FALL BULBS—1921

WE take pleasure in presenting our ANNUAL BULB CATALOGUE for your early consideration. We have assurance from our Holland growers that the Bulbs shipped to us will all be first size and of quality equal to that supplied to us in former years.

We thank our numerous patrons and friends for their continued confidence in our goods, which has enabled us to be proud of their patronage, and we hope to still maintain the standard and quality of our bulbs in the future as in the past.

Our patrons will always find courteous treatment from our fellow-workers who have so greatly aided us in the expansion of our business.

Hardy Lilies

For Outdoor Planting or Growing in Pots. (Ready in November)

When grown in the border or open ground, they should remain undisturbed for years, frequent removals being injurious. In the Autumn, a covering of leaves, coarse manure or boughs will prove highly beneficial. Plant at least 6 inches deep.

Pot-Grown Strawberries

Pot-grown Strawberry plants are much superior to the ordinary ground layers usually sold, as there is no loss of fine roots in taking them up. They can be transplanted at any season with scarcely any check to their growth. The sooner pot-grown plants can be set out after June 1st, the larger they will grow and the more they will produce the next Spring. We only offer varieties that are considered the best of existing sorts.

Brief Directions for Culture

Strawberries require rich, well-tilled soil. The plants should be set 15 inches apart, in rows 2 feet apart. One hundred plants will plant four rows 30 feet long, if set above distance apart. For horse cultivation set plants 2 feet apart in rows 3 feet apart; 7,260 plants at this distance will plant an acre. Firm the plants well in the soil, keeping them thoroughly cultivated and cut off all runners. About the middle of December, cover bed with salt-meadow hay, straw or leaves. In April, as soon as the plants show indications of growth, push the covering away from the plants to allow them to come through. The mulching protects the plants from cold in the winter and heat in the Summer, keeping the fruit clean and prevents the growth of weeds.

Growing Bulbs in Prepared Fiber

The following bulbs may be grown in prepared fiber: **Hyacinths, Early Tulips, Narcissus, Jonquils, Crocuses, Scillas, Freesias, Snowdrops** and **Spiræas**. Our prepared fiber is mixed with charcoal and only needs to be moistened before use. Bulbs may be grown in vases or bowls as drainage is unnecessary when using fiber.

Marshall's Prepared Fiber. Half pk. 35c., pk. 60c., bu. \$2.00.

Hyacinth Glasses

Hyacinths can easily be grown in water, and it is rather a novelty to grow them in this way.

We offer the following two kinds of glasses to be used for this purpose:

Tall Shape. In various colors. Each 40c., doz. \$4.00.

Tye Shape. In various colors. Each 45c., doz. \$4.50.

Tall Shape Tye Shape

Planting Table For Beds of Bulbs

A circular bed 6 feet in diameter, with bulbs 6 inches apart, requires 110 bulbs; 5 inches apart, requires 160 bulbs; 4 inches apart, requires 300 bulbs.

Depth at Which Bulbs Should be Planted

Many of our customers are frequently puzzled to know the proper depth and distance apart at which bulbs should be planted. The accompanying diagram, reproduced from **Popular Gardening**, conveys the information much more clearly and briefly than we could describe it. The chart will bear careful study. **Outdoor planting should be done early in the Fall** to secure healthy plants, vigorous foliage and beautiful flowers.

Marshall's Lawn Grass Seed

Marshall's Special Lawn Grass Mixture

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

This mixture includes highest grade re-cleaned seeds of Red Top, Kentucky Blue, Sheep Fescue, Pacey's Rye Grass, and other fine Grasses with White Clover.

Price: Lb. 60c., 5 lbs. \$2.50, 20 lbs. \$9.00, 100 lbs. \$45.00.

Marshall's Central Park Lawn Grass

Marshall's Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making a quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no re-seeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and as free as it is possible to make it from foreign matter.

Price: Lb. 40c., 5 lbs. \$1.75, 20 lbs. \$6.00, 100 lbs. \$30.00.

Marshall's Shady Place Lawn Grass

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: Lb. 50c., 5 lbs. \$2.25, 20 lbs. \$8.00, 100 lbs. \$40.00.
