a half millions of acres, was ceded to the government. By certain other provisions, the tribe was to occupy a large tract lying north of Fox river and east of Wolf river. Their territory farther west was reserved for their hunting-grounds until such time as the general government should desire to purchase it. Another portion, amounting to four millions of acres, lying between Green bay on the east and Wolf river on the west, was also ceded to the United States, besides a strip of country, three miles in width, from near the portage of the Wisconsin and Fox rivers north, on each side of the Wisconsin river, and forty-eight miles long — still leaving the tribe in peaceable possession of a country about one hundred and twenty miles long, and about eighty broad. By supplementary articles to the treaty, provision was made for the occupancy of certain lands by the New York Indians — two townships on the east side of Lake Winnebago.

13. At the conclusion of the Black Hawk war, in 1832, for the purpose of clearing up the Indian title of the Winnebago nation in the country, a treaty was made and concluded at Fort Armstrong, September 15, 1832. All the territory claimed by this nation lying south and east of the Wisconsin and Fox river of Green bay, was ceded to the United States, and no band or party of Winnebagoes was allowed to reside, plant, fish or hunt on these grounds, after June 1, 1833, or on any part of the country therein ceded.

14. On the 27th of October, 1832, articles of agreement were made and concluded at Green Bay between the United States and the Menomonee Indians, by the terms of which that nation ceded to the New York Indians certain lands on Fox river.

15. An important treaty was made at Chicago, September 26, 1833, between the United States and the Chippewas, Ottawas and Pottawattamies. Those nations ceded to the government all their lands along the western shore of Lake Michigan, and between that lake and the land ceded to the United States by the Winnebago nation at the treaty at Fort Armstrong, September

15, 1832, bounded on the north by the country lately ceded by the Menomonees, and on the south by the country ceded at the treaty at Prairie du Chien, July 19, 1829 — containing about five millions of acres.

16. On the 3d of September, 1836, a treaty was made at Cedar Point with the Menomonees, by which lands lying west of Green bay, and a strip on the upper Wisconsin, were ceded to the United States — the quantity of land ceded being estimated at four millions of acres in the Green bay portion; on the Wisconsin river, a strip three miles wide on each side of the river, running forty-eight miles north in a direct line, equivalent to 184,320 acres.

17. On the 29th of July, 1837, a treaty was made with the Chippewas of the Mississippi, at Fort Snelling, and the United States, the nation ceding to the government all their lands in Wisconsin lying south of the divide between the waters of Lake Superior and those of the Mississippi.

18. Certain chiefs and braves of the Sioux nation of the Mississippi, while visiting Washington, September 29, 1837, ceded to the United States all their lands east of the Mississippi, and all their islands in said river.

19. The Winnebago nation, by the chiefs and delegates, held a treaty with the government at Washington, November 1, 1837. That nation ceded all their lands east of the Mississippi, and obligated themselves to remove, within eight months after the ratification of the treaty, to certain lands west of the river Mississippi which were conveyed to them by the treaty of September 21, 1832.

20. The Oneida or New York Indians, residing near Green Bay, by their chief and representative, on the 3d of February, 1838, at Washington City, ceded to the United States their title and interest in the land set apart by the treaty made with the Menomonees, May 8, 1831, and the treaty made with the same tribe, October 7, 1832, reserving about 62,000 acres.

21. Another treaty was made at Stockbridge on the 3d of September, 1839, by which the Stockbridge and Munsee tribes (New York Indians) ceded and relinquished to the United States the east half of the tract of 46,080 acres which was laid off for their use on the east side of Lake Winnebago by treaty of October 7, 1832

22. On the 4th of October, 1842, a treaty was made at La Pointe, on Lake Superior, with the Chippewas. All their lands in the northern and northwestern parts of Wisconsin were ceded, to the United States.

23. The Menomonee nation, on the 18th of October, 1848, at Pow-aw-hay-kon-nay, ceded and relinquished to the United States all their lands in the state, wherever situated — the government to furnish the nation as a home, to be held as Indian lands are held, all the country ceded to the United States by the Chippewa nation August 2, 1847, the consideration being the sum of \$350,000, to be paid according to the stipulations of the treaty. A supplementary treaty was made on the 24th of November, 1848, with the Stockbridges — the tribe to sell and relinquish to the United States the township of land on the east side of Lake Winnebago, secured to said tribe by treaty of February 8, 1831.

24. A treaty was made with the Menomonee nation, at the falls of Wolf river, May 12, 1854, being a supplementary treaty to one made October 18, 1848. All the lands ceded to that nation under the treaty last named was ceded to the United States — the Menomonees to receive from the United States a tract of country lying on Wolf river, being townships 28, 29 and 30, of ranges 13, 14, 15, 16.

25. A treaty was made with the Chippewas of Lake Superior, at La Pointe, on the 30th of September, 1854. That nation ceded to the United States all lands before owned by them in common with the Chippewas of the Mississippi — lying in the vicinity of Lake Superior in Wis-

consin and Minnesota.

26. On the 5th of February, 1856, a treaty was held with the Stockbridge and Munsee tribes, at Stockbridge. All the remaining right and title to lands in the town of Stockbridge, possessed by them, was ceded to the United States; and the said tribes were to receive in exchange a tract of land near the southern boundary of the Menomonee reservation, and by treaty made at Keshena, February 11, 1856, the Menomonees ceded two townships to locate the said tribes.

With this last treaty, the Indian title to all the lands of the present state of Wisconsin was ceded to the United States government, except a few small reservations to certain tribes, and a perfect, indefeasible title obtained to all the territory within its borders.

In the region of country which is now the state of Wisconsin, the settlements in early times were, as before stated, near Green Bay and at Prairie du Chien. Soon after the organization of the Northwest territory, the subject of claims to private property therein received much attention. By an act of congress approved March 3, 1805, lands lying in the districts of Vincennes, Kaskaskia and Detroit, which were claimed by virtue of French or British grants, legally and fully executed, or by virtue of grants issued under the authority of any former act of congress by either of the governors of the Northwest or Indiana territory, which had already been surveyed, were, if necessary, to be re-surveyed; and persons claiming lands under these grants were to have until November 1, 1805, to give notice of the same. Commissioners were to be appointed to examine, and report at the next session of congress. An act was also passed, approved April 25, 1806, to authorize the granting of patents for lands, according to government surveys that had been made, and to grant donation rights to certain claimants of land in the district of Detroit, and for other purposes. Another act was approved May 11, 1820, reviving the powers of the commissioners for ascertaining and deciding on claims in the district of Detroit, and for settling the claims to land at Green Bay and Prairie du Chien, in the territory of Michigan; the commissioners to have power to examine and decide on claims filed with the register of the land office, and not before acted on, in accordance with the laws respecting the same. The commissioners discharged the duties imposed on them, and in their report to congress in reference to the claims at Green Bay, they said that the antiquity of this settlement being, in their view, sufficiently established, and that they, being also satisfied that the Indian title must be considered to have been extinguished, decide favorably on the claims presented. About seventy-five titles were confirmed, and patents for the same were sent to the proper parties by the government. In relation to the Prairie du Chien titles, they reported "that they had met few difficulties in their investigations; that, notwithstanding the high antiquity which may be claimed for the settlement of that place, no one perfect title founded on French or British grant, legally authenticated, had been successfully made out; and that but few deeds of any sort have been exhibited." This they attribute to the carelessness of the Canadians in respect to whatever concerned their land titles, and accords with whatever is known in this regard, of the French population throughout the country. They therefore came to the conclusion that whatever claim the people of the place possessed, and might have for a confirmation of their land titles, they must be founded upon proof of continued possession since the year 1796. The commissioners further say, that "since the ancestors of these settlers were cut off, by the treaty which gave the Canadas to the English, from all intercourse with their parent country, the people both of Prairie du Chien and Green Bay have been left, until within a few years, quite isolated, almost without any government but their own; and, although the present population of these settlements are natives of the countries which they inhabit, and, consequently, are by birth citizens of the northwest, yet, until a few years, they have had as little political connection with its government as their ancestors had with the British. Ignorant of their civil rights, careless of their land titles, docility, habitual hospitality, cheerful

submission to the requisitions of any government which may be set over them, are their universal characteristics."

In reference to grants by the French and English governments, the commissioners say, they "have not had access to any public archives by which to ascertain with positive certainty, whether either the French or English ever effected a formal extinguishment of the Indian title at the mouth of the Wisconsin, which also may be said of the land now covered by the city of Detroit, that the French government was not accustomed to hold formal treaties for such purposes with the Indians, and when the lands have been actually procured from them, either by virtue of the assumed right of conquest, or by purchase, evidence of such acquisition is rather to be sought in the traditionary history of the country, or in the casual or scanty relations of travelers, than among collections of state papers. Tradition *does* recognize the fact of the extinguishment of the Indian title at Prairie du Chien by the old French government, before its surrender to the English; and by the same species of testimony, more positive because more recent, it is established also, that, in the year 1781, Patrick Sinclair, lieutenant governor of the province of Upper Canada, while the English government had jurisdiction over this country, made a formal purchase from the Indians of the lands comprehending the settlement of Prairie du Chien."

The territories and states formed from the section known as the Northwest territory, were:

1. The Northwest territory proper (1787-1800) having jurisdiction over all the lands referred to in the ordinance of 1787. In 1802, Ohio was organized as a state with its present boundaries.

2. Indiana territory was formed July 4, 1800, with the seat of government at Vincennes. That territory was made to include all of the northwest, except what afterward became the state of Ohio.

3. Michigan territory was formed June 30, 1805. It was bounded on the south by a line drawn east from the south bend of Lake Michigan, on the west by the center of Lake Michigan. It did not include what is now Wisconsin. The upper peninsula was annexed in 1836. The state of Michigan was formed January 26, 1837, with its present boundaries.

4. Illinois territory was formed March 2, 1810. It included all of the Indiana territory west of the Wabash river and Vincennes, and a line running due north to the territorial line. All of Wisconsin was included therein, except what lay east of the line drawn north from Vincennes.

5. Indiana was admitted as a state April 19, 1816, including all the territory of Indiana territory, except a narrow strip east of the line of Vincennes, and west of Michigan territory, her western boundary.

6. Illinois was admitted as a state April 11, 1818. It included all of Illinois territory south of latitude 42° 30'. All of Wisconsin was added to Michigan territory. In the month of October of that year, the counties of Michilimackinac, Brown and Crawford were formed, comprising besides other territory, the whole of the present state of Wisconsin.

7. Iowa district was attached to Michigan for judicial purposes, June 30, 1834, out of which Des Moines and Dubuque counties were formed.

8. Wisconsin territory was formed April 20, 1836. The state was formed May 29, 1848.

The territory of Wisconsin being a part of the Northwest territory claimed, and congress by direct action confirmed to her, all the rights and privileges secured by the ordinance of 1787, one of which was that congress should have authority to form one or two states in that part of the territory lying north of an east and west line, drawn through the southerly bend or extreme of Lake Michigan. Notwithstanding this plain provision of the ordinance, which is declared to

be articles of compact between the original states and the people and states in the said territory, and forever to remain unalterable unless by consent; yet congress, in establishing the boundaries of the state of Illinois, extended that state about sixty miles north of the line established by the ordinance. This action was claimed to be unjust and contrary to the spirit and letter of the compact with the original states. The legislative assembly of Wisconsin passed resolutions which were approved January 13, 1840, that it was inexpedient for the people of the territory to form a constitution and state government until the southern boundary to which they are so justly entitled by the ordinance of 1787 shall be fully recognized by the parties of the original compact. Owing to various complications over which the territory had no control, her people never succeeded in obtaining from congress what they considered their just rights.

It was also contended by many, that the portion of country set off to Michigan on Lake Superior given as a compensation in part for the strip of land awarded to Ohio from her southern border, should also have constituted a portion of Wisconsin, especially as Michigan never made the least claim to it by her delegate in congress, who was decidedly opposed to the extension of Michigan beyond the limits of the lower peninsula.

The first survey of the public lands northwest of the Ohio river, was made pursuant to an act of congress approved May 20, 1785. The geographer of the confederation was directed to commence the survey of the government lands on the north side of the river Ohio—the first line running north and south, to begin on said river at a point that should be found to be due north from the western termination of a line which had been run as the southern boundary of the state of Pennsylvania; the first line running east and west, to begin at the same point, and to extend through the whole territory. The survey comprised seven ranges, composing ten counties of the present state of Ohio. Other surveys followed when the Indian title was extinguished. Thomas Hutchins, who held the office of geographer, is believed to be the inventor of the mode of laying out land which was then introduced by him, and is still in general use by the government.

Soon after the government had acquired title to the Indian lands south of the Wisconsin river, the public authorities commenced a systematic survey of the lands, for the purpose of bringing the same into market at the earliest possible period.

The public lands in Wisconsin are, as elsewhere in the west, surveyed in uniform rectangular tracts, each six miles square, by lines running north and south, intersecting others, running east and west. These townships are numbered from two lines called the principal meridian and the base line. The principal meridian by which the Wisconsin surveys are governed is that known as the fourth, and extends from the Illinois boundary line to Lake Superior, at the mouth of Montreal river, about two hundred and eighty-two miles. It divides Grant from LaFayette county, and passes through the eastern parts of Vernon, Monroe, Jackson, Clark, Chippewa, and Ashland counties. The base line separates Wisconsin from Illinois in north latitude forty-two degrees, thirty minutes. There are nearly seventeen hundred townships in the state. Each township is subdivided into thirty-six sections by lines running parallel to the sides of the township, one mile apart. A section is, therefore, one mile square, and contains six hundred and forty acres. In fractional townships, each section is numbered the same as the corresponding section in whole townships. Each section is subdivided into half-mile squares, called quarter-sections, each containing one hundred and sixty acres, and the subdivision is carried still further into half-quarter or quarter-quarter sections. It is found necessary to establish at stated intervals standard parallels, commonly called correction lines, to obviate the effect of the curvature of the earth's surface. The convergence in a single township is small, though quite perceptible, the actual excess in length of its south over its north line being in the state

about three rods. The townships north of the base line, therefore, become narrower toward the north, and if continued for too great a distance, this narrowing would cause serious inconvenience. In the state of Wisconsin there are four of these correction lines. The first is sixty miles north of the base line, and accordingly runs between townships ten and eleven. The second is between townships twenty and twenty-one, and so on. They are usually sixty miles apart. On these parallels, which form new base lines, fresh measurements are made from the principal meridian, and the corners of new townships are fixed six miles apart as on the original base line. This method of procedure not only takes up the error due to convergency of meridians, but arrests that caused by want of precision in the surveys already made.

The northern or western sections of townships, which contain more or less than six hundred and forty acres, are called fractional sections, for the reason that the surplusage or deficiency arising from errors in surveying, and from other causes, is by law added to or deducted from the western or northern ranges of sections according as the error may be in running the lines from east to west, or from north to south.

As soon as the surveys were completed in southern Wisconsin and the Green Bay section, and a knowledge of the superior qualities of the land for agricultural purposes were known to the people, the emigration became large. In fact much land was taken possession of by settlers in advance of being surveyed and brought into market. As soon as the land offices at Green Bay, Mineral Point, and Milwaukee were located, public announcement was made by the government, of the time of the sale, when the lands were put up to the highest bidder, and such as were unsold were afterward subject to private entry. The first sales were held at Green Bay and Mineral Point in the year 1835. The sale at Milwaukee was in 1839. From the reports of the general land office, it appears that from 1835 to 1845 inclusive, there were sold at the three land offices from public sale, 2,958,592 $\frac{4}{10}$ acres, amounting to \$3,768,106.51.

Fort Howard military reservation was set apart by order of the president March 2, 1829, and comprised all the lands lying upon Fox river and Green bay, in township 24 north, range 20 east, 4th principal meridian, being about four thousand acres. The lands were abandoned for military purposes, by the war department, December 4, 1850. By an act of congress approved March 3, 1863, the commissioner of the general land office was authorized and directed to cause the reservation, including the site of the fort, containing three and four-hundredths acres, situated in the county of Brown, between Fox river and Beaver Dam run, and which is not included in the confirmations to T. C. Dousman and Daniel Whitney, nor in the grant to the state of Wisconsin, under resolutions of congress approved April 25, 1862, granting lands to Wisconsin to aid in the construction of railroads, to be surveyed and subdivided into lots not less than one-fourth of an acre, and not more than forty acres, deducting such portions of the same as the public interest and convenience may require; and when so surveyed and platted, to be sold separately at auction. On the 10th of November, 1864, under directions of the commissioner, the lands were offered for sale at auction at the fort. About one-half of the lands were sold, and purchased by actual settlers, and but few for speculation. The fort and the lands contiguous were sold for six thousand four hundred dollars. The other lands sold brought about the sum of nineteen thousand dollars.

That portion of the reservation unsold was to be subject to private entry at the appraised value, and that portion lying between Duck creek and Beaver Dam creek, was subject to entry as other public lands were offered.

On the 20th of May, 1868, a joint resolution of congress was approved, by which the commissioner of the general land office was authorized and directed to cause a patent to be issued to the Chicago & Northwestern railroad company, in pursuance of a resolution passed by con-

gress, granting the same to the state of Wisconsin, approved April 25, 1862, and by act of the legislature approved June 16, 1862, granting the same to that company for eighty acres of land, as was surveyed and approved by said commissioner June 11, 1864. The lands thus donated are now used by the railroad company for their depot grounds

The Fort Crawford military reservation was purchased from J. H. Lockwood and James D. Doty by the government in the year 1829, and covered the front and main portions of farm lots numbered thirty-three and thirty-four, of the private land claims at Prairie du Chien, and comprised about one hundred and sixty acres. Fort Crawford was built on this tract in 1829, 1830 and 1831. There was also a reservation of section eighteen, township seven, north of range four west, known as the Cattle Yard. This land was at the mouth of the Kickapoo river, and is now known as the village of Wauzeka. In addition to these lands which were located in Wisconsin, there was a reservation of lands lying on the west side of the Mississippi river, in Iowa. The lands in Wisconsin were relinquished by the secretary of war, January 10, 1851, and were originally set apart by the president of the United States, February 17, 1843.

In the month of April, 1857, the secretary of war authorized Hon. H. M. Rice, of Minnesota, to sell that part of the reservation not improved, in tracts not exceeding forty acres each; and, in the month of June of that year, he sold at auction five hundred and seven acres of the reserve opposite Fort Crawford, none of which was claimed by actual settlers; and in the month of December, 1857, he sold the remainder to claimants of lands, also on the west side, and the section in Wisconsin known as the Cattle Yard, amounting to $177\frac{89}{100}$ acres. A portion of this reservation was subdivided into town lots, 80 by 140 feet, with streets 66 feet and alleys 20 feet wide. November 17, 1864, the acting commissioner of the general land office, by order of the war department, offered for sale at public auction at La Crosse the reservation at Fort Crawford, which had been surveyed and subdivided into town lots, eighty by one hundred and forty feet, with streets sixty-five feet and alleys twenty feet wide, conforming to the plat of the village of Prairie du Chien. The lands unsold were subsequently opened to private entry and disposed of.

The lands of the Fort Winnebago reservation were set apart by order of the president, February 9, 1835, and consisted of the following territory: sections two, three, and that part of four lying east of Fox river, and fractional section nine, all in township twelve, north of range nine east, also fractional section thirty-three, in township thirteen, north of range nine east, lying west of Fox river, and the fraction of section four, township twelve north, of range nine east, lying west of claim numbered twenty-one of A. Grignon, and adjacent to Fort Winnebago, reserved by order of the president, July 29, 1851, the whole amounting to about four thousand acres. September the first, 1853, these lands were by order of the president offered for sale at public auction at the fort, by F. H. Masten, assistant quartermaster United States army, having previously been surveyed into forty acre lots, and were purchased by J. B. Martin, G. C. Tallman, W. H. Wells, Wm. Wier, N. H. Wood, M. R. Keegan, and others.

The first land offices in Wisconsin were established under an act of congress approved June 26, 1834, creating additional land districts in the states of Illinois and Missouri, and in the territory north of the state of Illinois. The first section provides "that all that tract lying north of the state of Illinois, west of Lake Michigan, south and southeast of the Wisconsin and Fox rivers, included in the present territory of Michigan, shall be divided by a north and south line, drawn from the northern boundary of Illinois along the range of township line west of Fort Winnebago to the Wisconsin river, and to be called — the one on the west side, the Wisconsin land district, and that on the east side the Green Bay land district of the territory of Michigan, which two districts shall embrace the country north of said rivers when the Indian title shall be

extinguished, and the Green Bay district may be divided so as to form two districts, when the president shall deem it proper;" and by section three of said act, the president was authorized to appoint a register and receiver for such office, as soon as a sufficient number of townships are surveyed.

An act of congress, approved June 15, 1836, divided the Green Bay land district, as established in 1834, "by a line commencing on the western boundary of said district, and running thence east between townships ten and eleven north, to the line between ranges seventeen and eighteen east, thence north between said ranges of townships to the line between townships twelve and thirteen north, thence east between said townships twelve and thirteen to Lake Michigan; and all the country bounded north by the division line here described, south by the base line, east by Lake Michigan, and west by the division line between ranges eight and nine east," to be constituted a separate district and known as the "Milwaukee land district." It included the present counties of Racine, Kenosha, Rock, Jefferson, Waukesha, Walworth and Milwaukee, and parts of Green, Dane, Washington, Ozaukee, Dodge and Columbia.

An act was approved March 3, 1847, creating an additional land district in the territory. All that portion of the public lands lying north and west of the following boundaries, formed a district to be known as the Chippewa land district: commencing at the Mississippi river on the line between townships twenty-two and twenty-three north, running thence east along said line to the fourth principal meridian, thence north along said meridian line to the line dividing townships twenty-nine and thirty, thence east along such township line to the Wisconsin river, thence up the main channel of said river to the boundary line between the state of Michigan and the territory of Wisconsin. The counties now included in this district are Pepin, Clark, Eau Claire, Dunn, Pierce, St. Croix, Polk, Barron, Burnett, Douglas, Bayfield, Ashland, Taylor, Chippewa, and parts of Buffalo, Trempeleau and Jackson; also, the new county of Price.

An act of congress, approved March 2, 1849, changed the location of the land office in the Chippewa district from the falls of St. Croix to Stillwater, in the county of St. Croix, in the proposed territory of Minnesota; and, by section two of the act, an additional land office and district was created, comprising all the lands in Wisconsin not included in the districts of land subject to sale at Green Bay, Milwaukee, or Mineral Point, which was to be known as the Western land district, and the president was authorized to designate the site where the office should be located. Willow River, now Hudson, was selected. The district was usually known as the St. Croix and Chippewa district, and included St. Croix, La Pointe, and parts of Chippewa and Marathon counties. By an act of congress, approved July 30, 1852, so much of the public lands in Wisconsin as lay within a boundary line commencing at the southwest corner of township fifteen, north of range two east of the fourth principal meridian, thence running due east to the southeast corner of township fifteen, north of range eleven, east of the fourth principal meridian, thence north along such range line to the north line of the state of Wisconsin, thence westwardly along said north line to the line between ranges one and two east of fourth principal meridian, thence south to the place of beginning, were formed into a new district, and known as the Stevens Point land district, and a land office located at that place.

The boundaries enclosed the present counties of Juneau, Adams, Marquette, Green Lake, Waushara, Waupaca, Portage, Wood, Marathon, Lincoln, Shawano, New and Marinette. The La Crosse land district was formed of the following territory: "Commencing at a point where the line between townships ten and eleven north touches the Mississippi river, thence due east to the fourth principal meridian, thence north to the line between townships fourteen and fifteen north, thence east to the southeast corner of township fifteen north, of range one east of the

fourth principal meridian, thence north on the range line to the south line of township number thirty-one north, thence west on the line between townships number thirty and thirty-one to the Chippewa river, thence down said river to its junction with the Mississippi river, thence down said river to the place of beginning." The present counties of Vernon, La Crosse, Monroe, Buffalo, Trempealeau, Eau Claire, Clark, and parts of Juneau and Chippewa were included in its limits.

By act of congress, approved February 24, 1855, an additional district was formed of all that portion of the Willow river land district lying north of the line dividing townships forty and forty-one, to be called the Fond du Lac district—the office to be located by the president as he might from time to time direct. The present counties of Douglas, Bayfield, Ashland, and part of Burnett were included within its boundaries.

By an act of congress, approved March 3, 1857, so much of the districts of land subject to sale at La Crosse and Hudson, in the state of Wisconsin, contained in the following boundaries, were constituted a new district, to be known as the Chippewa land district: North of the line dividing townships twenty-four and twenty-five north; south of the line dividing townships forty and forty-one north; west of the line dividing ranges one and two east; and east of the line dividing ranges eleven and twelve west. The location of the office was to be designated by the president as the public interest might require. The present counties of Chippewa, Taylor, Eau Claire and Clark were in this district.

There are at the present time six land offices in the state. They are located at Menasha, Falls of St. Croix, Wausau, La Crosse, Bayfield and Eau Claire. By the provisions of law, when the number of acres of land in any one district is reduced to one hundred thousand acres, subject to private entry, the secretary of the interior is required to discontinue the office, and the lands remaining unsold are transferred to the nearest land office, to be there subject to sale. The power of locating these offices rests with the president (unless otherwise directed by law), who is also authorized to change and re-establish the boundaries of land districts whenever, in his opinion, the public service will be subserved thereby.

The pre-emption law of 1830 was intended for the benefit of actual settlers against competition in open market with non-resident purchasers. It gave every person who cultivated any part of a quarter section the previous year, and occupied the tract at the date mentioned, the privilege of securing it by payment of the minimum price at any time before the day fixed for the commencement of the public sale. To avail himself of this provision he was to file proof of cultivation and occupancy. As men frequently located claims in advance of the survey, it occasionally happened that two or more would find themselves upon the same quarter section, in which case the pre-emption law permitted two joint occupants to divide the quarter section equally between them, whereupon each party received a certificate from the land office, authorizing him to locate an additional eighty acres, elsewhere in the same land district, not interfering with other settlers having the right of preference. This was called a *floating right*. This provision of the law was ingeniously perverted from its plain purpose in various ways.

As fast as these evasions came to the notice of the department, all certificates given to occupants of the same quarter section in excess of the two first, or to more than one member of the same family, to employees, to any person who had not paid for eighty acres originally occupied, as well as those which were not located at the time of such payment, and the additional tract paid for before the public sale, were held to be worthless or fraudulent; but a large number of these certificates had been issued, and passed into the hands of speculators and designing men, and were a source of almost endless vexation and annoyance to settlers. The law of 1830

expired by limitation in one year from its passage, but was revived by the law of 1834 for two years. In the interim no settler could obtain his land by pre-emption. The law of 1834 extended only to those who had made cultivation in 1833, consequently the settlers of later date were excluded from its benefits. Meanwhile the fraudulent floats were freely used to dispossess actual settlers as late as 1835.

The pre-emption law of congress, approved September 4, 1841, provided that every person who should make a settlement in person on public land, and erect a dwelling, should be authorized to enter a quarter section (one hundred and sixty acres), at the minimum price (one dollar and twenty-five cents per acre), and thus secure the same against competition; and if any person should settle upon and improve land subject to private entry, he might within thirty days give notice to the register of the land office of his intention to claim the land settled upon, and might within one year upon making proof of his right, enter the land at the minimum price.

At the public land sales at Mineral Point, held in 1835, all those tracts on which lead was found, or on which it was supposed to exist, were reserved to the United States, and were leased under certain regulations by the government for a rent of ten per centum of all the lead raised. The quantity of land thus reserved was estimated at one million acres. Considerable difficulty was found in collecting these rents, and subsequently it was abandoned, as the amount expended in collecting exceeded the value of the lead collected. In the period of four years the government suffered a loss of over nineteen thousand dollars.

The act of congress, approved July 11, 1846, authorized the sale of the reserved mineral lands in Illinois, Wisconsin and Iowa, and provided that, after six months' public notice, the lands should not be subject to the rights of pre-emption until after the same had been offered at public sale, when they should be subject to private entry. The law also provided, that, upon satisfactory proof being made to the register and receiver of the proper land office, any tract or tracts of land containing a mine or mines of lead ore actually discovered and being worked, would be sold in such legal subdivisions as would include lead mines, and no bid should be received therefor at less than the sum of two dollars and fifty cents per acre, and if such tract or tracts should not be sold at such public sale, at such price, nor should be entered at private sale within twelve months thereafter, the same should be subject to sale as other lands. This act was changed by an act approved March 3, 1847, providing that any one being in possession by actual occupancy of a mine discovered prior to the passage of this act, who should pay the same rents as those who held leases from the secretary of war, should be entitled to purchase the lands prior to the day of sale at five dollars per acre. Mineral lands were to be offered for sale in forty acre pieces, and no bids were to be received less than five dollars per acre, and if not sold they were then to be subject to private entry at the same price. In 1847 or 1848 the reserved mineral lands were sold at public sale at Mineral Point at two dollars and fifty cents per acre, and they were all disposed of at that price.

Soon after the formation of Wisconsin territory, an act was passed by its legislature, approved January 5, 1838, incorporating the Milwaukee and Rock river canal company, and by an act of congress approved June 18 of the same year, a grant of land was made to aid in the construction of the canal. The grant consisted of the odd-numbered sections on a belt of ten miles in width from Lake Michigan to Rock river, amounting to 139,190 acres. Of those lands 43,447 acres were sold at public sale in July, 1839, at the minimum price of two dollars and fifty cents per acre. Work was commenced on the canal at Milwaukee, and the Milwaukee river for a short distance from its outlet was improved by the construction of a dam across the river, which was made available for manufacturing and other purposes. A canal was also built about a mile in length and forty feet wide, leading from it down on the west bank of the river. Much

dissatisfaction subsequently arose; the purchasers at this sale, and others occupying these canal and reserved lands felt the injustice of being compelled to pay double price for their lands, and efforts were made to repeal all laws authorizing further sales, and to ask congress to repeal the act making the grant. The legislation on the subject of this grant is voluminous. In 1862 the legislature of the state passed an act to ascertain and settle the liabilities, if any, of Wisconsin and the company, and a board of commissioners was appointed for that purpose. At the session of the legislature in 1863, the committee made a report with a lengthy opinion of the attorney-general of the state. The views of that officer were, that the company had no valid claims for damages against the state. In this opinion the commissioners concurred. On the 23d of March, 1875, an act was approved by the governor, giving authority to the attorney-general to discharge and release of record any mortgage before executed to the late territory of Wisconsin, given to secure the purchase money or any part thereof of any lands granted by congress to aid in the construction of this canal. The quantity of lands unsold was subsequently made a part of the 500,000 acre tract granted by congress for school purposes. It is believed the whole matter is now closed against further legislative enactments.

The next grant of lands made by congress for internal improvements in Wisconsin, was one approved August 8, 1846, entitled "an act to grant a certain quantity of land to aid in the improvement of the Fox and Wisconsin rivers, and to connect the same by canal." By this act there was granted to Wisconsin on her becoming a state, for improving the navigation of the above-named streams, and constructing the canal to unite the same, a quantity of land equal to one-half of three sections in width on each side of Fox river, and the lakes through which it passes from its mouth to the point where the portage canal should enter the same, and each side of the canal from one stream to the other, reserving the alternate sections to the United States with certain provisions in relation thereto. On the 3d of August, 1854, an act of congress was approved, authorizing the governor of Wisconsin to select the balance of lands to which the state was entitled to under the provisions of the act of 1846, out of any unsold government lands subject to private entry in the state, the quantity to be ascertained upon the principles which governed the final adjustment of the grant to the state of Indiana, for the Wabash and Erie canal, approved May 9, 1848. In the years 1854 and 1855, acts of congress were passed, defining and enlarging the grant. Under the grants of 1846, 1854 and 1855, the number of acres donated for this purpose and certified to the state, was 674,100.

After the admission of Wisconsin into the Union, by an act of its legislature, approved August 8, 1848, a board of public works was created, through which the work of improving the said rivers, by the application thereto of the proceeds of the sale of the lands granted by congress, was undertaken by the state.

It soon became apparent that the moneys realized from the sale of lands were insufficient to meet the obligations of the state issued by its board of public works as they became due; and in 1853 the work was turned over to the Fox and Wisconsin Improvement company, a corporation created under an act of the legislature of Wisconsin approved July 6, 1853. In 1856, by an act of the legislature of Wisconsin, approved October 3, 1856, the lands granted by congress then unsold were granted by the state, through the said company, to trustees, with power to sell, and to hold the proceeds in trust for the payment of state indebtedness, the completion of the work, thereafter for the payment of bonds issued by the said company, and the balance, if any, for the company itself.

In February, 1866, the trustees, in execution of the powers contained in the deed of trust made to them, and pursuant to a judgment of the circuit court of Fond du Lac county, sold at public sale at Appleton, Wisconsin, the works of improvement and the balance of lands granted

Chas. T. Deissner
(DECEASED)
PEWAUKEE.

by congress then unsold, and applied the proceeds to the purposes expressed in the deed of trust. The proceeds were sufficient to pay in full the expenses of the trust, the then outstanding state indebtedness, and to provide a fund sufficient to complete the work according to the plan specified in the act approved October 3, 1856.

Under an act of the legislature of Wisconsin approved April 13, 1861, and the acts amendatory thereof, the purchasers at said sale, on the 15th day of August, 1866, filed their certificate in the office of the secretary of state, and thereby became incorporated as the Green Bay and Mississippi canal company, holding, as such company, the said works of improvement.

At a subsequent date, under instructions from the engineer department of the United States, the surveys of the Fox and Wisconsin rivers were placed in the charge of General G. K. Warren, and by act of congress approved July 7, 1870, the secretary of war was authorized to appoint a board of arbitrators to ascertain how much the government should pay to the successors of the Improvement company, the Green Bay and Mississippi canal company, for the transfer of all its property and rights; and by a subsequent act, approved June 10, 1872, an appropriation was made therefor.

The legislation on matters connected with the Fox and Wisconsin river improvement would make a chapter of itself. The work is now in charge of the government, and will be prosecuted to completion in a satisfactory manner.

On the 29th of May, 1848, an act was approved by the president "to enable the people of Wisconsin territory to form a constitution and state government, and for the admission of such state into the Union," by which certain propositions were to be submitted to the convention which were to be acted upon, and subsequently submitted to the people for their approval. The first constitutional convention was held in October, 1846, and, having framed a constitution, it was submitted to a vote of the people at the election in 1847, and it was rejected. The second convention met December 15, 1847, and, having formed a constitution, it was adopted by the people at the election in 1848. The following are the propositions proposed by congress:

1. That section sixteen numbered in every township of the public lands of said state, and where such section has been sold or otherwise disposed of, other lands equivalent thereto, and as contiguous as may be, shall be granted to the said state for the use of schools.

2. That seventy-two sections, or two entire townships, of land set apart and reserved for the use and support of a university by act of congress approved June 12, 1838, are hereby granted and conveyed to the state, to be appropriated solely to the use and support of such university in such manner as the legislature may prescribe.

3. That ten entire sections of land to be selected and located under the direction of the legislature, in legal subdivisions of not less than one quarter of a section from any of the unappropriated lands belonging to the United States within the state are granted to the state for completing the public buildings, or for the erection of others at the seat of government, under the direction of the legislature.

4. That all salt-springs within the state, not exceeding twelve in number, shall be granted to the state, to be selected by the legislature, and when selected, to be used or disposed of on such terms, conditions, and regulations as the legislature shall direct.

The title to all lands and other property which accrued to the territory of Wisconsin by grant, gift, purchase, forfeiture, escheat, or otherwise, were, by the provisions of the constitution of the state, vested in the state; and the people of the state, in their right of sovereignty, were declared to possess the ultimate property in and to all lands within its jurisdiction; and all lands, the title of which shall fail from a defect of heirs, shall revert or escheat to the people.

The act of congress for the admission of the state into the Union gave formal assent to the

grant relative to the Fox and Wisconsin river improvement, and the lands reserved to the United States by said grant, and also the grant to the territory of Wisconsin, for the purpose of aiding in opening a canal to connect the waters of Lake Michigan with those of Rock river, were to be offered for sale at the same minimum price, and subject to the same rights of pre-emption as other public lands of the United States.

By the provisions of the state constitution, the secretary of state, the state treasurer and attorney-general, were constituted a board of commissioners for the sale of the school and university lands, and for the investment of the funds arising therefrom. In the year 1850 the commissioners put into market, for the first time, the school lands which had been donated to the state. The total quantity of lands offered was 148,021, 44-100 acres, which sold for the sum of \$444,265.19.

By an act of congress, approved September 4, 1841, there were granted to the state 500,000 acres of land, which were, by act of the territorial legislature of 1849, appropriated to the school fund, and the unsold lands of the Milwaukee and Rock river canal company, amounting to about 140,000 acres, were to be included as a part of the above grant. These lands, and the sixteenth section of each township, make up the whole of the school lands of the state. The whole number of acres sold up to the year 1877 is 1,243,984 acres, and there remain unsold, subject to entry, 216,016 acres.

The state university land grant was made in 1838, and seventy-two sections set apart and reserved. The lands were selected in 1845 and 1846. On the 15th of December, 1854, an act of congress was approved, relinquishing to the state the lands reserved for the salt-springs, and seventy-two sections were granted in lieu thereof, in aid of the university of the state. The number of acres amounts to 92,160, all of which have been sold except 4,407 acres, which are subject to entry. Under the re-organization and enlargement of the university, under provisions of chapter 114, of general laws of 1866, section thirteen provides, among other things, that the income of a fund to be derived from the sales of the two hundred and forty thousand acres, granted by congress by act approved July 2, 1862, entitled: "An act donating lands to the several states and territories which may provide colleges for the benefit of agriculture and mechanic arts," be devoted to the state university, and the funds arising therefrom to be known as the "agricultural college fund." All of the grant of lands have been sold except 51,635 acres. The quantity of lands donated by act of congress August 6, 1846, for the purpose of completing or erecting public buildings at the seat of government, known as "Capitol Lands," amounted to ten entire sections, or six thousand four hundred acres. A grant of lands was made to the state by act of congress, approved September 28, 1850, of all the swamp and overflowed lands within its limits. The total number of acres of this grant, as certified to the state from the government, to the year 1877, is 1,869,677.

A grant of land was made by congress, approved March 3, 1863, for the construction of a military road from Fort Wilkins, Michigan, to Fort Howard, Wisconsin, of every alternate section of public lands, designated by even numbers for three sections in width on each side of said road, and subject to the disposal of the legislature. In 1865 sales of land were made to the number of 85,961.89 acres, which realized the sum of \$114,856.54.

An act of congress was approved June 25, 1864, granting lands to the state to build a military road from Wausau, Wisconsin, to Ontonagon, on Lake Superior, of every alternate section of land designated as odd sections, for three sections in width on each side of the road. The grant was accepted by the state by law, approved April 10, 1865.

An act was also passed by congress, approved April 10, 1866, granting to the state of Wisconsin a donation of public lands to aid in the construction of a breakwater and harbor and ship

canal at the head of Sturgeon bay, Wis., to connect the waters of Green bay with Lake Michigan. The grant was for 200,000 acres of land. The grant was accepted by the legislature of 1868. In 1874, the same body by resolution transferred to the Sturgeon bay and Lake Michigan ship canal and harbor company 32,342 acres, and the remaining portion was authorized to be sold for agricultural purposes by said company.

The first railroad grant in Wisconsin was by act of congress, approved June 3, 1856, by the first section of which there was granted to the state, for the purpose of aiding in the construction of a railroad from Madison or Columbus, by the way of Portage City, to the St. Croix river or lake, between townships twenty-five and thirty-one, and from thence to the west end of Lake Superior and to Bayfield; and from Fond du Lac, on Lake Winnebago, northerly to the state line, every alternate section of land designated by odd numbers, for six sections in width on each side of said roads, respectively; the land to be applied exclusively in the construction of said roads, and to no other purpose whatever, and subject to the disposal of the legislature, and the same shall remain public highways for the use of the government, free from toll and other charges upon the transportation of property or troops of the United States, with other conditions as to the disposal of said lands.

The grant was accepted by the legislature by an act approved October 8, 1856, and on the 11th of the same month an act was approved granting a portion of the lands to the La Crosse & Mississippi railroad company, who were to carry out all the requirements of the original grant. A supplementary act was approved the same session, October 13, incorporating the Wisconsin & Superior railroad, which company was required to commence the construction of their road on or before January 1, 1857, and to complete the same to Oshkosh before August 1, 1858. Of this land grant John W. Cary says: "That portion of the grant given to aid in the construction of a railroad northerly to the state line was conferred on the Wisconsin & Superior railroad company. This company was organized in the interest of the Chicago, St. Paul & Fond du Lac railroad company, and that part of the grant was transferred to it. The road was, in 1859, extended to Oshkosh, and thence to Menasha, and finally to Green Bay. In the panic of 1857, the company failed to meet its obligations, but was afterward enabled to go on, and continued in possession until June 2, 1859, when its road was sold on the foreclosures of the mortgages given thereon; and on the sixth of the same month the present Chicago & Northwestern railroad company was organized under the statute, by purchasers at said sale, and took possession."

A large portion of the original grant was given for the construction of a road from Madison or Columbus to the St. Croix river, as before stated. The La Crosse company, during the years 1857 and 1858, completed its main line to La Crosse; the Watertown line, from Watertown to Columbus, and partially graded the line from Madison to Portage City. Neither it nor its successors ever received any part of the lands of the land grant.

In 1856 and 1857, the La Crosse & Milwaukee railroad graded most of the line from Madison to Portage. After the failure of the company, this line was abandoned, and so remained until 1870, when a new company was organized, under the name of the Madison & Portage City railroad company. In 1873, an act was passed chartering the Tomah & Lake St. Croix railroad company, and repealing and annulling that portion of the land grant which bestowed the lands from Tomah to Lake St. Croix upon the La Crosse company, and bestowing the same upon the company chartered by this act. This road is known as the West Wisconsin railroad.

An act of congress was approved May 5, 1864, granting lands to aid in the construction of certain roads in the state. This was a re-enactment of the law of 1856, and divided the grant in three sections, one of which was for a road from a point on the St. Croix river or lake, between

townships twenty-five and thirty-one, to the west end of Lake Superior, and from some point on the line of said road, to be selected by the state, to Bayfield — every alternate section designated by odd numbers, for ten sections in width on each side of said road, with an indemnity extending twenty miles on each side, was granted, under certain regulations; another, for aiding in building a road from Tomah to the St. Croix river, between townships twenty-five and thirty-one — every alternate section by odd numbers, for ten sections in width on each side of the road; another for aiding and constructing a railroad from Portage City, Berlin, Doty's Island, or Fond du Lac, as the legislature may determine, in a northwestern direction, to Bayfield, on Lake Superior, and a grant of every alternate section designated by odd numbers, for ten sections in width on each side of said road, was donated.

The legislature of 1865 failed to agree upon a disposition of the grant. The succeeding legislature conferred the grant partly upon the "Winnebago & Lake Superior Railroad Company," and partly upon the "Portage & Superior Railroad Company," the former April 6, 1866, and the latter April 9, 1866. The two companies were consolidated, under the name of the "Portage, Winnebago & Superior Railroad," by act of the legislature, March 6, 1869, and by act of legislature approved February 4, 1871, the name was changed to the "Wisconsin Central Railroad."

HEALTH OF WISCONSIN.

By JOSEPH HOBBS, M.D.

An article on state health, necessarily embracing the etiology, or causes of disease, involves the discussion of the geographical position of the state; its area, physical features; its elevations, depressions; water supply; drainage; its mean level above the sea; its geology; climatology; the nationality of its people; their occupations, habits, food, education; and, indeed, of all the physical, moral and mental influences which affect the public health.

GEOGRAPHICAL POSITION.

The geographical position of Wisconsin, considered in relation to health, conveys an immediate and favorable impression, which is at once confirmed by a reference to the statistical atlas of the United States. On its north it is bounded by Lake Superior, Minnesota, and the northern peninsula of Michigan; on the south by Illinois; on the east by Lake Michigan, and on the west by the Mississippi. It lies between $42^{\circ} 30'$ and $46^{\circ} 55'$ N. latitude, and between 87° and $92^{\circ} 50'$ W. long.; is 285 miles long from north to south, and 255 in breadth from east to west, giving it an area of some 53,924 square miles, or 34,511,360 acres. Its natural surface divisions, or proportions, are 16 per cent. of prairie, 50 of timber, 19 of openings, 15 of marsh, mineral undefined. North of 45° the surface is nearly covered with vast forests of pine. The proportion of the state cultivated is nearly one-sixth.

PHYSICAL FEATURES.

Among these, its lacustrine character is most conspicuous, so much so that it may not inaptly be called the state of a thousand lakes, its smaller ones being almost universal and innumerable.

It has an almost artificially perfect arrangement of its larger rivers, both for supply and drainage, is rolling in its surface, having several dividing ridges or water sheds, and varies from 600 to 1,600 feet above the level of the sea, Blue Mounds being 1,729 feet above sea level. Its pine and thickly wooded lands are being rapidly denuded, and to some extent converted to agricultural purposes; its marshes in the north are being reclaimed for cranberry cultivation, and in the more thickly settled parts of the state for hay purposes. The surface of the state is beautifully diversified with stream, waterfall and rapids; richly wooded bluffs several hundred feet in height, assuming the most romantic and pleasing forms, and composed of sandstone, magnesian limestone, granite, trap, etc. The health and summer resorts of Wisconsin are illustrative of its beauty, and its numerous mineral springs have long since formed an important feature of its character for salubrity.

GEOLOGY.

The geology of Wisconsin does not require from us but a very general notice, as it is only from its relation to disease that we have to consider it. This relation is in a measure apparent in the fact that everywhere the topographical features are governed by the strata below them. The relationship will be seen still further in the chemical or sanitary influence of the geological structures. Through the greater part of the south half of the state limestone is found, the cliff prevailing in the mineral region, and the blue in the other parts; while in the north part of the state the primitive rocks, granite, slate, and sandstone prevail. South of the Wisconsin river sandstone in layers of limestone, forming the most picturesque bluffs, abounds. While west of Lake Michigan extends up to these rocks the limestone formation, being rich in timber or prairie land. Sandstone is found underneath the blue limestone. The general dip of the stratified rocks of the state is toward the south, about 8 feet to the mile.

Medical geology treats of geology so far only as it affects health. Thus, some diluvial soils and sands are known to be productive of malarial fevers; others, of a clayey character, retaining water, are productive of cold damp, and give rise to pulmonary and inflammatory diseases; while others still, being very porous, are promotive of a dry and equable atmosphere. In the Potsdam rocks arise our purest waters and best supply, while our magnesian limestone rocks (a good quality of this kind of rock being composed of nearly equal parts of carbonate of lime and carbonate of magnesia) affect the water to the extent of producing simple diarrhœa in those unaccustomed to drinking it, as is observed in southern visitors, and was especially noticeable in the rebel prisoners at Camp Randall, though singularly enough do not seem to produce stone and gravel, as is alleged of the same kind of water in the north of England. Why this is so—if so—is a question of some interest. Goitre and cretinism are both attributed to the use of the same magnesian limestone water. Goitre is by no means an uncommon affection here, but not common enough, perhaps, to warrant us in thinking its special cause is in the water. Boiling the water is a preventive of all injurious effects. There is still another objection—particularly applicable to cities—to this kind of water, the carbonates of lime and magnesia which it contains, not simply making it hard, but giving it the power to promote the decomposition of organic matters, and thus where the soil is sandy or porous, endangering the purity of our well-water. Geology in general affects all our soils and their products; all our drainage; even our architecture, the material with which we build. Our building stone for half of the state is a magnesian limestone, a rather soft or poor quality of which will absorb one-third of its bulk of water, or two and a half gallons to the cubic foot, while most kinds of sandstone are nearly as porous as loose sand, and in some of them the penetrability for air and water is the same. (A single brick of poor quality will absorb a pint of water). Such materials used in the construction

of our dwellings, without precautionary measures, give rise to rheumatism, other grave diseases, and loss of strength. Besides, this character of stone absorbs readily all kinds of liquid and gaseous impurities, and though hardening in dry air, decays soon when exposed to underground moisture. The material of which our roads are made, as well as the kind of fuel we use in our homes, have the same unquestionable relationship to geology and disease.

DRAINAGE.

The natural drainage of the state, bearing in mind that the mean elevation of its hydrographical axis is about 1,000 feet above the sea level, is as excellent as it is obvious. (A line running from Lake Michigan across the state to the Mississippi, shows an elevation of about 500 feet). North its drainage is by a few rapid but insignificant streams into Lake Superior, while east it increases greatly and enters Lake Michigan by way of Green bay. The principal part of the supply and drainage, however, is from the extreme north to the southwest through the center of the state, by five large rivers, which empty themselves into the Mississippi at almost equal distances from each other.

CLIMATOLOGY.

The climatology of Wisconsin will be exhibited in the observations taken at different times, for longer or shorter periods, and at different points of the state. But it must be borne in mind that climate depends quite as much and very frequently more upon the physical surroundings, upon the presence of large bodies of water, like our lakes, upon large forests, like our pineries, like our heavy hard-woods, and of land elevations and depressions, upon isothermal lines, etc., as it does upon latitude. Our historic period is of a character too brief for us to assume to speak of our climate, or of all the changing causes which influence it—in a positive manner, our horticultural writers, to make the difficulty still greater, affirming that it has *several climates within itself*; still, sufficient data have been gathered from sufficiently reliable sources to enable us to form a tolerably accurate idea of the subject.

The great modifiers of our climate are our lakes. These, bounding as they do, the one, Lake Superior (600 feet above the level of the sea, 420 miles long and 160 broad), on the north side of the state, and the other, Lake Michigan (578 feet above the sea level, 320 miles long and 84 broad), on the east side of the state, serve to govern the range of the thermometer and the mean temperature of the seasons, as much as they are governed in New England by the ocean. Our climate is consequently very much like that of the New England sea-board. They both exhibit the same extremes and great extremes, have the same broadly marked continental features at some seasons, and decided tropical features at others. It is of special interest in this connection to know that the climate between the eastern coast and the lakes increases in rigor as one advances west until the lakes are reached, and again becomes still more rigorous as one advances into the interior west of the lakes, thus affording proof, if proof were wanting, of the modifying and agreeable influences of large bodies of water.

During the winter the mean temperature of the east on the New England coast is 8.38 higher than the west (beyond the lakes); during the spring 3.53 lower; during the summer 6.99 lower; and during the autumn 1.54 higher. In the mean temperature for the year there is but a fractional difference. That the winters are less rigorous and the summers more temperate on the Great Lakes is demonstrated to be owing not to elevation, but, as on the ocean, to the equalizing agency of an expanse of water.

On the lakes the annual ratio of fair days is 117, and on the New England coast 215; the

cloudy days are as 127 to 73; the rainy as 63 to 46, and the snowy as 45 to 29. In the former the prevailing weather is cloudy, and in the latter it is fair. The immense forests on the upper lake shores of course exercise a considerable influence in the modification of our temperature, as well as in the adding to our rain-fall and cloudy days. A climate of this character, with its attendant rains, gives us that with which we are so abundantly supplied, great variety of food, both for man and beast, the choicest kinds of fruits and vegetables in the greatest profusion, and of the best quality, streams alive with fish, woods and prairies with game, the noblest trees, the most exquisite flowers, and the best breeds of domestic animals the world can boast of.

The semi-tropical character of our summer, and its resemblance to that of New England, is shown by the mean temperature — 70° — for three months at Salem, Massachusetts, at Albany, New York, at southern Wisconsin, Fort Snelling and Fort Benton on the Upper Missouri, being the same; while at Baltimore, Cincinnati and St. Louis, it is 75° , and around the gulf of Mexico it is 80° . Another feature of our climate is worthy the notice of invalids and of those who make the thermometer their guide for comfort. It is a well-ascertained fact that during the colder seasons the lake country is not only relatively, but positively, warmer than places far south of it. The thermometer, during the severe cold of January, 1856, did not fall so low at the coldest, by 10° to 15° at Lake Superior as at Chicago at the same time. This remark holds true of the changes of all periods of duration, even if continued over a month. The mean temperature at Fort Howard, Green Bay, Wisconsin, 600 feet above the level of the Atlantic, latitude $44^{\circ} 40'$, longitude 87° , observations for nine years, is 44.93; and at Fort Crawford, Prairie du Chien, Wisconsin, 580 feet above the level of the Atlantic, latitude $43^{\circ} 3'$, longitude $90^{\circ} 53'$, observations for four years, is 45.65, giving a just idea of our mean temperature for the state. Under the head of distribution of heat in winter, it is found that the maximum winter range at Fort Winnebago, Wisconsin, for sixteen years, is 9.4.

HYETAL OR RAIN CHARACTER.

Wisconsin is situated within what is termed the *area of constant precipitation*, neither affected by a rainy season, nor by a partial dry season. The annual quantity of rain on an average for three years at Fort Crawford, was 29.54 inches, and at Fort Howard the mean annual on an average of four years, was 38.83 inches. The annual quantity of rain, on an average of three years was 31.88 inches at Fort Winnebago, situate (opposite the portage between the Fox and Wisconsin rivers) 80 miles west of Lake Michigan and 112 miles southwest of Green Bay. The rain-fall is less in the lake district than in the valley of the Mississippi in the same latitudes. One of the peculiarities of our winters is the almost periodical rain-fall of a few days in the middle of the winter (usually in the middle of January), which extends to the Atlantic coast, while north and northwest of us the dry cold continues without a break, winter being uniform and severe, characterized by aridity and steady low temperature. Another peculiarity of our climate is, the number of snowy and rainy days is increased disproportionately to the actual quantity — the large bodies of water on the boundaries of the state, contrary to the popular opinion, reducing the annual quantity of rain in their immediate vicinity instead of adding to it, the heavier precipitation being carried further away. One of the most pleasing features of our climate is its frequent succession of showers in summer, tempering as it does our semi-tropical heat, increasing the fertility of the soil, and carpeting our prairies with a green as grateful to the eye as that of England.

The hygrometric condition of Wisconsin may be judged of with proximate accuracy by that given of Poultney, Iowa:

Day.	Temperature of Air.	Temperature of Evaporat'n	Humidity, per cent.	Day.	Temperature of Air.	Temperature of Evaporat'n	Humidity, per cent.
10th.....	92°	78°	51	19th.....	94°	81°	55
11.....	87	75	55	20.....	97	81	48
12.....	92	77	48	21.....	96	80	47
13.....	96	81	50	29.....	81	72	63
14.....	93	78	44	30.....	84	71	50

The average depth of snow for three years, at Beloit, Wisconsin, was twenty-five inches, while at Oxford county, Maine, the average for twelve years was ninety inches. The isohyetal lines of the mean precipitation of rain and melted snow, for the year 1872, show that of Wisconsin to be thirty-two.

ISOTHERMS.

The mean temperature of spring is represented by the isotherm of 45° F. which enters Wisconsin from the west about forty miles south of Hudson, passing in a nearly southeast direction, and crosses the south line of the state near the west line of Walworth county. It then passes nearly around the head of Lake Michigan, then northeast until it reaches the latitude of Milwaukee, whence it passes in a somewhat irregular course east through Ontario, New York, and Massachusetts, entering the ocean in the vicinity of Boston. The summer mean isotherm of 70° F. enters Wisconsin from the west but little farther north than the spring isotherm, and passes through the state nearly parallel with the course of that line, crossing the southern boundary near the east line of Walworth county; passing through Chicago it goes in a direction a little south of east, and enters the Atlantic at New Haven. The mean isotherm of 47° F. for autumn, enters the state about twenty miles north of Prairie du Chien, passing in a direction a little north of east through Portage, and enters Lake Michigan near Manitowoc. The isotherm of 20° F. representing the mean temperature of winter, enters the state near Prairie du Chien, passes east and north and enters Lake Michigan at Sturgeon bay. The annual mean temperature is represented by the isotherm of 45° F. which enters the state near Prairie du Chien, passes across the state in a direction a little south of east, and enters Lake Michigan a little south of Milwaukee.

What influence these isotherms have upon our belts of disease there are no data to show. But from their influence upon vegetable life, one can not but infer a similar good influence on the animal economy. This is a question for the future.

BAROMETRICAL.

Yearly mean of barometer at 32° F. as observed at the University of Wisconsin, altitude 1,088 feet above the sea :

1869.....	28.932 inches.	1873.....	28.892 inches.
1870.....	28.867 "	1874.....	28.867 "
1871.....	28.986 "	1875.....	28.750 "
1872.....	28.898 "	1876.....	28.920 "

Atmospheric pressure, as indicated by the barometer, is an important element in the causation of disease, far more so than is generally thought. The barometer indicates not only the coming of the storm, but that state of the atmosphere which gives rise to health at one time, and to disease at another. When the barometer is high, both the body and mind have a feeling of elasticity, of vigor and activity, and when the barometer ranges low, the feelings of both are just the reverse; and both of these states, commonly attributed to temperature, are mostly the result of change in the barometric pressure. Many inflammations, as of the lungs, etc., commonly

attributed to change in the temperature, have their origin in barometrical vicissitudes.

WINDS.

Generally speaking, the atmospheric movement is from the west. It is of little purpose what the surface wind may be, as this does not affect the fact of the *constancy* of the *westerly winds* in the middle latitudes. The showers and cumulus clouds of the summer always have this movement. The belt of westerly winds is the belt of constant and equally distributed rains, the feature of our winds upon which so much of our health and comfort depends.

CLIMATOLOGICAL CHANGES FROM SETTLING THE STATE.

There are many theories afloat concerning the effects of reclaiming the soil and the destruction of its forests. To us, a new people and a new state, the question is one of great moment, the more so that it is still in our power not only to watch the effects of such changes, but still more so to control them in a measure for our good. As to the effects upon animal and vegetable life, it would appear that so far as relates to the clearing away of forests, the whole change of conditions is limited to the surface, and dependent for the most part on the retention and slow evaporation in the forest, in contrast with the rapid drainage and evaporation in the open space. The springs, diminishing in number and volume in our more settled parts of the state, do not indicate a lessening rain-fall. It is a well ascertained fact that in other places so denuded, which have been allowed to cover themselves again with forests, the springs reappear, and the streams are as full as before such denudation. With us, happily, while the destruction of forests is going on in various parts of the state, their *second growth* is also going on, both in the pineries, where new varieties of hard-wood take the place of the pine, and in the more cultivated parts of the state, cultivation forbidding, as it does, the practice so much in vogue some years ago, of running fires through the undergrowth. Thus, though the renewal of forests may not be keeping pace with their destruction, it would seem clear that as time advances, the springs and streams in the more cultivated sections of the state will fill and flow again, increasing in proportion as the second growth increases and expands.

The change, however, from denudation, though strictly limited to the surface, affects the surface in other ways than simply in the retention and evaporation of rain. When the winter winds are blowing, the want of the sheltering protection of belts of trees is bitterly felt, both by man and beast. And so, too, in the almost tropical heats of the summer; both languish and suffer from the want of shade. Nor is the effect of denudation less sensibly felt by vegetable life. The *growing* of our more delicate fruits, like the peach, the plum, the pear, the better varieties of the cherry and gooseberry, with the beautiful half-hardy flowering shrubs, all of which flourished so well in a number of our older counties some twenty years ago, are as a rule no longer to be found in those localities, having died out, as is believed, from exposure to the cold winds, to the south west winds in particular, and for want of the protecting influence of the woods. In fruits, however, we have this compensation, that, while the more tender varieties have been disappearing, the hardier and equally good varieties, especially of apples, have been increasing, while the grape (than which nothing speaks better for climatology), of which we grow some 150 varieties, the strawberry, the raspberry, blackberry and currant, etc., hold their ground. Nor are the cattle suffering as much as formerly, or as much as is perhaps popularly believed, from this want of forests or tree shelter. With the better breeds which our farmers have been able of late years to purchase, with better blood and better food, and better care, our stock instead of dwindling in condition, or in number, from the effect of cold, has progressed in quality and quantity, and competes with the best in the Chicago and the New York markets.

There can, however, be no doubt that the planting of groves and belts of trees in exposed localities, would be serviceable in many ways; in tempering the air and imparting to it an agreeable moisture in the summer; in modifying the severity of the cold in winter; in moderating the extreme changes to which our climate is subject; and thus in a measure preventing those discomforts and diseases which occur from sudden changes of temperature. Besides, these plantings, when made between our homes or villages and malarial marshes *southwest* of us, serve (by the aid of our prevailing southwest winds) to break up, to send over and above and beyond us the malarial substratum of air to which we are otherwise injuriously exposed.

The effects of reclaiming the soil, or "breaking" as it is called in the west, have, years ago, when the state first began to be settled, been disastrous to health and to life. The moist sod being turned over in hot weather, and left to undergo through the summer a putrifying fomentative process, gave rise to the worst kind of malarial, typhoid (bilious) and dysenteric disease. Not, however, that the virulence or mortality altogether depended upon the soil emanations. These were undoubtedly aggravated by the absolute poverty of the early settlers, who were wanting in everything, in proper homes, proper food and proper medical attendance, medicines and nursing. These fevers have swept the state years ago, particularly in the autumns of 1844 and 1845, but are now only observed from time to time in limited localities, following in the autumn the summer's "breaking." But it is pleasing to be able to add that through the advancing prosperity of the state, the greater abundance of the necessaries and comforts of life, and the facilities for obtaining medical care, the diseases incident to "settling" are much less common and much less fatal than formerly.

RELATIONS OF CLIMATOLOGY TO SANITARY STATUS.

One of the principal reasons for gathering climatological observations, is to obtain sanitary information, which serves to show us where man may live with the greatest safety to his health. Every country, we might perhaps correctly say every state, has, if not its peculiar diseases, at least its peculiar type of diseases. And by nothing is either this type or variety of disease so much influenced as by climate. Hence the great importance of the study of climatology to health and disease, nay, even to the kind of medicine and to the regulating of the dose to be given. It is, however, best to caution the reader that these meteorological observations are not always made at points where they would most accurately show the salubrity of a geographical district, by reason of the fact that the positions were chosen not for this special purpose, but for purely military purposes. We allude to the forts of Wisconsin, from which our statistics for the most part come. Another caution it is also well to bear in mind in looking over the class of diseases reported at these stations in connection with their observations. The diseases are those of the military of the period, a class from which no very favorable health reports could be expected, considering their habits, exposure, and the influences incidental to frontier life.

The geography of disease and climate is of special interest to the public, and a knowledge especially necessary to the state authorities, as it is only by such a knowledge that state legislation can possibly restrain or root out the endemic diseases of the state. In connection with the gathering of vital statistics must go the collection of meteorological and topographical statistics, as without these two latter the former is comparatively useless for sanitary purposes. More particularly does this apply to the malarial diseases of the state.

Acclimation is very rarely discussed or even alluded to by our people in relation to Wisconsin, for the reason that, come from whatever part of Europe men may, or from the eastern states, acclimation is acquired for the most part unconsciously, rarely attended by any malarial affection, unless by exposure in such low, moist localities, where even the natives of the state could not

live with impunity. It seems to be well enough established that where malaria exists, whether in London, New York, or Wisconsin; where the causes of malarial disease are permanent, the effects are permanent, and that there is no positive acclimation to malaria. Hence it should follow that since life and malaria are irreconcilable, we should root out the enemy, as we readily can by drainage and cultivation, or, where drainage is impossible, by the planting of those shrubs or trees which are found to thrive best, and thereby prove the best evaporators in such localities. Our climate, approximating as it does the 45th degree (being equi-distant from the equator and pole), would *a priori* be a common ground of compromise and safety, and from this geographical position is not liable to objections existing either north or south of us.

INFLUENCE OF NATIONALITIES.

Our population is of such a confessedly heterogeneous character that naturally enough it suggests the question: Has this intermingling of different nationalities sensibly affected our health conditions? Certainly not, so far as intermarriages between the nations of the Caucasian race are concerned. This opinion is given first upon the fact that our classes of diseases have neither changed nor increased in their intensity by reason of such admixture, so far as can be learned by the statistics or the history of disease in the northwest. Imported cases of disease are of course excepted. Second, because all that we can gather from statistics and history concerning such intermingling of blood goes to prove that it is beneficial in every respect, physically, mentally and morally.

England, of all nations, is said to be the best illustration of the good attending an intermingling of the blood of different nations, for the reason that the English character is supposed to be, comparatively speaking, good, and that of all countries she has been perhaps more frequently invaded, and to a greater or less part settled by foreign peoples than any other.

From a residence of nearly a quarter of a century in the center of Wisconsin, and from an adequate knowledge of its people, whose nationalities are so various and whose intermarriages are so common, it is at least presumable that we should have heard of or noted any peculiar or injurious results, had any such occurred. None such, however, have been observed. Some fears have been expressed concerning the influence of Celtic blood upon the American temperament, already too nervous, as is alleged. It is scarcely necessary to say that these fears are unsupported by figures or facts. Reasoning from analogy, it would seem safe to affirm that the general intermingling by intermarriage now going on in our population, confined to the Caucasian nationalities, will tend to preserve the good old Anglo-Saxon character, rather than to create any new character for our people. If this view needed support or confirmation, it is to be found in some very interesting truths in relation to it. Mr. Edwin Seguin, in his work on Idiocy, lays special stress on the influences of races in regard to idiocy and other infirmities, like deafness. He says that the crossing of races, which contributed to the elimination of some vices of the blood (as may be the case in the United States, where there are proportionally less deaf and dumb than in Europe), produces a favorable effect on the health of the population, and cites as an example, Belgium, which has fewer deaf and dumb than any country in Europe, owing to the influence of the crossing of races in past ages from the crowds of northern tribes passing, mingling and partly settling there on the way to England.

We are aware that it has been predicted that our future will give us a *new type*, distinct from all other peoples, and that with this type must come not only new diseases but modifications or aggravations of the present diseases, in particular, consumption and insanity. But so long as we are in a formative state as a nation, and that this state seems likely to continue so long as the country has lands to be occupied and there are people in Europe to occupy them, such speculations can be but of little value.

OCCUPATIONS, FOOD, EDUCATION, ETC., AS AFFECTING PUBLIC HEALTH.

The two chief factors of the social and sanitary well-being of a people are a proper education of the man and a proper cultivation of the soil. Our two principal occupations in Wisconsin are education and agriculture, the learners in the schools being in excess of the laborers on the soil. A happier combination could scarcely be desired, to form an intelligent and a healthy people. How this will affect our habits in the future it is easy to conceive, but for the present it may be said (of so many different nationalities are we composed), that we have no habits which serve to distinguish us from the people of other northwestern states. A well-fed and a well-taught people, no matter how mixed its origin, must sooner or later become homogeneous and a maker of customs. In the mean time we can only speak of our habits as those of a people in general having an abundance of food, though it is to be wished the workers ate more beef and mutton, and less salt-pork, and that whisky was less plentiful in the land. The clothing is sufficient, fuel is cheap, and the dwellings comfortable. Upon the whole, the habits of the people are conducive to health. It is thought unnecessary to refer to the influence upon health in general of other occupations, for the reason that manufacturers, traders and transporters are for the most part localized, and perhaps not sufficiently numerous to exercise any marked influence on the state health.

HISTORY OF DISEASE.

In searching for historical data of disease in Wisconsin, we are able to go back to the year 1766, commencing with the aborigines. The Indians, says Carver, in his chapter on their diseases, in general are healthy and subject to few diseases. Consumption from fatigue and exposure he notices, but adds that the disorder to which they are most subject is pleurisy. They are likewise afflicted with dropsy and paralytic complaints. It is to be presumed that while Carver is speaking generally, he means his remarks to apply, perhaps, more particularly to those Indians with whom he lived so long, the Sioux of this state. That they were subject to fevers is gathered from the use of their remedies for fever, the "fever bush" being an ancient Indian remedy, and equally valued by the inhabitants of the interior parts of the colonies. Besides this, they had their remedies for complaints of the bowels, and for all inflammatory complaints. These notices sufficiently indicate the class of diseases which have certainly followed in the wake of the Indians, and are still occurring to his white brother, making it plain enough that lung diseases, bowel complaints, and fevers are in fact native to the state. The fact must not be ignored that the Indian is subject to the same diseases as the human race in general.

After Carver, we may quote Major Long's expedition in 1824. The principal disease of the Sacs appears to be a mortification of the intestinal canal, more common among men than women, the disease proving fatal in four days if not relieved. It is unaccompanied with pain, and is neither hernia, dysentery, nor hemorrhoids. Intermittents were prevalent, and the small-pox visited them at different periods. As the Chippewas have a common Algonquin origin with the Sacs, and as their home and customs were the same, it may be expected that their diseases were similar. The principal disease to which the Chippewas are liable is consumption of the lungs, generally affecting them between the ages of 30 and 40; they linger along for a year or two, but always fall victims to it. Many of them die of a bowel complaint which prevails every year. This disease does not partake, however, of the nature of dysentery. They are frequently affected with sore eyes. Blindness is not common. Many of them become deaf at an early age.

Referring to the report of the commissioner of Indian affairs for 1854, we find that the decrease in the number of the Menomonees is accounted for by the ravages of small-pox, in 1838,

of the cholera, in 1847 (which latter was superinduced by misery and starvation), and by the fever, which from time to time, commonly in the winter, has been raging among them, being clearly the consequence of want of provisions and other necessaries. The report for 1850 says, there has been considerable sickness among the Winnebagoes for several months past; dysentery has been the prevalent disease, confined mostly to children. For 1857: the Winnebagoes have suffered considerably from chronic diseases, scrofula and consumption. For 1859: the chief malady among the Winnebagoes is phthisis pulmonalis and its analogous diseases, having its source in hereditary origin. Some of the malignant diseases are occasionally met with among them, and intermittent and remittent fevers. In 1863: of the Menomonees, there is a large mortality list of the tribes under my charge. Measles and some of the more common eruptive diseases are the causes. But the most common and most fatal disease which affects the Indians at this agency is pneumonia, generally of an acute character. There is but little tubercular disease to be found in any of these tribes, Menomonees, Stockbridges, Oneidas, etc. In the report for 1865, one can not but notice with some regret the absence of all allusion, except to small-pox, to the diseases of the Indians. Regret, because reliable information of such diseases serves a variety of valuable purposes, for comparison, confirmation, etc., of those of the white population. For these reasons, if for none other, it is to be hoped that the attention of the proper authorities will be called to this feature of such reports.

The first reliable report on the diseases of the people (as distinguished from the Indians) of Wisconsin to which we have had access, is Lawson's Army Report of Registered Diseases, for 10 years, commencing 1829, and ending 1838 (ten years before the admission of Wisconsin into the Union as a state).

FORT HOWARD, GREEN BAY.

Intermittent fever.....	30	This abstract exhibits the second quarters only, the mean strength being 1,702.
Remittent do	11	
Synochal do	4	
Typhus do	—	
Diseases of respiratory organs.....	101	
Diseases of digestive organs.....	184	All other diseases 114, excepting venereal diseases, abscesses, wounds, ulcers, injuries, and ebriety cases.
Diseases of brain and nervous system...	9	
Dropsies	1	
Rheumatic affections.....	61	

Under the class of diseases of the respiratory organs, are comprised 384 catarrh, 6 pneumonia, 60 pleuritis, and 28 phthisis pulmonalis; under the class of digestive organs, 376 diarrhoea and dysentery, 184 colic and cholera, and 10 hepatitis; under the class of diseases of the brain and nervous system, 15 epilepsy, etc. The deaths from all causes, according to the post returns, are 25, being 1½ per cent. per annum. The annual rate of intermittent cases is 6, and that of remittent is 3, per 100 of mean strength.

TABLE OF RATIO OF SICKNESS AT FORT HOWARD.

SEASONS.	MEAN STRENGTH.	NUMBER TREATED.	RATE PER 1,000 OF MEAN STRENGTH TREATED QUARTERLY.
10 first quarters	1,764	715	405
10 second "	1,702	726	425
9 third "	1,526	1,073	703
10 fourth "	1,594	636	399
Annual rate.....	1,647	3,150	1,913

Every man has consequently, on an average, been reported sick about once in every six months, showing this region to be extraordinarily salubrious. The annual ratio of mortality, according to the medical reports, is $\frac{8}{100}$ per cent.; and of the adjutant-general's returns, $\frac{8}{100}$ per cent.

FORT WINNEBAGO.

Intermittent fever.....	21
Remittent fever.....	10
Synochal fever.....	1
Typhus fever.....	—
Diseases of the respiratory organs.....	141
Diseases of digestive organs.....	90
Diseases of brain and nervous system..	2
Rheumatic affections.....	26

This abstract exhibits the fourth quarters only, the mean strength being 1,571.

All other diseases, 80, with the exceptions as above.

Under the class of diseases of the respiratory organs are comprised 448 catarrh, 11 pneumonia, 29 pleuritis and 10 phthisis pulmonalis; under the head of digestive organs, 193 diarrhœa and dysentery, 149 colic and cholera, and 17 hepatitis; under the class of brain and nervous system, 1 epilepsy. The total number of deaths, according to the post returns, is 20. Of these, 3 are from phthisis pulmonalis, 1 pleuritis, 2 chronic hepatitis, 1 gastric enteritis, 1 splenitis, etc.

TABLE OF RATIO OF SICKNESS AT FORT WINNEBAGO.

SEASONS.	MEAN STRENGTH.	NUMBER TREATED.	RATE PER 1,000 OF MEAN STRENGTH TREATED QUARTERLY.
10 first quarters.....	1,535	552	360
10 second ".....	1,505	517	343
10 third ".....	1,527	581	380
10 fourth ".....	1,571	495	315
Annual ratio.....	1,534	2,145	1,398

Every man on an average is consequently reported sick once in eight months and a half.

FORT CRAWFORD.

Intermittent fever.....	262
Remittent fever.....	61
Synochal fever.....	—
Typhus fever.....	—
Diseases of respiratory organs.....	177
Diseases of digestive organs.....	722
Diseases of brain and nervous system..	16
Rheumatic affections.....	58

This abstract exhibits the third quarters only, the mean strength being 1,885.

All other diseases, 309, with the same list of exceptions as above.

Under the class of diseases of the respiratory organs are included 1,048 of catarrh, 28 pneumonia, 75 pleuritis and 13 phthisis pulmonalis; under the head of digestive organs, 933 diarrhœa and dysentery, and 195 colic and cholera; under the head of brain and nervous diseases, 7 epilepsy, etc. The total of deaths, according to the post returns, is 94, the annual ratio being $\frac{7}{100}$ per cent. The causes of death are: 6 phthisis pulmonalis, 6 epidemic cholera, 1 common cholera, 4 remittent fever, 3 dysentery, etc. In the third quarter of 1830 there were 154 cases of fever, while the same quarter of 1836, with a greater strength, affords but one case, the difference seeming to depend upon the temperature.

The relative agency of the seasons in the production of disease in general is shown in the annexed table :

TABLE EXHIBITING THE RATIO OF SICKNESS.

SEASONS.	MEAN STRENGTH.	NUMBER TREATED.	RATIO PER 1,000 OF MEAN STRENGTH TREATED QUARTERLY.

Annual ratio.....	1,793	5,472	3,052

Consequently every man on an average has been reported sick once in nearly every four months. But high as this ratio of sickness is, at this fort, and, indeed, at the others, it is low considering the topographical surroundings of the posts. But besides these injurious topographical and other influences already alluded to, there were still other elements of mischief among the men at these stations, such as "bad bread and bad whisky," and salt meat, a dietary table giving rise, if not to "land-scurvy," as was the case at the posts lower down in the Mississippi valley (more fatal than either small-pox or cholera), at least to its concomitant diseases.

The reason for using these early data of the United States Army medical reports in preference to later ones is, that even though the later ones may be somewhat more correct in certain particulars, the former serve to establish, as it were, a connecting link (though a long one) between the historical sketch of the diseases of the Indian and those of the white settler; and again—these posts being no longer occupied—no further data are obtainable.

To continue this historical account of the diseases of Wisconsin, we must now have recourse to the state institutions.

THE INSTITUTION FOR THE EDUCATION OF THE BLIND.

The first charitable institution established by the state was formally opened in 1850, at Janesville. The census of 1875 showed that there were 493 blind persons in the state, those of school age—that is—under 20 years of age, probably amounting to 125. The number of pupils in the institution that year, 82; the average for the past ten years being 68. If the health report of the institution is any indication of the salubrity of its location, then, indeed, is Janesville in this respect an enviable city. Its report for 1876 gives one death from consumption, and a number of cases of whooping-cough, all recovered. In 1875, ten cases of mild scarlet fever, recovered. One severe and two mild cases of typhoid fever, recovered. For 1873, no sick list. For 1872, the mumps went through the school. For 1871, health of the school reasonably good; few cases of severe illness have occurred.

THE INSTITUTE FOR THE DEAF AND DUMB.

This was organized in June, 1852, at Delavan. The whole number of deaf and dumb persons in the state, as shown by the census of 1875, was 720. The report for 1866 gives the number of pupils as 156.

Little sickness, a few cases of sore throat, and slight bowel affections comprise nearly all the ailments; and the physician's report adds: "The sanitary reports of the institution from its earliest history to the present date has been a guarantee of the healthiness of the location. Having gone carefully over the most reliable tabulated statements of deaf-mutism, its parent-

age, its home, its causes, and its origin, we would most earnestly call the attention of the public to the fact that the chief cause comes under the head of congenital, 75 of the 150 pupils in this institution having this origin. Such a fearful proportion as this must of necessity have its origin in a cause or causes proportionately fearful. Nor, fortunately, is the causation a mystery, since most careful examination leaves not a shadow of doubt that consanguineous marriages are the sources of this great evil. Without occupying further space by illustrative tables and arguments, we would simply direct the attention of our legislators and thoughtful men to *the law of this disease* — which is, that *the number of deaf and dumb, imbeciles, and idiots is in direct keeping with the degree of consanguinity*. With such a law and exhibit before us, would not a legislative inquiry into the subject, with the view of adopting *preventive* means, be a wise step? The evil is fearful; the cause is plain; so, too, is the remedy."

INDUSTRIAL SCHOOL FOR BOYS.

This institution is situated on the banks of the Fox river, at Waukesha, and was organized in 1860. The whole number of the inmates since it was opened in July, 1860, to October 10, 1876, was 1,291. The whole number of inmates for 1876 was 415. Of these, since the period of opening up to date, October, 1876, 25 have died: 8, of typhoid fever; 1, of typhoid erysipelas; 1, of gastric fever; 3, of brain fever; 1, nervous fever; 2, congestion of the lungs; 2, congestive chills; 5, of consumption; 1 of dropsy; and 1 of inflammatory rheumatism.

THE STATE PRISON.

This was located at Waupun in July, 1857. On September 30, 1876, there were 266 inmates. But one death from natural causes occurred during the year. The health of the prisoners has been unusually good, the prevalent affections attendant upon the seasons, of a mild and manageable character.

STATE HOSPITAL FOR THE INSANE.

This institution, located near Madison, was opened for patients in July, 1860. The total number of admissions down to the year 1877, was 1,227 males, 1,122 females, total 2,349. Over one half of these have been *improved*; nearly one third *recovered*; while less than one quarter have been discharged *unimproved*. Total number of deaths, 288. At the commencement of the year, October 1, 1875, there were in the hospital 376 patients. In the report for the year ending September 30, 1876, we find the past year has been one of unusual health in the hospital. No serious epidemic has prevailed, although 20 deaths have been reported, 7 fatally ill before admission, 4 worn-out cases, etc. Insanity, coming as it does, under this head of an article on State Health, is of the highest interest from a state point of view, not only because so much may be done to remedy it, but that still more can and ought to be done by the state to prevent it. Our insane amount to 1 in 700 of the whole population, the total number in hospitals, poor-houses and prisons being in round numbers 1,400. It is a striking fact, calling for our earnest consideration, that the Germans, Irish and Scandinavians *import and transmit* more insanity — three to one — than the American-born population produce. The causes assigned for this disparity, are, as affecting importation, that those in whom there is an hereditary tendency to disease constitute the migratory class, for the reason that those who are sound and in the full possession of their powers are most apt to contend successfully in the struggle to live and maintain their position at home; while those who are most unsound and unequal to life's contests are unable to migrate. In other words, the strongest will not leave, the weakest can not leave. By this, the character of the migratory is defined. As affects transmission, poverty is a most fruitful parent of insanity, so too is poor land. Says Dr. Boughton, superintendent of the Wisconsin State Hospital for the Insane:

Martin Fildes

MUKWANAGO.

Wisconsin is characterized by a large poor class, especially in the northern part of the state, where people without means have settled on new and poorly paying farms, where their life is made up of hard work, exposure to a severe climate, bad and insufficient diet, cheerless homes, etc., etc. These causes are prolific in the production of insanity. It is easy, therefore, to trace the causes that give us so large a per cent. of insane in many of the counties of the state. Nor is it of less interest to know, as Dr. B. adds: We draw our patients from those families where phthisis pulmonalis, rheumatism and insanity prevail. Insanity and rheumatism are interchangeable in hereditary cases, so too are insanity and phthisis. What may be accomplished by intelligent efforts to stem the increase of insanity in our state? Much. Early treatment is one means, this is of course curative in its character. And its necessity and advantage are well illustrated in table No. 10 of the annual report of Dr. Boughton, for 1876, where it is seen that 45.33 of males, and 44.59 of the females who had been sent to the State Hospital having been insane but three months before admission, were cured, the proportion of cures becoming less in proportion to the longer duration of insanity before admission. As a preventive means, the dissemination of the kind of knowledge that shows indisputably that insanity is largely hereditary, and consequently that intermarriage with families so tainted should on the one hand be avoided by the citizen, and on the other hand, perhaps, *prevented by the state*, (congress at the same time restraining or preventing as far as possible persons so tainted from settling in this country.) By the state, inasmuch as the great burthen of caring for the insane falls upon the state. Still other preventive means are found in the *improved cultivation of our lands* and in our improved education; in fact, in whatever lessens the trials of the poor and lifts them out of ignorance and pauperism. It is only by culture, says Hufeland, that man acquires perfection, morally, mentally and physically. His whole organization is so ordered that he may either become nothing or anything, *hyperculture* and the *want* of cultivation being alike destructive.

THE NORTHERN HOSPITAL FOR THE INSANE.

This hospital was opened at Oshkosh, May, 1873. The total number under treatment September 30, 1876 was—males 246, females 257, total 503. No ailment of an epidemic character has affected the health of the household, which has been generally good. The report of Dr. Kempster is full of suggestive matter for the legislator and sociologist.

CITY OF MILWAUKEE.

Still adhering to the plan, in writing the sanitary history of the state, of gathering up all the health statistics which properly belong to us, we now take up those of Milwaukee, the only city in Wisconsin, so far as we know, that has kept up a system of statistics of its diseases. The city is built on each side of the mouth of Milwaukee river, on the west shore of Lake Michigan in lat. $43^{\circ} 3' 45''$ N., long. $87^{\circ} 57'$ W., and is considered remarkable for its healthy climate. The board of health has furnished us with its report for 1870 and downward. The character of its mortality from June 19, 1869, to March 31, 1870, is thus summarized: In children under five years of age, 758 out of 1,249 deaths, consumption, 93; convulsions, 128; cholera infantum, 59; diarrhœa, 128; scarlet fever, 132; typhoid fever, 52; inflammation of the lungs, 41; still-born, 79. This disproportionate number of still-born children is attributed in part to a laxity of morals. The deaths from consumption in Milwaukee are $7\frac{1}{2}$ out of every 100, one third less out of a like number of deaths than in San Francisco, in which city, in 4,000 deaths, 441 died of consumption, being 11 out of every 100 deaths for the year ending July, 1869. The deaths for 1870 numbered 1,655, the population being at the last census report, 71,636.

TABLE OF PRINCIPAL CAUSES.

Consumption.....	143
Inflammation of lungs.....	56
Convulsions.....	259
Diarrhoea.....	131
Diphtheria.....	74
Scarlet fever.....	52
Typhoid fever.....	49
Old age.....	28
Still-born.....	123

The Milwaukee population being about 72,000, the death rate per annum for every 1,000 inhabitants would be 21, after proper deductions of deaths from other causes than from disease, showing very favorably as compared with other cities.

Glasgow has 39 to every 1,000; Liverpool, 36; London, 25; New Orleans, 54; New York, 32; San Francisco, 24; Milwaukee, 21. Among seventeen of the principal cities of the Union, Milwaukee ranks the ninth in rate of mortality. An impression has prevailed that Milwaukee is subject to a large and disproportionate amount of lung and allied diseases. Statistics disprove this, its deaths from consumption being only 6 per cent., while those of Chicago are 7.75; of St. Louis, 9.68; of Cincinnati, 11.95; and of Boston, 19.31. But few cases of malarial disease occur in Milwaukee, and fewer cases of intestinal fever than in the interior of the state. The mortality among children is explained by its occurring chiefly among the poor foreign-born population, where all that can incite and aggravate disease is always to be found.

This, (the historical part of the health article), will doubtless call forth from the profession much additional and desirable matter, but excepting what will further appear under the head of Madison it is proper to say that we have exhausted the sources of information on the subject within our reach.

HEALTH RESORTS.

Next in order would seem to come some notice of the summer and health resorts of Wisconsin, which, significant of the salubrity of the state, are not only becoming more numerous, but also more frequented from year to year.

Madison, the capital of the state, with a population of 11,000, is built on an isthmus between two considerable lakes, from 70 to 125 feet above their level; 80 miles west of Milwaukee, in latitude 43° 5' north, and longitude 89° 20' west, in the northern temperate region. The lake basins, and also the neck of land between them, have a linear arrangement, trending northeast and southwest. The same linear topography characterises the whole adjacent country and the boundary lines of its various geological formations, this striking feature being due to the former movement of glacier ice over the face of the country. At two points, one mile apart, the Capitol and University hills, respectively 348 and 370 feet above the level of Lake Michigan, rise prominently above the rest of the isthmus. Both of these hills are heaps of drift material from 100 to 126 feet thickness, according to the record of the artesian well. The neck of land on which Madison stands is of the same material. The same boring discloses to us the underlying rock structure, penetrating 614 feet of friable quartzose sandstone belonging to the Potsdam series, 10½ feet of red shale belonging to the same series, and 209½ feet of crystalline rocks belonging to the Archæan. In the country immediately around Madison, the altitude is generally considerably greater, and the higher grounds are occupied by various strata, nearly horizontal, of sandstone and limestone. The Potsdam sandstone rises about 30 feet above the level of Lake Mendota, on its northern shore, where at McBride's Point it may be seen overlaid by the next and hitherto unrecognized layer, one of more or less impure, dark-colored, magnesian limestone, to which the name of Mendota is assigned, and which furnishes a good building stone. The descent of these strata is about

9 feet to the mile in a due southerly direction. Overlying the Mendota beds are again sandstone layers, the uppermost portions of which are occasionally charged with 10 to 20 per cent. of calcareous and dolomitic matter, and then furnish a cream-colored building stone of considerable value. Most of this stratum which has been designated as the *Madison* sandstone, is, however, quite non-calcareous, being either a ferruginous brown stone, or a quite pure, white, nearly loose sand. In the latter phase it is of value for the manufacture of glass. In a number of quarries, cuttings and exposed places around the city, the Madison beds are seen to be overlaid by a grayish, magnesian limestone, the lower magnesian, varying very considerably in its character, but largely composed of a flinty-textured, heavy-bedded, quite pure dolomite, which is burnt into a good quality of lime. Its thickness exceeds 80 feet. Madison, with the conveniences and comforts of a capital city, from its easy access by railroads, from not only in itself being beautiful, but from its beautiful surroundings, from its good society, charming climate, and artesian mineral water, is naturally a great summer resort.

Though there are no vital statistics of the city to refer to, a residence of nearly a quarter of a century has made us sufficiently acquainted with its sanitary history, which is more or less the sanitary history of this part of the state, and in a measure of the state itself. In 1844 and 1845, it was visited by an epidemic malarial fever of a bilious type, and not unfrequently fatal, which passed very generally through the state, and was attributed to the turning up of the soil. It was most virulent in the autumns. Again in 1854 it was visited by a light choleraic epidemic, which also swept the state, assuming very generally a particularly mild type. Again in 1857 it suffered lightly from the epidemic dysentery, which passed through the state. In 1865, it suffered from a visitation of diphtheria, the disease prevailing generally over the state at that time. It has also had two visitations of the epidemic grip (*grippe*), or influenza. The last invasion, some five years since, commencing in a manner perhaps worthy of noting, by first affecting the horses very generally, and again, by beginning on the east side of the city, while the other epidemics for the past twenty-five years (unless the choleraic visitation was an exception) came in on the southwest side of the city, as has been the case, so far as we have been able to observe with the light epidemics to which children are subject. But little typhoid fever is found here, and the aguish fevers when they occur are light and easy of control. There is but little diarrhoea or dysentery. Pneumonia and its allied affections are more common, so is rheumatism, and so neuralgia. Inflammatory croup, however, is very rare, sporadic diphtheria seeming to be taking its place. All the ordinary eruptive fevers of children are and always have been of a peculiarly mild type.

Prairie du Chien, situated immediately at the junction of the Wisconsin with the Mississippi, is built about 70 feet above low water, and 642 feet above the level of the sea. The cliffs on both sides of the river present on their summits the lower strata of the blue Silurian limestone of Cincinnati, beneath which are found sandstone and magnesian limestone down to the water's edge. We give this notice of Prairie du Chien for the purpose of bringing to the knowledge of the public that it possesses one of the most superb artesian wells in the state, which is attracting many persons by its remedial mineral properties.

Green Bay sanitarily may be considered as sufficiently indicated under the head of Fort Howard. It is, however, proper to add that from its geographical position and beautiful situation at the head of the bay, its easy access both by railroad and steamboat, its pleasant days and cool summer nights, it has naturally become quite a popular summer resort, particularly for southern people.

Racine, some 25 miles south by east by rail from Milwaukee and 62 by rail from Chicago, is built upon the banks and some 40 feet above the level of the lake. Its soil is a sandy loam and

gravel, consequently it has a dry, healthy surface, and is much frequented in the summer for its coolness and salubrity.

Waukesha, 18 miles west of Milwaukee by railroad, is a healthy, pleasant place of resort at all times on account of its mineral water, so well known and so highly appreciated throughout the country.

Oconomowoc, 32 miles by railroad west by north of Milwaukee, is a healthy and delightfully located resort for the summer. Its many lakes and drives form its chief attractions, and though its accommodations were considered ample, during the past summer they were found totally inadequate to meet the demands of its numerous visitors.

The Dalles, at Kilbourn City, by rail 16 miles from Portage, is unsurpassed in the northwest for the novelty, romantic character, and striking beauty of its rock and river scenery. It is high and dry; has pure water and fine air, and every-day boat and drive views enough to fill up a month pleasantly.

Lake Geneva, 70 miles by rail from Chicago, is built on the north side of the lake, is justly celebrated for its beauty, and its reputation as a summer resort is growing.

Green Lake, six miles west of Ripon, and 89 northwest from Milwaukee, is some 15 miles long and three broad, surrounded by beautiful groves and prairies; and is claimed to be one of the healthiest little places on the continent.

Devil's Lake is 36 miles by rail north of Madison. Of all the romantic little spots in Wisconsin, and they are innumerable, there is none more romantic or worthy of a summer visitor's admiration than this. It is, though shut in from the rude world by bluffs 500 feet high, a very favorite resort, and should be especially so for those who seek quiet, and rest, and health.

Sparta, 246 miles by rail from Chicago, is pleasantly and healthily situated, and its artesian mineral water strongly impregnated with carbonate of iron, having, it is said, over 14 grains in solution to the imperial gallon, an unusually large proportion, attracts its annual summer crowd.

Sheboygan, 62 miles by rail north of Milwaukee, from its handsome position on a bluff overlooking the lake, and from the beauty of its surroundings as well as from the character of its mineral waters, is an attractive summer resort.

Elkhart Lake, 57 miles by rail north of Milwaukee, is rapidly acquiring a good name from those seeking health or pleasure.

CHANGE IN DISEASES.

In order to ascertain whether the classes of diseases in the state at the date of Carver's travels are the same which prevail to-day, we have compared his description of them with those tabulated in the army medical reports of Forts Howard, Crawford and Winnebago, and again with those given in the U. S. Census for 1870, and with the medical statistics of the city of Milwaukee. The three distinct and prominent classes prevailing from Carver's to the present time, are, in the order of prevalence, diseases of the respiratory organs, consumption, pneumonia, bronchitis, etc.; diseases of the digestive organs, enteritis, dysentery, diarrhœa, etc.; and the malarial fevers. At Fort Howard alone do the diseases of the digestive organs seem to have outnumbered those of the respiratory organs. So far as it is possible to gather from the reports of the commissioners of Indian affairs, these features of the relative prevalence of the three classes of disease are not disturbed.

There are, however, some disturbing or qualifying agencies operating and affecting the amount or distribution of these classes in different areas or belts. For instance, there are two

irregular areas in the state; the one extending from the Mississippi east and north, and the other starting almost as low down as Madison, and running up as far as Green Bay, which are more subject to malarial diseases than are the other parts of the state. While it is found that those parts of the state least subject to diseases of the digestive organs are, a belt along the western shore of Lake Michigan, and a belt running from near Prairie du Chien north into the pineries. Again, it is found that the part of the state most subject to enteric, cerebro-spinal and typhus fevers, is quite a narrow belt running north from the southern border line into the center of the state, or about two-thirds of the distance toward the pineries. All along the western shore of Lake Michigan, and stretching across the country by way of Fond du Lac to the Mississippi, is a belt much less subject to these disorders. It is equally beyond question that the western shore of Lake Michigan, and the southern shore of Lake Superior, as well as the western half of the southern boundary line of the pineries, are less affected with consumption than the interior parts of the state.

The tendency of these diseases is certainly to amelioration. The sanitary history of Wisconsin does not differ from that of any other state east of us, in this striking particular; the farther you trace back the history of disease, the worse its type is found to be. It follows, then, that the improvement in public health must progress with the general improvement of the state, as has been the case with the eastern states, and that the consequent amelioration of our malarial diseases especially will tend to mitigate infectious diseases. The ameliorating influences, however, that sanitary science has brought to bear upon disease, of which England is so happy an illustration, has scarcely as yet begun to be known to us. But the time has come at last when this science is moving both the hearts and minds of thinking and humane men in the state, and its voice has been heard in our legislative halls, evoking a law by which we are, as a people, to be governed, as by any other enactment. The organization of a state board of health is a new era in our humanity. In this board is invested all legal power over the state health. To it is committed all the sanitary responsibility of the state, and the greatest good to the people at large must follow the efforts it is making.

There are many other points of sanitary interest to which it is desirable to call the attention of those interested in Wisconsin. It is a popular truth that a dry climate, all other things being equal, is a healthy climate. Our hygrometrical records show Wisconsin to have one of the driest climates in the United States. Choleraic diseases rarely prevail unless in a comparatively stagnant state of the atmosphere, where they are most fatal. Where high winds prevail such diseases are rare. The winds in Wisconsin, while proverbially high and frequent (carrying away and dissipating malarial emanations), are not destructive to life or property, as is the case, by their violence, in some of the adjoining states. A moist, warm atmosphere is always provocative of disease. Such a state of atmosphere is rare with us, and still more rarely continuous beyond a day or two. Moist air is the medium of malarial poisoning, holding as it does in solution gases and poisonous exhalations. Its character is readily illustrated by the peculiar smell of some marsh lands on autumnal evenings. Such a state of moisture is seen only in our lowest shut-in marshes (where there is but little or no air-current), and then only for a very limited period, in very hot weather.

But too much importance is attached by the public to a simply dry atmosphere for respiratory diseases. The same mistake is made with regard to the good effects in such disorders of simply high elevations. Dry air in itself or a high elevation in itself, or both combined, are not necessarily favorable to health, or curative of disease. In the light and rare atmosphere of Pike's Peak, an elevation of 6,000 feet, the pulse is accelerated, the amount of sleep is diminished, and the human machine is put under a high-pressure rate of living, conducive only to its

injury. The average rate of the pulse in healthy visitors is from 115 to 120 per minute (the normal rate, in moderate elevations, being about 75). And where there is any organic affection of the heart, or tendency to bleeding from the lungs, it is just this very dry atmosphere and high elevation that make these *remedies* (?) destructive. Hence it is that Wisconsin, for the generality of lung diseases, especially when accompanied with hemorrhage, or with heart disease, is preferable to Colorado. It may be objected, that the diseases of the respiratory organs are in excess of other diseases in Wisconsin. This feature, however, is not confined to the cold belt of our temperate latitudes—our proportion of respiratory diseases, be it noted, comparing most favorably with that of other states, as may be seen in the following table:

CLIMATOLOGICAL DISTRIBUTION OF PULMONARY DISEASES.

STATES.	Deaths by Phthisis.	Per cent. of entire Mortality.	Deaths by all diseases of Respiratory Organs.	Per cent. of entire Mortality.
Massachusetts, 1850, U. S. Census.....	3,426	17.65	4,418	22.27
Ohio, 1849-50, U. S. Census.....	2,558	8.83	3,988	13.77
Michigan, 1850, U. S. Census.....	657	14.55	1,084	24.00
Illinois, 1849-50, U. S. Census.....	866	7.36	1,799	15.00
Wisconsin, 1849-50, U. S. Census.....	290	9.99	535	18.43

Now, while the mortuary statistics of the United States census for 1850 are acknowledged to be imperfect, they are, nevertheless, undoubtedly correct as to the causes of mortality. But besides this statistical evidence of the climatological causes of disease, there are certain relative general, if not special, truths which serve to guide us in our estimate. Respiratory diseases of all kinds *increase* in proportion as the temperature *decreases*, the humidity of the air being the same. Another equally certain element in the production of this class of diseases is variability of climate. Still, this feature of our climate is only an element in causation, and affects us, as we shall see in the table below, very little as compared with other states. Indeed, it is still disputed whether there is not more consumption in tropical climates than in temperate climates. This much is admitted, however, that consumption is rare in the arctic regions. Dr. Terry says the annual ratio of pulmonary diseases is lower in the northern than in the southern regions of the United States, and Dr. Drake, an equally eminent authority, recommends those suffering from or threatened with pulmonary affections, to *retreat* to the colder districts of the country, citing among others localities near Lake Superior—a recommendation which our experience of nearly half a century endorses.

PROPORTION OF PNEUMONIA TO CONSUMPTION IN THE DIFFERENT STATES.

STATES.	CONS.	PNEUM.	STATES.	CONS.	PNEUM.
Massachusetts.....	3,424	549	North Carolina.....	562	664
Ohio.....	2,558	895	Kentucky.....	1,288	429
Illinois.....	866	647	Wisconsin.....	290	194

When we compare the general death-rate of Wisconsin with that of the other states of the Union, we find that it compares most favorably with that of Vermont, the healthiest of the New England states. The United States census of 1850, 1860 and 1870, gives Wisconsin 94 deaths to 10,000 of the population, while it gives Vermont 101 to every 10,000 of her inhabitants. The

census of 1870 shows that the death-rate from consumption in Minnesota, Iowa, California and Wisconsin are alike. These four states show the lowest death-rate among the states from consumption, the mortality being 13 to 14 per cent. of the whole death-rate.

Climatologically considered, then, there is not a more healthy state in the Union than the state of Wisconsin. But for health purposes something more is requisite than climate. Climate and soil must be equally good. Men should shun the soil, no matter how rich it be, if the climate is inimical to health, and rather choose the climate that is salubrious, even if the soil is not so rich. In Wisconsin, generally speaking, the soil and climate are equally conducive to health, and alike good for agricultural purposes.

ABSTRACT OF LAWS.

WISCONSIN.

ELECTORS AND GENERAL ELECTIONS.

SEC. 12. Every male person of the age of twenty-one years or upward, belonging to either of the following classes, who shall have resided in the State for one year next preceding any election, shall be deemed a qualified elector at such election :

1. Citizens of the United States.
2. Persons of foreign birth who shall have declared their intention to become citizens conformably to the laws of the United States on the subject of naturalization.
3. Persons of Indian blood who have once been declared by law of Congress to be citizens of the United States, any subsequent law of Congress to the contrary notwithstanding.
4. Civilized persons of Indian descent not members of any tribe. Every person convicted of bribery shall be excluded from the right of suffrage unless restored to civil rights ; and no person who shall have made or become directly or indirectly interested in any bet or wager depending upon the result of any election at which he shall offer to vote, shall be permitted to vote at such election.

SEC. 13. No elector shall vote except in the town, ward, village or election district in which he actually resides.

SEC. 14. The general election prescribed in the Constitution shall be held in the several towns, wards, villages and election districts on the Tuesday next succeeding the first Monday in November in each year, at which time there shall be chosen such Representatives in Congress, Electors of President and Vice President, State officers, and county officers as are by law to be elected in such year.

SEC. 15. All elections shall be held in each town at the place where the last town-meeting was held, or at such other place as shall have been ordered at such last meeting, or as shall have been ordered by the Supervisors when they establish more than one election poll, except that the first election after the organization of a new town shall be held at the place directed in the act or proceeding by which it was organized ; and all elections in villages constituting separate election districts and in the wards of cities, shall be held at the place to be ordered by the Trustees of such village, or the Common Council of such city, at least ten days before such election, unless a different provision is made in the act incorporating such village or city.

SEC. 16. Whenever it shall become impossible or inconvenient to hold an election at the place designated therefor. the Board of Inspectors, after having assembled at or as near as practicable to such place, and before receiving any votes may adjourn to the nearest convenient place for holding the election, and at such adjourned place shall forthwith proceed with the election. Upon adjourning any election as hereinbefore provided, the Board of Inspectors shall cause proclamation thereof to be made, and shall station a Constable or some other proper person at the place where the adjournment was made, to notify all electors arriving at such place of adjournment, and the place to which it was made.

SEC. 20. A registry of electors shall annually be made :

1. In each ward or election district of every city which, at the last previous census, had a population of three thousand or more.
2. In each ward or election district of every incorporated village in which, by law, separate elections are held ; which village at the last preceding census, had a population of fifteen hundred or more.
3. In every town containing a village which, at said census, had a population of fifteen hundred or more, in which village separate general elections are not by law required to be held.
4. In all towns any part of which shall have been embraced in any part of any city or village in which a registration by this chapter is required.

Such registration shall be made in the manner provided by this chapter. The persons authorized by law to act as Inspectors of Election in each of such towns, wards or election districts shall constitute the Board of Registry therefor.

SEC. 21. The said Inspectors shall have their first meeting on Tuesday, four weeks preceding each general election, at the place where said election is to be held ; and in election districts at which there were polled at the previous general election three hundred votes or less, they shall sit for one day, and in districts at which there were more than three hundred votes polled, they shall have power to sit two days if necessary, for the purpose of making such list. They shall meet at 9 o'clock in the forenoon and hold their meetings open until 8 o'clock in the evening of each day during which they shall so sit. The Clerks appointed by law to act as Clerks of Election shall act as Clerks of the Board of Registry on the day of election only. The proceedings shall be open, and all electors of the district shall be entitled to be heard in relation to corrections or additions to said registry. They shall have the same powers to preserve order which Inspectors of Election have on election days, and in towns vacancies in the Board shall be filled in the same manner that vacancies are filled at elections.

SEC. 22. The said Inspectors at their first meeting, and before doing any business, shall severally take and subscribe the oath of Inspectors at a general election, and said Inspectors shall at their first meeting make a registry of all the electors of their respective districts, placing thereon the full names, alphabetically arranged according to surnames, in one column, and in another the residence by number and name of street or other location, if known. If any elector's residence is at any hotel or public boarding-house the name of the hotel or boarding-house shall be stated in the registry. They shall put thereon the names of all persons residing in their election district appearing on the poll-list kept at the last preceding general election, and are authorized to take therefor such poll-list from the office where kept, omitting such as have died or removed from the district, and adding the names of all other persons known to them to be electors in such district. In case of the formation of a new election district since the last preceding general election, the said Board therein may make such registry from the best means at their command, and may, if necessary, procure therefor certified copies of the last poll-list. They shall complete said registry as far as practicable at their first meeting, and shall make four copies thereof, and certify the original and each copy to be a true list of the electors in their district so far as the same are known to them. One of said copies shall be immediately posted in a conspicuous place in the room in which their meeting was held, and be accessible to any elector for examination or making copies thereof, and one copy shall be retained by each Inspector for revision and correction at the second meeting. They shall within two days after said first meeting file the original registry made by them, and said poll-list in the office of the proper town, city or village clerk, and may, in their discretion, cause ten printed copies of said registry to be made and posted in ten of the most public places of said election district, or may publish the same in a newspaper at an expense not exceeding one cent for each name.

SEC. 23. The Inspectors shall hold their second meeting at the same place designated for holding elections on the Tuesday two weeks preceding the election. They shall meet at 9 o'clock in the forenoon. In election districts having less than three hundred voters, as shown by the

preliminary registry, the Board shall complete the registry on the same day ; but if there are more than that number of voters, they shall sit two days. They shall remain in session until 8 o'clock in the evening. They shall revise and correct the registry first by erasing the name of any person who shall be proved to their satisfaction by the oaths of two electors of the district to be not entitled to vote therein at the next ensuing election, unless such person shall appear and if challenged, shall answer the questions and take the oath hereinafter provided ; secondly, by entering thereon the names of every elector entitled to vote in the district at the next election who shall appear before the Board and require it, and state his place of residence, giving street and number, if numbered, or location, as hereinbefore provided, if challenged answer the questions, and take the oaths provided in case of challenge at an election ; but if any person shall refuse to answer all such questions or to take such oath, his name shall not be registered. Any person who is not twenty-one years of age before the date when the registry is required to be corrected, but will be if he lives until the day of election, shall have his name put on the registry if he be otherwise qualified to be an elector. Any elector who did not vote at the previous general election shall be entitled to be registered either at the preliminary or the final registration of electors by appearing before the Board of Registration of his election district and establishing his right to be registered, or, instead of a personal appearance, he may make his application to be registered to the Board in writing. Such application shall state the name and period of continuous residence in the election district and place of residence therein, giving the number and street of the applicant, and, in case the person making the application is of foreign birth, he shall state when he came to the United States and to the State of Wisconsin, and the time and place of declaring his intention of becoming a citizen of the United States, and that he is entitled to vote at the election. Upon receiving such application, the Board of Registration shall register the name of such applicant, if it appears to the Board that the applicant is, by his statement, entitled to vote. Such statement shall be made under oath, and shall be preserved by the Board and be filed in the office of the village or city clerk, as the case may be. All city and village clerks shall keep blanks for making the application for registration, as provided by this section. The form shall be prescribed by the Secretary of State. Every person named in this section shall be subject to the same punishment for any false statement or other offense in respect thereto as is provided in case of such false statement or other offense by an elector offering to vote at an election. After such registry shall have been fully completed on the days above mentioned, no name shall be added thereto by any person or upon any pretext. Within three days after the second meeting the said Board shall cause four copies of the registry to be made, each of which shall be certified by them to be a correct registry of the electors of their district, one of which shall be kept by each Inspector for use on election day, and one shall forthwith be filed in the office of the proper town, city or village clerk. All registries shall at all times be open to public inspection at the office where deposited without charge.

SEC. 24. On election day the Inspectors shall designate two of their number at the opening of the polls, who shall check the names of every elector voting in such district whose name is on the registry. No vote shall be received at any general election in any ward or election district defined in Section 20, if the name of the person offering to vote be not on said registry made at the second meeting as aforesaid, except as hereinafter provided ; but in case any one shall, after the last day for completing such registry, and before such election, become a qualified voter of the district, he shall have the same right to vote therein at such election as if his name had been duly registered, provided he shall, at the time he offers to vote, deliver to the Inspectors his affidavit, in which he shall state the facts, showing that he has, since the completion of such registry, become a qualified elector of such district, and the facts showing that he was not such elector on the day such registry was completed, and shall also deliver to such Inspectors the affidavits of two freeholders, electors in such election district, corroborating all the material statements in his affidavit. In case any person who was a voter at the last previous general election shall not be registered, such person shall be entitled to vote on making affidavit that he was entitled to vote at the previous election, and that he has not become disqualified by reason of removal

from the election district or otherwise, since that election, which affidavit shall also be corroborated by the affidavits of two freeholders, as is provided for other non-registered voters. No one freeholder shall be competent to make at any one election corroborating affidavits for more than three voters. All of said affidavits shall be sworn to before some officer authorized by the laws of this State to take depositions. The Inspectors shall keep a list of the names and residence of the electors voting whose names are not on said completed registry, and attach said list to the registry and return it, together with all such affidavits, to the proper town, city or village clerk. No compensation shall be paid or received for taking or certifying any such affidavits. On the day following the election, one of said poll-lists and one copy of the registry so kept and checked shall be attached together and filed in the office of the proper town, city or village clerk, and the other of said poll-lists and copy of the registry so kept and checked shall be returned to the County Clerk with the returns of the election. Such Inspectors shall give notice by advertisement in a newspaper printed in the city, village or town where such registration was made, of the registry, and shall include in such notice all additions to and omissions from the preliminary list, and shall also state where the election is to be held. In case there be no newspaper printed in such city, village or town, such notice shall be given by posting copies thereof in three or more public places in each ward or election district in such city, village or town. For publication of such notice in any such newspaper the publisher thereof shall be entitled to the same compensation per folio as is prescribed for publishing other legal notices.

COMMON SCHOOLS.

SEC. 413. The formation of any school district shall be by written order of the Town Board, describing the territory embraced in the same, to be filed with the Town Clerk within twenty days after the making thereof. The Supervisors shall deliver to a taxable inhabitant of the district their notice thereof in writing, describing its boundaries, and appointing a time and place for the first district meeting, and shall therein direct such inhabitant to notify every qualified voter of the district, either personally or by leaving a written notice at his place of residence, of the time and place of such meeting, at least five days before the time appointed therefor, and said inhabitant shall notify the voters of such district accordingly, and indorse thereon a return containing the names of all persons thus notified, and said notice and return shall be recorded as a part of the record of the first meeting in such district.

SEC. 414. In case such notice shall not be given, or the inhabitants of a district shall neglect or refuse to assemble and form a district meeting when so notified, or in case any school district having been formed or organized shall afterward be disorganized, so that no competent authority shall exist therein to call a special district meeting, in the manner hereinafter provided, notice shall be given by the Town Board, and served in the manner prescribed in the preceding section. Whenever a district meeting shall be called as prescribed in this and the preceding section, it shall be the duty of the electors of the district to assemble at the time and place so directed.

SEC. 415. Whenever it shall be necessary to form a district from two or more adjoining towns, the Town Boards of such towns shall meet together and form such districts by their written order, describing the territory embraced in such district, signed by at least two of the Supervisors of each town; and shall file one such order with the Town Clerk of each town, and deliver the notice of formation to a taxable inhabitant of such district, and cause the same to be served and returned in the time and manner hereinbefore prescribed; and any such district may be altered only by the joint action of the Town Boards of such towns in the same manner that other districts are altered.

SEC. 416. Every school district shall be deemed duly organized when any two of the officers elected at the first legal meeting thereof shall have consented to serve in the offices to which they have been respectively elected, by a written acceptance thereof filed with the clerk of the first meeting, and recorded in the minutes thereof; and every school district shall be considered

as duly organized after it shall have exercised the franchises and privileges of a district for the term of two years.

SEC. 425. The annual meeting of all school districts in which graded schools of two or more departments are taught, shall be held on the second Monday of July, and of all other school districts on the last Monday of September, in each year. The hour of such meeting shall be seven o'clock in the afternoon, unless otherwise provided by a vote of the district, duly recorded at the last previous annual meeting; but at any annual meeting a majority of the electors present may determine that the annual meeting of such district shall be held on the last Monday of August instead of the last Monday of September. Said determination to take effect when a copy of the proceedings of said annual meeting in reference to such change shall have been filed with the Town Clerk in which the schoolhouse of such district is situated, and to remain in force until rescinded by a like vote of the electors of such district.

SEC. 426. The Clerk shall give at least six days' previous notice of every annual district meeting, by posting notices thereof in four or more public places in the district, one of which shall be affixed to the outer door of the schoolhouse, if there be one in the district, and he shall give like notices for every adjourned district meeting when such meeting shall have been adjourned for more than one month; but no annual meeting shall be deemed illegal for want of due notice, unless it shall appear that the omission to give such notice was willful and fraudulent.

SEC. 427. Special district meetings may be called by the Clerk, or, in his absence, by the Directors or Treasurer, on written request of five legal voters of the district, in the manner prescribed for calling an annual meeting; and the electors, when lawfully assembled at a special meeting, shall have power to transact the same business as at the first and each annual meeting, except the election of officers. The business to be transacted at any special meeting shall be particularly specified in the notices calling the same, and said notices shall be posted six full days prior to the meeting. No tax or loan or debt shall be voted at a special meeting, unless three-fourths of the legal voters shall have been notified, either personally or by a written notice left at their places of residence, stating the time and place and objects of the meeting, and specifying the amount proposed to be voted, at least six days before the time appointed therefor.

SEC. 428. Every person shall be entitled to vote in any school district meeting who is qualified to vote at a general election for State and county officers, and who is a resident of such school district.

ASSESSMENT AND COLLECTION OF DISTRICT TAXES.

SEC. 469. All school district taxes, unless otherwise specially provided by law, shall be assessed on the same kinds of property as taxes for town and county purposes; and all personal property which, on account of its location or the residence of its owner, is taxable in the town, shall, if such locality or residence be in the school district, be likewise taxable for school district purposes.

BORROWING MONEY.

SEC. 474. Whenever, upon any unusual exigency, any school district shall, before the annual meeting, vote a special tax to be collected with the next levy, the district may, by vote, authorize the District Board to borrow for a period not exceeding one year a sum not exceeding the amount of such tax, and by such vote set apart such tax when collected to repay such loan, and thereupon the District Board may borrow such money of any person and on such terms and execute and deliver to the lender such obligation therefor, and such security for the repayment, including a mortgage or pledge of any real or personal property of the district, subject to the directions contained in the vote of the district as may be agreed upon and not prohibited by law.

SEC. 498. Every District Clerk who shall willfully neglect to make the annual report for his district as required by law shall be liable to pay the whole amount of money lost by such

district in consequence of his neglect, which shall be recovered in an action in the name of and for the use of the district.

SEC. 499. Every Town Clerk who shall neglect or refuse to make and deliver to the County Superintendent his annual report, as required in this chapter within the time limited therefor, shall be liable on his official bond to pay the town the amount which such town or any school district therein, shall lose by such neglect or refusal, with interest thereon; and every County Superintendent who shall neglect or refuse to make the report required of him by this chapter to the State Superintendent shall be liable to pay to each town the amount which such town or any school district therein shall lose by such neglect or refusal, with interest thereon, to be recovered in either case in an action prosecuted by the Town Treasurer in the name of the town.

SEC. 503. Every member of a district board in any school district in this State in which a list of text-books has been adopted according to law, who shall, within three years from the date of such adoption, or thereafter, without the consent of the State Superintendent, order a change of text-books in such district, shall forfeit the sum of fifty dollars.

SEC. 513. Every woman of twenty-one years of age and upward may be elected or appointed as director, treasurer or clerk of a school district, director or secretary of a town board under the township system; member of a board of education in cities, or county superintendent.

SEC. 560. In reckoning school months, twenty days shall constitute a month and one hundred days five months.

ASSESSMENT OF TAXES.

SEC. 1035. The terms "real property," "real estate" and "land," when used in this title, shall include not only the land itself, but all buildings, fixtures, improvements, rights and privileges appertaining thereto.

SEC. 1036. The term "personal property," as used in this title, shall be construed to mean and include toll-bridges, saw-logs, timber and lumber, either upon land or afloat, steamboats, ships and other vessels, whether at home or abroad; buildings upon leased lands, if such buildings have not been included in the assessment of the land on which they are erected; ferry-boats, including the franchise for running the same; all debts due from solvent debtors, whether on account, note, contract, bond, mortgage or other security, or whether such debts are due or to become due; and all goods, wares, merchandise, chattels, moneys and effects of any nature or description having any real or marketable value and not included in the term "real property," as above defined.

SEC. 1037. The improvements on all lands situated in this State, which shall have been entered under the provisions of the act of Congress entitled "An act to secure homesteads to actual settlers on the public domain," approved May twentieth, one thousand eight hundred and sixty-two, and which shall be actually occupied and improved by the person so entering the same, or his heirs, shall be subject to taxation, and such improvements shall be assessed as personal property. All taxes levied thereon shall be collected out of the personal property of the occupant of such lands, and in no other manner.

SEC. 1038. The property in this section described is exempt from taxation, to wit:

1. That owned exclusively by the United States or by this State, but no lands contracted to be sold by the State shall be exempt.
2. That owned exclusively by any county, city, village, town or school district; but lands purchased by counties at tax sales shall be exempt only in the cases provided in Section Eleven Hundred and Ninety-one.
3. Personal property owned by any religious, scientific, literary or benevolent association, used exclusively for the purposes of such association, and the real property, if not leased, or not otherwise used for pecuniary profit, necessary for the location and convenience of the buildings of such association, and embracing the same not exceeding

ten acres ; and the lands reserved for grounds of a chartered college or university, not exceeding forty acres ; and parsonages, whether of local churches or districts, and whether occupied by the pastor permanently or rented for his benefit. The occasional leasing of such buildings for schools, public lectures or concerts, or the leasing of such parsonages, shall not render them liable to taxation.

4. Personal property owned and used exclusively by the State or any county agricultural society, and the lands owned and used by any such society exclusively for fair grounds.
5. Fire engines and other implements used for extinguishing fires, owned or used by any organized fire company, and the buildings and necessary grounds connected therewith, owned by such company, and used exclusively for its proper purposes.
6. The property of Indians who are not citizens, except lands held by them by purchase.
7. Lands used exclusively as public burial-grounds, and tombs and monuments to the dead therein.
8. Pensions receivable from the United States.
9. Stock in any corporation in this State which is required to pay taxes upon its property in the same manner as individuals.
10. So much of the debts due or to become due to any person as shall equal the amount of bona-fide and unconditional debts by him owing.
11. Wearing apparel, family portraits and libraries, kitchen furniture and growing crops.
12. Provisions and fuel provided by the head of a family to sustain its members for six months ; but no person paying board shall be deemed a member of a family.
13. All the personal property of all insurance companies that now are or shall be organized or doing business in this State.
14. The track, right of way, depot grounds, buildings, machine-shops, rolling-stock and other property necessarily used in operating any railroad in this State belonging to any railroad company, including pontoon, pile and pontoon railroads, and shall henceforth remain exempt from taxation for any purpose, except that the same shall be subject to special assessments for local improvements in cities and villages and all lands owned or claimed by such railroad company not adjoining the track of such company, shall be subject to all taxes. The provision of this subdivision shall not apply to any railroad that now is or shall be operated by horse-power, whether now or hereafter constructed in any village or city.
15. The property, except real estate, of all companies which are or shall be engaged in the business of telegraphing in this State.
16. The real estate of the Home of the Friendless in the city of Milwaukee, not exceeding one lot in amount, is exempted, so long as the same shall continue to be used as such home.
17. All property of any corporation or association formed under the laws of this State for the encouragement of industry by agricultural and industrial fairs and exhibitions, which shall be necessary for fair grounds, while used exclusively for such fairs and exhibitions, provided the quantity of land so exempt shall not exceed forty acres.
18. Such tree-belts as are or may be planted and maintained in compliance with chapter sixty-six of one of these statutes.

SEC. 1191. Real property, upon which the county holds any certificates of tax sale, shall continue liable to taxation and to sale for unpaid taxes, and the county shall be the exclusive purchaser at the sale ; but when a tax deed shall be issued to the county, and it shall hold tax certificates of sale unredeemed on the same property for two successive years subsequent to the date of the sale on which such deed shall issue, including certificates of sale made prior to the passage of these statutes, such property shall thereafter be exempt from taxation until the same is sold by the county. The County Clerk shall annually, before the first day of June, furnish to the Assessors of each town a list of the lands in such town exempt under this section. Nothing in this section shall be so construed as to apply to lands owned by minors, married women, widowed women, idiots or insane persons.

COLLECTION OF TAXES.

SEC. 1089. The Town Treasurer of each town, on the receipt of the tax-roll for the current year, shall forthwith post notices in three or four public places in such towns, that the tax-roll for such town is in his hands for collection, and that the taxes charged therein are subject to payment at his office at any time prior to the first day of January in such year; and after the said first day of January he shall proceed to collect the taxes charged in such roll and remaining unpaid, and for that purpose shall call at least once on the person taxed, or at any place of his usual residence, if within the town, and demand payment of the taxes charged to him on such roll.

SEC. 1090. On all taxes paid or tendered at the office of such Treasurer prior to said first day of January, he shall remit all of the 5-per-cent collection fees, except so much thereof as he is authorized by law to have for his fees upon taxes so paid.

SEC. 1091. Town orders shall be receivable for taxes in the town where issued, and shall be allowed the Town Treasurer on settlement of town taxes; and county orders and jurors' certificates shall be receivable for taxes in the county where issued, and shall be allowed such Treasurer on settlement of county taxes with the County Treasurer, but no Town Treasurer shall receive town orders in payment for taxes to a larger amount than the town taxes included in his assessment-roll exclusive of all taxes for school purposes, nor county orders and jurors' certificates to a greater amount than the county tax included therein.

SEC. 1097. In case any person shall refuse or neglect to pay the tax imposed upon him, the Town Treasurer shall levy the same by distress and sale of any goods and chattels belonging to such person, wherever the same may be found within his town; and if a sufficient amount of such property cannot be found in such town, the Town Treasurer may levy the same by distress and sale of the goods and chattels belonging to such person, wherever the same may be found in the county or in any adjoining counties.

SEC. 1098. The Town Treasurer shall give public notice of the time and place of such sale, at least six days previous thereto, by advertisement, containing a description of the property to be sold, to be posted up in three public places in the town where the sale is to be made. The sale shall be at public auction, in the daytime, and the property sold shall be present; such property may be released by the payment of the taxes and charges for which the same is liable, to be sold; if the purchase-money on such sale shall not be paid at such time as the Treasurer may require, he may again, in his discretion, expose such property for sale, or sue, in his name of office, the purchaser for the purchase-money, and recover the same with costs and 10-per-centum damages.

SEC. 1099. If the property so levied upon shall be sold for more than the amount of tax and costs, the surplus shall be returned to the owner thereof; and if it cannot be sold for want of bidders, the Treasurer shall return a statement of the fact, and return the property to the person from whose possession he took the same; and the tax, if unsatisfied, shall be collected in the same manner as if no levy had been made.

HIGHWAYS AND BRIDGES.

SEC. 1223. The Supervisors of the several towns shall have the care and supervision of the highways and bridges therein, and it shall be their duty:

1. To give directions for repairing the highways and bridges within their respective towns, and cause to be removed all obstructions therefrom.
2. To cause such of the roads used as highways as have been laid out but not sufficiently described, and such as have been lawfully laid out and used as such up to the then present time, but not fully and sufficiently recorded, to be ascertained, described and entered of record in the Town Clerk's office.

3. To cause bridges which are or may be erected over streams intersecting highways to be kept in repair.
4. To divide their respective towns into so many road districts as they shall judge convenient, and specify every such division in writing under their hands, to be recorded in the office of the Town Clerk; but no such division shall be made within ten days next preceding the annual town meeting.
5. To assign to each of the said road districts such of the inhabitants liable to pay taxes on highways as they think proper, having regard to the nearness of residence as much as practicable.
6. To require the Overseers of Highways from time to time, and as often as they shall deem necessary, to perform any of the duties required of them by law.
7. To assess the highway taxes in their respective towns in each year, as provided by law.
8. To lay out and establish upon actual surveys, as hereinafter provided, such new roads in their respective towns as they may deem necessary and proper; to discontinue such roads as shall appear to them to have become unnecessary, and to widen or alter such roads when they shall deem necessary for public convenience, and perform all other duties respecting highways and bridges directed by this chapter.

INTOXICATING LIQUORS.

SEC. 1548. The Town Boards, Village Boards and Common Councils of the respective towns, villages and cities may grant license to such persons as they may deem proper, to keep groceries, saloons or other places, within their respective towns, villages or cities, for the sale in quantities less than one gallon of strong, spirituous, malt, ardent or intoxicating liquors, to be drank on the premises; and in like manner may grant licenses for the sale in any quantity of such liquors not to be drank on the premises. The sum to be paid for such license for the sale of such liquor to be drank on the premises shall not be less than twenty-five nor more than one hundred and fifty dollars; and for the sale of such liquors not to be drank on the premises shall be not less than ten nor more than forty dollars.

SEC. 1549. Every applicant for such license shall, before delivery thereof, file with such town, village or city clerk a bond to the State in the sum of five hundred dollars, with at least two sureties, to be approved by the authorities granting the license, who shall each justify in double its amount over and above their debts and liabilities and exemptions, and be freeholders and residents of the county, conditioned that the applicant, during the continuance of his license will keep and maintain an orderly and well-regulated house; that he will permit no gambling with cards, dice or any device or implement for that purpose, within his premises or any out-house, yard or shed appertaining thereto; that he will not sell or give away any intoxicating liquor to any minor, having good reason to believe him to be such, unless upon the written order of the parents or guardian of such minor, or to persons intoxicated or bordering upon intoxication, or to habitual drunkards; and that he will pay all damages that may be recovered by any person, and that he will observe and obey all orders of such Supervisors, Trustees or Aldermen, or any of them, made pursuant to law. In case of the breach of the condition of any such bond, an action may be brought thereon in the name of the State of Wisconsin, and judgment shall be entered against the principals and sureties therein named for the full penalty thereof; and execution may issue thereupon by order of the court therefor, to satisfy any judgment that may have been recovered against the principal named in said bond, by reason of any breach in the conditions thereof, or for any penalties of forfeitures incurred under this chapter. If more than one judgment shall have been recovered, the court, in its discretion, may apply the proceeds of said bond toward the satisfaction of said several judgments, in whole or in part, in such manner as it may see fit.

SEC. 1550. If any person shall vend, sell, deal or traffic in or for the purpose of evading this chapter, give away, any spirituous, malt, ardent or intoxicating liquors or drinks in any

quantity whatever without first having obtained license therefor, according to the provisions of this chapter, he shall be deemed guilty of a misdemeanor, and, on conviction thereof shall be punished by fine of not less than ten nor more than forty dollars, besides the costs of suit, or, in lieu of such fine, by imprisonment in the county jail of the proper county not to exceed sixty days nor less than twenty days; and, in case of punishment by fine as above provided, such person shall, unless the fine and costs be paid forthwith, be committed to the county jail of the proper county until such fine and costs are paid, or until discharged by due course of law; and, in case of a second or any subsequent conviction of the same person during any one year, the punishment may be by both fine and imprisonment, in the discretion of the court.

SEC. 1551. Upon complaint made to any Justice of the Peace by any person that he knows or has good reason to believe that an offense against this chapter, or any violation thereof, has been committed, he shall examine the complainant on oath, and he shall reduce such complaint to writing and cause the same to be subscribed by the person complaining. And if it shall appear to such Justice that there is reasonable cause to believe that such offense has been committed, he shall immediately issue his warrant, reciting therein the substance of such complaint and requiring the officer to whom such warrant shall be directed forthwith to arrest the accused and bring him before such Justice, to be dealt with according to law; and the same warrant may require the officer to summon such persons as shall be therein named to appear at the trial to give evidence.

SEC. 1552. The District Attorney of the proper county shall, on notice given to him by the Justice of the Peace before whom any such complaint shall be made, attend the trial before such Justice and conduct the same on behalf of the State.

SEC. 1553. Every supervisor, trustee, alderman and justice of the peace, police officer, marshal, deputy marshal and constable of any town, village or city who shall know or be credibly informed that any offense has been committed against the provisions of this chapter shall make complaint against the person so offending within their respective towns, villages or cities to a proper Justice of the Peace therein, and for every neglect or refusal so to do every such officer shall forfeit twenty-five dollars, and the Treasurer of such town, village or city shall prosecute therefor.

SEC. 1557. Any keeper of any saloon, shop or place of any name whatsoever for the sale of strong, spirituous or malt liquors to be drunk on the premises in any quantity less than one gallon, who shall sell, vend or in any way deal or traffic in or for the purpose of evading this chapter, give away any spirituous, ardent or malt liquors or drinks in any quantity whatsoever to or with a minor, having good reason to believe him to be such, or to a person intoxicated or bordering on a state of intoxication, or to any other prohibited person before mentioned, shall be deemed guilty of a misdemeanor; nor shall any person sell or in any way deal or traffic in, or, for the purpose of evading this chapter, give away, any spirituous, ardent, intoxicating or malt liquors or drinks in any quantity whatsoever within one mile of either of the hospitals for the insane; and any person who shall so sell or give away any such liquors or drinks shall be deemed guilty of a misdemeanor.

BILLS OF EXCHANGE AND PROMISSORY NOTES.

SEC. 1675. All notes in writing made and signed by any person or for any corporation, and all certificates of the deposit of money issued by any person or corporation, whereby he or it shall promise to pay to any person or order, or unto the bearer, any sum of money, as therein mentioned, shall be due and payable as therein expressed, and shall have the same effect and shall be negotiable in like manner as inland bills of exchange, according to the custom of merchants. But no order drawn upon or accepted by the Treasurer of any county, town, city, village or school district, whether drawn by any officer thereof or any other person, and no obligation nor instrument made by such corporation or any officer thereof, unless expressly authorized by law

to be made negotiable, shall be, or shall be deemed to be, negotiable according to the customs of merchants, in whatever form they may be drawn or made.

SEC. 1680. On all bills of exchange payable at sight, or at future day certain, within this State, and all negotiable promissory notes, orders and drafts payable at a future day certain, within this State, in which there is not an express stipulation to the contrary, grace should be allowed in like manner as it is allowed by the custom of merchants on foreign bills of exchange payable at the expiration of a certain period after date or sight. The provisions of this section shall not extend to any bill of exchange, note or draft payable on demand.

SEC. 1684. All notes, drafts, bills of exchange or other negotiable paper maturing on Sunday or upon any legal holiday shall be due and payable on the next preceding secular day.

HOURS OF LABOR.

SEC. 1728. In all manufactories, work-shops and other places used for mechanical or manufacturing purposes, the time of labor of children under eighteen years of age and of women employed therein, shall not exceed eight hours in one day; and any employer, stockholder, director, officer, overseer, clerk or foreman who shall compel any woman or any child to labor exceeding eight hours in any one day, or who shall permit any child under fourteen years of age to labor more than ten hours in any one day in any such place, if he shall have control over such child sufficient to prevent it, or who shall employ at manual labor any child under twelve years of age in any factory or work-shop where more than three persons are employed, or who shall employ any child of twelve and under fourteen years of age in any such factory or work-shop for more than seven months in any one year, shall forfeit not less than five nor more than fifty dollars for each such offense.

SEC. 1729. In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours, and all engagements or contracts for labor in such cases shall be so construed; but this shall not apply to any contract for labor by the week, month or year.

FORM OF CONVEYANCES.

SEC. 2207. A deed of quitclaim and release of the form in common use or of the form hereinafter provided, shall be sufficient to pass all the estate which the grantor could lawfully convey by deed of bargain and sale.

SEC. 2208. Conveyances of land may be in substantially the following form:

WARRANTY DEED.

A B, grantor of _____ County, Wisconsin, hereby conveys and warrants to C D, grantee, of _____ County, Wisconsin, for the sum of _____ dollars, the following tract of land in _____ County.

(Here describe the premises.)

Witness the hand and seal of said grantor this _____ day of _____, 18—.

QUITCLAIM DEED.

A B, grantor, of _____ County, Wisconsin, hereby quitclaims to C D, grantee, of _____ County, Wisconsin, for the sum of _____ dollars, the following tract of land in _____ County,

(Here describe the premises.)

Witness the hand and seal of said grantor this _____ day of _____, 18—.

In presence of }
 _____ }
 _____ }

_____ [SEAL.]
 _____ [SEAL.]
 _____ [SEAL.]
 _____ [SEAL.]

Such deeds, when executed and acknowledged as required by law, shall, when of the first of the above forms, have the effect of a conveyance in fee simple to the grantee, his heirs and assigns of the premises therein named, together with all the appurtenances, rights and privileges thereto belonging, with a covenant from the grantor, his heirs and personal representatives, that he is lawfully seized of the premises; has good right to convey the same; that he guarantees the grantee, his heirs and assigns in the quiet possession thereof; that the same are free from all incumbrances, and that the grantor, his heirs and personal representatives will forever warrant and defend the title and possession thereof in the grantee, his heirs and assigns against all lawful claims whatsoever. Any exceptions to such covenants may be briefly inserted in such deed, following the description of the land; and when in the second of the above forms, shall have the effect of a conveyance in fee simple to the grantee, his heirs and assigns, of all the right, title, interest and estate of the grantor, either in possession or expectancy, in and to the premises therein described, and all rights, privileges and appurtenances thereto belonging.

MORTGAGES.

SEC. 2209. A mortgage may be substantially in the following form :

A B, mortgagor, of _____ County, Wisconsin, hereby mortgages to C D, mortgagee, of _____ County, Wisconsin, for the sum of _____ dollars, the following tract of land in _____ County.

(Here describe the premises.)

This mortgage is given to secure the following indebtedness :

(Here state amount or amounts and form of indebtedness, whether on note, bond or otherwise, time or times when due, rate of interest, by and to whom payable, etc.)

The mortgagor agrees to pay all taxes and assessments on said premises, and the sum of _____ dollars attorney's fees in case of foreclosure thereof.

Witness the hand and seal of said mortgagor this _____ day of _____, 18—.

In presence of }

_____ }

_____ [SEAL.]
_____ [SEAL.]

when executed and acknowledged according to law shall have the effect of a conveyance of the land therein described, together with all the rights, privileges and appurtenances thereunto belonging in pledge to the mortgagee, his heirs, assigns and legal representatives for the payment of the indebtedness therein set forth, with covenant from the mortgagor that all taxes and assessments levied and assessed upon the land described during the continuance of the mortgage shall be paid previous to the day appointed by law for the sale of lands for taxes, as fully as the forms of mortgage now and heretofore in common use in this State, and may be foreclosed in the same manner and with the same effect, upon any default being made in any of the conditions thereof as to payment of either principal, interest or taxes.

ASSIGNMENT OF MORTGAGE.

SEC. 2210. An assignment of a mortgage substantially in the following form :

For value received I, A B, of _____, Wisconsin, hereby assign to C D, of _____, Wisconsin, the within mortgage (or a certain mortgage executed to _____ by E F and wife, of _____ County, Wisconsin, the _____ day of _____, 18—, and recorded in the office of the Register of Deeds of _____ County, Wisconsin, in Vol. _____ of mortgages, on page _____), together with the _____ and indebtedness therein mentioned.

Witness my hand and seal this _____ day of _____, 18—.

In presence of }

_____ }

A B. [SEAL.]

W. D. Bacon

shall be sufficient to vest in the assignee for all purposes all the rights of the mortgagee under the mortgage, and the amount of the indebtedness due thereon at the date of assignment. Such assignment, when indorsed upon the original mortgage, shall not require an acknowledgment in order to entitle the same to be recorded.

TITLE TO REAL PROPERTY BY DESCENT.

SEC. 2270. When any person shall die, seized of any lands, tenements or hereditaments, or any right thereto, or entitled to any interest therein in fee simple, or for the life of another, not having lawfully devised the same, they shall descend subject to his debts, except as provided in the next section, in the manner following:

1. In equal shares to his children, and to the lawful issue of any deceased child, by right of representation; and if there be no child of the intestate living at his death, his estate shall descend to all his other lineal descendants; and if all the said descendants are in the same degree of kindred to the intestate, they shall share the estate equally, otherwise they shall take according to the right of representation.
2. If he shall leave no lawful issue, to his widow; if he shall leave no such issue or widow, to his parents, if living; and if either shall not be living, the survivor shall inherit his said estate. If a woman shall die, leaving no issue, her estate shall descend to her husband, if she shall have one at the time of her decease, and if she shall leave, surviving her, neither issue nor husband, to her parents, if living; and if either shall not be living, the survivor shall inherit her said estate.
3. If he shall leave no lawful issue, nor widow, nor father, nor mother, his estate shall descend in equal shares to his brothers and sisters, and to the children of any deceased brother or sister, by right of representation.
4. If the intestate shall leave no lawful issue, widow, father, mother, brother nor sister, his estate shall descend to his next of kin in equal degree, except that when there are two or more collateral kindred in equal degree, but claiming through different ancestors, those who claim through the nearest ancestor shall be preferred to those claiming through an ancestor more remote; provided, however,
5. If any person die leaving several children, or leaving one child, and the issue of one or more other children, and any such surviving child shall die under age, and not having been married, all the estate that came to the deceased child, by inheritance from such deceased parent, shall descend in equal shares to the other children of the same parent, and to the issue of any such other children who shall have died, by right of representation.
6. If, at the death of such child, who shall die under age, and not having been married, all the other children of his said parent shall also be dead, and any of them shall have left issue, the estate that came to said child by inheritance from his said parent, shall descend to all the issue of the other children of the same parent; and if all the said issue are in the same degree of kindred to said child, they shall share the said estate equally; otherwise they shall take according to the right of representation.
7. If the intestate shall have no widow nor kindred, his estate shall escheat to the State, and be added to the capital of the school fund.

SEC. 2271. When the owner of any homestead shall die, not having lawfully devised the same, such homestead shall descend free of all judgments and claims against such deceased owner or his estate, except mortgages lawfully executed thereon, and laborers' and mechanics' liens, in the manner following:

1. If he shall have no lawful issue, to his widow.
2. If he shall leave a widow and issue, to his widow during her widowhood, and, upon her marriage or death, to his heirs, according to the next preceding section.
3. If he shall leave issue and no widow, to such issue, according to the preceding section.
4. If he shall leave no issue or widow, such homestead shall descend under the next preceding section, subject to lawful liens thereon.

OF WILLS.

SEC. 2277. Every person of full age, and any married woman of the age of eighteen years and upward, being of sound mind, seized in his or her own right of any lands, or of any right thereto, or entitled to any interest therein, descendible to his or her heirs, may devise and dispose of the same by last will and testament in writing; and all such estate not disposed of by will, shall descend as the estate of an intestate, being chargeable, in both cases, with the payment of all his debts or her debts, except as provided in the next preceding chapter, and in section twenty-two hundred and eighty.

SEC. 2278. Every devise of land in any will shall be construed to convey all the estate of the devisor therein, which he could lawfully devise, unless it shall clearly appear by the will that the devisor intended to convey a less estate.

SEC. 2279. Any estate, right or interest in lands acquired by the testator, after the making of his will, shall pass thereby in like manner as if possessed at the time of making the will, if such shall manifestly appear, by the will, to have been the intention of the testator.

SEC. 2280. When any homestead shall have been disposed of by the last will and testament of the owner thereof, the devisee shall take the same, free of all judgments and claims against the testator or his estate, except mortgages lawfully executed thereon, and laborers' and mechanics' liens.

SEC. 2281. Every person of full age, and every married woman of the age of eighteen years and upward, being of sound mind, may, by last will and testament in writing, bequeath and dispose of all his or her personal estate remaining at his or her decease, and all his or her rights thereto and interest therein, subject to the payment of debts; and all such estate not disposed of by the will shall be administered as intestate estate.

SEC. 2284. All beneficial devises, legacies and gifts whatsoever, made or given in any will to a subscribing witness thereto, shall be wholly void, unless there be two other competent subscribing witnesses to the same; but a mere charge on the lands of the devisor for the payment of debts, shall not prevent his creditors from being competent witnesses to his will.

SEC. 2285. But if such witness, to whom any beneficial devise may have been made or given, would have been entitled to any share of the estate of the testator, in case the will was not established, then so much of the share that would have descended or been distributed to such witness as will not exceed the devise or bequest made to him in the will, shall be saved to him, and he may recover the same of the devisees or legatees named in the will, in proportion to and out of the parts devised or bequeathed to them.

SEC. 2286. When any child shall be born, after the making of his parent's will, and no provision shall be made therein for him, such child shall have the same share in the estate of the testator as if he had died intestate; and the share of such child shall be assigned to him, as provided by law, in case of intestate estates, unless it shall be apparent from the will that it was the intention of the testator that no provision should be made for such child.

SEC. 2290. No will, or any part thereof, shall be revoked, unless by burning, tearing, canceling or obliterating the same, with the intention of revoking it, by the testator, or by some person in his presence, and by his direction, or by some other will or codicil in writing, executed as prescribed in this chapter, or by some other writing, signed, attested and subscribed in the manner provided in this chapter, for the execution of a will; excepting, only, that nothing contained in this section shall prevent the revocation implied by law, from subsequent changes in the condition or circumstances of the testator. The power to make a will implies the power to revoke the same.

OF THE ADOPTION OF CHILDREN.

SEC. 4021. Any inhabitant of this State may petition the County Court, in the county of his residence, for leave to adopt a child not his own by birth; but no such petition made by a married person shall be granted, unless the husband or wife of the petitioner shall join therein;

nor shall any such petition be granted, unless the child, if of the age of fourteen years, or more, shall consent thereto in writing, in the presence of the court.

SEC. 4022. No such adoption shall be made, without the written consent of the living parents of such child, unless the court shall find that one of the parents has abandoned the child, or gone to parts unknown, when such consent may be given by the parent, if any, having the care of the child. In case where neither of the parents is living, or if living, have abandoned the child, such consent may be given by the guardian of such child, if any; if such child has no guardian, such consent may be given by any of the next of kin of such child, residing in this State, or, in the discretion of the court, by some suitable person to be appointed by the court.

2. In case of a child not born in lawful wedlock, such consent may be given by the mother, if she is living, and has not abandoned such child.

SEC. 4023. If upon such petition and consent, as herein provided, the County Court shall be satisfied of the identity and the relations of the persons, and that the petitioners are of sufficient ability to bring up, and furnish suitable nurture and education for the child, having reference to the degree and condition of its parents, and that it is proper that such adoption shall take effect, such court shall make an order, reciting said facts that, from and after the date thereof, such child shall be deemed, to all legal intents and purposes, the child of the petitioners; and by such order the name of such child may be changed to that of the parents by adoption.

SEC. 4024. A child so adopted, shall be deemed for the purposes of inheritance and succession by such child, custody of the person and right of obedience by such parents by adoption, and all other legal consequences and incidents of the natural relation of parents and children, the same to all intents and purposes as if such child had been born in lawful wedlock of such parents by adoption, excepting that such child shall not be capable of taking property expressly limited to the heirs of the body of such parents.

The natural parents of such child shall be deprived, by such order of adoption, of all legal rights whatsoever, respecting such child, and such child shall be freed from all legal obligations of maintenance and obedience to such natural parents.

INTEREST.

The legal rate of interest is 7 per cent. A higher rate of interest, not exceeding 10 per cent, may be contracted for, but the same must be clearly expressed in writing. If a higher rate than 10 per cent is collected or paid, the party so paying may, by himself or his legal representative, recover treble the amount so paid above the 10 per cent, if the action is brought within one year, and all bills, notes, or other contracts whatsoever, whereby a higher rate than 10 per cent is secured, shall be liable for the principal sum, but no interest shall be recovered.

JURISDICTION OF COURTS.

The Circuit Courts have general jurisdiction over all civil and criminal actions within their respective circuits, subject to a re-examination by the Supreme Court.

The County Courts shall have jurisdiction over the probate matters in their respective counties, and shall have exclusive appellate jurisdiction in the counties of Brown, Dodge, Fond du Lac, Milwaukee and Winnebago in all cases of appeals from Justices of the Peace in civil actions, and all cases commenced in Justices' Courts therein, there shall be an answer put in, showing that the title of lands will come in question.

And such Courts shall have concurrent and equal jurisdiction in all civil actions and proceedings with the Circuit Courts of said counties to the following extent respectively:

The County Court of Brown, when the value of the property in controversy, after deducting all payments and set-offs, shall not exceed five thousand dollars.

The County Court of Dodge County, when such value shall not exceed twenty-five thousand dollars.

The County Court of Fond du Lac, when such value shall not exceed twenty thousand dollars.

The County Court of Milwaukee, when such value does not exceed five million dollars.

The County of Winnebago, when such value does not exceed twenty thousand dollars.

They shall have jurisdiction of all actions for foreclosure where the value does not exceed the above amounts, and of all actions for divorce or for affirmation or annulment of marriage contract.

Justices of the Peace have jurisdiction in civil matters where two hundred dollars or less are involved.

The criminal jurisdiction of Justices extends to all cases where the fine is one hundred dollars, or the imprisonment six months.

JURORS.

All persons who are citizens of the United States, and qualified electors of the State shall be liable to be drawn as jurors, except as provided as follows:

The following persons shall be exempt from serving as jurors:

All officers of the United States, the Governor, Lieutenant Governor, Secretary of State, Attorney General, State Superintendent and Treasurer; all Judges, Clerks of Courts of Record; all county officers, Constables, attorneys and counselors at law, ministers of the Gospel of any religious society, practicing physicians, surgeons, dentists, and the President, professors and instructors of the University and their assistants, and of the several colleges and incorporated academies; all teachers of the State Normal Schools, one teacher in each common school, the officers and employes of the several State institutions, one miller in each grist-mill, one ferryman at each licensed ferry, one dispensing druggist in each prescription drug-store, all telegraph operators and superintendents, conductors, engineers, firemen, collectors and station-agents of any railroad or canal, while in actual employment as such; all officers of fire departments, and all active members of fire companies organized according to law; all persons more than sixty years of age, and all persons of unsound mind or subject to any bodily infirmity amounting to disability; all persons who have been convicted of any infamous crime, and all persons who have served at any regular term of the Circuit Court as a grand or petit juror within one year, except he shall be summoned on a special venire or as a talesman.

CAPITAL PUNISHMENT.

Capital punishment has been abolished in this State.

WOLF SCALPS.

A bounty of five dollars is paid for each wolf scalp.

WEIGHTS AND MEASURES.

Whenever either of the articles, as commodities hereafter mentioned, shall be sold by the bushel, and no special agreement as to measure or weight thereof shall be made by the parties, the measure shall be ascertained by weight, and shall be computed as follows:

Sixty pounds for a bushel of wheat, clover seed, potatoes or beans.

Fifty pounds for a bushel of green apples; fifty-six pounds for a bushel of rutabagas, flax-seed, rye or Indian corn shelled, and seventy pounds of Indian corn unshelled; fifty pounds for a bushel of rape seed, buckwheat, beets, carrots or onions; forty-eight pounds for a bushel of barley; forty-five pounds for a bushel of timothy seed; forty-four pounds for a bushel of parsnips; forty-two pounds for a bushel of common flat turnips; thirty-two pounds for a bushel of oats; and twenty-eight pounds for a bushel of dried apples or dried peaches.

No person shall sell, buy or receive in store any grain at any weight or measure per bushel other than the standard weight or measure per bushel fixed by law; and, for any violation, the offender shall forfeit not less than five nor more than fifty dollars.

DAMAGES FOR TRESPASS.

Any person who shall willfully, maliciously or wantonly destroy, remove, throw down or injure any fence, hedge or wall inclosing any orchard, pasture, meadow, garden, or any field whatever on land belonging to or lawfully occupied by another, or open and leave open, throw down, injure, remove or destroy any gate or bars in such fence, hedge or wall, or cut down, root up, sever, injure, destroy or carry away when severed, any fruit, shade, ornamental or other tree, or any shrub, root, plant, fruit, flower, grain or other vegetable production, or dig up, sever or carry away any mineral, earth or stone, or tear down, mutilate, deface or injure any building, sign-board, fence or railing, or sever and carry away any part thereof, standing or being upon the land of another or held in trust, or who shall willfully, maliciously or wantonly cut down, root up, injure, destroy or remove or carry away any fruit, ornamental or other tree, or any shrub, fruit, flower, vase or statue, arbor, or any ornamental structure, standing or being in any street or public ground in any city or village, in any private inclosure or highway, or destroy, remove, mutilate or injure any milestone or board, or any guide-post or board erected in any highway or public way, or on any turnpike, plank-road or railroad, or deface or obliterate any device or inscription thereon, or cut down, break down, remove, mutilate or injure any monument erected or tree marked for the purpose of designating the boundaries of any town or tract of land or subdivision thereof, or deface or obliterate any figures, letters, device or inscription thereon, made for such purpose, or break, remove, destroy or injure any post, guard, railing or lamp-post or lamp thereon, erected or being on any bridge, street, sidewalk, alley, court, passage, park, public ground, highway, turnpike, plank or rail road, or extinguish or break any lamp on any such lamp-post, or tear, deface, mutilate or injure any book, map, pamphlet, chart, picture or other property belonging to any public library, or take and carry away the same with intent to convert to his own use, or shall injure or destroy any personal property of another, shall be punished by imprisonment in the county jail not more than six months, or by fine not exceeding one hundred dollars.

Any person who shall willfully, maliciously or wantonly kill, maim, mutilate, disfigure or injure any horse, mule, cattle, sheep or other domestic animal of another, or administer poison to such animal, or expose any poison, with intent that the same may be taken or swallowed by such animal; and any person who shall overdrive, overwork, overload, maim, wound, torture, torment, cruelly beat or kill any such animal belonging to himself or another, or being the owner or having the care or charge thereof, shall fail to provide necessary food, water or shelter for any such animal, or who shall turn out and abandon, without proper care and protection, or cruelly work any such animal when old, diseased, disabled or unfit for work, or shall carry or confine any live animal, fowl or bird, in a cruel or inhuman manner, or who shall cause, procure or abet any cruelty above mentioned, or the fighting or baiting of bulls, dogs or cocks, shall be punished by imprisonment in the county jail not more than six months or by fine not exceeding one hundred dollars.

ESTRAYS.

No stray, except horses and mules, shall be taken up by any person not a resident of the town in which it is found; nor unless it is found upon land owned or occupied by him. Every finder for a stray must notify the owner, if he is known, within seven days, and request him to pay all reasonable charges and take the stray away. If the owner is not known, he must file a notice with the Town Clerk within ten days, who shall transmit a copy thereof to the County Clerk.

If the stray is not worth five dollars, the finder shall post a copy of such notice in two public places in such town; if it exceed five dollars in value, he shall publish such notice four

successive weeks either in some newspaper published in the county or in an adjoining county, if one be published nearer his residence than any published in his county; but if no newspaper is published within twenty miles of his residence, then he must post such notice in three public places in his county. Such notice shall describe the stray by giving its marks, natural or artificial, as near as possible, the name and residence of the finder, specifying the section and town, and the time when such stray was taken up. For neglect to post up or publish as required, the finder shall be liable to double the amount of damages sustained by the owner. For neglect to post or publish for one year, the finder shall be liable for its full value, to be recovered in the name of the town, and the amount recovered to be added to the school fund of such town.

The finder shall, within one month, cause the stray to be appraised by a Justice of the Peace and a certificate of such appraisal signed by such Justice filed in the Town Clerk's office. The finder shall pay the Justice fifty cents for such certificate, and ten cents per mile for each mile necessarily traveled to make the same.

The owner may have the same restored to him any time within one year after such notice is filed in the town Clerk's office, by proving that the stray belongs to him, and paying all lawful charges incurred in relation to the same. If the owner and finder cannot agree as to the charges, either party, on notice to the other, may apply to a Justice of such town to settle the same, who, for that purpose, may examine witnesses upon oath, and the amount found due, with the costs, shall be a lien upon such stray. If no owner applies for the return of such stray, as provided, and the same is not worth more than ten dollars, it shall become the absolute property of such finder; but if the appraisal shall exceed ten dollars, it shall be sold at public auction by the Sheriff or any Constable of the county, on the request of the finder, and he shall be entitled to one-half the proceeds, and the other half shall be paid to the Treasurer of the town within ten days. If the finder shall neglect or refuse to cause such sale, he shall pay to the town the value of such stray, to be recovered by the town.

If any person, without the consent of the owner, shall take away such stray, without first paying the lawful charges, he shall be liable to the finder for the value of such stray. If the finder shall neglect to do any act prescribed above, he shall be precluded from acquiring any right in such stray, and from receiving any charges or expenses relative thereto.

FENCES.

The Overseers of Highways in their respective towns, the Aldermen of cities in their respective wards, and the Trustees of villages in their respective villages, shall be Fence Viewers, and in towns having less than three road districts, the Supervisors shall be Fence Viewers.

All fences four and a half feet high, and in good repair, consisting of rails, timber, boards or stone walls, or any combination thereof, and all brooks, rivers, ponds, creeks, ditches and hedges or other things which shall be considered equivalent thereto, in the judgment of the Fence Viewers, within whose jurisdiction the same may be, shall be deemed legal and sufficient fences. Every partition of a fence, or line upon which a fence is to be built, made by the owners of the adjoining lands, in writing, sealed and witnessed by two witnesses, or by Fence Viewers in writing, under their hands, after being recorded in the Town Clerk's office, shall oblige such owners and their heirs, as long as they remain owners, and after parting with the ownership, until a new partition is made. A division of a partition fence, or line upon which a partition fence between adjoining lands shall be built, may be made by Fence Viewers in the following cases:

1. When any owner of uninclosed lands shall desire to inclose the same, he may have the line between his land and the adjoining land of any other person divided, and the portion upon which the respective owners shall erect their share of the partition fence assigned, whether such adjoining land be inclosed or not.

2. When any lands belonging to different persons in severalty, shall have been occupied in common, or without a partition fence between them, and one of the occupants shall be desirous

to occupy his part in severalty, and the others shall refuse or neglect, on demand, to divide with him the line where the fence ought to be built, or to build a sufficient fence on his part of the line, when divided, the occupant desiring it may have the same divided, and the share of each assigned.

3. When any controversy shall arise about the right of the respective occupants in partition fences, or their obligations to maintain the same, either party may have the line divided, and the share of each assigned.

In either case, application may be made to two or more Fence Viewers of the town where the lands lie, who shall give reasonable notice in writing to each party, and they shall in writing under their hands, divide the partition fence or line, and assign to each owner or occupant his share thereof, and in the second and third cases direct within what time each party shall build or repair his share of the fence, having regard to the season of the year, and shall file such decision in the Town Clerk's office. If either party shall neglect or refuse to build or repair within the time so assigned, his part of the fence, the other may, after having completed his own part, build or repair such part, and recover double the expense thereof.

Where the whole or a greater share than belongs to him has been built by one of the occupants, before complaint to the Fence Viewers, the other shall be obliged to pay for his share of such fence.

Where uninclosed land is afterward inclosed, the owner shall pay for one-half the partition fence upon the line between him and any other owner or occupant.

If any person shall determine not to keep inclosed any part of his land adjoining any partition fence, and shall give six months' notice of such determination to all adjoining occupants, he shall not be required to maintain any part of such fence during the time his lands shall lie open.

LANDLORD AND TENANT.

The common law right to distraint for rent is abolished.

The atonement of a tenant to a stranger shall be absolutely void, and shall not in anywise effect the possession of his landlord, unless it be made

1. With the consent of the landlord; or
2. Pursuant to, or in consequence of, a judgment or order of a court of competent jurisdiction; or
3. To a purchaser upon a judicial sale, who shall have acquired title to the lands by a conveyance thereof, after the period for redemption, if any, has expired. A tenancy, a will or sufferance may be determined by the landlord, giving one month's notice to quit, or the tenant giving one month's notice of his intention to quit, or if the terms of payment are for less than a month, notice equal to the time between payments, or for non-payment of rent, fourteen days' notice to quit. Such notice shall be served by delivering the same to such tenant, or to some person of proper age residing on the premises, or if no such person can be found, by affixing the same in a conspicuous part of the premises, where it may be conveniently read, and, at the expiration of the time required after the service of such notice, the landlord may re-enter, or maintain an action for the recovery of the possession thereof, or proceed in the manner prescribed by law to remove such tenant without further or other notice to quit. If, after giving notice of determination to quit, the tenant neglects or refuses to deliver up the premises, he shall be liable to double the rent agreed upon, to be collected the same as single rent.

MARKS AND BRANDS.

Every Town Clerk shall, on application of any person residing in his town, record a description of the marks or brands with which such person may be desirous of marking his horses, cattle, sheep or hogs; but the same description shall not be recorded or used by more than one resident of the same town. If any person shall mark any of his horses, cattle, sheep

or hogs, with the same mark or brand previously recorded by any resident of the same town, and while the same mark or brand shall be used by such resident, he shall forfeit for every such offense \$5; if any person shall willfully mark or brand any of the horses, cattle, sheep or hogs, of any other person with his mark or brand, he shall forfeit for every such offense \$10; and, if any person shall willfully destroy or alter any mark or brand upon any of the horses, cattle, sheep or hogs of another, he shall forfeit \$10, and pay to the party injured double damages.

SURVEYORS AND SURVEYS.

A County Surveyor is elected every two years.

The surveyor may appoint and remove deputies at will, on filing a certificate thereof with the County Clerk. He shall be responsible on his bond for the faithful performance by every deputy of his duties.

It shall be the duty of the County Surveyor:

- (1.) To execute, himself or by his deputy, any survey which may be required of him by order of court, or upon application of any individual or corporation.
- (2.) To make a record of the plat and field notes of each survey made by him or his deputies, in record books kept therefor, and to so arrange or index the same as to be easy of reference, and to file and preserve in his office the original field notes and calculations thereof.
- (3.) To safely keep all books, records, plats, files, papers and property belonging to his office; afford opportunity to examine the same to any person desiring, and deliver the same to his successor in office.
- (4.) To furnish a copy of any record, plat or paper in his office, to any person on demand and payment of his legal fees therefor.
- (5.) To administer to every chainman and marker assisting in any survey, before commencing their duties as such, an oath or affirmation faithfully and impartially to discharge the duties of chainman or marker, as the case may be; and the surveyor and his deputies are empowered to administer the same.
- (6.) To perform such other duties as may be required by law.

The surveyor and his deputies may demand and receive the following fees, except it be otherwise agreed upon with the parties employing them, to wit:

For each day's service, \$3.

For each mile traveled in going from his office to the place of rendering service and returning, 10 cents.

For plat and certificate, except town plats, 50 cents.

For recording a survey, 50 cents.

For each chainman and marker necessarily employed, \$1.50 per day, unless they be furnished by the person for whom the survey is made.

For making a copy, 10 cents a folio, and 25 cents for his certificate.

SUPPORT OF THE POOR.

Every town shall relieve and support all poor and indigent persons lawfully settled therein, whenever they shall stand in need thereof, excepting as follows:

The father, mother and children, being of sufficient ability, of any poor person, who is blind, old, lame, impotent or decrepit, so as to be unable to maintain himself, shall, at their own charge, relieve and maintain such poor person in such manner as shall be approved by the Supervisors of the town where such person may be, and, upon the failure of any such relative so to do, the Supervisors shall apply to the County Judge for an order to compel such relief.

Legal settlement may be acquired by one year's residence in a town of this State.

MARRIED WOMEN.

In Wisconsin, the marriage of a *femme sole*, executrix or administratrix, extinguishes her authority; and of a female ward, terminates the guardianship as to custody of person, but not as to estate. The husband holds his deceased wife's lands for life, unless she left, by a former husband, issue to whom the estate might descend. Provisions exist by which powers may be given to married women, and regulating their execution of them. If husband and wife are impleaded, and the husband neglects to defend the rights of the wife, she applying before judgment, may defend without him; and, if he lose her land, by default, she may bring an action for ejectment after his death. The real estate of females married before, and the real and personal property of those after February 21, 1850, remain their separate property. And any married woman may receive, but not from her husband, and hold any property as if unmarried. She may insure the life of her husband, son, or any other person, for her own exclusive benefit. The property of the wife remains to her separate use, not liable for her husband's debts, and not subject to his disposal. She may convey her separate property. If her husband desert her, or neglect her, she may become a sole trader; and she may insure his life for her benefit. Her husband is not liable for her debts contracted before marriage; the individual earnings of the wife are her separate property, and she may sue, and be sued alone, in regard to the same. She may make and hold deposits in savings-banks. She may, by a separate conveyance, release her dower in any lands which her husband has conveyed.

If a woman has authority, she can transact all her husband's business for him; and while they live together, the wife can buy all family things necessary for the support of the family, and for which he is liable.

The husband is responsible for necessaries supplied to his wife, if he does not supply them himself; and he continues so liable, if he turns her out of his house, or otherwise separates himself from her without good cause. But he is not so liable, if she deserts him (unless on extreme provocation), or if he turns her away for good cause. If she leaves him, because he treats her so ill, that she has good right to go from him, this is the same thing as turning her away, and she carries with her his credit for all necessaries supplied to her; but what the misconduct must be, to give this right, is uncertain. In America the law must be, and undoubtedly is, that the wife is not obliged to stay and endure cruelty and indecency.

If a man lives with a woman as his wife, and represents her to be so, he is responsible, the same as if she were his wife, even if it is known that she is not his wife.

ACTIONS:

All distinctions have been abolished, and there is now but one form, which must be prosecuted in the name of the real party in interest, except in case of executors, administrators and trustees, and which is begun by the service of a summons on the defendant, to be answered within twenty days.

ARREST.

Defendant may be arrested: 1. In an action to recover damages not on contract, where the defendant is a non-resident, or is about to remove from the State, or where the action is for injury to the person or character, or for injury to, or wrong taking, detaining or converting property, or in an action to recover damages for property taken under false pretenses.

2. In an action for a fine or penalty or for money received or property embezzled or fraudulently misapplied by a public officer or attorney, solicitor, or counsel or officer of a corporation as such, or factor agent or broker, or for misconduct or neglect in official or professional employment.

3. In an action to recover property unjustly detained where it is so concealed that the Sheriff cannot find the same.

4. Where the defendant was guilty of fraud in contracting the debt, or in concealing or disposing of the property for the taking, detaining or disposing of which the action is brought.

An affidavit must be made on the part of the plaintiff, stating the cause of action and one of the above causes.

ATTACHMENT

is allowed on an affidavit that the defendant is indebted to plaintiff, and stating the amount and that it is due on contract; and,

1. That defendant has absconded, or is about to abscond, or is concealed to the injury of his creditors.

2. That defendant has assigned, disposed or concealed his property or is about to do so with intent to defraud creditors.

3. That the defendant has removed, or is about to remove, his property from the State with intent to defraud creditors.

4. That the debt was fraudulently contracted.

5. That he is a non-resident.

6. Or a foreign corporation.

7. That he has fraudulently conveyed or disposed of his property with intent to defraud creditors.

The amount sued for must exceed \$50.

GARNISHMENT

is allowed on an affidavit on behalf of the creditor, that he believes that any third person (naming him) has property effects, or credits of defendant, or is indebted to him, also in execution, on a similar affidavit.

JUDGMENT

is a lien on real estate in the county where rendered from the date of docketing, and in other counties from the time of filing a transcript, and the lien continues for ten years. It bears interest at 7 per cent, or as high as 10 per cent if stipulated for in the contract.

STAY LAWS.

In Justices' Courts, on giving bond with surety within five days after judgment was rendered, stay of execution is allowed, as follows:

On sums not exceeding \$10, exclusive of costs, one month; between \$10 and \$30, two months; between \$30 and \$50, three months; over \$50, four months.

EXEMPTIONS.

A homestead not exceeding forty acres, used for agriculture and a residence, and not included in a town plat or a city or village; or, instead, one-quarter of an acre in a recorded town plat, city or village. Also, 1, Family Bible; 2, Family pictures and school-books; 3, Private library; 4, Seat or pew in church; 5, Right of burial; 6, Wearing-apparel, beds, bedsteads and bedding, kept and used in the family, stoves and appurtenances, put up and used, cooking utensils and household furniture to the value of \$200, one gun, rifle or fire-arm to the value of \$50; 7, Two cows, ten swine, one yoke of oxen and one horse or mule, or, in lieu thereof, a span of horses or mules, ten sheep and the wool therefrom, necessary food for exempt stock for one year, provided or growing or both, one wagon, cart or dray, one sleigh, one plow, one drag and other farm utensils, including tackle for the teams to the value of \$50; 8, Provisions and fuel for the family for one year; 9, Tools and implements or stock-in-trade of a

mechanic or miner, used and kept, not exceeding \$200 in value, library and implements of a professional man to the value of \$200; 10, Money arising from insurance of exempt property destroyed by fire; 11, Inventions for debts against the inventor; 12, Sewing-machines; 13, Sword, plate, books or articles presented by Congress or Legislature of a State; 14, Printing-material and presses to the value of \$1,500; 15, Earnings of a married person necessary for family support for sixty days previous to issuing process.

LIMITATIONS OF ACTIONS.

Real actions, *twenty years*; persons under disabilities, five years after removal of the same. Judgments of Courts of Record of the State of Wisconsin and sealed instruments when the cause accrues within the State, *twenty years*. Judgments of other Courts of Record and sealed instruments accruing without the State, *ten years*. Other contracts, statute liabilities other than penalties and forfeitures, trespass on real property, trover detinue and replevin, *six years*. Actions against Sheriffs, Coroners and Constables, for acts done in their official capacity, except for escapes, *three years*. Statutory penalties and forfeitures, libel, slander, assault, battery and false imprisonment, *two years*. Actions against Sheriffs, etc., for escapes, *one year*. Persons under disabilities, except infants, may bring action after the disability ceases, provided the period is not extended more than *five years*, and infants *one year* after coming of age. Actions by representatives of deceased persons, *one year* from death; against the same, *one year* from granting letters testamentary or of administration. New promise must be in writing.

COMMERCIAL TERMS.

\$—Means dollars, being a contraction of U. S., which was formerly placed before any denomination of money, and meant, as it means now, United States currency.

£—Means *pounds*, English money.

@—Stands for *at or to*; lb for pounds, and bbl. for barrels; ₪ for *per*, or *by the*. Thus: Butter sells at 20@30c ₪ lb, and Flour at \$8@12 ₪ bbl. % for per cent., and # for numbers.

May 1. Wheat sells at \$1.20@\$1.25, "seller June." *Seller June* means that the person who sells the wheat has the privilege of delivering it at any time during the month of June.

Selling *short* is contracting to deliver a certain amount of grain or stock at a fixed price, within a certain length of time, when the seller has not the stock on hand. It is for the interest of the person selling *short* to depress the market as much as possible, in order that he may buy and fill his contract at a profit. Hence the "shorts" are termed "bears."

Buying *long* is to contrive to purchase a certain amount of grain or shares of stock at a fixed price, deliverable within a stipulated time, expecting to make a profit by the rise in prices. The "longs" are termed "bulls," as it is for their interest to "operate" so as to "toss" the prices upward as much as possible.

SUGGESTIONS TO THOSE PURCHASING BOOKS BY SUBSCRIPTION.

The business of publishing books by subscription having so often been brought into disrepute by agents making representations and declarations not authorized by the publisher, in order to prevent that as much as possible, and that there may be more general knowledge of the relation such agents bear to their principal, and the law governing such cases, the following statement is made:

A subscription is in the nature of a contract of mutual promises, by which the subscriber agrees to pay a certain sum for the work described; the consideration is concurrent that the publisher shall publish the book named, and deliver the same, for which the subscriber is to pay the price named. The nature and character of the work is described by the prospectus and sample shown. These should be carefully examined before subscribing, as they are the

basis and consideration of the promise to pay, and not the too often exaggerated statements of the agent, who is merely employed to solicit subscriptions, for which he is usually paid a commission for each subscriber, and has no authority to change or alter the conditions upon which the subscriptions are authorized to be made by the publisher. Should the agent assume to agree to make the subscription conditional or modify or change the agreement of the publisher, as set out by the prospectus and sample, in order to bind the principal, the subscriber should see that such condition or changes are stated over or in connection with his signature, so that the publisher may have notice of the same.

All persons making contracts in reference to matters of this kind, or any other business, should remember that the law as written is, that they cannot be altered, varied or rescinded verbally, but, if done at all, must be done in writing. It is therefore important that all persons contemplating subscribing should distinctly understand that all talk before or after the subscription is made, is not admissible as evidence, and is no part of the contract.

Persons employed to solicit subscriptions are known to the trade as canvassers. They are agents appointed to do a particular business in a prescribed mode, and have no authority to do it in any other way to the prejudice of their principal, nor can they bind their principal in any other matter. They cannot collect money, or agree that payment may be made in anything else but money. They cannot extend the time of payment beyond the time of delivery, nor bind their principal for the payment of expenses incurred in their business.

It would save a great deal of trouble, and often serious loss, if persons, before signing their names to any subscription book, or any written instrument, would examine carefully what it is; if they cannot read themselves call on some one disinterested who can.

CONSTITUTION OF THE STATE OF WISCONSIN.

CONDENSED.

PREAMBLE.

We, the People of Wisconsin, grateful to Almighty God for our freedom; in order to secure its blessings, form a more perfect government, insure domestic tranquillity, and promote the general welfare, do establish this Constitution.

ARTICLE I.

DECLARATION OF RIGHTS.

SECTION 1. All men are born free and independent, and have, among other rights, those of life, liberty and pursuit of happiness. Governments are instituted to secure these rights.

SEC. 2. There shall be neither slavery nor involuntary servitude, except for the punishment of crimes.

SEC. 3. Liberty of speech and of the press shall not be abridged.

SEC. 4. The right of the people to peaceably assemble to consult for the common good shall never be abridged.

SEC. 5. The right of trial by jury shall remain inviolate.

SEC. 6. Excessive bail shall not be required, nor excessive fines imposed, nor cruel punishments inflicted.

SEC. 7. In criminal prosecutions, the rights of the accused shall be protected.

SEC. 8. Criminal offenses shall be prosecuted on presentment of a grand jury. No one shall be twice put in jeopardy for the same offense, nor be compelled to be a witness against himself. Every one shall have the right of giving bail except in capital offenses; and the writ of habeas corpus shall not be suspended, except in case of rebellion or invasion.

SEC. 9. Every person is entitled to a certain remedy for all injuries or wrongs.

SEC. 10. Treason consists in levying war against the State, or giving aid and comfort to its enemies. Two witnesses are necessary to convict a person of the crime.

SEC. 11. The people are to be secure against unreasonable searches and seizures.

SEC. 12. Bills of attainder, ex post facto laws, or laws impairing obligation of contracts, shall never be passed.

SEC. 13. No property shall be taken for public use without compensation.

SEC. 14. All laws in the State are allodial. Feudal tenures are prohibited.

SEC. 15. The rights of property are the same in resident aliens and citizens.

SEC. 16. No person shall be imprisoned for debt.

SEC. 17. Wholesome exemption laws shall be passed.

SEC. 18. Liberty of conscience and rights of worship shall never be abridged. The public money shall never be applied to sectarian uses.

SEC. 19. No religious test shall ever be required as a qualification for any office.

SEC. 20. The military shall be in strict subordination to the civil power.

SEC. 21. Writs of error shall never be prohibited by law.

SEC. 22. A free government can only be maintained by adhering to justice, moderation, temperance, frugality and virtue.

ARTICLE II.

BOUNDARIES.

SECTION 1. The boundary of the State, beginning at the northeast corner of the State of Illinois, runs with the boundary line of Michigan, through Lake Michigan and Green Bay, to the mouth of the Menominee River; up that stream and the Brule River to Lake Brule; along the southern shore of that lake to the Lake of the Desert; thence in a direct line to the head of Montreal River; down the main channel of that stream to the middle of Lake Superior; thence through the center of said lake to the mouth of St. Louis River; up the channel of that stream to the first rapids; thence due south to the main branch of the St. Croix; down that river and the Mississippi to the northwest corner of Illinois; thence due east with the northern boundary of that State to the place of beginning.

SEC. 2. The propositions in the enabling act of Congress are accepted and confirmed.

ARTICLE III.

SUFFRAGE.

SECTION 1. The qualified electors are all male persons twenty-one years of age or upward, who are (1.) white citizens of the United States; (2.) who are white persons of foreign birth that have declared their intentions, according to law, to become citizens; (3) who are persons of Indian blood and citizens of the United States; and (4.) civilized Indians not members of any tribe.

SEC. 2. Persons under guardianship, such as are non compos mentis or insane, and those convicted of treason and felony and not pardoned, are not qualified electors.

SEC. 3. All votes shall be by ballot, except for township officers when otherwise directed by law.

SEC. 4. No person shall be deemed to have lost his residence by reason of his absence on business for the State or United States.

SEC. 5. No person in the army or navy shall become a resident of the State in consequence of being stationed therein.

SEC. 6. Persons convicted of bribery, larceny or any infamous crime, or those who bet on elections, may be excluded by law from the right of suffrage.

ARTICLE IV.

LEGISLATIVE.

SECTION 1. The Legislative power is vested in a Senate and Assembly.

SEC. 2. Members of the Assembly shall never number less than fifty-four, nor more than one hundred; of the Senate, not more than one-third, nor less than one-fourth of the members of the Assembly.

SEC. 3. Census shall be taken, every ten years, of the inhabitants of the State, beginning with 1855, when a new apportionment of members of the Senate and Assembly shall be made; also, after each United States census.

SEC. 4. Members of the Assembly shall be chosen on the Tuesday succeeding the first Monday of November of each year.

SEC. 5. Members of the Senate shall be elected for two years, at the same time and in the same manner as members of the Assembly.

SEC. 6. No person shall be eligible to the Legislature, unless a resident of the State one year, and a qualified elector.

SEC. 7. Each House shall be the judge of the qualifications of its members. A majority shall be necessary to form a quorum.

SEC. 8. Each House shall make its own rules.

SEC. 9. Each House shall choose its own officers.

SEC. 10. Each House shall keep a journal of its proceedings.

SEC. 11. The Legislature shall meet at the seat of government once a year.

SEC. 12. No member shall be eligible to any other civil office in the State, during the term for which he was elected.

SEC. 13. No member shall be eligible to any office of the United States, during the term for which he was elected.

SEC. 14. Writs of election, to fill vacancies in either House, shall be issued by the Governor.

SEC. 15. Except treason, felony and breach of the peace, members are privileged from arrest in all cases; nor subject to any civil process during a session.

SEC. 16. Members are not liable for words spoken in debate.

SEC. 17. The style of all laws shall be, "The people of the State of Wisconsin represented in Senate and Assembly, do enact as follows:"

SEC. 18. Private or local bills shall not embrace more than one subject.

SEC. 19. Bills may originate in either House, and a bill passed by one House may be amended by the other.

SEC. 20. Yeas and nays, at the request of one-sixth of the members present, shall be entered on the journal.

SEC. 21. [Each member shall receive, as an annual compensation, three hundred and fifty dollars and ten cents for each mile traveled in going to and returning from the seat of government]. As amended in 1867.

SEC. 22. Boards of Supervisors may be vested with powers of a local, legislative and administrative character, such as shall be conferred by the Legislature.

SEC. 23. One system only, of town and county government, shall be established by the Legislature.

SEC. 24. The Legislature shall never authorize any lottery, or grant any divorce.

SEC. 25. Stationery, for State use and State printing, shall be let by contract to the lowest bidder.

SEC. 26. Extra compensation to any public officer shall not be granted after service is rendered, nor shall his compensation be increased or diminished during his term of office.

SEC. 27. The Legislature shall direct, by law, in what manner and in what Courts suits against the State may be brought.

SEC. 28. Public officers shall all take an oath of office.

SEC. 29. The Legislature shall determine what persons shall constitute the militia, and may provide for organizing the same.

SEC. 30. Members of the Legislature shall vote *viva voce* in all elections made by them.

SEC. 31. [Special legislation is prohibited (1) for changing the names of persons, or constituting one person the heir-at-law of another; (2) for laying out, opening or altering highways, except in certain cases; (3) for authorizing persons to keep ferries; (4) for authorizing the sale of the property of minors; (5) for locating a county seat; (6) for assessment of taxes; (7) for granting corporate powers, except to cities; (8) for apportioning any part of the school fund; and (9) for incorporating any town or village, or to award the charter thereof]. Added by amendment, in 1871.

SEC. 32. [General laws shall be passed for the transaction of any business prohibited by Section 21 of this Article.] Added by amendment, in 1871.

ARTICLE V.

SECTION 1. The executive power shall be vested in a Governor, who shall hold his office two years. A Lieutenant Governor shall be elected at the same time and for the same term.

SEC. 2. Governor and Lieutenant Governor must be citizens of the United States, and qualified electors of the State.

SEC. 3. Governor and Lieutenant Governor are elected at the times and places of choosing members of the Legislature.

SEC. 4. The Governor shall be (1) commander-in-chief of the military and naval forces of the State; (2) he has power to convene the Legislature in extra session; (3) he shall communicate to the Legislature all necessary information; (4) he shall transact all necessary business with the officers of the State; and (5) shall expedite all legislative measures, and see that the laws are faithfully executed.

SEC. 5. [The Governor's salary shall be five thousand dollars per annum.] As amended in 1869.

SEC. 6. The Governor shall have power to grant reprieves and pardons.

SEC. 7. The executive duties shall devolve upon the Lieutenant Governor when, from any cause, the executive office is vacated by the Governor.

SEC. 8. The Lieutenant Governor shall be President of the Senate. The Secretary of State shall act as Governor when both the Governor and Lieutenant Governor are incapacitated from any causes to fill the executive office.

SEC. 9. [The Lieutenant Governor shall receive a salary of one thousand dollars per annum.] As amended in 1869.

SEC. 10. All legislative bills shall be presented to the Governor for his signature before they become laws. Bills returned by the Governor without his signature may become laws by agreement of two-thirds of the members present in each house.

ARTICLE VI.

ADMINISTRATION.

SECTION 1. A Secretary of State, Treasurer and Attorney General shall be elected at the times and places of choosing members of the Legislature, who shall severally hold their offices for two years.

SEC. 2. The Secretary of State shall keep a record of the official acts of the Legislature and Executive Department. He shall be ex officio Auditor.

SEC. 3. The powers, duties and compensation of the Treasurer and Attorney General shall be prescribed by law.

SEC. 4. Sheriffs, Coroners, Registers of Deeds and District Attorneys shall be elected every two years.

ARTICLE VII.

JUDICIARY.

SECTION 1. The Senate shall form the Court of Impeachment. Judgment shall not extend further than removal from office; but the person impeached shall be liable to indictment, trial and punishment, according to law.

SEC. 2. The judicial power of the State is vested in a Supreme Court, Circuit Courts, Courts of Probate, and in Justices of the Peace. Municipal courts, also, may be authorized.

SEC. 3. The Supreme Court shall have appellate jurisdiction only. Trial by jury is not allowed in any case. The Court shall have a general superintending control over inferior courts, and power to issue writs of habeas corpus, mandamus, injunction, quo warranto, certiorari, and other original and remedial writs.

William Weaver 2nd

LISBON

SEC. 4. [The Supreme Court shall consist of one Chief Justice, and four Associate Justices, each for the term of ten years.] As amended in 1877.

SEC. 5. The State shall be divided into five Judicial Circuits.

SEC. 6. The Legislature may alter the limits or increase the number of the circuits.

SEC. 7. There shall be a Judge chosen for each Circuit, who shall reside therein; his term of office shall be six years.

SEC. 8. The Circuit Courts shall have original jurisdiction in all matters civil and criminal, not excepted in this Constitution, and not prohibited hereafter by law, and appellate jurisdiction from all inferior courts. They shall have power to issue writs of habeas corpus, mandamus, injunction, quo warranto, certiorari, and all other writs necessary to carry their orders and judgments into effect.

SEC. 9. Vacancies in the office of Supreme or Circuit Judge shall be filled by the Governor. Election for Judges shall not be at any general election, nor within thirty days before or after said election.

SEC. 10. Judges of the Supreme and Circuit Courts shall receive a salary of not less than one thousand five hundred dollars, and shall hold no other office, except a judicial one, during the term for which they are respectively elected. Each Judge shall be a citizen of the United States, and have attained the age of twenty-five years. He shall also be a qualified elector within the jurisdiction for which he may be chosen.

SEC. 11. The Supreme Court shall hold at least one term annually. A Circuit Court shall be held at least twice in each year, in each county of this State organized for judicial purposes.

SEC. 12. There shall be a Clerk of the Circuit Court chosen in each county, whose term of office shall be two years. The Supreme Court shall appoint its own Clerk.

SEC. 13. Any Judge of the Supreme or Circuit Court may be removed from office by vote of two-thirds of all the members elected to both Senate and Assembly.

SEC. 14. A Judge of Probate shall be elected in each county, who shall hold his office for two years.

SEC. 15. Justices of the Peace shall be elected in the several towns, villages and cities of the State, in such manner as the Legislature may direct, whose term of office shall be two years. Their civil and criminal jurisdiction shall be prescribed by law.

SEC. 16. Laws shall be passed for the regulation of tribunals of conciliation. These may be established in and for any township.

SEC. 17. The style of all writs and process shall be "The State of Wisconsin." Criminal prosecutions shall be carried on in the name and by authority of the State; and all indictments shall conclude against the peace and dignity of the same.

SEC. 18. A tax shall be imposed by the Legislature on all civil suits, which shall constitute a fund, to be applied toward the payment of the salary of Judges.

SEC. 19. Testimony in equity causes shall be taken the same as in cases at law. The office of Master in Chancery is prohibited.

SEC. 20. Any suitor may prosecute or defend his case in his own proper person, or by attorney or agent.

SEC. 21. Statute laws and such judicial decisions as are deemed expedient, shall be published. No general law shall be in force until published.

SEC. 22. The Legislature at its first session shall provide for the appointment of three Commissioners to revise the rules of practice in the several Courts of Record in the State.

SEC. 23. The Legislature may confer judicial powers on one or more persons in each organized county of the State. Powers granted to such Commissioners shall not exceed that of a Judge of a Circuit Court at chambers.

ARTICLE VIII.

FINANCE.

SECTION 1. Taxation shall be uniform, and taxes shall be levied upon such property as the Legislature may prescribe.

SEC. 2. [No money shall be paid out of the treasury except in pursuance of an appropriation by law. Claims made against the State must be filed within six years after having accrued.] As amended in 1877.

SEC. 3. The credit of the State shall never be given or loaned in aid of any individual, association or corporation.

SEC. 4. The State shall never contract any public debt, except in the cases and manner provided in this Constitution.

SEC. 5. A tax shall be levied each year sufficient to defray estimated expenses.

SEC. 6. Debts not to exceed one hundred thousand dollars may be contracted by the State, which shall be paid within five years thereafter.

SEC. 7. The Legislature may borrow money to repel invasion, suppress insurrection or defend the State in time of war.

SEC. 8. All fiscal laws in the Legislature shall be voted on by yeas and nays.

SEC. 9. State scrip shall not be issued except for such debts as are authorized by the sixth and seventh sections of this article.

SEC. 10. No debt for internal improvements shall be contracted by the State.

ARTICLE IX.

EMINENT DOMAIN AND PROPERTY OF THE STATE.

SECTION 1. The State shall have concurrent jurisdiction on all rivers and lakes bordering on Wisconsin.

SEC. 2. The title to all property which has accrued to the Territory of Wisconsin shall vest in the State of Wisconsin.

SEC. 3. The ultimate property in and to all lands of the State is possessed by the people.

ARTICLE X.

EDUCATION.

SECTION 1. The supervision of public instruction shall be vested in a State Superintendent and such other officers as the Legislature shall direct. The annual compensation of the State Superintendent shall not exceed twelve hundred dollars.

SEC. 2. The school fund to support and maintain common schools, academies and normal schools, and to purchase apparatus and libraries therefor, shall be created out of (1) the proceeds of lands from the United States; (2) out of forfeitures and escheats; (3) out of moneys paid as exemptions from military duty; (4) out of fines collected for breach of penal laws; (5) out of any grant to the State where the purposes of such grant are not specified; (6) out of the proceeds of the sale of five hundred thousand acres of land granted by Congress September 14, 1841; and (7) out of the five per centum of the net proceeds of the public lands to which the State shall become entitled on her admission into the Union (if Congress shall consent to such appropriation of the two grants last mentioned.)

SEC. 3. District schools shall be established by law which shall be free to all children between the ages of four and twenty years. No sectarian instruction shall be allowed therein.

SEC. 4. Each town and city shall raise for common schools therein by taxation a sum equal to one-half the amount received from the school fund of the State.

SEC. 5. Provisions shall be made by law for the distribution of the income of the school fund among the several towns and cities for the support of common schools therein; but no appropriation shall be made when there is a failure to raise the proper tax, or when a school shall not have been maintained at least three months of the year.

SEC. 6. Provision shall be made by law for the establishment of a State University. The proceeds of all lands granted for the support of a university by the United States shall constitute "the University fund," the interest of which shall be appropriated to the support of the State University. No sectarian instruction shall be allowed in such university.

SEC. 7. The Secretary of State, Treasurer and Attorney General shall constitute a Board of Commissioners to sell school and university lands and for the investments of the proceeds thereof.

SEC. 8. School and university lands shall be appraised and sold according to law. The Commissioners shall execute deeds to purchasers, and shall invest the proceeds of the sales of such lands in such manner as the Legislature shall provide.

ARTICLE XI.

CORPORATIONS.

SECTION 1. Corporations without banking powers may be formed under general laws, but shall not be created by special act, except for municipal purposes, and in cases where, in the judgment of the Legislature, the objects of the corporation cannot be attained under general laws.

SEC. 2. No municipal corporation shall take private property for public use, against the consent of the owner, except by jury trial.

SEC. 3. Cities and incorporated villages shall be organized, and their powers restricted by law so as to prevent abuses. [No county, city, town, village, school district, or other municipal corporation, shall become indebted to exceed five per centum on the value of the taxable property therein.] As amended in 1874.

SEC. 4. Banks shall not be created except as provided in this article.

SEC. 5. The question of "bank" or "no bank" may be submitted to the voters of the State; and if a majority of all the votes cast shall be in favor of banks, the Legislature shall have power to grant bank charters, or pass a general banking law.

ARTICLE XII.

SECTION 1. Amendments to the Constitution may be proposed in either house of the Legislature, and referred to the next Legislature and published for three months previous. If agreed to by a majority of all the members elected to each house, then the amendment or amendments shall submit them to the vote of the people; and if the people shall approve and ratify such amendment or amendments, they shall become a part of the Constitution.

SEC. 2. If a convention to revise or change the Constitution shall be deemed necessary by the Legislature, they shall recommend to the electors of the State to vote at the next general election for or against the same. If the vote shall be for the calling of such convention, then the Legislature, at its next session, shall provide for the same.

ARTICLE XIII.

MISCELLANEOUS PROVISIONS.

SECTION 1. The political year for Wisconsin shall commence on the first Monday in January in each year. General elections shall be holden on the Tuesday succeeding the first Monday in November.

SEC. 2. A duelist shall not be qualified as an elector in this State.

SEC. 3. United States officers (except Postmasters), public defaulters, or persons convicted of infamous crimes, shall not be eligible to office in this State.

SEC. 4. A great seal for the State shall be provided, and all official acts of the Governor (except his approbation of the laws), shall be authenticated thereby.

SEC. 5. Residents on Indian lands may vote, if duly qualified, at the polls nearest their residence.

SEC. 6. Elective officers of the Legislature, other than the presiding officers, shall be a Chief Clerk, and a Sergeant-at-Arms, to be elected by each House.

SEC. 7. No county with an area of nine hundred square miles or less, shall be divided, without submitting the question to the vote of the people of the county.

SEC. 8. [The Legislature is prohibited from enacting any special or private laws, for locating or changing any county seat.] See amendment adopted in 1871, as Sec. 31 (Subdivision 5) of Art. IV.

SEC. 9. Officers not provided for by this Constitution shall be elected as the Legislature shall direct.

SEC. 10. The Legislature may declare the cases in which any office shall be deemed vacant, and also the manner of filling the vacancy, where no provision is made for that purpose in this Constitution.

ARTICLE XIV.

SCHEDULE.

SECTION 1. All rights under the Territorial government are continued under the State government. Territorial processes are valid after the State is admitted into the Union.

SEC. 2. Existing laws of the Territory of Wisconsin not repugnant to this Constitution shall remain in force until they expire by limitation or are altered or repealed.

SEC. 3. All fines, penalties or forfeitures accruing to the Territory of Wisconsin shall inure to the use of the State.

SEC. 4. Territorial recognizances, bonds and public property shall pass to and be vested in the State. Criminal prosecutions, offenses committed against the laws, and all actions at law and suits in equity in the Territory of Wisconsin shall be contained in and prosecuted by the State.

SEC. 5. Officers holding under authority of the United States or of the Territory of Wisconsin shall continue in office until superseded by State authority.

SEC. 6. The first session of the State Legislature shall commence on the first Monday in June next, and shall be held at the village of Madison, which shall be and remain the seat of government until otherwise provided by law.

SEC. 7. Existing county and town officers shall hold their offices until the Legislature of the State shall provide for the holding of elections to fill such offices.

SEC. 8. A copy of this Constitution shall be transmitted to the President of the United States to be laid before Congress at its present session.

SEC. 9. This Constitution shall be submitted to the vote of the people for ratification or rejection on the second Monday in March next. If ratified, an election shall be held for Governor, Lieutenant Governor, Treasurer, Attorney General, members of the State Legislature and members of Congress, on the second Monday of May next.

SEC. 10. [Omitted. See Section 1, Chapter 3, Acts of Extra Session of 1878.]

SEC. 11. The several elections provided for in this Article shall be conducted according to the existing laws of the Territory of Wisconsin.

SEC. 12. [Omitted. See Section 1, Chapter 3, Acts of Extra Session of 1878.]

SEC. 13. The common law in force in the Territory of Wisconsin shall continue in force in the State until altered or suspended by the Legislature.

SEC. 14. The Senators first elected in the even-numbered Senate districts, the Governor, Lieutenant Governor and other State officers first elected under this Constitution, shall enter upon their duties on the first Monday of June next, and hold their offices for one year from the first Monday of January next. The Senators first elected in the odd-numbered districts and the

members of the Assembly first elected shall enter upon their duties on the first Monday of June next, and continue in office until the first Monday in January next.

SEC. 15. The oath of office may be administered by any Judge or Justice of the Peace, until the Legislature shall otherwise direct.

We, the undersigned, members of the Convention to form a Constitution for the State of Wisconsin, to be submitted to the people thereof for their ratification or rejection, do hereby certify that the foregoing is the Constitution adopted by the Convention.

In testimony whereof, we have hereunto set our hands, at Madison, the 1st day of February, A. D. 1848.

MORGAN L. MARTIN,

President of the Convention and Delegate from Brown County.

THOMAS MCHUGH,

Secretary.

CONSTITUTION OF THE UNITED STATES.

CONDENSED.

PREAMBLE.

We, the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I.

SECTION 1. All legislative powers herein granted shall be vested in a Congress, which shall consist of a Senate and House of Representatives.

SEC. 2. The House of Representatives shall be composed of members chosen every second year by the people of the States, and electors shall have qualifications for electors of the most numerous branch of the State Legislature.

Representatives must be twenty-five years of age, and must have been seven years citizens of the United States, and inhabitants of the State in which they shall be chosen.

Representatives and direct taxes shall be apportioned among the several States according to population, which shall be determined by adding to the whole number of free persons, including apprentices and excluding Indians not taxed, three-fifths of all other persons. The enumeration shall be made within three years after the first meeting of Congress, and every ten years thereafter in such manner as Congress shall by law direct. States shall have one Representative only for each thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, New Hampshire shall choose three; Massachusetts, eight; Rhode Island, one; Connecticut, five; New York, six; New Jersey, four; Pennsylvania, eight; Delaware, one; Maryland, six; Virginia, ten; North Carolina, five; South Carolina, five, and Georgia, three.

Vacancies in the representation from any State shall be filled by elections, ordered by the executive authority of the State.

The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

SEC. 3. The Senate shall be composed of two Senators from each State, chosen by the Legislature thereof for six years; and each Senator shall have one vote.

Senators shall be divided as equally as may be into three classes immediately after assembling, in consequence of the first election. The first class shall vacate their seats at the expiration of the second year; the second class, at the expiration of the fourth year, and the third class, at the expiration of the sixth year, so that one-third may be chosen every second year; and vacancies happening by resignation or otherwise during the recess of the Legislature of any State may be filled by temporary appointments of the Executive until the next meeting of the Legislature.

All Senators shall have attained the age of thirty years, and shall have been nine years citizens of the United States, and shall be inhabitants of the State for which they shall be chosen.

The Vice President of the United States shall be President of the Senate, but shall have no vote, unless they be equally divided.

The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice President, or when he shall exercise the office of President,

The Senate shall have the sole power to try impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President is tried, the Chief Justice shall preside, and concurrence of two-thirds of the members present shall be necessary to conviction.

Judgment in cases of impeachment shall be limited to removal from office and disqualification to hold any office under the United States; but the party convicted shall be liable to trial and punishment according to law.

SEC. 4. The Legislature of each State shall prescribe the times, places and manner of holding elections for Senators and Representatives, but Congress may make or alter such regulations, except as to the place of choosing Senators.

Congress shall assemble annually, on the first Monday in December, unless a different day be appointed.

SEC. 5. Each House shall be the judge of the elections, returns and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may compel attendance of absent members, under penalties.

Each House may determine its own rules of proceeding, punish its members, and, by a two-thirds vote, expel a member.

Each House shall keep a journal, which shall be published at their discretion, and one-fifth of those present may require the yeas and nays to be entered on the journal.

Neither House shall adjourn for more than three days without the consent of the other, nor to any other place than that in which they are sitting.

SEC. 6. The compensation of Senators and Representatives shall be fixed by law, and paid out of the Treasury of the United States. They shall be privileged from arrest during attendance at the session of their respective Houses, except for treason, felony and breach of the peace, and shall not be questioned in any other place for any speech or debate in either House.

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the United States which shall have been created or the emoluments whereof shall have been increased during such time; and no person holding office under the United States shall be a member of either House during his continuance in office.

SEC. 7. All bills for raising revenue shall originate in the House of Representatives, but may be amended by the Senate.

Every bill passed by the House of Representatives and the Senate shall, before it becomes a law, be presented to the President; if he approve, he shall sign it; but if not, he shall return

it, with his objections, to that House in which it originated, who shall enter the objections on their journal and proceed to reconsider it. If, after reconsideration, two-thirds shall agree to pass the bill, it shall be sent, with the objections, to the other House, and, if approved by two-thirds of that House, it shall become a law. But in all such cases, the yeas and nays shall be taken, and entered upon the journal of each House, respectively. Any bill not returned by the President within ten days (Sundays excepted) after it shall have been presented to him, shall be a law, as if he had signed it, unless Congress, by adjournment, shall prevent its return, in which case it shall not be a law.

Every order, resolution or vote requiring the concurrence of the Senate and House of Representatives (except a question of adjournment), shall be approved by the President before taking effect; or, being disapproved by him, shall be repassed by a two-thirds vote of each House, as in the case of a bill.

SEC. 8. Congress shall have power :

To lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts and excises shall be uniform throughout the United States;

To borrow money on the public credit;

To regulate commerce with foreign nations, and among the several States and with the Indian tribes;

To establish a uniform rule of naturalization, and uniform laws on the subject of bankruptcies;

To coin money, regulate the value thereof and foreign coin, and fix the standard of weights and measures;

To provide for the punishment of counterfeiting the securities and current coin of the United States;

To establish post offices and post roads;

To promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries;

To constitute tribunals inferior to the Supreme Court;

To define and punish piracies and felonies committed on the high seas, and offenses against the laws of nations;

To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water;

To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years;

To provide and maintain a navy;

To make rules for the government and regulation of the land and naval forces;

To provide for calling forth the militia to execute the laws of the Union, suppress insurrection and repel invasions;

To provide for organizing, arming and disciplining the militia, and for governing such parts of them as may be employed in the service of the United States—the several States—to appoint the officers and to train the militia according to the discipline prescribed by Congress;

To exercise exclusive legislation, in all cases, over the seat of Government, and over all forts, magazines, arsenals, dock-yards and other needful buildings; and

To make all laws necessary and proper for carrying into execution all powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

SEC. 9. Foreign immigration or the importation of slaves into the States shall not be prohibited by Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed not exceeding ten dollars for each person so imported.

The writ of habeas corpus shall not be suspended, unless required by the public safety in cases of rebellion or invasion.

No bill of attainder or ex post facto law shall be passed.

No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be made.

No tax or duty shall be laid on articles exported from any State.

In regulating commerce or revenue, no preference shall be given to the ports of one State over those of another; nor shall vessels bound to or from one State be obliged to enter, clear or pay duties in another.

No money shall be drawn from the Treasury unless appropriated by law; and accounts of the receipts and expenditures of all public money shall be published from time to time.

No title of nobility shall be granted by the United States; and no person holding any office under them shall accept any present, emolument, office or title from any foreign State, without the consent of Congress.

SEC. 10. No State shall enter into any treaty, alliance or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass bills of attainder, ex post facto laws, or law impairing the obligation of contracts, or grant any title of nobility.

No State shall, without the consent of Congress, lay any imposts or duties on imports or exports, except for the execution of its inspection laws; and all such duties shall be for the use of the United States; and all such laws shall be subject to the revision and control of Congress.

No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State or with a foreign power, or engage in war unless actually invaded or in imminent and immediate danger.

ARTICLE II.

SECTION 1. The executive power shall be vested in a President. He shall hold office for four years, and, together with the Vice President chosen for the same term, shall be elected as follows:

Each State shall appoint in the manner directed by the Legislature, a number of electors equal to the whole number of its Senators and Representatives in Congress; but no Senator or Representative or person holding any office under the United States shall be appointed an elector.

[The third clause of this section has been superseded and amended by the 12th Amendment.]

Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States.

A natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, only shall be eligible to the office of President; and he must have attained the age of thirty-five years, and been fourteen years a resident within the United States.

If the President be removed from office, die, resign, or become unable to discharge the duties of his office, the same shall devolve upon the Vice President, and Congress may provide by law for the case of removal, death, resignation or inability of both the President and Vice President, declaring what officer shall then act as President, and such officer shall act accordingly, until the disability be removed or a President elected.*

The President shall receive a compensation for his services, which shall be neither increased nor diminished during the period for which he shall have been elected† and within that period he shall not receive any other emolument from the United States or from any of them.

Before entering upon office he shall take the following oath or affirmation: "I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect and defend the Constitution of the United States."

* By act of March 1, 1792, Congress provided for this contingency, designating the President of the Senate *pro tempore*, or if there be none the Speaker of the House of Representatives, to succeed to the chief Executive office in the event of a vacancy in the offices of both President and Vice President.

† The President's salary was fixed February 18, 1793, at \$25,000, and was increased March 3, 1873, to \$50,000.

SEC. 2. The President shall be the Commander-in-Chief of the army and navy of the United States, and of the militia of the several States, when in actual service of the United States; he may require the written opinion of the principal officers of the several executive departments upon subjects relating to the duties of their respective offices, and shall have power to grant reprieves and pardons for offenses against the United States, except in cases of impeachment.

He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur, and shall nominate to the Senate ambassadors, other public ministers and consuls, Judges of the Supreme Court, and all other officers of the United States whose appointment is not otherwise provided for; but Congress may vest the appointment of inferior officers in the President alone, in the courts of law, or in the heads of departments.

The President may fill all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session.

He shall, from time to time, give Congress information of the state of the Union, and recommend measures to their consideration; he may, on extraordinary occasions, convene both Houses or either of them, and, in case of disagreement between them as to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

SEC. 4. The President, Vice President and all civil officers of the United States, shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.

SECTION 1. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as Congress may establish. The Judges, both of the Supreme and inferior Courts, shall hold their offices during good behavior, and shall receive a compensation which shall not be diminished during their continuance in office.

SEC. 2. The judicial power shall extend to all cases, in law and equity, arising under this Constitution, the laws of the United States, treaties, cases affecting ambassadors, other public ministers and consuls, all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States; between a State and citizens of another State; between citizens of different States; between citizens of the same State claiming lands under grants of different States, and between a State or the citizens thereof and foreign States, citizens or subjects.

In all cases affecting Ministers and Consuls, and those in which a State is a party, the Supreme Court shall have original jurisdiction. In all other cases mentioned, the Supreme Court shall have appellate jurisdiction, both as to law and fact, subject to exceptions and regulations made by Congress.

All crimes, except in cases of impeachment, shall be tried by jury, and in the State where the crime was committed; but Congress shall fix the place of trial for crimes not committed within any State.

SEC. 3. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture, except during the life of the person attainted.

ARTICLE IV.

SECTION 1. Each State shall give full faith and credit to the public acts, records and judicial proceedings of every other State, and Congress may prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof.

SEC. 2. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

Fugitives from justice in any State found in another State, shall, on demand of the Executive, be delivered up and removed to the State having jurisdiction of the crime.

No person held to service or labor in one State under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

SEC. 3. New States may be admitted to the Union, but no new State shall be formed within the jurisdiction of any other State; nor by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of Congress.

Congress shall have power to dispose of and to regulate and govern the territory or other property belonging to the United States; and nothing in this Constitution shall be construed to prejudice any claims of the United States, or any particular State.

Every State shall be guaranteed a republican form of government, and shall be protected against invasion; and on an application of the Legislature, or of the executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on application of two-thirds of the Legislatures of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the ninth section of the first article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

All existing debts and engagements shall be valid against the United States under this Constitution.

This Constitution and the laws of the United States made in pursuance thereof, and all treaties made under the authority of the United States, shall be the supreme law of the land, and the Judges in every State shall be bound thereby; anything in the Constitution or laws of any State to the contrary notwithstanding.

Senators and Representatives, members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation, to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

The ratification of the Convention of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

DONE in convention by the unanimous consent of the States present, the seventeenth day of September, in the year of our Lord one thousand seven hundred and eighty-seven, and of the independence of the United States of America the twelfth.

IN WITNESS WHEREOF we have hereunto subscribed our names.

GEORGE WASHINGTON,
President and Deputy from Virginia.

[Other signatures omitted.]

AMENDMENTS TO THE CONSTITUTION OF THE UNITED STATES OF AMERICA.

Proposed by Congress and ratified by the Legislatures of the several States, pursuant to the Fifth Article of the original Constitution.

ARTICLE I.

Congress shall make no law respecting religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or of the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

ARTICLE II.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war, but in a manner to be prescribed by law.

ARTICLE IV.

The right of the people to be secure in their persons and property against unreasonable searches and seizures shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

ARTICLE V.

No person shall be held to answer for any infamous crime unless on an indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger; nor shall any person be twice put in jeopardy of life or limb for the same offense; nor shall he be compelled, in any criminal case, to be a witness against himself, nor be deprived of life, liberty or property without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

In all criminal prosecutions, the accused shall enjoy the right to speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

ARTICLE VII.

In suits at common law, when the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people.

ARTICLE XI.

The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another State, or by citizens or subjects of any foreign State.

ARTICLE XII.

The electors shall meet in their respective States, and vote by ballot for President and Vice President, one of whom, at least, shall not be an inhabitant of the same State with themselves; distinct ballots shall be made for President and Vice President, and distinct lists made of such ballots and of the number of votes for each, which lists they shall sign and certify and transmit sealed to the seat of government, addressed to the President of the Senate; the President of the Senate shall, in presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be President, if such number be a majority of the whole number of electors appointed; if no person have such majority, then from those having the highest numbers, not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately by ballot the President. But, in choosing the President, the vote shall be taken by States, each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. If, whenever the right of choice shall devolve upon them, the House of Representatives shall not choose a President before the fourth day of March next following, then the Vice President shall act as President, as in the case of death or disability of the President. The person having the greatest number of votes as Vice President shall be the Vice President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person ineligible to the office of President shall be eligible to that of Vice President of the United States.

ARTICLE XIII.

SECTION 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

SEC. 3. Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XIV.

SECTION 1. All persons born or naturalized in the United States, or subject to the jurisdiction thereof, are citizens of the United States, and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty or property without

due process of law, nor deny to any person within its jurisdiction the equal protection of the law.

SEC. 2. Representatives shall be apportioned among the States according to population, counting the whole number of persons in each State, including Indians not taxed. But when the right to vote is denied to any of the male inhabitants of a State, being twenty-one years of age and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

SEC. 3. No person shall hold any office under the United States or under any State, who having previously, as an officer of the United States or any State, taken an oath to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

SEC. 4. The validity of the public debt of the United States, including pensions and bounties, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

SEC. 5. Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

ARTICLE XV.

SECTION 1. The right of citizens to vote shall not be denied or abridged by the United States, or by any State, on account of race, color, or previous condition of servitude.

SEC. 2. Congress shall have power to enforce this article by appropriate legislation.

ALPHABETICAL LIST OF COUNTIES AND CITIES

WITH GUBERNATORIAL AND PRESIDENTIAL VOTES.

Note.—The Republican or Democratic majority in each county is given as between Smith and Mallory. Green-back majority is only given when the vote for Allis exceeds the others, and is taken from the highest vote.

LISBON

HISTORY OF WAUKESHA COUNTY.

POLITICAL GEOGRAPHY.

THE territory now included within the boundaries of Waukesha County, as well as that of the entire Northwest, was claimed by France from 1671 to 1763, when it was surrendered to the British. By the "Quebec Act" of 1774, the whole was placed under the local administration of Canada. It was, however, practically put under a despotic military rule, and so continued until possession passed to the United States. Before the last-mentioned event, and during and after the Revolution, the conflicting claims of Virginia, New York, Massachusetts and Connecticut to portions of the country were relinquished to the General Government. All the claims were based upon chartered rights, and Virginia added to hers the right of conquest of the "Illinois country" during the Revolution. As early as October, 1778, she declared, by an act of her General Assembly, that all the citizens of that commonwealth who were then settled, or should thereafter settle, on the western side of the Ohio, should be included in a distinct county, which should be called Illinois. No Virginians were then settled so far north as what is now Wisconsin; and as none thereafter located so far north before she relinquished all her rights to the United States, it follows that Waukesha was not included in Illinois County, and that Virginia never exercised any practical jurisdiction over any portion of Wisconsin; nor did she make claim to any portion of it by right of conquest.

Notwithstanding the passage of the ordinance of 1787, establishing a government over the territory northwest of the Ohio River, which territory was acquired by the treaty of 1783 from Great Britain, possession only was obtained by the United States of the southern portion, the northern part being held by the British Government until 1794.

The county of Wayne, organized in 1796, was made to include, besides much other territory, all of the present State of Wisconsin, watered by streams flowing into Lake Michigan. As it was not then known how far back into the interior the Menomonee and Root Rivers extended, all of what is now Waukesha County was laid down on the temporary maps of the time as belonging to Wayne County. This was of no consequence, however, as not a white man had taken up an abode within its limits. That was probably the first county in Wisconsin. From 1800 to 1809, what is now included in its boundaries was within the Territory of Indiana, and in the last-mentioned year, passed into the Territory of Illinois. It is probable that Indiana Territory exercised jurisdiction over Wisconsin to the extent of appointing two Justices of the Peace—one for Green Bay and one for Prairie du Chien. In the year 1809, the Illinois Territorial Government commissioned three Justices of the Peace and two militia officers at Prairie du Chien, St. Clair County having been extended so as to include that point, and, probably, Green Bay. Other Illinois counties subsequently had jurisdiction, until 1818, when what is now Wisconsin became a portion of the Territory of Michigan. On the 16th of October of that year, the Legislature of Michigan organized the county of Brown. It included all of the territory embraced between Lake Michigan and a line drawn north from the State line, through the "portage" between the Wisconsin and Fox (not the Waukesha County Fox) Rivers. Thereafter, until September 6, 1834, what is now Waukesha County belonged to Brown County for judicial and all other purposes; but it might as well have belonged to Russia or Great Britain,

for until the May previous to its being set off in September, 1834, it contained no white settlers to transact business at Green Bay—the county seat of Brown County—or elsewhere. On the day last mentioned, the Legislature of Michigan set off from Brown the county of Milwaukee, which extended from the Illinois line seventy-two miles north, and to the west, a little beyond Madison, in what is now Dane County. As hardly males enough for the purpose lived within its ample limits at that time, the county was not organized until 1835. The next year, 1836, Congress erected Wisconsin into a Territory, and that ended all “jurisdiction by outsiders,” as James Duane Doty expressed it. The county seat was established at Milwaukee, and the name and county of Waukesha were still unknown. Finally, after Milwaukee County had been several times divided, leaving but a comparatively small portion of its territory, the county of Waukesha, just as it now exists, was erected by the Legislature, and ratified at the polls, early in 1846. Thus the territory of the snug little county of Waukesha has been under rule as follows: France, 1670 to 1759—89 years; Great Britain, 1759 to 1794—35 years; Virginia and Ohio, 1794 to 1800—6 years; Indiana, 1800 to 1809—9 years; Illinois, 1809 to 1818—9 years; Michigan (being a portion of Brown County), 1818 to 1835; Milwaukee County, to 1846; total, 176 years. It is bounded on the north by Dodge and Washington, on the east by Milwaukee, on the south by Racine and Walworth, and on the west by Rock Counties. The parallels of 43° north latitude, and 88° west longitude cross near the village of Waukesha.

TOPOGRAPHY.

The almost unsurpassable works donated to the public by the State through its geologist and his corps of workers, on the subjects which might properly be treated in the subdivisions naturally coming under the head of this article, have wiped out the necessity for an elaborate chapter on this subject in a work of the character here presented. Simple outlines generally, and more salient features particularly, will therefore only be attempted.

Few counties in Wisconsin—the mining regions alone excepted—present such an exceedingly rich and rare field for general study to the geologist and archæologist as Waukesha; and for the more particular examination of the details of that wondrous period during which the different strata of limestone were given to man, no other county is its equal. Peculiar features of the not less peculiar lacustrine system for which Wisconsin is famous, are quickly discernible in this county, as well as of springs and the unmistakable evidences of the glacial period's stupendous work.

When that portion of Wisconsin which is now called Waukesha County first emerged from the ocean, there are evidences that its surface, in common with that of the entire southeastern portion of the State, sloped more or less to the east and south, and was pretty nearly a plane surface. The little inequalities now visible—large, perhaps, as compared with the county, but insignificant as compared with the whole extent of similar geological formations—are due to subsequent changes, the running water of the pre-glacial period leaving few, if any, traces of its work in this vicinity, though long ages swept over the earth before any other marked geological changes took place. This next change is designated as the Glacial Period, and the evidences of its power and work can never be effaced from Waukesha by the engines of mankind. The causes which led to the formation of vast ice-fields—thicker, perhaps, to the north and east of this section—are not of concern to this chapter; but it is not doubted that they had an existence, and the results of their movement and melting are salient features of the county. The work of the ice was twofold: First, in the leveling of the surface by planing down the hills and filling up the valleys; and second, in the creation of a new uneven surface, by heaping up in an irregular and promiscuous manner the clay, sand, gravel and boulders it had formed, thus giving the surface a new aspect. Among the features produced by the action of the ice are parallel ridges, sometimes miles in length, having the same direction as the ice movement; hills of rounded, flowing contour, sometimes having a linear arrangement in the direction of glacial progress; mounds of drift promiscuously arranged on an otherwise plane surface; oval

domes of rock (*roches moutonees*); sharp gravel ridges, often having a tortuous, serpentine course, transverse to the drift movement; peculiar depressions known as "kettles," and half-submerged rock gorges, known as "fjords," all of which combine to form a peculiar and distinctive surface contour. The melting of the ice mass gave rise to swollen lakes and flooded rivers, which eroded at some points and filled up at others, and so still farther modified the face of the country. All these peculiarities, being the result, directly or indirectly, of the ice action, may be denominated glacial features.

And they are particularly noticeable in almost every portion of Waukesha County. There are two distinctive features of the glacial drift, or glacial formations, in Waukesha as elsewhere: (1) The primary drift, consisting of ridges, or "hog's backs," and "kettle-holes;" and (2) the modified drift. The former consists of glacial formations just as they were left at the end of the great ice movement, and the latter of deposits of sand, gravel and lacustrine deposits of clay, which received their present forms from the action of water and wind since the termination of the glacial movement. This glacial movement appears to have been a little west of south in direction in Waukesha County, the principal force and mass of ice coming from the north, although some of its moraines indicate a more westerly direction. The vast glacier that covered the surface of this portion of the earth, lifted segments of disintegrated rocks which were imbedded in its lower side, and these were ground and crushed on the upper surface of the earth's crust as the ice plowed its mighty course to the south. They also scored the ledges, thus leaving the record of the glacial movements engraven on the enduring surfaces of the rock. Sometimes the ice-cakes raised sections of the earth's surface, thus leaving "kettle-holes," and the retrograde movements bunched into hillocks the masses of rounded rock and gravel. Both are to be seen in Waukesha County, the hillocks outnumbering the "kettle-holes." The latter vary from the merest indentation, not noticeable by the untrained observer, to bowls 100 feet in depth and generally from 50 to 500 feet across. Some of them, however, have greater diameters, and are filled with water. There are several of these in Waukesha County—beautiful, deep and clear lakes, having, apparently, neither inlets nor outlets. The slope of the sides of some of them are as steep as loose earth will lie, while others are beautifully curved hollows, with gradually descending sides. They are round, oblong, and sometimes long and trough-like. Ordinarily, the owners of "pots and kettles"—so named from their resemblance to the form of these articles of furniture—have very crude ideas as to the origin or date of them. They think but little about them, unless to grumble because their sloping sides and water-soaked bottoms are worthless except for grazing. It may be interesting, therefore, for them to know that "hog's backs" and "kettle-holes" are the results of the movements of ice and water during the glacial period ages ago, which movements pulverized the various rocks of which the earth is composed, into soil, sand and gravel, and brought boulders, or "erratics," from the regions of harder metamorphic and igneous rocks, for the farmers' stone walls and "underpinning," as well as made some of his fields so stony as to be fitted only for sheep pastures.

The counterparts of these "kettle-holes" are the hillocks called "hog's backs." They vary in form, size and height, and in Waukesha County are composed of almost impenetrable masses of coarse gravel, sand and boulders. Any attempt to penetrate some of them suggests that they are compact enough to warrant the conclusion that the mass was glued firmly together, as separate kernels are stuck together to form popcorn balls. Some of these hills have had a thin layer of soil—finely pulverized rock—spread over them by the last of the glacial flow, and are therefore tillable; but most of them are called "gravel-knolls" by the farmers, and are hard, dry, barren, and able to resist all efforts of the plow. With the unlearned, "gravel-knolls" are usually ascribed to violent upheavals of the earth's surface, caused by internal forces. This is a positive error, even if they do not owe their origin to the glacial period. That they do owe their origin to that period there is little doubt now among savans, however.

In Waukesha County, the "kettle range" comprises among its elevations the highest points of land in the county. They are high and bold in Delafield, Government Hill being 611 feet

above Lake Michigan. They are numerous, and of marked elevation in Menomonee, Eagle, Pewaukee, Waukesha, Vernon, Delafield, and in fact almost every town in the county.

The fact that not all of the series of hillocks in the "kettle range" extend in the same direction has been a subject of much discussion, the question being raised as to whether the glacial flow was really from northeast to southwest, or whether there was first one to the west, or east, and another across it to the south. There was probably but one general direction, so far as any evidences are left in this county, and that toward the southeast; but that flow may have been violently interrupted, or turned aside by some ice-mountain, or other obstacle not now discernible, thus causing lateral moraines, and in some places leaving hills and "kettle-holes" well intermingled, giving the surface the appearance of a chopped sea, similar in likeness to the famous cairns of Scotland. The erosion, abrasion and trains of gravel, bowlders and silt, show that the general flow was from the north to the south, southeast or southwest.

In the town of Eagle, where the range of kettles crosses the Cincinnati group of limestone, large quantities of calcareous shales, belonging to that formation, are found. These, at Lake Winnebago, lie about two hundred feet below the upper face of the group mentioned. In the same town are large quantities of that unmistakable, fine-grained, white dolomite, which came from the Waukesha beds of the Niagara group, and which journeyed only a few miles before being deposited. They came, however, from the northeast, which is the important point, thus establishing the direction of the glacial flow. Pieces of native copper have been found from time to time, usually near the surface, in Waukesha County, which is further evidence of the general southerly direction of the great glacial drift movement, all copper, of course coming from the North.

Occasionally, a large hillock of drift deposit is found in the shape of an elbow, or acute, obtuse, or right angle. Wherever such are found, their structure conflicts with the theory of a general flow in a southern or any other direction; but they are generally such as suggest the theory that perhaps an ice mass moving forward cornerwise, on the surface of the earth's crust, was halted, and that either melting or retreating, the sand and gravel which had been scraped up and pushed along before it, were left to conflict with the conclusions of geological theorists, and to show the outlines of some vast fragment of ice.

Some of the "hog's backs" in this county, so far as examined, are composed entirely of sand of nearly uniform fineness. Occasionally, one of this kind is found between large hillocks of gravel and bowlders, as though the ice masses had halted, and a vast stream of water, heavily charged with sand, had rushed on through an opening, thus forming a large rounded hillock of clean sand, while on all sides, perhaps, the halted ice masses were finally melted, thus depositing in irregular shapes their mixed burdens of fragmentary rocks, rounded bowlders and coarse gravel.

The "modified drift"—consisting of clay, finer sand and gravel, which shows the action of water or wind some time after the end of the glacial flow—is not so conspicuous in Waukesha. A section of this drift might present a horizontal stratum of deposit, or an undulating one, or a sharply waving one, or all three of these features. The strata may be composed of thin layers of clay, fine sand, coarse sand, and coarse gravel, in almost any order, the coarser deposits, however, generally being below. The most casual observer will notice these features in the softer sandpits, which have been opened to secure material for buildings and road-beds.

Farmers, when contemplating the worthlessness of their "pots and kettles," should recollect that the rich, strong soil of this portion of Wisconsin is due to the grinding, pulverizing and intermingling of many different rock formations, by the advances and retreats of the great ice-fields of the glacial period, thus furnishing a soil of such varied ingredients as make it adapted to the production of more numerous varieties of plants, fruits and grains, than could otherwise have been possible.

The surface of Waukesha County is composed of prairies, oak openings, small marshes, almost innumerable lakes and small hills. The openings and prairies are rich, productive and valuable lands; the marshes are mostly drained, and used for meadows, while the hills are no

where—to any extent—so barren and precipitous as not to be utilized for grazing purposes. But comparatively little of the surface, except that covered by lakes, is worthless for all the branches of agriculture. The natural resources of the county are therefore as varied as they are extensive, while its natural beauties would seem to be unsurpassed. It presents a surface neither flat nor precipitous; submerged nor lakeless; a jungle nor treeless, but a well-watered, generally well-timbered, undulating and pleasing landscape, combining hill, valley, lake, prairie, stream and forest in one beautiful landscape gem.

GEOLOGICAL FORMATIONS.

Geologically speaking, the vicinity of Waukesha is the oldest in Wisconsin—that is, it was covered by the ocean for ages after later formations began to come into existence in other localities. It was, for unknown centuries, the bed of an ocean teeming with invertebrate, or backboneless, life, while the earth's crust in other States was undergoing various changes and receiving additions. Waukesha, geologically, belongs to the first or oldest period of the Paleozoic Age—the Silurian, or Age of Invertebrates. The backboneless fossils of this age are visible everywhere, almost, in the county. After the Silurian came, successively, the Devonian, or Age of Fish; Carboniferous, or Age of Coal; Reptilian, or Age of Reptiles; Mammalian, or Age of Animals which give birth to their young alive, and, lastly, the Age of Man. Thus, gold, silver, coal and granite will never be found native in Waukesha County.

Archæan Rocks.—The Archæan formation of rocks is the oldest that crops out in Wisconsin, and of this, only the upper stratum is visible. It is the great, sloping floor of quartzite, porphyritic and granitic rock on which rest, successively, all the later formations. Were it not for its great irregularity of surface, Archæan rocks would appear nowhere in the State. Its knobs protrude through the superincumbent deposits as far south as Green Lake County, but none are visible in Waukesha and Southeastern Wisconsin. The thickness of this formation varies, and can only be estimated, so far as that portion underlying this county is concerned, but extends downward many thousands of feet. The ordinary observer may distinguish the formation by the numerous specimens of heavy, hard or crumbly, bluish, flesh-colored, pinkish or grayish bowlders and erratics which appear in the trains of glacial drift in various portions of the county. They are all true igneous rocks.

Potsdam Sandstone.—Next above the Archæan floor is Potsdam sandstone, which is also next younger. It varies in thickness, mostly on account of the uneven surface of the rock on which it lies, but its depth is generally from eight hundred to one thousand one hundred feet. "Sandstone Bluff," at Green Lake, is the most southern outcrop of this formation, so that none can be found visible in Waukesha County. It is the lowest stratum of the Lower Silurian formations, whose superincumbent strata are so conspicuous in this vicinity. The evidences of marine animal life in the Potsdam sandstone indicate that it was deposited beneath the ocean.

Lower Magnesian Limestone.—Dr. Owen gave this name to the silicious dolomitic beds of limestone, which rest upon the upper surface of the Potsdam sandstone. This is in contradistinction to the Galena and Niagara limestones, which were once called Upper Magnesian. The term dolomite, given to most of the limestones in Waukesha County, has no significance, geologically, but is so called from a once famous French geologist named Dolomieu. When pure, it is composed of 54 per centum of carbonate of lime and 46 per centum of carbonate of magnesia. Although geologists credit none of this Lower Magnesian limestone formation to Waukesha, it probably underlies the county in a thin bed. Much of the true and general geological character of the district has undoubtedly been obscured by the various local terms given to the same formations by different persons, the names being determined by the names of the localities where the outcrops are visible, or by some slight local modification.

St. Peters Sandstone.—Although geologists credit none of this formation to Waukesha, they describe its unmistakable outcroppings in Rock County, a few miles distant. It is also known to exist to the northwest and north of this section, and therefore probably stretches

along under Waukesha, between the Lower Magnesian and Trenton limestones, in a stratum varying in thickness from 8 to 130 feet. It is undoubtedly a submarine deposit, as is evidenced by ocean fossils, laminations and ebb and flow structure. There are some modifications, but this rock may be generally described as being composed of rounded, nearly uniform, transparent and incoherent grains of igneous rock, making a very friable formation. It is too soft for building purposes, but it is a water-bearing formation, valuable also for glass-making purposes. Glass has already been successfully made from it in Wisconsin.

Trenton Group.—This large and remarkable bed of limestone has frequently been obscured by local names. It consists of (1) Trenton limestone, lying next above the St. Peters sandstone; (2) Galena limestone, and (3) Cincinnati shales, which are the latest formations in the Lower Silurian group. The whole group may possibly be five hundred feet in thickness.

(1) Trenton limestone is the lower stratum of the Trenton group. It has several features, which has caused it to be subdivided, so far as name is concerned, into as many different groups or heads. They are essentially limestone and dolomite, blue and buff. All contain numerous fossils.

(2) Immediately upon the blue or Trenton limestone rests the gray or Galena limestone, possessing similar characteristics. It derives its name from the fact that it is the main formation that bears Galena or lead in the southwestern part of the State. It differs from the Trenton in being deeper bedded and having a more irregular texture, weathering into rough, craggy forms, sometimes with a rotten appearance. Being essentially dolomite, the weather disintegrates much of its lime and magnesia, giving any outcroppings a jagged appearance. It is not visible in Waukesha County.

(3) The Galena limestone is succeeded by a series of shales and limestone known as the Cincinnati group, which constitute the upper series of the Lower Silurian period. Just where this series begins and ends, however, is a matter of some dispute among geologists. The thickness varies from 180 to 255 feet. The formation contains fossils of seaweeds, radiates, mollusks, and articulates. The shales that form the prominent member of this group have a varied character; one kind is but little else than silicate of alumina. It is indurated, of a greenish or bluish color, and contains but little sand or other hard material. It graduates, however, by the addition of fossils, iron pyrites, calcareous and silicious matter and gypsum, into impure, worthless shales. A second class is more shaly and easily splits into thin, brittle, regular plates. A third has something of the appearance of fine-grained sandstone. These three general classes are subdivided into minor varieties. The characteristics of the rock are no reliable guide to what may be found below. Some sanguine parties expended large sums in piercing this formation for coal in Waukesha County, but, of course, found none. Probably none will ever be found in or beneath it. Its most southern outcrop is probably in the town of Eagle, in this county. The exposure at that point is slight, and is not, contrary to geological theory, next below the Niagara limestone, a bed of clayey shale separating them. On Section 10 of the same town, there is a plain line of demarkation between this group and the bed of Niagara limestone above it. It is the dividing line between the Upper and Lower Silurian formations. At Pewaukee, in this county, it is almost impossible to distinguish where the lower beds of Niagara limestone end and the upper beds of the Cincinnati shales begin. In fact, in a shaft fifty feet in depth, sunk in the before-mentioned search for coal, limestone was found in which at least eight new fossils were discovered. That is to say, eight never before known to exist in what have been named Cincinnati shales and Niagara limestone in other localities. This is significant, as well as confusing to those who read the printed works of professional geologists. It indicates that if there was not some distinct formation between the Cincinnati shales and Niagara limestone, the lower beds of the latter or the upper beds of the former had some features and fossils in Waukesha not yet found elsewhere.

Niagara Limestone.—This, with its various subdivisions, is the latest geological formation that appears in Waukesha County, except the drift, which was merely a shifting and changing of form, in formations already completed. It belongs to the Upper Silurian series. Dr.

Increase A. Lapham gave to the limestone in this vicinity the name of "Waukesha Beds." This name is still retained.

The reports of the State Geologists will be used as authority in treating of the so-called Waukesha beds. They consist of three classes of limestone. In the quarry near Carroll College, in the village of Waukesha, the upper fourteen feet consists of layers of soft, yellowish, coarse dolomite, which in other localities, is called Racine limestone. Below it is the more regular bed of hard, compact, firm-textured, crystalline dolomite. This is of a grayish color and conchoidal fracture. "It is characterized," quoting from the State Geologist's report, "by the presence of much chert in the form of nodules, distributed chiefly in layers coinciding with the bedding joints. These strata abound in orthoceratites, but contain few other fossils. They constitute the type of the Waukesha beds. The transition to the Racine beds is quite abrupt, but does not correspond to a bedding joint. From three to four inches of the base of the thick layer consists of compact rock, like that below, while the remainder has the open texture and fossils of the Racine beds. Passing by several intermediate quarries for the moment, we find at the limekilns, two miles above Waukesha, a fine display of Racine limestone reposing upon similar cherty flags, which form the sole of the quarry. * * * In the road south of this quarry the porous Racine limestone appears; but 100 yards beyond, and at the same elevation, occurs a light-colored, hard, close-grained, sub-crystalline dolomite, resembling closely Waukesha flags, except the chert is absent. * * * Several openings follow at short intervals, including Mr. Hadfield's main quarry, which exhibit the same character. This is true also of the several quarries on the opposite side of the Fox River. * * * The only undoubted members of the Waukesha beds are the cherty flags near the [Carroll] College and the kiln" [in Waukesha Village].

In Menomonee the cherty flags appear, but at Pewaukee the Racine beds appear. At Pelton's quarry both Racine and Waukesha beds appear, the former being above the latter.

"An interesting feature of this locality," again quoting from the State Geologist's report, "is a mound of rock, lying a short distance west of the main quarries, which rises ten or twelve feet above its base. * * * It is hard, compact, white and in some portions cherty, and contains a few brachiopods. It owes its origin (position) to irregularities of disposition and not to upheaval. Johnson's quarry, in the town of Genesee, presents a vertical exposure of twenty-five feet of beautiful white, fine-grained dolomite, in beds twenty inches in thickness and less, having an eastward dip of one foot in sixty. * * * A few rods distant, on the opposite side of the road, a quarry displays very similar beds; but they are more porous and *abound in chert* in certain layers, which is rare or absent at the other locality. In Section 34, town of Lisbon, we find a formation that may be said to be identical in character with the upper strata at Pewaukee. To the east and northeast, in that and the adjoining towns, are numerous openings upon white, fine-grained, even-bedded dolomite, with few or no fossils, which renders their place in the series somewhat doubtful. As the horizon of the Waukesha beds is traced northward, it plunges beneath the deep drift of the kettle range, and on emerging beyond, the Byron beds and upper and lower coral beds are found to occupy the space between the Racine beds above and the Mayville beds below. The cherty flags at Waukesha most closely resemble the upper portion of the upper coral beds, which occupy the same stratigraphical position beneath the Racine strata, but nowhere in the southern counties is there manifested that abundance and variety of coralline forms that distinguish the formation to the northward. The Pentamerus beds at Pewaukee bear a closer alliance to certain members of the lower coral beds than to any other member of the Northern Niagara series, while the white, compact, chertless beds bear so striking a lithological resemblance to the Byron beds (in Fond du Lac County) that they have been sometimes regarded as equivalents. But to satisfy all these affinities would be to impose incredible if not impossible demands upon the stratigraphical relations upon the southern members; besides, the affinities are not by any means unequivocal. The facts seem to be that in this case, with the lower formations, the deposits in the southern counties differ from the corresponding ones in the northern counties, and that the Waukesha group of strata is the equivalent of the

three more ponderous northern members that lie, like it, between the Mayville and Racine horizons."

This incongruity of names as well as of descriptions of the same or similar formations in different localities, makes it exceedingly difficult to clearly and properly describe, in general terms, the formations that appear at any given locality, so the untrained reader can understand them.

Following is a popular description of what is not the occult geology of Waukesha, written by the late Dr. Increase A. Lapham, when he was State Geologist, to C. C. Olin :

"In reply to your request for a statement of the geological features to be found at and around Waukesha, and of the character of the rocks out of which at least some of the numerous springs having medical virtues issue, I have to say that these rocks are limestones of the Niagara group (Upper Silurian), so called because they are of the same age or period as those over which the water falls at Niagara. No other rocks are found in their natural bed at Waukesha. They occur in two very distinct varieties; the lower, compact and evenly bedded is very much used for building and as flagstones for sidewalks; the upper, more irregularly bedded, is quarried chiefly for the manufacture of quicklime, and corresponds in many particulars with the limestone found at Racine. The first has been named Waukesha limestone, and is generally known under that name. The long, jointed fossil, so common at Waukesha, often seen in the flagging of the sidewalks, is not a petrified snake as many suppose, but a very old marine chambered shell, like the modern nautilus, except that it is straight instead of coiled.

"These, like all other limestones, are marine deposits, as is clearly evinced by the shells and corals so abundantly found in the quarries. Hence we come to the strange conclusion that Waukesha was in the old Silurian times the bottom of the sea. Limestones are formed by the deposition of soft calcareous mud upon the sea bottom, which cannot be free from the salts contained in the sea water. These salts have remained dormant until the present time, when they are gradually being re-dissolved and carried away by the ever-flowing springs. Visitors will find many curious relics of this old ocean by an occasional visit to the several stone quarries.

"The limestones at Waukesha contain a large proportion of magnesia; so large, that they may properly be called by their mineralogical name of dolomite, instead of limestone. Spring water, while percolating through the rocks, contains free carbonic acid, which seems to give it the power to soften and dissolve this dolomite; and to this source we must attribute the carbonates of lime and magnesia found in the Waukesha waters; and also the soft white grains found bubbling up from the bottom of the springs.

"An examination of any of the quarries will show that the limestones have been subjected to movements of elevation at some very remote time, causing numerous crevices, by which they are divided into large squares or irregular cubical blocks. These crevices afford passages through which rain water, falling upon the surface, penetrates to great depths, only to be returned in the form of springs, charged with the various mineral substances taken up during its passage through the rocks. The uniformity of temperature of the springs, winter and summer, shows that their sources are deep in the ground, being below the level to which the changes of the seasons affect the temperature of the earth.

"Those who are even slightly posted in modern geological science will know that the Niagara limestones at Waukesha belong far down in the geological scale, and far back in the order of time. When they were deposited, no animal of the vertebrate branch had yet appeared upon the face of the earth, and no plants of higher organization than the humble seaweed; the fishes of the Devonian, the tree-ferns of the coal period, the reptile of the middle ages, had not yet been brought into existence. There were then no Rocky Mountains, no Alleghanies, no Mississippi River.

"Such facts may give the numerous visitors to your springs some idea of the great age of the rocks around them, whose dissolution is now giving health and strength to their enfeebled constitutions.

“Above the limestones around Waukesha, there is a layer of drift, either in its original condition as left by the old ‘continental glaciers,’ when our country had the climate of Greenland, or in a condition modified by subsequent causes. These glaciers left their marks upon the surface of the rocks precisely like the grooves and scratches of the glaciers of the Alps. The grooves show that the motion of the glaciers was toward the southwest, or down the valley of the river. In the beds of this drift are found pebbles and bowlders of nearly all the different kinds and qualities of rocks; and we may suppose that they also, by their decay and solution, aid in supplying the mineral ingredients of the Waukesha Springs.

“Remains of coniferous wood have been found in digging wells near Waukesha at great depth below the surface; and the discovery of a tooth of the fossil elephant (mammoth) has shown that at one time the woods and prairies around were enlivened by that uncouth animal.

“Next following the now long extinct mammoth and mastodon, were an ancient race of men, almost as strange, and about whom as little is known. The ‘turtle mound’ (now destroyed) left by them near the site of the court house, was one of the first of those strange animal-shaped earthworks to attract the attention of the curious. Implements of stone and copper with remains of pottery further attest the former existence of these people, and give but a faint knowledge of their habits.

“Accumulations of marl and peat are found under the larger marshes, which have been formed in modern times—indeed are still in process of formation.

“We have, then, at Waukesha, as matters of geological interest: 1st.—The Waukesha Limestone. 2d.—The Racine Limestone belonging to the Niagara Group of Silurian Age. 3d.—The Glacial Drift. 4th.—The Modified Drift. 5th.—The age of Mammoths and Mastodons; and 6th.—The age of pre-historic man; each a fruitful subject for study by the thoughtful—each affording opportunities for investigation and elucidation.”

STONE QUARRIES AND LIMEKILNS.

The cheapness with which buildings have always been erected in Waukesha County, as well as their substantial character, is owing to the abundance and excellence of the stone which is quarried at almost every desirable point. The oldest structure of stone in the county—the old Prairieville Academy building—still retains its original clear, bluish color. When dressed, Waukesha stone, as it is popularly termed, makes an exceedingly fine-appearing building. It is a close-textured, light-colored magnesian stone, of which many of the business blocks and private residences at the county seat are constructed. At the village of Waukesha there are three classes of limestone. The upper layers of the quarry near Carroll College consist of a soft, coarse dolomite, corresponding with the Racine limestone, under which are the hard, compact, and crystalline blocks of building stone of which the Fountain Spring House is constructed. West of the river and above the village is found a mottled stone of blue and white in addition to the two classes already mentioned. All the quarries at Waukesha, now being worked, belong to the Messrs. Hadfield.

The large group of buildings used for the workshops and accommodation of the Wisconsin Industrial School for Boys is built of Waukesha limestone; and the balance of the best buildings in the county are of that material. The durability of this building stone, so far as experience has proven, will be almost infinite, and the supply is practically inexhaustible.

The principal quarries of these kinds of stone are Hinckley’s in the town of Eagle, Hunter’s in Ottawa, Audley & Graham’s and Robert’s in Delafield, Johnson’s in Genesee, Ross & Cairncross’ and Ormsby Brothers’ in Pewaukee, Colville & Ormsby’s, Gray’s, Davidson’s and Caldwell’s in Lisbon, and Saunders’ and Howard’s in Menomonee.

The first stone quarry ever worked in Waukesha County was opened in the early spring of 1840 by Lyman Goodnow. The land in which the stone was noticed was leased by him from Morris D. Cutler, in the village of Waukesha, and the first stone taken out was used in building the old Prairieville Academy that same spring. The work was prosecuted in the top layers, but

the product of even that portion of the quarries proved so compact and hard that from that day the fame of Waukesha limestone was firmly established.

The first limekiln to burn lime for sale, in Waukesha County, was opened by Lyman Goodnow, as soon as the snow left in 1840. At first the product was sold only in the immediate vicinity, but now Waukesha County lime is sold extensively in Chicago and in States west of Wisconsin, notwithstanding the cost of transportation, on account of the marked excellence of the article. There are kilns at almost every important stone quarry, and an analysis of their products shows that when properly burned, Waukesha lime is almost pure oxide of calcium. It is the whitest and strongest lime in the market.

RIVERS.

The watershed of Waukesha County is somewhat peculiar. Its streams flow into both the Mississippi and St. Lawrence basins. The sources of most of its rivers and streams being principally within its limits, they must necessarily be small. They are of great importance, however, furnishing, as they do, fish, admirable systems of drainage to lakes and marshes, an abundant supply of good water where there are no marshes and lakes, and water-powers of considerable value.

Fox River.—This is the principal stream of the county, in which the head-waters of its main branches take their rise. Originally it was called Pishtaka, a name erroneously supposed to have been given to the stream by "the Indians." This stream has branches in twelve of the sixteen towns in the county; and although its general course is south and southeast to the Mississippi River, into which it empties, it flows in every conceivable direction before leaving the county, on Section 34, in the town of Vernon. It enters that town from the north; flows across and out of it in a southwesterly direction, enters again from the west and flows almost entirely across to Muskego in an easterly direction, and then flows out in a southwesterly direction, thus affording an opportunity for almost every resident of the town to have a farm or a house on its banks. The Fox is not a large river and is generally sluggish, affording but few water-powers, and those with but little fall. Its waters drive mills at Waukesha, Pewaukee and Section 26, town of Pewaukee. One of its principal branches takes its rise in Pewaukee Lake; another in New Berlin, and another in Genesee. All the old settlers agree that the Fox River is but little more than half as large as it was in 1835. Its size then indicated the possibility of an unlimited water-power.

Poplar Creek.—This is a branch of the Fox River, which takes its rise on Section 21, town of New Berlin; flows north into Brookfield; southwest into Pewaukee, in which, on Section 21, it empties into the Fox. The stream is much smaller now than when the county was first settled. It is fed mostly by springs. The early settlers testify that when they first knew Poplar Creek, so named from the poplar trees along its banks, it contained trout; but this was probably a mistake. At least it contains no trout now.

Bark River.—The most remote head-waters of this stream have their source in Washington County; but by far the larger portion of its volume is furnished by the astonishing number, size and character of the lakes and springs in three of the northwest towns of the county, Merton, Delafield and Summit. Its bed lies in Lisbon, Merton, Delafield, Summit and Ottawa. On Section 6, of Ottawa, the Bark River crosses into Jefferson County, flowing west, in which it empties into Rock River, at Fort Atkinson. It affords several good water-powers, mostly by damming the outlets of the lakes through which it flows.

Oconomowoc River.—This stream averages next in size to the Fox River in Waukesha County. North Lake, in the town of Merton, is its principal source, though two streams—one of them large enough to drive a mill, flow into North Lake from the southern portion of Washington County. This branch rises in Section 19, town of Polk, in Washington County. At the outlet of Okauchee Lake, and in the city of Oconomowoc, this stream furnishes good water-powers. Chas. B. Sheldon remembers that Oconomowoc River is not much more than one-half

as large as it was forty years ago, and does not contain, with the lake through which it passes, one-half as many fish. The stream is fed by springs and spring lakes.

Mukwonago River.—This creek, more properly speaking, takes its rise partly in Walworth County, in the south, but mostly in the towns of Eagle and Mukwonago, the north branch rising near the line of Section 1, in the former, and Section 6, in the latter. The stream turns a mill in Section 36, of Eagle; furnishes good water-power at the village of Mukwonago, and empties into the Fox River on Section 30, in Vernon.

Menomonee River.—One branch of this stream takes its rise in Washington County and flows southeast through Menomonee, while another rises in Brookfield and Menomonee. The river flows nearly east, emptying into the Milwaukee River at Milwaukee. It is a small stream in Waukesha County. At Menomonee Falls the river has cut through high banks of limestone, where also it has a fall of fifty feet in a half-mile of distance, affording a good water-power.

Ashippun River.—This little creek, the outlet of a small lake of the same name, in the town of Oconomowoc, rises mostly in Dodge County. It crosses the northwest corner of the town just named and soon commingles with the Rock River, in Jefferson County.

Muskego Creek.—This is the outlet of Muskego Lake, in the town of the same name, though the lake has several feeders which rise in New Berlin. It is finally a confluent of the Fox, into which it empties at Rochester, Racine County.

Root River.—The head-waters of this river take their rise in New Berlin, but a few rods from those of Poplar Creek, and other branches of the Fox. The Root empties into Lake Michigan at Racine. One of its branches joins a creek which flows into Muskego Lake, and at one point it is difficult to tell which way its waters flow.

LAKES.

To the casual observer, no matter whether he be hastening through the county on business, wandering in search of health, or roaming in quest of nature's rarest embellishment of earth, the most remarkable feature of Waukesha County is its wonderful lacustrine system. The number, character and beauty of her lakes astonish all. They are mostly, without doubt, the deep bowls formed by the glacial movements of bygone ages filled by numerous springs. Some of them have neither inlets nor outlets, except such springs as can be seen boiling up through their gravelly bottoms, and which keep the water at a certain depth, no matter how rapidly evaporation takes place. All of these quaternary lakelets abound in black, rock, green and strawberry bass, perch, sunfish, pickerel and other fish, as well as all the water-fowl common to Southern Wisconsin; and a dozen or more of them have large summer hotels, costly residences and scores of summer cottages of numerous fantastic designs overlooking their clear depths.

There are sixty-three lakes in the county, the greater number of which belong to its north-west quarter—the towns of Oconomowoc, Delafield, Summit and Merton.

Muskego Lake.—This body of water is the largest in the county—contains a few more square rods than any other, though Pewaukee Lake has generally been supposed to be larger. It lies in the town of Muskego; has fewer bays, more irregular shores than any other of the larger lakes, and has much the appearance of being, so far as its basin is concerned, the direct result of the glacial movement. It is about four miles in length, two miles in width and eleven in circumference, and contains 3,165 acres—nearly five sections. Its outlet is Muskego Creek, which flows into the Fox River at Rochester, Racine Co., Wis.

Pewaukee Lake.—This is a noted as well as exceedingly beautiful sheet of water. As near as can be measured, one-half of it lies in the town of Pewaukee—the town taking its name from the lake—and the other half in the town of Delafield. It is nearly ten times as long as wide; has high but not precipitous banks most beautifully wooded, and deep, clear, cool water. It was formerly called Snail Lake, but this slimy and common-place term was long since dropped. This was a ridiculous name, as the shells on the shore of the lake, whence the term arose, are

not snail shells. The lake covers about three and one-half sections and has a coast-line of eleven and one-sixth miles. Before the erection of the dam for mill purposes at Pewaukee Village, the lake was a trifle less than four and one-half miles in length; now it is a trifle more than that. Its depth is fifty feet; its elevation above Lake Michigan is 263 feet, and its outlet discharges, on an average, 300 cubic feet of water per minute, which is supplied by springs. Dr. I. A. Lapham wrote in 1843: "Around this lake, at many places, as well as other lakes in Wisconsin, may be observed a singular wall of round stones or bowlders, laid up with such regularity as to suggest that it was the work of art. A little further observation, however, will show that these walls were made by the expansion of the ice during the winter, which has a tendency to push the bowlders up the shore. The sandy ridges around some of the lakes were formed in the same way."

La Belle Lake.—This, "the beautiful lake," is the lowest and largest of what is termed the Oconomowoc group of lakes. It is in the southwestern portion of the town of Oconomowoc; two and one-half miles in length; occupies an area of about one thousand three hundred acres, and is six and one-fourth miles in circumference. The Rock River is only twenty-five feet below this lake and 500 rods west of it. Long Island, the largest in La Belle Lake, is a beautiful place. The lake is comparatively shallow; 273 feet above Lake Michigan, and filled with springs. Some are small, but several are very large, and keep the water cool in summer, and so warm in winter that ice never forms over where they hoil up, during even the coldest weather. The shores of La Belle Lake probably have more summer residences than those of any other lake in the county.

Nagawicka Lake.—This is a beautiful sheet of water, 304 feet above Lake Michigan; two and one-fourth miles in length; five and one-fourth miles in circumference, and containing about seven hundred acres. Its outlet is Bark River, which also flows into it. A dam built at Delafield for a grist-mill raised this lake several feet. It is the largest lake in Delafield, and contains a high and attractive island.

Okauchee Lake.—This irregular body of water is partly in Oconomowoc and partly in Merton; contains 957 acres of surface; is $5\frac{3}{4}$ miles in circumference and is fed and drained by Oconomowoc River. A dam, built for a water-power, raised the lake several feet.

Oconomowoc Lake.—This lake, lying in the town of Summit, near the north line, is 282 feet above Lake Michigan; contains 750 acres, and has a circumference of $6\frac{3}{4}$ miles. It is not very deep and by some is considered an enlargement of Oconomowoc River, which flows through it.

Pine Lake.—Originally this was called Chenequa Lake, signifying pine, on account of the existence of a few pine-trees on the small island in it. The outlet of Beaver Lake empties into it, and thence flows into North Lake. Its area is nearly 700 acres, lying mostly in the south part of the town of Merton.

Twin Lakes.—The Indian name of these two hill-bound lakelets is Nee-sho-tah, now spelled Nashotah, or twins, which is still the proper term by which to designate them on the maps. They are situated in the east portion of the town of Summit, and have become famous as the seat of the Episcopal college, called Nashotah House, which was established at a very early day. Their shores are high, thickly wooded, and as beautiful as nature could make them.

Other Lakes.—Not all of the fifty-four other lakes in Waukesha County have been honored with names. There are, however, Denoon and Little Muskego in Muskego; Mukwonago, lying mostly in the town of the same name; School Section and Pretty Lakes in Ottawa; Mud, Golden, Silver, Duck, Egg, Genesee, Crooked and Nehmabin in Summit; Ashippun and Fowler in Oconomowoc; Mouse, Beaver, North, Mud and Keesus in Merton. This leaves forty-three lakelets scattered over the county, many of them with only an outlet, and some with neither outlet nor inlet, which have not been named; or, if they have been, their names have not become generally known, or cut upon the maps.

So far as known, no county in the United States of the same, or even larger size, has such a remarkable lake record as Waukesha.

In his article on the lacustrine system of Wisconsin, State Geologist Chamberlain said: "Muskego, Wind (in Racine County,) and several smaller lakes associated with them, bear evidence of having formerly constituted parts of a much more extended body of water, which leveled by erosion and deposition the original uneven surface in their vicinity, so that its primitive drift features disappeared, and with them the corresponding features of those lakes. They, therefore, do not now present those features common to the majority of the others. There are other evidences that the southeastern portion of the county was once covered, at a period comparatively recent, with a fresh-water lake."

The "Oconomowoc chain" comprises the most remarkable group of lakes in Wisconsin. Their number is about forty, and their beds, together with the surrounding land, except perhaps a few bluffs which were islands, constituted the bed of a large lake immediately, and for ages, after the glacial epoch. To the action of their waters, no doubt, is due the level character of the country about Oconomowoc.

WATER-POWERS.

The close observer will conclude, from present indications, that water-powers in Waukesha County have more of a past than a future. Concerning volume of water in all her streams, from the spring's bubbling outlet to the Fox River, this is true. The marshes have been ditched and plowed; ponds drained, and various changes have been wrought by man during the last forty years, which have diminished the available flow of water-power streams. This is indeed unfortunate, not only for the producers of food and wood and wool, but for the cities and consumers of the county. There would have been no Waukesha Village (so those who first entered the land on which it stands, declare to-day), had there been no rapids in the Fox River at that point, out of which a water-power might be built. But Waukesha has been compelled to live and thrive independent of the aid which the original owners of the place calculated would be sufficient to build up a goodly city, and maintain it in prosperity; for the Fox River at Waukesha drives one flouring-mill, and nothing else. There are no great water-powers in this county, but the shrewd Eastern mechanic can see that not 50 per cent of the moving force of those which do exist is utilized. This is true of the power at Delafield, which is backed by Nagawicka Lake as a reservoir; at Oconomowoc, backed by Fowler Lake; at Menomonee Falls, when there is a fall of fifty feet, and at other places. There are not in Waukesha County the latest improved appliances for utilizing the moving force of water. This is not the fault of the locality, nor of the water-power, but of the manufacturers. The wealth of the West will begin to increase more rapidly, when these matters receive their proper attention. The inhabitants of Waukesha County produce vast quantities of crude material needing manufacture. This bulky and heavy matter they transport a thousand miles to be worked up, and their food products are sent the same thousand miles to feed those who manufacture the other material. They then bring back the manufactured article, murmuring at its expense. The situation is this: At one end of a thousand miles is a man and his tools; at the other end is the heap of crude material he is to manufacture, the bulky food he is to eat, and the market for his products; and the problem is, "Shall the mountain go to Mohammed, or will Mohammed come to the mountain?" What is needed is for capitalists to fully realize that the natural facilities for manufacturing in the interior must, in the immediate future, be utilized to their utmost capacity. Those who first turn their attention to utilizing to their utmost capacity all the powers in Waukesha County, will reap the greatest benefits. A small water-power often yields as great a profit as a large steam-power, and requires only a little of the outlay to put it to use.

SOILS OF WAUKESHA COUNTY.

The soil is the latest and most important geological formation. To make a report at once accurate and intelligible to the general reader is as difficult as the subject is important. Scientific farming is rapidly taking the place of the blundering, hap-hazard manner of tilling the soil

which has been the rule for so many years and to such great cost in this country; and farmers, therefore, desire to understand the value of soil ingredients, that they may till and sow accordingly. The difficulty in presenting an intelligible article on soils arises partly from the vagueness of the descriptive terms used by different persons. People speak of "light" and "heavy" soils, the majority of them supposing reference is had to the actual weight or specific gravity of them. This is a great error. For example: localities are described as composed of a "heavy clay," and "a light sandy" soil; but literally the sand weighs almost twice as much as the clay, measure for measure. Light and heavy, as commonly used, are terms intended to describe adhesiveness, power of holding water, comminution—in short, the manner in which the soil "works." Again, purely scientific persons generally suppose that sandy soils are composed of grains of quartz—globules of hard igneous rocks—and are, therefore, barren. This is not always true, as sandy soils may contain grains of limestone and be very fertile.

The leading elements of soils are derived from the original rocks, which were broken into fragments by internal forces, and ground, pulverized and transported by water mostly, either as ice during the glacial period, or later by streams and lakes. These elements were, however, generally not left by these agencies in such a state as to be fertile. Ages of leeching, weathering and wearing, by such agencies as winds, sun, rain and frosts, prepared the beds of soil which were afterward self-enriched for ages by vegetation. It will now be clear that the character of a soil will depend upon (1) the nature of the rock from which it is derived; (2) the manner and degree of its reduction; (3) the amount lost by leeching and otherwise, and (4) the amount gained from vegetation above, or capillary attraction from beneath. Or, to put the matter in simpler terms, a soil depends upon (1) the chemical nature of the material and (2) its physical state, or degree of fineness to which it has been reduced.

Prairie Loam.—This soil owes its origin to the decomposition of underlying limestone; to the disintegration of limestone gravel, or to the deposits of ancient lakes. The true type may be described as a black, light soil, that works like an ash heap when dry; rolls into little pellets when wet and refuses to "scour," except with the very best steel plows. It is a very warm soil, but not so rich as its dark color might lead some to suppose. It is very responsive to fertilizers. This soil is easily penetrated by the humus of vegetable matter, hence its dark color. The apparent absence of the carbonates of lime and magnesia is owing to the fact that this soil is the residue of rocks from which the lime and magnesia have been dissolved. The necessary mineral substances, however, will always be found in the subsoil. There are only a few small patches of this soil in the county.

Clayey Loams.—These are sometimes called marly clays, and are drift soils derived chiefly from calcareous or limey clay, formed by glacial agencies. The top is composed largely of lime and magnesia, but the subsoil is more marly. The plow frequently turns up a reddish or yellowish subsoil, which contains but very little decayed vegetable matter. It is a fertile soil, and stands floods and droughts well. The marly clay soils are light and heavy, but their origin and character are essentially the same. The latter is apt to contain "hard-heads," and works heavily at first, but more easily afterward. Thus, crops which at first were failures, finally produce well upon it.

Red Clay.—This does not appear to any extent in Waukesha, although it is prominent in Milwaukee, and counties along the lake shore. It is hard when dry, and always requires a great amount of working. It is easily distinguishable by the tendency to crack, the cracks occasionally widening into large fissures in dry weather. Such a soil is not the true clay; it contains some lime and magnesia, silicious matter and hematite. The hematite, or sesqui-oxide of iron, may be easily found by drawing a magnet through a handful of the dust, and is the substance which aids in giving the color to the clay.

Silicious Sand.—This forms a small portion of the soil in Waukesha County. It needs no description. Without mixtures of other soils it is sterile. It is hot and dry, and, when mixed with adjoining clays, produces certain crops in abundance. It is also wonderfully

prolific when heavily and continually enriched by artificial means. The western portion of the county has some of this soil.

Limestone Loam.—This is an improper term, used to designate a soil composed of decomposed limestone, unmixed with much drift matter. It is easily worked, and supports a heavy growth of hard timber. It produces excellent wheat, and is one of the valuable soils of the county.

Calcareous Sand.—This is a drift soil, having its origin in the reduction of the dolomitic beds of the Niagara group of limestone, mixed with silicious sand. It is the principal soil of most of the towns in the county, though found in various slightly modified forms. It will, and generally does, support a heavy growth of hard timber, being well adapted to the growth of maple. It is light, warm and arenaceous, but has little appearance of fertility. This is owing to the fact that the sand has been left by decomposition and bleaching on the surface. The sub-soil, being essentially dolomitic, adds 100 per cent to the value of the land for agricultural purposes. Being a drift soil, it is found pure in but few localities, being modified, for better or worse, by mixture of the substances which compose other soils.

Humus Soils.—These are chiefly peat and swamp muck, or vegetable mold. They are generally very rich, though sometimes thorough drainage is necessary to make them productive, and sometimes the acids of the decomposed vegetation render them too "sour" for the profitable growth of cereals. They generally produce grasses, but do not contain mineral ingredients enough for cereals. Some of the finest pastures in the county, as well as many of the best meadows, are humus swamp muck.

Economic Considerations.—Prairie loam is generally covered with such grasses and plants as the virgin prairies presented to the first settlers—the light, marly clays are covered with oaks; maples grow in heavy, marly clays; red clays have about the same growth of trees; limestone loam is generally covered with oaks in this zone; maple, oak and beech grow on calcareous sands; conifers, pine, hemlock, etc., on silicious sands; swamp vegetation on humus soils.

The natures of soils may be also known by the following tables, the plant growing most rapidly and thriftily in soil where its principal ingredient is found in the most liberal quantities:

	Magnesia.	Lime.		Magnesia.	Lime.
Wheat.....	12.2	3.1	Winter-wheat straw.....	2.6	6.2
Rye.....	10.9	2.7	Rye.....	3.1	7.7
Barley.....	8.3	2.5	Barley.....	2.4	7.6
Oats.....	7.3	3.8	Oats.....	4.0	8.2
Maize.....	14.6	2.7	Maize.....	5.5	10.5
Buckwheat.....	13.4	3.3	Pease.....	7.7	37.9
Flax.....	13.2	8.4	Field beans.....	7.8	23.1
Beet.....	18.9	15.6	Garden beans.....	5.2	27.4
Turnip.....	8.7	17.4	Buckwheat.....	3.6	18.4
Carrot.....	6.7	38.8	Oak, body wood.....	4.8	73.5
Pease.....	8.0	4.2	Oak, small branches, with bark.....	7.5	54.0
Field beans.....	6.7	5.2	Poplar, young twigs.....	7.5	58.4
Garden beans.....	7.5	7.7	Elm, young twigs.....	10.0	37.9
Clover seed.....	12.2	6.2	Elm, body wood.....	7.7	47.8
Potatoes.....	4.5	2.3	Linden (basswood).....	4.2	29.9
			Apple-tree.....	5.7	81.0
			Apple-tree, entire fruit.....	8.8	4.1
			Beech.....	45.8	16.8
			White pine.....	5.9	50.1
			Larch.....	24.5	27.1

These tables show that lime is concerned more in the formation of fiber of all kinds, and magnesia in the growth and production of the fruit. This accounts for the excellence of Waukesha County wheat, and may be of value to farmers in sowing their various crops on proper soils.

ELEVATIONS OF DIFFERENT LOCALITIES.

To know some of the different elevations of the surface of Waukesha County may be of value, and will certainly be of interest. The Government and State surveyors will be given as authority for these figures, which are undoubtedly correct. However, the State Geologist's report, page 126, contains a statement, which, if correct, is certainly astonishing. It places Fox River, in Section 17, town of Waukesha, *eighty feet higher* than at the depot in Waukesha Village, two miles up the stream. It has been testified in court that Waukesha mineral water will "flow up hill;" but the Fox River is generally considered too much of a sluggard to climb a hill, even to bear out the statements made in a public document. More seriously, this may be considered the only error in the official elevations of the county, only a few of which will be given, beginning with the highest.

NATIVE VEGETATION.

The plow, the ox, and herds and flocks have driven much of the native vegetation of Waukesha County out of existence. A list of the prominent products of the virgin soil, before the march of civilization had wrought her wondrous artificial change, may be of interest and value. There are (a) upland, (b) marsh, and (c) intermediate groups of vegetation, and each has its groups of representatives in Waukesha County.

Upland Vegetation.—This is comprised in what is technically termed the prairie group, consisting of prairie grass and prairie blossoms, and plants of all kinds, and the various arborescent or tree groups. The oak group comprises the burr-oak (*quercus macrocarpa*), white-oak (*quercus alba*), and pin-oak (*quercus palustris*), which are the prominent species, and give name to the whole. With them are found poplar or aspen (*populus tremuloides*), shell-bark hickory (*carya alba*), pig-nut or bitter-nut hickory (*carya glabra*), crab-apple (*pyrus coronaria*), choke-cherry (*prunus Virginiana*), black cherry (*prunus serotina*), wild plum (*prunus Americana*), sumac (*rhus typhina*), hazelnut (*corylus Americana*), sugar-maple (*acer saccharinum*), red maple

MUSKEGO CENTRE
(SEE PAGE 347)

(*acer rubrum*), elms (*ulmus Americana* and *U. fulva*), basswood or linden (*tilia Americana*), ironwood (*ostrya virginica*),* black ash (*fraxinus sambucifolia*), butternut (*juglans cinera*).

Marsh Vegetation.—Waukesha County has not much marsh, but its vegetation is the same as that of larger marshes. The grasses are luxuriant and indicate a soil that may be easily reclaimed. The sedges (*cyperdeæ*), occupy marshes that usually cannot be easily reclaimed.

The heath family (*ericaceæ*), comprises some important plants. The most characteristic ones, the leather leaf (*cassandra calyculata*), cranberry (*vaccinium macrocarpon*), willows, larch, mosses and erratic plants. The existence of native cranberry plants in Waukesha County is a matter worthy of some attention, as it indicates a condition of soil and climate which will insure the cultivation of the plant as an industry of profit. The simple presence of that plant alone, in a wild state, is not all-sufficient; but when leather-leaf, gander-bush and feather-leaf abound also, cranberry culture is sure to be a success. Native cranberries are found in Eagle, Section 31; Ottawa, Sections 28 and 32; Summit, Sections 9 and 12; Delafield, Sections 34 and 27; Oconomowoc, Section 4. Next in importance in marsh vegetation is the tamarack group, so far as this county is concerned. It is the American larch (*larix Americana*). A few white cedars (*thuga occidentalis*), and black spruces (*abies nigra*), are found in some of the swamps. The rosin plant (*stilphium laciniatum*), or compass weed as it is sometimes called, grows in Mukwonago, on Dr. Youman's farm. It was a popular belief that its broad leaves always point north and south, thereby furnishing travelers in uninhabited countries a sure guide by which to keep their proper course.

Intermediate Groups.—These are of very little importance in this county. They comprise stray witch-hazel clumps, black alder, yellow birch and cohosh.

Miscellaneous.—There have been discovered and classified, in Waukesha County, over six hundred different plants, not including mosses. Many of them are valuable for their medicinal properties, and others as articles of food. Among the 600 may be mentioned cowslip (*caltha palustris*), gold thread (*coptis trifolia*), golden seal, bloodroot (*sanguinaria Canadensis*), prickly ash (*zanthoxylum*), snake root (*polygala Senega*), tea (*ceanothus*), grape (*vitis aestivalis*), wild pea—three varieties—which, in early days, were considered of great value as food for stock; wild bean, Indian potato (*apios tuberosa*), used not only by Indians but by the early white settlers as a substitute for potatoes; strawberry (*fragaria Virginiana*), red and black raspberry, prickly gooseberry (*ribes cynosbati*), wild red and black currant (*ribes floridune* and *R. rubrum*), spikenard (*aralia racemosa*), sarsaparilla (*A. nudicaulus*), wild coffee (*triosteum perfoliatum*), high-bush cranberry (*viburnum opulus*) Indian tobacco (*lobelia inflata*), popularly called Thompson's physic; "ginseng" (*genitiana*), wild hop (*humulus lupulus*), Indian turnip (*arum triphyllum*), wild asparagus* (*A. officinalis*), sweet flag (*acorus calamus*), wild rice (*zizania aquatica*), and fifty species of wild grasses. Many of these are gone, but they, with the carices, which were used for hay, formed a most valuable wild product in early times, as farmers could cut fodder enough without waiting to make "tame" meadows.

FOSSIL REMAINS.

The most noticeable fossils in the limestones of Waukesha County are to be seen in great numbers in the paving stones of the village of Waukesha, and are the remains of those old species of cuttle-fish which are provided with chambered shells—either straight, when they are termed *orthoceratites*; somewhat curved, called *cyrtoceratites*, or voluted, like the shell of the nautilus, when they receive the name of *gyroceratites*. These petrified shells may be found by hundreds, visible to the casual pedestrian along the streets of Waukesha, and are from one to two feet in length, ordinarily. The *pentamerus*, a shell bearing some resemblance to the oyster, but thicker and smoother, is common in the Pewaukee limestone, and various forms of *trilobites* are to be found in both places, though not so plentifully. Of stone corals, the *halysites* and

*There is little doubt that this is a degenerated plant, introduced as asparagus by the French settlers. None is known to exist in this county now. Solomon Juneau pointed out a few plants near Muskego Center, years ago.

favosites are to be found almost everywhere in the county where limestone appears on the surface, either in quarries or as drift, and *crinoid* specimens are also quite numerous.

For the benefit of those who desire a more particular knowledge of the fossils to be found in the limestones of Waukesha County, a more detailed list is here subjoined.

At Pewaukee, of crinoids: *caryocrinisooratus*, *encalyptocrinus*, *crassus* and *cælatus*; of trilobites: *Illænus ioxus* and *pterocephalus*, and several corals.

At Johnson's quarry in Genesee the same and several brachiopods, including the *orthis flabellula* and *spirifera plicatilla*.

At Waukesha, besides those mentioned above, there are more than twenty species of coral, ten of *cystidea*, three of *bryozoa*, twenty of brachiopods, five of lamellibranchiata, nine of gastropods, and ten of crustacea.

At Menomonee Falls, the fossils are principally corals and brachiopods.

MINERAL SPRINGS.

Nothing ever gave Waukesha County so great a notoriety as her numerous mineral springs, whose waters are drunk everywhere for the restoration of health. The providential discovery of the virtues of these springs at once gave the entire county a reputation world-wide in extent; springs wholly invaluable to the thousands afflicted with several fatal diseases for which their mineral properties are a specific. The elements of all of them throughout the county are very similar, the mineral substances and curative properties being nearly the same in each. They may be found, too, almost anywhere, but only a few springs, compared with the number known to exist, have been improved, advertised and their waters sent abroad. They are nearly all of astonishing size, almost any one being large enough to furnish as much water as could be shipped with ordinary railway facilities; and the flow from all the springs in Waukesha County would be sufficient to more than slake the thirst of all the inhabitants of the Union. Thus, nature has provided, free and delicious, a remedy so unlimited that every person in the civilized world afflicted with the peculiar diseases for which it is a specific, can have an abundance of it. The existence of good, pure springs in Waukesha County has been known, it is true, ever since the country was first settled by whites; but their wonderful curative properties were never fully understood, probably not known at all to the whites, until 1868. The Indians, however, had one of their oldest and largest trails leading to Mineral Rock Springs, another to Bethesda and another to the springs at Pewaukee; and their Medicine Man told some of the first settlers that the water of the two springs at Waukesha was "sick." It may be judged from these facts that the aborigines understood the peculiarities of them and drank of their waters with that understanding.

In fact, George Washington Featherstonhaugh, now of Milwaukee, sent out nearly fifty years ago as a surveyor and geologist by the English government, and as the commander of the party referred to in the extract, furnishes the following:

"In 1834, a party was dispatched by the Topographical Bureau to survey and fix a road from Port Lawrence and Vistula to Fort Armstrong, Rock Island on the Mississippi, nearly opposite to the mouth of the Rock River.

"The survey was arrested at the confluence of the Fox River with the Illinois, opposite to the town of Ottawa, Illinois, by the illness of the men. Fourteen or fifteen had complication of fever and ague, and many other bad consequences resulting from exposure and bad water.

"At this time the whole region from Portage City to Chicago was purely an Indian territory and the Indians outnumbered the whites by immense odds. A half-breed guide informed the commanding officer that at the head of the Fox River was a spring of great virtue well known to the Indians. Having some faith in the information thus obtained, a small party was detailed to follow the Fox River and endeavor to find this healing water.

"By following up the main water-course they arrived at the present site of Waukesha and encamped on the bluff. No less than 100 Indians were engaged in drinking the waters, using them as external applications and pouring them into rude vessels for transportation.

“On the historical branch of this vitally interesting question it is a work of supererogation to dwell any longer. A cloud of living witnesses can at any moment be summoned before the tribunal of public opinion.”

In handling the waters of the various springs in this county as a business enterprise, a rivalry sprang up between their proprietors. This may have misled the public somewhat; but there was no occasion for it, as the published analyses of several chemists of unblemished reputation demonstrated that there is but very little difference in the mineral properties of the various springs. The chief difference, discovered by careful observation, is that the waters of most of them are more strongly impregnated with mineral substances in dry weather than during the wet periods of spring and late autumn; but all are subject to exactly the same conditions and changes, river over-flow alone excepted. Their similarity renders them unusually valuable, for abounding in various portions of the county as they do, ample room is furnished for all who may come—the great annual influx of pleasure-seekers, as well as afflicted, not being compelled to crowd around one little fountain.

The source of the curative properties of these waters has never been satisfactorily explained. The use, by the most skillful physicians, of the substances found in Waukesha water would have very little effect in curing diseases for which these springs are a specific. When all other remedies failed in the attempt to overcome retention of urine among the victims of yellow fever in the South in 1878 and 1879, Waukesha water “acted like a charm,” in the language of Dr. Broaddus, of New Orleans, “and numerous cases of recovery can be attributed alone to its use.” This was an invaluable boon to the fever-stricken South, as the water loses none of its curative properties by transportation.

The flow of the Waukesha Springs has no peculiarities. Their temperature remains the same throughout the year. A beautiful and interesting phenomenon was thus described by a Milwaukee chemist in 1873:

“Every one who has observed any of the springs in this vicinity, may have noticed small white particles constantly bubbling up with the water. They vary from the size of a grain of sand to that of a pea, and are of irregular shapes and very white. They are tossed up by the action of the water and fall back again; they are rolled out and roll back again, appearing and re-appearing, and performing all kinds of pretty and curious revolutions. If you endeavor to keep your eyes upon one particular particle, you will find your strictest watch evaded, and in the course of one or two pretty parabolas it will give you the go-by in spite of yourself.

“Taken in the fingers, one of these little globules is quite soft and smooth, giving no indication of grit, and rather soapy when rubbed between the fingers. They are regarded by many as being composed of magnesia, but this is not strictly true. Their composition is about one-fourth carbonate of magnesia and three-fourths carbonate of lime. They, moreover, undoubtedly have their origin in the course of the water which evidently comes from the limestone. How they should consist of so large a per cent of carbonate of magnesia may be explained in this way.

“The limestone of this place is to some extent magnesian (carbonate of lime and carbonate of magnesia, the latter being in a very small proportion). The water, percolating through the strata of the stone, disintegrates the carbonate of magnesia more easily than the carbonate of lime, hence the greater proportion of magnesia is found in the water, and the solid substance which it carries with it.

“If the course of any one of the numerous springs of this place were traced to the limestone bed, there would perhaps be found, near the outlet of the water from the strata, considerable quantities of the same substance as the little moving particles alluded to. In the Waukesha Mineral Rock Spring, which flows directly from a spur of Mr. A. Hadfield & Co.’s quarry bed, this substance exists in bulk. Pounds of it may be taken out in a fine condition, soft and pasty and white as snow.

“In noting these facts, I do not wish to be understood as claiming any medicinal virtues for the waters *by reason* of the presence of carbonate of magnesia, although its admixture in

suitable proportions may contribute to the general effect. The phenomena, however, have given rise to some inquiry, which it is hoped, the above explanation will tend to satisfy."

Bethesda Spring.—The late Richard Dunbar, the first white man to discover the virtues of Waukesha mineral water and receive an almost miraculous benefit from them, relates the not wholly unromantic story of the discovery as follows:

"I had been afflicted with the disease known as diabetes, in its worst form. I resorted to the most eminent physicians in this country, but without avail. My family physician, the distinguished Dr. Willard Parker, of New York City, having exhausted his skill in medicine, advised me as a last resort to visit Europe. I went but returned home unbenefited. On my return I called on Dr. Parker. He told me that there was no use in resorting to any more remedies; that my case was beyond the reach of medical aid. I then concluded that there was nothing more for me to do but put my house in order and resign myself to my fate.

"In pursuit of a matter of family interest, I visited South Bend, Ind., accompanied by Mrs. Dunbar, and while there I was summoned to Waukesha, by the death of Mrs. Clarke, my wife's mother, who had resided there. I was very feeble, at this time, and enduring much bodily suffering. My insatiable thirst was beyond the power of man to describe. My tongue and gums were ulcerated; my bodily suffering was intense. Under these conditions I reluctantly made my way to Waukesha. This was the autumn of 1868. On the following day after the burial I was invited by Miss Clarke to ride out to see some real estate she had purchased within the corporate limits of the city. I protested strongly against my going; finally I reluctantly consented, feeling but little interest in, to me, earth's fast receding affairs, as I did not expect to live one day beyond the limit set by Dr. Willard Parker—six weeks.

"When I entered the field on which the spring is located, the intolerable thirst which had so long afflicted me had nearly overpowered me, and at this time I bemoaned my imprudence in leaving the house, and wished to return to obtain water to slake my insatiate thirst. Miss Clarke remarked that there was plenty of water on the property which we were viewing.

"A tumbler was immediately procured. As if providentially, I went to the right spring. I drank six tumblerfuls, and felt instantly a most grateful and refreshed sensation, as I felt the water coursing through my system. My tongue and gums were raw; my lips were parched; the water seemed to coat my tongue, and my lips became moistened. The water seemed to me so mild and soothing, I at once remarked to the ladies that there was something peculiar in the water. Reader, it was to me the most delicious, the most grateful beverage that entered my mouth in years. I immediately sought rest under the shade of a wide-spreading oak which then stood and now stands overlooking the spring, like a guardian angel watching it.

"After a rest of one-half hour I returned again to the spring, and drank six tumblerfuls in succession, making twelve in all within the space of half an hour. I felt then, and expressed the opinion that there was something wonderful in the water, as I felt it working a great change in me. Previous to my reaching the house, a profuse perspiration broke out all over me, a result science and medical skill had failed to produce in the three and a half years of my illness. That night I retired at half-past 9 and slept all night. Such a night of undisturbed repose I had not enjoyed for years. I arose that morning feeling well. At 11 o'clock A. M., on that day, I considered myself as well as ever I felt; nevertheless I remained three days and drank the water freely, but never exceeding twelve glasses per day. I then returned to Indiana, finishing my business there, after which I returned to New York, feeling I had a new lease of life, so benefited and restored did I feel.

"I again called on Dr. Parker. He felt a great surprise to see me, and so well, for he said when last I took my leave of him he would never see me again alive, and questioned me about what brought on this change. I told him about my visit to Waukesha, and the almost miraculous cure. He said it was wonderful; had never heard of anything like it.

"In the following January, while at Washington, I suffered a relapse. I felt it was a punishment inflicted on me by Divine Providence for my neglecting to introduce to suffering humanity the great and wonderful specific. On that day I telegraphed Dr. Parker saying I had a

relapse. He answered by saying, there is no other remedy but the Wisconsin water. I left Washington that evening for New York, and called on the Doctor previous to my going home. He (Dr. Parker) then told me there would have been a foot of grass on my grave if it had not been for that water, and then advised me to send for a cask of the water. I told him there were several other springs adjacent to the spring from which I drank, and that my friends might make a mistake. One of these springs was twenty feet from the Bethesda, on the same level, and boiling up out of the earth; on the other side, about fifty feet, was another large spring boiling. I told him I would go to Waukesha. He said that was well, and keep him posted on the effect of the water on me. If it had the same effect as before, it was the most wonderful thing he had ever heard of, and if it could be purchased, to spare no time in obtaining it. I arrived in Waukesha. In due time I hastened to the spring, and I found the same effect as before. I then made the beneficial effects of the water known, and people crowded here, drank the water and were healed.

"I determined to be a help to humanity, but was derided, abused, persecuted by many of the good people of Waukesha. I was even accused of drugging the spring. So fierce was the blast I had to encounter, that I would have relinquished the spring, if I had not been drawn and impelled forward by an influence which I could neither fully analyze nor resist. I would hear that word as distinctly as I now can see to write—'Push Bethesda; you cannot say two much for it; don't abandon it.' While introducing the water throughout this nation, it never failed to perform all I claimed for it, and, in fact, more than I had ever anticipated it would do. To-day it has no counterpart on earth as a grand specific for all kidney troubles.

"Time, which makes all things even, had made Bethesda a victor. The voice of sneering incredulity was silenced; the healing properties of the spring were acknowledged. I have been the means of enriching those miserable persecutors. I have snatched Waukesha from obscurity, and set it in a large place; its conspicuity is widening, as everybody can see. The acknowledged merits of the spring are attracting the attention of this and other countries, and the present and prospective wealth of Waukesha has been increased \$1,000,000 or more.

"Prof. C. F. Chandler, of Columbia College, N. Y., made an analysis of the water. I found nothing remarkable in the analysis, but public incredulity could not induce me to disbelieve the evidence of my own senses, or forget my rescue from an imminent and painful death. I proclaimed and do proclaim the fact of my cure. I refer to Dr. Willard Parker for the facts in my own case. Throughout this nation and Europe, I have invited for it the severest tests, that of actual trial, and serenely awaited a verdict which I knew to be inevitable, and have public confidence obtained.

"I called the spring Bethesda, because the Lord was merciful to me in leading me to the healing fount. The word Bethesda signifies the house of mercy, and was the name of a pool at Jerusalem, which had five porticoes, piazzas or covered walks around it.—John, v, 2 and 4.

"The generality of expositors think it had this name rather from the great goodness of God, manifested to his people in bestowing healing virtues upon its waters. It was at this pool that Jesus directed a blind man to wash for the recovery of his sight.—John ix, 7.

"The five porches mentioned by the Evangelist, John, v, 2 and 4, are supposed to have been five apartments for the accommodation of the multitude that came to the pool to be cured of their bodily diseases. In these porches, says the Evangelist, lay a great many of impotent people, blind, halt and withered, waiting for the moving of the waters, for an angel went down at a certain season into the pool and troubled the water. Whosoever the first after the troubling of the waters stepped in was made whole of whatever disease he had. The modern pool of Bethesda is about the same dimensions as the ancient pool. The five springs encircling the pool of Bethesda, I compared to the five porches at the ancient pool—the five porticoes, or covered walks, all are built. Of those springs, so far, we find but one curative; the other four I filled, as they were worthless. What those curative properties are seems to be beyond the comprehension of all scientists. I drank of the modern Bethesda; I was healed of an incurable disease, one that baffled the skill of the most scientific men, at home and abroad."

The first analysis of Bethesda water was made by Prof. C. F. Chandler, of Columbia College, N. Y., with this result, the quantity analyzed being a wine gallon of 231 cubic inches :

Chloride of sodium	1.160 grains.
Sulphate of potassa	0.454
Sulphate of sodium	0.542
Bicarbonate of lime	17.022
Bicarbonate of magnesia	12.388
Bicarbonate of iron	0.042
Bicarbonate of soda	1.256
Phosphate of soda	a trace
Alumina	0.122
Silica	0.944
Organic matter	1.983
Total	35.710 grains.

The surroundings of this spring have been made beautiful. It is in the midst of a large park, in which are numerous walks and drives, the latter named after the prominent citizens of Waukesha. Near it is a large pool, in which are several other springs and several varieties of fish. This pool, in a different shape, was in existence when the first white people visited Waukesha. During the summer of 1880, Mrs. Dunbar, proprietor, erected an office and bath-house at a cost of nearly \$8,000, and the work of planting trees and flowers never ceases. The shipment of water from Bethesda Spring is to all parts of the civilized world, and averages thirty barrels per day.

Mineral Rock Spring.—The Mineral Rock Spring is owned by C. C. Olin & Co. The following analysis, by Prof. Gustavus Bode, of Milwaukee, shows its ingredients :

Chloride of sodium	0.279
Sulphate of soda	0.957
Bicarbonate of soda	1.210
Bicarbonate of lime	9.866
Bicarbonate of magnesia	7.824
Silica	1.054
Organic matter	a trace
Total	21.197

Accompanying the analysis was the following letter :

MILWAUKEE, Wis., Nov. 11, 1872.

C. C. OLIN, Esq., Waukesha :

Dear Sir:—In transmitting the result of my analysis of the *Waukesha Mineral Rock Spring*, you will allow me to state that the above water does not differ materially in its combination from the famous Bethesda water. Chemical analysis has thus far failed to detect what causes the well-known effects of those waters. There are, however, some points to which I would call your attention, which may serve to give some explanation :

All spring waters contain certain combinations of salts, in larger or smaller quantities, and upon the amount of lime and magnesia salts they contain depends their degree of hardness. Almost all of them contain the lime, principally combined with sulphuric acid (as sulphate of lime—gypsum), which is the cause of its hardness and the formation of kettlestone. The Waukesha water contains no sulphate of lime, and but very little sulphate of soda. To the absence of sulphates their medical effect is to be attributed.

If you will refer to the analysis of the Bethesda water, made by Prof. Chandler, and compare the figures of the inclosed analysis, you will find that the *Waukesha Mineral Rock Spring* contains less lime and magnesia salts, and hardly any sulphates, and, if the conclusions I have come to are correct, you may expect the water of the *Waukesha Mineral Rock Spring* to prove even more effective than the Bethesda and others.

The location of your spring, coming direct from the lime quarries, and being considerably elevated above the river, is another guarantee for its purity, which it will maintain in times of high water when other springs are overflowed and mixed with river water.

Respectfully yours,

G. BODE, *Analytical Chemist.*

Hygiea Spring.—This spring, only a few rods from the street, owned by Edward Flannery, an engineer on the Chicago, Milwaukee & St. Paul Railway, by whom it was improved in 1872, is inclosed by the finest and largest amphitheater of masonry in the county of Waukesha. The spectacle is a remarkable one, the broad slabs of marble, the lime, the sand

and the clear, sparkling mineral waters, all being natives of Waukesha, and to be had in unlimited quantities. During the season of 1880, Mr. Flannery erected a new office near his spring, and made other improvements of value. The analysis of this spring made by Otto A. Thiele, of Berlin, Prussia, is as follows:

Bicarbonate of soda.....	2.265 grains.
Bicarbonate of iron.....	0.575
Bicarbonate of lime.....	16.726
Bicarbonate of magnesia.....	13.142
Chloride of sodium.....	1.250
Phosphate of soda.....	0.040
Sulphate of potassa.....	0.820
Sulphate of sodium.....	0.524
Alumina.....	0.720
Silica.....	0.150
Organic matter.....	a trace
Total.....	38.211

Glenn Waukesha Spring.—The waters of the Glenn Waukesha Spring, near the Fox River, in Waukesha Village, were analyzed by Prof. C. F. Chandler, of Columbia College, New York, with this result:

Chloride of sodium.....	1.1944 grains.
Sulphate of potassa.....	0.4943
Sulphate of soda.....	0.6212
Bicarbonate of lime.....	15.9764
Bicarbonate of magnesia.....	11.5795
Bicarbonate of iron.....	0.0866
Bicarbonate of soda.....	0.7595
Phosphate of soda.....	0.0034
Alumina.....	0.0466
Silica.....	1.0497
Organic matter.....	2.2160
Total.....	34.0276 grains.

This spring is owned by J. K. Glenn, of New York City. He now has an office, bath-house and shipping-house near, and ships large quantities of water, especially to New York. A wind-engine has been erected for hoisting water for an artificial fountain and for packing purposes. The pavilion at this spring is a good one, and the mason-work about it substantial. A large lamp is kept burning, at the head of the stone stairway leading down to the spring, every night in the year, for the accommodation of those who drink of its waters.

Clysmic Spring.—This spring, near the corner of Grand avenue and the Fountain House grounds, is the property of Mrs. Kate B. Hill, of Natchez, Mississippi. It has a liberal flow and is very cold and sparkling. The water was awarded a grand medal by the American Institute at New York, the award being to John L. Lockwood, of New York City, who is the lessee and manager. The improvements about the Clysmic Spring are not extensive, but valuable ones are in contemplation. The analysis by Prof. Rathbone, is as follows:

In one U. S. or wine gallon of 231 cubic inches, there are—

Chloride of sodium.....	1.170 grains.
Sulphate of potassa.....	0.456
Sulphate of soda.....	0.560
Bicarbonate of lime.....	16.044
Bicarbonate of magnesia.....	13.563
Bicarbonate of iron.....	0.038
Bicarbonate of soda.....	1.261
Phosphate of soda.....	0.032
Alumina.....	a trace
Silica.....	0.722
Organic matter.....	1.616
Total.....	35,462 grains.

Crescent Spring.—This mineral spring, discovered while excavations were being made near the Fountain House, in Waukesha, is a very large one. The mason work incloses the largest area of any in the county, and over the clear, deep pool is a two-story pagoda, of attractive architecture, capable of seating comfortably nearly two hundred persons. The discharge from this spring is 400 barrels per hour. The proprietor, Matthew Laffin, of Chicago, who was cured at the age of sixty-nine, of rheumatism, placed the water from this spring on the market, which has reached a wide sale. The analysis made by Prof. A. Voght, of New Orleans, shows the water to contain the following ingredients:

Free carbonic acid.....	11.7825 grains.
Bicarbonate of lime.....	16.1885
Bicarbonate of magresia.....	9.7530
Bicarbonate of iron.....	3.7654
Bicarbonate of baryta.....	0.2469
Bicarbonate of lythia.....	1.1267
Sulphate of lime.....	0.2470
Sulphate of soda.....	0.2006
Chloride of sodium.....	0.7253
Alumina, silica, etc.....	0.5093
Total.....	44.5352

Silurian Spring.—This very large spring, opposite the Park Hotel, Waukesha, was so named from the Silurian Age, in which were deposited the limestone formations from which its waters derive their peculiar virtues and properties. It has been in use longer than any other spring in Waukesha, David Jackson's house having been supplied from it by means of hand-bored "pump-logs," forty years ago, or more. It is in the midst of a large and beautiful park, in which is a ridge formed during the famous glacial epoch. Near by is a pool for fish; several pagodas and a very fine bath-house, erected in the spring of 1880—the largest in the village. There are several springs on the Silurian property, all with similar mineral and medicinal qualities; but one is sufficient for all purposes, having a flow unequalled by any other, with perhaps one exception, in Waukesha. Over the main spring, a truly elegant pagoda of a rare style of architecture was built in 1880, by the proprietors, Anderson & Haslage, the latter of whom was cured by the water. It has double rows of iron columns, and is encircled by a table of polished imported marble. It is said to be the finest spring pagoda in the Union. The waters boil up through several holes pierced in a thick block of limestone rock. The analysis by Prof. Walter S. Haines, of Rush Medical College, Chicago, is disclosed in the following letter:

CHEMICAL LABORATORY OF RUSH MEDICAL COLLEGE, CHICAGO, January 10, 1880.

MESSRS. ANDERSON & HASLAGE—*Gentlemen*: Upon subjecting the Silurian Mineral Water to chemical analysis, I find each gallon of 231 inches contains:

Chloride of sodium.....	0.1926 grains.
Sulphate of sodium.....	0.2917 "
Bicarbonate of sodium.....	0.0301 "
Carbonate of calcium.....	9.9277 "
Carbonate of magnesium.....	6.8324 "
Carbonate of iron.....	0.1285 "
Phosphate of iron.....	traces.
Phosphate of manganese.....	traces.
Alumina.....	0.5827 "
Silica.....	0.7004 "
Organic matter.....	very faint trace.

Total solids.....18.6861 grains.
Carbonic acid gas, 44.7 cubic inches per gallon.

One of the most noteworthy features of the water is its remarkable freedom from organic matter; it is the purest water in this respect that I have ever examined, and this organic purity undoubtedly greatly increases the alterative and diuretic effects of its mineral constituents.

WALTER S. HAINES, M. D.

White Rock Spring.—In a natural amphitheater of limestone, with clean limestone rock on five sides, is H. W. Colver's White Rock Spring. The flow is large and the water exceedingly cold. The natural beauties of the surrounding lands are great, being composed of forest,

prairie, rocks, hills and river bank, all in the sixty acres of land owned by Mr. Colver. Below the spring, over which he has an ample pavilion, are five or six other large springs of similar analysis. In the pools of two of these, fine watercresses grow in abundance. The analysis of White Rock was made by J. Campbell Brown, of Liverpool, England, and is as follows, expressed in grains per imperial gallon :

Sodium chloride857	grains.
Sodium bicarbonate	1.341	"
Sodium sulphate609	"
Potassium sulphate731	"
Magnesium bicarbonate	14.211	"
Calcium bicarbonate.....	19.225	"
Iron salts.....	.082	"
Sodium silicate.....	.922	"
Organic matter.....	1.641	"
Total.....	39.619	"

Lethean Spring.—This spring, discovered in a remarkable manner, is owned by Dr. Jehiel Smith, in the village of Waukesha. The following is an extract from the book issued in 1875, by the proprietor of the Lethean Spring :

“The spring forming the subject of this book is located in the heart of the village, on a plat of ground 100 by 150 feet, on Clinton street, about eight rods from the business portion of the village. The proprietor of the spring built a house on this plat two years ago, and, in digging the cellar to the depth of nine feet and the size of the house, enough stone was taken out for not only the outside walls of the cellar, but the division and cistern walls, showing how much of stone there is in the vicinity of the spring, from which to derive its mineral properties. In digging for a well, the spring was opened to the upper surface at the depth of twenty-two feet ; a large boulder of about one ton’s weight was lifted, revealing a beautiful spring flowing through a bed of white sand. The workmen could only go two feet farther, and the flow of water soon rendered it clear ; the upper walls were laid in cement to keep out foreign matter and surface drainage, while the lower walls allowed the spring to pursue the course it had probably followed for ages, in its dark and lonely depths. The constant flow keeps it steadily at two feet, summer and winter, and it has a uniform temperature the year round of 45° Fahrenheit, which shows the depth of its source is far below the level to which the changes of the seasons affect the temperature of the earth.”

The analysis, by Prof. G. Bode, of Milwaukee, shows the water of this spring to contain the following ingredients :

Chloride of sodium.....	0.695	grains.
Sulphate of soda	0.881	"
Bicarbonate of soda.....	1.286	"
Bicarbonate of lime	9.498	"
Bicarbonate of magnesia.....	5.922	"
Bicarbonate of iron	0.097	"
Alumina.....	0.101	"
Silica	0.783	"
Organic matter	not a trace.	
Total quantity of soluble salts in United States wine gallon.....	19.263	"
Total quantity of soluble salts in imperial gallon.....	23.116	"
Carbonic acid in combination in imperial gallon.....	6.721	"

Excelsior Mineral Springs.—On Section 14, Waukesha, W. P. Calkins has several springs of quite varying mineral properties, some being so highly charged with iron and sulphur as to have a decided mineral taste, and to make a great discoloration of substances at the outlet ; while others have the property of petrifying moss and other substances. Some of them are so highly charged with carbonic acid as to be fatal to fish. Some of these springs have no mineral taste and make no discolorations. The water from one of them has been used as a medicinal agent for nearly thirty years. Mr. Calkins says : “I have not had the water from any of these springs analyzed ; and, as to name, I have for many years called them the Waukesha Excelsior

Mineral Springs. I have been told that a Mr. Welsh, who lives in Vernon, has some springs which he calls Excelsior; but I claim the right to the name, having so called my springs before Welsh's springs were discovered."

Eocene Spring.—This spring, owned by W. S. Chandler, contains the same minerals, in the same proportion as the other springs, as the following letter from Prof. G. Bode, of Milwaukee, written June 25, 1878, will show:

W. S. CHANDLER, Esq., Waukesha: Herewith please find the results of the analysis of the water from your spring, made by me at your request, of the sample furnished by you:

One gallon United States measure contains total quantity of solid matter 21.9401 grains, consisting of	
Chloride of sodium.....	0.2519 grains.
Sulphate of soda.....	0.5775 "
Bicarbonate of soda.....	0.3809 "
Bicarbonate of lime.....	11.7166 "
Bicarbonate of magnesia.....	8.0916 "
Bicarbonate of iron.....	0.0184 "
Alumina.....	0.0431 "
Silica.....	0.8601 "

The analysis proves that the water of your spring contains the same salts and in the same proportions as other Waukesha Springs. As it contains neither sulphate of lime nor organic matter, I believe it to possess the medicinal qualities claimed for this class of waters in the highest degree. Very respectfully yours,

GUSTAVUS BODE, Analytical Chemist.

Horeb Spring.—This is one of the most elevated springs in the vicinity of Waukesha, being situated on the property of Thomas Spence, a high plateau on the west side of the Fox River, in the edge of the town of Pewaukee. It boils up through a bed of gravel at the foot of a hill, and in its bed may be seen small globules of magnesia, accumulated by the flow of water through the limestone rocks. There are several Horeb springs, but Mr. Spence ships only from the most elevated one, in order to avoid organic matter. The analysis, by Prof. G. Bode, of Milwaukee, is as follows:

A gallon, U. S. wine measure, contains:

Total quantity of soluble salts, 20.002 grains, consisting of	
Chloride of sodium.....	0.179 grains.
Sulphate of soda.....	1.213 "
Bicarbonate of lime.....	10.725 "
Bicarbonate of magnesia.....	6.875 "
Aluminium.....	0.225 "
Silica.....	0.723 "
Iron.....	a trace.

Mr. Spence ships water to Canada, and to various cities in several States.

Minnewoc Springs.—These delightfully situated springs are on property owned by the heirs of the late Dr. Increase A. Lapham, near Gifford's Summer Resort, on Pewaukee Lake. The analysis was made by Gustavus Bode, of Milwaukee, and is as follows:

Chloride of sodium.....	6.129 grains.
Sulphate of soda.....	0.627 "
Bicarbonate of soda.....	1.041 "
Bicarbonate of lime.....	9.638 "
Bicarbonate of magnesia.....	6.138 "
Bicarbonate of iron.....	0.129 "
Alumina.....	0.067 "
Silica.....	0.876 "

Total grains in a gallon.....18.648

It will be seen, by comparing this analysis with all others here given, that Minnewoc Springs are wholly unlike in their medicinal properties, and are specifics for different diseases than the others.

Other Springs.—There are numerous other mineral springs in Waukesha County, but no complete analysis of them has been obtained. Martin T. Draper, of Draper Hall, Oconomowoc, has several springs near his hotel, all with mineral properties. One is quite remarkable,

having three separate pipes leading into the ground within the space of a square yard, from which three streams, icy-cold, but with wholly different mineral properties, keep a constant flow. One of these streams is strongly impregnated with iron; another is notable for magnesia, and the third for other mineral properties. All of these discharge into one basin, and make a decoction fatal to fish. No business is made of shipping water from Draper's Magnesia Springs.

There are also at Oconomowoc, Hitchcock's Medicinal Springs, La Belle Springs and others; at Pewaukee, the Oakton; at Waukesha, Samuel A. Barstow's Superior; at Delafield, the Nemahbin, and at Muskego, perhaps the largest springs of all. These require no elaborate description, as their owners generally do not make a business of selling the water, although nearly all have some customers.

PRE-HISTORIC RELICS.

There is probably nothing, natural or artificial, which is so sure to attract the attention and excite the curiosity of all, learned and unlearned, as the pre-historic relics with which Waukesha County so richly abounds.

Of the many Indian mounds in the shapes of beasts and birds, which were found along the valley of the Pishtaka (Fox River), by the early settlers, but few now remain in their entirety, and the best-preserved specimens about the village of Waukesha are on the grounds of Carroll College and of M. D. Cutler, respectively. In relation to the Waukesha mounds, it is proper to quote extensively from "The Antiquities of Wisconsin," by Dr. I. A. Lapham, who gave years of attention to this interesting subject. After mentioning the various collections of mounds along the Pishtaka, from the Illinois line northward, he says:

"Waukesha is the next place which seems to have been occupied by the ancient inhabitants. It was formerly known as Prairie Village, or Prairieville, and, being on the main road west from Milwaukee, its mounds were early brought into notice. They occupy three different levels—those in the lower part of the village, mostly conical, are on the lowest ground, while those in the upper part are on what may be called the second bank, and the others are on the highlands, and south of the village. A group of these works was surveyed in 1836, with the assistance of Mr. William T. Cully. At that time, the log house near these mounds was the only evidence of civilization in the place; and the works were uninjured by the white man, except that the large mound was made use of for a root-house, or potato-hole. The turtle-mound [see plate 'a'] was then a conspicuous object, and such was its resemblance to that animal that it was pronounced a good representation by all who saw it.

"On this mound was, at that time, a recent grave [see plate 'b'], protected by pickets driven on opposite sides, so as to cross at the top. The Indians had but recently left the place, and the trail leading from the river to their wigwams ran directly over two of the mounds. This turtle was then a very fine specimen of the ancient art of mound-building, with its graceful curves, the feet projecting back and forward, and the tail, with its gradual slope, so acutely pointed that it was impossible to ascertain precisely where it terminated. The body was 56 feet in length, and the tail 250; the height, 6 feet. The ground occupied by this group of works is now covered with buildings. A dwelling-house stands upon the body of the turtle, and a Catholic church is built upon the tail.

"Another turtle was found on the college grounds, and differs from the other in being concave on the back. It is also less symmetrical.

"A group of structures occupying the very high ground on a little hill east of the town consists of two round, four oblong, one turtle and one bird-shaped mound. The position of the last is peculiar, on a steep hillside, with its head downward. The general outline of the figure [see No. 5, plate "d"], and the shape of the head and beak, leave no doubt that a bird was intended to be represented; but whether an eagle, a hawk, or any particular bird, must be left entirely to conjecture.

“The very fine group, half a mile south of the town, fortunately is upon the grounds of Carroll College, and we may, therefore, hope it will be forever preserved as a record of the past. These mounds form a quasi-inclosure, and hence, like many other groups of works, have been, by casual observers, called a fort. [See plate “c.”] If we were not well acquainted with works of defense, in Ohio and elsewhere, which show that the Mound-Builders were considerably advanced in military arts, we might suppose that this was intended for a rude fortification; but we can only regard it as an accidental arrangement, and not designed for any such purpose.

“Much of the ground about Waukesha was, in 1836, covered with ‘Indian corn-hills,’ or remains of their recent culture of maize. In this locality, as at numerous others, mounds occupy the highest grounds, and the points of hills, and other places, whence the most extensive view, above and below, can be obtained. The town of Waukesha stands on a slightly undulating plain, surrounded by hills, forming a fine amphitheater, which, in ancient times, was doubtless crowded, as it is now, with a numerous population.

“The mound on the grounds near Mr. Cutler’s present residence was selected for examination; much of the earth having been removed by the town authorities, so as materially to lessen the labor. At about two feet above the original surface of the ground, the top of a circular wall or pile of stones, about nine feet in diameter, was discovered. It was composed of loose fragments of white limestone, which exhibited evidence of long contact with the earth, by their decayed and softened exterior. The wall was interrupted on the west side.

“We commenced the exploration by opening a trench three feet wide, beginning on the east side of the original mound, deep enough to reach through the black and mottled earth of which the mound was composed, and to the surface of the yellowish clay subsoil. Continuing the trench toward the center, we passed the loose stone wall, and found the black earth suddenly extending down about two feet below the natural surface of the ground, and reaching the gravel below the yellow clay. Upon this gravel, two feet below the original surface, directly under the center of the mound, and surrounded by the circular heap of stones, was found a human skeleton, lying on its back, with the head toward the west. Stones had also been placed at the sides and over the body, forming a rude sort of coffin. The bones were very much decayed, and only fragments could be obtained. The plates of the skull were too far gone to be restored.

“In the left hand was a pipe of baked clay or pottery, ornamented with holes around the bowl, and also a quantity of red paint. In the right hand was a smaller pipe, cut from a soft kind of stone. They are both very small, and appear to have been articles of fancy rather than use. At the head were found many fragments of pottery which had been crushed by the weight of earth; these fragments were originally portions of two vessels. They are of the same coarse and rude materials as the fragments so frequently found on and near the surface in many localities throughout the State. The earth immediately over the skeleton was hard and black, indicating the action of fire, though no other evidence of this was discovered. Fragments of fresh water shells (of the genus *Unio*) were found with the fragments of pottery. No wood was found, nor where any vacant places noticed where it might have decayed.

“Another mound was opened a short distance west of the first, by sinking a shaft in the center five feet in diameter. We soon reached burnt clay, of a yellow or reddish-yellow color, with stones almost calcined into quicklime by the intensity of the heat. Much charcoal was obtained, showing still the original pores and concentric circles of the wood, which appeared to be oak. The bones of the leg of a human being were found, but the remainder of the skeleton had evidently been consumed at the time of the interment. There had been no excavation below the natural surface of the ground in this case.

The materials composing these mounds were taken from the surface, so that no perceptible excavations are left in their vicinity; and the whole body of the tumulus consists of black mold, with occasional spots of yellowish clay. The difference between the artificial and natural soil was quite apparent. No articles of ornament or use, indicating any commerce with the white

race, were discovered, and we are led to the conclusion that the mound was erected before the discovery of the country. The position of the skeleton, and other indications, show conclusively that no disturbance had taken place since the interment, and that the articles obtained were the original deposits. The skeleton was, without doubt, that of the personage for whom the mound was erected.

“In one of the vases at the head of the skeleton were the remains of a shell, apparently the *Unio siliquoides*, a very common species in the rivers and lakes of Wisconsin. Those shells are often used for spoons; and this vase probably contained a supply of food for the departed while on the journey to the spirit land.

* * * * *

“A mile and a half above Waukesha, on a very high and commanding position, are three mounds in front of four ‘lizard-mounds.’ They are at the crossing of the old ‘Madison road,’ in the southwest quarter of Section 26. A sentinel stationed on them could give warning to the inhabitants of the approach of any hostile force, long before they could reach the village. The ‘lizards,’ as in most cases, have their heads toward the south.

“On the northwest quarter of the same section are also some small mounds, and one of the lizard shape. They are at the foot of the hill that borders the outlet of Pewaukee Lake. Still farther on the road (southeast quarter of Section 22, Town 7, Range 19), were found the remains of another lizard mound, now nearly destroyed.

“But the most remarkable collection of lizards and turtles yet discovered, is on the school section [see Nos. 1, 2, 3 and 4, plate ‘d,’ for specimens], about a mile and a half southeast from the village of Pewaukee. This consists of seven turtles, two lizards, four oblong mounds, and one of those remarkable excavations alluded to. One of the turtle mounds, partially obliterated by the road, has a length of 450 feet, being nearly double the usual dimensions. Three of them are remarkable for their curved tails, a feature here first observed. One of the smallest has the tail turned back by the side of the body. These curved figures have another peculiarity in the obtuseness of the extremity; the end being round and flat, instead of a sharp point as in most other similar mounds. While these have a width of about four feet at the end, others so gradually diminish in height and breadth that it is almost impossible, as before observed, to determine the precise point of termination. One has a rectangular bend at the extremity of the tail, and in each there is a change of direction in passing from the body to the tail. This interesting group occupies a secure position, being on a ridge flanked by marshy grounds on either side. At the remote period when these mounds were built, the marshes may have been lakes, since filled up or dried away to their present condition. A diligent search did not reveal any evidence of breastworks or other means of defense, across the ridge at either end of the mounds. About half a mile off, in a northwest direction, is a very high hill (probably two hundred feet above the level of the marshes), on which are one lizard and three circular mounds. From these there is a fine view, extending over much of the adjacent country.”

In the town of Vernon is a remarkable group of mounds [see plate “e”], which was surveyed by Dr. I. A. Lapham, who described them as follows: “By invitation we took up our quarters at the house of Isaac Bailey, where it was once proposed to build a city [Section 29, Vernon], to be called Crawfordsville. The city was never built, and the same is only remembered by a few of the oldest inhabitants. This is the place mentioned by R. C. Tayler, as stated in the Western papers, to contain mounds resembling lizards, alligators and flying dragons. They occupy ground sloping gently toward the river [the Fox] at the north and northwest, their heads pointing up hill, and their general course southwesterly. The winged mounds or dragons, three in number, appear to lead the flight or march of the other animals, and to be heralded by a host of simple oblong figures, extending nearly half a mile in the same direction. The main figure of the group is 286 feet in length. This and the figure immediately preceding it are good representatives of the kind called lizards; while the two exterior figures, having four projections or feet, are always called turtles by the most casual observer.

They are from two to six feet in height. A little north of the group represented on plate "e," is a very large mound ten feet in height and eighty feet in diameter. It had been opened prior to our visit, but without important results. It has an appendage consisting of a slight ridge of earth, sixty feet long, extending in a northerly direction. Immediately north of it is an excavation from one to two feet in depth. The earth taken from this excavation, however, would make but a small portion of the mound."

None of the ancient works along the Pishtaka (Fox) River, or in the vicinity of the lakes of Waukesha County, have been built of brick, or in such a way as to indicate that they were intended as fortifications; and in this respect they differ from relics somewhat similar, farther south. Even in Wisconsin, in the adjoining county of Jefferson, there was found at Aztalan a very complete ruin of a pre-historic fortification, and it is probable that the forts were built by the same people as the mounds. Who were the builders of all these works has long been, and still continues to be, a puzzle; and it is very doubtful whether students will ever be more enlightened on the subject than they are at present, however desirable such enlightenment may be, and however diligently they may study the materials left behind by a race shrouded in absorbing mystery.

There are some things, however, which may be accepted as proven. In the first place, the Mound-Builders, so called, certainly did not belong to the known Indian nations of the Northern States of this Union. The nature of the latter as to disinclination for manual labor renders impossible any supposition including the idea of their having toiled for months and years in erecting structures of any kind, and especially structures which could have been in no way necessary to their physical well-being, for protection from hunger, the elements, or from enemies.

In the second place, it is reasonably certain that the builders of these mounds did belong to a race whose approach towards civilization was far beyond that of the lake Indian tribes. The researches of the past few years have proved beyond a question that the valleys of Wisconsin were once inhabited by people who made tools of copper, and a collection of chisels, axes, arrow and spear heads, bits for drilling holes in wood, adzes, and many other implements, have recently been added to the valuable collection of the State Historical Society, all of the articles having been found beneath the surface of lands in Wisconsin.

The ability to work in copper shows a long stride forward from that state of barbarism where no utensils or weapons are used except of wood and stone. So far we have facts, and from these facts may be deduced certain theories, and for which no more respect is claimed than from their own consistency they may seem to deserve.

For reasons that are derived from a long series of ethnological researches, it is thought that the progenitors of the so-called native races of America were driven from Northeastern Asia by the lack of sufficient food to support the population; and thence, along the Alaskan coasts, in various directions, toward the interior and to the southward, extended in successive migrations over the continent. What these people may have been on their arrival in America, is, of course, only a matter for conjecture; but it is very safe, judging from the general character of their descendants, to assume that they were little, if any, removed from the lowest depths of barbarism. Ages upon ages must have elapsed before the particular descendants, who made the ancient pottery and copper utensils of Wisconsin, and constructed its mounds, had reached a degree of social elevation sufficient to enable them to devote themselves to such labor. For the potters, coppersmiths and earth-bearers must have been supported by the labor of others in the tilling of the soil and in the procuring and drying of meat and fish. In the lower grades of barbarism, each individual provides for himself or herself and children only, and that but from day to day. Division of labor is unknown to them. They have not sufficient forethought to perceive the advantage of supplying food to those who are engaged in *useful* labor of a different kind, even, and still less would they submit to feed those who were performing a work not of direct and visible importance.

While the ancient inhabitants of this region were advancing to the degree that has been stated, cultivating tobacco, beans, potatoes, Indian corn and other agricultural products, living peaceful lives, and only disputing the possession of the soil with the ferocious beasts that had an abiding-place here, their savage relatives in the North remained in a state of barbarism but little better than their condition of hundreds, and perhaps thousands, of years before. At last, they, too, increasing slowly in numbers, because of their ignorance and comparative carelessness in the treatment of their young, found their population too great for subsistence, and the strongest and boldest of them set out for fresh fields, in which to secure the wherewithal to live.

Slowly they came on toward the South, fighting with each other for the sole occupancy of some fishing or hunting ground, and thus dividing into tribes and nations, till at last a portion of them passed around Lake Superior and found the peaceful citizens of this country enjoying the blessings of productive industry, but unable to defend themselves against the arrows of the barbarous invader. It needs no great stretch of the imagination to conceive of the frightened agriculturists taking the canoes with which they were wont to navigate the lakelets and rivers, and once more seeking a home far enough to the south to feel safe from the persecutions of the hardy northern races. They may have left their fields of beans, corn, potatoes and tobacco in full or partial maturity; but, at any rate, the new-comers seem to have gathered some hints in regard to the production of those articles, and to have employed their women to some extent in their cultivation. So also, the old canoes left by the departing natives very probably taught the invaders the fact that it is easy to construct of birch bark, a vessel which floats upon the water, even when freighted with considerable weight. This knowledge was so much gained to the barbarians, but they never improved upon it to any appreciable degree. It required less exertion on their part, when the productions of any one region became more or less exhausted, to remove by bands into some more desirable place, than to devise methods for improving their opportunities at home. So the Mound-Builders, so-called, were gradually driven down its numerous northern and eastern branches, to the Mississippi; and their works are found as far to the south as Vicksburg. In Arkansas and Tennessee, there are even evidences of former roadways, and of burnt brick, which show that these people improved with time—and, we may say, with travel.

When they were forced away from their last abiding-place on the Mississippi, they probably turned to the Southwest and grew into that splendid half-civilized nation which constructed magnificent works for religion and luxury about the lakes of Central Mexico, which even had books of hieroglyphics written upon a sort of natural paper, but which was brushed away three hundred and fifty years ago by Cortez and his handful of followers as a colony of industrious spiders is brushed away by the broom of an housemaid.

Having thus given a very brief sketch of the probable history* of our early predecessors at Waukesha, the question recurs—"What were these mounds intended for?" There appears to be little doubt that they were built as propitiatory offerings to imaginary gods, who were supposed by the simple-minded inhabitants to dwell in the forms of the various animals found in the regions where they lived.

The ancient Egyptians had similar ideas of the gods even after they were much farther advanced in the arts of civilization than our Mound-Builders could have been; and the supposition that these works of earth were for religious purposes seems to be the only hypothesis against which no valid reason can be brought. At every place where the mounds existed there appears to have been also a more or less populous settlement, and it seems that the lizard, the turtle, or the fox, the exaggerated image of which was built up out of the soil, was chosen as the guardian and protector of that settlement, and worshiped in accordance with the power of which such guardian was supposed to be possessed. The earth of which these *basso relievos* are composed was scraped from the surface of the soil for acres in extent—no excavations corresponding to the

* No author or scientist has been trespassed upon for these theories.

mounds are generally found near them—and the labor entailed by this performance was doubtless considered to have been well bestowed. Possibly it may have been thought by the grangers of those days that the more of their land was used to make gods of, the more the underlying soil would be blessed. There are mounds or tumuli in almost every town in the county, but those represented in the following plates are the principal ones. Figure "f" represents the form in miniature of a vessel of not very hard pottery, found by Truman Wheeler (killed at Fond du Lac in 1848 by the fall of a tree), in a small mound a short distance down the Fox River from Waukesha. That mound has long since been razed by the plow and harrow.

There might have been represented the outlines of a skull found in a circular mound on Morris D. Cutler's land in Waukesha Village. Others were found in circular mounds; but none were found except those known to have been recently buried, the graves of which are represented on plate "b," in the turtle or lizard mounds. The significance of this fact may possibly suggest some theory to the reader. Most of the mounds contained no bones, and those which did contain human remains were made long before the burials took place. The vessel mentioned above, represented in Figure "f," had small, round holes on either side of its top, which were supposed to have been used as fastening-places for a string by which to transport it. The capacity of the vessel was about two quarts.

The plate of the skull might be inserted, not because of any historic fact that it transmits or illustrates, but simply as a shadow rescued from the limitless domain of oblivion; the outline of a being whose name was never written, whose face no civilized man ever saw, and whose history, further than that he lived and died, *will never be known*. These outlines can lead the generations of the mysterious future into the pathless desert of the past, curiosity-laden, but they will return as barren of knowledge as ourselves concerning his history.

AN ANCIENT DOCUMENT.

A very curious, ancient and interesting deed is given place in this volume for two reasons. One is that it seems to be the first record of the first conveyance of any land in what is now Waukesha; and the second, that it is believed to show that the now world-famous Waukesha Mineral Springs were known and named more than a century ago, and were the unmovable and indestructible boundary-line marks of a tract of land mentioned in the following document:

To all people to whom these presents shall come, Greeting: Know ye that we, Tomaroa, or Gabriel; Petaguage, or Michael; Maughquayah, or John Baptiste; Couroway Kicounaisa, or Fish; and Tontowaraganih, or Peter, sometimes called La Cloche, or the Bell, Kaskaskias Chiefs; Maughquinthepe, or Bear's Head; otherwise called the Black Dog; Meinquinpaumiah, Achiswewah, and Eschawinikawah, Pervariahs and Cahoquias Chiefs; chiefs and sachems of the different tribes of the Illinois nations of Indians, and being and effectually representing all the tribes of the said Illinois Indians, send greeting:

WHEREAS, William Murray, of the Illinois country, merchant, one of the grantees hereinafter named, as well for himself as on the parts and behalfs of the several other grantees herein also after named, did at several conferences publicly held with us, the said chiefs and sachems, at Kaskaskias Village, in the Illinois country aforesaid, treat and confer with us, the said chiefs and sachems, for the purchase of certain quantities or tracts of land belonging and appertaining unto us and to the several tribes or nations of Indians whom we represent; and

WHEREAS, We, the said chiefs and sachems, have deliberately and maturely considered for ourselves; and consulted with the natives of our several tribes or nations, of the requests and proposals made as aforesaid by the said William Murray, for himself and others, to us, the said chiefs and sachems; and

WHEREAS, We, the said chiefs and sachems, as well as the other natives of our several tribes or nations, are fully satisfied and contented (for the consideration hereinafter mentioned) to grant and confirm unto the said William Murray, and to the other grantees hereinafter named, the several tracts or quantities of land, hereinafter bounded and described:

Now know ye, therefore, that we, the said chiefs and sachems of the several tribes of the Illinois Indians aforesaid in full and public council assembled, at Kaskaskias Village aforesaid, for and in consideration of the sum of five shillings, to us in hand paid by the said William Murray, and for and in consideration of the following goods and merchandise to us, the said Tomaroa, Petaguage, Maughquayah, Couroway, Kicounaisa, Tontowaraganih, Maughquinthepe, Achiswewah, Meinquinpaumiah and Eschawinikawah, paid and delivered in full council aforesaid, that is to say, 260 strouds, 250 blankets, 350 shirts, 150 pairs of stroud and half-thick stockings, 150 stroud breech-cloths, 500 pounds of gunpowder, 4,000 pounds of lead, one gross of knives, thirty pounds of vermilion, 2,000 gun-flints, 200 pounds of brass kettles, 200 pounds of tobacco, three dozen gilt looking-glasses, one gross of gun-worms, two gross of awls, one gross of fire-steels, sixteen dozen of gartering, 10,000 pounds of flour,

500 bushels of Indian corn, twelve horses, twelve horned cattle, twenty bushels of salt and twenty guns, the receipt whereof we do hereby acknowledge, have granted, bargained, sold, aliened, released, enfeoffed, ratified, and fully confirmed, and by these presents do grant, bargain, sell, alien, release, enfeoff, ratify and fully confirm unto the said William Murray, Moses Franks and Jacob Franks, of the city of London, in the Kingdom of Great Britain, Esquires; David Franks, John Inglis, Bernard Gratz, Michael Gratz, Alexander Ross, David Sproat and James Milligan, all of the city of Philadelphia, in the Province of Pennsylvania, merchants; Moses Franks, of the same city, attorney at law; Andrew Hamilton and William Hamilton, of the same city, gentlemen; Edmund Milnes, of the same city, goldsmith and jeweler; Joseph Simons and Levi Andrew Levi, of the town of Lancaster, in the county of Lancaster, and province aforesaid, merchants; Thomas Minshall, of York County, and province aforesaid, Esquire; Robert Calender and William Thompson, of Cumberland County and province aforesaid, Esquires; John Campbell, of Pittsburgh, Westmoreland County and province aforesaid, merchant; George Castles, of the Illinois country aforesaid, and James Rumsey, late of the same county, merchants, their heirs and assigns, in the severality, or unto his Most Sacred Majesty George III, by the grace of God, of Great Britain, France and Ireland, King, defender of the faith, etc., his heirs and successors, for the use, benefit and behoof of all the said several above-named grantees, their heirs and assigns, in severality, as aforesaid (by whichever of these tenures the said grantees may most legally hold the same), the two several tracts or parcels of land hereinafter described and bounded, viz.:

One tract or parcel of land, situate, lying and being on the east side of the River Mississippi, beginning at the mouth of the Heron Creek, called by the French the River of Mary, being about a league below the mouth of Kaskaskias River; thence a northward of east course, in a direct line back to the Hilly Plains, eight leagues or thereabouts, be the same more or less; thence the same course, in a direct line, to the Crabtree Plains, seventeen leagues or thereabouts, be the same more or less; thence the same course, in a direct line, to a remarkable place known by the name of the Big Buffalo Hoofs, seven leagues or thereabouts, be the same more or less; thence the same course, in a direct line, to the Salt Lick Creek, about seven leagues, be the same more or less; then, crossing the said creek about one league below the ancient Shawanese town, in an easterly or a little to the north of east course, in a direct line to the River Ohio, about four leagues, be the same more or less; then down the Ohio by the several courses thereof, until it empties itself in the Mississippi, about thirty-five leagues, be the same more or less; and then up the Mississippi, by the several courses thereof, to the place of beginning, thirty-three leagues, or thereabouts, be the same more or less; and also one other piece or parcel of land, situate, lying, or being on the east side of the Mississippi, beginning at a place or point in a direct line opposite to the mouth of the Missouri River; thence up the Mississippi by the several courses thereof, to the mouth of the Illinois River, about six leagues, be the same more or less; then up the Illinois River, by the several courses thereof, to Chicago, or Garlick Creek, about ninety leagues, or thereabouts, be the same more or less; then nearly a northerly course, in a direct line, to a certain place remarkable, being the ground on which an engagement, or battle, was fought about forty or fifty years ago between the Pewaria and Renard Indians, about fifty leagues, be the same more or less; thence, by the same course, in a direct line, to the two remarkable hills* close together, in the middle of a large prairie, or plain, about fourteen leagues, be the same more or less; thence a north by east course, in a direct line, to a remarkable spring, known by the Indians by the name of Foggy Spring,† about fourteen leagues, be the same more or less; thence the same course, in a direct line, to a great mountain to the northward of the White Buffalo Plain, about fifteen leagues, be the same more or less; thence nearly a southwest course, in a direct line, to the place of beginning, about forty leagues, be the same more or less; and also all minerals, ores, trees, woods, underwoods, water, water-courses, profits, commodities, advantages, rights, liberties, privileges, hereditaments and appurtenances whatsoever, to the said two several tracts or parcels of land, belonging, or in anywise appertaining, and also the reversion and reversions, remainder and remainders, rents, issues and profits thereof, and of every part and parcel thereof, and all the estate, right, title, and interest, use, property, possession, claim and demand of them, the said Tomarora, Petaguage, Maughquayah, Couroway, Kicounaisa, Tontowaraganih, Maughquinthepe, Achiswewah, Meinquipaumiah and Eschawinikiwah, chiefs and sachems aforesaid, and of all and every other person and persons whatsoever, of or belonging to the said nations, of, unto, and out of, the premises, and every part and parcel thereof; to have and to hold the said several tracts or parcels of land, and all and singular the said granted or bargained premises, with the appurtenances, unto them, the said William Murray, Moses Franks, Jacob Franks, David Franks, John Inglis, Bernard Gratz, Michael Gratz, Alexander Ross, David Sproat, James Milligan, Moses Franks, Andrew Hamilton, William Hamilton, Edmund Milnes, Joseph Simon, Levi Andrew Levi, Thomas Minshall, Robert Calender, William Thompson, John Campbell, George Castles and James Rumsey, their heirs and assigns, forever, in severality, or unto his said Majesty, his heirs and successors, to and for the use, benefit, and behoof of the said grantees, their heirs and assigns, forever, in severality, as aforesaid; and the said Tomarora, Petaguage, Maughquayah, Couroway, Kicounaisa, Tontowaraganih, Maughquinthepe, Achiswewah, Meinquipaumiah and Eschawinikiwah, for themselves and for their several tribes of the Illinois nations, and all and every other nation and nations, tributaries and dependants on the said Illinois Indians, and their and every of their posterities, the said several tracts of land and premises, and every part thereof, against them the said Tomarora, Petaguage, Maughquayah, Couroway, Kicounaisa, Tontowaraganih, Maughquinthepe, Achiswewah, Meinquipaumiah and Eschawinikiwah, and against the said Illinois nations, and their tributaries, and dependants, and all and every of their posterities, unto the said William Murray, Moses Franks, Jacob Franks, David Franks, John Inglis, Bernard Gratz, Michael Gratz, Alexander Ross, David Sproat, James Milligan, Moses Franks, Andrew Hamilton, William Hamilton, Edmund Milnes, Joseph Simon, Levi Andrew Levi, Thomas Minshall, Robert Calender, William Thompson, John Campbell, George Castles and James Rumsey, their heirs and assigns, in severality, or unto his said Majesty, his heirs and successors, to and for the only use, benefit and behoof of the said grantees, their heirs and assigns in severality, as aforesaid, shall and will warrant, and forever defend, by these presents.

* Supposed to be pre-historic mounds which have since been leveled.

† Foggy Spring is supposed to be either the Mineral Rock or Bethesda Spring.

In witness whereof, we, the said chiefs and sachems, in behalf of ourselves respectively, and in behalf of all the different tribes of the Illinois Indians as aforesaid, have hereunto set our hands and seals, in the presence of the persons subscribing as witnesses hereunto, at a public council held at Kaskaskias Village aforesaid, this 5th day of July, in the thirteenth year of his Majesty's reign, and in the year of our Lord 1778.

TOMAROA, or GABRIEL
(being baptized), a Chief of the Kaskaskias. His X mark.
PETAGUAGE, or MICHAEL
(being baptized), a Chief of the Kaskaskias. His X mark.
MAUGHQUAYAH, or JOHN BAPTISTE
(being baptized), a Chief of the Kaskaskias. His X mark.
COUROWAY,
a Chief of the Kaskaskias. His X mark.
KICOUNAISA, or FISH,
a Chief of the Kaskaskias. His X mark.
TONTOWARAGANIAH, or PETER
(being baptized), a Chief of the Kaskaskias. His X mark.
MAUGHQUINTHEPE, or BLACK DOG,
a Chief of the Pewariahs. His X mark.
ACHISWEWAH,
a Chief of the Pewariahs. His X mark.
ESCHAWINKIWAH,
a Chief of the Pewariahs. His X mark.
MEINQUIPAUMIAH,
a Chief of the Cahouquias. His X mark.

Sealed and delivered in the presence of us. The word (thousand) in the twenty-eighth line of the first page being first written upon an erasure. The word (course) in the fifteenth line and the word (Murray) in the twenty-eighth line of the second page being first interlined; and also (Meinquipaumiah), the last subscribing chief of the Cahouquias, his name was first interlined in two places in the first page, and the same chief's name was also interlined in three places in the second page of these presents before signing.

Sealed and delivered in presence of us. All the foregoing interlineations, erasure and writing on the erasure being first made, the considerations in the above written deed-poll being also delivered in our presence to the said chiefs, the said deed was translated or explained by Richard Winston in French to Michael Dannee, an inhabitant of the said village of Kaskaskias, and to Piero Bloit, Indian interpreter for the Crown, who explained and interpreted the same to the said Indian chiefs in council. The said Michael and Piero Bloit, interpreters, cannot write their names.

French Interpreter.

KASKASKIAS, *Illinois Country, ss.*

Personally appeared before me, Richard Winston and Michael Dannee, of the country aforesaid, inhabitants, and Piero Bloit, Indian interpreter for his Majesty at this place, who, being solemnly sworn upon the Holy Evangelists, do depose and say as follows, viz.: The said Richard Winston deposeth and saith that he acted as French interpreter during the negotiation of the purchase of the lands in the foregoing deed-poll, bounded and described; that he, the said Richard Winston, did, to the best of his knowledge and understanding, faithfully interpret and explain in the French language, to the said Michael Dannee and Piero Bloit, the purport or tenor of the aforesaid deed-poll, the considerations therein expressed, the boundaries of the lands thereby bargained and sold to the grantees therein named, and was a subscribing witness to the executing of the same deed, as well as present at the delivery of the consideration in the said deed mentioned. The said Michael Dannee and Piero Bloit depose and say that they both acted as Indian interpreters in the said transaction; that they, to the best of their knowledge and understanding, did faithfully interpret and explain to the several chiefs whose marks are affixed to the foregoing deed grant, the purport of the same, as it was interpreted or explained to the deponents in the French language by the said Richard Winston; that the said Michael Dannee and Piero Bloit were present at the executing the aforesaid deed or grant, but that they cannot write their names.

RICHARD WINSTON,
MICHAEL DANNEE, His X mark.
PIERO BLOIT, His X mark.
HUGH LORD,

Captain Eighteenth Regiment, Commandant Illinois Country.

FORT GAGE, July 20, 1773.

Enregistre au Livre V., en mon etude, aux Kaskaskias, pages 21, 22, 23, 24, 25, 26, 27, 28, et 29. Deuxieme Septembre, 1773.

VIERAULT LEMERANCE, *Notaire Public.*

According to the terms of the above document, land enough (about one-half of Waukesha County was supposed to have been included in the tract), for two goodly States was bargained away for a canoe-load of "truck."

FIRST SETTLEMENT OF WAUKESHA COUNTY.

The precise date of civilized man's first visit to Waukesha County is not and never can be known. A man named Vieu, Solomon Juneau's father-in-law, visited Prairie Village and Mukwonago in 1804-05. He was a trader, to whose business Mr. Juneau succeeded. In 1817, Samuel A. Starrow was in Pewaukee, Brookfield, Menomonee, and probably Lisbon and Berlin. But none of these visits were of long duration. The first resident, of whose doings there is any certain account extant, was Aumable Vieau, Solomon Juneau's brother-in-law, now a resident of Muskego. As nearly as he can recollect, he was sent by his father to Prairie Village in 1827, to trade with the Pottawatomies, then the sole occupants of this vicinity. Here he remained about two years, and, during that time, never saw any person but the Indians. When, therefore, his father came, he found he had lost his language—the French—and could only converse in Pottawatomie, with which his father was also familiar.

The Indians, at that time, were exceedingly hostile toward the whites, and all that saved the Vieaus from assassination was the fear amongst the tribe that any violence toward their French friends would cut off the supply of ammunition, calico, beads and tobacco. Mr. Vieau's home, while with the Pottawatomies, was not far from what is now known as the Mineral Rock Spring, in Waukesha Village. They had a very large village at this point, one at Pewaukee and one at Mukwonago. Mr. Vieau lived with them entirely. He not only sold goods for his father, but went from place to place to collect of the Indians, thus learning nine tribal languages, all of which he understood perfectly and spoke fluently. The traders granted the Indians credit, some to the value of \$10, some \$25, some \$100, and some as high as \$500, and, says Mr. Vieau, they always got their pay. This pay it was particularly Mr. Vieau's business to collect, which he did by taking various kinds of skins. He could have had any amount of land anywhere in Waukesha County, as the Pottawatomies would have willingly given him all he wanted; but the idea that the country would ever be settled by the whites, or that the Indians would so soon disappear, or that the land would ever be valuable, never occurred to him at that time.

Mr. Vieau visited all the principal points in Waukesha County during several years. But these visits, even though lengthened into years, can by no means be properly termed settlements. The parties mentioned did not intend to make Waukesha their home; did not even come to look for land.

The first persons to enter the county, after due deliberation, with the intention of cultivating the soil and establishing homes, were Morris D. and Alonzo R. Cutler, who arrived at Waukesha, probably, about the 7th of May, 1834. A young man of the name of Henry Luther, who worked for the Cutlers by the month at La Porte, Ind., accompanied them in the same capacity to Waukesha on their first visit, but never became a permanent settler. A local historian thus describes the journey of these three:

"Their journey to Milwaukee was not a pleasant one, for roads were unknown in those days. The settlers' houses had not yet been established so as to answer the purposes of inns to weary emigrants. They journeyed on horseback, following the shore of the lakes, bivouacked wherever night overtook them, taking their food from their knapsacks and making their beds with the blankets which were fastened to their saddles. When they turned inland from Milwaukee, they found a delightful change from the monotonous scenery of the lake. Oak openings were spread over the undulating surface of the ground, and at the feet of these monarchs of the forest, there was no undergrowth of tangled brush to obscure the view or to impede the progress of the travelers. The green grass of the prairie received the shimmering sunlight through the leaves above, and clumps of wild roses and prairie-flowers of a hundred hues added

the beauty of infinite variety to the prospect. Now and then the loftier heads of tamaracks would indicate the marshy ground which they must avoid, but these did not occur so often as to excite fears regarding the salubrity of the new country. We can well imagine that, when these three youths had reached the eminence overlooking the magnificent valley of the Pishtaka (or Fox River), they considered it as nearly a realization of an earthly paradise as was likely to be attained through years of wandering. Far over the hills in every direction appeared the soft, velvety green of the oak trees, while at one side of the amphitheater at their feet was spread out a little prairie on which only an occasional tree relieved the monotony of the wild grasses and flowers. Near the foot of the western bluffs, the serpentine Pishtaka sparkled at intervals through the overhanging verdure, and a dozen miles away appeared the lofty range of Delafield Hills, blue and dim in the distance. Near them were clumps of hazel-bushes, on which the pale-green buds gave promise of a plentiful harvest of nuts, and the myriads of strawberry-blossoms at either hand awakened thoughts of luxurious repasts in the near future. The smoke rolled lazily up from Indian encampments for miles along the river, and to the hospitality of the wandering Pottawatomies our travelers were glad to entrust themselves, while they pursued their investigations with more minuteness."

The Cutlers at once blazed out their claims on the east bank of the Fox River, one of which embraced the water power. In fact, the rapids at this place, which, with the then far more liberal flow of water, were mainly instrumental in stopping the young "Hoosiers" at Waukesha, for the stream at that time promised to become a valuable piece of property for manufacturing purposes. The Cutlers at once began the erection of two "claim shanties," one, perhaps, between Blair's machine shop and the post office, and the other near the site of Morris D. Cutler's present residence. The immediate surroundings were thickly covered with hazel brush and a tangle of other small trees, with here and there a large oak. The house nearest the river, erected for Alonzo R. Cutler, was finished a few days before the one on Morris D. Cutler's claim. This was the first settlement, these two the first settlers, and these the first claims made in Waukesha County. As the centuries roll on, and all vestiges of primitive Waukesha County are crushed out and polished away by the half billion people who will inhabit the United States before they are as old as China, let it never be forgotten that the two brothers, Morris D. and Alonzo R. Cutler, the former being still a hale and active resident of the village of Waukesha, were the first settlers of Waukesha County. The honor, however, of being the pioneer settler, mostly belongs to Morris; for, while his brother only remained a few years, he has resided upon his first claim over forty-six years, and intends to end his life upon the same spot. He is put down as an "odd character," and he certainly is the possessor of numerous eccentricities. During the first years of his residence in Waukesha, Mr. Cutler went bare-footed and bare-headed in summer, and he frequently had no boots for winter. In place of boots or shoes he wore cloth moccasins—without stockings—made in his own rude way. He frequently labored all day in the open air of the coldest winter weather with "overalls" for pantaloons, and a single shirt for coat, vest and overcoat. Thus he earned the reputation, among the other pioneers, of being "tougher than a biled owl." Mr. Cutler is still straight, broad-shouldered and bony, though past the allotted three-score and ten years, and no day passes that he does not perform more or less manual labor. The *Real Estate Journal*, whose editor has known Mr. Cutler forty-four years, contained the following sketch in January, 1879:

"His wealth has not been obtained by speculation or by taking any chances whatever, but by buying 160 acres of land of the Government at \$1.25 per acre, platting it into village lots, and, at first, selling them at a low price, very frequently receiving nothing in advance; but there was always an obligation behind to build on lots so sold, thus enabling many a poor man to make a home for himself in a very short time. Of course, some never paid up the principal or interest, the property thereby reverting back to the original owner; but no man can say that Mr. Cutler ever took advantage of his position to distress one living being. On the contrary, he has very often been imposed upon by his leniency. We believe it is a fact that cannot be contradicted, that he has never foreclosed a mortgage on any property he ever sold in Waukesha.

A good many of our people call Mr. Cutler penurious, declaring he never gives anything to any object. That is because they do not comprehend his motives. He gives more to the poor every year than all the rest of the people in Waukesha. He never gives to an object simply because some one has solicited aid from him. He does things in his own way, and takes his own time for it. None can say that Mr. Cutler has not done a good deal for Waukesha—more than any one or half a dozen men that are reputed to be well off. ‘Well,’ say they, ‘he has no one to care for, and can afford to give to almost every object that is presented to him.’ What he has he honestly earned, and no man has a right to say how or in what way he shall dispose of it. He has made valuable donations to Carroll College, to most of our churches (in the way of lots, or by selling at reduced prices), and many a family can attest to his generosity. His good old father, now ninety-seven years old, was at his house less than one year since, and, being acquainted with him, we called upon him, and, after some conversation, he said: ‘How is Morris getting along here, where he is dealing with so many that have bought property of him?’ Then he said: ‘I hear a good account of him in one thing, and that is that he is good to the poor.’

“Strangers who come to our village and look over Mr. Cutler’s beautiful grounds of some seven acres are apt to cultivate his acquaintance; they spend hours and hours with him, talking about the early days of his sojourn in Waukesha. The Indians with the three beautiful mounds in his park are subjects of animated conversation. Strangers invariably ask him who built those mounds, and he as invariably says: ‘I and the Indians built them, and we buried old Chief Waukesha in the large one and his two squaws on each side in the smaller ones. The small ones are called his right and left hand supporters.’

“Mr. Cutler began to make his park, the first year he came here, by planting trees, which he has kept up until the present time. He has a mania for trees. He has now some twenty-five or thirty different varieties in his park, and some day not far distant it will be a lovely place; it now beats anything that we have seen in the West, taking the location into account. A great many persons ask Mr. Cutler what he is going to do with such a nice park, and why he does not improve it. He almost invariably tells them ‘that he is going to sell it, or get him a young wife and occupy it himself.’ ‘Well, how much do you ask for it?’ ‘Oh, I don’t know, how much will you give?’ In this way he draws out people to get their views of the value of the property in their estimation. There are a good many people, who have known him for years, who think he is not very shrewd; but let these people undertake to make a trade with him, and they will find he knows all about the value of property, and can give his reasons for it. He never makes a trade because somebody wants him to. He never gives anything because somebody asks him to. He has a mind of his own on all subjects, and is able to maintain his position, and therefore has a strong individuality. He thinks for himself, and talks and acts for himself. Such men always succeed. He is a very quiet man, minds his own business, and is kind to those that have respect for him. All good citizens who are honest and mean to do right, and are prompt with him, can get most any favor they ask for; but if they deceive him, it is all day with them. Still, he has a kind and forgiving spirit toward those who have wronged him.

“He is from a long-lived family, and his habits are correct in eating, drinking and sleeping. He will, no doubt, live to a good old age. He was once married and had a most estimable woman, who was beloved by all who knew her; she died some eighteen or twenty years since. Mr. Cutler has always had the name of being economical in everything that pertains to this life. Sometimes we have thought he did this to be odd, but we long ago learned that it was from habits that he had formed in an early day in this then new country. Everybody then was obliged to live close, and very often on short rations. This saving has grown with his growth and strengthened with his strength, so that we expect he will live and die with those same habits of honesty and industry. He will leave a very large property to somebody. He has no family.

“We have given our views of Mr. Cutler (imperfectly), because we believe it due to our oldest inhabitant that something should be said that will make us remember him, perhaps more vividly in the future, and, maybe, after he is dead and gone.

“It would be strange if Mr. Cutler did not have some enemies; but he has as few as any man we ever knew. No one doubts his good intentions, and it is proverbial in Waukesha that his word is as good as his bond.”

These pioneers were all the inhabitants, except the Indians, that what is now Waukesha could claim during the year 1834. They returned to Indiana during the cold months of the winter of 1834-35, but came back early the following spring, bringing additional stock, farming utensils, and several other families.

This, briefly, is the story of the first settlement in what is now Waukesha County. Subsequent settlements, which were first in their respective localities, will be found in the various town histories.

GOVERNMENT LAND DISTRICTS AND OFFICES.

By the end of 1833, a large amount of the public land in what is now Southern and Eastern Wisconsin had been surveyed, and the fact being duly reported by the Surveyor General, Congress, by an act approved June 26, 1834, created two land districts. They embraced all that tract north of the State of Illinois, west of Lake Michigan, south and southeast of the Wisconsin and Fox Rivers, included in the then Territory of Michigan. It was divided by a north and south line, drawn from the northern boundary of Illinois, between Ranges 8 and 9, to the Wisconsin River. All east of that line was called the Green Bay Land District; all west, the Wisconsin Land District. Within the first-mentioned district was included the present county of Waukesha. A land office for this Eastern District was established at Green Bay, which was duly opened by the Government, and a notice given of a public sale of all the then surveyed public lands lying therein. In accordance with this announcement, a sale took place at Green Bay in 1835. So far as known, not an acre of land within the limits of Waukesha County was disposed of at this sale. As the southern and eastern portions of the State were settling much more rapidly than any others, and as it was becoming obviously unjust to compel settlers to journey to Green Bay to make entries, the Territory was divided into three districts, —the Green Bay, Mineral Point and Milwaukee, with offices at each of those points. The Milwaukee District was bounded on the south by Illinois; on the east by Lake Michigan; on the west by Range 9 (near a line passing north through Madison); and on the north by the south line of Town 11 (just south of Port Washington, Juneau and West Bend). In this district the first public sale took place in 1839.

CLAIM COMMITTEE AND LAWS.

In early days, there were no laws in Waukesha County, except those the settlers brought with them, or agreed to abide by as emergencies arose. The laws most urgently required were such as would protect settlers, not simply against speculators, or land-snarks, as they were called, but against the encroachments of each other. The lands had not been surveyed, nor offered by the Government for sale; any person, therefore, had a right to “squat” wherever fancy led him. But as, in the absence of laws and legal boundaries, several parties might claim the same tract or building site, the settlers mutually agreed to abide by certain claim laws, improvised by themselves. Many of these laws were never even committed to paper; but they were well known and thoroughly understood, and it was an unlucky hour when any settler broke the least of them. In fact, so far as Waukesha County is concerned, disobedience to claim laws was almost wholly unknown.

The Claim Committee consisted of John Manderville, the first Justice of the Peace, and one of the very early settlers, Nelson Olin and Israel W. Porter, who held claim court for trying cases in the same manner as any other case would be tried before a court and jury, adjusting all contests in Milwaukee (which included Waukesha) County. If their decision was not satisfactory, an appeal could be taken to Milwaukee, where a Claim Committee for several counties resided, and the decision of this committee was final. But few disputes came before this committee for settlement, the most important one being that in which Messrs. McMillan and Sargeant

claimed the tract on which the Cutlers had erected the first house built by the whites in the county. It was finally settled by the Cutlers agreeing to pay a certain sum to the claimants, after a contest lasting several days.

To illustrate the tricks resorted to for the purpose of securing land, may be mentioned the case of a New Englander, or Yankee, who found a claim had been made on a piece of land which he especially desired to secure. He, therefore, sent his wife in the night to Milwaukee, where she took several baskets of potato plants, which were two or three inches in height, from a garden near that village. While she was accomplishing this, her husband plowed and harrowed a patch on the coveted tract, and before morning, potatoes three inches in height were growing in the apparent usual thrift upon it. The real owner was amazed when he discovered the magic transformation, and was at a loss what course to pursue. He insisted that he was on the potato-patch one or two days before, and the land had not even been plowed. This, in the face of the rows of lusty potatoes, was difficult to believe. The wronged settler saw it, and was grieved accordingly. Finally a pioneer, who afterward became a noted and successful politician, took a spade and began to dig on the potato-patch, giving no reason for his course. In a few minutes, the spade turned up the under or grass side of the sod, and behold! the grass upon it was as fresh and green as that of the prairie surrounding the patch! The sod had not been turned long enough to cause the grass to become yellow. The rightful owner of the soil dug thirty-one bushels of potatoes from that patch in the fall, for next day the Yankee who attempted this novel trick was not to be found in the neighborhood. He moved to a neighboring county, and became a wealthy and respected citizen. His name may be read in the "Blue Book," as a member of the Legislature of Wisconsin, several years ago.

The extreme sturdiness with which the pioneers stood by each other and upheld the cause of right, in the days when there was no law but the underlying principles of the golden rule, is worthy of the most sacred preservation. The brief mention of a single case will suffice to illustrate:

In what is now one of the richest towns in Waukesha County, a poor man had built a cabin on a desirable claim which was not taken at land sale. A gentleman who afterward became honorable and prominent in the civil and political affairs of the county, came to that section to settle, and signified his intention to purchase the tract on which the poor man, with his large family and sick wife, was struggling along. The neighbors told him not to do it, as pioneers always stood by each other, and it would not be safe for him to turn the family out of house and home. A deputation also went to Milwaukee and informed the late Rufus Parks, then in the Land Office, of the circumstances, and requested him to persuade the stranger not to purchase the coveted tract from under a poor man's sick family, as it would certainly result in trouble.

The stranger replied that he knew his rights as an American citizen, and demanded to have a patent of the land. Mr. Parks remonstrated, but could do nothing else, as the money was tendered by the indignant stranger.

As soon as the land was bought, the neighbors—and any one within a radius of twenty-five or thirty miles was a neighbor in those days—held a meeting to decide what should be done. Some were for lynching, some for tar and feathers and some for running him out of the country under a lash. Finally, after many serious threats and determined efforts to carry them out, the law-and-order folks prevailed and a conservative plan was adopted. The settlers resolved to have nothing whatever to do with the "hard-hearted new-comer," as they called him. The wagon-maker resolved not to repair the stranger's wagons; the blacksmith, not to shoe his horses; the merchants, not to deal with him—in short, he was to be totally ignored and shunned in every possible way by everybody. At these resolutions the stranger laughed jeeringly. In the mean time, four big-hearted settlers gave each five acres of land on the joining corners of their farms, thus making a fine little farm of twenty acres, enriched and sanctified by such whole-souled generosity as the county will never see again, for the poor man and his family; and, as a coronation to the good work, the neighbors clubbed together and built him a snug house.

Next came the business of ostracising and freezing out the stranger. The resolutions were all adhered to with crushing rigidity, and, in addition, his children had no playmates at school; were scorned and taunted with the sins of their father, and no one offered seats to the family at church or recognized them in any manner.

This went on for a time without much apparent effect. Finally, the gentleman began to bow and speak to his neighbors as he met them, attempting to win the friendship, if possible, of some one. But all efforts in that direction, however polished and persuasive, utterly failed. At last, wholly unable to bear up longer under the ostracism that was all the more crushing in those days of generosity and unlimited warmheartedness, he sent for two or three neighbors. They came. "I can live no longer like this," said the haggard pioneer. "My children refuse to go to school; my wife is in tears and utter loneliness, and I—I—well, I am no better off. I now see I did wrong by the poor man who had claimed this land, and I am willing to make amends. I can see in these noble-hearted men, who have stood by him like brothers in his hour of need, such qualities as I do not wish to leave behind. I am determined to stay with you. Pay back the original sum the land cost me and I will give it up, more than cheerfully, and make me a home somewhere else near by."

The neighbors saw he was penitent, was a man of ability and would make a good citizen. He had made a mistake in attempting to override the unwritten pioneer laws; was sorry, and ready to make amends. The matter was therefore adjusted; friendships established which lasted until death, and that stranger became afterward one of the good citizens and respected and honored public officials of the county, holding several high positions of trust.

His name would not be dishonored in the use of this case to illustrate the noble qualities of the men who left behind all the comforts and luxuries of civilization, to turn the wilderness into a garden, for his after-life blotted out the wrong done when he attempted to go to the limits of the laws of the United States, but break those of the pioneers, and he forever after was a true friend to those in sorrow or need.

LAND SALE.

To the settlers who held claims, or occupied lands in Waukesha County previous to 1839, the land sale was the most important event in their history up to that time. A comparatively large number of claims had been taken—that is, shanties had been built on lands marked out as near with the four cardinal points of the compass as the rude appliances of the time would permit, and bounded by "blazed" trees or stakes. These boundaries were respected among themselves by the actual settlers; but not by the "land-sharks," as the speculators were called. These sharks, unless prevented by some united action on the part of the actual settlers, could make such claimant "bid up" his land to a high figure, or lose it together with all the improvements he had made, perhaps through the greatest sacrifices. Many of the settlers understood, from costly experience, the manner in which the sharks had operated in other States, which was like this: Some of them did not have a dollar with which to back their bids. This class would go to a settler and say they had fixed upon bidding off his claim, no matter how high the bidding might be carried; but if he would pay them \$100, or some other sum then and there, they would not molest him. Hundreds of settlers came to such terms as these, thus putting thousands of dollars into the pockets of a set of men rightly named sharks, and rendering many of the claimants unable to pay for their lands. Those who were financially disabled in this manner, as well as others who could not command sufficient cash to pay for their lands, engaged to pay from 25 to 50 per centum interest, and more than half of this class lost their claims entirely and were compelled to start anew in another locality.

Other sharks who had the money added greater certainty to their nefarious business. They said nothing to the settler claimants, but always out-bid any one of them who had a particularly valuable piece of land, or had made such extensive and permanent improvements thereon as would make a forced abandonment of them disastrous. After they had outbid the settler, this class of

sharks went to each claimant and offered to make terms of abandonment, nearly always succeeding in getting large sums of money, a horse, or several head of cattle. This exasperating business was soon squelched by the settlers of what is now Waukesha County.

The land was offered for sale, as provided by law, to the highest bidder [provided, however, that no bid for less than ten shillings (\$1.25) per acre was entertained], on a platform in front of a building located pretty near the site of the present Custom House in Milwaukee.

Col. Morton, a Kentucky gentleman, was Register of the Land Office at Milwaukee, and offered the lands for sale, and the late Rufus Parks, who died at Oconomoc, was receiver and took the money. Each town appointed a "shark committee," consisting of several of the strongest and most fearless men in it, whose business it then became to look after the speculators, and also appointed a keen and trustworthy man who knew the location of all the claims in the town for which he was appointed, to do all the bidding. He took his stand near the Register, and when any claimed section or quarter was offered, would bid ten shillings for it, by direction of its claimant. The real claimant made no bid; but if any speculator or shark offered to run the land up above the lowest Government price, the "shark committee" would grab him and start for the river. He generally would withdraw his bid before going far; but if not, he was "doused" until he did. The settlers thus secured their lands at the lowest Government price, each town having a "bidder" and a "shark committee."

Land sale for what is now Waukesha County began the second week in October, 1839, and lasted until all the lands had been offered. "Specie," that is, gold and silver, was required to pay for lands, except that Illinois bank bills had been declared "land-office" money, and were received in payment for lands.

Mr. Cutler, father to M. D. Cutler, of Waukesha, the oldest settler in the county, brought \$10,000 of this money from La Porte, Ind., to help his son and any friends who had settled in this county, in case the land sharks made a fight. This large sum, for those days, was not needed, as the "shark committees" of the various towns proved far more effectual and infinitely less expensive.

PIONEER HARDSHIPS AND PLEASURES.

The term "early settler" carries only one idea to the marionettes of modern fashion and civilization, and that is an erroneous one. They believe it to be the condensation into two words of the history of a long fight with stumps, stones, wild beasts, Indians, poverty and sometimes want. "Pioneer" is not the synonym for terror and suffering—not the condensed definition of isolation from enjoyment, happiness and social pleasures. But, however desirous the historian may be to preserve all the rich details of pioneer life, that erroneous ideas may be corrected and the foundation and beginning of all civilization and wealth pictured for the future in their true colors, he will find his task a difficult one. Newspapers were either entirely wanting, or of small proportions; no books were making; no child of genius and leisure was taking notes and making histories. Events, great and small, transpired and dropped into oblivion without being recorded, except such outlines of them as might chance to be impressed, perhaps, without date or detail, upon the minds of a few, only to be soon afterward erased beyond recall, as years rolled on and other events crowded upon the failing faculties. But whatever there is should be sacredly preserved, as the foundation of all the history of ages yet to come must begin with and rest upon it.

The youths of to-day—some of them born in luxury and reared in idleness—as well as the more sturdy men of business and the lovers of romantic facts in history, will love to delve in pioneer records, however incomplete they may be; for they have a charm no person can describe and no reader fail to appreciate. By their light, imagination can follow where the actual foot-steps of the dwellers in more advanced civilization never can. No matter how long this world may swing on and Waukesha remain a prosperous community, no one within its borders to-day or hereafter can be a pioneer in the sense in which the term is here used. Pioneerism is forever and forever finished in Waukesha County. By its light, however, the historian can guide his

readers back to the unadorned domain of the early settler, and watch the struggle necessary to make "the wilderness blossom as the rose." We can sit by his cabin fire, partake of his homely but cheerfully granted fare, and listen to the accounts which he is pleased to give us of frontier life, and of the dangers, trials, hardships and sufferings of himself and others in their efforts to make for themselves homes in regions remote from civilization, and unexplored hitherto save by wandering Indians and the beasts of the forests and prairies. Through these ancient records, we make our way along to the present. From small beginnings, we come to the mighty achievements of industry, the complex results or daring enterprise, subduing and creative energy, and untried perseverance; but all resting upon the labors of the brave few who broke the first glebe, felled the first tree, built the first cabin and first made friends with the Indian occupants.

The first important business of the pioneer settler, upon his arrival in Waukesha County, was to build a house. Until this was done, some had to camp on the ground or live in their wagons—perhaps the only shelter they had known for weeks. So the prospect for a house, which was also to be a home, was one that gave courage to the rough toil, and added a zest to the heavy labors. The style of the home entered very little into their thoughts—it was shelter they wanted, and protection from stress of weather and wearing exposures. Many a poor settler had neither the money nor even mechanical appliances that are considered absolutely necessary, to-day, in such undertakings, for building himself a house. He was content, in most instances, to have a mere cabin or hut. Some of the most primitive constructions of this kind were half-faced, or, as they were sometimes called, "cat-faced" sheds or "wike-ups," the Indian term for tent or house. It is true, a "claim shanty" was a little more in the shape of a human habitation, made, as it was, of round logs, light enough for two or three men to lay up, about fourteen feet square—perhaps a little larger or smaller—roofed with bark, clapboards, and sometimes with the sods of the prairie, and floored with puncheons (logs split once in two, and the flat side laid up) or with earth. For a fire-place, a wall of stones and earth—frequently the latter only, when stone was not convenient—was made in the best practical shape for the purpose, in an opening in one end of the building, extending outward, and planked on the outside by bolts of wood notched together to stay it. Frequently a fire-place of this kind was made so capacious as to occupy nearly the whole width of the house. In cold weather, when a great deal of fuel was needed to keep the atmosphere above freezing point—for this wide-mouthed fire-place was a huge ventilator—large logs were piled into this yawning space. To protect the crumbling back-wall against the effects of the fire, two back-logs were placed against it, one upon the other. Sometimes these were so large that they could not be got in except by attaching a rope or chain by a "half-hitch" to one end of them and all hands, with a tug and a shout, uniting their strength to drag the source of future warmth into position.

For a chimney, any contrivance that would convey the smoke out of the building would do. Some chimneys were made of sods, plastered on the inside with clay; others—the more common, perhaps—were of the kind we occasionally see in use now, clay in sticks, or "cat in clay," as they were sometimes called, but of proportions as ample as an old-fashioned "bed-sink." Imagine, of a winter's night, when the storm was having its own wild way over this almost uninhabited land, when the wind was roaring like a cataract of cold over the snowy wilderness, and the settler had to do his best to keep warm, what a royal fire this double back-log and well-filled fireplace would hold! It was a cozy place for smoking, provided the settler had any tobacco; or for the wife to sit knitting before, provided she had any needles and yarn. At any rate, it gave something of cheer to the conversation, which very likely was upon the home and friends they had left behind when they started out on this bold venture of seeking fortunes in a new land, or whether the rocking cabin would survive the frozen hurricane.

The stair-case that led to the chamber, or garret, more properly speaking, was either rude wooden pins driven in the logs which constituted the side of the house, or a still ruder ladder, made by splitting a sapling and inserting into the two halves, rounds of smaller saplings. The garret aforesaid was frequently only high enough to accommodate a person on his hands and knees, with a floor, perhaps, made of poles, or the sides and bottom of the wagon box, which had to be

removed every time the wagon was used. It was not unfrequently the case that the women were compelled to mount such a stairway and sleep in such a chamber.

During the first summer, doors and windows were generally mere openings, without frames or glass, blankets or sheets serving to guard the door and at night, to obstruct the glances of the Indians and the entrance of the mosquitoes. The first door was generally hung on long wooden hinges; opened by a wooden latch and string—the latch-string always hanging on the outside to indicate welcome and hospitality—and fastened by a wooden pin, while more than one window in Waukesha County has had white cloth or greased paper as a substitute for glass.

As to furniture, the variety was as great as the skill which produced it for the different cabins. But what a contrast there would be, were the contents of the most amply furnished house of 1835 or 1836 placed by the side of the contents of the elegant homes of 1880! Not much furniture could be bought at first, and still less was for sale in the earliest days of the settlement of the county. Substitutes for tables and chairs were easily made of split logs—the flat side up—with small saplings for legs; occasionally, however, the door was taken from its hinges for a table, when the settlers “had company,” and re-hung when the meal was finished.

A “prairie bedstead” was made by placing poles on a crotch, and into the opening between the logs. When skillfully made, such a bedstead was by no means uncomfortable, after the thrifty housewife had spread her tick, filled with marsh hay or dried prairie grass, upon it, and added the well-filled, home-made bed of feathers. Sometimes this primitive place of repose, where sleep was as sweet as in the richest chambers of to-day, was hidden by gingham curtains, or by an extra sheet; but more frequently neither were to be had, and the tallow dip was snuffed out before the household disrobed for the night's rest.

As soon as the cabin was put into such shape as would make it tolerable shelter, it was left to be decorated or cared for by the wife, while the men began to prepare the soil for the production of the necessaries of life.

The first year's farming consisted mainly of a “truck patch,” planted in corn, potatoes, turnips and other vegetables. Generally, the first year's crop fell far short of supplying even the most rigid economy of food. Many of the settlers brought with them small stores of such things as seemed indispensable to frugal living, such as flour, bacon, coffee and tea. But these supplies were not inexhaustible, and once used were not easily replaced.

When food was scarce, the period intervening between one harvest and another was a long one. Wild game, usually caught by rude trap contrivances, or shot when gun and ammunition were at hand, was the principal source of meat, which, with the excellent fish, was better than an unlimited supply of salted meats. Corn produced more abundantly than wheat in the earlier years; but even when corn was plentiful, the preparation of it was the next difficulty in the way. The mills for grinding it were at such long distances that every other device was resorted to for reducing it to meal. Some grated it on an instrument made by punching small holes through a piece of tin or sheet-iron, and fastening it upon a board in concave shape, with the rough side out. Upon this the ear was rubbed to produce the meal. But grating could not be done when the corn became so dry as to shell off when rubbed. Some used a coffee mill for grinding it; and a very common substitute for bread was hominy—a palatable and wholesome diet—made by boiling corn in a weak lye till the hull or bran peeled off, after which it was well washed to cleanse it of the lye. It was then boiled again to soften it, when it was ready for use, as occasion required, by frying and seasoning it to the taste. Another mode of preparing hominy was by pestling. A mortar was made by burning a bowl-shaped cavity in the end of an upright block of hard wood, into which, after it was thoroughly cleansed of the charcoal, the shelled corn was placed, and crushed by a heavy club or an iron wedge. But “hulled corn” was oftenest prepared, as lye, for removing the hull or skin, was easily made and the product was really delicious, as it is to-day.

Not the least among the pioneer's tribulations, during the first few years of the settlement, was going to mill. The slow mode of travel by ox teams was made still slower by the almost

total absence of roads and bridges, while such a thing as a ferry was hardly ever dreamed of. In dry weather, common sloughs and creeks offered but little impediment to teamsters; but during floods, and the breaking-up of winter, they proved exceedingly troublesome and dangerous. To get stuck in a slough, and thus be delayed for many hours, was no uncommon occurrence, and that, too, when time was an item of grave import to the comfort and sometimes even to the lives of the settlers' families. Often a swollen stream would blockade the way, seeming to threaten destruction to whoever would attempt to ford it.

With regard to roads, there was nothing of the kind worthy of the name. Indian trails were common, but they were unfit to travel on with vehicles. They were mere paths about two feet wide—all that was required to accommodate the single-file manner of Indian traveling.

Only a few settlers ever attempted to go beyond Bigelow's mill, at Eagle, for grists, flour costing higher, after paying the exorbitant tolls and other necessary expenses, than it did by the barrel from Green Bay or Milwaukee. Bigelow's grist-mill was the first one erected in the county, or in a section of country extending many miles in all directions; it therefore had plenty of business. The stones were hardly as large as an ordinary pail; were made by Mr. Bigelow himself, and ground very slowly; but Mr. Bigelow had a son, and sometimes other help, and kept the mill running night and day. This plan by no means kept the miller ahead of his customers, and it was nothing for them to wait three, or even six or more days for a grist. After the settler had made his toilsome journey with an ox team, and was rejoicing that he would soon be on his way home with a supply of the wherewith for bread, it was a disheartening shock indeed to be told that his turn would come in a week from that, or the next day. He must either remain at the mill or return home, thus making four journeys over the bridgeless roads—alternatives in which it was difficult to choose for the best. Thus, milling trips were attended with an expense, in one way or another, that rendered the cost of breadstuffs extremely high. If made in the winter, when more or less grain-feed was required for the team, the load would be found to be so considerably reduced on reaching home that the cost of what was left, adding other expenses, would make their grain reach the high cash figure of from \$3 to \$5 per bushel. Sometimes half of the grist was taken for toll; nearly one-half of the balance eaten by the team, and the settler would return with his purse nearly or quite emptied of its scanty contents, in hiring the miller's son, who for some years was not supposed to be more than an ordinary hired man, to run the mill over night. The Territorial statutes fixed the amount of toll millers might take for grinding, in Milwaukee County, of which Waukesha formed a part, and this was the miller's trick to secure three or four times as much as the law allowed—any amount, from one to three dollars, according to the size of the poor settler's purse, being charged for allowing the son to run the mill by night.

After all this trouble and expense, the good housewife did not always have white, clean flour returned to her. Owing to the lack of proper means for thrashing and cleaning wheat, it was more or less mixed with foreign substances, such as smut, dirt and oats. As the time will come when the settler's methods of thrashing and cleaning may be forgotten, it may be well to preserve a brief account of them here. The plan was to clean off a space of ground of sufficient size, and, if the earth was dry, to dampen it and beat it to render it somewhat compact. The sheaves were unbound and spread in a circle, so that the heads would be uppermost, leaving room in the center for the person whose business it was to turn and stir the straw in the process of thrashing. Then, as many horses or oxen were brought as could conveniently swing around the circle, and these were kept moving until the wheat was well trodden out. After several "floorings" or layers were thrashed, the straw was carefully raked off and the wheat shoveled into a heap to be cleaned. This cleaning, before the days of fanning-mills, was done by "winnowing"—pouring the grain from a measure, or "pan" made for the purpose, while standing on a stump or block, thus allowing the wind to blow the chaff from the falling stream. This process was not equal to that in vogue at present, as it failed to separate from the grain any cockle, dirt or heavy seeds, and the bread was not only occasionally dark-colored, but tasted pretty strong of seeds not considered palatable. How would some of the snug and comfortable

Waukesha County farmers of to-day appear thrashing and winnowing a thousand bushels of wheat by the process in vogue forty years ago?

Among other things calculated to annoy and distress the pioneer, was the prevalence of wild beasts of prey, the most numerous and troublesome of which was the wolf. While it was frequently true, in a figurative sense, that it required the utmost care and exertion to "keep the wolf from the door," it was almost always as true in a literal sense. There were two species of these animals—the large black timber wolf, and the small gray wolf that usually inhabited the prairie. At first, it was almost impossible for a settler to keep small stock of any kind that would serve as a prey to these ravenous beasts. Sheep were not deemed safe property until years after, when their enemies were supposed to be nearly exterminated. Large numbers of wolves were destroyed during the early years of settlement. When they were hungry, which was by no means an uncommon condition with them, particularly during the winter, they were too indiscreet for their own safety, and would often approach within easy shot of the settlers' dwellings. At certain seasons, their wild, plaintive yelp or bark could be heard in all directions at all hours of the night, creating intense excitement among the dogs, whose howling would add to the dismal melody. Attempts were often made to capture the wolf with the common cur, but this animal, as a rule, proved himself wholly unreliable for such service. So long as the wolf would run, the cur would follow; but the wolf, being apparently acquainted with the character of his pursuer, would either turn and place himself in a combative attitude, or else act upon the principle that "discretion is the better part of valor," and throw himself upon his back in token of surrender. This strategic performance would make instant peace between these two scions of the same house; and not infrequently dogs and wolves have been seen playing together like puppies. But the hound was never known to recognize a flag of truce; his baying seemed to signify "no quarter;" or, at least, so the terrified wolf understood it.

Wolf stories—all true—might be related *in extenso*. In 1836, Isaac B. Judson, while on his way from Milwaukee to Prairieville, alone and in the night, was set upon by a pack of wolves of unusual fierceness. Fortunately, he had a large cloak for protection against cold, which, when the wolves became uncomfortably close, he would shake vigorously. This frightened them, and, during their momentary confusion, he would again take to his legs and thus gain a considerable distance. This programme was continued by Mr. Judson until he reached McMillan's hotel, where he fell exhausted. A warm fire and a bowl of warmer punch restored his well-exhausted strength.

Once, while on his way from Milwaukee to Prairieville on foot, in the night, E. S. Purple had a portion of the leg of a new pair of boots eaten away by wolves. No man who saved his own legs from the wolves, complained if he did lose the legs of his boots.

On one occasion, as late as 1841, a family in the town of Pewaukee left the log house alone during two days while on a visit, and, on returning after dark, found an old wolf and her whelps in possession. She had entered through an open door in the rear and had devoured a quantity of food, besides tearing into shreds for a nest several articles of clothing.

Smaller animals, such as panthers, lynxes, wildcats, catamounts and polecats, were sufficiently numerous to be troublesome; but some of them were also "game," and the settlers would not have had them all exterminated at one sweep, if that had been possible.

But pioneer life was not without its sunshine and pleasure. Those who could appreciate the beauties of nature were surrounded by such landscapes, verdure, lakes, streams, forests and blossoming prairies as no spot in the West could excel; those who loved fishing and hunting had ample opportunities for gratifying their passion, and, at the same time, of furnishing the table with delicious meats; the air was pure, fragrant and healthful, and there were none of the restraints of conventionality to circumscribe the actions or warp the social intercourse of the few unassuming settlers who were laying the foundations of future homes, prosperity and aristocracy. There is hardly an old settler living who does not say that, notwithstanding all the hardships and privations of the first years of his residence in the wilderness, he took more comfort then than now. There was no aristocracy then; no stiff-neckedness. One person was

considered as good as another, if he behaved as well, and nothing was known at first of neighborhood scandals and demoralizing social corruption. All were friendly, social, obliging and desirous of contributing to the mutual comfort, happiness and prosperity of each other. Exclaimed a pioneer of 1837 to the historian of 1880: "The days seemed longer, the sun shone brighter, sleep was sweeter, religious profession more earnest, dress more simple, the grass was greener, food tasted better, there was less elbowing, less kicking each other down, less gossip, less scandal, less idleness, less ill-health, fewer divorces, less codfish aristocracy, more virtue, more honesty, more good feeling and more unadulterated enjoyment forty years ago than now, and I do wish old times could be revived, if only for a month."

ORGANIZATION OF WAUKESHA COUNTY.

Although not as large as Milwaukee, Prairieville had become of nearly as great importance, politically, in 1845, and had become dissatisfied with "paying tribute and playing second fiddle to that mudhole on the lake," as one of the prominent citizens, who subsequently became Governor, put it, and action was taken to secure the erection of a new county, with the capital at Prairieville.

It is probable that Alexander F. Pratt first conceived the idea of forming a new county, though Andrew E. Elmore, of Mukwonago (now a resident of Green Bay), William A. Barstow and Alexander W. Randall, of Waukesha, were early advocates and agitators with him, of that scheme. There appeared some opposition in store for the plan of separation from the mother county, on the score of expense; but the following bill was prepared for the Legislature of 1846, by these men, which was submitted among the earliest of the session:

Be it enacted by the Council and House of Representatives of the Territory of Wisconsin:

SECTION 1. That it shall be the duty of the several chairmen of the several Boards of Supervisors, in the several towns in the county of Milwaukee, lying west of Range 21, in said county, to provide a separate box at the spring town elections of 1846, to be holden in said county, for the reception of votes for or against the division of said county of Milwaukee, and every elector qualified by law to vote for town officers in each of their respective towns shall have the right to vote for or against such division.

SEC. 2. All ballots or votes so received and counted shall have legibly written or printed thereon the words "for division," or "against division;" and all votes so received shall be counted, and returns thereof made to the Clerk of the Board of Supervisors for the county of Milwaukee, in the same manner and time as is now provided by law in relation to election returns for county officers.

SEC. 3. The votes so returned shall be canvassed by the Clerk of the Board of Supervisors of the county of Milwaukee, and the result of such canvass shall be certified to by said Clerk, and published, within two days after said returns are made, in one or more newspapers printed in said county.

SEC. 4. If a majority of the votes so returned shall be in favor of division, then, and in that case, from and after the time the result aforesaid should be published, all the district of country lying and being within the present limits of the county of Milwaukee, and lying west of a line running north and south between Ranges 20 and 21, in said county, be and the same is hereby erected, established and organized into a distinct county, by the name and style of Waukesha County. That it be organized for judicial purposes, and shall enjoy all the privileges of other counties in this Territory. It shall form a part of the Third Judicial District, and the courts therein shall be held by the Judge of said district, commencing on the third Monday of February, and third Monday of August.

SEC. 5. All process, appeals, recognizances or other proceedings commenced in the District Court of Milwaukee County, prior to the first day of January next, shall be prosecuted to final judgment and execution thereon, in the same manner they might or could have been, had not this act passed; and executions on any judgments heretofore rendered in said county, shall have the like force and effect, and may be executed and returned by the Sheriff of Milwaukee County, anything in this act to the contrary notwithstanding.

SEC. 6. That said county of Waukesha is by this act erected, established and organized into a distinct election district, and at the time now fixed by law for holding general elections in this Territory, the qualified electors of said county of Waukesha, at and from that time, shall be entitled to elect such members of the Legislative Assembly as a new apportionment may authorize, and, in case no new apportionment be made previous to the next general election, then and in that case said county shall at said general election elect one member of the Council and two members of the House of Representatives, who shall represent said county in the next Legislature of this Territory. The electors of said county of Waukesha shall at the next general election elect such county officers as other counties under the same government are authorized to elect, whose respective terms of service shall commence on the 1st day of January next, and continue in office for the term now prescribed by law for such officers in this Territory.

SEC. 7. In case the vote before mentioned determines a division of the county of Milwaukee, then and in that case, the several County Supervisors elected at the next April town election, within the limits of said county of Waukesha, shall meet at what is known as Vail's Hotel, in the town of Prairieville, on the second Monday of June next, at 12 o'clock M., and proceed to organize a Board of County Supervisors for the county of Waukesha. They shall elect a clerk of their board, and such other officers as may be necessary for carrying into effect the organization of the county; which officers so elected shall serve until their successors are duly elected and qualified according to

law. Said Board of Supervisors shall at said meeting, or at some subsequent adjourned meeting, procure for the use of said county suitable and convenient grounds for the location of the seat of justice, and provide for the erection of all necessary county buildings.

SEC. 8. That an act entitled "An act to provide for the removal of the seat of justice of the county of Milwaukee from the town of Milwaukee to Prairieville," approved February 24, 1845, be and the same is hereby repealed.

Approved January 31, 1846.

The original of the above bill was said to have been written by Alexander F. Pratt, some slight changes being made in the phraseology before it became a law, which was not accomplished without a struggle. The city of Milwaukee was building bridges, and wanted several more. The whole county, in those days, was taxed for the bridges at Milwaukee, a fact not relished by the western towns, but one which made the Milwaukeeans exceedingly anxious that the territory contributing to the improvement of their city should not be reduced in extent.

In the Legislature, from what is now Waukesha County, were J. H. Kimball, of Prairieville, and Curtis Reed, of Summit, in the Council; and Samuel H. Barstow, of Prairieville, Luther Parker, of Muskego, and W. H. Thomas, of Lisbon, in the Assembly. Of these, Curtis Reed and W. H. Thomas joined the Milwaukee delegation and opposed the division, while the others labored strenuously for it. The bill finally passed the Legislature only to meet with wider and fiercer opposition at the polls. The two factions organized for the fight as soon as the act was approved, and it is difficult to say who labored the most persistently or resorted to the most extraordinary electioneering measures—those who favored or those who opposed the proposed divorce. From the office of the *American Freeman*, at Prairieville, was issued a paper called the *Advocate*, favoring the division; while from the *Sentinel* office, at Milwaukee, was issued a no less able and vigorous sheet called the *Unionist*, opposing it. Both were widely circulated and eagerly perused, as they were what the people called "red hot." The *Advocate* was edited by Alexander F. Pratt, A. W. Randall, W. A. Barstow, and perhaps it had other writers. The other paper had such a shrewd manager as A. D. Smith, who opposed the division of Milwaukee County. When argument was exhausted, of which there was a goodly supply in favor of a division, personal abuse of the leaders of the respective factions was the main feature of these two publications. Prairieville was the headquarters for those who thought Milwaukee County should be divided; and Summit, strange to record, although in the district proposed to be set off from Milwaukee, became the headquarters of the opposition. The campaign was one of extreme excitement and acrimoniousness. Finally, after about one-half of the residents of the county had become enemies to the other half, the day for voting arrived, when the excitement reached fever heat. Every known means was resorted to in the frantic attempt to secure votes. A wagon-load of roughs from Milwaukee arrived at Prairieville a little before noon, and offered to sell their votes—ten of them—for ten dollars, to those favoring a division. The managers would not pay that price, or any other; but said they would pay for ten dinners and horse-feed at the hotel. This offer was accepted, and ten Milwaukee roughs voted for a division of the county. They then hastened to Summit, where they offered to sell ten votes for the opposition for ten dollars and ten suppers. The offer was accepted, and ten Milwaukee roughs voted at Summit *against* a division of the county, so the general result was not affected by these twenty fraudulent votes. Strangers and minors voted *ad libitum*, and that election was for years referred to as the one in which universal suffrage was tolerated. The polls were kept open two or three days at Summit, where it was declared afterward that any new-comer was allowed to slip in a vote against division for a week after the day set for the election. This statement has never been sworn to. However, there was a majority in favor of a division, and Waukesha County, as it now is, came into existence.

Agreeably to the act previously quoted, the Supervisors elected in April for the sixteen towns comprising the new county met at Vail's Hotel, in Prairieville, on the second Monday of June, 1846, and organized for the transaction of county business, soon after adjourning to the Congregational Church, where the balance of the session was held. Curtis Reed, now of Winnebago County, was elected Chairman, and Harrison Phillips, Clerk. The Board then appointed county officers to serve until the regular election in August, as follows: T. F. Bancroft, Register of Deeds; W. P. Sloan, County Treasurer; John Blane, Sheriff; J. W.

Brackett, Judge of Probate; Alexander W. Randall, District Attorney; T. S. Huntington, Surveyor; and D. H. Shumway, Coroner.

The sixteen Supervisors who composed the first County Board and effected the organization of the county were Hiram Carter, Curtis Reed, Talbot C. Dousman, B. P. Melendy, Joseph Bond, S. S. Case, A. L. Castleman, William Odell, T. Richmond, C. McVean, Joseph Turner, A. A. Flint, L. Martin, M. W. Sherwood, William Fisher, and W. Bancroft.

COUNTY SEAT AND BUILDINGS.

The county buildings at Waukesha were never intended to be models of architectural beauty nor objects upon which to lavish large sums of public money. They are, however, solid, durable, ample in size, pleasant, and, while not particularly ornamental to the village of which they form a part, look neat and comfortable, answering satisfactorily every purpose for which they were erected. Nothing more is required.

County Seat.—In early days, the selection and securing of county seats was one of the most important matters to be accomplished by the residents of any particular locality. The idea obtained almost everywhere, that the locality which should be lucky enough to secure the county court house and accompanying buildings would be sure to grow, thrive and ultimately, as a consequence, become a great city. This enlisted the utmost efforts of all the property holders in every village whenever a county seat was to be chosen. In 1845, the city of Milwaukee was all torn up over a shrewd piece of legislative engineering which resulted in the passage of "An act to provide for the removal of the seat of justice of Milwaukee County to Prairieville," which was approved and signed by Gov. Henry Dodge February 24, 1845. Milwaukee was angry enough over the passage of this act, the papers denouncing every one who had anything to do with the "vicious measure;" and it is probably due to the fact that Milwaukee would thereby again become a county seat that the bill setting off the county of Waukesha was allowed to become a law, as otherwise Milwaukee would have had no county buildings at all

The great county-seat fight, however, was after Waukesha had been erected into a separate county, and her Supervisors had met to appoint provisional county officers and choose a seat of justice. On Wednesday afternoon, June 10, 1846, the County Board, then in session in the Congregational Church in Prairieville, after receiving numerous proposals for erecting a court house either there or at Niles Higginbottom's, near Deissner's mill, took the first informal ballot for a location for the proposed buildings. The result was 6 for Delafield, 4 for Prairieville, 4 for Pewaukee and 2 for Genesee. An adjournment to the next day was then secured, and wire-pulling and log-rolling in favor of the various places wanting a court house was carried on through the night, tremendous pressure being brought to bear upon the weaker Supervisors, or those who had no particular choice of location. Next morning, nearly everybody was present, either inside or outside of the church, to see the balloting proceeded with. The second ballot resulted: 5 for Prairieville, 3 for Genesee, 2 for Delafield, 4 for Pewaukee, 1 for Parker's farm and 1 for Parker's melon-patch. The Supervisor who voted for the melon-patch will be sustained by a large majority of people when it is recorded that, in those days, Mr. Parker had the name of raising the best melons in Waukesha County. As the balloting lasted three days, and caused more excitement than, perhaps, anything else that ever concerned the public, a table of votes is here preserved:

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	
Prairieville.....	4	5	5	7	8	7	7	7	6	6	6	6	6	7	7	8	7	8	8	8	8	8	8	8	8	9
Genesee.....	2	3	3	2	2	2	2	2	2	2	4	3	3	3	2	2	2	1	1							
Pewaukee.....	4	4	7	7	6	7	7	7	7	6	7	6	6	7	6	6	7	7	8	8	8	8	7	8	7	
Delafield.....	6	2	1																							
Parker's farm.....	1										1															
Parker's melon patch.....	1																									
Muskego.....													1				1							1		

Her Richard Weaver

SUSSEX.

On the conclusion of the twenty-fifth ballot, the board adjourned amid a shout never to be forgotten by those who heard it, and the Pewaukee folks immediately instituted a search for the eighth man, who deserted them and went over to Prairieville; but, fortunately for him, they never found the right one, though all manner of corruption was charged upon several. It was done in anger, however, as there was no foundation in fact for such a harsh and damaging charge—not a particle of evidence to sustain it ever having been found.

Court House.—On Saturday, June 14, 1846, S. S. Case offered this resolution, which was adopted: "That Lots 1, 2 and 3 in Block F, of John Gale, Jr., Robert Lockwood and William A. Barstow's plat of Prairieville, situate on the northeast quarter of Section 3, in the town of Prairieville, be and is hereby designated and fixed as the site on which to erect the county buildings for the county of Waukesha." On the motion of William Fisher, S. S. Case, Curtis Reed and Talbot C. Dousman were appointed a committee to procure plans for a court house and superintend the commencement and construction of the building; also, to determine the expediency of purchasing Lots 4 and 5, adjoining the three donated by William A. Barstow, of Prairieville, H. N. Ward, of Ohio, and Morris D. Cutler, of Prairieville. These two lots were not then purchased. They were sold to the county in December, 1868, however, by Herman A. Meyer, and now form a part of the court-house site—the portion used for a garden.

In April, 1847, a new Building Committee, consisting of Charles Burchard, G. M. Humphrey and William Crombie, was appointed, and Squire S. Case was appointed Superintendent of the construction of the county buildings.

The contract was let to "John Gale, Jr., and others," in 1846; but as the work of construction went on very slowly, and the walls, as far as finished, were not satisfactory, in October, 1847, a year or more from the commencement of operations, a committee, consisting of Charles Burchard, F. McNaughton and W. P. Clarke, was appointed to investigate the validity of the contract, the state of the work and the responsibility of the contractors' bondsmen. This committee reported in favor of canceling the bond and contract for building the court house, and appropriating \$1,200 for paying any new contractor who should complete the building; which report was adopted. On more closely examining the unfinished walls, they were found to be wholly unsafe—hardly able to stand without the weight of any further superstructure. The Board, therefore, ordered, in April, 1848, that the court-house walls be torn down, and new contracts for completing the building be let to competent and responsible parties; or that the Building Committee engage workmen and complete the structure. J. A. Short was, therefore, appointed Superintendent, and the committee prosecuted the work, which was contracted, piecemeal, to various parties, and finally completed it in the summer of 1849, after various alterations in the inside work.

The building stands now as it was completed in 1849, three years and more from its commencement, and is a substantial, plain, two-story stone structure, about 70x42 feet on the outside. It contains a jury-room, Sheriff's office, two offices for the County Judge, and County Superintendent's office on the first floor, while the second floor constitutes the court room. A blunt dome surmounts the structure, and solid stone walks and steps lead up to its entrance, over which is inscribed the somewhat untruthful legend: "Court House—Erected 1846."

No settlement was ever secured with "John Gale, Jr., and others," the first contractors' whose work had to be torn down, so the exact cost of the structure can hardly be stated, though it was probably about \$10,000, from beginning to end.

County Jail.—In January, 1847, the County Board resolved, "That the Building Committee (S. S. Case, Curtis Reed and T. C. Dousman) be and hereby are directed to contract for the construction of a jail and jailer's house, in accordance with the plans now in its possession, to be paid for as follows, viz.: \$500 out of the tax of 1846, and the balance out of the tax of 1847."

The contract was let to Clinton, Conover & Co., for \$2,305.18 for the jail buildings. In October, 1847, the Superintendent reported the buildings satisfactorily completed according to contract, and recommended the payment of the balance due, \$1,805.18. The Board then

granted \$40 for "beds, stoves, etc.," for the jail, and also ordered the contractors paid in full. A bill having come before the Legislature designating this jail as the State Prison until a regular State Prison building should be erected, the Building Committee had certain alterations made which furnished accommodations for more prisoners. But Gov. Dewey finally refused to sign the act, which therefore failed to become a law. The contract for the alteration, however, was let as soon as the act passed the Senate and Assembly, and considerable work had been done before the Governor's refusal to sign it had become known. The alteration was therefore necessarily allowed to be completed, and the County Board petitioned Judge Levi Hubbell to send all the convicts sentenced to the State prison in his circuit to the Waukesha jail, as it had been strengthened, enlarged and such provisions made for employing convict labor as no other county could offer. The petition was obeyed, and United States convicts, that is, those convicted by the United States Courts, were confined in this building several years.

County Offices.—The best building owned by the county of Waukesha is the county offices building, located near the court house at Waukesha. It was erected in 1860, at a cost of about \$4,000, and is a solid Waukesha-stone, fireproof structure, of ample proportions for the County Clerk, Register of Deeds, County Treasurer and Clerk of the Court's offices, and for storing their numerous records.* The situation is pleasant—iron fences, stone walks and fine maple trees extending in front. The records of the county are unusually perfect in these offices, and the building is such as will preserve them against all ordinary destructive influences for at least five centuries to come.

FIRST COUNTY RECORDS.

Fortunately, Milwaukee County, including what is now Waukesha County, was set apart and organized in 1834, the same year the first settlers located within the present county limits, or whatever business of a public nature that was necessary before that time, would have been recorded at Green Bay, an out-of-the-way place for residents of Waukesha County. All county records from 1834 to June, 1846, were made and continue to be kept at Milwaukee. Mere outlines or index transcripts have been made of them, which are kept at the county building in Waukesha.

After the county of Waukesha was set off from Milwaukee, the first record was made by the Supervisors of the sixteen towns, who met to set the wheels of the new county machinery in motion. The record of that meeting, the first in Waukesha County, is as follows, for the first day's proceedings:

At a meeting of the County Supervisors of the county of Waukesha, held at Vail's Hotel, in Prairieville, on Monday, the 8th day of June, A. D. 1846, at 12 o'clock M., pursuant to an act entitled "An Act to provide for a division of the county of Milwaukee," approved January 31, 1846, for the purpose of organizing a Board of County Supervisors for said county; the Supervisors were called to order by Mr. T. C. Dousman, and Curtis Reed was chosen Chairman *pro tem.*; and on motion of Mr. Martin, T. C. Dousman was chosen Secretary *pro tem.*

The Secretary then proceeded to call the names of the several towns in said county, when the following-named persons appeared and took their seats as members of this Board, viz.:

From the town of Oconomowoc, Hiram Carter; Summit, Curtis Reed; Ottawa, Talbot C. Dousman; Eagle, Baxter P. Melendy; Mukwonago, Joseph Bond; Genesee, Squire S. Case; Delafair, Alfred L. Castleman; Warren, William Odell; Lisbon, Thompson Richmond; Pewaukee, Collin McVean; Prairieville, Joseph Turner; Vernon, Asa F. Flint; Muskego, Leonard Martin; New Berlin, Moses H. Sherwood; Brookfield, William Fisher; Menomonee, Willard Bancroft.

On motion, the Board then adjourned until 3 o'clock P. M.

At 3 o'clock P. M., the Board met pursuant to adjournment.

On motion of Mr. Case, the Board proceeded to take an informal ballot for Clerk. Messrs. Case and Sherwood acting as tellers, who reported that the whole number of votes received were 16, of which Harrison Phillips received 11; Henry Sherman, 1; William P. Sloan, 4; when, on motion of Mr. Martin, the Board proceeded to take a formal ballot for the appointment of a Clerk. Messrs. Bond and Turner acting as tellers, who reported that the whole number of votes received were 16, of which Harrison Phillips received 14; H. W. Sherman, 1, and William P. Sloan, 1. Harrison Phillips, having received a majority of all the votes cast, was declared duly appointed Clerk.

On motion of Mr. Turner, the Board then proceeded to take an informal ballot for Chairman. Messrs. Castleman and Richmond acting as tellers, who reported that the whole number of votes received were 16, of which Curtis Reed received 11; J. Bond, 1; J. Turner, 1; S. S. Case, 1; H. Phillips, 1, and Blank, 1.

*Thanks are not history; but it is nothing less than proper to here sincerely thank the incumbents of these offices for many kindnesses shown by them to the historian in the prosecution of his work.

On motion of Mr. Turner, the Board then proceeded to take a formal ballot for the election of Chairman of the Board. Messrs. Martin and McVean acting as tellers, who reported that the whole number of votes received were 16, of which Curtis Reed received 14; J. Turner, 1, and Blank, 1; whereupon the Secretary declared Curtis Reed to be Chairman of this Board.

On motion of Mr. Castleman, a Committee of five members was appointed to report rules for the government of this Board, consisting of Messrs. Castleman, Turner, Bond, Case and Sherwood.

Mr. Dousman was excused from acting any longer as Clerk, and, on motion of Mr. Castleman, Mr. Phillips—the Clerk elect—was requested to act as Clerk of this Board until a Treasurer be appointed and qualified to approve of the bond of the Clerk in conformity to law.

The petition of R. C. Peck, claiming a seat in this Board from the town of Muskego was presented; and, on motion of Mr. Dousman, was referred to a select committee of three, consisting of Messrs. Dousman, McVean and Turner.

On motion of Mr. Castleman,

Resolved, That a Committee of three be appointed by the Chair to receive proposals for furnishing a lot of land and erecting thereon a Court House, Jail, Treasurer's office, Register's office, and two Clerks' offices, accompanied with plans and proposals for the same, and that said Committee be instructed to report to this Board by 10 o'clock to-morrow morning: and the Chair appointed Messrs. Castleman, Fisher and Case such Committee.

On motion of Mr. Castleman, the Board then adjourned to 8 o'clock to-morrow morning.

HARRISON PHILLIPS, *Clerk*.

The first record made in the books of the office of the Register of Deeds, after Waukesha County was organized, is as follows:

CERTIFICATE No. 12,576.—THE UNITED STATES OF AMERICA.—To all whom these presents shall come—greeting: Whereas, Willard Bancroft, of Milwaukee County, Wisconsin Territory, has deposited in the General Land Office of the United States a certificate of the Register of the Land Office at Milwaukee, whereby it appears that full payment has been made by the said Willard Bancroft, according to the provision of the act of Congress of the 24th of April, 1820, entitled “An Act making further provisions for the sale of the public lands,” for the northeast quarter of the northwest quarter of Section 4, in Township 8 north, of Range 20 east, in the district of lands subject to sale at Milwaukee, Wisconsin Territory, containing forty acres and seventy-three hundredths of an acre, according to the official plat of the survey of the said lands, returned to the General Land Office by the Surveyor General, which said tract has been purchased by the said Willard Bancroft; Now know ye, that the United States of America, in consideration of the premises, and in conformity with the several acts of Congress in such case made and provided, have given and granted, and by these presents do give and grant, unto the said Willard Bancroft, and to his heirs, the said tract above described; to have and to hold the same, together with all the rights, privileges, immunities and appurtenances, of whatsoever nature, thereunto belonging, unto the said Willard Bancroft and to his heirs and assigns forever.

In testimony whereof, I, John Tyler, President of the United States of America, have caused these letters to be made patent, and the seal of the General Land Office to be hereunto affixed. Given under my hand, at the city of Washington, the 1st day of October, in the year of our Lord one thousand eight hundred and forty-four, and of the Independence of the United States the sixty-ninth. By the President:

J. TYLER.

By J. TYLER, JR., *Secretary*.

S. H. LAUGHLIN, *Recorder of the General Land Office*.

Signed by the Recorder 21st of March, 1845. Received [at the Waukesha office] June 16, 1846.

John P. Story was the grantor, and William Cruikshank the grantee, of the first transfer of land recorded next after the above certificate, and were really the parties to the first real-estate transaction after Waukesha became a county, so far as the records show.

The first record in the office of the Clerk of Court is as follows:

No. 1.

Samuel K. Platt

vs.

} A. W. Randall.

February Term, 1847.

David Douglass and John A. Douglass.

Trespass in the case. Damages, \$200.

Summons in trespass in the case issued January 4, 1847; writ returned July 6, 1847, indorsed as follows, viz.: “Waukesha County, Wisconsin Territory. Served the within writ by reading to David Douglass, one of the defendants; John A. Douglass not found, 6th day of January, 1847. Albert Alden, Sheriff. Fees, \$2.20.”

Filed January 25, 1847, and now, February 16, 1847, cause called, and, no plea being filed, the default of the defendant is entered for want of a plea. Judgment granted for the plaintiff by the default of the defendant, and the Clerk is directed by the Court to examine, ascertain and report what sum the plaintiff ought to have for his damages. The same day the Clerk reports in writing that he has assessed the damages to the plaintiff at the sum of \$80.87, per report filed. Wherefore, it is considered and adjudged by the Court now here, that the plaintiff recover of the defendants the sum of \$80.87, with \$5.49 for his costs and charges by him about his said suit in this behalf expended; and that he have execution therefor.

Damages,	- - -	\$80.87
Interest from Feb. 6, 1847,	
Costs taxed at		5.49

March 5, 1847, process for execution, and execution issued.

GEO. S. WEST, *Clerk*.

March 20, 1850, *fi. fa.* returned, indorsed: “Satisfied. A. Alden, Sheriff.”

COUNTY OFFICERS FROM 1846 TO 1880.

As the territory now designated as Waukesha County was for many years under the jurisdiction, and a portion of, other counties, the first officers who had charge of its local affairs are not matters of record within its present boundaries, and of necessity must be omitted. During only three years before Waukesha County was set off from Milwaukee were the people permitted to choose who should manage anything but their town affairs. Other offices were filled by appointment, as often in such a manner as would pay political debts as otherwise. Although, of course, some good officers were appointed, the custom was a vicious one. The act allowing certain officers to be chosen by ballot was approved March 23, 1843, under which the first election was held in May of that year. A Milwaukee paper's comments, as follows, on the passage of the act, is further explanatory :

“ Our readers will perceive, by referring to an act of Congress, which we publish to-day, that the people of Wisconsin are hereafter to have the right of electing their own Sheriffs, Judges of Probate and Justices of the Peace. This is a privilege which has long been desired by the people of the Territory, and one which was demanded by justice. The old system of having these officers appointed by the Governor was one which conferred more power upon the Executive than should ever be given to that officer. Men of his appointment were generally such ones as would be subservient to his will and dictation ; and, in appointing them, it has not been the object of the Governor to select such men as would administer the laws with justice so much as it has to get such ones as would give to him the greatest support, and best advance his cause. Such always has been, and always will be, the case when the power of appointing these officers is given to the Executive. This power is now taken from the Governor of this Territory and given to the majority of the people.

“ We also publish a bill to provide for the manner and time of electing such officers, which passed both branches of the Legislature, and was sent to the Governor for his approval, yesterday. It provides that the election shall take place on the first Monday in May next, and that the officers elected at that time shall commence their term of service on the 1st of June.”

The officers of Waukesha County, since its separation from Milwaukee, have been as follows :

Register of Deeds.—T. F. Bancroft, appointed by the Board of Supervisors June 8, 1846, and served until October, 1846 ; E. B. Quiner, 1846–47, two terms ; Philip V. Bovee, 1848 ; Samuel H. Barstow, 1849–52, two terms ; William R. Williams, 1853–58, three terms ; Henry A. Shears, 1859–62, two terms ; Pitts Ellis, 1863–64 ; Samuel H. Barstow, 1865–66 ; Herman Adolph Meyer, 1867–68 ; Peter Coyle, 1869–70 ; J. E. Seabold, 1871–72 ; John C. Schuetz, 1873–74 ; James McDonald, 1875–76 ; John Stephens, 1877–80.

Sheriff.—John Blane, appointed by the Board of Supervisors June 9, 1846, served three months ; Albert Alden, 1846–48 ; Alex F. Pratt, 1849–50 ; Dominick Casey, 1851–52 ; Charles B. Ellis, 1853–54 ; Dewey K. Warren, 1855–56 ; Israel H. Castle, 1857–58 ; Charles W. Bennett, 1859–60 ; James Clark, 1861–62 ; Orson Reed, 1863–64 ; Albert Alden, 1865–66 ; William K. Hunkins, 1867–68 ; Alexander F. Pratt, 1869–70 ; John Graham, 1871–72 ; C. M. Hartwell, 1873–74 ; Ephraim Beaumont, 1875–76 ; J. W. Patterson, 1877–78 ; John Porter, 1879–80.

District Attorney.—Alexander W. Randall, appointed by the Board of Supervisors in June, 1846 ; Alex Cook, appointed in October, 1846–47 ; John E. Gallagher, 1848–49 ; Alexander Cook, 1850–52 ; John E. Gallagher, 1853–54 ; William Soper, 1855–56 ; Edwin Hurlbut, 1857–58 ; E. M. Randall, 1859–60 ; Calvert C. White, 1861–62 ; David W. Small, 1863–64 ; Alexander Cook, 1865–68 ; David W. Small, 1869 ; Rufus C. Hathaway (to fill out the last half of Mr. Small's term, he having been chosen Circuit Judge in 1869), 1870 ; Vernon Tichenor (received all the votes cast), 1871 ; Alexander Cook, 1872–73 ; Edwin Hurlbut, 1874–75 ; D. H. Sumner, 1876–77 ; Alexander Cook, 1878–79 ; William H. Thomas, 1880–81.

County Treasurer.—William P. Sloan, appointed by the Board of Supervisors on June 8, 1846; Gordon C. Cone, elected in October, 1846, served 1846-49; Horatio N. Davis, 1850-51; Peter G. Jones (no opposition), 1852; Gordon C. Cone, 1853-54; Horatio N. Davis, 1855-58; Oliver S. Rathburn, 1859-62; John Fallon, 1863-64; H. H. Hunkins, 1865-66; George E. Bergwall, 1867-68; John Castleholz, 1869-70; Ephraim Beaumont, 1871-74; Anthony Houser, 1875-76; John A. Lins, 1877-78; John Russell, 1879-80.

County Clerk.—Harrison Phillips (appointed by Board of Supervisors, in June, 1846, and removed a few days later); Joseph H. Turner (appointed in June, and resigned in October, 1846); E. M. Randall (appointed by County Board), 1846-47; William S. Hawkins, 1848-49; E. B. Kelsey, 1850; Lemuel White, 1851-52; Benj. E. Clarke, 1853-54; Owen McMahon, 1855-56; John E. Jewett, 1857-62; Adam Beaver, 1863-64; William S. Green, 1865-66; J. L. O'Brien, 1867-68; James Murray, 1869-70; John C. Schuet, 1871; James Murray (to fill vacancy), 1872; Thomas C. Martin, 1873-78; J. D. Roberts, 1879-80.

Clerk of the Court.—George S. West (appointed by Judge Miller), 1847-48; William S. Hascall, 1849-52; Lemuel White (C. C. White acting as clerk during the latter portion of the term), 1853-54; Samuel H. Barstow, first part of 1855; Henry D. Barron, by appointment, filled out S. H. Barstow's term of 1855-56; John Forbes, 1857-60; John A. Williams, 1861-62; P. H. Carney, 1863-64; John Forbes, 1865-66; R. B. Rowlands, served only a few days, and resigned to John Forbes, who served 1867-68; William R. Williams, 1869-73; H. F. Jennings (appointed to fill out the third term of Mr. Williams, deceased), 1874; William S. Green, 1875-78; Mathias L. Snyder, 1878-81.

County Surveyor.—T. S. Huntington (appointed by the County Board in June, 1846), 1846-47; J. Van Vechten, 1848-50; William R. Williams, 1851-52; John O. Rudbergh, 1853-54; William West, 1855-56; Thomas Faulkner, 1857-58; Ira Blood, 1859-62; R. C. Hathaway, 1863-64; William R. Williams, 1865-66; Ira Blood, 1867-68; William West, 1869-74; R. C. Hathaway, 1875-78; M. S. Hodgson, 1879-80.

Coroner.—D. H. Shumway, appointed by the first County Board in June, 1846; S. H. Barstow, 1847-50; Frederick A. Sprague, 1851-52; Peter Hart, 1853-54; Richard Hardell, 1855-56; Ira Rowe, 1857-58; George McWhorter, 1859-60; William M. Saunders, 1861-62; W. H. Burgess, 1863-64; Peter D. Gifford, 1865-66; William M. Saunders, 1867-68; C. C. Palmer, 1869-70; Leonard Martin, 1871-72; Orville Hathaway, 1873-74; Sam. H. Barstow, 1875-78; William M. Saunders, 1879-80.

Superintendent of Schools.—Elihu Enos, 1861-62; A. D. Hendrickson, 1863-64; William S. Green, 1865-71; Alexander F. North, 1872-73; Isaac A. Stewart, 1874-75; John Howitt, 1876-81.

Before 1861, the town system of Superintendents was in force.

Board of Supervisors.—The Board of Supervisors is to the county what the Legislature is to a State. The official records show the Board to have been composed of the following persons for the different years:

1846—Hiram Carter, of Oconomowoc; Curtis Reed, of Summit; Talbot C. Dousman, of Ottawa; Baxter P. Melendy, of Eagle; Joseph Bond, of Mukwonago; Squire S. Case, of Genesee; Alfred L. Castleman, of Delafield; William Odell, of Warren; Thompson Richmond, of Lisbon; Collin McVean, of Pewaukee; Joseph Turner, of Prairieville; Asa A. Flint, of Vernon; Leonard Martin, of Muskego; Moses W. Sherwood, of New Berlin; William Fisher, of Brookfield; Willard Bancroft, of Menomonee.

1847—A. J. Story, of Summit; T. C. Dousman, of Ottawa; D. Orendorff, of Genesee; W. Crombie, of Delafield; W. P. Clarke, of Warren; James Weaver, of Lisbon; J. H. Waterman, of Pewaukee; C. Burchard, of Waukesha; O. Hazeltine, of Vernon; L. Martin, of Muskego; George M. Humphrey, of New Berlin; M. Spear, of Brookfield; N. P. Reynolds, of Menomonee; E. P. Cotton, of Oconomowoc; Jonathan Parsons, of Eagle; Joseph Bond, of Mukwonago.

1848—William Flanagan, of Menomonee; Henry Brainard, of Lisbon; Curtis B. Brown, of Oconomowoc; Henry C. Morgan, of Pewaukee; John P. Story, of Brookfield; E. P. Birchard, of Waukesha; S. S. Case, of Genesee; T. C. Dousman, of Ottawa; Jonathan Parsons, of Eagle; Jesse Smith, of Vernon; John Finley, of Muskego.

1849—William Flanagan, of Menomonee; George Elliot, of Lisbon; William A. Barstow, of Waukesha; Robert Curran, of Brookfield; Benjamin Hunkins, of New Berlin; Pitts Ellis, of Genesee; John C. Snover, of Eagle; John Finley, of Muskego; A. J. Story, of Summit; Andrew E. Elmore, of Mukwonago; Daniel Cottrell, of Oconomowoc; Hiram Paris, of Ottawa; Henry Shears, of Merton; Aaron Putnam, of Vernon; John Hodgson, of Pewaukee; Andrew Proudfit, of Delafield.

1850—Simon Smith, of Menomonee; Elisha Pearl, of Lisbon; Jeremiah Noon, of Merton; John S. Rockwell, of Oconomowoc; J. M. Clark, of Summit; Dewey H. Warren, of Delafield; Henry Smith, of Pewaukee; Robert Curran, of Brookfield; George Hyer, of Waukesha; Thomas Sugden, of Genesee; Peter D. Gifford, of Ottawa; John C. Snover, of Eagle; Andrew E. Elmore, of Mukwonago; Amos Goff, of Vernon; Thomas Lenan, of Muskego; N. T. Loomis, of New Berlin.

1851—John C. Snover, of Eagle; Daniel E. Cotton, of Ottawa; Elisha W. Edgerton, of Summit; John S. Rockwell, of Oconomowoc; Jeremiah Noon, of Merton; Dewey K. Warren, of Delafield; Thomas Sugden, of Genesee; Andrew E. Elmore, of Mukwonago; Amos Goff, of Vernon; Absalom Miner, of Waukesha; William C. Gates, of Pewaukee; Robert Black, of Lisbon; Simon Smith, of Menomonee; Oliver S. Rathburn, of Brookfield; Daniel Church, of New Berlin; Luther Parker, of Muskego.

1852—John Finley, of Muskego; Benjamin Hunkins, of New Berlin; Aaron V. Groot, of Brookfield; William Flanagan, of Menomonee; Rodman Palmer, of Lisbon; A. H. Griffin, of Pewaukee; H. N. Davis, of Waukesha; William A. Vanderpool, of Vernon; A. E. Elmore, of Mukwonago; Pitts Ellis, of Genesee; George R. McLean, of Delafield; Jeremiah Noon, of Merton; John S. Rockwell, of Oconomowoc; Elisha W. Edgerton, of Summit; Peter D. Gifford, of Ottawa; Marvin H. Bovee, of Eagle.

1853—William R. Hesk, of Menomonee; George Cairncross, of Lisbon; Hosea Prentice, of Merton; Daniel Cottrell, of Oconomowoc; Elisha M. Edgerton, of Summit; Alfred L. Castleman, of Delafield; Ashbert H. Griffin, of Pewaukee; Ira Rowe, of Brookfield; Benjamin Hunkins, of New Berlin; Horatio N. Davis, of Waukesha; Thomas Sugden, of Genesee; Talbot C. Dousman, of Ottawa; Alexander Winnie, of Eagle; Andrew E. Elmore, of Mukwonago; Findlay McNaughton, of Vernon; James Reymert, of Muskego.

1854—Marvin H. Bovee, of Eagle; Peter D. Gifford, of Ottawa; Dennison Worthington, of Summit; Hosea Prentice, of Merton; L. B. Seymour, of Delafield; Alexander Fender, of Genesee; Andrew E. Elmore, of Mukwonago; Findlay McNaughton, of Vernon; Horatio N. Davis, of Waukesha; William C. Gates, of Pewaukee; George Cairncross, of Lisbon; William R. Hesk, of Menomonee; Ira Rowe, of Brookfield; John Evans, of New Berlin; John Reynolds, of Muskego.

1855—Patrick Higgins, of Menomonee; George Cairncross, of Lisbon; James Donnelly, of Merton; Daniel Cottrell, of Oconomowoc; James H. Waterman, of Pewaukee; Ira Rowe, of Brookfield; John Evans, of New Berlin; G. C. Cone, of Waukesha; Thomas Sugden, of Genesee; Thomas Chandler, of Ottawa; John C. Snover, of Eagle; A. E. Elmore, of Mukwonago; F. McNaughton, of Vernon; B. Babcock, of Muskego.

1856—Ira Rowe, of Brookfield; Albert Alden, of Delafield; George Underhill, of Eagle; Thomas Sugden, of Genesee; George Cairncross, of Lisbon; E. McMonnigal, of Menomonee; Jeremiah Noon, of Merton; A. E. Elmore, of Mukwonago; Charles D. Parker, of Muskego; Moses Cleveland, of New Berlin; D. Mc Kercher, of Oconomowoc; Thomas Chandler, of Ottawa; A. H. Griffin, of Pewaukee; James Clark, of Summit; F. McNaughton, of Vernon; A. F. Pratt, of Waukesha.

1857—Aaron V. Groot, of Brookfield; Albert Alden, of Delafield; George Underhill, of Eagle; Pitts Ellis, of Genesee; George Cairncross, of Lisbon; William Flanagan, of Menomonee; Francis McCormick, of Merton; Andrew E. Elmore, of Mukwonago; John Reynolds, of Muskego; John Evans, of New Berlin; Washington W. Collins, of Oconomowoc; William E. McClure, of Ottawa; Chauncey G. Heath, of Pewaukee; Orson Reed, of Summit; Findlay McNaughton, of Vernon; George C. Pratt, of Waukesha.

1858—Simeon Faulkner, of Brookfield; Albert Alden, of Delafield; John C. Snover, of Eagle; Thomas Sugden, of Genesee; George Cairncross, of Lisbon; Sylvester Rowe, of Menomonee; Francis McCormick, of Merton; Andrew E. Elmore, of Mukwonago; Matthew Elliott, of Muskego; Benjamin Hunkins, of New Berlin; Daniel Cottrell, of Oconomowoc; T. C. Dousman, of Ottawa; George Parker, of Pewaukee; Orson Reed, of Summit; Perry Craig, of Vernon; George C. Pratt, of Waukesha.

1859—John H. Cushing, of Brookfield; Albert Alden, of Delafield; D. G. Snover, of Eagle; P. D. Gifford, of Genesee; R. Cooling, of Lisbon; William R. Hesk, of Menomonee; F. McCormick, of Merton; A. E. Elmore, of Mukwonago; P. L. Bigelow, of Muskego; J. J. Punch, of New Berlin; Norman Schultz, of Ottawa; John Hodgson, of Pewaukee; Orson Reed, of Summit; R. C. Robertson, of Vernon; George C. Pratt, of Waukesha; R. C. Hathaway, of Oconomowoc.

1860—Daniel Brown, of Brookfield; Samuel Thompson, of Delafield; H. F. Potter, of Eagle; Peter D. Gifford, of Genesee; Richard Cooling, of Lisbon; Sylvester Rowe, of Menomonee; Holt Barnes, of Merton; A. E. Elmore, of Mukwonago; P. L. Bigelow, of Muskego; John Evans, of New Berlin; John S. Rockwell, of Oconomowoc; David Roberts, of Ottawa; John Hodgson, of Pewaukee; Orson Reed, of Summit; R. C. Robertson, of Vernon; H. N. Davis, of Waukesha.

1861—Daniel Brown, of Brookfield; Samuel Thompson, of Delafield; W. S. Green, of Eagle; A. Fender, of Genesee; H. R. Savage, of Lisbon; Peter Hart, of Menomonee; F. McCormick, of Merton; Frederick Ring, of Mukwonago; C. H. Babcock, of Muskego; James Murray, of New Berlin; D. Rhoda, of Oconomowoc; Thomas Chandler, of Ottawa; E. M. Danforth, of Summit; R. C. Robertson, of Vernon; H. N. Davis, Waukesha.

In 1861, Commissioners took the place of Supervisors, one being elected at large and one from each Assembly District. Under that system the following Commissioners were elected:

1862-63—At large, Nelson Burroughs; Albert Stewart, for the First Assembly District; E. M. Danforth, for the Second District; Pitts Ellis, Third District; Leonard Martin, Fourth District.

1864-65—At large, John Hodgson; A. M. Robbins, First District; John N. Cadby, Second District; E. D. Reynolds, Third District; Jesse Smith, Fourth District.

1866—At large, John Hodgson; A. M. Robbins, First District; D. S. Stone, Second District; David Roberts, Third District; Sargeant R. Hunkins, Fourth District.

1867—Isaac Lain, First District; Daniel Cottrell, Second District; John Castenholz, Third District.*

1868—Isaac Lain, First District; Thomas H. Boone, Second District; John Castenholz, Third District.

1869—Isaac Lain, First District; Thomas H. Boone, Second District; Patrick Higgins, Third District.

1870—Isaac Lain, First District; John Hodgson, Second District; Patrick Higgins, Third District. These Commissioners only served a small portion of 1870, the act returning to the town system having become a law in time for the April elections of that year.

1870—Thomas Lambe, of Brookfield; Albert Alden, of Delafield; Thomas D. Jones, of Genesee; Henry Phillips, of Lisbon; William N. Lannon, of Menomonee; James McDonough, of Muskego; M. H. Molster, of Merton; William McArthur, of Mukwonago; Lyman Evans,

*The County was re-districted, erecting three Assembly Districts, and the Commissioner at Large was cut off, his election not being necessary to make an odd number of Commissioners.

of New Berlin; John Whittaker, of Oconomowoc; Henry Weiner, of Ottawa; Alexander Caldwell, of Pewaukee; J. D. McDonald, of Summit; Jesse Smith, of Vernon; Edward Porter, of Waukesha; D. H. Sumner, of Oconomowoc Village; W. V. Tichenor, of Waukesha Village.

1871—Thomas Lambe, of Brookfield; Albert Alden, of Delafield; John C. Snover, of Eagle; John A. Jones, of Genesee; John Watson, of Lisbon; Thomas McCarty, of Menomonee; Martin H. Molster, of Merton; L. J. Andrews, of Mukwonago; James McDonough, of Muskego; John Evans, of New Berlin; David Rhoda, of Oconomowoc; Henry Weiner, of Ottawa; Elihu Enos, of Pewaukee; J. D. McDonald, of Summit; Jesse Smith, of Vernon; Edward Porter, of Waukesha; Willis V. Tichenor, of Waukesha Village; Orville Hathaway, of Oconomowoc Village.

1872—Jefferson Gregg, of Brookfield; J. Sperry, of Delafield; J. A. Lins, of Eagle; John A. Jones, of Genesee; Henry Phillips, of Lisbon; Thomas McCarty, of Menomonee; S. L. Worth, of Merton; William McArthur, of Mukwonago; James McDonough, of Muskego; John Evans, of New Berlin; David Rhoda, of Oconomowoc; William Thompson, of Oconomowoc Village; B. W. Knight, of Ottawa; S. T. Bolles, of Pewaukee; E. S. Stone, of Summit; Andrew Bertram, of Vernon; Edward Porter, of Waukesha; D. H. Sumner, of Waukesha Village.

1873—Thomas Lambe, of Brookfield; Johnson Sperry, of Delafield; William LeFever, of Eagle; William H. Hardy, of Genesee; R. Ainsworth, of Lisbon; M. H. Molster, of Merton; Thomas McCarty, of Menomonee; Charles Bass, of Muskego; William McArthur, of Mukwonago; John Evans, of New Berlin; H. T. Dousman, of Ottawa; F. S. Capron, of Oconomowoc; Lyman Kellogg, of Oconomowoc Village; S. T. Bolles, of Pewaukee; J. D. McDonald, of Summit; David Edwards, of Summitville; Jesse Smith, of Vernon; Edward Porter, of Waukesha; Isaac Lain, of Waukesha Village.

1874—Thomas Lambe, of Brookfield; Albert Alden, of Delafield; J. C. Snover, of Eagle; Thomas D. Jones, of Genesee; Roderick Ainsworth, of Lisbon; Thomas McCarty, of Menomonee; John L. Buckley, of Merton; Charles Bass, of Muskego; William McArthur, of Mukwonago; John Evans, of New Berlin; David Rhoda, of Oconomowoc; Lyman Evans, of Oconomowoc Village; H. F. Dousman, of Ottawa; George Baker, of Pewaukee; J. D. McDonald, of Summit; L. Martin, of Vernon; O. M. Tyler, of Waukesha; I. Lain, of Waukesha Village.

1875—Fred. Goerke, of Brookfield; Johnson Sperry, of Delafield; John C. Snover, of Eagle; Thomas D. Jones, of Genesee; William Small, of Lisbon; Thomas McCarty, of Menomonee; John L. Buckley, of Merton; J. N. Crawford, of Mukwonago; Adam Meahl, of Muskego; William Ockler, of New Berlin; O. H. Thayer, of Ottawa; M. A. Place, of Oconomowoc; W. W. Collins, of Oconomowoc City; O. P. Clinton, of Pewaukee; J. D. McDonald, of Summit; Leonard Martin, of Vernon; O. M. Tyler, of Waukesha; George C. Pratt, of Waukesha Village.

1876—Christopher Gaynor, of Brookfield; Johnson Sperry, of Delafield; J. A. Lins, of Eagle; Henry Bowman, of Genesee; William Small, of Lisbon; Peter Reith, of Menomonee; Edward Purtell, of Merton; F. S. Andrews, of Mukwonago; Adam Meahl, of Muskego; William Ockler, of New Berlin; Henry Weiner, of Ottawa; M. A. Place, of Oconomowoc; M. T. Draper, of Oconomowoc City; B. F. Goss, of Pewaukee; S. T. Bolles, of Pewaukee Village; A. G. Hardell, of Summit; James Stewart, of Vernon; R. M. Jameson, of Waukesha; Isaac Lain, of Waukesha Village.

1877—Christopher Gaynor, of Brookfield; J. Sperry, of Delafield; M. J. Regan, of Eagle; Thomas D. Jones, of Genesee; John Flanagan, of Menomonee; James Walsh, of Merton; F. S. Andrews, of Mukwonago; S. C. Schuet, of Muskego; John Evans, of New Berlin; O. H. Thayer, of Ottawa; Silas Clemons, of Oconomowoc; M. T. Draper, of Oconomowoc City; J. M. Heath, of Pewaukee; S. T. Bolles, of Pewaukee Village; J. D. McDonald, of Summit; James Stewart, of Vernon; R. M. Jameson, of Waukesha; Silas Richardson, of Waukesha Village.

1878—W. R. Blodgett, of Brookfield; Albert Alden, of Delafield; M. J. Regan, of Eagle; T. D. Jones, of Genesee; Charles Buck, of Lisbon; John Flanagan, of Menomonee; Edward Drummond, of Merton; John Schmidt, of Muskego; William Addenbrook, of Mukwonago; John Evans, of New Berlin; N. J. Nichols, of Ottawa; David Rhoda, of Oconomowoc; W. W. Collins, of Oconomowoc City; John Ross, of Pewaukee; B. F. Goss, of Pewaukee Village; John D. McDonald, of Summit; James Stewart, of Vernon; O. Tichenor, of Waukesha; Isaac Lain, of Waukesha Village.

1879—Christopher Gaynor, of Brookfield; Albert Alden, of Delafield; William E. Hennessy, of Eagle; T. D. Jones, of Genesee; William Small, of Lisbon; Thomas McCarty, of Menomonee; James Walsh, of Merton; Matthew Howitt, of Mukwonago; John Schmidt, of Muskego; John Evans, of New Berlin; Henry Weiner, of Ottawa; David Rhoda, of Oconomowoc; M. T. Draper, of Oconomowoc City, First Ward; A. McKee, of Oconomowoc City, Second Ward; E. W. Delaney, of Oconomowoc City, Third Ward; John Ross, of Pewaukee; A. M. Clark, of Pewaukee Village; Daniel Williams, of Summit; Leonard Martin, of Vernon; Alexander McWhorter, of Waukesha; William Langer, of Waukesha Village.

1880—Albert Alden, of Delafield; Christopher Gaynor, of Brookfield; William E. Hennessy, of Eagle; Thomas D. Jones, of Genesee; Henry Phillips, of Lisbon; Thomas McCarty, of Menomonee; Edward Drummond, of Merton; William A. Denbrook, of Mukwonago; John Schmidt, of Muskego; A. E. Gilbert, of New Berlin; Henry Weiner, of Ottawa; W. A. Place, of Oconomowoc; John Ross, of Pewaukee; Daniel Williams, of Summit; L. Martin, of Vernon; Alexander McWhorter, of Waukesha.

WAUKESHA IN THE CONSTITUTIONAL CONVENTIONS.

First Constitutional Convention.—This convention assembled at Madison October 5, 1846, and adjourned December 16, 1846, framing a constitution, which was submitted to the people the first Tuesday in April, 1847, and rejected. Waukesha County was represented as follows: Andrew E. Elmore, Pitts Ellis, George Reed, Elisha W. Edgerton, Rufus Parks, William B. Hesk, Barnes Babcock, Benjamin Hunkins, Alexander W. Randall, Charles Burchard* and James M. Moore.

Second Constitutional Convention.—This convention assembled at Madison, on December 15, 1847, and adjourned February 1, 1848, framing the present constitution, which was adopted by the people on the second Monday in March, 1848. Waukesha County was represented as follows: Peter D. Gifford, George Scagel, S. S. Case, A. L. Castleman, Emulous P. Cotton and Eleazer Root.

TERRITORIAL REPRESENTATION.†

Council.—Alanson Sweet and Gilbert Knapp, 1836–38; Daniel Wells, Jr., and William A. Prentiss, 1838–40; Jonathan E. Arnold and Don A. J. Upham, 1841–42 (Arnold resigning his seat, which was filled by John H. Tweedy); Hans Crocker, Lemuel White and David Newland, 1842–44; Adam E. Ray, James Kneeland and Jacob H. Kimball, 1845; Curtis Reed, Jacob H. Kimball and James Kneeland, 1846; Joseph Turner, 1847–48.†

Representatives.—William B. Sheldon, Madison W. Cornwall and Charles Durkee, 1836–38; Lucius I. Barber, William Shew, Henry C. Skinner, Ezekiel Churchill and Augustus Story, 1839; Adam E. Ray, William R. Longstreet, Wm. Shew, Horatio N. Wells and Augustus Story, 1839–40; Joseph Bond, Jacob Brazelton, A. E. Ray, John S. Rockwell and William Shephard, 1840–42; Andrew E. Elmore, Benjamin Hunkins, Thomas H. Olin, Jonathan Parsons, Jared Thompson and George H. Walker, 1842–44; Charles E. Brown, Pitts Ellis, Byron Kilbourn, B. H. Mooers, William Shew and George H. Walker, 1845; Samuel H. Barstow, John Crawford, James Magone, Benj. H. Mooers, Luther Parker and William H. Thomas, 1846; Joseph Bond and

*Seat unsuccessfully contested by Mathias J. Bovee, now deceased.

†The first Territorial Legislature convened at Belmont, now in Iowa County, October 25, 1836, and continued in session until December 9, 1836.

Chauncey G. Heath, 1847;* George Reed and L. Martin (special session in October), 1847; George Reed and L. Martin, 1848.

STATE REPRESENTATION.

Senate.—Up to 1853, after the organization of the State, Waukesha constituted the Thirteenth District; after that, it was divided into the Ninth and Tenth, the two districts continuing until 1857, when the county was made to constitute the Tenth District, since which time no change has been made. The following Senators have represented Waukesha County since the adoption of the State Constitution: Joseph Turner, 1848; Fred A. Sprague, 1849–50; George Hyer, 1851; E. B. West, 1852; G. R. McLane and Marvin H. Bovee, 1853; G. R. McLane and James D. Reymert, 1854; Dennis Worthington and James D. Reymert, 1855; Dennis Worthington and Edward Gernon, 1856; Edward Gernon, 1857; Dennis Worthington, 1858–61; George C. Pratt, 1862–63; William Blair, 1864–65; Orson Reed, 1866–67; Curtis Mann, 1868–69; John A. Rice, 1870–71; William Blair, 1872–73; John A. Rice, 1874–75; William Blair, 1866–67; John A. Rice, 1877–78; Richard Weaver, 1879–80.

Assembly.—Joseph W. Brackett, Dewey K. Warren, C. G. Heath, George M. Humphrey and Joseph Bond, 1848; William H. Thomas, John M. Wells, Albert Alden, David H. Rockwell and Thomas Sugden, 1849; Patrick Higgins, Henry Shears, Pitts Ellis, John E. Gallagher and Anson H. Taylor, 1850; John C. Snover, Peter D. Gifford, Aaron V. Groot, William A. Cone and Hosea Fuller, Jr., 1851; John U. Hilliard, Dennison Worthington, Thomas Sugden, Publius V. Monroe and Fin. McNaughton, 1852; Winchell D. Bacon, Edward Lees, Orson Reed and Elisha Pearl, 1853; Edward Lees, Jesse Smith, Dennison Worthington and Chauncey H. Purple, 1854; Alex. W. Randall, Joseph Bond, Stephen Warren and Benjamin F. Goss, 1855; John James, James Weaver, Charles S. Hawley and Jeremiah Noon, 1856; George Cairncross, James M. Lewis, Thomas Sugden, Elihu Enos, Jr., and Charles S. Hawley, 1857; Albert Alden, Oliver P. Hulet, David Roberts, George McWhorter and Charles S. Hawley, 1858; Parker Sawyer, William P. King, Andrew E. Elmore, Charles T. Deissner and Ira Blood, 1859; Albert Alden, William R. Hesk, Andrew E. Elmore, Benjamin Hunkins and Robert C. Robertson, 1860; Daniel Cottrell, William H. Thomas, Henry A. Youmans, Myron Gilbert and Isaac Lain, 1861; George W. Brown, Samuel Thompson, Peter D. Gifford, William A. Vanderpool, 1862; Silas Richardson, Elisha W. Edgerton, David G. Snover and Nelson Burroughs, 1863; William Costigan, Joel R. Carpenter, Norman Shultis and John Smith, 1864; Thomas Weaver, John N. Cadby, John B. Monteith and Myron Gilbert, 1865; Daniel Brown, Samuel Thompson, Peter D. Gifford and Jesse Smith, 1866; Jesse Smith, Rufus Parks, and James Murray, 1867; Silas Barber, William Thompson and Adam Muehl, 1868; Vernon Tichenor, Edwin Hurlbut and James McDonald, 1869; Henry Totten, John D. McDonald and Thomas McCarty, 1870; Leonard D. Hinkley, John D. McDonald and William Ockler, 1871; Eliphalet S. Stone and Charles Brown, 1872; Francis G. Parks and David Rhoda, 1873; William H. Hardy and Henry Clasen, 1874; Silas Barber and Manville S. Hodgson, 1875; William H. Hardy and James S. Dent, 1876; H. F. Dousman and Thomas McCarty, 1877; Alvarus E. Gilbert and Richard Weaver, 1878; John Schmidt and William Small, 1879.

REPRESENTATION IN CONGRESS.

The act of Congress, approved April 20, 1836, organizing the Territory of Wisconsin, conferred upon the people the right to be represented in the National Congress by one delegate, to be chosen by the votes of the qualified electors of the Territory. Under this authority, the Territory was represented in Congress by the following delegates:

George W. Jones, elected October 10, 1836; James D. Doty, September 10, 1838; James D. Doty, August 5, 1840; Henry Dodge, September 27, 1841; Henry Dodge, September 25, 1843; Morgan L. Martin, September 22, 1845; John H. Tweedy, September 6, 1847.

* In 1846, Waukesha was set off from Milwaukee, and constituted a separate election district.

By the Constitution, adopted when the Territory became a State in 1848, two Representatives in Congress were provided for, by dividing the State into two Congressional Districts.

Waukesha, with three other counties, was included in the First Congressional District, and though the territory of this district was changed in 1861 and 1872, the county has never been out of it. The representation, since Wisconsin became a State, has been as follows: William Pitt Lynde,* of Milwaukee, 1847-49; Charles Durkee, of Kenosha, 1849-53; Daniel Wells, Jr., of Milwaukee, 1853-57; John F. Potter, of Walworth County, 1857-63; James S. Brown, of Kenosha, 1863-65; Halbert E. Paine, of Milwaukee, 1865-71; Alexander Mitchell, of Milwaukee, 1871-73; Charles G. Williams, of Janesville, 1873, continuously to the present time, his fourth term expiring in March, 1881. Politically, the delegates have been divided as follows: James S. Brown, Daniel Wells, Jr., William Pitt Lynde and Alexander Mitchell, Democrats; and Charles Durkee (Libertyite), Halbert E. Paine, John F. Potter and Charles G. Williams, Republicans.

TERRITORIAL DISTRICT COURTS AND JUDGES.

Had Waukesha County contained any settlers before 1836, who desired to "go to law," they would have been compelled to travel to Green Bay, where, as early as 1820 or 1821, Robert Irwin held the office of Justice of the Peace; or, possibly, it would have been necessary for them to have journeyed to Detroit. Up to that time, cases were tried by Justices in Wisconsin (which belonged to Michigan, however, and could not be legally called by that name), or contestants were compelled to go to Detroit.

The act of Congress establishing the Territorial Government of Wisconsin provided for the division of the Territory into three judicial districts, and for the holding of a District Court by one of the Justices of the Supreme Court in each district, two terms each year in each organized county in the district. The three Justices were Charles Dunn, David Irvin and William C. Frazer. By an act of the Territorial Legislature, approved November 15, 1836, the counties of Brown and Milwaukee (the last named including the territory afterward designated as Waukesha County) were constituted the Third District, and assigned to Justice Frazer.

The place for holding court was at Milwaukee, the opening of which was a notable event in those days, and attended by nearly all the men in the county, which, of course, included Waukesha. Some reminiscences, therefore, will not only be properly in place here, but of more or less interest and value. The late Alexander F. Pratt, who was an officer (Deputy Sheriff by appointment) of that court, wrote as follows (in 1854) of Judge William C. Frazer, of Pennsylvania, and his court peculiarities:

"Judge Frazer arrived in Milwaukee on a Sunday evening, in June, 1837, to hold first court. He put up at the small hotel, which stood where 'Dickerman's Block' now stands, kept by Mr. Vail. On his arrival, he fell in with some old Kentucky friends, who invited him to a private room for the purpose of participating in an innocent game of 'poker.' The party consisted of the Judge, Col. Morton, Register of the Land Office, and two or three others—friends of the Judge. They commenced playing for small sums at first, but increased them as the hours passed, until the dawn of day, the next morning, when small sums seemed beneath their notice. The first approach of day was heralded to them by the ringing of the bell for breakfast. The Judge made a great many apologies, saying, among other things, that as that was his first appearance in the Territory, and as his court opened at 10 o'clock that morning, he must have a little time to prepare a charge to the grand jury. He therefore hoped that they would excuse him, which they accordingly did, and he withdrew from the party. The court met at the appointed hour, Owen Aldrich acting as Sheriff, and Cyrus Hawley as Clerk. The grand jury was called and sworn. The Judge, with much dignity, commenced his charge; and never before did we hear such a charge poured forth from the bench! After charging them upon the laws generally, he alluded to the statute against gambling. The English language is too barren to describe his abhorrence of that crime. Among other extravagances, he said, that

* As at first constituted, the First Congressional District comprised the counties of Milwaukee, Waukesha, Walworth and Racine. After the State was divided into six districts, in 1861, it contained the same territory, and, in 1872, it was reduced by setting Milwaukee County off into the Fourth District.

'a gambler was unfit for earth, heaven or hell,' and that 'God Almighty would even *shudder* at the sight of one.'

"At that time, we had but one session of the Legislature, which had adopted mostly the statutes of Michigan, which allowed the court to exercise its discretion in granting stays of execution, etc. A suit came up against a man in the Second Ward, who had no counsel. The Judge ordered the crier to call the defendant. He did so, and the defendant appeared. The Judge asked him if he had anything to say against judgment being rendered against him. He replied, that he did not know that he had, as it was an honest debt, but that he was unable to pay it. The Judge inquired what his occupation was. He replied that he was a fisherman. Says the Judge, 'Can you pay it in fish?' The defendant answered that 'he did not know but he could, if he had time to catch them.' The Judge turned to the Clerk, and ordered him to 'enter up a judgment, payable in fish, and grant a stay of execution for twelve months,' at the same time remarking to the defendant, that he must surely pay it at the time, and in *good* fish, for he would not be willing to wait so long for 'stinking fish.' The next suit worthy of note was against William M. Dennis, our present Bank Comptroller. He, like his predecessor, had no counsel. His name was called, and he soon made his appearance. He entered the courtroom, wearing his usual smile, whittling with his knife in the left hand. The Court addressed him in a loud voice, 'What are you grinning about, Mr. Dennis?' Mr. Dennis replied, that he was not aware that he was laughing. The court inquired if he proposed to offer any defense! He replied that he did, but was not ready for trial. 'No matter,' said the Judge, 'there's enough that are ready, and the Clerk will enter it continued.' The next case, about which we recollect, was the trial of two Indians, who were indicted for murdering a man on the Rock River. They were also indicted for an assault, with intent to kill, upon another man, at the same time. The trial for murder came off first. They were found guilty, and sentenced to be hanged. On the day following they were tried for the assault, etc., found guilty, and sentenced to five years' imprisonment, and to pay a fine of five hundred dollars each! Gov. Dodge, however, deemed it too severe to fine and imprison a man after he was hanged, commuted it to imprisonment for life. The Indians were confined in a jail a year or two, but were finally pardoned by the Governor.

"Judge Frazer soon afterward went to Green Bay, and held a court, from where, for want of a jail in which to confine prisoners, he sentenced a man, for some trifling offense, 'to be banished to Turkey River.' After the court adjourned, he returned to Milwaukee on the steamboat Pennsylvania. She anchored in the bay, and the Judge, who was dead drunk at the time, was lowered by means of a tackle into a boat, and rowed to the landing at Walker's Point. From the effect of this bacchanalian revel he never recovered. His friend, Col. Morton, took him to his own house, called to his aid our best physicians, and all was done that human skill could devise, for the restoration of his health, but it was too late, the seeds of death had been sown; he lingered in great distress for four or five days, and breathed his last in Milwaukee, October 18, 1838, aged sixty-two years. The members of the bar, generally, neglected to attend the funeral; and having no relations in the State, he hardly received a decent burial. His remains were followed to their last resting-place by only two members of the bar (Messrs. Arnold and Crocker) besides a few friends. Years afterward the son of Judge Frazer came to Milwaukee and had the remains of his father removed to the new churchyard in the Fifth Ward and a proper tombstone erected over them."

Andrew G. Miller succeeded Judge Frazer as Judge of the Third District, receiving his appointment from Martin Van Buren, in 1838. When Waukesha County had been erected, in 1846, the people within its limits had a right, under the Territorial statutes, to two terms of court per year—in February and August; therefore Judge Miller came to Prairieville for the purpose of affording the citizens of the new county opportunity of having justice done them, in February, 1847. The court house had been building for some time, but not being fit for occupancy, Judge Miller opened court in the old Prairieville Academy, now the Lutheran Church. Albert Alden was Sheriff; George S. West, Clerk; Guy Carleton, Crier; John S. Rockwell,

United States Marshal; E. P. Cotton and D. H. Rockwell, Assistants; William Pitt Lynde, United States District Attorney, and Alexander Cook, Territorial District Attorney.

The first case was entitled, "Samuel K. Platt vs. David Douglass and John A. Douglass, action for trespass." Alexander W. Randall was the only attorney appearing in the case, which was decided in favor of the plaintiff.

The second case demanded a jury, and Whitney Hudson, O. M. Hubbard, George W. Porter, B. W. Knight, Joseph Marsh, Robert Curran, Chauncey H. Purple, William Brimmer, A. R. Hinckley, Elisha Pearl, E. B. Birchard and Charles Butterjunt, "twelve free, honest and lawful men of the county," had the honor of being the first jury. The survivors are few, among whom are Robert Curran and A. R. Hinckley. Some of them declare that the tests "to prove a juror's honesty were not always infallible; the declaration of free, honest and lawful sometimes being more of a form than of fact."

CIRCUIT COURT AND JUDGES.

After the adoption of the State Constitution, in 1848, Wisconsin was divided into a number of districts called circuits, for judicial purposes. The county of Waukesha (with Milwaukee) was included in the Second Circuit, as it still continues to be, and Levi Hubbell was the first Judge. He held his first term of court for this county in the Court House, at Waukesha, beginning November 13, 1848. Albert Alden was Sheriff; William S. Hascall, Clerk; J. E. Gallagher, District Attorney; Guy Carleton, Crier, and J. L. Delano, Doorkeeper. The first case was not for a jury; its title was: "Jason Downer vs. William A. Barstow and Robert Lockwood, for trespass." The damages claimed were \$500, and judgment for about half that amount was entered for the plaintiff, for whom Alexander W. Randall was attorney.

The first jury case was the second tried by Judge Hubbell, for Waukesha County, and came up for hearing Nov. 14, 1848. Its title was "John B. Johnson vs. Colon McVcan. A. W. & E. M. Randall, attorneys for plaintiff." The jurors were Archibald A. Anderson, Edwin B. Quiner, John Ferry, Luke W. Cross, Peter D. Gifford, Alfred G. Barr, Asa S. Watson, George McWhorter, Samuel Reed, Albert Fallon, Thomas Mayhew, Jr., and William Crombie, "twelve free, honest and lawful men of the county."

Three terms of court are held annually, at Waukesha, beginning the third Monday of March, the second Monday of June and the first Monday of December. Each term is a special term for all portions of the circuit. The Judges of the Second Judicial Circuit have been as follows: Levi Hubbell, 1848, till his resignation in 1856; Alexander W. Randall, appointed in 1856, by Coles Bashford, and resigned after being elected Governor, in November, 1857; Arthur McArthur, who was elected in April, 1857—holding a November term of court that year, after Randall's resignation, though his regular term of office began in January, 1858—re-elected in April, 1863, but resigned in 1869; Jason Downer, appointed to fill out Judge McArthur's term, held one term of court in 1869; and David W. Small, the present incumbent, who was elected in April, 1869, taking his seat in January, 1870, and re-elected in April, 1875.

The decisions of the bench in the Second Circuit are among the very ablest in the State.

COUNTY COURT AND JUDGES.

One of the most important offices provided for the people by the Constitution is the Judge of Probate or County Judge. He may, in addition to his legal jurisdiction over the estates of minors and deceased persons, exercise no little influence for good by kindly advice and wise counsel in the numerous unpleasant squabbles over unsettled estates and property liable to be squandered by unnecessary litigation.

The General Government, in the act organizing the Territory of Wisconsin, provided for Probate Judges, to adjudicate the estates of deceased persons, and also those of minors, idiots and the insane. Until the year 1850, the designation of the office continued to be Judge of Probate, when it was changed to County Judge, and the court to that of County Court. As

Waukesha County was not organized until 1846, of course previous to that time matters of administration of estates and the probating of wills were brought before the Milwaukee County Probate Judge.

The different County Judges since 1846 have been as follows :

J. W. Brackett, appointed by the Board of Supervisors June 8, 1846, from 1846 to 1849; Martin Field, 1850 to 1861; Samuel A. Randles, 1862 to 1869; Patrick H. Carney, 1870 to 1873; M. S. Griswold, 1874 to 1877; John C. Snover, 1878 to 1881.

HOW AND BY WHOM WAUKESHA COUNTY WAS NAMED.

The meaning of the word Waukesha (properly Wauk-tsha), is given elsewhere; but a recital of why, how and by whom it was given to the sixteen towns which now comprise this county, and legally adopted as its corporate name, will be of interest as well as of value. After it had become certain that the county of Milwaukee was to be divided, and in fact as soon as any talk was had about measures looking in that direction, the matter of choosing a proper name for the new county was a subject of consideration. Joseph Bond said in the old log store at Mukwonago, then kept by Andrew E. Elmore, that if Milwaukee should be divided into two counties, the new one must have an Indian name, suggesting two—Tchee-gas-cou-tak and Wauk-tsha—the former meaning burnt prairie or burnt land, and given by the Indians to the vicinity of Waukesha, and the latter meaning fox, being the Indian name for the Fox River, below Waukesha County. At the mass meeting held at Waukesha, late in 1845, to take into consideration the propriety and advisability of dividing the county, at which Joseph Bond presided, a committee was appointed to make a formal report. This committee received a written communication from Mr. Bond in regard to what the name of the county should be, in which he suggested two names, expressing a desire that some prominent Indian name given to the locality by its original owners and occupants should thus be handed down for future generations—the only reminder of a race which was rapidly becoming extinct. Those two names were “Wauk-shah” and “Tchee-gas-cou-tak,” as Mr. Bond wrote them. The committee decided that the latter was a “jaw-breaker,” and altogether too long a name for so small a county; but thought the former would do. In their report, however, a majority of the committee, not understanding Indian terms or pronunciation, struck off the final h and substituted w in the name adopted, making it Wauk-shaw. Mr. Bond opposed pronouncing the second syllable, “shaw,” as the Indians pronounced the a in shah like a in aster. But the name was adopted, notwithstanding this opposition from its author, by the meeting, and was so written in the bill soon after presented to the Legislature, which provided for the division of the old and the naming of the new county. But while the bill was before the Legislature, Alexander W. Randall, in response to a letter by Andrew E. Elmore and Joseph Bond, making the suggestion, had the w lopped off entirely; but when the act came to be published the name of the new county was not Wauk-sha, as it should have been, but Waukesha, a word of three syllables, pronounced in all imaginable ways, as suits each one who has occasion to use the term. But the change was otherwise unfortunate. The general public now believes that Waukesha means fox; it does not, nor has it any meaning whatever. But Wauk-shah or Wauk-tsha, had that been adopted, would have been interpreted fox by those who understood the Pottawatomie tongue.

The above reference to A. W. Randall should be explained by adding the fact that he was merely a lobbyist in favor of, and sent to Madison by, the sixteen towns which afterward became Waukesha County, and had the general welfare of the bill in charge, although Luther Parker, Samuel H. Barstow and Jacob H. Kimball were members of the Legislature and favorable to the division and name of the new county.

It will thus be seen that the honor of naming Waukesha County, although the name is not what he suggested, belongs to Joseph Bond, still a resident of Mukwonago; but the honor of emasculating the name, of injecting a syllable into it that destroyed its Indian nomenclature, making it a term that is neither Indian nor English; belongs to some one else. He was aided

and sustained in his views by Andrew E. Elmore from the first, and his suggestion was carried into effect by the co-operation and labor of Alexander W. Randall, at Madison.

The name of this county was originally Pottawatomie and it should therefore have, as nearly as possible the Pottawatomie pronunciation. That, as the term is now written, would be Wauk-ih-shah, the "i" in the second syllable being given just the slightest sound, like "i" in it, and the "a" in the last syllable like "a" in aster.

WAUKESHA COUNTY'S INDIAN NAMES.

The utmost confusion has attended the majority of all published efforts to properly spell, pronounce and translate the numerous Indian names for the lakes, rivers and localities in Waukesha County, of which names the old residents are justly proud. To indicate clearly the form and sound of these terms is not less difficult now than it always has been; but an endeavor has been made to furnish for the future the Pottawatomie translations of the more prominent terms. Other translators have endeavored to interpret the names given by the Indians to this vicinity, by their knowledge of the Winnebago, Saukie or other languages, and have made miserable failures. These names were bestowed by the Pottawatomies, and therefore can be properly rendered by the language of no other Indian nation or tribe.

In July, 1849, Joshua Hathaway, of Milwaukee, an old surveyor, gave to the public numerous translations of Indian terms, a portion of which are here produced:

"Much of the corruption in the pronunciation of Indian names has arisen from the want of a simple mode of spelling, and from an inaccurate habit of pronouncing words when correctly spelled. Thus in orthography, the sounds au, ahn and ee are incorrectly expressed by a, an and e; and the orthography au, ahn and ee is inaccurately pronounced by a, an and e or y. For example: Wau-kee-shah is incorrectly spelled Waukesha, and inaccurately pronounced (though very commonly) Walkyshaw.

"One more suggestion: When the double vowel ee occurs in the orthography of an Indian word, the syllable should have a thin, prolonged accent, more especially when it forms the middle syllable.

"Milwaukee, or Milouaqui, of the French settlers, is derived from the Indian name of our own river, Mahn-a-wau-kee seepe, first and third syllables accented. The word is Pottawatomie, probably, and the early French traders gave different significations to it, so that no one of them is reliable.

"Na-sho-tah, or twins, now known as Two Rivers. A glance at the place or at the map shows how appropriate the name.

"Mus-kee-go, from Muskeeguiac,* signifies cranberry—probably Pottawatomie.

"Waukesha, the name given to the county wrested from Milwaukee in 1846. As the county was appropriated without the consent of the owners, so it was very proper that the name should be. It is very probable that this name was never seen in English characters until the year 1846, when it was inscribed by the writer of this upon an oak-tree, standing where the town of Rochester now stands, in Racine County. The name was selected by me with the consent of Messrs. Cox and Myers, all being interested in the location, as a name for the future town, and so it appears on the sectional map of those times. When the town began to be settled shortly after, the name was changed by the inhabitants to Rochester, because, like the Rochester of New York, it had a water-power—no further point of resemblance being traceable. In 1835-36, I was engaged in subdividing the townships now comprising Racine County, and from some Indian boys lodged near my encampment, I made additions to my Indian vocabulary; and with the medium of a fox-skin collar, I obtained this name, understanding it to be Pottawatomie, for 'fox,' which is a favorite name with the nation for all crooked rivers, whose course, in this respect, resembles the eccentric trail of that animal. By giving the middle syllable a thin, prolonged, decided accent, and leaving the last syllable but half aspirated, you have the original, as given to me—Wau-kee-sha.

“Me quon-i-go, from Me-quan-ie-go-ick, likewise the name of the town. Mic-wan signifies a ladle*—a bend in the stream known by that name resembling a ladle, seems to have given the name. That the resemblance may be detected, it may be well to remark that the Indian ladle is a very crooked utensil, with the handle turned quite over the bowl.”

The above is here given more for its allusion to the name “Waukesha” than for correctness of translation, for it is generally very incorrect, and his statements, except as to Milwaukee, should be forgotten.

This chapter, although brief, was considered by the historian to be of sufficient importance to warrant the expenditure of some time in making it as nearly correct as possible. To this end, all the translations following have been submitted to and indorsed by a Pottawatomie, who lived at Milwaukee, Waukesha and Mukwonago sixty years. They are also pronounced correct by A. Vieau, who has spoken Pottawatomie a half-century.

Milwaukee is a manufactured name, and may mean anything whatever that any person desires to have it. The Pottawatomies called the place Mahn-a-wauk seepe. It conveyed the idea of a gathering-place by the river, seepe always meaning river—a good many; a full camp. Mr. Hathaway’s rule for pronouncing the term is about correct; but it cannot be made to appear on paper as it sounds to the ear when uttered in the peculiar hitching pronunciation and aspirated accent common to the Indians.

Waukesha is also a corruption; the original name for fox being Wauk-tsha, a word of two syllables, with the accent on the last. The “t” in the second syllable should hardly be made distinguishable, and the “a” should be sounded like “a” in aster. Wauk-tsha was Pottawatomie for fox. Fox River was Wauk-tsha seepe, below Mukwonago; above that point, it was Tchee-gas-cou-tak seepe, or Fire River; also Pishtaka.

The Indian village which stood where Waukesha now stands was not even Wauk-tsha, but Tchee-gas-cou-tak; accent on the final syllable, the “a” of which should sound like “a” in aster. Its meaning was “burnt, or fire-land.” Prairie country began near Waukesha, and according to the Pottawatomies, it was much frequented by fires, as is common to all prairies; hence its name, burnt or prairie-land.

Muk-won-a-go, accent on the final syllable, means bear; black bear.

Musk-ee-guack, accent on the final syllable, means sunfish. Muskego was derived from this term.

What is now known as Muskego Center, as well as Little Muskego Lake, was called by the Indians, Puk-woth-sic; a high piece of ground, a hill. The word should be uttered with the chief accent on the third syllable.

Nashotah has been but slightly emasculated by the whites. The correct Indian term was Nee-sho-tah; accent on the final syllable, with the “a” like “a” in aster. It means “two,” or “twin waters.” No one who has seen the two lakes in the town of Summit, which go by this name, will doubt its appropriateness. Literally, Nee-sho-tah means “two sons at once.” Nee-sho-tah nee-peesh means twin waters, or two lakes.

Pewaukee is from Pee-wauk-ee-win-ick, which means “the dusty place.” Dr. I. A. Lapham, in 1843, was the first to assail the vulgar translation of “Snail,” or “Snail Lake.” He did not know* what the translation should be, but declared it should not be snail. Had the Pottawatomies intended to name that body of water “Snail Lake,” it would have been called “Nee-nahs,” the “a” sounding like “a” in aster.

Ottawa, simply the name of an Indian tribe, was pronounced Ut-to-wau, the second syllable being hardly heard.

Coo-no-mo-wauk, from which was derived the name Oconomowoc, was the Pottawatomie term for distinguishing a waterfall in that vicinity.

As-sip-uhn, giving a sonorous accent to the last syllable, means raccoon. It is the name of a small stream flowing through the town of Oconomowoc, whence doubtless came the impression that Oconomowoc meant raccoon.

*Am-ee-quon means dipper, or ladle, but has no connection with the term “Mukwonago.”

*In 1844, Dr. Lapham concluded “Pee-wauk-ee-wee-niog (correct except the final syllable) should be translated “Lake of Shells.” The historian, however, has no doubt that “dusty place” is correct.

John A Rice M D

MERTON

Menomonee is from *Mih-no-min-ee seepe*, or "Wild Rice River." More properly the term should be rendered "rice" simply, as nothing was wild with the Indians.

Bark River was called *Coo-no-mo-wauk seepe* by the Pottawatomies.

The springs at Waukesha were called *Tah-kip nee-peesh*; that is, spring water.

INDIAN OCCUPANCY.

Just when the beautiful lakes, groves and prairies of Waukesha County were first occupied by the Indians, or whether the Indian tribes, as the whites now know them, had any predecessors in this vicinity, or precisely what tribes have from time to time made this fair land their hunting-grounds, battle-fields and burial place, will never be known. No record of them is left, and tradition, vague and unauthoritative at best, leads us but a short distance into the past, furnishing the most unsatisfactory fragments of information. Waukesha, however, seems to have been an important point in recent Indian history. So far as actual records determine, the Algonic tribes claimed and in fact held sway over this and other portions of Wisconsin during a longer period than any others. There is no doubt that possession was the only title the aborigines ever had to the soil among themselves, and the Government also recognized the ownership of the tribe found in possession when any final treaty was made. In earlier days, first one tribe and then another would be in possession, owing to the numerous wars in which they engaged, driving each other from place to place; but the last occupants were mainly Pottawatomies. After 1820, only a few straggling Winnebagoes and Menomonees infested what is now Waukesha County. The Pottawatomies, however, had several villages within its limits, traces of which can be distinctly seen at several points on the Fox River and some of the larger lakes—notably near Carroll College, at Waukesha, at Mukwonago and at Pewaukee. In 1827, Ebenezer Childs found several hundreds of them at Pewaukee Lake, and four hundred warriors where Waukesha now is, their village extending about a mile along the ridge south of where Carroll College is, also up and down the Fox River.

In 1835, George W. Featherstonhaugh, in his reports to the Government, mentioned that a large village of peaceable Pottawatomies was located where Waukesha now is. Mr. Childs mentioned (1827) that the Winnebagoes had been attempting to incite this village of Pottawatomies to join them on the war path; and that, although this was not accomplished, the warriors were somewhat ugly and threatened to make him trouble. They let him go in peace, however, and did not aid the Winnebagoes in their assaults on the whites, nor aid them in their attempt to resist the arrest of the Winnebago murderers in 1828. Afterward, they became very friendly to the whites. In fact, this tribe was always remarkable for its peaceable relations with other tribes as well as with the whites. This is the testimony of all old settlers. In 1639, they occupied more or less of a strip of country from Green Bay extending below Milwaukee River, in company with Sauks and Winnebagoes.

Tradition has it that the Winnebagoes occupied the Waukesha and adjoining country over two centuries ago, having fled before the Spaniards from Mexico. This has some show of truth, as the tribe was named *Weene-be-go* by the Algonquins, a term signifying fetid, stinking or salt water. The French rendered it *Ouinnebago*, which finally degenerated into *Winnebago*. The truth of this tradition is more strongly fortified by the indisputable fact that the Winnebagoes knew and described the Spaniards, always manifesting the most intense hatred of them, when first discovered by the whites. But whether or not this is true, or whether they did actually reside in Waukesha, is of little importance to this work, and of still less interest to the county's present inhabitants. Of the Pottawatomies, with whom the whites became well acquainted, and who frequently furnished the early settlers with shelter, food, guides and warning information as to the movements of hostile tribes, something more should be said. Their graves, corn-hills and camp-fire remains have not all disappeared from the county even yet, and many families have numerous interesting relics obtained from them safely stored away. The men, or "bucks," were expert hunters, athletic and lazy. No such *embonpoint* was ever discovered among them

as is common everywhere with the whites, extreme laziness being universal. The women, or "squaws," did all the work while in camp, and generally carried their smaller children and bore all the other burdens when on the march. No matter how long and tedious the journey, they were not relieved by the warriors. A local writer, speaking of these Indians and the first settlers, said :

"It is well known that they continued to spend a portion of every year among the lakes and rivers of Waukesha County for years after the first settlements were begun, and consequently our oldest settlers became familiarly acquainted with hundreds of them. The disposition of the aborigines is uniformly described by those who knew them best, as having been extremely good. Malicious criminals were almost unknown among them, and the settlers suffered very little from petty depredations on the part of their copper-colored friends. The women are said to have been as virtuous generally as are those of an equal population of white people, at least in their relations with their own race.

"The manner of burial practiced by the Pottawatomies was similar to that of many of the wandering tribes to-day. The body of the deceased was clothed in the blanket worn during life, a pipe, tobacco and food were placed in its hands for solace during the journey to the happy hunting-grounds, and it was then set upon the ground with an enclosure of branches to keep it from the birds and beasts of prey, and was left to molder into dust. The variations from this manner of burial were few and of no importance. M. D. Cutler, who settled in Waukesha in 1834, states that he has seen a dead infant bound to the limb of a tree, and on one occasion discovered the body of a man tied in a standing position by the forehead, neck and waist, to the trunk of an old oak ; but in the latter case, also, there was the fence of broken limbs to protect the corpse from wild animals. The method first described was almost invariably practiced.

"None of these Indians were permanently located. During the season of corn-planting, their women and children occupied the higher lands among the lakes and rivers throughout the country, and pursued their primitive methods of agriculture, while the adult males spent the time in hunting, fishing and lounging about the camp. As winter approached, they removed to some rendezvous farther south, returning with the ensuing spring. It was with such people that our three young Hoosiers [Morris D. and A. R. Cutler and Henry Luther] foregathered during their explorations in the neighborhood of Waukesha. With the assistance of their dusky friends, they were enabled to proceed with promptness and thoroughness. They went to Prospect Hill on the east, and from that delightful eminence looked down the Muskego Valley, with its chain of silvery lakes stretching for miles to the south, and in every other direction saw the undulating country covered with oaks and maples. To the west they journeyed among the hills and the lakes of Genesee and Delafield, and were shown the fishing-grounds of Pewaukee on the north by these friendly Indians."

After the Black Hawk war of 1832, and the subsequent treaty of 1833, the Indians mostly disappeared from this vicinity, and, in 1836, had no right here whatever, though wandering bands would return every spring, to fish and beg, for a period of twenty-five years. From first to last, they never did anything worse, the whites living near them in perfect friendliness and security. The large village, which was located where Carroll College now stands, and south of it, was a brigade of huts about twelve feet in height, and from twelve to twenty feet in diameter. They were made of poles, covered with bark or skins. This village was a permanent one until 1837, except during the winters. Some of the "bucks" were constantly making expeditions, north as well as south, but the huts were put up year by year, as the first settlers found them, until late in 1837 ; they were then transported by the Government, with their occupants, to a new reservation. Near this village, called Prairie Village, whence Waukesha took its first name of Prairieville, were some noted cornfields, the hills in which the maize was planted being plainly and unmistakably discernible yet. The reason for this is that the Indian method of corn-planting was far different from that in vogue among the palefaces. They made large heaps, from three to five feet across, and as near together as convenient, and in them planted

their corn year after year. The heaps or hills thus became as hard and permanent as any other elevation or depression of the soil, and those at Waukesha Village, if left undisturbed, will be plainly seen a thousand years hence. The present owners are determined to preserve them as they now are, fortunately, for the benefit of future generations.

The Indian trails in some portions of the county had been worn very deep by long years of use. The one leading to what is now known as Bethesda and Mineral Rock Springs was twenty inches in depth, and some leading to Pewaukee, across the prairie from the Fox River, were about two feet below the surface when the first settlers discovered them. They have been obliterated by the plow after serving thousands of years, perhaps, as the best highways the country afforded.

The leader of this band was, according to M. D. Cutler and others who knew them several years, a man, not a chief, called "Wauk-tsha," whose name will be forever perpetuated in the corporate title of the town, city and county in which he once lived. He is described as tall, athletic, proud in his bearing, dignified and friendly, and as going about after the manner of a peafowl, anxious to show his richly-decorated skins, strings of beads and shells, and tufts of feathers. He had no trophies in the way of scalps or human bones; nor did any members of his band, according to the testimony of the early settlers who lived near him.

Mukwonago was a very prominent point with the Pottawatomies, more so than any other in the county. How long this was the case of course cannot now be stated. By some, it has been designated as the "Pottawatomie capital." Whether it was or not is of little consequence; it certainly was their leading village in the county as far back as Vieu's and Juneau's times. It was called Mukwonago also by the Indians, because, having returned from a fruitless hunting expedition up north and found here bears enough for their meat, they desired to mark the event and the place. Muk-woh, accent on the last syllable, in which "o" sounds like "o" in oats, is the Pottawatomie for bear; and Mukwonago is the "place of the bear." Here they raised corn in very large quantities—Solomon Juneau says as much as 5,000 bushels per year. Here they also had permanent lodges, to which they returned every spring for planting, hunting and fishing. It was a fine place—beautiful as nature could make it, and in the midst of a rich-soiled country. Their large fields of corn-hills were plainly visible several years after the whites settled at Mukwonago. Near by, on land then owned by H. H. Camp, now deceased, the Indians had a smooth and level race-course, on which, at stated times, they gathered in immense numbers and indulged in the most novel and exciting horse-races imaginable; and even after the whites had settled in the county in considerable numbers, these races with wild ponies were continued, at which the pioneers for miles around were always present, and apparently delighted spectators.

At Mukwonago also lived the last chief of the Pottawatomies, or leader of the bands at that point. His name was Wau-be-kee-tschuk, and was the only leader known by the whites. He was blind, hence his name, "Kee-tschuk," meaning eyes. The next man to him in tribal importance was Top-o-wihs (more properly Tauh-pauh-wihs), a very kind man. These important men had larger houses or wigwams than the others, and were blessed with the privilege of having more wives. To illustrate that Top-o-wihs was a kind man: Once, while riding on the road from Milwaukee, he found a trunk which had been lost from a traveler's wagon. Top-o-wihs hid the trunk, without disturbing its contents, in the brush, returned to Mukwonago and told the whites of it. In a few days, a man returned, inquiring for a trunk. Top-o-wihs was found and kindly took his pony and rode fifteen miles to the place. The man was the rightful owner of the trunk, but paid the Indian nothing, not even a dinner, for his journey of thirty miles to make known its whereabouts. This made him angry, and he declared, on his return to Mukwonago, that if he ever found another white man's trunk he would break it with his tomahawk and take whatever of value it contained.

During several years after 1837, the year the Pottawatomies went farther west, they returned to the vicinity of Mukwonago, sometimes in parcels of 100, for the season, and occasionally staying in the neighboring woods through the winter. They have not been back in

any considerable numbers since about 1860; and all those who returned in later years were gray and decrepit. They spoke fondly of Waukesha County, however, and remarked that they would like to return to it if the whites had not plowed so much of the land, felled so many of the trees and killed so much of the game. But they never will return, and more of the local history of a once powerful and happy nation will never be known than is here recorded.

After Andrew E. Elmore opened a store at Mukwonago, he learned the Pottawatomie language, and, on this account, got the custom of all the Indians in the vicinity as long as they returned, which was during nearly twenty years after they ceased to revisit any other portion of Waukesha County. Some of them came from the head-waters of the Des Moines River, their new reservation, for the express purpose of trading their furs to a merchant who understood their language.

The manner in which these Indians dressed was very simple. The hair was allowed to grow at will by both male and female, and the "bucks" had no more beard than the "squaws." The former wore, in summer, when the early settlers arrived, only breech clouts; but in winter they added leggings of skin and square blankets furnished by the Government. The latter were far less elaborate in their toilette than their white sisters of to-day, generally wearing about the same style and quantity of clothing as the males. After 1834, calico shirts became more common, and were considered a great luxury; also, an occasional pair of pantaloons would be discovered on either a "buck" or a "squaw"—whichever first obtained possession of the garments generally got into them.

When the first white women came to Waukesha, the Indian women were deeply interested in their appearance and dress, and spent hours in watching and jabbering about them, in the most earnest manner imaginable. The youngsters—both boys and girls—ran about naked in summer, their greasy skins shining like polished mahogany.

The principal articles of food were fish, wild rice, muskrats, rabbits, prairie fowls, roots, Indian corn and wild fruits. The corn was raised in greater or less abundance, according to the industry of the squaws. Fish and game were furnished by the bucks; but they never disgraced themselves by hoeing corn, gathering wild rice, plucking berries or crushing corn. They also brought game home, to be skinned, drawn and prepared for the spit, or the smoking-crotches, by the squaws. It was considered enough for them to do the mere shooting and trapping.

A dish which was said to be very palatable was made by boiling fish, wild rice and Indian corn together, with a seasoning of spicy berries or herbs. This mixture was called *tassinomin*.

Their ceremonies at marriage, death and burial were as difficult to describe as they seemed ridiculous to the early white settlers. They had several burial places—one near Muskego Lake; one where the Park Hotel is, in Waukesha; several on the lakes at Oconomowoc; one at Mukwonago; one near Pewaukee, and perhaps others. Sometimes the graves were covered with "shakes," stuck up crosswise (see plate "B"); sometimes with logs (see Fig. 6, plate "D"); sometimes with brush or stones, and frequently bodies were fastened upright to trees, guarded from the depredations of beasts and birds for a certain number of days, and then left to decay.

The Indians found in this vicinity lived to a great age, carried an erect figure till death and were hardly ever ill. Venereal and all contagious diseases were said to be entirely unknown among them, thus showing that their simple habits of life had many redeeming features. Small-pox, and various other contagious diseases introduced by the whites, almost always resulted fatally with the Indians.

As they left no recorded history, the memory of old settlers has been depended on for any information concerning those from whom the soil now occupied by the whites was wrested by the sheer power of superior force, and that is more or less imperfect. However, everything should be preserved that contains the remotest reference to their appearance, habits and customs; for the day is not distant when history will record the utter extinction of a race that

owned and occupied a whole continent, and gave it up, with the graves of their fathers, without the return of any value.

HUNTING AND TRAPPING.

But very few persons have any idea that hunting and trapping are carried on by professionals in Waukesha County for profit, and that a single trapper may clear several hundreds of dollars per month in the business. In early times, Waukesha County was a rich field for trappers, owing to the large number of lakes within her borders. This was known to the early traders, who sent agents, usually Indians or half-breeds, from Green Bay, or across from Prairie du Chien, for furs; and finally Mr. Vieu sent his son to remain in the county during portions of the year, to collect the furs of the Pottawatomies. There are still two professional trappers residing quietly in the county, the most successful being A. Vieu, living near Little Muskego Lake. Every season an agent of the leading fur dealers of Chicago, and agents from the Milwaukee fur dealers, visit Waukesha for the purpose of contracting for furs. The last season was not a favorable one, but Mr. Vieu took between 300 and 400 muskrats, fifty minks and about a dozen otter in a month.

The muskrat skins are valued at about \$20 per hundred; mink at from 75 cents to \$2 each, and otter at from \$9 to \$20 each. Several Indians who formerly lived in the county return annually to set their traps, and then, after going to Milwaukee to sell their skins, return to the reservation to purchase supplies with the money thus earned. The casual observer would naturally suppose such persistent trapping would soon exterminate the fur-bearing animals in this county; but the trappers say they see no material decrease, that breeding goes on just about as rapidly as destruction.

The value of furs taken in Waukesha County will probably average \$2,000 per year.

AN EARLY EXPERIMENT.

In the year 1842, there came over, under the leadership of Thomas Hunt, a party of Englishmen and women, thirty-one in number, calling themselves the "Owenite Socialists," and united, according to that system, one of the best in theory, but a failure in practice, as the sequel proves. They had among them all, those who came and those who remained in England, a capital of several thousand dollars. They first purchased 160 acres of land, and elected a butcher by the name of Johnson farmer-in-chief, then went to work. Although they added to their first purchase of land, and labored hard for several years, yet the enterprise would not succeed. Being nearly all trained mechanics, they were unfitted for their chosen vocation, and as petty differences and jealousies constantly arose, adding to the unpleasantness of their situation, they at last decided to disband. As everything, except the women, had been held in common, so was everything equally divided, those at home receiving their share with the rest. They lost about 33½ per cent of their investment. The plan was to make Waukesha County the headquarters for a grand system of Owenitism, but it failed.

RESIDENTS OF 1838.

The first census taken in the territory now known as the county of Waukesha is considered of sufficient importance to be made the subject of a separate chapter in this work. What follows is an exact copy of the census report made by the United States Government in 1838. The census-takers, whoever they were, committed some errors, perhaps unavoidably, as several unmarried men are credited to more than one town, and several prominent men, who had been residents of the county at least two years, and who reside within its borders still, were not mentioned. As to the correctness of names, the historian discovers everywhere that many persons change the spelling of their names as years go on, sometimes from a mere whim, and sometimes for good reasons, and it will thus be seen that, while one form of spelling was correct in 1838, another form has been adopted by the parties since that time. In the following list, the number

in each family, with the name of "master, mistress, steward, overseer or other principal person" is given:

Muskego.—Stephen D. Jane, 8; Henry Houck, 4; Conrad Martin, 1; Michael Myers, 9; Homer Hawkins, 1; H. V. French, 3; Edward Hart, 3; Thomas P. Sixton, 8; John M. Ives, 1; Levi G. Guile, 8; Henry H. Dana, 4; Calvin Douglas, 4; Ebenezer Harris, 7; James Fields, 6; George Green, 1; H. Cone, 4.

New Berlin.—Sidney Evans, 3; William Parsons, 2; Daniel P. Johns, 2; Alvah Harrington, 4; John S. Palmer, 5; Ira Carter, 2; S. R. Hawkins, 6; Timothy Burnam, 1; Joey Stewart, 5; George McQuarter (McWhorter), 6; Waterman Fields, 3; Nelson Smith, 1; H. Hollister, 1; A. R. Whipple, 1; Ransom Ruse, 3; John McWhorter, 6; Curtis Davis, 4; Joseph D. Jane, 2; Hugh Wedge, 1; Hugh McIntyre, 2; William Wedge, 3; John H. White, 2; David Elliston, 2; Luther Parker, 6; S. E. Hall, 2; Isaac De Witt, 1.

Brookfield.—William P. Clark, 3; Augustus Story, 7; H. H. Brannon, 4; E. Griffin, 2; John Sears, 1; Robert Curran, 8; Gerrey Putney, 5; Volney Moore, 3.

Menomonee.—Robert Stoddard, 1; Harvey Hawkins, 1; Thomas Staunton, 3; William R. Hesk, 6; Charles Raymond, 7; William Pettys, 1; M. Cowen, 4; Mathias Burgot, 1.

Lisbon.—James H. Thomas, 5; David Bonham, 4; John Gaitly, 1; M. Stanley, 3; Samuel Dougherty, 8; Thomas Ralph, 4; William Elliby, 1; Edward Smith, 6; James Weaver, 12; George Elliot, 9; John Weaver, 5; Jacob Norris, 3; Lucius Bottsford, 3; Arthur A. Redford, 8; Patrick O'Raffeda, 5; Fred B. Otis, 2; M. Conley, 4; P. N. Reay, 1.

Merton.—Elias Palmer, 8; Luther Powers, 2; Ralph Allen, 1; Thomas B. Cole, 1; J. Short, 1.

Oconomowoc.—Russell Frisby, 8; M. Morris, 7; Thomas Salters, 2; Charles Wilson, 4.

Summit.—Horace Putman, 2; Samuel C. Leavit, 7; Barker Hildreth, 3; Jesse Hildreth, 4; Richard Hardell, 9; Charles B. Sheldon, 1; J. D. McDonald, 1; B. Harper, 1; William Flusky, 9; M. H. Fairservice, 5; Curtis B. Brown, 8; Andrew Baxter, 6; Seth Reed, 5; Major Pratt, 6; Onslow Brown, 7; Jonas Folts, 2.

Ottawa.—John Vallin, 8; George S. Hosmer, 3.

Delafield.—Philip S. Schuyler, 5; George Paddock, 3; Joseph Ward, 4; A. N. Foster, 3; Daniel Plumley, 1; Solomon White, 1; H. Campbell, 3; N. Thomas, 1; Homer S. Finlay, 4; H. C. Skinner, 6; Addison Ross, 2.

Pewaukee.—Daniel W. Kellogg, 6; S. Barnett (probably Morris S. Barnett), 1; Henry Clarke, 1; James O. Harry, 2; Andrew McCormick, 5; Francis McCormick, 4; Asa Clark, 10; Charles Bell, 3; Alfred Morgan, 5; Truman Wheeler, 10; I. Porter (probably Israel W. Porter), 10; Ethan Owen, 8; Harry F. Bigelow, 4; B. Rawson, 2; Zebulon Bidwell, 4; Isaac Judson, 4; R. Fuller, 10; L. Bidwell, 5; Hamilton Nelson, 3; Joseph Remington, 4; Waldo Rosebrook, 9; Thomas H. Olin, 4; Nelson Olin, 4; Richard Griffin, 2; J. W. Woodworth, 3; E. N. Maynard, 2.

Waukesha.—David Jackson, 11; Henry Brown, 3; George P. Goulding, 15; Allen Clinton, 11; Morris D. Cutler, 1; A. R. Cutler, 1; Robert Love, 9; Nathaniel Walton, 9; Richard Smart, 1; Isaac Smart, 4; Sabina Barney, 7; P. N. Cushman, 8; B. S. McMillan, 3; Madison Cornwall, 6; E. D. Clinton, 8; Ezra Mendall, 12; James Rossman, 1; Moses Ordway, 1; A. Foster Pratt, 3; G. A. Thompson, 1; John Y. Watson, 8; J. Sayles, 3; I. Whiteher, 4; Isaac Carpenter, 2; Daniel Thompson, 4; Roswell Hill, 1; Edward Kavanaugh, 2; J. M. Bidwell, 1; Edward W. Goodnow, 1; T. C. Jones, 1; Ira Potter, 2.

Genesee.—Joseph Marsh, 3; Orrin Brown, 3; Anson Denny, 8; Abram Bolser, 2; George Bolser, 7; William C. Garton, 4; William Cobb, 1; Charles Reynons, 6.

Eagle.—A. R. Hinkley, 3; Eb Thomas, 5; Thomas Woolley, 1; John Hearre, 5; Joseph Bias, 4; Thomas Coates, 1; John Taylor, 1; Josiah De Wolf, 6; A. Harris, 5; Thomas Orchard, 3; Andrew Scholfield, 7; Charles Cox, 5; William Sherman, 5; Daniel Bigelow, 5; Samos Parsons, 5; B. Whitehouse, 1; B. Severance, 5; N. Sherman, 3.

Mukwonago.—William Ellis, 1; John Burnell, 6; Robert Wilkinson, 1; James Ewell, 5; James Smart, 8; William Long, 1; Thomas Sugden, 3; William Cross, 5; Lyman Jones (should be Simon), 9; George P. Thompson, 2; William Sugden, 5; Joseph Smart, 5; William Moody, 3; David Orendorff, 6; Webber Andrews, 5; James K. Orendorff, 5; John Stockman, 8; Whiting Hudson, 4; Henry H. Camp, 2; Wilder Chapin, 3.

Vernon.—Gains Morgan (should be Gains Munger), 6; Sherman Morse, 5; Isaac Blood, 5; Jesse Smith, 6; P. Putman, 3; Curtis W. Hezilton (Haseltine), 2; John Dodge, 2; John Thomas, 7; Orrin B. Hesilton (Haseltine), 2; Aaron Putnam, 3; Lazarus Whipple, 1; Nelson K. Smith, 5; Asa A. Flint, 3; Orrin Haseltine, 10; Almon Welch, 2; Joseph P. Osborn, 1; M. Barnett, 4; Amos Putnam, 1.

Just how far the above statement is faulty, the historian is not able to determine; Lyman Goodnow, Deisner, John Gale, Jr., C. C. Olin, William T. Bidwell, Sewall Andrews, A. C. Nickell, Martin Field, Samuel Winch, C. B. Stockman, Lyman Hill, and, doubtless, several others were here when the census was taken. Some of them do not appear in name in this report, because they were merely boarders with those whose names are given. The document, however, is accurate enough to be of considerable value and great interest.

PLANK-ROADS.

In the early days of the settlement of Waukesha County, little was known or thought of railroads. Plank-roads were the best highways then built, and to them the people, therefore, gave their undivided attention. Although lasting but a comparatively brief period, they were actually of considerable importance in their day, enabling farmers to haul respectable loads to market, at a fair rate of speed—something they otherwise could not have done.

One of the first plank-roads in Waukesha County was incorporated in 1846, as the Lisbon & Milwaukee. Afterward, the Lisbon & Hartland road was incorporated, and still later, in 1854, the two were consolidated. But one of the most important was the Milwaukee & Waukesha Plank-road, incorporated in 1852, by Joseph Cary, George Burnham, C. A. Hastings, C. C. Dewey, Bigelow Case, Ditmar Fishback and Joseph Guild. It extended through Brookfield, the southwest corner of Pewaukee, and to Waukesha Village.

The branch to Watertown turned northward in Section 30, in Brookfield, and passed through Pewaukee, Delafield and the southern portion of Oconomowoc.

The Milwaukee & Waterford passed through the town of Muskego. It was incorporated in 1848.

The Milwaukee & Janesville road, incorporated in 1848, extended through New Berlin, Vernon, a small corner of Muskego and Mukwonago. It was a good thoroughfare, and has carried an incalculable amount of trade and travel to Milwaukee.

In 1854, the county had some trouble with the plank-roads then in existence, as to taxation, the assessors listing them as liable to the county and town taxation. Under the statutes, the plank-road companies refused to pay the taxes thus levied, and Edward G. Ryan, now Chief Justice of the Supreme Court, decided that the tax of 1 per cent on gross earnings exempted railroads and plank-roads from all other taxation.

The only roads in Waukesha County which now maintain toll-gates are the Milwaukee & Brookfield and the Milwaukee end of the old Milwaukee & Watertown roads. This latter road was a great help to Oconomowoc.

RAILROADS.

Waukesha is one of the few counties that owe but little of their wealth and importance to the railroads. The great market of Milwaukee is so near that much more than half of all the products raised in the county is taken by the farmers themselves direct to the commission men and warehouses of that city, thus saving the waste of handling twice, as well as the cost of transportation. Nevertheless, Waukesha has made liberal use of her railway facilities, which privileges and facilities she has enjoyed longer than any other county in Wisconsin.

Milwaukee & Waukesha Railway.—The very first railroad ever attempted or completed in the State, and which still has existence in this county in the Prairie du Chien Division of the Chicago, Milwaukee & St. Paul Railway, was conceived in the desire of Milwaukee to have a better communication with the surrounding country—on which she was depending for her commercial greatness—than plank-roads. This first railroad was built by the Milwaukee & Mississippi Railroad Company, which was organized early in 1849. Its first Directors were Byron Kilbourn, John H. Tweedy, Dr. Lemuel W. Weeks, Anson Eldred, James Kneeland, Alexander Mitchell, Erastus B. Walcott, E. D. Clinton and Edward D. Holton. Byron Kilbourn was its first President.

Perhaps the most authentic account of the inception of what is now a branch of one of the greatest railway corporations in the world, and which was the pioneer line in Wisconsin, is the following extract from a speech, delivered in 1858, at the Chamber of Commerce in Milwaukee, by E. D. Holton, on railroads:

“It was a great undertaking for that day, under the circumstances. We were without money, as a people, either in city or country. Every man had come here with limited means—each had his house, his store, his shop, his barn, to build, his land to clear and fence, and how could he spare anything from his own individual necessities? Some wise men looked on and shook their heads, and there were many croakers. But in the minds of those who had assumed the undertaking, there was a sober, earnest purpose, to do what they could for its accomplishment. It was demanded of our people that they should lay aside all their feuds and personalities, and, one and all, join in the great work. To a very great extent this demand was complied with, and gentlemen were brought to work cordially and harmoniously together, who had stood aloof from each other for years. The spirit of union, harmony and concord exhibited by the people of the city was most cordially reciprocated by those of the country, along the contemplated line of road. Subscription books were widely circulated and the aggregate sum subscribed was very considerable. I said we had no money; but we had things, and subscriptions were received with the understanding that they could be paid in such commodities as could be turned into the work of constructing the road. This method of building a railroad would be smiled at now, and was by some among us then. But it was, after all, a great source of our strength, and our success, at any rate for the time being. The work was commenced in the fall of 1849, and for one entire year the grading was prosecuted and paid for by orders, drawn upon merchants for goods, by carts from wagon-makers, by harness from harness-makers, by cattle, horses, beef, pork, oats, corn, potatoes and flour, from the farmers, all received on account of stock subscriptions, and turned over to the contractors in payment for work done upon the road. A large amount of the grading, from here to Waukesha, was done in this way.

“Upon seeing the work go on the people said everywhere, why, there is to be a railroad, surely; and the enterprise arose in public confidence. The Directors having concluded they could make headway against all difficulties, in casting up the road-bed, the pressing inquiry was, how can the road be ironed? Iron costs money, and money we have not got. In this emergency a mass meeting of stockholders was called at Waukesha, in the spring of 1850. About three hundred people assembled, mostly farmers. The question propounded was, how can \$250,000 be obtained for the purchase of iron to reach from Milwaukee to Whitewater.

“It was during this meeting, and after much discussion, that Joseph Goodrich, of Milton, said: ‘See here; I can mortgage my farm for \$3,000, and go to the East, where I came from, and get the money for it. Now, are there not one hundred men between Milwaukee and Rock River, who can do the same? If so, here is your money. I will be one of them.’

“This was a new idea. It was turned over and over. It had serious objections, but, after all, it was the best thing that was presented, and the plan was adopted. And here arose, so far as I know, the plan of raising farm mortgages in aid of the construction of railroads. The one hundred men were found, who put up the required number of mortgages, and an attempt was made to negotiate them. This was found, at first, impossible. It was a class of security

entirely unknown, and no market could be found for them. In the attempt to negotiate these mortgages it was found that while they would not sell, the bonds of the city of Milwaukee would sell. Whereupon an application was made to the city to come forward and issue \$234,000 of her bonds, in aid of the road. The city promptly and cordially responded. The bonds sold for cash at par; the money was at once invested in iron, at very low prices, and the success of the Milwaukee & Mississippi Railroad was set down as fixed."

The preliminary survey of the line was finished July 9, 1849, to Waukesha, and the road was completed, in a rough way, to the village of Waukesha, and cars were running in February, 1851; to Eagle in January, 1852, and to Milton, in Rock County, during the year 1852.

To return to the corporate concerns of this branch of the Chicago, Milwaukee & St. Paul Railway: The first bill to incorporate the company was introduced in the Territorial Legislature in January, 1847, and approved by Gov. Henry Dodge, February 11, of the same year. Its text was said to have been written by Alexander W. Randall. The commissioners named in the original charter were William A. Barstow, Norman Clinton, Alexander W. Randall, and Alexander F. Pratt, of Waukesha County, and Paraclete Potter, Daniel Wells, Jr., Edward D. Holton, Byron Kilbourn and Lemuel W. Weeks, of Milwaukee County. On the 23d of November, 1847, the commissioners opened books at Waukesha and Milwaukee, for subscriptions. The next year the company's charter was amended, so that the road might be extended to Madison and the Mississippi River, and to allow its capital stock to be increased to the sum of \$3,000,000. On the 5th of April, 1849, the commissioners announced that the \$100,000 required, had been subscribed and 5 per cent of it paid, and that an election could therefore be had. The election resulted: Byron Kilbourn, President; Lemuel W. Weeks, E. D. Holton, Alexander Mitchell, E. B. Wolcott, Anson Eldred, James Kneeland, John H. Tweedy, E. D. Clinton, Directors. Benjamin H. Edgerton was chosen Secretary and Walter P. Flanders, Treasurer. In February, 1850, the name of the company was changed, by act of the Legislature, to the "Milwaukee & Mississippi Railway Company." At that time, individuals had paid over \$300,000, and the city of Milwaukee \$244,800 in bonds and cash. On April 15, 1857—about seven years after ground was broken at Milwaukee, the road was completed from Lake Michigan to the Mississippi River, at Prairie du Chien. The road had cost \$5,500,000, and its equipment a trifle over \$1,000,000.

In 1860, Lewis H. Meyer, William P. Lynde, Allen Campbell, William Schall, John Wilkinson, John Catlin, Hercules L. Dousman and N. A. Cowdrey formed an association for the purchase of the Milwaukee & Mississippi Railway, and the new company took the name of the Milwaukee & Prairie du Chien Railway Company, L. H. Meyer, President. This corporation managed the road until 1866, when it was absorbed by the present Chicago, Milwaukee & St. Paul Railway Company, of which Alexander Mitchell has been always President, and S. S. Merrill, General Manager, and forms a part of the largest line of road in the world controlled by a single corporation.

Of the original commissioners of this, the first line of railroad in Wisconsin, Edward D. Holton, of Milwaukee, Edmund D. Clinton, of Brodhead, Lemuel W. Weeks, of Oconomowoc, and Daniel Wells, Jr., remain in the land of the living. They undoubtedly did not suppose, when announcing with much emphasis that for March, 1851, the receipts of the road were over \$45 per day; \$55 to \$60 per day for April, and at the middle of May had reached the astonishing figure of \$114 per day, that the company would, in less than thirty years, own more miles of road than any other, and count its earnings by millions. Cars began running twice a day between Milwaukee and Waukesha April 15, 1851. They lived also to see no small amount of trouble grow out of the farm mortgages given by farmers to aid in constructing this pioneer railway. The original company received \$40,000 in these mortgages in Waukesha County, and, in a comparatively large number of instances those who thus early mortgaged their farms were unable to lift the incumbrance, and therefore lost them.

The celebration had at Prairieville March 4, 1851, on the occasion of the formal opening of the Milwaukee & Mississippi Railway, was an elaborate affair. Don A. J. Upham was

President of the meeting, and J. Turner, Rufus King, J. Goodrich, Hans Crocker, S. B. Grant and Rufus Cheney, Vice Presidents. Among the speakers were A. W. Randall, Joseph Goodrich, E. D. Holton, Sherman M. Booth, James S. Brown, Rufus Cheney, Mr. Martyn and D. A. J. Upham. Nearly every person in the county was present, and the occasion was one of noisy and long-to-be-remembered enthusiasm.

The line passes through the towns of Brookfield, Pewaukee, Waukesha, Genesee, Eagle and a small corner of Mukwonago—a rich, populous and beautiful region of country. On Section 22, in Eagle, a branch of the Western Union (a division of the Chicago, Milwaukee & St. Paul Railway) forms a junction with the Prairie du Chien Division, this making connections for the southwest.

Milwaukee & Watertown Railroad.—This railroad company was chartered by an act approved March 11, 1851, which appointed E. D. Holton, Alexander Mitchell, Eliphalet Cramer, James Kneeland, Daniel Wells, Jr., Hans Crocker, John H. Tweedy, George H. Walker, Byron Kilbourn, Daniel H. Chandler, J. W. Medberry, of Milwaukee County, and William Dennis, Daniel Jones, B. F. Fay, Luther A. Cole, Simeon Ford, Peter Rogan, P. V. Brown and Edward Gilmore, of Jefferson County, as Commissioners to form the corporation. They were authorized to construct a line of road from Milwaukee, or some point on the Milwaukee & Mississippi Railway in Waukesha County, to Watertown. The first President was John S. Rockwell, of Oconomowoc; E. D. Holton, of Milwaukee, the first Secretary, and Joshua Hathaway, Treasurer. The preliminary survey of the line was made in January, 1853, and, in March, the construction of the road was begun at Brookfield Junction, in the town of Brookfield, fourteen miles from Milwaukee. In December, 1854, the road was opened for traffic to Oconomowoc, and, October 1, 1855, to Watertown. In 1856, Congress made a large grant of public lands to aid in the construction of roads in Wisconsin, and the vigorous struggle between the Milwaukee & Watertown and Milwaukee & La Crosse roads to secure its ample benefits, resulted in the practical consolidation of the two rival lines. In 1859, the name of the company was changed to Milwaukee, Watertown & Baraboo Valley Railway Company, and, June 8, 1863, the whole line and its appurtenances passed completely into the possession of the newly created Chicago, Milwaukee & St. Paul Railway Company, where it has since remained as the La Crosse Division of their great railway line.

The road passes through the towns of Brookfield, Pewaukee, Delafield, Summit and Oconomowoc, a region of country of unsurpassed loveliness.

The original corporation had no small amount of trouble with those who mortgaged their farms to aid in its construction, a serious mob disturbance being at one time imminent.

Milwaukee & Beloit Railroad.—The barest mention of the name of this mythical railroad will recall more history to a large number of farmers in Waukesha County than will ever be written. A railroad was to be built from Milwaukee to Beloit, through Muskego, Vernon and Mukwonago, by a company chartered for that purpose in 1855. Work was begun, and during 1856–57 the managers, or their agents for them, on the strength of the work already done and numerous glowing promises, secured scores and scores of mortgages on the farms of those near the proposed line of road. The road never was built; and, among other harsh things, the swindled inhabitants do not hesitate in saying that there was never an intention of building it. One of the county newspapers—the *Waukesha Freeman*—put the case into history thus briefly but plainly:

“In 1856–57, the Milwaukee & Beloit Railroad Company began work on their new road to pass through the Mukwonago. It is impossible to speak with any patience of the abominable swindle, whose managers induced the farmers along the route to mortgage their farms by the fairest promises, and who afterward violated their contracts, *seriatim*, by disposing of the mortgages at a small percentage, putting the charter in a situation to render the building of a road for many years a simple impossibility, pocketing whatever proceeds were available, and leaving these men who had befriended them—many of them to utter ruin, and all to years of sacrifice and labor which could only avail them to keep the officers of the law from their doors. The

names of the villains who carried out this scheme ought to be preserved (though the last of the 'farm mortgages' is now settled), that they might bear the eternal stigma of infamy, and be a warning to future swindlers and rascals who should be inclined to purchase wealth by the loss of honor. I hope sometime to be able to give a tolerably complete history of this matter; but for the present must content myself with a passing allusion. Suffice it to say, that the New England and New York stock which had already carried this part of the county, in a few years, from barbarism to an enlightened prosperity, was found sufficient for the task of removing the incubus of debt which a civilized scoundrelism had loaded upon their shoulders."

This is strong language to be handed down in history, but anything else would be a libel, for the records in the Register's office at Waukesha are mottled with the entries, in the red ink always used for this particular purpose, of the foreclosures made by holders of Milwaukee & Beloit Railway mortgages, for which no farmer who lost his farm, or any portion of it, or who paid the mortgage and saved his land, ever received a dollar in return in any manner whatever. When the State ordered the compilation of railway statistics, the following report was made for Waukesha County:

"In accordance with an act of the Legislature, statistics of farm mortgages given in aid of railroads are being collected. In this county the amount of mortgages for the Milwaukee & Mississippi road was \$39,997; for the Milwaukee & Beloit, \$27,600; for the La Crosse & Milwaukee, \$16,838.50; for the Milwaukee & Watertown, \$4,600; making a total of over \$89,000. It will be remembered that the Beloit road was never built, so that the farmers were not only swindled out of their money by the company, but the officers were so greedy as not even to lay a track in order to develop the country at large."

During the rebellion, when strong efforts were making to clear the property of these incumbrances, farms changing hands very rapidly in those days, an association to resist payment of these railway farm mortgages, on the plea of fraud, or to compromise them, was formed in this county, and regular meetings were held during a year or more. First and last, however, the agitation and resistance lasted nearly twenty years. A few, believing that the contingencies upon which the mortgages were given had been so nearly fulfilled as to make the incumbrances good in law, compromised, some for 25, some for 35 and some for 50 per cent, without interest.

At one of its early meetings, this farm-mortgage association made the following report of the mortgagors to Milwaukee & Mississippi Railroad Company: N. & E. D. Clinton, \$5,000; Alfred Galpin, \$2,500; William Sherman, \$2,000; Jonathan Parsons, \$2,000; Israel W. Porter, \$1,500; Leverett Sherman, \$500; David Norris,* \$1,000; Daniel F. Melendy, \$500; Ebenezer F. Wells, \$500; Ahira R. Hinckley, \$2,000; Stillman Smith, \$1,000; Isaiah Skidmore, \$1,500; Ebenezer Thomas,* \$3,000; George Underhill, \$500; John M. Wells, \$1,500; Nathan Whitcher, \$1,000; A. C. Nickell,* \$3,000; Francis Draper, \$1,000; Bradley P. Balcom, \$500; Ferrand Bigelow, \$500; Henry Sneider,* \$500; Thomas P. Turner, \$500; James McWilliams, \$1,000; Verus Henry, \$1,000; John Denvir, \$400; Osman M. Hubbard, \$1,500.

Mortgagors to Milwaukee & Beloit Railroad Company: Royal L. Bayley, \$300; Ira Blood, \$500; Wilder C. Chapin, \$1,000; Duncan Cameron, \$500; John Dodge,* \$300; Lyman Hill, \$500; Whiting Hudson, \$1,000; Simon Jones, \$500; John A. McKenzie, \$500; Samuel Winch, \$1,000; John Stewart, \$500; Allen Porter, \$500; G. Mudgett, \$1,000; George W. Porter, \$500; Evander T. Taylor, \$500; Martin Field, \$1,000; Finley Fraser, \$500; Angus McNaughton, \$1,000; Amos Putnam, \$1,000; Nathaniel Putnam,* \$1,000; Daniel Perkins, \$500; Charles Vanderpool, \$500; Bailey Webster, \$500; William Purves, \$200; James S. Cummings, \$500; James Begg, \$500; William M. Frazier, \$1,000; John Andrews, \$1,000; Prucius Putnam, \$1,000; Isaac Cate, \$500; Asa Hollister, \$1,000; Almon Welch, \$1,000; Alexander Stewart, \$500; Sewall Smith, \$1,000; Peter Frayer, \$1,000; Peter Van Buren, \$1,000; Perry Craig, \$500; Asa Wilkins, \$500; A. Minor Stillwell, \$1,000; William Talcott, \$300; Porter Daniels, \$300; William A. Vanderpool, \$1,000; Riley Demmon, \$500; Eli Welch,* \$1,000.

Mortgagors to Milwaukee & Watertown Railroad Company: John S. Rockwell, \$7,200; settled.

Mortgagors to Milwaukee & La Crosse Railroad Company: Thomas S. Redford, \$1,600; Arthur A. Redford, \$1,000; Henry Redford, \$1,600; Presley N. Reag,* \$1,000; Cyrus S. Davis, \$1,000; Theophilus Haylett, \$1,500; William Little,* \$700; John McLane, \$1,000; John Martin, \$1,000; J. B. Nehs,* \$500; Frederick Nehs, \$1,000; Charles Nehs, \$500; G. O. Nelson, \$600; William M. Saunders, \$1,000; Arthur A. Redford, \$400; H. S. Smith, \$1,000; John Mendar, \$800; Benjamin Harmon, Jr., \$200; Silas S. Johnson,* \$800; Herman Harmon, \$500; Benjamin Harmon, \$300; John Reynolds, \$138.50.

Various laws, at the instance of the association and of the railway company, were passed, looking to a settlement of the difficulties, some of which were declared unconstitutional, and others repealed.

Milwaukee, Waukesha, Jefferson & Madison Railway Company.—By an act, approved March 29, 1853, Charles H. Wheeler, J. D. Webster, Duncan C. Reed, William H. Hawkins, Alanson Sweet, William A. Barstow, Elisha W. Edgerton, Alonzo Wing and Leonard J. Farwell were authorized to construct a line of railway from Milwaukee, through Waukesha and Jefferson, to Madison. The capital stock was fixed at \$2,000,000. The historian will have done his duty well enough when he has added that this line of railroad never was constructed, although some preliminary labors were performed or attempted.

Fond du Lac & Waukesha Railway Company.—By an act, passed March 7, 1857, Major J. Thomas, Elihu Enos, Jr., E. N. Foster, George Cairncross, James M. Lewis, J. W. Hunt, D. M. McDonald, H. Totten, C. C. Barnes, George W. Weikert and J. D. Reymert were given authority to build "one or more tracks of railroad," from Waukesha to Fond du Lac. The capital stock was fixed at \$200,000, and fifteen years were given in which to complete "one track." Perhaps the financial crash of 1857 may be offered as the reason why the road never was built.

Fox River Valley Railroad.—One of the most elaborate railway charters ever granted was one, approved March 29, 1853, incorporating the Fox River Valley Railway Company, consisting of Preston Denton, Andrew E. Elmore, Winchell D. Bacon, Charles K. Watkins, W. K. Wilson, Pliny M. Perkins, Peter Forbes, Richard E. Ela, Philo Belden, J. C. McKesson, Arthur McArthur, William S. Hawkins, William A. Barstow, William A. Vanderpool, C. C. Olin, H. H. Camp, Stephen Sayles and Alexander F. Pratt. The capital stock was fixed at \$800,000, and the next Saturday after the passage of the act of incorporation C. C. Olin took \$20,000 in subscriptions to the stock. The company had power to construct a "single or double track" to the State line, from Waukesha, and from Rochester, in Racine County, to Milwaukee. The main line was to follow the valley of the Fox River. The historian hardly needs to add that the road never was built. So many other roads were then in process of construction that sufficient capital for the enterprise could not be enlisted. It would have been, however, a valuable road for Waukesha, opening a more direct route to Chicago.

MILWAUKEE & ROCK RIVER CANAL.

Although the Milwaukee & Rock River Canal was never constructed, for some years it was the main topic of conversation in Waukesha County, and was the only issue dividing political parties. "Canal" and "anti-canal," or "Sweet" and "Kilbourn," were the parties. Byron Kilbourn, of Milwaukee, was the father of a scheme to dig a canal from Milwaukee to the Rock River through Waukesha County, and Alanson Sweet opposed it.

Early in 1836, Byron Kilbourn, of the then village of Milwaukee, passed over the county between Lake Michigan and the Rock River, to discover the best route for a canal to connect those two waters. He concluded the cheapest and most feasible one was that from Milwaukee up the Menomonee River, through Waukesha County to near the present site of Oconomowoc,

* Settled.

with a branch to Waukesha. He drew up a petition praying the Legislature to grant a charter for such an undertaking, and on the 29th of November, 1836, a bill granting the necessary authority and power was introduced in the House of Representatives, in session at Belmont, Iowa County, which was laid on the table. The next year Dr. Increase A. Lapham made a preliminary survey and estimate of the probable cost of the canal. These, with strong arguments by Byron Kilbourn, were thoroughly published in the Milwaukee newspapers, the *Advertiser* being the acknowledged organ of the canal projectors. Another bill was introduced in the Legislature, in November, 1837, which became a law in January, 1838. It conferred the necessary power upon the Milwaukee & Rock River Canal Company "to construct, maintain and continue a navigable canal, or slackwater navigation from the town of Milwaukee to the Rock River; * * * and also a branch canal to connect with the Fox or Pishtaka River, at or near Prairieville, in Milwaukee (now Waukesha) County." The capital stock was to be \$100,000, with the privilege of increasing to \$1,000,000. Work was to be begun within three years, and so much as was not completed in ten years should be forfeited. The act also provided that the State of Wisconsin, when it became such, might purchase the canal and all its rights by payment to the company of the amount actually expended, with not to exceed 7 per cent interest. To protect pioneer settlers, for there had been no land sale, the Legislature provided that if the corporation did not allow each settler to purchase the 160 acres of land he had claimed on any lands Congress might donate along such canal at 10 shillings per acre, the charter should be forfeited.

Dr. Lapham's estimates, with plats and maps, were sent to Congress with a prayer that land be granted to aid in constructing the canal, and June 18, 1838, the President signed an act granting all the odd-numbered sections in a strip ten sections in breadth along the entire length of the canal from Milwaukee through Waukesha County to Lake Koshkonong, to the Milwaukee & Rock River Canal Company. This land the Territory was to sell at prices not under \$2.50 per acre, and devote the proceeds to the canal. Congress also gave Wisconsin Territory the right to defer the sale of lands until better prices could be realized, provided money for the construction of the canal was borrowed upon them. When the survey had been made it was estimated that Congress had granted 166,400 acres for the construction of the canal.

On the 26th of February, 1839, Gov. Dodge signed a bill providing for borrowing money; for selling all unoccupied lands at not less than \$2.50 per acre; for appraising unoccupied lands and selling them for not less than appraised value whenever the Governor might direct, and for carrying into effect various other details. Among them was a section prohibiting any commissioner, stockholder, engineer or other person interested from purchasing canal lands. This was a bar which prevented hundreds of citizens from subscribing to the stock or paying for their lands by building portions of the canal. Under this act, Gov. Dodge appointed Hans Crocker as Register; John H. Tweedy, Receiver; L. W. Weeks, Acting Commissioner, and Alexander M. Mitchell, Chief Engineer. At the next session of the Legislature, in December, 1839, the Governor announced that the bonds he had issued upon the canal lands could not be sold. The Commissioner reported that the occupied lands, or 43,447 acres, had been sold at \$2.50 per acre, and that the balance of the grant was 95,743 acres, which was unsold. These reports went before a committee, and Mr. Shew, of Milwaukee, its Chairman, reported against going on with the canal for the present, and against the manner in which settlers on adjoining Government lands were being treated. This resulted in a bill appointing a receiver, and providing that, if the desired loan could not be effected by September, 1840, all moneys thus far received from sales of lands should be used to pay interest and loans.

At the session of 1840-41, the Canal Commissioners made a most elaborate, earnest and exhaustive report to the Legislature, which resulted, December 24, 1840, in a bill postponing the payment of interest; and February 12, 1841, in an act substituting wood for stone locks, and authorizing the issue of \$100,000 of Territorial bonds at 7 per cent interest. Gov. Dodge authorized Byron Kilbourn to negotiate a loan of \$100,000 on the bonds issued, but in September, 1841, James Duane Doty became Governor of the Territory, and recalled the power

granted to Mr. Kilbourn, and also all documents and certificates of stock, as well as requiring him to make a detailed report of his acts. In this report, Mr. Kilbourn recited the difficulties of negotiating loans, and also explained the manner in which John H. Tweedy, Canal Receiver, had interfered with the negotiations by refusing to receive any but specie money, thus stopping work. The canal affairs were now in conflicting conditions; that is, some of the canal officers were friends to the project and others were apparently its enemies, and the principal business done was the prosecution of a spirited quarrel with each other.

In February, 1842, a legislative committee, of which Morgan L. Martin was Chairman, reported that Gov. Dodge could give Byron Kilbourn no authority to negotiate loans, and that hence his acts were void and the Territory not bounden in any liability therefor. The Legislature then remitted all interest due from purchasers of canal bonds up to December 22, 1841, and passed a law revoking all power to make canal contracts, approve or pay for labor done, and repealed the act providing for the appointment of an engineer. The Legislature also prayed Congress to put all canal lands on the market at the usual Government price of \$1.25 per acre, and allow all who had purchased at double that price to have the excess refunded. A select committee was appointed from which two reports emanated. The minority report suggested that the Territory and the canal company cry quits, as each "had *gouged* the other slightly." Montgomery M. Cothren, of Mineral Point, was said to be the author of the minority report.

After Wisconsin became a State the offices of Register and Receiver of Canal Lands were abolished, and an act passed April 2, 1853, whereby all persons who had bought canal lands and given mortgages thereon for the purchase money, were allowed to discharge their indebtedness, without interest, by the payment of \$1.25 per acre for the lands.

The work done in Milwaukee on the canal—erecting a dam and creating a good water power—was sold at auction under the direction of the Governor. The time for completing the canal, ten years from June 18, 1838, elapsed, and all rights and privileges were thus forfeited, and by act of Congress all unsold canal lands were given to the State of Wisconsin for educational purposes, after paying certain small debts from the proceeds of their sale.

This is a brief history of a scheme full of jumbled-up, contradictory and unjust legislation, full of efforts to secure material advantages for certain persons, and which for several years greatly retarded the settlement, development and prosperity of the northern portion of the county, through which the canal was expected to pass.

The State of Wisconsin and the city of Milwaukee were the gainers by this canal scheme. The former received many thousands of acres of land for educational purposes, and the latter had built in an early day a fine dam and water-power at public expense. The whole amount of money expended was \$56,745, of which the canal company paid \$24,868, and the Territory, out of the proceeds of canal lands sold, the balance, or \$31,877.

EARLY MUSIC IN WAUKESHA COUNTY.

Although the Olins and Goodnows had trained a few in singing, the first regular singing-school was one taught by A. B. Parsons. He was not more prominent than several others in organizing the school, though the agreement to secure him a certain number of scholars was the reason of his making Waukesha his stopping-place. He is now a harness-maker in Delavan, Wis. It was begun with about twenty-five scholars late in the fall of 1838, and continued during the winter, meetings being held in the old log schoolhouse on the west side of the river in Prairieville—the first in the county. The members of that early class in music who still remain in the land of the living, recall the school as an excellent one, in which there was not only good music but lively good times, never to be forgotten by its participants. The class, as it was called, consisted of the following, and possibly three or four other persons not recalled:

Nelson Thomas and C. C. Olin, Lyman and E. W. Goodnow, Orson Tichenor, James and Charles Rossman, William T. and Joel E. Bidwell, Phineas Bissell, Mr. Dye, John Y. Smith, William S. Barnard, Nancy Maria Tichenor, Jennette and Catherine Stewart, Emily White, Mary and Loraine Church (now Mrs. O. Z. and C. C. Olin), Mrs. Heath and Jane Hopkins.

This class was taught by Mr. Parsons during the winters of 1838 and 1839, and from it were turned out those trained musicians who became the first choir-singers of the first churches in Waukesha, or Prairieville, as the place was then called.

FIRST TEMPERANCE ORGANIZATION.

Very few are acquainted with the astonishing magnitude of the temperance army in Wisconsin, composed of those who belong to the Good Templars, Juvenile Temples, Sons of Temperance, Temple of Honor, Washingtonians, Cold-Water Bands, Total Abstinence Societies and various other organizations; and still fewer know what portion of Wisconsin claims or deserves the honor of forming and sustaining the pioneer temperance society. Waukesha County lays claim to that honor boldly, no locality, so far as known, pretending to have sustained such an organization before a very noted one existed at Prairieville. It was in working order during many years; attracted much attention on account of the radical views of its members, as well as by reason of their ability and prominence, and the influence they wielded in matters outside of temperance. It was no child's organization, but a league of all the citizens for miles around Prairieville, with a few exceptions—a gathering whose appearance, debates and proceedings would be of unbounded interest at this period of time. Some of the men who belonged to it from first to last, afterward were among those who have occupied the highest positions in the State and the nation.

The honor of securing the permanent organization of this pioneer temperance, or total abstinence society, belongs almost exclusively to Lyman Goodnow, who mounted his horse after securing the signatures of all the residents of the village of Prairieville, and scoured the country for miles around, presenting the pledge to every person then residing in the surrounding towns. Mr. Goodnow secured over one hundred and sixty signatures, only two men to whom the pledge was presented refusing to sign. They were temperate men, however, and did not refuse to add their signatures on account of any love for liquor, claiming only that they did not wish to feel themselves bound by any pledge whatsoever.

The organization was not suggested by Lyman Goodnow alone, but by whom is not exactly known, William T. Bidwell, E. W. Goodnow and E. S. Purple having something to do with preparing the pledge for signatures. It was begun in 1839, but did not become a power until early in 1840, when Lyman Goodnow secured the large list of names just mentioned. This society, or rather its leaders, projected the first Fourth of July celebration of any note ever held in Waukesha County. Some of its prominent working members—recalled by the old settlers, as the records are not to be had—were as follows: William T. Bidwell, E. W. and Lyman Goodnow, Ezra S. Purple, Deacons Edmund D. Allen and Norman Clinton, John Y. Smith, Rev. Quagh, Chauncey C., Thomas and Nelson Olin, Morris S. Barnett, John M. Wells, Peter N. Cushman, Sr., O. M. Hubbard, George A. Hine, William S. Barnard, John Manderville, Deacon Ezra Mendall, James Rossman, Sr., James Rossman, Jr., Deacon J. Rice, Nathaniel Walton, A. J. Cole, Dr. Gilbert Wright, Moses, Vernon and Orson Tichenor, Horatio N. Davis, Henry Bowron, Morris D. and Alonzo R. Cutler, Ethan Owen, Ichabod Coddling, Winchell D. Bacon, David Jackson (the first Postmaster), Jacob H. Kimball, Hamilton and John Nelson, David Reed, Charles R. Dakin, Cephas L. Rockwood, Abel and Lyman Brown, Mr. Day, Elder Griffin, Nathan Maynard, A. C. Nickell, Deacon Potter, Deacon Taylor, Plutarch Taylor, Deacon Hinman, William Smith, Nathan Witcher, George McWhorter, William McWhorter, Matthew Ray McWhorter, Daniel Chandler, Robert Love, Dr. Van Vleck and his sons Aaron and Amos, C. S. Putney, Milo Putney, Zebulon and Joel E. Bidwell, Samuel and Phineas Bissell, Elon, Hosea and Randall Fuller, Isaac Judson, Dr. Potter, Gordon C. Cone, Rev. Absolom Miner, Ansel McCall, David Van Kirk, Malcom Sellers, Joseph O'Neill, Henry and Asa Davis, Joseph Williams, Dr. Albert Warner, Samuel Warner, Moses Ordway, Richard Moore, Albert and Almon White, Allen Root, O. F. Curtis, Rev. Nicholls, Daniel and Levi Grant, Thomas Eggleston, Deacon Asa Clark, Lyman Clark, Uncle Stewart, William, Robert and Alexander Stewart, Deacon Crocker, Samuel and Stephen Beard, Benjamin and Levi Love, Joseph Turner, Barzilla Douglass, Harvey Church, Father Daugherty, I. W. Porter and of course, others.

What is most remarkable about this pioneer temperance organization, is that under manifold changes of name and management, it has been kept alive four decades, and its descendants now have an organization in the village of Waukesha.

In 1843, the society passed through a period of great and well-remembered excitement. A call had been issued by the Whigs for a mass-meeting at Milwaukee at which "roast ox, coon skins and hard cider" were to be dispensed in profusion. A large delegation of Whigs who belonged to the society participated in the jollification, the occasion being a memorable one. On the road home one member of the society asked another how he liked the cider. "It was good," he replied, smacking his lips. "It *was* good," piped a second and a third. At the next meeting the inquisitive member preferred charges against three or four of his leading brethren, one clause of the constitution requiring each member to report any other member known to have violated the pledge. One or two promptly acknowledged having fallen from grace, and asked to be forgiven, which was promptly done. The others refused to allow the difficulty to be thus easily and amicably settled, contending that as not an apple was raised in Wisconsin, the stuff called "hard cider" which they had partaken of was "not cider, but a decoction invented for the occasion." The opposition contended that the accused drank it for cider, and as no positive proof had been offered that the so-called decoction was anything else than cider, the rebellious members must be expelled. Expulsion from so strong, important and influential an organization as the society then was, they could not stand, and finally, after several weeks of great excitement, confessions were made, and the erring members received into full and renewed fellowship. To see one portion of the prominent citizens of the community trying another portion for drinking hard cider made from anything but apples, would be an interesting event for the bustling year of 1880.

COUNTY FINANCES.

If there is anything of which the citizens of Waukesha County may feel justly proud, it is the general management of her public affairs, during the last thirty-four years, and her present financial condition. While other counties are or have been groaning under their burden of railroad bonds, Waukesha has been wholly free from their depressive effects, although she had a railroad before any other in the State, except Milwaukee. The citizens of this county have never been oppressed, or outside capitalists debarred from making investments within her limits, by such high taxation as is consequent upon carrying a heavy bonded indebtedness.

The record of a county that has not and never had a bonded debt of any kind whatever, is indeed a rare one.

In October, 1846, at the first annual meeting of the Board of Supervisors, after the county had been set off from Milwaukee, Alfred L. Castleman, Chairman of the Committee on Expenses, made the following report to the Board:

The Committee on expenses reports the following estimates for the county expenses for the current year, including the time past since the organization of the county:

Expenses of District Court.....	\$2,000
Expenses of Justices' Court and jail.....	1,000
Pay of Clerk.....	125
Pay of Supervisors.....	405
Printing expenses.....	25
Attorney's fees.....	125
Election expenses.....	256
In part for building jail and jailer's house.....	500
Stationery (including Rood's bill, now before the board).....	300
Deficit in means to meet contract on court house, and to pay committee and Mygatt & Robbins...	650
Furnishing court house and offices.....	300
Incidental expenses.....	500

Total.....\$6,086

[Signed]

A. L. CASTLEMAN, }
 JOSEPH BOND, } Committee.
 ASA A. FLINT, }

PRAIRIEVILLE, October 7, 1846.

David Small

OCONOMOWOC.

Thus, the county expenses, not including means expended in permanent buildings, was only \$5,000 in 1846. In 1848, the Board voted \$6,500 should be raised by taxation, exclusive of State tax. And, in that year, Talbot C. Dousman made out the tax roll, taxes to be collected in January, 1849, as follows :

	No Acres.	Value per Acre.	Whole Valuation.	Improvements.	Personal Estate.	Property Subject to State Tax.	Property Subject to County Tax.	State Tax.	County Tax.
Menomonee.....	15,687	\$2 50	\$39,217	\$4,342	\$45,100	\$49,442	\$202 95	\$341 15
Lisbon.....	15,994	2 61	41,727	12,582	45,900	58,482	206 65	403 53
Warren.....	15,213	1 90	21,223	\$ 8,482	3,842	31,834	48,399	143 30	333 95

Vernon.....	21,438	2 73	45,662	13,051	1,725	45,562	60,338	205 03	416 33
Muskego.....	18,098	2 44	31,676	12,589	575	34,844	49,267	136 81	339 94
Totals.....	279,018	\$607,968	\$234,086	\$86,699	\$629,867	\$949,546	\$2,854 35	\$6,561 87

The equalized value per acre of land in 1848 was \$3.12; the total amount of taxes, \$9,416.22, and the rate of taxation, 6.9 mills on the dollar. It will be noticed in the above table that some towns returned but very little personal property, and some no improvements. It may also be stated that, for years since 1848, the Assessors of the town of Muskego have made solemn oath that no watches were owned by any of its residents, while other towns have made similar returns as to carriages, horses and musical instruments.

Some idea of the growth of property, as well as of county expenses, made be had from the following table, which is the apportionment of taxes made in November, 1879 :

Towns.	Valuation.	State Tax.	County Tax.	County School Tax.	Supt. Salary and Expenses.	Canceled Certificate.	Support of Resident Poor.	Personal Property charged back.	Trust Fund.	Total Tax.
Brookfield.....	\$ 783693	\$ 1129 88	\$ 1385 48	\$ 373 00	\$ 82 66	\$ 2 76	\$ 7 78	\$ 2981 56
Delafield.....	623706	899 20	1102 65	205 00	48 35	1 02	2256 22
Eagle.....	521704	752 11	922 33	188 00	43 87	\$ 24 62	5 45	1936 38
Genesee.....	649658	936 61	1088 52	195 00	45 49	13 11	2278 73
Lisbon.....	669562	962 43	1183 71	214 00	50 01	13 38	2423 53

Summit.....	590077	850 72	1043 20	135 00	36 18	1 93	48 20	2115 23
Vernon.....	658635	949 56	1164 39	160 00	39 23	4 68	2 54	2320 20
Waukesha.....	1811385	2611 50	3202 31	489 00	115 52	16 16	59 84	53 00	6547 33
Totals.....	\$12148426	\$17489 61	\$21416 16	\$4050 00	\$ 950 00	\$255 04	\$ 62 60	\$ 188 42	\$1121 00	\$45532 83

Thus, while the county tax was \$6,561.87 for building expenses and all in 1848, as will be seen by the first table, it had become only four and a half times greater in 1879, or \$28,043.22. And while the total value of all property in the county subject to county taxation

in 1848 was \$928,753, it had increased in 1879 to \$12,148,426, or more than thirteen-fold. This is a rare showing, and one which should be a source of gratification and pride to the citizens of the county. However, what has just been shown to be true of the county tax is not true of the State tax; for, while in 1848 Waukesha County paid only \$2,854.35 to the support of the State Government, in 1879 the apportionment was \$17,489.61, a six-fold increase.

With this tax, the county has nothing to do, and she has only to rejoice over the excellent management of her own domestic affairs. The County Treasurer's report, rendered November 11, 1879, for the fiscal year ending at that time, shows the following details as to receipts:

County tax.....	\$21,909 64
Personal property charged back to towns.....	168 07
Superintendent of Schools.....	1,200 00
Canceled certificates.....	1 76
Certificates of sale received from J. A. Lins, ex-County Treasurer.....	115 10
Cash received from J. A. Lins, ex-County Treasurer	525 19
Conscience money.....	20 00
Cash received from Monroe County—costs in case of State vs. Nicholas Chard	270 50
Fees on real estate tax returned.....	61 00
Fees on personal tax returned	62
Interest on delinquent real estate.....	45 66
Advertising fees on delinquent lands.....	34 25
Seventy-eight certificates of sale, 1876, at 25c.....	19 50
Income from school fund.....	4,040 16
Tax on delinquent State lands returned to State Treasurer.....	6 27
Drainage fund received from State Treasurer.....	44 10
Cash received T. C. Martin, ex-County Clerk, collected from persons having friends in the Northern Hospital for Insane, to wit: From H. Lorleberg, \$13.35; from J. Burns, \$35.00	70 35
Costs in case of State vs. C. A. Snover.....	13 46
Redemption fees received from County Clerk.....	12 65
Delinquent personal tax collected by sheriff.....	20 46
Total	\$28,578 74

And this table shows the details of disbursing the above amounts:

Amount paid John Stephens for recording certificates of marriages, births and deaths...\$	15 00
Amount paid John Stephens for certified copy of marriages, births and deaths, to Secretary of State.....	41 60
Amount paid Sheriff Porter on recommendation of District Attorney to pay fare of Jas. Moore, a vagrant, to New York.....	27 55
Delinquent State lands returned to State Treasurer	6 27
Delinquent personal taxes placed in hands of Sheriff for collection	271 41
Amount paid John Stephens for recording certificates of marriages, births and deaths..	26 00
Income from school fund—paid Town Treasurers.....	4,040 16
Drainage fund—paid town of Eagle.....	44 10
Amount paid John Stephens for recording certificates of marriages, births and deaths..	27 50
Amount paid John Stephens for recording certificates of marriages, births and deaths..	44 10
County orders paid.....	20,002 56
Court certificates paid	3,065 08
Witness fee certificates paid.....	429 05
Certificates of sale on hand	162 26
Total.....	\$28,202 64
Total receipts.....	\$28,578 74
Total disbursements	28,202 64
Balance	\$ 376 10

The different towns received the following amounts of school money, being their shares of the income from the State School Fund: Brookfield, \$372.02; Delafield, \$204.06; Eagle, \$187.72; Genesee, \$194.94; Lisbon, \$213.94; Menomonee, \$347.32; Merton, \$215.08; Mukwonago, \$161.12; Muskego, \$224.58; New Berlin, \$236.36; Oconomowoc, \$187.34; Oconomowoc City, \$262.20; Ottawa, \$137.18; Pewaukee, \$313.12; Summit, \$134.90; Vernon, \$159.60; Waukesha, \$488.68. Total, \$4,040.16.

WISCONSIN INDUSTRIAL SCHOOL FOR BOYS.

The Wisconsin Industrial School for Boys, in the midst of a beautiful artificial park on one side, and a natural one on the other, on the banks of the Fox River and near the Prairie du Chien Division of the Chicago, Milwaukee & St. Paul Railway, on Section 9, in the town and county of Waukesha, consists of ten buildings of brick and Waukesha limestone—mostly the latter; two of wood and stone, besides various barns, sheds and out-buildings. It is, in one view, the most important of our many State charitable, penal and reformatory institutions, and certainly has the most beautiful situation and surroundings. It is not the largest, or costliest, or oldest; but as it is a place for the molding of the character and habits of a large number of those who are to have the various affairs of the future in charge, it is, so far as it reaches, decidedly the most important of our State institutions.

Those committed to its charge are largely unfortunates. Some of them are born with malformations of mental faculties, with vicious tempers and low, brutal tendencies. These are the most unfortunate class with which the school has to deal. They are not responsible for their vicious tempers and evil dispositions any more than for their existence or physical appearance. They have defects which no reformatory school, be it never so strict or liberal, kind or harsh in its course of training, can wipe out, or completely bring into subjugation. None of them, however, leave the institution in as deplorable a condition as that in which they entered, and many of them are so thoroughly taught in the art of self-government that they become the best of citizens; but others, returning with their unfortunate natural viciousness to their old haunts, overcome and forget all the influence of the Industrial School, and rapidly fall to ruin or cells in the State Prison. Some are the victims of unfortunate marriages, quarreling, drinking, thieving, slothful parents; others are merely bright, intelligent boys with an extra amount of spirit and mischievousness, and others are wandering orphans who come within the scope of the law governing the commitment of children to the institution. Of all such a good account can be given. They rapidly yield to the beneficial influences brought to bear in the schools, workshop and chapel, and become, in a reasonably short time, good boys, and ultimately the very best of citizens. In fact, the good, dispositioned boys of intelligence sent out from the Industrial School are, as a general thing, much better prepared to cope single-handed with the affairs of the world, than those of equal ability who have not received such training.

Having all these peculiarities of the subjects to be dealt with in view, and also the beneficial results to them and the community at large, the State Industrial School for Boys must be considered the most important of all the State institutions.

The existence of the Industrial School is due in a great measure to the labors of the *Sentinel* and *Free Democrat* newspapers, of Milwaukee, neither of which, for many months, lost any opportunity of urging the necessity and benefits of a reformatory institution of this character. The first law looking to its establishment was passed March 7, 1857, for "a house of refuge for juvenile delinquents in the State of Wisconsin." The buildings were to be erected under the supervision of three Commissioners, who should, on the completion of them, certify the fact to each County Clerk in the State. Under this law the Governor appointed W. D. Bacon, of Waukesha, Edwin Palmer, of Milwaukee, and Martin Mitchell, of Oshkosh, Commissioners to locate and erect a building suitable for such purpose.

The Commissioners at once organized and entered upon the discharge of their duties. Houses of refuge to reform youth, separate from prisoners, were then in their infancy. The first one erected in this country was built in New York City but thirty-two years before, and not until May, 1857, had the subject of juvenile reform elicited among its friends sufficient interest to cause them to meet in convention for consultation and discussion as to improved plans of building, government and classification.

Such convention assembled in New York City on the 12th, 13th and 14th days of May, 1857. Seventeen institutions were represented, ten having the name and title of "House of

Refuge;" three, "State Reform School;" two, "Reform School;" one, "Asylum and Farm School," and one, "State Industrial School for Girls."

The Commissioners sought the advice and experience of the most devoted philanthropists connected with this new work, and from William R. Lincoln, Superintendent of the Maine State Reform School, obtained the outlines of a plan of building which they adopted, having regard to the division of its inmates into families (of thirty-six boys in each), and so planned that each boy would have a separate room to himself. Each room, whether large or small, had separate ventilating flues, both for the admission of pure and escape of foul air.

The plan of the first buildings consisted of three detached parallel buildings, each fifty feet distant from the other, and united by a corridor nine feet wide, extending crosswise through the center of each building, adapting all, in their internal accommodation and external view, to one building.

But one building was erected, that being of sufficient capacity for the State at that time. Each building was planned to furnish complete accommodation for officers, schoolroom, hospital, living rooms for family of Superintendent, kitchen, dining-room, wash-room, and bedrooms for officers, servants and inmates, both boys and girls (the law at that time sent girls also to the House of Refuge), and eighty separate rooms for inmates. The three buildings, if built, would have furnished rooms for Superintendent and his family, officers and servants, and four hundred rooms for inmates.

The building erected was 57x94 feet, and three stories high above basement, which, from the window sills of the basement, was above ground. Its location was determined, after due examination of various places in the State, to be at Waukesha, the citizens of Waukesha voting to tax the town for \$6,000, with which they purchased sixty acres of land for a site. The buildings were to be of stone. Stone being abundant at Waukesha, could be furnished much cheaper than at any other city desiring its location, and would save, in cost of building at Waukesha, several thousand dollars to the State in the price of stone. This more than overbalanced offers of a pecuniary consideration proposed by any other corporation. The act to establish a House of Refuge, required it to be "located where the citizens shall contribute the largest sum toward the erection," and "said Commissioners shall take into consideration any materials or money to aid in the erection thereof." Thus the matter of material alone would have secured the location of the institution at Waukesha.

But there were other things favorable to Waukesha. The soil of the site was a superior, rich garden mold, well watered, the Fox River flowing through diagonally. The original site also included the now famous Bethesda mineral spring, which the Commissioners reported "was of pure limpid water, discharging a large stream, forming a pond six rods in diameter, often full of pickerel, bass, and other fish common in Wisconsin streams." Before Bethesda was discovered to be medicinal, sixteen acres of land, of the original site, including the spring, were exchanged, by the State of Wisconsin, for an equal quantity of other land.

After erecting one building, the Commissioners, according to the act providing for the "House of Refuge," certified to the fact, and the Governor issued a formal proclamation to the public.

The school was formally opened on Wednesday, July 23, 1860, by the various State officials, Board of Managers, and a large congregation of the inhabitants of the State. The dedicatory address was made by J. B. D. Cogswell, of Milwaukee. After giving a full history of the workings of reformatory schools in other States and countries, he closed as follows:

"With such cheering precedents to encourage us, we dedicate this building to the uses of the State Reform School of Wisconsin. No more eligible or attractive site could have been selected for the purpose. It is easy of access, yet sufficiently removed from the great town and the bustling village, full of temptations to the weak and unsettled boy. We are an agricultural community, and the institution is fitly established among these pleasant fields, suitable for successful tillage. The sturdy boy shall here learn the rudiments of agriculture, to be thereafter

practiced for his own benefit upon the generous prairies or amid the virgin forests of Wisconsin. Here shall he be taught to love labor for its own sake, and in the pleasing alternative of toil and play, his wild spirit shall grow calm and peaceful. In these spacious and convenient halls he shall find everything necessary for his comfort and instruction. The site of his home is beautiful as well as eligible. Brought up yonder grassy slope at first a careless and wayward vagrant, he shall go away in due time, manly and free, self-reliant, yet impressed with a sense of moral responsibility. No longer the juvenile delinquent, he shall leave the reform school to assume and discharge the duties of an American freeman and citizen.

“Permit me, your Excellency [Gov. A. W. Randall], to congratulate you upon your good fortune, that you are enabled, during your administration, to inaugurate so many useful and memorable charities of the State. Hereafter, doubtless, you will recur to such occasions as the present as among the most pleasing reminiscences of your official career. We congratulate you, gentlemen of the building commission, upon the auspicious termination of your faithful and protracted labors. Long as these firm walls shall stand, they shall bear witness of your patient skill, foresight and fidelity. Finally, fellow-citizens, philanthropists, fathers and mothers, who guard your little ones in cheerful homes with tender solicitude, let us felicitate each other that to-day we witness a home opened for orphaned and homeless children. * * * Hereafter, upon this spot, shall be sown seed which shall ripen into a nobler fruitage than all the golden grain the husbandmen garner to-day. Some seed, it is true, shall fall by the wayside, and the unclean birds shall devour it up. * * * But other seed shall fall into good ground and bring forth fruit. Happy he who, in the providence of God, shall be privileged to plant and nourish the germ of goodness in the fruitful but desolate heart of the orphan and vagrant child. May he ever hope to hear, hereafter, those inspiring words of Divine commendation: ‘For inasmuch as ye have done it unto one of the least of these, ye have done it unto me.’”

Remarks were also made by Lieut. Gov. Butler G. Noble, Secretary of State Louis P. Harvey, and others, after which Gov. Alexander W. Randall, a citizen of Waukesha, formally proclaimed the institution open for the purposes contemplated in the act creating it. He further said:

“I will not attempt to add anything to what has been said as to the objects of these buildings, but will simply say that this is an institution which has long been needed by the State. That we have it now, is mainly due to the efforts of a few men who have long since pressed its necessity. Among the newspapers of the State which have urged its establishment, I may name the *Milwaukee Sentinel* and *Free Democrat*, and their editors, who, in the columns of their papers, lost no occasion of urging the utility of an institution of this character. I desire particularly at this time to speak of the services of a humble man in this connection, who labored efficiently, in season and out of season, to this end. I refer to John W. Hinton, of Milwaukee, formerly connected with the reportorial corps of the *Milwaukee Sentinel*. I will say only one word more. It is hoped that this school will be productive of great good; that it will make the boys who are sent here good men; that they will learn here that utility is the great object of life, and that it is better to be very good, than very wise or very great. If they learn these things here, they will have learned what it is the object of this school to inculcate.”

The school was now open to receive inmates, according to law, as follows:

Sec. 12. The said managers and Superintendent shall receive and take into said House of Refuge all male children under the age of eighteen years, and all female children under the age of seventeen, who shall be legally committed to said House of Refuge as vagrants, or on conviction of any criminal offense by any court having authority to make such commitments; and the said managers shall have power to place the said children committed to their care during the minority of said children, at such employments and cause them to be instructed in such branches of useful knowledge as shall be suited to their years and capacities; and they shall have power, in their discretion, to bind out said children, with their consent or the consent of their parents or guardians, if they have any, as apprentices or servants, during their minority, to such persons and at such places, to learn such proper trades and employments as, in their judgment, will be most for their information and amendment and the future benefit and advantage of such children; *Provided*, That the charge and power of said managers upon and over the said children shall not extend, in the case of females, beyond the age of twenty-one years: and *provided*, also, that the religious opinions of the inmates shall not be interfered with.

The law also required the managers to publish the names of the inmates; but this was never done, their first report declaring that, in their opinion, "good policy and the interests of the inmates forbade such publication." The managers furnished this reason for disobeying that portion of the enactment: "If that was the intention of the law, it was certainly, we think, a mistake; for, while more or less of a stigma will, in the public mind, attach to those who are inmates of the Reform School, there should be as little publicity as possible of their names in that connection. They should be taught to look forward to the future with hope; to blot out, as much as possible, the past, which is beyond their control; and when reformed, as we trust many of them will be, and become useful citizens, far from the scenes of their early errors, they ought not to be confronted by their names in a report like this, to cause *them* injury and good to *none*."

The Legislature did not compel the managers to obey the clause referred to, and afterward amended it.

The first inmates were three juveniles from the city of Milwaukee, who were committed, or received at the institution, August 1, 1860. Several girls were also committed that year—nearly all from Milwaukee—and female delinquents continued to be sent until 1871; but the plan was not a good one, as will be seen by the first report, which said:

"Of the seven girls committed, five had been connected with low dance-houses, or 'houses of ill-fame. The chapter of our statutes on the subject of vagrancy, in my opinion, needs a careful review. Surely, it was never intended that this school should be the receptacle of abandoned females, nor that the denizens of every low brothel should be thrown into our family circle. Vice is a contagion of the most terrible virulence, and when concentrated in minds matured in the pathway of criminal indulgence, it will overleap all barriers and fasten its deadly fangs upon the comparatively innocent and unsuspecting. No human efforts can control the contaminating influence."

From that time, fewer abandoned females were received, and finally, in 1871, only boys were committed to the institution.

At first there was no provision for discharging inmates; that is, nothing could be done but open the doors of the institution and let those whose terms had expired wander whither they would, no funds being available to transport them home or to any place where employment could be obtained. This was soon after remedied, and now each one, on his discharge, is given a good suit of clothes and transportation to his former or any new home.

A system of manual labor was instituted at once, and all inmates in good health were required to devote a certain number of hours to whatever was necessary to be done. Farm labor and putting the grounds about the buildings into shape were first in order; on the 1st of September, 1860, the shoe-shop was opened; in October, of the same year, the tailor-shop; and the girls were at once put at sewing and knitting. These departments are still in active operation and turn out all the shoes, boots, mittens, socks, pantaloons, coats, caps and all other wearing apparel necessary for the inmates. The "repairing room" turns out all necessary mending and repairing. The laundry, kitchen and carpenter-shop are necessary adjuncts of the institution, but turn out no work that is a source of income to the State. They afford practical instruction to the boys connected with them. The business of manufacturing as a source of profit, and at the same time as a means of thorough instruction to the inmates, is in the boot and shoe shop and sock and mitten factory. The first year nothing of profit to the State was turned out, except 100 pairs of button shoes. The school then contained but comparatively few inmates and all of them were ragged and unskilled. Their own personal wants, therefore, demanded most of their attention. A broom-factory was run for about ten years, but was never a source of much profit, and has been discontinued. The same is true of the business of chairmaking. The manufacture of boots, shoes, socks, mittens and suspenders, however, not only is a means of teaching the boys useful trades, but is now a source of profit. During 1879, about 40,000 pairs of socks and mittens were knit, and the shoe-shop turns out fifty cases of the best quality of hand-made boots and shoes per week. These are of a superior quality, and

therefore the demand still exceeds the supply, at good prices. In fact the demand exceeds the products in all the manufacturing departments of the Industrial School.

The C. M. & St. Paul Railway has provided a side-track near the school buildings, thus making shipping facilities of more than ordinary convenience.

On the farm, which consists of 233 acres of good land, are twenty-nine milch cows, twenty-one horses and numerous calves, poultry and pigs. Its products are oats, corn, beans, potatoes, and all the vegetables and other cereals (except wheat), common to the climate. These products, as food, are valued at \$5,000 per year, or more, at wholesale rates.

The inmates have an abundance of good, wholesome food. Meats are generally served to them in limited quantities, but they may have all the bread and vegetables they desire. All food is of the best quality, purchased by the Superintendent at such favorable bargains as he can make. The report for 1879 shows some of the items of subsistence as follows: Flour, barrels, 860; beef, pounds, 35,500; potatoes, bushels, 1,175; cheese, pounds, 1,032; butter, pounds, 10,139; eggs, dozens, 1,429; sugar, pounds, 9,326; sirup, gallons, 1,165. This subsistence is furnished at a cost of 7 cents per day per capita for the inmates; but as all employes have their subsistence from the common store, it would reduce the cost per inmate, per day, to about 5 cents. The total cost for salaries, fuel, subsistence, and all other items, is \$100.86 per capita per year, for the inmates, or 27 3-5 cents per day per capita.

A complete history of each inmate is kept at the school in a book prepared for the purpose, as well as birthplace, age, occupation, habits, and conditions of parents. This record of the history of the parents nearly always discloses some good reason why a reformatory school of the kind under consideration is necessary; and it is due to a majority of the boys confined in it to state that their parents are often actually more deserving of prison discipline than the children. As a general thing the parents of vicious and depraved boys are drunkards and loafers.

A most perfect system of labor record is in force, as well as a similar system of records of the conduct, health, proficiency, behavior and progress of each inmate. The Superintendent knows precisely where his watchmen were at any particular hour of any day or night, also where any particular inmate was; knows how many pairs of socks have been washed during the year; how many repaired, and the same with any and all other articles. He can tell, also, how many loaves of bread are baked, consumed or wasted; and has the same accurate knowledge of all other matters, even to the number of quarts of milk produced on the farm and how consumed.

A temperance society, called the Band of Hope, existed in the school for many years. It was not of any practical use in the institution, as the boys have neither liquors nor tobacco; but they took a strong pledge and were taught that when they left the school the obligation was to go with them all through life.

A cornet band, with good instruments, is maintained in the school, and once each week a good teacher furnishes them with instruction. To belong to this band a good record in the school is necessary, as well as some musical genius. The boys take great pride in their band, and frequently make proficient musicians. Applications to become members of the band are frequent, thus showing their appreciation of it.

The first main building was destroyed by fire on the night of the 10th of January, 1866. Although of stone, every part of the building was so intimately connected with every other part, that it was wrapt in flames in an almost incredibly short space of time. The fire was set by an inmate who had in some manner obtained a match with which he lighted shavings cut from his bedstead, starting the blaze in the opening of the ventilator in his room. All the inmates and employes escaped unharmed, though with little time to spare.

His object was to escape, but he failed. He was sent to the county jail, to which he set fire for the same purpose, a few days later, and had it not been for the accidental and fortunate discovery of the fire at 2 o'clock in the morning, by Mrs. Dewey K. Warren, wife of the Sheriff, he would have burned the jail also. Later, he was sent to the State Prison.

A small wooden building, used as a boot and shoe shop, and the wooden portion of what is now "No. 10," did not burn. Into these and some board barracks, hastily built for the purpose, the inmates were crowded. The weather was severe and these barracks, consisting only of inch boards, afforded but little protection, and for the balance of the winter all connected with the school had a hard time of it.

In the spring of 1866, the present main building (which was enlarged to twice its original size in 1873), and Nos. 1 and 2, all of Waukesha limestone, were erected. Afterward as the number of inmates increased, other buildings were erected as follows: No. 3, in 1868; No. 4, in 1871; Nos. 5, 7 and 10, in 1873; No. 6, in 1875; Nos. 8 and 9, in 1879; the shoe factory in 1871, and the correction house in 1877. These are all of the splendid Waukesha limestone, three and four stories high, except the upper stories of the two which escaped the fire of 1866, which are wood. The stone for Nos. 8 and 9, for the large correction house and for the horse-barn and two or three additions, were all dressed by inmates, and made by far the best-looking buildings of the group. All have slate roofs, good ventilation and ample furnaces. The different buildings not used for shops, kitchen, laundry and similar purposes, are called "family buildings," and are used as schoolrooms, playrooms, sleeping dormitories, dining and bath rooms for the several "families," into which all the inmates are divided. Each family is in charge of a man and woman who are, to a certain extent, responsible for the conduct and progress of those under their charge. In these buildings, all the branches usually taught in common schools are thoroughly pursued under competent teachers; light, innocent games and amusements are permitted, and every Saturday bathing and a change of clothing are required.

Boys are required to aid in cooking, washing, ironing, cleaning the rooms and doing all the work necessary about an institution of this kind and size. They thus learn to do all kinds of labor in the best possible manner.

The chapel exercises on Sunday are exceedingly interesting. All inmates assemble to listen to regular services by some of the local ministers, who serve free of charge, at 3 o'clock. The reform school choir, composed of rich, melodious and well-trained voices, furnishes the music, though every inmate is provided with a song-book, and a majority of the school join in the singing with apparent earnestness and pleasure. Behavior on these occasions is better, no doubt, than it would be on the part of the same number of boys taken at random from the wealthiest community in the State.

A good library is provided in the main building, which contains 800 volumes of books and various Wisconsin newspapers and other periodicals. Books can be taken from the library on Saturday and kept one week. The reading-room contains 275 volumes of books and various newspapers. All inmates are allowed to receive papers, books and letters from their friends, after careful inspection, to see that nothing objectionable enters. They are allowed to write once each month to parents or friends at the expense of the State, and also once each month at their own expense.

There has always been a system of advancement for good, and punishment for bad behavior. It is rigid but just. When necessary, incorrigible boys are, in addition to various other punishments, put into a building called the House of Correction. Such as are confined in this building have no play hours, cannot communicate with each other in any manner; are required to sleep separately in locked and grated cells; but they have the same privileges of the school and library as all others. The idea of a House of Correction originated with A. D. Hendrickson, when he was Superintendent.

On entering the institution, each boy is washed, furnished with a new uniform, and given some good advice—told that if he is studious, industrious and obedient, he will be well treated, and can the sooner be released. On leaving, he is clothed and transported, at State expense, to his former or any new home.

Some of the more important by-laws adopted by the Board of Managers are as follows:

"SECTION 13. All accounts for the supplies of the institution, for contracts of the Superintendent, and for salaries of officers and employes, must be indorsed as correct by the Superintendent before the same will be audited and allowed by the Board of Managers.

WISCONSIN STATE INDUSTRIAL SCHOOL FOR BOYS, WAIKESHIA.
W. H. Sheep, Supt.

"SEC. 14. The salary of the Superintendent shall be at the rate of \$1,200 per year, and of the Matron \$400 per year, and of the Assistant Superintendent \$1,000 per year, to be paid quarterly; and they shall reside in the institution, and devote all their time and labor to the service thereof.

"SEC. 15. The officers and employes are expected to board in the institution, at the expense of the State, but, with the exception of the family of the Superintendent and the person in charge of the farmhouse, no person not an officer or employe shall board in the institution; *provided*, however, that this rule may be suspended by a majority of the board, in extraordinary contingencies.

"SEC. 16. The Superintendent shall enter in a book, to be provided for that purpose, the name, age, birthplace, whence and by whom committed, the time of reception, and obtain, as nearly as possible, a brief, correct history and description of the person of each individual committed to the institution, the delinquency for which committed, when discharged and, if apprenticed, the name and place of residence of the person to whom apprenticed, and, in case of death, the time and cause thereof, and such record shall be, at all times, open to the inspection of each member of the board.

"SEC. 17. The Superintendent shall present to the Board of Managers, at the regular October meeting, a report showing the number of inmates at the beginning of the year, the number received and discharged during the year, the number remaining at the date of the report, and what disposition has been made of those sent from the institution during the year. He shall also cause to be kept in books provided for that purpose a correct account of expenditures, and on what account made; and also a correct account of receipts from any source, showing from what source, under appropriate heads, and present an abstract of the same with his annual report, together with such suggestions as he may deem beneficial.

"SEC. 18. No cruel or unnecessary punishment shall be inflicted upon any inmate, and no corporal punishment shall be administered in any case, except by the Superintendent, or by his express instruction.

"SEC. 19. The average length of time inmates shall remain in the institution shall not be less than two years, and no inmate shall be sent out on ticket before that period, without the concurrence of the Superintendent and at least two members of the Board of Managers."

The more important rules made by the Superintendent, for the government of inmates, are as follows:

"RULE 6. The man in charge of a family is expected to be with the family at all times when the boys are in the family building or yard, and especially when in the playroom yard or dormitory, and he will be held responsible for the condition of their clothing, the cleanliness of their persons, and their general good behavior. In addition to his duties as a family officer, he will be required to fill the position of teacher, overseer of shop, or such other position as may assigned him by the Superintendent.

"RULE 7. The woman in charge of the family building is expected (with the assistance of the boys detailed for that purpose) to keep the whole building, its furniture, beds and bedding, clean and in order; to be present in the dining-room at each meal, to preserve order, and to see that the food is of a suitable quality, properly prepared and properly served, and to report to the Matron anything objectionable in reference to the food. When not engaged in the performance of the duties mentioned, she is expected to make and repair the bedding and the boys' clothing (except their woolen outside garments). The man and woman in charge of a family are expected, as far as they may be able, to supply the place of father and mother to the boys in their charge, and their government shall be parental in all respects.

"RULE 8. Visitors will be received at the school from 9 to 12 A. M. and from 2 to 5 P. M., on Tuesdays, Wednesdays, Thursdays and Fridays only. Visitors will first record their names at the reception room, when they will be furnished with an escort. It is not expected that persons will stroll over the grounds unattended, or indulge in conversation with the inmates.

In view of the large number of inmates, employes and of their friends, it is not expected that visits will be frequent or prolonged, as no provision is made for entertainment.

"RULE 9. All donations intended for the inmates, from whatever source, must be placed directly in charge of the Matron, to be delivered or disbursed by her for their use and benefit. No inmate is permitted to have the custody of money, or to deposit the same with any one but the Matron.

"RULE 10. Innocent games, amusements and sports are to be encouraged and may be freely indulged in by the inmates, but all profane and indecent language, all obscene books or papers, the use of intoxicating drinks or tobacco, every species of gambling, and all disorderly and immoral practices are prohibited, and this rule is intended to be obligatory upon all persons connected with the institution.

"RULE 13. No visits will be received on Sunday, except from those in attendance upon the moral and religious exercises. A general invitation is extended to persons desirous of imparting moral and religious instruction to the inmates, either on Sunday, or at the daily evening exercises; *provided*, the rule excluding everything of a sectarian character, and any interference with the religious opinions of the inmates, shall be strictly adhered to."

The legislative enactments authorizing and governing the Wisconsin Industrial School for Boys have been amended and repealed so often that no little misapprehension has existed in various counties as to the scope, benefits and object of the institution. The important statutes at present are these:

"SEC. 1,543. All idle persons who, not having visible means to maintain themselves, live without employment; all persons wandering abroad and lodging in groceries, beer-houses, outhouses, market places, sheds or barns, or in the open air, and not giving a good account of themselves; all common drunkards; all lewd, wanton, lascivious persons in speech or behavior; all persons wandering abroad or begging, or who go about from door to door, or place themselves in the streets, highways, passages or other public places, to beg or receive alms, shall be deemed vagrants.

"SEC. 1,547. Any male child under the age of ten years, and any female child under the age of sixteen years, besides such as are included in Section 1,543, who shall be found begging or receiving alms, either directly or under pretense of selling or offering anything for sale in any public street or place, for that purpose, or wandering in public places as one of the class known as rag-pickers, or wandering without having any home, abode or proper guardianship, or destitute because an orphan, or having a parent undergoing imprisonment or otherwise, or who frequent the company of reputed thieves, or of lewd, wanton or lascivious persons in speech or behavior, or notorious resorts of bad characters, or is an inmate of any house of ill-fame or poor-house, whether in company with a parent or otherwise, or has been abandoned in any way by parents or guardians, and any child within the ages aforesaid, upon petition of his parents, guardian, or, if none, those having him in charge, showing that the welfare and best interests of the child require it, may be brought before any Judge of a Court of Record of the county and committed to an industrial school, in the manner and for the time before provided in this chapter, and subject to like appeal. If for any reason the commitment of any such child cannot be executed at the school designated, the Judge may afterward amend the judgment or commitment by substituting some other such school, and in case of boys so committed, who shall remain in any such school after arriving at the age of ten years, the commitment may be amended by the Judge making the same, by substituting the Wisconsin Industrial School for Boys. If the commitment be made on the petition of parents, guardians or persons having the child in charge, the Judge may, in his discretion, require them to pay the whole or any part of the expense of his maintenance, according to their ability.

"SEC. 4,961. The Wisconsin Industrial School for Boys, at Waukesha, shall be the place of confinement and instruction of all male children, between the ages of ten and sixteen years, who shall be legally committed to the said Wisconsin Industrial School for Boys, as vagrants,

or on the conviction of any criminal offense, or for incorrigible or vicious conduct, by any court having competent authority to make said commitment.

"SEC. 4,962. The managers of said school are hereby clothed with the sole authority to discharge any child or children from said Industrial School who shall have been legally committed thereto; and such power shall rest solely with said Board of Managers, subject to the power of the Executive to grant pardons, and they shall have power to return to the court, justice or other authorities ordering or directing said child to be committed, when, in the judgment of said managers, they may deem said child an improper subject for their care and management, or who shall be found incorrigible, or whose continuance in the school they may deem prejudicial to the management and discipline thereof, or who, in their judgment, ought to be removed from the school for any cause.

"SEC. 4,963. The Superintendent of said school shall charge to each of the several counties in the State, in a book provided by him for that purpose, the sum of \$1 per week for the care and maintenance of each person in said school who has been committed thereto as a vagrant, or by reason of incorrigible or vicious conduct, from each of such counties respectively;* and the cost of the original commitment of all persons to said school shall be chargeable to the county from which the person committed to said school is sent; and the Superintendent of said school shall procure the arrest and return of any person therefrom; and any Justice of the Peace, Marshal or Constable, upon information of such escape, shall arrest and return any such fugitive as above mentioned.

"SEC. 4,964. The Superintendent of said school shall keep an accurate account of the amount due from each county for the support of persons therefrom, and shall annually, on or before the 10th of October in each year, report to the Secretary of the State the amount which may then be due from each county for the year ending on the 1st day of October preceding; which report shall state the name of each person for whom such account is rendered, the number of weeks which such person has been in said school during said year, and the amount charged for each of said persons, respectively; and such report shall be verified by the oath of said Superintendent as to its correctness. The Secretary of State shall add the amount due from any county in this State, for the support of such persons, to the State tax apportioned to said county, and such amount shall be collected and paid into the State treasury for the use of said school.

"SEC. 4,968. The courts and several magistrates in any county in the State may, at their discretion, sentence to the school any such male child who may be convicted of any petit larceny or misdemeanor, and the several courts may, in their discretion, send to the said school any such male child who shall be convicted before them of any offense, which, under existing laws, would be punishable by imprisonment in the State prison, and the County Judge and Judges of municipal courts in any county in this State may, in their discretion, commit to the said school any male child having a legal residence in said county, and being between the ages of ten and sixteen years, which, upon complaint and due proof, is found to be a vagrant, or so incorrigible and vicious that a due regard for the morals and welfare of such child manifestly requires that he shall be committed to said school; but, in all cases, the terms of commitment shall not be less than to the age of twenty-one years.

"SEC. 4,969. The managers of the said school shall have power, in their discretion, to restore any person duly committed to said school to the care of his parents or guardian before the expiration of his minority, if, in their judgment, it would be most for the future benefit and advantage of such person."

When any inmate is allowed to leave the school to resume his home with parents, or apprentice himself to farmers or others, he only receives a ticket-of-leave; and, whenever his conduct

* This law has not been regarded with favor always at the Industrial School, though it has always been in force. The first report referred to it in this wise: "The whole law is often rendered inoperative by those sections taxing counties. Courts and magistrates refuse to commit to the school because of the expense incurred to the county. Reform schools should most certainly be public institutions. Two boys ran away from Dodge and Columbia Counties and found their way to Milwaukee, where they were arrested as vagrants and sent to the reform school by the municipal court. Under the law, Milwaukee is taxed for their support." This early protest was of no avail, the law being still in force.

is not what that ticket-of-leave requires, he is claimed by the officers of the institution, and returned to it without process of law, to serve again until he shall again have earned such a record as will entitle him to another trial discharge.

The following circular, or receipt, is sent to every parent or guardian, when a new inmate is received :

“ The Board of Managers of this institution take this method of informing you that ——— has been received as an inmate of this school, to remain until twenty-one years of age, unless sooner discharged by the board. This school is not a place of punishment, nor a prison, but a reformatory, where the inmates are trained to industrious and virtuous habits, and instructed in those branches of useful knowledge usually taught in our public schools. They are provided with a pleasant home, with suitable labor, such as will enable them to earn an honest living after they leave the school. They have their regular hours for rest and recreation. They are well fed and clothed, and carefully nursed in sickness. A competent physician is prepared to attend upon them when needed. They are furnished such moral and religious instruction as is suited to their capacities and circumstances. In order to reform their characters and establish correct principles and habits of industry, inmates must remain here a sufficient length of time, and what is sufficient is wisely left to the discretion of the managers. In the exercise of this discretion, the previous history of the inmate, the character of the delinquency, the conduct of the inmate while here, and the influences of the home to which he is to be returned, are all to be taken into consideration.

“ The inmates are permitted to write to their friends once a month, or once a fortnight, if postage stamps are furnished them. It is not expected that presents of food or clothing will be sent to inmates, as they are supplied with both by the State. Nothing unsuited to the health or condition of the boy will be delivered to him. All articles are examined, and it is a useless expense and trouble to send anything deemed injurious or unnecessary. In all cases of serious illness, the friends of inmates are promptly notified. It is not intended to prohibit visits from friends, but no provision is made for entertainment, and they cannot be frequent or prolonged. The best way to shorten the period of a boy's detention in the school is to observe carefully the foregoing suggestions, to abstain from any effort to release him until his conduct and standing justify it, and, in the mean time, to let him understand that upon his own efforts and advancement he must mainly rely for his discharge. Avoid saying or doing anything to render a boy restless or uneasy, and you may hasten rather than delay his release.

“ The rule adopted by the board provides, ‘ The average length of time inmates shall remain in the institution shall not be less than two years.’ The observance of this will save trouble to all concerned.”

From its organization to the present time, the managers of the State Industrial School for Boys, appointed by the various Governors for terms of three years, in such manner that a portion of them shall rotate out of office each year, have been as follows :

1860-61—Appointed by Alexander W. Randall : L. F. Frisby, of West Bend ; Thomas Reynolds, of Madison ; Henry Williams, of Milwaukee ; Cicero Comstock, of Milwaukee ; John B. Dousman, of Milwaukee ; Andrew E. Elmore, of Mukwonago ; George S. Barnum, of Waukau ; Talbot C. Dousman, of Waterville, and Isaac Lain, of Waukesha.

1862-63—Talbot C. Dousman, of Waterville ; Charles R. Gibbs, of Janesville ; Edward O'Neill, of Milwaukee ; Andrew E. Elmore, of Mukwonago, and Cicero Comstock, of Milwaukee.

1864—Andrew E. Elmore, of Green Bay ; John Hodgson, of Waukesha ; Edward O'Neill, of Milwaukee ; William Blair, of Waukesha, and C. C. Sholes, of Kenosha.

1865-69—Andrew E. Elmore, Green Bay ; Charles R. Gibbs, Whitewater ; William Blair, Waukesha ; Edward O'Neill, Milwaukee, and John Hodgson, Waukesha.

1870-71—Edward O'Neill, Milwaukee ; William Blair, Waukesha ; Edwin Hurlbut, Oconomowoc ; Charles R. Gibbs, Whitewater, and Andrew E. Elmore, Fort Howard.

1872-73—William Blair, Waukesha; Edward O'Neill, Milwaukee; Charles R. Gibbs, Whitewater; Andrew E. Elmore, Green Bay, and Samuel A. Randles, Waukesha.

1874—Andrew E. Elmore, Fort Howard; Samuel A. Randles, Waukesha; Charles Jonas, Racine; Edward O'Neill, Milwaukee, and William Blair, Waukesha.

1875—William Blair, Waukesha; Edward O'Neill, Milwaukee; Charles Jonas, Racine; Andrew E. Elmore, Fort Howard, and Edwin Hurlbut, Oconomowoc.

1876-79—Charles R. Gibbs, Whitewater; Andrew E. Elmore, Fort Howard; John Mather, East Troy; William Blair, Waukesha, and Edward O'Neill, Milwaukee.

During the first three years, Mr. Elmore was Secretary; the fourth year, Secretary and Treasurer, and since that time has continuously held the office of Treasurer of the Industrial School.

The different Superintendents have been: Dr. Moses Barrett, 1860 to 1865; A. D. Hendrickson, 1865 to 1877; S. J. M. Putnam, from January, 1877, to April 20, 1879; William H. Sleep, who had been responsibly connected with the school during ten years, the present Superintendent, was formally appointed in December, 1879, though he had been acting in that capacity several months previously.

A. D. Hendrickson is now Assistant Superintendent, and John F. C. Legler, Clerk of the school and Secretary to the Board of Managers.

Owing to sickness among officers and inmates, and to various official changes during 1879, no inventory of the property of the Industrial School was taken; but from the inventory of 1878, and an estimate of other betterments, the value of the property may be approximately stated, as follows:

Real estate, 233 acres, \$12,500; main building, \$37,000; family buildings, Nos. 1, 2, 3, 4, 5 and 6, of stone, \$60,000; 7 and 8, of wood and stone, \$9,000; shop and factory, \$17,000; correction house, \$14,000; barn and carriage house, \$1,500; stone cellar, \$1,500; farm house and other out-buildings, of wood, \$700; furniture, fixtures, farm tools, library and miscellaneous stock, \$24,119.91; total, \$77,319.91. Since 1878, one large double family building and stone connections between the shops, costing \$17,000; an ice-house costing \$1,100, and a gas machine and pipes, costing \$800, have been added; total, \$18,900; grand total, \$96,219.91. This inventory is all put in at cost price. About \$2,000 should be added for cattle, hogs and poultry, which, being raised on the farm, represent no cost to the State. But, to show the actual value of the Industrial School property, there should be added to \$96,219.91, various large sums for farm improvements, trees in the nursery, a large surplus fund from the factories since 1878, making an estate worth, with all its artificial parks and other valuable improvements, at least \$150,000.

Of the different inmates taken into the school in the twenty years of its existence, the different counties have furnished the following numbers:

The actual number of new commitments from July, 1860, to September 30, 1879, was 1,693, or twenty-seven less than the footings of the above table. This table was made up from the printed annual reports, in some of which, in the early years of the institution, re-commitments were included, erroneously, in the report of the number of subjects received for the year, thus making the apparent number of new inmates greater than the real number.

Some counties, and they are by no means of better morals and habits than the others, have never availed themselves of the benefits of the Industrial School, and some never send vicious, vagrant or incorrigible boys to the institution for the reason that it would entail an annual expense of \$52 for each subject upon the county. The counties which have sent no subjects are Barron, Bayfield, Buffalo, Douglas, Kewaunee, Pepin, Shawano, and the counties erected during the last year or two. The judicial officers of other counties deem it a privilege to be able to

commit young criminals and various incorrigible boys to a reformatory institution of this kind. A glance at the above table will discover which those counties are.

Up to 1871, when girls were no longer committed to this school, 129 of them were confined within its walls. They were taught the various household arts, and received the same course of mental and moral training as the boys.

The Industrial School has cost annually, the following sums:

1860, \$4,953.81; 1861, \$7,021.79; 1862, \$6,370.84; 1863, \$7,263.97; 1864, \$12,456.53; 1865, \$19,756.47; 1866, \$24,026.14; 1867, \$24,247.56; 1868, \$26,741.83; 1869, \$24,982.34; 1870, \$32,103.04; 1871, \$32,387.95; 1872, \$36,538.71; 1873, \$41,472.64; 1874, \$48,453.02; 1875, \$45,156.70; 1876, \$48,148.49; 1877, \$46,321.31; 1878, \$48,721.45; 1879, \$42,866.72. This makes a total charge to "current expenses" of \$560,234.78, which does not include any expenditures for buildings, permanent improvements or real estate. This has been diminished by \$116,049.50, paid by the different counties, at the rate of \$1 each, per week, for the vagrants and incorrigibles, and also by the products of the farm and workshops. This total amount of "current expenses," \$560,234.78, divided by the total number of commitments, 1,693, makes the total cost, per capita, a trifle less than \$331, during the twenty years the institution has been in working order.

The amounts appropriated by the State Legislature, for the different years, for "current expenses," are as follows:

1860, \$3,500; 1861, \$10,550; 1862, \$6,500; 1863, \$5,500; 1864, \$12,004.50; 1865, \$20,500; 1866, \$16,000; 1867, \$14,000; 1868, \$20,500; 1869, \$25,000; 1870, \$37,000; 1871, \$37,000; 1872, \$33,450; 1873, \$27,500; 1874, \$31,000; 1875, \$28,000; 1876, \$28,000; 1877, \$44,000; 1878, \$35,000; 1879, \$34,000; total, \$432,004.50. The difference between the total amount appropriated, \$432,004.50, and the total amount charged to "current expenses" (\$560,234.78), is \$128,230.28. This amount has been paid by counties and earned by the inmates, their earnings, however, being exclusive of the valuable improvements made on the property, and the very large amount of food raised each year, upon the farm, for their support. The income from inmate labor is greater now than ever before, and is constantly increasing, and the appropriations from the State, outside of those for building expenses, are constantly decreasing.

The law provides that boys sent to the Industrial School for vagrancy, incorrigibility or vicious conduct shall be supported by the counties to which they are chargeable, at the rate of 1\$ per week each. Thus the different counties sending such subjects have contributed amounts to the support of the institution as shown in the following pages:

CENTENNIAL HISTORICAL ADDRESS.

The following is the text of an historical address, delivered July 4, 1876, on the occasion of the Centennial celebration at Waukesha, by Theron W. Haight of that village. It contains some reminiscences, political references and personal allusions, which are both pleasant and valuable, but some of which could not be used in any other manner by the historian :

"I do not need to say that what I have to offer to-day is the merest sketch of the history of Waukesha. To crowd the events of forty years into a paper occupying as many minutes in the reading, would be a feat as remarkable as was that of the monstrous genie in the Arabian story, who compressed himself within the limits of Solomon's vase, and, as I am not an adept in works of magic, I shall not attempt it.

"It would be an easy thing to devote an hour to speculations upon the old inhabitants of this region, who left their monuments in the shape of mounds bearing the likenesses of birds and beasts, scattered over the hills which look down upon our rivers or lakes, but I can only afford them this slight reference. It would not be difficult to consume much time in describing our immediate predecessors here, the Pottawatomie Indians, whose cornfields waved in the breezes from the west and from the lakes, for many scores of summers before the face of a white man was seen here. Within a few feet from where I stand, their corn rows are still distinguishable, having been preserved by this beautiful growth of trees. But we cannot dwell, at present, upon the history and the fate of this people.

"The real history of Waukesha begins in the year 1834, when two brothers, Alonzo R. and Morris D. Cutler, with a 'hired man,' named Luther, having left their home in La Porte, Ind., and, having traveled on horseback down the shore of Lake Michigan, turned inland on reaching the Milwaukee River, and a few hours afterward were greeted with a view of this lovely valley, with a prairie stretching away at the farther side, while the foreground of the picture was filled by the oak openings, which, in those early days, gave the appearance of an English park, rather than of a country fresh from the hand of nature. The Indian villages were numerous here at that time. From Pewaukee Lake to Mukwonago, and probably much farther, the smoke from assembled wigwams was frequently to be seen.

"The young adventurers were warmly welcomed by the dusky sons of the soil, and immediately went to work. It was now in the month of June, but not too late to put in potatoes and buckwheat, and to thus ascertain the productiveness of the land.

"It cannot be doubted that the experiment was entirely satisfactory to Morris D. Cutler, at least, for he is still among us, hale and hearty after his forty-two years of sojourn in the valley of the Pishtaka. A short visit home was paid by the brothers in the ensuing winter and spring, and the year 1835 sees them permanently settled in a log cabin near the site of the present post office, while a few other adventurous pioneers, including John Mandeville, Dr. Cornwall, Ira Stewart, A. C. Nickell and Isaac and Richard Smart and Mr. Sargeant, took up claims in various places from what is now Hickory Grove to Capt. Lawrence's farm. James McMillan erected his palatial mansion of logs, 16x24 feet, on the present site of the Catholic Church, and, being accompanied by his wife, did a hotel business on a scale magnificent for those days. Messrs. Stewart and Isaac Smart also had their wives with them in 1835, and in Pewaukee, where a few claims had been made in that year, Mrs. Judson and Mrs. Nelson Olin accompanied their husbands. In the same year, Messrs. Sewell Andrews and H. H. Camp looked up an eligible location in the town of Mukwonago, where they staked out their claims the next spring.

"It can easily be understood that the Waukesha County settlers of 1835 did not enjoy many luxuries, and that they were obliged to do without many things which their children would consider almost absolutely necessary to sustain life. Houses in those days, were not the comparatively comfortable log cabins of which we may still see now and then specimens on our country roads. The sides of those primitive dwellings were of poplar logs, and the roofs of

poles, having a top covering of split-poplar saplings, and the furniture was of the same wood, roughly hewn with axes. The bed, where anything more luxurious than the bare soil was indulged in for sleeping purposes, was made of dried grass from the marshes. The provisions attainable here during the summer consisted chiefly of fish, with now and then a little wild game. For flour and pork a visit to Milwaukee was required, and Milwaukee itself was not very well supplied with merchandise of any kind. The settlers were under great obligations, however, to Solomon Juneau for his assistance, not only in 1835 but for several years succeeding. If they could not pay him for necessary provisions he trusted them, and thus they were enabled to tide over the period of scarcity until the time was reached when enough was raised by the settlers to supply their own immediate wants, and also to exchange for goods which savored more of luxury and refinement.

"The year 1836 was a very promising one for what is now Waukesha County. A settlement was established at Mukwonago by about a dozen young men; Deacon Schuyler and his two sons located themselves at Delafield; Luther Parker made his residence in the present town of Muskego, bringing with him his bright-eyed, good-natured little son Charley, a boy of seven years old then, and now (1876) the acting Governor of Wisconsin in the absence of Gov. Ludington, while a few shanties were erected in the vicinity of Brookfield Junction, of which one was occupied, I believe, by Robert Curran. The population of Waukesha and vicinity was also increased by about a score more of settlers, among them Alexander F. Pratt, who exchanged four city lots in Milwaukee with Morris D. Cutler for the farm down the river, which he retained for many years afterward. Of the other settlers who came here in that year, I believe that Sebina Barney is the only one still remaining among us. [Mr. Barney died in 1879.]

"From this time onward for six years the influx to this part of the country was steady and continuous, consisting almost exclusively of American immigrants from the Eastern States, including New York, men who came here with their families because it was evidently a fertile and pleasant farming country, and a good place from which to start the younger members of their households in the great journey of life. The daily routine of the inhabitants during these years was much the same with all. Fresh arrivals were welcomed from month to month, and the stranger was shown where he could best make his claim. The hut of poplar logs was gradually exchanged for a more substantial one of oak. The visits of the Indians became less frequent and less troublesome. Horses were introduced in the place, to some extent, of oxen. A thriving hamlet had sprung up where the court house and Episcopal and Catholic Churches now stand, and the name of 'Prairieville' had been given to the little cluster of houses. A flouring and a saw mill had been built by John Gale, and the adjoining land laid out into village lots. It was time for changes to be made, and they were not long in coming. On the 5th day of April, 1842, the first town meeting was held for the town of Prairieville. The first name on the tally-sheet is that of Jacob H. Kimball; the second is that of William A. Barstow, afterward Governor of Wisconsin. The twenty-third vote was handed in by Alexander W. Randall, Wisconsin's favorite war-governor at the beginning of the rebellion, and subsequently Postmaster-General of the United States. The next to the last ballot was cast by H. N. Davis, now State Senator from Rock County, whose son, Cushman K., has lately served a term as Governor of Minnesota. There were 112 votes cast in all. Joseph Turner acted as Chairman at the election, and Ezra S. Purple, as Clerk. The first Board of Supervisors, then elected, consisted of James Y. Watson, J. H. Kimball and J. J. Wright. Vernor Tichenor was chosen as Town Clerk.

"The town of Prairieville had become duly organized, and was in a condition to go alone, so far as local government was concerned. The southwestern quarter of what is now Waukesha County had previously organized as the town of Mukwonago, and in 1841 had been divided in the middle, the northern half being called Genesee, and the southern half retaining the old name. The northwestern quarter of the county had just been divided into the towns of Summit and Warren; the latter comprising Merton and Oconomowoc.

“It was about this time that the movement began which resulted in making Waukesha County the center of theological instruction for the Protestant Episcopal Church in the Northwest. The headquarters of the associate mission of that church for Wisconsin had been located at Prairieville by Bishop Kemper, then residing at St. Louis. Three enthusiastic young clergymen, who have since attained deserved renown in the church, Revs. Messrs. William Adams, James Lloyd Breck and John Henry Hobart, had established themselves at Prairieville in 1841, and had worked, without intermission, for thirty miles in every direction to preach the Gospel to every living creature. It is not likely that their efforts were greatly appreciated at Prairieville itself, and they soon established the mission at Nashotah, which is still bearing wonderful fruit from year to year.

“In the mean time, other denominations had not been idle. The Rev. Burgess took charge of the interests of the Baptist Church at Mukwonago, and the Rev. Griffin in the northern part of the county. The Rev. H. N. Frink was an active missionary of the Methodist Church in the early part of 1840 and afterward. No doubt I might find records of other missionary labors, by diligent search, but they are not ready at my hand for present use. The lives of those men of God were not passed upon “flowery beds of ease” by any means, for they were obliged to travel on foot from settlement to settlement; to hold services in whatever barn, dwelling or other house might be most convenient, and eat and sleep as the dispositions of the church-goers might dictate. Their salaries were merely nominal, and the most that they received for their arduous labors was the feeling that they had performed their duty, as it had been given them to understand their duty. Their memories should be ever held in honor.

“One of the peculiar features of the population of Wisconsin in 1842 was its prevailing condition of bankruptcy. In looking through the Madison papers of that year, we find them crowded with notices in bankruptcy, and this portion of the State had its full share of cases. It seemed, almost, as though people in those days passed through the bankruptcy courts as a sort of initiation into Western life, and without much reference to whether previous debts of any consequence were hanging over them or not. The total of debts from Wisconsin people wiped out by bankruptcy proceedings amounted to over \$2,500,000, and the total aggregate of property available for the settlement of this enormous indebtedness amounted to just \$2,913, or about 1-10th of 1 per cent. Whatever inclination there may be toward repudiation among us more latterly, it can not be said that it is not a legitimate inheritance from the old settlers.

“With Joseph Bond and Andrew E. Elmore, at Mukwonago, and A. F. Pratt, A. W. Randall and William A. Barstow, at Prairieville, it need not be said that there was a good deal of interest in politics here in those days, and it was in the fall of 1842 that Mr. Elmore was first elected to the Territorial Legislature. He was a Whig at that time, though he soon became the champion, on general principles, of the famous semi-communistic doctrine embraced in the watchword ‘All rights for all men.’

“David Bonham was at this time a very influential politician in the town of Lisbon, which had been settled largely by English families, and was appointed a Justice of the Peace. It was he who killed a man named Keene, a few years later, in a wrangle over a mill property, and for the commutation of whose punishment for this crime Alexander Randall was said to have forwarded a petition to the Governor, with a yard or two of names of citizens, which he had cut from a temperance petition and fastened to that on behalf of his friend. It may as well be stated here as anywhere, that Mr. Bonham was reprieved, and finally pardoned.

“Talbot C. Dousman was the political leader in the town of Genesee, then comprising Ottawa also, and accomplished more by his wit and humor than others were able to do by solid argument.

“The first Genesee election was held in 1841, when Tweedy, Whig, was candidate for the Council against Turner, Democrat. Dousman could find only one Whig near the polls, but managed to secure a large number of additional votes for Tweedy, on the ground that he was known to be a rascal, while Turner had only been in the country a year, and no one could venture to predict how he might turn out in the end.

"All kinds of fun were current among the politicians in the early times, and the practical jokes engineered by Alexander W. Randall and Andrew E. Elmore are still conspicuous among the traditional lore of Waukesha County.

"But the inhabitants did not give their whole time to joking by any means. In October, 1842, the first county fair was held at Prairieville, and its record shows that the agriculturists had begun to seek after excellence in methods of farming and in results. There were no second prizes awarded at this show, and I am inclined to think that, in many cases at least, there was but one entry in a class. It was a beginning in the right direction, however, and has made subsequent labors much easier.

"At this time, and for years afterward, the roads were execrable, if the Milwaukee newspapers of that era are to be trusted. The road from Milwaukee to Waukesha, and that from Milwaukee to Mukwonago, received special attention from the editors, who showered epithets upon those supposed to be responsible for the bad condition of the highways, in a manner that the editors of thirty years ago were proficient in, but in which, of course, the editors of to-day never indulge. It is probable that the uproar created by the journals was the means of getting better roads after a season, for they are assuredly very respectable now.

"To complete my outline of Waukesha County in 1842, I will state that it was then the backwoods portion of Milwaukee County, but with fully recognized capabilities for growth and improvement; sparsely settled by an energetic, good-natured and open-handed native American population, for the most part, though with an English settlement in the town of Lisbon, and a Scandinavian settlement about Pine Lake; having for its noteworthy hamlets, Waukesha, with about four hundred inhabitants, and Mukwonago, with perhaps half as many; having little clusters of houses about the water-powers at Pewaukee, Delafield, Genesee, Hartland, Muskego, Menomonee and Oconomowoc, where mills were built, or expected to be built at an early day; and having the appearance, in general, of just being on the point of emerging into the comforts and conveniences of social life, after years of experience without them.

"At this time, the wonderful beauty of our scenery and fertility of our land, began to attract the attention of several different classes of people in addition to those already here. The followers of the French Communist, Fourier, were then exercising a very powerful influence upon the progressive thought of the world, and their theory of association had captivated many of the foremost thinkers, of the younger sort, in America. Several communities, on Fourier's plan, had been established in the East, and several associations of European communists had instituted a search through the West for places where their theories might be tested under favorable circumstances. One of these societies, organized in England with about fifty members, fixed upon a half-section of land bordering upon Spring Lake, a little to the south of the village of Genesee. About thirty of the number came and made the settlement in 1843, under the leadership of Thomas Hunt, but after a year's trial the experiment was abandoned. It would have been a miracle if it had succeeded, since the members were all Londoners, and knew no more about farming than their neighbors did of Sanscrit. Although not directly successful, however, this society had a perceptible effect upon the politics of the county and State from that time forward.

"One year later, in 1844, David Roberts, a Welshman, discovered in the towns of Delafield and Genesee a country of hills and streams, which pleasantly reminded him of the old country, without presenting its more objectionable features. A Welsh immigration was the immediate and valuable result of Mr. Roberts' discovery, and the chapels of the new immigrants were soon dotting the hills of the two towns.

"At about the same time, the German immigration, which had at first stopped in the neighborhood of Milwaukee, began to reach farther inland, and to become an important factor in our population, especially in what now constitutes our eastern tier of towns, Menomonee, Brookfield, New Berlin and Muskego. With these means of growth, besides the steady influx of Americans, from the Eastern States, it is not surprising that the census of 1845 should have shown a population, within our present county limits, of 13,733, of which number, 7,402 were

males and 6,331 females. The towns were then divided as at present. In the following year, those restless politicians, William A. Barstow, Elmore, Randall and Pratt, conceived the bright idea of forming a new county out of the sixteen western towns of Milwaukee County. The idea was no sooner brought out than it was acted upon and a brilliant fight began in the Legislature, where Milwaukee County was then represented by J. H. Kimball, of Prairieville, Curtis Reed, of Summit, and James Kneeland, of Milwaukee, in the Council, and S. H. Barstow, of Prairieville, Luther Parker of Muskego, W. H. Thomas, of Lisbon, and Crawford, Magoon and Mooers, of Milwaukee, in the House. Of the above, Reed and Thomas, with the Milwaukee members, were opposed to the bill giving the voters of these sixteen towns the right to decide the question of division, but it was finally carried and the matter thus relegated to the people.

“Several weeks intervened between the legislative session and the election, which were employed by the supporters and opponents of the movement in a newspaper warfare of the most personal and virulent character. The paper advocating division was printed at the office of the *American Freeman*, an Abolitionist journal established by C. C. Sholes, at Waukesha, in the fall of 1844, and the one which advocated a continued union with Milwaukee County was issued from the office of the Milwaukee *Sentinel*. The editors of the first-mentioned sheet were A. F. Pratt and A. W. Randall. The latter was managed by A. D. Smith but numbered Dr. Castleman, Leonard Martin, W. H. Thomas, Aaron Putnam and Curtis Reed among its contributors. Mr. Pratt, in his recollections, says that the first two or three numbers of these sheets, called the ‘Waukesha *Advocate*,’ and the ‘*Unionist*,’ were devoted to arguments, but that subsequently there was nothing in them but the bitterest personal abuse. The election which ended this contest must have been curious to strangers. At Prairieville and Summit, the headquarters of the opposing forces, travelers and children were brought to the polls and made to vote. It is quite probable that an emigrant who voted with his nine children, for division at Prairieville, may have cast ten votes for the opposite side of the question on reaching Summit, especially as voting was kept up at the latter town for two days subsequent to that set for election. The result of the whole matter was a division of Milwaukee County, the new county being named Waukesha at the suggestion of Joseph Bond, of Mukwonago, who has always been a consistent admirer and advocate of Indian names.

“In this year, 1846, the first constitutional convention was held for the purpose of organizing a State government. The constitution adopted by the convention was rejected by the people, and the next year another convention was held, whose labors were ratified by the people, and Wisconsin became a State in 1848. The political work of these two years was mostly confined to the matters here alluded to, which created great excitement among the voters. In the mean time, Waukesha County had become the hot-bed of Abolitionism in the Northwest, the *American Freeman*, published by Mr. Sholes, being the great exponent of that sentiment. Messrs. C. C. Olin and L. D. Plumb took the publication of the paper off from Mr. Sholes’ hands in 1846, and in December of the same year Ichabod Codding, the great apostle of Abolitionism, bought out Mr. Plumb and became the editor of the paper. In July of 1847, Mr. Codding was ordained as a Congregational minister here, by Owen Lovejoy, and took charge of the Congregational Church of Waukesha. In 1848, Mr. S. M. Booth came on from the East to edit the *Freeman*, which was then removed to Milwaukee and became the *Free Democrat*.

“The educational interests of the county had not been neglected on account of the absorbing interest in politics. Schools had sprung up in every town, and Waukesha especially had become a seat of learning for the whole State. A young ladies’ institute was established here in November, 1846, by E. Root and Rev. S. K. Miller, in which French, Latin, Greek, higher mathematics and music were attended to, and which was continued for many years afterward under different managements. In 1847, the endowment of Carroll College was a subject of as much attention and interest as it is to-day, although it had not, at that time, a faculty or students, and the Classical and Normal Institute began with the year 1848, under the management of Profs. Sterling and E. Enos, Jr.—the latter being to-day the presiding officer of our centennial

celebration, to say nothing of his other honorable positions. The Classical Institute was a prosperous school, and received many students from abroad from among the better classes. Rev. A. Menæos, a Greek by birth, took charge of it with the beginning of 1849. Among the students here were Gov. Davis, of Minnesota, Gov. Fairchild, and his brother, Gen. Cassius Fairchild, and that soaring eagle of the late national Republican convention, Bob Ingersoll, of Illinois. The first class in Carroll College was started by Prof. Root, in a room over J. S. Bean's store, in December of 1849, and the contract for the building was let in 1853. I have neglected to note in its proper place the establishment of the county seat here, and the change of name from Prairieville to Waukesha, which must, therefore, be considered as accomplished facts without further circumlocution. I shall be obliged also to pass the growth of the Free-Soil party here, which affords many points of interest in the days of the fugitive-slave law. The feeling for and against the enforcement of the act was very strong, and Booth was at one time hung in effigy from the liberty pole in the public square, while some of our citizens were actively engaged in helping this same Booth to secure the escape of fugitives from Southern slavery.

"On the 20th of July, 1848, the first permanent newspaper having in view the local interests of Waukesha, was issued by George Hyer, under the name of the *Waukesha Democrat*. From this time forward, the politics of Waukesha County became an unknown quantity and a source of continual amazement to the remainder of the State for many years. In fact it may be said that the remainder of the State derived its politics from Waukesha County, in one way or another, until 1860, and the manipulators of the various machines here were the most skillful and the most worthy of being followed of any from Lake Superior to Illinois. I have spoken of many of these gentlemen already, but, about 1850, the politicians received an accession in the person of Henry D. Barron, who was then hardly past boyhood, but took his position among the most expert, almost at the beginning gobbling up first a county office, and then the post office, without an apparent effort. In August, 1851, he established the *Chronotype* newspaper, which was continued from 1854 onward, by A. F. Pratt, as the *Plaindealer*. While acting as Postmaster, Mr. Barron was once surprised at receiving a notification that his resignation had been accepted and another person appointed in his place. It did not take him long to ascertain that somebody else had written a resignation for him in due form and forwarded it to the General Post Office Department. This was more of the true inwardness of Waukesha politics.

"The decade closing with 1860 was one of real and substantial progress for the county. Manufactures were started at various points. The farms throughout our whole extent assumed an air of neatness corresponding with those in the East. The State Industrial School was built and prepared for the reception of inmates, under the supervision principally of W. D. Bacon, who had previously done much for the industrial interests of the village, besides serving acceptably as a member of the State Legislature and in other public capacities. Above all, the Milwaukee & Mississippi, and the Milwaukee, Watertown & Baraboo Valley railroads had been built through the county—the two roads being now branches of the Chicago, Milwaukee & St. Paul. The first named was the first road commenced in Wisconsin, and the editor of the Milwaukee *Wisconsin* boasted, on the 21st of November, 1850, of having traveled as far as Wauwatosa on the only railroad in the State. On the 4th of March, 1851, a celebration of the arrival of the railroad was held at Waukesha, at which nearly all of the noted men of the State were present. Mayor Upham, of Milwaukee, compared the taking of Waukesha by the iron horse to the taking of ancient Troy by the wooden horse; and A. W. Randall saw, with prophetic vision, the iron pathway extending to the Pacific, and the productions of China and the Indies passing by our doors. In 1852, the village of Waukesha was incorporated under a charter which its citizens still regard with jealous pride, and which they are unwilling to exchange for the empty name of a city.

"From 1860 to 1865, little advance was made in our material prosperity, but it was demonstrated that there was something for which our citizens cared more for than for money. In the vast torrent of blood that flowed in defense of the unity of the Republic whose centennial we are now celebrating, was mingled much of the purest and best that Waukesha County

could afford. Of our heroes who fell in the war for the preservation of the Union I speak with reverence. Their memories are still dear to us personally as well as in the abstract, and if I do not undertake to mention their names it is because it is impossible to enumerate all, and I feel that all should occupy a place in the roll of honor. Our dead are scattered over innumerable battle-fields, but their deeds are monuments of patriotism, which shall, in their results, endure forever.

“With the close of the late civil war, the decade began which is this year completed. It has been a period whose importance is equal to that of any preceding ten years, in the light of its influence upon our local interests. It began with the establishment of a new and valuable industry to Waukesha in the shape of the manufacture of woolen goods, and it has progressed with the steady influx of wealth in search of health and pleasure on the shores of our beautiful lakes. It was in the year 1868 that the discovery was first made of the wonderful healing qualities of a water which had flowed from a spring near this village—cool, pure and sweet as the fabled nectar, for untold years before, and which might have continued the same even tenor of its way for ages to come had it not been for the remarkable enthusiasm and energy of Col. Richard Dunbar, to whom must be awarded the praise of making known to the world that the hope of the afflicted is here. Of the changes that have been wrought on account of this knowledge you are all aware. A new era seems to have been inaugurated which shall make the future progress of this county in wealth, as well as in culture and refinement, more wonderful than has been its progress for the past forty years, from a pleasant wilderness to a power in the midst of the powerful commonwealth of Wisconsin. So may it be.”

“THE EENJUNS ARE COMING!”

In September, 1862, when everybody was thrilled with horror over the terrible Minnesota massacre, and trembling with apprehension lest similar outbreaks should occur in other localities, the cry was raised, no one can tell where or by whom, that the “Indians were coming.” Several parties had recently returned from the Minnesota massacre, and their stories of those bloody scenes had been repeated, thought over and exaggerated by the people, until the very atmosphere seemed to be filled with apprehensions. At brief intervals, reports had also been circulated that the rebels (the rebellion was then at its height) had passed through Canada, and were descending on Wisconsin from the north. Taken altogether, everything was ripe for the ungovernable and memorable stampede that followed. The village of Waukesha was made the center of fright, with no particularly good reason, had the Indians been really on the war-path. On Thursday night, September 4, its sleeping but apprehensive inhabitants were startled by the entry of scores of teams driven at headlong speed, and loaded with men and women shouting, “The Eenjuns are coming!” The stream of rattling vehicles began to enter from the direction of Pewaukee; but before midnight they were pouring in from all directions and in all conditions. It was a scene of the utmost fright, confusion, apprehension and downright fear. Reputable men, breathless and convulsed with fright, rushed in with blood-curdling stories of what they had seen. Those coming from one direction said Hartland was burned; others saw mills in ashes; others had seen the yelling savages setting fire to grain-stacks in the town of Lisbon, and Menomonee was swarming with red men who were burning and butchering indiscriminately as they swept toward the city. Everybody was frightened, wild, crazy, foolish. No story was too unreasonable for credence—in fact, the more horrible and unreasonable the incoming reports were, the more eagerly the crazed populace seized upon them as true. There were in the village of Waukesha, on that wild, dusty September day, at least one thousand persons who had seen “Indians” in all the surrounding towns, and beheld grain-stacks, barns, houses and mills in ashes.

Business was entirely suspended, and all the fire-arms and ammunition to be had were taken eager possession of by the people, who were rushing wildly about with unfounded stories to increase each other's fears. Every hotel was crowded; the streets were literally jammed

with teams, wagons, buggies and vehicles of every conceivable sort. Ox teams were goaded by hatless farmers over the roads at their utmost speed, entering the village with distended eyes and parched tongues lolling out. The men took turns at the whip to urge their frightened but exhausted horses at still greater speed, while half-dressed women and crying children clung to the bounding vehicles. The sick were hustled in their beds into the lumber wagons, and jolted in the most reckless manner to the city at the highest attainable speed. Some thrifty farmers loaded bureaus into their wagons; some brought along the best cow, and some hurried away with parcels of worthless household furniture, leaving valuables behind. No one stopped to eat, and the bruised and jolted children were crying about the streets for food. One family left just as supper was spread, and did not return until tea-time the next day, when the table was found as it had been left, except the inroads made on the edibles by the cat and chickens, the latter having spent the night on the mantel. A Scotchman in the town of Pewaukee left a strong house and slept on the ground over night with his family in the neighboring forest. A heavy rain ensued, from the effects of which his wife and children were sick several days. Another man loaded an old-fashioned melodeon into a rattling lumber wagon, and ran his horses to—he probably has no idea where, to this day—leaving a tin box well filled with cash and valuable papers behind. But, fortunately, his thirteen-year-old boy had been out for squirrels, and returning to the deserted house, cared for it and the box of valuables until the frightened family returned. One man, who afterward became a good soldier, never quailing in the fiercest battle, drove a team at the wildest speed to take his two children to Milwaukee; but the demoralized fellow snatched up two other children and bore them screeching away, leaving his own behind in greater peace and safety, but not less astonishment. At Poplar Creek, a crowd of brave men started helter-skelter for somewhere, leaving the horses attached to a thrashing machine, around which they had been working. The neighbors who crept back before morning aver that the poor horses were not released from the machine until the succeeding day; but the fearless fellows who left off thrashing so precipitately maintain that every one of them “broke loose” before morning!

The bravest citizen of Lisbon, when there was talk of forming a company to protect the women and children, boldly sneaked out of the neighborhood and walked—when he did not creep—to Milwaukee. He there dodged about through the city, completely evading all Indians, and, confiscating some white chief's boat, rowed far out into Lake Michigan, where, shivering and alone, he remained during the night in the soaking rain.

In Waukesha Village the court house and every public place was full. Private houses were kindly thrown open to such as had an apparently earnest desire to save their scalps; but notwithstanding this, scores of men and some women were compelled to sleep on the ground, thoroughly exposed to all the horrors of Indian warfare—death by burning at the stake; by having red-hot tobacco spittle squirted into their ears and eyes; by writhing under streams of scalding water; by being skinned alive and having salt rubbed in; by having burning splinters shot into their quivering flesh, and by all the other methods for which skilled barbarity is noted. The people on the north side of Fox River at Waukesha, all flocked to the south side where most of them remained over night. This was thought to be the only place of safety. Elder Spooner declared in case any Indians *should* come, that the bridge could be blown up. Not till the scare had subsided—the honest historian must put upon record in unmistakable terms that it did subside—did any one seem to realize that in case the bridge were to be blown up the river could have been forded by a three-year-old child.

In Cutler's park the squawk of fowls in distress had been heard for some time, when, about midnight, several citizens banded together for the purpose of learning what was the matter, as an old lawyer had tremblingly suggested that he believed—he knew—the “Eenjuns” were skulking in that park, and being so terribly hungry, were eating Cutler's chickens alive. The citizens, after some searching, found a well-known farmer wedged between the ground and the fence at the back side of Mr. Cutler's yard. He was hatless, coatless and bootless. He wore stockings, however, and in each hand held a flapping, squawking game-fowl. He was quaking and

puffing, and when found, was lying with his face thrust against the earth, wheezing, "Oh Lordy! Oh Lordy!" in the most agonizing and ridiculous manner imaginable. He had caught two of his fowls and was trying to save them from the Indians!

It being finally determined that if any Indians were coming they would come from the northeast, a parcel of young bloods agreed to go out a few miles and form a skirmish line, sending back word of warning in case of danger. They marched up the railroad track bravely enough, but before reaching Brookfield Junction fully determined to take the next train for Milwaukee, which they did. On reaching that city, which had also been thoroughly invested by the "Indian scare," they found an individual who was too drunk to be afraid of Indians, yet not so drunk as to have completely lost his knowledge of drawing beer; they therefore went on a spree and did not return for several days.

Out in one of the towns two half-blood Indians were at work a short distance from the road gathering roots and herbs for a well-known Waukesha physician. They worked steadily on for an hour, but finally the headlong rush of teams and people toward the city wrought upon their imagination until they were as thoroughly frightened as their white brethren, and, with ax in hand, ran toward the road to beg for a ride to some place of safety. This was more than the fleeing pale-faces could bear. Here were real Indians—bare-headed, armed with axes and on the run! The foaming steeds were more desperately lashed in the increased frenzy of fear, and the poor redskins, more thoroughly frightened than ever, got no ride.

Without having occult evidence to sustain them, the people of the village of Waukesha had as good reasons for their fears as those of any other locality. Before the rain, clouds of dust hung over the village, and over all the roads leading into it, and the smoke from several fallows were indubitable proof to the wild-eyed throngs that the savages were applying their torches as they advanced.

This "scare" was not as bad at Oconomowoc as at Waukesha.

Finally the "scare" died out, as it had nothing whatever but imagination to feed upon; but the ludicrous incidents which transpired during that memorable day would make a book of respectable proportions. The hungry, dusty, exhausted crowds returned home, most of them declaring they had "just started" for the post office, or to buy snuff, or tea, or groceries, when they heard the Indians were coming! Everybody felt sheepish enough after the affair was all over, but gathered bravely on the corners and related how *they* never felt the least bit of apprehension.

There was no foundation for the various rumors afloat at that time, and all rational theories utterly failed to account for the indescribable scene of confusion, fright and excitement that ensued, as it was well known to all that a thousand Indian warriors could not have been mustered in the whole State. At the same time, people from every direction reported that thousands of savages had fallen upon their particular neighborhoods. But Waukesha County was not alone the afflicted. The malaria of fright reached every town and village in the State, and even invaded the brave precincts of the capitol at Madison, the Governor ordering the Milwaukee militia to march to the rescue of surrounding villages, which was done, thereby affording material for many a gibe in the newspapers.

There are to this day scores of rusty guns and pistols hidden away in Waukesha County, which have not seen light since that memorable September day, and which will remain in their secure retreats until the men who bought them at ruinous figures have gone the way of all the earth.

WAUKESHA COUNTY AS A SUMMER RESORT.

There are many things in which Waukesha County excels, but in none more prominently than in the number, character, and fame of her summer resorts. Some localities have beautiful scenery; some health-giving springs, and some delightful lakes. Waukesha has all of these; not only all of them, but she has more lakes and springs than any other county of equal size in the Union. The last ten or fifteen years have witnessed summer idling and watering-place

seeking grow to their present large proportions ; but the periodicals of the East contained glowing accounts of the natural beauties and healthfulness of Waukesha at least forty years ago. Although these manifold beauties were recognized and appreciated at that early period, pleasure-seeking had not then become a business ; nor had such a great mass of people the means to carry on that business had the desire to do so existed. When, however, it begun to be fashionable to seek rest and health by lake and wood and spring, Waukesha County at once sprang into fame as a place where all might be found, where she has continued to occupy one of the front ranks, entertaining annually many thousands of visitors from all parts of the country.

Although the great Northwest, and particularly the State of Wisconsin, is full of summer resorts, the county of Waukesha leads all other localities. This is not a mere statement to gratify local pride, nor an advertisement to secure more customers, but such a truth as can easily be demonstrated by statistics. She has more lakes and more springs than any other county ; the finest and largest* hotels in the State ; beautiful scenery, good railway facilities, excellent fishing and as many other attractions as other places.

A writer for one of the leading publications of the West, writing recently from Waukesha County, said : " It has long been a puzzle to me that our Indian summer should be enjoyed by nobody but our own citizens, for the two or three weeks following the first frost constitute by far the most magnificent period of the whole year, in the rural districts. The foliage of the forests has masses of gold and scarlet mingled with its green, and the warm, rainless days are softened by a far-extending veil of haze which reminds one of his early dreams of elf-land. It is a season that I should not advise any one to indulge in for once unless he can afford to repeat the experience in the future, for, once enjoyed, the desire to see other Indian summers becomes all-powerful."

Waukesha.—While hundreds and thousands visit the village of Waukesha for pleasure and recreation, the place is more distinctly a health resort than a pleasure watering-place. Her numerous mineral springs, of which elaborate accounts will be found elsewhere, are such a boon to suffering humanity as no pen can describe, and the afflicted gather from nearly all portions of the civilized world, and those suffering from the diseases for which their waters are a specific return home healed and happy.

But Waukesha Village is a beautiful retreat, a pleasant place in which to spend a summer set apart for needed rest and recreation. It lies in the valley of the Fox River, down to which the land slopes gently on one side, and abruptly, from a high, commanding elevation, on the other. The drives up and down the Fox River, close to the shaded banks, are delightful, as are also those in other directions to Pewaukee, Nashotah, Muskego, Mukwonago, or toward Milwaukee, the metropolis of the State, which is only eighteen miles distant.

On the high, green bluff north of the village is the Waukesha Observatory, from whose summit several counties can be seen, as well as a most charming bird's-eye view of the whole village. Here also is the Fountain House, the largest hotel in Wisconsin, erected by a gentleman who, at sixty-nine, was cured by the use of Waukesha mineral water. The village has other hotels, the park, opposite the Silurian Springs, being one of the most charming places in the county ; the Mansion House, large and fashionable ; the Exchange and American (regular hotels), besides numerous, elegant boarding-houses. Waukesha is unsurpassed in hotel and boarding-house accommodations, and, numerous as they are, they do not afford room for all who annually visit the place, and nearly every private house in the village is called upon to furnish accommodations for strangers, which is cheerfully done.

During the last ten years, since Richard Dunbar infused new life and hope into its somnolent citizens, much has been done to beautify Waukesha, in the way of planting shade trees and improving residence property. In this direction, M. D. Cutler's splendid private park, which he has been planting during the last forty-five years, is a great attraction and ornament, with its thirty varieties of trees, numerous song birds, deep shade and relics of the work of pre-historic nations.

* The Fountain House, at Waukesha, of brick and stone, is the largest hotel in Wisconsin.

As the fame of the place grows apace, its citizens will do more toward making it attractive. There are now three parks, brilliantly lighted every evening in summer, by private individuals, and free concerts are given every alternate night at the Silurian and Bethesda Parks.

Waukesha has also attractions rich in the extreme, for students of nature. To show this, an enthusiastic writer will be quoted as follows:

"This article is not intended for the general public, but is a description of an old and mysterious locality in which is a rare summer retreat, and therefore, all but the peculiar and appreciative few for whom it is here presented should pass on. There is a certain small percentage of the people of this world who know, understand and appreciate its rarest beauties and richest pleasures, and are always to be found among them. They will be found where the genius of man has crowned the beneficence of nature with all the rarest jewels of his skill. They love delicious shade, clear springs, fragrant orchards, an unsurpassed table, elegant rooms, select company, nooks, arbors and lawns. For them it can be truthfully said that no place in Wisconsin comprises so many of the desirable attributes of such a summer resort as Waukesha, the "Saratoga of the West," situated at the bottom of the old Silurian Ocean. Its attractions can hardly be enumerated. It nestles in that tree-covered valley that was once the bottom of a mysterious but teeming ocean, whose numberless fossilized beings halt the observer wherever he goes, in fact are trodden beneath his feet at almost every step. The ancient and mysteriously interesting remains of a pre-historic race, graves, deities, fortifications, birds, men, turtles, small mountains, corn-fields and gardens—this unreadable but absorbing history of the past—wrought and written in the soil, arrest the curious wherever he may wander. Mineral springs whose waters—free to the million in their marble basins—tone up and strengthen any reduced or overtaxed system, no matter from what cause the degeneration arose, are found on almost every street, scattered charmingly among such parks, shade, drives and walks as no other place in Wisconsin affords. In front and on either side [of the hotel mentioned by the writer, but the name of which is omitted], is one of the oldest parks in Waukesha, which contains more than a dozen different varieties of trees; to the rear stretch acres of a fine old orchard now in the richest bloom—and across the street is the Silurian Mineral Spring, park pavilions and bath-house—the buildings all new and elegant. This spring is one of the largest in Waukesha, and within two minutes' walk of the Park Hotel. The situation and surroundings, indiscribably charming, are all rendered cool and fragrant by the surrounding pines, spruce, aspens, maples, elms and fruit trees.

"Nothing like Waukesha can be found; nothing at all compares with it as a place to regain health, throw off business and household cares and perplexities, and take up a new and brighter lease of life, is anywhere in existence. All is beauty, blossom, growth, health and cheerfulness. In the surrounding stretch of park, the music of robins, orioles, humming-birds, wrens, wild canaries, bees, thrushes and bobolinks is ever heard, while the flash of various bright-winged but songless birds may be watched from every window and verandah. A summer idling place, with springs, orchards, gardens, birds, shade, culture, and reasonable prices—where can one be found? Waukesha is the only one that combines them all. It enjoys what every other summer resort enjoys, and can boast of several attributes no other pretends to claim. As a delicious retreat, an elegant summer home, a health-giving resort, a delightful idling place, a rich field for the student, a congenial point for the cultured, the "Saratoga of the West," at the bottom of the mysterious old Silurian Ocean, is unapproached and unapproachable. Beautiful lakes in great number are near by, where bass, perch and pickerel are plentiful, and hills, valleys and forests line the roads to them."

Pewaukee.—Is situated nineteen miles from Milwaukee.* The road passes through the National Asylum, the beauties of which we admire from the car window, and then through a charming landscape, until just fifty minutes after leaving Milwaukee we reach our destination—the first of Waukesha County's many famous resorts. There are two hotels, the Oakton Springs and Heath's, the former having a capacity of two hundred, the latter accommodations

*The balance of this article is from the "Northwestern Tourist."

for fifty guests. Both being built for the purpose of entertaining summer tourists, and conducted with special reference to their wants, there is probably no choice in the matter of accommodations. The Oakton Springs Hotel fronts on Lake Pewaukee, a beautiful sheet of water, four to five miles long by about one mile in width, called by the aborigines "Pewaukee-wee-ning," the meaning of this pretty name being "Lake of Shells," from the countless beautiful little shells strewing the sandy beaches. We are much pleased with Pewaukee-wee-ning, the charming scenery of its shores, varying from pastoral fields to rocky formations and primitive forests, the advantages of access to two of the most famous mineral springs in the world, for the cure of all those undefined internal ailments which particularly beset people of sedentary habits, the excellent fishing, boating, etc.—it would seem to require considerable "wee-ning" to keep us away from here after once becoming acquainted with the place. This is our first impression of Pewaukee, and every day confirms it. The hotel accommodations are strictly first-class; the lake is a perfect gem; sail and row boats are on hire at the boat-house, where line and bait are also furnished the angler. Pickerel, pike, black bass and perch are ever ready to rise and take the bait with an eagerness and dexterity quite gratifying. The excellent fishing at the lake draws hither a large number of disciples of Isaak Walton every season, many of them camping out. Finer camping grounds are found nowhere in the entire Northwest, and none are more popular. The "Lady of the Lake," a beautiful double-decker, with accommodations for one hundred and twenty passengers, makes regular excursions on the lake, stopping at every point of interest. The elegant steam yacht "Oriole," owned by the proprietor of the Oakton Springs Hotel, is gotten ready whenever a party of guests so desire, and thus the opportunities for aquatic sports are practically unlimited. A moonlight excursion on the lake will always be remembered with much pleasure. Luna plays fancifully with the water and the surrounding landscape, producing the most peculiar and grotesque effects; the merriment of the passengers mingles with the song and laughter filling the air from every point on the shore—all is life, joy and happiness. The drives from Pewaukee lead through a charming and interesting country, over well-kept, hard roads, excellent turnouts being procured at reasonable prices. When not engaged in the legitimate pursuits at a watering-place, one can spend a pleasant hour at the bowling alley or billiards. Grotto Rock, one-half mile south of Oakton Springs, furnishes food for study of the wonderful freaks of nature. Those coming later in the fall will find the best of shooting, there being a great variety of game—canvas-back, mallard, teal and wood duck, woodcock, snipe and pheasant. Congregational, Methodist, Baptist and Catholic Churches each receive their share of patronage on Sundays, dividing up the guests, who are of but one thought in all other respects—enjoyment of the beautiful nature, so richly endowed and so generously offering her charms. With all these attractions, Pewaukee is justly gaining such wide reputation and extensive patronage.

Lakeside.—Once more on the railroad, although for three and one-half miles only, we proceed to Lakeside. A convenient way to reach this point from Pewaukee is by means of the "Lady of the Lake," Lakeside being located on the opposite shore from Pewaukee. We intend to ride it out on the superb steel track, however, although the stops be often and the conductors courteous in furnishing stop-over checks, frequently requested. For the benefit of those not familiar with the stop-over check system in vogue on the Chicago, Milwaukee & St. Paul Railway, we would explain that the ticket is taken up when the first stop-over is given. This is good for fifteen days, and if not used within that time, another check can be obtained again good for fifteen days, and so on, *ad infinitum*, a new check being given at every stop, reading from stopping-off point to destination.

Lakeside is eminently a family retreat, very popular on account of its quiet location. An excellent hotel, on the cottage plan, affords superior accommodations for two hundred and twenty-five guests, rooms and table being strictly first class. Beautiful grounds surround these cottages, charmingly located a short distance from Lake Pewaukee, the grounds gently sloping to the lake. The surrounding country is very attractive, hills, forests and lakes combining to make a landscape of surpassing beauty. No grander *retreat* can be imagined, and no description

will do it full justice. In addition to Pewaukee Lake, three others are accessible in an hour's drive: Pine Lake ($3 \times 1\frac{1}{2}$ miles), Beaver Lake ($1 \times \frac{3}{4}$ mile), and North Lake (2×1 miles), the water of all these lakes being literally alive with pike, pickerel, perch and bass. Fine billiard rooms, bowling alleys, and choice croquet grounds furnish diversity of enjoyment; row, sail and steamboats are on hire at reasonable charges, lines and minnows being furnished at the cottages. Fine liveries are provided on demand—in fact there is no limit to the means of enjoyment, of which bathing furnishes a valuable part, and the facilities for which are exceptionally good. During the "season" a multitude of sportsmen congregate here, who claim for Lakeside greater attractions than possessed by any other point in this section—pheasants, ducks, squirrels, etc., being very plentiful. We spend two days in a most pleasant manner, roaming through the surrounding country, boating and fishing. This a wonderful region. The famous Oakton Springs are on the opposite shore, and here is another mineral spring, not famous as yet, but fast becoming so. We refer to the Lakeside Springs, highly impregnated with properties invaluable to many constitutions.

There is no village here. Lakeside is a beautiful summer resort, nothing else, the nearest village being Hartland, two and one half miles distant. Hartland is also the post office, and church-goers have a pleasant drive or walk there on Sundays. Here we would say that Hartland has three good churches—Episcopal, Congregational and Lutheran—presided over by very able ministers. The gay throng, snugly quartered at Lakeside, many of them for the entire summer, render the place very lively, in the evening particularly, when song, music and dance form the attractions, and a source of social and intellectual enjoyment. No pains have been spared to render Lakeside perfect, a farm of several hundred acres being operated by the hotel proprietor for the exclusive use of the hotel, and the daily supply of sweet, fresh butter, the richest cream and the choicest vegetables is not exceeded, if equaled, at any other hotel in the country.

Hartland.—After a short journey of three and one-half miles, on the railroad, we arrive at Hartland. We find a pleasant, neat village, of some five hundred inhabitants, located in the beautiful Bark River Valley. At the hotel we meet a number of acquaintances from Milwaukee, just ready to start out for a drive to some of the points of interest in the vicinity, and readily accept the invitation to join, so courteously tendered. The afternoon is beautiful, a cooling breeze blowing from the east, and we are promised an enjoyable ride. Hartland is the center at which tourists gather, and from which they scatter to Lakeside and the resorts on Pine, North and Beaver Lakes and Lake Keesus. Many elegant residences are found, owned by citizens of Milwaukee, Chicago and other places. Our drive leads us to Sand's villa, on the eastern side of Pine Lake, about a mile and a half from Hartland. This villa is one of the finest private residences we have met, situated in superb grounds, with beautiful gardens, hot-houses, etc. We are most hospitably received and courteously escorted through the grounds, in which a deer park, containing a large number of native hart and roe, forms a prominent and attractive feature. A pretty steam yacht on the lake is ever ready for the accommodation of friends and visitors. Proceeding north, we come upon many more elegant residences, among them Inter-Lachen, the well-known establishment of Dr. Leuthstrom, of Milwaukee. We pass between Pine and Beaver Lakes, proceeding to North Lake. Here is another remarkable attraction in a mineral spring, which has recently gained much notoriety, accidentally discovered on the grounds of Mr. B. B. Hopkins, who owns an elegant mansion on this lake. The water of the spring is claimed to possess the same curative properties which have made the Manitou Springs, of Colorado, so famous. North Lake is a beautiful body of water, about one mile in length and three-fourths in width, the lake frontage nearly all owned by private parties, who have erected, or are erecting, summer residences. A drive of two and one-half miles east brings us to Lake Keesus, a smaller lake of irregular shape, with attractive shores and an abundance of fish of the varieties generally found here. This region is particularly attractive. The high banks of the lakes named rising abruptly from the water's edge, the country rolling and somewhat broken, ravines, hills, lawns, and beautiful groves of majestic oaks, forming an *ensemble* of

which the eye never tires. The well-kept grounds surrounding many of the private residences contribute materially to the beauties of this corner of the "County of Summer Resorts," and although there are no hotels here (board being obtainable at several of the private cottages, however), it abounds with life. Tents are seen in every direction, croquet parties upon the lawns, the roads are filled with carriages, and life and happiness prevail everywhere.

Nashotah.—Nashotah itself offers little or no attractions, being merely a railway station, of little note as such; but, being located in the center of the wonderful lake system of Waukesha County, and the *entrepot* for visitors to Nashotah Mission, Delafield and the celebrated Nemahbin Springs, every arriving train brings a large number of tourists. We are comfortably stowed away in the commodious bus in waiting at the station, on the arrival of every train, conveying passengers bound for Delafield, on Nagowicka Cottage, located on the lake of the same name. The distance is two miles and a half, and the drive very pleasant. We find excellent accommodations, and visitors from all points of the compass. The society gathering at these places is very select, and they have evidently all come for the sole purpose of enjoyment and recreation. There is a refreshing absence of all conventionalism, and we are permitted to be natural and unrestrained in our movements. This is an advantage which so many summer resorts, otherwise attractive, lack, and the lack of which is to be deeply deplored. We dress for a walk, a climb, or a row, always ready for every occasion for enjoyment; we laugh aloud to our heart's content; we run and dance upon the lawns and give full play to our inward happiness, without meeting reproving looks and disdainful shrugs of proud shoulders. Alas, that usage should ordain differently at home! These refined men and women all acknowledge their love of this freedom from the baneful dictates of society, and yet how readily will they again submit to all the rules of etiquette upon returning home! These thoughts are involuntarily suggested by the rosy cheeks and glowing eyes we meet, so seldom seen in the parlors at home, and rarely ever at the "fashionable" watering places East, where dress occupies so much of the time and enjoyment is sought in the ball-rooms and parlors, while here, Dame Nature provides the entertainments.

A drive to Nashotah Mission, the theological seminary of wide repute, which has sprung from the "mission" established for the conversion of the noble red man, dominant in these parts scarce forty years ago, is very interesting. The "mission" is situated in a most charming spot, on the northern one of the twin Nashotah Lakes, in a heavily wooded country surrounded by lofty hills and picturesque ravines. From here different drives diverge. We pay a visit to Nemahbin Lakes, two lakes connected together, in the lower one of which Sugar Island suggests picnics. A number of smaller lakes are in the immediate vicinity, concealed among the abrupt bluffs and thickly timbered hills, the landscape being beautiful throughout. Yonder rises Government Hill, which we have been particularly admonished to visit. The drive there alone is well worth a visit to Nashotah. Winding through heavily wooded hills, the most prominent of which is our objective point, the rise is gradual, and on reaching the summit the grandest panorama is opened before our fascinated vision. As far as the eye reaches in either direction, the scenery is beautiful beyond comparison. We count twenty-six lakes, the two Nemahbins and Nagowicka, connected by the Bark River, while to the northwest the grandest chain of lakes is presented to view—Pine, Beaver, Okauchee, Oconomowoc, Fowler's Lakes and Lac La Belle, linked together by Oconomowoc River. This is the most extensive of the several "chains." Isolated lakes, creeks and streams are seen in every direction. The surface of the country is picturesque in the highest degree, the most vivid imagination being unable to produce a landscape of more varied charms. Fields of golden grain, green meadows, pastures with herds of cattle and flocks of sheep are interspersed between dense forests; lofty bluffs and strangely shaped rocks rise here and there; the many lakes of all shapes and sizes glistening in the bright sun like so many diamonds in a crown of emeralds, the creeks and streams winding their silvery threads among the hills, the church spires of Oconomowoc, the many palaces and cottages strewn over the surface, the roads, where seen, alive with vehicles—here is a feast for the eye, a motive for the artist. Every part of the picture before us is

beautiful in itself, and in its entirety, once seen, will never be forgotten. As we glance toward Pewaukee, Lakeside and Hartland, we live over the pleasant hours spent there, and almost determine to seek no further, but to remain in Waukesha County during the remainder of our vacation; we return to Government Hill several times during our stay; we love to linger here and to view ever and again the beautiful landscape beneath.

Delafield.—This place is chiefly noted through the famous Nemabbin Springs located here. But the attractions are not confined to invalids only. The general tourist, the sportsman, every lover of nature will find enough here to admire and to render his sojourn pleasant. There are no finer drives anywhere; beautiful promenades invite the visitor, the opportunities for rowing and sailing on the crystal waters of the lakes and rivers are unlimited, fishing is unsurpassed, Lake Nagowicka particularly proving all that is claimed for it; the air is invigorating, you are away from the life and bustle of the city, having every opportunity to enjoy the quiet of country life and the beauties of a country adorned by nature in her most lavishing mood. An Episcopal and Presbyterian church invite the worshiper—not to a “country sermon” by any means, there being preachers of eloquence and wide reputation, and services are frequently held by visiting ministers of national renown.

Gifford's.—This is the next resort on the “Tourists’ Route,” as the Chicago, Milwaukee & St. Paul Railway is appropriately called. Gifford’s is one of the most charming places in the Northwest, enchantingly located on the banks of Oconomowoc Lake, but three minutes’ walk from Gifford Station. An extensive grove of forest trees, one hundred acres of upland and lowland, hills and dales, lawns and meadows and romantic rambles, belong to the premises, while the magnificent scenery, in the center of which it is located, with its many pleasant drives, excellent roads, wonderful springs, elevated location, and the facilities for all kinds of aquatic sport, fishing, billiards, bowling, etc., render it a perfect gem. Oconomowoc Lake is one of the most charming of the lakes of this region, and unexcelled as a fishing ground. Covering six hundred acres, its waters afford the finest sailing, and visitors should not fail to profit by the opportunities at hand. The hotel is kept in a superior manner, and those who have once spent some weeks or months at this beautiful spot need no urging to come again.

The distance to Oconomowoc is only a mile and a half, the guests at the two points making frequent visits to each other. One of the most charming sights is had from the lake every pleasant evening, when the large verandah and the dancing pavilion are illuminated with Chinese lanterns, etc. Music is furnished by the well-known Bach band, of Milwaukee. It is impossible to recommend any one special point of the great number one will visit on a trip to St. Paul, such as we are taking. They are all attractive, each having its peculiar charms, but it is safe to say that none surpass Gifford’s, the centrality of its location causing many of the regular visitors to Waukesha County to select it as their place of residence during their stay in this lake country.

Oconomowoc.—Nothing can surpass the charming location of Oconomowoc, and the most glowing description of it and its surroundings will ever fail to do it justice. Rural poets go into ecstasies over its beauties, giving evidence of the possibilities to which the unrestrained use of superlatives may be carried; the most acrobatic feats in journalism are chargeable to Oconomowoc. These the calm and disinterested reader will benignly smile upon as attributable to the rising tendencies of the thermometer, but to those who have been here and who understand the beauties of this delightful spot, these manifestations seem less extravagant, and they will readily excuse the perpetrator. There is so much here to inspire that we involuntarily feel a desire to communicate our impressions, to render which, and to do justice to the subject, we find language inadequate. The isthmus between Lac La Belle and Fowler’s Lake will ever form the center of attraction for thousands of tourists, and happy they who can come here every year! Beautiful Lac La Belle! Its pretty name leads to expectations of rare beauties, but our imagination had not pictured such a combination of loveliness and grandeur. Countless sail and row boats with their gay occupants, numerous elegant steam-yachts plow the waters of this most favorite of lakes at all times, the air resounding with the merry voices of the happy

Copeland Townsend

OCONOMOWOC.

occupants. The beautifully shaded islands harbor picnic parties, while the shore, gently rising from the water, adorned with pretty houses and fine grounds, with here and there a tent, lends a frame worthy of the picture. Judge Small's fine resort and Draper Hall, both favorite hotels, are located on this lake.

Lac La Belle is one of the largest and finest lakes at Oconomowoc. It is connected with Fowler's Lake, the most prominent feature on whose pretty shores is the grand, well-known Townsend House. All the hotels at Oconomowoc—there are quite a number, and they are all good—are located on the banks of one or the other of the lakes, and are provided with bath-houses. In addition, there are a number of first-class boarding-houses, and furnishing in all accommodations for about one thousand visitors. A beautiful drive leads to Okauchee Lake, another sheet of water, which would be prized by the quart in many localities, although it covers sixteen hundred acres. There is much to admire in the scenery at this lake, and soon you will doubtless find a number of commodious and excellent hotels on its shores to meet the wants of tourists who come here for the excellent bass and muskallunge fishing. Numerous private residences are already erected and many more projected. This fact speaks better for this wonderful lake region of Wisconsin than volumes of argument, since expensive houses, to be used during a few months of the year only, are never built except in highly favored localities.

A drive south from Oconomowoc to Dousman's artificial trout pond, some eight miles distant, reached via the ancient mounds, Silver, Otis, Duck and Genesee Lakes and several smaller ones, through a most picturesque country, will prove of special interest to every lover of the rod and line, and not less to the lover of well-prepared trout, visitors catching their own fish, which are prepared for them at the farm at moderate charge.

Mention of the drives in the surrounding country has been made in several instances, but too much cannot be said in their favor, and it is no exaggeration to state that they compare favorably with the choicest drives of which the largest cities boast. In all these drives the visitor will fail to find a single poor team, Oconomowoc particularly boasting of a very superior class of livery. When we then realize that within a radius of nine miles there are forty-one of these charming lakes, a number of which we have described, that mineral springs are found in every direction, that the scenery is one of surpassing beauty, we must concede to Oconomowoc the claim of being the grandest resort for the enjoyment of nature, combined with the luxuries and comforts produced by modern civilization. The lakes are all of pure, cool water, with pebbly shores, grassy, dry banks, and of great depth. They are literally alive with fish—pickerel, black, green and rock bass, perch and muskallunge. Two hundred thousand whitefish were planted in Nagowicka Lake from the Milwaukee hatchery in 1877, which are doing well. The fishing at all the lakes is done with minnows, the catching of which forms a regular business. Of the mineral springs in the immediate vicinity of Oconomowoc we have visited but few, they being the La Belle Springs, Draper's Flowing Magnesia Springs, Hitchcock's Medicinal Springs, and the famous Minnewoc Springs near Gifford's. These springs have been analyzed, and are claimed to be equal to any found in this country. Croquet grounds are found at every hotel and boarding-house, while of churches we remember a Congregational, Methodist, Catholic, German Methodist and German Lutheran. The climate of this section is genial and wonderfully invigorating, owing to its high location, some 400 feet above Lake Michigan; the nights are always delightfully cool and refreshing, and there is a gratifying absence of mosquitoes and other "pests of life" peculiar to the season. The sportsman in quest of a plenty of game will find duck, woodcock, snipe and other varieties in greatest abundance. There is a diversity of sport and pastimes which is practically unlimited, and while we enjoy every luxury and every sport to our heart's content, first-class hotel accommodations, driving, boating, fishing, bathing, together with a long list of etceteras, we find our expense account considerably within the appropriation, leaving a margin larger than the deficit generally resulting from vacations.

OLD LOG SCHOOLHOUSE.

The title of this article is not intended to convey the impression that there was but one "old log schoolhouse" in Waukesha County, for there were many of them. The one referred to had the honor of being the first schoolhouse, meeting-house and debating room in Waukesha County. In it the first school (except a private school taught at N. Walton's house, and one by Mrs. John Weaver) was taught; in it the first public gatherings were held; the first spelling-school met; the first singing-school was organized; some of the earliest "sparking" was done and the first temperance society was formed. It was erected in the fall of 1837, on Section 3, town of Waukesha—that is, "under the hill," on the west side of the Fox River at Waukesha, the land being owned by Joel E. Bidwell. It was of logs—almost entirely of tamarack poles, taken without leave or license from an unentered tamarack swamp up the river, and was erected by the joint labors of the few pioneers who had then taken up their abode at Waukesha. It was located on the west side of the river, because a majority of the children who would attend school resided on that side. It soon became a noted building, its fame spreading for miles in all directions. It was a proud day for the few settlers of Waukesha County (then a part of Milwaukee County) when they had a place for lectures, funerals and meetings of all kinds. Could the power to speak be given to the ashes of its moldered walls, their story would make the richest pages in the history of the county. But the story will never be told. Like the building itself, those whose hands reared its homely walls, and whose voices resounded often within them, have nearly all passed from the sight of man.

The first teacher was John Moon Wells, who had between twenty-five and thirty pupils, and whose first term extended through the winter of 1837-38. The second teacher was Jane McWhorter; the third, William T. Bidwell; the fourth, Chauncey C. Olin.

The pupils were probably nearly all embraced in the following list—that is, the pupils who composed John M. Wells' school: Henry and Albert Clinton; Josiah, Diana, Matilda and Lucinda Mendall; Elon, Hosea, Randall, Joseph, and Eliza Ann Fuller; Oliver, Deborah and Henry B. Bidwell; Charles Rossman, Charles, Horace, Caroline and Eliza Owen; Jerome, Sarah and Mary Love; Elizabeth Walton and a few more.

Deacon Edmund Clinton's boys sometimes went home from school with "striped jackets," but the Deacon publicly declared "that the boys must mind," and that he "was satisfied as long as they did not come home with an arm or a leg broken." School-books were very scarce at first, some of the scholars having none at all during the first winter. The few who had books divided the use of them with those who had none or only a few. One or two scholars appeared every Monday morning with new, or rather different old almanacs, the source of supply being a collection owned by their grandmother; and Deacon Mendall's copy of the "Pilgrim's Progress" was finally brought into requisition. It was nearly destroyed by the voracious urchins before the winter was over. Some of the youngsters probably know more about Giant Despair, the twelve signs of the zodiac, how to take Marston's pills and Boltune's liver syrup, and what to do in case of croup, than they did about syntax, percentage or geography; and probably some of them could get off stale almanac jokes with more accuracy and relish, if not with more polish and eloquence, than they could the multiplication table or the "double rule of three." Whenever a bit of white paper could be secured, the artistic youths made pictures from their almanacs, of tape-worms, cancers, goitre and monster lizards, alleged to have been taken from the stomachs of kings and noblemen by some patent nostrum. However, the school was a success, and with the exceedingly limited facilities at hand, most of the scholars made rapid progress, and their names will go down for ages as those honored as being members of the first district school in Waukesha County.

"OLD PRAIRIEVILLE ACADEMY."

Few buildings or institutions in Wisconsin, and, perhaps, none in Waukesha County, have a more interesting history than the "Old Prairieville Academy," at Waukesha. It has long been honored with the credit of being the first institution of its kind in the State. That idol

the historian must shatter. There were two, in name, at least, before this; but neither of them began to be successful as early, and the walls of not one have re-echoed the voices of so many students who afterward became distinguished in the State, national and foreign diplomatic circles, and in the war. The building which took the name of the Prairieville Academy is claimed to be the first structure wholly of stone erected in the State. It certainly was the first in Milwaukee and Waukesha Counties, and there are no records by which the historian can dispute the claim of its being the first in Wisconsin. It was the first academy building of any kind erected in the State of Wisconsin. It was erected for an academy, and for no other purpose. William T. Bidwell was a school-teacher, without a school, and Lyman Goodnow the proprietor of a fine stone-quarry, with no market for its products. They, therefore entered into partnership for the purpose of founding an academy, and the building, which stands next west of M. D. Cutler's splendid park, in the village of Waukesha, was begun by them early in June, 1840. That Waukesha was to have a real academy soon became well understood throughout the vicinity; for while Mr. Goodnow was quarrying stone and erecting the walls, Mr. Bidwell was advertising the enterprise and securing scholars in advance, as far as he could. Neither of them had any money with which to pay the masons or for the purchase of lumber and glass; so \$400 in gold was hired for this purpose of J. Nanscawen, and Morris D. Cutler gave two lots for a site. The plan, at first, was to erect a small one-story building; but as the enterprise was looked upon with so much favor, Mr. Goodnow urged that it was not philosophical and progressive to build only for the present. The hardy builders, therefore, determined to be more liberal, and the two-story structure now used by the Lutheran Church was the result. As soon as the walls were up, Mr. Bidwell began a school in a room finished for the purpose; but the building was not wholly completed until 1841. When done, the \$400 had been swallowed up, other debts had been contracted, and Mr. Goodnow had expended nearly two years of his labor in addition to donating stone, lime and sand—quarrying his own stone, burning his own lime and hauling his own lime. The academy was duly incorporated by an act passed and approved February 19, 1841, as follows:

SECTION 1. That there shall be established in the town of Prairieville, in the county of Milwaukee, a seminary of learning, by the name and style of the Prairieville Academy; and that Lyman Goodnow and William T. Bidwell, and their associates and successors in office, are hereby created a body politic and corporate by the name of the Trustees of the Prairieville Academy, by which name they and their successors shall forever be known and have perpetual succession, and shall have power to contract and be contracted with, sue and be sued, plead and be impleaded, defend and be defended in all courts and places, in all actions, suits, complaints and causes whatsoever; and they shall have a common seal, and may alter the same at pleasure. And they shall have power under said corporate name to acquire, purchase, receive, possess, hold and enjoy, in deed and in law, to themselves and their successors, property, real, personal and mixed, and the same to sell and convey, rent or otherwise lawfully dispose of at pleasure, for purposes of education; *provided*, that the real estate owned by the said company at any one time shall not exceed \$10,000.

SEC. 2. The stock of said corporation shall consist of shares of \$20 each, which shall be deemed personal property, and shall be transferable on the books of said corporation in such manner as shall be directed by the Trustees of the same.

SEC. 3. The corporate concerns of said academy shall be managed by three Trustees, a majority of whom shall constitute a quorum for the transaction of business. They shall be elected annually, on the first Monday of May, by the stockholders of the academy, and shall hold their offices for the term of one year, and until their successors are elected. The election of Trustees shall be by ballot, and each stockholder shall be entitled to one vote for every share owned by him, to the amount of ten shares, and then one vote for every five shares over and above that amount.

SEC. 5. No religious test or qualification shall be required from any Trustee or other officer of said corporation as a condition for admission to any privilege in the same.

At first, Messrs. Goodnow and Bidwell held nearly or quite all of the stock, for much of which they were in debt. The former, therefore, in 1842, sold his interest, debts and all, for a horse. That was all he ever realized from the academy. By an act approved January 27, 1844, the number of trustees was increased to seven. This was in reality a re-organization, as Mr. Cutler, who donated the lots, had purchased the property for its debts, which he paid, of Mr. Bidwell. This new company, or organization, purchased the academy of Mr. Cutler, and continued the school. But it soon became again financially involved, and again fell into Mr.

Cutler's hands in consequence. After lying idle a year or so, in January, 1846, a complete re-organization took place and a new company was formed, which had the name changed to Carroll College. In January, 1847, the charter was amended so that the Board of Trustees should consist of twenty-one persons. During this year, Elihu Enos, now Postmaster of Waukesha, and Prof. Sterling were paid \$40 by the county for the use of the building for the first term of the Territorial District Court. School was closed while Judge Miller held court.

In 1849, the name and rights of "Prairieville Academy" were restored by legislative act. The school thereafter was kept along, in a very weak way a portion of the time it must be recorded, until about the beginning of the war, when it was discontinued, probably forever. In 1866, the building was remodeled inside, a vestibule added, and taken possession of for religious worship by the Lutheran Church. Before that, however, it had been used as a cabinet shop, as a storeroom and for various other purposes.

Among the graduates of this time-honored institution may be numbered some of the conspicuous men of the war and the nation, such as Lucius Fairchild, a General in the army, Governor of Wisconsin in 1866-67, United States Consul to England, and now United States Minister to Spain; Cassius Fairchild, a General in the army; Charles D. Parker, twice Lieutenant Governor of Wisconsin; Cushman K. Davis, Governor of Minnesota in 1874-75; Capt. W. V. Tichenor, now of Iowa; C. C. White, deceased; Col. Sidney A. Bean, deceased; Capt. I. M. Bean, Collector of Internal Revenue for this district; Walker L. Bean, deceased, and others hardly less distinguished.

Some of the teachers, too, have been men of note. The first was William T. Bidwell, the junior founder of the institution; the next, Silas Chapman, the great map man of Milwaukee, who taught about one year from the spring of 1841; Winchell D. Bacon, still a resident of Waukesha, taught three terms next after Chapman; he was succeeded for nearly a year by Myron B. Williams, of Watertown; Judge Green, now of Dodge County, taught for a time; Eleazer Root, the first State Superintendent of Public Instruction, was Principal for about three years, to October, 1847; Elihu Enos and Prof. Sterling managed the school from October, 1847, to October, 1848, under the name of the "Classical Institute and Normal School," and afterward a Greek of the name of Rev. A. Menæos, and various other parties taught until the old Prairieville Academy building—the first in Wisconsin—was sold and dedicated forever to other purposes.

It had an eventful history; so much so, perhaps, that the future historians will always have some reason for perpetuating its identity as the first academy building erected in Wisconsin Territory. It was a monument to its founders and builders worthy of their energy and forethought, and for many years served a good purpose well.

NASHOTAH HOUSE.

This old institution and its lovely surroundings are known everywhere in Waukesha County as "Nashotah Mission;" but very few, however, have any adequate idea of the richness of its romantic history, nor of the want and privation suffered in founding it. Instead of being condemned, the historian will be praised for incorporating in this sketch of the oldest Episcopal Mission in the great Northwest, without further or more particular specification, the main points in the Rev. John A. Egar's "Story of Nashotah," published in London, England.

In the summer of the year 1841, three young clergymen of the Protestant Episcopal Church came to do missionary work in this new region. They were the Rev. William Adams, a graduate of Trinity College, Dublin; the Rev. James Lloyd Breck, a graduate of the University of Pennsylvania; and the Rev. John Henry Hobart, a son of the great Bishop of New York, of that name, and a graduate of Columbia College, New York City. They had been classmates in the General Theological Seminary, and while there the design had been formed, by themselves and others, of establishing an associate mission somewhere among the settlers of what was then the Far West.

The honor of originating the project is given to a classmate, Mr. J. W. Miles, a candidate for holy orders from the diocese of South Carolina. He had been actively engaged in Sunday-school and mission work in connection with his theological studies, and entertained, with some enthusiasm, the idea of missionary life after his ordination. The study of the great missions of the seventh and following centuries, in the Ecclesiastical History course, fired his imagination, and the Great West and its wilderness seemed to present a field where the labors and self-denial of Augustine and Boniface, and Willibrord and Anskar and their companions might be imitated. On the 18th of June, 1840, he presented a scheme to such of his classmates as seemed likely to enter into it, in which, with some youthful exaggeration of thought and language, the general plan was set forth. He proposed that a certain number from every class, as they completed their seminary course, should devote themselves to the West.

The summer vacation now coming on, the class dispersed. When they re-assembled, five were found to be still interested in the project. Its reality began to be felt, and the matter was opened to the Rt. Rev. Bishop Kemper, the Missionary Bishop of the Northwest, and received his approval. As the time for their ordination approached, one more withdrew, and the original mover of the project was held by his Bishop for work in the diocese to which he properly belonged. The three who were free to go received, in the course of the summer, their appointment as missionaries, with a stipend of \$250 each, and an assignment to work in Wisconsin, and started on their journey of a thousand miles into the Western wilderness; the Rev. Mr. Hobart in advance, and Messrs. Adams and Breck together, a little later.

The headquarters of the mission were established, under the Bishop's direction, at what is now the village of Waukesha, and a field was assigned them for their work, thirty miles north, west and south.

Having arrived in Prairieville, the three associates obtained such accommodations as the village could afford, by engaging an apartment in a log house, consisting of two rooms, one of which was occupied by the family of the proprietor, while the other was given up to his "boarders," with one reservation. The table was set for the entire family in this room, and here all took their meals in common. Subject to this interruption, the apartment was their own, and constituted their entire domain; and here they lived and studied, and prayed and slept, and here they were "at home." It was a marked change from the comfort of the city; but the life was so new, and all around them so strange, that the privations and primitive simplicity of the situation doubtless added to the interest with which they entered upon their work. Their first public services were held in a stone building, called the Academy, which they occupied on Sundays until a small frame church was built. This was begun in the fall of 1841, but was not completed for some time.

So marked had been the success of the mission during the fall and winter of 1841-42, that Bishop Kemper cheerfully gave his consent to an appeal to churchmen at the East for funds to establish an institution under their care, where they could still further develop their plans, and bring their school into operation. The Rev. Mr. Hobart was therefore authorized to proceed to New York and endeavor to interest the church there in the enterprise. He arrived in that city early in March, 1842, and by the kindness of the editor of the *Churchman*, the Rev. Samuel Seabury, D. D., was permitted to print in that paper a modest and dignified appeal.

The appeal was favorably received, and the responses made to his personal solicitations were such as to permit him to acknowledge, on September 24, 1842, the receipt of moneys amounting to the sum of \$2,274.44. The encouraging advices he forwarded to his colleagues, from time to time, justified them in proceeding to secure a location; and their knowledge of the country, gained by their itineracy, enabled them to lay down in advance certain conditions to guide them in their selection. It seemed unadvisable to establish such an institution as they had in view in the village of Prairieville, partly because, from the growth of the village, the church there would require before long such exclusive attention as could be given only by a settled Rector, and partly because it was desirable to secure a larger domain than could be bought with the means at command in immediate proximity to a settlement of that size. A few miles to the west was a region of small

lakes, beautiful for scenery, and where land could be obtained at a lower price. It was resolved to purchase a tract upon one of these lakes, and the clergy made it a point, when on their journeys, to examine different localities. In the course of the summer, it was learned that a claim could be bought upon the Nashotah Lakes, and on a set day the Rev. Mr. Adams, accompanied by the Rev. Lemuel B. Hull, of Milwaukee, rode out on horseback to view the spot. They took with them their lunch, consisting of dried beef and biscuit, and spent the day upon the ground. Their unanimous conclusion was that this was the place of all others for their purpose. The Nashotah, or Twin Lakes (upper and lower), are two of a chain of four, the others being the Upper and Lower Nemahbin, lying about the center of the lake region, twenty-five miles from Milwaukee, and on the summit or ridge which separates the tributaries of Rock River and the Mississippi from those of Lake Michigan. They lie east of Oconomowoc, south of Okauchee, west of Nagowicka, and north of the Nemahbins, into which their surplus water flows, the Upper Nashotah being the head, and having no inlet; it is fed by springs in the bed of the lake itself. The Indians called the Upper and Lower Nashotah by this name, meaning "twins," because of their correspondence in size and shape.

Upon these lakes was the claim which the missionaries proposed to purchase. It lay to the east and south of the Upper Nashotah, and extended about half-way down the east bank of the Lower Nashotah, the lake being the western limit, and the eastern the section line. It was described in the Government survey as the east fractional half of Section 12, Town 7, Range 17 east of the Fourth Principal Meridian, and the west fractional half of Section 7, Town 7, Range 17 east, containing altogether 464 acres, more or less. Negotiations were at once commenced, and the land was purchased. The deed was made jointly to the three missionaries.

Here, on the 30th day of August, 1842, the Rev. Messrs. Adams and Breck (Mr. Hobart being still at the East) arrived with their worldly possessions. On Thursday, September 1, they took formal possession of the domain by an elaborate public religious service in the open air, at which, besides themselves, two laymen were present, and by which they set it apart and dedicated it to the service of God, for an institution of piety and learning.

The missionaries found, on their arrival, that the improvements actually made upon their purchase consisted of a claim shanty, 17x13, made of rough boards, without lath or plaster; and in this they took up their abode; one corner, as they facetiously described it in after times, being their chapel, one corner their study, one corner their kitchen, and one corner their bedroom. They immediately put under contract a building of a better character, which, though unfinished, they were able to occupy in November, and in which the three clergy (Mr. Hobart having returned) and three resident students, who joined them as soon as they were able to receive them, spent the winter of 1842-43.

On the 9th of October, 1842, Messrs. Adams and Breck were advanced to the priesthood. The ordination took place in the Indian Church, at Duck Creek. The journey was made in a lumber wagon, and occupied four days each way. On their return they brought a bell and some other effects, which belonged to the Green Bay Mission, and which were made over to them by those having authority. The bell was hung in an oak-tree near the house; and, though its position has been changed, it still calls to duty and to prayer. And thus came into existence the institution which is known to the church at large as Nashotah, and to the people of the vicinity, even to the present day, as "the Mission."

In the fall of 1842, three acres of land were plowed up and fenced. The next spring the house, of which mention has been made, was finished, and the "claim shanty" was moved near it, and made useful. The shanty has disappeared; it became a kitchen, then a carpenter's shop, and finally was pulled down; but the house is still standing, though not on its original site, which is occupied by the present stone chapel. It is known traditionally as the "Blue House," from the color with which it was painted. The structure was humble, but fully equal to the average house of the country at that time. It was a low one, two stories in height, a frame building, containing two rooms on the ground floor and three above. The front room below was the common room, the other was the kitchen; underneath was a cellar; the rooms above were

study and sleeping-rooms combined. Here the clergy lived, attending to their own housekeeping, as well as to their numerous missions.

During the summer of 1843, other buildings were added to the mission premises. The first of these was a chapel schoolhouse of peculiar construction, fitted to the exigencies of an institution which aimed to do a great work with little means. It was a plain, frame building, as were all those erected during this period. It would hold about fifty persons. The second floor was divided into rooms for students, and underneath was a basement. In course of time the basement was also occupied by students, in fact the basement was in request, being warmest and most comfortable in winter; and Bishop Kemper, during the winter of 1843-44, which he spent at the mission, made his home in one of these basements, or cellar rooms. At the end of this year, eight students found accommodations on the premises, and the next year, 1844, these were increased to twenty-eight. To accommodate them, colleges of the same humble character were built, besides which, other improvements were made from time to time; such as a barn, a dairy, a wash-house, ice-house, and finally a farmhouse; so that the mission in a short time presented the appearance of a small village.

Before the institution, however, got fairly started on its educational career, certain important changes took place. The Rev. Mr. Adams spent eighteen months at the East, from May, 1843, to October, 1844, and his place was taken for a time by the Rev. William Walsh, a young clergyman from New York, who remained a year. At the close of 1843, the Rev. Mr. Hobart relinquished his connection with the mission, and took clerical work at the East, where all his connections were. These changes are not to be wondered at. To gentlemen born and bred, men of university education, the hardships of pioneer life were peculiarly trying, and the triple labor, not only of carrying on an arduous mission, but also of establishing a school without adequate means, and at the same time of breaking up a farm, and reducing it to cultivation, together with the necessity of doing their own housekeeping, cooking and domestic work, might well weary the most devoted enthusiasm. Society there was none outside their own circle; culture was wholly wanting; books, that prime necessity to a studious man, were inaccessible; and in the face of the difficulties that beset them, it is no wonder that the one sought a vacation in a change of scene, and the other retired to more congenial pursuits.

The school, however, had been established, and the work must go on. Mr. Breck remained at his post, and, with the assistance of the students and Mr. Walsh, the missionary work was kept up, instruction given and more land brought under cultivation. In October, 1844, Mr. Adams returned, and has remained ever since at Nashotah.

The interest excited by the appeal of Mr. Hobart had not ceased, and friends continued to send their offerings for the support of the mission. These sums more than met the expenses of building and preparing ground for cultivation, but they were inadequate to the support of the clergy and students. Nor was it desired at this time that the institution should be supported by funds collected from abroad. It has been mentioned that the idea of combining manual labor with education was quite popular in the United States at this time; and it was supposed that the students could contribute materially towards their own support by the cultivation of the farm, and the performance of the various duties required in the internal economy of the institution. To secure a due co-operation and distribution of labor, the mission was formed into a brotherhood, in which the principle of a common fund and a common life was applied to the clergy and the lay brethren. The members, though bound by no irrevocable vows, did bind themselves to merge all personal considerations in the good of the institution, while they remained its inmates, to share equally with the rest the means they might possess or receive, and to perform such labor as the interests of the community required. The lay brethren, being students for the holy ministry, were to receive the reward of their industry in the spiritual and intellectual training which should fit them for their vocation; and upon their ordination they were to be released from all obligations to the institution.

Every person educated in the institution was expected to work an average of four hours per day, which was increased to eight hours a day during the summer vacation of two months.

For two months in winter, only two hours' work was required each day. The manual labor was performed by committees, each committee having its particular duty. Of these, some were special, and depended upon the presence among the students of men brought up to a trade, or educated for a profession; *e. g.*, the medical committee was due to the fact that an educated physician was for awhile a student of divinity. Others were permanent, and their names indicate the kind of work done—gardening, bakery, dairy, farming, carpentry, and clearing land. The head of each committee was held responsible for the tools, furniture, etc., belonging to his department, and also for the work done. He rendered a quarterly account of the condition of his department to the "Lay Council." Each member of a committee was also required to make an individual report of his personal expenses, labor, etc. His expenses were charged against him, and his labor credited at a fair valuation. In this way, the benefit accruing to him from the general fund of the institution could be calculated at any time, and also the value of the work done in lessening the expenses of the mission.

Mr. Gustaf Unonius, a graduate of the University of Upsala, Sweden, was received as a candidate for orders by the Bishop in the spring of 1844, and, after reading theology with Mr. Adams for a year, was ordained deacon May 11, 1845, the first graduate of Nashotah who entered the sacred ministry.

In June, 1843, Mr. Breck wrote to Bishop Kemper:

"It would be, Rt. Rev. Father, impossible to maintain a student for \$25 per year unless other resources, aside from the sum of \$25, were available; for his washing would come to \$8 or \$10 a year, groceries to nearly the same, books to half as much, and clothing to twice the sum. But using other means, such as the labor of the students for food, the industry of the ladies of the mission for preparing clothing already purchased or supplied, and the charity of merchants or manufacturers in the East for much of the necessary clothing, and the donations of private Christians for our expenses—by these means, Rt. Rev. Father, we trust to live. I have written to Mr. M——, of Philadelphia, and to my brother, who is one of several manufacturers, at Wilmington, to send us clothing. It matters not what the color or texture, or style of the clothing may be; we are all *pauperes Christi* at Nashotah, and wish to remain so."

And, June 6, 1844, he wrote again: "The brethren are laboring hard to bring about a supply of food for the approaching winter. We are now twenty lay-brethren, and myself (Mr. Walsh and Mr. Hobart had gone, and Mr. Adams had not yet returned), and the expenses of such a household upon the start are very great. With about four exceptions, the mission clothes them all, which, at \$25 per annum, would make \$400; but the first year nearer \$500, for those that have come in many respects very meanly clad; and up to the present we have had all our food to purchase, besides buildings to erect, etc., so that the next twelve months will be the trying time with Nashotah. In the autumn we shall have to purchase, or rather pay for, 600 weight of butter, that we have ordered to be laid down. But, dear Bishop, we must make our own butter another year. There are two brethren here that understand fully both the making of butter and cheese—indeed do now make from our two cows a few pounds per week, and better butter I never wish to eat; but we must have ten or twelve good cows, and a milk-house by the lake, and an ice-house. I do, moreover, see another necessity that will, without doubt, arise before long, viz., the doing a portion, and in time all, of the *washing* ourselves. We cannot pay out \$250 a year for twenty brethren, \$500 for forty. All, except shirts and the finer clothing, may be done. I have never hinted anything of the kind to the brethren as yet, but they have to me. In time it will work out. We have bought a wagon for \$60, new, and Eastern make; also a superior yoke of oxen for \$60."

On the 28th of September, 1845, he wrote again: "We have received no very abundant supply of money since last spring, but have been, nevertheless, kept from distress; we are in debt about \$200. We have all the provisions necessary for the ensuing winter, save wheat and pork; both will be cheap. Also, we have the most part of the winter's clothing that will be necessary; yet this must amount to nigh on \$100, which for twenty or more is moderate, compared with the last winter. We have put in twenty-four acres of wheat for the next year, and shall raise our

own pork. There have been some depredations committed in the neighborhood, so that now we have to keep two of the students staidly sleeping in the wash-house, which is not yet either lathed or plastered. The schoolhouse is lathed, but not plastered. We have had \$10 given us to buy fowls with, and have turned the horse-stable into a poultry house, no longer keeping even so much as a single horse. The farm-work is done by oxen. We shall require, to pay what we owe, and to meet necessary expenses, nearly \$500 the coming winter."

It will be noticed that Mr. Breck speaks of a limited supply of money, but congratulates himself that they had been "kept from distress." It would be interesting to know at what extremity he would at that time have considered "distress" to begin; for the fact was that the spring of 1845 was a time of real want at the mission. The rule not to go in debt was never relaxed for daily support; and if provisions fell short, and there was no money with which to buy more, the community lived on what it had until supplies, or money for their purchase, came in. It is not too much to say that more than once their diet was reduced actually to bread and water, and no great quantity of the former.

When the candidates went out to lay-read at the stations to which they were appointed, they were, of course, entertained by some one or other of the farmers or villagers of the vicinity, and it usually happened, on sitting down to a backwoods farmer's meal, that some apology would be made for the roughness of the plenty on the table, with the suggestion that, doubtless, at the mission they were used to better fare. It was said that on no such occasion was the want at the mission alluded to, but the remark was allowed to pass with the assurance that they enjoyed the meal set before them; and it was not until long afterward that the neighborhood really knew how poorly the brotherhood lived at that time.

And this may illustrate the fact that the brotherhood was a necessity, without which Nashotah could not have persevered through the years immediately succeeding its foundation. Circumstances at a later period, however, as imperatively required that the brotherhood principle should be given up; and it is a true account of this whole matter, that, without the brotherhood, Nashotah could not have been begun, and with it, the institution could not, after a certain period, have been continued.

In 1846, Bishop Kemper, having organized the Diocese of Missouri and surrendered it to a Bishop of its own, removed to Wisconsin and purchased a farm adjoining the Nashotah property, which became his residence (November, 1846) until his death.

About this time, some further improvements were made at the mission. The increase of population in the immediate neighborhood rendered necessary the formation of a parish, and, to accommodate the more numerous congregation, the building before spoken of, in which the services had been held, was remodeled and enlarged. Some little attempt at ornamentation of a churchly character was also made, and the institution became possessed of a proper chapel, which was also the parish church of the neighborhood.

At this time, the institution had shown such evidence of stability that it was deemed proper to petition the Legislature of the Territory for a charter, and, in 1847, it was duly incorporated with university powers. The property was then legally transferred to the Trustees.

In 1847, Bishop Kip, of Albany, N. Y., visited the mission, and, in his account of it, remarked that at prayer he "was surrounded by Americans, English, Irish, Swedes, Danes, a Norwegian, a converted Israelite and the dusky sons of our own forest. The Indians are Oneidas, from the mission of Mr. Davis, on Duck Creek, where a flourishing church has been formed and a system of discipline adopted as strict as that introduced by the Jesuits, and far more efficient. The Indians, in their own figurative language, have bestowed upon Bishop Kemper a name signifying the 'Keeper of the Word,' and on Mr. Davis that of the 'Clear Sky.' When the late convention of our church was held, at Milwaukee, four lay delegates from the Oneidas appeared and took their seats. They walked the whole distance from the mission, the last day traveling forty-five miles. We believe that it is the first time that the voice of one of our aborigines has been heard in the councils of the church."

The report of the committee of clergymen appointed by the Bishop, above alluded to, is also printed in the letters of Dr. Kip. It gives a very full exhibit of the finances of the institution from its commencement, September 12, 1841, to June 17, 1847, the date of the report. It showed that the total sum donated from the beginning had been \$13,007.34. Of this had been expended for land, \$1,180.30; for buildings, \$3,870; for clearing, plowing and fencing eighty-two acres of land, \$820; for furniture, tools, live stock and other property, \$2,487.31. The number of students actually supported had been equal to ninety-six for one year. Their cost had been found to be \$75 per year and labor, instead of \$25 and \$50, as supposed. The labor done had been found to be worth \$2,512.77, but had fallen short of their support \$4,649.73.

The mode of life and the nature of the work at Nashotah during the first period of its existence will be understood from what has already been written. It continued the same in its general features until 1850; but for several years succeeding the time to which our history has been brought up in the last chapter, the surrounding circumstances were in a state of gradual but rapid change, which could not help but modify, eventually, the general character of the institution itself.

In the first place, the influx of population was much greater than had been expected when the association was formed; and, as the country became more thickly settled, the newness and strangeness of its life wore off, and the settlers reverted to the habits and customs of the older States from which they had emigrated.

In like manner the internal economy of the mission felt the influence of the movement around it. By the time the area of land cleared for cultivation was a hundred acres, it became necessary to place it under the supervision of an experienced farmer, that it might be turned to the best account. This was done in 1847.

Now, so far as the labor of the students was productive, its result must appear in the supplies the farm could furnish; and this, we have seen, was charged with the support of the farmer, and very little could be done upon it with advantage by the students, now that it was cleared and fenced and plowed, except in the harvest season, when the coincidence of the vacation with the stress of work to gather in the crops, made their help both profitable and necessary. The only result to be expected from the labor, then, was that kind of indirect productiveness which saves expense by performing services in the institution which must otherwise be paid for. But not only did this leave the whole question of support untouched, but as the country became settled and civilized, and help was to be hired at a reasonable rate, the popular feeling became more and more prejudiced against the employment, in domestic work, of men studying for the ministry. So that in this way also, the labor theory broke down, and a change in the institution was imminent, if it would go on and prosper.

Upon the resignation of Mr. Breck, in 1850, which was sudden and unexpected, it was at first feared that the institution would go down. There was some \$3,500 of indebtedness, against about \$15,000 of assets, real and personal; but the difficulty was that the assets were unavailable, whilst the debts were pressing. Mr. Adams, who had confined himself to his duties as instructor, and to clerical work, and who was now rising in reputation in the American church as a writer and theologian, was looked upon at the mission as a mere scholar, and it was to the surprise of every one that he manifested a business ability fully equal to the emergency, and successfully filled the gap until a new head was found for the work.

On the 1st of September, 1850, the Rev. A. D. Cole, one of Dr. Adams' classmates, arrived to take charge of the mission. He has continued from that time to this as manager of its affairs.

The principal changes since 1850 have been the substitution of comfortable buildings of stone and brick for the humble wooden cottages of Nashotah's infancy, the increase of the library to 7,000 volumes, and the enlargement of the corps of clerical instructors from two to five. The departments of instruction are Systematic Divinity, Pastoral Theology,

Biblical Learning, Ecclesiastical History, and a preparatory course of Classics and Mathematics for those who need it.

The lakes and the land remain about Nashotah, but all else is new. The Indian trail, and even the later stage-road, have become obsolete, and in their place the Milwaukee & St. Paul Railway, one of the great continental thoroughfares, passes by the mission at the distance of a mile. The great forests have shrunk to groves standing here and there upon the hillsides or lake-shores, and the fields of the farmer, with their grass and grain, fill up the broad spaces of the landscape. Milwaukee, twenty-five miles distant, has grown to be a city of 116,000 inhabitants, and within one hundred miles is Chicago, the emporium of the West, whose population numbers more than half a million.

In 1854-55, the first permanent building of Nashotah was ready for occupancy. It is a brick structure of three stories and attic, containing thirty-two rooms; and is named Bishop White Hall, in honor of the first presiding Bishop of the American church. Its cost was \$9,000, about half the sum which would have been required to erect it ten years later. Another, called Shelton Hall, a large stone edifice, has also been built.

The routine of the student's daily life is now not so rigidly prescribed as when the mission was a brotherhood. Its course of instruction is indeed thorough, and the institution ranks third of its class in the Union.

In the summer of 1873, the "Convocation of Nashotah House"—a corporate body composed of the graduates of the institution—was formed.

The whole number of graduates from the beginning has been 181 up to 1878, that year not included; and more than one-fourth as many more received instruction for various periods, but did not become full graduates.

A circular, issued in 1879, states that if "to-morrow the affairs were to be peremptorily closed, all her debts would be paid and a balance left for whomever it might concern."

It is an old and a famous institution, and its Faculty, consisting of Revs. A. D. Cole, D. D., President, William Adams, D. D., Lewis A. Kemper, D. D., and John H. Egar, D. D., is also long-tried, earnest, faithful and able. In Biblical and Ecclesiastical lore, the library is an exceedingly rich one.

OCONOMOWOC SEMINARY.

This admirable seminary for young ladies is at Bordulac, Oconomowoc, and the only one of the kind in Waukesha County. It is delightfully situated, with La Belle Lake a few rods in front and Fowler Lake equally near in the rear of the ample and neatly kept grounds. Its career has been one of uniform success. Following is a transcript of the initial proceedings:

On the 21st of March, 1855, a meeting was held in Zion Church, Oconomowoc, by the appointment of the Rt. Rev. Jackson Kemper, D. D., at the request of several gentlemen of the place, to take into consideration the best plan and means for the establishment of a female seminary, under the supervision, direction and patronage of the Protestant Episcopal Church. There were present the Rt. Rev. Jackson Kemper, Rev. E. Steele Peake, John S. Rockwell, William H. Warner, M. D., J. M. Lewis, M. D., Mrs. A. H. Whitney, James Luck, Samuel Dodge and D. H. Rockwell—the Bishop presiding.

The Rector briefly stated the objects of the meeting. It was suggested that a suitable building could probably be erected for \$2,400, and that if one-half should be subscribed, the other \$1,200 could be obtained by a loan at 10 per cent. A plan was described, and Samuel Dodge was appointed a committee to estimate and report the probable cost of a building erected upon the plan proposed. The following resolutions were then unanimously adopted:

Resolved (1), That the school be under the supervision of the Bishop of the diocese.

Resolved (2), That the Bishop of the diocese, the President of Nashotah House and the Rector of the parish, be a Board of Visitors to the institution, and the plan and manner of conducting the school be such as they shall approve.

Resolved (3), That the Board of Visitors be a committee for the selection of proper teachers for the school.

Resolved (4), That the Rev. Mr. Peake and Dr. J. M. Lewis be a committee to draw up a statement of the principles embraced in the above resolutions, and report the necessary steps for procuring a charter.

E. S. PEAKE, *Secretary*.

The above is a transcript of the minutes of the first meeting held for the establishment of a diocesan school for girls in Wisconsin. The founders wished an institution of the highest

order, and interested a number of gentlemen in the enterprise. Among the laymen, the largest contributor was John S. Rockwell, and this fact secured the establishment of a diocesan school in Oconomowoc, in preference to other places in the State, which proved fortunate for it, as a finer location in any State cannot be found. A charter was obtained by act of Legislature in January, 1856. The following is the legislative enactment which chartered the Oconomowoc Seminary :

SECTION 1. That Jackson Kemper, Azel D. Cole, William H. Warner, Talbot C. Dousman, B. R. Hinckley, E. W. Edgerton, A. H. Whitney, D. Henry Rockwell, Thomas Salton, George W. Pugh, James Luck, James M. Lewis, Samuel Dodge, John S. Rockwell, A. L. Prichard, L. Wilson Davis, together with such persons as may hereafter become associated with them, are hereby created a body politic and corporate, with perpetual succession, by the title and name of "Oconomowoc Seminary," by which name they and their successors shall be known, and shall have power to sue and be sued, to contract and be contracted with, to plead and be impleaded, defend and be defended, in all courts of law and equity; and, further, shall have power to borrow any sums of money for the purposes of said corporation, not exceeding the corporate stock of said corporation, may have and use a common seal, and shall have power to receive as a gift and to purchase and hold any real estate or personal property, consistent with the interests of the institution, and the same to sell and convey, or otherwise lawfully dispose of, at pleasure. Any three of the above-named persons may call a meeting of said corporation, to be held at Oconomowoc, where said corporation is hereby located, by giving ten days' notice thereof, by posting up notices in three public places in said village. The stock of said corporation shall be divided into shares of \$100 each, which shall be deemed personal property, and shall be transferable on the books of said corporation, in such manner as shall be provided by the by-laws of the same, and any person holding one or more shares of such stock, and subscribing to the by-laws and constitution of said corporation, shall be a Trustee and have one vote for each share so held at all meetings of said corporation for the transaction of business; and any person paying to said corporation a sum not less than \$5, and subscribing to the constitution and by-laws of the same, shall be deemed a member thereof.

SEC. 2. The Bishop of the Protestant Episcopal Church of the Diocese of Wisconsin shall be *ex officio* President, and shall preside at all meetings of said corporation. The Vice President shall be a presbyter of said church and diocese and shall be elected by the Board of Trustees at their annual meeting, and shall act in the absence of the President. The Rector of "Zion Church" shall be *ex officio* Secretary, and shall keep a correct record of all the proceedings of said corporation.

SEC. 3. The President, Vice President and Secretary shall constitute and be a Board of Visitors to said seminary, who shall appoint requisite teachers, prescribe the course of study and discipline, and confer such degrees as are usual in institutions of learning, and issue and grant diplomas for the same.

SEC. 4. There shall be an annual meeting of the Trustees, at which meeting they shall elect a Treasurer, who shall receive and disburse the funds of the corporation, and issue certificates of stock to such persons as shall be entitled to the same: they shall also elect an Executive Committee of five from their own body, designating the Chairman thereof, which committee shall execute the resolutions of said Trustees, and manage generally the business affairs of said corporation. Said Trustees may also hold special meetings, to be called by the Executive Committee or by the President, upon the application of any five members of said corporation, in the manner as may be prescribed in the by-laws; and said Trustees are hereby authorized to make such by-laws as they may deem necessary to carry out the provisions of this charter, with full power and authority to execute the same, provided the same be not inconsistent with the laws and constitution of this State.

SEC. 5. This act shall take effect immediately.

Approved January 25, 1856.

The school opened in the following autumn. Some money was subscribed in Oconomowoc toward the purchase of property, but the most liberal donor was J. S. Rockwell, and, from time to time, he enlarged and improved the building, which was purchased by the Trustees of Dr. J. M. Lewis. While he lived, he gave generous aid to the school by liberal patronage, and at his death the institution lost one of its most valued friends.

Bishop Kemper, who was President of the Board of Trustees, was a liberal benefactor of the school, purchasing several trusteeships and bestowing them upon the clergy. The Board was increased in members yearly, from among prominent clergymen and laymen in the State. The Executive Committee was composed of gentlemen residing in and near Oconomowoc, viz.: J. S. Rockwell (until his death), D. W. Small, James Luck, D. H. Rockwell, Talbot C. Dousman, William H. Warner, M. D., and, later, Daniel Jones, of Watertown. Rev. A. D. Cole, D. D., Vice President of the Board of Trustees, was always active in furthering the interests of the school, and never absent from the meetings. The venerable Bishop took the deepest interest in its welfare, which he evinced by donations to its fund, by frequently visiting it and by always presiding at the annual commencement exercises.

By the terms of the charter, the Rector of the parish was Rector of the school. The first five years, Rev. L. W. Davis was Rector; he was succeeded by Rev. Lyman Phelps, who

occupied the position three years, when Rev. Ezra Jones became Rector, and continued to be for four years.

The first Principal of the seminary was Mrs. Camelia Mason, who remained in charge for three years, when she was succeeded by Miss Grace P. Jones, still at the head of the institution, who entered upon her duties in September, 1859.

On February 3, 1863. Mr. Rockwell, the kind friend and patron of the institution died, after which, the Trustees, from time to time, tried, by repeated appeals to parishes and individuals, to raise an efficient sum to pay the indebtedness on the property, due to the administrators of Mr. Rockwell's estate. Failing to accomplish this, they discussed, in a meeting held on the 2d of December, 1867, the expediency of transferring the property to Miss Jones, and the following resolution was passed by a unanimous vote:

Resolved, That the Executive Committee of the Oconomowoc Seminary be hereby authorized to convey to Miss Grace P. Jones all their interest in the present seminary lots and property, under such conditions as they shall deem proper.

Before January 1, 1868, Miss Jones came into full possession of the property, and, in the following spring, made many improvements on the grounds and additions to the buildings, which had been long needed. Since that, she has, from time to time, improved the place, until one no longer recognizes the original seminary of 1859.

Miss Jones has continued the work of the school, not essentially changing its character, but advancing as the demands of the times require, and constantly laboring to bring it up to a higher standard. There is thorough instruction in every branch of study. Girls are received into a Christian home and put under a course of training to fit them for useful and accomplished women.

The institution has accommodations for thirty boarding pupils. A more delightful spot than this for a school cannot be found. Nature smiles in fullest loveliness. The surroundings are charming—changeful yet restful, in lake and wood and hillside—while the clear, bracing atmosphere gives health and pleasure to all who seek it. The internal arrangements of the seminary are pleasant and cheerful, with the air of home pervading the whole. The grounds are situated on Fowler's Lake, and boating in summer and skating in winter are pleasant features of recreation hours.

During Miss Jones' principalship, seven classes have graduated in a full course of study, and a larger number have pursued a partial course. The institution is a permanent one, and no effort will be spared to make it among the best of the land.

CARROLL COLLEGE.

Our American population, as it moves westward into new Territories, carries with it the love of religion and of a sound education, which has so long characterized it in its Eastern home. Knowing that the greater number of those who seek a high grade of intelligence could not return to the institutions whose benediction rested upon their fathers, they early began in this, as in all the Western States, earnest efforts to add to the system of common schools those of a higher grade, even to the college.

Carroll College was one of the fruits of these efforts. Christian men, in and out of the ministry, in connection with the Presbyterian Church (old school), set the enterprise on foot. It is said to have been born in the basement of the Pastor's residence at Cambridge. It was first chartered by the Legislature of the Territory of Wisconsin as "The Prairieville Academy," February 19, 1841. It was first conducted in what is now known as "The Old Female Seminary, or Old Prairieville Academy Building," on Wisconsin avenue. The first Board of Trustees appears to have been constituted January 1, 1844, with Peter N. Cushman, Chairman, A. W. Randall, Secretary, Morris D. Cutler, Treasurer, and Barzillai Douglass, Collector; William A. Barstow and Edmund D. Clinton were also members of the board, as well as J. Y. Watson, C. R. Dakin, C. Burchard, W. P. Sloan, N. Walton and S. Cummings. In 1846, upon petition of the trustees, the name of the institution was changed into that of "Carroll College,"

and appropriate changes made in the charter by the Legislature. The name was in honor of a wealthy and benevolent gentleman in Brooklyn, N. Y. This was really the beginning of Carroll College.

Thus constituted, Eleazer Root was appointed Professor of Languages and Rhetoric, and Henry Barnes, Professor of Mathematics. Soon afterward, Rev. John W. Sterling was appointed Professor of Ancient Languages, and Abraham Miner, Professor of Moral Philosophy. Rev. Dr. Youmans appears to have acted for a short time as President. Measures were at once set on foot to raise funds for building purposes, Professor Sterling going East for that purpose, and Professor E. Root laboring in this State. For a time, Rev. J. Buchanan also acted as agent, going East for funds. The salaries of the Professors were fixed at \$500 for the first two years, to be then increased to \$800 for each. When 1849 arrived, \$6,000 had been raised or subscribed, and M. D. Cutler and C. R. Dakin and other trustees gave tracts of land for the use of the college. George W. Lawrence, R. W. Wright, Jacob L. Bean and W. L. Ward, in the meantime, were chosen trustees. The board had placed the institution under the fostering care of the Presbytery of Milwaukee.

In 1850, the Presbytery recommended the appointment of Rev. John A. Savage, of New York, as President and as fiscal agent, which was done. He accepted the position, and entered at once with energy upon its responsible duties. During this year, also, A. C. Nickell, A. G. Hanford and William H. Watson, of Milwaukee, were chosen Trustees. For eleven years, Dr. Savage was President, and for thirteen, fiscal agent. In every direction, and by every honorable means, did he labor to secure the endowment needed to render the institution permanent. But it was necessary, or deemed so, to keep a full corps of Professors, and the efforts to obtain means for their support appear to have crippled the other object. The Presbyterian Board of Education gave substantial aid, and something was obtained from the State, in view of the normal work done by the college.

The college building was ready for use by January, 1853, and the basement of the Presbyterian Church was fitted up for the Preparatory Department. President Savage was assisted at different times by such able instructors as Revs. L. I. Root, William J. Monteith, Lowman Hawes, Edward P. Evans, Charles D. Pigion, Jesse Edwards and Sidney A. Bean. For a time, also, Andrew Watson (now reverend) acted as tutor. From 1857 to 1860, Rev. Oscar Park, Pastor of the Presbyterian Church, gave instructions in some branches, for which the trustees expressed hearty thanks, and voted him a perpetual scholarship. Among the assistants of Prof. Savage on the Board of Trustees, besides some of those already mentioned, are found the names of Jason Downer, William P. Lynde, I. A. Lapham, all of Milwaukee; C. J. Pettibone, of Portage; J. D. Rexford, of Janesville; Alfred L. Castleman, M. D., and H. N. Davis, of Waukesha.

In 1857, the first class graduated with the degree of A. B., and, for four successive years, classes were sent forth from Carroll College, which would have been an honor to any institution of learning in the land. It is worth giving their names: Class of 1857, Irving M. Bean, C. D. W. Gage, George W. Burchard, Moses Bryant, Jr., and Andrew Watson. Class of 1858, John H. Carpenter, John P. Story, Charles L. Thompson and S. M. White. In 1859, J. K. Bengster, John Hinton, Louis A. Proctor and H. K. Smith. In 1860, Franklin Dolph, Thomas S. Johnson, William B. Marsh, Edward Savage and Frederic Wardrobe.

From 1852, the college passed under the care of the Synod of Wisconsin—the proper successor of the Presbytery of Milwaukee. Regular collegiate instruction ceased with 1860. After having been closed for two years, Dr. Savage still acting as fiscal agent, the college was re-opened in 1863, upon a somewhat different plan. Ladies were admitted to its privileges, and a female teacher employed. Rev. William Alexander was appointed President; Rev. C. C. Hersman, Professor, and Miss Julia M. Willard, Assistant. With some success, much hard work, and many difficulties, this plan was carried on for two years. For a part of the time, Rev. David Hull was chosen fiscal agent at a salary of \$1,000 per annum; but the historian did not learn of much success in the raising of funds. At least, no beginnings appear to have

been made upon a permanent endowment. Money and lands were given for perpetual and for single scholarships, by individuals and by churches, East and West, during all the preceding years; but never in large enough sums, single or in the aggregate, to more than sustain the running expenses.

From about 1860, death and removals had made necessary the appointment of new men as Trustees, and while George W. Allen, of Milwaukee, and A. P. Waterman, of Beloit, were added from abroad, the active work at home fell upon William R. Williams, R. B. Hammond, M. S. Hartwell, Henry Davis, John Forbes, Edward Chester and O. Z. Olin, to whom Rev. C. L. Thompson, an alumnus of the college, was soon added.

During 1865, occurred another interregnum in the course of instruction. In March, 1866, began a renewed and earnest effort to resuscitate the college. Walter L. Rankin, of New Jersey, a graduate of Princeton College, was invited to take charge and conduct such a school as seemed best under the circumstances. He began with only fifteen pupils, but in one year the number had reached sixty, and continued to increase till the rooms devoted to the school work were filled. Edward Rankin and others were called in to assist, and all that the most thorough instruction and faithful administration of the institution could do was done. In the mean time, Rev. C. L. Thompson was appointed fiscal agent, and through his zealous efforts, together with some efficient help from Rev. John C. Rankin, of Basking Ridge, N. J., father of the Principal, a debt of \$3,000 was lifted from the institution. During these five years, Rev. J. H. Barnard was an active member of the Board of Trustees, and Vernon Tichenor and William A. Nickell began a long and faithful service. But the tuition charged for instruction was necessarily low, and even a full school was unable to afford the salary needed by the Principal and his assistants.

Therefore, in 1870, renewed efforts were put forth to secure a permanent endowment. Prof. W. L. Rankin, who was also President of the Board of Trustees, acted as fiscal agent during his summer vacation, after which Rev. William C. Turner was chosen to that position, and appears to have worked hard. Subscriptions to the amount of \$5,000 were secured by him; but as this was the limit of his apparent ability to raise funds, and as these subscriptions were conditioned upon the raising of \$15,000, he resigned his position at last, and the effort was abandoned.

In 1871, Prof. Rankin felt compelled to resign his position.

A year and a half passed, during which Rev. W. D. Lummis, assisted by his wife, conducted the instruction in the college.

In 1873, forty citizens of Waukesha and Milwaukee, appreciating the noble work done by Prof. W. L. Rankin, agreed to give \$10 a year, each, for three years, in order to secure him a definite salary, if he would return. John Beveridge, of New York, also left a legacy, which enabled the Trustees to pay some debts which had accrued, and also materially repair the college building. Prof. Rankin returned, and opened with a large school, which increased till the rooms were well filled. Chiefly by his efforts, the three years' subscription was increased to four years, and the number of subscribers increased to nearly one hundred. With able assistants, at different times, such as Mr. G. W. Howard, Miss Lillie Camp, Miss Alice Perry, Mrs. Mary Wolcott, Miss Kittie North, Miss Louie Park, and Dr. Hugo Philler, an admirable school of high grade was sustained until the summer of 1879, soon after which Prof. Rankin resigned, in order to accept a position as Principal of the Preparatory Department of Lake Forest University.

During this period, the efforts to secure endowment were renewed upon a different basis, and a real commencement made. The Board of Trustees adopted a resolution, that, in view of the growth of other colleges since this one was founded, and of the greatly increased funds now needed to sustain such an institution, in competition with the State University, and especially in view of the great demand in the whole Northwest, for academies of high grade, it would best subserve the interests of a Christian education, if we abandon all effort, at present, to obtain a full collegiate endowment for Carroll College, and, instead, put forth

earnest efforts to secure, as early as practicable, an endowment for an academy, after the model of Phillips Academy, at Andover, Mass.

This action, substantially as above, was approved by the Synod of Wisconsin, and the board was advised to appoint a fiscal agent to visit the churches of this and other synods, to obtain \$25,000, as a beginning.

The great financial depression of 1873-79, threw a damper upon the new hopes entertained by the friends of Carroll College. However, several hundred dollars were realized for endowment from the ten-dollar subscription referred to; and in April, 1876, the board appointed Rev. T. G. Watson, Pastor of the Presbyterian Church, and Secretary of the board, its fiscal agent; and, the church consenting to his absence for one month, he visited the churches of Janesville, Beloit, Fond du Lac and Beaver Dam, besides canvassing for a week in Waukesha Village. The result was that there is now about \$2,000 held by the board, and invested as an endowment fund. But the hard times made it imprudent to extend the effort by seeking a paid agent to carry it on.

Prof. George H. Reed, has now taken charge of the college, and is faithfully carrying on the grammar school and high school departments, as has been done during the past eight years. Besides preparing quite a number for college, many have graduated with a fair education, who did not expect to pursue their studies further; and a noble work has been done in providing competent teachers for the common schools of the county. A much greater work will be done when the wise and good men are found who will build a grand monument for themselves by giving to Carroll College a liberal endowment, which it truly deserves.

Vernon Tichenor is President of the Board of Trustees, and Revs. T. C. Kirkwood, B. G. Riley and C. W. Camp, and Messrs. John S. McDonald, J. K. Anderson, Edward Porter, Richard Street, W. D. Bacon, M. S. Griswold, A. V. B. Dey and Willard Farr are among the newer, acting and active trustees.

GENERAL EDUCATIONAL INTERESTS.

The general supervision of the educational interests of Waukesha County have always been in remarkably good hands. Several of the ablest and most conscientious educators in the State have devoted themselves, at various periods, to the schools of the county, and the results of these labors are plainly apparent. During many years, it was the custom of Superintendents, as long as the publishers would do so *gratis*, to publish every week lengthy reports of their doings and of the condition of the schools visited. This stimulated teachers and scholars alike to deserve the best possible report, and all awaited eagerly the next issue of the papers, always showing the reports with pride to their friends.

The first schoolhouse, elaborately described elsewhere, was erected in 1837, at what is now Waukesha, and, during that fall and winter, William T. Bidwell taught a school with twenty-odd scholars in it. That was the first public school in what is now Waukesha County, though, a year or two before, small private schools were taught at the homes of John Weaver, in Lisbon, and Nathaniel Walton, near Waukesha.

Forty years have wrought a wondrous change in the matter of educational facilities in every part of the county. That change cannot be made more striking than by a jump from an imaginary picture of the first tamarack schoolhouse, with its rude seats, scant furniture and comparative absence of school-books, to the report for 1879 of County Superintendent Howitt. In making his report to the Board of Supervisors for that year, he says:

“Your attention is first called to general statistics. Number of joint districts with school-houses in the county, 43; number of regular school districts, 84; total, 118. Number of parts of districts, 103; number reported, 103. Number of male children as reported, over four and under twenty years of age, in the county, 5,455; females, 5,155; total number of male and female children over four and under twenty, 10,610. Number of days school has been taught by a qualified teacher, 18,627. Number of pupils over four and under twenty years of age who have attended public schools, 6,713; under four years of age, 13; over twenty years of

B. F. Gros

PEWAUKEE.

age, 23; total number of pupils who have attended public school, 6,749; private school, as reported, 202, and, if Carroll College were included, it would make over 7,000 pupils who have received instruction during the year in the county. During the coming year, it is expected the number will be increased, as the compulsory law will be in force, and to which the attention of district boards, patrons and teachers is respectfully called. In relation to this law, I deem it not necessary to make any comment in this report.

“Number of private schools in the county, 11. Number which are denominational, 9. Number of teachers engaged, 17. Number of days school has been taught, 700. Number of pupils who have not attended a district school during the year, 187. Number of daily attendance, 202.

“The following is the official report of Pewaukee High School: Number of teachers employed, 1; number of pupils not over twenty years of age, 88; number over twenty years, 1; whole number of pupils registered, 89; average daily attendance, 33; number of days of high school, 160; number of pupils in natural sciences, 21; amount actually expended for instruction, \$600.

“The following are the graded schools and number of departments: Waukesha Union, 8 departments; Oconomowoc City, 6; Pewaukee No. 1, 3; No. 3, 2; Menomonee Falls, 2; Merton, 2; Delafield, 2; Eagle, 2; Hartland, 2; Sussex, 2; Mukwonago, 2. Total number of graded schools, 12. Number of departments, 35.

“My opinion on the text-book question has been given in previous reports, and here I will only state that experience and reflection have only added strength to the conviction that in our existing text-book laws is to be found all that is needed for uniformity of text-books, changes, etc. The following will show the increase or decrease in adoption, purchase, loans and selling text-books, by districts, from 1877 to 1879: Number of districts which have a list of text-books adopted—in 1877, 5; in 1878, 52; in 1879, 73. Number of districts which purchase text-books—in 1877, 2; in 1878, 40; in 1879, 65. Number of districts which loan text-books—in 1877, 2; in 1878, 1; in 1879, 2. Number of districts which sell text-books to pupils—in 1877, 0; in 1878, 40; in 1879, 40.

“There has been \$2,372.58 more expended this year in building and repairing than the previous year; and a most commendable interest has been taken in re-seating and supplying the schools with dictionaries, globes, maps, charts, etc.

“Cash value of all the schoolhouses and sites in the town of Brookfield, \$7,075; Delafield, \$5,145; Eagle, \$4,905; Genesee, \$4,490; Lisbon, \$9,380; Menomonee, \$10,720; Merton, \$5,800; Mukwonago, \$5,720; Muskego, \$4,025; New Berlin, \$3,145; Ottawa, \$2,050; Oconomowoc, \$3,235; Oconomowoc City, \$10,300; Pewaukee, \$10,480; Summit, \$4,250; Vernon, \$4,070; Waukesha, \$19,845.

“The total receipts and expenditures during the last school year are reported as follows;

Amount on hand August 31, 1878.....		\$8,924 59
Received from taxes levied for building and repairing.....		3,881 18
Received from teachers' wages.....		29,899 32
Received from apparatus and library.....		534 09
Received from annual town meeting.....		487 23
Received from County Supervisors.....		4,129 67
Received from income of State School Fund.....		4,150 31
Received from all other sources.....		3,241 21
Total amount received.....		\$55,247 60
Paid out for building and repairs.....	\$5,498 37	
Paid out for apparatus and library.....	287 79	
Paid out for services of female teachers.....	22,989 56	
Paid out for services of male teachers.....	12,787 75	
Paid out for old indebtedness.....	1,952 07	
Paid out for furniture, registers, etc.....	542 84	
Paid out for all other purposes.....	6,321 00	
Total amount of expenditures.....		\$50,809 38
Money on hand August 31, 1879.....		\$4,918 29

“Waukesha being an old county, comparatively speaking, the majority of the school-houses are in excellent condition and well furnished; but there are a number of school buildings which should be replaced by new ones, and be well furnished. I would call upon the School Directors, parents, teachers and all concerned to look well to the danger which may easily arise from ill-ventilated schoolhouses and impure water. Do not have your children poisoned with foul water, impure air, etc., and charge their sickness and death to the mysterious dealings of an inscrutable Providence.

“The 118 schoolhouses will accommodate 8,008 pupils, being 2,061 less than the number of children of school age. Number of schoolhouses in good condition, as reported, 105; number properly ventilated, 77; with outhouses in good condition, 93; well inclosed, 45; number of sites containing less than one acre, 85; number of schoolhouses of stone or brick, 45.

“The number of public examinations held during the year are 9; number of applicants for certificates, 350. It has been our object to give the teachers fair, practical questions which would test their knowledge of the branches in which they are examined, as well as to ascertain their ability to govern and teach. It is our intention to steadily increase the standing of the teachers of the county. I have examined a large number of teachers from the adjoining counties, and I must say the teachers of Waukesha County, in relation to education, government, tact and ability to teach, stand pre-eminent.

“The whole number of first-grade certificates granted for the year, 4; second-grade, 11; third-grade, 188; total, 203. The whole number of teachers employed was 207.”

The close proximity of the Milwaukee commercial colleges, State University and various normal schools, of which desirable institutions Waukesha County has none, calls many students away who would aid materially in raising the grade of the schools, but the annual reports of the State Superintendent of Public Instruction show that Waukesha County stands in the front rank in educational matters.

Eleazer Root, who was a prominent educator of Waukesha County, was a member of the second Constitutional Convention, in 1848, and was chosen to draft that portion of the State Constitution referring to educational matters. He performed the task—one of the most important assigned to any member of that body—so well that the parents and children of Wisconsin will have cause to remember him as long as education and schools are necessary. Perhaps no State in the Union has better school laws than Wisconsin, and very few have as good. For them Waukesha, is indebted largely to the old-time resident, Eleazer Root, now, if living, a citizen of California.

AGRICULTURE IN WAUKESHA COUNTY.

He who follows agricultural pursuits, breaks the tough prairie glebe, or fells trees and burns the fallows before he can put the plow into the soil, is the pioneer in all new countries, and prepares the way for lawyer, editor, miller, minister, blacksmith, and all others who depend upon anything but farming for a livelihood, and who never fail to come after him when the soil has been made sufficiently productive. The first settlers of Waukesha County were no exception to this rule. The Cutler brothers, when they first pushed their way into the wilderness in May, 1834, did not find lawyers' "shingles" swinging from the oaks; did not find a minister "holding forth" to the rocks and trees, and "passing the hat" to birds and beasts; did not find a physician with his saddle-bags hunting for a site on which to start a cemetery; did not find a musician teaching the birds and forest denizens to vocalize or play the piano; in fact, they found no one; and if they had, farming and tilling the soil would necessarily have been their occupation. The farmer has been the first man in every new country.

Not much was done in 1834, though a little "garden truck" was raised where the streets and blocks of Waukesha now are. This was the first planting by the hand of white men in

Waukesha County. The following year, nearly all kinds of crops were raised; none, however, more than one or two miles from the present site of Waukesha Village.

What spring wheat was at first sowed did not yield satisfactorily; therefore, during ten or fifteen years, winter wheat largely took its place as a bread crop, and returned profitable yields, especially in the "openings." Spring wheat thrived better on the prairies, where the soil was less adapted to winter grain, and the winter winds were more severe. Winter grain was abandoned almost entirely, and for twenty-five years, up to 1878, spring wheat has taken the lead. In the fall of that year, owing to the unprofitable returns from an overworked soil, and the disastrous effects of drought, chinch-bugs and weevil, large quantities of winter wheat were sown in some parts of the county, and, returning a tolerable yield, were largely increased in the fall of 1879. From necessarily small beginnings agriculture has grown to astonishing proportions in Waukesha County, and, although considerable attention is given to manufacturing and stock-raising, still represents the bulk of capital and population. Any other condition of things would be unnatural, as, with its rich soil and good markets, the county has always furnished a field for the most profitable returns of industry, skill and means applied to the labor of tilling the ground. The whole county is more than usually well watered, springs, lakes and streams being more numerous than in any other county in Wisconsin. Small portions of the county are better adapted to dairying and stock-raising, and the profit of adding these departments of farming to that of simple plowing and sowing has recently become apparent. Most of the farmers came from New England, New York and Pennsylvania, and adopted, generally, the mode of farming then practiced in the East. Since that time, experience (as to the capacity of the soil and as to the climate) has caused, of course, considerable change in the methods of farming in this region, as it has elsewhere. The quality of the butter and cheese made in this county is first-class. Wheat and hay produced here are second in quality to the products of no other county, and large quantities of pork, wool and beef, of excellent quality, are annually exported. Orchards may be found in all sections of the county. Grapes, cherries and all kinds of berries are grown with profit wherever the farmers are disposed to devote the necessary labor and skill to their culture.

The soil of the county is well diversified, from the heavy peat beds or glades, where grass grows in abundance in dry or wet seasons, to the light, quick, sandy soils, in which tobacco and sweet potatoes will, with a little care, thrive well. Thus the farmers are always insured against a total failure of crops, for seasons are never known in which all of the numerous farm products raised in Waukesha County do not make profitable returns.

In 1840, the county of Milwaukee (which included Waukesha) contained 541 horses, 5,100 cattle, 798 sheep and 8,114 swine. The agricultural products of 1839 were 34,236 bushels of wheat, 845 of barley, 26,836 of oats, 147 of rye, 1,829 of buckwheat, 26,820 of corn, 64,242 of potatoes, 4,574 tons of hay, 48,886 pounds of maple sugar, 67 pounds of wool, and \$15,000 worth of skins and furs. The wool product of that year, for what is now two counties, was, as compared with what Waukesha alone now produces, insignificant indeed. Much of the maple sugar was produced in what is now Milwaukee County, but the wheat and other grains were mostly produced in what is now Waukesha County. The following table, prepared in 1840, shows the various products and amount of farm stock in Waukesha County in 1839:

TOWNS.	Horses.	Cattle.	Swine.	Bushels Wheat.	Oats.	Corn.	Potatoes.	Sheep.	Sugar.
Brookfield.....	6	166	384	287	350	1364	2350	2655

Forty years later, the tables required to be prepared by the assessors of the various towns make a far different showing, and, by comparing the tables of population, it will be seen that the wealth and productiveness of the county have increased more rapidly than the numbers of her people, and the rate of valuation, or permanent market price of each product, has also been largely increased.

The following is a certified statement of the principal farm products grown in the county of Waukesha, for the year 1878, as ascertained and compiled pursuant to the provisions of Chapter 48 of the Revised Statutes of 1878:

TOWNS.	NUMBER OF BUSHELS.										No. ACRES HARVESTED FOR SEED.		NUMBER OF POUNDS.								
	Wheat.	Coru.	Oats.	Barley.	Rye.	Potatoes.	Root Crops.	Cranberries.	Apples.	Clover Seed.	Timothy Sd.	Clover.	Timothy.	Flax.	Hops.	Tobacco.	Grapes.	Butter.	Cheese.

In 1850, John Gilbraith was awarded a gold medal for some samples of ninety-six acres of flax raised by him about four miles from Mukwonago. In 1848, a squash was taken to Waukesha from Genesee to be weighed, which tipped the beam at eighty-six pounds.

In 1860, F. B. Ward, of Brookfield, became noted for producing a crop of potatoes, some of which weighed three and one-fourth pounds. J. Woodruff, of Lisbon, exhibited one that weighed three and one-eighth pounds, and Mr. Heath, of Pewaukee, exhibited a beet weighing sixteen and one-fourth pounds, and a radish weighing twelve pounds.

FIRST UNDERGROUND RAILROAD.

By far the larger portion of the people of the present day have no correct idea of what meaning was intended to be conveyed by the term "underground railroad," as it was used in the early days of active Abolitionism. Very many think it was literally a railway for the passage of locomotives and cars beneath the surface of the earth, and have inquired where the ruins of one could be seen. For the purpose of properly explaining a term familiar to all

Waukesha from thirty-five to thirty-seven years ago, if for no other reason, an extended account of how passengers traveled by that famous line might properly be given in this work; but there are still more weighty reasons for historically preserving such an account, as the first underground railroad established in Wisconsin had Waukesha for its northern terminus; was established by Lyman Goodnow, its first conductor, a Waukesha man, with some help from his neighbors, and the first passenger was Caroline Quarlls, whom he safely conducted by this line from Waukesha to Canada. Mr. Goodnow, still a resident of Waukesha, and whose mind and body are strong and active, tells the story substantially as follows:

"There probably was never more excitement in old Prairieville than during the search for, and escape of Caroline, a fugitive slave girl from St. Louis. In fact the whole county—then Milwaukee, was in a fermentation, and the leading citizens of the day, many of whom afterward became prominent in the State and nation, were the chief actors in that long-to-be-remembered drama of reality.

"A man by the name of Quarlls left Connecticut many years ago, emigrated to Virginia when the country was new, and was married to a squaw. His son's son was the father of our heroine; so that probably her great-grandmother was a squaw. Mrs. Hall, her mistress, was her father's sister, and her own aunt. Caroline came into the hands of this aunt on the death of her father. Caroline was an octoroon, probably. She had a straight nose, thin lips, skin not very dark, and a slender form of medium height. Although quite intelligent, she could not read or write. She was fifteen or sixteen years of age when in Waukesha. Her master was Charles R. Hall, a merchant at St. Louis, who formerly lived in Kentucky. Caroline was probably never badly abused while in bondage, though occasionally whipped in addition to being deprived of her freedom. She was brought up to do fine sewing, embroidery, and probably to wait upon her mistress. She was not allowed to attend church on the Sabbath, but was locked in the house to "scrub paints," as she called it.

"Although her mother was dead, Caroline had a stepfather, who never had been a slave, and who made quite a pet of her. The jewelry she had while here probably came from him, for he was well off, with a good trade, that of a blacksmith.

"Caroline wished to be free. She meditated on the subject for a long time, listened to all the talk about the North for a year or more, and conversed with her stepfather on the subject, though no one suspected her intention. Her mistress became angry at her one day, and cut off her hair, which was long and beautiful. That decided her to run away as soon as possible. She was some time in perfecting her plans. She managed in some way to possess herself of \$100, and when the opportunity came for her to go, threw a bundle of clothes out of the window, after obtaining permission of her mistress to go and see a sick girl of her acquaintance. She kissed the sick girl, bade her good-bye, went back, picked up her clothes, and walked down to the ferry. The boat was just ready to start, it being about 5 o'clock P. M. Caroline must have had some experience in traveling, for she went up with unsuspecting naturalness and bought a ticket to Alton, Ill., where there was a school for young ladies. She wore a quantity of rich jewelry, stayed on deck in the daytime, with other young ladies, and when there was dancing she danced. She thus excited no suspicion, being no darker skinned than many other of the young ladies who attended the seminary. I suppose she acted a little strange at Alton, for a colored man, who was at the wharf, asked her if she was a slave escaping, and she said "no;" but he watched her, and making up his mind differently, told her if she was, not to stay in Alton. So after staying a day, the darkey put her on the stage for Milwaukee. She rode night and day till she reached that city. As she left the stage at the Milwaukee House, she saw a colored man by the name of Titball, who was a barber, and went to him, supposing that he would be a friend to her—a correct conclusion, as he had himself been a slave. He took her to his home, where she remained a week or more.

"The first that people in Milwaukee knew about the affair, lawyers came, about a week after her arrival, from her master to take her back. They came upon Titball and asked him if he knew anything about Caroline. He told them that she was at his house. He then managed

to send a boy who was working with him, with orders to take Caroline to a certain place. He intended to get some money out of the lawyers, but the boy (who had also been a slave), did not take her to the place designated by Titball.

"The St. Louis lawyer, Spencer, desired to proceed according to law, and therefore consulted H. N. Wells, an Anti-slavery Democrat, who afterward became a Judge. Although Abolitionism had not then entered into politics and Mr. Wells was a Democrat, he would have nothing to do with Spencer and the other St. Louis lawyers, but visited the office of Finch & Lynde, and laughed about the affair with them, who, being thus set upon the track, hid the girl away in the grubs and brush until night. I am not sure whether Mr. Lynde (the ex-Congressman, William Pitt Lynde), aided his partner, Asahel Finch, or not.

"Spencer not getting help from Wells, went to another lawyer, Jonathan E. Arnold (who had run for Congress on a Whig ticket the year before), who turned right in with them. They then went to Titball, and he took them to his house, but, of course, did not find the girl. The lawyers were afraid they would lose Caroline, and offered the barber \$100 to produce her. So he took them to where he supposed she was hidden, but, not finding her, the lawyers thought the darkey was fooling them, and were going to kick him. He convinced them, however, of his honesty of purpose to help them, and saved himself a kicking, which he no doubt richly deserved—but he lost his \$100.

"At night, Asahel Finch took her across the river, and the story was she was headed up in a barrel, but it was a sugar hogshead or crockery cask, which stood between the road and sidewalk, between what is now Grand avenue and Kilbourn Town. The cask stood in front of a darkey's one-story house, which was raised up from the ground so that a person could see under it from the street. The house was so small one could look all through it from the sidewalk, the doors standing open, for it was the month of August. The people would slip something to eat under the cask when no one saw them, which enabled Caroline to remain hidden under the cask until night, when she fell into the hands of Samuel Brown, father of the present Mayor of Milwaukee, who then lived on a farm a mile or more from the city, but whose farm is now part of the city. He took her home, and kept her there one night. The next night, he started to Pewaukee with her, in an old rickety wagon, which he was afraid would break down before he reached his destination.

"Just before he struck the main road, Mr. Brown heard voices and stopped till some men on horseback passed. The party proved to be Jonathan E. Arnold, Alexander F. Pratt, the lawyer Spencer, and one or two others. They had been to Prairieville (now Waukesha), 'that Abolition hole,' as it was then called, to find Caroline, having lost track of her in Milwaukee. Mr. Brown's wagon *did* break down before he reached Pewaukee, and he placed the saddle, which he had taken the precaution to put in his wagon, on the horse and took the girl on with him. He took her to Father Dougherty's, who lived between two and three miles north of Pewaukee Village, where she was kept concealed two or three weeks.

"In the mean time, the parties who wanted her were searching all over the country, offering rewards for her capture. They made their headquarters at Peter Jones' tavern, the 'Prairieville House,' thinking she must be in Prairieville or near there, it was so strongly impregnated with Abolitionism. They did not leave a stone unturned to find her, keeping watchers out at night on all the bridges and roads leading to the place. A young lady while going to watch with a sick girl (who afterward died), at Rev. O. F. Curtis', was followed and the house watched to find out if she was not Caroline.

"Two men, who afterward held the highest position in the State (that of Governor), were found employed watching an opportunity to deliver a poor slave girl to her master. They did not watch boldly and openly, but on the sly. One of the wealthy citizens of Prairieville went to a new house just outside the village, pretending to want the plan, but really to see if he could get some trace of Caroline, the \$300 reward offered for her capture being a great temptation. Although there was so much excitement among the pro-slavery people at this time, who were all stirred up and rushing from one place to another, trying to stir up the people and find Caroline,

the Abolitionists were as quiet as might be, seeming to take no interest whatever in the matter, and the pro-slaveryites could gain nothing from them. The St. Louis lawyers and their friends, among whom were several of the prominent citizens of Milwaukee and Prairieville, defied the Abolitionists to keep Caroline away from them, saying the law was being violated by so doing, and vengeance would soon be visited on their heads. But Caroline's friends could not be provoked into any conversation or argument. The hangers-on at the Prairieville House were watching the every movement of every Abolitionist. The gang went to Deacon Mendall's, threatening him with some sort of violence, as he was a staunch anti-slaveryite, and supposed to know something of Caroline's whereabouts. They found him in the field engaged at hilling potatoes. The lawyers demanded to know the Deacon's opinion of his crime of law-breaking 'Why,' replied the Deacon, 'I didn't know as hilling potatoes was breaking the law.' 'You are harboring that slave-girl, which is against the law.'

"'Well, a bad law is sometimes better broken than obeyed,' said the Deacon, glancing at his rifle which lay near by in the grass.

"The Deacon's glance at his rifle cooled the slavehunters somewhat, who finally summoned courage to beg permission to search the house."

'No, sir, you don't search my house for any slave,' said Deacon Mendall sternly, and the crowd, afraid of the rifle, marched back to Prairieville. A man over sixty years of age had frightened them away, single-handed.

"By some hook or crook, some one got sight of Caroline at the Doughertys', and brought the news straight to the lawyers. They made a rush one Saturday afternoon to effect the capture. One or two roads turned off before reaching the house, and this Saturday Caroline sat by the window looking up the road from which she had an unobstructed view of a mile or more. She saw several men on horseback coming in that direction; as they kept straight on toward the house, she knew they were after her and slipped through the cellar, which was at the back of the house, and out toward a cornfield, to which she crawled on her hands and knees, and hid in the back of it till her pursuers went away. The men went into the house bold enough, and inquired of Mrs. Dougherty if a colored girl was there, and getting no satisfaction from the old lady, asked to search the premises. She consented, and it did not take long to look through the house, which was a large claim shanty; not much chamber nor cellar. They left very reluctantly, after searching everywhere on the premises, as they supposed. They came to what is now Pewaukee Village, and passing by Elder Wheelock's, A. F. Pratt told them that 'whatever the Elder said would be true. He might not tell all, but what he did say could be depended upon.' They therefore began to talk with him; asked him if he knew if there was a slave girl around. He said he had heard there was. They told a plausible story—said they had talked with Deacon Clinton; that they understood she wanted to go back, and she could go with them if she wanted to. If not, they would give her free papers; and the Deacon said if that was a fact, and she wanted to go back, it was his duty to give her up if he knew where she was; thought that was honorable. Then they said to the Elder:

"'Do you know where she is?'

"'No.'

"'Can you find her?'

"'I think I can. I have a great deal of confidence in the Deacon's judgment. I am going down to Prairieville to preach to-morrow, and I'll talk it up with the Deacon. Wait till I get my horse.'

The men thought that very favorable to their prospects, though had they known as much as they found out afterward, they would have come to a different conclusion. As they came into Prairieville, the Elder left them and said he would go up to Deacon Clinton's, who lived on his farm just out of the village, and have a talk with him, and would meet them at night at Jones' tavern (the Prairieville House), by 10 o'clock, with the Deacon. He meant to keep them away from Pewaukee neighborhood as long as possible. He then went to Deacon Clinton's and told them to send a boy for Deacon Mendall. Deacon Mendall came. The Elder told him to

take a man with him, get the girl away from Pewaukee, and keep out of the roads as much as possible, for these men might be prowling around, but to lose no time in getting her away. The Elder and Deacon Clinton went as agreed to the Prairieville House at 10 o'clock that night, and talked and gassed with the men till about 12 o'clock, and finally came to the conclusion that they would have nothing to do with the matter in any way. Deacon Mendall was a man of whom the people stood in awe. He had been something of a fighting character in younger days, but at this time was a good Christian man and a member of the church. He took a man by the name of Jewett with him, and went to Mr. Dougherty's and brought the girl to Prairieville to Deacon Allen Clinton's (brother to Deacon Edmund Clinton, who also lived on his farm two miles from the village). That Sunday all of Allen Clinton's folks went to church except his wife, who stayed with Caroline. That morning a man came to me at church and tried to tell me about the girl; but I did not want to hear. I told him that the fewer people there were who knew about it the better; but in the afternoon Daniel Chandler came to me after church and told me to have my team ready that night at a place designated a mile west of the village in oak openings. I did not dare to take my own horses out, for I was watched; but I told him I would be at the place with horses. So I went to Daniel Chandler and said: "Mr. Chandler, I want your horses to-night, and I don't want you should ask me a question." He let me have his team, a splendid one, of which he thought everything. I took the horses after dark, and went to the woods according to promise. After awhile I heard a whistle and answered it. By-and-by I heard it again in another direction, and I answered as before. Deacon Allen Clinton then made his appearance on horseback, Caroline riding with him. Two or three others came also—Chandler and Deacon Mendall. Caroline was given into my hands. I chose Deacon Mendall as company and we started with Caroline curled down in the straw in the bottom of the wagon for—we had no idea where, but any place of safety. On the way we stopped and got James Rossman to accompany us. I drove down through Mukwonago and toward Spring Prairie, thirty miles from Prairieville. We reached Spring Prairie about daylight, and stopped at Charles Thompson's. He said he would have thrashers that day and it would not be safe to have the girl there, but he took us to another place in the vicinity, where we left her and turned toward home as quickly as possible. On the way home in moving my feet around in the straw, I hit something hard; on picking it up it proved to be the longest butcher knife I ever saw (Deacon Mendall, in his earlier days, had been a famous butcher.) I says, 'Deacon, what's this?'

"O, it's something I brought along to pick my teeth with,' said the Deacon.

"You can guess what he intended to do if any one had attempted to capture us. We came home by a different route from that on which we went, and found everything serene. We had not been missed from Prairieville. Those fellows were satisfied she had left the place, and for two or three days a few friends of us talked of the affair, and concluded that though the people the girl was with were stanch Abolitionists, we did not know how good managers they were. The more we talked, the more fearful we were she would be found. Finally, we decided that one of us should go and take the girl through to some station on the underground railroad, and they pitched upon me, being an old bachelor with no family to keep me from going, as the proper one to do the job. At this time, money was not plenty in Prairieville, as every one was paying for his land. I had to start away with very little money. I rode my horse up to Deacon Edmund Clinton's, as I always did when I wanted to get him shod, with a rope halter on, so as not to look suspicious. It was about dark. I told the Deacon I wanted his saddle, bridle, and all the money he had. 'I am going on a *skeerup*, and I may be obliged to pay the Queen a visit before I get back.' He handed me \$5, all the money he had by him. That made \$8 with what I had, to start with. I mounted my horse, and started for the oak openings. Went through North Prairie, Eagle, and through to West Troy. Before reaching the last place it began to rain, and it was the darkest night I had ever seen. Lost my way two or three times, and did not reach my destination till 7 or 8 o'clock in the morning. Had scarcely a dry thread on me. I had breakfast, baited my horse and dried my clothes till noon. I was startled to find Caroline

gone. I was more easy, however, when I found they had moved her Tuesday night to Gardner's Prairie (two miles from Burlington), where she was left; but they didn't know at whose house. I started for Gardner's Prairie to hunt her up, and on the way stopped at Elder Manning's. He had brothers living at Prairieville, and I knew he was a good Abolitionist. He had not heard there was such a girl as Caroline, and knew nothing about the excitement connected with her case, having been confined to the house by illness. He declared his intention of going with me to the Prairie to find the girl, in spite of the pleadings of his wife, who thought it too great a risk to his health, this being his first day out of bed. The weather had cleared, and we started, the Elder going straight from his bed to his horse. We rode to Mr. Peffer's, who, knowing the Elder, upon being questioned, said the girl was there. I was acquainted with the brothers Arms, Abolitionists, and went to them. They called in two or three other friends to consult what to do, and, while talking, Dr. Dyer, father of Judge Charles E. Dyer, and still a resident of Racine County, came along. He proved to be the Commander-in-chief—a strong Abolitionist, the greatest and best friend to humanity. We could not keep the Doctor from seeing the girl; so we all went down to where she was, and held another consultation, when it was decided I should take Mr. Chenery's buggy and harness, and continue the journey to safety and freedom. Dr. Dyer went home and made preparations. He came back with a pillow-case full of cakes, pies and cheese, to be used in case of an emergency. He inquired into my finances. I told him what I had. He commanded the friends to draw their wallets, and he took up enough to make \$20 with what I had. The Doctor gave me a recommendation, the best I ever read, and an appeal to friends of humanity to assist me without question to the extent of my asking. I believe there never was an appeal like that written by mortal man before or since. It would almost stir the heart of a stone.

“While at this place, just before night, who should we see coming up the hill but Arnold and Spencer, still wearily but doggedly pursuing the fugitive girl. Caroline and myself, as well as the balance, were unfortunately out in the yard, and the road was in plain sight, but we were not seen.

“When night came on, we started from Dr. Dyer's, Caroline on the buffalo in the bottom of the buggy, which covered her so no one would know but that I had a sheep or a quarter of veal.

“Mr. Chenery accompanied us to the house of Mr. Perkins (who has a brother now living—a great sheep farmer—in Mukwonago). We could not stop there, as he was to thrash that day; so he took us to Elder Fitch, of the Christian denomination, who secreted us and our horse and buggy till night, when I started on again. The Elder started with us. It commenced to rain when we were but a few miles away, and, as we could not go through to Dundee as we wanted to, a prairie a few miles from McHenry was crossed, though it was so dark we could not see, on the road to a Christian Methodist named Russell, not an Abolitionist; but we had to stop somewhere. Mr. Russell was perfectly willing to assist a slave to freedom. If that was being an Abolitionist, he was one. He never knew before what Abolitionism was. I made him a station-keeper on the underground railroad, which I established along the route.

“In the morning, Elder Fitch went back home, and Russell went with us, through Dundee, to Dr. Root's. That was the first that we traveled by day. He was a double Abolitionist, like Dr. Dyer. His brother was a minister, and he sent for him and several friends, who came to see us while we dried out clothes, which were still wet. Started from there at about 2 o'clock, and went to Naperville, fifteen or twenty miles distant. Did not reach there till after dark. We went to Deacon Fowler's, as the Doctor had told us. There were some young ladies present of about Caroline's size, and they gave her some clothes, her dress having been badly torn. They gave her gloves and a thick veil, and also a small reticule into which to put her jewelry; so we started from there pretty well stocked. Caroline, being well dressed, after that sat in the seat.

“As I said, we traveled in the daytime now. I fell in with a Mr. Freeman, who directed me toward the underground railroad. We went through Lockport, a few miles from Joliet,

while the people were eating dinner, and of course so occupied that they did not notice us. Drove eight miles, to Deacon Beach's, which was on the original underground railroad. Mr. Beach had gone to a church-meeting, it being Saturday afternoon, and the women were very suspicious, thinking I might be trying to break up the line; but they gave us dinner and fed my horse. I went to the place at Hickory Grove they designated, and found myself on the right road.

"The next day was Sunday, but I thought we had better travel and get away from Chicago vicinity as soon as possible, as Hickory Grove was only about forty miles southeast of that place. We then made for Beebe's Grove. The people we went to were just starting for church, so we went to Mr. Beebe's. He made us welcome. He was a very intelligent man, and had just returned from Chicago, where he saw an advertisement on the docks, '\$300 reward for a colored girl,' but did not pay much attention to the description, though it was no doubt offered for Caroline. The clerk of the steamboat on which Caroline left St. Louis was visiting all the lake ports to advertise her, for the company would be compelled to pay \$800 to her master in case she was not found. This sum they were finally obliged to pay.

"After dinner, we started on our journey, Mr. Beebe accompanying us as far as the school-house, where their meetings were held. Sunday-school was just out. Beebe said they were all Abolitionists at the schoolhouse, and he wanted the people to see Caroline. So we stopped and he told the people her history. Several young ladies, Sunday-school teachers, came out after church to see Caroline and talk with her. Near by stood one of the 'liberty poles,' so called, which are common to Northern villages. Turning toward it, she asked them what it was. They replied properly. 'What is it for?' 'To commemorate the birth of liberty in America,' they answered. 'What do you do with it?' 'Oh, look at it,' was the reply. 'Who may look at it?' 'Everybody,' said the girls. 'But you said it was a liberty pole; can a slave look at it? How can it commemorate liberty in a country where there are slaves? Have you repealed the law [the Fugitive Slave Act], and raised this pole to mark the event? Do those who have their liberty have their names written on the pole or in some book? If not, how do you know who the pole is for?'

"These and similar searching questions so confused the young ladies that no replies could be made to Caroline, and their Pastor attempted to reply for them but was not fully equal to the occasion. She had thoroughly befuddled her visitors, who were glad enough to call her attention to something besides liberty poles, and their connection with liberty and the Fugitive Slave Act.

"The next night, a terrific storm brought darkness unusually early, and made it impossible to reach the next station. I had been told that, in cases of emergency, the Germans were the next best to Quakers for protection, and we stopped at a big claim shanty occupied by a German and his wife, begging shelter from the roaring storm that was almost upon us. 'We have no bed for you, no fires, no wood, and no candles,' said the German, 'but will do what we can for you.' The horse, which had been half a day without water, was hitched to the fence as quickly as possible, and when we went in Caroline had already gone to bed with the German's wife. He and I slept on the floor, or rather I reposed there, not being able to sleep much on account of my poor horse. As the German had no water, I arose early, hitched up, called Caroline and started on our journey before daylight, and to this day that kind German woman does not know she slept with a colored girl who was fleeing from bondage, nor does her husband.

"From La Porte we traveled three days, I think, wholly among Quakers. The men were all absent from home, attending a Quaker meeting in Ohio. The women refused everywhere to say anything about any underground railroad, though they usually said: 'Thee can have what thee wants.' Their homes were, of course, stations on the road, but, fearing I might be an impostor, they would not let me into any secrets. They would, however, tell me where the next Quaker's house was to be found at a convenient distance. After leaving the Quaker settlement, I was compelled to stop over night about five miles from Climax Prairie, in Michigan, with a man who did not treat us well. Caroline was given a room in which was an old-fashioned loom.

On this she hung her reticule, in which were her jewels and the few dollars in money I had given her for the future. In the hurry of next morning the reticule was forgotten, and the loss not discovered until we were twenty miles on the journey. The horse was then too tired, and my destination yet too distant to think of turning back, making forty miles more of travel. I determined, therefore, to go on, secure the jewels on my return, and forward them to Caroline. So we pushed on. At Ann Arbor, we were entertained by the editor of the Abolitionist paper published in that place. Before reaching Detroit, we came across a fleshy colored woman, who said she had been a slave, but for some time refused to say where she had been in bondage. Finally, on being shown Caroline's face, she acknowledged being from St. Louis, from which place she and her husband had escaped in a most romantic and miraculous manner. It was soon discovered she and Caroline were old acquaintances.

"I also met a gang of thirty-two escaped slaves, on the underground railroad, near Marshall and Battle Creek. They were led by three stout fellows, who went several miles in advance, engaging work and searching out and marking stations. One of the women weighed over four hundred pounds, and could not walk. She traveled only in the night. As large as this gang was, every one was perfectly safe anywhere in the Quaker settlement. Whatever may be said against the Quakers by those who do not like them, I must say I never saw or heard of one who was not an Anti-slaveryite. The same may be said of the Germans, except of some of them who had become Yankeefied.

"We passed through Detroit at 6 o'clock on Tuesday night—about three weeks from home—while the streets were filled with workmen on their way home. We were not discovered, and arrived safely at Ambler's, who kept the last station this side of the Detroit River, his house being only separated from that stream by a narrow street. He was absent, but we were well cared for, and his wife sent two men—one of whom I had known in the East—to take us over the river. To him I paid twelve shillings, the first money I had paid out in the whole journey, which, on account of the circuitous route followed by the underground railroad, had extended over a distance of between five and six hundred miles. After crossing the Detroit River, Caroline began crying, and clutched me by the arm, asking if it was possible that she was being taken back to St. Louis. I talked and explained, but it took some time to clear her mind, that side of the river appearing to her like the country across from St. Louis. I left Caroline with Rev. Haskell, or at his house. He was a missionary at Sandwich, Canada.

"The clerk of the steamboat, whose owners were afterward compelled to pay \$800 for transporting Caroline from St. Louis to Alton, was in Detroit when we got there, and had been watching every ferryboat that crossed the river for a fortnight. How long he remained on watch I do not know, but he never found Caroline.

"On the road home, I stopped at the place near Climax Prairie where Caroline left the jewelry. [At this prairie is a junction of the underground railroad from the Ohio River.] The man refused to give up the reticule. His excuse was, that probably Caroline would return for it, and then there would be trouble. I argued every way with him that I could think of, but all to no purpose. He was not only stubborn, but mean and stingy. Finally I asked him if he would take ample security, to which, after an unaccountable amount of squirming, he consented, promising to receive Dr. Thayer's bond for the jewelry and money. The Doctor, who was another Dr. Dyer—a double Abolitionist—lived at Climax Prairie, five miles distant, to whose place I started on foot, my horse being very tired, at 9 o'clock Saturday evening. The Doctor was away attending patients, and I started after him. Not knowing the roads, I got lost, and, after a long delay, reached the place where he had been, just a few moments too late. I then returned to the Doctor's house, reaching it late, or rather early in the morning, where I was given a bed for an hour before breakfast, the Doctor being still absent. He returned Sunday, and, when I told him my errand, he spared no invectives or profanity in attempting to satisfactorily express his indignation. He sat down at once and wrote one of the strongest obligations I ever saw, with which I returned for the reticule. Even after all my trouble, and after promising to take Dr. Thayer's bond, this mean-souled individual delayed a long time before he

would give up the valuables. I was terribly exasperated, but talked as coolly and politely as I could until the reticule was recovered, when I gave him as much deserved abuse as I could command, and I wish I could recall his name now, that the world might know what kind of men inscrutable Providence has from time to time permitted to live in it. I returned to Milwaukee, and to Father Dougherty's, in the town of Pewaukee, in both of which places Caroline had left whatever she possessed. I immediately gathered everything together, and with the money and jewels, forwarded them to her at Sandwich, Canada, through Dr. Porter, at Detroit, who wrote me afterward that they reached their destination.

"On the road home—I was from home five weeks—I was repeatedly bantered, friends inquiring if I did not expect old Tenny [Chief Justice Taney, who afterward delivered the notorious Dred Scott decision,] would soon have my hide on the collar-beam.

"Caroline had \$80 when she reached Milwaukee, which she placed in the hands of Titball, the ex-slave barber, before mentioned, who at first befriended her, and then attempted to sell her to the slave-hunters. When I went to him for it, he said he never had but \$40 of Caroline's money, and even this he refused to pay. I sued him and got a judgment, which I called paid when Titball died, about thirty-five years ago. He had his shop in the Milwaukee House, and it was the finest barber-shop in Milwaukee.

"When Caroline was on the road to Canada, she was asked if she could read or write. 'I can't write,' said she, 'but I can read; I know as much as half my letters.' Since then, she seems to have learned the use of a pen, for I received the following, which contained more errors, however, in punctuation and spelling, than here appear :

" ' SANDWICH, April 18, 1880.

" ' *Dearest Friend*: Pen and ink could hardly express my joy when I heard from you once more. I am living and have to work very hard; but I have never forgotten you nor your kindness. I am still in Sandwich—the same place where you left me. Just as soon as the Postmaster read the name to me—your name—my heart filled with joy and gladness, and I should like to see you once more before I die, to return thanks for your kindness toward me. I would like for you to send me one of the books you were speaking about.

" ' Dearest friend, you don't know how rejoiced I feel since I heard from you. Answer this as soon as you get it, and let me know how you are, and your address.

" ' Direct your letter to Caroline Watkins, Sandwich, Ontario.

" ' CAROLINE WATKINS.'

"The envelope was quaintly directed in this manner: 'mr lymun Goodnow Warekesha Wis in haste U S'

"After receiving this letter, I sent a series of questions to Caroline, to which she sent me promptly an answer, dated April 23, 1880, at Sandwich, and which is *verbatim et literatim*, as follows:

" ' *Dear Friend*:—I received you letter and was glad you was well and doing well it leaves me in not very good health. I did marry a man on Col. princess farm by the name of Watkins but he was considerable elder than i was and had children by his first wife as old as i was but she was sold from her children in slavery and before she got to the end of her journey she killed herself. I learned to read and write in Canada went to school the first year after i came here to Askins i was here nearly three years before i was married. My husbands occupation is a cook i got a pretty good living but by working pretty hard for it, but i am not very happy. I have heard from St. Louis several times since i came by my cousin who served her time out and got free and came here my old Mistress is dead and my Master is married again that is Charles R Hall i knew about me having property left me before i came away perhaps if i had of stayed until i became of age i could have got it and perhaps not, there was not but only two of us, i had one sister but she died before i came away. I have forgotten how long i was going from Alton to Milwaukee by stage. Mr. Potts was the minister that my master and his wife went to and they were Presbyterians my husband was once a slave born in richmond virginia belonged to a man by the name of William watkins after he died he fell heir to a widow in kentucky by the name of Nancy Cleveland and remained there until he came to Canada. I have six children three boys and three girls three married and three single the youngest is 16 a boy my oldest boy is a farmer and my other boy is in cincinnati my youngest girl 18 is at home and i am trying to educate her for a school teacher only she has had quite a impediment in her speech they have all very good educations—Mr. Askell is dead he moved away from here the second year after I came here he was not the man as professed to be he had some very dark traits about him my grandfather and father both was born in richmond virginia then emigrated to St. Louis my father was name Robert Prior Quarlls i was born in St. Louis on the corner of pine and sixth streets. I got the box out of my masters store room and hid it in a cherry hedges i left on the 4th of July my mistress folks treated me well enough for

a slave. Yes i have been whipped yes i had to do the house work for i was kept for that purpose. I told my grandmother that i was going to canada but i was so young that she did not pay any attention to me nor any the rest of them.

“ ‘ I have answered all the questions you have asked me until the next time good bye.

“ ‘ CAROLINE WATKINS.’ ”

The letter is published without correction, as its errors are the proof of its genuineness.

Thus ends the story, every detail of which is known to be true, of the first escape of a slave not only from Waukesha County, but from the Territory of Wisconsin, the closing incident being the receipt of the above letters thirty-seven years after Caroline was hidden in Prairieville, or in its vicinity. Connected with incidents like this, the name of Lyman Goodnow will never be erased from the richest pages of American history.

PIONEER REMINISCENCES.

The old settlers of the county were personally and publicly requested to furnish papers for this chapter, one of the most entertaining and instructive in the book, as it furnishes the truest insight into all the early modes of living, doing business and weaving the social fabric. Some have responded, but many have not, urging that they were too busy, had forgotten the stories of their early lives, or were too old to write. The chapter contains a few unimportant errors in dates and names, which, however, will be found referred to correctly in other portions of the book, especially that portion of A. F. Pratt's which states that Mrs. McMillan was the first woman in the county.

BY NATHANIEL WALTON, 1880.

Among the “ old settlers ” of Waukesha County, I think it safe to record myself and my wife, Mrs. Laura Walton. We started from Genesee County, N. Y., with four children, February 2, 1836, for the “ Far West,” as it was then called. The journey was begun in the midst of the snows and storms of a very cold winter, and our route took us through a part of Canada, across Michigan, around the lower part of Lake Michigan, through Chicago, then a little village, and on to Milwaukee, arriving there the last of March. We were at the end of the road, so concluded we must be at our destination, at least for a time. Having four horses to feed, I went out to get some grain, and found oats at \$4 a bushel, and poor at that. During the summer, I concluded to go a little farther west of the lake.

At that time, there were only paths extending westward from Milwaukee, wide enough for horses in single file. I took my team and started with a party of surveyors and broke the first wagon road through to Waukesha, clearing away such forest trees as were necessary and bridging the streams in a rude way.

In October of that year, I brought my family to Waukesha, and the experience of the first day in their new home was simply a foretaste of many more to follow. Three travelers soon came, wanting to engage board, and thenceforward for some time the little cabin in the center of the prairie was known as the “ Lighthouse ” and the “ Travelers' Home.” Our most numerous neighbors were wolves and Pottawatomie Indians. They were very social—in fact, altogether too social.

I was the first Deputy Sheriff appointed for this vicinity. Other whites, in addition to the few already here, soon began to settle around us within the radius of a mile. This had at least one advantage, for, as the settlers had none of the usual Sabbath-day privileges, one devout Christian began immediately to observe regular hours of “ secret prayer,” and on such occasions, all the neighbors within half a mile could plainly hear his every word. The service for the first sermon preached was held in my house, the clergyman officiating being that good Methodist, Father Wheelock. From this time, every denomination met in the same room for service until there was a schoolhouse built. The first Baptist Church was formed there, with eleven members.

Mr. Juneau engaged one room of the house to open the first store. He furnished the goods and a young man named Terrell acted as his agent. Afterward, when the course of travel removed

toward the heart of the prairie, the store was removed there, and the room thus left vacant was occupied by Mrs. Emma Griffin, wife of Rev. Mr. Griffin, now living at Pewaukee, to open the first select school.

The register showed the names of fifteen scholars, among whom were the still well-remembered names of Mendall, Love, Jackson and others. When the first district school was organized, John M. Wells was the teacher.

The early settlers of Waukesha were patriotic citizens. As early as 1839, they thought they ought to gather together to celebrate their country's independence, and, as no more suitable shelter was found, my new barn was selected. The Declaration of Independence was read by David Jackson, then acting as Postmaster; an address was delivered by Mr. Rockwood, and dinner provided by Mrs. Walton.

Although suffering some inconveniences and privations at first, we have many things to be thankful for. We have lived forty four years on one place, and the family, consisting of nine children, has seen no death.

BY LYMAN GOODNOW, 1880.

No one comes to Waukesha County nowadays without some good reason, and the reasons are so manifold and all good that no one thinks of attaching any importance to knowing what they are. But everything was different forty-three years ago—a period of time covering more than four-sevenths of man's allotted time on earth. Therefore, the people of to-day very frequently ask why the first settlers came to this wilderness; what were the inducements; what the prospects. Several circumstances combined to result in my coming West, as is probably the case with all emigrants. To begin with, I was born in old Rutland, Worcester Co., Mass., Feb. 12, 1799—before the death of the Father of his country—and partook somewhat of the rugged, hardy character of my native section. I possessed a keen desire to do something, to get along in the world—in short, to make money, but had nothing with which to do it. My early education was somewhat neglected, much the same as nature apparently had failed to round and soften the bold hills and barren rocks of Worcester; but I wanted to do something. I accompanied my parents, Asa and Lydia Warren Goodnow, in 1805, to Potsdam, St. Lawrence Co., N. Y., a county wilder and rougher than the surroundings of my Bay State home. There I first went to a common school—very common, indeed—walking four miles and sitting in a barn at that. I followed farming until 1820, in St. Lawrence County, after leaving school, when I went to Canada and began lumbering, taking along a span of horses. There I made money, and at one time could have bought the land on which the city of Ottawa, the capital of Canada and seat of the splendid Rideau Hall, now stands, for \$600, payments to be made in sums of \$100 for six years. Three years later, 100 acres of the site sold for \$8,000, and now the place is valued at millions and millions of dollars. After meeting with serious financial reverses, I left Canada and began business in Massachusetts, at Lowell, engaging extensively and successfully in contracting and building. When a lull ensued in the building operations, I began the railroad business, where I was again laid out, financially speaking. My attention was then turned to the West. My brother, E. W., and my sister, Mrs. Allen Clinton, had already settled in what is now Waukesha County, in the southern portion of the town of Pewaukee, and were sending back glowing accounts of the fertility of the soil and the beauty of the country. Having, after thorough inquiry, learned that my kind and style of people were settling in that section, I determined to emigrate to Wisconsin Territory. Before coming on to "Ouisconsin," however, I spent three years and over boating into Buffalo, N. Y. In September, 1837, I shipped on the schooner Toledo, the largest one on the lakes, and arrived at Milwaukee in October, after a terribly stormy passage. I gazed curiously at the few white brick buildings then in "Milwacky," thinking, of course, from their color, that they were temporary structures of unbaked brick, as the raw brick in the East were of a similar clayey color. It was some time before that erroneous idea was gotten out of my head. After spending one night there, I started on foot for Prairieville (now Waukesha), stopping for dinner with Robert Curran,

whose log house was the first in the town of Brookfield, and who is now a respected resident of the village of Waukesha. About the middle of the afternoon of the second Friday in October, I came upon Henry Bowron, now a resident of Delafield, and others, building the old Prairieville House, of logs, a little northeast of the present court house. I asked them to direct me to Prairieville. "Why," said they, "you are right on the main street." I was surprised enough, for there was no street worth mentioning, and the place was a jungle of hazel-bush, oak underbrush and poplar saplings. This jungle extended all over the present site of the business portion of the village—where stand the American House, bank, Exchange Hotel and all business blocks—down to the river, where Alonzo R. Cutler had a "claim shanty," of logs, called the "mill claim." Morris D. Cutler also had a "claim shanty," of logs, where his present residence, in the midst of a beautiful park, is located. B. S. McMillan's log house, which was the first tavern, so-called, stood near where the jail now stands, and was occupied by David Jackson, who was Postmaster. Solomon Juneau had an Indian store where the Catholic Church now is, Alonzo Cutler having donated a lot to him as a consideration for opening it; the store was not kept by Mr. Juneau, but by his brother-in-law, a half-breed, I think. Nathaniel Walton had a log house where he now resides, on the street leading to the Industrial School. The Olin brothers had a log house a little northeast of the present village. Robert Love had a good log house near the Bethesda Spring, and was building a frame addition to it when I arrived. Richard and Isaac Smart had claim shanties south of the present village, and Ethan Owen had a log house on the west side of the river, near the present dam; and farther north, was another claim shanty, afterward occupied by Maj. Pratt. On the hill, in the edge of the present town of Pewaukee, was a very large double log house, built for a tavern, though never used as such. This Owen's daughter ferried travelers across the Fox River, and in Robert Love's house, religious services were held, until the log schoolhouse was built, and in it, I think, the first church organization was formed. I nearly forgot Joel E. Bidwell, who had a log house near Spencer's Spring, on the hill west of the river, and the log house built by Edmund Clinton, farther west from Bidwell's, and occupied by three families. It was a small house, and with the families of Deacon Edmund D. Clinton, George A. Hine, Deacon Allen Clinton, my brother and myself, made a nestful, and no mistake. But it was all right and pleasant in those days, and everything went off in good shape.

The next day after arriving, I took a rifle and started to locate some land. No one knew of a claim to be made, but everybody had claims to sell. I could have "jumped" one almost anywhere, as nearly everybody had taken more than the law allowed. My first work was shaving the old-fashioned, long Ohio shingles for Edmund D. Clinton, from a black-oak cut on "Cutler's opening." While I was "butting" this log for the saw, I heard the surveyors coming. They run their line across the log and passed on to what is now Walton's corner, about eighty rods from the Fountain House, where they turned and passed down to the river at a point a few rods above the Hygiea Spring. This party was surveying the first road in the town of Waukesha. It was run out from Milwaukee, four rods wide, and was intended to be laid out to Madison. It was never a prominent road, however, being too roundabout, and never was laid out beyond Waukesha.

In the fall of 1837, I helped to build the first schoolhouse in what is now Waukesha County, under the hill on the west side of the river, about east of Thomas Spencer's tower, and a famous building it afterward became. No other building in the county ever witnessed such earnest meetings, such lively debates, or such astonishing temperance and anti-slavery eloquence from men in the common walks of life—men without the slightest training in the arts of oratory.

I also helped to build the first bridge over the Fox River, and with my brother, Edward W., and brother-in-law, Allen Clinton, built the first frame house in the county. It now is the home of Austin Waite. Both were built in 1837, I believe.

I opened the first stone-quarry in the county, having rented the land of M. D. Cutler, and also built the first limekiln, burning the first lime offered for sale. But there was no profit in either. People had little or no money then, but I wanted to see the place growing and

Geo. P. Peffer

PEWAUKEE

prosperous, so never refused any one stone, lime or sand. Scores of them never paid their debts till they paid them by death, and the grim messenger has not yet come to settle some of my old accounts, which have been drawing interest from thirty-five to forty years.

But for all that, I dwell upon the memory of those early days with lingering pleasure and affection. We had no politics and few distractions. We were all friends—all willing to help one another. The petty jealousies that mar the peace of to-day found no place among us then. There was no aristocracy—one was as good as another, if he behaved as well, and no different thoughts were entertained. We were very radical, however, in our views of right and wrong, and made those views felt. A large class held tenaciously to the most rigid temperance reform and anti-slavery doctrines, and carried them into nearly all business, political, social and church relations. We opposed bad men everywhere; supported all fugitive slaves who came to us, and worked like beavers for the right. All this told upon those who at first opposed us, having come from localities where different ideas had always prevailed, and at last nearly all were arrayed upon one side, making Waukesha the most famous headquarters for the radicals in Wisconsin, as it was the strongest and furthest advanced.

Waukesha has now settled down to more quiet, humdrum ways, except the bustle of selling mineral water and caring for our summer guests—all our battles but one having been won, and the fruits, rich and abundant, gathered and stored. That one is the conflict between liquor and abstinence, and I have lived long enough to see the former taking a more advanced position in the fight than it occupied forty years ago, as well as to see this such a rich, prosperous and beautiful country as not one of us in those early days ever expected could be made of it. I can be pardoned for wishing that I might take a look at the valley of the Fox River in 1980.

After taking a rest—for a man in his eighty-second year needs to rest pretty often—I have been thinking over the above. I feel like adding a little more, though it will not join on right beautifully. My father, Asa Goodnow, was born in old Stow, Middlesex. He was the third of five brothers. He had eight sisters; all had large families, and all lived to old age. Their mother's name was Knight, from England; she lived to be ninety-eight years of age. Our name Goodnow probably sprung from the name of a Russian count. My mother's name was Warren, daughter of Thaddeus Warren. You look at the record of the Mayflower and you will find the same name. She died of consumption, as did also two sisters and a brother, who died in Bombay, East India, as missionaries. I was sixteen years of age when mother died. She had three brothers who lived to be over eighty years of age and one ninety-six years of age; four sisters lived to be eighty and one ninety-four years of age. Her father and mother were eighty-four and eighty-eight; both were buried in one grave, dying only twelve hours apart. Gen. Hastings Warren, of Middlebury, Vt., was my mother's brother, and also John Warren, who built the first cotton-factory in Vermont.

After landing in Milwaukee in 1837, I paid 3 cents the next morning to cross the Milwaukee River, and started for Prairieville on foot and alone. Took the woods above Kilbourn-town, came out to Wauwatosa and found Hart's mill had just began sawing. I found numerous claims secured by patches of turnips, as the claim law required something to be raised. The road was through a heavily timbered country till I passed Poplar Creek, where I came to oak openings. I liked the looks of the country better, but did not like the grubs and hazel brush. I traveled on, expecting every minute to find a prairie. I soon came in sight of a small prairie and soon arrived at Prairieville. I crossed the Fox River in a canoe just above where the dam now is. Started west through the openings to Allen Clinton's, my brother-in-law. Reached the bluffs north of the river and began to think Prairieville was worth something. I came to a log house, not more than 18x20 feet, with three families living in it and had boarders. The two Clintons had large families. I turned in and helped E. D. Clinton build another log house, and then helped to build the old log schoolhouse and a log bridge. I took a job to cut and split 5,000 rails and draw them onto the prairie at \$30 per 1,000. I bought a yoke of oxen. In the spring, I helped on a dam for a saw-mill built by Clinton & Hine. Then I dug on the race that now carries the grist-mill. John Gale, Jr., built it. In August, a man by the name of

Perry and I bought a prairie team—five yoke of oxen. We went and broke up sixty acres of land for Ben Jenkins, of Jenkinville, Genesee. It was the same team that broke up the Hodgson farm, owned by Mr. Payne.

I sold claims here for a year or two, until the great land sale in 1839.

All the politics I found here was Kilbourn and Sweet. Kilbourn for the Rock River Canal, and Sweet opposing it. Excitement ran high sometimes.

At the land sale, I bought a piece of land joining some that Allen Clinton bought of William T. Bidwell. After the land sale, I helped Allen Clinton build a neat log house on his place. That winter, he and I *borrowed* rails enough of Uncle Sam to fence his farm. I never worked harder in my life than I did that winter. I cut for him to drive the two teams. As his farm was a little farther away and up hill, we thought we'd fence his land first while it was good sledding, which took us into March. I got one load of rail stuff for myself, when a thaw came and took off all the snow. Then, as I could not farm it for want of a fence, I looked about for business. I came down to the village and made an arrangement with Mr. Cutler and opened his limestone quarry, and went into the lime and stone business. I built a limekiln—the second built in Waukesha County, Deacon Mendall having built the first, which was a small, inferior one. When mine was built, it ran his out. I never sold lime for less than 25 cents per bushel, and, two or three years after, there was an opposition limekiln which brought lime down to a shilling per bushel, which did not pay for the wood to burn it. I delivered stone for 50 cents a perch, and sand for 50 cents a load. I delivered sand, stone and lime for the first stone dwelling-house for 76 cents a perch, measured in the wall, with the openings out. I did this to show what the stone would do, and to get people to build; but it was hard to get them to raise in price on the stone. They'd say they wouldn't build if they couldn't get the materials cheap. When I got the quarry nicely opened, the limekiln built and all ready for business, about the last of June, I entered into partnership with William T. Bidwell, to put up a stone building. He at first wanted to put up a small, one-story building, just large enough for a schoolhouse, as he had been a school-teacher. I said no; if we build anything, we will build something that will be permanent and salable. We were offered \$400 on time to build with. We hired the money of Mr. Nanscawen on time, Cutler giving us the lots to build on. We inclosed the building, and I sold out to my partner, Mr. Bidwell. If it had not been for the early March thaw in 1840, the old Prairieville Academy would never have been built. I was the first Constable elected in Waukesha; was elected the third time, but only served two and one-half years, as the election changed from fall to spring. I was Road Supervisor of the whole town, excepting a little district set off by Pratt in the southwest corner of town. I was appointed first Collector here. I think the tax only consisted of school taxes, and, in collecting it, I made a great many enemies among people who did not send children to school, who complained they had no benefit from the school. I furnished stone, lime and sand to the village until the year 1846 or 1847, and dug a good many cellars and stoned them. In 1843, there was a good deal of excitement about the slavery question. I was charged by A. F. Pratt and others with running off a slave girl to Canada. On account of the fugitive-slave law, I would not own it nor have much to say to them or anybody else; but did say to Abolition friends that I was down to Canada on business and saw her across the river in Canada. But since that law was abolished, I can talk about it.

I was married in 1844. About this time my health failed. Lifting in the quarry brought on a kidney complaint, and we then knew nothing of the value of the mineral springs, and I had to give up hard work. In the spring of 1848, I moved up to Omro, Winnebago County, with my family, thinking that I could make something claiming Government land, which I did. I made a claim and stayed on it two or three months, then sold it and cleared a good yoke of oxen. I was watching to take advantage of the pending treaty with the Menomonee Indians, which took place the 18th of October or November. I moved my family the next day onto a claim I had looked out before, it being timber and heavy openings. I was the first family on the Menomonee lands, and my third child the first white child born on those lands. I stayed on my

claim about two years. My health grew worse, and finally there came a Mr. Arnold from Wauwatosa to whom I sold my claim for \$600. I moved back to Waukesha (the name was changed in 1846 or 1847) late in the fall of 1850, and they were just finishing the old railroad depot, preparatory to having a railroad run through the place, which they accomplished the next spring (1851). My health was so poor for twelve or thirteen years that I could scarcely do anything. I have had my "ups" and "downs;" have been pretty well off several times, but circumstances change so that I cannot boast of having too much at present, though I have lived in Waukesha long enough to have become the richest man in it. Had I known of the virtues of our mineral water thirty-four years ago, I should have been in different circumstances.

BY MRS. TALBOT C. DOUSMAN, 1880.

Early in February, 1838, my father left Ohio, where he had been an unsuccessful merchant, for the West. Having purchased six yokes of oxen, as nearly matched as possible, each with bright buttons on his horns, and, having found a tall, raw-boned Yankee who could gee! whoa! haw! sonorously, and could cover his six yokes with his tremendous gad, he fitted out two long wagons with covers, filled them with such supplies as he had in store and as he knew would be needed in a new country, and driving the horses himself, started his caravan. It was a caravan indeed, and created as much excitement as any menagerie of the present day, as he halted in the middle of Superior street, Cleveland, for the admiring crowds to make an examination. He reached Town 7, Range 18, now Delafield, after a journey of four or five weeks; made his claim and built his log cabin, in time to put in quite a crop that spring, doing his own cooking for himself and men, as all the female members of the family remained for navigation to open. We, the portion of the family left behind, landed in Milwaukee on the evening of the 14th of June, 1838, after a journey of eight days, by steam, from Cleveland (one can go half around the world in that time now). Our first impressions of Milwaukee were not very favorable, as the hilarity of song-singing and story-telling, with its usual accompaniments, kept up till a very late hour, was unusual to us. But the next morning was bright and beautiful, and all gloomy forebodings were dispelled on seeing a young man approaching the hotel with his hands filled with wild flowers. Some were such as we had cultivated with the greatest care in the East; others, again, we had never seen, but all were indicative of something more than the roughness of border-life generally. A message was sent to my father, and, three days afterward, we started for our home in the woods. When about ten miles out, we stopped for dinner, and, dismounting from our high perch on the lumber-wagon, filled with luggage, my sister entered a famous eating-house (quite as much so then as the Plankinton is now), where she found the good lady of the house preparing dinner before a huge fireplace. The dinner, consisting of the traditional fried pork and potatoes and saleratus biscuit, with a cup of tea, and the table set in the overheated room, was a sorry damper to her spirits, and she came out to the wagon, with the tears streaming down her face, exclaiming: "Father! have we got to live in *such* a house?"—a hard question for one of his sensitive spirit. But I, who was still chatting with him, laughingly asked if she expected to dwell in "marble halls" in the wilderness. She knew very little of log houses, though she "came to" afterward.

Among the many curious things of pioneer housekeeping, one of our neighbors used to renew her floor every week by turning the boards over, as each one made an individual cradle of itself. By so doing, and putting her carpet over them, the floor was soon brought into shape again.

After dinner, we proceeded on our way again through the heavy timber. The road not being cut through, it seemed as if we had to wind twice around every other tree till we reached Poplar Creek, about sixteen miles from Milwaukee, when we came upon the oak openings; but, to describe the beautiful scenes surpasses my pen. They had the appearance of a large park, the verdure being very dense, filled with most lovely flowers, which stood as high as the horses' knees, while the trees were about the size and appeared to be about as near like each other as the very old orchards at the East. Invariably we found ourselves looking about for the house belonging to these beautiful grounds; but it was emphatically "God's country," without sight

or sound of human habitation, from the house where we dined till we reached our home in the woods, thirty miles from Milwaukee. Such a house of spare rooms! entirely spare of furniture for four weeks, for we were waiting for it to come by sailing vessel. We managed to sit on trunks and benches, and sleep on prairie hay. Fortunately, by mistake, we had brought a trunk of bed-linen instead of clothing, and it being summer-time, our shawls made good blankets. My father's bachelor's-hall furniture consisted of a good cooking-stove and its belongings; six white bowls for tea and coffee; six white plates, such as are used for baking pies; and, for an extra plate for bread, a clean chip was substituted, and for butter, a like chip, covered with foolscap paper bent to hold it, was used, and so on. We thought ourselves quite comfortable, even with these inconveniences. People scarcely know with how little they can get along until compelled to; but it teaches ingenuity, as "necessity is the mother of invention." All this time, we were having company, scarcely ever taking a meal entirely alone, as people prospecting through the country always sought the habitations, if there were any.

The business of the day usually began with a general hunt for the cattle, as they strayed off for feed, and, it being the breaking season, to find them was imperative. And a genuine breaking season it was, for it seemed as often as every three days the plow or some of its belongings broke down, and we had to go ten miles to a blacksmith. On one of these trips, myself and sister made our first visit to Prairieville, spending the day at Deacon Love's, near where the State Reform School now stands.

There was at that time no road, except such as each one made for himself, which was an easy thing to do, only avoiding the miry ground, which was indicated by an absence of the rosin-weed; wherever that grew it was safe to travel. Our home was very pleasantly situated, on the bank of a little stream called Checoopenon, whose waters were clear and beautiful, and plentiful withal. Father had drawn the trees, which had been felled in the clearing, and turned their tops toward the house, thus forming a beautiful hedge, also a protection from wind and sun. To make it very romantic, we sometimes had most delightful serenades from behind this beautiful screen, having two gentlemen friends who played the flute very finely. Notwithstanding all that was done for our pleasure, many were the tears we shed. The summer wore on. Mr. Hosmer married and brought his wife within a mile of us; and Mr. Edgerton went East in the fall and brought a wife to his home, three miles west. Mr. Flusky and family were one mile east, and Mr. Dousman spent most of the winter at his farm, three miles southwest of us. This little neighborhood at that time was known as Genesee, and its inhabitants were all originally from New York State, except Mr. Dousman. We soon became acquainted and very sociable, so that during the winter we managed to meet two or three times a week, at one house or the other, to spend the evening. We made three miles and longer journeys with oxen, because they were more easily cared for after reaching home, and they trotted off nearly as briskly as horses.

For a long time our nearest post-office was Milwaukee; but nearly every week some one had occasion to go to town, and generally brought the mail for the whole neighborhood. We then thought it a great privilege to get our mail once a week; but now we feel greatly abused without at least a mail once or twice a day, or oftener.

All those old-time inconveniences taught us to appreciate friends, and I used to feel it my bounden duty to call upon all who came within ten miles of me, if I heard of their coming. The social status of the country warrants me in assuring you that, in the course of three or four years, we could assemble a goodly company of as high culture as you could wish to find anywhere, East or West, and in that early time all who were here were cultivated people.

As to the religious condition of the people, we were told by one elderly lady that the religion of the East didn't bear transportation; that they considered themselves quite pious at home; but here she hardly knew when Sunday came except by hearing a gun go off a little more frequently, and all the boys wanting clean shirts. In 1840, the Episcopal clergyman of Milwaukee, the Rev. Mr. Hull, used to come out and preach in the different houses in the neighborhood and at Oconomowoc, and in 1842 the Revs. Breck, Adams and Hobart com-

menced their mission at Nashotah. They circulated through the country, preaching to all deluded souls who needed their ministrations, enduring privations and hardships almost equal to those of the martyrs of old.

The first picnic in the town occurred on the 29th of June, 1839. The second day after my marriage, Mrs. Edgerton invited the wedding guests to join her in a picnic, and to spend the evening at her house afterward. We went about four miles south of where we now live, on buckboards, through the woods without roads, fording the streams, the gentlemen with their rifles shooting pigeons, and the ladies picking strawberries, till we found a beautiful spot near a spring, where we spread our cloth. Toasts were drunk, speeches made, and guns were fired and a good time had generally. This anniversary was observed for some years afterward. One of the first Fourth of July celebrations was a picnic at Nashotah. Mr. Breck invited all to whom he ministered, and the different congregations assembled from far and near and had a glorious time.

To show that in those days all social formalities were ignored, one of our neighbors had business at Prairieville, and having only oxen as a means of locomotion, was obliged to be gone some days. The wife must go with him or be left alone. Accordingly the wife and child occupied the front of the wagon, the family of pigs the back part, and the cow was tied behind—for it would not do to leave anything alone—and so they went visiting. But ourselves were not exempt from *contretemps*. One day in the fall, my father and his men had been all day carrying potatoes into the cellar, to reach which the whole length of the sitting-room had to be traversed, and of course no little dirt was brought with them. Just before finishing, a carriage drove up with a bridal party from Milwaukee, on their way to Nashotah to be married. They were so late, the night so dark, and the road so difficult to find, my father would not permit them to attempt the drive, but jumped on his horse and rode the distance of seven miles for Mr. Breck to come *there* and perform the ceremony. It was rather a poser to make the room in order for a high-toned wedding under the circumstances, but nimble feet and ready hands soon brought order out of chaos. I can fully appreciate the fact now, and could then, that the odor of freshly gathered potatoes was not quite as agreeable as the perfume of the flowers that adorn such occasions at the present time. However, those are all dearly remembered experiences, and I would not strike them from the pages of the past if I could.

BY ALMON WELCH, 1880.

I started with team by land from Cortland Village, N. Y., accompanied by Asa A. Flint, his mother and sisters, and, without change of team, reached Oak Creek, Wis., July 9, 1837, after a journey of six weeks. Mr. Flint remained at Oak Creek while I started for my destination. I struck a camp of 300 Indians on the east side of Big Muskego Lake, and marched on the regular trail right through the camp. When at the outlet of Little Muskego Lake, I inquired of a lone settler named Parker for Isaac Flint or N. K. Smith. Mr. Parker told me to keep the trail, which I did, reaching N. K. Smith's in safety. A. A. Flint soon followed with his family, which was the fourth family in the town of Vernon, N. K. Smith, Joel Day and Gaius Munger preceeding him with their families. Alvah Plumb soon followed with his family, but all other settlers in the town were bachelors. H. Vail got our first Sunday dinner by carrying a pan of flour one-half mile to a creek to wet and mix it, and, when baked with bacon, made a well-relished dinner. Mr. Vail settled on the farm now owned by Amos Goff. The happiest days of my life were those when I could take enough "grub" to last a week, and with my ax go into the woods rail-splitting, sleeping on logs at night, lulled by the howling of the wolves. My first crop of corn, oats, wheat and potatoes was raised in 1838. I buried the potatoes in the ground, as it was impossible to sell or give them away, although the seed had cost an outrageously high price only the spring before. Mr. Smith being a great bee-hunter, he and I captured forty swarms of bees in the fall of 1839, selling the honey in Milwaukee for \$60, and with my share of the proceeds, together with my summer's wages at \$10 per month, paid for my claim. Mr. Vail left his crop in the fall of 1839 and went to Indiana, but never returned.

having died there; and his corn, stored in the loft of my house, was all carried away by the rats, mice and squirrels. During a portion of 1837, Leonard Martin and I kept "old bach" in his cabin. That winter, I split rails to fence the farms of Leonard Martin, Almon Osborn and L. Whipple. Right here I want it distinctly understood that I did not give up to "Old Abe" or any other man in splitting rails or other hard work. I chopped and split 150 every day; where the timber was chopped, I split 300 per day. In eight days I split 3,000 rails for Gaius Munger. The first day I traveled thirteen miles and split \$39. I received 50 cents per 100. Leonard Martin and I were then making our home at N. K. Smith's. In those days there was an abundance of wild fruit, such as raspberries, blackberries, strawberries, plums, crab-apples, etc., which grew in open places in the woods. On Sundays, Mrs. Smith would send us for berries for pies, and then, to pay for this work, she would send us a pie once in awhile, which we would cut into four pieces. Each ate a piece for supper and left two pieces for breakfast. Mr. Martin would say, "Now, Al, take your choice, but don't take the largest piece." We had to go to Milwaukee for our provisions, which were nearly all shipped from Buffalo. It took three days to make the trip to Milwaukee with two yokes of cattle to draw two barrels of flour; and at night we had to sleep under our wagons. We paid \$16 per barrel for flour and \$32 for pork. In 1839, I worked for N. K. Smith. When we had cut all of his grain but five acres, Mr. Munger wanted his cradle, which we had borrowed. Mr. Smith says to me: "Al, for your stint to-day, you may cut that wheat and take the cradle home." After breakfast, Mr. Smith helped me to grind the scythe, and I went to my work, which I had finished at 3 o'clock; then, shouldering the cradle, carried it to Mr. Munger's, seven miles distant, arriving there before sunset; then went back to Mr. Flint's, which was three miles more. That would be a good day's work for the soft-soldered youngsters of to-day.

The wolves, deer, wild cat and lynx were plenty at that time. In the fall of 1839, Mr. Smith and I caught eleven prairie wolves in a trap. The same fall, we went to a neighbor's to raise a barn, and on our way home we were followed by two gray wolves to the Fox River, a distance of three miles. Many a night I have been followed home by the wolves. The way I knew was by their tracks which I found the next morning in the light fall of snow, even on the doorstep and along the trail. I never was startled by them. They sometimes killed calves and yearlings, but seldom attacked man. They would go in droves and surround a deer, then set up a terrible pow-wow, frightening the poor animal so it could not stir, and then they would kill it. I found one which they had killed in Mr. Martin's wheatfield, but it had been dead too long to be fit for eating.

When I first came to Waukesha County, Leonard Martin, Lazarus Whipple, Nelson K. Smith, A. A. Flint and Isaac Flint, each got a yoke of oxen, and we went to breaking; it required from four to six yokes of oxen to break the ground. We commenced the 1st of May, and finished about the 4th of July. I helped break, fence and improve their places before I could do much on mine, for I had to earn money to pay for it. We had no pastures fenced, and had to turn the oxen out at night to go where they pleased, and then get up the next morning at 4 o'clock, and start out in search of them, through the brush, woods and dew. After searching for five minutes, we would be as wet from head to foot as a drowned rat. It would take from 9 to 12 o'clock to get the teams together and ready for the plow, after which we would get our "grub," and go to our work. As we were keeping "bach," we could not spend time to cook, or wash dishes through the day, so we would cook each night enough to last through the day. We ate our meals and turned our plates over, so the mice should not muss them, until we could get time to wash them, which would sometimes not be in four or five days. Many a time I have gone to bed without my supper, because I was so tired I could not cook it. In the fall of 1838, Mr. Ellis and I commenced to dig a well, for there was no living water on our claim, and we had to carry water one and one-half miles. After digging down twenty feet, we came to a hardpan, which was nearly as hard as a rock. We worked at it for eight days, working until 6 o'clock at night, after which, each day, we had to go seven miles and back to a place

called Wedge's Mill, to a blacksmith named Hugh McIntyre, to get our pick-axes sharpened, for which we paid 50 cents. We could not stand this, so Mr. Ellis left for Indiana, and that was the last I ever saw of him. I held on to that claim of a quarter-section, and bought it at the land sale; ten days after, I sold it to Asher Stillwell for \$500. I was then bound to have a farm with living water on it. I then went to New York State, and, in the spring, I came back and bought 160 acres of land, a yoke of oxen, two cows and calves, built a house and broke seven acres of land. I was married August 12, 1840, and went to living on my own account. The fall of 1840, I sowed five acres of winter wheat, which yielded forty bushels per acre. I sold wheat in Milwaukee as soon as there was a market established in that place. We raised winter wheat, and without any failures, for ten years; but soon after it became unsafe to sow winter wheat, for it was winter-killed; then we began raising spring wheat. Now, 1880, winter wheat seems to be a safe crop again. I hardly know just where to leave off. I will stop right here, without looking further for a stopping place. Those who read this in print cannot see how difficult it is for my stiffened old hands to write as much as I have; and, if they had been compelled to begin the foundations of the present rich, beautiful and prosperous county of Waukesha, in which one house incloses more comforts and luxuries than all its inhabitants owned in those early days, their bones would be stiff too; their sentences angular, and their grammar questionable. However, in looking over the fields of the past, I can see many large patches of roses, and long, long paths rich with the sweetest pleasures.

As soon as it was known that we were moved out in the country, men kept coming, so that our little log house was always full. The four weeks that the three families of us lived all together in one house, our floor was strewn with men (those who came to look for land and make claims) every night but one, and that night we felt rather lonely. There was only one room that we could use, for the upper floor was only laid half-way over, and no stairs to go above. So we had to crowd ourselves, fourteen of us, into one end of the room, which was partitioned off between the beds with quilts, to make room in the other end for company. Some of them brought their own provisions and we prepared it for them, and some of them boarded with us; but they all had to lie on the floor, as we had no bedsteads besides what we used ourselves, and those were home-made, and roughly made at that. As much crowded as we were, we were only too glad to divide our small room, and accommodate, as well as it was possible in our poor way, for we wanted neighbors as well as they wanted homes; and, if we were somewhat selfish, we had a desire to be kind and neighborly.

There was such a body of snow on the ground that there was good sleighing nearly half of the month of March, which made it very convenient for our men to get hay and grain and such things as they had to have, for they had to go to Milwaukee for everything needed, except wood and water. They made hay and stacked it the previous summer, when they went to make their claims, hoping to have an abundance in the spring. Knowing that the Indians were in the habit of setting fire to burn over prairies, to make clear their hunting-grounds from grass and herbage, they thought best to set fire themselves and burn around their stacks; but they had the misfortune to lose all of their hay, seven large stacks, by the shifting of the wind. So they had to buy hay in Milwaukee and draw it home, seventeen miles, to the place that has been known for many years as the town of Lisbon. The last time they went to town while the sleighing lasted was the last week in March. The snow was wasting fast; but as they were wanting more corn, they thought they must fetch it before the snow was gone.

As they were very busy with other work, our neighbor, who lived in the house with us; took a yoke of oxen and sled and went alone after the corn. He was not much used to driving a team, and my husband told him that he would go as far as the Menomonee River the next day, to meet him and help him if he needed help. Fearing the ice might not be safe to cross with a load, he started the next morning in good time, so as to be sure to meet him at the river; but when he got there he could see nothing of the team, so he walked along three or four miles farther before he met him. Then he took the ox whip himself and hurried the team along as fast as possible, for he saw that there were cracks in the ice when he crossed the river, and water

above the ice, half-way to his boot-tops; and when they got back there the water was deeper and the cracks in the ice wider. Mr. Rolph, our neighbor that had been after the corn, did not know what to do; but my husband told him that they must carry the corn across on their shoulders, a bag at a time, and they carried it across in that way, then took the sled and drew that across by hand, and then unyoked the oxen and drove one over alone; then they went back for the other, and when they had driven him about half-way over, the ice broke and the ox fell into the river all over but his head. They caught hold of his horns and tried to pull him out, but could not, and the current of water drew him under the ice. They then cut away the ice with an ax, hoping that he might rise so they could help him out. But he did not, and when they found that he was still going under they threw themselves down on the ice, in the water, and caught the ox by the tail and pulled him back, until he could get his head above the water. Then he could help himself some, and, with their help, he scrambled up on the ice and got over on the other side, with his mate. He came near being drowned, and the men, trying to save his life, came very near drowning themselves. Every thread of their clothing was as wet as water could make it.

There they were, as much as nine miles from home, or from any house, and they were about tired out, and it was almost night. It was growing cold and beginning to freeze, but they loaded their corn again and drove on until they came within a mile and a half of the Fox River. By that time, it was getting too dark to drive much farther, and their clothing was frozen, and there appeared to be no alternative. But they must stop there for the night and perhaps freeze to death before morning. They cut some dry wood and made a large fire, for they had matches which did not happen to get wet in the box. They stood by the fire and kept from freezing; but after a while, Mr. Rolph felt so tired and sleepy that he would lie down and go to sleep. My husband did not dare to, for he thought that if he did they would both freeze to death. So he kept stirring around and kept up a large fire, disturbed Mr. Rolph every few minutes, trying to wake him for fear that he would freeze to death. After awhile he succeeded in arousing him so that he got up and stirred himself about and kept awake, and when daylight came they started for home. But when they came to the Fox River, and crossed, and were going up the bank, their load of corn slipped from the sled and all went into the water, and they were obliged to wade in and get it, carry it out a bag at a time, and load it again, making their garments dripping wet as they were the day before, and in that plight had to drive home, where they arrived about eight o'clock, tired, cold and hungry, or at least faint and about sick. When they had taken a warm bath and put on dry garments, and had taken some warm food and coffee, and had lain in bed a few hours, they felt better, got up and went to work. They built a scaffold of the boards which they had sawed by hand, and spread the corn on there, taking it out in the morning and into the house at night, until it was dry. They concluded they had earned the corn, with their troubles, besides the two dollars and a half a bushel they paid for it.

As for fruit, it was but little that we used in those days, except wild plums and crab-apples, and to make them palatable and fit for use took as much sugar and a little more than we were really able to buy. We had to study and learn economy, and we found it as economical to buy dried fruit, and sugar to sweeten it, as to use wild fruit that we could get plenty of in the season without buying. Our men had been hoping to be able to raise some corn, oats, buckwheat and potatoes, but alas! their expectations failed, and by the time they were ready to commence breaking the ground, their oxen were nearly all of them taken sick, and were not able to work, until it was too late to plow and sow and expect a crop of anything. Then it began to look as if we must see hard times; for we should have everything to buy for another year. How we should be able to buy what we should need, we did not know, for our money was nearly gone. Our neighbors were very kind as a general thing, and willing to accommodate each other by lending. We all found it convenient and necessary to borrow at times, and if we had not been kind and neighborly to each other, we should have fared harder than we did. We have had a barrel of flour brought in sometimes, and have lent it all out in one day, except what we used

for baking. We never suffered on account of it, for if it did not all come back before we needed it, we would borrow of some one else. Sometimes when we had a barrel brought in, we have had to pay out the half of it, where we had borrowed, and just the same with other things.

While the oxen were unable to work that spring (1837), my husband dug some ground with a spade to make a small garden, and hearing that a schooner loaded with potatoes had come to Milwaukee, he walked in, bought half a bushel, paid \$2.50 for them, and brought them home on his back, eighteen miles. He went in one day, and came back the next, and was about tired out. He said it seemed as if he had come to Wisconsin to be a pack-horse, or to take the place of one. Some people in these times will scarcely believe that potatoes were ever sold at \$5 a bushel in Wisconsin. But it was so at that time, and the merchant would, and did extort just such exorbitant prices for everything they knew the settlers most needed. But no one would buy more than one bushel of potatoes at \$5 a bushel, and some would buy only a peck.

It was with potatoes the same as with grain of all kinds. By the time that farmers could raise grain and have any to sell, it would fetch scarcely enough to pay for the time spent to get it ready for sale and taking it to market. In many cases it did not come anywhere near paying them, but they were obliged to put up with it, for the merchants had their own way, and paid their own price for produce. The potatoes were planted, except a meal or two, which we could not forego the pleasure of eating, having been without any vegetables for nearly three months, and they were quite a luxury at the time, dearly bought and far fetched.

We got through the winter of 1837-38 better than we expected, not being able to raise anything of any account except on our poor little gardens, but managed to get bread and meat, and other groceries. Toward spring, Mr. Elliott and my husband had a chance to take a job of cutting logs and splitting rails. They had to go about nine miles into the timber towards Milwaukee, and take their provision with them for the week, or from Monday morning till Saturday night. We cooked their provision at home, except their tea and coffee, which they had with two young men that lived in a cabin and cooked for themselves, and who very kindly gave them such accommodation as they had. They cut and split the rails for fifty cents a hundred, and had to take their pay at a provision store in Milwaukee, and had to go or send by some one else, to get it. But there were five weeks in succession during the time they were at their job, that the road was so bad that teams could scarcely get through to Milwaukee. When they did, they could not bring much at a load. Our two men had to quit their work every Friday afternoon, soon enough to walk into Milwaukee, and start for home as early as they could in the morning, with as much flour and meat (with a few other necessary things) as they could carry eighteen miles to our place and a mile farther to Mr. Elliott's. It would be night, and they would be about tired out, and while they were resting on Sunday we had to cook their week's rations for them to take back with them when they went to their work on Monday. What was worse, and very mortifying to their feelings, one of those five times that they had to back their loads home, there was no provision for them. The man that they worked for was gone from home, and there was nothing for them in store. They were told by the clerk that they were expecting a vessel to come in that day, but it had not got in yet. It was loaded with provisions, and they thought that it would be in that night or early in the morning, so that they could have something to carry home with them. But the morning came and there was no vessel in sight, and they waited as long as they thought it would do to wait, and have time to get home that night, as it was Saturday, and they expected we should be out of the requisite for cooking at home, and supposed our neighbors were nearly, if not quite, as short of the needful as we were. For that reason they did not like to go home without anything, and risk the chance of borrowing, for fear of distressing the neighbors, knowing that they would lend as long as they had enough of anything to divide. They knew not what to do. They had not money to go to any other store, and they could not get an order, as the head man was not at home. While they were talking, a friend came to them, and to him they told their dilemma, and he advised them to go to the store of Messrs. Brown & Miller, where there was plenty of provision in store for any one that needed it and had no money to buy. They thought that

looked too much like begging. But he persuaded them, and told them that it was no disgrace, and they would never be thought the less of for it. So they took his advice and the friend went with them, stated the case to those gentlemen, and they told them to come forward and have what they wanted of such as they had in store, and welcome; they expressed their thankfulness, but told them that they did not come to beg, and would pay for what they got as soon as they could. They said we shall not take pay if you do bring it; our instructions are to give to those that need, and not to sell. When you are able, if you see an opportunity to assist others, do so; that is all the pay that will ever be required of you. Now, would you like to have some garden seeds, said they; and they gave them of all kinds in their store. They came home in the evening very tired, and ready for their supper, which I had ready and waiting for them. Tired as they were, they told me of their trial and disappointment, and the kindness they had received; that they did not expect to find any bread in either of their houses, until we could bake something from the flour that they brought. Then I had to tell them how and in what way I had been supplied. Three of our neighbors had joined teams, and had been to town, with only one wagon, and bought some flour and meat and a few groceries, and by that means I had been supplied, for they returned things that we had lent to them.

In my new home I undertook to do all my work—washing, ironing and sewing, besides my every-day work, taking care of my three children (the youngest then a year and a half old), and teaching three hours each half-day, according to custom, and not take a day except each alternate Saturday. I soon found that I could not manage both my school and my work without taking one day out of each week, so I concluded to take Monday, do my washing, and as much other necessary work as I could in a day, and teach the remaining five days. Not having a very strong constitution, my duties were rather severe on me during the week, for both body and mind: yet I enjoyed doing duty, because I was anxious to play my part well in doing what I hoped would be to the advantage of others as well as ourselves.

I suppose that many young mothers and housekeepers of the present time would marvel at the idea of a woman undertaking to do her own work for a family of six, and, at the same time, teach a school of twenty scholars in the same room, which was only twelve by fourteen feet in size. But as necessity was then, and had been, and perhaps always will be, the mother of many inventions, we found that by patience and perseverance it could be done, at least for a few months. At the end of four months, I found it necessary to give up my school, so as to take time to do my fall work and prepare my family for the coming winter. We had no more school for a year, except on Sundays. We opened again, after a short time, the door of our little cabin for Sunday school, in which little children were taught to read and spell, and older ones that could read learned Testament lessons, and repeated to teachers who gave them instructions according to their ability. With the addition of prayers and singing, the exercises of from two to three hours passed very pleasantly, and, as we then thought, profitably to ourselves and our children.

As soon as our corn was glazed and partially hardened, that fall of 1838, so that we could finish drying it by laying it in the sun in the daytime, and in the house at night, we picked off a little at a time and dried it in that way, and had some ground every day for two months, by hand, in a coffee-mill, except on Sunday. It was such slow work to grind by hand that we could not get any more ahead than would do for Sunday, and with the meal thus prepared we made all of our bread (or johnnycake) for two or three weeks; then the buckwheat was ripened, so that some of that could be thrashed, and we dried some of that in the same way as we did the corn, and had it ground in the same way, and had to sift it instead of having it bolted, and with it we made something we called buckwheat cakes. Although not as fine and nice as we had been accustomed to using, yet it made a very good change under the circumstances. We did not expect to grind our flour and meal by hand as long as two months, when we commenced the arduous task. There was a mill in process of building at the place now known as Wauwatosa, but as the mill was not ready to commence operations by the expected time—although the task of grinding by hand was very tedious—we concluded to persevere and not give up until the mill

should be in working order, which was two months instead of two weeks. Our indignation had become so thoroughly aroused, in consequence of being obliged to pay such exorbitant prices for our bread material as well as everything else that we had to buy of the Milwaukee dealers, that we were not willing to humor them any more than we were really obliged to. Mr. George Elliott, of Lisbon, Waukesha County, can testify concerning the grinding by hand for two months, nearly all of the material which we used for bread and cakes, for he was our little faithful home miller, and a younger brother of his was the miller for his father's family, and Mr. Smith's young boys did the grinding for his family. One of them is still living, and well remembers the time and circumstance. There were several of our neighbors that shared in the work and trial of grinding their own breadstuff by hand. I do not remember just how many, but there were six of us, I can remember, who did do it for two months.

Perhaps some one, or more, who never saw a wooden kettle, and it may be never heard of one of that kind before, would like to know how it was made. Our wooden kettle was eighteen inches wide and about three feet long. The wood part of it was made of plank, and nailed together in the form of a box. This was bottomed with sheet-iron wide and long enough to turn over on the ends and sides, so that the fire should not touch the wood. Then it was set over a stone fireplace, which was built sufficiently long and wide to allow the box to be bedded all around with stone and mortar to protect the wood. A capacious fireplace underneath with a chimney at the extremity, and a wooden cover to the kettle, completed the concern. Although it was a rude, rustic-looking article, and was the object and occasion of much laughter, the wooden kettle was, nevertheless, found to be so useful and convenient under the circumstances in which we were placed in those early days, that it came to be an indispensable article until such times as we could afford to buy a cauldron. I have thought of late that if a specimen of those home-made kettles should be sent to the Centennial, it might excite as much curiosity as many things that will be sent there.

After we had the Sunday-school established in our house, we began to hold religious meetings, and although we had no minister to preach to us, we met once in two weeks, sometimes at the house of one neighbor and sometimes at another, for a few months. Then we got out of our small cabin into a larger and more comfortable one, and as we happened to have a more commodious room, the meetings were held there until the district schoolhouse was built, which was more than two years after.

One of our neighbors, a well disposed and religious man, took the lead in our religious services, except occasionally some minister would chance to come into the neighborhood, or pass through the little settlement, stopping over night. As soon as it was known that there was a minister in the place, who would stay long enough for the people to get word of it, it mattered not whether he was a Baptist, Methodist, Presbyterian, Congregationalist or Episcopalian, every one who could possibly leave home—even if they had to appear in their every-day clothing, which was frequently the case—would lay aside their pride, and come together to unite in the services and listen to the sermon, whether it was Sunday or a week day, and all, or nearly all, seemed to enjoy it as a rare treat. When we had no minister, our religious services were conducted in the same manner as when we had one—by praying, Bible reading, singing and the reading of a sermon. We always had two sermons on Sunday, the first commencing at half-past 10 and the second at half-past 1, or sometimes 2 o'clock, and the Sunday school between those two services, and a prayer meeting at 5 o'clock.

Thus our time was taken up on Sunday. It was all that I could do to get my necessary work done, myself and family in readiness to attend worship, and have seats placed, before some of the people would begin to come in.

It has been put in print that the first sermon preached, in Lisbon was by a Mr. Frink, in 1838, but that was a mistake. Mr. Lucius Bottsford and Miss Lucinda Denny were the first couple married in Lisbon. The ceremony was performed by Elder Griffin, at the residence of Mr. Jonathan Dougherty, Sr., on the 3d of June, 1839, after the preaching of the first sermon in the town of Lisbon. In the month of August following, there was another sermon preached in

the same house by the Rev. Mr. Ordway, Congregationalist. Then in the following winter, about the middle of January, 1840, came the Rev. Mr. Frink (Methodist), and preached the first sermon that he preached in our place, in our house. Our cabin was filled with people that had come with their oxen and sleds, some of them from five miles distant in different directions. It was good sleighing (or sledding, as they called it), but it was very cold, and they had to sit down among the straw or marsh hay, which was plentifully laid in the sled box. They had no fine, fleet horses and gay looking pleasure sleighs out in country places in those days, but had to be contented and satisfied to be drawn on the same sled and by the same *horned-horses* (oxen I mean) that drew their wood, hay and grain. There was no ringing of the musical sleigh bells, such as we had been in the habit of hearing, to cheer and enliven them on the long, slow, cold ride; yet they were very cheerful and sang hymns as they rode along, making the air and the woods ring with the music of their voices, and they seemed as eager to hear what the minister had to say to them as hungry people would be to go to a feast.

In the month of March came Elder Wheelock, a Methodist preacher. He came two or three evenings for a time, and then he was hired to come and preach once in two weeks, on Sunday, for a year. He was the first minister that was hired in Lisbon. He was more than sixty years of age, and he used to walk fourteen miles every other Saturday, getting to our house in the afternoon, perform his duties on Sunday, and walk home on Monday. Sometimes, however, he might get a ride a part of the way, but not frequently, for he did not own a horse, neither was there one in our immediate neighborhood. His salary was the small sum of eighty dollars—small enough, certainly. To some people at the present time it would not seem worth mentioning, and that the people were thoughtless and penurious not to allow him a larger sum for coming so far to serve them; yet that small sum was all they were able to pay. The reverend father was satisfied, for he knew just how we were all situated. It was, perhaps, well for us in many respects that we lived in those days, and shared with our neighbors and friends the trials and hardships of new country life, as well as the joys and pleasures, for there certainly was enjoyment even then. It was as much of a pleasure to visit our neighbors and friends who were not related to us, and to receive visits from them, as it had been to visit and receive visits from our own relatives when we had lived near and among them. In the earliest part of our new country experience we did not invite large parties, for the want of sufficient room and other conveniences to make it pleasant and comfortable for a large party of friends. But whenever neighbors could make it convenient to visit each other they were cordially welcomed, treated kindly, and made as comfortable as circumstances would permit. Such traits were characteristic of the people of our early settlement. There was no dazzling splendor in those days, in the way of furniture, dress, ornaments, or the viands of the table. No one tried to outdo another. They could not if they would, but they did not show any such inclination. One of those days, when I was alone with my children I took my water pail in haste to go about twenty-five rods to the stream for water, and when about three rods from the door, I saw a wolf coming up the path only a few rods from me, as if coming to meet me. The wolf at the same time saw me, and we both halted suddenly and stared each other in the face for some minutes, but presently, I bethought myself that I had a tin pail and dipper in my hand. Then with the dipper I beat vehemently against the pail, and he turned and started off a few steps, then slackened his pace and looked back at me again, and as I had no other means of frightening him, kept beating the pail with the dipper, and after a little time he turned and left the path. It was not until he was fairly out of sight that I ventured to go for the water.

BY HAMILTON NELSON, 1880.

Although now a resident of Rock County (at Beloit), I was for many years one of the pioneers of the county of Waukesha. The name never fails to bring to mind many pleasant recollections, and the images of scores of true friends. The history of themselves and the county deserve to be indelibly recorded.

I landed in Milwaukee June 1, 1836; located in Pewaukee, Waukesha County, on the

farm now owned by A. V. B. Dey. I was married August 12, 1838, at the residence of Deacon Robert Love, whose house stood about four rods east of what is now Bethesda Springs. There were present Mr. and Mrs. Robert Love and their five children—Jerome, Sarah, Mary, Adelaide and Martha—Mr. and Mrs. Morriss Barnett, now living in Neenah, Wis., and, perhaps, others. The ceremony was performed by John Manderville, for the reason that our minister—Rev. Mr. Ordway—had his license packed among his goods, which were on their way up the lakes. I was done up good and strong, so the knot has held fast nearly forty-two years. I think mine was the first marriage* in what is now Waukesha County. There were no cards, no presents; but Deacon Love took his pitcher and can to his spring, now Bethesda—which he always thought so much of—and passed the spring water around in the place of wine. The next morning he harnessed his horses to his lumber wagon and landed us at our door, in quite as good style as Gov. Dodge was escorted from the beach of Lake Michigan up to the Milwaukee House (which was upon a load of trunks) and he rode backward, to assume the Governorship of the Territory of Wisconsin.

In addition to being a party to the first marriage, I claim to have erected in Waukesha County the first threshing machine built in the State of Wisconsin.

BY T. S. REDFORD, MAY, 1880.

I was born in the year 1818, in Genesee County, N. Y.; my father and mother moved from that county and located in Cattaraugus County when I was twelve years old, and then in 1836, I started West to find a home; I traveled from Cattaraugus County through Pennsylvania, Ohio, Michigan and Illinois, and reached Milwaukee the 23d of April, 1836. During my journey, which was on foot, I carried a valise that weighed twenty-five pounds on my back. Some days I traveled in Michigan all day, and did not find more than two or three houses, and poor ones at that; I often got tired and homesick, but kept on till I found Wisconsin. When I came to Milwaukee, there were but very few inhabitants in the place; no schools, no churches, in fact, nothing but a swamp of tamarack, with but few settlers in the town. After taking a rest, I fell in with a party of surveyors that were going out, and I went with them. On the 15th of May, 1836, I located in the town of Lisbon, on the southeast quarter of Section 25. To-day makes me forty-four years the owner of the same, it being the first claim made in the town. When I look back on the past, and see such a city as Milwaukee, with its schools, churches, hotels and warehouses, together with residences, banks, and the Chamber of Commerce, and railroads and telegraph lines leading in every direction, it often seems to me that it is not possible I have lived to see all the vast improvements that have taken place in this State within the space of forty-four years. When I took up my claim, the land from Lake Michigan to the Mississippi was nearly all in a state of nature, and to-day it is all under a state of cultivation, dotted over with farmhouses and fine villages, with schools and churches ranking second to those of no State in the Union. I am very sorry to say that most all of my old neighbors have passed away. There are but very few left to tell the hardships of settling a new country, without railroads or anything but an ox team and wagon to carry freight with through swamps and over corduroy roads. Some people complain of the roads at the present day; but if some of the old pioneers could come back on earth and see the roads at the present time, they would not find any fault. When the town of Lisbon was first settled, it usually took two days to make the trip to Milwaukee, a distance of sixteen miles, over logs and through the mud, fording streams and camping out one night on the road. There were no horses, no buggies, nothing but the faithful ox. We may all thank God for the ox. If it had not been for him I do not know what we should have done. Provisions were high, and no grain had been raised to feed the horse; but the ox was worked all day, then turned loose to pick his own food at night. There was plenty of wild feed through the summer, and during the winter we fed marsh hay to our stock. We generally thought it good living for our cattle, taking into consideration the way we used to live ourselves.

* See chapter on "First Things" for an earlier wedding.

When we raised the first crops, there were no mills, and our corn was either hulled or ground in a coffee-mill for making johnnycakes. We took turns at the mill nights to grind for the use of the family the following day. When Wisconsin was first settled, we had every obstacle to contend with. First, we had no market for our produce. There was no outlet for it, except home consumption. The first log houses that were built are very nearly all gone. There is now and then one left to mark the first settlement of the county. I could fill out a volume with events, but it might not interest any one to read it. One thought more, and I close: I attended the first wedding that took place in the town of Lisbon. There were no gilt cards, no presents; but we had a good big johnnycake passed around, and we wished them all the good things of this life the same as they do nowadays. After the ceremony, the young couple took their wedding tour home behind a yoke of oxen, just as happy as could be.

BY MRS. JOHN WEAVER, 1875.

I was born in the town of Augusta, county of Oneida and State of New York, and had always lived there until I was twenty-four years old. My husband was born in England, and lived there until he was twenty-two. After our marriage, he often had a touch of the Western fever (as the phrase was in those days); but it did not meet my mind, exactly, to leave the old place, with all of the comforts and conveniences and high privileges that we enjoyed, neither could I make up my mind to leave my parents, brothers and sisters, and many other relatives and friends, until the summer of 1836, when we had a flattering account of Wisconsin, and particularly of Milwaukee, sent to us by a brother-in-law of my husband that went to Milwaukee from our place in the spring. He seemed to think that he had found the right place, just the place for young people to commence life in earnest; in fact, it seemed to him an earthly paradise. My husband made up his mind almost immediately to settle his affairs and make ready, as fast as possible, to move, and to try his fortune in the "Far West," as it was then called. Therefore, on the 1st day of September, 1836, we left our parents, brothers, sisters, other relatives, friends and neighbors, and bid good-bye to our old home and to all that was near and dear to us, and, with our small children, a son and a daughter, we started on our journey. Slow and tedious was the way of traveling in those days, compared with the faster and much more comfortable way of the present. On the 27th, about 12 o'clock, midnight, we were a mile from Milwaukee. As late as it was, we had to go ashore in a small row-boat, which went three times from the schooner to the shore to take passengers and goods. We went the second time. There was no harbor or pier, and the sailors rowed as near as they could and then jumped on shore, with a rope in hand, and pulled the boat close to the shore, helping the rest of us to land; and there we were, with our two little children, on the beach of the lake, a long way from a house or any building, and so dark that we could scarcely see to walk on the beach and keep clear of the lake. We took our children, each of us one, in our arms, and walked half a mile right along close by the lake, the thunder growing louder and nearer. We came to a small log house, where lived three families; but they were all in bed by the time that we got there. We rapped at the door, and a man called out to know what was wanted. My husband answered that he had just been landed from a schooner, with his wife and two children, and would like to get shelter the rest of the night. A lady let us in, the only man at home being lame and could not get out of bed. They were kind enough to give us shelter, but had no bed for us; so my husband went back to where we had landed and brought a loose bed, and got back with it before it rained very hard. As there was no one living where we wanted to make our claim, we had to remain through the winter with my husband's brother-in-law, near Milwaukee.

We expected to pay for our land that fall, but as it was not in the market, we could not; but as we found provisions and everything that we needed so much dearer than we had been used to paying, we found it necessary to use all of our ready money before we could raise anything on our land. We paid \$16 for a barrel of white fish and \$32 for a barrel of pork; \$6 a hundred for beef by taking the half of one animal; butter 25 cents, and not fit to eat, so we did not buy any for awhile, but used a jar of it that we brought from the East, and then went without any for two months. At the end of that time, there was a man came from Illinois with

a sleigh-load of nice butter that he sold for two-and-sixpence, as we used to count money then. The merchants sold what they called good butter at the same time for five shillings a pound; very poor brown sugar, 18 cents; a little better kind, 20, and loaf sugar 25 cents a pound. Tea, coffee and spices were also dear accordingly, and went up in price when navigation closed. About the middle of winter, flour had to be brought by teams from Chicago, and those who had to buy then had to pay \$20 a barrel. We paid \$1 a bushel for potatoes, and 50 cents for turnips. Clothing was very dear, but we had supplied ourselves so well that we did not need much for two years, and by that time it was a little more reasonable. My husband went to work at \$2 a day, the third day after we landed, and worked until he earned \$120, sometimes with carpenters and sometimes with masons. There were a good many men out of employment that would have been glad to have had work to do. Our men bought some oxen and got a chance to draw wood for the steamboats. They had to pay \$22 a ton for hay, \$2 a bushel for oats, and \$2.50 for corn. Their job of hauling wood lasted about three weeks, and then they went out through the woods and began to build a log house. It was eighteen miles to their claims, so they would take provisions for a week and then come home and get more and go again. It was very cold, and they found it very slow business to get even a log house built. They had to saw all the boards they used by hand, and it took three men four weeks, including the time that it took to go to and from the place, and break their road through snow and cut trees and brush, so that they could get through with oxen and sleds. The third man was a neighbor that was going to live near us. When they had got one house so that they thought we could live in it, we moved, three families into the house, and all lived together four weeks. One of our neighbors fixed up a claim shanty, as they called it, and moved his family into it, on the same day that we moved, that being the 4th day of March, 1837. We were a mile and a half apart, and could not see each others' cabins.

There were no houses all through the woods, as we went to our new home in the opening beyond, except the Half-way House, as our men called it; but it was only a place where a man had cut down a few trees and laid up some logs, as if for a house about twelve feet square, just to save his claim. There was no roof, not even rafters, but a few pieces of bark, and a little brush laid over at one corner. There was a doorway, but no door. There were some pieces of flat stone laid up against the logs in one corner, and as our men went to and fro once a week, for four weeks, they would stop there and give their oxen some grain, and as there was none there to entertain them, they would entertain themselves in the best possible manner. They would enter this wayside inn, build a fire in the corner, where stood those flat stones, and boil their tea-kettle, which they always carried with them, make tea or coffee, and take their lunch of bread, cold meat and some pie and cake, and such things as we could cook and put up for them. When they had finished their meal and warmed themselves as well as they could, and their teams had rested and fed, they would drive along again on their lonely road, never meeting or overtaking any one.

BY ALEXANDER F. PRATT, 1854.

Waukesha was originally called "Prairie Village." Afterward, the Legislature changed it to "Prairieville," and after the county was set off from Milwaukee, it was changed to Waukesha. The first white settlers were Messrs. M. D. and A. R. Cutler and Henry Luther. They came here in the spring of 1834, not very long after the close of the "Black Hawk war." At that time, the land had been purchased of the Indians; yet, in accordance with the treaty, they remained in possession of it up to the summer of 1836, when it was surveyed by the General Government. The Messrs. Cutler built the first "log cabin" in this town in the year 1834. It was located near where Messrs. Blair & Smith's machine-shop now stands. Mr. Manderville at that time made a "claim" on what is now the "school section." Mr. Luther claimed the land where Mr. Meyer now resides, on Section 20, in this town. These are the only settlers who came here that year. At that time, large tribes of Indians were located in this county. Their headquarters were at this place; yet their wigwams were scattered up and down the Fox River (or Pish-ta-ka, as they called it), from Mukwonago to Pewaukee Lake; and for the first

two or three years, they were a great annoyance to the white settlers. There being no fences, the settlers' cattle would often get among the Indians' corn fields, and caused much trouble. The Indians, being legally in possession of the land, and having the numbers and power to rule, would demand such damages as they saw fit; and upon one occasion claimed and received of the Messrs. Cutler a fat ox for the damage he had done their corn. In the spring of 1835, Mr. McMillan and family came and built a cabin where the court-house now stands. Mr. A. C. Nickell and Dr. Cornwall located on the south part of the farm now owned by Mr. Nickell. Mr. Ira Stewart located on what is now known as the "Cushman farm," and Messrs Isaac and Richard Smart located where they now live. These were the only settlers who came that year. During the summer and fall of 1836, Mr. Murray located on what is now William White's farm. Messrs. Nelson and Thomas H. Olin located on what is now known as the "Gale farm." Mr. Sergeant located on the west side of the river, near the water-power. Soon afterward, this town was surveyed, when it seemed that the Messrs. Cutler, McMillan and Sergeant were all on one quarter-section, where the village and mills are now located. This, for some length of time, was a bone of contention, all being anxious to "claim" the water-power. In the fall of that year, Nathaniel Walton, with his family, located where they still reside, near this village. Up to this time, Mrs. McMillan was the only white woman in this part of the country;* consequently there was no tea-table gossip at that time. Mr. McMillan's cabin, which was about 16x24 feet, was the only public house in the place, and an interesting spot it was, too. At that time, we were located at Milwaukee, and came out here often. Upon one occasion, we stopped, with twelve others, at this hotel over night, there being but one room and two beds in the house. We have often seen the hogs occupy the inside of the house, and the whisky barrel placed on the outside to make room. If a landlord at that time could raise a barrel of flour, pork and whisky, it was all that was necessary for a first-class hotel. In short, tavern-keeping was more an act of necessity than choice with many, as the settlements were so few and far between that they were compelled to keep all travelers that came, regardless of their means of accommodation, as all preferred sleeping on a floor to a bed, or on a blanket in the open fields, as we were often compelled to do. In the spring of 1837, we came here to look at a claim owned by Mr. Cutler, which he had then recently purchased of Mr. Luther for \$500. We stopped with Mr. Walton, who at that time kept the best house. In the morning, we started on foot, in company with M. D. Cutler, to view the claim—a distance of about four miles. When we came to the river, which at that time was nearly two feet deep, Mr. Cutler commenced fording it. We backed out, and proposed to return to the hotel for our pony; but Mr. C. insisted on our trying our pedestrian powers in the water, and, after spending some time in consultation, he supplied the place of our pony, and carried us safe through the river. Upon arriving at the claim, we found it to be all our fancy painted, and we soon closed a bargain for it at \$1,000, paying in four (paper) city lots, at \$250 each. Previous to this time, Orrin Brown had come and located on the quarter-section where the stone quarry is, and Mr. Manderville having found himself, after the survey, on the school section, located on the quarter-section that A. Minor now lives on. In the course of that season, Messrs. E. D. Clinton, Y. Bidwell, Henry Bowron, James Z. Watson, J. M. Wells, J. Rice, J. W. Rossman, E. Churchill, Ezra Mendall, Joel Bidwell, Daniel Thompson, Robert Love, Moses Ordway, Sabina Barney, Asa S. Watson and Peter N. Cushman located on different claims in this town. This comprised the most of the settlement here in the year 1837.

In the spring of 1838, several new settlers immigrated. Among them were H. N. Davis, James Buckner, Charles Crownheart, Ira Doliver, B. F. Chamberlain, O. N. Higley, Albert White, James and Edward W. King, I. C. Owen, Daniel Chandler, Allen Clinton, Lyman and E. W. Goodnow, and several others. During that season, James Buckner and Mr. Bowron built what is now a part of the Prairieville House.† Robert Love built a small frame dwelling-house, and we another. These were the only framed buildings‡ in this county at that time.

* See chapter on "First Things" for the name of the first woman in the county.

† An error of one year—this hotel was built in 1837.

‡ The house now occupied by Austin Waite, in Waukesha, was built before these two.

Elisha Pearl

LISBON

Associations had been formed by the settlers for the mutual protection of each other in their claims. Each had his claim registered, and was protected in the peaceable possession of so many acres, which was altered from time to time by the association. At first, each man was allowed to claim 160 acres, after which, claims became more valuable, and it was extended to a whole section. Disputes having arisen between the Messrs. Cutler, McMillan and Sergeant, who were all on one claim, several claim trials were had, and finally the Messrs. Cutler bought off the other claimants. In the mean time, M. D. Cutler had bought out Mr. Brown and taken possession of the quarter where he now lives. Up to this time, the only provisions used or seen in the country were salt pork, flour and potatoes. Flour was worth, in Milwaukee, from \$16 to \$17 a barrel, pork \$30 to \$33, and potatoes \$2 to \$3 a bushel; and the price of hauling a barrel of pork from there was \$5, and other freights in proportion. The road from here to Milwaukee was anywhere we chose to travel, as travelers generally preferred new routes each time, knowing that a change must necessarily be an improvement. It had never been cut out through the timber, and each traveler was obliged to carry an ax to cut the trees whenever he ran against them. Previous to the summer of 1838, there were but few settlers between here and Milwaukee. During the summer of 1836, Messrs. Camp and Andrews had settled at Mukwonago, Messrs. Hatch and Rockwell at Oconomowoc, and Messrs. Fuller and Porter at Pewaukee, where they now live; and, in 1837, Messrs. Edgerton and Dousman located their claims in Summit and Ottawa, where they now reside. The same season, John Gale, who then lived at Milwaukee, bought Mr. Cutler's claim to the quarter-section containing the water-power, for \$6,600, and, the next season, built a flour and saw mill on it, after which he sold an undivided interest in it to William A. Barstow and Robert Lockwood, who, in company with him, laid it out into village lots, many of which were sold at a high price, and bonds for deeds given while the title still remained in the General Government. In October, 1839, the lands were brought into market and sold. At that time, all the best locations had been taken, and each occupant was permitted to purchase his land at public auction, at the minimum price of \$1.25 per acre. Many of the settlers, being poor, paid from 25 to 50 per cent for money to purchase their lands, and allowed the speculators to take the titles to them in their own names, as a security for the money loaned; whereby, in the end, being unable to pay, they lost their all. All those who succeeded in paying for their lands and have remained on them up to the present time have become wealthy; while some who were unable to pay for their lands sold their improvements for what they could get, and commenced anew on unimproved lands. From that time to this, the settlement of our country has gone forward steadily, and the lands are now mostly owned and occupied by actual settlers. Several large and flourishing villages have been built up in the county. In 1847, the Milwaukee & Waukesha Railroad Company was incorporated, and subsequently it was changed to Milwaukee & Mississippi and extended to the Mississippi. The road was completed from Milwaukee to this village in March, 1851. There are also charters for three other railroads running through Waukesha.

BY MRS. A. B. HALL, 1880.

In the spring of 1843, before Horace Greeley advised young men to go West, Mr. Hall left New York for Wisconsin and settled in Oconomowoc, and at that time it was very far West. The next August I took our little son and started on the perilous road to meet him. When we stepped on board the Great Western, at Buffalo, with only a plank to stand on, I thought I should never find him; but an invisible guide and Capt. Walker, with a good steamboat, carried us safely through to Milwaukee. As soon as the boat reached the pier, John S. Rockwell came on board and told me Mr. Hall had left a horse and buggy with him to take us to Oconomowoc. "Tell it not in Gath," but it was a long time before I saw another horse and buggy.

We left Milwaukee in time to reach Wauwatosa as the sun went down, and my heart went down with it when told I was thirty miles from home, but drove on, hoping to get there during the night. It was not until the third day that we arrived there. The road through the Milwaukee woods was nearly impassable. The mud and darkness added made it almost unbearable.

My little boy was tired of riding and wanted to go back to grandpapa's. I remembered Lot's wife and drove on until late in the evening, when we reached Prairieville. Spent the first Sunday in the Territory there, at Mr. Walton's. On Monday, we ended our journey, and were cordially received by strangers, as they were pleased to have acquisitions to their numbers. The pioneers will understand this allusion.

The first Sunday in Oconomowoc we attended church in a log house in "Canada." I went over on the floating bridge; some went in boats. Nearly every family owned a boat then, and they were used in place of more expensive locomotion. It was a beautiful sight, Sunday morning, to see the boats drawing near the house of God. We found many of the inhabitants Christian people, transplanted from some of the Eastern States. The Episcopal students at Nashotah brought us the Gospel; the Presbyterian Mission Society sent us a missionary for a time, and the Methodists helped on the good cause, also.

In 1825, I drew a map of the United States from Woodbridge's Atlas, and while printing the map, found mountains and lakes and rivers and Indian villages, but not a name for one of them on that vast tract of country from Lake Michigan to the Pacific coast. Near the head of Lac La Belle the land looked familiar to me, and, in referring to the map, saw I had been here with my pencil in my girlhood, and had printed on it "unknown regions." After eighteen years, I found myself here in this same wilderness; yet Oconomowoc then, in the absence of art, was in nature's loveliness, and was wildly beautiful. Language is tame in description, but its "beauty will be a joy forever." We then called it Eden; but the tree of evil was soon planted here and soon began to flourish, and it was impossible to tell how far its branches would extend.

Our national day was decided to be celebrated on the 4th of July, 1844, but the weak faith of some failed to see how it could be done; yet, when the day came, the people made their appearance from every direction, through the bushes, except those who came on the lake, "padding their own canoe."

It was a "day of small things," yet all were as patriotic as if the day was exclusively theirs. The music of the fife and drums never sounded more thrilling, for, from a child, I have revered it, as my grandfather was a fifer at the battle of Bunker Hill. The few women that marched, with shoeless feet, were the first to go at the call of distress or sorrow. (The sick ones, away from friends, needed the best of care, as we were eight miles from a physician.) When the marching ended and the music ceased, the company sat down to dinner, and pronounced the repast the best ever prepared.

In the fall of 1844, W. W. Collins opened a store on the point, the first one established in Oconomowoc.

There were then seven dwelling-houses on the peninsula. Mr. Rockwell's was the boarding-house; there was one log house; five one-story houses, with one room in each (with one exception), with small families in them. The place was all owned, or nearly all of it, by Mr. Rockwell, and most of the men were in his employ. He furnished from his store in Milwaukee the most we had here for a year. In 1845, he moved his family here, and here was his home while he lived.

Leister Rockwell, a brother, was one of his family also—a man long to be remembered by the old settlers.

Mr. Rockwell was a kind, considerate, Christian gentleman, and lived somewhat like his master—for the good of others—and made some of the rough places of pioneer life more pleasant and more endurable. Then, in the noontide of his useful life, we were compelled to leave him "in the city under the hill."

Some of the pioneers came here without their families; some were not so fortunate as to have them, and it cannot be denied that some of the latter saw very hard times. Mr. _____ told me he had walked to Milwaukee more than once to buy bread, and brought it home on his shoulder. After I came, there were opportunities to pity and help the boys without homes. Notwithstanding all this, the facilities for gaining a support far exceeded anything we had ever

known or imagined. There was very little food here in 1843-44, but every one could help themselves to fish in the lake or deer in the forest. When there was a bee tree found, the honey was divided and every one supplied. It was said that pork was only 1½ cents per pound, but there was no money with which to buy.

Then there was a noble company of ladies here, and what women should be, true help-meets. We were laboring not only for husbands, but sons, to be grown into soldiers to sacrifice their lives for the salvation of their country. Eight boys went from Oconomowoc between the ages of sixteen and twenty years, and three came back. Their mothers are Mrs. D. Hastings, Mrs. William Chaffee, Mrs. D. R. Thompson, Mrs. Jones, Mrs. A. Woodruff, Mrs. Christie and Mrs. A. B. Hall. They are living here now, with one exception.

BY ANDREW E. ELMORE, 1880.

Sickness in my family and an unending press of business prevent me from writing anything which would be of value concerning the early history of Waukesha County. I remember I came to Waukesha County, and, after looking over the country, determined to settle at Mukwonago, as it was the richest and most pleasant valley I had ever seen in my life. I had \$100 in money, and no more, and no other property; but I had pretty good credit in the East. I purchased, or rather got trusted for, a general variety of goods, and arrived in Mukwonago in October, 1839. I remained there one night, but I can't now tell precisely where, when I found a man named Hill, who had erected a log building in which to manufacture wooden measures and half-bushels. The upper portion of this building, I think, had been finished and used as a church; but as there was no one in the country to buy his measures, Hill had given up the business, and I purchased his building, paying, if I remember aright, \$80 for it. There was a large stump directly in front of the door, which must be removed in some manner before I began business. I therefore arose next morning as soon as I could fairly see, and began chopping at the stump, which was very large, tough and hard. Not knowing how to go at the work, and being wholly unaccustomed to the use of an ax, I made very awkward work and poor headway. While I was sweating and pounding away, I noticed the door of the neighboring cabin open, and the brawny, erect figure of what I thought was the tallest man I ever had seen issue forth. He evidently had been watching me, for he came directly to the spot, and taking the ax, attacked the stump in scientific backwoods style, with astonishing strength, and in a few well-directed blows did more than I had done in half an hour, or during the entire morning, remarking at the same time that he "guessed I did not know much about the use of an ax." He then sat down and said he was "in trouble," and that if I "was from the East I could help him." Grateful for the progress his sturdy blows had made toward removing the stump, I answered that I was from the East, and would do anything for him that lay in my power. "Well," said he, "we have been disputing here as to who was the father of Madame De Steal. Martin Field says it was one man, and I said it was altogether another; and as there is no library here by which to determine who is right I appeal to you." I chanced to have the required information about me, and so settled the matter at once and forever in Mukwonago. Joseph Bond, for that was the name of my tall visitor, a man whom everybody in the county knows, seized my ax in high glee upon receiving the desired information, and, for a few minutes, made the splinters fly from the old stump that had given me such trouble. From that day—a period of forty-one years, lost in oblivion—Joseph Bond and I have been friends; and, although differing with him in politics during all my later life, we always worked together for the best interests of whatever pertained to Waukesha County.

I finally got my goods in order and my store open for custom, but for some time there was but little to do. I slept under the counter, cut my own fire-wood on Joseph Bond's land, which he gave me, and then gratuitously hauled it to my store, and got acquainted with all the people in that part of the country, whose names would not make a very long list. I also made it a point to get acquainted with the Pottawatomie Indians, learning to speak their language, and by this means I got nearly all of their custom. I trusted them too, as freely as I was able,

and they always paid me. No merchant of that day or this can say as much of the whites.

In speaking of cutting my own wood, I should have added that I did it by moonlight, and that Mr. Bond hauled it with his oxen at the close of his own day's labors. But this is only one of his small favors; he has done good to all ever since he came to Wisconsin.

I look back to Waukesha as the county, and old Mukwonago as the place, where I spent many of the happiest years of my life, and where I still love to claim some of my truest friends. I knew from the rich appearance of the country when I first saw it, that the growth of Waukesha County would be rapid, but cannot say I expected to live to see the wealth, population, culture and buildings she now contains. But she deserves it all, and I am glad to know that I had something to do with making her what she is.

BY THOMAS SUGDEN—1880.

I was born at Millington, East-Riding of Yorkshire, England, June 12, 1810. Sailed from the port of Hull, in the ship *Mayday*, for New York, on April 14, 1834; arrived at the city of New York, June 1, 1834; left New York for Detroit, Mich., by steamer for Albany, June 3, 1834; Albany to Schenectady by rail, about sixteen miles (no other railroad at that time between New York and the Pacific Ocean); by canal from Schenectady to Buffalo; June 11, Buffalo to Detroit by steamer, arriving at Detroit June 14, 1834.

On July 11, 1834, I hired to Mr. Rogers to work through haying and harvesting, on what was then called "Bay settlement," sixty miles from Detroit, Aug. 30, 1834. During my absence from Detroit, in all about seven weeks, about five hundred people had died, and about two thousand people fled from the city. The city contained about five thousand people on the 11th of July, and on the 30th of August, one-half had died or fled the city.

November 11, 1834, left Detroit for England. Arrived at Millington, my native place, December 25, 1834. April 1, 1835, was married to Hannah Slightam, daughter of John and Elizabeth Slightam, of Millington. May 25, 1835, left my native place again for Detroit, U. S. A., bringing with me my mother, five brothers and sisters; also my wife's father and three brothers. Arrived at Detroit August 3, 1835, with the two families all safe.

May 10, 1836, left Detroit for Milwaukee on the steamboat *New York*; arrived at Milwaukee (then a very small village) May 20, 1836. May 26, 1836, started west from Milwaukee, following the Indian trail through the then dense woods, a distance of fifteen or sixteen miles, carrying on my back an ax and some crackers and cheese, sleeping on the floor of a small log cabin 10x12, which was occupied by a man named Hunt and a lady friend. It was about nine miles west of Milwaukee, and the only house, shanty or cabin, between Milwaukee and Prairieville.

May 27, 1836, arrived at Prairieville; the first house I saw was the residence and hotel of a Mr. McMillan, located near or about the place now occupied by the Catholic Church; think there was no other house between this point and the now Bethesda Spring.* There I found a log house occupied by Alonzo R. Cutler and Richard Smart. About one mile south of this point I found Mr. and Mrs. Isaac Smart, with whom I had crossed the ocean in 1834. This was unexpected, as I supposed they were living at White Pigeon, Mich.

There were a few others living here at that time—A. C. Nickell, Dr. Cornwall, Mr. Manderville, a Mr. Smith, who was afterward killed in the woods (supposed by Indians), a Mr. Stewart, and one or two of the Osborn family. There may have been some others which time has blotted from my memory; think there was not a single inhabited house of any description on the present site of the village of Waukesha, except the house and hotel of Mr. McMillan, before mentioned. I remained two or three days with Isaac Smart; and during this time John Coats and Jonathan Aimeson arrived from Michigan.

About June 1, 1836, the two last named and myself bought of the Indians a canoe, took our provisions, guns, axes, etc., and started down the Fox River, the following day. We paddled our canoe

* Mr. Sugden probably did not see the small claim shanty built by the Cutlers in the spring of 1834. It stood not far from where Blair's machine-shop now stands. Or, possibly, he was mistaken a few rods in location, and the house he refers to was the Cutler claim shanty.

down the river to what was then called Pishtaka Lake, in Illinois, being by the river seventy or eighty miles from the Bethesda Spring. I think we were three days and three nights making this trip, stopping at several points on the river during the daytime to examine the country on each side, and sleeping on or near the river bank during the nights. There were but two log shanties in sight of the river during this entire distance of seventy or eighty miles. The first was about two miles south of Waukesha; I think it was built by a man by the name of Parker. The second was near the river on the present site of the village of Burlington, in Racine County, built by a man named Smith. On arriving at the above-named lake, we tied up our canoe and explored the country north, discovering the prairie about one mile from said lake. We surveyed this prairie into quarter-sections, on one of which the said Jonathan Aimeson now resides. On or about June 8, 1836, I returned to Prairieville by way of the Indian trail on the west side of Fox River. On this trip, the only white person on the whole route was Warren Godfrey and wife, who were living in their wagon, on the present site of the village of Rochester, Racine County. I slept under their wagon during the night, Mr. Godfrey furnishing me with some bread for breakfast the next morning, for which I was then and am now thankful. I arrived at Prairieville, at Isaac Smart's, the same day, in the afternoon. On arriving here, I found Mr. Joseph Smart, who, with his family, had just arrived from White Pigeon, Mich. Here was another man who had crossed the ocean with me in 1834.

After remaining at Isaac Smart's a few days (probably three or four), a Mr. Cox, who had, a few days previous, settled on the northwest quarter of Section 19, in the town of Mukwonago, called on Mr. Smart, requesting him to send some white person to settle near him, as his wife was afraid of the Indians, there being at this time a large Indian village on the east part of said town, and not one white settler in any part thereof.

On or about the 12th day of June, Joseph Smart and myself started from Mr. Isaac Smart's to the northwest quarter of Section 19, in Mukwonago; there we found Mr. Charles Cox, his wife Mary and their two adopted children, named David and Hannah. They were living in their wagon, near the creek, on said northwest quarter of Section 19, in the town of Mukwonago. I think there were no other white settlers in this town at that time. Mr. Cox and family had moved here from the south part of Illinois, with three yoke of oxen and wagon. I think Mr. Sewall Andrews, Mr. Camp and Mr. Meacham came into Mukwonago about the 14th or 15th of this month, Mr. Andrews and Mr. Camp settling on Section 26. About this time, the Government concluded a treaty with the Indians then living on this section, and, in September following, they surrendered their lands here and moved West, the Government aiding in their removal. Up to the time of concluding the treaty above alluded to, the Indians refused to allow white settlers within three miles of this section, and did refuse Coats, Aimeson and myself to stay near them while exploring the lands on each side of the Fox River, about June 4, 1836. At this time, Joseph Smart laid claim to the northwest quarter of Section 17, on which he lived until 1857, when he died. I also, at this time, laid claim to the northeast quarter of Section 19, adjoining the land on which Mr. Cox and family had settled. The first white child born in the town was, I think, John A. Smart, son of said Joseph Smart, on December 31, 1836. The first white person who died in the town was Charles Cox, who died July 23, 1838, he being the first white settler.

I sold my interest in the northeast quarter of Section 19 to James Meader, and moved to the town of Eagle in September, 1843. I removed from the town of Eagle to the town of Genesee in October, 1849, where I have resided ever since. I think there is not a single white person living now in the town of Mukwonago, Eagle, Genesee and Ottawa, who were living there when Joseph Smart and myself first claimed our land in the town of Mukwonago. If there are any now living in either of these towns. I should be very glad to meet them.

BY CHAUNCEY C. OLIN, 1880.

Forty-four years ago to-day (April 27, 1880), I left my native place, Canton, St. Lawrence Co., N. Y., for the Far West, being then less than nineteen years of age. Our destination was

Milwaukee, a place not much known in those days. It being early in the spring, and as we were to travel with teams, with an older brother and family, on account of bad roads we shipped aboard a steamboat at Ogdensburg. After a day and a half of boisterous and disagreeable weather, we landed at Rochester. There we found good settled weather, fine roads and a splendid country. We thought at the time Western New York was comparatively new. It was known mostly for its fine wheat lands, as it supplied most all of Eastern New York and New England with what was called Genesee Flour. I was for stopping right there; but was told by our brother, who had been in Wisconsin during the previous year, to wait, and not be too rash, as a far better and finer country was ahead of us. Rochester was then but a small village and Buffalo a small city; Erie and Cleveland were also small towns, but such timber as we found around Cleveland was a sight not easily to be forgotten. We remember distinctly those three-foot poplar-trees sixty to seventy feet without a limb. Where Toledo now stands, we found the worst ague country in christendom, so we did not stop only long enough to get safely across the river, and set our faces direct for Chicago, through the southern part of Michigan. After leaving Toledo on our route to Michigan City, at the head of Lake Michigan, in Indiana, we saw our first prairie country, where we could travel for miles and miles without seeing a tree, shrub or a house. We said then to ourselves that it would be a hundred years before these large prairie wastes would be settled. But experience has taught us how little we then knew of the Great West and the Yankee enterprise that was then taking possession of these valuable lands. We traveled a large share of the way from Michigan City to Chicago on the beach of the lake, sometimes in the water to the depth of two feet to avoid deep sand that had been thrown up by the waves. On our arrival at Chicago, we were beset with all kinds of difficulties, as it was almost impossible to get through the city without getting stuck in the mud, and we really felt relieved when we crossed the river at the now State street crossing. Chicago had been advertising throughout the East for two or three years, so it was much better known than any other Western town. But we saw nothing that interested us. Most of the buildings were on stilts, and it was almost impossible to get through any of the streets with teams without carrying a rail on our backs to pry them out of the mud, for the street was generally on a level with the water in the river. Little did we think then that, in 1880, Chicago would contain 500,000 inhabitants. We were now eighteen days from home, and in the next three days, had passed what is now Waukegan, Kenosha, Racine and the mouth of the Milwaukee River. All the facilities we had for crossing was a small skiff, but over we went by putting our household goods into the skiff, swimming our horses and floating our wagon. This was May 19, 1836. We were in a new town with scarcely a dozen houses, but plenty of new-comers and Indians. After resting a few days, and looking around for something to turn up, we took our departure for what was then called Prairie Village, sixteen miles west, through a heavy-timbered country for the first twelve miles. Although we had an early start, it took us all day to make these sixteen miles. We had no road more than blazed trees. We had quagmires on the start, and hills and dales until we crossed the Menomonee at the present viaduct of the St. Paul Railroad. In a creek near Elm Grove, we had our first experience in a Western mud-hole. We had to strip the harness from our four horses and pull them out one by one; and they looked more like mummies than anything else. By this time it was noon, and we had made about eight miles of the sixteen. After feeding our team and partaking of our lunch, we moved on a little more cautiously. After crossing Poplar Creek, we came into the oak openings. I thought it the most lovely sight I had ever beheld. The country looked more like a modern park than anything else. How beautiful to look upon! How strange! We said in our enthusiasm, "Who did this? By what race of people was it done, and where are they now?" for there were but very few people here. On our arrival at Prairie Village, the first family we met was McMillan's, which was the place of entertainment, near where the court house now stands. This cabin was about twelve feet square, with bunks arranged one above another on two sides, for sleeping; our bedclothing, prairie hay, which, with our own blankets, made quite a comfortable bed for summer. At this time, there were but very few persons in or around this Indian town. M. D. and A. R.

Cutler, Richard and Isaac Smart, Isaac Judson, Elon Fuller, Nelson and T. H. Olin, John Manderville, Almon Osborn, A. C. Nickell, Dr. Cornwall, Ira Stewart and ourselves were about all who were or had been here up to the spring of 1836. In the fall, Nathaniel Walton and family came and located on his present homestead, south and adjoining our village. On our first visit to Prairie Village, we only stayed a few days, and in that time we made a claim.

I have always regretted that any of the mounds in this county should have been destroyed. We have mounds on the college grounds that have been preserved, and no doubt will always be kept intact, as they are on public ground. If all of these ancient relics of the history of our county could be put back in their original state, our people would not take thousands of dollars for them. Before leaving for Milwaukee, I had to take some steps to protect the claim I had made. The way I did that was to blaze a tree and write my name, date of making it, etc. Those who made claims on the prairie where there was no timber had to build a fence with rails, to show whoever came along that it was claimed. But after this precaution, our claims had to be watched very closely to keep them from being "jumped." When I was tired of claim-hunting and sight-seeing, I returned to Milwaukee and settled down where I could see something besides Indians and wild animals. Milwaukee was, of course, just in its embryo stage, and it needed work to level its hills and fill its marshes. For a few months that was my work. Every day we could see a change, and in a few months the transformation of hills and valleys was wonderful. Then came buildings to be filled with goods, families and manufactories. Thus the improvement went on, and speculation, in a very short time, became very exciting. In this way Milwaukee was growing at a rapid rate. But, having a taste for country life, after spending one year in Milwaukee with my brother and family, I took up my permanent residence at Prairie Village, to grow up with the country. I can truly say that I enjoyed this pioneer life, although young and inexperienced. There was just enough novelty about it to interest the most verdant of country boys. By the time we had returned, other parties had come in with their families. The first women that came were Mrs. McMillan and sister, Mrs. Isaac Smart, Mrs. Isaac Judson, Mrs. Nathaniel Walton and Mrs. Nelson Olin. Jane Smart, daughter of Isaac Smart, was the first girl born in this vicinity, and U. P. Olin, son of Nelson Olin, was the first boy. Up to this time we were mere squatters on the land, as it was not surveyed until late in the fall of 1836, and was not in market. When the survey was made, a good many of us were disappointed, as the lines did not correspond with our ideas of where our farms should be. The subdivision of townships into sections and quarters left many of us high and dry on somebody else's land, and we had to "get up and get," as the saying was. John Manderville found himself on the school section; M. D. Cutler did not have what he supposed he had, and had to buy off his neighbor. The Olins—all of them—were in another township, as were also Isaac Judson and Elon Fuller; but still we were all close by. At this time the Indians were located here in large numbers. A treaty had been made for their lands, and their title extinguished, but they stuck to their old hunting grounds and wigwams, as game was very plenty in the immediate vicinity, as I can testify, having seen as many as eight deer in a drove near where our court house now stands. This Indian village was located on the south and east of us. It extended from Grand avenue and Mineral Rock Spring on the west to C. S. Hawley's place on the east. They planted corn on their grounds for two years after they were notified to leave, and the corn hills remain on some parts of this land to this day.

When I came here, the Indians had a trail running from the northeast to the southwest, just south of Mineral Rock Spring, and it had been used so long that an indentation of some eighteen inches in the ground had been reached in quite a number of places. Pioneers in a new country, if they are at all observing, know that Indians always travel in single file and in the same place for an indefinite length of time. This trail extended from Pewaukee Lake to Mukwonago, a distance of nearly twenty miles. In coming from Pewaukee the trail crossed the Fox River, two miles and a half up the river at what is now Hadfield's quarry, then came directly down the river to where White Rock Spring is located. Around this spring was a great place for game. It was called by the Indians, and white men, too, the "Salt Lick." The

water was a little brackish then, as we thought, and was always open in the coldest winter. The Indians understood this so well that they built a large ambush in the branches of one of the large oak-trees near the spring, and many a deer, wolf, fox and smaller animal has been secured from this hidden retreat. This ambush remained there for years after the Indians left the county, until it rotted to the ground. Whenever we felt like going a-gunning, we always chose this region, as we could always find some kind of game without much travel. The trail, after leaving this spring, came just north of Hickory Grove, then to near where the Congregational Church now stands, and a little south of Mineral Rock Spring, then a little more north, and recrossed the river near Bethesda Spring, going to the Industrial School, and so on to Mukwonago. This tract of country, from Pewaukee to Mukwonago, was the Indians' great fishing ground. We could always buy fish of the Indians cheap. They would take anything, from a cracker to a few pounds of flour or meal, for as many fish as a large family could eat at two or three meals. In 1837, the Indians began to fold their tents and emigrate to their new reservation, and by the fall of 1838 they were all gone, except a few stragglers that were too lazy to work or even to get away to their new hunting-grounds. Finally they became such a nuisance that the Indian Agents came and took them away by force; and then some of them would return and live on the white folks for months. Such was the Indian's love of country.

In the year 1837, we had quite a large accession to our village and vicinity. I remember the names of the following persons: Orrin Brown, E. D. Clinton, Z. Bidwell, Henry Bowron, J. Y. Watson, J. M. Wells, E. S. Purple, J. Rice, J. W. Rossman, E. Churchill, J. E. Bidwell, Daniel Thompson, Robert Love, Moses Ordway, Sabina Barny, A. S. Watson, Loomis Bidwell, P. N. Cushman. These persons were worthy farmers and settled around our village, near by, and improved their farms, so that in a few years they became quite independent for a new county.

In the fall of 1837, I returned to my native place in New York and spent the winter, at which time I taught my first district school. But I could hardly contain myself in that hard Eastern winter, and early in the spring set face toward the West again, to stay. In 1838, the emigrants came early. The news had spread all over the East in regard to the fine farming lands in Wisconsin, and it seemed as though each one had tried to be the first to reach and claim unto himself a good farm. Milwaukee being the best harbor, all of the new-comers landed there, and more than one-half of these people came through or stopped at Prairieville. I have seen fifty teams loaded with these thrifty people coming through what is called the Milwaukee Woods, and about one-half of them would be stuck in the mud. Each one had to choose his own route, and get along the best way he could. Among the number that stopped here that year I remember the following: H. N. Davis, James Buckner, Charles Crownhart, Ira Doliver, B. F. Chamberlain, O. N. Higby, Albert White, J. and E. W. King, J. C. Owen, Allen Clinton, L. and E. W. Goodnow,* and hundreds of others that I cannot now name. This year, considerable improvement was made, and some good buildings for those days were built, such as the Prairieville House (as by this time the name of the village had been changed), our grist and saw-mill, and Robert Love and A. F. Pratt had each small frame houses. In the meantime, settlements had been opening up at Mukwonago, Summit, Delafield and Pewaukee, so we felt as though we had neighbors. By the time the land came into market in the fall of 1839, there was hardly a desirable piece of land in the county but what was held for actual settlement or for speculation. All the settlers were permitted to enter their claims at \$1.25 an acre, but many of us were compelled to borrow the money at 25 per cent interest to pay for our homes, which were then becoming quite valuable. After our lands were secured, we felt a little more independent, and really from that time set out in earnest to make ourselves comfortable by putting up better and more buildings on our farms, and looking a little more after public improvements in the way of better roads and bridges in different parts of the county. We were also interested in building churches, schoolhouses, stores, blacksmith-shops, and in fact in all kinds of improvements where it would help to build up our town. Our wheat crop as early as 1839 to 1841

* The Goodnows, Clinton, Buckner and some of the others came in 1837, perhaps after Mr. Olin had returned from New York. The hotel was also built in 1837.

was of no mean dimensions. It gave us all enough to eat and some to spare, as our grist-mill sent to Milwaukee 7,000 barrels of flour, and our merchants 250 barrels of pork and 12,000 pounds of hides, which were valued at \$38,846. These merchants up to this time had bought in Milwaukee \$27,700 worth of goods. While we were providing things for our temporal comfort, the spiritual man was not neglected or overlooked. In 1840, the population of our county was 2,156, and after this time our county settled very rapidly, town sites were laid out, and water-powers were being improved in every direction.

From the year 1841 to 1844 and 1845, there was a good deal of depression in real estate, as speculation had run high since 1836. A good deal of this depression was caused by the currency of the country, which was of a very doubtful character. The Western and Southern States seemed to vie with each other in seeing which could issue and circulate the most wildcat currency, as it was called in those days. In fact, the currency was so worthless that it could only be passed in the State where it was issued, without a fearful discount. I remember of going to New York in 1841, and I had to change money several times on the way, as there were no through tickets in those days, by steamboats or railroads. On my arrival at New York I could not even pay a hotel bill with Wisconsin money without standing a shave of 25 per cent. The only reliable currency we had in those days in Wisconsin was the Wisconsin Fire and Marine Insurance Company bank bills. This bank was owned and controlled then by George Smith, of Chicago, and Alexander Mitchell, of Milwaukee. They issued thousands of bills, and a large share of the people of Wisconsin, Illinois and Iowa said: "We shall wake up some morning and find the bills of this corporation worthless." They had several hard runs on their bank, but they were always ready and willing to redeem their bills in coin when it was asked for. I remember at one time there was quite a formidable mob gathered in front of their bank in Milwaukee, because they could not get their money changed quite as fast as they wished. In fact, I suppose the officers were a little slow sometimes, as their supply of gold generally came from Chicago, and there being no railroad in those days, they had to depend upon steamboats, which were very slow as compared with railroads. But every bill-holder got his money, and no man, woman or child could say that they ever lost a dollar by holding this money. In time, Mr. Mitchell became the sole owner of this bank, and it has always since taken a very high rank as a safe moneyed institution of the Northwest.

I was present at an annual dinner of the Old Settlers' Club in Milwaukee on Washington's birthday in 1878, at which time Mr. Mitchell gave a history of the currency, banks and bankers of Wisconsin from the time he landed in Milwaukee. It was the most amusing as well as instructive speech of the occasion, showing how the greatest banking institution of the West was begun, and its progress up to the present time. It had become a settled conviction in the minds of the people that the bills of this bank would always be good and every dollar would eventually be redeemed, while multitudes of other banking institutions had gone to the wall with a loss to the bill-holders of a large proportion of what they were supposed to be worth. After all this depreciation and fluctuation in the currency and real estate, our general prosperity was apparent. We had a splendid soil and plenty of willing hands to cultivate it, and as immigration was constantly on the increase, we became a very prosperous community. In fact, we were getting a little too thick for the ever wide-awake Yankee, so much so that quite a large number of our oldest citizens took up their line of march to newer fields in other parts of the State. About the first to leave was the Rev. Moses Ordway, who took up his abode in Beaver Dam, in Dodge County, having sold his large farm. In a very short time, numbers of our citizens followed him, such as E. W. Goodnow, William T. Bidwell, George Thompson, Stephen Cummings, Charles Burchard, Mr. McNeil and two of the Mannings. Mr. Ordway was not only a strong preacher, but a good business man as well, and he soon had a prosperous community about him. He improved a valuable water-power and built the first mill in that part of the State, and to-day Beaver Dam is one of the best manufacturing towns in Wisconsin, having several flouring and woolen mills of no mean dimensions.

In a more northern direction at Hartford the Rossmans located. At first they built a

saw-mill and did not dream of a removal, but circumstances out of their control compelled them to leave us. Immigration followed them quickly to that timbered county, Washington. The immigrants were mostly Germans, and, as they are almost invariably industrious, in a short time the Rossmans had a prosperous village around them. The La Crosse Railroad was located through their town in a few years, and to-day Hartford is the second town in size in the county. I suppose this lucky find of the Rossmans took at least fifty people from our midst, consisting of farmers, merchants, shop-keepers, teamsters, millers, etc. In a more northern direction other settlements were formed, this time at Neenah and Menasha. L. H. Jones, one of the most prosperous merchants, was the first victim. Others followed, namely, Joseph Turner and family, two families by the name of Wheeler, Rev. O. P. Clinton, Curtis Reed, A. E. Bates and family, and quite a number of others that I cannot now name. But during all this emigration from us, we were receiving new accessions at least three times greater than the number leaving us; so we were increasing in population rapidly all the time. Farther west in the county of Winnebago, we sent out another delegation to Omro. The following are some of the persons that located there: Nelson and James Olin, Loomis Bidwell, Richard Reed and a large family of boys, Edward West, Marshall Moss, Lyman Goodnow, the first man to settle on the Indian lands opposite Omro and on the north side of Fox River; E. W. Beckwith, Edwin Bullis and A. S. Olin. Others soon followed from other parts of the county—Rev. William McKee, Messrs. Sanborn and Fisk, from Summit. Other places were also founded by Waukesha people, such as Fox Lake, Eureka, Oak Grove, Pine River, Berlin, Clintonville and several places of minor note. Waukesha people have built up quite a goodly number of towns in different parts of the State, as has been shown, and still we have all the time prospered ourselves. In fact, we may go to most any part of the State, and we will find people that have lived within Waukesha Village or county. During all this time we were connected with Milwaukee County. But few of our citizens saw in the future the result of being connected with a territory in which was located a large city such as Milwaukee has proven to be, and began to grow restless. We were determined to take measures for a separation and set up for ourselves, the division being at Range 20, leaving the west sixteen towns in the new county. At first the Milwaukee people got dreadfully excited over the matter and declared by all that was great and good that it should never be done. They said that it would have to be submitted to the vote of the whole county, as there was no other way that it could be done in a legal manner; and further, they said, we have just enough territory for one of the best and wealthiest counties in the State, and we do not propose to stand any such nonsense as a division of this beautiful county, with Milwaukee, the metropolis of the State, located within its boundaries. But the people in the western part of the county made up their minds that their taxes would be much lighter by the separation, so the cry went up strongly for division. Our first move was to go to the Legislature and get a law passed to submit the division question to the voters living within the boundaries of the territory to be set off. The Milwaukee people said that was the height of impudence, but we had some good workers at Madison and a law was enacted, giving the people only within the territory set off the right to vote on the subject. In order to give the reader the full benefit of what was said and done to accomplish the end in view, I will incorporate some articles from the *Waukesha Plaindealer*, edited by A. F. Pratt. This article was written for the Old Settlers' Club February 21, 1871:

The Territorial Legislature consisted of a Council of thirteen members and a House of Representatives of twenty-six members.

At the session of 1846, Nelson Dewey, of Grant County, was President of the Council, and M. C. Darling, of Fond du Lac, Speaker of the House.

This county, which was then Milwaukee, was represented in the Council by J. H. Kimball, of Prairieville; Curtis Reed, of Summit, and James Kneeland, of Milwaukee. We were represented in the House by Samuel H. Barstow, of Prairieville; Luther Parker, of Muskego; W. H. Thomas, of Lisbon, and John Crawford, James Magoon and W. H. Mooers, of Milwaukee.

At that session, William A. Barstow, A. W. Randall, A. E. Elmore and myself, conceiving

the idea of seceding from Milwaukee, and organizing a new county, for that purpose went to the Legislature, where, after a long and desperate struggle, we succeeded in getting a bill passed, submitting the question of division to the voters of the new county only, at the town meeting.

Councilmen Reed and Kneeland and the member Thomas opposed the bill to the bitter end. In fact, all the residents of the present limits of Milwaukee County were so much opposed to it that we did not *dare to permit* them to vote on the question. The same feeling existed in the north tier of towns, also more or less in Brookfield, New Berlin, Muskego and Vernon, while the people in the other towns were nearly a unit for "division."

At that time, C. C. Sholes was publishing the first and only paper in this village, called the *American Freeman*, an Abolition sheet of the deepest dye. The friends of "division" met together, and appointed a committee, consisting of A. W. Randall and ourself, to conduct a campaign paper, to be devoted solely to the "division" question. Arrangements were made with Mr. Sholes to print it as often as we desired. It was christened the *Waukesha Advocate*. The first two or three numbers were filled with good and substantial reasons for a separation from Milwaukee, but about that time our opponents issued an opposition sheet from the *Sentinel* office, called the *Unionist*.

This was edited by A. D. Smith (since Judge of the Supreme Court, and a brother-in-law of Curtis Reed, our Councilman, now of Menasha). Dr. A. L. Castleman, of Delafield, Leonard Martin, W. H. Thomas, Aaron Putnam and Curtis Reed were the principal contributors to that paper; and both papers soon lost sight of the main object, and contained nothing but personal abuse of the bitterest type. For a sample, we clip several articles from the *Advocate*, which are fair specimens from our side, and if we had a copy of the *Unionist*, both sides should be represented.

We published a communication in the *Advocate*, over the signature of "Waukesha Farmer," which contained a few lines of poetry, and was answered in the *Unionist* by Dr. Castleman, over the signature of "Colburn," which we answered in the *Advocate* in the following communication, which was intended as a drive at the whole *Unionist* faction; and, in order that our readers will better appreciate the drive, we will say that when Dr. Castleman first came here, the prairie itch was a very common disease, which he treated with such success that he subsequently wrote a treatise on it, giving the cause, remedy, etc.

Messrs. Editors: I saw a communication in the *Unionist*, signed "Colburn," who asks the "Waukesha Farmer," to "join his talents" with those of "poet Smith," saying "they could tell us some mighty pretty stories for children." As I have not the honor of a personal acquaintance with this distinguished poet, I have taken the liberty of selecting a few of his "poetic effusions," which you are at liberty to publish. [The poet Smith, whom the Doctor referred to, was another Philbrook.—EDITOR OF PLAINDEALER.]

"To 'Colburn's' bow and shaft I lay no claim,
He shot at men; I but at insects aim;
But grant, since I must war on little things,
Just flame enough to singe their puny wings.

"I hear a voice that cries, Lift up thine hand
Against the leaders of that 'union band';
Roused by the call of duty, I obey;
I draw the sword, and fling the sheath away.

"But where begin! when vermin thus abound,
No shaft I shoot can bloodless reach the ground.
O Curtis, Curtis, if thy history's true,
In thee, the d—l only gets his due.
Thou wretch, if spirits e'er reply from hell,
The purpose of thy black invention tell.
Dost thou not see thy 'union press' and tools
Create an endless jubilee for fools?
Couldst thou but see the loathing public cram'd,
With lie on lie—most justly art thou damn'd,
I'll take your vulgar trash and harm you not,
Poor d—l, you're not worth another shot.

“ There’s A. D. Smith with truth may boast of merits, too ;
 His paltry pieces are both short and few,
 And still his ‘ address ’ would be the more improv’d
 The more the number of the lines removed.
 Some heavy food that undigested lay
 Upon his organs did his wits betray.
 Not ‘ facts,’ but vulgar epithets came,
 And set him free from all restraints of shame.

“ Here’s milk-and-water Martin, half insane,
 With his native fogs condensed upon his brain ;
 Unnatural Martin, how, how didst thou dare
 Fowls of thine own feather thus to tear ?
 Were the same measure meted out to thee,
 How great, poor jackdaw, would thy sufferings be.

“ Dismissing Martin to the state of mist,
 The name of Castleman next comes on the list,
 A name well worthy of no second place,
 On the dark record of the land’s disgrace.
 When first ambitious hopes his heart inspired,
 The ROCK, congenial theme, his fancy fired ;
 A theme that nature did express devise,
 To find his hand its proper exercise.
 So well his pen the subject seem’d to match,
 And brought his thoughts so promptly to the scratch,
 That all who read the common inference drew,
 He wrote from feeling, and from knowledge, too.
 O Doctor, Doctor, where get’st thou so much brass,
 To think thy farthings would for guineas pass ?

“ Now I have thumped each lout I meant to thump,
 And my worn pen exhibits but a stump ;
 Let candor judge what motive nerved my arm,
 And if I meant my country good or harm ;
 For the dear-bought suffrage of the ‘ Union press,’
 I prize but little, and fear it less.

“ For you whose backs and sides and shoulders still
 Twinge with my blows, and, maybe, ever will ;
 Whose yard-long ears my honest muse offends,
 I’ll tell ye, dunces, how to get amends :
 To my poor lines be just such treatment shown,
 (For that’s your worst) as each has given his own.

“ To those who listen to my humble lay,
 Untouched and unattempted, let me say—
 No private malice on my course propelled,
 No anger spurred me, and no fear withheld ;
 In these my strictures on my fellow-men,
 Truth held the light, and conscience drove the pen.”

The following “epistle” of the “Geneseeans to the Reedites” was written by us [A. F. Pratt] for the last issue of the *Advocate*, and we are indebted to Curtis Reed, now of Menasha, for a copy of it, which is, probably, the only copy of that paper in existence. In order that “new-comers” may better understand and appreciate it, we give the following key to it: Councilman Curtis Reed, who then lived with his father, Seth, at Summit, conceived the idea of calling a meeting of the opponents of “division,” at Genesee, among its friends, and started around the outskirts of the county, among the opposition, to drum up recruits at that meeting. He went to Lisbon to enlist W. H. Thomas, better known as “Hank,” who, with David Bonham, were active politicians in that town; but David, having, a few days previous, been incarcerated for the killing of Keene, could not help. Hank was dubbed the “orphan boy.” From there he went over and saw William R. Hesk, at Menomonee, and Leonard Martin, who was a farmer in Muskego, and an opponent of Luther Parker, who had voted in the House for division. From there he called on Aaron Putnam, who was running a saw-mill at Big Bend, and was opposed to the division, but too cautious, as he is now, to invest any money where he

could not see an immediate return. The meeting was finally held at Genesee, and A. D. Smith and others addressed the crowd; but the friends of "division" outnumbered them more than two to one:

MR. EDITOR: The following epistle was picked up in the street near "Jenkinsville." You are at liberty to publish it if you choose.

Yours,

P.

MODERN CHRONICLES.

THE FIRST EPISTLE FROM GENESSEE TO THE REEDITES.

CHAPTER I.

1. And it was in those days when the division subject waxed warm that the mighty talents of Curtis, the son of Seth, were brought into action.

2. And behold, he left his home, amidst the tears of his father and mother, and went over and about Lisbon to secure the services of the orphan boy, Henry, a child of David.

3. From thence he passed over the waters of the mighty Menomonee, and entered the synagogue of King William.

4. Now, when William saw him yet a great way off, he ran to him, and fell down on his knees, and kissed him, saying, Well done, thou good and faithful servant; thou hast been faithful over Milwaukee's interest, and that is mine.

5. And Curtis answered and said unto him, Verily, verily, I say unto you, ye must be out and doing while the day lasts, or we shall never receive our reward.

6. And he said, Master, master, what wouldst thou have me do? And he answered and said unto him, Saddle thine ass and follow me; and he did likewise.

7. And as they passed over to a place called Brookfield, Curtis says unto him, Tarry thou here, and notify my people that there is to be a mighty gathering of the sons of Curtis over and about Genesee.

8. After he had spoken these words, he passed over to the land of Martin and Aaron, sons of Ethan.

9. Now, when Martin and Aaron saw him, they said unto him, Our tears have been our meat and drink, day and night. Our opponents have called on us for arguments: but lo! you have furnished us with none. When we asked you for bread, you gave us a stone.

10. And he answered and said unto them, Behold, I have come out to gather my people together at Genesee. Let those who hunger and thirst after facts come there and be filled.

11. Harken unto me, O Martin! and you shall draw around you the followers of Luther, and he shall become an outcast in Muskego and a wanderer upon the face of the earth.

12. Martin answered and said unto him, I will gather my tribe and follow thee, for thou art my strength, my guide and my salvation.

13. After saying these words, he turned unto Aaron and said, Wilt thou go and do likewise? Aaron answered and said unto him, How many pieces of silver will it cost to carry me over unto the land of Genesee?

14. Then said Curtis unto him, Whatever thou spendest in my cause shall be returned to thee tenfold in loaves and fishes; and he shut down his gate and followed him.

CHAPTER II.

1. Now, when all the Reedites had gathered together at Genesee, behold, they numbered twenty and two. And they began to marvel among themselves, saying, How can these things be? Have our numbers dwindled down to this?

2. Behold, in their midst stood a son of Waukesha, and when he saw who was there, he cried out with a loud voice, saying, Verily, verily, I say unto you, unless you are born again you can never become honest men.

3. And as they began to look out and around about, then they saw Waukesha indelibly written upon the countenance of every Geneseean.

4. And they cried aloud, saying, Hath the son of Seth nowhere to lay his head? And the Geneseeans cried out, saying, Crucify him! crucify him!

5. Then spake the Geneseeans and said unto them, O ye blind guides; ye that strain out the facts, and make us swallow your falsehoods; what came ye out for to see? a Reed shaken by the wind? Do you not all understand that your leaders were conceived in sin and rocked in the cradle of iniquity?

6. And the Reedites answered and said unto them, Our ways are as much above your ways as Summit is north of Genesee; and our interest is as far from your interest as Summit is from the center of Waukesha.

The following article, purporting to come from Dr. Castleman, was written for the *Advocate* by us [A. F. Pratt], and the answer by A. W. Randall:

SOFT SOAP OFFICE, SIGN OF THE WEATHERCOCK, }
DELAFIELD, March 28, 1846. }

To the Publishing Committee of the *Waukesha Advocate*:

GENTS—At a meeting of "those settlers upon canal lands who are opposed to division," held at my office, a few nights since, I had the honor of being one of a committee appointed under the following resolution:

Resolved, That a committee of three be appointed to wait on the Publishing Committee of the *Waukesha Advocate*, and ask them to resign.

Believing myself more competent than a majority of the committee, I have "taken the responsibility" to

address you on this subject. The project which you advocate has consumed the most of my time for the last six weeks. As many of you have known me for the last ten years, it would be needless for me to add that every act of mine has *flown from the purest of motives*, believing, as I do, that some of our people, whom I have the honor to represent, are opposed to "this kind of division." I will not attempt to disguise the fact that I have "labored in vain," traveling this county, to convince the tax-payers that their taxes would be increased by division; and I will assure you, gentlemen, that I am convinced that the only sovereign remedy for "our disease" is to persuade you to resign. You are so well aware, gentlemen, of the object of this request that it is unnecessary for me to state it here, or the reasons which might be advanced to induce you to comply. Suffice it to say that it is from no objection to your holding the office, the duties of which we are satisfied you perform honorably and efficiently; but we do humbly object to the unhealthy influence you exert through this community. For the satisfaction of myself and other disappointed aspirants, whose budding prosperity has been so suddenly nipped, I beg leave to request a reply at your earliest convenience. Accept, gentlemen, assurances of my respect and esteem.

Yours, in haste,

PILL GARLICK.

ADVOCATE OFFICE, April 1, 1846.

Pill Garlick, Esq.:

SIR—Your letter in which, under a resolution of certain persons in Delafield, you, as member of a committee of three appointed for the purpose, ask the Publishing Committee of the *Waukesha Advocate* to resign their office, is before me as agent for that committee. I have the honor to state to you, in behalf of that committee, that the office they hold is one of honor and profit, and it would be doing injustice to the power that appointed them, to resign and leave their office vacant, before the object was accomplished, and the funds placed in their hands. After this, if the public good requires it, they will resign or do anything that they can do according to law. One of the committee has written to Gov. Smith for his views and opinions in relation to the course we ought to pursue. When his answer is received, it will be made public. In the mean time, we advise you to urge upon your friends that they take out for your especial benefit a commission called "lunatico stultus."

I am, with much feeling and commiseration, your devoted friend,

JOHN CHILBLAIN.

We would here remark that the friends of "division" carried the election by a large majority; the principal voting, however, was done at Waukesha and Summit, which, we believe, cast more votes than they ever have since. At Summit, Mr. Reed and his friends kept the polls open three days, and stopped every teamster from the east and west, and secured his vote. At this poll, Deacon Joseph Turner, a very conscientious man, being Chairman of Supervisors, and having taken a solemn oath to prevent all fraud, etc., it was more difficult to poll all our votes. The election was held at Justice Sloan's office, which stood where Mr. Sanner's tailoring establishment now stands, and a pane of glass was taken out of the window to receive the votes; but in order to satisfy the old Deacon that all were legal voters, a box was placed on the outside for boys to stand upon, so they would look like men to these *honest* inspectors of the election.

I will now resume my own narrative.

After the settlement of the county seat question, which was decided in favor of Waukesha, we then of course had to have county buildings. They were built the next year of our famous Waukesha limestone. They are of no great dimensions, but of a good, substantial character and will answer the purpose for years to come. But we do not feel proud of our county jail; it is simply a disgrace to our county and ought to be replaced with a good, substantial, modern jail building in connection with the Sheriff's residence, at once, as our county is out of debt, and abundantly able to make such an improvement without its being a burden to any of the tax-payers. Our county offices are most of them detached from the court house in a fire-proof building; those that are located in the court house have fire-proof vaults, so that all of our county records are safe in case of a destruction of the building. By 1846, Waukesha had grown quite rapidly, and our main business street had taken quite a start for a new town, as it was indeed new. Our abundance of limestone gave us a great advantage in making permanent improvements. We could build much cheaper than with wood. This stone could be made into lime cheaply; sand was also abundant, near at hand, and most anybody with energy and a little money could build in Waukesha County. It is not likely Waukesha ever will be much of a commercial county. We have scarcely any manufactories even now, but we had thirty years ago the most beautiful country villages in Wisconsin, and the improvement is still onward. M. D. Cutler and Charles R. Dakin, a prosperous merchant amongst us, donated ten acres of land to Carroll College. A building was erected by the liberal donations of the people, and the school was opened by E. Root, as its first Principal. Soon after, Dr. Savage, from New York, came and took the presidency. Other places around us had taken the lead in these matters, and Dr.

Savage, after a few years of struggle and hard work, died, leaving the college with but a very small endowment, and it has remained to this day a feeble and unremunerative place of learning. The grounds and building are beautifully located and should be well patronized. Up to 1851, our only outlet to Milwaukee was by carriage road; but we began to feel, before that, a railroad would be of some benefit to us. Therefore the subject was agitated in Milwaukee and along the proposed line until the enterprise took such shape that the work was really commenced and the Milwaukee & Waukesha Railroad was built to Waukesha in March, 1851, and the same year it was finished as far as Whitewater. Since that time, our prosperity has been onward until now we have a population of nearly 30,000, and the prospect is good for a large increase within the next ten years. The public press has done something for Waukesha. The first paper was published here in 1845, by C. C. Sholes, and was called the *American Freeman*. It was Anti-slavery through and through, and as it was the pioneer paper in that direction in the West it soon had a wide reputation. The enterprise was projected by the strong men of our then new Territory by issuing stock in \$10 shares, Mr. Sholes being the editor and publisher. After the first year of its existence I became the owner of the paper by buying the stock and assuming the liabilities, and published the *Freeman* in Waukesha some three years, Ichabod Codding being its editor. We made it hot for all proslavery sympathizers. The circulation of the paper was largely increased, when S. M. Booth, direct from Connecticut, became the editor and half owner. We after this moved the press and fixtures to Milwaukee and changed the name to the *Milwaukee Free Democrat*. From that time forward, for some eight years, were recorded most momentous events in the history of our county. A strong and influential party had made its appearance and was not to be put down until slavery was wholly abolished, which was finally accomplished by the bayonet in a most sanguinary civil war. I cannot close without saying that the pioneer period of my life embraced by far its happiest days. There was no aristocracy, fine feathers, stiff necks or big feeling in those days. We all felt an interest in each other and each other's prosperity, and worked accordingly. The interests of the whole never suffered because of some petty personal jealousies. We were all together and worked shoulder to shoulder. Those were glorious old days, free from factions, neighborhood wrangles, scandals and efforts to outdress or override each other.

WAUKESHA COUNTY AGRICULTURAL SOCIETY.

This flourishing society, with its predecessor, has the honor of being the oldest duly organized agricultural association in the State of Wisconsin, though others had charters granted by the State sooner than any in Milwaukee or Waukesha Counties. This first agricultural exhibition, only the most meager accounts of which have been preserved, was conceived and pushed to an end by the late Joseph Turner, Talbot C. Dousman, of Waterville; E. W. Edgerton and George Paddock. Possibly some others had something to do with its formation. The exhibition was held, probably, on land now owned by Mrs. Dunbar, in Waukesha Village, on the west side of the street, perhaps thirty rods south of the Glenn Spring, on the 28th of October, 1842. The grounds were not even inclosed, a disastrous drawback in the management of a fair thirty-eight years later. What the admission was is not recalled by those present, but the exhibition is generally believed to have been free, and that a collection was taken up to secure enough cash to pay the premiums. By whom the premiums were awarded is not recorded, further than that "Joseph Turner was Chairman of the committee." They all were paid, however, to men who resided in what subsequently became Waukesha County. The whole credit of the affair, therefore, belongs to this county, though the name of the first organization was the "Milwaukee County Agricultural Society." The awards, amounting to about \$40, were as follows:

For the best working cattle the premium of \$3 was taken by George Paddock, of Warren (now Merton). Talbot C. Dousman, of Genesee (which then comprised Ottawa), took the prize for the best four-year-old oxen. Prizes of \$2 each were awarded to George Paddock and Nelson Olin, of Genesee, for the best three-year-old and two-year-old steers, respectively. T. C. Dousman

received \$1 for the best pair of yearling steers; George Paddock also received \$1 for the best two-year-old heifer; James Holton, of Prairieville, for the best yearling, and E. Rowley, of Prairieville, for the best heifer calf. Curtis Reed, of Summit, was awarded \$2 for the best milch cow, and Thomas H. Olin, of Pewaukee, \$1 for the best bull calf.

Of the horse kind only four received premiums; B. F. Chamberlain, of Prairieville, taking \$2 for the best stallion horse; Hosea Fuller, Jr., of Pewaukee, the same for the best two-year-old colt, and T. C. Dousman the same for the best mare and colt.

Two-dollar premiums were taken by George Paddock for the best ewe and for the best buck lamb, and by Nathaniel Walton, of Prairieville, for the best fine-wool buck. Mr. Walton was also awarded \$1 for the best ewe lamb.

In the line of hogs, Barstow & Lockwood, of Prairieville, and E. W. Edgerton, of Summit, took \$2 premiums for the best boars over and under a year old; J. B. Winton, of Prairieville, for the best sow and pigs, and James Holton for the best sow under a year old.

Discretionary premiums were awarded as follows: To John Long, of "Mequanago," \$2 for the best four-year-old bull; James Holton, \$2 for the best three-year-old heifer; Mrs. Nathaniel Walton, \$2 for the best sixty-six yards domestic flannel; Mrs. Joseph Turner, \$1 for the best stocking yarn; Nelson Olin, for best plowing, \$3, and John McDermid, of Prairieville, for second best plowing, \$2. The officers said that McDermid's plowing was slightly the better, but Olin's was done more rapidly, a fourth of an acre being plowed by him, without extra driver, in forty-three minutes, the furrow being nowhere less than four inches deep. The same work took McDermid forty-four minutes. There were three competitors at the plowing match, which took place on Nathaniel Walton's farm, not far from where the Wisconsin Industrial School for Boys now stands, and it was an interesting and spirited contest. The award of the judges was by no means satisfactory, McDermid's friends claiming that the quality of the work was of far more importance than the quantity, and Olin's friends claiming the contrary, which latter claim was officially sustained. That plowing match was the principal theme for animated discussion during weeks and months after it was over with, and resulted in various other matches in the county.

To close the exhibition, a little speech was made, and the President, Joseph Turner, thanked E. W. Edgerton for a cabbage head three feet in circumference and weighing fourteen pounds three ounces. Mr. Edgerton was the only exhibitor at that memorable fair who took his premium in thanks, though not the only one who was paid in full. Thus ended the first agricultural fair in the county, and, so far as known, in the State.

In the Milwaukee *Sentinel* of December 21, 1842; appeared the following notice:

Notice is hereby given that the first annual meeting of the Milwaukee County Agricultural Society, will be held at the Prairieville Hotel, in the town of Prairieville, on the third Thursday in January next, being the 17th day thereof, at 12 o'clock M., for the election of officers and the transaction of such other business as is calculated to promote the interest of the society. The unexampled success which has attended its efforts since its organization, should encourage the hearts and give a new impetus to the exertions of the whole agricultural community. Matters of interest, and business of importance, are expected to be brought before the society. A general attendance is requested, not only of the farmers, but of all interested in the enterprise.

PRAIRIEVILLE, December 13, 1842.

JOSEPH TURNER, *President*.

In response to the above call a meeting was held at Prairieville on Tuesday, January 17, 1843, at which the following proceedings, copied *verbatim*, were had:

The annual meeting of the society was held at Prairieville, on Tuesday the 17th of January, inst. This being the time for awarding premiums for grain and field crops, the Executive Committee awarded to Joseph Turner \$3 for the best yield of corn raised on one acre, it being seventy-three and nine seventy-fifths bushels, weighing seventy-five pounds to the bushel in the ear; this was the second crop from a piece of land known as oak openings, without any manure. Owing to the season, which was very unfavorable, there was no competition for field crops. It is generally believed that no farmer realized more than half a crop of corn the past season.

The society, after disposing of the ordinary business, proceeded to the choice of officers for the ensuing year: Joseph Turner, of Prairieville, was elected President; and Sylvester Pettibone, of Milwaukee; M. Field, of Mequanigo; W. W. Treadway, of Eagle; Nelson Olin, of Genesee; S. Sanborn, of Summit; D. Bonham, of Lisbon; T. H. Olin, of Pewaukee; J. C. Howard of Lake; S. R. Manning, of Prairieville; A. A. Flint, of Vernon; I. C. Loomis, of Franklin; P. V. Monroe, of New Berlin; Judge Brackett, of Brookfield; William O. Underwood, of Wauwatosa; G. S. West, of Greenfield; A. Rowe, of Menomonee; J. Brazelton, of Granville; L. Parker of Muskego; William Shew, of Oak Creek and G. Paddock, of Warren, Vice Presidents; C. L. Rockwood, Recording Secretary; William A. Barstow, Corresponding Secretary; Elisha W. Edgerton, Treasurer; E. D. Holton, H. N. Davis and G. C. Cone, Executive Committee.

Thompson Richmond

LISBON.

The spirit manifested by the farming interest in the county argues well for this enterprise, and it is hoped that no farmer will hereafter be discouraged from entering the lists as a competitor, though the season should prove unpropitious.

It is expected that the friends of the society will be such the coming year, that the amount and number of premiums will be greatly extended.

PRAIRIEVILLE, January 17, 1843.

JOSEPH TURNER, *President*.

No exhibition or fair was held in Waukesha during the year 1843. Finally, after Waukesha had been separated from Milwaukee County, two fair associations were organized, one for each county. But the Mexican war, the increasing interest in politics, and the business of making the Territory into a State, occupied the attention of the people to such an extent that neither organization accomplished much in their proper directions. Therefore, after due consultation and public notice, on the 9th of January, 1852, a meeting of the Waukesha and Milwaukee County societies was held at the court house in Waukesha, and a consolidation effected under the title of the "Milwaukee and Waukesha Agricultural Society." No fair was held for the year 1852, on account of some difficulty with the State Fair officers, of whom grounds for the exhibition had been engaged. The next year, 1853, a fair was held at Waukesha. There was not much of a fence around the fair grounds, and many who are prominent business men to-day in the county were caught stealing in without tickets, while some succeeded in getting in without being caught. Lyman Goodnow was gate-keeper at the fair held in the stone schoolhouse, soon after it was finished, at Waukesha. He also sold tickets, which were 10 cents each. The managers gave out bunches of them which were charged against Mr. Goodnow, the account being balanced by the return of the money or the tickets. At the close of the fair, Mr. Goodnow emptied over \$70 before the fair managers, which he had taken in for tickets, while they had only \$20 charged against him. He was far more honest than the good-natured managers were accurate. They took his pile and wrote him down as an honest man. At this fair, the address was delivered by A. D. Smith.

In 1854, the Milwaukee and Waukesha societies dissolved partnership, and January 10, of that year, a meeting was held at the court house, and a society for Waukesha County alone organized. George C. Pratt, Robert Black and I. N. Cadby composed the committee on constitution. In September, of that year, the new society held a fair at Waukesha; also in 1855 at the same place.

In July, 1856, a meeting was held at the court house in Waukesha, to organize a county society under the law passed the previous winter. W. D. Bacon, Martin Field and A. G. Hanford composed the committee that prepared the articles of association, and George C. Pratt, James Davis and Horatio N. Davis composed the committee authorized to purchase grounds. They first purchased ten acres of Nathaniel Walton, on the northwest corner of northwest quarter of Section 10, near the State Industrial School, at Waukesha; but as it was not satisfactory, W. D. Bacon transferred to them, in exchange for the first purchase, ten acres where the grounds now are, on the southeast corner of the west half of the southwest quarter of section 3. Afterward, in 1869, additional land was purchased, so the society now owns about fifteen acres. The grounds are provided with the necessary buildings and a half-mile race-course, and the society is in a flourishing condition. Exhibitions have not been held every year since the society was organized, owing to temporary difficulties; but of late the fairs have been very successful. The attendance has been large, the exhibitions of unusual merit and the receipts satisfactory. This association has several times taken the banner offered by the State Agricultural Society for the best general exhibition of all articles. In fine stock of all kinds and fruits, it has excelled during several years.

The Presidents, Secretaries and Treasurers of the society since 1852 have been as follows, in the order named:

1852—E. W. Edgerton, Cyrus Hawley, Talbot C. Dousman. 1853—Talbot C. Dousman, R. N. Messenger, S. S. Daggett. 1854—T. C. Dousman, George C. Pratt, George Hatch. 1855—B. R. Hinckley, S. S. Case, George Hatch. 1856—57—James Davis, H. N. Davis, Chauncy C. Olin. 1858—John Gale, George C. Pratt, John Forbes. 1859—Thomas P.

Turner, George C. Pratt, John Forbes. 1860—Talbot C. Dousman, Henry Shears, John Forbes. 1861—Winchel D. Bacon, M. Sellers, R. B. Hammond. 1862—W. D. Bacon, C. C. White, R. B. Hammond. 1863-64-65—W. D. Bacon, Vernon Tichenor, R. B. Hammond. 1866—Edward Porter, O. M. Tyler, J. L. Smith. 1867-68—Edward Porter, Elihu Enos, J. L. Smith. 1869—W. D. Bacon, W. V. Tichenor, O. M. Tyler. 1870—Edward Porter, W. V. Tichenor, O. M. Tyler. 1871—W. D. Bacon, W. V. Tichenor, O. M. Tyler. 1872—J. C. Starkweather, F. H. Putney, O. M. Tyler. 1873—Isaac Lain, Frank H. Putney, A. J. Frame. 1874—Isaac Lain, F. H. Putney, O. M. Tyler. 1875—T. C. Dousman, F. H. Putney, O. M. Tyler. 1876-77—W. A. Nickell, George C. Pratt, M. S. Hodgson. 1878—John Porter, G. C. Pratt, M. S. Hodgson. 1879—Ephraim Beaumont, M. L. Butterfield, George F. H. Barber. 1880—Isaac Lain, M. L. Buterfield, Geo. F. H. Barber.

DAIRYING IN WAUKESHA COUNTY.

The dairying interest in Waukesha County has assumed quite an importance, mostly confined to cheese factories. We find Messrs. George Lawrence & Son started a new era by building a fine, large commodious building for a creamery, calling it the Rose Glen Creamery (the name of the farm at the time). They began operations May 6, 1878, and for two years have never failed to receive milk every day, winter and summer. They manufacture both butter and cheese. A. J. W. Pierce started a smaller creamery the same time at Summit Corners, in Summit. This was run not over successfully for the owners, but helped build up the high reputation of Waukesha County for producing gilt-edge butter.

Messrs. George Lawrence & Son were the winners of a nickel-plated milk scales valued at \$100, for the best single tub of butter made in America; also, received the first prize for creamery butter made in Wisconsin, and A. J. W. Pierce received the second prize for creamery butter made in Wisconsin. The products were exhibited in New York City December 8, 1878, at the first international dairy fair ever held in this country. This places Waukesha County not only in a very exalted position in this particular line, but at the head of all counties in the Union for first-class butter. In 1879, F. Schultis, of South Genesee, and — Steel, of Genesee, converted over their cheese factories into creameries. These are all the creameries to be mentioned that are in operation at the present time. Private dairies, or small creameries, where the milk from only one dairy is supplied, are quite numerous throughout the county.

Waukesha County abounds in sweet, nutritious grasses, and has a bountiful supply of clear cold water from the best springs in the country. All that is required is the skill of man to utilize the great advantages nature has provided, by caring for the cows and by the scientific handling of their product. The creamery plans of handling milk are numerous, but generally, and doubtless with the best success, milk is set in cold spring water, as at Rose Glen Creamery. Such creameries have running springs in their buildings, so arranged that the water can be let off or allowed to run over the top of large tanks, as may be required. "Setters" eight inches in diameter and nineteen inches deep, of tin, are used to set the milk in these tanks of water. The milk is skimmed after setting twenty-four hours. The cream is held twenty-four hours longer, and allowed to sour slightly. Revolving churns are used, run by steam power. When small particles of butter, the size of small shot, present themselves, the churn is stopped, strong brine is put in, and after a few revolutions of the churn the buttermilk is drawn, when new brine is added and the butter washed thoroughly, after which spring water is thrown in and the butter washed again. This leaves the butter entirely clear of buttermilk. One reason why Waukesha County butter stands so high for its keeping qualities, is that manufacturers use one ounce of the best dairy salt to each pound of butter—more than is used elsewhere.

The first steam-power butter-worker ever used in the State was introduced in the spring of 1880 into George Lawrence & Son's Creamery. There has been an immense increase in the production of butter in Waukesha County recently, the product of 1878 being nearly ten times greater than that of 1870. This demonstrates that the creameries have not only made a great

reputation for Waukesha County butter, but built up an exceedingly profitable business for its farmers.

The first cheese factory, for making cheese alone, was built in Summit by Mann & Dousman in 1870. During the following year, 1871, Mann, Stone & Hinckley erected the second factory in the county, also in the town of Summit. There are now a dozen cheese factories in the county in successful operation, and their product will be greater this year than for several years past, cheese selling at more profitable figures. The town of Waukesha with four factories and Genesee with three, lead the other towns in the manufacture of cheese. Although nature has done more for the butter and cheese maker in Waukesha than in any other county in the State in the way of grass, spring water and facilities for securing ice, the dairy business is comparatively young in this locality. It is growing, however, as the cheese product increased from the product of one factory in 1870 to that of twelve in 1879, which received the milk of between 3,000 and 4,000 cows. According to the last annual report of the State Dairymen's Association, the factories in this county were Olin & Clinton's, T. C. Donsman's, B. R. Hinckley's, Montrey Factory, Frank Shultis' (two), Rose Glen, D. Ostrander's, M. Rowell's and the Waterville Factory.

WOOL GROWING AND SHEEP RAISING.

It was early found in the settlement of Waukesha, that the farmer, to be successful, must diversify his products—that to depend on grain-raising wholly would not do; and the enterprise that brought the first settlers to this country caused them to seek not only for stock, but for the best of stock. Perhaps this enterprise was not more manifest in any one thing than in the improvement of merino sheep. The prevailing opinion among farmers had been that a sheep was a sheep, and that was all there was of it; and that so many sheep would produce just so much wool. But some of the Waukesha farmers did not entertain this idea. They believed in improvement in this as well as in other stock, and sought for and bought improved animals as soon as presented. About 1850, J. D. Patterson, of New York, introduced some merino sheep that sheared greater fleeces, and were really better sheep than any Waukesha farmers had. A. E. Perkins, of Mukwonago, purchased of these, and, finding they improved his flock, was naturally on the lookout for further improvements. In 1861, Mr. E. S. Lake, brought in here a lot of rams from Vermont, which were distributed in the county, Mr. Perkins purchasing most of them, about 40 in number, which he let and sold to various parties, and which proved of great value to the flocks in this and adjoining counties. This stimulated the farmers to greater efforts to improve their flocks, and Mr. Perkins, in particular, who visited Vermont the following year, together with Mr. Lake, of Saxton's River, Vt., made large importations from that State. About this time, John Paul, of Genesee, George Lawrence, of Waukesha, Perry Craig, of Vernon, and others, engaged earnestly in the business, and spared neither money nor pains in getting the best sheep to be found in the country. These may be said to be the pioneers in the fine-wool sheep improvement, and from these others have sprung up, until now Waukesha County probably takes the lead of any county in the State in improved merino sheep. The breeders regret that George Lawrence left the business for the creamery, for no one manifested greater enterprise in the business than did Mr. Lawrence, and no one was rewarded with greater success. There was no great interest or improvement in the long-wool, or Cotswolds, until about 1861, when E. Porter, of Waukesha, began and made large importations from Canada. These importations seem to have been made with great skill and wisdom, and Waukesha soon took the lead in this kind of sheep. Now, George Harding and others are offering as good animals of this kind as can be found in the State. It may be stated here that many farmers made a mistake in crossing these with the fine-wools by using the grade animals; that is, the lambs produced by the full-blood rams for stock animals. It is due to Mr. Porter to state that this was done against his protests. Only those who have persistently used full-blood male animals have made a complete success of the business, which has grown to unusual proportions in Waukesha County. Sheep-shearing festivals are held annually, and are largely

attended. All the dealers in full-bloods have grade-books, which show the pedigree of their stock, and the business is a scientific as well as a very profitable one. It brings annually thousands of dollars into the county, and the managers of the woolen-mill at Waukesha say their finest grades of cloth are made from Waukesha County wool, than which there is no better. In 1839, only sixty-seven pounds of wool were produced in the territory now comprising the two counties of Milwaukee and Waukesha, and there were only 790 sheep and lambs in the county, valued at about \$1,000. In June, 1879, there were 89,969 sheep and lambs in Waukesha County, valued at \$150,945 by the Assessors, but really worth \$300,000 at the lowest. Thus, in forty years, the number of animals has increased a trifle over 10,000 per cent and the value of them 30,000 per cent—an astonishing growth. But sheep-raising and wool-growing have become a science, the chief growers combining to help each other in producing pure-blooded stock and the finest wool. To do this, an organization called the "Wool-Growers' Association" was formed. A record of the first meeting, held June 11, 1874, is as follows:

"The meeting for a more extensive association of the wool-growers of this part of the State, was held at Caldwell's Prairie last Thursday, agreeably to the resolutions adopted at the sheep-shearing festival on May 14, 1874. The meeting was quite generally attended by wool-growers, and speeches were made by Messrs. Perkins, Humbert and others, a good number of stanch, wide-awake men being present. A constitution and by-laws were adopted, and officers elected for the ensuing year.

"The object of this society is for the promotion and encouragement of breeders and wool-growers, that they may attain the highest standard of perfection in quality of sheep, value of fleece, and management of flocks. Also, to establish some standards, by which they may be governed in principles of breeding, and awarding prizes at fairs.

"The officers for the coming year are: A. E. Perkins, President; E. Milroy and M. L. Ayers, Vice-President; George Lawrence, Jr., Secretary; J. W. Parks, Treasurer. The name of the society is 'The Southeastern Wisconsin Sheep-Breeders' and Wool-Growers' Association.'

"The relative merits of sheep were discussed in a lively manner. Those interested in sheep-husbandry are cordially invited to become members, or attend meetings, which are open to all. The meeting adjourned to the last Thursday in August, 1874, at Caldwell's Prairie.

"G. LAWRENCE, JR., *Secretary.*"

This association strengthened and grew until it is now the Wisconsin Wool-Growers' Association—a State institution. It was born in Waukesha County, and has been the means of adding hundreds of thousands of dollars to the wealth of her citizens, besides establishing the reputation of this locality as one of the very foremost counties in the Northwest in producing fine wool and blooded stock.

At the Centennial Exposition at Philadelphia, in 1876, John Paul, of Genesee, and George Lawrence, Jr., of Waukesha, were awarded each a medal and diploma for their exhibition of sheep.

In addition to bettering the financial condition of the county, the business of producing the best stock possible has a tendency to cultivate and educate those engaged in it.

WAR RECORD.

It were honor enough for any work of this kind, and for its compilers and publishers, if it had nothing more to preserve than the record made by the citizens of the county in the war of the Rebellion. Solferino, Austerlitz, Waterloo, Marston Moor, Lodi, Mount Tabor and Grenada are making a gilded journey down through the ages in immortal song, resplendent with the richest decorations of genius; but they were not greater than Shiloh, or the Wilderness, Gettysburg, Lookout Mountain or a score of other battles that stand out boldly in the history of the Rebellion. The work of patriotism and genius in decorating the achievements of American soldiers has just begun; and the least of the details of those mighty events should be sacredly preserved for the pen and the brush of future genius.

In the completed picture, in the almost limitless scroll of fame, there will be none to out-shine or out-honor the soldiers from Waukesha County. She is peculiarly rich in the record of

men—officers and privates—as well as in the record of deeds. But it is unnecessary to burden the pages of history with word-pictures, for the deeds themselves far outshine their most glowing descriptions.

The news that Fort Sumter had been fired upon and had surrendered reached Waukesha, Oconomowoc and places along the railroads Saturday evening, April 13, 1861, but was not generally disseminated until Sunday. Everything was dropped, and people rushed to the centers of population and information for the latest news. Newspapers were in demand and commanded almost any price, one man, who afterward became a Colonel, giving his hat for a copy of the Milwaukee *Evening Wisconsin*.

Impromptu meetings to enroll volunteers and organize to sustain the Government were held in almost every part of the county. The first of importance of which any record is left us was held at Robinson's Hall, in Waukesha, Saturday evening, April 20, 1861, though a large meeting was held at Oconomowoc at about the same time.

To adequately describe the intensity of the patriotism and excitement displayed at this first meeting would be wholly impossible. The crowd was as large as the hall would hold, and the streets were full besides. Winchel D. Bacon was made Chairman; C. G. Heath and Malcom Sellers, Vice Presidents, and C. C. White, Secretary.

On motion, a committee consisting of H. N. Davis, P. H. Carney and V. Tichenor was appointed by the Chair to present resolutions expressive of the sense of the people of Waukesha on national affairs, who made the following report, which was adopted amidst the wildest hurrahs:

WHEREAS, A forcible dissolution of these United States is *threatened*, and is being actually attempted by armed bands acting without authority, and in defiance of the Constitution and the laws of the country, we, the people of Waukesha, irrespective of party, being of the opinion that the time for *words* has passed, and that the hour for *action* has arrived, do

Resolve, That the preservation of the American Union in its integrity is the paramount duty of every citizen of the United States.

That in view of the preservation of the Union and the enforcement of the laws, the political differences which have heretofore existed should be totally effaced.

That we hereby ratify the policy of the Administration, as indicated in the proclamation of President Lincoln, and that we believe that the restoration of the National flag to the places from which it has been removed by traitors is necessary to secure tranquillity at home and respect abroad.

That to the preservation of the Union and to the enforcement of the laws, we hereby pledge our *lives*, our *fortunes* and our *sacred honor*.

During the absence of the committee, speeches were made by C. K. Davis, William S. Hawkins, M. Sellers, C. C. White, H. K. Smith, D. Casey, Rev. Dr. Savage and Rev. J. M. Walker, all in favor of burying past differences and offering an united support to the Constitution and the laws, and during the meeting stirring addresses were made by S. W. Warner, Alexander F. Pratt and others.

M. G. Townsend, C. G. Heath, A. S. Bennett, B. F. Cram and O. Z. Olin were appointed a committee to establish a recruiting station at Waukesha.

The following resolutions, offered by C. C. White, were unanimously adopted:

Resolved, That while recognizing in its fullest extent the right of free speech, we hold that this right authorizes no man to lift up his voice in favor of his country's enemies, and that no such men or such sentiments will be tolerated in this community.

Resolved, That a Vigilance Committee of thirty-four *men* be appointed by the Chair.

The Chair offered the following, which was adopted:

Resolved, That the citizens of Waukesha agree to provide all needful assistance to the families of those who may enlist in their country's service, during their term of enlistment, and for the purpose of creating a fund for the purpose above named, we agree to pay the sums set opposite our names *pro rata* as shall be required.

The following subscriptions were made on the spot:

Isaac Lane, \$200; M. G. Townsend, \$100; O. M. Tyler, \$50; T. D. Cook, \$100; F. A. Maurer, \$25; R. Mercer, \$30; J. A. Williams, \$50; V. Tichenor, \$25; C. C. White, \$50; E. Porter, \$50; C. Jackson, \$50; W. D. Bacon, \$100; L. Purdy, \$25; C. G. Heath, \$25; D. Howie, \$5; A. F. Root, \$5; H. N. Davis, \$25; W. D. Horton, \$5; E. M. Randall, \$20; Capt. G. Lawrence, \$100; Phineas Clawson, \$50; L. A. Mann, \$25; C. A. Leuthstrom, \$50; John

Tyler, \$25; John Collins, \$10; S. W. Warner, \$25; A. S. Putney, \$25; L. B. Wright, \$20; John Gaspar, \$25; C. Blackwell, \$25; G. A. Hine, \$50; Charles Stein, \$15; E. Chester, \$10; W. Nickerson, \$10; H. A. Kennedy, \$20; K. Orvis, \$5; J. A. Hibbard, \$5; B. F. Chamberlain, \$50; V. H. Porter, \$10.

The Chair was authorized to appoint a Central Committee and a committee of one from each town to receive subscriptions and push on war measures. He appointed as follows:

Central Committee, Capt. George Lawrence, O. Z. Olin, Findlay McNaughton; Menomonee, Jesse B. Nehs; Brookfield, Aaron V. Groot; Pewaukee, J. H. Waterman; Lisbon, Henry Phillips; Merton, G. W. Cottrell; Oconomowoc, P. A. Woodruff; Summit, E. M. Danforth; Ottawa, T. C. Dousman; Eagle, Marvin H. Bovee; Mukwonago, A. L. Perkins; Muskego, P. L. Bigelow; New Berlin, Benjamin Hunkins; Vernon, William Guthrie; Genesee, Thomas Sugden; Delafield, Albert Alden; Waukesha, D. Casey.

Before adjourning, the enthusiastic crowd sang the "Star Spangled Banner" with wonderful effect, and an enlistment roll was opened. The first man to sign it was A. S. Bennett. He was, therefore, the first man to enlist in Waukesha County. He was killed as Captain in the regular army in 1879, while fighting the Indians in the West. He was a bachelor. The Recruiting Committee opened an office on Monday, April 22, in C. G. Heath's office, and recruiting began in earnest. At about the same time, an enlistment roll was opened at Oconomowoc. During the week following this meeting similar ones were held in Pewaukee, Mukwonago, Delafield, Eagle and nearly every other town. On Monday evening, another mass meeting was held in Waukesha, at which enthusiasm ran high. More cash was raised to care for the families of soldiers, and pledges were offered on every hand to furnish wood, meat, flour and provisions to soldiers' wives and children. Men offered houses free of rent; physicians offered medical attendance free of charge.

Patriotism and generosity ran riot. War meetings were appointed in almost every school-house in the county, and speakers were in great demand. The demand, however, was supplied, as men who had never made a speech before, and have not since, proved to be fountains of patriotic eloquence.

Party lines were nearly obliterated, old feuds were forgotten, and a new era in good-fellowship and patriotism inaugurated. Old enemies, both political and social, met at recruiting gatherings, and made speeches together. It was a remarkable sight.

Patriotism and a desire to do something for their country were not confined to the men. The ladies were busy preparing little things for the soldiers to take with them; making flags, committing patriotic songs, making rosettes of red, white and blue, and lending their influence by being present at all war meetings. They met at Jackson's Hall in Waukesha, April 31, and formed a "Soldiers' Aid Society" which had almost weekly meetings and continued to work for the comfort and health of the boys in blue until the close of the Rebellion. They collected money, food and clothing; made new clothing, forwarded jellies and medicines; secured nurses and did everything that human hearts and hands could desire and carry out. The thanks they received from sick and wounded soldiers during that long struggle would be reward enough for a whole life devoted to works of philanthropy. Scores of letters were sent home telling how health and lives had been preserved by what the ladies had done.

Wisconsin's "noble war Governor," Alexander W. Randall, was a Waukesha County man, and his proclamation, which went far to put the State at the front in raising volunteers, did much to create the unbounded enthusiasm that burst forth in this county. Its author having been for many years a resident of Waukesha County, that proclamation may rightfully claim a place in this work. It is as follows:

TO THE LOYAL CITIZENS OF WISCONSIN: For the first time in the history of the Federal Government, organized treason has manifested itself within several States of the Union, and armed rebels are making war against it.

The Proclamation of the President of the United States tells of unlawful combinations, too powerful to be suppressed in the ordinary manner, and calls for military forces to suppress such combinations, and to sustain him in executing the laws.

The treasury of the country must no longer be plundered—the public property must be protected from aggressive violence. That already seized must be retaken, and the laws must be executed in every State of the Union alike.

A demand made upon Wisconsin by the President of the United States, for aid to sustain the Federal arm, must meet with a prompt response.

One regiment of the militia of this State will be required for immediate service, and further service will be required as the emergencies of the Government may demand.

It is a time when against the civil and religious liberties of the people, and against the integrity of the United States, parties, politicians and platforms must be as dust in the balance.

All good citizens, everywhere, must join in common cause against a common enemy.

Opportunities will be immediately offered to the existing military companies, under the direction of the proper authorities of the State, for enlistment to fill the military demand of the Federal Government, and I hereby invite the patriotic citizens of this State to enroll themselves into companies of seventy-eight (78) men each, and to advise the Executive of their readiness to be mustered into service immediately.

Detailed instruction will be furnished upon the acceptance of companies, and the commissioned officers of each regiment will nominate their own field officers.

In times of public danger, bad men grow bold and reckless. The property of the citizen becomes unsafe, and both public and private rights liable to be jeopardized. I enjoin upon all administrative and peace officers within this State renewed vigilance in the maintenance and execution of the laws, and in guarding against excesses leading to disorder among the people.

(Signed) ALEX. W. RANDALL.

L. P. HARVEY, *Secretary of State.*

This proclamation, together with the fact that Walker L. Bean had been given a commission to enroll a company, and the Prairie du Chien (Chicago, Milwaukee & St. Paul) Railway had offered to transport volunteers free, added fuel to the fire throughout the county. There being but one recruiting office at first, in the county, large numbers of soldiers enlisted in Milwaukee and adjoining counties, no one being aware at that time that the county would need all the men she could spare to fill her own quota and to avoid a draft. The first soldiers from Eagle, Brookfield, Muskego, New Berlin and Menomonee enlisted at Milwaukee, and some of the first from Mukwonago, Ottawa and Summit, at Whitewater and Janesville. These enlistments in other counties were to secure the local bounties.

Waukesha County, as a county, had no ninety-days men. The first company raised was the "Waukesha Union Guards," which unanimously agreed to tender services for "three years or the war." The company election was held on Thursday, May 2, 1861, and two days later the Governor issued commissions. The officers and privates of this pioneer company, were as follows: Captain, I. M. Bean; First Lieutenant, Enoch Totten; Ensign, Andrew S. Bennett; First Sergeant, Miles L. Butterfield; Second Sergeant, Thomas Devereaux; Third Sergeant, Arthur Holbrook; Fourth Sergeant, H. H. Messenger; First Corporal, Andrew J. Smith; Second, F. A. Canright; Third, Nathaniel Stein; Fourth, George W. Rice; Fifth, F. L. Ladue; Sixth, E. F. Davison; Seventh, Orlando Culver; Eighth, William Hall; Drummer, George B. Babcock; Fifer, Robert Powrie; Wagoner, John Rattray; Servant, Thomas McGee, Jr.

Privates: Henry Vreeland, Joseph Hesketh, George W. Rice, Artemas M. Culver, William Arlit, William B. Ward, Angus Cameron, William H. Smith, James Boyne, William Wright, Henry Becker, Henry Theade, George Klock, Ferdinand Keussner, Morris L. Corbett, Ezra O. Pelton, Isaac J. Wood, Albert J. West, Ansel Strong, James S. Bottsford, Joseph Gray, Andrew J. Bennett, George A. Smith, Alexander Johnson, Otis Darling, James C. Bagley, John Ross, Justus F. Heath, Thomas Larkin, Peter Gilcrest, James B. Jessup, Thomas Parkinson, James C. Foster, Thomas H. Webley, James Arnold, John David Jones, Edward Mills, T. N. Coleman, Joseph Bub, Sanford Blossom, J. P. Benedict, A. H. Gurney, Samuel Gower, Melville Vanduker, Phillip Downey, Samuel E. Orvis, Hiram Hines, Barton S. Bullard, George W. Block, Lucius Hall, Henry Owen, Charles J. Cole, Henry B. Potter, Daniel C. Corbett, John F. Culver, Arthur H. Peck, Henry B. Lowe, William Stickles, Luke Shapeleau, William Hall, Henry H. Messenger, George Schwartz, John B. Doty, Warren H. Shaul, Eli J. March, William H. Bump, Dominick Federer, Nathaniel Stein, Harrison Ward, Charles O. Brown, Valentine Imig, Warren Thompson, Henry C. Hyde, Richard M. Welsh, Selah B. Langworthy, Francis L. Larkin, Andrew J. Smith, Chester McFarland, W. W. Root, John W. Grimes, John Heath, John Ross, Peter J. Hurtgen.

The company was sworn in on Monday, June 10, 1861, by Maj. Larrabee, of the Fifth Regiment, to which the boys had been assigned, and on the following Thursday left for camp at

Madison, amid a strange mingling of tears and hurrahs. Before leaving for the front, the company presented Capt. Bean and Lieuts. Enoch Totten and A. S. Bennett with gold-headed canes.

When this company had left, war enthusiasm died out, temporarily, at Waukesha Village.

The second company, called the "Oconomowoc Guards," was raised at Oconomowoc, and was organized and officered as follows, only a few days later than the first company :

Captain, A. S. Peck ; First Lieutenant, J. H. Mann ; Second Lieutenant, Warham Parks ; Orderly Sergeant, William Kelly ; Second Sergeant, John J. Adams ; Third Sergeant, Decatur Thompson ; Fourth Sergeant, M. K. Leavitt ; First Corporal, Asa Colby ; Second Corporal, David Stratton ; Third Corporal, John H. Meigs ; Fourth Corporal, M. H. Brown. This company began regular drill under the instruction of Maj. Whittaker, of Summit, early in the second week of May. It was a good company, and composed of first-class men, many of whom could hardly be spared from the community.

The company did not go into service as a company, but scattered and most of them went into other organizations. A brief insight into camp life, to see "how the boys took it," may be interesting. An extract from a letter written by one of the pioneer company, reads like this :

"We have at last received our clothes, which they call uniforms, although one would think to see the company on parade, that the tailor had warranted each uniform to fit the largest man or the smallest boy. The cloth is gray, of various shades ; much of it is of poor quality and will not stand hard service. The pants have a cord down the sides, and the coats have brass buttons and stand-up collars. Each man has a metal plate, spoon, knife and fork, which he must take care of himself. About 6 o'clock, the Orderly Sergeant calls out, 'Company I, fall in for breakfast,' and, as the call is passed from tent to tent, you take your plate in one hand, knife, fork, cup and spoon in the other, and step into the ranks. But be careful as you go into the eating-house that you do not slip down in a pool of coffee. As the boys range themselves along the rough table, the Orderly commands, 'Inward face—take seats.' At first, a teacup of mustard, a box of pepper, salt and vinegar, are the only articles in the line of victuals to be seen ; but, immediately, a pan filled with slices of bread an inch or more in thickness, another of boiled potatoes, followed by one filled with meat, come in rapid succession. The bread is 'baker's,' and good ; the potatoes are good enough, and the meat—well, as to meat and gravy, we won't take any this morning. The waiter fills your cup with coffee, which you sweeten and taste. It is cold, and appears inclined to coagulate. Another waiter appears, and while steam rises in large volumes from his pitcher, cries out, 'Hot coffee !' You want some, of course, but what is to be done ? Your cup is full, you cannot swallow its contents, and there is no dish into which to empty it. You look around and find everybody in the same fix. Finally, a sly one comes to an 'about face' and pours his coffee on the ground. In an instant you follow suit, and so do the others. Now it may be understood whence came the pools of coffee on the ground. * * * After finishing your meal, should you wish to clear your plate of fragments, you empty them on the table or where you did the cold coffee. You clean your dish with bread, dip it in a large dish of hot water, and wipe it with paper."

Some of them did not relish this at first, but many times afterward they would have been overwhelmingly thankful for half as good or half as abundant fare.

As before mentioned, after the first companies had left Waukesha County, the zeal and patriotism of her citizens began to wane, and the newspapers contained numerous appeals and addresses intended to arouse the people. In August, 1862, when it became apparent that, unless something was done at once, Waukesha County would have a whole regiment drafted from her sixteen towns, the people awoke to greater efforts and wilder enthusiasm than was known when Lincoln's first call for volunteers was promulgated. War meetings were held in all portions of the county, and offers of medical attendance, money, wood, provisions, house rent and clothing were made to the families of those who should become volunteers. And there was a grand, glorious response. The "Central War Committee"—W. D. Bacon, George C. Pratt and Isaac Lain—kept an office open constantly

at Waukesha, and directed, as well as possible, the operations of the town sub-committees. They called a grand mass meeting for Sunday, August 17, and half the pastors in the county were present and made speeches containing more eloquence than had been in all their utterances for a year before. Recruiting began by C. C. White, D. G. Snover, H. A. Meyer, John Fallon, Walker L. Bean, Elihu Enos, J. W. Lowry, P. H. Carney, James Murray, J. B. Monteith and others, and enlistments were recorded at an astonishing rate. But to raise 1,684 men in such a small county in one week, the time allotted before the draft, was too much. However, W. D. Bacon, Isaac Lain, George C. Pratt and C. C. White received authority to raise a Waukesha County regiment, and succeeded in enlisting nearly eight hundred men, the men working particularly hard in the hope of securing a full regiment without going outside of the county. The Twenty-eighth Infantry was mostly raised in Waukesha County, while a great many went into the Twentieth and Twenty-fourth.

Waukesha County Roster.—As near as the official records show, the following is the roster of the soldiers credited to Waukesha County, though it does not comprise all the county furnished, as many, enticed by large bounties, enlisted in other portions of the State, and were credited, of course, to the localities where they signed the roll :

TOWN OF BROOKFIELD.

First Infantry—Company unknown—Walter Finleson, Lawrence Kinney, W. Brown.

Second Infantry—Co. F—John H. Anderson. Co. K—Benjamin F. Barker. Company unknown—Charles Thrall, Joseph Maynard.

Fifth Infantry—Co. B—Leander L. Hatch, Robert Bell, James W. Allen, Charles H. Allen, Oscar W. Colvin. Co. F—James Arnold and Willard B. Ward.

Sixth Infantry—Co. D—Francis Bell, Jr. Company unknown—Joseph Ewbanks.

Twelfth Infantry—Co. E—William Parker.

Seventeenth Infantry—Co. I—James Brown.

Twentieth Infantry—Company unknown—Isaac Arnold.

Twenty-second Infantry—Company unknown—Joseph Kroy.

Twenty-fourth Infantry—Company unknown—William Help, Dever White, William Enos, R. M. M. Putney, John Montgomery, Lewis Fellows, — Hyde, Hawley Churchill, George W. Gregg, Joseph Todhunter, Jr., George W. Hine, John R. Penrose, John Hine, Benjamin Van Camp, Henry C. Green, John Snyder, John G. Vedder, John H. Tyler, George Mitchell, Eugene Phillips, David H. Springsted, William F. Seymour, Fred Liefert, Ermead Bordwell, Charles F. Brownell.

Twenty-eighth Infantry—Company unknown—William Dolloon, Joseph Matteson, Loren Barker, Charles Phillips, Michael McAdow, Matthew Brooks, Charles Larkin, Lindry S. Smith, Joseph Hengy, Orlando Vanderhoff, David Arnold, Herman Buncher, Hopken Hagadam, P. Swan, William D. Carthon, Fred Humbert, Jacob Gunderman, John Wohlhisser, Alonzo Hannum, John Gale, Albert Ward, John Schlenck, George Alexander, John Hasler, John Weitzel, George Coleman, John Heider, John Heider, 2d, George Hall.

Regiment unknown—Leander C. Philbrook and Peter Setzel, Dennis A. Philbrook and John Shelly, Henry C. Philbrook.

Sixth Kansas—James Clary, Matthew Clary.

First Kansas—Co. F—John W. Clary.

First Cavalry—Henry A. Breed, William Fellows. Co. L—Thomas Bateman.

Second Cavalry—Co. M—Albert H. Smith.

Third Cavalry—John Sheldon and Hiram Blanchard.

Twelfth Regulars—Co. B—Nathaniel Warren, Henry Churchill.

Second Battery—Jacob Arnold.

Seventh Battery—Godfrey Keese, Nelson Gray, George Hanney, William Dill, A. J. Wright, H. D. Tucker, Robert Tyler, Alman T. Higgins.

TOWN OF DELAFIELD.

First Infantry—Co. B—Patrick McNulty.

First Infantry—Co. G—Henry Ashby, William M. Jacques, Jr. Company unknown—John Davis.

Second Infantry—Company unknown—Edward Faut.

Third Infantry—Company unknown—Lewis Jones, Evan Morris, Daniel E. Rowe, John J. Jones, James Richardson.

Fifth Infantry—Co. F—George W. Rice, Albert Gurney. Co. K—Myron Sherwood. Company unknown—Joseph Turner.

Sixth Infantry—Company unknown—Henry Baker, Milo Sage, Alonzo Rugg.

Tenth Infantry—Company unknown—George Price, Peter Fulmer.

Seventeenth Infantry—John Farrell.

Twentieth Infantry—William Young.

Twenty-second Infantry—Company unknown—Allen Muckleson, Edward I. Roberts, Thomas Hopkins, Edward D. Williams.

Twenty-Third Infantry—Company unknown—Charles Wheelock.

Twenty-Eighth Infantry—Company unknown—Wm. D. Dapkins, James Bone, Robert Hill, Granville H. Coleman, Thomas D. Roberts, Fred Burg, Ira Rowell, John Williams, William Williams, Christopher Lorenson, Charles Klaus, Martin Holcomb, George Morris, Charles Luther, Charles Hengen, Ammi D. Hawks, Ezra A. Seymour, Wright W. Smith, Jens Larson, Jacob Jacobson, Hans Margerson, Robert Williams, William Jones, Peter Sillmore, Lewis Kune, Mathias Halyer, Nicholas Halyer, John A. Carrier, George W. Weeks, Adin Reynolds, Lewis C. Burg, Charles W. Frisbee, Martin D. Clark, Henry M. Ward, John C. Baker, George Anderson, Herman Afield, Peter Stevenson, David Turner, Alonzo Richardson, Robert Owen, —Zoller.

First Cavalry—Co. F—Josiah Lesley, Cyrus Gurnsey, Charles Hahn.

Regiment unknown—William Gallup, John Gallup, Jacob Lawson, Phillip Downey, Griffith T. Rice, Eli Marsh.

Berdan's Sharpshooters—Marshall Fairservice.

TOWN OF EAGLE.

Second Infantry—Co. K—Nicholas Hanes, Chas. Brown. Company unknown—Elberton Bigelow.

Fourth Infantry—Co. A—Peter Hunter, James Cardle.

Fifth Infantry—Co. F—Gilchrist. Co. K—Wallace Root.

Thirteenth Infantry—Co. I—John Miller, Henry Carle, John Hubbard, Joshua Scott. Co. K—Napoleon B. Draper, Wm. Kanute.

Sixteenth Infantry—J. D. Reed. Co. I—P. V. Bovee.

Seventeenth Infantry—Co. B—Conrad Van Readen, Bernhart Meyer, John Fink. John Briedenback, Anton Schulte, Martin Schulte, Jacob Van Readen, Martin Devine, Hiram Daniels, Bernhart Briedenback, John Stinoff.

Twenty-fourth Infantry—Co. A—Sidney Kline, George Logan, Franklin W. Rice, Mathias J. Bovee, Jr., Stephen W. Powell, John I. Bovee, William B. Sherman, Lewis M. Sherman, Leonard D. Hinkley, Mathias L. Snyder and Thomas Lewis.

Twenty-eighth Infantry—Company unknown—Wilson Kipp, John Kalp, William Harrison, Albert Williams, John Nelson, Michael O'Neil, William Lean, Jeremiah Carr, John McIntyre, Edward P. Hinkley, William Duncan, John Cummins, C. J. Melenda.

First Cavalry—Co. A—Thomas Audis. Co. K—Thomas S. Draper, Wm. Logan, Charles Kilts, Frank Snover, H. F. Potter. Company unknown—Frank Bigelow, James Grant, James Robison, Jeremiah Bessey, Julius Mastic.

Third Cavalry—Co. D—Henry James, Henry Brewin, Thomas Pryor, William Keener, Timothy Sullivan, L. W. Robison, Hiram Lampman, Caleb Lobdell, William Lobdell, Martin Lee.

Seventh Battery—Charles Willard, Frank Fox, George Alvord, Edgar Wainright, John Burke, Arthur Wainright, Walter Downing, Samuel Kinder.

First Heavy Artillery—Andrew J. Reeves, Myron Scott, Edward O'Brien, Norman Markley, Silas Reeves, John Western, David Kinder, Thomas Lacey.

Second Heavy Artillery—Seymour Lewis.

Langworthy Artillery—Francis Draper, Jr., William Bigelow, Benson Sternes.

Regiment unknown—Clesant Hendrickson, E. P. Downer.

TOWN OF GENESEE.

First Infantry—Co. G—Francis Pelton, Harry Baker, Jocelyn Baker, Rollin Johnson. Company unknown—John Warner.

Fifth Infantry—Co. F—Ezra O. Pelton, John I. Jones.

Seventh Infantry—Company unknown—Theodore Sherler.

Twenty-second Infantry—Company unknown—Thomas Hopkins.

Twenty-eighth Infantry—Company unknown—S. Kellogg, George Randle, Abel C. Van Camp,

Michael Hunt, Peter Finnegan, Stephen Remington, Allen Williams, Jeremiah Carr, H. E. L. Baker, David Webster, John Gandy, Thomas Green, George Sawyer, Peter F. Boss, Charles Samerlatt, John Monteith, Archie D. Monteith (Captain), William E. Brown, George Simmons, Otto Gross, Francis Bruce, John Jones, John Sweeden, Richard B. Morris, Philip Flood, John Hargarzog, Franz Elzner.

Regiment unknown—August Karl, John D. Jones.

First Cavalry—Co. H—Rollin Holsapple.

Second Cavalry—George Price.

Third Cavalry—Co. D—Thomas Prior, Henry H. Clark, Patrick Brannon, William H. Graves, James Bowen, Albert Russell, Patrick Brimer, John Kitsook, Enoch James.

TOWN OF LISBON.

First Infantry—Co. B—Daniel H. Henshaw, Co. G—James Greengo, Amos Greengo.

Fifth Infantry—Co. F—Andrew J. Smith, Thomas Larkin, Samuel Gower, James Bottsford, Joseph Gray, Hiram Hine, Robert Powrie.

Tenth Infantry—Co. E—Andrew Howitt.

Seventeenth Infantry—Co. A—John McKenna.

Twenty-eighth Infantry—Company unknown—Benjamin Campbell, Wallace Ellsworth, Amasa F. Carpenter, Peter Porter, George A. Mason, James Moyes, George Fielder, George Dingleidin, Samuel Cranch, Charles G. Wildisb, Patrick Henley, Jeremiah Noon, Peter Bonner, John A. Hartzen, Amos Roisier, Andrew Ennis, Peter Hourts, Levi H. Palmer, Gotlieb Bohman, Ira B. Rowell, William Rankin, George W. Higgins, Thomas Butler, James Templeton, John Field, Alexander Rodgers, Charles D. Luce, Thomas H. Gower, Alanson Piso, Anthony W. Mullin, John Taylor, Fitz James Thompson, Edward H. Dougherty, Thomas Lannon, Lucius Weaver, Frederick L. Weaver, John Watson, T. Butler, T. McGill, A. McKee.

Thirty-eighth—Company unknown—F. Fish.

Regiment unknown—Frank Hine, T. Richmond, E. Pearl, H. Howard.

First Cavalry—Co. F—George Wilding, Henry N. Ainsworth, Edward Craig. Co. I—Frank Donoley.

Third Cavalry—Co. D—George Boyce, Patrick Murphy, Thomas Dixon, William H. Thomas.

TOWN OF MERTON.

First Infantry—Co. E—Edward Stokin.

Second Infantry—Co. K—Charles Klauson, Chauncey Skinner.

Third Infantry—Co. A—Wm. Connely.

Fifteenth Infantry—Co. D—Andrew L. Jacobson, Hans L. Jacobson, Nels Tuft, Jacob Jacobson, Rollep Amanson, Nels Nelson, Nels Aleson. Company unknown—Rasmus Neilson.

Sixteenth Infantry—Co. B—Gilbert Kenyon, Mahlon Taylor, Jacob Johnson, Peter W. Cross and Robert Wallace, Erasmus Johnson, Evans S. Evanson.

Nineteenth Infantry—Co. E—Peter Sorenson.

Twenty-second Infantry—Company unknown—J. N. Reed, Warren Reed.

Twenty-eighth Infantry—John Munn, John Kenyon, Kamite Reddin, James Bull, John Bull, Thomas Roe, Orrin Boughton, Edward Tannis, S.

L. Worth, Joseph D. Danah, Andrew E. Johnson, Halver Waller, Lars Yansen, Hans Yansen, Rasmus Hansen, Paul Hansen, John Thorne, Peter Cross, Edwin Foster, John Wild, John Mason, Thomas Holt, Edmond Holt, James Alderdice, Timothy Sullivan, Charles Whichman, Jacob Metzger, James C. Pawling, Sydney Van Kirk, G. B. Tobey, James H. Hamlin, Anton Newberry, Frederick Barcher, John Miller, Jacob Lohrie, Charles Miller, Rasmus Larson, Robert Gibson, Cassius Caldwell, Jas. Caldwell, Frank M. Pippin.

First Cavalry—Co. A—Nelson Skinner, Charles Skinner, Edward Munger. Co. F—Russell Williams, John Farmer, Nels Oleson. Co. L—Francis Donnelly. Company unknown—Jerome D. Merrick.

Third Cavalry—Co. D—Phillips Hoffman, John Mitchell, Richard Chestnut, Sanford Marsh, Harry Cocks, Herbert Cocks, Mathew Weeks, Timothy Stokin, Silas M. Sherwood, Oswin Perry, John Frederickson, Henry Ainsworth.

TOWN OF MUKWONAGO.

First Infantry—Co. A—Thomas Lacy, William B. Sherman. Co. H—James Sprague, William Sample, Jacob Kline, William Field, Leroy Delamatter.

Second Infantry—Co. K—Horatio Skidmore. Company unknown—Frederick Baldwin.

Fourth Infantry—Company unknown—Henry Harding, Charles Pepper.

Fifth Infantry—Co. B—George Spencer. Co. F—Lucius Hall. Company unknown—Jas. Bagley, William Stickle.

Sixth Infantry—William Serner.

Tenth Infantry—Company unknown—Franklin Jokish, Thomas D. Powers.

Eleventh—Dane Co. Zouaves—Martin Brannan, *Thirteenth Infantry*—Co. I—Daniel Perkins, John Stickle, Joseph Patridge,

Nineteenth Infantry—Rufus Yraes, Reville Moffitt.

Twenty-fourth Infantry—Co. I—Jonathan Cox.

Twenty-eighth Infantry—Henry Smart, William Kerrfarm, David Hill, John Carney, Frederick Shoutry, Allen Williams, E. W. Bixby, Franklin Bender, Samuel Kline, John Dailey, William Freeman, Ephraim Whitney, George Hoag, Clark Perkins, John Foster, Charles I. Parker, Hiram F. Lyke, Oren D. Moffitt, William Green, Fred Tesh, Carl Yruchtinaker, Charles Holty, Thomas Devenck, Sewall Andrews, Patrick Fuly, Julius Lyke, George Klinefelter, William Watkins, Jacob Stickle, Lucius Kells, Jacob Milius, James McDonough, James Wortham, Henry Wheeler, Ira Pool.

Berdan's Sharpshooters—William Clark.

Seventh Battery—Alexander Craig, Stephen Bramwell, Frank Fox, James Bramwell, Leonard Platner.

Third Cavalry—L. I. Shaw, George Hunter, Charles Dorrison, Charles Woodbridge, Charles Howard, Harrison Parsons, Patrick Brennan, William Metcalf.

TOWN OF MUSKEGO.

First Infantry—Co. D—Ramanto Peck, Arthur Peck, Samuel Elliot, William Taylor.

Second Infantry—Co. E—Camete Peterson.

Fifth Infantry—Co. F—Angus Cameron, Geo. Swenge.

Sixth Infantry—Co. D—John Finley. Co. K—Patrick Brady.

Ninth Infantry—Co. E—John Swenge.

Fourteenth Infantry—Co. H—Alandus Platt.

Fifteenth Infantry—Co. C—Lars Rolfsen, Emanuel Swinson, John Johnson, William Elliott, Daniel Donaldson, Carl Linn Torbison. Co. F—George Belknapp. Company unknown—Henry Nelson.

Nineteenth Infantry—Co. E—John Malam, Kury O. Donald. Thomas Willet, Nathan Elliot, Thomas Elliot, Michael Nolan, Thomas Burns, William Miller, Richard Miller, Peter Post.

Nineteenth Infantry—Co. D—James Platt.

Twenty-second Infantry—Company unknown—John Murphy, Hamilton Grooves, Jonathan Lowe.

Twenty-fourth Infantry—Company unknown—James Hawkins, Charlie Low.

Twenty-sixth Infantry—Osmun Hetty.

Twenty-eighth Infantry—Henry Benez, Frederick Harrison, Hibbard Vasberg, Charles Wigart, Christian Peters, Allen Peck, Frederick Myer, Charles Finley, George Peck, Myron Huckey, Henry Draper, James Fitzgerald, Alexander Cameron, William Young, Joseph Babcock, John Cullen, William W. Kowan, George Franklin Bowers, John Watson, Owen Finley, Joseph Muckey, Charles Green, Christopher Cullen, Nelson Smith.

Regiment unknown—Charles Graves, Charles Belknapp, John Valier.

First Cavalry—Co. C—Johan Hawkins. Co. F—John Vasberg.

Third Cavalry—Samuel Liscum. Co. E—Louis Blessinger.

Ninth Artillery—Co. E—Peter Post.

Fourteenth Missouri Sharpshooters—Co. H—Alandus Platt.

TOWN OF MENOMONEE.

First Infantry—Co. G—Edwin Oliver, Andrew Dent, Henry Johnson, George Holtzbower, James Miner. Company unknown—Nicholas Zimmer, Henry Christman.

Fifth Infantry—Co. F—Joseph Gray.

Twentieth Infantry—Company unknown—Jacob R. Johnson.

Twenty-fourth Infantry—Company unknown—William Harrison, Andrew Conroy and Frederick Nois, Henry Winzenberg.

Twenty-sixth Infantry—Company unknown—John Sawler, Jacob Deximer.

Twenty-eighth Infantry—Company unknown—Moses D. Pickle, Thomas J. Winnegal, Anson E. Bailey, Robert O. Newberry, Hiram S. Mason, Eli H. Keeler, Christopher K. Lachlafer, John T. Nims, Christopher Schuck, George Cook, Franklin Mills, Walter Weaver, Amos Rosier, Jr., John A. Urelin, Hiram Howard, William T. Slyter, Patrick Hanly, Thomas Lacy (New York), Joseph Natesheime, Worthy Leuce, Henry Baines.

First Cavalry—Co. A—Carmi L. Nicholson, John B. Nicholson, Martin Johnson, Phillip Bean. Company I—Daniel Barnes, Amandas Barnes, Christopher Aiken, John A. Reed, Jacob Schuck, William Kelner, James Flannigan, Samuel Hard, George Warr.

Second Cavalry—Co. F—Robert Gray. Co. K—August Knoll, Harmon Knoll. Company unknown—Dominic Dillon, Malaki Rooney, Thomas Welch. *Montgomery Guards*—John Costigan.

TOWN OF NEW BERLIN.

First Infantry—Co. A—James Johnson. Company B—John Shawoan, William Matteson. Company D—William Boyd, Alton Clark, Samuel Legg, Myron Walprige, William Spiers, George Knoepfel.

Western Shooters—Daniel Wood.

Second Infantry—Co. K—George Boobe, Edward Murran.

Fourth Infantry—Co. G—John Paulus.

Fifth Infantry—Co. F—Henry C. Hyde, Ansol Strong, Thomas Parkerson, Alexander Johnson.

Milwaukee Zouaves—William G. Murray.

Tenth Infantry—Co. C—Kine P. Downie.

Thirteenth Infantry—Co. B—Thomas Starky.

Fifteenth Infantry—Co. D—William Wallace.

Sixteenth Infantry—Co. F—Peter Quortz.

Seventeenth Infantry—Co. H—Ezra Kenedy. Company I—Philip Punch, Peter Karn. Company unknown—Joseph Hosler.

Eighteenth Infantry—Co. E—William Johnson. Co. F—John M. Babcock (Illinois Regiment).

Berdan's Sharpshooters—Coles Dutcher, Benjamin F. Moderate.

Benton Hussars—Michael Shafer, John Paulos.

The Draft.—There was but little excitement in Waukesha County when the announcement was made that her citizens would be obliged to submit to a draft to fill her quota in Lincoln's call for 600,000 men. A gallant effort had been made to avert the humiliation of a draft, but it was not quite successful. Therefore, in September, 1862, Vernon Tichenor, of Waukesha, was appointed Commissioner to superintend the draft in this county, and Dr. R. Dunlap was appointed examining surgeon. The quota for the county was announced as follows: Waukesha, 194; Vernon, 63; New Berlin, 104; Brookfield, 116; Summit, 63; Oconomowoc, 121; Mukwonago, 75; Eagle, 70; Ottawa, 59; Delafield, 74; Genesee, 90; Menomonee, 125; Lisbon, 78; Pewaukee, 85; Muskego, 76; Merton, 81; total, 1,474. To this was added 210 for decimated companies belonging to the county, which had theretofore enlisted, which swelled the number to 1,684. Before the arrival of the time for the draft to take place, however, the quota was reduced by enlistment to less than 200, and finally to 191.

The examining surgeon opened his office at Waukesha about September 1, 1862, and from that time until the day of the draft, it was crowded day and night. He succeeded in giving exemption papers to an average of thirty-five persons per day. The local papers described the

scene as one ludicrous in the extreme. Men who had always boasted of their physical health and prowess were prostrated by the draft malaria, and could hardly climb the stairs to the surgeon's office. The melancholy feelings of men of sound body and middle age who suddenly received word that their friends in Canada were "very sick—not expected to live," was sorrowful to behold. Ten who thus suddenly learned of illness among their Canada friends left Waukesha in a single night. Thirteen left Oconomowoc on a certain Sunday evening, and about half that number tore themselves away from Pewaukee. Canada did not appear to have at that time well ones enough to properly care for the sick, and the good men of Waukesha County could not see them suffer. They therefore left for the Queen's dominions in the night, not finding it in their hearts to wait until another day.

The enrollment of men between the ages of eighteen and forty-five years was the work of the Sheriff. The enrollment, exemptions and the draft may be seen as follows :

	Enrolled Militia.	Exemptions.	Drafted.
Eagle.....	224	16	1
Muskego.....	206	24	5
Lisbon.....	270	31	29
Delafield.....	222	32	5
Merton.....	268	33	3
Ottawa.....	151	33	12
Summit.....	218	34	12
Mukwonago.....	198	39	
Pewaukee.....	265	39	12
Vernon.....	203	47	19
Menomonee.....	335	52	49
Brookfield.....	320	53	13
Genesee.....	328	62	31
Oconomowoc.....	379	67	
New Berlin.....	437	72	
Waukesha.....	620	136	
Total.....	4644	770	191

The first draft began in the court house, at Waukesha, on Monday, November 10, 1862. It will be seen by the above table that the four towns of Waukesha, New Berlin, Oconomowoc and Mukwonago had no draft. Their quotas were full. Mr. Tichenor, the Draft Commissioner, secured only 117 of the 191 drafted, which number he took to Madison November 16, 1862. The balance were either exempted or had "skedaddled."

During this draft, Mr. Tichenor and his deputies all went armed, as several had threatened to open a fight. The thorough preparation made by Mr. T. for a battle to kill, if any was to be had at all, prevented a disturbance.
