UNIVERSITY OF CALIFORNIA  
AT LOS ANGELES

EX LIBRIS

169. BUTLER (JOSEPH). THE ANALOGY OF RELIGION, Natural and Revealed, to the constitution and course of nature. 4to, contemporary calf, rubbed. London, 1736.

FIRST EDITION. On the Grolier List. The famous 'Analogy' is an endeavor to show that, "as the particular frame of man reveals a supreme conscience, so the frame of nature shows a moral governor revealed through conscience." Considered the greatest theological work of the time, and one of the most original of all times.

## ADVERTISEMENT.

**I**F the Reader should meet here with any thing, which he had not before attended to, it will not be in the Observations upon the Constitution and Course of Nature, these being all obvious; but in the Application of them: In which, though there is nothing but what appears to me of some real Weight, and therefore of great Importance; yet he will observe several things, which will appear to him of very little, if he can think things to be of little Importance, which are of any real Weight at all, upon such a Subject as Religion. However, the proper Force of the following Treatise, lies in the whole general Analogy considered together.

It is come, I know not how, to be taken for granted, by many Persons, that Christianity is not so much as a Subject of Inquiry; but that it is, now at  
( b 2 ) length,

## A D V E R T I S E M E N T.

length, discovered to be fictitious. And accordingly they treat it, as if, in the present Age, this were an agreed Point, among all People of Discernment; and nothing remained, but to set it up as a principal Subject of Mirth and Ridicule, as it were, by Way of Reprisals, for its having so long interrupted the Pleasures of the World. On the contrary, thus much, at least, will be here found, not taken for granted, but proved, that any reasonable Man, who will thoroughly consider the Matter, may be as much assured, as he is of his own Being, that, however, it is not so clear a Case, that there is nothing in it. There is, I think, strong Evidence of its Truth; but it is certain no one can, upon Principles of Reason, be satisfied of the contrary. And the practical Consequence to be drawn from this, is not attended to, by every one who is concerned in it.

## INTRODUCTION.

**P**robable Evidence is essentially distinguished from demonstrative by this, that it admits of Degrees; and of all Variety of them, from the highest moral Certainty, to the very lowest Presumption. We cannot indeed say a thing is probably true upon one very slight Presumption for it; because, as there may be Probabilities on both sides of a Question, there may be some against it: and though there be not, yet a slight Presumption does not beget that Degree of Conviction, which is implied in saying a thing is probably true. But that the slightest possible Presumption, is of the nature of a Probability, appears from hence; that such low Presumption often repeated, will amount even to moral Certainty. Thus a Man's having observed the Ebb and Flow of the Tide to Day, affords some sort of Presumption, though the lowest imaginable, that it may happen again to Morrow: But the observation of this Event for so many Days, and Months, and Ages together, as it has been observed by Mankind, gives us a full assurance that it will.

B

That

## I N T R O D U C T I O N.

That which chiefly constitutes Probability is expressed in the Word Likely, *i. e.* like some Truth<sup>a</sup>, or true Event; like it, in itself, in its Evidence, in some more or fewer of its Circumstances. For when we determine a thing to be probably true, suppose that an Event has or will come to pass, 'tis from the Mind's remarking in it a Likeness to some other Event, which we have observed has come to pass. And this observation forms, in numberless daily Instances, a Presumption, Opinion, or full Conviction, that such Event has or will come to pass; according as the observation is, that the like Event has sometimes, most commonly, or always so far as our observation reaches, come to pass at like distances of Time, or Place, or upon like Occasions. Hence arises the Belief, that a Child, if it lives twenty years, will grow up to the stature and strength of a Man; that Food will contribute to the preservation of its Life, and the want of it for such a number of days, be its certain Destruction. So likewise the rule and measure of our Hopes and Fears concerning the success of our Pursuits; our Expectations that Others will act so and so in such Circumstances; and our Judgment that such Actions proceed from such Principles; all These rely upon our having observed the like to what we hope, fear, expect, judge, I say upon our having observed the like either with respect to Others or Ourselves. And thus, whereas the Prince<sup>b</sup> who had always lived in a warm Climate, naturally concluded in the way of Analogy, that there was no such thing as Water's becoming hard; because he had always observed it to be fluid and yielding: We on the contrary, from Analogy conclude, that there is no Presumption at all against This: that 'tis supposeable, there may be Frost in *England* any given day in *January* next; probable that there will on some day of the month; and that there is a moral Certainty, *i. e.* Ground for an expectation without any doubt of it, in some part or other of the Winter.

<sup>a</sup> Verisimile.

<sup>b</sup> The Story is told by Mr. *Lock* in the Chapter of Probability.

## INTRODUCTION.

ij

Probable Evidence, in its very nature, affords but an imperfect kind of Information; and is to be considered as relative only to Beings of limited Capacities. For nothing which is the possible object of Knowledge, whether past, present, or future, can be probable to an infinite Intelligence; since it cannot but be discerned absolutely as it is in itself, certainly true, or certainly false: But to us, Probability is the very Guide of Life.

From these things it follows, that in Questions of Difficulty or such as are thought so, where more satisfactory Evidence cannot be had, or is not seen; if the result of Examination be, that there appears upon the whole, any the lowest Presumption on One side, and none on the Other, or a greater Presumption on One side, though in the lowest Degree greater; this determines the Question, even in matters of Speculation; and in matters of Practice, will lay us under an absolute and formal Obligation, in point of Prudence and of Interest, to act upon that Presumption or low Probability, though it be so low as to leave the mind in very great Doubt which is the Truth. For surely a Man is as really bound in Prudence, to do what upon the whole appears, according to the best of his Judgment, to be for his Happiness, as what he certainly knows to be so. Nay further, in Questions of great consequence, a reasonable Man will think it concerns him to remark lower Probabilities and Presumptions than these; such as amount to no more than showing One side of a Question to be as supposeable and credible as the Other: nay such as but amount to much less even than this. For numberless Instances might be mentioned respecting the common Pursuits of Life, where a Man would be thought, in a literal sense, distracted, who would not act, and with great application too, not only upon an even Chance, but upon much less, and where the Probability or Chance was greatly against his succeeding <sup>c</sup>.

<sup>c</sup> See Chap. vi. Part II.

It is not my Design to enquire further into the Nature, the Foundation, and Measure of Probability; or whence it proceeds that *Likeness* should beget that Presumption, Opinion, and full Conviction, which the human Mind is formed to receive from it, and which it does necessarily produce in every one; or to guard against the Errors to which, Reasoning from Analogy is liable. This belongs to the Subject of Logick; and is a part of that Subject which has not yet been thoroughly considered. Indeed I shall not take upon me to say, how far the Extent, Compass, and Force, of analogical Reasoning, can be reduced to general Heads and Rules; and the Whole be formed into a System. But though so little in this way has been attempted by those who have treated of our intellectual Powers, and the Exercise of them; this does not hinder but that we may be, as we unquestionably are, assured, that Analogy is of weight, in various Degrees, towards determining our Judgment, and our Practice. Nor does it in any wise cease to be of weight in those cases, because Persons either given to dispute, or who require things to be stated with greater Exactness than our Faculties appear to admit of in practical Matters, may find other Cases in which 'tis not easy to say, whether it be, or be not, of any weight; or instances of seeming Analogies which are really of none. It is enough to the present purpose to observe, that this general way of arguing is evidently natural, just and conclusive. For there is no Man can make a Question but that the Sun will rise to-morrow, and be seen, where it is seen at all, in the Figure of a Circle, and not in that of a Square.

Hence, namely from analogical Reasoning, *Origen*<sup>d</sup> has with singular Sagacity observed, that *he who believes the Scripture to have proceeded from Him who is the Author of Nature, may well expect to find the same sort of Difficulties in it, as are*

<sup>d</sup> Χρὴ μὲν τοι γε τὸν ἅπασι παραδειζόμενον τὸ κτίσαντος τὸν κόσμον εἶναι ταύτας τὰς γραφὰς πεπεισθῆ, ὅτι ὅσα περὶ τῆς κτίσεως ἀπαντᾷ τοῖς ζητοῦσι τὸν περὶ αὐτῆς λόγον, ταῦτα καὶ περὶ τῶν γραφῶν. Phil. p. 23. Ed. Cant.

## I N T R O D U C T I O N.

v

*found in the Constitution of Nature.* And in a like way of Reflexion it may be added, that he who denies the Scripture to have been from God upon account of these difficulties, may, for the very same Reason, deny the World to have been formed by Him. On the other hand, if there be an Analogy or Likeness between the System of things, and Dispensation of Providence, which Revelation informs us of, and that System of Things and Dispensation of Providence, which Experience together with Reason informs us of, *i. e.* the known Course of Nature; this is a Presumption, that they have both the same Author and Cause; at least so far as to answer objections against the former's being from God, drawn from any thing which is analogical or similar to what is in the latter, which is acknowledged to be from Him: for an Author of Nature is here supposed.

Forming our Notions of the Constitution and Government of the World upon Reasoning, without Foundation for the Principles which we assume, whether from the Attributes of God or any thing else; is building a World upon Hypothesis, like *Deſ Cartes*. Forming our Notions upon Reasoning from Principles which are certain, but applied to Cases to which we have no ground to apply them, like those who explain the Structure of the human Body, and the Nature of all Diseases and Medicines from mere Mathematicks; is an Error much a-kin to the former: since what is assumed in order to make the Reasoning applicable, is Hypothesis. But it is allowed just, to join abstract Reasonings with the observation of Facts, and argue from such Facts as are known, to others that are like them; from that Part of the Divine Government over intelligent Creatures which comes under our view, to that larger and more general Government over them, which is beyond it; and from what is present, to collect, what is likely, credible, or not incredible, will be hereafter.

This method then of concluding and determining being practical, and what, if we will act at all, we cannot but act upon in  
the

## I N T R O D U C T I O N.

the common Pursuits of Life; being evidently conclusive, in various Degrees, proportionable to the Degree and Exactness of the whole Analogy or Likeness; and having so great Authority for introducing it into the Subject of Religion, even revealed Religion; my Design is to apply it to that Subject in general, both natural and revealed: taking for proved, that there is an intelligent Author of Nature, and natural Governor of the World. For as there is no Presumption against This prior to the Proof of it: so it has been often proved with accumulated Evidence; from this Argument of Analogy and final Causes; from abstract Reasonings; from the most ancient Tradition and Testimony; and from the general Consent of Mankind. Nor does it appear, so far as I can find, to be denied, by the Generality of those who profess themselves dissatisfied with the Evidence of Religion.

As there are Some, who, instead of thus attending to what is in Fact the Constitution of Nature, form their notions of God's Government upon Hypothesis; so there are Others, who indulge themselves in vain and idle speculations, how the World might possibly have been framed otherwise than it is; and upon supposition that things might, in imagining that they should, have been disposed and carried on after a better Model, than what appears in the present Disposition and Conduct of them. Suppose now a person of such a Turn of Mind, to go on with his Reveries, till he had at length fixt upon some particular Plan of Nature, as appearing to him the best. — One shall scarce be thought guilty of Detraction against human Understanding, if one should say, even beforehand, that the Plan which this speculative Person would fix upon, though he were the wisest of the Sons of men, probably would not be the very best, even according to his own Notions of *best*; whether he thought That to be so, which afforded Occasions and Motives for the Exercise of the greatest Virtue, or which was productive of the greatest Happiness, or that These two were necessarily connected,

ed, and run up into one and the same Plan. However, it may not be amiss once for all to see, what would be the Amount of these Emendations and imaginary Improvements upon the System of Nature, or how far they would mislead us. And it seems there could be no stopping, till we came to some such Conclusions as these: That all Creatures should at first be made as perfect and as happy as they were capable of ever being: That nothing to be sure of Hazard or Danger should be put upon them to do; some indolent Persons would perhaps think nothing at all: Or certainly, that effectual care should be taken, that they should, whether necessarily or not, yet eventually and in fact, always do what was Right and most conducive to Happiness, which would be thought easy for infinite Power to effect; either by not giving them any Principles which would endanger their going wrong; or by laying the right motive of Action in every instance before their Minds continually in so strong a manner, as would never fail of inducing them to act conformably to it: And that the whole method of Government by Punishments should be rejected, as absurd; as an awkward round-about method of carrying things on; nay as contrary to a principal Purpose, for which it would be supposed Creatures were made, namely Happiness.

Now without considering what is to be said in particular to the several Parts of this Train of Folly and Extravagance, what has been above intimated, is a full direct general Answer to it, namely, that we may see before-hand that we have not Faculties for this kind of Speculation. For though it be admitted, that from the first Principles of our Nature, we unavoidably judge or determine Some Ends to be absolutely in themselves preferable to Others, and that the Ends now mentioned, or if they run up into one, that this One is absolutely the best; and consequently that we must conclude the ultimate End designed, in the Constitution of Nature and Conduct of Providence, is the most Virtue and Happiness possible: Yet we are far from  
being

## I N T R O D U C T I O N.

being able to judge, what particular Disposition of things, would be most friendly and assistant to Virtue, or what Means might be absolutely necessary to produce the most Happiness in a System of such Extent as our own World may be, taking in all that is past and to come; though we should suppose it detached from the whole of things. Indeed we are so far from being able to judge of this; that we are not Judges what may be the necessary means of raising and conducting one Person to the highest Perfection and Happiness of his Nature. Nay even in the little Affairs of the present Life, we find men of different Educations and Ranks are not competent Judges of the Conduct of each other. Our whole Nature leads us to ascribe all moral Perfection to God, and to deny all Imperfection of him. And this will for ever be a practical Proof of his moral Character, to such as will consider what a practical Proof is; because it is the Voice of God speaking in us. And from hence we conclude, that Virtue must be the Happiness, and Vice the Misery, of every Creature; and that Regularity and Order and Right cannot but prevail finally in a Universe under His Government. But we are in no sort Judges, what are the necessary Means of accomplishing this End.

Let us then, instead of that idle and not very innocent Employment of forming imaginary Models of a World, and Schemes of governing it, turn our Thoughts to what we experience to be the Conduct of Nature with respect to intelligent Creatures; which may be resolved into general Laws or Rules of Administration, in the same way as many of the Laws of Nature respecting inanimate Matter may be collected from Experiments. And let us compare the known Constitution and Course of Things, with what is said to be the moral System of Nature; the acknowledged Dispensations of Providence, or that Government which we find ourselves under, with what Religion teaches us to believe and expect; and see whether they are not analogous and of a piece. And upon such a comparison,  
it

it will I think be found, that they are very much so; that both may be traced up to the same general Laws, and resolved into the same Principles of divine Conduct.

The Analogy here proposed to be considered, is of pretty large Extent, and consists of several Parts; in Some, more, in Others, less, exact. In some few instances perhaps it may amount to a real practical Proof; in others not so. Yet in these it is a Confirmation of what is proved other ways. It will undeniably show, what too many want to have showed them, that the System of Religion both natural and revealed, considered only as a System, and prior to the Proof of it, is not a Subject of Ridicule, unless That of Nature be so too. And it will afford an Answer to almost all Objections against the System both of natural and revealed Religion; though not perhaps an Answer in so great a Degree, yet in a very considerable Degree an Answer, to the Objections against the Evidence of it: For Objections against a Proof, and Objections against what is said to be proved, the Reader will observe are different things.

Now the divine Government of the World, implied in the Notion of Religion in general and of Christianity, contains in it; That Mankind is appointed to live in a future State<sup>e</sup>; That There, every one shall be rewarded or punished<sup>f</sup>; rewarded or punished respectively for all that Behaviour Here, which we comprehend under the Words Virtuous or Vicious, morally good or evil<sup>g</sup>: That our present Life is a Probation, a State of Trial<sup>h</sup>, and of Discipline<sup>i</sup>, for that future one; Notwithstanding the Objections, which men may fancy they have, from Notions of Necessity, against there being any such moral Plan as this at all<sup>k</sup>; And whatever Objections may appear to lie against the Wisdom and Goodness of it, as it stands so imperfectly made known to us at present<sup>l</sup>: That this World being in a State of Apostacy and Wickedness, and consequently of Ruin, and the Sense both of their Condition and Duty being so

<sup>e</sup> Ch. i. <sup>f</sup> Chap. ii. <sup>g</sup> Ch. iii. <sup>h</sup> Ch. iv. <sup>i</sup> Ch. v. <sup>k</sup> Ch. vi. <sup>l</sup> Ch. vii.

## I N T R O D U C T I O N.

greatly corrupted amongst Men, this gave occasion for an additional Dispensation of Providence; of the utmost Importance<sup>m</sup>; proved by Miracles<sup>n</sup>; but containing in it many things appearing to us strange and not to have been expected<sup>o</sup>; a Dispensation of Providence, which is a Scheme or System of things<sup>p</sup>; carried on by the Mediation of a divine Person, the Messiah, in order to the Recovery of the World<sup>q</sup>; yet not revealed to all Men, nor proved with the strongest possible Evidence to all those to whom it is revealed; but only to such a Part of Mankind, and with such particular Evidence as the Wisdom of God thought fit<sup>r</sup>. The Design then of the following Treatise will be to shew, that the several Parts principally objected against in this Moral and Christian Dispensation, including its Scheme, its Publication, and the Proof which God has afforded us of its Truth; that the particular Parts principally objected against in this whole Dispensation, are analogous to what is experienced in the Constitution and Course of Nature, or Providence; that the chief Objections themselves which are alledged against the former, are no other, than what may be alledged with like Justness against the latter, where they are found in Fact to be inconclusive; and that this Argument from Analogy is in general, unanswerable, undoubtedly of Weight, and very material on the side of Religion<sup>t</sup>, notwithstanding the Objections which may seem to lie against it, and the real Ground which there may be, for Difference of Opinion, as to the particular Degree of Weight which is to be laid upon it. This is a general Account of what may be looked for in the following Treatise. And I shall begin it with That which is the Foundation of all our Hopes and of all our Fears; all our Hopes and Fears, which are of any Consideration; I mean a future Life.

THE  
ANALOGY  
OF  
RELIGION  
TO THE  
Constitution and Course of NATURE.

---

PART I.  
Of NATURAL RELIGION.

---

CHAP. I.  
*Of a Future Life.*

STRANGE Difficulties have been raised by some con- CHAP.  
cerning personal Identity, or the Sameness of living A- I.  
gents, implied in the Notion of our existing Now and   
Hereafter, or in any two successive Moments ; which whoever  
C 2 thinks

PART thinks it worth while, may be considered in the first Dissertation at the End of this Treatise. But without Regard to any of them here, let us consider what the Analogy of Nature, and the several Changes which we have undergone, and those which we know we may undergo without being destroyed, suggest, as to the Effect which Death may, or may not have upon us; and whether it be not from thence probable, that we may survive this Change, and exist in a future State of Life and Perception.

I. From our being born into the present World in the helpless imperfect State of Infancy, and having arrived from thence to mature Age, we find it to be a general Law of Nature in our own Species, that the same Creatures, the same Individuals, should exist in Degrees of Life and Perception, with Capacities of Action, of Enjoyment and Suffering, in one Period of their Being, greatly different from those appointed them in another Period of it. And in other Creatures the same Law holds. For the Difference of their Capacities and States of Life at their Birth, to go no higher, and in Maturity; the Change of Worms into Flies, and the vast Enlargement of their locomotive Powers by such Change: and Birds and Insects bursting the Shell their Habitation, and by this means entering into a new World, furnished with new Accommodations for them, and finding a new Sphere of Action assigned them; these are Instances of this general Law of Nature. And all the various and wonderful Transformations of Animals are to be taken into Consideration here. But the States of Life in which we ourselves existed formerly in the Womb and in our Infancy, are almost as different from our present in mature age, as it is possible to conceive any two States or Degrees of Life can be. Therefore, that we are to exist hereafter in a State as different suppose from our present, as This is from our former, is but according to the Analogy of Nature; according to a natural Order or Appointment of the very same Kind with what we have already experienced.

II. We

II. We know we are endued with Capacities of Action, of Happiness and Misery ; for we are conscious of acting, of enjoying Pleasure and suffering Pain. Now that we have these Powers and Capacities before Death, is a Presumption that we shall retain them through and after Death ; indeed a Probability of it abundantly sufficient to act upon, unless there be some positive Reason to think that Death is the Destruction of those living Powers : Because there is in every Case a Probability, that all things will continue as we experience they are, in all Respects, except those in which we have some Reason to think they will be altered. This is that *Kind*<sup>a</sup> of Presumption or Probability from Analogy, express'd in the very word *Continuance*, which seems our only natural Reason for believing the Course of the World will continue to morrow, as it has done so far as our Experience or Knowledge of History can carry us back. Nay it seems our only Reason for believing, that any one Substance now existing, will continue to exist a Moment longer ; the Self-existent Substance only excepted. Thus if Men were assured that the unknown Event, Death, was not the Destruction of our Faculties of Perception and of Action, there would be no Apprehension, that any other Power or Event unconnected with this of Death, would destroy these Faculties just at the instant of each Creature's Death ; and therefore no doubt but that they would remain after it : which shows the high Probability that our living Powers will continue after Death, unless there be some Ground to think that Death is their Destruction<sup>b</sup>. For,  
if

<sup>a</sup> I say *Kind* of Presumption or Probability ; for I do not mean to affirm that there is the same *Degree* of Conviction, that our living Powers will continue after Death, as there is, that our Substances will.

<sup>b</sup> *Destruction of living Powers*, is a manner of Expression unavoidably ambiguous ; and may signify either, *the Destruction of a living Being, so as that the same living Being shall be incapable of ever perceiving or acting again at all* : Or *the Destruction of those Means and Instruments by which it is capable of its present Life, of its present State of Perception and of Action*. It is here used in the former Sense. When it is used in the latter, the Epithet *present*

PART I. if it would be in a manner certain that we should survive Death; provided it were certain that Death would not be our Destruction, it must be highly probable we shall survive it, if there be no Ground to think Death will be our Destruction.

Now though I think it must be acknowledged, that prior to the natural and moral Proofs of a future Life commonly insisted upon, there would arise a general confused Suspicion, that in the great Shock and Alteration which we shall undergo by Death, We, *i. e.* our living Powers, might be wholly destroyed; yet even prior to those Proofs, there is really no particular distinct Ground or Reason for this Apprehension at all, so far as I can find. If there be, it must arise either, from *the Reason of the thing*, or from *the Analogy of Nature*.

But we cannot argue from *the Reason of the thing*, that Death is the Destruction of living Agents, because we know not at all what Death is in itself; but only some of its Effects, such as the Dissolution of Flesh, Skin, and Bones. And these Effects do in no wise appear to imply the Destruction of a living Agent. And besides, as we are greatly in the Dark, upon what the Exercise of our living Powers depends, so we are wholly ignorant what the Powers themselves depend upon; the Powers themselves as distinguished, not only from their actual Exercise, but also from the present Capacity of exercising them; and as opposed to their Destruction: For Sleep, or however a Swoon, shews us, not only that these Powers exist when they are not exercised, as the passive Power of Motion does in inanimate Matter; but shews also that they exist, when there is no present

*present* is added. The Loss of a Man's Eye, is a Destruction of living Powers in the latter Sense. But we have no Reason to think the Destruction of living Powers, in the former Sense, to be possible. We have no more Reason to think a Being endued with living Powers, ever loses them during its whole Existence, than to believe that a Stone ever acquires them.

Capacity

Capacity of exercising them: or that the Capacities of exercising them for the present, as well as the actual Exercise of them, may be suspended, and yet the Powers themselves remain undestroyed. Since then we know not at all upon what the Existence of our living Powers depends, this shews further, there can no Probability be collected from the Reason of the thing, that Death will be their Destruction: because their Existence may depend, upon somewhat in no Degree affected by Death; upon somewhat quite out of the reach of this King of Terrors. So that there is nothing more certain, than that *the Reason of the thing* shews us no Connection between Death, and the Destruction of living Agents. Nor can we find any thing throughout the whole *Analogy of Nature*, to afford us even the slightest Presumption, that Animals ever lose their living Powers; much less, if it were possible, that they lose them by Death: for we have no Faculties wherewith to trace any beyond or through it, so as to see what becomes of them. This Event removes them from our View. It destroys the *sensible* Proof, which we had before their Death, of their being possessed of living Powers, but does not appear to afford the least Reason to believe that they are, then, or by that Event, deprived of them.

And our knowing, that they were possessed of these Powers, up to the very Period to which we have Faculties capable of tracing them, is itself a Probability of their retaining them, beyond it. And this is confirmed, and a sensible Credibility is given to it, by observing the very great and astonishing Changes which we have experienced; so great, that our Existence in another State of Life, of Perception and of Action, will be but according to a Method of providential Conduct, the like to which, has been already exercised even with regard to Ourselves; according to a Course of Nature, the like to which, we have already gone through.

## PART

## I.

However as one cannot but be greatly sensible, how difficult it is to silence Imagination enough to make the Voice of Reason even distinctly heard in this Case; as we are accustomed, from our Youth up, to indulge that forward delusive Faculty, ever obtruding beyond its Sphere; of some Assistance indeed to Apprehension, but the Author of all Error: As we plainly lose Ourselves in gross and crude Conceptions of things, taking for granted that we are acquainted with, what indeed we are wholly ignorant of; it may be proper to consider the imaginary Presumptions, that Death will be our Destruction, arising from these Kinds of early and lasting Prejudices; and to shew how little they can really amount to, even though we cannot wholly divest Ourselves of Them. And,

I. All Presumption of Death's being the Destruction of living Beings, must go upon supposition that they are compounded and so discernible. But since Consciousness is a single and indivisible Power, it should seem that the Subject in which it resides, must be so too. For were the Motion of any Particle of Matter absolutely one and indivisible, so as that it should imply a Contradiction to suppose Part of this Motion to exist, and Part not to exist, *i. e.* Part of this Matter to move, and Part to be at rest; then its Power of Motion would be indivisible; and so also would the Subject in which the Power inheres, namely the Particle of Matter: for if this could be divided into two, one Part might be moved and the other at rest, which is contrary to the Supposition. In like manner it has been argued<sup>ε</sup>, and, for any thing appearing to the contrary, justly, that since the Perception or Consciousness, which we have of our own Existence, is indivisible, so as that it is a Contradiction to suppose one Part of it should be here and the other there, the perceptive Power, or the Power of Consciousness, is indivisible too, and consequently the

<sup>ε</sup> See Dr. Clarke's Letter to Mr. Dodwell, and the Defences of it.

Subject in which it resides, *i. e.* the conscious Being. Now CHAP.  
upon Supposition That living Agent each Man calls himself, is I.  
thus a single Being, which there is at least no more Difficulty   
in conceiving than in conceiving it to be a Compound, and of  
which there is the Proof now mentioned, it follows, that our  
organized Bodies are no more ourselves or Part of ourselves  
than any other Matter around us. And it is as easy to conceive,  
how Matter, which is no part of ourselves, may be appropri-  
ated to us in the manner which our present Bodies are; as how  
we can receive Impressions from, and have power over any  
Matter. It is as easy to conceive, that we may exist out of Bo-  
dies as in them: and that we might have animated Bodies  
of any other Organs and Senses wholly different from these  
now given us; that we may hereafter animate these same or  
new Bodies variously modified and organized; as to conceive  
how we can animate such Bodies as our present. And lastly,  
the Dissolution of all these several organized Bodies, supposing  
ourselves to have successively animated them, would have no  
more conceivable Tendency to destroy the living Beings Our-  
selves, or deprive us of living Faculties, the Faculties of Per-  
ception and of Action; than the Dissolution of any foreign  
Matter, which we are capable of receiving Impressions from,  
and making use of for the common Occasions of Life.

II. The Simplicity and absolute Oneness of a living Agent  
cannot, from the Nature of the thing, be properly proved by ex-  
perimental Observations: But as these *fall in* with the Supposi-  
tion of its Unity, so they plainly lead us to *conclude* certainly,  
that our gross organized Bodies, with which we perceive the  
Objects of Sense, and with which we act, are no Part of our-  
selves; and therefore show us, that we have no reason to be-  
lieve Their Destruction to be Ours: even without determi-  
ning whether our living Substances be material or immaterial.  
For we see by Experience, that Men may lose their Limbs,

PART I. their Organs of Sense, and even the greatest Part of these Bodies, and yet remain the same living Agents. And Persons can trace up the Existence of themselves to a Time, when the Bulk of their Bodies was extremely small, in comparison of what it is in mature Age: and we cannot but think, that they might then have lost a considerable Part of that small Body, and yet have remained the same living Agents; as they may now lose great Part of their present Body and remain so. And it is certain, that the Bodies of all Animals are in a constant Flux, from that never-ceasing Attrition which there is in every Part of them. Now Things of this Kind unavoidably teach us to distinguish, between these living Agents Ourselves, and large Quantities of Matter, in which we are very nearly interested; since these may be alienated, and actually are in a daily Course of Succession, and changing their Owners, whilst we are assured, that each living Agent remains one and the same permanent living Being<sup>d</sup>. And this general Observation leads us on to the following ones.

*First*, That we have no way of determining by Experience, what is the certain Bulk of the living Being each man calls himself: and yet, till it be determined that it is larger in Bulk than the solid elementary Particles of Matter, which there is no Ground to think any known Power in Nature can dissolve, there is no sort of Reason to think Death to be the Dissolution of it, of the living Being, even though it should not be absolutely indiscernible.

*Secondly*, From our being so nearly related to and interested in certain Systems of Matter, suppose our Flesh and Bones, and afterwards ceasing to be at all related to them, the living Agents ourselves remaining all this while undestroyed notwithstanding such Alienation; and consequently these Systems of Mat-

<sup>d</sup> See *Dissertation 1.*

## Of a Future Life.

19

CHAP.

I.

ter not being Ourselves: it follows further, that we have no Ground to conclude any other, suppose *internal Systems* of Matter, to be the living Agents Ourselves; because we can have no Ground to conclude This, but from our Relation to and Interest in such other Systems of Matter: and therefore we can have no Reason to conclude, what befalls those Systems of Matter at Death, to be the Destruction of the living Agents. We have already several Times over lost a great Part or perhaps the whole of our Body, according to certain common established Laws of Nature; yet we remain the same living Agents: When we shall lose as great a Part, or the whole by another common established Law of Nature, Death; why may we not also remain the same? That the Alienation has been gradual in one Case, and in the other will be more at once, does not prove any thing to the contrary. We have passed undestroyed through those many and great Revolutions of Matter, so peculiarly appropriated to us ourselves; why should we imagine Death will be so fatal to us? Nor can it be objected, that what is thus alienated or lost, is no Part of our original solid Body, but only adventitious Matter; because we may lose intire Limbs, which must have contained many solid Parts and Vessels of the original Body: or if this be not admitted, we have no Proof, that any of these solid Parts are dissolved or alienated by Death. Though, by the way, we are very nearly related to that extraneous or adventitious Matter, whilst it continues united to and distending the several Parts of our solid Body. But after all; the Relation a Person bears to those Parts of his Body, to which he is the most nearly related; what does it appear to amount to but this, that the living Agent, and those Parts of the Body, mutually affect each other? And the same thing, the same thing in Kind though not in Degree, may be said of *all foreign* Matter, which gives us Ideas, and which we have any Power over. From these observations the whole Ground of the Imagination is removed, that the Dissolution of

P A R T any Matter, is the Destruction of a living Agent, from the Interest he once had in such Matter.

I.

*Thirdly*, If we consider our Body somewhat more distinctly, as made up of Organs and Instruments of Perception and of Motion, it will bring us to the same Conclusion. Thus the common optical Experiments show, and even the Observation how Sight is assisted by Glasses shows, that we see with our Eyes in the same Sense as we see with Glasses. Nor is there any Reason to believe, that we see with them in any other Sense; any other, I mean, which would lead us to think the Eye itself a Perceptient. The like is to be said of Hearing: and our Feeling distant solid Matter by means of somewhat in our Hand, seems an Instance of the like Kind, as to the Subject we are considering. All these are Instances of foreign Matter, or such as is no Part of our Body, being instrumental in preparing objects for, and conveying them to, the perceiving Power, in a Manner similar or like to the Manner, in which our Organs of Sense prepare and convey them. Both are in a like way Instruments of our receiving such Ideas from external Objects, as the Author of Nature appointed those external Objects to be the Occasions of exciting in us. However Glasses are evidently Instances of this, namely of Matter which is no Part of our Body, preparing Objects for and conveying them towards the perceiving Power, in like Manner as our bodily Organs do. And if we see with our Eyes only in the same manner as we do with Glasses, the like may justly be concluded, from Analogy, of all our other Senses. It is not intended, by any thing here said, to affirm, that the whole Apparatus of Vision, or of Perception by any other of our Senses, can be traced, through all its Steps, quite up to the living Power of seeing, or perceiving: But that so far as it can be traced by experimental Observations, so far it appears, that our Organs of Sense prepare and convey on Objects, in order to their being perceived, in like manner as fo-

reign.

## *Of a Future Life.*

21

reign Matter does, without affording any Shadow of Appearance, that they themselves perceive. And that we have no Reason to think our Organs of Sense Percipients, is confirmed by Instances of Persons losing some of them, the living Beings Themselves, their former Occupiers, remaining unimpaired. It is confirmed also by the Experience of Dreams, by which we find we are at present possessed of a latent, and, what would be otherwise, an unimagined unknown Power of perceiving sensible Objects, in as strong and lively a Manner without our external Organs of Sense as with them.

C H A P.

I.

So also with regard to our Power of moving, or directing Motion by Will and Choice; upon the Destruction of a Limb, this active Power remains, as it evidently seems, unlesened, so as that the living Being, who has suffered this Loss, would be capable of moving as before, if it had another Limb to move with. It can walk by the help of an artificial Leg; just as it can make use of a Pole or a Leaver, to reach towards itself and to move Things, beyond the Length and the Power of its natural Arm: And this last it does in the same Manner as it reaches and moves, with its natural Arm, Things nearer and of less weight. Nor is there so much as any Appearance of our Limbs being endued with a Power of moving or directing themselves; though they are adapted, like the several Parts of a Machine, to be the Instruments of Motion to each other; and some Parts of the same Limb, to be Instruments of Motion to other Parts of it.

Thus a Man determines, that he will look at such an Object through a Microscope; or being lame suppose, that he will walk to such a Place with a Staff a Week hence. His Eyes and his Feet no more determine in these Cases, than the Microscope and the Staff. Nor is there any Ground to think they any more put the Determination in Practice; or that his Eyes are

the

P A R T the Seers or his Feet the Movers, in any other than in such a Sense as the Microscope and the Staff are. Upon the whole then, I.  our Organs of Sense and our Limbs are certainly Instruments, which the living Persons ourselves make use of to perceive and move with: There is not any Probability, that they are any more; nor consequently, that we have any other Kind of Relation to them, than what we may have to any other foreign Matter formed into Instruments of Perception and Motion, suppose into a Microscope or a Staff; I say any other Kind of Relation, for I am not speaking of the Degree of it: nor consequently is there any Probability, that the Alienation or Dissolution of these Instruments is the Destruction of the perceiving and moving Agent.

And thus our finding, that the Dissolution of Matter, in which living Beings were most nearly interested, is not their Dissolution, and that the Destruction of several of the Organs and Instruments of Perception and of Motion belonging to them, is not their Destruction; shows demonstratively, that there is no Ground to think that the Dissolution of any other Matter, or Destruction of any other Organs and Instruments, will be the Dissolution or Destruction of living Agents, from the like Kind of Relation: and we have no Reason to think we stand in any other Kind of Relation to any thing which we find dissolved by Death.

But it is said these Observations are equally applicable to Brutes; and 'tis thought an insuperable Difficulty that they should be immortal, and by consequence capable of everlasting Happiness. Now this Manner of Expression is both invidious and weak; but the thing intended by it, is really no Difficulty at all, either in the way of natural or moral Consideration. For *1<sup>st</sup>*. Suppose the invidious thing designed in such a manner of Expression, were really implied, as it is not in the least,  
in

in the natural Immortality of Brutes, namely, that they must arrive at great Attainments, and become rational and moral Agents; even this would be no Difficulty: since we know not what latent Powers and Capacities they may be endued with. There was once, prior to Experience, as great Presumption against human Creatures, as there is against the brute Creatures, arriving at that Degree of Understanding, which we have in mature Age. For we can trace up our own Existence to the same Original with Theirs. And we find it to be a general Law of Nature, that Creatures endued with Capacities of Virtue and Religion, should be placed in a Condition of Being, in which they are altogether without the use of Them, for a considerable Length of their Duration; as in Infancy and Childhood. And great Part of Mankind go out of the present World, before they come to the Exercise of these Capacities in any Degree at all. But then *2dly*. The natural Immortality of Brutes, does not in the least imply, that they are endued with any latent Capacities of a rational or moral Nature. And the Oeconomy of the Universe might require; that there should be living Creatures without any Capacities of this Kind. And all Difficulties as to the manner how they are to be disposed of, are so apparently and wholly founded in our Ignorance, that 'tis wonderful they should be insisted upon by any, but such as are weak enough to think they are acquainted with the whole System of Things. There is then absolutely nothing at all in this Objection, which is so rhetorically urged, against the greatest Part of the natural Proofs or Presumptions of the Immortality of human Minds: I say the greatest Part; for 'tis less applicable to the following Observation, which is more peculiar to Mankind:

III. That as 'tis evident our *present* Powers and Capacities of Reason, Memory, and Affection, do not depend upon our gross Bodies

PART Bodies in the Manner in which Perception by our Organs of Sense does; so they do not appear to depend upon it at all in any such Manner, as to give Ground to think, that the Dissolution of this Body, will be the Destruction of these our *present* Powers of Reflection, as it will of our Powers of Sensation; or to give Ground to conclude, even that it will be so much as a Suspension of the former.

I.

Human Creatures exist at present in two States of Life and Perception, greatly different from each other; each of which has its own peculiar Laws, and its own peculiar Enjoyments and Sufferings. When any of our Senses are affected or Appetites gratified with the Objects of Them, we may be said to exist or live in a State of Sensation. When none of our Senses are affected or Appetites gratified, and yet we perceive and reason and act; we may be said to exist or live in a State of Reflection. Now it is by no means certain, that any thing which is dissolved by Death, is any way necessary to the living Being in this its State of Reflection, after Ideas are gained. For, though from our present Constitution and Condition of Being, our external Organs of Sense are necessary for conveying in Ideas to our reflecting Powers, as Carriages and Leavers and Scaffolds are in Architecture: yet when these Ideas are brought in, we are capable of reflecting in the most intense Degree, and of enjoying the greatest Pleasure and feeling the greatest Pain by Means of that Reflection, without any Assistance from our Senses; and without any at all, which we know of, from that Body which will be dissolved by Death. It does not appear then, that the Relation of this gross Body to the reflecting Being, is, in any Degree, necessary to Thinking; to our intellectual Enjoyments or Sufferings: nor consequently, that the Dissolution or Alienation of the former by Death, will be the Destruction of those present Powers, which render us capable of this State of Reflection.

fection. Further, there are Instances of mortal Diseases, which do not at all affect our present intellectual Powers; and this affords a Presumption, that those Diseases will not destroy these present Powers. Indeed, from the Observations made above<sup>e</sup>, it appears, that there is no Presumption that the Dissolution of the Body, is the Destruction of the living Agent, from their mutually affecting each other. And by the same Reasoning, it must appear too, that there is no Presumption, that the Dissolution of the Body, is the Destruction of our present reflecting Powers, from their mutually affecting each other: But Instances of their not affecting each other, afford a Presumption of the contrary. Instances of mortal Diseases not impairing our present reflecting Powers, evidently turn our Thoughts even from imagining such Diseases to be the Destruction of them. Several things indeed greatly affect all our living Powers, and at length suspend the Exercise of them; as for Instance Drowsiness, increasing till it ends in sound Sleep: and from hence we might have imagined it would destroy them, till we found by Experience the Weakness of this Way of judging. But in the Diseases now mentioned, there is not so much as this Shadow of Probability, to lead us to any such Conclusion, as to the reflecting Powers which we have at present. For in those Diseases, Persons the moment before Death, appear to be in the highest Vigour of Life. They discover Apprehension, Memory, Reason, all entire; with the utmost Force of Affection; Sense of a Character, of Shame and Honour; and the highest mental Enjoyments and Sufferings, even to the last Gasps: and these surely prove even greater Vigour of Life than bodily Strength does. Now what Pretence is there for thinking, that a progressive Disease when arrived to such a Degree, I mean that Degree which is mortal, will destroy those Powers, which were not impaired, which were not affected by it, during its whole Progress quite up to that De-

C H A P.  
I.  
<sup>e</sup> p. 18, 19.

PART III. gree? And if Death by Diseases of this Kind, is not the Destruction of our present reflecting Powers, 'twill scarce be thought that Death by any other Means is.

It is obvious that this general Observation may be carried on further; and there appears so little Connection between our bodily Powers of Sensation, and our present Powers of Reflection, that there is no Reason to conclude, that Death, which destroys the former, does so much as suspend the Exercise of the latter, or interrupt our *continuing* to exist in the like State of Reflection which we do now. For Suspension of Reason, Memory, and the Affections which they excite, is no Part of the Idea of Death, nor is implied in our Notion of it. And our daily experiencing these Powers to be exercised, without any Assistance, that we know of, from those Bodies, which will be dissolved by Death; and our finding often, that the Exercise of them is so lively to the last; these Things afford a sensible Apprehension, that Death may not perhaps be so much as a Discontinuance of the Exercise of these Powers, nor of the Enjoyments and Sufferings which it implies<sup>f</sup>. So that our posthumous Life, whatever there may be in it additional to our present, yet may not be intirely beginning anew; but going on. Death may, in some sort, and in some Respects, answer to our Birth, which is not a Suspension of the Faculties which we had before it, or a total Change of the State of Life in which we existed when in the Womb; but a Continuation of both, with such and such great Alterations.

<sup>f</sup> There are three distinct Questions, relating to a future Life, here considered: Whether Death be the Destruction of living Agents; If not, Whether it be the Destruction of their *present* Powers of Reflection, as it certainly is the Destruction of their present Powers of Sensation; And if not, Whether it be the Suspension, or Discontinuance of the Exercise, of these present reflecting Powers. Now if there be no Reason to believe the last, there will be, if that were possible, less for the next, and less still for the first.

Nay, for ought we know of Ourselves, of our present Life and of Death; Death may immediately, in the natural Course of Things, put us into a higher and more enlarged State of Life, as our Birth does; a State in which our Capacities, and Sphere of Perception and of Action, may be much greater than at present. For as our Relation to our external Organs of Sense, renders us capable of existing in our present State of Sensation; so it may be the only natural Hindrance to our existing, immediately and of course, in a higher State of Reflection. The Truth is, Reason does not at all shew us, in what State Death naturally leaves us. But were we sure that it would suspend all our perceptive and active Powers; yet the Suspension of a Power and the Destruction of it, are Effects so totally different in Kind, as we experience from Sleep and a Swoon, that we cannot in any wise argue from one to the other; or conclude even to the lowest Degree of Probability, that the same Kind of Force which is sufficient to suspend our Faculties, though it be increased ever so much, will be sufficient to destroy them.

CHAP.

I.

These Observations together may be sufficient to shew, how little Presumption there is, that Death is the Destruction of human Creatures. However there is the Shadow of an Analogy, which may lead us to imagine it is; the supposed Likeness which is observed between the Decay of Vegetables, and of living Creatures. And this Likeness is indeed sufficient to afford the Poets very apt Allusions to the Flowers of the Field, in their Pictures of the Frailty of our present Life. But in Reason, the Analogy is so far from holding, that there appears no Ground even for the Comparison, as to the present Question;

§ This according to *Strabo* was the Opinion of the *Brachmans*, νομίζον μὲν ἔφ' ἃ τὸ μὲν εὐδαίμονος βίον, ὡς ἂν ἀκμὴν κρομένην εἶναι τὸ ἢ θάνατον, γένεσιν εἰς τὸ ὄντως βίον, καὶ τὸ εὐδαίμονος τοῖς φιλοσοφῆσαι. Lib. XV. p. 1039 Ed. Amst. 1707. To which Opinion perhaps *Antoninus* may allude in these Words, ὡς ἂν παρήμενοι, τότε ἔμελλον εἰς τῆς γαστρὸς τῆς γαστρὸς ἐκ πάλιν, ἕτας ἀσκήσει τὴν ὄραν εἰ ἢ τὸ ψυχάριον σε τὸ ἔλαττε τετα ἀπισίται. Lib. IX. c. 3.

PART because one of the two Subjects compared, is wholly void of

I.  That, which is the principal and chief thing in the other, the Power of Perception and of Action; and which is the only thing we are inquiring about the Continuance of. So that the Destruction of a Vegetable, is an Event not similar or analogous to the Destruction of a living Agent.

But if, as was above intimated, leaving off the delusive Custom of substituting Imagination in the Room of Experience, we would confine ourselves to what we do know and understand; if we would argue only from That, and from That form our Expectations; it would appear at first Sight, that as no Probability of living Beings ever ceasing to be so, can be concluded from the Reason of the thing; so none can be collected from the Analogy of Nature; because we cannot trace any living Beings beyond Death. But as we are conscious that we are endued with Capacities of Perception and of Action, and are living Persons; what we are to go upon is, that we shall continue so, till we foresee some Accident or Event, which will endanger those Capacities, or be likely to destroy us: which Death does in no wise appear to be.

And thus, when we go out of this World, we may pass into new Scenes, and a new State of Life and Action, just as naturally as we came into the present. And this new State may naturally be a social one. And the Advantages of it, Advantages of every Kind, may naturally be bestowed, according to some fixt general Laws of Wisdom, upon every one in Proportion to the Degrees of his Virtue. And though the Advantages of that future natural State, should not be bestowed, as these of the present in some Measure are, by the Will of the Society; but entirely by his more immediate Action, upon whom the whole Frame of Nature depends: Yet this Distribution may be just as natural, as their being distributed here by  
the

the Instrumentality of Men. And indeed, though one should allow any confused undetermined Sense, which People please to put upon the Word *natural*, it would be a Shortness of Thought scarce credible, to imagine, that no System or Course of things can be so, but only what we see at present<sup>b</sup>: especially whilst the Probability of a future Life, or the natural Immortality of the Soul, is admitted upon the Evidence of Reason; because this is really both admitting and denying at once, a State of Being different from the present to be natural. But the only distinct Meaning of that Word is, *stated, fixed, or settled*; since what is natural, as much requires and presupposes an intelligent Agent to render it so, *i. e.* to effect it continually or at stated Times; as what is supernatural or miraculous does to effect it for once. And from hence it must follow, that Persons Notion of what is natural, will be enlarged in Proportion to their greater Knowledge of the Works of God, and the Dispensations of his Providence. Nor is there any Absurdity in supposing, that there may be Beings in the Universe, whose Capacities, and Knowledge, and Views, may be so extensive, as that the whole Christian Dispensation may to them appear natural, *i. e.* analogous or conformable to God's Dealings with other Parts of his Creation; as natural as the visible known Course of things appears to us. For there seems scarce any other possible Sense to be put upon the Word, but that only in which it is here used; similar, stated, or uniform.

C H A P.  
I.  

This Credibility of a future Life, which has been here insisted upon, how little soever it may satisfy our Curiosity, seems to answer all the Purposes of Religion, in like manner as a demonstrative Proof would: Indeed a Proof, even a demonstrative one, of a future Life, would not be a Proof of Religion. For, that we are to live Hereafter, is just as reconcileable with the Scheme of Atheism, and as well to be accounted for by it,

<sup>b</sup> See Ch. ii. Part II. p.      & Ch. iii. Part II. p.

PART as that we are now alive, is: and therefore nothing can be more absurd than to argue from That Scheme, that there can be no future State. But as Religion implies a future State, any Presumption against This, is a Presumption against Religion. And the foregoing Observations remove all Presumptions of that Sort, and prove, to a very considerable Degree of Probability, one fundamental Doctrine of Religion; which, if believed, would greatly open and dispose the Mind seriously to attend to the general Evidence of the whole.

## C H A P. II.

*Of the Government of God by Rewards and Punishments ; and particularly of the latter.*

**T**HAT which makes the Question concerning a future C H A P.  
 Life, to be of so great Importance to us, is our Capa- II.  
 city of Happiness and Misery. And that which makes   
 the Consideration of it, to be of so great Importance to us, is  
 the Supposition of our Happiness and Misery Hereafter, depend-  
 ing upon our Actions Here. Curiosity indeed could not but  
 sometimes bring a Subject, in which we may be so highly inte-  
 rested, to our Thoughts; especially upon the Mortality of Others,  
 or the near Prospect of our own. But reasonable Men would  
 not take any farther Thought about Hereafter, than what  
 should happen thus occasionally to rise in their Minds, if it  
 were certain that our future Interest no way depended upon our  
 present Behaviour: Whereas on the contrary, if there be Ground,  
 either from Analogy or any thing else, to think it does; then  
 there is Reason also for the most active Thought and Sollici-  
 tude, to secure that Interest; to behave so as that we may es-  
 cape That Misery, and obtain that Happiness in another Life,  
 which we not only suppose ourselves capable of, but which we  
 apprehend also may be put in our own Power. And whether  
 there be Ground for this last Apprehension, certainly would de-  
 serve to be most seriously considered, were there no other Proof  
 of

P A R T of a future Life and Interest, than That presumptive one, which  
 I. the foregoing Observations amount to.

Now in the present State, all which we enjoy, and a great Part of what we suffer, *is put in our own Power*. For Pleasure and Pain are the Consequences of our Actions; and we are endued by the Author of our Nature with Capacities of foreseeing these Consequences. We find by Experience He does not so much as preserve our Lives, exclusive of our own Care and Attention, to provide ourselves with, and to make use of, that Sustenance, by which he has appointed our Lives shall be preserved; and without which, he has appointed, they shall not be preserved at all. And in general we foresee, that the external things, which are the Objects of our various Passions, can neither be obtained nor enjoyed, without exerting ourselves in such and such Manners: But by thus exerting Ourselves, we obtain and enjoy these Objects, in which our natural Good consists; or by this means God gives us the Possession and Enjoyment of them. I know not, that we have any one Kind or Degree of Enjoyment, but by the means of our own Actions. And by Prudence and Care, we may for the most part, pass our Days in tolerable Ease and Quiet: Or on the contrary, we may by Rashness, ungoverned Passion, Willfulness, or even by Negligence, make Ourselves as miserable as ever we please. And many do please to make themselves extremely miserable, *i. e.* to do what they know beforehand will render them so. They follow those ways, the Fruit of which they know, by Instruction, Example, Experience, will be Disgrace and Poverty and Sickness and untimely Death. This every one observes to be the general Course of things; though it is to be allowed, we cannot find by Experience, that all our Sufferings are owing to our own Follies.

Why

Why the Author of Nature does not give his Creatures pro- C H A P.  
miscuously, such and such Perceptions without Regard to their II.  
Behaviour; why he does not make them happy without the  
Instrumentality of their own Actions, and prevent their bring-  
ing any Sufferings upon themselves; is another Matter. Per-  
haps there may be some Impossibilities in the Nature of things,  
which we are unacquainted with<sup>i</sup>. Or less Happiness, it may  
be, would upon the whole be produced by such a Method of  
Conduct, than is by the present. Or perhaps divine Goodness,  
with which, if I mistake not, we make very free in our Specu-  
lations, may not be a bare single Disposition to produce Happi-  
ness; but a Disposition to make the good, the faithful, the ho-  
nest Man happy. Perhaps an infinitely perfect Mind may be  
pleas'd with seeing his Creatures behave suitably, to the Nature  
which he has given them; to the Relations which He has plac-  
ed them in to each other; and to That, which they stand in to  
Himself: That Relation to himself, which, during their Exif-  
tence, is even necessary, and which is the most important one  
of all. Perhaps, I say, an infinitely perfect Mind may be plea-  
s'd with this moral Piety of moral Agents, in and for itself;  
as well as upon Account of its being essentially conducive to  
the Happiness of his Creation. Or the whole End, for which,  
God made, and thus governs the World, may be utterly beyond  
the Reach of our Faculties: There may be somewhat in it as  
impossible for us to have any Conception of, as for a blind Man  
to have a Conception of Colours. But however this be, it is  
certain Matter of universal Experience, that the general Me-  
thod of divine Administration, is, forewarning us, or giving us  
Capacities to foresee, with more or less Clearness, that if we  
act so and so, we shall have such Enjoyments, if so and so, such  
Sufferings; and giving us those Enjoyments, and making us feel  
those Sufferings, in consequence of our Actions.

<sup>i</sup> Ch. vii p.

PART I. “ But all this is to be ascribed to the general Course of Nature.” True. This is the very thing which I am observing. It is to be ascribed to the general Course of Nature, *i. e.* not surely to the Words or Ideas, *Course of Nature*; but to him who appointed it, and put things into it: Or to a Course of Operation, from its Uniformity or Constancy, called natural<sup>k</sup>; and which necessarily implies an operating Agent. For when Men find themselves necessitated to confess an Author of Nature, or that God is the natural Governor of the World; they must not deny this again, because his Government is uniform: They must not deny that he does things at all, because he does them constantly; because the Effects of his acting are permanent, whether his acting be so or not; though there is no Reason to think it is not. In short, every Man, in every thing he does, naturally acts upon the Forethought and Apprehension of avoiding evil or obtaining good: And if the natural Course of things be the Appointment of God, and our natural Faculties of Knowledge and Experience, are given us by him; then the good and bad Consequences which follow our Actions, are his Appointment, and our Foresight of those Consequences, is a Warning given us by Him, how we are to act.

“ Is the Pleasure then, naturally accompanying every particular Gratification of Passion, intended, to put us upon gratifying Ourselves in every such particular Instance, and as a Reward to us for so doing?” No certainly. Nor is it to be said, that our Eyes were naturally intended to give us the Sight of each particular Object, to which they do or can extend; Objects which are destructive of them, or which, for any other Reason, it may become us to turn our Eyes from: Yet there is no doubt, but that our Eyes were intended for us to see with. So neither is there any doubt, but that the foreseen Pleasures

<sup>k</sup> Ch. i. p. 28, 29.

and Pains belonging to the Passions, were intended, in general, to induce Mankind to act in such and such Manners.

CHAP.  
II.  

Now from this general Observation, obvious to every one, that God has given us to understand, he has appointed Satisfaction and Delight to be the Consequence of our acting in one Manner, and Pain and Uneasiness of our acting in another, and of our not acting at all; and that we find these Consequences, which we were beforehand informed of, uniformly to follow; we may learn, that we are at present actually under his Government in the strictest and most proper Sense; in such a Sense, as that he rewards and punishes us for our Actions. An Author of Nature being supposed, it is not so much a Deduction of Reason, as a Matter of Experience, that we are thus under his Government: under his Government, in the same Sense, as we are under the Government of civil Magistrates. Because the annexing Pleasure to some Actions, and Pain to others, in our Power to do or forbear, and giving Notice of this Appointment beforehand to those whom it concerns; is the proper formal Notion of Government. Whether the Pleasure or Pain which thus follows upon what we do, be owing, to the Author of Nature's acting upon us every Moment which we feel it; or to his having at once contrived and executed his own Part in the Plan of the World; makes no Alteration as to the Matter before us. For if civil Magistrates could make the Sanctions of their Laws take Place, without interposing at all, after they had passed them; without a Trial, and the Formalities of an Execution: If they were able to make their Laws execute themselves, or every Offender to execute them upon himself; we should be just in the same Sense under their Government then, as we are now: but in a much higher Degree, and more perfect Manner. Vain is the Ridicule, with which, one foresees, some Persons will divert themselves, upon finding lesser Pains considered as Instances of divine Punishment. There is

P A R T no Possibility of answering or evading the general thing here intended, without denying all final Causes. For final Causes being admitted, the Pleasures and Pains now mentioned, must be admitted too as Instances of them. And if they are; if God annexes Delight to some Actions, and Uneasiness to others, with an apparent Design to induce us to act so and so; then He not only dispenses Happiness and Misery, but also rewards and punishes Actions. If, for Example, the Pain which we feel, upon doing what tends to the Destruction of our Bodies, suppose upon too near approaches to Fire, or upon wounding Ourselves, be appointed by the Author of Nature to prevent our doing what thus tends to our Destruction; this is altogether as much an Instance of his punishing our Actions, and consequently of our being under his Government, as declaring by a Voice from Heaven, that if we acted so, he would inflict such Pain upon us, and inflicting it, whether it be greater or less.

Thus we find, that the true Notion or Conception of the Author of Nature, is That of a Master or Governor, prior to the Consideration of his moral Attributes. The Fact of our Case, which we find by Experience, is, that He actually exercises Dominion or Government over us at present, by rewarding and punishing us for our Actions, in as strict and proper a Sense of these Words, and even in the same Sense, as Children, Servants, Subjects, are rewarded and punished by those who govern them.

And thus the whole Analogy of Nature, the whole present Course of things, most fully shows, that there is nothing incredible in the general Doctrine of Religion; that God will reward and punish Men for their Actions Hereafter: nothing incredible, I mean, arising out of the Notion of rewarding and punishing. For the whole Course of Nature is  
a present

a present Instance of his exercising That Government over us, which implies in it rewarding and punishing.

C H A P.  
II.  
S~S

**B**UT as divine Punishment is what Men chiefly object against, and are most unwilling to allow; it may be proper to mention some Circumstances in the natural Course of Punishments at present, which are analogous to what Religion teaches us concerning a future State of Punishment: Indeed so analogous to it, that as they add a farther Credibility to this latter, so they cannot but raise a most serious Apprehension of it in those who will attend to them.

It has been now observed, that such and such Miseries naturally follow such and such Actions of Imprudence and Willfulness, as well as Actions more commonly and more distinctly considered as vitious; and that these Consequences, when they may be foreseen, are properly natural Punishments annexed to such Actions: for the general thing here insisted upon, is, not that we see a great deal of Misery in the World, but a great deal which Men bring upon themselves by their own Behaviour, which they might have foreseen and avoided. Now the Circumstances of these natural Punishments, particularly deserving our Attention, are such as these; That oftentimes they follow, or are inflicted in consequence of, Actions, which procure many present Advantages, and are accompanied with much present Pleasure; for Instance, Sickness and untimely Death, in consequence of Intemperance, though accompanied with the highest Mirth and Jollity: That these Punishments are often much greater, than the Advantages or Pleasures obtained by the Actions, of which they are the Punishments or Consequences: That though we may imagine a Constitution of Nature, in which these natural Punishments, which are in Fact to follow, would follow, immediately upon such Actions being done,

P A R T  
I.

done, or very soon after; we find on the contrary in our World, that they are often delayed a great while, sometimes even till long after the Actions occasioning them are forgot; so that the Constitution of Nature is such, that Delay of Punishment, is no Sort nor Degree of Presumption of final Impunity: That after such Delay, these natural Punishments or Miseries often come, not by Degrees, but suddenly, with Violence, and at once; however the chief Misery often does: That as Certainty<sup>1</sup> of such distant Misery following such Actions, is never afforded Persons; so perhaps during the Actions, they have seldom a distinct full Expectation of its following: And many Times the Case is only thus, that they see in general, or may see, the Credibility, that Intemperance, suppose, will bring after it Diseases; civil Crimes, civil Punishments; when yet the real Probability often is, that they shall escape: but things take their destined Course, and the Misery inevitably follows at its appointed Time, in very many of these Cases. Thus also though Youth may be alledged as an Excuse for Rashness and Folly, as being naturally thoughtless, and not clearly foreseeing all the Consequences of being untractable and profligate; this does not hinder, but that these Consequences follow, and are grievously felt, throughout the whole Course of mature Life. Habits contracted even in that Age, are often utter Ruin: And Men's Success in the World, not only in the common Sense of worldly Success, but their real Happiness and Misery, depends, in a great Degree, and in various Ways, upon the Manner in which they pass their Youth; which Consequences they for the most part neglect to consider, and perhaps seldom can properly be said to believe, beforehand. It requires also to be mentioned, that in numberless Cases, the natural Course of things affords us Opportunities for procuring Advantages to Ourselves at certain Times, which we cannot procure when we will, nor ever recall the Opportunities, if we have neglected them. The Example last mentioned, is

<sup>1</sup> See Chap. vi. Part II.

an Example of this also ; as indeed the general Course of Nature is. If, during the Opportunity of Youth, Persons are indocile and selfwill'd ; they suffer greatly in their future Life, for want of those Acquirements, which they neglected the natural Season of attaining. If the Husbandman lets his Seed-time pass without sowing, the whole Year is lost to him beyond Recovery. In like Manner, though after Men have been guilty of Folly and Extravagance *up to a certain Degree*, it is often in their Power, for instance, to retrieve their Affairs, to recover their Health and Character ; at least in good measure : yet real Reformation is in many Cases, of no Avail at all towards preventing the Miseries, Poverty, Sicknefs, Infamy, naturally annexed to Folly and Extravagance *exceeding that Degree*. There is a certain Bound to Imprudence and Misbehaviour, which being transgressed, there remains no Place for Repentance in the natural Course of things. It is further very much to be remarked, that Neglects from Inconsiderateness, Want of Attention<sup>m</sup>, not looking about us to see what we have to do, are often attended with Consequences altogether as dreadful, as any active Misbehaviour, from the most extravagant Passion. And lastly, civil Government being natural, the Punishments of it are so too : And some of these Punishments are capital ; as the Effects of a dissolute Course of Pleasure are often mortal. So that many natural Punishments are final<sup>n</sup> to him, who

<sup>m</sup> Chap. vi. Part II.

<sup>n</sup> The general Consideration of a future State of Punishment, most evidently belongs to the Subject of natural Religion. But if any of these Reflections should be thought to relate more peculiarly to this Doctrine, as taught in Scripture ; the Reader is desired to observe, that gentile Writers, both Moralists and Poets, speak of the future Punishment of the wicked, both as to the Duration and Degree of it, in a like manner of Expression and of Description, as the Scripture does : So that all which can positively be asserted to be Matter of mere Revelation, with regard to this Doctrine, seems to be, that the great Distinction between the righteous and the wicked, shall be made at the End of this World ; that each shall *Then* receive according to his Deserts. Reason did, as it well might, conclude that it should, finally and upon the whole, be well with the righteous, and ill with the wicked : But it could not be determined upon any Principles of Reason,

PART who incurs them, if considered only in his temporal Capacity:  
 I. and seem inflicted by natural Appointment, either to remove the  
 Offender out of the Way of being further mischievous; or as  
 an Example, though frequently a disregarded one, to those who  
 are left behind.

These things are not, what we call accidental, or to be met with only now and then; but they are things of every Day's Experience; which proceed from general Laws, very general ones, by which God governs the World, in the natural Course of his Providence. And they are so analogous, to what Religion teaches us concerning the future Punishment of the wicked, so much of a piece with it, that both would naturally be expressed in the very same Words, and Manner of Description. In the Book of *Proverbs* °, for Instance, Wisdom is introduced, as frequenting the most publick Places of Resort, and as rejected when she offers herself as the natural appointed Guide of human Life. *How long, speaking to those who are passing through it, how long, ye simple ones, will ye love folly, and the scorers delight in their scorning, and fools hate knowledge? Turn ye at my Reproof. Behold, I will pour out my Spirit upon you, I will make known my words unto you. But upon being neglected, Because I have called, and ye refused, I have stretched out my hand, and no man regarded; But ye have set at nought all my Counsel, and would none of my Reproof: I also will laugh at your calamity, I will mock when your fear cometh; when your fear cometh as desolation, and your destruction cometh as a whirlwind;*

son, whether human Creatures might not have been appointed to pass through other States of Life and Being, before that distributive Justice should finally and effectually take Place. Revelation teaches us, that the next State of things after the present, is appointed for the Execution of this Justice; that it shall be no longer delayed: *But the Mystery of God, the great Mystery of his suffering Vice and Confusion to prevail, shall then be finished;* and he will take to him his great Power and will reign, by rendering to every one according to his Works.

° Chap. i.

when

*When distress and anguish cometh upon you. Then shall they call upon me, but I will not answer; they shall seek me early, but they shall not find me.* This Passage, every one sees, is poetical, and some Parts of it are highly figurative; but their Meaning is obvious. And the thing intended, is expressed more literally in the following Words; *For that they hated knowledge, and did not chuse the fear of the Lord—therefore shall they eat of the fruit of their own way, and be filled with their own devices. For the Security of the simple shall slay them, and the Prosperity of fools shall destroy them.* And the whole Passage is so equally applicable, to what we experience in the present World, concerning the Consequences of Men's Actions, and to what Religion teaches us, is to be expected in another, that it may be questioned which of the two was principally intended.

CHAP'  
II.  

Indeed when one has been recollecting the proper Proofs of a future State of Rewards and Punishments, nothing methinks can give one so sensible an Apprehension of the latter, or Representation of it to the Mind, as observing; that after the many disregarded Checks, Admonitions and Warnings, which People meet with in the ways of Vice and Folly and Extravagance; Warnings from their very Nature; from the Examples of Others; from the lesser Inconveniences which they bring upon themselves; from the Instructions of wise and virtuous Men: After these have been long despised, scorned, ridiculed: after the chief bad Consequences, temporal Consequences, of their Follies, have been delayed for a great while; at length they break in irresistibly, like an armed Force: Repentance is too late to relieve, and can serve only to aggravate, their Distress: The Case is become desperate: and Poverty, and Sickness, Remorse and Anguish, Infamy and Death, the Effects of their own Doings, overwhelm them, beyond Possibility of Remedy or Escape. This is an Account of what is in Fact the general Constitution of Nature.

PART It is not in any sort meant, that according to what appears at present of the natural Course of things, Men are always uniformly punished in proportion to their Misbehaviour: But that there are very many Instances of Misbehaviour punished in the several Ways now mentioned, and very dreadful Instances too; sufficient to show what the Laws of the Universe may admit; and, if thoroughly considered, sufficient fully to answer all Objections against the Credibility of a future State of Punishments; from any Imaginations, that the Frailty of our Nature and external Temptations, almost annihilate the Guilt of human Vices: as well as Objections of another Sort; from Necessity; from Suppositions, that the Will of an infinite Being cannot be contradicted; or that He must be incapable of Offence and Provocation <sup>p</sup>.

Reflections of this Kind are not without their Terrors to serious Persons, the most free from Enthusiasm, and of the greatest Strength of Mind: But it is fit things be stated and considered as they really are. And there is, in the present Age, a certain Fearfulness, with regard to what may be hereafter under the Government of God, which, nothing but an universally acknowledged Demonstration on the Side of Atheism, can justify; and which makes it quite necessary, that Men be reminded, and if possible made to feel, that there is no Sort of Ground for being thus presumptuous, even upon the most sceptical Principles. For, may it not be said of any Person upon his being born into the World, he may behave so, as to be of no Service to it, but by being made an Example of the woful Effects of Vice and Folly? That he may, as any one may, if he will, incur an infamous Execution, from the Hands of civil Justice; or in some other Course of Extravagance shorten his Days: or bring upon himself Infamy and Diseases worse than Death? So

<sup>p</sup> See Chap. iv. & vi.

that it had been better for him, even with regard to the present C H A P.  
World, that he had never been born. And is there any pretence II.  
of Reason, for People to think themselves secure, and talk as if ~~~~~  
they had certain Proof; that let them act as licentiously as they  
will, there can be nothing analogous to This, with regard to  
a future and more general Interest, under the Providence and  
Government of the same God?

*Of the Moral Government of God.*

P A R T

I.  

**A**S the manifold Appearances of Design and of final Causes, in the Constitution of the World, prove it to be the Work of an intelligent Mind; so the particular final Causes of Pleasure and Pain distributed amongst his Creatures, prove that they are under his Government: what may be called His natural Government of Creatures endued with Sense and Reason. This implies somewhat more than seems usually attended to, when we speak of God's natural Government of the World. It implies Government of the very same Kind with That, which a Master exercises over his Servants, or a civil Magistrate over his Subjects. These latter Instances of final Causes, as really prove an intelligent Governor of the World, in the Sense now mentioned, and before<sup>a</sup> distinctly treated of; as any other Instances of final Causes, prove an intelligent Maker of it.

But this alone, does not appear at first Sight to determine any thing certainly, concerning the moral Character of the Author of Nature, considered in this Relation of Governor; does not ascertain his Government to be moral, or prove that he is the righteous Judge of the World. Moral Government consists, not barely in rewarding and punishing Men for their Actions, which the most tyrannical Person may do: but in rewarding the Righteous and punishing the Wicked; in rendering to Men ac-

<sup>a</sup> Chap ii.

cording

According to their Actions considered as good or evil. And the Perfection of moral Government consists in doing this, with regard to all intelligent Creatures, in an exact Proportion to their personal Merits or Demerits.

C H A P.  
III.

Some Men seem to think, the only Character of the Author of Nature, to be That of simple absolute Benevolence. This, considered as a Principle of Action and infinite in Degree, is a Disposition to produce the greatest possible Happiness, without Regard to Persons Behaviour, otherwise than as such Regard would produce higher Degrees of it. And supposing this to be the only Character of God, Veracity and Justice in Him, would be nothing but Benevolence conducted by Wisdom. Now surely this ought not to be asserted, unless it can be proved; for we should speak with cautious Reverence upon such a Subject. And whether it can be proved or no, is not the thing here to be inquired into; but whether in the Constitution and Conduct of the World, a righteous Government be not discernibly planned out, which necessarily implies a righteous Governor. There may possibly be in the Creation Beings, to whom the Author of Nature manifests himself under this most amiable of all Characters, this of infinite absolute Benevolence; for it is the most amiable, supposing it not, as perhaps it is not, incompatible with Justice: but he manifests himself to Us under the Character of a righteous Governor. Consistently with this, He may be simply absolutely benevolent in the Sense now explained; but he is, for he has given us a Proof in the Constitution and Conduct of the World, that he is, a Governor over Servants, as he rewards and punishes us for our Actions: And in the Constitution and Conduct of it, he may also have given, besides the Reason of the thing, and the natural Presages of Conscience, clear and distinct Intimations, that his Government is righteous or moral; clear to such as think the Nature of it deserving their

PART their Attention: and yet not to every careless Person who casts  
 I. a transient Reflection upon the Subject<sup>b</sup>.

But it is particularly to be observed, that the divine Government, which we experience Ourselves under in the present State, taken alone, is allowed not to be the Perfection of moral Government. And yet this by no means hinders, but that there may be somewhat, be it more or less, truly moral in it. A righteous Government may plainly appear to be carried on to some Degree: enough to give us the Apprehension that it shall be completed, or carried on to that Degree of Perfection which Religion teaches us it shall; but which cannot appear, till much more of the divine Administration be seen, than can in the present Life. And the Design of this Chapter is to inquire, how far this is the Case; how far, over and above the moral Nature<sup>c</sup> which God has given us, and our natural Notion of Him as righteous Governor of those his Creatures, to whom he has given this Nature<sup>d</sup>; I say how far besides this, the Principles and Beginnings of a moral Government over the World, may be discerned, notwithstanding and amidst all the Confusion and Disorder of it.

Now one might mention here, what has been often urged with great Force, that in general, less Uneasiness and more Satisfaction, are the natural Consequences<sup>e</sup> of a virtuous than of a vitious Course of Life, in the present State, as an Instance

<sup>c</sup> The Objections against Religion, from the Evidence of it not being universal, nor so strong as might possibly have been, may be urged against natural Religion, as well as against revealed. And therefore the Consideration of them, belongs to the first Part of this Treatise, as well as the second. But as these Objections are chiefly urged against revealed Religion, I chose to consider them in the second Part. And the Answer to them there, Ch. vi. as urged against Christianity, being almost equally applicable to them as urged against the Religion of Nature, to avoid Repetition, the Reader is referred to that Chapter.

<sup>e</sup> *Dissertation 2.*

<sup>d</sup> Chap. vi. p.

<sup>a</sup> See Lord Shaftsbury's Inquiry concerning Virtue, Part II.

of a moral Government established in Nature; an Instance of it, collected from Experience and present Matter of Fact. But it must be owned a thing of Difficulty to weigh and balance Pleasures and Uneasinesses, each amongst themselves, and also against each other, so as to make an Estimate, with any Exactness, of the Overplus of Happiness on the Side of Virtue. And it is not impossible, that, amidst the infinite Disorders of the World, there may be Exceptions to the Happiness of Virtue; even with regard to them, whose Course of Life from their Youth up, has been blameless; and more with regard to those, who have gone on for some time in the ways of Vice, and have afterwards reformed. For suppose an Instance of the latter Case; a Person with his Passions inflamed, his natural Faculty of Self-Government impaired by Habits of Indulgence, and with all his Vices about him, like so many Harpies, craving for their accustomed Gratification: who can say how long it might be, before such a Person would find, more Satisfaction in the Reasonableness and present good Consequences of Virtue, than Difficulties and Self-denial in the Restraints of it? Experience also shows, that Men can, to a great Degree, get over their Sense of Shame, so as that by professing themselves to be without Principle, and avowing even direct Villany, they can support themselves against the Infamy of it. But as the ill Actions of any one, will probably be more talked of and oftener thrown in his way, upon his Reformation; so the Infamy of them will be much more felt, after the natural Sense of Virtue and of Honour is recovered. Uneasinesses of this Kind ought indeed to be put to the Account of former Vices, yet it will be said, they are in Part the Consequences of Reformation. Still I am far from allowing it doubtful, whether Virtue upon the whole be happier than Vice in the present World: But if it were, yet the Beginnings of a righteous Administration, may beyond all Question be found in Nature, if we will attentively inquire after them. And,

PART I. In whatever Manner the Notion of God's moral Government over the World, might be treated, if it did not appear, whether he were in a proper Sense our Governor at all, yet when it is certain Matter of Experience, that He does manifest himself to us under the Character of a Governor in the Sense explained <sup>f</sup>; it must deserve to be considered, whether there be not reason to apprehend, that he may be a righteous or moral Governor. Since it appears to be Fact, that God does govern Mankind by the Method of Rewards and Punishments, according to some settled Rules of Distribution, it is surely a Question to be asked; what Presumption is there against his finally rewarding and punishing them, according to this particular Rule, namely, as they act reasonably or unreasonably, virtuously or vitiously? Since rendering Men happy or miserable by this Rule, certainly falls in, much more falls in, with our natural Apprehensions and Sense of things, than doing so by any other Rule whatever: Since rewarding and punishing Actions by any other Rule, would appear much harder to be accounted for, by Minds formed as He has formed ours. Be the Evidence of Religion then more or less clear, the Expectation which it raises in us, that the righteous shall, upon the whole, be happy, and the wicked miserable, cannot however possibly be considered as absurd or chimerical; because it is no more than an Expectation, that a Method of Government already begun, shall be carried on, the Method of rewarding and punishing Actions; and shall be carried on by a particular Rule, which unavoidably appears to us at first Sight more natural than any other, the Rule which we call distributive Justice. Nor,

II. Ought it to be entirely passed over, that Tranquillity, Satisfaction, and external Advantages, being the natural Consequences of prudent Management of Ourselves, and our Affairs;

<sup>f</sup> Chap. ii.

and Rashness, profligate Negligence, and willful Folly, bringing after them many Inconveniencies and Sufferings; these afford Instances of a Right Constitution of Nature: as the Correction of Children, for their own Sakes, and by way of Example, when they run into Danger or hurt themselves, is a Part of right Education. And thus, that God governs the World by general fixt Laws, that He has endued us with Capacities of reflecting upon this Constitution of things, and foreseeing the good and bad Consequences of our Behaviour; plainly implies some sort of Moral Government: since from such a Constitution of things it cannot but follow, that Prudence and Imprudence, which are of the Nature of Virtue and Vice,<sup>s</sup> must be, as they are, respectively rewarded and punished.

C H A P.  
III.

III. From the natural Course of things, vicious Actions are, to a great Degree, actually punished as mischievous to Society: And besides Punishment actually inflicted upon this Account, there is also the Fear and Apprehension of it in those Persons, whose Crimes have render'd them obnoxious to it, in Case of a Discovery; this State of Fear being itself often a very considerable Punishment: We must add too That Fear and Apprehension of it, by which Men are restrained from such Crimes. It is necessary to the very being of Society, that Vices destructive of it, should be punished *as being so*; the Vices of Falshood, Injustice, Cruelty: Which Punishment therefore is as natural as Society; and so is an Instance of a Kind of moral Government, naturally established and actually taking place. And, since the certain natural Course of Things, is the Conduct of Providence or the Government of God, though carried on by the Instrumentality of Men; the Observation here made amounts to this, that Mankind find themselves placed

<sup>s</sup> See Dissert. II.

PART by Him in such Circumstances, as that they are unavoidably accountable for their Behaviour, and are often punished, and sometimes rewarded under His Government, in the view of their being mischievous, or eminently beneficial to Society.

I.

If it be objected that good Actions, and such as are beneficial to Society, are often punished, as in the Case of Persecution and in other Cases; and that ill and mischievous Actions are often rewarded: It may be answered distinctly; first, that this is in no sort necessary, and consequently not natural, in the sense in which it is necessary, and therefore natural, that ill or mischievous Actions should be punished: And in the next Place, that good Actions are never punished, considered as beneficial to Society, nor ill Actions rewarded, under the view of their being hurtful to it. So that it stands good, without any thing on the side of vice to be set over against it, that the Author of Nature has as truly directed, that vitious Actions considered as mischievous to Society, should be punished, and put Mankind under a Necessity of thus punishing them; as he has directed and necessitated us to preserve our Lives by Food.

IV. In the natural Course of things, *Virtue as such* is actually rewarded, and *Vice as such* punished: which seems to afford an Instance or Example, not only of Government, but of moral Government, begun and established; moral in the strictest Sense; though not in that Perfection of Degree, which Religion teaches us to expect. In order to see this more clearly, we must distinguish between Actions themselves, and That Quality ascribed to them, which we call virtuous or vitious. The Gratification itself of every natural Passion, must be attended with Delight: And Acquisitions of Fortune, however made, are Acquisitions of the Means or Material,

of

of Enjoyment. An Action then, by which any natural Passion is gratified or Fortune acquired, procures Delight or Advantage; abstracted from all Consideration of the Morality of such Action. Consequently the Pleasure or Advantage in this Case, is gained by the Action itself, not by the Morality, the Virtuousness or Viciousness of it; though it be, perhaps, virtuous or vicious. Thus, to say such an Action or Course of Behaviour, procured such Pleasure or Advantage, or brought on such Inconvenience and Pain, is quite a different thing from saying, that such good or bad Effect was owing to the Virtue or Vice of such Action or Behaviour. In one Case, an Action abstracted from all moral Consideration, produced its Effect: In the other Case, for it will appear that there are such Cases, the Morality of the Action, the Action under a moral Consideration, *i. e.* the Virtuousness or Viciousness of it, produced the Effect. Now I say Virtue as such, naturally procures considerable Advantages to the Virtuous, and Vice as such, naturally occasions great Inconvenience and even Misery to the Vicious, in very many Instances. The immediate Effects of Virtue and Vice upon the Mind and Temper, are to be mentioned as Instances of it. Vice as such is naturally attended, with some sort of Uneasiness, and, not uncommonly, with great Disturbance and Apprehension. That inward Feeling, which, respecting lesser Matters, and in familiar Speech, we call being vexed with oneself, and in matters of Importance and in more serious Language, Remorse; is an uneasiness naturally arising from an Action of a Man's own, reflected upon by himself as wrong, unreasonable, faulty, *i. e.* Vicious in greater or less Degrees: And this manifestly is a different Feeling from that Uneasiness, which arises from a Sense of mere Loss or Harm. What is more common than to hear a Man lamenting an Accident or Event, and adding — but however he has the Satisfaction that he cannot blame himself for it; or on the contrary, that

PART he has the Uneasiness of being sensible it was his own Doing?

I. Thus also the Disturbance and Fear, which often follow upon a Man's having done an Injury, arise from a Sense of his being blame-worthy; otherwise there would, in many Cases, be no Ground of Disturbance, nor any Reason to fear Resentment or Shame. On the other hand, inward Security and Peace, and a Mind open to the several Gratifications of Life, are the natural Attendants of Innocence and Virtue. To which must be added the Complacency, Satisfaction, and even Joy of Heart, which necessarily, and often, accompany the Exercise, the real Exercise, of Gratitude, Friendship, Benevolence.

And here, I think, ought to be mentioned, the Fears of future Punishment, and peaceful Hopes of a better Life, in those who fully believe, or have any serious Apprehension of Religion: because these Hopes and Fears are present Uneasiness and Satisfaction to the Mind; and cannot be got rid off by great Part of the World, even by Men who have thought most thoroughly upon the Subject of Religion. And no one can say, how considerable this Uneasiness and Satisfaction may be, or what upon the whole it may amount to.

In the next Place, comes in the Consideration, that all honest and good Men are disposed to befriend honest good Men as such, and to discountenance the vicious as such, and do so in some Degree; indeed in a considerable Degree: from which Favour and Discouragement cannot but arise considerable Advantage and Inconvenience. And though the Generality of the World have little Regard to the Morality of their own Actions, and may be supposed to have less to that of Others, when they Themselves are not concerned; yet let any One be known to be a Man of Virtue, some how or other, he will be favoured, and good offices will be done him, from  
Regard

Regard to his Character without remote Views, occasionally, and in some low Degree, I think, by the Generality of the World, as it happens to come in their Way. Publick Honours too and Advantages are the natural Consequences, are sometimes at least the Consequences in Fact, of virtuous Actions; of eminent Justice, Fidelity, Charity, Love to our Country, considered in the view of being virtuous. And sometimes even Death itself, often Infamy and external Inconveniences, are the publick Consequences of Vice as Vice. For instance, the Sense which Mankind have of Tyranny, Injustice, Oppression, additional to the meer Feeling or Fear of Misery, has doubtless been instrumental in bringing about Revolutions, which make a Figure even in the History of the World. For it is plain, Men resent Injuries as implying Faultiness, and retaliate, not merely under the notion of having received Harm, but of having received wrong; and they have this Resentment in Behalf of Others, as well as of Themselves. So likewise even the Generality are, in some Degree, grateful and disposed to return good offices, not merely because such an one has been the Occasion of good to Them, but under the view, that such good offices implied kind Intention and good Desert in the Doer. To all this may be added two or three particular things, which, many Persons will think frivolous; but to me nothing appears so, which at all comes in towards determining a Question of such Importance, as, whether there be, or be not, a moral Institution of Government, in the strictest Sense moral, *visibly* established and begun in Nature. The particular things are these; that in domestick Government, which is doubtless natural, Children and Others also, are very generally punished for Falshood, and Injustice, and Ill-behaviour, as such, and rewarded for the contrary; which are Instances of Veracity, and Justice, and right Behaviour as such, naturally enforced by Rewards and Punishments,

CHAP.  
III.  
~~~~~

PART  
I.  ments, whether more or less considerable: That, though civil Government be supposed to take Cognizance of Actions in no other view than as prejudicial to Society, without respect to the Immorality of them; yet as such Actions are immoral, so the Sense which Men have of the Immorality of them, very greatly contributes, in different ways, to bring Offenders to Justice: And that intire Absence of all Crime and Guilt in the moral Sense, when plainly appearing, will almost of course procure, and Circumstances of aggravated Guilt prevent, a Remission of the Penalties annexed to civil Crimes, in many Cases, though by no means in all.

Upon the whole, besides the good and bad Effects of Virtue and Vice upon Men's own Minds, the Course of the World does, in some Measure, turn upon the Approbation and Disapprobation of them as such, in Others. The Sense of well and ill Doing, the Presages of Conscience, the Love of good Characters and Dislike of bad ones, Honour, Shame, Repentment, Gratitude; all these, considered in themselves, and in their Effects, do afford manifest real Instances of Virtue as such naturally favoured, and of Vice as such discountenanced, more or less, in the daily course of human Life; in every Age, in every Relation, in every general Circumstance of it. That God has given us a moral Nature<sup>h</sup>, may most justly be urged as a Proof of our being under his moral Government: But that he has placed us in a Condition, which gives this Nature, as one may speak, Scope to operate, and in which it does unavoidably operate, *i. e.* influence mankind to act, so as thus to favour and reward Virtue, and discountenance and punish Vice; this is not the same, but a further, additional Proof of his moral Government: for it is an Instance

<sup>h</sup> See Differt. II.

of it. The first is a Proof, that he will finally favour and support Virtue effectually; the second is an Example of His favouring and supporting it at present, in some Degree.

C H A P.

III.

If a more distinct Inquiry be made, whence it arises, that Virtue as such is often rewarded, and Vice as such is punished, and this Rule never inverted; it will be found to proceed, in Part, immediately from the moral Nature itself, which God has given us; and also in Part, from his having given Us, together with this Nature, so great a Power over each other's Happiness and Misery. For first, it is certain, that Peace and Delight, in some Degree and upon some Occasions, is the necessary and present Effect of virtuous Practice; an Effect arising immediately from that Constitution of our Nature. We are so made, that Well-doing as such gives us Satisfaction, at least, in some Instances; Ill-doing as such, in none. And secondly, From our Moral Nature, joined with God's having put our Happiness and Misery in many Respects in each other's Power, it cannot but be, that Vice as such, some Kinds and Instances of it at least, will be infamous, and Men will be disposed to punish it as in itself detestable; and the Villain will by no means be able always to avoid feeling that Infamy, any more than he will be able to escape this further Punishment, which Mankind will be disposed to inflict upon him, under the Notion of his deserving it. But there can be nothing on the side of Vice, to answer this; because there is nothing in the human Mind, contradictory, as the Logicians speak, to Virtue. For Virtue consists, in a Regard to what is Right and Reasonable, as being so; in a Regard to Veracity, Justice, Charity, in themselves: and there is surely no such thing as a like natural Regard to Falshood, Injustice, Cruelty. If it be thought, that there are Instances of  
an

PART an Approbation of Vice, as such, in itself, and for its own sake, though it does not appear to me, that there is any such thing at all; but supposing there be, it is evidently monstrous: as much so, as the most acknowledged Perversion of any Passion whatever. Such Instances of Perversion then being left out, as merely imaginary, or, however, unnatural; from the Frame of our Nature, and from our Condition, in the Respects now described, it must follow, that Vice cannot at all be, and Virtue cannot but be upon some Occasions, favoured as such by Others, and happy in itself, in some Degree. For what is here insisted upon, is not the Degree in which Virtue and Vice are thus distinguished, but only the thing itself, that they are so in some Degree; though the whole good and bad Effect of Virtue and Vice as such, is not inconsiderable in Degree. But that they must be thus distinguished in some Degree, is in a manner necessary: It is Matter of Fact of daily Experience, even in the greatest Confusion of human Affairs.

It is not pretended, but that in the natural Course of Things, Happiness and Misery appear to be distributed by other Rules than only the personal Merit and Demerit of Characters. They may sometimes be distributed by way of mere Discipline: There may be the wisest and best Reasons, why the World should be governed by general Laws, from whence such promiscuous Distribution perhaps must follow; and also why our Happiness and Misery should be put in each other's Power, in the Degree which they are. And these things, as they contribute to the rewarding Virtue and punishing Vice, as such: so also they contribute, not to the Inversion of this, which is impossible; but often to the rendring Persons prosperous, though wicked, afflicted, though righteous; and, which is worse, to the *Rewarding some Actions*, though viti-  
ous

ous, and *punishing other Actions* though virtuous. But all this cannot drown the Voice of Nature in the conduct of Providence, plainly declaring itself for Virtue, by way of Distinction from Vice, and Preference to it. For, our being so constituted, as that Virtue and Vice are thus naturally favoured and discountenanced, rewarded and punished respectively as such, is an intuitive Proof of the Intent of Nature, that it should be so; otherwise the Constitution of our Mind, from which it thus immediately and directly proceeds, would be absurd. But it cannot be said, because virtuous Actions are sometimes punished, and vicious Actions rewarded, that Nature intended it. For, though this great Disorder is brought about, as all Actions are done, by means of some natural Passion; yet *This may be*, as it undoubtedly is, brought about by the Perversion of such Passion, implanted in us for other, and those very good Purposes. And indeed these other and good Purposes, even of every Passion, may be clearly seen.

CHAP.  
III.  

We have then a Declaration, in some Degree of present Effect, from Him who is supreme in Nature, which Side He is of, or what Part He takes; a Declaration for Virtue and against Vice. So far therefore as a Man is true to Virtue, to Veracity and Justice, to Equity and Charity and the right of the Case, in whatever he is concerned; so far he is on the Side of the divine Administration, and co-operates together with it: and from hence, to such a Man, arises naturally a secret Satisfaction and Sense of Security, and implicate Hope of somewhat further. And,

V. This Hope is confirmed, by the necessary Tendencies of Virtue, which, though not of present Effect, yet are at present discernible in Nature; and so afford an Instance of somewhat moral in the essential Constitution of it. There is, in the Nature of  
I Things,

P A R T Things, a Tendency in Virtue and Vice to produce the good and bad Effects now mentioned, in a greater Degree than they do in Fact produce them. For Instance; good and bad Men as such, would be much more rewarded and punished, were it not, that Justice is often artificially eluded, that Characters are not known, and many, who would thus favour Virtue and discourage Vice, are hindered from doing so by accidental Causes. These Tendencies of Virtue and Vice are obvious with regard to *Individuals*. But it may require more particularly to be considered, that Power in a *Society*, by being under the Direction of Virtue, naturally increases, and has a necessary Tendency to prevail over opposite Power, not under the Direction of it; in like Manner as Power, by being under the Direction of Reason, increases, and has a Tendency to prevail over brute Force. There are several brute Creatures of equal, and several of superior Strength, to That of Men; And possibly the Summ of the whole Strength of Brutes, may be greater than That of Mankind: but Reason gives us the Advantage and Superiority over them; and thus Man is the acknowledged governing Animal upon the Earth. Nor is this Superiority considered by any as accidental, but as what Reason has a Tendency, in the Nature of the Thing, to obtain. And yet perhaps Difficulties may be raised about the Meaning, as well as the Truth, of the Assertion, that Virtue has the like Tendency.

To obviate these Difficulties, let us see more distinctly, how the Case stands with Regard to Reason, which is so readily acknowledged to have this advantageous Tendency. Suppose then two or three Men, of the best and most improved Understanding, in a desolate open Plain, attacked by ten times the number of Beasts of Prey: Would their Reason secure them the Victory in this unequal Combat? Power then, though joined with Reason, and under its Direction, cannot be expected to prevail

prevail over opposite Power, though merely brutal, unless the one bears some Proportion to the other. Again; Put the imaginary Case, that rational and irrational Creatures were of like external Shape and Manner: it is certain, before there were Opportunities for the first, to distinguish each other, to separate from their Adversaries, and to form an Union among themselves, they might be upon a Level, or in several Respects upon great Disadvantage; though united they might be vastly superior: Since Union is of such Efficacy, that ten Men united, might be able to accomplish, what ten thousand of the same natural Strength and Understanding wholly ununited, could not. In this Case then, brute Force might more than maintain its Ground against Reason, for Want of Union among the rational Creatures. Or suppose a Number of Men to land upon an Island inhabited only by wild Beasts; a Number of Men, who, by the Regulations of civil Government, the Inventions of Art, and the Experience of some Years, could they be preserved so long, would be really sufficient, to subdue the wild Beasts, and to preserve themselves in Security from them: Yet a Conjunction of Accidents might give such Advantage to the irrational Animals, as that they might at once over-power, and even extirpate, the whole Species of rational ones. Length of time then, such and such Scope and Opportunities, for Reason to exert itself, may be absolutely necessary to its prevailing over brute Force. Further still, there are many Instances of Brutes succeeding in Attempts, which they could not have undertaken, had not their irrational Nature rendered them incapable of foreseeing the Danger of such Attempts, or the Fury of Passion hindered their attending to it; and Instances of Reason and real Prudence preventing Men's undertaking what, it hath appeared afterwards, they might have succeeded in by a lucky Rashness. And in certain Conjunctions, Ignorance and Folly, Weakness and Discord, may have their Advantages. So that rational Animals

C H A P.

III.

P A R T have not necessarily the Superiority over irrational ones; but, how improbable soever it may be, it is evidently possible, that, in some Globes, the latter may be superior. And were the former wholly at variance and disunited, by false Self-interest and Envy, by Treachery and Injustice, and consequent Rage and Malice against each other, whilst the latter were firmly united among themselves by Instinct; this might greatly contribute to the introducing such an inverted Order of things. For every one would consider it as inverted: Since Reason has, in the Nature of it, a Tendency to prevail over brute Force; notwithstanding, the Possibility it may not prevail, and the Necessity, which there is, of many concurring Circumstances to render it prevalent.

I.  Now I say, Virtue in a Society has a like Tendency to procure Superiority and additional Power; whether this Power be considered as the Means, of Security from opposite Power, or of obtaining other Advantages. And it has this Tendency, by rendering publick Good, an Object, and End, to every Member of the Society; by putting every one upon Consideration and Diligence, Recollection and Self-government, both in order to see what is the most effectual Method, and also in order to perform their proper Part, for obtaining and preserving it; by uniting a Society within itself, and so increasing its Strength; and, which is particularly to be mentioned, uniting it by Means of Veracity and Justice. For as these last are principal Bonds of Union, so Benevolence or publick Spirit, undirected, unrestrained, by them, is, no body knows what.

And suppose the invisible World, and the invisible Dispensations of Providence, to be, in any sort analogous to what appears: or that both together make up one uniform Scheme, the two Parts of which, are analogous to each other; the

Part

Part which we see, and That which is beyond our Observation: C H A P. III.  
Then, there must be a like natural Tendency in the derived Power, throughout the Universe, under the Direction of Virtue, to prevail in general over That, which is not under its Direction; as there is in Reason, derived Reason in the Universe, to prevail over brute Force. But then, in order to the Prevalence of Virtue, or that it may actually produce, what it has a Tendency to produce; the like Concurrences are necessary, as are, to the Prevalence of Reason. There must be some Proportion, between the natural Power or Force which is, and That which is not, under the Direction of Virtue: There must be sufficient Length of Time; for the compleat Success of Virtue, as of Reason, cannot, from the Nature of Thing, be otherwise than gradual: There must be, as one may speak, a fair Field of Trial, a Stage large and extensive enough, proper Occasions and Opportunities, for the virtuous to join together, to exert themselves against lawless Force, and to reap the Fruit of their united Labours. Now indeed it is to be hoped, that the Disproportion between the good and bad, even here on Earth, is not so great, but that the former have natural Power sufficient to their prevailing, to a considerable Degree; if Circumstances would permit this Power to be united. For, much less, very much less, Power under the Direction of Virtue, would prevail over much greater not under the Direction of it. However, good Men over the Face of the Earth, cannot unite; as for other Reasons, so because they cannot be sufficiently ascertained of each other's Characters. And the known Course of human Things, the Scene we are now passing through, particularly the Shortness of Life, denies to Virtue its full Scope, in several other Respects. The natural Tendency, which we have been considering, though real, is *hindered* from being carried into Effect in the present State: But these Hindrances may be removed in a future one. Virtue, to borrow the Christian Allusion,

P A R T I.   
 fion, is militant Here; and various untoward Accidents contribute to its being often overborn: But it may combat with greater Advantage Hereafter, and prevail compleatly, and enjoy its consequent Rewards, in some future States. Neglected as it is, perhaps unknown, perhaps despised and oppressed, here; there may be Scenes in Eternity, lasting enough, and in every other way adapted, to afford it a sufficient Sphere of Action; and a sufficient Sphere for the natural Consequences of it to follow in Fact. If the Soul be naturally immortal, and this State be a Progress towards a future one, as Childhood is towards mature Age; good Men may naturally unite, not only amongst themselves, but also with other Orders of virtuous Creatures, in that future State. For Virtue, from the very Nature of it, is a Principle and Bond of Union, in some Degree, amongst all who are endued with it, and known to each other; so as that by it, a good Man cannot but recommend himself to the Favour and Protection of all virtuous Beings, throughout the whole Universe, who can be acquainted with his Character, and can any way interpose in his Behalf, in any Part of his Duration. And one might add, that suppose all this advantageous Tendency of Virtue to become Effect, amongst one or more Orders of Creatures, in any distant Scenes and Periods, and to be seen by any Orders of vitious Creatures, throughout the universal Kingdom of God; this happy Effect of Virtue, would have a Tendency, by way of Example, and possibly in other Ways, to amend those of them, who are capable of Amendment, and being recovered to a just Sense of Virtue. If our Notions of the Plan of Providence were enlarged, in any sort proportionably to what late Discoveries have enlarged our Views, with Respect to the material World; Representations of this Kind, would not appear absurd or extravagant. However they are not to be taken, as intended for a literal Delineation of what is in Fact the particular Scheme of the Universe, which cannot be known without Revelation;

velation ; for Suppositions are not to be looked on as true, because not incredible: But they are mentioned to shew, that our finding Virtue to be hindred from procuring to itself such Superiority and Advantages, is no Objection against its having, in the essential Nature of the thing, a Tendency to procure them. And the Suppositions now mentioned, do plainly shew this; for they shew, that these Hindrances are so far from being necessary, that we ourselves can easily conceive, how they may be removed in future States, and full Scope be granted to Virtue. And all these advantageous Tendencies of it, are to be considered as Declarations of God in its Favour. This however is taking a pretty large Compass; though it is certain, that, as the material World appears to be, in a manner, boundless and immense, there must be *some* Scheme of Providence vast in Proportion to it.

But let us return to the Earth our Habitation ; and we shall see this happy Tendency of Virtue, by imagining an Instance not so vast and remote : by supposing a Kingdom or Society of Men upon it, perfectly virtuous, for a Succession of many ages; to which, if you please, may be given a Situation advantageous for universal Monarchy. In such a State, there would be no such thing as Faction: but Men of the greatest Capacity would of Course, all along, have the chief Direction of Affairs willingly yielded to them; and they would share it among themselves without Envy. Each of these would have the Part assigned him, to which his Genius was peculiarly adapted; and others, who had not any distinguished Genius, would be safe, and think themselves very happy, by being under the Protection and Guidance of those who had. Publick Determinations would really be the Result of the united Wisdom of the Community; and they would faithfully be executed, by the united Strength of it. Some would in a higher  
Way

P A R T I. Way contribute, but all would in some Way contribute, to the publick Prosperity; and in it, each would enjoy the Fruits of his own Virtue. And as Injustice, whether by Fraud or Force, would be unknown among themselves; so they would be sufficiently secured from it in their Neighbours. For Cunning and false Self-interest, Confederacies in Injustice, ever slight, and accompanied with Faction and intestine Treachery; these on one hand, would be found mere childish Folly and Weakness, when set in Opposition, against Wisdom, publick Spirit, Union inviolable, and Fidelity on the other: allowing both a sufficient Length of Yeats to try their Force. Add the general Influence, which such a Kingdom would have over the Face of the Earth, by Way of Example particularly, and the Reverence which would be paid it. It would plainly be superior to all others, and the World must gradually come under its Empire: not by Means of lawless Violence; but partly by what must be allowed to be just Conquest; and partly by other Kingdoms submitting themselves voluntarily to it, throughout a Course of Ages, and claiming its Protection, one after another, in successive Exigencies. The Head of it would be an universal Monarch, in another Sense than any Mortal has yet been; and the eastern Stile would be literally applicable to him, that all People, Nations, and Languages should serve him. And though indeed our Knowledge of human Nature, and the whole History of Mankind, shew the Impossibility, without some miraculous Interpositions, that a Number of Men, here on Earth, should unite in one Society or Government, in the Fear of God and universal Practice of Virtue; and that such a Government should continue so united for a Succession of Ages: yet admitting or supposing this, the Effect would be as now drawn out. And thus, for Instance, the wonderful Prosperity promised to the Jewish Nation in the Scripture, would be, in a great Measure, the Consequence of what is predicted of them; that the

*People*

*People should be all righteous and inherit the Land for ever*<sup>a</sup>. The Predictions of this Kind, for there are many of them, cannot come to pass, in the present known Course of Nature; but suppose them come to pass, and then the Prosperity promised must naturally follow, to a very considerable Degree.

C H A P.  
III.

Consider now, the general System of Religion; that the Government of the World is uniform, and one, and moral; that Virtue and Right shall finally have the Advantage, and prevail over Fraud and lawless Force, over the Deceits as well as the Violence of Wickedness, under the Conduct of one supreme Governor: And from the Observation above made, it will appear, that God has, by our Reason, given us to see, a peculiar Connection in the several Parts of this Scheme, and a Tendency towards the Completion of it, arising out of the very Nature of Virtue; which Tendency is to be considered as somewhat moral in the essential Constitution of Things. If any should think all this to be of little Importance, I desire him to consider, what he would think, if Vice had, essentially and in its Nature, these advantageous Tendencies; or if Virtue had essentially the direct contrary ones.

But it may be objected, that, notwithstanding all these natural Effects and these natural Tendencies of Virtue; yet Things may be Now going on throughout the Universe, and may go on Hereafter, in the same mixt way as here at present upon Earth; Virtue sometimes prosperous, sometimes depressed, Vice sometimes successful, sometimes punished. The Answer to which is, that it is not the Purpose of this Chapter, nor of this Treatise, properly to prove God's perfect moral Government over the World, or the Truth of Religion; but to observe what there is in the Constitution and Course of Nature, to confirm the proper Proof of it, supposed to be known: And that the

<sup>a</sup> *Is. lx. 21.*

P A R T Weight of the foregoing Observations to this Purpose, may be thus distinctly proved. Pleasure and Pain are to a certain Degree, say to a very high Degree, distributed amongst us without any apparent Regard to the Merit or Demerit of Characters. And were there nothing else, concerning this Matter, discernible in the Constitution and Course of Nature, there would be no Ground from the Constitution and Course of Nature, to hope or to fear, that Men would be rewarded or punished hereafter according to their Deserts; which however, it is to be remarked, implies, that even then there would be no Ground from Appearances to think, that Vice upon the whole would have the Advantage, rather than that Virtue would. And thus the Proof of a future State of Retribution, would rest upon the usual known Arguments for it; which are I think plainly unanswerable, and would be so, though there were no additional Confirmation of them from the Things above insisted on: But these Things are a very strong Confirmation of them. For,

*First*, They shew, that the Author of Nature is not indifferent to Virtue and Vice. They amount to a Declaration from Him, determinate and not to be evaded, in Favour of one, and against the other; such a Declaration, as there is nothing to be set over against or answer, on the Part of Vice. So that were a Man, laying aside the proper Proof of Religion, to determine from the Course of Nature only, whether it were most probable, that the Righteous or the Wicked, would have the Advantage in a future Life; there can be no Doubt, but that he would determine the Probability to be, that the former would. And therefore, since in general there is not any Medium between Virtue and Vice, though possibly in particular Cases there may, since in general a Man must behave either well or ill; the Course of Nature, in the View of it now given, furnishes us with a real practical Proof of the Obligations of Religion.

*Secondly*,

Secondly, When, conformably to what Religion teaches us, C H A P. III.  
 God shall reward and punish Virtue and Vice as such, so as that every one shall, upon the whole, have his Deserts; this distributive Justice will not be a thing different in *Kind*, but only in *Degree*, from what we experience in His present Government: it will be That in *Effect*, toward which we now see a *Tendency*: it will be no more than the *Completion* of that moral Government, the *Principles and Beginning* of which, have been shewn, beyond all Dispute, discernible in the present Constitution and Course of Nature. And from hence it follows,

*Thirdly*, That, as, without taking into Consideration the moral Government of God, our Experience of the Kinds and Degrees of Happiness and Misery, which we do experience at present; gives natural Ground to hope for and to fear, higher Degrees, and other Kinds of both in a future State, a future State admitted: so the moral Government of God, which we experience, or that Virtue and Vice are, in the Manners above-mentioned, actually rewarded and punished at present, in a certain Degree; gives natural Ground to hope and to fear, that they may be rewarded and punished in an higher Degree Hereafter: though this alone is not sufficient Ground to think, that they will be rewarded and punished in a higher Degree, rather than in a lower. But then,

*Lastly*, There is sufficient Ground to think so, from the good and bad Tendencies of Virtue and Vice. For these Tendencies are essential, and founded in the Nature of Things; whereas the Hindrances to their becoming Effect, are, in numberless Cases, not necessary, but artificial only. Now it may be much more strongly argued, that these Tendencies, as well as the actual Rewards and Punishments, of Virtue and Vice, which arise directly out of the Nature of things, will

P A R T remain Hereafter, than that the accidental Hindrances of them will.  
 I. And if these Hindrances do not remain, those Rewards and Punishments cannot but be carried on much further towards the Perfection of Moral Government, *i. e.* the Tendencies of Virtue and Vice will become Effect: But when, or where, or in what particular Way, cannot be known at all but by Revelation.

Upon the whole: There is a Kind of moral Government implied in God's natural Government; <sup>i</sup> Virtue and Vice are naturally rewarded and punished as beneficial and mischievous to Society; <sup>k</sup> and rewarded and punished respectively as such. <sup>l</sup> The Notion then of a moral Scheme of Government, is not fictitious, but natural; for it is suggested to our Thoughts by the Constitution and Course of Nature: and the Execution of this Scheme is actually begun, in the Instances here mentioned. And these things are to be considered, as a Declaration of the Author of Nature, for Virtue, and against Vice; they give a Credibility to the Supposition of their being rewarded and punished Hereafter; and also Ground to hope and to fear, that they may be rewarded and punished in higher Degrees than they are Here. And as all this is confirmed, so the Argument for Religion, from the Constitution and Course of Nature, is carried on farther, by observing; that there are natural Tendencies, and, in innumerable Cases, only artificial Hindrances, to this moral Scheme's being carried on much farther towards Perfection, than it is at present <sup>m</sup>. The Notion then of a moral Scheme of Government, much more perfect than what is seen, is not a fictitious, but a natural Notion; for it is suggested to our Thoughts, by the essential Tendencies of Virtue and Vice. And these Tendencies are to be considered, as Intimations, as implicit Promises and Threatnings, from the Author of Nature, of much greater Rewards and Pu-

<sup>i</sup> p. 48, 49.<sup>k</sup> p. 49, 50.<sup>l</sup> p. 50, &c.<sup>m</sup> p. 57, &c.

nishments to follow Virtue and Vice, than do at present. And indeed, every *natural* Tendency, which is to continue, but which is hindred from becoming Effect by only *accidental* Causes, affords a Presumption, that such Tendency will, some Time or other, become Effect; a Presumption in Degree proportionable to the Length of the Duration, through which such Tendency will continue. And from these things together, arises a real Presumption, that the Moral Scheme of Government established in Nature, shall be carried on much farther towards Perfection hereafter; and, I think, a Presumption that it will be absolutely compleated. But from these things, joined with the moral Nature which God has given us, considered as given us by Him, arises a practical Proof <sup>m</sup> that it will; a Proof from Fact, and therefore a distinct one from That, which is deduced from the eternal and unalterable Relations, the Fitness and Unfitness of Actions.

<sup>m</sup> See this Proof drawn out briefly, Ch. vi. p.

## C H A P. IV.

*Of a State of Probation, as implying Trial,  
Difficulties and Danger.*

PART

I.  

**T**HE general Doctrine of Religion, that our present Life is a State of Probation for a future one, comprehends under it several particular things, distinct from each other. But the first and most common Meaning of it, seems to be, that our future Interest is now depending, and depending upon Ourselves; that we have Scope and Opportunities Here, for that good and bad Behaviour, which God will reward and punish Hereafter; together with Temptations to one, as well as Inducements of Reason to the other. And this is, in great measure, the same with saying, that we are under the moral Government of God, and to give an Account of our Actions to Him. For the Notion of a future Account and general righteous Judgment, implies some Sort of Temptations to what is wrong; otherwise there would be no moral Possibility of Doing wrong, nor Ground for Judgment, or Discrimination. But there is this Difference, that the Word *Probation* is more distinctly and particularly expressive of, Allurements to wrong, or Difficulties in adhering uniformly to what is right, and the Danger of Miscarrying by such Temptations, than the Words *Moral Government*. A State of Probation then, as thus particularly implying in it, Trial, Difficulties and Danger, may require to be considered distinctly by itself.

And

And as the moral Government of God which Religion teaches us, implies, that we are in a State of Trial with regard to a future World; so also his natural Government over us, implies, that we are in a State of Trial, in the like Sense, with regard to the present World. Natural Government by Rewards and Punishments, as much implies natural Trial, as moral Government does moral Trial. The natural Government of God here meant,<sup>a</sup> consists, in his annexing Pleasure to some Actions, and Pain to others, in our Power to do or forbear, and giving us Notice of such Appointment beforehand. This necessarily implies, that he has made our Happiness and Misery, or our Interest, to depend in Part upon Ourselves. And so far as Men have Temptations to any Course of Action, which will probably, ~~become~~ <sup>bring</sup> them greater temporal Inconvenience and Uneasiness, than Satisfaction; so far, their temporal Interest is in Danger from themselves, or they are in a State of Trial with respect to it. Now People often blame others, and even themselves, for their Misconduct in their temporal Concerns. And we find many are greatly wanting to themselves, and miss of that natural Happiness, which they might have obtained in the present Life; perhaps every one does in some Degree. But many run themselves into great Inconvenience, and into extream Distress and Misery; not through Incapacity of knowing better, and doing better for themselves, which would be nothing to the present Purpose; but through their own Fault. And these things necessarily imply Temptation, and Danger of miscarrying, in a greater or less Degree, with respect to our worldly Interest or Happiness. Every one too, without having Religion in his Thoughts, speaks of the Hazards which young People run, upon their setting out in the World; Hazards from other Causes; than their Ignorance merely, and unavoidable Accidents. And

<sup>a</sup> Ch. ii.

P A R T  
 I. some Courſes of Vice, at leaſt, being contrary to Men's worldly Intereſt or Good, Temptations to theſe, muſt at the ſame time be Temptations to foregoe our preſent, and our future Intereſt. Thus, in our natural or temporal Capacity, we are in a State of Trial, *i. e.* of Difficulty and Danger, analogous, or like to our moral and religious Trial.

This will, more diſtinctly, appear to any one, who thinks it worth while, more diſtinctly, to conſider, what it is which conſtitutes our Trial in both Capacities, and obſerve how Mankind behave under it.

And that which conſtitutes this our Trial, in both theſe Capacities, muſt be, either ſomewhat in our external Circumſtances, or in our Nature. For, on the one hand, Perſons may be betrayed into wrong Behaviour upon Occaſions of Surprize, or overcome upon any other very ſingular and extraordinary external Occaſions, who would, otherwiſe, have preſerved their Character of Prudence and of Virtue: And in ſuch Caſes, every one, in ſpeaking of theſe Perſon's wrong Behaviour, would impute it to ſuch particular external Circumſtances. On the other hand, Men who have contracted Habits of Vice and Folly of any kind, or have ſome particular Paſſions in Exceſs, will ſeek Opportunities, and, as it were, go out of their way, to gratify themſelves in theſe Reſpects, at the Expence of their Wiſdom and their Virtue; led to it, as every one would ſay, not by external Temptations, but by ſuch Habits and Paſſions. And the Account of this laſt is, that particular Paſſions are no more coincident with Prudence, or that reaſonable Self-love, the End of which is our worldly Intereſt, than they are with the Principle of Virtue and Religion; but often draw contrary ways to one as well as to the other: and ſo ſuch particular Paſſions are as much Temptations, to act imprudently with regard to our worldly

worldly Interest, as to act vitiously.<sup>b</sup> However, as when we say, Men are misled by external Circumstances of Temptation; it cannot but be understood, that there is somewhat within themselves, to render those Circumstances Temptations, or to render them susceptible of Impressions from them: So when we say, they are misled by Passions; it is always supposed, that there are Occasions, Circumstances, and Objects, exciting these Passions, and affording Means for gratifying them. And therefore, Temptations from within, and from without, coincide, and mutually imply each other. Now the several external Objects of the Appetites, Passions, and Affections, being present to the Senses, or offering themselves to the Mind, and so exciting the Passions; not only in Cases where they can be gratified consistently with Innocence and Prudence, but also in Cases where they cannot, and yet can be gratified imprudently and vitiously: this, as really puts them in Danger of voluntarily foregoing their present Interest or Good, as their future, and as really renders Self-denial necessary to secure one, as the other; *i. e.* We are in a like State of Trial with Respect to both, by the very same Passions, excited by the very same means. Thus Mankind having a temporal Interest depending upon themselves, and a prudent Course of Behaviour being necessary to secure it; Passions inordinately excited, by Means of Example, or by any other external Circumstance; or Passions excited towards Objects, at Times, or in Degrees, impossible to be gratified consistently with worldly Prudence: these are Temptations, dangerous, and too often successful Temptations, to forego a greater temporal Good for a less; *i. e.* to forego what is, upon the whole, our temporal Interest, for the sake of a present Gratification. This is a Description of our State of Trial in our temporal Capacity. Substitute now the Word *future* for *temporal*, and *Virtue* for *Prudence*; and it

<sup>b</sup> See Sermons preached at the Rolls, 1726. 2d. Ed. p. 205. &c. Pref. p. 25, &c. Sermon. p. 21, &c.

P A R T will be just as proper a Description of our State of Trial in  
 I. our religious Capacity: so analogous are they to each other.

If, from Consideration of this our like State of Trial in both Capacities, we go on to observe farther how Mankind behave under it; we shall find, there are some, who have so little Sense of it, that they scarce look beyond the passing Day: They are so taken up with present Gratifications, as to have, in a manner, no Feeling of Consequences, no regard to their future Ease or Fortune in this Life; any more than to their Happiness in another. Some appear to be blinded and deceived by inordinate Passion, in their worldly Concerns, as much as in Religion. Others are, not deceived, but, as it were, forcibly carried away by the like Passions, against their better Judgment, and feeble Resolutions too of acting better. And there are Men, and truly they are not a few, who shamelessly avow, not their Interest, but their mere Will and Pleasure, to be their Law of Life; and who, in open Defiance of every thing that is reasonable, will go on in a Course of vicious Extravagance, foreseeing, with no Remorse and little Fear, that it will be their temporal Ruin: and some of them, under the Apprehension of the Consequences of Wickedness in another State. And to speak in the most moderate Way, human Creatures are not only continually liable to go wrong voluntarily, but we see likewise that they often actually do so, with regard to their temporal Interests, as well as with regard to Religion.

Thus our Difficulties and Dangers, or our Trials, in our temporal and our religious Capacity, as they proceed from the same Causes, and have the same Effect upon Men's Behaviour, are evidently analogous, and of the same Kind.

It may be added, that the Difficulties and Dangers of Miscarrying in our religious State of Trial, are greatly increased, one is ready to think, are in a manner wholly *made*, by the ill Behaviour of Others; by a Wrong Education, wrong in a moral Sense, sometimes positively vicious; by general bad Example; by the dishonest Artifices, which are got into Business of all Kinds; and, in very many Parts of the World, by Religion's being corrupted into Superstitions, which indulge Men in their Vices: In like manner, the Difficulties of conducting ourselves prudently in respect to our present Interest, and our Danger of being led aside from pursuing it, are greatly increased, by a foolish Education; and, after we come to mature Age, by the Extravagance and Carelessness of Others, whom we have Intercourse with; and by mistaken Notions, very generally prevalent, and taken up from common Opinion, concerning temporal Happiness, and wherein it consists. And by Persons own Negligence and Folly in their temporal Affairs, no less than by a Course of Vice, they bring themselves into new Difficulties; and, by Habits of Indulgence, become less qualified to go through them: And one Irregularity after another, embarrasses things to such a Degree, that they know not where about they are; and often makes the Path of Conduct so intricate and perplexed, that it is difficult to trace it out; difficult even to determine what is the prudent or the moral Part. Thus, for Instance, wrong Behaviour in one Stage of Life, Youth; wrong, I mean, considering ourselves only in our temporal Capacity, without taking in Religion; this, in several ways, increases the Difficulties of right Behaviour in mature Age; *i. e.* puts us into a more disadvantageous State of Trial in our temporal Capacity.

We are an inferior Part of the Creation of God.. There are natural Appearances of our being in a State of Degradation,

PART I. tion.\* And we certainly are in a Condition, which *does not seem*, by any means, the most advantageous we could imagine or desire, either in our natural or moral Capacity; for securing either our present or future Interest. However, this Condition, low, and careful, and uncertain as it is, does not afford any just Ground of Complaint. For, as Men may manage their temporal Affairs with Prudence, and so pass their Days here on Earth in tolerable Ease and Satisfaction, by a moderate Degree of Care; so likewise with regard to Religion, there is no more required than what they are well able to do, and what they must be greatly wanting to themselves, if they neglect. And for Persons to have That put upon them, which they are well able to go through, and no more, we naturally consider as an equitable thing; supposing it done by proper Authority: Nor have we any more reason to complain of it, with regard to the Author of Nature, than of his not having given us other Advantages, belonging to other Orders of Creatures.

But the thing here insisted upon is, that the State of Trial, which Religion teaches us we are in, is rendered credible, by its being throughout uniform and of a piece with the general Conduct of Providence towards us, in all other Respects within the Compass of our Knowledge. Indeed if Mankind considered in their natural Capacity, as Inhabitants of this World only, found themselves, from their Birth to their Death, in a settled State of Security and Happiness, without any Sollicitude or Thought of their own: or if they were in no Danger of being brought into Inconveniences and Distress, by Carelessness, or the Folly of Passion, through bad Example, the Treachery of others, or the deceitful Appearances of things: Were This our natural Condition; then it might seem strange, and be some Presumption against the Truth of Religion, that it represents

our future and more general Interest, as not secure of course, but as depending upon our Behaviour, and requiring such Recollection and Self-government to obtain it. For it might be alledged, what you say is our Condition in one Respect, is not in any wise of a Sort with what we find, by Experience, our Condition is in another. Our whole present Interest is secured to our hands, without any Sollicitude of ours; and why should not our future Interest, if we have any such, be so too? But since, on the contrary, Thought and Consideration, the voluntary denying ourselves many Things which we desire, and a Course of Behaviour, far from being always agreeable to us; are absolutely necessary to our acting even a common decent, and common prudent Part, so as to pass with any Satisfaction through the present World, and be received upon any tolerable good Terms in it: since this is the Case, all Presumption against Self-denial and Attention being necessary to secure our higher Interest, is removed. Had we not Experience, it might, perhaps speciously, be urged, that it is improbable any thing of Hazard and Danger should be put upon us by an infinite Being; when every thing which is Hazard and Danger in our manner of Conception, and will end in Error, Confusion, and Misery, is now already certain in his Fore-knowledge. And indeed, why any thing of Hazard and Danger should be put upon such frail Creatures as we are, may well be thought a Difficulty in Speculation; and cannot but be so till we know the whole, or, however, much more of the Case. But still the Constitution of Nature is as it is. Our Happiness and Misery are trusted to our Conduct, and made to depend upon it. Somewhat, and, in many Circumstances, a great deal too, is put upon Us, either to do, or to suffer, as we chuse; of which, all the various Miseries of Life, which People bring upon themselves by Negligence and Folly, and might have avoided by proper Care, are Instances: Which  
Miseries

C H A P.  
IV.  

P A R T Miseries are beforehand, just as contingent and undetermined as their Conduct, and left to be determined by it.

I.

These Observations are an Answer to the Objections against the Credibility of a State of Trial, as implying Temptations, and real Danger of miscarrying, with regard to our general Interest, under the moral Government of God: and they shew, that, if we are at all to be considered in such a Capacity, and as having such an Interest; the general Analogy of Providence must lead us to apprehend ourselves in Danger of miscarrying, in different Degrees, as to this Interest, by our neglecting to act the proper Part belonging to us in that Capacity. For we have a present Interest, under the Government of God which we experience here upon Earth. This Interest, as it is not forced upon us, so neither is it offered to our Acceptance, but to our Acquisition; in such Sort, as that we are in Danger of missing it, by means of Temptations to neglect, or act contrary to it; and without Attention and Self-denial, must and do miss of it. It is then perfectly credible, that this may be our Case, with Respect to that chief and final Good, which Religion proposes to us,

---

C H A P.

---

## C H A P. V.

*Of a State of Probation, as intended for  
moral Discipline and Improvement.*

**F**ROM the Consideration of our being in a Probation-  
state, of so much Difficulty and Hazard, naturally arises  
the Question, how we came to be placed in it. But such  
a general Inquiry as this, would be found involved in unanswerable  
Difficulties. For, though some of these Difficulties would be lessened by observing, that all Wickedness is voluntary, as is implied in its very Notion; and many of the Miseries of Life have apparent good Effects: yet, when we consider other Circumstances belonging to both, and what must be the Consequence of the former in a Life to come; it cannot but be acknowledged plain Folly and Presumption, to pretend to give an Account of the whole Reasons of this Matter; the whole Reasons of our being allotted a Condition, out of which, so much Wickedness and Misery, so circumstanced, would in Fact arise. Whether it be not beyond our Faculties, not only to find out, but even to understand, the whole Account of This; or, though we should be supposed capable of understanding it, yet, whether it would be of Service or Prejudice to us to be informed of it; is impossible to say. But as our present Condition, can in no wise be shewn inconsistent with the perfect moral Government of God; so Religion teaches us, we were placed in it, that by the Practice of Virtue, we might qualify ourselves for That to follow it: Which, though but a partial Answer, a very partial one indeed, to the Inquiry now mentioned; yet, is a more satisfactory Answer to  
Another,

C H A P.

V.

So

## Of a State of Moral Discipline.

P A R T Another, which is of real, and of the utmost Importance to  
I. us to have answered; the Inquiry, what is our Business here?  
The End then, the known End, why we are placed in a State  
of so much Affliction, Hazard, and Difficulty, is, our Improvement in Virtue and Piety, as the requisite Qualification for a future State of Happiness and Security.

Now the Beginning of Life, considered as an Education for mature Age in the present World, appears plainly, at first sight, analagous to this our Trial for a future one; the former being in our temporal Capacity, what the latter is in our religious Capacity. But some Observations common to both of them, and a more distinct Consideration of each, will more distinctly shew, the Extent and Force of the Analogy between them; and the Credibility, which arises from hence, as well as from the Nature of the thing, that the present Life was intended to be a State of Discipline for a future one.

I. Every Species of Creatures is, we see, designed for a particular way of Life; to which, the Nature, the Capacities, Temper, and Qualifications, of each Species, are as necessary, as their external Circumstances. Both come into the Notion of such State, or particular way of Life, and are constituent Parts of it. Change a Man's Capacities or Character to the Degree, in which it is conceivable they may be changed, and he would be altogether incapable of a human Course of Life, and human Happiness; as incapable, as if, his Nature continuing unchanged, he were placed in a World, where he had no Sphere of Action, nor any Objects to answer his Appetites, Passions, and Affections of any Sort. One thing is set over against another, as an antient Writer expresses it. Our Nature corresponds to our external Condition. Without this Correspondence, there would be no Possibility of any such thing as human Life and human Happiness; which Life and Happiness are, therefore, a *Result*  
from

from our Nature and Condition jointly: meaning by human Life, not living in the literal Sense, but the whole complex Notion commonly understood by those Words. So that, without determining, what will be the Employment and Happiness, the particular Life, of good Men hereafter; there must be some determinate Capacities, some necessary Character and Qualifications, without which, Persons cannot but be utterly incapable of it: in like manner, as there must be some, without which, Men would be incapable of their present State of Life. Now,

C H A P.

V.

II. The Constitution of human Creatures, and indeed of all Creatures which come under our Notice, is such, as that they are capable of naturally becoming qualified for States of Life, for which they were once wholly unqualified. In Imagination we may indeed conceive of Creatures, incapable of having any of their Faculties naturally enlarged, or as being unable naturally to acquire any new Qualifications: But the Faculties of every Species known to us, are made for Enlargement; for Acquirements of Experience and Habits. We find ourselves in particular indued with Capacities, not only of perceiving Ideas, and of Knowledge or perceiving Truth, but also of storing up our Ideas and Knowledge by Memory. We are capable, not only of acting, and of having different momentary Impressions made upon us; but of getting a new Facility in any Kind of Action, and of settled Alterations in our Temper or Character. The Power of the two last is the Power of Habits. But neither the Perception of Ideas, nor Knowledge of any Sort, are Habits; though absolutely necessary to the forming of them. However, Apprehension, Reason, Memory, which are the Capacities of acquiring Knowledge, are greatly improved by Exercise. Whether the Word Habit is applicable to all these Improvements, and in particular how far the Powers of Memory and of Habits, may be Powers of the same Nature, I shall not

M

inquire.

P A R T

I.

inquire. But that Perceptions come into our Minds readily and of Course, by means of their having been there before, seems a thing of the same Sort, as Readiness in any particular Kind of Action, proceeding from being accustomed to it. And Aptness to recollect practical Observations of Service in our Conduct, is plainly Habit in many Cases. There are Habits of Perception, and Habits of Action. Instances of the former, are our constant and even involuntary Readiness, in correcting the Impressions of our Sight, concerning Magnitudes and Distances, so as to substitute Judgment in the Room of Sensation imperceptibly to ourselves. And it seems as if all other Associations of Ideas not naturally connected, might be called passive Habits; as properly as our Readiness in understanding Languages upon Sight, or hearing of Words. And our Readiness in speaking and writing of them, are Instances of the latter, of active Habits. For Distinctness, we may consider Habits, as belonging to the Body, or the Mind; and the latter will be explained by the former. Under the former are comprehended all bodily Activities or Motions, whether graceful or unbecoming, which are owing to Use: Under the latter, general Habits of Life and Conduct, such as those of Obedience and Submission to Authority, or to any particular Person; those of Veracity, Justice, and Charity; those of Attention, Industry, Self-government, Envy, Revenge. And Habits of this latter Kind, seem produced by repeated Acts, as well as the former. And in like manner as Habits belonging to the Body, are produced by external Acts; so Habits of the Mind are produced by the Exertion of inward practical Principles, *i. e.* by carrying them into Act, or acting upon them; the Principles of Obedience, of Veracity, Justice, and Charity. Nor can those Habits be formed by any external Course of Action, otherwise than as it proceeds from these Principles: because it is only these inward Principles exerted, which are strictly Acts of Obedience, of Veracity, of Justice, and of Charity. So likewise Habits of Attention, Industry, Self-government, are in the same manner acquired by Exercise; and  
Habits

## Of a State of Moral Discipline.

83

CHAP.

V.

Habits of Envy and Revenge by Indulgence, whether in outward Act, or in Thought and Intention, *i. e.* inward Act: for such Intention is an Act. Resolutions also to do well, are properly Acts. And endeavouring to enforce upon our own Minds, a practical Sense of Virtue, or to beget in Others that practical Sense of it, which a Man really has himself, are virtuous Acts. All these, therefore, may and will contribute towards forming good Habits. But going over the Theory of Virtue in ones Thoughts, talking well, and drawing fine Pictures, of it; this is so far from necessarily or certainly conducing to form an Habit of it, in him who thus employs himself; that it may harden the Mind in a contrary Course, and render it gradually more insensible, *i. e.* form an Habit of Insensibility, to all moral Considerations. For, from our very Faculty of Habits, passive Impressions, by being repeated, grow weaker: Thoughts, by often passing through the Mind, are felt less sensibly: Being accustomed to Danger, begets Intrepidity, *i. e.* lessens Fear; to Distress lessens the Passion of Pity; to Instances of Others Mortality, lessens the sensible Apprehension of our own. And from these two Observations together, that practical Habits are formed and strengthened by repeated Acts; and that passive Impressions, by being repeated upon us, grow weaker; it must follow, that active Habits may be gradually forming and strengthening, by a Course of acting upon such and such Motives and Excitements, whilst these Motives and Excitements themselves are, by proportionable Degrees, growing less sensible, *i. e.* are continually less and less sensibly felt, even as the active Habits strengthen. And Experience confirms this; for active Principles, at the very time that they are less lively in Perception than they were, are found to be, some how, wrought more thoroughly into the Temper and Character, and become more effectual in influencing our Practice. The three things just mentioned, may afford Instances of it. Perception of Danger, is a natural

PART Excitement of passive Fear, and active Caution: And by being  
 I. inured to Danger, Habits of the latter are gradually wrought,  
 at the same time that the former gradually lessens. Perception  
 of Distress in others, is a natural Excitement, passively to pity,  
 and actively to relieve it: But let a man set himself to attend to,  
 inquire out, and relieve distressed Persons, and he cannot but  
 grow less and less sensibly affected with the various Miseries of  
 Life, with which he must become acquainted; when yet, at the  
 same time, Benevolence considered, not as a Passion, but as a  
 practical Principle of Action, will strengthen: and whilst he pas-  
 sively compassionates the distressed less, he will acquire a greater  
 Aptitude actively to assist and befriend them. So also at the  
 same time that the daily Instances of Mens dying around us,  
 gives us daily a less sensible passive Feeling or Apprehension of our  
 own Mortality, such Instances greatly contribute to the strength-  
 ening a practical Regard to it in serious Men; *i. e.* to forming an  
 Habit of acting with a constant View to it. And this seems  
 again further to shew, that passive Impressions made upon our  
 Minds by Admonition, Experience, Example, though they may  
 have a remote Efficacy, and a very great one, towards forming  
 active Habits, yet, can have this Efficacy no otherwise than by  
 inducing us to such a Course of Action; and that it is, not be-  
 ing affected so and so, but Acting, which forms those Habits:  
 only it must be always remembered, that real Endeavours to en-  
 force good Impressions upon ourselves, is a Species of virtuous  
 Action. Nor do we know how far it is possible, in the nature  
 of things, that Effects should be wrought in us at once, equi-  
 valent to Habits, *i. e.* what is wrought by Use and Exercise.  
 However, the thing insisted upon, is, not what may be possible,  
 but what is in Fact the Appointment of Nature; which is that  
 active Habits are to be formed by Exercise. Their Progress may be  
 so gradual, as to be imperceptible in its Steps: It may be hard,  
 to explain throughout its several Parts; and to trace up the Fa-  
 culty

culty by which we are capable of Habits to its Original, so as to distinguish it from all others in our Mind: And it seems as if contrary Effects were to be ascribed to it. But the thing in general, that our Nature is formed to yield, in some such Manner as this, to Use and Exercise, is Matter of certain Experience.

C H A P.  
V.  

Thus, by accustoming ourselves to any Course of Action, we get an Aptness to go on, a Facility, Readiness, and often Pleasure, in it. The Inclinations which rendered us averse to it, grow weaker; the Difficulties in it, not only the imaginary but the real ones, lessen; the Reasons for it, offer themselves of course to our Thoughts upon all Occasions; and the least Glimpse of them is sufficient to make us go on, in a Course of Action, to which we have been accustomed. And practical Principles appear to grow stronger, absolutely in themselves, by Exercise; as well as relatively, with regard to contrary Principles, which, by being accustomed to submit, do so habitually, and of Course. And thus a new Character, in several Respects, may be formed; and many Habitudes of Life, not given by Nature, but which Nature directs us to acquire.

III. Indeed we may be assured, that we should never have had these Capacities of improving by Experience, acquired Knowledge, and Habits, had they not been necessary, and intended to be made use of. And accordingly we find them so necessary, and so much intended, that without them we should be utterly incapable of That, which was the End for which we were made, considered in our temporal Capacity only; the Employments and Satisfactions of our mature State of Life.

Nature does in no wise qualify us wholly, much less at once, for this mature State of Life. Even Maturity of Understanding and bodily Strength, are not only arrived to gradually, but  
are

P A R T I. are also very much owing to the continued Exercise of our Powers of Body and Mind, from Infancy. But if we suppose a Person brought into the World with both these in Maturity, as far as this is conceivable; he would plainly at first be as unqualified for the human Life of mature Age, as an Idiot. He would be in a manner distracted, with Astonishment, and Apprehension, and Curiosity, and Suspence: Nor can one guess, how long it would be, before he would be familiarized to himself and the Objects about him enough, even to set himself to any thing. It may be questioned too, whether the natural Information of his Sight and Hearing, would be of any manner of use at all to him in acting, before Experience. And it seems, that Men would be strangely headstrong and self-willed, and disposed to exert themselves with an Impetuosity, which would render Society insupportable, and the living in it impracticable; were it not for some acquired Moderation and Self-government, some Aptitude and Readiness in restraining themselves, and concealing their Sense of things. Want of every thing of this Kind which is learnt, would render a Man as incapable of Society, as Want of Language would: or as his natural Ignorance of any of the particular Employments of Life, would render him incapable of providing himself with the common Conveniences, or supplying the necessary Wants of it. In these Respects, and probably in many more, of which we have no particular Notion, Mankind is left, by Nature, an unformed, unfinished Creature; utterly deficient and unqualified, before the Acquirement of Knowledge, Experience, and Habits, for that mature State of Life, which was the End of his Creation, considering him as related only to this World.

But then, as Nature has endued us with a Power of supplying those Deficiencies, by acquired Knowledge, Experience, and Habits; so likewise we are placed in a Condition, in Infancy,  
 4 Childhood,

Childhood, and Youth, fitted for it; fitted for our acquiring those Qualifications of all Sorts, which we stand in need of, in mature Age. Hence Children, from their very Birth, are daily growing acquainted, with the Objects about them, with the Scene in which they are placed, and to have a future Part; and learning somewhat or other, necessary to the Performance of it. The Subordinations, to which they are accustomed in domestick Life, teach them Self-government in common Behaviour abroad, and prepare them for Subjection and Obedience to civil Authority. What passes before their Eyes, and daily happens to them, gives them Experience, Caution against Treachery and Deceit, together with numberless little Rules of Action and Conduct, which we could not live without; and which are learnt so insensibly and so perfectly, as to be mistaken perhaps for Instinct: though they are the Effect of long Experience and Exercise; as much so as Language, or Knowledge in particular Business, or the Qualifications and Behaviour belonging to the several Ranks and Professions. Thus the Beginning of our Days, is adapted to be, and is, a State of Education in the Theory and Practice of mature Life. We are much assisted in it by Example, Instruction, and the Care of Others; but a great deal is left to Ourselves to do. And of this, as Part is done easily and of Course; so Part requires, Diligence and Care, the voluntary Foregoing many things which we desire, and setting ourselves to what we should have no Inclination to, but for the Necessity or Expedience of it. For, That Labour and Industry, which the Station of so many absolutely requires, they would be greatly unqualified for, in Maturity; as those in other Stations would be, for any other Sort of Application; if both were not accustomed to them in their Youth. And as Persons behave themselves, in the general Education which all go through, and in the particular ones adapted to particular Employments; their Character is formed, and made appear; they

recommen

C H A P.  
V.  

PART recommend themselves more or less; and are capable of, and placed in, different Stations in the Society of Mankind.

I.

The former Part of Life then, is to be considered as an important Opportunity, which Nature puts into our Hands; and which, when lost, is not to be recovered. And our being placed in a State of Discipline throughout this Life, for another World, is a providential Disposition of things exactly of the same Kind, as our being placed in a State of Discipline during Childhood, for mature Age. Our Condition in both Respects is uniform and of a piece, and comprehended under one and the same general Law of Nature.

And if we were not able at all to discern, how or in what Way, the present Life could be our Preparation for another; this would be no Objection against the Credibility of its being so. For we do not discern, how Food and Sleep contribute to the Growth of the Body; nor could have any Thought that they would, before we had Experience: Nor do Children at all think, on the one hand, that the Sports and Exercises, to which they are so much addicted, contribute to their Health and Growth; nor on the other, of the Necessity which there is for their being restrained in them: Nor are they capable of understanding the Use of many Parts of Discipline, which nevertheless they must be made to go through, in order to qualify them for the Business of mature Age. Were we not able then to discover, in what Respects, the present Life could form us for a future one; yet nothing would be more supposeable than that it might, in some Respects or other, from the general Analogy of Providence. And this, for ought I see, might reasonably be said, even though we should not take in the Consideration of God's moral Government over the World. But,

IV. Take

IV. Take in this Consideration, and, consequently, that the Character of Virtue and Piety, is a necessary Qualification for the future State; and then we may distinctly see, how, and in what Respects, the present Life may be a Preparation for it: since we *want, and are capable of, Improvement in That Character, by moral and religious Habits; and the present Life is fit to be a State of Discipline for such Improvement*: In like manner as we have already observed, how, and in what Respects, Infancy, Childhood, and Youth, are a necessary Preparation, and a natural State of Discipline, for mature Age.

C H A P.  
V.  

Nothing which we at present see, would lead us to the Thought of a solitary unactive State hereafter; but we must suppose, according to the Scripture Account of it, if we judge at all from the Analogy of Nature, that it will be a Community: and there is no Shadow of any thing unreasonable in conceiving, though there be no Analogy for it, that this Community will be, as the Scripture represents it, under the more immediate, or, if such an Expression may be used, the more sensible Government of God. Nor is our Ignorance, what will be the Employments of this happy Community, nor our consequent Ignorance, what particular Scope or Occasion there will be, for the Exercise of Veracity, Justice, and Charity, amongst the Members of it, with regard to each other; any Proof, that there will be no Sphere of Exercise for those Virtues. Much less, if that were possible, is our Ignorance any Proof, that there will be no Occasion for that Frame of Mind, or Character, which is formed by the daily Practice of those particular Virtues here, and which is a Result from it. This at least must be owned in general, that, as the Government established in the Universe, is moral, the Character of Virtue and Piety, must, in some way

P A R T or other, be the Condition of our Happiness, or the Qualification for it.

I.

Now from what is above observed concerning our natural Power of Habits, it is easy to see, that we are *capable* of moral Improvement by Discipline: And how greatly we *want* it, need not be proved to any one who is acquainted, with the great Wickedness of Mankind, or even with those Imperfections, which the best are conscious of. But it is not perhaps distinctly attended to by every one, that the Occasion which human Creatures have for Discipline, to improve in them this Character of Virtue and Piety, is to be traced up higher than to Excess in the Passions, by Indulgence and Habits of Vice. Mankind, and perhaps all finite Creatures, from the very Constitution of their Nature, before Habits of Virtue, are deficient, and in danger of deviating from what is right; and therefore stand in need of virtuous Habits for a Security against this Danger. For, together with the general Principle of moral Understanding, we have in our inward Frame, various Affections towards particular external Objects. These Affections are naturally, and of right, subject to the Government of the moral Principle, as to the Occasions upon which they may be gratified; as to the Times, Degrees, and Manner in which the Objects of them may be pursued: But then the Principle of Virtue can neither excite them, nor prevent their being excited. On the contrary, they are naturally felt, when the Objects of them are present to the Mind, not only before all Consideration, whether they can be obtained by lawful Means, but after it is found they cannot. For the natural Objects of Affection continue so; the Necessaries, Conveniences, and Pleasures of Life, remain naturally desirable; though they cannot be obtained innocently: nay, though they cannot possibly be obtained at all. And when the Objects of any Affection whatever, cannot be obtained without unlawful Means,

Means, but may by them; such Affection, though its being excited, and its continuing some time in the Mind, be as innocent as it is natural and necessary; yet cannot but be conceived to have a Tendency to incline Persons to venture upon such unlawful Means: and therefore must be conceived as putting them in some Danger of it. Now what is the general Security against this Danger, against their actually deviating from Right? As the Danger is, so also must the Security be, from within; from the practical Principle of Virtue<sup>a</sup>. And the strengthening or improving this Principle, considered as practical, or as a Principle of Action, will lessen the Danger, or increase the Security against it. And this moral Principle is capable of Improvement, by proper Discipline and Exercise: by recollecting the practical Impressions made upon us, by Example and Experience: and, instead of following Humour and mere Inclination, by continually attending to the Equity and Right of the Case, in whatever we are engaged, be it in greater or less Matters; and accustoming ourselves always to act upon it; as being itself the just and natural Motive of Action: and as this moral Course of Behaviour, must necessarily, under divine Government, be our final Interest. *Thus the Principle of Virtue, improved into an Habit, of which Improvement we are thus capable, will plainly be, in Proportion to the Strength of it, a Security*

<sup>a</sup> It may be thought, that a Sense of Interest, would as effectually restrain Creatures from doing wrong. But if by a *Sense of Interest*, is meant a speculative Conviction or Belief, that such and such Indulgence would occasion them greater Uneasiness, upon the whole, than Satisfaction; it is contrary to present Experience to say, that this Sense of Interest is sufficient to restrain them from thus indulging themselves. And if by a *Sense of Interest*, is meant a practical Regard to what is upon the whole our Happiness; this is not only coincident with the Principle of Virtue or moral Rectitude, but is a Part of the Idea itself. And it is evident this reasonable Self-love wants to be improved, as really as any Principle in our Nature. For we daily see it overmatched, not only by the more boisterous Passions, but by Curiosity, Shame, Love of Imitation, by any thing, even Indolence: especially if the Interest, the temporal Interest, suppose, which is the End of such Self-love, be at a Distance. So greatly are profligate Men mistaken, when they affirm they are wholly governed by Interestedness and Self-love. And so little Cause is there for Moralists to disclaim this Principle. See p. 72, 73.

PART *against the Danger which finite Creatures are in, from the very Nature of Propension, or particular Affections.* This way of putting the Matter, supposes particular Affections to remain in a future State, which it is scarce possible to avoid supposing. And if they do, we clearly see, that acquired Habits of Virtue and Self-government, may be necessary for the Regulation of them. However, though we were not distinctly to take in this Supposition, but to speak only in general; the thing really comes to the same. For Habits of Virtue, thus acquired by Discipline, are Improvement in Virtue; and Improvement in Virtue, must be Advancement in Happiness, if the Government of the Universe be moral.

From these things we may observe, and it will farther shew this our natural and original Need of being improved by Discipline, to observe, how it comes to pass; that Creatures made upright, fall; and those who preserve their Uprightness, by so doing, raise themselves to a more secure State of Virtue. To say that the former is accounted for by the Nature of Liberty, is to say no more, than that an Event's actually happening, is accounted for by a mere Possibility of its happening. But it seems distinctly conceivable, from the very Nature of particular Affections or Propensions. For, suppose Creatures intended for such a particular State of Life, for which, such Propensions were necessary: Suppose them endued with such Propensions, together with moral Understanding, as well including, a practical Sense of Virtue, as a speculative Perception of it; and that all these several Principles, both natural and moral, forming an inward Constitution of Mind, were in the most exact Proportion possible, *i. e.* in a Proportion the most exactly adapted to their intended State of Life. Such Creatures would be made upright, or finitely perfect. Now particular Propensions, from their very Nature, must be felt, the Objects of them being present; though they cannot be gratified at all, or not with the Allowance

ance of the moral Principle: But if they can without, then such Propensions must be conceived to have some Tendency, in how low a Degree soever, yet they cannot but be conceived to have some Tendency, to induce Persons to such forbidden Gratification. This Tendency, in some one particular Propension, may be increased, by Occasions naturally exciting it oftener occurring, than Occasions exciting others. The least voluntary Indulgence in forbidden Circumstances, though but in Thought, will increase this wrong Tendency; and may increase it further, till, peculiar Conjunctures perhaps conspiring, it becomes Effect; and Danger of deviating from Right, ends in actual Deviation from it: a Danger necessarily arising from the very Nature of Propension, and which therefore could not have been prevented; though it might have been escaped, or got innocently through. The Case would be, as if we were to suppose a strait Path marked out for a Person, in which, such a Degree of Attention would keep him steady: But if he would not attend in this Degree, any one of a thousand Objects catching his Eye, might lead him out of it. Now it is impossible to say, how much, even the first full overt Act of Irregularity, might disorder the inward Constitution; unsettle the Adjustments, and alter the Proportions, which formed it, and in which the Uprightness of its Make consisted: But Repetition of Irregularities would produce Habits. And thus the Constitution would be spoiled; and Creatures made upright, become corrupt and depraved, in their settled Character, proportionably to their repeated Irregularities, in occasional Acts. But on the contrary, these Creatures might have improved and raised themselves, to an higher and more secure State of Virtue, by the contrary Behaviour; by steadily following the moral Principle, supposed to be one Part of their Nature, and thus withstanding their unavoidable Danger of Defection; unavoidable, because arising necessarily from Propension, the other Part of their Nature. For by thus preserving their Integrity for

some

P A R T some Time, their Danger would lessen, since Propensions by being inured to submit, would do it more easily and of Course; and their Security against this lessening Danger would increase, since the moral Principle would gain additional Strength by Exercise: both which are implied in the Notion of virtuous Habits. Thus vicious Indulgence, is not only criminal in itself, but also depraves the inward Constitution and Character. And virtuous Self-government, is not only right in itself, but also improves the inward Constitution or Character: and may improve it to such a Degree, that though we should suppose it impossible, for particular Affections to be absolutely coincident with the moral Principle, and consequently should allow, that those Creatures would for ever remain defectible; yet their Danger of actually deviating from Right, may be almost infinitely lessened, and they fully fortified against what remains of it: if That may be called Danger, against which, there is an adequate effectual Security. But still, this their higher Perfection may remain to consist in Habits of Virtue formed in a State of Discipline, and this their more compleat Security remain to proceed from them. And thus it is plainly conceivable, that Creatures without Blemish, as they come out of the Hands of God, may be in Danger of going wrong; and so may stand in need of the Security of virtuous Habits, additional to the moral Principle wrought into their Natures by Him. That which is the Ground of their Danger, or their Want of Security, may be considered as a Deficiency in themselves, to which virtuous Habits are the natural Supply. And as they are naturally capable of being raised and improved by Discipline, it may be a thing fit and requisite, that they should be placed in Circumstances with an Eye to it; in Circumstances peculiarly fitted to be, to them, a State of Discipline for their Improvement in Virtue.

But

But how much more strongly must this hold with Respect to those, who have corrupted their Natures, are fallen from their original Rectitude, and whose Passions are become excessive by repeated Violations of their inward Constitution. Upright Creatures may want to be improved; depraved Creatures want to be renewed. Education and Discipline, which may be in all Degrees and Sorts of Gentleness and of Severity, is expedient for those; but must be absolutely necessary for these. For these, Discipline of the severer Sort too, and in the higher Degrees of it, must be necessary, in order, to wear out vicious Habits; to recover their primitive Strength of Self-government, which Indulgence must have weakned; to repair, as well as raise into an Habit, the moral Principle, in order to their arriving at a secure State of virtuous Happiness.

C H A P.  
V.  

Now whoever will consider the thing, may clearly see, that the present World is *peculiarly fit* to be a State of Discipline for this Purpose, to such as will set themselves to mend and improve. For, the various Temptations with which we are surrounded; our Experience of the Deceits of Wickedness; having been in many Instances led wrong Ourselves; the great Viciousness of the World; the infinite Disorders consequent upon it; our being made acquainted with Pain and Sorrow, either from our own Feeling of it, or from the Sight of it in Others; these things, though some of them may indeed produce wrong Effects upon our Minds, yet when duly reflected upon, have, all of them, a direct Tendency to bring us to a settled Moderation and Reasonableness of Temper: the contrary both to thoughtless Levity, and also to that unrestrained Self-will, and violent Bent to follow present Inclination, which may be observed in undisciplined Minds. Such Experience as the present State affords, of the Frailty of our Nature; of the boundless Extravagance

P A R T I.  vagance of ungoverned Passion; of the Power which an infinite Being has over us, by the various Capacities of Misery which he has given us; in short, that Kind and Degree of Experience, which the present State affords us, that the Constitution of Nature is such as to admit, the Possibility, the Danger, and the actual Event, of Creatures losing their Innocence and Happiness, and becoming vicious and wretched; has a Tendency to give us a practical Sense of things, very different from a mere speculative Knowledge, that we are liable to Vice, and capable of Misery. And who knows, whether the Security of Creatures in the highest and most settled State of Perfection, may not in part arise, from their having had such a Sense of things as this, formed, and habitually fixt within them, in some State of Probation. And passing through the present World with That moral Attention, which is necessary to the acting a right Part in it, may leave everlasting Impressions of this Sort upon Our Minds. But to be a little more distinct: Allurements to what is wrong; Difficulties in the Discharge of our Duty; our not being able to act an uniform right Part without some Thought and Care; and the Opportunities which we have, or imagine we have, of avoiding what we dislike, or obtaining what we desire, by unlawful Means, when we either cannot do it at all, or at least not so easily, by lawful ones; *i. e.* the Snares and Temptations of Vice; are what render the present World peculiarly fit to be a State of Discipline, to those who will preserve their Integrity: because they render being upon our Guard, Resolution, and the Denial of our Passions, necessary in order to That End. And, from the Make of our Nature, the Exercise of such particular Recollection, Intention of Mind, and Self-government, in the Practice of Virtue, has a peculiar Tendency to form Habits of it; as implying, not only a real, but also a more continued Exercise of the virtuous Principle; and perhaps also as implying a more intense Exercise of it: or a more constant and a stronger

Stronger Effort of Virtue exerted into Act. Thus suppose a Person to know himself to be in particular Danger, of doing any thing wrong, for some Time, which yet he fully resolves not to do: Continued Recollection, and keeping upon his Guard, in order to make good his Resolution, is a *continued* exerting of that Act of Virtue in a *high Degree*, which need have been, and perhaps would have been, only *instantaneous* and *weak*, had the Temptation been so. It is indeed ridiculous to assert, that Self-denial is essential to Virtue and Piety: But it would have been nearer the Truth, though not strictly the Truth itself, to have said, that it is essential to Discipline and Improvement. For though Actions materially virtuous, which have no Sort of Difficulty, but are perfectly agreeable to our particular Inclinations, may possibly be done only from these particular Inclinations, and so may not be any Exercise of the Principle of Virtue, *i. e.* not be virtuous Actions at all; yet on the contrary, they may: and when they are, they have a Tendency to form and fix the Habit of Virtue: But when the Exercise of the virtuous Principle, is more continued oftener repeated and more intense, as it must be in Circumstances of Danger Temptation and Difficulty of any Kind and in any Degree, this Tendency is increased proportionably; and a more confirmed Habit is the Consequence.

This undoubtedly holds to a certain Length, but how far it may hold, I know not. Neither our intellectual Powers, nor our bodily Strength, can be improved beyond such a Degree; and both may be over-wrought. Possibly there may be somewhat analogous to this, with respect to the moral Character; which is scarce worth considering. And I mention it only, lest it should come into some Persons Thoughts, not as an Exception to the foregoing Observations, which perhaps it is; but as a Confutation of them, which it is not. And there may be several

P A R T

I.

veral other Exceptions. Observations of this Kind cannot be supposed to hold minutely, and in every Case. It is enough that they hold in general. And these plainly hold so far, as that from them may be seen distinctly, which is all that is intended by them, that *the present World is peculiarly fit to be a State of Discipline, for our Improvement in Virtue and Piety*: in the same Sense as some Sciences, by requiring and engaging the Attention, not to be sure of such Persons as will not, but of such as will, set themselves to them ; are fit to form the Mind to Habits of Attention.

Indeed the present State is so far from proving in Event, a Discipline of Virtue to the Generality of Men, that, on the contrary, they seem to make it a Discipline of Vice. And the Viciousness of the World is, in different ways, the great Temptation, which renders it a State of virtuous Discipline, in the Degree it is, to good Men. The whole End, and the whole Occasion, of Mankind's being placed in such a State as the present, is not pretended to be accounted for. That which appears amidst the general Corruption, is, that there are some Persons, who, having within them the Principle of Amendment and Recovery, attend to and follow the Notices of Virtue and Religion, be they more clear or more obscure, which are afforded them: And that the present World is, not only an Exercise of Virtue in these Persons, but an Exercise of it in Ways and Degrees, peculiarly apt to improve it ; apt to improve it in some Respects, even beyond what the Exercise of it required in a perfectly virtuous Society, or in a Society of equal imperfect Virtue with themselves, would be. But that the present World does not actually become a State of moral Discipline to many, even to the Generality, *i. e.* that they do not improve or grow better in it, cannot be urged as a Proof, that it was not intended for moral Discipline, by any who at all observe the Analogy  
of

of Nature. For, of the numerous Seeds of Vegetables and Bodies of Animals, which are adapted and put in the way, to improve to such a Point or State of natural Maturity and Perfection, we do not see perhaps one in a million actually to improve to it. Far the greatest Part of them decay before they are improved to it; and appear to be absolutely destroyed. Yet no one, who does not deny all final Causes, will deny, that those Seeds and Bodies, which do attain to that Point of Maturity and Perfection, answer the End for which they were really designed by Nature; and therefore that Nature designed them for such Perfection. And I cannot forbear adding, though it is not to the present Purpose, that the *Appearance* of such an amazing *Waste* in Nature, with Respect to these Seeds and Bodies, by foreign Causes, is to us as unaccountable, as, what is much more terrible, the present and future Ruin of so many moral Agents, by themselves, *i. e.* by Vice.

Against this whole Notion of moral Discipline, it may be objected, in another Way; that so far as a Course of Behaviour materially virtuous, proceeds from Hope and Fear, so far it is only a Discipline and Strengthening of Self-love. But Doing what God commands, because he commands it, is Obedience, though it proceeds from Hope or Fear. And a Course of such Obedience will form Habits of it. And a constant Regard to Veracity Justice and Charity, may form distinct Habits of these particular Virtues; and will certainly form Habits of Self-government, and of denying our own Inclinations, whenever Veracity Justice or Charity requires it. Nor is there any Foundation for this great Nicety, with which some affect to distinguish in this Case, in order to depreciate all Religion proceeding from Hope or Fear. For, Veracity Justice and Charity, Regard to God's Authority, and to our own chief Interest, are not only all three coincident; but each of them is, in

PART itself, a just and natural Motive or Principle of Action. And  
 I. he who begins a good Life from any one of them, and perseveres in it, as he is already in some Degree, so he cannot fail of becoming more and more, of That Character, which is correspondent to the Constitution of Nature as moral; and to the Relation which God stands in to us as moral Governor of it: nor consequently can he fail of obtaining That Happiness, which this Constitution and Relation necessarily suppose connected with that Character.

These several Observations, concerning the active Principle of Virtue and Obedience to God's Commands, is applicable to passive Submission or Resignation to his Will; which is another essential-Part of a right Character, connected with the former, and very much in our Power to form ourselves to. It may be imagined, that nothing but Afflictions can give Occasion for or require this Virtue, that it can have no Respect to, nor be any way necessary to qualify for, a State of perfect Happiness: But it is not Experience which can make us think thus: Prosperity itself, whilst any thing supposed desirable is not ours, begets extravagant and unbounded Thoughts. Imagination is altogether as much a Source of Discontent, as any thing in our external Condition. It is indeed true, that there can be no Scope for Patience when Sorrow shall be no more; but there may be Need of a Temper of Mind, which shall have been formed by Patience. For, though Self-love considered merely as an active Principle, leading us to pursue our chief Interest, cannot but be uniformly coincident with the Principle of Obedience to God's Commands, our Interest being rightly understood; because this Obedience, and the Pursuit of our own chief Interest, must be in every Case one and the same thing: yet it may be questioned, whether Self-love considered merely as the Desire of our own Interest or Happiness, can, from its Nature, be  
 thus.

thus absolutely and uniformly coincident with the Will of God; C H A P. any more than particular Affections can:<sup>b</sup> coincident in such V. Sort, as not to be liable to be excited upon Occasions and in Degrees, impossible to be gratified consistently with the Constitution of things, or the divine Appointments. So that *Habits* of Resignation may, upon this Account, be requisite for all Creatures; Habits, I say, which signify what is formed by Use. However, in general it is obvious, that both Self-love and particular Affections in human Creatures, considered only as passive Feelings, distort and rend the Mind; and therefore stand in need of Discipline. Now Denial of those particular Affections, in a Course of active Virtue and Obedience to God's Will, has a Tendency to moderate them; and seems also to have a Tendency to habituate the Mind, to be easy and satisfied with that Degree of Happiness which is allotted us, *i. e.* to moderate Self-love. But the proper Discipline for Resignation, is Affliction. For a right Behaviour under That Trial; Recollecting ourselves so as to consider it in the View, in which Religion teaches us to consider it, as from the Hand of God; Receiving it as what He appoints, or thinks proper to permit, in His World and under His Government; this will habituate the Mind to a dutiful Submission. And such Submission, together with the active Principle of Obedience, make up the Temper and Character in Us, which answers to His Sovereignty; and which absolutely belongs to the Condition of our Being, as dependent Creatures. Nor can it be said, that this is only breaking the Mind to a Submission to mere Power; for mere Power may be accidental, and precarious, and usurped: But it is forming within Ourselves the Temper of Resignation to His rightful Authority, who is, by Nature, supream over all.

<sup>b</sup> p. 90.

P A R T    Upon the whole: Such a Character, and such Qualifications, are necessary for a mature State of Life in the present World, as Nature alone does in no wise bestow; but has put it upon us, in great Part, to acquire, in our Progress from one Stage of Life to another, from Childhood, to mature Age: put it upon us to acquire them; by giving us Capacities of Doing it; and by placing us, in the Beginning of Life, in a Condition fit for it. And this is a general Analogy to our Condition in the present World, as in a State of moral Discipline for another. It is in vain then to object, against the Credibility of the present Lives being intended for this Purpose; that all the Trouble and the Danger unavoidably accompanying such Discipline, might have been saved us, by our being made at once the Creatures and the Characters, *which we were to be*. For we experience, that what *we were to be*, was to be the Effect of *what we would Do*; and that the general Conduct of Nature is, not to save us Trouble or Danger, but to make us capable of going through them, and to put it upon us to do so. Acquirements of our own, Experience and Habits, are the *natural* Supply to our Deficiencies, and Security against our Dangers; since it is as plainly natural to set ourselves to acquire the Qualifications, as the external things, which we stand in need of. In particular, it is as plainly a general Law of Nature, that we should, with regard to our temporal Interest, form and cultivate practical Principles within us, by Attention, Use and Discipline, as any thing whatever is a natural Law; chiefly in the Beginning of Life, but also throughout the whole Course of it. And the Alternative is left to our Choice, either to improve Ourselves, and better our Condition; or, in Default of such Improvement, to remain deficient and wretched. It is therefore perfectly credible, from the Analogy of Nature, that the same may be our Case, with respect

to

## *Of a State of Moral Discipline.*

103

to the Happiness of a future State, and the Qualifications necessary for it.

C H A P.  
V.  

There is a third thing, which may seem implied in the present World's being a State of Probation; that it is a Theatre of Action, for the Manifestation of Persons Characters, with respect to a future one: not to be sure to an All-knowing Being, but to his Creation or Part of it. This may, perhaps, be only a Consequence of our being in a State of Probation, in the other Senses. However it is not impossible, that Mens shewing and making manifest, what is in their Heart, what their real Character is, may have Respect to a future Life, in Ways and Manners which we are not acquainted with: particularly it may be a Means, for the Author of Nature does not appear to do any thing without Means, of their being disposed of suitably to their Characters; and of its being known to the Creation, by way of Example, that they are thus disposed of. But not to enter upon any conjectural Account of this; One may just mention, that the Manifestation of Persons Characters, contributes, very much in various Ways, to the carrying on a great Part of that general Course of Nature, respecting Mankind, which comes under our Observation at present. I shall only add, that Probation, in both these Senses, as well as in That treated of in the foregoing Chapter, is implied in moral Government; since by Persons Behaviour under it, their Characters cannot but be manifested, and if they behave well, improved.

C H A P.

## C H A P. VI.

*Of the Opinion of Necessity, considered as influencing Practice.*

PART I. **T**HROUGHOUT the foregoing Treatise it appears, that the Condition of Mankind, considered as Inhabitants of this World only, and under the Government of God which we experience, is greatly analogous to our Condition, as designed for another World, or under that farther Government, which Religion teaches us. If therefore any assert, as a Fatalist must, that the Opinion of universal Necessity is reconcileable with the former; there immediately arises a Question in the way of Analogy, whether he must not also own it to be reconcileable with the latter, *i. e.* the System of Religion itself, and the Proof of it. The Reader then will observe, that the Question now before us, is not absolute, Whether the Opinion of Fate be reconcileable with Religion; but hypothetical, Whether, upon Supposition of its being reconcileable with the Constitution of Nature, it be not reconcileable with Religion also: Or, what Pretence a Fatalist, not other Persons, but a Fatalist, has to conclude from his Opinion, that there can be no such thing as Religion. And as the Puzzle and Obscurity, which must unavoidably arise, from arguing upon so absurd a Supposition as That of universal Necessity, will, I fear, easily be seen, it will, I hope, as easily be excused.

But since it has been all along taken for granted, as a thing proved, that there is an intelligent Author of Nature, or natural

rural Governor of the World ; and since an Objection may be made against the Proof of this, from the Opinion of universal Necessity, as it may be supposed, that such Necessity will itself account for the Origin and Preservation of all things: it is requisite, that this Objection be distinctly answered ; or that it be shewn, that a Fatality, supposed consistent with what we certainly experience, does not destroy the Proof of an intelligent Author and Governor of Nature ; before we proceed to consider, whether it destroys the Proof of a moral Governor of it, or of our being in a State of Religion.

C II A P.  
VI.  

Now when it is said by a Fatalist, that the whole Constitution of Nature and the Actions of Men, that every thing, and every Mode and Circumstance of every thing, is necessary and could not possibly have been otherwise ; it is to be observed, that this Necessity does not exclude Deliberation, Choice, Preference, and acting from certain Principles, and to certain Ends: because all this is matter of undoubted Experience, acknowledged by all, and what every man may, every moment, be conscious of. And from hence it follows, that Necessity alone and of itself, is in no sort an Account of the Constitution of Nature, and how Things came *to be* and *to continue* as they are ; but only an Account of this *Circumstance* relating to their Origin and Continuance, that they could not have been otherwise than they are, and have been. The Assertion that every thing is by Necessity of Nature, is not an Answer to the Question ; Whether the World came into Being as it is, by an intelligent Agent forming it thus, or not : But to quite another Question ; Whether it came into Being as it is, in that Way and Manner which we call *necessarily*, or in that Way and Manner which we call *freely*. For suppose farther, that one who was a Fatalist, and one who kept to his natural Sense of things, and believed himself a free Agent, were disputing together, and vindicating their

P A R T I.  respective Opinions; and they should happen to instance in a House: They would agree, that it was built by an Architect. Their Difference concerning Necessity and Freedom, would occasion no Difference of Judgment concerning this; but only concerning another Matter; whether the Architect built it necessarily or freely. Suppose then they should proceed to enquire concerning the Constitution of Nature: In a lax way of speaking, One of them might say, it was by Necessity; and the Other, by Freedom: But, if they had any Meaning to their Words, as the latter must mean a free Agent, so the former must at length be reduced to mean an Agent, whether he would say one or more, acting by Necessity: for abstract Notions can do nothing. Indeed we ascribe to God a necessary Existence, uncaused by any Agent. For we find within ourselves the Idea of Infinity, *i. e.* Immensity and Eternity, impossible, even in Imagination, to be removed out of Being: We seem to discern intuitively, that there must, and cannot but be somewhat external to ourselves, answering this Idea, or the Archetype of it. And from hence (for *This abstract*, as much as any other, implies a *Concrete*) we conclude, that there is and cannot but be, an infinite, an immense eternal Being existing, prior to all Design contributing to his Existence, and exclusive of it. And from the Scantiness of Language, a manner of speaking has been introduced; that Necessity is the Foundation, the Reason, the Account of the Existence of God. But it is not alledged, nor can it be at all intended, that *every thing* exists as it does, by this Kind of Necessity; a Necessity antecedent in Nature to Design: it cannot, I say, be meant that every thing exists as it does, by this Kind of Necessity, upon several Accounts; and particularly because it is admitted, that Design, in the Actions of Men, contributes to many Alterations in Nature. For if any deny this, I shall not pretend to reason with them.

From these things it follows; *First*, That when a Fatalist asserts, that every thing is *by Necessity*, he must mean, *by an Agent acting necessarily*; he must I say mean this, for I am very sensible, he would not chuse to mean it: And *Secondly*, That the Necessity by which such an Agent is supposed to Act, does not exclude Intelligence and Design. So that, were the System of Fatality admitted; it would just as much account for the Formation of the World, as for the Structure of an House, and no more. Necessity as much requires and supposes a necessary Agent, as Freedom requires and supposes a free Agent, to be the Former of the World: And the Appearances of *Design* and of *final Causes* in the Constitution of Nature, as really prove this acting Agent, to be an *intelligent Designer*, or to act from Choice; upon the Scheme of Necessity, supposed possible, as upon That of Freedom.

CHAP.  
VI.  
~~~~~

It appearing thus, that the Notion of Necessity does not destroy the Proof, that there is an intelligent Author of Nature and natural Governor of the World; the present Question, which the Analogy before mentioned<sup>c</sup> suggests, and which, I think, it will answer, is this: Whether the Opinion of Necessity supposed consistent, with Possibility, with the Constitution of the World, and the natural Government which we experience exercised over it; destroys all reasonable Ground of Belief, that we are in a State of Religion: or whether That Opinion be reconcileable with Religion; with the System, and the Proof of it.

Suppose then a Fatalist to educate any one, from his Youth up, in his own Principles: that the Child should reason upon them, and conclude, that since he cannot possibly behave otherwise

<sup>c</sup> P 104.

PART than he does, he is not a Subject of Blame or Commendation, nor can deserve to be rewarded or punished: Imagine him to eradicate the very Perceptions of Blame and Commendation out of his Mind, by means of this System; to form his Temper, and Character, and Behaviour to it; and from it to judge of the Treatment he was to expect, say, from reasonable Men, upon his coming abroad into the World: as the Fatalist judges from this System, what he is to expect from the Author of Nature, and with regard to a future State. I cannot forbear stopping here to ask, whether any one of common Sense would think fit, that a Child should be put upon these Speculations, and be left to apply them to Practice. And a Man has little Pretence to Reason, who is not sensible, that we are all Children in Speculations of this Kind. However, the Child would doubtless be highly delighted to find himself freed from the Restraints of Fear and Shame, with which his Play-fellows were fettered and embarrassed; and highly conceited in his superior Knowledge, so far beyond his Years. But Conceit and Vanity would be the least bad Part of the Influence, which these Principles must have, when thus reasoned and acted upon, during the Course of his Education. He must either be allowed to go on and be the Plague of all about him, and himself too, even to his own Destruction: or else Correction must be continually made use of, to supply the Want of those natural Perceptions of Blame and Commendation, which we have supposed to be removed; and to give him a practical Impression, of what he had reasoned himself out of the Belief of, that he was in Fact an accountable Child, and to be punished for doing what he was forbid. It is therefore in reality impossible, but that the Correction which he must meet with, in the Course of his Education, must convince him, that if the Scheme he was instructed in were not false; yet that he reasoned inconclusively upon it, and somehow or other misapplied it to Practice and common Life: As  
 what

what the Fatalist experiences of the Conduct of Providence at present, ought in all reason to convince him, that this Scheme is misapplied, when applied to the Subject of Religion.<sup>d</sup> But supposing the Child's Temper could remain still formed to the System, and his Expectation of the Treatment he is to have in the World be regulated by it ; so as to expect that no reasonable Man would blame or punish him, for any thing which he should do, because he could not help doing it: Upon this Supposition, it is manifest he would, upon his coming abroad into the World, be insupportable to Society, and the Treatment which he would receive from it, would render it so to him ; and he could not fail of doing somewhat, very soon, for which he would be delivered over into the hands of civil Justice. And thus, in the End, he would be convinced of the Obligations he was under to his wise Instructor. Or suppose this Scheme of Fatality, in any other way, applied to Practice, such practical Application of it, will be found equally absurd ; equally fallacious in a practical Sense: For Instance, that if a Man be destined to live such a Time, he shall live to it, though he take no Care of his own Preservation ; or if he be destined to die before that Time, no Care can prevent it: therefore all Care about preserving one's Life is to be neglected ; which is the Fallacy instanced in by the Ancients. But now on the contrary, none of these practical Absurdities can be drawn, from reasoning upon the Supposition, that we are free ; but all such Reasoning with regard to the common Affairs of Life, is justified by Experience. And therefore, though it were admitted that this Opinion of Necessity were speculatively true, yet, with regard to Practice, it is as if it were false ; so far as our Experience reaches, that is, to the whole of our present Life. For, the Constitution of the present World, and the Condition in which we are actually placed, is, as if we were free. And it may per-

<sup>d</sup> P. 123.

PART I. haps justly be concluded, that since the whole Process of Action, through every Step of it, Suspence, Deliberation, inclining one way, determining, and at last Doing as we determine, is as if we were free, therefore we are so. But the thing here insisted upon is, that under the present natural Government of the World, we find we are treated and dealt with, as if we were free, prior to all Consideration whether we are or not. Were this Opinion therefore of Necessity admitted to be ever so true, yet such is in Fact our Condition and the natural Course of things, that whenever we apply it to Life and Practice, this Application of it, always misleads us; and cannot but mislead us, in a most dreadful Manner, with regard to our present Interest. And how can People think themselves so very secure then, that the same Application of the same Opinion, may not mislead them also, in some analogous manner, with respect to a future, a more general, and more important Interest? For, Religion being a practical Subject, and the Analogy of Nature shewing us, that we have not Faculties to apply this Opinion, were it a true one, to practical Subjects; whenever we do apply it to the Subject of Religion, and thence conclude, that we are free from its Obligations, it is plain, this Conclusion cannot be depended upon. There will still remain just Reason to think, whatever Appearances are, that we deceive Ourselves; in somewhat of a like manner, as when People fancy they can draw contradictory Conclusions from the Idea of Infinity.

From these things together, the attentive Reader will see it follows, that if upon Supposition of Freedom, the Evidence of Religion be conclusive, it remains so, upon Supposition of Necessity; because the Notion of Necessity is not applicable to practical Subjects: not applicable, *i. e.* with respect to them, is as if it were not true. Nor does this contain any Reflection upon Reason; but only upon what is unreasonable. For, to pretend  
to

to act upon Reason, in Opposition to practical Principles, which the Author of our Nature gave us to act upon; and to pretend to apply our Reason to Subjects, with regard to which, our own short Views, and even our Experience, will shew us, it cannot be depended upon, and such, at best, the Subject of Necessity must be: this is Vanity, Conceit, and Unreasonableness.

CHAP.  
VI.  

But this is not all: For, we find within ourselves a Will, and are conscious of a Character. Now if this, in us, be reconcilable with Fate, it is reconcilable with it, in the Author of Nature. And besides, natural Government and final Causes, imply a Character and a Will in the Governor and Designer; ° a Will concerning the Creatures whom He governs. The Author of Nature then being certainly of some Character or other, notwithstanding Necessity; it is evident this Necessity is as reconcilable with the particular Character of Benevolence, Veracity, and Justice in Him, which Attributes are the Foundation of Religion, as with any other Character: Since we find this Necessity no more hinders *Men* from being benevolent than, cruel, true, than faithless, just, than unjust; or if the Fatalist pleases, what we call unjust. For it is said indeed, that what, upon Supposition of Freedom, would be just Punishment, upon Supposition of Necessity, becomes manifestly unjust; because it is Punishment inflicted for Doing That, which Persons could not avoid Doing. As if the Necessity, which is supposed to destroy the Injustice of Murder, for Instance, would not also destroy the Injustice of punishing it. However, as little to the Purpose as this Objection is in itself, it is very much to the Purpose to observe from it, how the Notions of Justice and In-

° By *Will* and *Character* is meant That, which, in speaking of Men, we should express, not only by these Words, but also by the Words, *Temper, Taste, Dispositions, practical Principles; That whole Frame of Mind, from whence we act in one Manner rather than another, and from whence all our Happiness and Misery arise.*

P A R T I. justice remain, even whilst we endeavour to suppose them removed; how they force themselves upon the Mind, even whilst we are making Suppositions destructive of them: For there is not, perhaps, a Man in the World, but would be ready to make this Objection at first Thought. But though it is most evident, that universal Necessity, if it be reconcileable with any thing, is reconcileable with That Character in the Author of Nature, which is the Foundation of Religion; “ Yet, does it not plainly destroy the Proof, that He is of That Character, and consequently the Proof of Religion?” By no means. For we find, that Happiness and Misery are not our Fate, in any such Sense as not to be the Consequences of our Behaviour; but that they are the consequences of it.<sup>a</sup> We find God exercises the same kind of Government over us, with That, which a Father exercises over his Children, and a civil Magistrate over his Subjects. Now, whatever becomes of abstract Questions concerning Liberty and Necessity, it evidently appears to us, that Veracity and Justice must be the natural Rule and Measure of exercising this Authority or Government, to a Being, who can have no Competitions, or Interfering of Interests, with his Creatures and his Subjects.

But as the Doctrine of Liberty, though we experience its Truth, may be perplexed with Difficulties, which run up into the most abstruse of all Speculations; and as the Opinion of Necessity seems to be the very Basis, upon which Infidelity grounds itself; it may be of some Use to offer a more particular Proof of the Obligations of Religion, which may distinctly be shewn, not to be destroyed by this Opinion.

The Proof from final Causes of an intelligent Author of Nature, is not affected by the Opinion of Necessity, supposing Necessity a thing possible in itself, and reconcileable with the

<sup>a</sup> Ch. ii.

Constitution of Things.<sup>f</sup> And He governs the World by the Method of Rewards and Punishments.<sup>g</sup> He has also given us a moral Faculty, by which, we distinguish between Actions, and approve some as virtuous and of Good-desert, and disapprove others as vicious and of Ill-desert:<sup>h</sup> which moral Discernment implies, in the Notion of it, a Rule of Action: and a Rule of a very peculiar Kind, for it carries in it Authority and a right of Direction; Authority in such a Sense, as that we cannot depart from it without being Self-condemned.<sup>i</sup> Now, that this Rule, or the Dictates of this moral Faculty, are moreover the Laws of God, Laws in a Sense including Sanctions; may be thus proved. Consciousness of a Rule or Guide of Action, in Creatures who are capable of considering it as given them by their Maker, not only raises immediately a Sense of Duty, but also a Sense of Security in following it, and of Danger in deviating from it. A Direction of the Author of Nature, given to Creatures capable of looking upon it as such, is plainly a Command from Him: and a Command from Him, necessarily includes in it, at least, an implicit Promise and Threatning in Case of Obedience and Disobedience. But then the Sense or Perception of good and ill Desert,<sup>k</sup> which is contained in the moral Discernment, renders the Sanction explicit, and makes it appear, as one may say, expressed. For if every Rule from Him, be of the Nature of a Command, and every Command carries an implicit Sanction; the Sense of good and ill Desert annexed to the Actions required and forbidden, evidently makes the Sanction explicit. And since His Method of Government is to reward and punish Actions, His having annexed to some Actions an inseparable Sense of good Desert, and to others of ill, this surely amounts to declaring, upon whom his Punishments shall be inflicted, and his Rewards be bestowed. For he must have gi-

Q

VEN

PART

I.

ven us this Discernment and Sense of things, as a Pre-sentiment of what is to be hereafter; or by way of Information before hand, what we are finally to expect in His World. There is then most evident Ground to think, that the Government of God, upon the whole, will be found to correspond to the Nature which he has given us; and that in the Upshot and Issue of things, Happiness and Misery shall, in Fact and Event, be made to follow Virtue and Vice respectively, as He has already, in so peculiar a Manner, associated the Ideas of them in our Minds.

Now I say no Objection, from Necessity, can lie against this general Proof of Religion. None against the Proposition reasoned upon, that we have such a moral Faculty and Discernment; because this is a mere Matter of Fact, a thing of Experience, that human Kind is thus constituted: None against the Conclusion; because it is immediate and wholly from this Fact. For the Conclusion, that God will finally reward the righteous and punish the wicked, is not here drawn, from its appearing to us fit,<sup>1</sup> that *He should*; but from its appearing, that He has told us, *He will*; in the Promise and Threatning just now observed to be contained, implicitly, in the Notion of a Command, and more distinctly and expressly, in the Sense of

<sup>1</sup> However, I am far from intending to deny, that the Will of God is determined, by what is fit, by the Right and Reason of the Case; though one chuses to decline Matters of such abstract Speculation, and to speak with Caution when one does speak of them. But if it be intelligible to say, that *it is fit and reasonable for every one to consult his own Happiness*, then, *Fitness of Action, or the Right and Reason of the Case*, is an intelligible manner of speaking. And it seems as inconceivable, to suppose God to approve one Course of Action, or one End, preferably to another, which yet His acting at all from Design implies that He does, without supposing somewhat prior in That End, to be the Ground of the Preference; as to suppose Him to discern an abstract Proposition to be true, without supposing somewhat prior in it, to be the Ground of the Discernment. It doth not therefore appear, that moral Right is any more relative to Perception, than abstract Truth is: Or that it is any more improper, to speak of the Fitness and Rightness of Actions and Ends, as founded in the Nature of things, than to speak of abstract Truth, as thus founded.

good

good and ill Defert which he has given us. And this Reasoning from Fact is confirmed, and in some Degree even verified, by other Facts; by the natural Tendencies of Virtue and of Vice;<sup>m</sup> and by this, that God, in the natural Course of his Providence, punishes vicious Actions as mischievous to Society; and also vitious Actions as such in the strictest Sense.<sup>n</sup> So that the general Proof of Religion is unanswerably real, even upon the wild Supposition which we are arguing upon.

It must likewise be observed farther, that natural Religion hath, besides this, an external Evidence, which the Doctrine of Necessity, if it could be true, would not affect. For suppose a Person, by the Observations and Reasoning above, or by any other, convinced of the Truth of Religion; that there is a God, who made the World, who is the moral Governor and Judge of Mankind, and will upon the whole deal with every one according to his Works: I say, suppose a Person convinced of this by Reason; but to know nothing at all of Antiquity, or the present State of Mankind. It would be natural for such an one to be inquisitive, what was the History of this System of things; at what time, and in what manner, it came first into the World, and whether it were believed by any considerable Part of it. And were he upon Inquiry to find, that a particular Person, in a late Age, first of all proposed it, as a Deduction of Reason, and that Mankind were before wholly ignorant of it; then, though its Evidence from Reason would remain, there would be no additional Probability of its Truth, from the Account of its Discovery. But instead of this being the Fact of the Case, on the contrary, he would find, what could not but afford him a very strong Confirmation of its Truth: *First*, That somewhat of this System, with more or fewer Additions and Alterations, hath been professed in all Ages and Countries, of which

<sup>m</sup> p. 57. &c.

<sup>n</sup> p. 49, 50. &c.

PART we have any certain Information relating to this Matter. *Secondly*, That it is certain historical Fact, so far as we can trace things up, that this whole System of Belief, that there is one God the Creator and moral Governor of the World, and that Mankind is in a State of Religion, was believed in the first Ages. And *Thirdly*, That as there is no Hint or Intimation in History, that this System was first reasoned out; so there is express historical or traditional Evidence, as antient as History, that it was taught first by Revelation. Now these things must be allowed to be of great Weight. The first of them, general Consent, shews this System to be conformable to the common Sense of Mankind. The Second, namely, that Religion was believed in the first Ages of the World, especially as it does not appear that there were then any Superstitions or false Additions to it, cannot but be a farther Confirmation of its Truth. For it is a Proof of this Alternative; either that it came into the World by Revelation, or that it is natural, obvious, and forces itself upon the Mind. The former of these is the Conclusion of learned Men. And whoever will consider, how unapt for Speculation, rude and uncultivated Minds are, will, perhaps from hence alone, be strongly inclined to believe it the Truth. And as it is shewn in the second Part<sup>o</sup> of this Treatise, that there is nothing of such peculiar Presumption against a Revelation in the Beginning of the World, as there is supposed to be against subsequent ones; a Sceptick could not, I think, give any Account, which would appear more probable even to himself, of the early Pretences to Revelation, than by supposing some real original one, from whence they were copied. And the third thing abovementioned, that there is express historical or traditional Evidence as antient as History, of the System of Religion being taught Mankind by Revelation; this must be admitted as some Degree of real Proof, that it was so taught.

For why should not the most antient Tradition be admitted, as some additional Proof of a Fact, against which there is no Presumption? And this Proof is mentioned here, because it has its Weight to shew, that Religion came into the World by Revelation, prior to all Consideration of the proper Authority of any Book supposed to contain it; and even prior to all Consideration, whether the Revelation itself be uncorruptly handed down and related, or mixed and darkned with Fables. Thus the historical Account, which we have, of the Origin of Religion, taking in all Circumstances, is a real Confirmation of its Truth, no way affected by the Opinion of Necessity. And the *external* Evidence even of natural Religion, is by no means inconsiderable.

C H A P  
VI.  

But it is carefully to be observed, and ought to be recollected after all Proofs of Virtue and Religion, which are only general; that as speculative Reason may be neglected, prejudiced, and deceived: so also may our moral Understanding be impaired and perverted, and the Dictates of it not impartially attended to. This indeed proves nothing against the Reality of our speculative or practical Faculties of Perception; against their being intended by Nature, to inform us in the Theory of things, and instruct us, how we are to behave, and what we are to expect in Consequence of our Behaviour. Yet our Liableness, in the Degree we are liable, to Prejudice and Pervertion, is a most serious Admonition to us to be upon our Guard, with respect to what is of such Consequence, as our Determinations concerning Virtue and Religion: And particularly not to take Custom, and Fashion, and slight Notions of Honour, or Imaginations of present Ease, Use, and Convenience, to Mankind, for the only moral Rule. <sup>p</sup>

<sup>p</sup> Dissert. II.

## PART

## I.

The foregoing Observations together, drawn from the Nature of the thing, and the History of Religion, amount to a real practical Proof of it, not to be confuted: Such a Proof as, considering the infinite Importance of the thing, I apprehend, would be admitted fully sufficient, in Reason, to influence the Actions of Men, who act upon Thought and Reflection; if it were admitted, that there is no Proof of the contrary. But it may be said: "There are many Probabilities, which cannot indeed be confuted, *i. e.* shewn to be no Probabilities, and yet may be overbalanced, by greater Probabilities on the other Side; much more by Demonstration. And there is no Occasion to object against particular Arguments alledged for an Opinion, when the Opinion itself may be clearly shewn to be false, without meddling with such Arguments at all, but leaving them just as they are.<sup>a</sup> Now the Method of Government by Rewards and Punishments, and especially rewarding and punishing good and ill Desert as such respectively, must go upon Supposition, that we are free and not necessary Agents. And it is incredible, that the Author of Nature should govern us upon a Supposition as true, which he knows to be false: and therefore absurd to think, he will reward or punish us for our Actions hereafter; especially that he will do it under the Notion, that they are of good or ill Desert." Here then the Matter is brought to a Point. And the Answer to all this is full, and not to be evaded; that the whole Constitution and Course of things, the whole Analogy of Providence, shews beyond Possibility of Doubt, that the Conclusion from this Reasoning is false; wherever the Fallacy lies. The Doctrine of Freedom indeed clearly shows where; in supposing ourselves necessary, when in Truth we are free Agents. But upon the Supposition of Necessity, the Fallacy lies in taking

<sup>a</sup> p. 1. 9.

for granted, that it is incredible necessary Agents should be rewarded and punished. But that some how or other, the Conclusion now mentioned, is false, is most certain. For it is Fact, that God does govern even Brute Creatures by the Method of Rewards and Punishments, in the natural Course of things. And Men are rewarded and punished for their Actions, punished for Actions mischievous to Society as being so, punished for vicious Actions as such; by the natural Instrumentality of each other, under the present Conduct of Providence. Nay even the Affection of Gratitude, and the Passion of Resentment, and the Rewards and Punishments following from them, which in general are to be considered as natural, *i. e.* from the Author of Nature; these Rewards and Punishments being naturally annexed to Actions considered as implying, good Intention and good Desert, ill Intention and ill Desert; these natural Rewards and Punishments, I say, are as much a Contradiction to the Conclusion above, and shew its Falshood, as a more exact and compleat rewarding and punishing of good and ill Desert as such. So that if it be incredible, that necessary Agents should be thus rewarded and punished, then, Men are not necessary but free; since it is matter of Fact, that they are thus rewarded and punished. But if, on the contrary, which is the Supposition we have been arguing upon, it be insisted, that Men are necessary Agents, then, there is nothing incredible in the farther Supposition of necessary Agents being thus rewarded and punished; since we Ourselves are thus dealt with.

From the whole therefore it must follow, that a Necessity supposed possible, and reconcileable with the Constitution of things, does in no Sort prove that the Author of Nature will not, nor destroy the Proof that he will, finally and upon the whole, in his eternal Government, render his Creatures happy

<sup>r</sup> Sermon. 8th, at the *Rolls*.

PART or miserable, by some means or other, as they behave well or ill.

I. Or, to express this Conclusion in Words conformable to the Title of the Chapter, the Analogy of Nature shews us, that the Opinion of Necessity, considered as practical, is false. And if Necessity, upon the Supposition abovementioned, doth not destroy the Proof of natural Religion, it evidently makes no Alteration in the Proof of revealed.

From these things likewise we may learn, in what Sense to understand That general Assertion, that the Opinion of Necessity is essentially destructive of all Religion. First in a practical Sense; that by this Notion, atheistical Men pretend to satisfy and encourage Themselves in Vice, and justify to Others their Disregard to all Religion. And secondly, in the strictest Sense; that it is a Contradiction to the whole Constitution of Nature, and to what we may every moment experience in Ourselves, and so overturns every thing. But by no means is this Assertion to be understood, as if Necessity, supposing it could possibly be reconciled with the Constitution of things and with what we experience, were not also reconcileable with Religion; for upon this Supposition, it demonstrably is so.

## C H A P. VII.

*Of the Government of God, considered as a Scheme or Constitution, imperfectly comprehended.*

**T**HOUGH it be, as it cannot but be, acknowledged, C H A P.  
VII.  
 that the Analogy of Nature gives a strong Credibility,   
 to the general Doctrine of Religion, and to the several  
 particular things contained in it, considered as so many Matters  
 of Fact; and likewise that it shews, this Credibility not to be  
 destroyed by any Notions of Necessity: Yet still, Objections  
 may be insisted upon, against the Wisdom Equity and Good-  
 ness, of the divine Government implied in the Notion of Re-  
 ligion, and against the Method by which this Government is  
 conducted; to which Objections, Analogy can be no direct An-  
 swer. For the Credibility, or the certain Truth, of a Matter  
 of Fact, does not immediately prove any thing concerning the  
 Wisdom or Goodness of it: and Analogy can do no more,  
 immediately or directly, than shew such and such things to  
 be true or credible, considered only as Matters of Fact. But  
 still, if, upon Supposition of a moral Constitution of Nature,  
 and a moral Government over it, Analogy suggests and makes  
 it credible, that this Government must be a Scheme System  
 or Constitution of Government, as distinguished from a number  
 of single unconnected Acts of distributive Justice and Good-  
 ness; and likewise, that it must be a Scheme, so imperfectly  
 comprehended, and of such a Sort in other Respects, as to  
 R afford

PART afford a direct general Answer to all Objections against the Justice and Goodness of it: then Analogy is, remotely, of great Service in answering those Objections, both by suggesting the Answer, and shewing it to be a credible one.

I.

Now this, upon Inquiry, will be found to be the Case. For, *First*, Upon Supposition God exercises a moral Government over the World, the Analogy of his natural Government suggests and makes credible, that his moral Government must be a Scheme, quite beyond our Comprehension: and this affords a general Answer to all Objections against the Justice and Goodness of it. And, *Secondly*, A more distinct Observation of some particular things contained in God's Scheme of natural Government, the like to which, being supposed, by Analogy, to be contained in his moral Government, will farther shew, how little Weight is to be laid upon these Objections.

I. Upon Supposition God exercises a moral Government over the World, the Analogy of his natural Government suggests and makes credible, that his moral Government must be a Scheme, quite beyond our Comprehension: And this affords a general Answer to all Objections against the Justice and Goodness of it. It is most obvious, Analogy renders it highly credible, that upon Supposition of a moral Government, it must be a Scheme, for the World and the whole natural Government of it, appears to be so; to be a Scheme System or Constitution, whose Parts correspond to each other, and to a Whole: as really as any Work of Art, or as any particular Model of a civil Constitution and Government. In this great Scheme of the natural World, Individuals have various peculiar Relations to other Individuals of their own Species. And whole Species are, we find, variously related to other Species, upon this Earth. Nor do we know, how much farther these Kinds of Relations may extend. And, as there is not any Action or natural Event, which we are acquainted with,

with, so single and unconnected, as not to have a Respect to some other Actions and Events; so possibly each of them, when it has not an immediate, may yet have a remote, natural Relation to other Actions and Events, much beyond the Compass of this present World. There seems indeed nothing from whence, so much as to make a Conjecture, whether all Creatures Actions and Events, throughout the whole of Nature, have Relations to each other. But as it is obvious, that all Events have future unknown Consequences: so, if we trace any, as far as we can go, into what is connected with it, we shall find, that if such Event were not connected with somewhat farther in Nature unknown to us, somewhat both past and present; such Event could not possibly have been at all. Nor can we give the whole Account of any one thing whatever: of all its Causes, Ends, and necessary Adjuncts; those Adjuncts, I mean, without which, it could not have been. By this most astonishing Connexion, these reciprocal Correspondencies and mutual Relations; every thing which we see in the Course of Nature, is actually brought about. And things seemingly the most insignificant imaginable, are perpetually observed to be necessary Conditions to other things of the greatest Importance: So that any one thing whatever, may, for ought we know to the contrary, be a necessary Condition to any other. The natural World then, and natural Government of it, being such an incomprehensible Scheme; so incomprehensible, that a Man must, really in the literal Sense, know nothing at all, who is not sensible of his Ignorance in it: this immediately suggests, and strongly shews the Credibility, that the moral World and Government of it, may be so too. Indeed the natural and moral Constitution and Government of the World, are so connected, as to make up together but one Scheme: and it is highly probable, that the first is formed and carried on merely in Subserviency to the latter; as the vegetable World is for the Animal, and organized

PART nized Bodies for Minds. But the thing intended here, is, without inquiring how far the Administration of the natural World is subordinate to That of the moral, only to observe the Credibility, that one should be analogous or similar to the other: that therefore every Act of divine Justice and Goodness, may be supposed to look much beyond itself, and its immediate Object; may have some Reference to other Parts of God's moral Administration, and to a general moral Plan: and that every Circumstance of this his moral Government, may be adjusted beforehand with a View to the whole of it. Thus for Example: the determined Length of Time, and the Degrees and Ways, in which Virtue is to remain in a State of Warfare and Discipline, and in which Wickedness is permitted to have its Progress; the Times appointed for the Execution of Justice; the appointed Instruments of it; the Kinds of Rewards and Punishment, and the Manners of their Distribution: all particular Instances of divine Justice and Goodness, and every Circumstance of them, may have such Respects to each other, as to make up altogether a Whole, connected and related in all its Parts; a Scheme or System, which is as properly One, as the natural World is, and of the like Kind. And supposing this to be the Case, it is most evident, that we are not competent Judges of this Scheme, from the small Parts of it, which come within our View in the present Life: and therefore no Objections against any of these Parts, can be insisted upon by reasonable Men.

This our Ignorance, and the Consequence here drawn from it, are universally acknowledged, upon other Occasions; and, though scarce denied, yet are universally forgot, when Persons come to argue against Religion. And it is not perhaps easy, even for the most reasonable Men, always to bear in Mind the Degree of our Ignorance, and make due Allowances for it.

Upon

Upon these Accounts, it may not be useleſs to go on a little farther, in Order to ſhew more diſtinctly, how juſt an Answer, our Ignorance is, to Objections againſt the Scheme of Providence. Suppose then a Perſon boldly to aſſert, that the things complained of, the Origin and Continuance of Evil, might eaſily have been prevented by repeated Interpoſitions;<sup>f</sup> Interpoſitions ſo guarded and circumſtanced, as would preclude all Miſchief ariſing from them: Or, if this were impracticable, that a *Scheme* of Government is itſelf an Imperfection, ſince more Good might have been produced, without any Scheme System or Conſtitution at all, by continued ſingle unrelated Acts of diſtributive Juſtice and Goodneſs; becauſe theſe would have occaſioned no Irregularities. And farther than this, it is preſumed, the Objections will not be carried. Yet the Answer is obvious: that were theſe Aſſertions true, ſtill the Obſervations above, concerning our Ignorance in the Scheme of divine Government, and the Conſequence drawn from it, would hold, in great meaſure; enough to vindicate Religion, againſt all Objections from the Diſorders of the preſent State. Were theſe Aſſertions true, yet the Government of the World might be juſt and good notwithstanding; for, at the moſt, they would infer nothing more than that it might have been better. But indeed they are mere arbitrary Aſſertions; no Man being ſufficiently acquainted with the Poſſibilities of things, to bring any Proof of them, to the loweſt Degree of Probability. For however poſſible what is aſſerted may ſeem; yet many Inſtances may be alledged, in things much leſs out of our Reach, of Suppoſitions abſolutely impoſſible, and to be reduced to the moſt palpable Self-contradictions, which, by no Means, every one would perceive to be ſuch, nor perhaps any one at firſt ſight ſuſpect. From theſe things, it is eaſy to ſee diſtinctly, how our Ignorance, as it is the common, is really a ſatiſfactory Answer to all Objections againſt the Juſtice

<sup>f</sup> p. 128, 129.

PART and Goodness of Providence. If a Man contemplating any one providential Dispensation, which had no Relation to any others, should object, that he discerned in it a Disregard to Justice, or a Deficiency of Goodness; Nothing would be less an Answer to such Objection, than our Ignorance, in other Parts of Providence, or in the Possibilities of things, no way related to what he was contemplating. But when we know not, but the Parts objected against, may be relative to other Parts unknown to us; and when we are unacquainted with what is, in the Nature of the thing, practicable in the Case before us; then our Ignorance is a satisfactory Answer: Because, some unknown Relation, or some unknown Impossibility, may render what is objected against, just and good; nay good in the highest practicable Degree.

II. And how little Weight is to be laid upon such Objections, will farther appear, by a more distinct Observation of some particular things contained in the natural Government of God, the like to which, may be supposed, from Analogy, to be contained in his moral Government.

*First,* As in the Scheme of the natural World, no Ends appear to be accomplished without Means; so we find that Means very undesirable, often conduce to bring about Ends in such a Measure desirable, as greatly to overbalance the Disagreeableness of the Means. And in Cases where such Means are conducive to such Ends, it is not Reason, but Experience, which shews us, that they are thus conducive. Experience also shews us many Means to be conducive and necessary to accomplish Ends, which Means, before Experience, we should have thought, would have had even a contrary Tendency. Now from these Observations relating to the natural Scheme of the World, the moral being supposed analogous to it, arises a great Credibility, that  
the

the putting our Misery in each others Power to the Degree it is, and making Men liable to Vice to the Degree we are; and in general, that those things which are objected, against the moral Scheme of Providence, may be, upon the whole, friendly and assistant to Virtue, and productive of an Over-balance of Happiness: *i. e.* the things objected against, may be Means, by which, an Overbalance of Good will, in the End, be found produced: And that it is no Presumption against This, that we do not, if indeed we do not, see those Means to have any such Tendency; or that they appear to us to have a contrary one. Thus those things, which we call Irregularities, may not be so at all; because they may be Means of accomplishing wise and good Ends more considerable. And it may be added, as above,<sup>b</sup> that they may also be the only Means, by which, these wise and good Ends are capable of being accomplished.

CHAP.  
VII.

It may be proper to add, in order to obviate an absurd and wicked Conclusion from any of these Observations; that though the Constitution of our Nature from whence we are capable of Vice and Misery, may, as it undoubtedly does, contribute to the Perfection and Happiness of the World: and though the actual Permission of Evil may be beneficial to it; *i. e.* it would have been more mischievous, (not that a wicked Person had himself abstained from his own Wickedness, but) that any one had forcibly prevented it, than that it was permitted: Yet notwithstanding, it might have been much better for the World, if this very Evil had never been done. Nay it is most clearly conceivable, that Vice may be beneficial to the World, in the Sense which some have asserted; and yet, that it would be infinitely more beneficial for Men to refrain from it. For thus in the wise and good Constitution of the natural World; there are Disorders which bring their own Cures: Diseases which are themselves Remedies.

<sup>t</sup> p. 125, 126.

PART And many a Man would have died, had it not been for the  
 I. Gout or a Fever: yet it would be thought Madness to assert,  
 that Sickness is a better or more perfect State than Health; though the like, with regard to the moral World, has been asserted. But,

*Secondly,* The natural Government of the World is carried on by general Laws. For this, there may be wise and good Reasons; the wisest and best, for ought we know to the contrary. And that there are such Reasons, is suggested to our Thoughts, by the Analogy of Nature; by our being made to experience good Ends to be accomplished, even all the Good which we enjoy, by this Means, that the Laws, by which the World is governed, are general. For we have scarce any Kind of Enjoyments, but what we are, in some way or other, instrumental in procuring ourselves; by acting in a manner which we foresee likely to procure us such Enjoyments: which Foresight could not be at all, were not the Government of the World carried on by general Laws. And though, for ought we know to the contrary, every single Case may be, at length, found to have been provided for even by these; yet to prevent all Irregularities, or remedy them as they arise, by the wisest and best general Laws, may be impossible in the Nature of things: as we see it is absolutely impossible in civil Government. But then we are ready to think, that, the Constitution of Nature remaining as it is, and the Course of things being permitted to go on, in other Respects, as it does, there might be Interpositions to prevent Irregularities; though they could not have been prevented or remedied by any general Laws. And there would indeed be reason to wish, which, by the way, is very different from a Right to claim, that all Irregularities were prevented or remedied by present Interpositions, if these Interpositions would have no other Effect than this. But it is plain they would have some visible and immediate bad Effects: for Instance,

1

they

they would encourage Idleness and Negligence ; and they would render doubtful the natural Rule of Life, which is ascertained by this very thing, that the Course of the World is carried on by general Laws. And farther, it is certain they would have distant Effects, and very great ones too ; by means of the wonderful Connexions before mentioned.<sup>c</sup> So that we cannot so much as guess, what would be the whole Result of the Interpositions desired. It may be said, any bad Result might be prevented by farther Interpositions, whenever there was occasion for them : But this again is talking quite at random, and in the dark.<sup>d</sup> Upon the whole then, we see wise Reasons, why the Course of the World should be carried on by general Laws, and good Ends accomplished by this Means : And, for ought we know, there may be the wisest Reasons for it, and the best Ends accomplished by it. We have no Ground to believe, that all Irregularities could be remedied as they arise, or could have been precluded, by general Laws. We find that Interpositions would produce Evil, and prevent Good : And, for ought we know, they would produce greater Evil than they would prevent, and prevent greater Good than they would produce. And if this be the Case, then the not interposing is so far from being a Ground of Complaint, that it is an Instance of Goodness. This is intelligible and sufficient ; and going farther, seems beyond the utmost Reach of our Faculties.

CHAP.  
VII.

But it may be said, that after all, these supposed Impossibilities and Relations are what we are unacquainted with ; and we must judge of Religion, as of other things, by what we do know, and look upon the rest as Nothing : Or however, that the Answers here given to what is objected against Religion, may equally be made use of to invalidate the Proof of it ; since their Stress lies so very much upon our Ignorance. But,

<sup>c</sup> p. 122, 123.

<sup>d</sup> p. 125.

## P A R T

## I.

*First*, Though total Ignorance in any Matter, does indeed equally destroy, or rather preclude, all Proof concerning it, and Objections against it; yet partial Ignorance does not. For we may, in any Degree, be convinced, that a Person is of such a Character, and consequently will pursue such Ends; though we are greatly ignorant, what is the proper Way of acting, in order, the most effectually, to obtain those Ends: And in this Case, Objections against his Manner of acting, as seemingly not conducive to obtain them, might be answered by our Ignorance; though the Proof that such Ends were intended, might not at all be invalidated by it. Thus, the Proof of Religion is a Proof of the moral Character of God, and consequently that his Government is moral, and that every one upon the whole shall receive according to his Deserts; a Proof that this is the designed End of his Government. But we are not competent Judges, what is the proper Way of acting, in order the most effectually to accomplish this End.\* Therefore our Ignorance is an Answer to Objections against the Conduct of Providence, in permitting Irregularities, as seeming contradictory to this End. Now, since it is so obvious, that our Ignorance may be a satisfactory Answer to Objections against a thing, and yet not affect the Proof of it; till it can be shewn, it is frivolous to assert, that our Ignorance invalidates the Proof of Religion, as it does the Objections against it.

*Secondly*, Suppose unknown Impossibilities, and unknown Relations, might justly be urged to invalidate the Proof of Religion, as well as to answer Objections against it: And that in Consequence of this, the Proof of it were doubtful. Yet still, let it be despised, or let it be ridiculed, it is undeniably true, that moral Obligations would remain certain; though it

\* p. 7, 8.

were not certain what would, upon the whole, be the Consequences of observing or violating them. For, these Obligations arise immediately from the Judgment of our own Mind, unless perverted, which we cannot violate without being Self-condemned. And they would be certain too, from Considerations of Interest. For though it were doubtful, what will be the future Consequences of Virtue and Vice; yet it is, however, credible, that they may have those Consequences, which Religion teaches us they will: And this Credibility is a certain<sup>f</sup> Obligation in point of Prudence, to abstain from all Wickedness, and to live in the conscientious Practice of all that is Good. But,

*Thirdly*, The Answers above given to the Objections against Religion, cannot be made Use of to invalidate the Proof of it, as they do invalidate those Objections. For, upon Supposition, that God exercises a moral Government over the World, Analogy does most strongly lead us to conclude, that this moral Government must be a Scheme or Constitution, beyond our Comprehension. And a thousand particular Analogies shew us, that Parts of such a Scheme, from their Relation to other Parts, may conduce to accomplish Ends, which we should have thought, they had no Tendency at all to accomplish; nay Ends, which before Experience, we should have thought such Parts were contradictory to, and had a Tendency to prevent. And therefore all these Analogies shew, that the Way of arguing made use of in objecting against Religion, is delusive: because they shew, it is not all incredible, that, could we comprehend the Whole, we should find the Permission of the Disorders objected against, to be consistent with Justice and Goodness; and even to be Instances of them. Now This, not being applicable to the Proof of Religion, as it is to the Objections against it,<sup>g</sup> cannot invalidate That Proof, as it does these Objections.

<sup>f</sup> p. 3. And Part II. Ch. vi.

<sup>g</sup> Serm. at the *Rolls*, p. 312. 2d. Ed.

PART *Lastly*, From the Observation now made, it is easy to see, that the Answers above given to the Objections against Providence, though in a general way of speaking, they may be said to be taken from our Ignorance; yet they are by no means taken merely from That, but from somewhat which Analogy shews us concerning it. For Analogy shews us positively, that our Ignorance in the Possibilities of things, and the various Relations in Nature, renders us incompetent Judges, and leads us to false Conclusions, in Cases similar to This, in which we pretend to judge and to object. So that the things above insisted upon, are not mere Suppositions of unknown Impossibilities and Relations; but they are suggested to our Thoughts, and even forced upon the Observation of serious Men, and rendered credible too, by the Analogy of Nature. And therefore, to take these things into the Account, is to judge by Experience and what we do know; and it is not judging so, to take no Notice of them.

## CONCLUSION.

**T**HE Observations of the last Chapter, lead us to consider this little Scene of human Life, in which we are so busily engaged, as having a Reference, of some Sort or other, to a much larger Plan of things. Whether we are, any Way, related to the more distant Parts of the boundless Universe, into which we are brought, is altogether uncertain. But it is evident, that the Course of things, which comes within our View, is connected with somewhat, past, present, and future, beyond it.<sup>a</sup> So that we are placed, as one may speak, in the Middle of a Scheme, not a fixt but a progressive one, every way incomprehensible; incomprehensible, in a manner equally, with Respect to, what has been, what now is, and what shall be hereafter. And this Scheme cannot but contain in it somewhat, as wonderful, and as much beyond our Thought and Conception,<sup>b</sup> as any thing in That of Religion. For, will any Man in his Senses say, that it is less difficult to conceive, how the World came to be and to continue as it is, without, than with, an intelligent Author and Governor of it? Or, admitting an intelligent Governor of it, that there is some other Rule of

<sup>a</sup> p. 123.

<sup>b</sup> See Part II. Ch. 2.

Government,

PART Government, more natural, and of easier Conception, than  
 I. That, which we call moral? Indeed, without an intelligent Author and Governor of Nature, no Account at all can be given, how this Universe, or the Part of it particularly in which we are concerned, came to be, and the Course of it to be carried on, as it is: Nor any, of its general End and Design, without a Moral Governor of it. That there is an intelligent Author of Nature and natural Governor of the World, is a Principle gone upon in the foregoing Treatise; as proved, and generally known and confessed to be proved. And the very Notion of an intelligent Author of Nature, proved by particular final Causes, implies a Will and a Character.<sup>c</sup> Now, as our whole Nature, the Nature which He has given us, leads us to conclude His Will and Character to be moral, just, and good; so we can scarce in Imagination conceive, what it can be otherwise. However, in Consequence of this his Will and Character, whatever it be, he formed the Universe as it is, and carries on the Course of it as he does, rather than in any other Manner; and has assigned to Us, and to all living Creatures, a Part and a Lot in it. Irrational Creatures act this their Part, and enjoy and undergo, the Pleasures and the Pains allotted them, without any Reflection. But one would think it impossible, that Creatures endued with Reason, could avoid reflecting sometimes upon all This: reflecting, if not from whence we came, yet, at least, whether we are going; and what the mysterious Scheme, in the Midst of which we find ourselves, will, at length, come out, and produce: a Scheme in which it is certain we are highly interested, and in which we may be interested even beyond Conception. For many things prove it palpably absurd to conclude, that we shall cease to be, at Death. Particular Analogies do most sensibly shew us, that there is nothing to be thought strange, in our being to exist in another State of Life. And

<sup>c</sup> p. 111, 114.

that we are now living Beings, affords a strong Probability, that we shall *continue* so; unless there be some positive Ground, and there is none from Reason or Analogy, to think Death will destroy us. Were a Persuasion of this Kind ever so well grounded, there would, surely, be little Reason to take Pleasure in it. But indeed it can have no other Ground, than some such Imagination, as That of our gross Bodies being Ourselves; which is contrary to Experience. Experience too most clearly shews us the Folly of concluding, from the Body and the living Agent affecting each other mutually, that the Dissolution of the former, is the Destruction of the latter. And there are remarkable Instances of their not affecting each other, which lead us to a contrary Conclusion. The Supposition then, which in all Reason we are to go upon, is, that our living Nature will *continue* after Death. And it is infinitely unreasonable to form an Institution of Life, or to act, upon any other Supposition. Now all Expectation of Immortality, whether more or less certain, opens an unbounded Prospect to our Hopes and our Fears: since we see the Constitution of Nature is such, as to admit of Misery, as well as to be productive of Happiness, and experience ourselves to partake of both in some Degree; and since we cannot but know, what higher Degrees of both we are capable of. And there is no Presumption against believing farther, that our future Interest depends upon our present Behaviour: For we see our present Interest doth; and that the Happiness and Misery, which are naturally annexed to our Actions, very frequently, do not follow till long after the Actions are done, to which they are respectively annexed. So that were Speculation to leave us uncertain whether it were likely, that the Author of Nature, in giving Happiness and Misery to his Creatures, hath Regard to their Actions or not; yet, since we find by Experience that he hath such Regard, the whole Sense of things which he has given us, plainly leads us, at once and without any elaborate Inquiries,

P A R T I. quires, to think, that it may, indeed must, be to good Actions chiefly that he hath annexed Happiness, and to bad Actions, Misery; or that he will, upon the whole, reward those who do well, and punish those who do evil. To confirm this from the Constitution of the World, it has been observed; that some Sort of moral Government is necessarily implied, in That natural Government of God, which we experience ourselves under: that good and bad Actions, at present, are naturally rewarded and punished, not only as beneficial and mischievous to Society: but also as virtuous and vitious: and that there is, in the very Nature of the thing, a Tendency to their being rewarded and punished in a much higher Degree, than they are at present. And though this higher Degree of distributive Justice, which Nature thus points out and leads towards, is prevented for a Time from taking place; it is by Obstacles, which the State of this World unhappily throws in its Way, and which therefore are in their Nature temporary. Now, as these things in the natural Conduct of Providence, are observable on the Side of Virtue; so there is nothing to be set against them, on the Side of Vice. A moral Scheme of Government then, is visibly established, and, in some Degree, carried into Execution: And this, together with the essential Tendencies of Virtue and Vice duly considered, naturally raises in us an Apprehension, that it will be carried on farther towards Perfection, in a future State, and that every one shall there receive according to his Deserts. And if this be so, then our future and general Interest, under the moral Government of God, is appointed to depend upon our Behaviour; notwithstanding the Difficulty, which this may occasion, of securing it, and the Danger of losing it: just in the same manner as our temporal Interest, under his natural Government, is appointed to depend upon our Behaviour; notwithstanding the like Difficulty and Danger. For, from our original Constitution,

tution, and That of the World which we inhabit, we are naturally trusted with Ourselves; with our own Conduct and our own Interest. And from the same Constitution of Nature, especially joined with That Course of Things which is owing to Men, we have Temptations to be unfaithful in this Trust; to forfeit this Interest, to neglect it, and run ourselves into Misery and Ruin. From these Temptations arise, the Difficulties of behaving so as to secure our temporal Interest, and the Hazard of behaving so as to miscarry in it. There is therefore nothing incredible in supposing, there may be the like Difficulty and Hazard with regard to That chief and final Good, which Religion lays before us. Indeed the whole Account, how it came to pass, that we were placed in such a Condition as this, must be beyond our Comprehension. But it is in part accounted for by what Religion teaches us, that the Character of Virtue and Piety must be a necessary Qualification, for a future State of Security and Happiness, under the moral Government of God; in like Manner, as some certain Qualifications or other are necessary, for every particular Condition of Life, under his natural Government: And that the present State was intended to be a School of Discipline, for improving in Ourselves That Character. Now this Intention of Nature is rendered highly credible by observing; that we are plainly made for Improvement of all Kinds; that it is a general Appointment of Providence, that we cultivate practical Principles, and form within Ourselves Habits of Action, in order to become fit for, what we were wholly unfit for before; that in particular, Childhood and Youth is naturally appointed to be a State of Discipline for mature Age; and that the present World is peculiarly fitted for a State of moral Discipline. And whereas Objections are urged against the whole Notion of moral Government and a Probation-state, from the Opinion of Necessity; it has been shewn, that God has given

P A R T I. us, the Evidence, as it were, of Experience, that all Objections against Religion, on this Head, are vain and delusive. He has also, in his natural Government, suggested an Answer to all our short-sighted Objections, against the Equity and Goodness of his moral Government: And in general He has exemplified to us, the latter, by the former.

These things, which, it is to be remembred, are Matters of Fact, ought, in all common Sense, to awaken Mankind; to induce them to consider in earnest their Condition, and what they have to do. It is absurd, if the Subject were not of so serious a kind, absurd to the Degree of being ridiculous, for Men to think themselves secure, in a vicious Life; or even in that immoral Thoughtlessness, which far the greatest Part of them are fallen into. And the Credibility of Religion, arising from Experience and Facts here considered, is fully sufficient, in Reason, to engage them to live in the general Practice of all Virtue and Piety; under the serious Apprehension, though it should be mixed with some Doubt,<sup>d</sup> of a righteous Administration established in Nature, and a future Judgment in Consequence of it: Especially when we consider, how very questionable it is, whether any thing at all can be gained by Vice;<sup>e</sup> how unquestionably little, as well as precarious, the Pleasures and Profits of it are at the best; and how soon they must be parted with at the longest. For, in the Deliberations of Reason, concerning what we are to pursue, and what to avoid, as Temptations to any thing from mere Passion, are supposed out of the Case: So Inducements to Vice, from cool Expectations of Pleasure and Interest so small and uncertain and short, are really so insignificant, as, in the View of Reason, to be almost Nothing in themselves: And in Comparison with the Importance of Religion, they quite disappear and are lost. Mere Passion indeed may be alledged,

<sup>d</sup> Part II. Ch. 6.

<sup>e</sup> p. 46, 47.

though

though not as a Reason, yet as an Excuse, for a vitious Course of Life. And how sorry an Excuse it is, will be manifest by observing, that we are placed in a Condition, in which we are unavoidably inured to govern our Passions, by being necessitated to govern them; and lay ourselves under the same Kind of Restraints, and as great ones too, from temporal Regards, as Virtue and Piety, in the ordinary Course of things, require. The Plea of ungovernable Passion then, on the Side of Vice, is the poorest of all things; for it is no Reason, and a poor Excuse. But the proper Motives to Religion, are the proper Proofs of it, from our moral Nature, from the Presages of Conscience, and our natural Apprehension of God under the Character of a righteous Governor and Judge; a Nature and Conscience and Apprehension given us by Him: and from the Confirmation of the Dictates of Reason, by *Life and Immortality brought to light by the Gospel; and the wrath of God revealed from Heaven, against all ungodliness, and unrighteousness of Men.*

PART II.  
OF REVEALED RELIGION.

---

CHAP. I.

*Of the Importance of Christianity.*

SOME Persons, upon Pretence of the Sufficiency of the  
Light of Nature, avowedly reject all Revelation, as, in its  
very Notion, incredible, and what must be fictitious.  
And indeed it is certain, there would have been none, had the  
Light

CHAP.  
I.

PART Light of Nature been sufficient in such a Sense, as to render a  
 II. Revelation not wanting and useles. But no man, in Seriousness  
 and Simplicity of Mind, could possibly have thought it so, who  
 had considered, the State of Religion in the heathen World, before Revelation, and its present State in those Places which have borrowed no Light from it; particularly, the Doubtfulness of some of the greatest Men, concerning things of the utmost Importance, as well as the natural Inattention and Ignorance of Mankind in general. It is impossible to say, who would have been able to have reasoned out That whole System, which we call natural Religion, in its genuine Simplicity, clear of Superstition; but there is certainly no Ground to affirm, that the Generality could. If they could, there is no Sort of Probability, that they would. Admitting there were, they would highly want a standing Admonition, to remind them of it, and inculcate it upon them. And farther still, were they as much disposed to attend to Religion, as the better Sort of Men are; yet, even upon this Supposition, there would be various Occasions for supernatural Instruction and Assistance, and the greatest Advantages might be afforded by them. So that to say, Revelation is a thing superfluous, what there was no Need of, and what can be of no Service; is, I think, to talk quite wildly and at random. Nor would it be more extravagant to affirm, that Mankind is so entirely at ease in the present State, and Life so compleatly happy, that it is a Contradiction to suppose our Condition capable of being, in any Respect, better.

There are other Persons, not to be ranked with these, who seem to be getting into a way of neglecting and, as it were, overlooking Revelation, as of small Importance, provided natural Religion be kept to. With little Regard, either to the Evidence of the former, or to the Objections against it, and even upon Supposition of its Truth; the only Design of it, say they,  
 must

must be, to establish a Belief of the moral System of Nature, and to enforce the Practice of natural Piety and Virtue. The Belief and Practice of these, were, perhaps, much promoted by the first Publication of Christianity: But whether these things are believed and practiced, upon the Evidence and Motives of Nature or of Revelation, is no great Matter.<sup>a</sup> This way of considering Revelation, though it is not the same with the former, yet borders nearly upon it, and very much, at length, runs up into it: and requires to be particularly considered, with regard to the Persons, who seem to be getting into this Way. The Consideration of it, will likewise farther shew, the Extravagance of the former Opinion, and the Truth of the Observations in Answer to it, just mentioned. And an Inquiry into the Importance of Christianity, cannot be an improper Introduction to a Treatise concerning the Credibility of it.

Now if God has given a Revelation to Mankind, and commanded those things, which are commanded in Christianity; it is evident, at first sight, that it cannot in any wise be an indifferent matter, whether we obey or disobey those Commands: unless we are certainly assured, that we know all the Reasons for them, and that all those Reasons are now ceased, with regard to Mankind in general, or to Ourselves in particular. And it is absolutely impossible, we can be assured of this. For our Ignorance of these Reasons proves nothing in the Case; since the whole Analogy of Nature shews, what is indeed in itself evident, that there may be infinite Reasons for things, with which we are not acquainted.

<sup>a</sup> Invenis multos—propterea nolle fieri Christianos, quia quasi sufficiant sibi de bona vita sua. Bene vivere Opus est, ait. Quid mihi præcepturus est Christus? Ut bene vivam? Jam bene vivo. Quid mihi necessarius est Christus? Nullam homicidium, nullum furtum, nullam rapinam facio, res alienas non concupisco, nullo adulterio contaminor. Nam invenitur in vita mea aliquid quod reprehendatur, et qui reprehenderit faciat Christianum. *Sig. in Psal. xxxi.*

But

P A R T

II.

But the Importance of Christianity will more distinctly appear, by considering it more distinctly: *First*, as a Republication, and external Institution, of natural or essential Religion, adapted to the present Circumstances of Mankind, and intended to promote natural Piety and Virtue: And *Secondly*, as containing an Account of a Dispensation of things, not discoverable by Reason, in Consequence of which, several distinct Precepts are enjoined us. For though natural Religion is the Foundation and principal Part of Christianity, it is not in any Sense the whole of it.

I. Christianity is a Republication of natural Religion. It instructs Mankind in the moral System of the World: that it is the Work of an infinitely perfect Being, and under his Government; that Virtue is his Law; and that He will finally judge Mankind in Righteousness, and render to all according to their Works, in a future State. And, which is very material, it reaches natural Religion, in its genuine Simplicity; free from those Superstitions, with which, it was totally corrupted, and under which, it was in a manner lost.

Revelation is farther, an authoritative Publication of natural Religion, and so affords the Evidence of Testimony for the Truth of it. Indeed the Miracles and Prophecies recorded in Scripture, were intended to prove a particular Dispensation of Providence, the Redemption of the World by the Messiah: But this does not hinder, but that they may also prove God's general Providence over the World, as our moral Governor and Judge. And they evidently do prove it; because This Character of the Author of Nature, is necessarily connected with and implied in That particular revealed Dispensation of things: It is likewise continually taught expressly, and

insisted upon, by those Persons, who wrought the Miracles and delivered the Prophecies. So that indeed natural Religion seems as much proved by the Scripture Revelation, as it would have been, had the Design of Revelation been nothing else than to prove it.

But it may possibly be disputed, how far Miracles can prove natural Religion; and notable Objections may be urged against this Proof of it, considered as a Matter of Speculation: But considered as a practical thing, there can be none. For suppose a Person to teach natural Religion to a Nation, who had lived in total Ignorance or Forgetfulness of it; and to declare he was commissioned by God so to do: Suppose him, in Proof of his Commission, to foretel things future, which no human Foresight could have guessed at; to divide the Sea with a Word; feed great Multitudes with Bread from Heaven; cure all manner of Diseases; and raise the dead, even himself, to Life: Would not this give additional Credibility to his Teaching, a Credibility beyond what That of a common Man would have, and be an authoritative Publication of the Law of Nature, *i. e.* a new Proof of it? It would be a practical one, perhaps, of the strongest Kind which human Creatures are capable of having given them. The Law of Moses then, and the Gospel of Christ, are authoritative Publications of the Religion of Nature: They afford a Proof, of God's general Providence as moral Governor of the World; as well as of his particular Dispensations of Providence towards sinful Creatures, revealed in the Law and the Gospel. As they are the only Evidence of the latter, they are an additional Evidence of the former.

To shew this farther, let us suppose a Man of the greatest and most improved Capacity, who had never heard of Revelation, convinced upon the whole, notwithstanding the Disorders

PART II. of the World, that it was under the Direction and moral Government of an infinitely perfect Being; but ready to question, whether he were not got beyond the Reach of his Faculties: Suppose him brought, by this Suspicion, into great Danger of being carried away, by the universal bad Example of almost every one around him, who appeared to have no Sense, no practical Sense at least, of these things: And this, perhaps, would be as advantageous a Situation with regard to Religion, as Nature alone ever placed any Man in. What a Confirmation now must it be to such a Person, all at once, to find, that this moral System of things was revealed to Mankind, in the name of That infinite Being, whom he had from Principles of Reason believed in; and that the Publishers of the Revelation proved their Commission from Him, by making it appear, that he had intrusted them, with a Power of suspending and changing the general Laws of Nature.

Nor must it by any Means be omitted, for it is a thing of the utmost Importance, that Life and Immortality are eminently brought to Light by the Gospel. The great Doctrines of a future State, the Danger of a Course of Wickedness, and the Efficacy of Repentance, are not only confirmed in the Gospel, but are taught, especially the last is, with a Degree of Light, to which That of Nature is but Darkness.

Farther: As Christianity served these Ends and Purposes, when it was first published, by the miraculous Publication itself; so it was intended to serve the same Purposes, in future Ages, by Means of the Settlement of a visible Church: of a Society, distinguished from common ones and from the rest of the World, by peculiar religious Institutions; by an instituted Method of Instruction, and an instituted Form of external Religion. Miraculous Powers were given to the first Preachers of Christianity,

in Order to their introducing it into the World: A visible Church was established, in order to continue it, and carry it on successively throughout all Ages. Had Moses and the Prophets, Christ and his Apostles, only taught, and by Miracles proved, Religion to their Cotemporaries; the Benefits of their Instructions would have reached but to a small Part of Mankind. Christianity must have been, in a great Degree, sunk and forgot in a very few Ages. To prevent this, appears to have been one Reason, why a visible Church was instituted; to be, like a City upon a Hill, a standing Memorial to the World, of the Duty which we owe our Maker; to call Men continually, both by Example and Instruction, to attend to it, and, by the Form of Religion, ever before their Eyes, remind them of the Reality; to be the Repository of the Oracles of God; and hold up the Light of Revelation in Aid to That of Nature, and propagate it throughout all Generations to the End of the World——the Light of Revelation, considered here in no other View, than as designed to enforce natural Religion. And in Proportion as Christianity is professed and taught in the World, Religion, natural or essential Religion, is thus distinctly and advantageously laid before Mankind; and brought again and again to their Thoughts, as a Matter of infinite Importance. A visible Church has also a farther Tendency to promote natural Religion, as being an instituted Method of Education, intended to be of more peculiar Advantage to those who would conform to it. For one End of the Institution was, that by Admonition and Reproof, as well as Instruction, by a general regular Discipline, and publick Exercises of Religion; *the body of Christ*, as the Scripture speaks, should be *edified*, *i. e.* trained up in Piety and Virtue, for a higher and better State. This Settlement then appearing thus beneficial, tending in the Nature of the thing to answer, and in some Degree actually answering, those Ends; it is to be remembred, that the very Notion of it implies positive Institu-

PART tions: for the Visibility of the Church consists in them. Take  
 II. away every thing of this Kind, and you loose the very Notion  
 itself. So that if the things now mentioned are Advantages,  
 the Reason and Importance of positive Institutions in general,  
 is most obvious; since without them, these Advantages could not be  
 secured to the World. And it is mere idle Wantonness, to in-  
 sist upon knowing the Reasons, why such particular ones were  
 fixt upon, rather than others.

The Benefit arising from this supernatural Assistance, which Christianity affords to natural Religion, is what some Persons are very slow in apprehending. And yet it is a thing distinct in itself, and a very plain obvious one. For will any in good earnest really say, that the Bulk of Mankind in the heathen World, were in as advantageous a Situation with regard to natural Religion, as they are now amongst us: That it was laid before them, and enforced upon them, in a Manner as distinct, and as much tending to influence their Practice?

The Objections against all this, from the Perversion of Christianity, and from the Supposition of its having had but little good Influence, however innocently they may be proposed, yet cannot be insisted upon as conclusive, upon any Principles, but such as lead to downright Atheism: Because the Manifestation of the Law of Nature by Reason, which, upon all Principles of Theism, must have been from God, has been perverted and rendred ineffectual in the same Manner. It may indeed, I think, truly be said, that the good Effects of Christianity have not been small; nor its supposed ill Effects, any Effects at all of it, properly speaking. Perhaps too the things themselves done, have been aggravated: And if not, Christianity hath been often only a Pretence; and the same Evils in the Main would have been done, upon some other Pretence. However,  
 great

great and shocking as the Corruptions and Abuses of it, have really been, they cannot be insisted upon as Arguments against it, upon Principles of Theism. For, one cannot proceed one Step in reasoning upon natural Religion, any more than upon Christianity, without laying it down as a first Principle, that the Dispensations of Providence are not to be judged of, by their Perversions, but by their genuine Tendencies: not by what they do actually seem to effect, but by what they would effect if Mankind did their Part; That Part which is justly put and left upon them. It is altogether as much the Language of one, as of the other; *He that is unjust, let him be unjust still: and he that is holy, let him be holy still.*<sup>b</sup> The Light of Reason does not, any more than That of Revelation, force Men to submit to its Authority: Both admonish them of what they ought to do and avoid; together with the Consequences of each: And after this, leave them at full Liberty to act just as they please, till the appointed Time of Judgment. Every Moment's Experience shews, that this is God's general Rule of Government.

To return then: Christianity being a Promulgation of the Law of Nature; being moreover an authoritative Promulgation of it; with new Light, and other Circumstances of peculiar Advantage, adapted to the Wants of Mankind; these things fully shew its Importance. And it is to be observed farther, that, as the Nature of the Case requires, so all Christians are commanded to contribute, by their Profession of Christianity, to preserve it in the World, and render it such a Promulgation and Enforcement of Religion. For it is the very Scheme of the Gospel, that each Christian should, in his Degree, contribute towards continuing and carrying it on: all by uniting in the publick Profession and external Practice of Christianity; some by instructing, by having the Oversight and taking Care of, this religious Community, the Church of God.

<sup>b</sup> Rev. xxii. 11.

PART Now this farther shews, the Importance of Christianity; and,  
 II. which is what I chiefly intend, its Importance in a practical  
 Sense: or the high Obligations we are under, to take it into our  
 most serious Consideration; and the Danger there must necessarily be, not in treating it despitefully, which I am not now speaking of, but in disregarding and neglecting it. For this is neglecting to do what is expressly enjoined us, for continuing those Benefits to the World, and transmitting them down to future Times. And all this holds, even though the only thing to be considered in Christianity, were its Subserviency to natural Religion. But,

II. Christianity is to be considered in a further View; as containing an Account of a Dispensation of things, not at all discoverable by Reason, in Consequence of which, several distinct Precepts are enjoined us. Christianity is not only an external Institution of natural Religion, and a new Promulgation of God's general Providence, as righteous Governor and Judge of the World; but it contains also a Revelation of a particular Dispensation of Providence, carrying on by his Son and Spirit, for the Recovery and Salvation of Mankind, who are represented, in Scripture, to be in a State of Ruin. And in Consequence of this Revelation being made, we are commanded *to be baptized*, not only *in the name of the Father*, but also, *of the Son and of the holy Ghost*: and other Obligations of Duty, unknown before, to the Son and the Holy Ghost, are revealed. Now the Importance of these Duties may be judged of, by observing that they arise, not from positive Command merely; but also from the Offices, which appear, from Scripture, to belong to those divine Persons in the Gospel Dispensation; or from the Relations, which, we are there informed, they stand in to us. By Reason is revealed the Relation, which God the Father stands in to us. Hence arises the Obligation of Duty, which we are  
 under

under to Him. In Scripture are revealed the Relations, which the Son and Holy Spirit stand in to us. Hence arise the Obligations of Duty, which we are under to them. The Truth of the Case, as one may speak, in each of these three Respects being admitted, that God is the Governor of the World, upon the Evidence of Reason; that Christ is the Mediator between God and Man, and the holy Ghost our Guide and Sanctifier, upon the Evidence of Revelation—the Truth of the Case, I say, in each of these Respects being admitted; it is no more a Question, why it should be commanded, that we be baptized in the name of the Son and of the holy Ghost, than that we be baptized in the name of the Father. And we are not now considering Baptism itself, as an external positive Institution, for the Importance of positive Institutions in Religion has been above remarked; but only the general Duty to be paid to the Son and holy Ghost, abstracted from any Consideration of the particular external Manner, in which it is to be paid. This Matter seems to require to be more fully stated<sup>c</sup>

Let it be remembred then, that Religion comes under the twofold Consideration of internal and external; for the latter is as real a Part of Religion, of true Religion, as the former. Now when Religion is considered under the first Notion, as an inward Principle, to be exerted in such and such inward Acts of the Mind and Heart; the Essence of natural Religion may be said to consist, in religious Regards to *God the Father Almighty*: and the Essence of revealed Religion, as distinguished from natural, to consist, in religious Regards, to *the Son*, and to *the Holy Ghost*. And the Obligation we are under, of paying these religious Regards to each of these divine Persons respectively, arises

<sup>c</sup> See, The Nature, Obligation, and Efficacy, of the Christian Sacraments, &c. and *Collibus* of revealed Religion, as there quoted.

P A R T

II.

from the respective Relations, which they each stand in to us. How these Relations are made known, whether by Reason or Revelation, makes no Alteration in the Case: because the Duties arise out of the Relations themselves, not out of the Manner in which we are informed of them. The Son and Spirit have each their proper Office, in that great Dispensation of Providence, the Redemption of the World; one our Mediator, the other our Sanctifier. Does not then the Duty of religious Regards to both these divine Persons, as immediately arise, to the View of Reason, out of the very Nature of these Offices and Relations; as the inward Good-will and kind Intention, which we owe to our Fellow-creatures, arises out of the common Relations between us and them? But it will be asked, What are the inward religious Regards, appearing thus obviously due to the Son and holy Spirit; as arising, not merely from Command in Scripture, but from the very Nature of the revealed Relations, which they stand in to us? I answer, the religious Regards of Reverence, Honour, Love, Trust, Gratitude, Fear, Hope. In what external Manner, this inward Worship is to be expressed, is a Matter of pure revealed Command; as perhaps the external Manner, in which, God the Father is to be worshipped, may be more so, than we are ready to think: But the Worship, the internal Worship itself, to the Son and Holy Ghost, is no farther Matter of pure revealed Command, than as the Relations they stand in to us, are Matter of pure Revelation; for the Relations being known, the Obligations to such internal Worship, are Obligations of Reason, arising out of those Relations themselves. In short, the History of the Gospel as immediately shews us the Reason of these Obligations, as it shews us the Meaning of the Words, Son and Holy Ghost.

CHAP.

I.

If this Account of the Christian Religion be just; those Persons who can speak lightly of it, as of little Consequence, provided natural Religion be kept to, plainly forget, that Christianity, even what is peculiarly so called, as distinguished from natural Religion, has yet somewhat very important, even of a moral Nature. For the Office of our Lord being made known, and the Relation he stands in to us, the Obligation of religious Regards to Him, is plainly moral; as much as Charity to Mankind is: since this Obligation arises, before external Command, immediately out of That his Office and Relation itself. Those Persons appear to forget, that Revelation is to be considered, as informing us of somewhat New, in the State of Mankind, and in the Government of the World; as acquainting us with some Relations we stand in, which could not otherwise have been known. And these Relations being real, (though before Revelation we could be under no Obligations from them, yet upon their being revealed,) there is no Reason to think, but that Neglect of behaving suitably to them, will be attended with the same Kind of Consequences under God's Government; as neglecting to behave suitably to any other Relations made known to us by Reason. And Ignorance, whether unavoidable or voluntary, so far as we can possibly see, will, just as much and just as little, excuse in one case as in the other; the Ignorance being supposed equally unavoidable, and equally voluntary, in both Cases.

If therefore Christ be indeed the Mediator between God and Man, *i. e.* if Christianity be true; if he be indeed our Lord, our Saviour, and our God; no one can say, what may follow, not only the obstinate, but the careless Disregard to him, in those high Relations. Nay no one can say, what may follow such

PART Disregard, even in the way of natural Consequence.<sup>d</sup> For, as  
 II. the natural Consequences of Vice in this Life, are doubtless to  
 be considered, as judicial Punishments inflicted by God; so like-  
 wise, for ought we know, the judicial Punishments of the future  
 Life, may be, in a like Way or a like Sense, the natural Consequence of Vice:<sup>e</sup> of Men's violating or disregarding the Relations, which God has placed them in here, and made known to them.

Again: If Mankind have corrupted themselves, are depraved in their moral Character, and so are unfit for that State, which Christ is gone to prepare for his Disciples; and if the Assistance of God's Spirit be necessary to renew their Nature, in the Degree requisite to their being qualified for That State; all which is implied in the express, though figurative Declaration, *Except a Man be born of the Spirit, he cannot enter into the kingdom of God*:<sup>f</sup> Supposing this, is it possible any serious Person can think it a slight matter, whether or no he makes use of the Means, expressly commanded by God, for obtaining this divine Assistance? Especially since the whole Analogy of Nature shews, that we are not to expect any Benefits, without making use of the appointed Means for obtaining or enjoying them. Now Reason shews us nothing, of the particular immediate Means of obtaining, either temporal or spiritual Benefits. This therefore we must learn, either from Experience or Revelation. And Experience, the present Case does not admit of.

The Conclusion from all this evidently is; that, Christianity being supposed either true or credible, it is unspeakable Irreverence, and really the most presumptuous Rashness, to treat it as a light Matter. It can never justly be esteemed of little Consequence, till it be positively supposed false. Nor do I know a higher and more important Obligation which we are under,

<sup>d</sup> p. 28, 29.<sup>e</sup> Ch. v.<sup>f</sup> John. iii. 5.

than That, of examining most seriously into the Evidence of it, CHAP. I.  
supposing its Credibility; and of embracing it, upon Supposition of its Truth. 

The two following Deductions may be proper to be added, in order, to illustrate the foregoing Observations, and to prevent their being mistaken.

*First*, Hence we may clearly see, where lies the Distinction between what is positive and what is moral in Religion. Moral *Precepts* are Precepts, the Reasons of which we see. Positive *Precepts* are Precepts, the Reasons of which we do not see.\* Moral *Duties* arise out of the Nature of the Case itself, prior to external Command. Positive *Duties* do not arise out of the Nature of the Case; but from external Command: Nor would they be Duties at all, were it not for such Command, received from Him whose Creatures and Subjects we are. But the Manner in which, the Nature of the Case, or the Fact of the Relation, is made known, this doth not denominate any Duty either positive or moral. That we be baptized in the Name of the Father, is as much a positive Duty, as that we be baptized in the Name of the Son; because both arise equally from revealed Command: though the Relation which we stand in to God the Father, is made known to us by Reason, the Relation we stand in to Christ, by Revelation only. On the other hand, the Dispensation of the Gospel admitted, Gratitude as immediately becomes due to Christ, from his being the voluntary Minister of this Dispensation; as

\* This is the Distinction between moral and positive Precepts, considered respectively as such. But yet, since the latter have somewhat of a moral Nature, considered in this View, we may see the Reason of them. Moral and positive Precepts are, in some Respects alike, in other Respects different: So far as they are alike, we discern the Reasons of both; So far as they are different, we discern the Reasons of the former, but not of the latter. See p. 147, 148. & p. 156

PART II. it is due to God the Father, from his being the Fountain of all Good : though the first is made known to us, by Revelation only, the second, by Reason. Hence also we may see, and, for Distinctness sake, it may be worth mentioning, that positive Institutions come under a two-fold Consideration. They are either Institutions founded on natural Religion, as Baptism in the name of the Father ; though this has also a particular Reference to the Gospel-dispensation, for it is in the Name of God, as the Father of our Lord Jesus Christ : Or they are external Institutions founded on revealed Religion ; as Baptism in the name of the Son, and of the holy Ghost.

*Secondly*, From the Distinction between what is moral and what is positive in Religion, appears the Ground of That peculiar Preference, which the Scripture teaches us to be due to the former.

The Reason of positive Institutions in general, is very obvious ; though we should not see the Reason, why such particular ones are pitched upon, rather than others. Whoever therefore, instead of cavilling at Words, will attend to the thing itself, may clearly see, that positive Institutions in general, as distinguished from this or that particular one, have the Nature of moral Commands ; since the Reasons of them appear. Thus, for Instance, the *external* Worship of God, is a moral Duty, though no particular Mode of it be so. Care then is to be taken, when a Comparison is made between positive and moral Duties, that they be compared, no farther than as they are different : no farther than, as the former are positive, or arise out of mere external Command, the Reasons of which we are not acquainted with ; and as the latter are moral, or arise out of the

the apparent Reason of the Case, without such external Command. Unless this Caution be observed, we shall run into endless Confusion.

CHAP.

I.

Now this being premised, suppose two standing Precepts enjoined by the same Authority; that, in certain Conjunctions, it is impossible to obey both; that the former is moral, *i. e.* a Precept of which we see the Reasons, and that they hold in the particular Case before us; but that the latter is positive, *i. e.* a Precept of which we do not see the Reasons: it is indisputable that our Obligations are to obey the former; because, there is an apparent Reason for this Preference, and none against it. Farther, positive Institutions, I suppose all of them which Christianity enjoins, are Means to a moral End; and the End must be acknowledged more excellent, than the Means. Nor is Observance of these Institutions, any religious Obedience at all, or of any Value, otherwise than as it proceeds from a moral Principle. This seems to be the strict logical way of stating and determining this Matter; but will, perhaps, be found less applicable to Practice, than may be thought at first sight.

And therefore, in a more practical, though more lax way of Consideration, and taking the Words, *moral Law* and *positive Institutions*, in the popular Sense; I add, that the whole moral Law is as much Matter of revealed Command, as positive Institutions are: for the Scripture enjoins every moral Virtue. In this Respect then they are both upon a Level. But the moral Law is, moreover, written upon our Hearts; interwoven into our very Nature. And this is a plain Intimation of the Author of it, which is to be preferred when they interfere.

But

P A R T

II.

But there is not altogether so much Necessity, for the Determination of this Question, as some Persons seem to think. Nor are we left to Reason alone to determine it For, *First*, Though Mankind have, in all Ages, been greatly prone to place their Religion in peculiar positive Rites, by way of Equivalent for Obedience to moral Precepts; yet, without making any Comparison at all between them, and consequently without determining which is to have the Preference, the Nature of the thing abundantly shews, all Notions of That Kind to be utterly subversive of true Religion: as they are, moreover, contrary, to the whole general Tenor of Scripture; and likewise, to the most express particular Declarations of it, that nothing can render us accepted of God, without moral Virtue. *Secondly*, Upon the Occasion of mentioning together positive and moral Duties, the Scripture always puts the Stress of Religion upon the latter, and never upon the former: Which, though no Sort of Allowance to neglect the former, when they do not interfere with the latter; yet, is a plain Intimation, that when they do, the latter are to be preferred. And farther, as Mankind are for placing the Stress of their Religion any where, rather than upon Virtue; lest both the Reason of the thing, and the general Spirit of Christianity, appearing in the Intimation now mentioned, should be ineffectual against this prevalent Folly: Our Lord himself, from whose Command alone, the Obligation of positive Institutions arises, has taken Occasion to make the Comparison between Them and moral Precepts; when the Pharisees censured him, for *eating with Publicans and Sinners*; and also when they censured his Disciples, for *plucking the ears of corn on the Sabbath-day*. Upon this Comparison, he has determined expressly, and in Form, which shall have the Preference when they interfere. And by delivering his authoritative Determination in a proverbial Manner of Expression, he has made it general;

neral; *I will have Mercy, and not sacrifice.*<sup>b</sup> The Propriety of the Word, *proverbial*, is not the thing insisted upon; though I think the Manner of speaking is to be called so. But, that the Manner of speaking, very remarkably renders the Determination general, is surely indisputable. For, had it been said only, that God preferred Mercy to the rigid Observance of the Sabbath, even then, by Parity of Reason, most justly might we have argued, that he preferred Mercy likewise, to the Observance of other ritual Institutions; and in general, moral Duties, to positive ones. And thus the Determination would have been general; though its being so, were inferred and not expressed. But as the Passage really stands in the Gospel, it is much stronger. For, the Sense and the very literal Words of our Lord's Answer, are as applicable to any other Instance of a Comparison, between positive and moral Duties, as to That upon which they were spoken. And if, in Case of Competition, Mercy is to be preferred to positive Institutions, it will scarce be thought, that Justice is to give Place to them. It is remarkable too, that, as the Words are a Quotation from the Old Testament, they are introduced, on both those Occasions, with a Declaration, that the Pharisees did not understand the Meaning of them. This, I say, is very remarkable. For, since it is scarce possible, for the most ignorant Person, not to understand the literal Sense of the Passage, in the Prophet;<sup>i</sup> and since, understanding the literal Sense, would not have prevented Their *condemning the guiltless*;<sup>k</sup> it can hardly be doubted, that the thing which our Lord really intended in That Declaration, was, that the Pharisees had not learnt from it, as they might, wherein the *general* Spirit of Religion consists: that it consists in moral Piety and Virtue, as distinguished from ritual Observances. However, it

<sup>b</sup> Matth. ix. 13. and xii. 7.

<sup>i</sup> Hof. vi.

<sup>k</sup> See Matth. xii. 7.

P A R T is certain we may learn this from his divine Application of the  
 II. Passage, in the Gospel.

But, as it is one of the peculiar Weaknesses of human Nature, when, upon a Comparison of two things, one is found to be of greater Importance than the other, to consider this other as of scarce any Importance at all: it is highly necessary that we remind ourselves; how great Presumption it is, to make light of positive Institutions of divine Appointment; that our Obligations to obey all God's Commands whatever, are absolute and indispensable; And that Commands merely positive, admitted to be from Him, lay us under a moral Obligation to obey them: an Obligation moral in the strictest and most proper Sense.

To these things I cannot forbear adding, that the Account now given of Christianity, most strongly shews and enforces upon us, the Obligation of searching the Scriptures, in order to see, what the Scheme of Revelation really is, instead of determining beforehand, from Reason, what the Scheme of it must be.<sup>a</sup> Indeed if in Revelation there be found any Passages, the seeming Meaning of which, is contrary to natural Religion; we may most certainly conclude, such seeming Meaning not to be the real one. But it is not any Degree of a Presumption against an Interpretation of Scripture, that such Interpretation contains a Doctrine, which the Light of Nature cannot discover,<sup>b</sup> or a Precept, which the Law of Nature does not oblige to.

<sup>a</sup> See also Ch. iii. Part II.

<sup>b</sup> p. 162.

## C H A P. II.

*Of the supposed Presumption against a Revelation, considered as miraculous.*

**H**AVING shewn the Importance of the Christian Revelation, and the Obligations which we are under seriously to attend to it; upon Supposition of its Truth, or its Credibility: The next thing in Order, is to consider, the supposed Presumptions against Revelation in general; which shall be the Subject of this Chapter: and the Objections against the Christian in particular; which shall be the Subject of some following ones.<sup>a</sup> For it seems the most natural Method, to remove these Prejudices against Christianity; before we proceed to the Consideration of the positive Evidence for it, and the Objections against that Evidence.<sup>b</sup>

It is, I think, commonly supposed, that there is some peculiar Presumption, from the Analogy of Nature, against the Christian Scheme of things, at least against Miracles; so as that stronger Evidence is necessary to prove the Truth and Reality of them, than would be sufficient to convince us of other Events, or Matters of Fact. Indeed the Consideration of this supposed Presumption, cannot but be thought very insignificant, by many Persons: Yet, as it belongs to the Subject of this Treatise; so it may tend to open the Mind, and remove some Prejudices: however needless the Consideration of it be, upon its own Account.

<sup>a</sup> Ch. iii, iv, v, vi.<sup>b</sup> Ch. vii.  
Y

P A R T I. I find no Appearance of a Presumption, from the Analogy of Nature, against the general Scheme of Christianity, that God created and invisibly governs the World by Jesus Christ; and by him also will hereafter judge it in Righteousness, *i. e.* render to every one according to his Works: and that good Men are under the secret Influence of his Spirit. Whether these things are, or are not, to be called miraculous, is, perhaps, only a Question about Words; or however, is of no Moment in the Case. If the Analogy of Nature raises any Presumption against this general Scheme of Christianity, it must be, either because it is not discoverable by Reason or Experience; or else, because it is unlike That Course of Nature, which is. But Analogy raises no Presumption against the Truth of this Scheme, upon either of these Accounts.

II.  

*First*, There is no Presumption, from Analogy, against the Truth of it, upon Account of its not being discoverable by Reason or Experience. For suppose one who never heard of Revelation, of the most improved Understanding, and acquainted with Our whole System of natural Philosophy and natural Religion; such an one could not but be sensible, that it was but a very small Part of the natural and moral System of the Universe, which he was acquainted with. He could not but be sensible, that there must be innumerable things, in the Dispensations of Providence past, in the invisible Government over the World at present carrying on, and in what is to come; of which he was wholly ignorant,<sup>c</sup> and which could not be discovered without Revelation. Whether the Scheme of Nature be, in the strictest Sense, infinite or not; it is evidently vast, even beyond all possible Imagination. And doubtless That Part of it, which is opened to our View, is but as a Point, in Comparison

of the whole Plan of Providence, reaching throughout Eternity past and future; in Comparison of what is now going on, in the remote Parts of the boundless Universe; nay in Comparison of the whole Scheme of This World. And therefore, that Things lye beyond the natural Reach of our Faculties, is no Sort of Presumption against the Truth and Reality of them; because it is certain, there are innumerable things, in the Constitution and Government of the Universe, which are thus beyond the natural Reach of our Faculties. *Secondly*, Analogy raises no Presumption, against any of the things contained in this general Doctrine of Scripture now mentioned, upon Account of their being unlike the known Course of Nature. For there is no Presumption at all from Analogy, that the *whole* Course of things, or divine Government, naturally unknown to us, and *every thing* in it, is like to any thing in That which is known; and therefore no peculiar Presumption against any thing in the former, upon Account of its being unlike to any thing in the latter. And in the Constitution and natural Government of the World, as well as in the moral Government of it, we see things, in a great Degree, unlike one another: and therefore ought not to wonder at such Unlikeness between things visible and invisible. However, the Scheme of Christianity is by no means entirely unlike the Scheme of Nature; as will appear in the following Part of this Treatise.

The Notion of a Miracle, considered as a Proof of a divine Mission, has been stated with great Exactness by Divines; and is, I think, sufficiently understood by every one. There are also invisible Miracles, the Incarnation of Christ, for Instance, which, being secret, cannot be alledged as a Proof of such a Mission; but require themselves to be proved by visible Miracles. Revelation itself too, is miraculous; and Miracles are the Proof of it; and the supposed Presumption against these, shall pre-

PART II. sently be considered. All which I have been observing here is; that, whether we chuse to call every thing in the Dispensations of Providence, not discoverable without Revelation, nor like the known Course of things, miraculous; and whether the general christian Dispensation now mentioned, is to be called so, or not; the foregoing Observations seem certainly to shew, that there is no Presumption against it, from the Analogy of Nature.

II. There is no Presumption, from Analogy, against Operations, some or other, which, we should now call miraculous, particularly none against a Revelation, at the Beginning of the World; nothing of such Presumption against it, as is supposed to be implied or expressed in the Word, miraculous. For a Miracle, in its very Notion, is relative to a Course of Nature; and implies somewhat different from it, considered as being so. Now, either there was no Course of Nature at the Time which we are speaking of; or if there were, we are not acquainted, what the Course of Nature is, upon the first peopling of Worlds. And therefore the Question, whether Mankind had a Revelation made to them at That Time, is to be considered, not as a Question concerning a Miracle, but as a common Question of Fact. And we have the like Reason, be it more or less, to admit the Report of Tradition, concerning this Question, and concerning common Matters of Fact of the same Antiquity; for Instance, what Part of the Earth was first peopled.

Or thus: When Mankind was first placed in this State, there was a Power exerted, totally different from the present Course of Nature. Now, whether this Power, thus wholly different from the present Course of Nature, for we cannot properly apply to it, the Word miraculous; whether This Power stopped immediately after it had made Man, or went on, and exerted

itself farther in giving him a Revelation, is a Question of the same Kind, as whether an ordinary Power exerted itself in such a particular Degree and Manner, or not.

C H A P.  
II.  

Or suppose the Power exerted in the Formation of the World, be considered as miraculous, or rather, be called by that Name; the Case will not be different: since it must be acknowledged, that such a Power was exerted. For supposing it acknowledged, that our Saviour spent some Years in a Course of working Miracles: there is no more Presumption, worth mentioning, against his having exerted this miraculous Power, in a certain Degree greater, than in a certain Degree less; in one or two more Instances, than in one or two fewer; in this, than in another Manner.

It is evident then, that there can be no peculiar Presumption, from the Analogy of Nature, against supposing a Revelation, when Man was first placed upon the Earth.

Add, that there does not appear the least Intimation in History or Tradition, that Religion was first reasoned out; but the whole of History and Tradition makes for the other Side, that it came into the World by Revelation. Indeed the State of Religion in the first Ages, of which we have any Account, seems to suppose and imply, that this was the Original of it amongst Mankind. And these Reflections together, without taking in the peculiar Authority of Scripture, amount to real and a very material Degree of Evidence, that there was a Revelation at the Beginning of the World. Now this, as it is a Confirmation of natural Religion, and therefore mentioned in the former Part of this Treatise;<sup>d</sup> so likewise it has a Tendency to remove any Prejudices against a subsequent Revelation.

<sup>d</sup> p. 115, 116.

PART III. But still it may be objected, that there is some peculiar  
 II. Presumption, from Analogy, against Miracles; particularly  
 against Revelation, after the Settlement and during the Continuance of a Course of Nature.

Now with regard to this supposed Presumption, it is to be observed in general; that before we can have Ground for raising what can, with any Propriety, be called an *Argument* from Analogy, for, or against, Revelation considered as somewhat miraculous, we must be acquainted with a similar or parallel Case. But the History of some other World, seemingly, in like Circumstances with our own, is no more than a parallel Case; and therefore Nothing short of This, can be so. Yet, could we come at a presumptive Proof, for, or against, a Revelation, from being informed, whether such World had one, or not; such a Proof, being drawn from one single Instance only, must be infinitely precarious. More particularly: *First* of all; There is a very strong Presumption, against common speculative Truths, and against the most ordinary Facts, before the Proof of them; which yet is overcome by almost any Proof. There is a Presumption of Millions to one, against the Story of *Cæsar*, or of any other Man. For suppose a Number of common Facts so and so circumstanced, of which, one had no kind of Proof, should happen to come into one's Thoughts; every one would, without any possible Doubt, conclude them to be false. And the like may be said of a single common Fact. And from hence it appears, that the Question of Importance, as to the Matter before us, is, concerning the Degree of the peculiar Presumption supposed against Miracles; not whether there be any peculiar Presumption at all against them. For, if there be the Presumption of Millions to one, against the most common Facts; What can a small Presumption additional to this, amount to, though it be peculiar? It cannot be estimated, and is as Nothing.

only material Question is, whether there be any such Presumptions against Miracles, as to render them in any Sort incredible. *Secondly*, If we leave out the Consideration of Religion, we are in such total Darkness, upon what Causes, Occasions, Reasons, or Circumstances, the present Course of Nature depends; that there does not appear any Improbability for or against supposing, that five or six thousand Years may have given Scope for, Causes, Occasions, Reasons, or Circumstances, from whence miraculous Interpositions may have arisen. And from this, joined with the foregoing, Observation, it will follow, that there must be a Presumption, beyond all Comparison, greater, against the *particular* common Facts just now instanced in, than against Miracles *in general*; before any Evidence of either. But, *Thirdly*, Take in the Consideration of Religion, or the moral System of the World, and then we see distinct particular Reasons for Miracles; to afford Mankind Instruction additional to That of Nature, and to attest the Truth of it. And this gives a real Credibility to the Supposition, that it might be Part of the original Plan of things, that there should be miraculous Interpositions. Then, *Lastly*, Miracles must not be compared, to common natural Events, or to Events which, though uncommon, are similar to what we daily experience; but to the extraordinary Phenomena of Nature. And then the Comparison will be between, the Presumption against Miracles; and the Presumption, against such uncommon Appearances, suppose, as Comets, and against there being any such Powers in Nature as Magnetism and Electricity, so contrary to the Properties of other Bodies not endued with these Powers. And before any one can determine, whether there be any peculiar Presumption against Miracles, more than against other extraordinary things; he must consider, what, upon first hearing, would be the Presumption against the last mentioned Appearances and Powers, to a Person acquainted

P A R T acquainted only with the daily, monthly, and annual, Course of  
 II. Nature respecting this Earth, and with those common Powers  
 of Matter which we every Day see.

Upon all this I conclude ; That there certainly is no such Pre-  
 sumption against Miracles, as to render them in any wise incre-  
 dible: That on the contrary, our being able to discern Reasons  
 for them, gives a positive Credibility to the History of them,  
 in Cases where those Reasons hold: And That it is by no Means  
 certain, that there is any peculiar Presumption at all, from Ana-  
 logy, even in the lowest Degree, against Miracles, as distinguish-  
 ed from other extraordinary Phenomena ; though it is not worth  
 while to perplex the Reader, with Inquiries into the abstract  
 Nature of Evidence, in order to determine a Question, which,  
 without such Inquiries, we see <sup>a</sup> is of no Importance.

<sup>a</sup> p. 166.

## C H A P. III.

*Of our Incapacity of judging, what were to be expected in a Revelation; and the Credibility, from Analogy, that it must contain things appearing liable to Objections.*

**B**ESIDES the Objections against the Evidence for Christianity, many are alledged against the Scheme of it; against the whole Manner in which it is put and left with the World; as well as against several particular Relations in Scripture: Objections drawn, from the Deficiencies of Revelation; from things in it appearing to Men *Foolishness*;<sup>a</sup> from its containing matters of Offence, which have led, and must have been foreseen would lead, into strange Enthusiasm and Superstition, and be made to serve the Purposes of Tyranny and Wickedness; from its not being universal; and, which is a thing of the same Kind, from its Evidence not being so convincing and satisfactory as it might have been: for this last is sometimes turned into a positive Argument against its Truth.<sup>b</sup> It would be tedious, indeed impossible, to enumerate the several Particulars comprehended under the Objections here referred to; they being so various, according to the different Fancies of Men. There are Persons, who think it a strong Objection against the Authority of Scripture, that it is not composed by Rules of Art, agreed upon by Criticks, for polite and correct Writing. And the Scorn is inexpressible, with which some of

C H A P.  
III.<sup>a</sup> 1 Cor. i. 28.<sup>b</sup> See Ch. vi.

P A R T the prophetick Parts of Scripture are treated: partly through  
 II. the Rashness of Interpreters; but very much also, on Account  
 of the hieroglyphical and figurative Language, in which they  
 are left us. Some of the principal things of this Sort, shall be  
 particularly considered, in following Chapters: But my De-  
 sign at present, is to observe in general, with respect to this  
 whole way of arguing, that, upon Supposition of a Revelation,  
 it is highly credible beforehand, we should be incompetent  
 Judges of it, to a great Degree; and that it would contain ma-  
 ny things appearing to us liable to great Objections: in case  
 we judge of it otherwise, than by the Analogy of Nature.  
 And therefore, though Objections against the Evidence of  
 Christianity, are most seriously to be considered; yet Objections  
 against Christianity itself, are, in a great measure, frivolous:  
 almost all Objections against it, excepting those which are al-  
 ledged, against the particular Proofs of its coming from God.  
 I express myself with Caution, lest I should be mistaken to vi-  
 lify Reason; which is indeed the only Faculty we have where-  
 with to judge concerning any thing, even Revelation itself: or  
 be misunderstood to assert, that a supposed Revelation cannot  
 be proved false, from internal Characters. For, it may contain  
 clear Immoralities or Contradictions; and either of these would  
 prove it false: Nor will I take upon me to affirm, that Nothing  
 else can possibly render any supposed Revelation incredible.  
 Yet still the Observation above, is, I think, true beyond Doubt,  
 that Objections against Christianity, as distinguished from Objec-  
 tions against its Evidence, are frivolous. To make out This, is  
 the general Design of the following Chapter. And with regard  
 to the whole of it, I cannot but particularly wish, that the  
 Proofs might be attended to; rather than the Assertions cavilled  
 at, upon Account of any unacceptable Consequences, whether  
 real or supposed, which may be drawn from them. For, after  
 all,

all, That which is true, must be admitted, though it should shew  
us, the Shortness of our Faculties; and that we are in no wise  
Judges of many things, of which we are apt to think our-  
selves very competent ones. Nor will this be any Objection  
with reasonable Men, at least upon second Thought, it will  
not be any Objection with such, against the Justness of the fol-  
lowing Observations.

C H A P.  
III.

As God governs the World, and instructs his Creatures, ac-  
cording to certain Laws or Rules, in the known Course of Na-  
ture; known by Reason together with Experience: so the Scrip-  
ture informs us of a Scheme of divine Providence additional to  
this. It relates, that God has, by Revelation, instructed Men  
in things concerning his Government, which they could not  
otherwise have known; and reminded them of things, which  
they might: and attested the Truth of the whole, by Miracles.  
Now if the natural and the revealed Dispensation of things, are  
both from God, coincide with each other, and together make  
up one Scheme of Providence; our being incompetent Judges  
of one, must render it credible, that we may be incompetent  
Judges also of the other. Since, upon Experience, the acknow-  
ledged Constitution and Course of Nature, is found to be great-  
ly different from what, before Experience, would have been ex-  
pected, and such as, Men fancy, there lie great Objections against;  
this renders it beforehand highly credible, that they may find  
the revealed Dispensation likewise, if they judge of it as they  
do of the Constitution of Nature, very different from Expecta-  
tions formed beforehand, and liable, in Appearance, to great  
Objections: Objections, against the Scheme itself, and against  
the Degrees and Manners of the miraculous Interpositions, by  
which it was attested and carried on. Thus suppose a Prince  
to govern his Dominions in the wisest Manner possible, by com-  
mon known Laws; and that upon some Exigencies he should

P A R T II. suspend these Laws, and govern, in several Instances, in a different Manner: If one of his Subjects were not a competent Judge beforehand, by what common Rules, the Government should or would be carried on; it could not be expected, that the same Person would be a competent Judge, in what Exigencies, or in what Manner, or to what Degree, those Laws commonly observed, would be suspended or deviated from. If he were not a Judge of the Wisdom of the ordinary Administration, there is no Reason to think, he would be a Judge of the Wisdom of the extraordinary. If he thought he had Objections against the former, doubtless, it is highly supposable, he might think also, that he had Objections against the latter. And thus, as we fall into infinite Follies and Mistakes, whenever we pretend, otherwise than from Experience and Analogy, to judge of the Constitution and Course of Nature; it is evidently supposable beforehand, that we should fall into as great, in pretending to judge, in like Manner, concerning Revelation. Nor is there any more Ground to expect, that this latter should appear to us, clear of Objections, than that the former should.

These Observations relating to the Whole of Christianity, are applicable to Inspiration in particular. As we are in no Sort Judges beforehand, by what Laws or Rules, in what Degree, or by what Means, it were to have been expected, that God would naturally instruct us; so, upon Supposition of his affording us Light and Instruction by Revelation, additional to what he has afforded us by Reason and Experience, we are in no Sort Judges, by what Methods and in what Proportion, it were to be expected, that this supernatural Light and Instruction would be afforded us. We know not beforehand, what Degree or Kind of natural Information, it were to be expected God would afford Men, each by his own Reason and Experience; nor how far He would enable, and effectually dispose them to communicate

nicate it, whatever it should be, to each other ; nor whether the Evidence of it would be, certain, highly probable, or doubtful ; nor whether it would be given with equal Clearness and Conviction to all : Nor could we guess, upon any good Ground I mean, whether natural Knowledge, or even the Faculty itself, by which we are capable of attaining it, Reason, would be given us, at once, or gradually. In like Manner, we are wholly ignorant, what Degree of new Knowledge, it were to be expected, God would give Mankind by Revelation, upon Supposition of his affording one : or how far, or in what Way, he would interpose miraculously, to qualify them, to whom he should originally make the Revelation, for communicating the Knowledge given by it ; and to secure their doing it to the Age in which they should live ; and to secure its being transmitted to Posterity. We are equally ignorant, whether the Evidence of it would be, certain, or highly probable, or doubtful ;<sup>c</sup> or whether all who should have, any Degree of Instruction from it, and any Degree of Evidence of its Truth, would have the same ; or whether the Scheme would be revealed at once, or unfolded gradually. Nay we are not in any Sort able to judge, whether it were to have been expected, that the Revelation should have been committed to Writing ; or left to be handed down, and consequently corrupted, by verbal Tradition, and at length sunk under it ; If Mankind so pleased, and during such Time as they are permitted, in the Degree they evidently are, to act as they will.

But it may be said, that a Revelation in some of the above-mentioned Circumstances ; one, for Instance, which was not committed to Writing and thus secured against Danger of Corruption, would not have answered its Purpose. I ask, what Purpose ? It would not have answered all the Pur-

<sup>c</sup> See Ch. vi.

P A R T poses, which it has now answered, and in the same Degree; but  
 II. it would have answered others, or the same in different Degrees.  
 ~~~~~ And which of these, were the Purposes of God, and best fell in  
 with his general Government, we could not at all have determined beforehand.

Now if we have no Principles of Reason, upon which to judge beforehand, how, it were to be expected, Revelation should have been left, or what was most suitable to the divine Plan of Government, in any of the forementioned Respects; it must be quite frivolous to object afterwards as to any of them, against its being left in one way, rather than another: For this would be to object against things, upon Account of their being different from Expectations, which have been shewn to be without Reason. And thus we see, that the only Question concerning the Truth of Christianity, is, whether it be a real Revelation; not whether it be attended with every Circumstance which we should have looked for: and concerning the Authority of Scripture, whether it be what it claims to be; not whether it be a Book of such Sort, and so promulged, as weak Men are apt to fancy, a Book containing a divine Revelation should be. And therefore, neither Obscurity, nor seeming Inaccuracy of Stile, nor various Readings, nor early Disputes about the Authors of particular Parts; nor any other things of the like Kind, though they had been much more considerable in Degree than they are, could overthrow the Authority of the Scripture: unless the Prophets, Apostles, or our Lord, had promised, that the Book containing the divine Revelation, should be secure from those things. Nor indeed can any Objections overthrow such a Kind of Revelation as the Christian claims to be, since there are no Objections against the Morality of it,<sup>d</sup> but such as can shew, that there is no Proof of Miracles wrought originally in Attestation of it;

<sup>d</sup> p. 182, 183.

no Appearance of any thing miraculous in its obtaining in the World; nor any of Prophecy, that is, of Events foretold, which human Sagacity could not foresee. If it can be shewn, that the Proof alledged for all these, is absolutely none at all, then is Revelation overturned. But were it allowed, that the Proof of any one or all of them, is lower than is allowed; yet, whilst any Proof of them remains, Revelation will stand upon much the same Foot it does at present, as to all the Purposes of Life and Practice, and ought to have the like Influence upon our Behaviour.

C H A P.  
III.

From the foregoing Observations too, it will follow, and those who will thoroughly examine into Revelation, will find it worth remarking; that there are several Ways of arguing, which, though just with Regard to other Writings, are not applicable to Scripture. We cannot argue, for Instance, that This cannot be the Sense or Intent of such a Passage of Scripture; for if it had, it would have been express'd more plainly, or have been represented under a more apt Figure or Hieroglyphick: Yet we may justly argue thus, with respect to common Books. And the Reason of this Difference is very evident; that in Scripture, we are not competent Judges, as we are in common Books, how plainly, it were to have been expected, what is the true Sense should have been express'd, or under how apt an Image, figured. The only Question is, what Appearance there is, that This is the Sense; and scarce at all, how much more determinately or accurately it might have been express'd or figured.

“ But is it not Self-evident, that internal Improbabilities of all Kinds, weaken external probable Proof?” Doubtless. But to what practical Purpose can this be alledged here, when it has been proved before,\* that real internal Improbabilities which rise even to moral Certainty, are overcome by the most ordinary

\* p. 166.

PART  
 II.
 

Testimony; and when it now has been made appear, that we scarce know what are Improbabilities, as to the Matter we are here considering: as it will farther appear from what follows.

For though from the Observations above made, it is manifest, that we are not in any Sort competent Judges, what supernatural Instruction were to have been expected; and though it is Self-evident, that the Objections of an incompetent Judgment must be frivolous: Yet it may be proper to go one Step farther and observe; that if Men will be regardless of these things, and pretend to judge of the Scripture by preconceived Expectations, the Analogy of Nature shews beforehand, not only that it is highly credible, they may, but also probable that they will, imagine they have strong Objections against it, however really unexceptionable: for so, prior to Experience, they would think they had, against, the Circumstances and Degrees and the whole Manner of That Instruction, which is afforded by the ordinary Course of Nature. Were this Instruction which God affords, to brute Creatures, by Instincts and mere Propensions, and to Mankind, by these together with Reason, Matter of probable Proof, and not of certain Observation; it would be rejected as incredible, in many Instances of it, only upon Account of the Means, by which this Instruction is given, the seeming Disproportions, the Limitations, necessary Conditions, and Circumstances of it. For Instance: Would it not have been thought highly improbable, that Men should have been so much more capable of discovering, even to Certainty, the general Laws of Matter, and the Magnitudes Paths and Revolutions of the heavenly Bodies; than the Occasions and Cures of Distempers, and many other things, in which, human Life seems so much more nearly concerned, than in Astronomy? How capricious and irregular a Way of Information, would it be said, is That of *Invention*, by Means of which, Nature instructs us in Matters of Science, and in  
 many

many things, upon which the Affairs of the World greatly depend: That a Man should, by this Faculty, be made acquainted with a thing in an Instant, when perhaps he is thinking of somewhat else, which he has in vain been searching after, it may be, for Years. So likewise the Imperfections attending the only Method, by which Nature enables and directs us to communicate our Thoughts to each other, are innumerable. Language is, in its very Nature, inadequate, ambiguous, liable to infinite Abuse, even from Negligence; and so liable to it from Design, that every Man can deceive and betray by it. And, to mention but one Instance more; that Brutes, without Reason, should act, in many Respects, with a Sagacity and Foresight vastly greater than what Men have in those Respects, would be thought impossible. Yet it is certain they do act with such superior Foresight: whether it be their own indeed, is another Question. From these things, it is highly credible beforehand, that upon Supposition God should afford Men some additional Instruction by Revelation, it would be with Circumstances, in Manners, Degrees and Respects, which we should be apt to fancy we had great Objections against; against the Credibility of. Nor are the Objections against the Scripture, nor against Christianity in general, at all more or greater, than the Analogy of Nature would before hand—not perhaps give Ground to expect; for this Analogy may not be sufficient, in some Cases, to ground an Expectation upon; but no more nor greater, than Analogy would shew it, beforehand, to be supposeable and credible, that there might seem to lie against Revelation.

By applying these general Observations, to a particular Objection, it will be more distinctly seen, how they are applicable to others of the like Kind; and indeed to almost all Objections against Christianity, as distinguished from Objections against its Evidence. It appears from Scripture, that, as it was not

PART  
II.

unusual in the Apostolick Age, for Persons, upon their Conversion to Christianity, to have been endued with miraculous Gifts; so, that some of those Persons exercised these Gifts in a strangely irregular and disorderly Manner. And this is made an Objection against their being really miraculous. Now the foregoing Observations quite remove this Objection, how considerable soever it may appear at first sight. For, consider a Person endued with any of these Gifts; for Instance, That of Tongues: It is to be supposed, that he had the same Power over this miraculous Gift, as he would have had over it, had it been the Effect of Habit, of Study and Use, as it ordinarily is; or the same Power over it, as he had over any other natural Endowment. Consequently, he would use it in the same Manner he did any other; either regularly and upon proper Occasions only, or irregularly and upon improper ones: according to his Sense of Decency, and his Character of Prudence. Where then is the Objection? Why, if this miraculous Power was indeed given to the World, to propagate Christianity and attest the Truth of it, we might, it seems, have expected, that other sort of Persons should have been chosen to be invested with it; or that these should, at the same Time, have been endued with Prudence; or that they should have been, continually, restrained and directed in the Exercise of it: *i. e.* that God should have miraculously interposed, if at all, in a different Manner or higher Degree. But from the Observations made above, it is undeniably evident, that we are not Judges, in what Degrees and Manners, it were to have been expected, he should miraculously interpose; upon Supposition of his doing it in some Degree and Manner. Nor, in the natural Course of Providence, are superior Gifts of Memory, Eloquence, Knowledge, and other Talents of great Influence, conferred only on Persons of Prudence and Decency, or such as are disposed to make the properest Use of them.

Nor

Nor is the Instruction and Admonition naturally afforded us for the Conduct of Life, particularly in our Education, commonly the most suited to recommend it; but often with Circumstances apt to prejudice us against such Instruction.

C H A P.  
III.  

One might go on to add, that there is a great Resemblance between the Light of Nature and of Revelation, in several other Respects. Practical Christianity, or That Faith and Behaviour which renders a Man a Christian, is a plain and obvious thing; like the common Rules of Conduct with Respect to our ordinary temporal Affairs. The more distinct and particular Knowledge of those things, the Study of which, the Apostle calls, *going on unto Perfection*,<sup>f</sup> and of the prophetick Parts of Revelation, like many Parts of natural and even civil Knowledge; may require very exact Thought, and careful Consideration. The Hindrances too, of natural, and of supernatural Light and Knowledge, have been of the same Kind. And as, it is owned, the whole Scheme of Scripture is not yet understood, so, if it ever comes to be understood, before the *Restitution of all things*,<sup>g</sup> and without miraculous Interpositions; it must be in the same Way as natural Knowledge is come at: by the Continuance and Progress of Learning and of Liberty; and by particular Persons attending to, comparing and pursuing, Intimations scattered up and down it, which are overlooked and disregarded by the Generality of the World. For, this is the Way, in which, all Improvements are made; by thoughtful Mens tracing on obscure Hints, as it were, dropped us by Nature accidentally, or which seem to come into our Minds by Chance. Nor is it at all incredible, that a Book, which has been so long in the Possession of Mankind, should contain many Truths as yet undiscovered. For, all the same Phenomena, and the same Faculties of Investigation, from which, such great Discoveries in natural Know-

<sup>f</sup> Heb. vi. 1.

<sup>g</sup> Acts iii. 21.

P A R T II. ledge, have been made in the present and last Age, were equally in the Possession of Mankind, several thousand Years before. And possibly it might be intended, that Events, as they come to pass, should open and ascertain the Meaning of several Parts of Scripture.

It may be objected, that this Analogy fails in a material Respect; for, that natural Knowledge is of a little or no Consequence. But I have been speaking of the general Instruction, which Nature does or does not afford us. And besides, some Parts of natural Knowledge, in the more common restrained Sense of the Words, are of the greatest Consequence to the Ease and Convenience of Life. But suppose the Analogy did, as it does not, fail in this Respect; yet it might be abundantly supplied, from the whole Constitution and Course of Nature: which shews, that God does not dispense his Gifts, according to our Notions of the Advantage and Consequence they would be of to us. And This in general, with his Method of dispensing Knowledge in particular, would together make out an Analogy full to the Point before us.

But it may be objected still farther and more generally; “ The  
 “ Scripture represents the World as in a State of Ruin, and  
 “ Christianity as an Expedient to recover it, to help in these Re-  
 “ spects where Nature fails; in particular, to supply the Defici-  
 “ encies of natural Light. Is it credible then, that so many  
 “ Ages should have been let pass, before a matter of such a  
 “ Sort, of so great and so general Importance, was made known  
 “ to Mankind; and then, that it should be made known to so small  
 “ a Part of them? Is it conceivable, that this Supply should be  
 “ so very deficient, should have the like Obscurity and Doubt-  
 “ fulness, be liable to the like Perversions, in short, lie open  
 “ to

“ to all the like Objections, as the Light of Nature itself?”<sup>s</sup> C H A P.  
Without determining how far this in Fact is so, I answer; It is III.  
by no Means incredible, that it might be so, if the Light of Nature and of Revelation, be from the same hand. Men are naturally liable to Diseases, for which God, in his good Providence, has provided natural Remedies.<sup>h</sup> But Remedies existing in Nature, have been unknown to Mankind for many Ages; are known but to few now; probably many valuable ones are not known yet. Great has been and is the Obscurity and Difficulty, in the Nature and Application of them. Circumstances seem often to make them very improper, where they are absolutely necessary. It is, after long Labour and Study and many unsuccessful Endeavours, that they are brought to be as useful, as they are; after high Contempt and absolute Rejection of the most useful we have; and after Disputes and Doubts, which have seemed to be endless. The best Remedies too, when unskilfully, much more if dishonestly, applied, may produce new Diseases: what will be the Success of them, is often doubtful: for many Diseases, these Remedies are not effectual: where they are, it is often very slowly: and the Application of them, and the necessary Regimen accompanying it, is, not uncommonly, so disagreeable, that some will not submit to them; and satisfy themselves with the Excuse, that if they would, it is not certain, whether it would be successful. And many Persons, who labour under Diseases, for which there are known natural Remedies, are not so happy as to be always, if ever, in the Way of them. In a Word, these Remedies which Nature has provided for Diseases, are neither certain, perfect, nor universal. And indeed the same Principles of arguing, which would lead us to conclude, that they must be so, would lead us likewise to conclude, that there could be no Occasion for them, *i. e.* that there could be no Diseases at all.

<sup>s</sup> Ch. vi.

<sup>h</sup> See Ch. v.

PART II. And therefore, our Experience that there are Diseases, shews, that it is credible beforehand, upon Supposition Nature has provided Remedies for them, that these Remedies may be, as by Experience we find they are, not certain, nor perfect, nor universal; because it shews, that the Principles upon which we should expect the contrary, are fallacious.

And now, what is the just Consequence from all these things? Not that Reason is no Judge of what is offered to us as being of divine Revelation. For, this would be to infer, that we are unable to judge of any thing, because we are unable to judge of all things. Reason can, and it ought to judge, not only of the Meaning, but also of the Morality and the Evidence, of Revelation. It is the Province of Reason, first, to judge of the Morality of the Scripture; *i. e.* not whether it contains things different from what we should have expected, from a wise, just and good Being; for Objections from hence have been now obviated: but whether it contains things plainly contradictory to Wisdom, Justice or Goodness; to what the Light of Nature teaches us of God. And I know nothing of this Sort objected against Scripture, unless in such Objections as are formed upon Supposition, that the Constitution of Nature is contradictory to Wisdom, Justice or Goodness; which most certainly it is not. Indeed there are some particular Precepts in Scripture, given to particular Persons, requiring Actions, which would be immoral and vicious, were it not for such Precepts. But it is easy to see, that all these are of such a Kind, as that the Precept changes the whole Nature of the Case and of the Action; and both constitutes, and shews, That not to be unjust or immoral, which, prior to the Precept, must have appeared and really have been so: which may well be, since none of these Precepts are contrary to immutable Morality. If it were commanded, to cultivate the Principles, and act from the Spirit, of Treachery, Ingratitude,

itude, Cruelty; the Command would not alter the Nature of the Case or of the Action, in any of these Instances. But it is quite otherwise in Precepts, which require only the doing an external Action; for Instance, taking away the Property or Life of any. For, Men have no Right to either, but what arises solely from the Grant of God: When this Grant is revoked, they cease to have any Right at all, in either: And when this Revocation is made known, as surely it is possible it may be, it must cease to be unjust to deprive them of either. And though a Course of external Acts, which, without Command, would be immoral, must make an immoral Habit; yet, a few detached Commands have no such natural Tendency. I thought proper to say thus much, of the few Scripture Precepts requiring, not vicious Actions, but Actions which would have been vicious but for such Precepts; because they are sometimes weakly urged as immoral, and great Weight is laid upon Objections drawn from them. But to me, there seems no Difficulty at all in these Precepts, but what arises from their being Offences, *i. e.* from their being liable to be perverted, as indeed they are; to serve the most horrid Purposes, by wicked designing Men; and, perhaps, to mislead the weak and enthusiastick. And Objections from this Head, are not Objections against Revelation; but against the whole Notion of Religion, as a Trial, and against the general Constitution of Nature. Reason, in the next Place, is able, and must judge, of the Evidence of Revelation, and of the Objections urged against That Evidence; which shall be the Subject of a following Chapter.<sup>1</sup>

But the Consequence of the foregoing Observations, is, that the Question, upon which the Truth of Christianity depends, is scarce at all, what Objections there are against its Scheme, since there are none against the Morality of it; but *what Objections*

<sup>1</sup> Ch vii

PART  
II.

*there are against its Evidence: or, what Proof there remains of it, after due Allowances made for the Objections against That Proof: Because it has been shewn, that the Objections against Christianity, as distinguished from Objections against its Evidence, are frivolous. For surely very little Weight, if any at all, is to be laid upon a way of arguing and objecting, which, when applied to the general Constitution of Nature, Experience shews not to be conclusive; and such, I think, is the Whole way of objecting treated of throughout this Chapter. It is resolveable into Principles, and goes upon Suppositions, which mislead us to think, that the Author of Nature would not act, as we experience He does; or would act, in such and such Cases, as we experience He does not, in like Cases. But the Unreasonableness of this Way of objecting, will appear yet more evidently from hence, that the chief things thus objected against, are justified, as shall be farther shewn,<sup>k</sup> by distinct, particular, and full Analogies, in the Constitution and Course of Nature.*

But it is to be remembred, that, as frivolous as Objections of the foregoing Sort against Revelation, are, yet, when a supposed Revelation, is more consistent with itself, and has a more general and uniform Tendency to promote Virtue, than, all Circumstances considered, could have been expected from Enthusiasm and political Views; this is a presumptive Proof of its not proceeding from Them, and so of its Truth: because we are competent Judges, what might have been expected from Enthusiasm and political Views.

<sup>k</sup> Ch. v. vi. and the latter Part of the iv<sup>th</sup> Chapter.

## C H A P. IV.

*Of Christianity, considered as a Scheme or Constitution, imperfectly comprehended.*

**T**HE Analogy of Nature, as hath been now shewn,<sup>a</sup> renders it highly credible beforehand, that a Revelation supposed to be true, must contain many things very different from what we should have expected, and such as appear open to great Objections: And that this Observation, in good measure, takes off the Force of those Objections afterwards, or rather ought to preclude them. But it may be alledged, that this is a very partial Answer to such Objections, or a very unsatisfactory Way of obviating them; as not at all shewing, that the Things objected against, can be wise just and good, much less, that it is credible they are so. It will therefore be proper to shew this distinctly; by applying to these Objections against the Wisdom Justice and Goodness of Christianity, the Answer above<sup>b</sup> given to the like Objections against the Constitution of Nature: before we consider the particular Analogies in the latter, to the particular things objected against, in the former. Now that which affords a sufficient Answer, to Objections against the Wisdom Justice and Goodness of the Constitution of Nature, is its being a Constitution, a System or Scheme; imperfectly comprehended; a Scheme in which Means are made use of to accomplish Ends; and which is carried on by general Laws. For from these things, it has been proved, not only to

<sup>a</sup> in the foregoing Chapter.<sup>b</sup> Part II. Ch. vii: To which This all along refers.

PART

II.

be possible, but also to be credible, that what is objected against, may be consistent with Wisdom Justice and Goodness, may be Instances of them; and even that the Constitution and Government of Nature, may be perfect in the highest possible Degree. If Christianity then be a Scheme, and of the like Kind, it is evident, the like Objections against it, must admit of the like Answer. And

I. Christianity is a Scheme, quite beyond our Comprehension. The moral Government of God is exercised, by gradually conducting things so in the Course of his Providence, that every one, at length and upon the whole, shall receive according to his Deserts; and neither Fraud nor Violence, but Truth and Right, shall finally prevail. Christianity is a particular Scheme under this general Plan of Providence, and a Part of it, conducive to its Completion, with regard to Mankind: consisting itself also of various Parts, and a mysterious Oeconomy, which has been carrying on from the Time the World came into its present wretched State, and is still carrying on, for its Recovery, by a divine Person, the Messiah; who is to *gather together in one, the children of God, that are scattered abroad,*<sup>c</sup> and establish *an everlasting Kingdom, wherein dwelleth Righteousness.*<sup>d</sup> And in order to it; after various Manifestations of things, relating to this great and general Scheme of Providence, through a Succession of many Ages: (*For the Spirit of Christ which was in the Prophets, testified beforehand his sufferings, and the glory that should follow. Unto whom it was revealed, that not unto themselves, but unto us they did minister the things which are now reported unto us by them that have preached the Gospel; which things the Angels desire to look into:*<sup>e</sup>)—after various Dispensations, looking forward, and preparatory, to this final

<sup>a</sup> Joh. xi. 52.

<sup>d</sup> 2 Pet. iii. 13.

<sup>e</sup> 1 Pet. i. 11, 12.

Salvation: *in the fullness of time*, when infinite Wisdom thought fit; He, *being in the form of God*,—made himself of no reputation, and took upon him the form of a Servant, and was made in the likeness of men: And being found in fashion as a man, he humbled himself, and became obedient to death, even the death of the cross: Wherefore God also hath highly exalted him, and given him a name which is above every name: That at the name of Jesus every knee should bow, of things in heaven, and things in the earth, and things under the earth; And that every tongue should confess, that Jesus Christ is Lord, to the glory of God the Father.<sup>f</sup> Parts likewise of this Oeconomy, are the miraculous Mission of the Holy Ghost, and the ordinary Assurances of it given to good Men; the invisible Government, which Christ at present exercises over his Church; That which he himself refers to in these words, *In my Fathers house are many Mansions*—*I go to prepare a place for you*; and his future Return to judge the World in Righteousness, and compleatly re-establish the Kingdom of God. For the Father judgeth no Man; but hath committed all judgment unto the Son: That all Men should honour the Son, even as they honour the Father.<sup>h</sup> All power is given unto him in heaven and in earth.<sup>i</sup> And he must reign, till he hath put all enemies under his feet. Then cometh the end, when he shall have delivered up the kingdom to God, even the Father; when he shall have put down all rule, and all authority and power. And when all things shall be subdued unto him, then shall the Son also himself be subject unto him that put all things under him, that God may be all in all.<sup>k</sup> Now little, surely, need be said to shew, that this System or Scheme of things, is but imperfectly comprehended by us. The Scripture expressly asserts it to be so. And indeed one cannot read a Passage relating to this great Mystery of Godliness,<sup>l</sup> but what immediately runs up into something

<sup>f</sup> Phil. ii.

<sup>g</sup> Joh. xiv. 2.

<sup>h</sup> Joh. v. 22, 23.

<sup>i</sup> Matth. xxviii. 18.

<sup>k</sup> 1 Cor. xv.

<sup>l</sup> 1 Tim. iii. 16.

P A R T II. which shews us our Ignorance in it; as every thing in Nature, shews us our Ignorance in the Constitution of Nature. And whoever will seriously consider That Part of the Christian Scheme, which is revealed in Scripture, will find so much more unrevealed, as will convince him, that, to all the Purposes of judging and objecting, we know as little of it, as of the Constitution of Nature. Our Ignorance, therefore, is as much an Answer to our Objections against the Perfection of one, as against the Perfection of the other.<sup>m</sup>

II. It is obvious too, that in the Christian Dispensation, as much as in the natural Scheme of things, Means are made use of to accomplish Ends. And the Observation of this, furnishes us with the same Answer, to Objections against the Perfection of Christianity, as to Objections, of the like Kind, against the Constitution of Nature. It shews the Credibility, that the things objected against, how *foolish*<sup>n</sup> soever they appear to Men, may be the very best Means of accomplishing the very best Ends: And that their appearing *Foolishness* is no Presumption against this, in a Scheme so greatly beyond our Comprehension.<sup>o</sup> But,

III. The Credibility, that the christian Dispensation may have been, all along, carried on by general Laws,<sup>p</sup> no less than the Course of Nature, may require to be more distinctly made out. Consider then, upon what Ground it is we say, that the whole common Course of Nature is carried on according to general foreordained Laws. We know indeed several of the general Laws of Matter; and a great Part of the natural Behaviour of living Agents, is reducible to general Laws. But we know in a manner nothing, by what Laws, Storms and Tempests, Earthquakes, Famine, Pestilence, become the Instruments of

<sup>m</sup> p. 122, &c.<sup>n</sup> 1 Cor. i.<sup>o</sup> p. 126.<sup>p</sup> p. 128.

Destruction

Deſtruction to Mankind. And the Laws, by which, Perſons born into the World at ſuch a Time and Place, are of ſuch Capacities, Genius's, Temper; the Laws, by which, Thoughts come into our Mind, in a multitude of Caſes; and innumerable things happen, upon which, the Affairs and the State of the World, depend; theſe Laws are ſo wholly unknown to us, that we call the Events which come to paſs by them, accidental: though all reaſonable Men know certainly, that there cannot, in Reality, be any ſuch thing as Chance; and conclude, that the things which have this Appearance, are the Reſult of general Laws, and are reſolveable into them. It is then, but an exceeding little Way, and in but a very few Reſpects, that we can trace up the natural Courſe of things before us, to general Laws. And it is only from Analogy, that we conclude, the Whole of it to be capable of being reduced into them; only from our ſeeing, that Part is ſo. It is from our finding, that the Courſe of Nature in ſome Reſpects and ſo far, goes on by general Laws, that we conclude this of the Whole. And if That be a juſt Ground for ſuch a Concluſion, it is a juſt Ground alſo, if not to conclude, yet to apprehend, to render it ſuppoſeable and credible, which is ſufficient for answering Objections, that God's miraculous Interpoſitions may have been, all along in like manner, by *general* Laws of Wiſdom. Thus, that miraculous Powers ſhould be exerted, at ſuch Times, upon ſuch Occaſions, in ſuch Degrees and Manners, and with regard to ſuch Perſons, rather than Others; that the Affairs of the World, being permitted to go on in their natural Courſe ſo far, ſhould, juſt at ſuch a Point, have a new Direction given them by miraculous Interpoſitions; that theſe Interpoſitions ſhould be exactly in ſuch Degrees and Reſpects only; all this may have been by general Laws: Unknown indeed to us: but no more unknown, than the Laws from whence it is, that Some die as ſoon as they are born, and Others live to extream Old-age; that One Man is ſo ſuperior

PART to Another in Understanding; with innumerable more things: which, as was before observed, we cannot reduce to any Laws or Rules at all, though it is taken for granted, they are as much reduceable to general ones, as Gravitation. Now, if the revealed Dispensations of Providence, and miraculous Interpositions, be by general Laws, as well as God's ordinary Government in the Course of Nature, made known by Reason and Experience; there is no more Reason to expect, that every Exigence, as it arises, should be provided for by these general Laws of miraculous Interpositions, than that every Exigence in Nature should, by the general Laws of Nature. Yet there might be wise and good Reasons, that miraculous Interpositions should be by general Laws; and that these Laws should not be broken in upon, or deviated from, by other Miracles.

Upon the whole then; The Appearance of Deficiencies and Irregularities in Nature, is owing to its being a Scheme, but in part made known, and of such a certain particular Kind in other Respects. Now we see no more Reason, why the Frame and Course of Nature should be such a Scheme, than why Christianity should. And that the former is such a Scheme, renders it credible, that the latter, upon Supposition of its Truth, may be so too. And as it is manifest, that Christianity is a Scheme, revealed but in part, and a Scheme in which, Means are made use of to accomplish Ends; like to That of Nature: So the Credibility, that it may have been all along carried on by general Laws, no less than the Course of Nature, has been distinctly proved. And from all this, it is beforehand, credible that there might, I think probable that there would, be the like Appearance of Deficiencies and Irregularities in Christianity, as in Nature; *i. e.* that Christianity would be liable to the like Objections, as the Frame of Nature. And these Objections are answered,

answered, by the Observation of those things in Christianity; CHAP.  
as the like Objections against the Frame of Nature, are answer- IV.  
ed, by the like Observations concerning the Frame of Nature. 

THE Objections against Christianity, considered as a Matter of Fact,<sup>a</sup> having, in general, been obviated in the preceding Chapter; and the same, considered as made against the Wisdom and Goodness of it, having been obviated in this: the next thing, according to the Method proposed, is to shew, that the principal Objections, in particular, against Christianity, may be answered, by particular and full Analogies in Nature. And as one of them is made against the whole Scheme of it together, as just now described, I chuse to consider it here, rather than in a distinct Chapter by itself. The thing objected against this Scheme of the Gospel, is, “ that it seems to suppose, “ God was reduced to the Necessity of a long Series of intricate “ Means, in order to accomplish his Ends; the Recovery and “ Salvation of the World: In like Sort as Men, for Want of “ Understanding or Power, not being able to come at their Ends “ directly, are forced to go round-about Ways, and make use “ of many perplex Contrivances to arrive at them.” Now every thing which we see, shews the Folly of This, considered as an Objection against the Truth of Christianity. For, according to our Manner of Conception, God makes Use of Variety of Means, what we often think tedious ones, in the natural Course of Providence, for the Accomplishment of all his Ends. Indeed it is certain, there is somewhat in this Matter quite beyond our Comprehension: But the Mystery is as great in Nature, as in Christianity. We know what we ourselves aim at, as final Ends; and what Courses we take, merely as Means conducing to those Ends. But we are greatly ignorant, how far things are

<sup>a</sup> p. 121.

P A R T

II.

considered by the Author of Nature, under the single Notion of Means and Ends; so as that it may be said, This is merely an End, and That merely Means, in His Regard. And whether there be not, some peculiar Absurdity in our very Manner of Conception, concerning this Matter; somewhat contradictory arising from our extremely imperfect Views of things; it is impossible to say. However, thus much is manifest, that the whole natural World and Government of it, is a Scheme or System, not a fixt but a progressive one; a Scheme in which, the Operation of various Means takes up a great Length of Time, before the Ends they tend to, can be attained. The Change of Seasons, the Ripening the Fruits of the Earth, the very History of a Flower, is an Instance of this: And so is human Life. Thus vegetable Bodies, and those of Animals, though possibly formed at once, yet grow up, by Degrees, to a mature State. And thus rational Agents, who animate these latter Bodies, are naturally directed to form, each his own Manners and Character, by the gradual gaining of Knowledge and Experience, and by a long Course of Action. Our Existence is not only successive, as it must be of Necessity; but one State of our Life and Being, is appointed by God, to be a Preparation for Another, and That the Means of attaining to another succeeding one: Infancy to Childhood; Childhood to Youth; Youth to mature Age. Men are impatient and for precipitating things: but the Author of Nature appears deliberate throughout his Operations; accomplishing his natural Ends, by slow successive Steps. And there is a Plan of things beforehand laid out, which, from the Nature of it, requires various Systems of Means, as well as Length of Time, in order to the carrying on its several Parts into Execution. Thus, in the daily Course of natural Providence, God operates in the very same Manner, as in the Dispensation

*imperfectly comprehended.*

193

of Christianity ; making one thing subservient to another, C H A P.  
This to somewhat farther, and so on through a progressive Se- IV.  
ries of Means, which extend, both backward and forward, be-  
yond our utmost View. Of this Manner of Operation, every  
thing which we see in the Course of Nature, is as much an  
Instance, as any Part of the christian Dispensation.

C H A P.

---

## C H A P. V.

*Of the particular System of Christianity;  
the Appointment of a Mediator, and the  
Redemption of the World by him.*

P A R T  
II.  THERE is not, I think, any thing relating to Christianity, which has been more objected against, than the Mediation of Christ, in some or other of its Parts. Yet, upon thorough Consideration, there seems nothing less justly liable to it. For, --

I. The whole Analogy of Nature removes all imagined Pre-  
sumption against the general Notion of *a Mediator between God  
and Man.*<sup>a</sup> For, we find all living Creatures are brought into  
the World, and their Life in Infancy is preserved, by the In-  
strumentality of Others: And every Satisfaction of it, some  
way or other, is bestowed by the like Means. So that the visible  
Government which God exercises over the World, is by the In-  
strumentality and Mediation of Others. And how far his in-  
visible Government be or be not so, it is impossible to deter-  
mine at all by Reason. And the Supposition, that Part of it is  
so, appears, to say the least, altogether as credible, as the con-  
trary. There is then no Sort of Objection, from the Light of  
Nature, against the general Notion of a Mediator between God  
and Man, considered as a Doctrine of Christianity, or as an Ap-  
pointment in this Dispensation: since we find by Experience,  
that God does appoint Mediators to be the Instruments of Good

<sup>a</sup> 1 Tim. ii. 5.

and Evil to us; the Instruments of his Justice and his Mercy. C H A P.  
And the Objection here referred to, is not urged, against Media- V.  
tion in That high eminent and peculiar Sense, in which Christ   
is our Mediator; but absolutely against the whole Notion itself  
of a Mediator at all.

II. As it is supposed, so it is here to be distinctly mentioned, that the World is under the proper moral Government of God, or in a State of Religion, before we can enter into Consideration of the revealed Doctrine, concerning the Redemption of it by Christ. Now the divine moral Government which Religion teaches us, implies, that the Consequence of Vice shall be Misery, in some future State, by the righteous Judgment of God. That such consequent Punishment shall take Effect by His Appointment, is necessarily implied. But, as it is not in any sort to be supposed, that we are made acquainted with all the Ends or Reasons, for which it is fit future Punishments should be inflicted, or why God has appointed, such and such consequent Misery should follow Vice; and as we are altogether in the dark, how or in what Manner, it shall follow, by what immediate Occasions, or by the Instrumentality of what Means; there is no Absurdity in supposing, it may follow in a Way analogous to That, in which many Miseries follow such and such Courses of Action at present, Poverty, Sickness, Infamy, untimely Death by Diseases, Death from the Hands of civil Justice. There is no Absurdity in supposing, future Punishment may follow Wickedness, of Course, as we speak, or in the Way of natural Consequence; from God's original Constitution of the World; from the Nature He has given us, and from the Condition in which He places us: Or in a like Manner, as a Person rashly trifling upon a Precipice, in the way of natural

PART Consequence, falls down; in the way of natural Consequence,  
 II. breaks his Limbs, suppose; in the way of natural Consequence  
 of this, without Help, perishes.

Some good Men may perhaps be offended, with hearing it spoken of as a supposeable thing, that the future Punishments of Wickedness, may be in the way of natural Consequence; as if this were taking the Execution of Justice out of the Hands of God, and giving it to Nature. But they should remember, that when things come to pass according to the Course of Nature, this does not hinder them from being His Doing, who is the God of Nature: And that the Scripture ascribes those Punishments to divine Justice, which are known to be natural; and which must be called so, when distinguished from God's Working in a miraculous Manner. But after all, this Supposition, or rather this way of speaking, is here made use of only by way of Illustration of the Subject before us. For, since it must be admitted, that the future Punishment of Wickedness, is not a Matter of arbitrary Appointment, but of Reason Equity and Justice; it comes, for ought I see, to the same thing, whether it is supposed to be inflicted in a Way analogous to That, in which the temporal Punishments of Vice and Folly, are inflicted, or in any other Way. And were there any Difference, it is just, in the present Case, to make this Supposition, plainly not an incredible one; that the future Punishment may follow Wickedness, in the way of natural Consequence, or according to some general Laws of Government already established in the Universe.

III. Upon this Supposition, or even without it, we may observe somewhat, much to the present Purpose, in the Constitution of Nature or Appointments of Providence; the Provision which is made, that all the bad natural Consequences of Mens  
 Actions,

Actions, should not always actually follow: or that such bad Consequences, as, according to the settled Course of things, would inevitably have followed if not prevented, should, in certain Degrees, be prevented. We are apt presumptuously to imagine, that the World might have been so constituted, as that there would not have been any such thing as Misery or Evil. On the contrary we find the Author of Nature permits it: But then he has provided Reliefs, and, in many Cases, perfect Remedies for it, after some Pains and Difficulties; Reliefs and Remedies even for That Evil, which is the Fruit of our own Misconduct, and which, in the Course of Nature, would have continued, and ended in our Destruction, but for such Remedies. And this is an Instance both of Severity and of Indulgence, in the Constitution of Nature. Thus all the bad Consequences, now mentioned, of a Man's trifling upon a Precipice, might be prevented. And though all were not, yet some of them might, by proper Interposition, if not rejected; by Another's coming to the rash Man's Relief, with his own laying hold on that Relief, in such Sort as the Case required. Persons may do a great deal themselves towards preventing the bad Consequences of their Follies; and more may be done by themselves, together with the Assistance of others their Fellow creatures: which Assistance Nature requires and prompts us to. This is the general Constitution of the World. Now suppose it had been so constituted, that after such Actions were done, as were foreseen naturally to draw after them Misery to the Doer, it should have been no more in human Power to have prevented That naturally consequent Misery, in any Instance, than it is, in all; no one can say, whether such a more severe Constitution of things, might not yet have been really good. But, that on the contrary, Provision is made by Nature, that we may and do, to so great Degree, prevent the bad natural Effects of our Follies; this may be called Mercy or Compassion in the original Constitution

C H A P.  
V.  

PART II. Constitution of the World: Compassion, as distinguished from Goodness in general. And, the whole known Constitution and Course of things affording us Instances of such Compassion, it would be according to the Analogy of Nature, to hope, that, however ruinous the natural Consequences of Vice might be, from the general Laws of God's Government over the Universe; yet Provision might be made, possibly might have been originally made, for preventing those ruinous Consequences from inevitably following: at least from following universally and in all Cases.

Many, I am sensible, will wonder at finding this made a Question, or spoken of as in any Degree doubtful. The Generality of Mankind are so far from having that awful Sense of things, which the present State of Vice and Misery and Darkness, seems to make but reasonable, that they have scarce any Apprehension or Thought at all about this Matter, any way: and some serious Persons may have spoken unadvisedly concerning it. But let us observe, what we experience to be, and what, from the very Constitution of Nature, cannot but be, the Consequences of irregular and disorderly Behaviour; even of such Rashness, Wilfulness, Neglects, as we scarce call vicious. Now it is natural to apprehend, that the bad Consequences of Irregularity will be greater, in Proportion as the Irregularity is so. And there is no Comparison between these Irregularities, and the greater Instances of Vice, or a dissolute profligate Disregard to all Religion; if there be any thing at all in Religion. For consider what it is for Creatures, moral Agents, presumptuously to introduce that Confusion and Misery into the Kingdom of God, which Mankind have in Fact introduced; to blaspheme the Sovereign Lord of all; to contemn his Authority; to be injurious, to the Degree they are, to their Fellow-Creatures, the Creatures of God. Add that the Effects of Vice in the present  
World,

World, are often extream Misery, irremediable Ruin, and even Death. And upon putting all this together, it will appear, that as no one can say, in what Degree fatal, the unprevented Consequences of Vice may be, according to the general Rule of divine Government; so it is by no means intuitively certain, how far these Consequences could, possibly in the Nature of the thing, be prevented, consistently, with the eternal Rule of Right, or with what is, in Fact, the moral Constitution of Nature. However, there would be large Ground to hope, that the universal Government was not so severely strict, but that there was room for Pardon, or for having those penal Consequences prevented. Yet,

C H A P.

V.

IV. There seems no Probability, that any thing we could do, would alone and of itself prevent them; prevent their following or being inflicted. But one would think, at least, it were impossible, that the contrary should be thought certain. For we are not acquainted with the whole of the Case. We are not informed of all the Reasons, which render it fit that future Punishments should be inflicted; and therefore cannot know, whether any thing we could do, would make such an Alteration, as to render it fit that they should be remitted. We do not know, what the whole natural or appointed Consequences of Vice, are, nor in what Way they would follow, if not prevented; and therefore can in no Sort say, whether we could do any thing, which would be sufficient to prevent them. Our Ignorance being thus manifest, let us recollect the Analogy of Nature or Providence. For, though this may be but a slight Ground to raise a positive Opinion upon, in this Matter, yet it is sufficient to answer a mere arbitrary Assertion without any kind of Evidence, urged by way of Objection against a Doctrine, the Proof of which is not Reason but Revelation. Consider then: People ruin their Fortunes by Extravagance; they bring Diseases upon

PART II. upon themselves by Excess; they incur the Penalties of civil Laws, and surely civil Government is natural: Will Sorrow for these Follies past, and behaving well for the future, alone and of itself, prevent the natural Consequences of them? On the contrary, Mens natural Abilities of helping themselves are often impaired: Or if not, yet they are forced to be beholden to the Assistance of Others, upon several Accounts, and in different Ways; Assistance which they would have had no Occasion for, had it not been for their Misconduct, but which, in the disadvantageous Condition they have reduced themselves to, is absolutely necessary to their Recovery, and Retrieving their Affairs. Now since this is our Case, considering ourselves merely as Inhabitants of this World, and as having a temporal Interest in it under the natural Government of God, which however has a great deal moral in it; Why is it not supposeable, that this may be our Case also, in our more important Capacity, as under His perfect moral Government, and having a more general and future Interest depending? If we have misbehaved in this higher Capacity, and rendered ourselves obnoxious to the future Punishment, which God has annex to Vice; it is plainly credible, that behaving well for the Time to come, may be——not usefess; God forbid——but wholly insufficient, alone and of itself, to prevent that Punishment, or put us in the Condition, which we should have been in, had we preserved our Innocence.

And though we ought to reason with all Reverence, whenever we reason concerning the divine Conduct; yet it may be added, that it is clearly contrary to all our Notions of Government, as well as to what is, in Fact, the general Constitution of Nature, to suppose that Doing well for the future, should, in all Cases, prevent all the judicial bad Consequences of having done Evil, or all the Punishment annex to Disobedience: And

we

we have manifestly nothing from whence to determine, in what Degree and in what Cases, Reformation would prevent this Punishment, even supposing that it would in some. And though the Efficacy of Repentance itself alone, to prevent what Mankind had rendred themselves obnoxious to, and recover what they had forfeited, is now insisted upon, in Opposition to Christianity; yet, by the general Prevalence of propitiatory Sacrifices over the heathen World, this Notion, of Repentance alone being sufficient to expiate Guilt, appears to be contrary to the general Sense of Mankind.

C H A P.  
V.  

Upon the whole then, had the Laws, the general Laws of God's Government been permitted to operate, without any Interposition in our Behalf, the future Punishment, for ought we know to the contrary, or have any Reason to think, must inevitably have followed, notwithstanding any thing we could have done to prevent it. Now,

V. In this Darknes, or this Light of Nature, call it which you please, Revelation comes in; confirms every doubting Fear, which could enter into the Heart of Man, concerning the future unprevented Consequence of Wickedness; supposes the World to be in a State of Ruin, a Supposition which seems the very Ground of the Christian Dispensation, and which, if not proveable by Reason, yet is in no wise contrary to it; teaches us too, that the Rules of divine Government are such, as not to admit of Pardon, immediately and directly upon Repentance, or by the sole Efficacy of it: But then teaches at the same Time, what Nature might justly have hoped, that the moral Government of the Universe was not so rigid, but that there was Room for an Interposition, to avert the fatal Consequences of Vice; that, by this Means, it did admit of Pardon. Revelation teaches us, that the unknown Laws of God's more general

P A R T

II.

Government, no less than the particular Laws by which, we experience he governs us at present, are compassionate,<sup>b</sup> as well as good in the more general Notion of Goodness: And that he had mercifully provided, that there should be an Interposition to prevent the Destruction of human Kind; whatever that Destruction unprevented would have been. *God so loved the World, that he gave his only begotten Son, that whosoever believeth, not, to be sure, in a speculative, but in a practical Sense, that whosoever believeth in him, should not perish.*<sup>c</sup> In the same way of Goodness, as he affords Men the friendly Assistance of their Fellow-Creatures, when, without it, their temporal Ruin would be the certain Consequence of their Follies; in the same way of Goodness, though in a transcendent and infinitely higher Degree. And the Son of God *loved us and gave himself for us*, with a Love, which he himself compares to That of human Friendship; though in this Case, all Comparisons must fall infinitely short of the thing intended to be illustrated by them. He interposed in such a Manner, as was necessary and effectual to prevent that Execution of Justice upon Sinners, which God had appointed should otherwise have been executed upon them: Or in such a Manner, as to prevent That Punishment from actually following, which, according to the general Laws of divine Government, must have followed the Sins of the World, had it not been for such Interposition.<sup>d</sup>

If

<sup>b</sup> p. 197.<sup>c</sup> Joh. iii. 16.

<sup>d</sup> It cannot, I suppose, be imagined, even by the most cursory Reader, that it is, in any Sort, affirmed or implied in any thing said in this Chapter, that none can have the Benefit of the general Redemption, but such as have the Advantage of being made acquainted with it, in the present Life. But it may be needful to mention, that several Questions, which have been brought into the Subject before us, and determined, are not in the least entered into here: Questions which have been, I fear, rashly determined, and perhaps with equal Rashness contrary Ways. For Instance, Whether God could have saved the World by other Means than the Death of Christ, consistently with the general Laws of his Government. And had not Christ come into the World, What would have been the future Condition of the better Sort of Men; those just Persons over the Face

of

If any thing here said, should appear, upon first Thought, inconsistent with divine Goodness; a second, I am persuaded, will intirely remove that Appearance. For were we to suppose, the Constitution of things to be such, as that the whole Creation must have perished, had it not been for somewhat, which God had appointed should be, in order to prevent that Ruin; even this Supposition would not be inconsistent, in any Degree, with the most absolutely perfect Goodness. But still it may be thought, that this whole Manner of treating the Subject before us, supposes Mankind to be naturally in a very strange State. And truly so it does. But it is not Christianity, which has put us into this State. Whoever will consider the manifold Miseries, and the extream Wickedness of the World: the Wrongnesses within themselves which the best complain of, and endeavour to amend; but that the Generality grow more profligate and corrupt with Age: that heathen Moralists thought the present State to be a State of Punishment: to all which might be added, that the Earth our Habitation has the Appearances of being a Ruin——whoever, I say, will consider all these, and some other obvious things, will think, he has little Reason to object against the Scripture Account, that Mankind is in a State of Degradation; against this being the Fact: how difficult soever he may think it to account for, or even to form a distinct Conception of the Occasions and Circumstances of it. And that the Crime of our first Parents, was the Occasion of our being placed in a more disadvantageous Condition, is a thing

of the Earth, for whom, *Manasses* in his Prayer asserts, Repentance was not appointed. The Meaning of the first of these Questions is greatly ambiguous. And neither of them can properly be answered, without going upon That infinitely absurd Supposition, that we know the whole of the Case. And perhaps the very Inquiry, *What would have followed if God had not done as he has*, may have in it, some very great Impropriety; and ought not to be carried on any farther, than is necessary to help our partial and inadequate Conceptions of things.

PART throughout and particularly analogous to what we see, in the  
 II. daily Course of natural Providence; as the Recovery of the  
 World by the Interposition of Christ, has been shewn to be so  
 in general.

VI. The particular Manner in which Christ interposed in the Redemption of the World, the Satisfaction or Atonement which he made for the Sins of it; Or his Office as *Mediator*, in the largest Sense, *between God and Man*, is thus represented to us in the Scripture. *He is the light of the world*;<sup>e</sup> the Revealer of the Will of God in the most eminent Sense. He is a propitiatory Sacrifice;<sup>f</sup> *the Lamb of God*:<sup>g</sup> and, as he voluntarily offered himself, he is stiled our High-priest.<sup>h</sup> And, which seems of peculiar Weight, he is described beforehand in the Old Testament, under the same Character, and as a Sacrifice to expiate Sin.<sup>i</sup> And whereas it is objected, that all this is merely by way of Allusion to the Sacrifices of the Mosaick Law, the Apostle on the contrary affirms, that the *Law was a shadow of good things to come, and not the very image of the things*:<sup>k</sup> and that *the Priests that offer gifts according to the law—serve unto the example and shadow of heavenly things, as Moses was admonished of God, when he was about to make the tabernacle. For see, saith he, that thou make all things according to the pattern shewed to thee in the mount.*<sup>l</sup> *i. e.* the levitical Priesthood was a shadow of the Priesthood of Christ, in like manner as the Tabernacle made by *Moses*, was according to That shewed him in the Mount. The Priesthood of Christ, and the Tabernacle in the Mount, were the Originals: of the former of which, the levitical Priesthood was a Type; and of the latter, the Tabernacle made by *Moses* was a Copy. The Doctrine of this Epistle then plainly is, that the

legal Sacrifices were Allusions to the great and final Atonement, to be made by the Blood of Christ, and not that This was an Allusion to Those. Nor can any thing be more express and determinate than the following Passage. *It is not possible that the blood of bulls and of goats should take away Sin. Wherefore when he cometh into the world, he saith, Sacrifice and offering, i. e. of bulls and of goats, thou wouldst not, but a body hast thou prepared me -- Lo I come to do thy will O God -- By which will we are sanctified, through the offering of the body of Jesus Christ once for all.*<sup>m</sup> And to add one Passage more of the like Kind: *Christ was once offered to bear the Sins of many; and unto them that look for him shall he appear the second time, without Sin; without Sin, i. e. without bearing Sin as he did at his first coming, by being an offering for it, without having our iniquities again laid upon him, without being any more a Sin-offering: -- unto them that look for him shall he appear the second time, without sin, unto salvation.*<sup>n</sup> Nor do the inspired Writers at all confine themselves to this Manner of speaking concerning the Satisfaction of Christ, but declare an Efficacy in what he did and suffered for us, additional to and beyond mere Instruction Example and Government, in great Variety of Expression: *That Jesus should die for that nation, the Jews: And not for that nation only, but that also, plainly by the Efficacy of his Death, he should gather together in one, the children of God, that were scattered abroad:*<sup>o</sup> *That he suffered for sins, the just for the unjust:*<sup>p</sup> *That he gave his life, himself, a ransom:*<sup>q</sup> *That we are bought, bought with a price:*<sup>r</sup> *That he redeemed us with his blood; redeemed us from the curse of the law being made a curse for us:*<sup>s</sup> *That he is our Advocate and Intercessor:* That

PART II. *he was made perfect, or consummate, through sufferings: and being thus made perfect, he became the author of salvation:*<sup>c</sup> *That God was in Christ reconciling the world to himself; not imputing their trespasses unto them:*<sup>u</sup> *And lastly, that through death he destroyed him that had the power of death.*<sup>w</sup> Christ having thus humbled himself, and become obedient to death, even the death of the cross. God also hath highly exalted him, and given him a name which is above every name: hath given all things into his hands: hath committed all judgment unto him; that all men should honour the Son, even as they honour the Father.<sup>x</sup> For, worthy is the Lamb that was slain, to receive power, and riches, and wisdom, and strength, and honour, and glory, and blessing. And every creature which is in heaven, and on the earth, heard I, saying, Blessing, and honour, and glory and power be—unto the Lamb for ever and ever.<sup>y</sup>

These Passages of Scripture seem to comprehend and express the chief Parts of Christ's Office, as Mediator between God and Man, so far, I mean, as the Nature of this his Office is revealed; and it is usually treated of by Divines under three Heads.

*First*, He was, by way of Eminence, The Prophet; *That Prophet that should come into the world,*<sup>z</sup> to declare the divine will. He published anew the Law of Nature, which Men had corrupted, and the very Knowledge of which, to some Degree, was lost among them. He taught Mankind; taught us authoritatively, to live soberly righteously and godly in this present World, in Expectation of the future Judgment of God. He confirmed the Truth of this moral System of Nature, and gave

<sup>c</sup> 1 Joh. ii. 1. Heb. vii. 25. & ii. 10. & v. 9. <sup>u</sup> 2 Cor. v. 19. Rom. v. 10. Eph. ii. 16. <sup>w</sup> Heb. ii. 14. See also a remarkable Passage in the Book of Job, ch. xxxiii. ver. 24. <sup>x</sup> Phil. ii. 8, 9. Joh. iii. 35. Ch. v. 22, 23. <sup>y</sup> Rev. v. 12, 13. <sup>z</sup> Joh. vi. 14.

us additional Evidence of it; the Evidence of Testimony.<sup>a</sup> He distinctly revealed, the Manner in which God would be worshipped, the Efficacy of Repentance, and the Rewards and Punishments of a future Life. Thus he was a Prophet in a Sense, in which no other ever was. To which is to be added, that he set us a perfect Example, that we should follow his Steps.

CHAPTER  
V.  

*Secondly*, He has a Kingdom, which is not of this World. He founded a Church to be to Mankind a standing Memorial of Religion, and Invitation to it; which he promised to be with always even to the End. He exercises an invisible Government over it, himself, and by his Spirit: Over that Part of it, which is militant here on Earth, a Government of Discipline, *for the perfecting of the saints, for the edifying his body: till we all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fullness of Christ.*<sup>a</sup> Of this Church, all Persons scattered over the World, who live in Obedience to his Laws, are Members. For these he is *gone to prepare a Place, and will come again to receive them unto himself, that where he is, there they may be also; and reign with him for ever and ever:*<sup>b</sup> and likewise *to take vengeance on them that know not God, and obey not his gospel.*<sup>c</sup>

Against these Parts of Christ's Office, I find no Objections, but what are fully obviated in the Beginning of this Chapter.

*Lastly*, Christ offered himself a propitiatory Sacrifice, and made Atonement for the Sins of the World: Which is mentioned last, in regard to what is objected against it. Sacrifices of Expiation were commanded the Jews, and obtained amongst most other Nations, from Tradition, whose Original probably

PART  
II.

was Revelation. And they were continually repeated, both occasionally, and at the Returns of stated Times; and made up great Part of the external Religion of Mankind. *But now once in the end of the world, Christ appeared to put away Sin by the Sacrifice of himself.*<sup>d</sup> And this Sacrifice was, in the highest Degree and with the most extensive Influence, of That Efficacy for obtaining Pardon of Sin, which the heathens may be supposed to have thought their Sacrifices to have been, and which the Jewish Sacrifices really were in some Degree, and with regard to some Persons.

How and in what particular Way it had this Efficacy, there are not wanting Persons who have endeavoured to explain; but I do not find that the Scripture has explained it. We seem to be very much in the dark, concerning the Manner in which the Ancients understood Atonement to be made, *i. e.* Pardon to be obtained, by Sacrifices. And if the Scripture has, as surely it has, left this Matter of the Satisfaction of Christ mysterious, left somewhat in it unrevealed, all Conjectures about it must be, if not evidently absurd, yet at least uncertain. Nor has any one Reason to complain for want of farther Information, unless he can shew his Claim to it.

Some having endeavoured to explain the Efficacy of what Christ has done and suffered for us, beyond what the Scripture has authorized; Others, probably because they could not explain it, have been for taking it away, and confining His Office as Redeemer of the World, to his Instruction Example and Government of the Church. Whereas the Doctrine of the Gospel appears to be; not only that He taught the Efficacy of Repentance, but rendred it of the Efficacy which it is, by what he did and suffered for us: That he obtained for us the Benefit

<sup>d</sup> Heb. ix. 26.

of having our Repentance accepted unto eternal Life: Not only that he revealed to Sinners, that they were in a Capacity of Salvation, and how they might obtain it; but moreover that he put them into this Capacity of Salvation, by what he did and suffered for them; put us into a Capacity of escaping future Punishment, and obtaining future Happiness. And it is our Wisdom thankfully to accept the Benefit, by performing the Conditions, upon which it is offered, on our Part, without disputing how it was procured, on His. For

VII. Since we neither know, by what Means Punishment in a future State, would have followed Wickedness in this; nor in what Manner it would have been inflicted, had it not been prevented; nor all the Reasons why its Infliction would have been needful; nor the particular Nature of that State of Happiness, which Christ is gone to prepare for his Disciples: And since we are ignorant how far any thing which we could do, would, alone and of itself, have been effectual to prevent that Punishment, to which we were obnoxious, and recover that Happiness, which we had forfeited; it is most evident we are not Judges, antecedently to Revelation, whether a Mediator was or was not necessary, to obtain those Ends: to prevent That future Punishment, and bring Mankind to the final Happiness of their Nature. And for the very same Reasons, upon Supposition of the Necessity of a Mediator, we are no more Judges, antecedently to Revelation, of the whole Nature of his Office, or the several Parts which it consists of; or what Parts were fit and requisite to be assigned him, in order to accomplish those general Ends of divine Providence in the Appointment. And from hence it follows, that to object against the Expediency or Usefulness of particular things, revealed to have been done or suffered by him, because we do not see how they were conducive to those Ends; is highly

PART II. absurd. Yet nothing is more common to be met with than this Absurdity. But if it be acknowledged beforehand, that we are not Judges in the Case, it is evident that no Objection can, with any Shadow of Reason, be urged against any particular Part of Christ's Office revealed in Scripture, till it can be shewn positively, not to be requisite or conducive to the Ends proposed to be accomplished; or that it is in itself unreasonable.

And there is one Objection made against the Satisfaction of Christ, which looks to be of this positive Kind; that the Doctrine of His being appointed to suffer for the Sins of the World, represents God as being indifferent whether he punished the innocent or the guilty. Now from the foregoing Observations we may see the extream Slightness of all such Objections; and, though it is most certain all who make them do not see the Consequence, that they conclude altogether as much, against God's whole original Constitution of Nature, and the whole daily Course of divine Providence in the Government of the World, *i. e.* against the whole Scheme of Theism and the whole Notion of Religion; as against Christianity. For the World is a Constitution or System, whose Parts have a mutual Reference to each other: and there is a Scheme of things gradually carrying on, called the Course of Nature, to the carrying on of which, God has appointed us, in various ways, to contribute. And when, in the daily Course of natural Providence, it is appointed that innocent People should suffer for the Faults of the guilty, this is liable to the very same Objection, as the Instance we are now considering. The infinitely greater Importance of that Appointment of Christianity which is objected against, does not hinder but it may be, as it plainly is, an Appointment of the very same Kind, with what the World affords us daily Examples of. Nay if there were any Force at all in the Objection, it would be stronger, in one Respect, against natural Providence,

than

than against Christianity: because under the former, we are in many Cases commanded, and even necessitated whether we will or no, to suffer for the Faults of others; whereas the Sufferings of Christ were voluntary. The World's being under the righteous Government of God, does indeed imply, that finally and upon the whole every one shall receive according to his personal Deserts: And the general Doctrine of the whole Scripture is, that this shall be the Completion of the divine Government. But during the Progress, and, for ought we know, even in Order to the Completion of this moral Scheme, vicarious Punishments may be fit, and absolutely necessary. Men by their Follies run themselves into extrem Distress, into Difficulties which would be absolutely fatal to them, were it not for the Interposition and Assistance of Others. God commands by the Law of Nature, that we afford them this Assistance; in many Cases where we cannot do it without very great Pains, and Labour, and Sufferings to Ourselves. And we see in what Variety of Ways, one Person's Sufferings contribute to the Relief of another; and how or by what particular Means, this comes to pass or follows, from the Constitution and Laws of Nature, which come under our Notice: and being familiarized to it, Men are not shocked with it. So that the Reason of their insisting upon Objections of the foregoing Kind against the Satisfaction of Christ, is, either that they do not consider God's settled and uniform Appointments as His Appointments at all; Or else, they forget that vicarious Punishment is a providential Appointment of every Day's Experience: And then, from their being unacquainted with the more general Laws of Nature or divine Government over the World, and not seeing how the Sufferings of Christ could contribute to the Redemption of it, unless by arbitrary and tyrannical Appointment; they conclude his Sufferings could not contribute to it any other Way. And yet, what has been often alledged in Justification of this Doctrine, even from the

PART II.  apparent natural Tendency of this Method of our Redemption ; its Tendency to vindicate the Authority of God's Laws and deter His Creatures from Sin ; this has never yet been answered, and is I think plainly unanswerable : though I am far from thinking it an Account of the whole of the Case. But without taking this into Consideration, it abundantly appears, from the Observations above made, that this Objection is, not an Objection against Christianity, but against the whole general Constitution of Nature. And if it were to be considered as an Objection against Christianity, or considering it as it is, an Objection against the Constitution of Nature ; it amounts to no more in Conclusion than this, that a divine Appointment cannot be necessary or expedient, because the Objector does not discern it to be so : though he must own that the Nature of the Case is such, as renders him incapable of judging, whether it be so or not ; or of seeing it to be necessary, though it were so.

It is indeed a Matter of great Patience to reasonable Men, to find People arguing in this Manner : objecting against the Credibility of such a particular Part of Christ's Office revealed in Scripture, that they do not see the Necessity or Expediency of it. For though it is highly right, and the most pious Exercise of our Understanding, to enquire with due Reverence into the Ends and Reasons of God's Dispensations : Yet when those Reasons are concealed, to argue from our Ignorance, that such Dispensations cannot be from God, is infinitely absurd. The Presumption of this Kind of Objections, seems almost lost in the Folly of them. And the Folly of them is yet greater, when they are urged, as usually they are, against things in Christianity analogous or like to those natural Dispensations of Providence, which are Matter of Experience. Let Reason be kept to : and if any Part of the Scripture-account of the Redemption of the World by Christ, can be shewn to be really contrary to it, let the Scripture, in  
the

the name of God, be given up: But let not such poor Creatures as we, go on objecting against an infinite Scheme, that we do not see the Necessity or Usefulness of all its Parts, and call this Reasoning; And, which still farther heightens the Absurdity in the present Case, Parts which we are not actively concerned in. For it may be worth mentioning,

*Lastly*, That not only the Reason of the thing, but the whole Analogy of Nature, should teach us, not to expect to have the like Information concerning the divine Conduct, as concerning our own Duty. God instructs us by Experience, for it is not Reason but Experience which instructs us, what good or bad Consequences will follow our acting in such and such Manners; and by this he directs us how we are to behave ourselves. But, though we are sufficiently instructed for the common Purposes of Life; yet it is but an almost infinitely small Part of natural Providence, which we are at all let into. The Case is the same with regard to Revelation. The Doctrine of a Mediator between God and Man, against which it is objected, that the Expediency of some things in it, is not understood; relates only to what was done on God's Part in the Appointment, and on the Mediator's in the Execution of it. For what is required of us, in Consequence of this gracious Dispensation, is another Subject, in which none can complain for want of Information. The Constitution of the World and God's natural Government over it, is all Mystery, as much as the Christian Dispensation. Yet under the first, He has given Men all things pertaining to Life; and under the other, all things pertaining unto Godliness. And it may be added, that there is nothing hard to be accounted for in any of the common Precepts of Christianity though if there were, surely, a Divine Command is abundantly sufficient to lay us under the strongest Obligations to Obedience

But

PART II. But the Fact is, that the Reasons of all the Christian Precepts are evident. Positive Institutions are manifestly necessary to keep up and propagate Religion amongst Mankind. And our Duty to Christ, the internal and external Worship of him; this Part of the Religion of the Gospel, manifestly arises out of what he has done and suffered, his Authority and Dominion, and the Relation, which He is revealed to stand in to us.<sup>m</sup>

## C H A P. VI.

*Of the Want of Universality in Revelation;  
and of supposed Deficiency in the Proof  
of it.*

**I**T has been thought by some Persons, that if the Evidence of Revelation appears doubtful, this itself turns into a positive Argument against it; because it cannot be supposed, that if it were true, it would be left to subsist upon doubtful Evidence. And the Objection against Revelation from its not being universal, is often insisted upon as of great Weight.

C H A P.  
VI.

Now the Weakness of these Opinions may be shewn, by observing the Suppositions on which they are founded: Which are really such as these; that it cannot be thought God would have bestowed any Favour at all upon us, unless in the Degree, which, we think, he might, and which, we imagine, would be most to our particular Advantage; and also that it cannot be thought he would bestow a Favour upon any, unless he bestowed the same upon all: Suppositions which we find contradicted, not by a few Instances in God's natural Government of the World, but by the general Analogy of Nature together.

Persons who speak of the Evidence of Religion as doubtful, and of this supposed Doubtfulness as a positive Argument against it, should be put upon considering, what That Evidence indeed is, which they act upon with regard to their temporal Interests. For, it is not only extremely difficult, but, in many  
Cases,

P A R T

II.

Cases, absolutely impossible, to ballance Pleasure and Pain, Satisfaction and Uneasiness, so as to be able to say, on which Side the Overplus is. There are the like Difficulties and Impossibilities in making the due Allowances, for a Change of Temper and Taste, for Satiety, Disgusts, Ill-health; any of which render Men incapable of enjoying, after they have obtained, what they most eagerly desired. Numberless too are the Accidents, besides that one of untimely Death, which may even probably disappoint the best concerted Schemes: And strong Objections are often seen to lie against them, not to be removed or answered, but which seem overballanced by Reasons on the other Side; so as that the certain Difficulties and Dangers of the Pursuit, are, by every one, thought justly disregarded, upon Account of the appearing greater Advantages in Case of Success, though there be but little Probability of it. Lastly, every one observes our Liableness, if we be not upon our Guard, to be deceived by the Falshood of Men, and the false Appearances of things: And this Danger must be greatly increased, if there be a strong Bias within, suppose from indulged Passion, to favour the Deceit. Hence arises that great Uncertainty and Doubtfulness of Proof, wherein our temporal Interest really consists; what are the most probable Means of attaining it; and whether those Means will eventually be successful. And numberless Instances there are, in the daily Course of Life, in which all Men think it reasonable, to engage in Pursuits though the Probability is greatly against succeeding; and to make such Provision for themselves, as it is supposeable they may have Occasion for, though the plain acknowledged Probability is, that they never shall. Then those who think the Objection against Revelation, from its Light not being universal, to be of Weight, should observe, that the Author of Nature, in numberless Instances, bestows That upon some, which he does not upon others,

others, who seem equally to stand in Need of it. Indeed he appears to bestow all his Gifts, with the most promiscuous Variety, among Creatures of the same Species; Health and Strength, Capacities of Prudence and of Knowledge, Means of Improvement, Riches and all external Advantages. And as there are not any two Men found, of exactly like Shape and Features; so it is probable there are not any two, of an exactly like Constitution, Temper and Situation, with regard to the Goods and Evils of Life. Yet, notwithstanding these Uncertainties and Varieties, God does exercise a natural Government over the World; and there is such a thing as a prudent and imprudent Institution of Life, with regard to our Health and our Affairs, under that his natural Government.

CHAP.  
VI.  

As neither the jewish nor christian Revelation have been universal; and as they have been afforded to a greater and less Part of the World, at different Times: so likewise at different Times, both Revelations have had different Degrees of Evidence. The Jews who lived during the Succession of Prophets, that is, from *Moses* till after the Captivity, had higher Evidence of the Truth of their Religion, than those had, who lived in the Interval between the last mentioned Period, and the Coming of Christ. And the first Christians had higher Evidence of the Miracles wrought in Attestation of Christianity, than what we have now. They had also a strong presumptive Proof of the Truth of it, perhaps of much greater Force, in way of Argument, than many think, of which we have very little remaining; I mean the presumptive Proof of its Truth, from the Influence which it had upon the Lives of the Generality of its Professors. And we, or future Ages, may possibly have a Proof of it, which they could not have, from the Conformity between the prophetick History, and the State of the World and of Christianity. And farther; If we were to suppose the Evidence, which Some have of Religion, to

PART

II.

amount to little more, than seeing that it may be true; but that they remain in great Doubts and Uncertainties about both its Evidence and its Nature, and great Perplexities concerning the Rule of Life: Others to have a full Conviction of the Truth of Religion, with a distinct Knowledge of their Duty: and Others severally to have all the intermediate Degrees of religious Light and Evidence, which lie between these two——If we put the Case, that for the present, it was intended, Revelation should be no more than a small Light, in the midst of a World greatly overspread, notwithstanding it, with Ignorance and Darkness: that certain Glimmerings of this Light should extend, and be directed, to remote Distances, in such a Manner as that those who really partook of it, should not discern from whence it originally came: that Some in a nearer Situation to it, should have its Light obscured, and, in different Ways and Degrees, intercepted: and that Others should be placed within its clearer Influence, and be much more enlivened, cheered and directed by it; but yet that even to these, it should be no more than *a Light shining in a dark Place*: All this would be perfectly uniform and of a piece with the Conduct of Providence, in the Distribution of its other Blessings. If the Fact of the Case really were, that Some have received no Light at all from the Scripture; as many Ages and Countries in the heathen World: that Others, though they have, by Means of it, had essential or natural Religion enforced upon their Consciences, yet have never had the genuine Scripture-revelation, with its real Evidence, proposed to their Consideration; and the ancient *Persians*, and modern *Mahometans*, may possibly be Instances of People in a Situation somewhat like to this: that Others, though they have had the Scripture laid before them as of divine Revelation, yet have had it with the System and Evidence of Christianity so interpolated, the System so corrupted, the Evidence so blended with false Miracles, as to leave the Mind

in

in the utmost Doubtfulness and Uncertainty about the whole; which may be the State of some thoughtful Men, in most of those Nations who call themselves Christian: And lastly, that Others have had Christianity offered to them in its genuine Simplicity, and with its proper Evidence, as Persons in Countries and Churches of civil and of christian Liberty; but however that even these Persons are left in great Ignorance in many Respects, and have by no means Light afforded them enough to satisfy their Curiosity, but only to regulate their Life, to teach them their Duty and encourage them in the careful Discharge of it: I say, if we were to suppose This somewhat of a general true Account of the Degrees of moral and religious Light and Evidence, which were intended to be afforded Mankind, and of what has actually been and is their Situation, in their moral and religious Capacity; there would be nothing in all this Ignorance, Doubtfulness and Uncertainty, in all these Varieties, and supposed Disadvantages of some in Comparison of others, respecting Religion, but may be paralleled, by manifest Analogies in the natural Dispensations of Providence at present, and though we consider ourselves merely in our temporal Capacity.

Nor is there any thing shocking in all This, or which would seem to bear hard upon the moral Administration in Nature, if we would really keep in Mind, that every one shall be dealt equitably with; instead of forgetting this, or explaining it away, after it is acknowledged in Words. All Shadow of Injustice, and indeed all harsh Appearances, in this various Oeconomy of Providence, would be lost, if we would keep in Mind, that every merciful Allowance shall be made, and no more be required of any one, than what might have been equitably expected of him, from the Circumstances in which he was placed; and not what might have been expected, had he been

C H A P.  
VI.  

P A R T placed in other Circumstances: *i. e.* in Scripture Language, that  
 II. every Man shall be *accepted according to what he had, not according to what he had not.*<sup>n</sup> This however doth not by any means imply, that all Persons Condition here, is equally advantageous with respect to Futurity. And Providence's designing to place Some in greater Darkness with respect to religious Knowledge, is no more a Reason why they should not endeavour to get out of that Darkness, and Others to bring them out of it; than why ignorant and slow People, in Matters of other Knowledge, should not endeavour to learn, or should not be instructed.

It is not unreasonable to suppose, that the same wise and good Principle, whatever it was, which disposed the Author of Nature to make different Kinds and Orders of Creatures, disposed him also to place Creatures of like Kinds, in different Situations: And that the same Principle which disposed him to make Creatures of different moral Capacities, disposed him also to place Creatures of like moral Capacities, in different religious Situations; and even the same Creatures, in different Periods of their Being. And the Account or Reason of This, is also most probably the Account, why the Constitution of things is such, as that Creatures of moral Natures or Capacities, for a considerable Part of that Duration in which they are living Agents, are not at all Subjects of Morality and Religion; but grow up to be so, and grow up to be so more and more, gradually from Childhood to mature Age.

What, in particular, is the Account or Reason of these things, we must be greatly in the Dark, were it only that we know so very little even of our own Case. Our present State may possibly be the Consequence of somewhat past, which we are wholly ignorant of; as it has a Reference to somewhat to come, of

<sup>n</sup> 2 Cor. viii. 12.

which we know scarce any more than is necessary for Practice. A System or Constitution, in its Notion, implies Variety; and so complicated an one as this World, very great Variety. So that were Revelation universal, yet from Men's different Capacities of Understanding, from the different Lengths of their Lives, their different Educations and other external Circumstances, and from their Difference of Temper and bodily Constitution; their religious Situations would be widely different, and the Disadvantage of Some in Comparison of Others, perhaps, altogether as much as at present. And the true Account, whatever it be, why Mankind or such a Part of Mankind are placed in this Condition of Ignorance, must be supposed also the true Account of our farther Ignorance, in not knowing the Reasons, why, or whence it is, that they are placed in this Condition. But the following practical Reflections may deserve the serious Consideration of those Persons, who think the Circumstances of Mankind or their own, in the forementioned Respects, a Ground of Complaint.

C H A P.  
VI.  

*First*, The Evidence of Religion not appearing obvious, may constitute one particular Part of Some Mens Trial in the religious Sense; as it gives Scope, for a virtuous Exercise, or vitious Neglect of their Understanding, in examining or not examining into That Evidence. There seems no possible Reason to be given, why we may not be in a State of moral Probation, with regard to the Exercise of our Understanding upon the Subject of Religion, as we are with regard to our Behaviour in common Affairs. The former is as much a thing within our Power and Choice, as the latter. And I suppose it is to be laid down for certain, that the same Character, the same inward Principle, which, after a Man is convinced of the Truth of Religion, renders him obedient to the Precepts of it, would, were he not thus convinced, set him about an Examination of

it;

PART it, upon its System and Evidence being offered to his Thoughts:

II.  And that in the latter State, his Examination would be with an Impartiality Seriousness and Sollicitude, proportionable to what his Obedience is in the former. And as Inattention, Negligence, Want of all serious Concern, about a Matter of such a Nature and such Importance, when offered to Mens Consideration, is, before a distinct Conviction of its Truth, as real immoral Depravity and Dissoluteness; as Neglect of religious Practice after such Conviction: so active Sollicitude about it, and fair impartial Consideration of its Evidence before such Conviction, is as really an Exercise of a morally right Temper; as is religious Practice after. Thus, that Religion is not intuitively true, but a Matter of Deduction and Inference; that a Conviction of its Truth is not forced upon every one, but left to be, by some, collected with heedful Attention to Premises; this as much constitutes religious Probation, as much affords Sphere, Scope, Opportunity, for right and wrong Behaviour, as any thing whatever does. And their Manner of treating this Subject when laid before them, shews what is in their Heart, and is an Exertion of it.

*Secondly,* It appears to be a thing as evident, though it is not so much attended to, that if upon Consideration of Religion, the Evidence of it should seem to any Persons doubtful, in the highest supposeable Degree; even this doubtful Evidence will, however, put them into a *general State of Probation* in the moral and religious Sense. For, suppose a Man to be really in Doubt, Whether such a Person had not done him the greatest Favour; or Whether his whole temporal Interest did not depend upon that Person: No one who had any Sense of Gratitude and of Prudence, could possibly consider himself in the same Situation with regard to such Person, as if he had no such Doubt. In truth it is as just to say, that Certainty and Doubt are

are the same ; as to say, the Situations now mentioned, would leave a Man as entirely at Liberty in point of Gratitude or Prudence, as he would be, were he certain he had received no Favour from such Person, or that he no way depended upon him. And thus, though the Evidence of Religion which is afforded to some Men, should be little more than that they are given to see, the System of Christianity, or Religion in general, to be supposeable and credible ; this ought in all Reason to beget a serious practical Apprehension, that it may be true. And even this will afford Matter of Exercise, for religious Suspense and Deliberation, for moral Resolution and Self-government ; because the Apprehension that Religion may be true, does as really lay Men under Obligations, as a full Conviction that it is true. It gives Occasion and Motives to consider farther the important Subject ; to preserve attentively upon their Minds, a general implicit Sense that they may be under divine moral Government, an awful Sollicitude about Religion whether natural or revealed. Such Apprehension ought to turn Mens Eyes to every Degree of new Light which may be had, from whatever Side it comes ; and induce them to refrain, in the mean Time, from all Immoralities, and live in the conscientious Practice of every common Virtue. Especially are they bound to keep at the greatest Distance from all dissolute Profaneness, for this the very Nature of the Case forbids ; and to treat with highest Reverence a Matter, upon which their own whole Interest and Being and the Fate of Nature depends. This Behaviour and an active Endeavour to maintain within themselves this Temper, is the Business, the Duty and the Wisdom of those Persons, who complain of the Doubtfulness of Religion ; is what they are under the most proper Obligations to. And such Behaviour is an Exertion of, and has a Tendency to improve in Them, That Character, which the Practice of all the several Duties of Religion, from  
a full

P A R T

II.

a full Conviction of its Truth, is an Exertion of, and has a Tendency to improve in Others; Others, I say, to whom God has afforded such Conviction. Nay, considering the infinite Importance of Religion, revealed as well as natural, I think it may be said in general, that whoever will weigh the Matter thoroughly may see, there is not near so much Difference, as is commonly imagined, between what ought in Reason to be the Rule of Life, to those Persons who are fully convinced of its Truth, and to those who have only a serious doubting Apprehension, that it may be true. Their Hopes and Fears and Obligations will be in various Degrees: But, as the Subject-matter of their Hopes and Fears is the same; so the Subject-matter of their Obligations, what they are bound to do and to refrain from, is not so very unlike.

It is to be observed farther, that, from a Character of Understanding, or a Situation of Influence in the World, some Persons have it in their Power to do infinitely more Harm or Good, by setting an Example, of Profaneness and avowed Disregard to all Religion, or, on the contrary, of a serious though perhaps doubting Apprehension of its Truth, and of a reverend Regard to it under this Doubtfulness; than they can do, by acting well or ill in all the common Intercourses amongst Mankind. And consequently they are most highly accountable for a Behaviour, which, they may easily foresee, is of such Importance, and in which there is most plainly a Right and a Wrong, even admitting the Evidence of Religion to be as doubtful as is pretended.

The Ground of these Observations, and That which renders them just and true, is that Doubting necessarily implies some Degree of Evidence for That, of which we doubt. For no Person would be in Doubt, concerning the Truth of a Number of Facts so and so circumstanced, which should accidentally come into his Thoughts, and of which he had no Evidence at  
all.

all. And though in the Case of an even Chance, and where  
consequently we were in Doubt, we should in common Lan-  
guage say, that we had no Evidence at all for either Side; yet  
That Situation of things, which renders it an even Chance and  
no more, that such an Event will happen, renders this Case  
equivalent to all others, where there is such Evidence on both  
Sides of a Question,<sup>o</sup> as leaves the Mind in Doubt concerning  
the Truth. Indeed in all these Cases, there is no more Evi-  
dence on one Side, than on the other; but there is (what is equi-  
valent to) much more for either, than for the Truth of a Num-  
ber of Facts which come into ones Thoughts at random. And  
thus in all these Cases, Doubt as much presupposes Evidence,  
lower Degrees of it; as Belief presupposes higher, and Certainty  
higher still. Any one who will a little attend to the Nature  
of Evidence, will easily carry this Observation on and see, that  
between no Evidence at all, and That Degree of it which af-  
fords Ground of Doubt, there are as many intermediate Degrees;  
as there are, between That Degree which is the Ground of Doubt,  
and Demonstration. And though we have not Faculties to dis-  
tinguish these Degrees of Evidence, with any Sort of Exact-  
ness; yet, in Proportion as they are discerned, they ought to in-  
fluence our Practice. For it is as real an Imperfection in the  
moral Character, not to be influenced in Practice by a lower  
Degree of Evidence when discerned, as it is, in the Understand-  
ing, not to discern it. And as, in all Subjects which Men con-  
sider, they discern the lower as well as higher Degrees of Evi-  
dence, proportionably to their Capacity of Understanding; so,  
in practical Subjects, they are influenced in Practice, by the low-  
er as well as higher Degrees of it, proportionably to their Fair-  
ness and Honesty. And as, in Proportion to Defects in the  
Understanding, Men are unapt to see lower Degrees of Evi-

<sup>o</sup> Introduction.

PART

II.

dence, are in Danger of overlooking Evidence when it is not glaring, and are easily imposed upon in such Cases; so, in Proportion to the Corruption of the Heart, they seem capable of satisfying themselves with having no Regard in Practice to Evidence acknowledged real, if it be not overbearing. From these things it must follow, that Doubting concerning Religion, implies such a Degree of Evidence for it, as joined with the Consideration of its Importance, unquestionably lays Men under the Obligations before mentioned to have a dutiful Regard to it, in all their Behaviour.

*Thirdly,* The Difficulties in which the Evidence of Religion is involved, which Some complain of, is no more a just Ground of Complaint, than the external Circumstances of Temptation, which Others are placed in; or than Difficulties in the Practice of it, after a full Conviction of its Truth. Temptations render our State a more improving State of Discipline,<sup>F</sup> than it would be otherwise; as they give Occasion for a more attentive Exercise of the virtuous Principle, which confirms and strengthens it more, than an easier or less attentive Exercise of it could. Now speculative Difficulties are, in this Respect, of the very same Nature with these external Temptations. For the Evidence of Religion not appearing obvious, is, to some Persons, a Temptation to reject it, without any Consideration at all; and therefore requires such an attentive Exercise of the virtuous Principle, seriously to consider That Evidence, as there would be no Occasion for, but for such Temptation. And the supposed Doubtfulness of its Evidence, after it has been in some Sort considered, affords Opportunity to an unfair Mind of explaining away, and deceitfully hiding from itself, That Evidence which it might see; and also for Mens encouraging themselves in Vice

<sup>F</sup> Part I. Ch. v.

from Hopes of Impunity, though they do clearly see thus much at least, that these Hopes are uncertain: In like Manner as the common Temptation to many Instances of Folly, which end in temporal Infamy and Ruin, is, the Ground for Hope, of not being detected, and of escaping with Impunity, *i. e.* the Doubtfulness of the Proof beforehand, that such foolish Behaviour will thus end in Infamy and Ruin. On the contrary, supposed Doubtfulness in the Evidence of Religion, calls for a more careful and attentive Exercise of the virtuous Principle, in fairly yielding themselves up to the proper Influence of any real Evidence, though doubtful; and living in the conscientious Practice of all Virtue, though under some Uncertainty, whether the Government in the Universe may not possibly be such, as that Vice may escape with Impunity. And in general, Temptation, meaning by this Word, the lesser Allurements to Wrong and Difficulties in the Discharge of our Duty, as well as the greater ones, Temptation, I say, as such and of every Kind and Degree, as it calls forth some virtuous Efforts, additional to what would otherwise have been wanting, cannot but be an additional Discipline and Improvement of Virtue, as well as Probation of it in the other Senses of that Word.<sup>9</sup> So that the very same Account is to be given, why the Evidence of Religion should be left in such a Manner, as to require, in Some, an attentive, sollicitous, perhaps painful Exercise of their Understanding about it; as why Others should be placed in such Circumstances, as that the Practice of its common Duties, after a full Conviction of the Truth of it, should require Attention, Sollicitude and Pains: Or, why appearing Doubtfulness should be permitted to afford Matter of Temptation to Some; as why external Difficulties and Allurements should be permitted to afford Matter of Temptation to Others. The same Account also is to be given, why Some should be exercised with Temp-

<sup>9</sup> Part I. Ch. iv, and p. 103.

PART tations of both these Kinds; as why Others should be exercised  
 II. with the latter in such very high Degrees, as some have been,  
 particularly as the primitive Christians were.

Nor does there appear any Absurdity in supposing, that the speculative Difficulties in which the Evidence of Religion is involved, may make even the principal Part of some Persons Trial. For, as the chief Temptations of the Generality of the World, are, the ordinary Motives to Injustice or unrestrained Pleasure; or to live in the Neglect of Religion from That Frame of Mind, which renders many Persons almost without Feeling as to any thing distant, or which is not the Object of their Senses: So there are other Persons without this Shallowness of Temper, Persons of a deeper Sense as to what is invisible and future; who not only see, but have a general practical Feeling, that what is to come will be present, and that things are not less real for their not being the Objects of Sense; and who, from their natural Constitution of Body and of Temper, and from their external Condition, may have small Temptations to behave ill, small Difficulty in behaving well, in the common Course of Life. Now when these latter Persons have a distinct full Conviction of the Truth of Religion, without any possible Doubts or Difficulties, the Practice of it is to them unavoidable, unless they will do a constant Violence to their own Minds; and Religion is scarce any more a Discipline to Them, than it is to Creatures in a State of Perfection. Yet these Persons may possibly stand in Need of moral Discipline and Exercise in a higher Degree, than they would have, by such an easy Practice of Religion. Or it may be requisite, for Reasons unknown to us, that they should give some farther Manifestation of what is their moral Character, to the Creation of God, than such a Practice of it would be. Thus in the great Variety of

religious Situations in which Men are placed, what constitutes, what chiefly and peculiarly constitutes the Probation, in all Senses, of some Persons, may be the Difficulties in which the Evidence of Religion is involved; and their principal and distinguished Trial may be, how they will behave under and with Respect to these Difficulties. Circumstances in Mens Situation in their temporal Capacity, analagous in good Measure to This, respecting Religion, are to be observed. We find some Persons are placed in such a Situation in the World, as that their chief Difficulty with regard to Conduct, is not the Doing what is prudent when it is known, for this, in numberless Cases, is as easy as the contrary: But to some the principal Exercise is, Recollection and being upon their Guard against Deceits, the Deceits suppose of those about them; against false Appearances of Reason and Prudence. To Persons in some Situations, the principal Exercise with respect to Conduct, is, Attention in order to inform themselves, what is proper, what is really the reasonable and prudent Part to act.

C H A P.  
VI.  

But as I have hitherto gone upon Supposition, that Mens Dissatisfaction with the Evidence of Religion, is not owing to their Neglects or Prejudices; it must be added, on the other hand, in all common Reason, and as what the Truth of the Case plainly requires should be added, that such Dissatisfaction possibly may be owing to those, possibly may be Mens own Fault. For,

If there are any Persons, who never set themselves heartily and in earnest to be informed in Religion: if there are any who secretly wish it may not prove true; and are less attentive to Evidence than to Difficulties, and more to Objections than to what is said in Answer to them: these Persons will scarce be  
thought

P A R T

II.

thought in a likely Way of seeing the Evidence of Religion, though it were most certainly true, and capable of being ever so fully proved. If any accustom themselves to consider this Subject usually in the Way of Mirth and Sport: if they attend to Forms and Representations and inadequate Manners of Expression, instead of the real Things intended by them; for Signs often can be no more than inadequately expressive of the things signified: or if they substitute human Errors, in the Room of divine Truth——why may not all or any of these things, hinder some Men from seeing that Evidence which really is seen by Others; as a like Turn of Mind with respect to Matters of common Speculation and Practice, does, we find by Experience, hinder them from attaining That Knowledge and right Understanding, in Matters of common Speculation and Practice, which more fair and attentive Minds attain to? And the Effect will be the same, whether their Neglect of seriously considering the Evidence of Religion, and their indirect Behaviour with regard to it, proceed from mere Carelessness, or from the grosser Vices; or whether it be owing to this, that Forms and figurative Manners of Expression, as well as Errors, administer Occasions of Ridicule, when the Things intended, and the Truth itself, would not. Men may indulge a ludicrous Turn so far as to lose all Sense of Conduct and Prudence in worldly Affairs, and even, as it seems, to impair their Faculty of Reason. And in general, Levity, Carelessness, Passion, and Prejudice, *do* hinder us from being rightly informed, with respect to common things: And they *may*, in like Manner, and perhaps in some farther providential Manner, with respect to moral and religious Subjects; may hinder Evidence from being laid before us, and from being seen when it is. The Scripture <sup>r</sup> is express, that

<sup>r</sup> See If. xxix. 13, 14. Dan. xii. 10. Matth. vi. 23. and xi. 25. and xiii. 11, 12. Joh. iii. 19. Joh. v. 44. 1 Cor. ii. 14. and 2 Cor. iv. 4. 2 Tim. iii. 13. and That affectionate, as well as authoritative, Admonition so very many Times inculcated, *He that*  
*hath*

that every one shall *not understand*. And it makes no Difference, by what providential Conduct, this comes to pass: Whether the Evidence of Christianity was, originally and with Design, put and left so, as that those who are desirous of evading moral Obligations, should not see it; and that honest-minded Persons should: Or Whether it comes to pass by any other Means.

C H A P.  
VI.  

Farther; The general Proof of natural Religion and of Christianity, does, I think, lay Level to common Men; even those, the greatest Part of whose Time, from Childhood to Old-age, is taken up with providing themselves and their Families, the common Conveniencies, perhaps Necessaries of Life: those, I mean, of this Rank, who ever think at all of asking after Proof or attending to it. Common Men, were they as much in earnest about Religion, as about their temporal Affairs, are capable of being convinced upon real Evidence, that there is a God who governs the World; and they feel themselves to be, of a moral Nature and accountable Creatures: And as Christianity intirely falls in with this their natural Sense of things; so they are capable, not only of being persuaded, but of being made to see, that there is Evidence of Miracles wrought in Attestation of it, and many appearing Completions of Prophecy. But though this Proof is real and conclusive, yet it is liable to Objections, and may be run up into Difficulties, which Persons who are capable, not only of talking of, but of really seeing, are capable also of seeing through, *i. e.* not of clearing up and answering them, so as to satisfy their Curiosity, for of such Knowledge

*hath Ears to hear, let him hear. Grotius* saw so strongly the thing intended in these and other Passages of Scripture of the like Sense, as to say, that the Proof given us of Christianity was less than it might have been, for this very Purpose. *Ut ita Sermo Evangelii tanquam lapis esset Lydius ad quem ingenia sanabilia explorarentur.* De Ver. R. C. L. 2. towards the End.

P A R T  
 II.  we are not capable with respect to any one thing in Nature; but capable of seeing that the Proof is not lost in these Difficulties, or destroyed by these Objections. But then a thorough Examination into Religion, with regard to these Objections, which cannot be the Business of every Man, is a Matter of pretty large Compass, and, from the Nature of it, requires some Knowledge, as well as Time and Attention; to see, how the Evidence comes out, upon ballancing one thing with another, and what, upon the whole, is the Amount of it. Now if Persons who have picked up these Objections from Others, and take for granted they are of Weight, upon the Word of those from whom they received them, or, by often retailing of them, come to see or fancy they see them to be of Weight; will not prepare themselves for such an Examination, with a competent Degree of Knowledge; or will not give that Time and Attention to the Subject, which, from the Nature of it, is necessary for attaining such Information: in this Case, they must remain in Doubtfulness Ignorance or Error; in the same Way as they must, with regard to common Sciences, and Matters of common Life, if they neglect the necessary Means of being informed in them.

But still perhaps it will be objected, that if a Prince or common Master were to send Directions to a Servant, he would take Care, that they should always bear the certain Marks, who they came from, and that their Sense should be always plain; so as that there should be no possible Doubt, if he could help it, concerning the Authority or Meaning of them. Now the proper Answer to all this Kind of Objections, is, that, wherever the Fallacy lies, it is even certain, we cannot argue thus with respect to Him who is the Governor of the World; and particularly that he does not afford us such Information, with respect to our temporal Affairs and Interests, as Experience abundantly shews. However, there is a full Answer to this  
 Objection

Objection, from the very Nature of Religion. For, the Reason why a Prince would give his Directions in this plain Manner, is, that he absolutely desires such an external Action should be done, without concerning himself with the Motive or Principle upon which it is done; *i. e.* he regards only the external Event, or the thing's being done, and not at all, properly speaking, the Doing of it, or the Action. Whereas the whole of Morality and Religion consisting merely in Action itself, there is no Sort of Parallel between the Cases. But if the Prince be supposed to regard only the Action, *i. e.* only to desire to exercise, or in any Sense prove, the Understanding or Loyalty of a Servant; he would not always give his Orders in such a plain Manner. It may be proper to add, that the Will of God, respecting Morality and Religion, may be considered, either as absolute, or as only conditional. If it be absolute, it can only be thus, that we should act virtuously in such given Circumstances; not that we should be brought to act so, by his changing of our Circumstances. And if God's Will be thus absolute, then it is in our Power, in the highest and strictest Sense, to Do or to contradict his Will; which is a most weighty Consideration. Or His Will may be considered only as conditional, that if we act so and so, we shall be rewarded, if otherwise, punished; of which conditional Will of the Author of Nature, the whole Constitution of it, affords most certain Instances.

Upon the whole; that We are in a State of Religion necessarily implies, that we are in a State of Probation: and the Credibility of our being at all in a State of Probation, being admitted; there seems no peculiar Difficulty in supposing it to be, with regard to the Race of Mankind, just as it is, in those Respects which are above objected against. There seems no Pretence, from *the Reason of the thing*, to say, that the Trial cannot equitably be any thing, but whether Persons will act suitably

P A R T to certain Information, or such as admits no Room for Doubt; II. so as that there can be no Danger of Miscarriage, but either from their not attending to what they certainly know, or from overbearing Passion hurrying them on to act contrary to it. For, since Ignorance and Doubt afford Scope for Probation in all Senses, as really as intuitive Conviction or Certainty, and since the two former are to be put to the same Account, as Difficulties in Practice; Men's moral Probation may also be, whether they will take due Care to inform themselves by impartial Consideration, and afterwards whether they will act as the Case requires, upon the Evidence which they have, however doubtful. And this, we find by *Experience*, is frequently our Probation, <sup>f</sup> in our temporal Capacity. For, the Information which we want with Regard to our worldly Interests, is by no means always given us of Course, without any Care of our own. And we are greatly liable to Self-deceit from inward secret Prejudices, and also to the Deceits of others. So that to be able to judge what is the prudent Part, often requires much and difficult Consideration. Then after we have judged the very best we can, the Evidence upon which we must act, if we will live and act at all, is perpetually doubtful to a very high Degree. And the Constitution and Course of the World in Fact is such, as that Want of impartial Consideration what we have to do, and venturing upon extravagant Courses because it is doubtful what will be the Consequence, are often naturally *i. e.* providentially, altogether as fatal, as Misconduct occasioned by heedless Inattention to what we certainly know, or disregarding it from overbearing Passion.

Several of the Observations here made, may well seem strange, perhaps unintelligible, to many good Men. But if the Persons for whose Sake they are made, think so, Persons who object as

<sup>f</sup> p. 38, 227, 229.

above, and throw off all Regard to Religion under Pretence of  
Want of Evidence; I desire Them to consider again, whether  
their thinking so, be owing to any thing unintelligible in these  
Observations, or to their own not having such a Sense of Reli-  
gion and serious Sollicitude about it, as even their State of Scep-  
ticism does in all Reason require? It ought to be forced upon  
the Reflection of these Persons, that our Nature and Condition  
necessarily require us, in the daily Course of Life, to act upon  
Evidence much lower than what is commonly called probable;  
to guard, not only against what we fully believe will, but also  
against what we think it supposable may, happen; and to en-  
gage in Pursuits when the Probability is greatly against Success,  
if it be credible, that possibly we may succeed in them.

*Of the particular Evidence for Christianity.*

PART  
II.

**T**HE Presumptions against Revelation, and Objections against the general Scheme of Christianity, and particular things relating to it, being removed; there remains to be considered, What positive Evidence we have for the Truth of it: chiefly in Order to see, What the Analogy of Nature suggests with regard to That Evidence, and the Objections against it: Or to see what is, and is allowed to be, the plain natural Rule of Judgment and of Action, in our temporal Concerns, in Cases where we have, the same Kind of Evidence, and the same Kind of Objections against it, that we have in the Case before us.

Now in the Evidence of Christianity, there seem to be several things of great Weight, not reduceable to the Head, either of Miracles, or the Completion of Prophecy, in the common Acceptation of the Words. But these are its direct and fundamental Proofs: And those other things, however considerable they are, yet ought never to be urged apart from its direct Proofs, but always to be joined with them. Thus the Evidence of Christianity will be a long Series of things, reaching, as it seems, from the Beginning of the World to the present Time, of great Variety and Compass, taking in both the direct, and also the collateral, Proofs; and making up, all of them together, one Argument: the Conviction arising from which Kind of Proof, may be compared to, what they call, *the Effect* in Architecture

or.

or other Works of Art; a Result from a great Number of CHAP. things so and so disposed, and taken into one View. I shall VII. therefore, *FIRST*, make some Observations relating to Miracles, and the appearing Completions of Prophecy; and consider what Analogy suggests, in Answer to the Objections brought against this Evidence, And, *SECONDLY*, I shall endeavour to give some Account of the general Argument now mentioned, consisting both of the direct and collateral Evidence, considered as making up one Argument: this being the Kind of Proof, upon which we determine most Questions of Difficulty, concerning common Facts, alledged to have happened or seeming likely to happen; especially Questions relating to Conduct.

*FIRST* I shall make some Observations upon the direct Proof of Christianity from Miracles and Prophecy, and upon the Objections alledged against it.

I. Now the following Observations, relating to the historical Evidence of Miracles wrought in Attestation of Christianity, appear to be of great Weight.

1. The Old Testament affords us the same historical Evidence of the Miracles of *Moses* and of the Prophets, as of the common civil History of *Moses* and the Kings of *Israel*; or, as of the Affairs of the Jewish Nation. And the *Gospels* and the *Acts* afford us the same historical Evidence of the Miracles of Christ and the Apostles, as of the common Matters related in them. This indeed could not have been affirmed by any reasonable Man, if the Authors of these Books, like many other Historians, had appeared to aim at an entertaining Manner of Writing; though they had, in their Works, interspersed Miracles, at proper Distances and upon proper Occasions. These might have

PART have animated a dull Relation, amused the Reader and engaged his Attention. And the same Account would naturally have been given of them, as, of their Speeches and Descriptions: the same Account, in a Manner, as is to be given, why the Poets make Use of Wonders and Prodigies. But the Facts, both miraculous and natural, in Scripture, are related in plain unadorned Narratives; and both of them appear, in all Respects, to stand upon the same Foot of historical Evidence. Farther; Some Parts of Scripture, containing an Account of Miracles fully sufficient to prove the Truth of Christianity, are quoted as genuine, from the Age in which they are said to be written, down to the present: And no other Parts of them, material in the present Question, are omitted to be quoted in such Manner, as to afford any Sort of Proof of their not being genuine. And, as common History, when called in Question in any Instance, may often be greatly confirmed, by cotemporary or subsequent Events more known and acknowledged, and as the common Scripture-history, like many others, is thus confirmed; so likewise is the miraculous History of it, not only in particular Instances, but in general. For, the Establishment of the Jewish and Christian Religions, which were Events subsequent and cotemporary with the Miracles related to be wrought in Attestation of both, these Events are just what we should have expected, upon Supposition such Miracles were really wrought to attest the Truth of those Religions. These Miracles are a satisfactory Account of those Events: of which, no other satisfactory Account can be given; nor any Account at all but what is imaginary merely and invented. It is to be added, that the most obvious, the most easy and direct Account of this History, how it came to be written and to be received in the World, as a true History; is, that it really is so: nor can any other Account of it be easy and direct. Now, though an Account, not at all obvious, but very far-fetched and indirect, may

may indeed be, and often is, the true Account of a Matter; yet it cannot be admitted on the Authority of its being asserted. Mere Guess, Supposition, and Possibility, when opposed to historical Evidence, prove nothing, but that historical Evidence is not demonstrative.

C H A P.  
VII.  

Now the just Consequence from all this, I think, is, that the Scripture-history in general, is to be admitted as an authentick genuine History; till somewhat positive be alledged sufficient to invalidate it. But no Man will deny the Consequence to be, that it cannot be rejected, or thrown by as of no Authority, till it can be proved to be of none; even though the Evidence now mentioned for its Authority, were doubtful. This Evidence may be confronted, by historical Evidence on the other Side, if there be any; or general Incredibility in the things related, or Inconsistence in the general Turn of the History, would prove it to be of no Authority: But since, upon the Face of the Matter, upon a first and general View, the Appearance is, that it is an authentick History; it cannot be determined to be fictitious without some Proof, that it is so. And the following Observations, in Support of these and coincident with them, will greatly confirm the historical Evidence for the Truth of Christianity.

2. The Epistles of St. Paul, from the Nature of epistolary Writing, and moreover from several of them being written, not to particular Persons, but to Churches; carry in them Evidences of their being genuine, beyond what can be in a mere historical Narrative, left to the World at large. This Evidence, joined with That which they have in common with the rest of the New Testament, seems not to leave so much as any particular Pretence for denying their Genuineness, considered as an ordinary Matter of Fact, or of Criticism: I say *particular* Pretence,

P A R T  
II.

Pretence, for *denying* it; because any single Fact, of such a Kind and such Antiquity, may have *general Doubts* raised concerning it, from the very Nature of human Affairs and human Testimony. There is also to be mentioned, a distinct and particular Evidence of the Genuineness of the Epistle chiefly referred to here, the first to the Corinthians; from the Manner in which it is quoted by *Clemens Romanus*, in an Epistle of his own to That Church.<sup>a</sup> Now these Epistles afford a Proof of Christianity, detached from all others, which is, I think, a thing of Weight; and also a Proof of a Nature and Kind peculiar to itself. For,

In them the Author declares, that he received the Gospel in general, and the Institution of the Communion in particular, not from the rest of the Apostles, or jointly together with them, but alone, from Christ himself; whom he declares likewise, conformably to the History in the *Acts*, that he saw after his Ascension.<sup>c</sup> So that the Testimony of *St. Paul* is to be considered, as detached from That of the rest of the Apostles.

And he declares farther, that he was endued with a Power of working Miracles, as what was publicly known to those very People, speaks of frequent and great Variety of miraculous Gifts as then subsisting in those very Churches, to which he was writing; which he was reproving for several Irregularities; and where he had personal Opposers: He mentions these Gifts incidentally, in the most easy Manner and without Effort; by way of Reproof to those who had them, for their indecent Use of them; and by way of depreciating them, in Comparison of moral Virtues: In short he speaks to these Churches, of these miraculous Powers, in the Manner, any one would speak to

<sup>a</sup> Clem. Rom. Ep. I. c. 47.

<sup>c</sup> Gal. i. 1 Cor. xi. 23, &c.

1 Cor. xv. 8.

another

another of a thing, which was as familiar and as much known C H A P. in common to them both, as any thing in the World.<sup>d</sup> And VII. this, as hath been observed by several Persons, is surely a very  considerable thing.

3. It is an acknowledged historical Fact, that Christianity offered itself to the World, and demanded to be received, upon the Allegation, *i. e.*, as Unbelievers would speak, upon the Pretence, of Miracles, publicly wrought to attest the Truth of it, in such an Age; and that it was actually received by great Numbers in that very Age, and upon the professed Belief of the Reality of these Miracles. And by this, Christianity, including the Dispensation of the Old Testament, seems distinguished from all other Religions: By which I mean, that this does not appear to be the Case with regard to any other; for surely it will not be supposed to lie upon any Person, to prove by positive historical Evidence, that it was not. It does in no Sort appear, that Mahometanism was first received in the World upon the Foot of supposed Miracles,<sup>e</sup> *i. e.* publick ones; for, as Revelation is itself miraculous, all Pretence to it, must necessarily imply some Pretence of Miracles. And it is a known Fact, that it was immediately, at the very first, propagated by other Means. And as particular Institutions, whether in Paganism or Popery, said to be confirmed by Miracles after those Institutions had obtained, are not to the Purpose; So, were there, what might be called, historical Proof, of any of them being introduced by a supposed divine Command, believed to be attested by Miracles; these would not be in any wise pallel. For single things of this Sort are easy to be accounted for, after Parties are formed, and have Power in their Hands; and the Leaders of them are in Veneration with the Multitude; and political Interests are

<sup>d</sup> Rom. xv. 19. 1 Cor. xii. 8, 9, 10—28, &c. and c. xiii. 1, 2, 3, and the whole xiv<sup>th</sup> ch. 2 Cor. xii. 12, 13. Gal. iii. 2, 5. <sup>e</sup> See the Koran c. xiii. and c. xvii.

PART blended with religious Claims, and religious Distinctions. But  
 II. before any thing of this Kind, for a few Persons, and those of  
 the lowest Rank, all at once, to bring over such great Numbers  
 to a new Religion, and get it to be received upon the particular  
 Evidence of Miracles; this is quite another thing. And I  
 think it will be allowed by any fair Adversary, that the Fact  
 now mentioned, taking in all the Circumstances of it, is pecu-  
 liar to the christian Religion. However, the Fact itself is al-  
 lowed, that Christianity obtained, *i. e.* was professed to be re-  
 ceived in the World upon the Belief of Miracles, immediately  
 in the Age in which it is said those Miracles were wrought; Or  
 that This is what its first Converts would have alledged, as the  
 Reason for their embracing it. Now certainly it is not to be  
 supposed, that such Numbers of Men, in the most distant Parts  
 of the World, should forsake the Religion of their Country,  
 in which they had been educated; separate themselves from  
 their Friends, particularly in their festival Shows and Solemn-  
 ities, to which the common People are so greatly addicted, and  
 which were of a Nature to engage them much more, than any  
 thing of That Sort amongst us; and embrace a Religion,  
 which could not but expose them to many Inconveniences, and  
 indeed must have been a giving up the World in a great De-  
 gree, even from the very first, and before the Empire engaged in  
 Form against them; it cannot be supposed, that such Numbers  
 should make so great, and, to say the least, so inconvenient a  
 Change in their whole Institution of Life, unless they were re-  
 ally convinced of the Truth of those Miracles, upon the Know-  
 ledge or Belief of which, they professed to make it. And it  
 will, I suppose, readily be acknowledged, that the Generality of  
 the first Converts to Christianity, must have believed them:  
 that as by becoming Christians, they declared to the World,  
 they were satisfied of the Truth of those Miracles; so this De-  
 claration was to be credited. And this their Testimony is the  
 same

same Kind of Evidence for those Miracles, as if they had put it in Writing, and these Writings had come down to us. And it is real Evidence, because it is of Facts, which they had Capacity and full Opportunity to inform themselves of. It is also distinct from the direct or express historical Evidence, though it is of the same Kind, and would be allowed to be distinct in all Cases. For were a Fact expressly related by one or more antient Historians, and disputed in after Ages; that this Fact is acknowledged to have been believed, by great Numbers of the Age in which the Historian says it was done, would be allowed an additional Proof of such Fact, quite distinct from the express Testimony of the Historian. The Credulity of Mankind is acknowledged: and the Suspicions of Mankind ought to be acknowledged too; and their Backwardness even to believe, and greater still to practice, what makes against their Interest. And it must particularly be remembred, that Education, and Prejudice, and Authority, were against Christianity, in the Age I am speaking of. So that the immediate Conversion of such Numbers, is a real Presumption of somewhat more than human in this Matter; I say Presumption, for it is not alledged as a Proof alone and by itself: Nor need any one of the things mentioned in this Chapter, be considered as a Proof by itself; and yet all of them together may be one of the strongest.<sup>f</sup>

Upon the whole, as there is large historical Evidence, both direct and circumstantial, of Miracles wrought in Attestation of Christianity, collected by those who have writ upon the Subject; it lies upon Unbelievers to shew, why this Evidence is not to be credited. This Way of speaking is, I think, just; and what Persons who write in Defence of Religion, naturally fall into. Yet, in a Matter of such unspeakable Importance,

<sup>f</sup> p.

P A R T  
II.

the proper Question is, not whom it lies upon, according to the Rules of Argument, to maintain or confute Objections: but, whether there really are any, against this Evidence, sufficient, in Reason, to destroy the Credit of it. However, Unbelievers seem to take upon them the Part of shewing that there are.

They alledge, that numberless enthusiastick People, in different Ages and Countries, expose themselves to the same Difficulties which the primitive Christians did; and are ready to give up their Lives, for the most idle Follies imaginable. But it is not very clear, to what Purpose this Objection is brought. For, every one, surely, in every Case, must distinguish between Opinions and Facts. And though Testimony is no Proof of enthusiastick Opinions, or of any Opinions at all; yet it is allowed, in all other Cases, to be a Proof of Facts. And a Person's laying down his Life in Attestation of Facts or of Opinions, is the strongest Proof of his believing them. And if the Apostles and their Cotemporaries did believe the Facts, in Attestation of which, they exposed themselves to Sufferings and Death; this their Belief, or rather Knowledge, must be a Proof of those Facts: for they were such as came under the Observation of their Senses. And though it is not of equal Weight, yet it is of Weight, that the Martyrs of the next Age, notwithstanding they were not Eye-witnesses of those Facts, as were the Apostles and their Cotemporaries, had, however, full Opportunity to inform themselves, whether they were true or not, and gave equal Proof of their believing them to be true.

But Enthusiasm, it is said, greatly weakens the Evidence of Testimony even for Facts, in Matters relating to Religion: Some seem to think, it totally and absolutely destroys the Evidence of Testimony upon this Subject. And indeed the Powers of Enthusiasm, and of Diseases too which operate in a like Manner,  
are

are very wonderful, in particular Instances. But if great Numbers of Men, not appearing in any peculiar Degree weak, nor under any peculiar Suspicion of Negligence, affirm that they saw and heard such things plainly with their Eyes and their Ears, and are admitted to be in earnest; such Testimony is Evidence of the strongest Kind we can have, for any Matter of Fact. Yet possibly it may be overcome, strong as it is, by Incredibility in the things thus attested, or by contrary Testimony. And in an Instance where one thought it was so overcome, it might be just to consider, how far this could be accounted for, by Enthusiasm; for it seems as if no other imaginable Account were to be given of it. But till such Incredibility be shewn, or contrary Testimony produced, it cannot, surely, be expected, that so far-fetched, so indirect and wonderful an Account of such Testimony, as That of Enthusiasm must be; an Account so strange, that the Generality of Mankind can scarce be made to understand what is meant by it: it cannot, I say, be expected, that such Account will be admitted of such Evidence; when there is this direct easy and obvious Account of it, that People really saw and heard a thing not incredible, which they affirm sincerely and with full Assurance, they did see and hear. Granting then that Enthusiasm is not, strictly speaking, an absurd, but a possible Account of such Testimony; it is manifest that the very Mention of it, goes upon the previous Supposition, that the things so attested are incredible: and therefore need not be considered, till they are shewn to be so. Much less need it be considered, after the contrary has been proved. And I think it has been proved, to full Satisfaction, that there is no Incredibility in a Revelation, in general, or in such an one as the Christian, in particular. However; As Religion is supposed peculiarly liable to Enthusiasm, it may just be observed, that Prejudices almost without Number and without Name, Romance, Affectation, Humour, a Desire to engage Attention or to surprize,  
the

P A R T II. the Party-spirit, Custom, little Competitions, unaccountable Likings and Dislikings; these influence Men strongly in common Matters. And as these Prejudices are often scarce known or reflected upon, by the Persons themselves who are influenced by them, they are to be considered as Influences of a like Kind to Enthusiasm. Yet human Testimony in common Matters is naturally and justly believed notwithstanding.

It is intimated farther, in a more refined Way of Observation, that though it should be proved, that the Apostles and first Christians could not, in some Respects, be deceived themselves, and, in other Respects, cannot be thought to have intended to impose upon the World; yet it will not follow, that their general Testimony is to be believed, though truly handed down to us: because they might also in Part, *i. e.* in other Respects, be deceived Themselves, and designedly impose upon Others; which, it is added, is a thing very credible, from that Mixture of real Enthusiasm, and real Knavery, to be met with in the same Characters. And, I must confess, I think the Matter of Fact contained in this Observation upon Mankind, is not to be denied; and that somewhat very much a-kin to it, is often supposed in Scripture as a very common Case, and most severely reprobated. But it were to have been expected, that Persons capable of applying this Observation as applied in the Objection, might also frequently have met with the like mixt Character, in Instances where Religion was quite out of the Case. The thing plainly is, that Mankind are naturally endued with Reason, or a Capacity of distinguishing between Truth and Falshood; and as naturally they are endued with Veracity, or a Regard to Truth in what they say: But from many Occasions, they are liable to be prejudiced and biassed and deceived Themselves, and capable of intending to deceive Others, in every different Degree: Infomuch that, as we are all liable to be deceived  
by

by Prejudice, so likewise it seems to be not an uncommon thing, for Persons, who, from their Regard to Truth, would not invent a Lie entirely without any Foundation at all, to propagate it with heightning Circumstances, after it is once invented and set a-going. And Others, though they would not *propagate* a Lye, yet, which is a lower Degree of Falshood, will let it pass without Contradiction. But notwithstanding all this, human Testimony remains still a natural Ground of Assent, and this Assent, a natural Principle of Action.

It is objected farther, that however it has happened, the *Fact* is, that Mankind have, in different Ages, been strangely deluded with Pretences to Miracles and Wonders. But it is by no means to be admitted, that they have been oftener, or are at all more liable to be, deceived, by these, than by other Pretences.

It is added, that there is a very considerable Degree of historical Evidence for Miracles, which are, on all hands, acknowledged to be fabulous. But suppose there were even *the like* historical Evidence for These, to what there is for Those alleged in Proof of Christianity, which yet is in no wise allowed, but suppose this; the Consequence would not be, that the Evidence of the latter is not to be admitted. Nor is there a Man in the World who would conclude thus, in common Cases. For, what would such a Conclusion really amount to but this, that Evidence confuted by contrary Evidence, or any way overballanced, destroys the Credibility of other Evidence, neither confuted, nor overballanced? To argue, that because there is, if there were, like Evidence from Testimony, for Miracles acknowledged false, as for those in Attestation of Christianity, therefore the Evidence in the latter Case is not to be credited; this is the same as to argue, that if two Men of equally good  
Reputation,

P A R T Reputation, had given Evidence in different Causes no way  
 II. connected, and One of them had been convicted of Perjury,  
 this confuted the Testimony of the Other.

Upon the whole then, the general Observation that human Creatures are so liable to be deceived, from Enthusiasm in Religion, and Principles equivalent to Enthusiasm in common Matters, and in both from Negligence; and that they are so capable of dishonestly endeavouring to deceive others; this does indeed weaken the Evidence of Testimony, in all Cases, but does not destroy it, in any. And these things will appear, to different Men, to weaken the Evidence of Testimony, in different Degrees: in Degrees proportionable to the Observations they have made, or the Notions they have any Way taken up, concerning the Weakness and Negligence and Dishonesty of Mankind; or concerning the Powers of Enthusiasm, and Prejudices equivalent to it. But it seems to me, that People do not know what they say, who affirm, these things to destroy the Evidence from Testimony, which we have of the Truth of Christianity. Nothing can destroy the Evidence of Testimony in any Case, but a Proof or Probability, that Persons are not competent Judges of the Facts to which they give Testimony; or that they are actually under some indirect Influence in giving it, in such particular Case. Till this be made out, the *natural* Laws of human Actions require, that Testimony be admitted. It can never be sufficient to overthrow direct historical Evidence, indolently to say, that there are so many Principles, from whence Men are liable to be deceived themselves and disposed to deceive others, especially in Matters of Religion, that one knows not what to believe. And it is surprizing Persons can help reflecting, that this very Manner of speaking, supposes they are not satisfied, that there is nothing in the Evidence, of which they speak  
 thus;

thus; or that they can avoid observing, if they do make this Reflection, that it is, on such a Subject, a very material one.<sup>5</sup>

And over against all these Objections, is to be set, the Importance of Christianity, as what must have engaged the Attention of its first Converts, so as to have rendered them less liable to be deceived from Carelessness, than they would in common Matters; and likewise the strong Obligations to Veracity, which their Religion laid them under: So that the first and most obvious Presumption is, that they could not be deceived themselves, nor would deceive others. And this Presumption in this Degree, is peculiar to the Testimony we have been considering.

In Argument, Assertions are nothing in themselves, and have an Air of Positiveness, which sometimes is not very easy: Yet they are necessary, and necessary to be repeated; in order to connect a Discourse, and distinctly to lay before the View of the Reader, what is proposed to be proved, and what is left as proved. Now the Conclusion from the foregoing Observations, is, I think, beyond all Doubt, this: That Unbelievers must be forced to admit the external Evidence for Christianity, *i. e.* the Proof of Miracles wrought to attest it, to be of real Weight and very considerable; though they cannot allow it to be sufficient, to convince them of the Reality of those Miracles. And as they must, in all Reason, admit this, so it seems to me, that upon Consideration they would, in Fact, admit it; those of them, I mean, who know any thing at all of the Matter: In like Manner as Persons, in many Cases, own, they see strong Evidence from Testimony, for the Truth of things, which yet, they cannot be convinced are true: Cases, suppose, where there is contrary Testimony; or things which they think, whether with or without Reason, to be incredible. But there is no

<sup>5</sup> See the foregoing Chapter.

PART Testimony contrary to That which we have been considering ;  
 II. and it has been fully proved, that there is no Incredibility, in  
 Christianity in general, or in any Part of it.

II. As to the Evidence for Christianity from Prophecy, I shall only make some few general Observations ; which are suggested, by the Analogy of Nature, *i. e.* by the acknowledged natural Rules of judging in common Matters, concerning Evidence of a like Kind to this from Prophecy.

I. The Obscurity or Unintelligibleness of one Part of a Prophecy, does not, in any Degree, invalidate the Proof of Foresight, arising from the Appearing Completion of those other Parts which are understood. For the Case is evidently the same, as if those Parts which are not understood, were lost, or not written at all, or written in an unknown Tongue. Whether this Observation be commonly attended to or not, it is so evident, that one scarce knows how to set down an Instance in common Matters, to exemplify it. However, Suppose a Writing, partly in Cypher, and partly in plain Words at Length ; and that in the Part one understood, there appeared Mention of several known Facts : It would never come into any Man's Thoughts to imagine, that if he understood the Whole, perhaps he might find, that those Facts were not in Reality known by the Writer. Indeed, both in this Example and in the thing intended to be exemplified by it, our not understanding the Whole, the whole supposition of a Sentence or a Paragraph ; might sometimes occasion a Doubt, whether one understood the literal Meaning of such a Part : But this comes under another Consideration.

For the same Reason, though a Man should be incapable, for Want of Learning, or Opportunities of Inquiry, or from not having turned his Studies this Way, even so much as to judge,  
 whether

whether particular Prophecies have been throughout compleatly fulfilled; yet he may see, in general, that they have been fulfilled to such a Degree, as, upon very good Ground, to be convinced of Foresight more than human in such Prophecies, and of such Events being intended by them. For the same Reason also, though, by Means of the Deficiencies in civil History, and the different Accounts of Historians, the most learned should not be able to make out to Satisfaction, that such Parts of the prophetick History, have been minutely and throughout fulfilled; yet a very strong Proof of Foresight may arise, from That general Completion of them, which is made out: As much Proof of Foresight, perhaps, as the Giver of Prophecy intended should ever be afforded, by such Parts of Prophecy.

C H A P.  
VII.  

2. A long Series of Prophecy being applicable to such and such Events, is itself a Proof, that it was intended of them: as the Rules, by which we naturally judge and determine, in common Cases parallel to this, will shew. This Observation I make in Answer to the common Objection against the Application of the Prophecies, that considering each of them distinctly by itself, it does not at all appear, that they were intended of those particular Events, to which they are applied by Christians; and therefore it is to be supposed, that, if they meant any thing, they were intended of other Events unknown to us, and not of these at all.

Now there are two Kinds of writing, which bear a great Resemblance to Prophecy, with Respect to the Matter before us; the Mythological, and the Satyrical where the Satyr is, to a certain Degree, concealed. And a Man might be assured, that he understood what an Author intended by a Fable or Parable, related without any Application or Moral; merely from seeing it to be, easily, capable of such Application, and that such a

P A R T Moral might, naturally, be deduced from it. And he might be  
 II. fully assured, that such Persons and Events were intended in a  
 Satyrical Writing, merely from its being applicable to them. And, agreeably to the last Observation, he might be in a good Measure satisfied of it, though he were not enough informed, in Affairs, or in the Story of such Persons, to understand half the Satyr. For, his Satisfaction, that he understood the Meaning, the intended Meaning, of these Writings, would be greater or less, in Proportion as he saw, the general Turn of them to be capable of such Application; and in Proportion to the Number of particular things capable of it. And thus, if a long Series of Prophecy, is applicable, to the present State of the Church, and to the political Situations of the Kingdoms of the World, some thousand Years after these Prophecies were delivered, and a long Series of Prophecy delivered before the Coming of Christ, to him; these things are in themselves a Proof, that the prophetick History was intended of Him, and of those Events: in proportion as the general Turn of it, is capable of such Application, and to the Number and Variety of particular Prophecies, capable of it. However, though in all just way of Consideration, the appearing Completion of Prophecies, is to be allowed to be thus explanatory of, and to determine their Meaning; yet it is to be remembred farther, that the ancient Jews applied the Prophecies to a Messiah before his Coming, in much the same Manner as Christians do now: And that the primitive Christians interpreted the Prophecies respecting the State of the Church and of the World in the last Ages, in the Sense, which the Event seems to confirm and verify. And from these things, it may be made appear:

3. That the shewing even to a high Probability, if that could be, that the Prophets thought of some other Events, in such and such Predictions, and not those at all, which Christians alledge

alleged to be Completions of those Predictions ; or that such and such Prophecies are capable of being applied to other Events than those, to which Christians apply them---that this would not confute or destroy the Force of the Argument from Prophecy, even with regard to those very Instances. For, observe how this Matter really is. If one knew such a Person to be the sole Author of such a Book, and was certainly assured, or satisfied to any Degree, that one knew the Whole of what he intended in it ; one should be assured or satisfied to such Degree, that one knew the whole Meaning of that Book : for the Meaning of a Book, is nothing but the Meaning of the Author. But if one knew a Person to have compiled a Book out of Memoirs, which he received from Another, of vastly superior Knowledge in the Subject of it, especially if it were a Book full of great Intricacies and Difficulties ; it would in no wise follow, that one knew the whole Meaning of the Book, from knowing the whole Meaning of the Compiler : for the original Memoirs, *i. e.* the Author of them, might have, and there would be no Degree of Presumption, in many Cases, against supposing him to have, some farther Meaning than the Compiler saw. To say then, that the Scriptures and the things contained in them, can have no other or farther Meaning, than those Persons thought or had, who first recited or wrote them ; is evidently saying, that those Persons were the original, proper, and sole Authors of those Books, *i. e.* that they are not inspired : which is absurd, whilst the Authority of these Books is under Examination, *i. e.* till you have determined they are of no divine Authority at all. Till this be determined, it must in all Reason be supposed, not indeed that they have, for this is taking for granted that they are inspired, but that they may have, some farther Meaning than what the Compilers saw or understood. And upon this Supposition, it is supposeable also, that this farther Meaning may be fulfilled. Now Events corresponding to Prophecies,

C H A P.  
VII.  

P A R T Prophecies, interpreted in a different Meaning from That, in which the Prophets are supposed to have understood them; this affords, in a Manner, the same Proof, that this different Sense was originally intended, as it would have afforded, if the Prophets had not understood their Predictions in the Sense it is supposed they did: because there is no Presumption of Their Sense of them, being the whole Sense of them. And it has been already shewn, that the apparent Completions of Prophecy, must be allowed to be explanatory of its Meaning. So that the Question is, whether a Series of Prophecy has been fulfilled, in a natural or proper, *i. e.* in any real, Sense of the Words of it. For such Completion is equally a Proof of Foresight more than human, whether the Prophets are, or are not, supposed, to have understood it in a different Sense: I say supposed; for, though I think it clear, that the Prophets did not understand the full Meaning of their Predictions, it is another Question, how far they thought they did, and in what Sense they understood them.

Hence may be seen, to how little Purpose those Persons busy themselves, who endeavour to prove, that the prophetick History is applicable to Events, of the Age in which it was written, or of Ages before it. Indeed to have proved this before there was any Appearance of a farther Completion of it, might have answered some Purpose; for it might have prevented the Expectation of any such farther Completion. Thus could *Porphyry* have shewn, that some principal Parts of the Book of *Daniel*, for Instance, the seventh Verse of the seventh Chapter, which the Christians interpreted of the latter Ages, was applicable to Events, which happened before or about the Age of *Antiochus Epiphanes*; this might have prevented them from expecting any farther Completion of it. And, unless there was then, as I think there must have been, external Evidence concerning

cerning that Book, more than is come down to us; such a C H A P.  
 Discovery might have been a Stumbling-block in the Way of VII.  
 Christianity itself: considering the Authority which our Saviour   
 has given to the Book of *Daniel*, and how much the general  
 Scheme of Christianity presupposes the Truth of it. But even  
 This Discovery, had there been any such,<sup>i</sup> would be of very lit-  
 tle Weight with reasonable Men Now; if this Passage, thus ap-  
 plicable to Events before the Age of *Porphyry*, appears to be  
 applicable also to Events, which succeeded the Dissolution of  
 the Roman Empire. I mention this, not at all as intending to  
 insinuate, that the Division of this Empire into ten Parts, for  
 it plainly was divided into about that Number, were, alone and  
 by itself, of any Moment in verifying the prophetick History:  
 but only as an Example of the thing I am speaking of. And  
 thus upon the whole, the Matter of Enquiry evidently must  
 be, as above put, Whether the Prophecies are applicable, to  
 Christ, and to the present State of the World and of the Church;  
 applicable in such a Degree, as to imply Foresight: Not whe-  
 ther they are capable of any other Application; though I know  
 no Pretence for saying, the general Turn of them is capable of  
 any other.

These Observations are, I think, just, and the Evidence re-  
 ferred to in them, real: Though there may be People who will  
 not accept of such imperfect Information from Scripture.  
 Some too have not Integrity and Regard enough to Truth, to  
 attend to Evidence, which keeps the Mind in Doubt, perhaps  
 Perplexity, and which is much of a different Sort from what

<sup>i</sup> It appears, that *Porphyry* did nothing worth mentioning in this Way. For *Jerom* on the Place says: *Daas posteriores bestias—in uno Macedonum regno ponit.* And as to the ten Kings; *Decem reges enumerat, qui fuerunt favissimi: ipsosque reges non unius ponit regni, verbi gratia, Macedoniae, Syriae, Asiae, et Aegypti; sed de diversis regnis unum efficit regum ordinem.* And in this Way of Interpretation, any thing may be made of any thing.

P A R T

II.

they expected. And it plainly requires a Degree of Modesty and Fairness, beyond what every one has, for a Man to say, not to the World, but to Himself, that there is a real Appearance of somewhat of great Weight in this Matter, though he is not able thoroughly to satisfy himself about it; but it shall have its Influence upon him, in Proportion to its appearing Reality and Weight. It is much more easy, and more falls in with the Negligence Presumption and Willfulness of the Generality, to determine at once, with a decisive Air, There is nothing in it. The Prejudices arising from that absolute Contempt and Scorn, with which this Evidence is treated in the World, I do not mention. For what indeed can be said to Persons, who are weak enough in their Understandings, to think This any Presumption against it; or, if they do not, are yet weak enough in their Temper to be influenced, by such Prejudices, upon such a Subject.

*SECONDLY*, I shall now endeavour to give some Account of the general Argument for the Truth of Christianity, consisting both of the direct and circumstantial Evidence, considered as making up one Argument. Indeed to state and examine this Argument fully, would be a Work much beyond the Compass of this whole Treatise: Nor is so much as a proper Abridgment of it, to be expected here. Yet the present Subject requires to have some brief Account of it given. For it is the Kind of Evidence, upon which most Questions of Difficulty, in common Practice, are determined; Evidence arising from various Coincidences, which support and confirm each other, and in this Manner prove, with more or less Certainty, the Point under Consideration. And I chuse to do it also: First, because it seems to be of the greatest Importance, and not duly attended to by every one, that the Proof of Revelation is, not some direct and express things only, but a great Variety

Variety of circumstantial things also; and that though each of these direct and circumstantial things, is indeed to be considered separately, yet they are afterwards to be joined together; for that the proper Force of the Evidence consists in the Result of those several things, considered in their Respects to each other, and united into one View: And in the next Place, because it seems to me, that the matters of Fact here set down, which are acknowledged by Unbelievers, must be acknowledged by them also, to contain together, a Degree of Evidence of great Weight; if they could be brought, to lay these several things before themselves distinctly, and then with Attention consider them together; instead of that cursory Thought of them, to which we are familiarised. For being familiarised to the cursory Thought of things, as really hinders the Weight of them from being seen, as from having its due Influence upon Practice.

The thing asserted, and the Truth of which is to be enquired into, is this: That over and above our Reason and Affections, which God has given us, for the Information of our Judgment and the Conduct of our Lives, he has also, by external Revelation, given us an Account of Himself, and his moral Government over the World, implying a future State of Rewards and Punishments; *i. e.* hath revealed the System of natural Religion: for natural Religion may be, externally,<sup>k</sup> revealed by God, as the ignorant may be taught it by Mankind their Fellow-creatures——that God, I say, has given us the Evidence of Revelation, as well as the Evidence of Reason, to ascertain this moral System: together with an Account of, a particular Dispensation of Providence, which Reason could no way have discovered, and a particular Institution of Religion founded on it, for the Recovery of Mankind out of their present wretched

<sup>k</sup> P. 144, 145.

PART Condition, and raising them to the Perfection, and final Happiness of their Nature.

II.

This Revelation, whether real or supposed, may be considered as wholly historical; since Prophecy is nothing but the History of Events before they come to pass, Doctrines also are Matters of Fact, and Precepts come under the same Notion. And the general Design of Scripture, which contains in it this Revelation, thus considered as historical, may be said to be, to give us an Account of the World, in this one single View, as God's World: by which it appears essentially distinguished from all other Books, so far as I have found, except such as are copied from it. It begins with an Account of God's Creation of the World, in order to ascertain, and distinguish from all Others, Who is the Object of our Worship, by what He has done: In order to ascertain, who He is, concerning whose Providence Commands Promises and Threatnings, this sacred Book, all along, treats; the Maker and Proprietor of the World, He whose Creatures we are, the God of Nature: In order likewise to distinguish him from the Idols of the Nations, which are either imaginary Beings, *i. e.* no Beings at all; or else Part of that Creation, the historical Relation of which is here given. And St. *John*, not improbably, with an Eye to this Mosaick Account of the Creation, begins his Gospel with an Account, of our Saviour's Præexistence, and that *All things were made by him; and without him was not any thing made that was made*:<sup>1</sup> agreeably to the Doctrine of St. *Paul*, that *God created all things by Jesus Christ*.<sup>m</sup> This being premised, the Scripture, taken together, seems to profess to contain a kind of an Abridgment of the History of the World, in the View just now mentioned: that is, a general Account of the Condition of Religion and its Professors, during the Continuance of that Apostacy from

<sup>1</sup> Joh i. 3.

<sup>m</sup> Eph. iii. 9.

God, and State of Wickedness, which it every where supposes the World to lie in. And this Account of the State of Religion, carries with it some brief Account of the political State of things, as Religion is affected by it. Revelation indeed considers the common Affairs of this World, and what is going on in it, as a mere Scene of Distraction; and cannot be supposed to concern itself with foretelling, at what Time, *Rome* or *Babylon* or *Greece*, or any particular Place, should be the most conspicuous Seat of that Tyranny and Dissoluteness, which all Places equally aspire to be; cannot I say be supposed to give any Account of this wild Scene for its own Sake. But it seems to contain some very general Account of the chief Governments of the World, as the general State of Religion, has been, is, or shall be, affected by them, from the first Transgression, and during the whole Interval of the World's continuing in its present State, to a certain future Period, spoken of both in the Old and New Testament, very distinctly, and in great Variety of Expression: *The times of the restitution of all things:*<sup>n</sup> *When the mystery of God shall be finished, as he hath declared to his servants the prophets:*<sup>o</sup> *When the God of heaven shall set up a kingdom, which shall never be destroyed: And the kingdom shall not be left to other people,*<sup>p</sup> *as it is represented to be during this Apostacy, but Judgment shall be given to the saints,*<sup>q</sup> *and they shall reign:*<sup>r</sup> *And the kingdom and dominion, and the greatness of the kingdom under the whole heaven, shall be given to the people of the saints of the most High.*<sup>s</sup>

Upon this general View of the Scripture, I would remark, how great a Length of Time the whole Relation takes up, near six thousand Years of which, are past: and how great a Variety of things it treats of; the natural and moral System or History of the World, including the Time when it was formed,

<sup>n</sup> Acts iii. 21.    <sup>o</sup> Rev. x. 7.    <sup>p</sup> Dan. ii.    <sup>q</sup> Ch. vii. 22.    <sup>r</sup> Rev.    <sup>s</sup> Dan. vii.

P A R T all contained in the very first Book, and evidently written in a  
 II. rude and unlearned Age; and in subsequent Books, the various common and prophetick History, and the particular Dispensation of Christianity. Now all this together gives the largest Scope for Criticism; and Confutation of what is capable of being confuted, either from Reason, or from common History, or from any Inconsistence in its several Parts. And it is a thing which deserves, I think, to be mentioned, that whereas some imagine, the supposed Doubtfulness of the Evidence for Revelation, implies a positive Argument that it is not true; it appears, on the contrary, to imply a positive Argument that it is true. For, could any common Relation, of such Antiquity, Extent, and Variety, for in these things the Strefs of what I am now observing lies, be proposed to the Examination of the World: that it could not, in an Age of Knowledge and Liberty, be confuted, or shewn to have nothing in it, to the Satisfaction of reasonable Men; this would be thought a strong presumptive Proof of its Truth. And indeed it must be a Proof of it, just in Proportion to the Probability, that if it were false, it might be shewn to be so: Which, I think, is scarce pretended to be shewn, but upon Principles and in Ways of arguing, which have been clearly obviated.<sup>†</sup> Nor does it at all appear, that any Sett of Men who believe natural Religion, are of the Opinion, that Christianity has been thus confuted. But to proceed;

Together with the moral System of the World, the Old Testament contains, a chronological Account of the Beginning of it, and from thence, an unbroken Genealogy of Mankind for many Ages before common History begins; and carried on as much farther, as to make up a continued Thread of History the Length of between three

<sup>†</sup> Ch. ii, iii, &c.

and four thousand Years. It contains an Account, of God's making a Covenant with a particular Nation, that they should be his People, and He would be their God, in a peculiar Sense; of his often interposing miraculously in their Affairs; giving them the Promise, and, long after, the Possession, of a particular Country; assuring them of the greatest national Prosperity in it, if they would worship him, in Opposition to the Idols which the rest of the World worshipped, and obey his Commands; and threatenng them with unexampled Punishments, if they disobeyed him, and fell into the general Idolatry: inso-much that this one Nation should continue to be, the Observation and the Wonder of all the World. It declares particularly, that *God would scatter them among all people, from one end of the earth unto the other: but that when they should return unto the Lord their God, he would have compassion upon them, and gather them from all the nations, whither he had scattered them: that Israel should be saved in the Lord, with an everlasting salvation; and not be ashamed or confounded world without end.* And as some of these Promises are conditional, others are as absolute, as any thing can be expressed: That the Time should come, when *the people should be all righteous, and inherit the land for ever: that though God would make a full end of all nations whither he had scattered them, yet would he not make a full end of them: that he would bring again the captivity of his people Israel, and plant them upon their land, and they should be no more pulled up out of their land: that the seed of Israel should not cease from being a nation for ever.*<sup>u</sup> It foretells, that God would raise them up a particular Person, in whom all his Promises should finally be fulfilled; the Messiah, who should be, in an high and eminent Sense, their anointed Prince and Saviour. This was foretold in such a Manner, as raised a general Expecta-

<sup>u</sup> Deut. xxviii. 64. Ch. xxx. 2, 3. Is. xlv. 17. Ch. lx. 21. Jer. xxx. 11. Ch. xlv. 28. Amos ix. 15. Jer. xxxi. 35.

P A R T II. tion of such a Person in the Nation, as appears from the New Testament, and is an acknowledged Fact; an Expectation of his coming at such a particular Time, before any one appeared claiming to be That Person, and when there was no Ground for such an Expectation but from the Prophecies: which Expectation, therefore, must in all Reason be presumed to be explanatory of those Prophecies, if there were any Doubt about their Meaning. It seems moreover to foretell, that this Person should be rejected by that Nation, to whom he had been so long promised, and though he was so much desired by them.\* And it expressly foretells, that he should be the Saviour of the Gentiles; that the Completion of the Scheme, contained in this Book, and then begun, and in its Progress, should be somewhat so great, that God is represented as declaring; *It is a light thing that thou shouldst be my servant to raise up the tribes of Jacob, and to restore the preserved of Israel: I will also give thee for a light to the Gentiles, that thou mayst be for salvation unto the end of the earth: That in the last days, the mountain of the Lords house shall be established in the top of the mountains, and shall be exalted above the hills; and all nations shall flow into it—for out of Zion shall go forth the law, and the word of the Lord from Jerusalem. And he shall judge among the nations—and the Lord alone shall be exalted in that day, And the Idols be shall utterly abolish.*† The Scripture farther contains an Account, that at the Time the Messiah was expected, a Person rose up, in this Nation, claiming to be that Messiah, to be the Person, whom all the Prophecies referred to, and in whom they should center; that he spent some Years in a continued Course of miraculous Works; endued his immediate Disciples and Followers with a Power of doing the same, as a Proof of the Truth of that Religion, which he commissioned

\* If. viii. 14, 15. Ch. xlix. 5. Ch. liii. Mal. i. 10, 11. and Ch. iii. † If. xlix. 6. Ch. ii. Ch. xi. Ch. lvi. 7. Mal. i. 11. To which must be added, the other Prophecies of the like Kind, several in the New Testament, and very many in the Old; which describe, what shall be the Completion of the revealed Plan of Providence.

them to publish; that invested with this Authority and Power, they made numerous Converts, in the remotest Countries, and settled and established his Religion in the World; to the End of which, the Scripture professes to give a prophetick Account of the State of this Religion amongst Mankind. .

CHAP.  
VII.

Let us now suppose a Person utterly ignorant of History, to have all this related to him, out of the Scripture. Or suppose such an one, having the Scripture put into his hands, to remark these things in it, not knowing but that the Whole, even its civil History, as well as the other Parts of it, might be, from Beginning to End, an intire Invention; and to ask, What Truth was in it, and whether the Revelation here related, was real or a Fiction? And instead of a direct Answer, suppose him, all at once, to be told the following confessed Facts; and then to unite them into one View.

Let him first be told, in how great a Degree the Profession and Establishment of natural Religion, the Belief that there is one God to be worshipped, that Virtue is his Law, and that Mankind shall be rewarded and punished Hereafter, as they obey and disobey it Here; in how very great a Degree, I say, the Profession and Establishment of this moral System in the World, is owing to the Revelation, whether real or supposed; contained in this Book: the Establishment of this moral System, even in those Countries which do not acknowledge the proper Authority of the Scripture.<sup>2</sup> Let him be told also, what Number of Nations do acknowledge its proper Authority. Let him then take in the Consideration of what Importance Religion is to Mankind. And upon these things, he might, I think, truly observe, that this supposed Revelation's obtaining and being received in the World, with all the Circumstances and Effects

<sup>2</sup> p. 218.

P A R T  
II.

of it, considered together as one Event; is the most conspicuous and important Event in the Story of Mankind: that a Book of this Nature, and thus promulged and recommended to our Consideration, demands, as if by a Voice from Heaven, to have its Claims most seriously examined into: and that, before such Examination, to treat it with any Kind of Scoffing and Ridicule, is an Offence against natural Piety. But it is to be remembered, that how much soever the Establishment of natural Religion in the World, is owing to the Scripture-revelation, this does not destroy the Proof of Religion from Reason; any more than the Proof of *Euclid's Elements*, is destroyed, by a Man's knowing or thinking, that he should never have seen the Truth of the several Propositions contained in it, nor had those Propositions come into his Thoughts, but for that Mathematician.

Let such a Person as we are speaking of, be, in the next Place, informed, of the acknowledged Antiquity of the first Parts of this Book: And that its Chronology, its Account of the Time when the Earth, and the several Parts of it, were first peopled with human Creatures, is no way contradicted, but is really confirmed, by the natural and civil History of the World; collected from common Historians, from the State of the Earth, and from the late Invention of Arts and Sciences. And as the Scripture contains an unbroken Thread of common and civil History, from the Creation to the Captivity, for between three and four thousand Years: Let the Person we are speaking of be told in the next place, that this general History, as it is not contradicted, but is confirmed by prophane History as much as there would be reason to expect, upon Supposition of its Truth; so there is nothing in the whole History *itself*, to give any reasonable Ground of Suspicion, of its not being, in the general, a faithful and literally true Genealogy of Men,  
and

and Series of things. I speak here only of the common Scripture-history, or of the Course of ordinary Events related in it; as distinguished from Miracles, and from the prophetick History. In all the Scripture-narrations of this Kind, following Events arise out of foregoing ones, as in all other Histories. There appears nothing related as done in any Age, not conformable to the Manners of that Age; nothing in the Account of a succeeding Age, which, one would say, could not be true, or was improbable, from the Account of things in the preceding one. There is nothing in the Characters, which would raise a Thought of their being feigned; but all the internal Marks imaginable of their being real. It is to be added also, that mere Genealogies, bare Narratives of the Number of Years, which Persons called by such and such Names lived, do not carry the Face of Fiction, perhaps do carry some Presumption of Veracity; and all unadorned Narratives, which have nothing to surprize, may be thought to carry somewhat of the like Presumption too. And the domestick and the political History is plainly credible. There may be Incidents, in Scripture, which taken alone in the naked way they are told, may appear strange; especially to Persons of other Manners, Temper, Education: But there are also Incidents of undoubted Truth, in many or most Persons Lives, which, in the same Circumstances, would appear to the full as strange. There may be Mistakes of Transcribers, there may be other real or seeming Mistakes, not easy to be, particularly, accounted for: But there are certainly no more things of this Kind in the Scripture, than what were to have been expected in Books of such Antiquity; and Nothing, in any wise, sufficient to discredit the general Narrative. Now, that a History claiming to commence from the Creation, and extending in one continued Series, through so great a Length of Time, and Variety of Events, should have such Appearances of Reality and Truth in its whole Contexture, is surely a very

P A R T remarkable Circumstance in its Favour. And as all this is applicable to the common History of the New Testament; so there is a farther Credibility, and a very high one, given to it, by profane Authors: many of these writing of the same Times, and confirming the Truth of Customs and Events, which are incidentally as well as more purposely mentioned in it. And this Credibility of the common Scripture-history, gives some Credibility to its miraculous History; especially as this is interwoven with the common, so as that they imply each other, and both together make up one Relation.

Let it then be more particularly observed to this Person, that it is an acknowledged Matter of Fact, which is indeed implied in the foregoing Observation, that there was such a Nation as the *Jews*, of the greatest Antiquity, whose Government and general Polity was founded on the Law, here related to be given them by *Moses* as from Heaven; that natural Religion, with Rites additional though no way contrary to it, was their established Religion, which cannot be said of the gentile World; and that their very Being as a Nation, depended upon their Acknowledgment of one God, the God of the Universe. For, suppose in their Captivity in *Babylon*, they had gone over to the Religion of their Conquerors, there would have remained no Bond of Union, to keep them a distinct People. And whilst they were under their own Kings, in their own Country, a total Apostacy from God would have been the Dissolution of their whole Government. They, in such a Sense, nationally acknowledged and worshipped the Maker of Heaven and Earth, when the rest of the World were sunk in Idolatry, as rendered them, in Fact, the peculiar People of God. And this so remarkable an Establishment and Preservation of natural Religion amongst them, seems to add some peculiar Credibility to the historical

Evidence for the Miracles of *Moses* and the Prophets: Because these Miracles are a full satisfactory Account of this Event, which plainly wants to be accounted for, and cannot otherwise.

C H A P.  
VII.  

Let this Person, supposed wholly ignorant of History, be acquainted farther, that One claiming to be the Messiah, of Jewish Extraction, rose up at the Time this Nation expected the Messiah, from the Prophecies abovementioned: that he was rejected, as it seemed to have been foretold he should, by the Body of the People, under the Direction of their Rulers: that in the Course of a very few Years, he was believed on and acknowledged as the promised Messiah, by great Numbers among the Gentiles, agreeably to the Prophecies of Scripture, yet not upon the Evidence of Prophecy, but of Miracles,<sup>b</sup> of which Miracles we also have strong historical Evidence; by which I mean here no more than must be acknowledged by Unbelievers, for let pious Frauds and Follies be admitted to weaken, it is absurd to say they destroy, our Evidence of Miracles wrought in Proof of Christianity:<sup>c</sup> that this Religion approving itself to the Reason of Mankind, and carrying its own Evidence with it, so far as Reason is a Judge of its System, and no way contrary to Reason, in those Parts of it, which require to be believed upon the mere Authority of its Author; that this Religion, I say, gradually spread and supported itself, for some hundred Years, not only without any Assistance from temporal Power, but under constant Discouragements, and often the bitterest Persecutions from it; and then became the Religion of the World: that in the mean Time, the Jewish Nation and Government were destroyed, in a very remarkable Manner, and the People carried away captive and dispersed through the most distant Countries; in which State of Dispersion, they have remained fifteen hundred Years: and that they remain a nume-

<sup>b</sup> p. 241.

<sup>c</sup> p. 248, 249.

PART rous People, united amongst themselves, and distinguished from the rest of the World, as they were in the Days of *Moses*, by the Profession of his Law; and every where looked upon in a Manner, which one scarce knows how distinctly to express, but in the Words of the prophetick Account of it, given so many Ages before it came to pass; *Thou shalt become an astonishment, a proverb, and a by-word, among all nations whither the Lord shall lead thee.*<sup>d</sup>

The Appearance of a standing Miracle, in the *Jews* remaining a distinct People in their Dispersion, and the Confirmation which this Event appears to give to the Truth of Revelation; may be thought to be answered, by their Religion's forbidding them Inter-mariages with Foreigners, and prescribing them a particular Kind of Food, by which, they are debarred from the Means of incorporating with the People, in whose Countries they live. This is not, I think, a satisfactory Account of That which it pretends to account for. But what does it pretend to account for? The Correspondence between this Event and the Prophecies; or the Coincidence of both, with a long Dispensation of Providence of a peculiar Nature, towards that People formerly? No. It is only the Event itself, which is offered to be thus accounted for; which single Event taken alone, abstracted from all such Correspondence and Coincidence, perhaps would not have appeared miraculous: but That Correspondence and Coincidence may be so, though the Event itself be supposed not. As the Concurrence of our Saviour's being born at *Bethlehem*, with a long foregoing Series of Prophecy and other Coincidences, is doubtless miraculous, the Series of Prophecy, and other Coincidences, and the Event, being admitted; though the Event itself, his Birth at that Place, appears to have been brought

<sup>d</sup> Deut. xxviii. 37.

about in a natural Way, of which, however, no one can be certain.

And as several of these Events seem, in some Degree expressly, to have verified the prophetick History already; so likewise they may be considered farther, as having a peculiar Aspect towards the full Completion of it; as affording some Presumption that the Whole of it shall, one time or other, be fulfilled. Thus, that the *Jews* have been so wonderfully preserved in their long and wide Dispersion; which is indeed the direct Fulfilling of some Prophecies, but is now mentioned only as looking forward to somewhat yet to come: that natural Religion came forth from *Judea*, and spread, in the Degree it has done, over the World before lost in Idolatry; which, together with some other things, have distinguished that very Place, in like Manner, as the People of it are distinguished: that this great Change of Religion over the Earth, was brought about under the Profession and Acknowledgment, that *Jesus* was the promised Messiah—Things of this Kind, naturally, turn the Thoughts of serious Men, towards the full Completion of the prophetick History, concerning the final Restoration of that People; concerning the Establishment of the everlasting Kingdom among them, the Kingdom of the Messiah; and the future State of the World, under this sacred Government. Such Circumstances and Events compared with these Prophecies, though no Completions of them, yet would not, I think, be spoken of as Nothing in the Argument, by a Person upon his first being informed of them. They fall in with the prophetick History of things still future, give it some additional Credibility, have the Appearance of being somewhat in Order to the full Completion of it.

Indeed

PART II.  Indeed it requires a good Degree of Knowledge, and great Calmness and Consideration, to be able to judge, thoroughly, of the Evidence for the Truth of Christianity, from that Part of the prophetick History, which relates to the Situation of the Kingdoms of the World, and to the State of the Church, from the Establishment of Christianity to the present Time. But it appears, from a general View of it, to be very material. And those Persons who have thoroughly examined it, and some of them were Men of the coolest Tempers, greatest Capacities, and least liable to Imputations of Prejudice, insist upon it as determinately conclusive.

Suppose now a Person quite ignorant of History, first to recollect the Passages abovementioned out of Scripture, without knowing but that the Whole was a late Fiction, then to be informed of the correspondent Facts now mentioned, and to unite them all into one View: That the Profession and Establishment of natural Religion in the World, is greatly owing, in different Ways, to this Book, and the supposed Revelation which it contains; that it is acknowledged to be of the earliest Antiquity; that its Chronology and common History are intirely credible; that this antient Nation, the *Jews*, of whom it chiefly treats, appear to have been, in Fact, the People of God, in a distinguished Sense; that, as there was a national Expectation amongst them of a Messiah, to appear at such a Time, raised from the Prophecies, so one at this Time appeared claiming to be that Messiah; that He was rejected by this Nation; but received by the Gentiles, not upon the Evidence of Prophecy, but of Miracles; that the Religion he taught supported itself under the greatest Difficulties, gained Ground, and at length became the Religion of the World; that in the mean Time the Jewish Polity was utterly destroyed, and the Nation dispersed over the  
Face

Face of the Earth; that notwithstanding this, they have remained a distinct numerous People for so many Centuries, even to this Day; which not only appears to be the express Completion of several Prophecies concerning them; but also renders it, as one may speak, a visible and easy Possibility, that the Promises made to them as a Nation, may yet be fulfilled. And to these acknowledged Truths, let the Person we have been supposing, add, as I think he ought, whether every one will allow it or no, the obvious Appearances which there are, of the State of the World, in other Respects besides what relates to the *Jews*, and of the Christian Church, having so long answered, and still answering to the prophetick History. Suppose, I say, these Facts set over against the things before mentioned out of the Scripture, and seriously compared with them; The joint View of both together, must, I think, appear of very great Weight to a considerate reasonable Person: of much greater indeed, upon having them first laid before him, than is easy for us, who are so familiarised to them, to conceive, without some particular Attention for that Purpose.

All these things, and the several Particulars contained under them, require to be, distinctly and most thoroughly, examined into; that the Weight of each may be judged of, upon such Examination, and such Conclusion drawn as results from their united Force. But this has not been attempted here. I have gone no farther than to show, that the general imperfect View of them now given, the confessed historical Evidence for Miracles, and the many obvious appearing Completions of Prophecy, together with the collateral things <sup>f</sup> here mentioned, and there are several others of the like sort; that all this together, which being Fact, must be acknowledged by Unbelievers, amounts to

<sup>f</sup> All the particular things mentioned in this Chapter, not reduceible to the Head, of certain Miracles, or determinate Completions of Prophecy. See p. 236.

P A R T.

II.

real Evidence of somewhat more than human in this Matter: Evidence much more important, than careless Men, who have been accustomed only to transient and partial Views of it, can imagine; and indeed abundantly sufficient to act upon. And these things, I apprehend, must be acknowledged by Unbelievers. For though they may say, that the historical Evidence of Miracles wrought in Attestation of Christianity, is not sufficient to convince them, that such Miracles were really wrought; they cannot deny, that there is such historical Evidence, it being a known matter of Fact, that there is. They may say, the Conformity between the Prophecies and Events, is by accident; but there are many Instances, in which such Conformity itself cannot be denied. They may say, with regard to such Kind of collateral things as those abovementioned, that any odd accidental Events, without Meaning, will have a Meaning found in them, by fanciful People; and that such as are fanciful in any one certain Way, will make out a thousand Coincidences, which seem to favour their peculiar Follies. Men, I say, may talk thus: But no one who is serious, can possibly think these things to be nothing, if he considers the Importance of collateral things, and even of lesser Circumstances, in the Evidence of Probability, as distinguished, in Nature, from the Evidence of Demonstration. In many Cases indeed it seems to require the truest Judgment, to determine with Exactness the Weight of circumstantial Evidence; but it is very often altogether as convincing, as That, which is the most express and direct.

This general View of the Evidence for Christianity, considered as making one Argument, may also serve to recommend to serious Persons, to set down every thing, which they think may be of any real Weight at all in Proof of it, and particularly the many seeming Completions of Prophecy: and they will find, that, judging by the natural Rules, by which we judge

of

of probable Evidence in common Matters, they amount to a much higher Degree of Proof, upon such a joint Review, than could be supposed upon considering them separately, at different Times; how strong soever the Proof might before appear to them, upon such separate Views of it. For probable Proofs, by being added, not only increase the Evidence, but multiply it. Nor should I dissuade any one from setting down, what he thought made for the contrary Side. But then it is to be remembered, not in order to influence his Judgment, but his Practice, that a Mistake on one side, may be, in its Consequences, much more dangerous, than a Mistake on the other. And what Course is most safe, and what most dangerous, is a Consideration thought very material, when we deliberate, not concerning Events, but concerning Conduct in our temporal Affairs. To be influenced by this Consideration, in our Judgment, to believe or disbelieve, is indeed as much Prejudice, as any thing whatever. And, like other Prejudices, it operates contrary Ways, in different Men. For some are inclined to believe, what they hope, and Others, what they fear. And it is manifest Unreasonableness, to apply to Men's Passions in order to gain their Assent. But in Deliberations concerning Conduct, there is nothing which Reason more requires to be taken into the Account, than the Importance of it. For, suppose it doubtful, what would be the Consequence of acting in this, or in a contrary Manner; that one could be attended with little or no bad Consequence, and the other might, with the greatest, must appear to unprejudiced Reason, of the highest Moment towards determining, how we are to act. But the Truth of our Religion, like the Truth of common Matters, is to be judged of by all the Evidence taken together. And unless the whole Series of things to be alledged in this Argument, and every particular thing in it, can reasonably be supposed to have been by Accident, for here the Stress of the Argument for Christianity lies, then is the

PART II. Truth of it proved: In like manner, as if in any common Case, numerous Events acknowledged, were to be alledged in Proof of another Event disputed; the Truth of the disputed Event would be proved, not only if any one of the acknowledged ones did of itself clearly imply it, but, though no one of them singly did so, if the Whole of the acknowledged Events taken together, could not in Reason be supposed to have happened, unless the disputed one were true.

It is obvious, how much Advantage, the Nature of this Evidence gives to those Persons, who attack Christianity, especially in Conversation. For it is easy to shew, in a short and lively Manner, that such and such things are liable to Objection, that this and another thing, is of little Weight in itself; but impossible in like manner to shew, the united Force of the whole Argument in one View.

However, Lastly, as it has been made appear, that there is no Presumption against a Revelation as miraculous, that the general Scheme of Christianity, and the principal Parts of it, are conformable to the experienced Constitution of things, and the Whole perfectly credible: So the Account now given of the positive Evidence for it, shews, that this Evidence is such, as, from the Nature of it, cannot be destroyed; though it should be lessened.

## C H A P. VIII.

*Of the Objections which may be made against arguing, from the Analogy of Nature, to Religion.*

**I**F every one would consider with such Attention, as they are bound, even in Point of Morality, to consider, what they judge and give Characters of; the Occasion of this Chapter would be, in some good Measure at least, superseded. But since this is not to be expected; for some we find do not concern themselves to understand even what they write against: Since this Treatise, in common with most others, lies open to Objections, which may appear very material to thoughtful Men at first sight; And, besides That, seems peculiarly liable to the Objections, of such as can judge without thinking, and of such as can censure without judging; it may not be amiss to set down the chief of these Objections which occur to me, and consider them to their Hands. And they are such as these;

C H.  
VIII.

That it is a poor thing to solve Difficulties in Revelation, by saying, that there are the same in Natural Religion; when what is wanting is to clear both of them, of these their common, as well as other their respective, Difficulties: But that it is a strange Way indeed of convincing Men of the Obligations of Religion, to shew them, that they have as little Reason for their worldly Pursuits: And a strange Way of vindicating the Justice and Goodness of the Author of Nature, and of removing the Objections against both, to which the System of Religion lies

P A R T

II.

open, to shew, that the like Objections lie against natural Providence; a way of answering Objections against Religion, without so much as pretending to make out, that the System of it, or the particular things in it objected against, are reasonable—especially, perhaps some may be inattentive enough to add, must this be thought strange, when it is confessed that Analogy is no Answer to such Objections: That when this Sort of Reasoning is carried to the utmost length it can be imagined capable of, it will yet leave the Mind in a very unsatisfied State: And that it must be unaccountable Ignorance of Mankind to imagine, they will be prevailed with to foregoe their present Interests and Pleasures, from Regard to Religion, upon doubtful Evidence.

Now, as plausible as this Way of talking may appear, that Appearance will be found in a great Measure owing, to Half-views, which shew but Part of an Object, yet shew That indistinctly, and to undeterminate Language. By this Means weak Men are often deceived by others, and ludicrous Men, by themselves: And even those who are serious and considerate cannot always, readily disintangle, and at once clearly see through the Perplexities, in which Subjects themselves are involved; and which are heightened by the Deficiencies and the Abuse of Words. To this latter sort of Persons, the following Reply to each Part of this Objection severally, may be of some Assistance; as it may also tend a little to stop and silence Others.

*First.* The thing wanted, *i. e.* what Men require, is to have all Difficulties cleared. And this is, or, at least for any thing we know to the contrary, it may be, the same, as requiring to comprehend the divine Nature, and the whole Plan of Providence from everlasting to everlasting. But it hath always been allowed to argue, from what is acknowledged, to what is disputed.

puted. And it is in no other Sense a poor thing, to argue from natural Religion to revealed, in the Manner found Fault with, than it is to argue in numberless other ways of probable Deduction and Inference, in Matters of Conduct, which we are continually reduced to the Necessity of doing. Indeed the Epithet *poor*, may be applied, I fear as properly, to great Part or the whole of human Life, as it is to the things mentioned in the Objection. Is it not a poor thing, for a Physician to have so little Knowledge in the Cure of Diseases, as even the most eminent have? To act upon Conjecture and Guess, where the Life of Man is concerned? Undoubtedly it is; but not in Comparison of having no Skill at all in that useful Art, and being obliged to act wholly in the Dark.

Further, since it is as unreasonable, as it is common, to urge Objections against Revelation, which are of equal Weight against natural Religion; and Those who do this, if they are not confused Themselves, deal unfairly with Others, in making it seem, that they are arguing only against Revelation, or particular Doctrines of it, when in Reality they are arguing against moral Providence; it is a thing of Consequence to show, that such Objections are as much levelled against natural Religion, as against revealed. And Objections which are equally applicable to both, are properly speaking answered, by its being shown that they are so, provided the former be admitted to be true. And without taking in the Consideration how distinctly This is admitted, it is plainly very material to observe, that as the things objected against in natural Religion, are of the same Kind with what is certain Matter of Experience, in the Course of Providence, and in the Information which God affords us concerning our temporal Interest, under his natural Government; so the Objections against the System of Christianity and the Evidence of it, are of the very same Kind with Those which are made

P A R T made against the System and Evidence of natural Religion.

II.  

However, the Reader upon Review may see, that most of the Analogies insisted upon, even in the latter Part of this Treatise, do not necessarily require to have more taken for granted than is in the former ; that there is an Author of Nature, or natural Governor of the World : and Christianity is vindicated, not from its Analogy to natural Religion, but chiefly, from its Analogy to the experienced Constitution of Nature.

*Secondly.* Religion is a practical thing, and consists in such a determinate Course of Life ; as what there is Reason to think, is commanded by the Author of Nature, and will, upon the whole, be our Happiness under His Government. Now if Men can be convinced, that they have the like Reason to believe this, as to believe, that taking Care of their temporal Affairs, will be to their Advantage ; such Conviction cannot but be an Argument to them for the Practice of Religion. And if there be really any Reason for believing one of these, and endeavouring to preserve Life, and secure ourselves the Necessaries and Conveniences of it ; then there is Reason also for believing the other, and endeavouring to secure the Interest it proposes to us. And if the Interest which Religion proposes to us, be infinitely greater than our whole temporal Interest, then there must be proportionably greater Reason, for endeavouring to secure one, than the other ; since, by the Supposition, the Probability of our securing one, is equal to the Probability of our securing the other. This seems plainly unanswerable ; and has a Tendency to influence fair Minds, who consider what our Condition really is, or upon what Evidence we are naturally appointed to act ; and who are disposed to acquiesce in the Terms upon which we live, and attend to and follow That practical Instruction, whatever it be, which is afforded us.

But the chief and proper Force of the Argument referred to in the Objection, lies in another Place. For, the Proof of Religion is said to be involved in such inextricable Difficulties, as to render it doubtful; and that it cannot be supposed, that if it were true, it would be left upon doubtful Evidence. Here then, over and above the Force of each particular Difficulty or Objection, these Difficulties and Objections taken together, are turned into a positive Argument against the Truth of Religion; which Argument would stand thus: If Religion were true, it would not be left doubtful, and open to Objections to the Degree in which it is; therefore that it is thus left, not only renders the Evidence of it weak, and lessens its Force, in Proportion to the Weight of such Objections, but also shews it to be false; or is a general Presumption of this. Now the Observation, that from the natural Constitution and Course of things, we must in our temporal Concerns, almost continually, and in Matters of great Consequence, act upon Evidence of a like Kind and Degree to the Evidence of Religion; is an Answer to this Argument: because it shews, that it is according to the Conduct and Character of the Author of Nature, to appoint we should act upon Evidence like to That, which this Argument presumes He cannot be supposed to appoint we should act upon: It is an Instance, a general one made up of numerous particular ones, of somewhat in His Dealing with us, similar to what is said to be incredible. And as the Force of this Answer, lies merely in the Parallel which there is, between the Evidence for Religion and for our temporal Conduct; the Answer is equally just and conclusive, whether the Parallel be made out, by shewing, the Evidence of the former to be higher, or the Evidence of the latter to be lower.

C H A P.  
VIII.  

*Thirdly.*

P A R T

II.

*Thirdly.* The Design of this Treatise, is not to vindicate the Character of God, but to shew the Obligations of Men: It is not to justify His Providence, but to shew what belongs to Us to do. These are two Subjects, and ought not to be confounded: And though they may at length run up into each other, yet Observations may immediately tend to make out the latter, which do not appear, by any immediate Connection, to the Purpose of the former; which is less our Concern than many seem to think. For, First, It is not necessary we should justify the Dispensations of Providence against Objections, any farther than to shew, that the things objected against may, for ought we know, be consistent with Justice and Goodness. Suppose then, that there are things in the System of this World, and Plan of Providence relating to it, which taken alone would be unjust; yet, it has been shewn unanswerably, that if we could take in the Reference, which these things may have, to other things present, past and to come, to the whole Scheme which the things objected against, are Parts of; these very things might, for ought we know, be found to be, not only consistent with Justice, but Instances of it. Indeed it has been shewn, by the Analogy of what we see, not only possible that this may be the Case, but credible that it is. And thus Objections drawn from such things, are answered, and Providence is vindicated, as far as Religion makes its Vindication necessary. Hence it appears, Secondly, that Objections against the divine Justice and Goodness, are not endeavoured to be removed by shewing, that the like Objections allowed to be relly conclusive, lie against natural Providence: but those Objections being supposed and shewn not to be conclusive, the things objected against, considered as Matters of Fact, are farther shewn to be credible, from their Conformity to the Constitution of Nature; for Instance, that God will reward and punish Men for their Actions Hereafter, from the Observation, that He does reward and punish them for their Actions Here. And this, I apprehend,

is of Weight ; And, I add Thirdly, would be so too, even though those Objections were not answered. For, there being the Proof of Religion above set down ; and Religion implying several Facts, for Instance again, the Fact last mentioned, that God will reward and punish Men for their Actions Hereafter ; the Observation, that his present Method of Government is by Rewards and Punishments, shews That future Fact not to be incredible : whatever Objections Men may think they have against it, as unjust or unmerciful, according to their Notions of Justice and Mercy ; or as improbable from their Belief of Necessity : I say as improbable, for it is evident no Objection against it *as unjust*, can be urged from Necessity ; since this Notion as much destroys Injustice, as it does Justice. Then Fourthly, Though Objections against the Reasonableness of the System of Religion, cannot indeed be answered without entering into Consideration of its Reasonableness ; yet Objections against the Credibility or Truth of it, may. Because the System of it, is reducible into what is properly Matter of Fact : And the Truth, the probable Truth, of Facts, may be shewn without Consideration of their Reasonableness. Nor is it necessary, though, in some Cases and Respects, it is highly useful and proper, yet it is not necessary, to give a Proof of the Reasonableness, of every Precept enjoined us, and of every particular Dispensation of Providence, which comes into the System of Religion. Indeed the more thoroughly a Person of a right Disposition, is convinced of the Perfection of the divine Nature, and Conduct, the farther he will advance towards that Perfection of Religion, which St. *John*<sup>a</sup> speaks of. But the general Obligations of Religion are fully made out, by proving the Reasonableness of the Practice of it : And that the Practice of Religion *is* reasonable, may be shewn, though no more could be proved, than that the System of it *may be* so, for ought we know to the contrary ; and

C H A P.  
VIII.  
~~~~~

<sup>a</sup> 1 Joh. iv. 18

P A R T even without entering into the distinct Consideration of this.  
 II. And from hence, Fifthly, It is easy to see, that though the Analogy of Nature is not an immediate Answer to Objections against the Wisdom, the Justice or Goodness, of any Doctrine or Precept of Religion; yet, it may be, as it is, an immediate and direct Answer to what is really intended by such Objections, which is to shew, that the things objected against are incredible.

*Fourthly.* It is most readily acknowledged, that the foregoing Treatise is by no means satisfactory; very far indeed from it: But so would any natural Institution of Life appear, if reduced into a System, together with its Evidence. Leaving Religion out of the Case, Men are divided in their Opinions, Whether our Pleasures overbalance our Pains: And Whether it be, or be not, eligible to live in this World. And were all such Controversies settled, which, perhaps in Speculation, would be found involved in great Difficulties; and were it determined upon the Evidence of Reason, as Nature has determined it to our Hands, that Life is to be preserved: Yet still, the Rules which God has been pleased to afford us, for escaping the Miseries of it, and obtaining its Satisfaction, the Rules, for Instance, of preserving Health, and recovering it when lost; are not only fallible and precarious, but very far from being exact. Nor are we informed by Nature, in future Contingencies and Accidents, so as to render it at all certain, what is the best Method of managing our Affairs. What will be the Success of our temporal Pursuits, in the common Sense of the Word Success, is highly doubtful. And what will be the Success of them, in the proper Sense of the Word; *i. e.* what Happiness or Enjoyment we shall obtain by them, is so, in a higher Degree. Indeed the unsatisfactory Nature of the Evidence, with which we are obliged to take up, in the daily Course of Life, is scarce to be expressed. Yet Men do not throw away Life, or disregard the

the Interests of it, upon Account of this Doubtfulness. The Evidence of Religion then being admitted real, those who object against it, as not satisfactory, *i. e.* as not being what they wish it, plainly forget the very Condition of our Being: For Satisfaction, in this Sense, does not belong to such a Creature as Man. And, which is more material, they forget also the very Nature of Religion. For, Religion presupposes in all those who will embrace it, a certain Degree of Integrity and Honesty, which it was intended to try whether Men have or not, and to exercise in such as have it, in order to its Improvement. Religion presupposes this, as much, and in the same sense, as speaking to a Man, presupposes he understands the Language in which you speak; or as Warning a Man of any Danger, presupposes that he hath such a Regard to himself, as that he will endeavour to avoid it. And therefore the Question is not at all, Whether the Evidence of Religion be satisfactory, but Whether it be, in Reason, sufficient to prove and discipline That Virtue, which it presupposes. Now the Evidence of it is fully sufficient, for all those Purposes of Probation; how far soever from being satisfactory, as to the Purposes of Curiosity, or any other: And indeed it answers the Purposes of the former in several Respects, which it would not do, if it were as overbearing as is required. One might add farther; that Whether the Motives or the Evidence for any Course of Action, be satisfactory, meaning here by that Word, what satisfies a Man, that such a Course of Action will in Event be for his Good; this need never be, I think strictly speaking, never is, the practical Question in common Matters. But the practical Question in all Cases, is, Whether the Evidence for a Course of Action be such, as, taking in all Circumstances, makes the Faculty within us which is the Guide and Judge of Conduct,<sup>b</sup> determine that Course of Action to be prudent. In-

C H A P.  
VIII.  
~~~~~

<sup>b</sup> See Dissert. II.

P A R T II.  deed Satisfaction that it will be for our Interest or Happiness, abundantly determines an Action to be prudent: But Evidence almost infinitely lower than this, determines Actions to be so too; even in the Conduct of every Day.

*Fifthly.* As to the Objection concerning the Influence which this Argument, or any Part of it, may, or may not, be expected to have upon Men: I observe, as above, that Religion being intended for a Trial and Exercise of the Morality of every Person's Character, who is a Subject of it; And there being, as I have shewn, such Evidence for it as is sufficient, in Reason, to influence Men to embrace it: To object, that it is not to be imagined Mankind will be influenced by such Evidence, is nothing to the Purpose of the foregoing Treatise. For the Purpose of it is not to inquire, what Sort of Creatures Mankind are; but what, the Light and Knowledge which is afforded them, requires they should be; to shew how, in Reason, they ought to behave, not how, in Fact, they will behave. This depends upon themselves, and is their own Concern; the personal Concern of each Man in particular. And how little Regard the Generality have to it, Experience indeed does too fully shew. But Religion, considered as a Probation, has had its End upon all Persons, to whom it has been propos'd with Evidence sufficient in Reason to influence their Practice: For by this Means they have been put into a State of Probation; behave as they will in it. And thus, not only Revelation, but Reason also, teaches us, that by the Evidence of Religion being laid before Men, the Designs of Providence are carrying on, not only with regard to those who will, but likewise with regard to those who will not, be influenced by it. However, Lastly, The Objection here referred to, allows the things insisted upon in this Treatise, to be of some Weight: And if so, it may be hop'd it will have

some Influence. And if there be a Probability that it will have any at all, there is the same Reason in Kind though not in Degree, to lay it before Men, as there would be, if it were likely to have a greater Influence.

And farther, I desire it may be considered, with respect to the Whole of the foregoing Objections, that in this Treatise I have argued upon the Principles of Others<sup>c</sup>, not my own; and have omitted what I think true, and of the utmost Importance, because by Others thought unintelligible, or not true. Thus I have argued upon the Principles of the Fatalists, which I do not believe: and have omitted what I do believe, the moral Fitness and Unfitness of Actions, prior to all Will whatever; which as certainly determine the divine Conduct, as speculative Truth and Falshood necessarily determine the divine Judgment: And which is undoubtedly a thing of the utmost Importance. Indeed the Principle of Liberty and That of moral Fitness, so force themselves upon the Mind, that Moralists, the Ancients as well as Moderns, have formed their Language upon it. And probably it may appear in mine: though I have endeavoured to avoid it; and in order to avoid it, have sometimes been obliged to express my self in a Manner, which will appear strange, to such as do not observe the Reason for it: But the general Argument here pursued, does not at all suppose, or proceed upon, these Principles. Now, these two abstract Principles of Liberty and moral Fitness being omitted, Religion can be considered in no other View, than merely as a Question of Fact: And in this View, it is here considered. It is obvious, that Christianity, and the Proof of it, are both historical. And even natural Re-

<sup>c</sup> By *arguing upon the Principles of Others*, the Reader will observe is meant; not proving any thing *from* those Principles, but *notwithstanding* them. Thus Religion is proved, not *from* the Opinion of Necessity; which is absurd: But, *notwithstanding* or *even though* That Opinion were admitted to be true.

PART

II.

ligion is, properly, a Matter of Fact: For, that there is a righteous Governor of the World, is so; And this Proposition contains the general System of natural Religion. But then, several abstract Truths, and in particular, those two Principles, are usually taken into Consideration in the Proof of it. Whereas it is here treated of only as a Matter of Fact. To explain this: That the three Angles of a Triangle are equal to two right ones, is an abstract Truth; But that they appear so to our Mind, is only a Matter of Fact. And this last must have been admitted, if any thing was, by those ancient Scepticks, who would not have admitted the former; but pretended to doubt, Whether there were any such thing as Truth, or Whether we could certainly depend upon our Faculties of Understanding for the Knowledge of it, in any Case. So likewise, that there is, in the Nature of things, an original Standard of Right and Wrong in Actions, independent upon all Will, but which unalterably determines the Will of God, to exercise That moral Government over the World which Religion teaches, *i. e.* finally and upon the whole to reward and punish Men respectively as they act right or wrong; this Assertion contains an abstract Truth, as well as Matter of Fact. But suppose in the present State, every Man, without Exception, was rewarded and punished, in exact Proportion, as he followed or transgressed That Sense of Right and Wrong, which God has implanted in the Nature of every Man: this would not be at all an abstract Truth, but only a Matter of Fact. And though this Fact were acknowledged by every one; yet the very same Difficulties might be raised, as are now, concerning the abstract Questions of Liberty and moral Fitness: And we should have a Proof, even the certain one of Experience, that the Government of the World was perfectly moral, without taking in the Consideration of those Questions; and this Proof would remain, in what way  
soever

soever they were determined. And thus, God having given Mankind a moral Faculty, the Object of which is Actions, and which naturally approves some Actions as Right and of Good-desert, and condemns others as Wrong and of Ill-desert; that He will, finally and upon the whole, reward the former and punish the latter, is not an Assertion of an abstract Truth, but of what is as meer a Fact, as his doing so at present would be. This future Fact I have, not indeed proved with the Force with which it might be proved, from the Principles of Liberty and moral Fitness; but without them have given a really conclusive practical Proof of it, which is greatly strengthened by the general Analogy of Nature: a Proof, easily cavilled at, easily shewn not to be demonstrative, for it is not offered as such; but impossible I think to be evaded or answered. And thus the Obligations of Religion are made out, exclusively of the Questions concerning Liberty and moral Fitness; which have been perplexed with Difficulties and abstruse Reasonings, as every thing may.

C H A P.  
VIII.  

Hence therefore may be observed distinctly, what is the Force of this Treatise. It will be, to such as are convinced of Religion upon the Proof arising out of the two last mentioned Principles, an additional Proof and a Confirmation of it: To such as do not admit those Principles, an original Proof of it, and a Confirmation of that Proof. Those who believe, will here find both the Scheme and the Evidence of Christianity, cleared of Objections, and in a peculiar Manner strengthened: Those who do not believe, will at least be shewn, the Absurdity of all Attempts to prove Christianity false, the plain undoubted Credibility of it; and, I hope, a good deal more.

And:

P A R T

II.

And thus, though some, seriously perhaps, may think, differently from me, that Analogy as here urged, has too great Strefs laid upon it; and Ridicule, unanswerable Ridicule, may be applied, to shew the Argument from it in a disadvantageous Light: yet there can be no Question, but that it is a real one. For Religion, both natural and revealed, implying in it numerous Facts; and Analogy, being a Confirmation of all Facts to which it can be applied, as it is the only Proof of most, cannot but be admitted by every one to be a material thing, and truly of Weight on the Side of Religion, both natural and revealed: And it ought to be particularly regarded by such as profess to follow Nature, and to be less satisfied with abstract Reasonings.

---

## C O N C L U S I O N .

**W**HATEVER Account may be given, of the PART strange Inattention and Disregard, in some Ages and II. Countries, to a Matter of such Importance as Religion; it would, before Experience, be incredible, that there should be the like Disregard in those, who have had the moral System of the World laid before them, as it is by Christianity, and often inculcated upon them: Because this moral System carries in it a good Degree of Evidence for its Truth, upon its being barely proposed to our Thoughts. There is no Need of abstruse Reasonings and Distinctions, to convince an unprejudiced Understanding, that there is a God who made and governs the World, and will judge it in Righteousness; though they may be necessary to answer abstruse Difficulties, when once such are raised: When the very Meaning of those Words, which express most intelligibly the general Doctrine of Religion, is pretended to be uncertain; and the clear Truth of the thing itself, is obscured, by the Intricacies of Speculation. But to an unprejudiced Mind, ten thousand thousand Instances of Design, cannot but prove a Designer. And it is intuitively manifest, that Creatures ought to live under a dutiful Sense of their Ma-

P A R T II. ker ; and that Justice and Charity must be his Laws, to Creatures whom He has made social, and placed in Society. Indeed the Truth of revealed Religion, peculiarly so called, is not self-evident ; but requires external Proof, in order to its being received. Yet Inattention, among Us, to revealed Religion, will be found to imply the same dissolute immoral Temper of Mind, as Inattention to natural Religion : Because, when both are laid before us, in the Manner they are in Christian Countries of Liberty ; our Obligations to inquire into both, and to embrace both upon Supposition of their Truth, are Obligations of the same Nature. For, Revelation claims to be the Voice of God ; and our Obligation to attend to His Voice, is, surely, moral in all Cases : And as it is insisted, that its Evidence is conclusive, upon thorough Consideration of it ; so, it offers itself to us with manifest obvious Appearances of having something more than human in it, and therefore in all Reason requires, to have its Claims most seriously examined into. It is to be added, that though Light and Knowledge, in what Manner soever afforded us, is equally from God ; yet a miraculous Revelation has a peculiar Tendency, from the first Principles of our Nature, to awaken Mankind, and inspire them with Reverence and Awe : And this is a peculiar Obligation to attend to, what claims to be so with such Appearances of Truth. It is therefore most certain, that our Obligations to enquire seriously into the Evidence of Christianity, and, upon Supposition of its Truth, to embrace it ; are of the utmost Importance, and moral in the highest and most proper Sense. Let us then suppose, that the Evidence of Religion in general, and of Christianity, has been seriously inquired into, by all reasonable Men among us. Yet we find many professedly to reject both, upon speculative Principles of Infidelity. And all of them do not content themselves with a bare Neglect of Religion, and enjoying their imaginary Freedom from its Restraints. Some go much beyond this. They deride

deride God's moral Government over the World. They re- P A R T  
 nounce his Protection, and defy his Justice. They ridicule and II.  
 vilify Christianity, and blaspheme the Author of it; and take all  
 Occasions to manifest a Scorn and Contempt of Revelation.  
 This amounts to an active setting themselves against Religion;  
 to what may be considered as a positive Principle of Irreligion:  
 Which they cultivate within themselves, and, whether they in-  
 tend this Effect or not, render habitual, as a good Man does the  
 contrary Principle. And Others, who are not chargeable with  
 all this Profligateness, yet, are in avowed Opposition to Reli-  
 gion, as if discovered to be groundless. Now admitting, which  
 is the Supposition we go upon, that these Persons act upon,  
 what they think, Principles of Reason, and otherwise they are  
 not to be argued with; it is really inconceivable that they  
 should imagine, they clearly see the whole Evidence of it, con-  
 sidered in itself, to be Nothing at all: Nor do they pretend this.  
 They are far indeed from having a just Notion of its Evidence;  
 but they would not say, its Evidence was Nothing, if they  
 thought the System of it, with all its Circumstances, were cre-  
 dible, like other Matters of Science, or History. So that their  
 Manner of treating it must proceed; either from their Objec-  
 tions of that Kind against all Religion, which have been an-  
 swered, or obviated, in the former Part of this Treatise: or else  
 from Objections and Difficulties supposed more peculiar to  
 Christianity. Thus, they entertain Prejudices against the whole  
 Notion of a Revelation, and miraculous Interpositions. They  
 find things in Scripture, whether in incidental Passages, or in  
 the general Scheme of it, which appear to them unreasonable.  
 They take for granted, that if Christianity were true, the Light  
 of it must have been more general, and the Evidence of it,  
 more satisfactory, or rather overbearing; that it must and  
 would have been, in some Way, otherwise put and left, than it  
 is. Now this is not imagining they see the Evidence itself to

P A R T be Nothing, or inconsiderable; but quite another thing. It is being fortified against the Evidence, in some Degree acknowledged, by thinking they see, the System of Christianity, or somewhat which appears to them necessarily connected with it, to be incredible or false: fortified against That Evidence, which might, otherwise, make great Impression upon them. Or, Lastly, if any of these Persons are, upon the whole, in Doubt concerning the Truth of Christianity, their Behaviour seems owing to their taking for granted, through strange Inattention, that such Doubting is, in a manner, the same thing, as being certain against it.

To these Persons, and to this State of Opinion concerning Religion, the foregoing Treatise is adapted. For, all the general Objections against the moral System of Nature having been obviated, it is shewn, that there is not any peculiar Presumption at all against Christianity considered, either as not discoverable by Reason, or as unlike to what is so discovered; nor any worth mentioning, against it as miraculous, if any at all; none certainly, which can render it in the least incredible. It is shewn, that upon Supposition of a divine Revelation, the Analogy of Nature renders it, beforehand, highly credible, I think probable, that many things in it, must appear liable to great Objections; and that we must be incompetent Judges of it, to a great Degree. This Observation is, I think, unquestionably true, and of the very utmost Importance: But it is urged, as I hope it will be understood, with great Caution of not vilifying the Faculty of Reason, which is *the candle of the Lord within us*<sup>d</sup>; though it can afford no Light, where it does not shine; nor judge, where it has no Principles to judge upon. The Objections here spoken of, being first answered in the View of Objections against Christianity as a Matter of Fact, are in the

<sup>d</sup> Prov. xx. 27.

next Place considered as urged, more immediately, against the P A R T  
 Wisdom, Justice and Goodness of the Christian Dispensation. II.  
 And it is fully made out, that they admit of exactly the like   
 Answer, in every Respect, to what the like Objections against  
 the Constitution of Nature admit of: That, as partial Views  
 give the Appearance of Wrong to things, which, upon farther  
 Consideration and Knowledge of their Relations to other things,  
 are found just and good; so it is perfectly credible, that the  
 things objected, against the Wisdom and Goodness of the Chri-  
 stian Dispensation, may be rendred Instances of Wisdom and  
 Goodness, by their Reference to other things beyond our View:  
 Because Christianity is a Scheme as much above our comprehen-  
 sion, as That of Nature; and, like That, a Scheme in which  
 Means are made use of to accomplish Ends, and which, as is  
 most credible, may be carried on by general Laws. And it  
 ought to be attended to, that this is not an Answer taken, mere-  
 ly or chiefly, from our Ignorance; but from somewhat positive,  
 which our Observation shews us. For, to like Objections, the like  
 Answer is experienced to be just, in numberless parallel Cases.  
 The Objections against the Christian Dispensation, and the Me-  
 thod by which it is carried on, having been thus obviated, in  
 general and together; the chief of them are considered distinctly,  
 and the particular things objected to, are shewn credible, by  
 their perfect Analogy, each apart, to the Constitution of Na-  
 ture. Thus; If Mankind be fallen from his primitive State,  
 and to be restored, and infinite Wisdom and Power engages in  
 accomplishing our Recovery: it were to have been expected, it  
 is said, that this should have been effected at once; and not by  
 such a long Series of Means, and such a various Oeconomy of  
 Persons and things; one Dispensation preparatory to another,  
 this to a farther one, and so on through an indefinite Number of  
 Ages, before the End of the Scheme proposed can be com-  
 pletly accomplished: a Scheme conducted by infinite Wisdom;  
 and

P A R T and executed by almighty Power. But our finding that every  
 II. thing in the Constitution and Course of Nature, is Thus carried  
 on, shews such Expectations concerning Revelation, to be highly  
 unreasonable; and is a satisfactory Answer to them, when  
 urged as Objections against the Credibility, that the great  
 Scheme of Providence in the Redemption of the World, may  
 be of this Kind, and to be accomplished in this Manner. As  
 to the particular Method of our Redemption, the Appointment  
 of a Mediator between God and Man; this is most obviously  
 analogous to the general Conduct of Nature, *i. e.* the God of  
 Nature, in appointing Others to be the Instruments of his Mer-  
 cy, as we experience in the daily Course of Providence. The  
 Condition of this World, which the Doctrine of our Redemp-  
 tion by Christ presupposes, so much falls in with natural Appear-  
 ances, that heathen Moralists inferred it from those Appearan-  
 ces; inferred, that human Nature was fallen from its original  
 Rectitude, and, in Consequence of this, degraded from its pri-  
 mitive Happiness. Or, however this Opinion came into the  
 World, these Appearances must have kept up the Tradition, and  
 confirmed the Belief of it. And as it was the general Opinion  
 under the Light of Nature, that Repentance and Reformation,  
 alone and by itself, was not sufficient to do away Sin, and pro-  
 cure a full Remission of the Penalties annex to it; and as the  
 Reason of the thing does not at all lead to any such Conclu-  
 sion: So every Day's Experience shews us, that Reformation  
 is not, in any Sort, sufficient to prevent the present Disadvan-  
 tages and Miseries, which, in the natural Course of things,  
 God has annexed to Folly and Extravagance. Yet there may  
 be Ground to think, that the Punishments, which, by the gen-  
 eral Laws of divine Government, are annex to Vice, may  
 be prevented; that Provision may have been, even originally,  
 made, that they should be prevented by some Means or other,  
 though they could not by Reformation alone. For we have  
 daily

daily Instances of *such Mercy*, in the general Conduct of Nature: Compassion for Misery,<sup>d</sup> Medicines for Diseases, Friends against Enemies. There is Provision made, in the original Constitution of the World, that much of the natural bad Consequences of our Follies, which Persons themselves alone cannot prevent, may be prevented by the Assistance of Others; Assistance, which Nature enables, and disposes, and appoints them to afford. By a Method of Goodness analogous to this, when the World lay in Wickedness and consequently in Ruin, *God so loved the world, that he gave his only begotten Son to save it. And he being made perfect by suffering, became the author of eternal salvation to all them that obey him.*<sup>e</sup> Indeed neither Reason nor Analogy would lead us to think, in particular, that the Interposition of Christ, in the Manner in which he did interpose, would be of that Efficacy for Recovery of the World, which the Scripture teaches us it was: But neither would Reason nor Analogy lead us to think, that other particular Means would be of the Efficacy, which Experience shews they are, in numberless Instances. And therefore, as the Case before us does not admit of Experience, so, that neither Reason nor Analogy can shew, how or in what particular Way, the Interposition of Christ as revealed in Scripture, is of that Efficacy, which it is there represented to be; this is no Kind nor Degree of Presumption against its being really of That Efficacy. Farther; The general Analogy of Nature is an Answer to Objections against Christianity, from the Light of it not being universal, nor its Evidence so strong as might possibly have been. That God has made such Variety of Creatures, is indeed an Answer to the former: But that he dispenses his Gifts in such Variety, both of Degrees and Kinds, amongst Creatures of the same Species, and even to the same Individuals at different Times;

<sup>d</sup> Sermon. at the Rolls, p. 106.<sup>e</sup> Joh. iii. 16. Heb. v. 9.

P A R T II. is a more obvious and full Answer to it. And it is so far from being the Method of Providence in other Cases, to afford us such overbearing Evidence, as some require in Proof of Christianity, that on the contrary, the Evidence upon which we are naturally appointed to act in common Matters, throughout a very great Part of Life, is doubtful in a high Degree. And admitting the Fact, that God has afforded to some, no more than doubtful Evidence of Religion; the same Account may be given of it, as of Difficulties and Temptations with regard to Practice. But as it is not impossible,<sup>f</sup> surely, that this alledged Doubtfulness may be Men's own Fault; it deserves their most serious Consideration, whether it be not so. However, it is certain, that Doubting implies a Degree of Evidence for That, of which we doubt; and that this Degree of Evidence, as really lays us under Obligations, as demonstrative Evidence.

The whole then of Religion is throughout credible: Nor is there, I think, any thing relating to the revealed Dispensation of things, more different from the experienced Constitution and Course of Nature, than some Parts of the Constitution of Nature are, from other Parts of it. And if so, the only Question which remains, is, what positive Evidence can be alledged for the Truth of Christianity. This too in general has been considered, and the Objections against it estimated. Deduct then, what is to be deducted from that Evidence, upon Account of any Weight which may be thought to remain in these Objections, after what the Analogy of Nature has suggested in Answer to them: and then consider, what are the practical Consequences from all this, upon the most sceptical Principles, one can argue; for I am writing to Persons who entertain these Principles. And upon such Consideration, it will be obvious, that

<sup>f</sup> p. 229, &c.

Immorality, as little Excuse as it admits of in itself, is greatly aggravated, in Persons who have been made acquainted with Christianity, whether they believe it, or not: Because the moral System of Nature, or natural Religion, which Christianity lays before us, approves itself, almost intuitively, to a reasonable Mind upon seeing it proposed. In the next Place, with Regard to Christianity, it will be observed; That there is a Middle, between a full Satisfaction of the Truth of it, and a Satisfaction of the contrary. The middle State of Mind between these two, consists in a serious Apprehension, that it may be true, joined with Doubt, whether it be so. And This, upon the best Judgment I am able to make, is as far towards speculative Infidelity, as any Sceptick can at all be supposed to go, who has had true Christianity, with the proper Evidence of it, laid before him, and has in any tolerable Measure considered them. For I would not be mistaken to comprehend all, who have ever heard of it. Because, as it seems evident that in many Countries called Christian, neither Christianity, nor its Evidence are fairly laid before Men: So in Places where both are, there appear to be some, who have very little attended to either, and who reject Christianity with a Scorn proportionate to their Inattention; and yet are by no means without Understanding in other Matters. Now it appears, that a serious Apprehension that Christianity may be true, lays Persons under the strictest Obligations of a serious Regard to it, throughout the whole of their Life: a Regard not the same exactly, but in many Respects nearly the same, with what a full Conviction of its Truth would lay them under. Lastly, It will appear, that Blasphemy and Prophaneness, I mean with regard to Christianity, are absolutely without Excuse. For there is no Temptation to it, but from the Wantonness of Vanity or Mirth: And these, considering the infinite Importance of the Subject, are no such

P A R T II.  Temptations as to afford any Excuse for it. If this be a just Account of things, and yet Men can go on to vilify or disregard Christianity, which is to talk and act, as if they had a Demonstration of its Falshood; there is no Reason to think they would alter their Behaviour to any Purpose, though there were a Demonstration of its Truth.

**I**N the first Copy of these Papers, I had inserted the two following Dissertations into the Chapters, Of a future Life, and, Of the moral Government of God, with which they are closely connected. But as they do not directly fall under the Title of the foregoing Treatise, and would have kept the Subject of it too long out of Sight; it seemed more proper to place them by themselves.

## D I S S E R T. I.

*Of personal Identity.*

**W**HETHER we are to live in a future State, as it is DISSER.  
I.  
 the most important Question which can possibly be asked, so it is the most intelligible one which can be expressed in Language. Yet strange Perplexities have been raised about the Meaning of That Identity or Sameness of Person, which is implied in the Notion of our living Now and Hereafter, or in any two successive Moments. And the Solution of these Difficulties hath been stranger, than the Difficulties themselves. For, personal Identity has been explained so by Some, as to render the Inquiry concerning a future Life, of no Consequence at-all to Us the Persons who are making it. And though few Men can be misled by such Subtleties; yet it may be proper a little to consider them.

Now when it is asked, wherein personal Identity consists, the Answer should be the same, as if it were asked, wherein consists Similitude or Equality; that all Attempts to define, would but perplex it. Yet there is no Difficulty at all in ascertaining the Idea. For as upon two Triangles being compared or viewed together, there arises to the Mind the Idea of Similitude, or upon twice two and four, the Idea of Equality; so likewise upon the Consciousnesses of ones self or ones own Existence in any two Moments, being compared, there as immediately arises to the Mind the Idea of personal Identity. And as the two former Comparisons, not only give us the Ideas of Similitude and Equality,

DISSER. Equality, but also shews us, that two Triangles are alike, and  
 I. twice two and four are equal; so the latter Comparison, not  
 only gives us the Idea of personal Identity, but also shews us  
 the Identity of ourselves in those two Moments: the present, suppose, and That immediately past, or the present, and That, a Month, a Year, or twenty Years past. Or in other Words, by reflecting upon That, which is my Self now, and That, which was my Self twenty Years agoe, I discern they are not two, but one and the same Self.

But though Consciousness does thus ascertain our personal Identity to Ourselves, yet to say, that Consciousness makes personal Identity, or is necessary to our being the same Persons, is to say, that a Person has not existed a single Moment, nor done one Action, but what he can remember; indeed none but what he reflects upon. And one should really think it Self-evident, that Consciousness of personal Identity presupposes, and therefore cannot constitute, personal Identity, any more than Knowledge in any other Case, can constitute Truth, which it presupposes.

This wonderful Mistake may possibly have arisen from hence, that to be indued with Consciousness, is inseparable from the Idea of a Person, or intelligent Being. For, this might be expressed inaccurately thus, that Consciousness makes Personality; And from hence it might be concluded to make personal Identity. But though present Consciousness of what we at present do and feel, is necessary to our being the Persons we now are; Yet present Consciousness of past Actions or Feelings, is not necessary to our being the same Persons, who performed those Actions or had those Feelings.

The Inquiry, what makes Vegetables the Same in the common Acceptation of the Word, does not appear to have any Relation to This of personal Identity; because the Word, *same*, when applied to Them and to Person, is not only applied to different Subjects, but it is also used in different Senses. For when a Man swears to the same Tree, as having stood fifty Years in the same Place, he means only the same as to all the Purposes of Property and Uses of common Life, and not that the Tree has been all that Time the same in the strict philosophick Sense of the Word. For he does not know, whether any one Particle of the present Tree, be the same with any one Particle of the Tree which stood in the same Place fifty Years agoe. And if they have not one common Particle of Matter, they cannot be the same Tree in the proper philosophick Sense of the Word *same*; it being evidently a Contradiction in Terms, to say they are, when no Part of their Substance, and no one of their Properties, are the same: no Part of their Substance, by the Supposition; no one of their Properties, because it is allowed, that the same Property cannot be transferred from one Substance to another. And therefore when we say the Identity or Sameness of a Plant consists, in a Continuation of the same Life, communicated under the same Organization, to a Number of Particles of Matter whether the same or not; the Word *same* when applied to Life and to Organization, cannot possibly be understood to signify, what it signifies in this very Sentence when applied to Matter. In a loose and popular Sense then, the Life and the Organization and the Plant, are justly said to be the same, notwithstanding the perpetual Change of the Parts. But in a strict and philosophical Manner of Speech, no Man, no Being, no Mode of Being, no Any-thing, can be the same with That, with which it hath indeed Nothing the same. Now Sameness is used in this latter Sense when applied to Persons.

DISSER.  
I.

The

DISSER. The Identity of these, therefore, cannot subsist with Diversity of Substance.

I.

The thing here considered, and, demonstratively as I think, determined, is proposed by Mr. *Locke* in these Words, *Whether it, i. e. the same Self or Person, be the same identical Substance?* And he has suggested what is a much better Answer to the Question, than That which he gives it in Form. For he defines Person, *a thinking intelligent Being, &c.* and personal Identity, *the Sameness of a rational Being.*<sup>a</sup> The Question then is, whether the same rational Being is the same Substance; which needs no Answer, because Being and Substance, in this Place, stand for the same Idea. The Ground of the Doubt, whether the same Person be the same Substance, is said to be This, that the Consciousness of our own Existence, in Youth and in Old-age, or in any two joint successive Moments, is not *the same individual Action*<sup>b</sup>, i. e. not the same Consciousness, but different successive Consciousnesses. Now it is strange that this should have occasioned such Perplexities; for it is surely conceivable, that a Person may have a Capacity of knowing some Object or other, to be the same now which it was when he contemplated it formerly: Yet in this Case, where, by the Supposition, the Object is perceived to be the same, the Perception of it in any two Moments, cannot be one and the same Perception. And thus, though the successive Consciousnesses which we have of our own Existence, are not the same, yet are they Consciousnesses of one and the same thing or object, of the same Person, Self, or living Agent. The Person, of whose Existence the Consciousness is felt now, and was felt an Hour or a Year agoe, is discerned to be, not two Persons, but one and the same Person; and therefore is one and the same.

<sup>a</sup> *Locke's Works*, Vol. I. p. 146.

<sup>b</sup> *Locke*. p. 146, 147.

Mr. *Locke's* Observations upon this Subject appear hasty; and he seems to profess himself dissatisfied with Suppositions, which he has made relating to it<sup>b</sup>. But some of those hasty Observations have been carried to a strange Length by Others; whose Notion when traced and examined to the bottom, amounts, I think, to this<sup>c</sup>: That Personality is not a permanent, but a transient thing: That it lives and dies, begins and ends continually: That no one can any more remain one and the same Person two Moments together, than two successive Moments can be one and the same Moment: That our Substance is indeed continually changing, but whether this be so or not, is, it seems, nothing to the Purpose, since it is not Substance, but Consciousness alone, which constitutes Personality; which Consciousness, being successive, cannot be the same in any two Moments, nor consequently the Personality constituted by it. And from hence it must follow, that it is a Fallacy upon Ourselves, to charge our present Selves with any thing we did, or to imagine our present Selves interested in any thing which befell us, yesterday; or that our present Self will be interested in what will befall us to morrow: since our present Self is not, in Reality, the same with the Self of Yesterday, but another like Self or Person coming in its Room, and mistaken for it; to which another Self will succeed to morrow. This, I say, must follow: for if the Self or Person of to day, and That of to morrow, are not the same, but only like Persons; the Person of to Day, is really no more interested in what will befall the Person of to morrow, than in what will befall any other Person. It may be thought perhaps, that this is not a just Representation of the Opinion we are speaking of: because those who maintain it, allow, that a Person is the same as far back as his Remembrance reaches.

<sup>b</sup> *Locke*, p. 152.

<sup>c</sup> See an Answer to Dr. *Clarke's* third Defence of his Letter to Mr. *Dodwell*, 2<sup>d</sup> Edit. p. 44 & 56 &c.

DISSER. And indeed they do use the *Words, Identity* and *same* Person. Nor will Language permit these Words to be dropped; since if they were, there must be, I know not what ridiculous Periphrasis, substituted in the Room of them. But they cannot, consistently with themselves, mean, that the Person is really the same. For, it is an identical Proposition, that the Personality cannot be really the same, if, as they expressly assert, That in which it consists, is not the same. And as, consistently with themselves, they cannot, so, I think it appears, they do not, mean, that the Person is *really* the same, but only that he is so in a fictitious Sense; in such a Sense only as they assert, for this they do assert, that any Number of Persons whatever may be the same Person. The bare unfolding this Notion, and laying it thus naked and open, seems the best Confutation of it. However, since great Stress is said to be put upon it, I add the following things.

*First.* It is absolutely contradictory to that certain Conviction, which necessarily and every Moment rises within us, when we turn our Thoughts upon ourselves, when we reflect upon what is past, and look forward upon what is to come. All Imagination of a daily Change of That living Agent each Man calls himself, for another, or of any such Change throughout our whole present Life, is intirely born down by our natural Sense of things. Nor is it possible for a Person in his wits, to alter his Conduct, with regard to his Health or Affairs, from a Suspicion, that though he should live to morrow, he should not, however, be the same Person he is to day. And yet, if it be reasonable to act, with respect to a future Life, upon this Notion that Personality is transient, it is reasonable to act upon it, with respect to the present. Here then is a Notion equally applicable to Religion and to our temporal Concerns; And every one sees and feels the inexpressible Absurdity of it in the latter Case: If therefore any can take up with it in the former, this

this cannot proceed from the Reason of the thing, but must be owing to an inward Unfairness, and secret Corruption of Heart.

DISSER.  
I.  

*Secondly.* It is not an Idea, or abstract Notion, or Quality, but a Being only, which is capable of Life and Action, of Happiness and Misery. Now all Beings confessedly continue the same, during the whole Time of their Existence. Consider then a living Being now existing, and which has existed for any Time alive; this living Being must have done and suffered and enjoyed, what it has done and suffered and enjoyed formerly, this living Being, I say, and not another, as really as it this Instant does and suffers and enjoys, what it does and suffers and enjoys this Instant. All these successive Actions, Enjoyments, and Sufferings, are Actions, Enjoyments, and Sufferings, of the same living Being. And they are so, prior to all Consideration of its remembring or forgetting; since remembring or forgetting can make no Alteration in the Truth of past Matter of Fact. And suppose this Being endued with limited Powers of Knowledge and Memory, there is no more Difficulty in conceiving it to have a Power, of knowing itself to be the same living Being which it was some time agoe, of remembring some of its Actions, Sufferings, and Enjoyments, and forgetting others, than in conceiving it to know or remember or forget any thing else.

*Thirdly.* Every Person is conscious, that he is now the same Person or Self he was, as far back as his Remembrance reaches; since when any one reflects upon a past Action of his own, he is just as certain of the Person who did that Action, namely, Himself, the Person who now reflects upon it, as he is certain that the Action was at all done. Nay very often a Person's Assurance of an Action having been done, of which he is absolutely assured, arises wholly from the Consciousness that he himself did it. And this He, Person, or Self, must either be a

DISSER. Substance, or the Property of some Substance. If He, if Person, be a Substance, then Consciousness that He is the same Person, is Consciousness that He is the same Substance. If the Person or He be the Property of a Substance, still Consciousness that He is the same (the same Property) is as certain a Proof that his Substance remains the same, as Consciousness that he remains the same Substance would be; since the same Property cannot be transferred from one Substance to another.

But though we are thus certain, that we are the same Agents, living Beings, or Substances, Now, which we were as far back as our Remembrance reaches, yet it is asked, Whether we may not possibly be deceived in it? And this Question may be asked at the End of any Demonstration whatever. Because it is a Question concerning the Truth of Perception by Memory: And he who can doubt, whether Perception by Memory can in this Case be depended upon, may doubt also, whether Perception by Deduction and Reasoning, which also include Memory, or indeed whether intuitive Perception, can. Here then we can go no farther. For it is ridiculous to attempt to prove the Truth of those Perceptions, whose Truth we can no otherwise prove, than by other Perceptions of exactly the same Kind with them, and which there is just the same Ground to suspect; or to attempt to prove the Truth of our Faculties, which can no otherwise be proved, than by the Use or Means of those very suspected Faculties themselves.

## D I S S E R T. II.

*Of the Nature of Virtue.*

**T**HAT which renders Beings capable of moral Government, is their having a moral Nature, and moral Faculties of Perception and of Action. Brute Creatures are impressed and actuated by various Instincts and Propensities; so also are We. But additional to this, We have a Capacity of reflecting upon Actions and Characters, and making them an Object to our Thought: And on doing this, we naturally and unavoidably approve some Actions, under the peculiar View of their being virtuous and of Good-desert, and condemn Others, as vitious and of Ill-desert. That we have this moral approving and disapproving <sup>a</sup> Faculty, is certain from our experiencing it in Ourselves, and recognizing it in each other. It appears from our exercising it unavoidably, in the Approbation and Disapprobation even of feigned Characters: From the Words, right and wrong, odious and amiable, base and worthy, with many others of like Signification in all Languages, applied to Actions and Characters: From the many written Systems of Morals which suppose it; since it cannot be imagined, that all

DISSER.  
II.

<sup>a</sup> This way of speaking is taken from *Epicetus*\*, and is made use of as seeming the most full, and least liable to Cavil. And the moral Faculty may be understood to have these two Epithets, *δοκιμαστική* and *αποδοκιμαστική*, upon a double Account: Because, upon a Survey of Actions, whether before or after they are done, it determines them to be good or evil; and also because it determines itself to be the Guide of Action and of Life, in Contradistinction from all other Faculties, or natural Principles of Action. In the very same Manner, as speculative Reason *directly* and naturally judges of speculative Truth and Falseness; and, at the same Time, is attended with a Consciousness upon *Reflection*, that the natural Right to judge of them belongs to it.

\* Arr. Epict. L. 1. c. 1.

these

DISSER. these Authors, throughout all these Treatises, had absolutely no  
 II. Meaning at all to their Words, or a Meaning merely chimerical: From our natural Sense of Gratitude, which implies a Distinction between, merely being the Instrument of Good, and intending it: From the like Distinction, every one makes, between Injury and mere Harm, which, *Hobbs* says, is peculiar to Mankind; And between Injury and just Punishment, a Distinction plainly natural prior to the Consideration of human Laws. It is manifest great Part of common Language, and of common Behaviour over the World, is formed upon Supposition of such a Moral Faculty; whether called Conscience, moral Reason, moral Sense, or divine Reason; whether considered as a Sentiment of the Understanding, or as a Perception of the Heart, or, which seems the Truth, as including both. Nor is it at all doubtful in the general, what Course of Action, this Faculty or practical discerning Power within us, approves, and what it disapproves. For, as much as it has been disputed wherein Virtue consists, or whatever Ground for Doubt there may be about Particulars, yet, in general, there is in reality an universally acknowledged Standard of it. It is That which all Ages and all Countries have made Profession of in Publick; it is That which every Man you meet, puts on the Shew of; it is That which the primary and fundamental Laws of all civil Constitutions over the Face of the Earth, make it their Business and Endeavour to enforce the Practice of upon Mankind, namely, Justice, Veracity, and Regard to common Good. It being manifest then, in general, that we have such a Faculty or Discernment as this, it may be of Use to remark some things, more distinctly, concerning it.

*First*, It ought to be observed, that the Object of this Faculty is Actions,<sup>b</sup> comprehending under that Name active or prac-

<sup>b</sup> οὐδὲ ἡ ἀρετὴ καὶ κακία—ἐν πείσει, ἀλλὰ ἐνεργείᾳ. M. Anton. L. 9. 16. Virtutis laus omnis in Actione consistit. Cic. Off. l. 1. c. 6.

tical Principles; these Principles from which Men would act if Occasions and Circumstances gave them Power; and which, when fixed and habitual in any Person, we call, his Character. It does not appear, that Brutes have the least reflex Sense of Actions as distinguished from Events, or that Will and Design, which constitute the very Nature of Actions as such, are at all an Object to their Perception. But to ours they are: And they are the Object, and the only one, of the approving and disapproving Faculty. Acting, Conduct, Behaviour, abstracted from all Regard to what is, in Fact and Event, the Consequence of it, is itself the natural Object of the moral Discernment; as speculative Truth and Falshood is, of speculative Reason. Intention of such and such Consequences, indeed, is always included; for it is Part of the Action itself: but though the intended good or bad Consequence does not follow, we have exactly the same Sense of the Action as if they did. In like Manner we think well or ill of Characters, abstracted from all Consideration of the good or the evil, which Persons of such Characters, have it actually in their Power to do. We never in the moral Way, applaud or blame either ourselves or others, for what we enjoy, or what we suffer, or for having Impressions made upon us which we consider as altogether out of our Power; but only for what we do, or would have done had it been in our Power; Or for what we leave undone which we might have done, or would have left undone though we could have done it.

*Secondly.* Our Sense or Discernment of Actions as morally good or evil, implies in it a Sense or Discernment of them as of good or ill Desert. It may be difficult to explain this Perception, so as to answer all the Questions which may be asked concerning it: But every one speaks of such and such Actions as deserving

DISSER.  
II.  

DISSER.

II.  

deserving Punishment; and it is not, I suppose, pretended that they have absolutely no Meaning at all to the Expression. Now the Meaning plainly is not, that we conceive it for the Good of Society, that the Doer of such Actions should be made to suffer. For if unhappily it were resolved, that a Man who, by some innocent Action, was infected with the Plague, should be left to perish, lest, by other Peoples coming near him, the Infection should spread; no one would say, he deserved this Treatment. Innocence and Ill-desert are inconsistent Ideas: But Ill-desert supposes Guilt; and if one be not Part of the other, yet they are evidently and naturally connected in our Mind. The Sight of a Man in Misery, raises our Compassion towards him; and, if this Misery be inflicted on him by another, our Indignation against the Author of it. But when we are informed, that the Sufferer is a Villain, and is punished only for his Treachery or Cruelty; our Compassion exceedingly lessens, and, in many Instances, our Indignation wholly subsides. Now what produces this Effect, is the Conception of That in the Sufferer, which we call Ill-desert. Upon considering then, or viewing together, our Notion of Vice and That of Misery, there results a third, That of Ill-desert. And thus there is in human Creatures an Association of the two Ideas, natural and moral Evil, Wick- edness and Punishment. If this Association were merely artificial or accidental, it were nothing: but being most unquestion- ably natural, it greatly concerns us to attend to it, instead of endeavouring to explain it away.

It may be observed farther concerning our Perception of good and of ill Desert, that the former is very weak with respect to common Instances of Virtue. One Reason of which may be, that it does not appear to a Spectator, how far such Instances of Virtue proceed from a virtuous Principle, or in what Degree  
this

this Principle is prevalent; since a very weak Regard to Virtue, may be sufficient to make Men act well in many common Instances. And on the other hand, our Perception of Ill-desert in vicious Actions, lessens in Proportion to the Temptations Men are thought to have had to such Vices. For, Vice in human Creatures consisting chiefly in the Absence or Want of the virtuous Principle; though a Man be overcome, suppose, by Tortures, it does not from thence appear, to what Degree the virtuous Principle was wanting. All that appears is, that he had it not in such a Degree, as to prevail over the Temptation: But possibly he had it in a Degree, which would have rendered him Proof against common Temptations.

*Thirdly.* Our Perception of Vice and Ill-desert arises from, and is the Result of, a Comparison of Actions with the Nature and Capacities of the Agent. For, the mere Neglect of doing what we ought to do, would, in many Cases, be determined by all Men to be in the highest Degree vicious: And this Determination must arise from such Comparison, and be the Result of it; because such Neglect would not be vicious in Creatures of other Natures and Capacities, as Brutes. And it is the same also with respect to positive Vices, or such as consist in doing what we ought not. For, every one has a different Sense of Harm done by an Ideot, Madman or Child, and by one of mature and common Understanding; though the Action of both, including the Intention which is Part of the Action, be the same: as it may be, since Ideots and Madmen, as well as Children, are capable not only of doing Mischief, but also of intending it. Now this Difference must arise from somewhat discerned in the Nature or Capacities of one, which renders the Action vicious; and the Want of which in the other, renders the same Action innocent or less vicious: And this plainly sup-

DISSER.

II.

poses a Comparison, whether reflected upon or not, between the Action and Capacities of the Agent, previous to our determining an Action to be vitious. And hence arises a proper Application of the Epithets, incongruous, unsuitable, disproportionate, unfit, to Actions which our moral Faculty determines to be vitious.

*Fourthly.* It deserves to be considered, whether Men are more at Liberty in Point of Morals, to make themselves miserable without Reason, than to make other People so; or dissolutely to neglect their own greater Good, for the sake of a present lesser Gratification, than they are to neglect the Good of others, whom Nature has committed to their Care. It should seem, that a due Concern about our own Interest or Happiness, and a reasonable Endeavour to secure and promote it, which is, I think, very much the Meaning of the Word, Prudence, in our Language; it should seem, that this is Virtue, and the contrary Behaviour faulty and blameable: Since in the calmest way of Reflection, we approve of the first, and condemn the other Conduct, both in Ourselves and Others. This Approbation and Disapprobation are altogether different from mere Desire of our own or of their Happiness, and Sorrow upon missing it. For the Object or Occasion of this last Kind of Perception, is Satisfaction, Uneasiness, or Loss; whereas the Object of the first is active Behaviour: In one Case, what our Thoughts fix upon, is our Condition; in the other, our Conduct. It is true indeed, that Nature has not given in so sensible a Disapprobation of Imprudence and Folly, either in *Ourselves* or *Others*, as of Falshood Injustice and Cruelty: I suppose, because That constant habitual Sense of private Interest and Good, which we always carry about with us, renders such sensible Disapprobation, less necessary, less wanting, to keep us from imprudently neglecting our  
own

own Happiness, and foolishly injuring Ourselves, than it is necessary and wanting to keep us from injuring Others, to whose Good we cannot have so strong and constant a Regard: And also because Imprudence and Folly, appearing to bring its own Punishment more immediately and constantly than injurious Behaviour, it less needs the additional Punishment, which would be inflicted upon it by Others, had they the same sensible Indignation against it, as against Injustice and Fraud and Cruelty. Besides, Unhappiness being in itself the natural Object of Compassion; the Unhappiness which People bring upon Themselves, though it be wilfully, excites in us some Pity for them: and this of course lessens our Displeasure against them. But still it is matter of Experience, that we are formed so, as to reflect very severely upon the greater Instances of imprudent Neglects and foolish Rashness, both in Ourselves and Others. In Instances of this kind, Men often say of Themselves with Remorse, and of Others with some Indignation, that they deserved to suffer such Calamities, because they brought them upon themselves, and would not take Warning. Particularly when Persons come to Poverty and Distress by a long course of Extravagance, and after frequent Admonitions, though without Falshood or Injustice, we plainly do not regard such People as alike Objects of Compassion to those, who are brought into the same Condition by unavoidable Accidents. From these things it appears, that Prudence is a Species of Virtue, and Folly of Vice: meaning by *Folly*, somewhat quite different from mere Incapacity; a thoughtless Want of that Regard and Attention to our own Happiness, which we had Capacity for. And this, the Word properly includes, and, as it seems, in its usual Acceptation; for we scarce apply it to brute Creatures.

DISSER.  
II.  
~~~~~

DISSER.  
II.

However if any Person be disposed to dispute the Matter, I shall very willingly give him up the Words Virtue and Vice, as not applicable to Prudence and Folly : but must beg leave to insist, that the Faculty within us which is the Judge of Actions, approves of prudent Actions, and disapproves imprudent ones; I say prudent and imprudent *Actions* as such, and considered distinctly from the Happiness or Misery which they occasion. And by the way, this Observation may help to determine, what Justness there is in that Objection against Religion, that it teaches us to be interested and selfish.

*Fifthly.* Without inquiring how far and in what Sense, Virtue is resolvable into Benevolence, and Vice into the Want of it; it may be proper to observe, that Benevolence and the Want of it singly considered, are in no sort the Whole of Virtue and Vice. For if this were the Case, in the Review of ones own Character or That of Others, our moral Understanding and moral Sense would be indifferent to every thing, but the Degrees in which Benevolence prevailed, and the Degrees in which it was wanting. That is, we should neither approve of Benevolence to Some Persons rather than to Others, nor disapprove Injustice and Falshood upon any other Account, than merely as an Overbalance of Happiness was foreseen likely to be produced by the first, and of Misery by the second. But now on the contrary, suppose two Men Competitors for any thing whatever, which would be of equal Advantage to each of them: Though nothing indeed would be more impertinent, than for a Stranger to busy himself to get One of them preferred to the Other; yet such Endeavour would be Virtue, in Behalf of a Friend or Benefactor, abstracted from all Consideration of distant Consequences: as that Examples of Gratitude, and the Cultivation of Friendship,

would be of general Good to the World. Again, suppose one Man should, by Fraud or Violence, take from another the Fruit of his Labour, with Intent to give it to a third, who, he thought, would have as much Pleasure from it, as would balance the Pleasure which the first Possessor would have had in the Enjoyment, and his Vexation in the Loss of it; suppose also that no bad Consequences would follow: yet such an Action would surely be vicious. Nay farther, were Treachery, Violence and Injustice, no otherwise vicious than as foreseen likely to produce an Overballance of Misery to Society; then, if in any Case a Man could procure to Himself as great Advantage by an Act of Injustice, as the whole foreseen Inconvenience likely to be brought upon Others by it, would amount to; such a Piece of Injustice would not be faulty or vicious at all: Because it would be no more than, in any other Case, for a Man to prefer his own Satisfaction to Another's in equal Degrees. The Fact then appears to be, that we are constituted so, as to condemn Falshood, unprovoked Violence, Injustice, and to approve of Benevolence to Some preferably to Others, abstracted from all Consideration, which Conduct is likeliest to produce an Overballance of Happiness or Misery. And therefore, were the Author of Nature to propose nothing as an End but the Production of Happiness, were His moral Character merely That of Benevolence; yet Ours is not so. Upon that Supposition indeed, the only Reason of his giving us the abovementioned Approbation of Benevolence to Some Persons rather than Others, and Disapprobation of Falshood, unprovoked Violence, and Injustice, must be, that He foresaw, this Constitution of our Nature would produce more Happiness, than forming us with a Temper of mere general Benevolence: But still, since this is our Constitution, Falshood, Violence, Injustice, must be Vice in us, and Benevolence to Some preferably to Others,

DISSER. thers, Virtue ; abstracted from all Consideration of the Over-  
 II. ballance of Evil or Good, which they may appear likely to  
 produce.

Now if human Creatures are endued with such a moral Nature as we have been explaining, or with a moral Faculty, the natural Object of which is Actions ; moral Government must consist, in rendring them happy and unhappy, in rewarding and punishing them, as they follow, neglect, or depart from, the moral Rule of Action interwoven in their Nature, or suggested and enforced by this moral Faculty :<sup>a</sup> in rewarding and punishing them upon Account of their so doing.

I am not sensible that I have, in the fifth Observation, contradicted what any Author designed to assert. But some of great and distinguished Merit, have I think expressed themselves in a Manner, which may occasion some Danger, to careless Readers, of imagining, the whole of Virtue to consist in singly aiming, according to the best of their Judgment, at promoting the Happiness of Mankind in the present State ; and the whole of Vice, in doing what they foresee, or might foresee, is likely to produce an Overballance of Unhappiness in it: than which Mistakes, none can be conceived more terrible. For it is certain, that some of the most shocking Instances of Injustice, Adultery, Murder, Perjury, and even of Persecution, may, in many supposable Cases, not have the Appearance of being likely to produce an Overballance of Misery in the present State ; perhaps sometimes may have the contrary Appearance. For this Reflection might easily be carried on, but I forbear——The Happiness of the World is the Concern of Him, who is the Lord and the Proprietor of it: Nor do we know what we are about, when we endeavour to

<sup>a</sup> p. 117.

promote the Good of Mankind in any Ways but those which He has directed ; that is indeed in all Ways not contrary to Veracity and Justice. I speak thus upon Supposition of Persons really endeavouring, in some Sort, to do good without Regard to these. But the Truth seems to be, that such supposed Endeavours, proceed, almost always, from Ambition, the Spirit of Party, or some indirect Principle, concealed perhaps in great Measure from Persons themselves. And though it is our Business and our Duty to endeavour, within the Bounds of Veracity and Justice, to contribute to the Ease, Convenience, and even Cheerfulness and Diversion of our Fellow-creatures ; yet from our short Views, it is greatly uncertain, whether this Endeavour will, in particular Instances, produce an Overballance of Happiness upon the whole : since so many and distant things must come into the Account. And That which makes it our Duty, is, that there is some Appearance that it will, and no positive Appearance sufficient to ballance this, on the contrary Side ; and also that such benevolent Endeavour is a Cultivation of that most excellent of all virtuous Principles, the active Principle of Benevolence.

DISSER.

II.

However, though Veracity, as well as Justice, is to be our Rule of Life, it must be added, otherwise a Snare will be laid in the way of some plain Men, that the Use of common Forms of Speech generally understood, cannot be Falshood, and, in general, that there can be no designed Falshood without designing to deceive. It must likewise be observed, that in numberless Cases, a Man may be under the strictest Obligations to what he foresees will deceive, without his intending it. For it is impossible not to foresee, that the Words and Actions of Men in different Ranks and Employments, and of different  
Educations,

DISSER. II. Educations, will perpetually be mistaken by each other: And it cannot but be so, whilst they will judge with the utmost Carelessness, as they daily do, of what they are not, perhaps, enough informed to be competent Judges of, even though they considered it with great Attention.
