

# Bridge Formally Named For Charles Vanden Bulck

The new bridge crossing the Clinch River on Highway 95 at White Wing on the edge of the Oak Ridge area has been formally designated the "Charles Vanden Bulck Bridge" in honor of the late Atomic Energy Commission official.

Tennessee Governor Frank G. Clement signed a joint resolution of the Tennessee Legislature to officially name the new bridge, fulfilling the necessary legal requirement although the

bridge was initially given its name during dedication ceremonies on May 25, 1963.

The late Mr. Vanden Bulck, who died in 1962, was honored during the dedication ceremonies for the contributions he made to the nation's atomic energy programs both as a staff member with the Manhattan Engineer District and as Assistant Manager for Administration with the AEC's Oak Ridge Operations.

Mr. Vanden Bulck was one of the earliest of the military group to come to Oak Ridge to establish the initial project. He stayed in Oak Ridge following the war as a top member of the AEC staff and retired in 1960 after completion of more than 36 years of federal service. He was awarded the Legion of Merit by the War Department for his outstanding service to the Manhattan Engineer District and was also recipient of the AEC's Distinguished Service Award, the highest recognition extended by AEC to one of its employees.

## Charles Lovelace Retires At ORNL

Charles Lovelace, Oak Ridge National Laboratory, retired from his duties in the plant and equipment division March 1, to take up what appears to be a busier life than ever.

Besides helping his wife, Callie, run an imported foods shop here, Lovelace plans to maintain two tracks of land he owns, plus caring for 17 head of beef cattle. Lovelace's co-workers in the laundry department gave him a new overcoat.

## Visit Israeli Reactor Site

WASHINGTON (AP) — A State Department spokesman says American scientists have visited an Israeli nuclear reactor in the Negev Desert near Beersheba.

But press officer Marshall Wright emphasized: "There was no inspection. The Dimona project has been visited by American scientists, but inspection is not the correct expression."

During a Monday news conference, Wright also refused to say whether the visit satisfied the United States that the reactor would be used only for peaceful purposes.

## Old Greeneville Chair Firm Burns

GREENEVILLE, Tenn. (AP) — The Old Sam Moore Chair Co. building here was completely destroyed by fire Tuesday afternoon.

Fire Chief Kenneth Roberts said the three-story wooden structure had been unoccupied for about two years.

Roberts said heat from the blaze was so intense that sprinkler heads in a tobacco warehouse 100 yards away went off. He said nearby railway cars and buildings were damaged by the fire.
