FOURTH REPORT

OF

THE BUREAU OF LABOR.

1903

To the HONORABLE F. R. LATCHFORD, Commissioner of Public Works, Ontario.

.

SIR,-I have the honor to submit herewith the fourth Report of the Bureau of Labor.

I have the honor to be, sir,

Your obedient servant,

.

R. GLOCKLING, Secretary.

INTRODUCTION.

The fourth report of the Ontario Labor Bureau covering the year 1903 is devoted to the following subjects :

WAGE-EARNERS' STATISTICS.

As in past years' the Bureau has made investigation into the hours of labor, wages, benefits paid, periods of payment, etc., showing comparison between those organized and unorganized workers, also suggestions and remarks bearing upon the general improvement of the conditions of wageearners. The returns, while far from being complete, will give a fair idea of the general conditions, as has been stated in previous reports. Much difficulty is experienced in getting returns through the system of circular through the mails. Personal application through special agents is the method most satisfactory, as is the experience of all Labor Bureaus both on this continent and in other countries. The Secretary has, as in previous years, visited as many localities as time from office duties would permit.

BUSINESS OPENINGS.

For the purpose of ascertaining what opportunities existed for new business enterprises in the Province, circulars were sent to the Clerks of cities, towns and villages, asking the necessary information. Their replies will be found herein. In this connection the editor of "Commercial Intelligence," an eminent trade journal published in London, England, and who has published verbatim in its columns the Town Clerks' replies, wrote to say, "you could not have hit upon a happier plan."

DIRECTORY OF LABOR ORGANIZATIONS.

To the fullest extent possible, a Directory of Labor Organizations of the Province has been prepared, the fullest attention given to accuracy from all available sources. This feature has been favorably commented upon in the past by many among the workers, for which reason it is continued.

CONCILIATION IN TRADE DISPUTES.

Under this head is given cases of disputes, in which the services of the Secretary of the Bureau has been asked for in the capacity of mediator.

STRIKES AND LOCKOUTS.

Statistics are given of trade disputes in the Provinces of the Dominion as reported by the Labor Gazette, also disputes in Great Britain and the United States.

INDUSTRIAL STATISTICS.

Giving details of returns from manufacturers of the Province, also table showing wage rate and labor gost in manufactories.

LEGAL DECISIONS AFFECTING LABOR.

Decisions affecting labor in the Province of Ontario, compiled from the Labor Gazette for the year 1903.

The publishing of these decisions from year to year will form a correct history of Ontario decisions.

ONTARIO LABOR LAWS.

The chronology and synopsis of the Labor Laws of the Province.

MISCELLANEOUS.

Apart from the subjects enumerated above, such other matter is included which is thought will be of material interest to the wage-workers and others of the Province.

CIRCULAR TO TOWN CLERKS.

The following circular was issued in May, 1903, to the Clerks of the cities, towns and incorporated villages of the Province. In reply to the 390 circulars sent out, 366 answers were received.

A record is given of answers, which includes new industries established and openings for new enterprises, together with remarks and suggestions regarding industrial development, etc.

DEPARTMENT OF PUBLIC WORKS, ONTARIO.

The Bureau of Labor.

Toronto, May 29th, 1903.

Dear Sir,—The Bureau of Labor of On tario again asks the co-operation of the City and Town and Incorporated Village Clerks of the Province to assist in the continuance of collection of data as to the growth of the industries of the Province, together with opportunities for new industries. Will you be good enough to make answer to the following questions and return in enclosed envelope? No postage is required. Thanking you in advance for this courtesy, I am, Bespectfully yours

Respectfully yours,

R. GLOCKLING,

Secretary Bureau of Labor, Ontario.

1. Name of industries started during 1902. Give name and nature of business and postoffice address.

2. Have any industries changed hands? Name them.

3. Do you consider there is any opening in your locality for new industries? If so, of what character?

Clerks of the following cities, towns, etc., responded to the enquiry of the Bureau;

Ameliasburg,	Bath,
Alfred,	Bayfield,
Ancaster,	Bracebridge,
Arkona,	Baysville,
Alliston,	Beamsville,
Acton,	Barwick,
Alvinston,	Beaverton,
Aurora,	Beeton,
Athens,	Bluevale,
Alexandria,	Burk's Falls,
Aylmer,	Bolton,
Barrie,	Bowmanville,

Stirling, St. Catharines, Springfield, Sturgeon Falls, Sault Ste. Marie, South River, Sudbury, Trenton, Tweed, Tottenham, Thessalon, Tilbury, Thamesville, Uxbridge, Vankleek Hill, Vittoria, Vienna, Waterford, Whitby, Walkerton, Wingham, Winchester, Wheatley, Warren, Whitevale, Wiarton, Wyoming,

REMARKS FROM TOWN CLERKS.

Ameliasburg.—Opening for manufacture of sugar from sugar beets.

Alfred.—There is a good opening here for a grist mill, as there is none in the township. A sawmill, planing mill, and sash and door factory staried during the year.

Ancaster.-Good opening for an electric railway.

Arkona.—Good opening for fruit and vegetable canning factory.

Alliston.—Good opening for manufacture of wooden ware, farming implements, and boot and shoe factory. There is a proposal on foot at present to establish a boot and shoe manufacturing concern.

Acton.—A boot and shoe factory would do well here on account of the large tanneries in the place.

Alvinston.— Would regard this as a good town for establishing a canning factory, beet sugar factor, foundry, or a brick-making business. Have already one brick yard, but it is unable to supply the demand. There is said to be abundance of material for the manufacture of vitrified brick. The shipping facilities are very good.

Aurora.-Good opening for almost any kind of manufacturing.

Athens.—Cheese belt factory started during 1903.

Alexandria.—A new industry for the manufacture of cement pipes has been opened.

Barrie.—Good opening for carriage factory, furniture factory, piano factory, boots and shoes, and white goods (ladies' wear).

A charter has been obtained for a carriage factory company which is expected to begin operations next spring.

Bayfield.-Good opening for roller flour mill.

Baysville.-Good opening for hardwood manufactory. There is also hemlock bark in profusion for tanning.

Beamsville.—This village needs an evaporator, a canning factory and a basket factory.

Barwick.—Good opening for a cheese factory. Three saw and shingle mills started during 1902.

Beaverton.-A carriage factory would do well here.

Beeton.-Good opening for carriage factory, or sash and door factory.

Bluevale.—Good opening for waggon and carriage factory, or any industry of an agricultural character that would furnish steady employment.

Burk's Falls.—Opening for a good flour mill, grist mill, woollen mill and foundry.

Bolton.—There is a good opening here for woollen mill and brewery.

Brussells.—Almost any industry would do well here, as it is one of the condensed milk factory ought to do well.

Bothwell.—Machine shop has been started. There is a good opening for canning factory, and also for a first-class rolling mill. The country round is well adapted for the raising of vegetables and the like. A grist mill is badly needed.

Blezard Valley.—Either cheese or butter factory would do well here.

Brampton.—Good opening for the manufacture of separators, engines, etc.

Bobcaygeon.—This is a desirable location for almost any industry. A boat and canoe factory, wooden ware factory and lime kilns would do well.

Bracebridge.—Started during the year : Hess Furniture Company of Canada, Ltd., Branbridge Brick Company, Watson Brick Company, Muskoka Foundry Company, and Bracebridge Brilliant Light Company. Good opening for sewer pipe and tile factory.

Bath.—Carriage factory and summer hotel have started. Excellent opening for summer hotel and good location cheap, all houses now in business always full, also good site for canning factory.

Brockville.—Union Hat Works started. Good opening for manufacture of agricultural implements, machine shops, pork packing houses, flour mill: in fact, any staple line of merchandise made in factories; shipping facilities unsurpassed in Canada.

Brantford.—Two agricultural implement manufacturers enlarged their plant during the year. Good opening for almost any kind of industry.

Brampton.—Jackson Organ Company started. Good opening for the manufacture of separators, engines, etc.

Cardinal.—A foundry, boot and shoe factory started. Flour mill and grinding for farms are required here.

Cannington.—Good opening for canning factory, woollen mill and flax mill.

Calabogie.—There is a good opening for a grist mill. Good water power undeveloped.

Carleton Place.—Good opening for paper mill, furniture factory and machine shop.

Chesley.—Good opening for knitting factory, foundry and machine shop, and also woodworking factory (smallwares).

Cobden.—Good opening for foundry and repair shop, also for the manufacture of farm tile, as the farm lands are generally low and a great number of tile is required and the expense is considerable to bring such goods from a distance.

Clifford.—A sash and door and planing mill would do well here. The council will deal liberally with any industry employing a number of hands.

Cayuga.—Good opening for a grist mill and machine shop. Brick kiln and tile works started during the year.

Cockburn Island .- A woodworking industry would do well here while Then cheese or butter factory. There is also an abunthe forest lasts. dance of limestone here.

Cumberland.-Good opening for carding mill, sawmill and flour mill. Cumbermere .--- Good opening for a blacksmith shop.

Cooper .- Manufacturing of drain tile has been started.

Chapleau.-Saw mill has been established.

Cumberland.-Saw mill started. Good opening for carding mill, flour mill and saw mill.

Callender .- Sash and door factory started. Good opening here for a tannery, as there is plenty of hemlock in vicinity.

Collingwood.-Flour mill started. Good opening for a box factory, and any industry allied to smelting and bar iron.

Clinton .--- Clinton Knitting Company, Clinton Show Case Company started during the year.

Cobourg .- Upholstering and woodworking business and brewery start-Good opening for shirt factory, pork packing factory and furniture ed. factory or novelties in furniture.

Drayton.-Legging manufactory and over gaitors started. Good opening for a planing mill and sash and door factory with lumber yard, also cooperage for the manufacture of tanks and water boxes for wind mills.

Dunnville .-- The Monarch Knitting Factory, for the manufacture of sweaters, hosiery, etc., employing 60 hands, also kettle strainer industry started. An excellent opportunity for a foundry and machine shop, also a splendid opening for a brick yard. Good locality for raising sugar beets as all advantages exist here for such an industry.

Dresden .- The Strathroy Canning and Pickling Company, the Dres-

den Sugar Company started during the year. Durham.—The National Portland Cement Company, the Durham Cream Separator and the Dairy Supply Company started. Good opening for any industry that presents itself.

Dublin .- A good, up-to-date flour mill and elevator is required, a cheese and butter factory is also very essential, and other factories could be started with profit to the manufacturers and benefit to the citizens.

Dieux Riviers .-- Good opening for a pulp mill, saw mill or any woodenware manufactory.

Dorland .- A canning factory might do well here.

Drayton .- Good opening for planing mill and door factory with lumber yard, and a cooperage for the manufacture of tanks and water boxes for windmills.

Delhi .- Woollen factory, general foundry and farm implements of all kinds would find an excellent opening here.

Dunnville .- An excellent opportunity for a foundry and machine shop. There is no brick yard here, and it would appear from the number of bricks used that a splendid opportunity exists. Our farmers have demonstrated beyond doubt that there is no more favorable locality in Canada for raising sugar beets, and all advantages exist here for such an industry.

Durham .--- There are openings for any industries that may present themselves.

Dorchester Station .- Good opening for a paper mill.

Dixon's Corners .- There is a good opening for the manufacture of brick and tile, and the clay here is most excellent for the purpose. The farmers are experimenting a little in the manufacture of tile. There would be no difficulty in disposing of large quantities.

Dunchurch. There are excellent prospects for an industry here that could use the products of our forests, which are hardwoods and hemlock.

Denbigh.—Steam saw mill and steam thresher located. Good opening for a tannery, furniture establishment, shoemaking business, also another threshing machine would find work.

Dryden.—Portable lath mill. portable saw mill and shingle factory started. Good opening for a brick yard.

Embrum.—One cheese factory started. Good opening for a grist mill. Elora.—Oatmeal mill revived. chair factory extended and foundry extended. Any good building with water power for any small manufacturing business would do well.

Embro.—Evaporator and vinegar works started. Good opening for brick and tile works, canning factory and wagon maker.

Elmira. Planing mill and sash, doors. etc., started. Good opening for shoe factory, brush factory and tannery.

Egansville.—There is an opening here for a boot and shoe factory, also a foundry. Being situated on two lines of railway, the C. P. R. and the Canada Atlantic, the means of transportation are all that could be desired.

Embrum.-Good opening for a grist mill.

Ethel.-Beet sugar industry might do well in this locality.

Essex.—Flax mill. woodwork and turning factory established. There is an opening for a first-class creamery and for a cheese factory, also good opening for canning factory.

Exeter.—Canning factory, farm implements and machinery, carriage factory and beet sugar factory.

Elgin.—Harness factory (harness and collars), employing 25 hands, started. Good opening for creamery, canning factory and wooden ware industry.

Fergus.—Good opening for any manufacturing industry. Railway facilities excellent.

Fort William.—Stoves, ranges, heavy and general castings; sash and door factory, planing mill, woodworking factory, and brick yard started. Excellent opening for almost any kind of industry, as the situation at the head of Lake Superior ought to attract manufacturers of all kinds. Splendid water power in the immediate vicinity is to be developed, and ought to be a further inducement to manufacturers. Will be greatly surprised if, within the next five years, we have not as large, if not the largest factories in Ontario in our midst.

Flesherton.—Cement culvert pipes manufactory started. There are large tracts of cement marl in this locality.

Fort Francis.—Saw, shingle, lath and planing mill started. Good opening for a number of small industries, also for sash and door and furniture factory.

Fort Erie.—Lumber yard. flour and feed store, machine shop started, and a plant is being fitted up for the manufacture of steam radiators. Excellent opening for a planing mill, and flour mill: in fact, the opportunities are good for any industry. One of two general stores, also a bank would find it profitable to locate here.

Gesto.-Brick manufactory established.

Galt.—Grand River Metal Works, snow shovels, hasps, staples, etc., started. There is a good opening for any iron industry, as this may be said to be an iron industry centre.

Georgetown.-Glove factory started. Good opening for industries not requiring water power.

Guelph.—New industries: The Louden Machinery Company, hay forks, hay carriers, barn door hangings, iron pipes an diron tube factory, windmills, furniture frames, artificial stone, iron castings industry, brewery. This city is considered to be a good centre for all kinds of manufactory; has good shipping facilities in all directions, by G. T. R. and C.P.R. Railways. It is a good place for the manufacture of all kinds or agricultural implements and machinery, as the Ontario Agricultural College brings from 30.000 to 40.000 agriculturists to the place every year to visit the College. The Winter Fair, for the exhibition of cattle, sheep, swine, poultry, etc., is also held here every year in December, and thousands of visitors from all parts of the Dominion attend it, also a great many from the United States.

Gordon.-Good opening for a sugar beet factory and saw mill. Grand Valley.-Good opening for a peat manufacturing industry.

Grand Valley.-Good opening for a peat manufacturing industry. Village ready to help along any industry employing a number of hands.

Gore Bay. Woollen factory is needed here.

Glencoe.—Favorable opening for an evaporating fruit industry, a handle factory and a pork packing factory.

Gravenhurst.—Almost any industry except lumber mills would find here a good opening and the council is prepared to deal liberally with any reliable concern.

Hordan .- Good opening for a basket factory.

Harrowsmith .- A canning factory would do well here.

Hillier .- There is a good opening here for a canning factory.

Harrow .- A good opening for a canning factory.

Hastings .- There is a good opening for almost any industry. We have first-class water power.

Hanover.—The Portland Cement Works and several of the furniture factories have been greatly enlarged and improved. Good openiu; for almost any kind of industry, as taxation is low.

Huntsville.—The Muskoka Wood Mfg. Co., saw mill and turned goods, also brick kiln have been established. Good openings for a number of woodworking industries. plenty of hardwood.

Hawkesbury.—A small clothing factory started. Good opening for any industry employing wood, match factory, etc. It is a pity to see loads of wood leaving in the raw state that should be manufactured.

Holland Landing.—Four new sea grass factories started. Good opening for new facilities. Artesian wells in abundance. Railway facilities good.

Hagersville.—An excellent opening for a sash and door factory. planing mill and lumber yard.

Havelock.-A good opening for a manufacture of furniture, also rake brush backs, wood handles. Electric power can be had six miles away.

Hespeler.—We have good sites for manufacturing industries. conveniently located as to water supply, and railway facilities, the one draw back is the scarcity of labor.

Hensall.-Good opening for binder twine factory, foundry and machine shop.

Harriston .- A knitting factory would do well here.

Kincardine.—Chair factory started. There is a good upening for a stove foundry, and carding mill. or almost any industry. Good shipping facilities to the North West Territories.

Kingsville .- Good opening for tobacco factories, canning factory and fruit evaporating factory. A tobacco factory was started during the year.

Kemptville.-Room for almost any kind of manufacturing industry. Good shipping facilities by rail and boat. Killaloe.—Woollen mill and butter factory started. There appears to be good openings for mining.

London.—Rolling mills, extension of McClary Stove Foundry, and tin-plate decorating industry has been established. Good opening for a furniture factory, woollen mills and also factory for making prepared cheese in packages. London being a centre for this industry.

Lakefield.—Started saw mill and general lumber business and Portland Cement Company have almost doubled their output within the present year. Good opening for a woollen mill.

Lovering.—Good opening for any industry in which hardwood can be used.

Lasswade.—Opening for a saw mill, shingle mill, staves and barrel heading, etc.

Lindsay.—There is room for any kind of industry requiring the use of timber in their manufacture.

L'Orignal.—Opening for saw mill and manufacturers of wood, also brick manufactory.

Lucan.—There is an abundant opening for any kind of a manufacturing concern. There is no industry of any kind here and we are in the midst of one of the best agricultural countries in the world.

Moonstone.—There is an opening for a creamery and cheese factories. A planing mill started during the year.

Milford.-Think that a canning factory would do well in this locality.

Manchester.—There is considerable material here suitable for the manufacture of peat; there is also an inexhaustible supply of marl suitable for the manufacture of cement at a place named Chalk Lake.

McDonald's Corners.—First-class water power suitable for electric purposes.

W. McGillivray.-Good opening for a brick and tile yard.

Marksville.-Good opening for a furniture factory.

Minden.—Good opening for furniture factory.

Morrisburg.—Good opening for steel works.

Midland.—Good opening for any manufacturing establishment, as there is a blast furnace here. Also good opening for various kinds of wood manufacturing, we have both hard and soft wood in great quantities.

Marmora.—The Five-Acre Gold Mine began operations in 1902. Good opening for the development of iron ore.

Manitowaning.—This year the Manitou Fish Company have started fishing and intend building a hatchery on the lake. Good opening for cheese factory or creamery.

Maynooth.—One portable saw mill on the Papineau Creek and a portable saw mill at Watson's Lake started. Good opening here for a woollen mill and possibly a rolling mill (flour), and if mining was commenced there are large deposits of copper and molydinite and other minerals.

Mattawa.—A cheese factory, shingle mill, broom factory and saw mill started. There is ample room for saw mills, pulp mills and other factories in Mattawa and surroundings.

Meaford.—Wood turners, blinds, screens, etc., factory, furniture factory and canning factory started. Good opening for saw mills, machine shop, tannery, woollen mill, apple barrel factory and brickmakers.

Mt. Forest.—Picture frame factory, also a large carriage factory has been built here. Town granted them a loan of \$20,000 for twenty years.

Milton.-Any good metal works would find a good opening here.

Merritton.—Good opening for any industry that would bring families in as small help for cotton factory is short at present.

Markham.-Almost any kind of factory would have a good opening here, such, for instance, as shoe factory or tannery.

Markdale .- There is one of the best openings here for a furniture factory of any place in Ontario, there being plenty of timber land, and the town would, no doubt, deal in a very liberal manner with any responsible party desiring to establish here. There are also extensive marl beds suitable for the manufacture of Portland cement. There is a good opening for a pork packing house.

Millbrook.-Good opening for a canning factory.

Merrickville.-Good opening for any industry, as we have good buildings and water power. Good shipping facilities by rail and water. Maple.—There is a good opening here for a tailor shop.

North Gower.—Good opening for a sash and door factory and planing mill.

Newburg.-Almost any industry would be welcomed and on very advantageous terms.

New Hamburg .- American Wagon Company, sash and door factory started. Splendid place for flour mill, as water power is idle in consequence of late owner not rebuilding after being burnt out last fall.

Newboro'.-Good opening for a hub-making factory.

Niagara Falls.—There are three power companies actively engaged in constructing power plants here, spending enormous sums of money, and as soon as the power is available there will be openings for all kinds of industries.

North Bay.-Openings for foundry and machine shop, for the manufacture of lumber into all shapes, as this is the centre of a fine lumbering district, and the building of the T. & N. O. Railway opens up a virgin forest, where wood of all kind is plentiful in both hard and soft woods. Is facilities in all directions by the C.P.R. and G.T.R. lines. A pulp mill is well situated for manufacturing of any kind, having excellent shipping under way.

Norwich .- Any manufactory using hardwood would find a good opening here.

North Toronto .- Almost any industry which might not necessarily require close railway communication for shipping purposes might locate here.

Oakwood.-Good opening for a shoemaker.

Orono.-Good opening for sugar beet factory, this being a splendid district for the growth of roots for the purpose.

Oakville.—Any good manufacturing concern would find a good opening here.

Owen Sound.-This is a first-class point for the manufacture of any line that hardwood of any kind is required for, there being an abundance of the raw material in the adjacent township, and every facility for towing rafts or scows to any point along the miles of waterfront leading out to the Georgian Bay from the Sydenham River, upon which the town is built. For smelters and industries of that kind, no better location could be obtained, as the town is practically walled in with limestone rock. Both lines of railway, C.P.R. and G.T.R., have terminal points here, and that, along with having one of the best harbors in the Dominion, makes the shipping of manufactured articles to any point in Canada or elsewhere hard to excel. Orville.—There is a good opening for almost any kind of woodworking

A saw mill started during the year. industry.

Oshawa.-New industries. Steam and Gas Fitting Company. Good openings for agricultural machinery manufacture, also woodenware. Good

facilities for factories, favorable considerations, and convenient for shipping. The Oshawa Electric Company bringing in all freight and taking same from all the factory premises.

Ottawa East.—Brick factory, 'cecilised,' new process of pressing brick, composed of sand and cement, started. Good opening for almost any industry, as taxes are low and railroad facilities good.

Perth.—Peat factory, manufacturing turf into peat, started. The best turf bog in the Dominion is understood to be here.

Parry Sound.-Box factory started. Good opening for tannery and furniture factory.

Peterboro .-- Beet root sugar factory. Opening for almost any kind of industry requiring cheap power and excellent railway connection; it is also on the route of the Trent Canal.

Powassan.—Creamery, steam power for brick-making, shipping clay for making brick to Sault Ste. Marie, started. A good business could be done here in shipping cord wood. Would be glad to correspond with parties in need of wood.

Port Colborne.—Large lime quarries are being opened up to supply smelters on American side; natural gas for domestic purposes. Good opening for ship-building; elevators; steel manufactory. The Dominion Government is building breakwaters and elevator piers; when completed harbor will have 22 feet water inside breakwater.

Paris.—Good opening for an industry for the manufacture of agricultural machinery, engines, boilers and general machinery. Plough factory, refrigerator, screen, door and window factory started during the year.

Port Dalhousie.—There are facilities for almost any industry here. Shipping by rail and water.

Port Carling.—Opening for sash and door factory, and a shoemaker or cobbler is needed.

Point Edward.—Splendid opening for a tannery, making fine alum calf skins,—no such leather is made in Dominion, and the duty is 30 per cent. It would be used by every brace manufacturer in the Dominion. Great water point on St. Clair River and Lake Huron; over 3,000 acres of water land and 100 acres of bay or shallow water.

Port Hope.—Good opening for manufacture of iron machinery, those using moulding sand of which there is a large supply in the locality. Also a good opening for a carpet-weaving concern. A factory for the manufacture of porcelain bath tubs, etc., started during the year.

Picton. Good opening for barrel factory, canning factory and pork packing house.

Prescott.--Any kind of an industry would find here a good opening.

Port Perry.—Good opening for a canning factory or beet sugar factory. A cooperage has been started.

Port Stanley.—Any industry would find here a good opening, as there are excellent facilities for cheap fuel and water and raw material. A new saw mill has been started.

Penetang.-Good opening for knitting factory and woollen goods manufactory. Also any woodworking industry. Industries started during the year : Gasoline launch boats and canoes shop. Also box and tool factory and large saw mill.

Palmerston.—Facilities are good for almost any kind of manufacture not dependent on large contiguous supplies of natural resources. Shipping facilities unexcelled.

Port Arthur.-Good opening for biscuit factory, woodenware, flour mill. oatmeal mill, foundry.

17

Port Rowan.-Good opening for a brick and tile yard.

Plantagenet.—As there are good mineral springs here a fine summer resort could be established.

Pembroke.—Good opening for steam saw mill and for all wordworking factories. There is a good bay for holding logs and the C.P.R. runs close to water edge. Brick and tile works could also be established with advantage.

Parham.-Good opening for cheese box factory.

Paisley .- Almost any industry would find this a good place to locate.

Parkhill .- Good opening for canning factory or fruit evaporator.

Fort Elgin.-Good opening for creamery, canning factory and woodenware industry.

Port Dover.—This village can offer the best facilities for any new industry. There are two railways, and shipping by water, as well.

Pearcely.—As there is excellent water power, a tannery, woollen factory or cheese factory would do well.

Pomona.-Good opening in the township for a sawmill.

Ridgeway.—Ship yard and dry dock on the Niagara River has been established.—It is thought that a good brick yard would pay and some think there is a good opening for a canning factory. Renfrew.—Electric light company, roller mills and a flour mill started.

Renfrew.—Electric light company, roller mills and a flour mill started. Good opening for a stove foundry, planing mill, beet sugar factory, brick and tile factory and pulp factory.

Rainy River.—The Shewtin Clarke Company, Limited. of Minneapolis, are erecting a large sawmill and planing mill here. Buildings and plant to be worth about \$150,000. Output thirty to fifty millions per annum. There is a good opening for a sash and door factory, furniture factory and brick yard.

Richard's Landing.-Good opening for sash and door factory, mouldings, also tannery, furniture factory and brick yard.

Rodney.-Good opening for furniture factory or any kind of woodworking industry.

Rutherford .- Good opening for flax mill. roller mill, etc.

Ridgetown.-Opening for canning and evaporating plant.

Rat Portage.—Good opening for flour mills, pulp mill and furniture factories.

Strathroy.—A foundry has been started and the furniture factory has doubled its capacity for doing work and now employs about 100 hands. There is room and to spare for any industry not looking for a bonus.

St. Thomas.—Factory for making brooms, brushes and woodenware started. Good opening for almost any kind of iron industry.

Southampton.—Chair factory, foundry, match factory and laundry started. Good opening for a tannery, good site for elevator, great shipping facilities, and a grist mill is wanted badly.

Simcoe.—Automobile works. glove. mitt and robe company and wool stock company started. Good opening for a woodenware industry, tanning and beet sugar factory.

Sturgeon Falls.—Fulp factory for the finishing of paper material started. Good opening here for foundry, grist mill, tannery, etc. Excellent water power and plenty of raw material.

South River.—Sawmill and general lumbering business started. Good opening for woollen mill. The municipality is prepared to grant exemptions from taxes to any such company starting business. Have best water power north of Toronto, and close to Railway Station.

2 B.L.

Springbrook.—Cheese box factory started. Good opening here for pottery works, as the Felekspar required could easily be obtained. There is also plenty of natural gas and oil in the vicinity if looked after.

Sprucedale.—Sawmill started. Good opening for sash and door factory and lath factory.

Sandfield.-Good opening for creamery and cheese factory.

Scotia.—There is a splendid opening here for a large factory in woodworking machinery, a good site being available at a nominal figure, to any one who will put up and work a factory. Plenty of timber to be had in the vicinity, and good shipping facilities by the G.T.R. and C.A.R. The owners of the property will be glad to hear from anyone who contemplates starting such industry.

Strathmore.—Good opening here for the manufacture of lime on an extensive scale.

Sudbury.—A flour mill is in great demand here. There are over ',000 farmers between North Bay and Larchwood, and they have to buy their flour and provender.

Stouffville.—Any industry would find this a good place to locate.

Smith's Falls.—Good opening for any industry.

Sutton.—Good opening for a canning factory or a wool or carding mill. Shelburne.—Good opening for a woollen mill.

Streetsville.—Any industry capable of being operated by water power. Stirling.—Good opening for a canning factory.

St. Catharines.—Good opening for light industries requiring water power or electric power, either of which can be had at nominal rates.

Springfield.—Good opening here for a bank. A brick and tile industry would also do well here.

Sault Ste. Marie.—Portable sawmill factory started. Good opening for shingle mill, lath mill, turning mill, as there is any quantity of good hardwood, birch, maple and red oak, also furniture factory.

Sudbury.—Opening for foundry and machine shop. Woodworking shop could be advantageously established.

Trenton.—Four packing establishments have been established for curing hams and other meats. The Apple and Produce Cold Storage Forwarding Company, plant cost \$45,000; also shipbuilding. Good opening for iron industries, furniture factory, boot and shoe factory, casket factory; in fact, anything in iron or wood line or any industry that requires excellent shipping facilities by rail and water.

Thessalon.—Sawmill, capacity 4,000,000 feet per month; also laundry, has started. Good opening for tannery, as tan bark is shipped from here in great quantities. Hides are also shipped in ton lots. Hundreds of cattle killed for camps, as well as butcher's trade. Furniture factory, if established, could use waste wood from mills, to be used for parts of furniture.

Tillsonburg.—Maple Leaf Harvesting Tool Works started. Good opening for almost any industry on account of good railroad connection. Direct connection with Port Burwell Harbor, the Grand Trunk and Wabash Railways, Michigan Central, Tillsonburg, Lake Erie and Pacific Railway, and Canadian Pacific Railway.

Teeswater.—Tannery, making sole leather, started. Good opening for furniture or chair factory.

Tweed.—Good opening for canning factory and small woollen mill. A beet sugar factory would find this a good location; also a pork packing establishment. Good railway facilities, being on the main line of the C.P.R. between Toronto and Montreal. Light Water power can be obtained from private parties having power already developed.

Tottenham.—Good opening for a carriage factory and boot and shoe factory. An electric light plant has been established.

Tilbury.—There is an A1 opening for sash and door and planing factory, also for a canning factory.

Thamesville.—Good opening for canning factory, meat packing establishment, fence factory; in fact, any industry which would be adapted to a good grain and stock section. The town is anxious for some good, reliable industry to be established.

Uxbridge.—A splendid location for another tannery. The locality is also suited for a canning factory, also sugar factory.

Vankleek Hill.—There might be a canning factory established here or other small manufactory requiring no water supply of an extensive nature.

Vittoria.—A good canning or evaporating factory would pay in this section as there is a quantity of fruit grown here.

Vienna.—A roller process flour mill would find here a good opening. Al-o a canning factory to can green peas and tomatoes, as the district is particularly suited to raising tomatoes. Have also very fine water privileges, which can be bought cheap and utilized to good advantage, and of a sufficient power to run any of these industries.

Victoria Road.—Raven Lake Portland Cement Company, 1¹/₂ miles from Victoria Road Station; a creamery has also been started. Good opening for the manufacture of peat, as there is a first-class turf bog, one mile west of Victoria Road.

Wingham.—The Western Foundry Company, a stove foundry manufacturing stoves and steel ranges started. Good opening here for a casket factory.

Walkerton.—Walkerton Hosiery Company, Canada Spool and Bobbin Company, Biscuit and Confectionery Company started. Consider this a good location for a canning factory, also an oatmeal mill.

Walkerville.—Varnish works, wire nail factory in connection with the Page Wire Fence Company, and the Ontario Asphalt Block Company started.

Whitelake.—Stave and heads factory started. Good opening for any industry, as there is a charter applied for by a mining company, and if they succeed, as they are expected to at present session of Parliament, then there will be a railroad built up to the mines, which are of hematite iron, and once they are in operation it is most likely other industries will follow, as there is plenty of water power on the outlet creek of Whitelake.

Webbwood.—Spanish River Pulp and Paper Company started. Good opening in this locality for mining industry.

Waterford.— A general repair shop and foundry would find here a good opening.

Whitby.—Consider this town, along the lake front, offers better facilities for establishing manufacturing plants, either iron or leather, than most, and just now there is an agitation started to make Whitby and Midland a part of the transcontinental system of transportation, which would very much enhance its value.

Walkerton.-Good opening for canning factory and oatmeal mill.

Winchester.-Good opening for a canning factory.

Wheatley.-Good opening for a tobacco factory, also a canning factery.

Warren .-- Good opening here for a cheese factory.

Wyoming.—Good opening for canning factory, machine shop, foundry, apple evaporator.

Wiarton.—The Beaverton Beet Sugar Manufacturing Company, Limited, new flouring mill started. Good opening for planing mill, sash and door factory and brickmaking.

Whitevale.—Good opening for any manufacturing industry, there being good water privileges available at very moderate cost. No expense for dam or maintenance of dam, that being kept by owner of grist mill for all time. An industry for the manufacture of brush backs, handles, etc., would do well.

Windsor.—The Shoop Family Medicine Company, The Hardie Spring Pump Company, The Canadian Household Supply Company, The Eureka Planter Company, The People's Alpha Company (Vinegar), and the Erie Tobacco Company started during the year.

CIRCULAR TO LABOR ORGANIZATIONS.

The following circular and accompanying schedule was forwarded to the labor organizations in the Province of Ontario:

DEPARTMENT OF PUBLIC WORKS, ONTARIO,

The Bureau of Labor.

Dear Sir,—The Bureau of Labor of the Province of Ontario again seeks the co-op eration of the labor organizations of the Province to assist them in the continuance of the investigation of certain conditions of the wage-earners of Ontario. The value of this data will become more valuable, from a comparative point of view, as the years pass cn. The present year is the fourth of the collection of data as to wages, hours of labor, etc. Such information being classified each year will mark the progress or otherwise of the wage-earning class.

Confidence in the Labor Bureau increases year by year. Much of the suspicion feit toward it is passing away. Slowly its purpose is being understood, and with that understanding will the task become easier to collect the necessary statistics as may be desired, to enable the Bureau to present accurate and complete information through its Reports as will enable our Legislators and others to evolve solutions of public questions that will tend to the general prosperity of the Province.

Copies of the Report of the Labor Bureau. for 1902 have ben' forwarded to Secretaries of all labor organizations whose addresses could be obtained. If none have been received by your union, please drop a post card notifying me to that effect, and copies will be at once forwarded.

The Bureau also cordially invites any remarks of a general character that, in the cpinion of your body, will be of benefit to yours and other organizations.

You are respectively requested to answer as fully and as accurately as possible the questions on acompanying schedule, and return same in enclosed envelope as soon as convenient. No postage is required.

I am, respectively yours,

R. GLOCKLING,

Secretary Labor Bureau, Ontario.

P.S.—if you are not now secretary of your organization, will you please hand this to your successor

The Bureau asks that the name and address of the Corresponding Secretary of your organization be forwarded whenever a change of officers takes place.

Labor Organizations' Schedule No. 1, 1903.

Office No.

DEPARTMENT OF PUBLIC WORKS, ONTARIO,

The Bureau of Labor.

	The following questions refer to the year ending December 31st, 1902:

### REMARKS FROM LABOR ORGANIZATIONS.

No. 1. Legislation that will prevent members earning less than \$1,000 per year being assessed on income, respectfully requested.

No. 10. We change our system from piece to day work on August 15th, 1903.

No. 27. A clipping from local press, re prices, as follows :-

"Prices Frighten Builders," "While in conversation one day this week with a local architect the Bulletin was informed that the prices asked for building this spring had frightened many who had intended erecting houses and other buildings. He believed that the condition of the labor market was killing the goose which laid the golden egg. Plans had been prepared for many fine homes which were intended to be erected this year, but owing to the enormous advance in prices, these will be deferred until another year. 'But is there not a large amount of building going on?' queried the reporter, to which the experienced one replied in the affirmative, and, continuing, he added, 'The factories are all busy and the carpenters are receiving the advanced wages demanded, but,' said he, 'it will not last. There is an end to all things,' and, while he did not like to see hard times or men working for hard times pay, he was fully convinced that there would be a change, with the result that wages would be lower.''

"Frighten Builders" is made to appear that it is the labor that is the cause, but it is not. Last year bricklayers were working for 40 cents per hour, 10 hours per day; masons 30 cents per hour, 10 hours per day. Now, sir, where is the difference? Just one hour a day less, and one hour's pay less per day for bricklayers, and the same pay for masons for the nine hours, as they got last year for ten hours. Last year the mason laborers' wages was \$1.50, \$1.65 and \$1.70 per day. This year they get 17 cents per hour, nine hours per day, or \$1.53 straight.

Last year the price of brick, kiln run, was \$7.00; casing brick \$8.50 per thousand; lime 18 cents per bushel; sand 85 cents per yard or half load, and for work and material completed from \$13.00 to \$15.00 per thousand.

This year, the price of brick, kiln run, is \$7.85; casing brick \$9.35 per thousand for new bricks; sand \$1.00 per yard or half load; lime 20 cents per bushel, and for work and material completed from \$16.00 to \$20.00 per thousand.

Now, sir, I shall leave it for you to say, if it is the labor that is frightening would-be builders, or the bosses, and I think you will find that it is a nail trying to be drove in organization. Last year they were paying all prices, and did not know many hours together what they would have to pay. This year they know what they have to pay per hour till the first of January, 1904.

No. 28. I would like to inform your Department that we are unanimously in favor of a nine hour day. There is unpleasantness just now with our firm because we are asking for Saturday half holiday, for three months. It is unfair for us, I admit, to embarass our firm, seeing they are so busy, and also gives their competitors an advantage they should not get, as it may destroy our trade at no distant day. This, I would suggest, that Parliament step in and pass a nine hour day bill and make the competition equal all around. We have a good deal of sickness on account of close confinement and steady work. Most of the trades have got this in cities, I think. So we in the towns are doing them an injustice by working ten hours.

No. 30. Our Association is formed mainly for a protection to ourselves in a general way. We never strike for a regulation wage; we only wished to shorten hours, which used to be from 10 to 12 hours the first five days, to a nine hour day. With the co-operation of the merchants here, we educated the people to earlier or daylight shopping.

No. 35. The moulders are not paid here what they should be paid. \$2.75 is little enough for any moulder, 8 to 9 hours per day. 10 hours is too long for a moulder, considering a man standing at his work all day and cannot sit down.

We claim that union shops are the best for both employer and employee, as our committees look after the men that here is a fair day's work done.

Moulders' lives are shortend by their unhealthy trade. So much dust and blacking that they inhale, also the colds that they receive when going home from work, being over-heated by casting. It takes all a moulder earns to buy shoes and clothing and pay doctor bills. This is one reason I would like to see passed by our Dominion House, an eight hour work day, for the benefit of our trade.

No. 40. So that you may understand our union better, I pen the following remarks: First, we have a mixed body of skilled and unskilled men working at different trades and callings, and earning different wages, but invariably all union men work 9 hours per day the week through. Nine of the city corporation labourers left work and demanded 20 cents per hour for nine hours' work. They were receiving 15 cents per hour for 9 hours' work. The City Council ignored them, and would not grant it. They did not belong to our union or any other. Had they belonged to our union and petitioned the Council in a proper manner as union men, we members of this union feel sure that their petition would have been granted.

No. 48. A license system would be a good thing, and the Board of Examiners should be appointed by the locals of the International Union. All barbers should be subjected to a thorough examination.

No. 50. We favor restricted emigration as a means to prevent the labor market being flooded with an undesirable class of emigrants, who are never missed out of the country they leave; are a standing menace, socially and otherwise, and eventually increases the burden of the taxpayer by swelling and increasing the ranks of the thriftless and ne'er do well.

, We favor legislation that will protect the label of each individual union, the same as the law protects the property rights of each individual citizen.

We favor a stricter enforcement of the "Factory Act" in the matter c^{*} child labor, and a closer attention to sanitary arrangements in factories and workshops, and a general insistence of the provisions of the Act being faithfully carried out, especially where the employment is hazardous and dangerous.

No. 62. We protest against assisted emigration coming into competition with labor.

No. 63. For the improvement of the condition of our craft, I would suggest the abolition of the manufacture of brooms in the Central Prison of Toronto, and until that is abolished the conditions of our craft can never be improved. Brooms could be made in prisons to be used in all Government buildings, works and institutions and not interfere with free labor, but as long as prison-made brooms are put on the market and free labor has to compete with them, the broommakers of Canada will never improve their present conditions, which is very bad.

No. 83. We are of the opinion that a law should be passed that would abolish home workshops and sweating. Each employer should furnish workshop for his employees free. That if should come under Government · inspection as to sanitary conditions at least, and that some supervision should Le had over the manufacture of clothing, as a fruitful sourse of the spreading of contagious diseases lies in the home shops. The writer can verify this from his own knowledge.

Provincial law making the union label the exclusive property of the parties or organization using same, providing Provincial registration was complied with.

No. 85. Re improvement of our craft and every other trade in Canada for that matter .- "Exit Canadian Mechanics." I think something should positively be done to stop this wholesale importation of foreign mechanics to Canada. It will only be a question of a very short time when there will be twenty men to one job. Even now, we right here in London have them amongst us. Each ship load is bringing out there quota. And the way those foreign mechannics are being deceived is really a shame. As to waves etc., it is a well known fact that firms in United States pay tradesmen of all classes from 25 cents to \$2.00 per day more than they do in Canada. Now if our Canadian manufacturers have the interest of our fair Dominion so much at heart, why do they not pay the same wages as is paid in the States? If they did this Chicago would not be able to claim 200 000 Canacians. Detroit, 70,000, and so on, with Cleveland, Cincinnati, St. Louis and other American cities. For the very good reason that Canada's sons would stay in the land that gave them birth if conditions were equal. It would also dc away with thoe old boys' associations, for the old boys would stay here. If you wish to assist or help the conditions of machinists, try and stop this wholesale importation, when every job could be filled with our own people, if the same wages were paid.

No. 110. The members are satisfied with the conditions here. When any of the members have a grievance they go to the manager of the factory and have it settled, thereby avoiding the necessity of the union interfering.

No. 118. In my opinion there should be a clause in every contract for public works of any kind, which would compel a contractor to do all his work by the day. Piece work or sub-contracting should be prohibited. Taking the line of stone work done by the piece, we find that hundreds of pieces are worked by piece work which would not be worked by day work. When a man works by the piece, if the stone is spoiled before it is finished the workman loses his time. He receives nothing for his work. If he finds the stone shaky or unfit when he starts it. the foreman usually tells him to try it anyway; that it will be all right if it hangs together. This means cut it or lose your work, and time. So the cutter works away cannily and by taking more time often succeeds in finishing a stone that is unfit to work and totally unfit to go into any building. These stones would not be cut by day work, because if it did not hold together until finished the contractor would be the loser, not the workman.

Fortnightly pay should also be compulsory, as few workmen are in a position to go a month without a pay.

No. 121. Have had a very busy winter. Crews overworked. Company did not have power enough to handle freight offered properly. Crews made big money all the winter, but did not get much rest. Business still good. crews in freight service have no regular hours—called when wanted.

No. 124. I would suggest a Government boiler inspector for railroads.

No. 140. A new scale went into effect May 1st, raising our wages \$2.00 per week, and reducing work, week to 53 hours, 9 hours per day first five days, 8 hours on Saturday.

No. 153. We believe something should be done to give our men more Sunday rest.

No. 156. The journeymen tailors are opposed to the general policy of granting aid to immigration, because of the tendency of over-crowding the labor market, with the exploited foreign class of laborers from Europe, thus reducing wages and lowering the standard of living of the Canadian workers. The union believe in a natural growth of a well fed, well clothed, well educated people. In this connection we wish to point out the fact that the tendency of competition industry is determined to obtaining this rsult. The more intelligent class of Canadian workmen find it necessary to restrict the natural increase of numbers in the family, (as the census shows) because of industrial conditions, and we ask the pertinent question, is it wise of any Government to restrict population of the intelligent class, and buy population in the foreign fields for the sake of gain in the capitalist class of magnates, who control industry for gain.

No. 173. In reference to remarks or suggestions in regard to our calling. We are now trying to get some improvements from the Dominion House, as that is the House that passes marine laws in reference to do away, with temporary certificates to men who do not know much about engines, yet are allowed through the issue of temporary certificates to run them, and people are allowed to risk their lives on boats run by them.

There is one matter that deals very closely with us, and which we think the legislation ought to deal with. A law ought to be passed making all men having charge of boilers or engines pass an examination, and get a proper certificate from the Government.

No. 175. We should have compulsory examination by the municipal authorities as to competency on all electrical workers. This has been passed by the Legislative Assembly.

No. 182. Referring to your request for suggestion from our craft that would be of permanent benefit, I would beg to state that for the railway companies, as well as the carmen, permanent benfit would be derived from shops or cover of some kind for repairing cars. Under present conditions 75 per cent. of the men so employed in this locality are exposed to all weather the entire year. These conditions exist throughout the Province. In winter the labor of men employed in repairing cars would be 25 per cent. more effective if protected from snow and wet. Heating not necessary. The exposure renders it impossible for men to give effective service. Otherwise conditions satisfactory and amicable relations exist between the management and employees. A nine hour day and fortnightly pay is our aim.

No. 184. Arbitration is case of strikes and lockouts would be beneficial to all, both to the men as individuals and to the community at large.

No. 196. There is some friction just now on account of having to be at the stables at 6 o'clock in the morning, making it ten hours for the drivers.

No. 198. In the union yards the wages as for single rigs, \$10.80 for double rigs, \$12.00 per week. In the non-union yards there is no scale of wages. They pay just whatever they like.

No. 203. Since our organization has been in existence overtime used to run in many cases until 10 p.m. Since our union is in existence there is very little overtime worked. All overtime is now paid at a flat rate. The wages have been raised from one dollar to two dollars per week and in a few cases three dollars per week, which is due to two reasons: first, the existence of our union; secondly, the scarcity of cattle butchers. In fact, there are many of the slaughterhousemen and meat cutters, who are going to the States in great numbers, owing to higher wages being paid there. Whilst, on the other hand, there are a number of expert American butchers employed here, who command high wages in proportion to what the Canadian butchers command. One evil that exists in the pork packing establishments of Canada to-day, is the employment of boys under 14 years of age, which is demoralizing. In some cases boys are working at 12 years of age, as, for instance, in the case of certain packing houses, one boy 12 or 13 years of age, had a knife thrown at him by another boy, who was only 12 years old. The accident occurred last winter; in June the boy died in the hospital from the wound. There are many men working to-day in the pork packing houses, who have wives and families to keep, who are not drawing over \$8.00 per week, and any number who are drawing \$8.50 to \$9.00 for a week of sixty hours.

There are four pork packing concerns who have closed up their business in Ontario within the last few months, and many of the employees of those houses have gone to the States for employment, owing to the fact that they had no knowledge of any other part of the trade only pork butchering.

No. 207 wish to suggest that the establishing of the following would be conducive to the best interests of the wage-earners of the Province:

First. The establishing of a Printing and Binding Bureau by the Ontario Government, whereby all the Government printing and binding could be done by the Province itself.

Second. We would recommend the passage of an arbitration and conciliation bill, similar to the measure introduced in the House last dession by the Hon. Mr. Latchford, and allowed to drop.

Third. We further suggest that the Government discontinue granting, moneys for the purpose of assisting mechanics to come to this country to compete in our already over-crowded labor market.

. Fourth. That the Factory's Act be operated by the Labor Bureau. We earnestly believe that the general conditions of the Act would be better served if relegated to the Department of Labor. In any case, we desire to suggest a more rigid observance of the Act, than is at present given it.

No. 227. In response to your invitation for suggested legislation that will improve the condition of our craft, we submit the following remarks:

1. Political Reforms. (a) Compulsory arbitration on New Zealand lines. An arbitration board representing both union and employers, presided over by a sympathetic Judge of the Supreme Court, by firm, and righteous decisions, removing the cause and the possibility of strikes.

(b) Abolition of the ward system and single member constituencies. The old-fashioned idea of gerrymandering and disenfranchising our opponents is a wrong to the commonwealth. In a 20-member council or a fivemember constituency, intelligent lively minorities will receive much more encouragement.

(c) Adoption of the Hare-Spence system of voting, it stimulates a healthy interest in public affairs, and makes corruption a more difficult matter.

(d) Practical sympathy for crippled citizens. There are so many dangerous machines now used in daily toil that the number of maimed people fighting life's battle under painful odds is quite noticeable. We, therefore, suggest that in all Government appointments, cripples, who have passed the civil service examinations and are competent to do the work shall have the preference.

(e) Constituencies to have power to recall their representative, when such representative fails to represent the wishes of the constituents, and to elect another representative in his place. (f) Abolition of the Senate, and the substitution of the referendum in its place.

(g) Government to pay all legal expenses of candidates, who poll onehalf and upwards of the required quota of vote, at municipal and parliamentary elections.

II. Social Reforms. (a) Altruism and collectivism being the recognized basis of robust national life. We suggest, that isolated individuality be discouraged, and that people be encouraged to join societies for mutual aid and protection.

(b) The condition, training, and environment of the majority of toilers is so destructive to thrift, that the accumulation of wealth by them is a rare thing. Let the toiling millions, with a "summer vacation," exposed to all weathers, and enduring the strain of exhaustive toil, bear the burden of modern civilization. We, therefore, suggest that for the first ten years the following suggestions for legislative financial aid shall apply only to those toilers whose annual income is less than \$600. The claims of the poorest receiving first consideration.

(e) A municipal building loan of \$1,000 for ten years at 3 per cent., the party receiving the loan to furnish an endorsement covering a period of five years from his union, employers, landlord and the merchants with whom he deals, that the said applicant is a worthy citizen. 100 loans every year would every ten years release 1,000 poor families from the burden of rent. In ten years the cycle would be complete, and the loans, returned, making the scheme self-supporting. As the city can borrow money at three and a half per cent., this would really be a very cheap benevolence, and we submit far better than any tenement house scheme. We suggest that the union should co-operate with the Government in making this a genuine advantage to the toiler and his family. Much more than this is being done for Irish tenants by the British Government and has been done by this city for railway companies.

(d) Abolition of the contract system on all public works and the substitution of day labor.

(e) Establishment of municipal fuel yards. Railway in debt to municipalities to work out their indebtedness by hauling fuel free of charge. Fuel to be supplied at reduced rates to applicants endorsed by societies, who are feeling the pinch of poverty.

(f) Old age pensions of \$2.00 a week, the pensioner to be endorsed by a society, which society shall also pay one-eighth of the pension.

(g) On account of the numerous accidents from machinery, and the great loss of limbs, we suggest that where there is no legal claim, on some one financially able to pay damages, that the Government shall pay 50 per cent. of the cost of the artificial limb, provided that the income of the wounded person is less than \$600 per annum.

(h) Such public employment as watchmen, gate keepers, court constables, gaol guards, caretakers, to be reserved for men from 50 to 65 years of age.

(i) All Government officials and employees to be taken off the salary and wage sheet at the age of 65.

(j) Abolition of all Government pensions save the old age pension.

(k) The eight-hour day to be made the Canadian standard day for all forms of paid labor. All time above that to be overtime, and limited in amount per annum, as in New Zealand.

III. Moral Reforms. We suggest reforms under this head, because good John Ruskin says. "The greatest of all economists are the fortifying virtues, which the wisest men of all times have arranged under the general heads of Prudence, Justice, Fortitude, and Temperance." We submit that the toiler is justified in expecting financial aid from his children, from the age of 15 years until they leave home. We submit that the environment of the average toiler is so destructive to John Ruskin's "fortifying virtues" that many toilers fail to obtain from their children that financial aid to which they are justly entitled. The child and the State are also heavy losers from this destruction of the "fortifying virtues." We, therefore, suggest that:

(a) The age of the legal patrons of pool rooms be raised from 16 years to 21 years.

(b) That all children under 16 years of age be warned off the streets by the ringing of the curfew bell at 9 p.m. in summer and 8 p.m. in winter, unless the said children are attended by their guardians.

(c) Prohibition of the manufacture of cigarettes.

This is the report of our committee as received, amended and adopted by Branch IV. Amalgamated Society of Carpenters and Joiners at their regular meeting, August 25th, 1903.

No. 231. As this Assembly is composed of members of various trades and callings, we cannot give the desired information in detail, but on the whole wages are much higher and work more steady than it was, but the increased cost of living and the advance in rent which in some cases amounts to 30 to 40 per cent., robs the wage-earner of part of the benefits of the good times that Canada is at present enjoying.

No. 232. Before the Association started, wages were \$1.75 for ten hours; now wages are \$3.00 for eight hours.

No. 235. An examination by either Government or city officials to weed out incompetents, who do cheap botch work and so bring discredit upon mechanics.

No. 238. We are in favor of board of conciliation, also of superannuation for aged and infirm, and Government ownership of all arbitrary franchises.

No. 240. Provide proper sanitary arrangements, such as closets, etc., regular inspection of works by Government officers.

By enacting a workable alien labor law to protect the interests of Canadian citizens from importation of alien labor.

Prevention of Sunday work, such as loading and hauling of material by rail and water; weekly pay instead of monthly; the proper safe-guarding and housing of explosives; inspection of boilers, both stationary and locomotive: eight hours per day work; prohibition of sale of liquor in or near the works; licensing of steam engineers, and then only to British subjects.

## REFORM IN TAXATION.

No. 253. The one thing that the Legislature can do for the benefit of labor which would accomplish more good than anything else would be to rectify the method of assessment. At the present time the assessment discriminates against the employment of industry. Let any man erect dwellings, construct a factory or make other improvements, at once his taxes are increased, while the taxes of the land speculator are confined wholly to the value of the land. This discrimination should cease.

But the case becomes worse when we see how the holder of the land in the growing towns or cities can charge labor so much for the occupation thereof. While the land owner may collect a ground rent ranging all the way from a thousand dollars to a hundred thousand dollars per acre yearly, the toilers who produce the wealth get but little beyond a very narrow subsistence.

By this method of taxation the toilers must bear the whole burden of taxation, and at the same time keep in luxury the owners of the best sites. This means a double tax to industry and a life of luxurious leisure to the land owner, except for all time from any of the burdens of taxation.

### DIRECT LEGISLATION.

The people should have the power to either initiate laws or to express their approval or disapproval of the acts of the Legislature or the Councils. In this way reforms now much needed could be effected and much bad legislation prevented.

#### REFORM OF REPRESENTATION.

We believe that by the grouping of constituencies and proportional representation many of the evils of the party system could be eliminated.

#### DISCRIMINATING LEGISLATION.

All special favors and all methods of bonusing are a violation of the primary principle of Government, the equality of every one before the law. Bonuses are granted in almost every case so as to favor the rich at the expense of the poor. We would, therefore, recommend that all bonusing be abolished.

### PRISON LABOR.

We would recommend that all prison labor be directed more with the aim of educating the prisoners to become useful citizens, and not so much with the idea of giving a chance to some contractor to secure a fortune. We hope, therefore, that the Legislature will abolish all contract labor in prisons.

### PUBLIC OWNERSHIP.

The granting of public franchise has in many cases given undue power to capitalists to oppress the public. We would, therefore, be glad to see the Government adopt the method of public ownership of public utilities.

### THE INSPECTION OF FACTORIES.

This council is of the opinion that the inspection of the factories cannot be done efficiently by the present staff. The work is far too great, and to be attended to with proper care there should be an inspector for each city, of the Province.

### THE FACTORIES ACT.

The administration of the Factories Act is at present under the control of the Department of Agriculture. It is the opinion of this council that it would be much better to place it under the control of the Labor Bureau.

### THE INSPECTION OF BOILERS.

The numerous fatal accidents occurring through the explosion of boilers seriously demands the attention of the Legislature. This council would recommend that steps be taken in the direction of providing that only competent engineers be placed in charge of all steam plants.

No. 254. Suggestions bearing upon the industrial question: legislative, --the shortening of hours of labor; functional, the better inspection of factories.

### To the Secretary of the Bureau of Labor, Parliament Buildings, Toronto:

Dear Sir,-In answer to your communication of November 20th, we cordially desire to co-operate with the Ontario Government in the direction indicated We submit that the true wealth of Ontario is not her millionaires. nor even the aggregate wealth of her successful business men, but the moral fibre and intelligence of its population. We also submit that the most difficult problem that confronts our statesmen is, how shall the toilers of our nation be raised to and maintained in such condition of comfortable and enjoyable life, as the value of their labors and the wealth resulting therefrom fairly entitles them to? We submit that the heavy physical strain on many of our toilers, the precarious and intermittent nature of our occupations, compelling often times frequent change of residence, deprives them of those incentives to a thrifty, honorable life that has inspired many men with a steady job and a settled home, to a successful struggle for independence. We submit that, though many people, even some short-sighted statesmen, look upon trades unions with every suspicion, yet we are really entitled to the sympathy and co-operation of all those who wish to lighten the load of the burden-bearer and to raise the producer to a fairer share of that comfort and enjoyment which he so largely creates and so scantily shares. Now, as never before, the miners, in the gloomy depths of the earth, or the buildings trade mechanic on the lofty buildings, the sailors on our stormy lakes, or the train crews, by night and by day, through prairie and forest, swiftly transporting the wealth of the nation.-they all look to their union for protection from injuries, for help in sickness, and for that brotherly sympathy and financial backing that makes a man feel he is a man, not a slave. To many of our reckless sons of toil, who creates so much wealth for others, so little for themselves, the trades union teaches their first lessons of patient accumulation of financial power, of well organized and far-reaching co-operation for the common good. Though compelled by circumstances to leave his home and travel perhaps thousands of miles, true comrades of the union will meet him at the railway station, find him a boarding house, and start him in a job. If that noble doctrine of John Ruskin is ever realized, that every man, woman and child ought to be shepherded more tenderly than any 100 pounds of mutton that ever took prize among the South Downs, it must be realized through the trades unions. Through the unions the Government can reach and wisely assist thousands who would otherwise be beyond their reach. In working out our plans for the prosperity of the members of our unions we sometimes have to apply to our City Council or the Legislature for co-operative assistance, and are met with the reply, "We shall have to obtain special legislation before we can accede to your request." Recognizing the exexistence of your Department as a visible proof of the desire of the Ontario Government to promote harmony and prosperity among the industrial element of our Province, we appeal to you to obtain the enactment of such legislation as is required. (1) Laws effecting the relationship of capital and labor patterned after the New Zealand labor laws, in the following respects:

(a) The wealth of Canada being recognized as the moral fibre and physique of its men and women, that we be protected from protracted and exhaustive hours of labor by making eight hours a day, or 48 hours a week, as far as possible, the legal working day.

(b) Overtime for women and persons under 18 years of age to be limited to 90 hours per annum in factories, and 120 hours per annum in stores.

II. That, as our members are suffering serious loss through the intermittent and precarious nature of our occupations, largely caused by the fluctations of the markets, through stock gambling, stock watering or cornering the market, therefore, we appeal for legislation prohibiting their fraudulent methods of doing business.

(c) Legislation tending toward Government and municipal ownership of all public utilities, and the production of the necessities of life, so taking their immensely valuable investments out of the hands of private greed and making them to minister to the wealth and comfort of the people.

(d) Direct legislation so that the people may be able to veto unjust measures, and to initiate legislation for the good of the commonwealth when our Government refuses to take such action.

(e) That the "living wage" be made the basis of the laborers' pay, regardless of "market rates" or the "manufacturers' profits." Canada needs no industries that require to be run on sweat-shop methods.

(f) That all wages higher than "living wages" be based on the amount of profit attached to that class of labor, so that the producer may receive a fair proportion of the wealth created by his toil.

III. That conciliation and arbitration courts be established on which the unions shall have equal representation with the employers, the Arbitration Court to be presided over by a Judge of the Supreme Court. That the awards of this court shall be compulsory, provided that

(a) In acknowledgment of the valuable, beneficial and unique influence exercised by the unions over so many of the unshepherded citizens of our Dominion, where a majority of the workmen in any trade or occupation have joined their union, such unions shall be legally recognized as the defender and promoter of their trade interests.

(b) That where the union is so legally recognized, such union labor shall have the preference over non-union labor in filling vacancies that may occur in such trade.

(c) That the court shall not in any way interfere with the hours, rate of wages, or trade rules at present existing in our unions, except as they may be contrary to the spirit of the constitution of Canada, or may unduly interfere with the liberty of the subject.

(d) That all unions may, if they choose, be registered as industrial unions, and shall have power to buy and hold real estate, to sue their members for arrears of dues, but shall not be liable to be sued except for the purposes mentioned in their Constitution.

(e) That no non-unionists shall be allowed to claim the privilege of the court unless they first organize themselves into a union, and be registered as an industrial union.

(IV.) That a large number of men and women toil hart all their lives, and sometimes, through no fault of their own, fad themselves destitute in their old age. We therefore suggest that a beginning of the old age pension system be made in Ontario, by granting a pension of \$2 per week to all old men and women of 65 years of age or older who are endorsed by a society, the same society to pay one-eighth of the pension.

(V.) That whereas powers have been granted to municipalities to encourage factory buildings and machinery by exempting them from taxation and supplying them with water at less than cost price and whereas Toronto is in this way encouraging her manufacturers to the extent of \$106,000 a year, we therefore petition that similar powers be granted to Toronto offer building loans of \$1,000 for ten years at 3 per cent. to such union toilers as can give satisfactory certificates of skill and good citizenship; these municipal building loans not to cost the city more than \$5,000 per annum. Also, that the first \$700 in the value of improvements on land be exempt from taxation, so facilitating the erection of workmen's dwellings.

### LIST OF BUREAUS OF LABOR STATISTICS.

That the unity and general value of accurate statistics in those branches of a nation's wealth, comprising subjects of mechanical and manual labor is recognized by most civilized countries, is evidenced by the following list of existing labor bureaus, compiled from official records:

Ontario.—The Bureau of Labor was created by an Act passed by the Ontario Legislature, April 25th, 1900, under the direction of the Hon. F. R. Latchford, Commisioner of Public Works. R. Glockling, Secretary of the Bureau of Labor.

Canada.—The Department of Labor was established in July, 1900, and practically supersedes the Bureau of Labor of the Department of Agriculture established in 1890, with Mr. George Johnson as chief clerk. The Department is under the direction of the Minister of Labor, the Hon. William Mulock. The Act establishing the Department provides for the monthly issuing of a Labor Gazette, 'the editor of which is W. L. Mackenzie King, B.A., Deputy Minister of Labor. The first number of the Gazette was issued in September, 1900.

Great Britain.—The Labor Bureau of the Board of Trade was established March 2nd, 1886. In 1893 the service was greatly enlarged, and given its present name, "Board of Trade Labor Department." H. Llewellyn Smith, Chief Secretary. It publishes monthly The Labor Gazette; also annual reports.

New Zealand Department of Labor.—The Right Hon. R. J. Seddon, Minister of Labor. E. Tregear, Sècretary, Wellington, N.Z.

New South Wales.—Department of Labor and Industry. T. B. Clegg, Chief Clerk, Sydney, N.S.W.

Queensland.—Department of Immigration.—Government Labor Bureau and Relief. Chief Clerk, J. O'Neil Brennan, Brisbane, Queensland.

South Australia Labor Bureau.—Chief Clerk, A. C. H. Richardson, Adelaide, South Australia.

United States Department of Labor. -Established as a Bureau of Labor, January 31st, 1885; made a Department of Labor, June 13th, 1888. Bimonthly bulletins. Annual reports. Commissioner of Labor, Carroll D. Wright, Washington, D. C.

Massachusetts Bureau of Statistics of Labor.—Established June 23rd. 1869. Quarterly bulletins. Annual reports. Chief of the Bureau of Statistics of Labor, Chas. F. Pidgin, Boston, Mass.

Pennsylvania Bureau of Industrial Statistics.—Established April 12th, 1872. Annual reports. Chief of Bureau of Industrial Statistics, Robert C. Blair, Harrisburg, Pa.

Connecticut Bureau of Labor Statistics.—Established July 12th, 1873. Abolished July 23rd, 1875. Re-established April 23rd, 1885. Annual reports. Commissioner of Labor. Harry E. Back, Hartford, Conn.

Kentucky Bureau of Agriculture, Labor, and Statistics.—First established March 20th, 1876, as a Bureau of Agriculture, Horticulture, and Statistics; the duties of the Bureau were enlarged and the present name adopter April 2nd, 1892. Biennial reports. Commissioner of Agricultural, Labor and Statistics, I. B. Nall, Frankfort, Ky.

Missouri Bureau of Labor Statistics and Inspection.—Established March 19th, 1879; enlarged March 23rd, 1883. Annual reports. Commissioner of Labor, William Anderson, Jefferson City, Mo.

Ohio Bureau of Labor Statistics.—""stablished May 5th, 1887. Annual reports. Commissioner of Labor, M.D. Ratchford, Columbus, Ohio. New Jersey Bureau of Statistics of Labor and Industries.—Established March 27th, 1878. Annual reports. Chief of the Bureau of Statistics of Labor and Industries, W. C. Garrison, Trenton, N.J.

Illinois Bureau of Labor Statistics.--Established May 29th, 1879. Biennial reports. Secretary of the Bureau of Labor Statistics, David Ross, Springfield, Ill.

Indiana Bureau of Statistics-Established March 29th, 1879. Biennial reports. Chief of the Bureau of Statistics, B. F. Johnson, Indianapolis, Ind.

New York Bureau of Labor Statistics.—Established May 4th, 1883, created a Department of Labor, 1902. Commissioner of Labor, John Mc-Mackin, Albany, N.Y. Quarterly Bulletins. Annual reports.

California Bureau of Labor Statistics.—Established March 3rd, 1883. Biennial reports. Commissioner of Labor, F. V. Myers, San Francisco, Cal.

Michigan Bureau of Labor and Industrial Statistics.—Established June 6th, 1883. Annual reports. Commissioner of Labor, Scott Griswold, Lansing, Mich.

Wisconsin Bureau of Labor Statistics.—Established April 3rd, 1883. Biennial reports. Commissioner of Labor, Halford Erickson, Madison, Wis.

Iowa Bureau of Labor Statistics.—Established April 3rd 1884. Biennial reports. Commissioner of Labor, E. D. Brigham, Des Moines, Iowa.

Maryland Bureau of Industrial Statistics.—Established March 27th, 1884. Annual reports. Chief of the Bureau of Industrial Statistics, Thomas A. Smith, Baltimore, Md.

Kansas Bureau of Labor Statistics.—Established March 5th, 1885. Annual reports. Commissioner of Labor, W. L. A. Johnston, Topeka, Kan.

Rhode Island Bureau of Labor Statistics.—Established March 29th, 1887. Annual reports. Commissioner of Labor, Henry E. Tiepke, Providence, R.I.

Nebraska Bureau of Labor and Industrial Statistics.—Established March 31st, 1887. Biennial reports. The Governor, ex-officio Commissioner. Deputy Commissioner of Labor and Industrial Statistics, C. E. Watson, Lincoln, Neb.

North Caroline Bureau of Labor Statistics.—Established February 28th, 1887. Annual reports. Commissioner of Labor, Henry B. Varner, Raleigh, N.C.

Maine Bureau of Labor Statistics.—Established March 7th, 1887. Annual reports. Commissioner of Labor, Samuel W. Matthews, Augusta, Maine.

Minnesota Bureau of Labor.—Established as a Bureau of Labor Statistics, March 8th, 1887; enlarged and changed to a Bureau of Labor, April,

1893. Biennial reports. Commissioner of Labor. John O'Donnell, St. Paul, Minn.

Colorado Bureau of Labor Statistics.—Established March 24th, 1887. Biennial reports. Commissioner of Labor, W. H. Montgomery, Denver, Col.

West Virginia Bureau of Labor.—Established February 22nd. 1889. Annual reports. Commissioner of Labor, I. V. Barton, Wheeling, W.Va.

North Dakota Department of Agriculture and Labor.—Established October 1st, 1890. Biennial reports. Commissioner of Labor, R. J. Turner, Bismarck, N.D.

Tennessee Bureau of Labor Statistics and Mines.—Established March 23rd, 1891. Annual reports. Commissioner of Labor, R. A. Shiflett, Nashville, Tenn. Switzerland.-Dr. Louis Gillaume, Directeur du Bureau Federal de Statistiane (Ministere de l'Interieur), Berne.

Uruguay.--Honore Roustan, Directeur du Bureau de la Statistique General, Montevideo.

Stephen Bauer, Office International du Travail, Basle, Switzerland.

## CONCILIATION IN TRADES DISPUTES.

The amendment to the Trades Disputes Act, passed, March, 1902,—providing for conciliation in Trades Disputes, has been called into action officially in twenty-three disputes, as follows:

#### 1902.

Jeurneymen Tailors, Lindsay. Jewelry Workers, Toronto. Street Railway Carpenters, Toronto. Machinists, Kingston. Harness Makers, Toronto. Carpet Weavers, Toronto. Piumbers and Steamfitters, Toronto. Bookbinders (female), Toronto. Iron Moulders, etc., Toronto. Carpenters, St. Catharmes and Thorold. Sheet Metal Workers, Toronto. Carriage and Wagon Workers, Toronto.

#### 19.3.

Electrical Workers, Toronto. Garment Workers, Toronto. Ship Yard Employees. Collingwood. Broom Makers, Toronto. Rock Drillers and Helpers. Niagara Falls Employees Agricultural Implement Makers, Smith's Falls. Ont. Quarrymen, Sherkston. Textile Workers, Hespeter, Leather Workers, Toronto. Rubber Workers, Port Dalhousie. Leather Workers, Hamilton.

The Secretary of the Bureau of Labor, who is also Conciliator under the Act referred to, has in addition to the above official cases, also acted in the capacity of adviser in a number of other cases in which disputes have been averted and adjusted.

The principle of conciliation and arbitration is fast becoming the chief factor in trades disputes; its principle being applied in many cases between employers and employees in the Province. The existence of a Provincial Conciliator is unknown to many, yet time will undoubtedly extend the usefulness of this adjunct of Government in trades disputes.

The following resolution explains itself:

# RESOLUTION OF THE EXECUTIVE OF TRADES AND LABOR CON-GRESS OF CANADA.

That this Executive Board of the Trades and Labor Congress, having in view the growing tendency to submit industrial disputes to conciliation or arbitration, and it being a fixed principle of organized labor, we would recommend to all unions of labor in Ontario, that, as there has been an Act passed by the Ontario Legislature, commonly known as the "Preston" Bill, under which power is given to the Secretary of the Labor Bureau of Ontario, as follows:

An Act to amend the Act respecting Councils of Conciliation and Arbitration for settling industrial disputes.

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. Section 4 of the Trade Disputes Act is amended by adding the following sub-sections:

(4) If any difference shall arise between any corporation or person, employing ten or more employees, and such employees, threatening to result, or resulting in a strike, on the part of such employees, or a lock-out on the part of such employer, it shall be the duty of the Registrar, when requested in writing to do so by five or more of said employees, or by the employers, or by the Mayor or Reeve of the municipality in which the industry is situated. to visit the place of such disturbance and diligently seek to mediate between such employer and employees.

No. 29

(5) It shall be the duty of the Registrar to promote conditions favorable to a settlement by endeavoring to allay distrust, to remove causes of friction, to promote good feeling, to restore confidence, and to encourage the parties to come together and themselves effect a settlement, and also to promote agreements between employers and employees, with a view to the submission of difference to conciliation or arbitration before resorting to strikes or lock-outs.

Knowing Mr. R. Glockling, the present Secretary, as a man in sympathy with the work of his department, and thoroughly experienced in the operation and methods along trades union lines, the Executive recommend that labor organizations give their co-operation to make this department useful, and to the benefit of those for whom it is intended to apply.

(Sgd.) P. M. DRAPER, (Sgd.) RALPH SMITH, Secretary. President.

#### TRADES DISPUTES IN ONTARIO.

During 1903 the aggregate number of trade disputes, resulting in strikes, reported, is 82; involving 429 establishments and 10,564 persons, covering an aggregate of 994 days, giving an average duration of each dispute of 12.12 days, or 10.62 days per person, compared with 79 disputes, involving 500 establishments, 6,863 persons, aggregating 1,227 days, an average of 16 days to each dispute, and 5.59 days per person in 1902.

## TRADES DISPUTES IN CANADA.

Labor disputes reported by the Labor Gazette for 1903, are as follows: Ontario, 82; Quebec, 34; British Columbia, 24; New Brunswick, 7; North-West Territories, 5; Nova Scotia, 4; Cape Breton, 2; Manitoba, 1. Aggregate labor disputes reported in Canada for 1903, 159, involving 802 establishments and 32,932 persons, covering about 2,208 days, average number of days to each dispute, 13.88, or 14.91 days per person.

The results of the 159 labor disputes were: Ontario, successful, 27; unsuccessful, 14; settled by compromise or arbitration, 35; no particulars, 6; Quebec, successful, 16; unsuccessful, 5; settled by compromise or arbitration, 7; no particulars, 6; British Columbia, successful, 9; unsuccessful, 5; settled by compromise or arbitration, 8; no particulars, 2; New Brunswick, successful, 4; unsuccessful, 1; settled by compromise or arbitration, 1; no particulars, 1; North-West Territories, successful, 1; unsuccessful 1; settled by compromise, 1; no particulars, 2; Nova Scotia, successful, 2; unsuccessful, 1; no particulars, 1; Cape Breton, successful, 1; compromise, 1; Manitoba, successful, 1.

#### GREAT BRITAIN.

The Report of Strikes and Lock-outs in Great Britain for 1902, published by the Board of Trade (Labor Department), London, show 442 disputes during the year, which involved 260,000 persons, being about 2.9 per cent. of the industrial population of the United Kingdom. The aggregate duration of the disputes, new and old, in progress during the year, was about three and a half million working days, nearly 75 per cent. of which occurred in the mining and quarrying industries, spread over the whole population amounts to less than a half a day per head during the year. The report points out that "on the whole 1902 was less affected by labor disputes than 1901." The total number of stoppages was comparatively small, and, though they affected more persons than any of the five preceding years, the aggregate number of working days lost was not only less than in 1901, but was below the average for the five years covered by the report.

The number of actual stoppages settled by arbitration or conciliation was 29. The great bulk of the disputes, the report tells us, were ultimately settled by the parties to the disputes or their representatives. The principal agencies for arbitration and conciliation being more largely instrumental in the prevention of strikes and lock-outs than with their settlement. The various permanent Boards of Conciliation and Arbitration are known to have settled 678 cases during the year, in nine only of which had a stoppage of work taken place.

The report does not include many unimportant disputes that occurred in 1902, their importance being largely considered by the duration of the strike, the time or working days lost being regarded as "the best single test of the importance of the disputes of the year."

The effect of this arrangement, while excluding a large number of small disputes, includes those accountable for 83 per cent. of the total duration of all the disputes for the year, the figures for which are shown in the following table:

	Disp	102.	
		Omitted from detailed tables	Total.
Number of Disputes.	116	326	442

Total	216,918	39,749	256,667
	2,965,137	608,753	3,573,890

#### GENERAL COMPARISON OF 1902 WITH FOUR PRECEDING YEARS.

The aggregate disputes of 1902 were less than in any of the preceding four years, 1898-1901, but involved larger number of people than any of these four,—tested by duration of "working days, multiplied by numbers involved, regarded by the compiler as the best statistical comparison," 1902 was less affected by labor disputes than 1901, and well below the average of the previous four years, to show which the following figures are given:

Year.	No. of disputes	No. of work begi	people affected nning in each y	by disputes rear.	Aggregate duration of working days

METHOD OF SETTLEMENT OF DISPUTE

So far as concerns the proportion of the total number of persons involved in industrial contest who took part in disputes which found a settlement by means of arbitration, this percentage was in 1902 only 1.75 per cent., as against 4.65 per cent. in 1901. With respect to conciliation, the 1902 figures also show a considerable, though smaller decrease (2.78 per cent., as against 4.71). The great bulk of the disputes of 1902 were ultimately settled by direct negotiation between the parties concerned or their representatives. Thus, of the total of 442 disputes, 316 or 71.75 per cent. were so settled, and these embraced 86.7 per cent. of the persons involved in the disputes of 1902, as against 80 per cent. in 1901.

#### UNITED STATES.

The Report of Mr. Frank Morrison, Secretary of the American Federation of Labor for 1903, contains valuable information indicating the movements of the International Trades and Labor Unions of the United States and Canada, re changes of wages, hours of labor, etc., and is shewn in the following tables:

From Secretary Morrison's report :

Charters.—An almost complete report from the secretaries of our intertnaional lorganizations of their craft and calling. and 6 were revoked.

issued during the past year 7,385 charters; 1,807 charters surrendered—764 of the charters surrendered were 'bcals or international unions and J,943 affiliated direct with the American Federation of Labor. Of the latter number, 465 were suspended for non-payment of per capita tax, 470 joined international organizations of their craft and calling, and 6 were revoked.

Strikes.—Full and complete reports have been received from almost every international organization and from 358 local unions, which show that there were 1,620 strikes, in which there were 213,780 members involved; of that number 157,759 were benefited and 10,754 not benefited. The total cost of strikes reported on was \$2,768,311.98. The following tabulated statement and report from 114 international organizations shows that there was a total gain in membership of 495,495, of which number, 15,000 is contained in the local trade and federal labor unions chartered direct by the American Federation of Labor.

FROM SECRETARY MORRISON'S REPORT.-Continued.

No. 29

American Federation of Labor (Trade and Federal Labor Unions).— Gain in membership during fiscal year, 15,000; number of charters issued, 1,322; number of charters surrendered, 1,043; number of strikes, 84; won, 49; compromised, 21; lost, 14; pending, 5; number of persons involved, 6,355; benefited, 6,785; worsted, 1,679; cost of strikes, \$19,278.05.

The following tabulated statements give in detail the gain in wages, reduction in hours of labor, number of strikes, number of persons involved, and cost of strikes:

One hundred and fifty-seven Trade and Federal Labor Unions reported gains in wages. Of these-

32 reported gains of from  $2\frac{1}{2}$  to 10 per cent.

12 reported gains of from 10 to 25 per cent.

3 reported gains of from 25 to 50 per cent.

60 reported gains of from 5 to 25 cents per day.

28 reported gains of from 25 to 75 cents per day.

4 reported a gain of \$1.00 per day.

12 reported a gain of from  $1\frac{1}{2}$  cents to 15 cents per day.

6 reported a gain of from \$1.25 to \$2 per week.

Of the 92 local Trade and Federal Labor Unions reporting a reduction in the hours of labor-

14 reported reductions up to one hour per day.

76 reported reduction of from 1 to 4 hours per day.

2 reported reductions of from 1 to 5 hours per week.

Sixty-one unions reported a total number of 84 strikes. Of these-48 reported 1 strike each.

8 reported 2 strikes each.

2 reported 3 strikes each.

3 reported from 4 to 5 strikes each.

Of the 61 unions reporting strikes-

33 reported having won 1 strike each.

7 reported having won 2 strikes each.

1 reported having won 3 strikes.

Out of a total of 61 unions reporting strikes only-

9 reported having suffered 1 strike lost each.

1 reported having suffered 5 strikes lost.

15 reported having compromised 1 strike each.

3 reported having comprised 2 strikes each.

6 strikes are still pending.

A careful study of the above-tabulated statements in regard to strikes will show that 55 per cent. of the strikes entered into by Trade and Federal Labor Unions for better wages and better conditions of employment resulted in victory to the unions; that 23 per cent. were compromised, but which resulted in benefits to the unions; that about 6 per cent. were still pending settlement on the 1st of October, 1903, and that only 15 per cent. were lost to the unions.

The total number of persons involved in the 84 strikes was 6,355, distributed as follows:

42 unions reported from 1 to 100 persons involved.

12 unions reported from 100 to 500 persons involved.

1 union reported 650 persons involved.

1 union reported 2,500 persons involved.

Of the total number of persons involved in the strikes, 6,785 were benefited, distributed as follows: 29 unions reported from 1 to 100 persons benefited.

14 unions reported from 100 to 500 persons benefited.

1 union reported 600 persons benefited.

1 union reported 2,500 persons benefited. Out of a total number of 6,355 persons involved in the strikes, only 1.679 were reported worsted.

13 unions reported from 1 to 100 persons worsted.

1 union reported 1,400 persons worsted.

These tables show that nearly 77 per cent. of the persons involved in strikes carried on by local Trade and Federal Labor Unions were benefited; that nearly 2 per cent. are unaccounted for and that only about 21 per cent. were worsted.

The total amount of money expended by Trade and Federal Labor Unions in strikes during the lat fiscal year amounts to \$19,278.05. This amount was reported by unions as follows:

13 unions reports strikes costing up to \$100.

14 unions report strikes costing from \$100 to \$500.

1 union reports strikes costing \$617.30.

5 unions reports strikes costing from \$1,000 to \$5,000.

## COST OF LIVING IN UNITED STATES.

The following summary of the recent investigation by the Department of Labor of the United States is published in the Quarterly Bulletin, November, 1903. It is published in advance of the Annual Report for 1892, now in course of publication, for the reason stated in the summary:

"The Eighteenth Annual Report of the Bureau of Labor, the Report for the year 1903, which has just been completed and placed in the hands of the printer, presents the results of an extended investigation into the cost of living of workingmen's families and the retail prices of the principal staple articles of food used by such families. As the full printed report will not be ready for distribution for several months and as many urgent requests have been made to the Bureau for the results of the investigation, especially as they relate to the cost of living now compared with the cost in former years, a brief summary of the results is herewith shown.

The figures of income and expenditure furnished in detail by 2,567 families in 33 States, representing the leading industrial centres of the country, formed the material for the detailed study of the cost of living. Certain data which do not enter so much into detail were collected in regard to the cost of living in 25,440 families, and the results are extensively summarized in the full report.

The table herewith shows, for five geographical divisions and for the United States, the number of families investigated in detail, the average size of family, the average income per family, the average expenditure per family for food, the income and expenditure being for the year 1901.

Number of Families. Average size of family. Average income per family. Average Expenditure per family for all purposes, and average expenditure for food during the year 1901:

North Atlantic States     1,415     5     25       North Central States     721     5     46       South Atlantic States     219     5     30       South Atlantic States     122     5     65		all pur- poses.	family for food.
South Central States         122         5         65           Western States         90         4         69           United States         2,567         5         31	\$834 83 842 60 762 78 715 46 891 82 827 19	\$778 04 785 95 700 62 690 11 751 46	\$338 10 321 60 298 64 292 68 308 53 326 90

This table shows that 2,567 families consisted on an average of 5.31 persons, 0.7 person above the average of private families in the whole country as shown by the census of 1900. This larger size of family was not due to any intentional selection of larger families, for the only basis of selection was that the head of the family must be a wage worker or a salaried man earning not over \$1,200 during the year, and must be able to give information in regard to his expenditure in detail. The average income for the year of these 2,567 families from all sources was \$827.19. The average expenditure for all purposes was \$768.54, and the average expenditure for food was \$326.90 per family, or 42.54 per cent. of the average expenditure for all purposes.

That part of the investigation which relates to retail prices is, it should be stated the first extended investigated that has been made into retail prices prices in this country. All previous price studies covering a period of years have dealt solely with wholesale prices, which, of course do not represent accurately the cost to the small consumer. In the general trend retail prices follow the wholesale prices, but their fluctations are smaller and less rapid, and this is clearly brought out in the full report. A comparison of the relative wholesale and retail prices (simple averages) of 25 similar articles or group of articles of food, covering the period 1890 to 1902, inclusive, shows a range of 37.2 per cent. in wholesale prices, but only 15.4 per cent. in retail prices.

In order to ascertain the course of retail prices of food for a series of years and the consequent changes in the cost of living as regards food, the Bureau, through its agents, secured from the books of 814 retail merchants, in the same localities from which data relating to family expenditures were obtained, the retail prices of the principal staple articles of food. Prices were taken for each month during the 13 years of 1890 to 1902, inclusive, which was as far back as it was possible to go. These covered 30 distinct articles, and, under each article, various grades and descriptions of that article. From the prices thus obtained relative prices were calculated, the average prices for the ten-year period, 1890 to 1899, being taken as equal to 100. The importance of the various articles or groups of articles of food in the family consumption being known from the expenditures of the 2,567 families referred to above, the relative prices of the several articles of food were weighted according to this importance. The result shown in the following table gives for 5 geographical divisions and the United States for the period 1890 to 1902 the relative retail price of the food consumed in one year by a workingman's family, compared with the average price for the tenyear period 1890 to 1899 :

RELATIVE RETAIL PRICE OF FOOD, WEIGHTED ACCORDING TO THE AVERAGE FAMILY CONSUMPTION, 1890 TO 1902.

(AVERAG	E PRICE F	OR 1890 TO	5.1899 - 10	0.)		
Year.	North Atlantic States, 1,415 families,	North Central States, 721 families.	South Atlantic States, 219 families.	South Central States, 122 families.	Western States, 90 families.	United Stat-s, 2,567 families.
1890	102.3	102.3	101.2	102.1	107.7	102.4
1891	103.2	104.5	102.1	103.6	108.7	103.8
1892	102.1	101.8	101.1	100.7	105.2	101,9
1893	101.4	105.4	103.2	103.5	102.9	404.4
1894	99.2	100.6	100.0	100.0	99.3	99.7
1895	97.7	98.0	98.7	98.1	96.7	97.8
1896	97.0	94.6	96.8	96.1	93.2	95.5
1897	96.9	95.6	97.1	97.3	92.7	96.3
1898	98.8	98.4	99.3	98.8	95.2	98.7
1899	99.5	98.9	100.5	99.9	98.5	100.1
1900	101.2	100.8	102.4	101.1	98.1	101.1
1001	104.7	106.1	106.9	106.9	99.9	105.2
1902	110.5	111.7	111.8	113.5	104.4	110.9

This table shows that the cost of food, considered as a whole, reached its highest in 1902 the average for that year being 10.9 per cent. above the average for the ten year period 1890 to 1899. Compared with 1896, the year of lowest prices, the cost in 1902 showed an increase of 16.1 per cent.

To assist in making easy a comparison of 1902 prices with those of each of the other years, the following table has been prepared, showing the per cent. of increase of 1902 prices over the prices of each previous year of the period:

## PER CENT. OF INCREASE IN RETAIL PRICES OF FOOD IN 1902 OVER PRICES IN PREVIOUS YEARS, WEIGHTED ACCORD-ING TO FAMILY CONSUMPTION.

If the relative prices of food given above be taken in connection with the average actual expenditure for food in 1901 of the 2,567 families investigated by the Bureau, the amount of the average expenditure for food in each year may be calculated. This has been done, and the results show ing for 5 geographical groups and for the United States the average cost of food per family in each year from 1890 to 1902, inclusive, are given in the following table:

## AVERAGE COST OF FOOD PER FAMILY, 1890 TO 1902, BASED ON AVERAGE COST PER FAMILY IN 1901 AND THE RELATIVE RETAIL PRICES OF FOOD WEIGHTED ACCORDING TO FAMILY CONSUMPTION.

Year.	North Atlantic States, 1,415 families.	North Central States, 721 families.	South Atlantic States, 219 families.	South Central States, 122 families.	Western States, 90 families.	JUnited States, 2,567 families.

From this table it will be seen that the average cost of food per family in 1890 was \$318.20. In 1896, the year of lowest prices, it fell to \$296.76, and in 1902 reached the highest point of the period, being \$344.61, an increase, as has already been stated, of 16.1 per cent. over 1896, or of 10.9 per cent. when compared with the average for the ten-year period 1890 to 1899. The increase in the cost of living as shown by the results of this investigation relates to food alone, representing 42.54 per cent. of all family expenditures in the 2,567 families furnishing information.

Of the remaining articles, constituting 57.46 per cent. of the family expenditure, certain ones are from their nature affected only indirectly in very slight degree by any rise or fall in prices. Such are payments on account of principal and interest of mortgage, taxes, property and life insurance, labor and other organization fees, religion, charity, book and newspapers, amusements and vacations, intoxicating liquors, and sickness and death. These together constituted 14.51 per cent. of the family expenditure in 1901 of the 2,567 families investigated. Miscellaneous purposes, not reported, for which, from their very character, no prices are obtainable, made up 5.87 per cent., and rent. for which also no prices for the several years are available, made up the 12.95 per cent.

The remaining classes of family expenditure, 24.13 per cent. of all, consist of clothing, 14.04 per cent.; fuel and lighting, 5.25 per cent.; furniture and utensils, 3.42 per cent., and tobacco, 1.42 per cent. For these no retail prices covering a series of years are available, but, accepting as true of wholesale and retail prices here what this investigation has found true in the case of food, namely, that retail prices rise and fall more slowly and in smaller degree than wholesale prices, and examination of the relative wholesale prices of these classes of articles in Bulletin No. 45. giving them their proper weight according to family consumption, leads to the conclusion that the retail prices of these articles as a whole in 1902 could have been but little, if at all, above the level indicated by food.

It is apparently a safe and conservative conclusion, therefore, that the increase in the cost of living, as a whole, in 1902, when compared with the year of lowest prices, was not over 16.1 per cent., the figure given above as the increase in the cost of food as shown by this investigation. This assumes, of course, always the purchase of the same articles and the same quantities in years of low prices, low wages, and more or less irregular employment, and in years of higher prices, higher wages and steady employment.

#### INDUSTRIAL STATISTICS.—ONTARIO.

Tables 1 to 24.—Record in detail, information received from manufacturers, 204 schedules only. Where available for use in Tables A to V, the object of which is primarily to show the relative percentage of the labor cost to the gross value of product. As was pointed out in last years report, the value of this information will increase as the years go by, as progress in this direction will be ascertained by comparison.

The tabulation of the 204 schedules show there were 13,515 employed in the 204 establishments reporting. The aggregate number of days in operation, 59,768. The gross value of the product of these 204 establishments was \$20,865,441. The amount paid in wages by the same were \$3,627,218, an average annual earning per person of \$267.87, or a daily wage rate of \$1.22. The per cent. labor cost of production being 25 per cent., as against 21.69 in 1901, and 22.24 in 1902, or an increase over last year of 2.76, and 3.31 over 1901. In studying these tables it will be found that many establishments which, while being classified under similar captions, show a considerable discrepancy when the rates of wages paid to the value of the produce is considered. This will be understood when it is explained that in many cases much of the material used in the manufacture by one establishment may be, and often is, the unfinished product of another. Hence, a smaller labor cost in one instance and greater in the other. Of course, therefore, there will be a reversal of conditions as to the cost of material, etc., in such instances. The following circular was forwarded to a large number of the manufacturers throughout the Province:

# DEPARTMENT OF PUBLIC WORKS, ONTARIO.

The Bureau of Labor.

#### Toronto, June 22nd, 1903.

To the Manufacturers, Contractors, etc., of the Province of Ontario:

Gentlemen,—In accordance with the provisions of chap. 14, Statutes of Ontario, 1900, the Bureau of Labor is for the third time seeking the co-operation of the manufacturers, etc., to provide data that will show the industrial development of the Province during the year 1902. The success of the Bureau steadily increases in removing misapprehension and doubt as to the true purpose of the Bureau of Labor, and which has in the past caused hesitancy on the part of the business men in giving the desired information.

As in past years, the Bureau in asking your co-operation in providing the necessary statistics as will give information *re* industrial and manufacturing progress, gives you the fullest assurance that any information you may give will be received in the strictest confidence, and will only be used in tabular form, and in such manner as will in no wise disclose the identity of the informant.

The Bureau requests that you will, at your earliest convenience, fill in answers to the questions on accompanying schedule, and have same returned to this office in enclosed envelope. No postage is required.

#### Respectfully yours,

#### R. GLOCKLING,

Secretary, Bureau of Labor, Ontario

## DEPARTMENT OF PUBLIC WORKS, ONTARIO.

#### The Bureau of Labor.

The following questions refer to the year ending 31st December, 1902:
1. Name of firm? 2. Post office address?
2. Post office address?
3. Character of business?
4. Capital employed, including plant?
5. Number of days in operation during year?
6. Gross value of product manufactured during year?
7. Has the production increased or decreased during year?
8. If either, what per cent?
9. Value of materials used in production during year, including fuel, gas, etc.?
10. Total taxes paid during year?
11. Total insurance paid during year?
12. Amount invested, if any, in permanent repairs or plant enlargement during
ear?
13. Total number of employees during year (wage-earners only), male
emale
14. Total wages paid during year to wage-earners only, male
emale
15. Highest weekly wages paid, male female
16. Lowest weekly wages paid, male female
17. Total number of salaried clerks and officials, male female
18. Total salaries paid to clerks, officials, etc., malefemale
19. Have wages been increased or decreased during the year?
20. If either, what per cent?
21. Which class of employees has increases or decreases affected, if both, what per
ent, in either case?
22. Do you pay your wage-earners weekly, fortnightly or monthly?

## EMPLOYMENT BUREAUS.

The system of Free Employment Bureaus, under State direction, is carried on to the greatest extent by the State of Illinois. The private employment agencies in this State, particularly in the City of Chicago, becoming alarmed at the inroads being made into ther business by the State employment agencies, have made strenuous efforts from time to time to depreciate them in every way, despite which, however, they have continued to make marvellous progress. Speaking of the opposition referred to, the report says: "Considerable difficulty has been encountered in the enforcement of the law relating to private employment agencies. Two suits affecting the constitutionality of the Act have been instituted, one affirmed by the court and the other still pending. The former case sought to have section 10 of the law set aside for the reasons that the fee, \$200 per annum, was excessive, and that the State could not engage in the same business for which it required a license from others. The court's decision held that the subject was one wholly within the police powers of the State, and that it declined to interfere with the discretion and prerogatives of the Legislature in enactments of that character. The pending suit attacks the validity of the entire law on the alleged grounds that the title embraced two distinct subjects, and is for that reason void. The principal defects of the law is the failure to provide the necessary machinery for its enforcement, and the omission to prescribe regulations governing the operation of private employment agencies. At present the only condition exacted of persons employed in that business is that they shall file a bond and pay a license fee of \$200 per annum. Governor Yates, in his message to the present General Assembly, recommended that the Act be amended so as to provide that private employment agencies should be placed under the supervision and control of the Commissioners of Labor: that the annual fee be reduced to a more reasonable sum; that certain requirements relating to the keeping of records, the charging of registration fees, the sending of female help to places of bad repute, prohibiting such agencies in places where intoxicating liquors are sold, should be observed. A bill embracing these suggestions has been passed by the Legislature.

G. W. Geary, Esq., superintendent of one of the Chicago offices, in his last report says: "A careful perusal of this report will show that the volume of business has increased almost twofold from the previous year." He also points out that the attacks upon the State agencies by the proprietors of the private agencies has at last been met by a decision from the Supreme Court declaring the constitutionality of the Act creating the free State offices; and further, that so gross has been the violations of the law by the private agencies that vigorous prosecutions have been instituted by the Attorney-General of the State, and which has had the effect of compelling many of the private agencies to cease from doing business, while those who have complied with the law and have taken out licenses, have been more reasonable in their charges to persons seeking employment, and in a general way has been of great benefit to the public."

Speaking of the efficacy of State free employment agencies, Mr. Geary further says: "There is no necessity of saying anything about the great good that comes from any medium that will bring together the person that is seeking honest employment and the person who is desirous of employing competent and reliable help to assist in conducting his business. Especially is this true when this is accomplished without cost to either party."

Reviewing the work of the free employment offices since their establishment, August 2, 1899, to the close of the last fiscal year, October 1st, 1902, the following statement is presented:

	Applicatio	ons for em	Applications for help.		
Year.	Number filed.			Number filed.	
*1899 1900 1901 1902	$13,097 \\ 37,285 \\ 27,605 \\ 44,900$	6,497 31.218 23,966 40,181	$6,600 \\ 6,067 \\ 3,609 \\ 4,719$	$10.370 \\ 35,542 \\ 28,124 \\ 47,497$	3,873 4.342 4,128 7,316
Total	122,887	101,892	20,995	121,533	19,641

## STATEMENT.

"Nine weeks.

This shows a total of 122,887 applications for employment, and 121,-533 applications for help; also, that 101,892, or 83 per cent. of those seeking employment were placed in positions, thereby supplying 84 per cent. of those applying for help.

It may be well to mention in this connection the cost to the State for maintaining these offices, as some criticisms touching this question have been made.

There are two distinct classes of our citizens that are directly concerned or to be included in whatever advantage or benefit may be brought about by or through the agency of these offices; these are the employer and the employee.

The foregoing statement shows that during the three years and nine weeks since these offices were established, 101,892 persons were assisted to obtain positions where they could work for wages, and, consequently, a like number of persons, who have use for the services of others, were supplied with such service. This makes a total of 203,784 persons directly involved and benefitted by the assistance of these offices.

The total expense or cost to the State during the same period has been fifty-seven thousand three hundred and seventy-five dollars (857,375), or 28.2 cents for each position secured and filled. This should satisfy any reasonable person that for this small, almost insignificant, cost per capita, this large number of persons have been put in position to earn a livelihood, and the same number furnished with the service sought for.

1903

The work performed by the offices is set forth in condensed form as follows:

TABLE.—Showing the Combined Business of the Four Offices for the Year 1902.

1	Applicatio	ons for emp	Applications for help.		
Offices.	Number filed.	Number of positions secured.	Number unfilled.	Number filed.	Number unfilled.
North Side Office—Males North Side Office—Females	$5,666 \\ 4,226$	$5,493 \\ 4,117$	$     173 \\     109   $	$7,650 \\ 5,153$	$2,157 \\ 1,036$
Totals	9,892	9,610	282	12,803	3,193
South Side Office—Males South Side Office—Femal es	$12,438 \\ 6,013$	$11,761 \\ 5,791$	$rac{677}{222}$ ·	$12,540 \\ 7,481$	779 1,690
Totals	18,451	17,552	899	20,021	24,69
West Side Office—Males	$^{6,830}_{2,338}$	$4,918 \\ 2,028$	$\substack{1,912\\330}$	$5,347 \\ 2,704$	$\begin{array}{c} 429 \\ 676 \end{array}$
Totals	9,188	16,946	2,242	8,051	1,105
Peoria Office—Males Peoria Office—Females	5,223 2,146	$4,489 \\1,584$	$\begin{array}{c} 734 \\ 562 \end{array}$	$4,705 \\ 1,917$	216 333
Totals	7,369	6,073	1,296	6,622	549
Total Males—Four Offices Total Females—Four Offices	30,157 14,743	$26,661 \\ 13,520$	$^{3,496}_{1,223}$	$30,242 \\ 17,255$	$3,581 \\ 3,735$
Grand Total	44,900	40,181	4,719	47,497 -	7,316

Here it is shown that 44,900 persons applied to these offices during the year for employment. This is an increase over last year of 17,295, or 62.65 per cent.; however, the Peoria office, only reported for three months last year. It will be noticed in the foot note to the table that 1,670 applicants were brought forward from those filed last year, of which 1,262 were males and 408 females, thus making a total of 46,570 applications for employment. To this number may be added 47,497 applications of persons seekking help, which gives a total of 94,067 applications handled and cared for by these offices during the year.

Calling attention to the 46,570 applications for employment, it is found that 31,319, or 67.46 per cent., were males, and 15,151, or 32.54 per cent. females. Turning to the applications for help, it is found that of 47,497 filed, 30,242, or 63.67 per cent., were for male help, and 17,255, or 36.33 per cent., for female help. The proportion of both, applications for employment and applications for help, being very nearly in the same ratio. Of the 46,570 applications for employment, there have been 40,181, or 86.28 per cent., who have been placed in positions, and of this number 26,661, or 66.35 per cent., were males, and 13,520, or 33.65 per cent. females.

Referring to the 31,419 males applying for places to work, it is shown that 26,661, or 84.85 per cent., were secured positions, and that of the 15,151 females, 13,520, or 89.24 per cent., were put in positions to get employment. Considering, in this connection, the applications for help, it is found that of the 47,497 applications filed, 40,181, or 84.60 per cent., were supplied.

The following table gives the percentages for each of the offices and for all offices combined:

TABLE.—PERCENTAGES OF POSITIONS SECURED AND PERCENTAGES OF HELP FURNISHED, BOTH MALE AND FEMALE.

Offices.	secure	age of po d applica nploymen	nts for	Percentage of applications for help furnished.		
	Male.	Female.	Both Male & Female.	Male.	Female.	Both Male & Female.

## WHAT HAVE LABOR BUREAUS DONE AS AFFECTING PUBLIC POLICY?

The Annual Convention of the Association of Officials of the Bureaus of Labor Statistics, held at St. Louis, 1901, discussed the above subject. Selections from the debate are quoted here, and will give an idea of some of the benefits of the Labor Bureau.

Mr. Johnson: In responding to the question agreed upon at our last convention, as to "What have our respective Bureaus done as affecting Public Policy, or in what way has their Local Influence been felt," I will undertake to answer for the State of Kansas by citing a few instances where the statistics, information and general knowledge that have been compiled and presented in our annual reports have had the effect of either originating an agitation on certain qublic questions or have been instrumental in encouraging and supporting, and thereby lending great influence, by securing concerted efforts toward the final culmination of the desired success. In reviewing the reports of our Department since 1885, I have found many instances where the influences of the Bureau have been far reaching and effective, vet it is difficult in many of those instances to make a tangible showing that the Bureau was directly responsible for the success attained.

Touching upon the more recent events and work of the Bureau, with which I am more familiar, as recent as 1897, I found that the system of assessment and taxation had been a source of annoyance and disappointment to our people for a number of years, yet no well-defined effort was ever made to remedy the evils and inequalities which had crept into our system of taxation until the Bureau of Labor made a searching inquiry and presented the results of its investigation in an annual report. These investigations covered more than four thousand assessments, and showed by comparison of the actual selling values of these properties with the assessed values for the year, for which they were sold, that there were enormous inequalities in our method of taxation, and was successful at least in part in locating the evil. The result of this showing, I am pleased to say, has resulted in a Tax Commission being appointed by the Legislature to review and investigate more fully and to make a report to the next Legislature, and prepare a bill in the hope that a more equitable system may be established. And just here is where our Bureau takes some pride in the influence wielded on public policy; the Tax Commission only recently, in giving a brief review of its findings, and probable recommendations, followed very closely the conclusions and recommendations made in our 1897 and 1898 reports, providing for a permanent Tax Commission with certain discretionary powers in reviewing the assessments and methods of making assessments; also the requirement of assessments being made upon a true money value; also requiring publicity of assessed valuations and the election of a County Assessor, with powers to change township assessors where they could work to the best advantage. The interest of the Legislature in our report was manifested very clearly in the appointment of this Commission, and the expressed views of that Commission are strictly in accord with the investigations and conclusions of our Department.

Our investigation of the subject of county charities, the operation of poor farms, and the disbursement of public charities is another work of the Department that has impressed its influence upon the public policy of our State. This subject was investigated extensively in our 1899 report, showing the total expenditures and cost of operation of our county charities system, caring for paupers and insane and the operation of poor houses. The inequalities, extravagances and the general inapplication of the old out-grown law enacted in 1866, when our State was an infant, were fully presented, and when published immediately attracted the attention of students of our economic system, and seemed to inspire the organization of a State Association of Charities. Many of our prominent citizens became intensely interested, and by a fortunate co-incidence they were able to secure the Convention of the National Association of Charities and Corrections for our State in the year 1900, resulting in a more general agitation and resulting finally in the presentation to the Legislature of several laws ammendatory on the subject of proper care of our delinquent and defective elasses, thus again demonstrating the influence of the Bureau of Labor Statistics.

Our present new law, governing the Bureau, while an innovation in the matter of Labor Bureau laws, is but the outgrowth of the influence of the work accomplished under the old law, and, as many of you are aware, places our present Bureau of Labor, so far as the selection of its personnel in management is concerned, in the hands of a State Society of Labor, created by law for the sole purpose of eliminating the Labor Bureau and its work from the pernicious influence of partisan politics. The selection of the personnel of the Labor Bureau by the State Society of Labor, composed of delegates of labor organizations and associations, who are vitally interested in our economic and industrial life, is not now attended with that partisan bitterness that obtains sometimes where political prejudices interfere. Again, I am persuaded that there is more liberality in complying with the requests of the Department for information because of its non-partisan character. The distribution of eight thousand copies of our report, among our wage-workers and manufacturing public, has awakened the public conscience in the interest of our industrial well-being. There is a recognition and an appreciation of the organized labor elasses by the public at large which has not been shown before. This, I believe, to be due to the fact that in presenting the true objects, aims, hopes and aspirations of organized labor, a better understanding has been brought about and a better knowledge of our economic and industrial life. This condition is evidenced by the fact that the Labor Commissioner's services are frequently sought by manufacturers and proprietors of industrial concerns as well as by the wage-earners themselves to look into and assist in mediating differences that arise from time to time. They have come to regard the Department as a helpful friend, where they may seek advice and assistance in troublesome times.

The Bureau has been instrumental in many instances in aiding and encouraging contestants to submit their difficulties to voluntary arbitration, and in many instances the Commissioner has acted in such capacity with apparent satisfaction to all concerned, as well as to the general public. In the coal mining industry differences have been arbitrated by the aid of the Commissioner affecting several thousand men, involving schedules of wages and rules surrounding employment. These instances have been noted, not for the purpose of exploiting the details of our work, but to convey the extent of the influence of the Bureau upon our public policy and the position or place that our Bureau has assumed in the fabric of economic and industrial affairs.

There has been a decided improvement in system, thoroughness and scope of work connected with the Labor Bureau under our new law, among which might be mentioned the duties of the Commissioner as State Factory Inspector, and requiring him to enforce the labor laws of the State in the interest of the working classes. The compliance with the recommendations of the Commissioner as State Factory Inspector have usually been prompt, and recognized as beneficial in securing safety and better sanitary conditions for employees, as well as acting as a protection to employers against possible damage suits resulting from negligence surrounding dangerous machinery and unsanitary conditions in the workshops. This line of duties brings the Bureau into close connection with the manufacturing and industrial concerns, and I am convinced wields a potential influence for good in behalf of better conditions among all classes of our people.

The enforcement of labor laws by the Labor Commissioner makes him a sort of champion of the legal rights of our wage-earners, and has had the effect of clearing up many of the weak points in our labor laws which have hitherto been obscure and not clearly defined. The following out of this line of work has had the tendency to create an agitation for better laws, and for the crystalization into law of many of the principles and expres-sions of our people which have heretofore failed to reach legislative notice. or which, if reaching such notice, have been ignored. During the last two sessions of our State Legislature. the wage-earners of our State, who are most vitally interested in the work of the Labor Bureau. and who compose the dominant element in the control of our State Society of Labor and Industry, have had the satisfaction of seeing nine laws enacted which were originated in the State Society of Labor and fostered by that society until they were successfully placed upon the statute books, the more important of which may be mentioned as legislation regarding the payment of wages, prohibiting convict coal from being placed upon the public market, providing for seats for women working in mercantile establishments, establishing a State Free Employment Agency, providing that railway employees may vote anywhere in the State when absent from home on election day. mining legislation in the interest of coal miners, securing their safety and protecting their rights, and several other laws of similar character.

In conclusion, I trust I may be pardoned for mentioning many details which may seem foreign, but which I feel called upon to relate in order that it may be clearly understood that the influence of our Bureau of Labor on public policy of our State begets its power and far-reaching results, because of the fact that a great wage-earning population stands closely related, and maintains a close and sympathetic co-operation with the aims, objects and attainments of the Bureau as defined by law. I am a firm believer in the good results to be attained by divorcing bureaus of labor from partisan politics. It has been demonstrated in our State to our entire satisfaction. All interests and the public generally indicate it by their liberal attitude and confidence in the integrity and effective work which our Bureau of I abor is accomplishing under this system of operation. This is indicated by the most cordial co-operation and assistance rendered our Bureau in the collection of statistical data, in our factory inspection, in the enforcement of labor laws and in the arbitration and mediation of industrial difficulties. The demands made on our Bureau for statistical data on every phase of our economic life indicate the interest that is felt, and I believe that the investigations we have carried on have gone far towards shaping the social, industrial, and Governmental policy of our State. What is true of Kansas is, I believe, true of any other State having a Bureau of Labor Statistics. A well-directed Bureau of Labor Statistics is indispensable to a State in disseminating the knowledge and information necessary to enact wise legislation and to prevent vicious legislation. Statistics should be to the legislator what the blue-print is to the mechanic, presenting in a clear, precise and truthful manner those principles which govern our economic progress. In a word, if States would aim at the highest civilization, the first preliminary to reach that end—is to "Know Thyself"maintain a well-equipped Bureau of Labor Statistics .

President Wright: The idea of the Executive Committee in carrying out the suggestion made at our last annual convention in Milwaukee was to secure from each Commissioner, so far as possible, concrete statements along the lines of the paper just read by Commissioner Johnson; that is, statements of what his Bureau has accomplished in the way of influence or otherwise in the affairs of his special State. The paper is open for discussion, with the hope that some of the Commissioners at least can contribute instances similar to those noted by Mr. Johnson. Instead of calling the roll for responses I trust the Commissioners will feel at liberty each to speak as he has occasion on this point, commencing with the head of the room and going round; and if Commissioners have not prepared anything along this line they can submit it in writing, so that it will become part of the proceedings.

In regard to the United States Department of Labor in this respect, I would say that owing to the relation of the Federal Government to local affairs, I cannot give so specifically as can the Commissioners of States the actual outcome or effect of its work, which must be considered more in a general way.

The altruistic spirit of the age undertakes to ascertain what social classes owe to each other, and statistical science helps the world to the answer. Generally three answers may be given to the inquiry. If we say social classes owe nothing to each other, then society retrogrades to civilized heathenism, and neither social science nor statistics has any place among the departments of human knowledge. If the answer it that social classes owe everything to each other, then socialism is the logical form of social organization. But if the answer is in the spirit of "Inasmuch as ye have done it unto the least of these, ye have done it unto me," then we have put the Christian religion into social science, have answered the question rationally, and must have the light of facts in order that the action, either of Governments or of communities, under the spirit of this answer shall not be either futile or absurd. Altruism is the rule of the day as against the individualism of the past. Its tendency must be guided by facts, and facts can only be gained by the most faithful application of the statistical method, not only in the gathering thereof, but in the application. Personal observation on which to base conclusions is not sufficient. Very many illustrations might be given of this fact, but they are hardly essential. The assertion can be made. however, without fear of contradiction, that very many conclusions have been deducted from mere observation which the facts, when properly classified, showed were erroneous. The attempt to compare criminal conditions through criminal statistics, the use of city criminal statistics as against those belonging to the country, the acceptance of one line of statistics relative to moral conditions when two or three are essential -all these directions in which the statistical method is used to teach us that ordinary observation is too faulty, at least for legitimate purposes. So the character of the work of an office having the functions of the Department of Labor must be based upon the Baconian idea of securing the facts before taking the action. It is along this line that the Department of Labor is able in some degree to answer the inquiries just referred to.

The Department has issued fifteen annual reports, nine special reports, and thirty-five bi-monthly bulletins. The first annual report related to the industrial depressions. The statistics published in it bore upon the various features involved in depressions, and it brought out for the first time the relation of nations to each other as producers and the various influences bearing upon discontent. It gave a summary of the causes and classifications as to the regularity of previous depressions, and furnished a vast amount of information bearing directly or indirectly upon the condition and welfare of the working men and women of the country.

The second annual report related to convict labor as carried on in all the penal institutions of the United States. This investigation was directed by a joint resolution of Congress. The results were exceedingly valuable, and brought out the clear and well-defined relations between convict labor and other labor, the importance of it, the character of it, the relation of cost to product, and all the other features which one might expect as bearing upon the subject. The report also contained a rather extensive digest of the laws of the States and of different countries in the past and for the present bearing upon employment of convicts. All the methods in vogue were fully and freely described and discussed, and their advantages and disadvantages brought into relation. It is well known that the report had considerable influence in new experiments which are progressing favorably. It helped to enlighten State legislators as to the real and supposed dangers of convict labor, and the new system known as the New York system of convict labor is one of the direct outcomes of the Federal report.

The sixth and seventh annual reports related primarily to the cost of producing iron and steel and cognate products, the textiles and glass in this and other countries. This work was especially ordered by Congress. The primary object of securing the information relative to the cost of production was to ascertain the difference between the cost of producing articles abroad and in this country, in order that a more scientific conclusion might be reached in regard to the rates of duties necessary for the purpose of equalizing cost. The eighth annual report (also ordered by Congress, which related to industrial education in this and other countries, has had its share of influence in securing industrial education in its various forms in different States. It is only recently that the different States of the Union have felt it incumbent upon them, through their Legislatures, to study all the phases of industrial education, consisting of manual training, trade-school instruction, and the higher technological or university work which is taught in our institutes of technology, and the report has been of great value in the States where the subject has been discussed. It is now possible to consider the question of industrial education in all its phases not only intelligently, but on the basis of practical experience in this and other countries, as such experience relates not only to employers but to employees. This report was translated into Spanish for the use of the Government of the Argentine Republic, and has been of great service in the efforts of legislators to establish industrial training in that and other South American countries.

The ninth annual report, which related to building and loan associations, was comprehensive, and covered all the associations under whatever name, having kindred purposes in the United States as they existed in 1892 and 1893. One of the direct outcomes of the facts given has been the establishment in a few States of methods of supervision of building and loan associations.

The other annual reports are not of a character to lead either to positive legislation or to the modification of existing laws, but they have furnished a vast amount of information on various subjects that has removed apprehenson in some respects, qualified public opinion, and enabled students to draw more scientific conclusions and to see more clearly the bearing of industrial events.

A report having the greatest influence, perhaps, upon any sociological subject is the first special, which contains the statistics of and relating to marriage and divorce. This report was ordered by Congress, and covers the statistics of marriage and divorce in the United States for twenty years, from 1867 to 1886, inclusive. The report was of positive value in the discussion of the divorce question. It disabused the public mind of certain conclusions which had lodged in it, especially relative to the supposed migration of persons for the purpose of securing divorce, brought out the relation of lax legislation to the increasing number of divorces in certain States, and practically did away with the idea of uniform legislation by Congress relative to divorces or securing a constitutional amendment to enable Congress to act on the subject of divorces. The result has been an effort on the part of State Governments to secure, through commissioners appointed by the States, conferences relative to uniform legislation. It taught the students of the divorce question that differences of conditions existing in various states prevented that exact uniformity which formerly they thought so desirable.

The second special report comprehended the labor laws of the United States Government and of the different States, and has been of great positive value to State legislators, labor leaders and students generally.

The fourth special report, on compulsory insurance in Germany, brought out for the first time in this or any country all the facts relating to compulsory insurance, while the fifth special gave the facts in regard to the so-called Gothenburg system of regulating the liquor traffic.

The eighth special report, relating to the housing of the working people, has been of direct advantage, and through the information contained in it several companies have been organized in different parts of the country for the express purpose of erecting model dwellings for working men. The other special reports have been of great value to all students of sociology, but it must be recognized that the Federal Government, as already intimated, cannot legislate relative to local affairs; hence the Department cannot point to any distinctive labor legislation as the result of its work.

The bulletins contain a vast amount of information collected from this and other countries relative to the problems which this country is at present dealing with, and especially has the Department shown in them the relation of negroes in the Southern States to the general welfare and economic conditions of the States. It has also brought out in very extensive summary form works on foreign labor laws. The bulletins have also dealt with the question of the betterment of industrial conditions, employers' liability, and all such questions; and it is hoped that soon we can bring out annually in some number of the bulletin reports on the course of prices and wages and strikes. Whenever any condition in foreign countries seem to be fruitful in giving facts which would be of value in this country, it is the aim of the Department to secure such facts and publish them through the bulletin promptly, so that they may be made available in all parts of the country.

Canada.-Mr. King: I think what I stated this morning pretty well covers so far as this Department of Labor of Canada is concerned, the question of discussion this afternoon. I would like, however, to mention again just one phase of our work which I think will be instructive to the Commissioners here, because I believe it to be part of a great movement which has already started in the older lands and which may come in time to be · very important in this country also, and that is the fair-wages movement in connection with public contract work. In Canada some three years ago the Government caused an investigation to be made into the matter in which its public contracts were being carried out-those in relation to clothing for the militia and postoffice departments. The investigation was commenced at the instance of the Postmaster-General. Hon. Wm. Mulock, the present Minister of Labor. It was found as a result of that investigation that nearly all of the work, which had, in the first instance, been let to certain contractors, had in turn been sublet by them, and that a large part had finally been performed in the homes of the poorer people of the community, in some cases at less than starvation wages. The report containing the statement of these facts was presented to Parliament, and the Government immediately undertook to remedy that condition of affairs. It was provided that in future contracts for clothing for the militia and postoffice officials certain clauses should be inserted which would prevent this subletting and the fostering of the sweating system. So the new contracts which were let contained clauses which required that all public work of that kind should be performed in a factory which would be subject to inspection: that the hours of labor in that factory should be such as the Provincial law required they should be, and, further, that the sanitary requirements should also be in accordance with the laws of the Province in which the work was being carried, out. That was the beginning of the From the Militia and Postoffice Departments this work exmovement. tended to the Department of Public Works. It was felt that in connection with contracts let for public buildings-postoffice and customs buildings, harbors and works of like character-there was opportunity for the contractor to reap very large profits by subletting part of his work, and that

in the long run the people who actually did the labor upon the work would get very little of the public funds which had been appropriated for the prosecution of such contracts. And so there was embodied in subsequent contracts what is known as the "fair-wages schedule," and in all contracts which have been let during the past year by the Department of Public Works, which department executes the largest amount of public work, there has been inserted this fair-wage schedule, giving a list of the current wages in the district where the work is being performed, and containing the provision that the contractor, whoever he may be, must not pay his men less than the amount which is specified therein.

When the new department was created, or, as a matter of fact, just prior to the creation of the Department of Labor, a special officer was appointed, known as the fair-wage officer, a gentleman who stood in the foremost ranks of the trade-union movement in Canada, perhaps the best known labor man in the country-Mr. D. J. O'Donoghue. He was chosen by the Government as an officer to prepare these schedules which were to be inserted in the contracts, and since the department has been created another . officer, also known as the fair-wages officer, has been appointed. Now when one of the Government departments is about to let a contract the first thing they do is to send word to the Department of Labor that they contemplate calling for tenders for public work in a particular centre and desire to have a schedule of fair wages prepared to be inserted in the proposition. The fair-wage officer is sent to that locality; he discovers the current rates of wages paid there, and a schedule is drawn up naming the different classes of labor that are to be employed, and opposite each class is inserted the wage to be paid to mechanics or laborers of that class and the hours to be worked. This schedule is printed in the specifications and when a contractor desires to know the terms on which he must tender the schedule is sent to him. Thus all contractors are put upon the same basis. There is no opportunity for the mean man, the man who takes a contract at a low rate because he thinks he can secure certain advantages by making a subcontract, to be at an advantage as compared with the man who wants to treat his employees fairly. When this schedule has been prepared and the contract has been accepted on that basis, the department which has awarded the contract sends a copy of it, together with the amount of the contract and the place where the work is to be performed, to the Department of Labor, and we publish that contract in the Labor Gazette, which appears monthly. The Labor Gazette is distributed all over Canada. It goes to the locality in which the work is to be performed. The contractor gets a copy, and every man working on the job may have a copy if he wishes it. He sees the rate of wages to which he is entitled on this public work, and if he does not receive that rate he is at liberty to write to the Department of Labor and to show that he is not being paid the rate which is in the specifications of the contract under which he is working. We have received up to the present time some eight complaints from workingmen to the effect that the contractor has not been paying them the wages which are stated in the contract and set forth in the schedule. What happens, then? The fairwages officer is sent to investigate the complaint. He interviews the men engaged upon the work and he sees the contractor, and if the contractor refuses to settle with the workingmen forthwith the fair-wages officer presents a report to the Minister of Labor; that report, with the recommendation to the Department of Labor, is transmitted to the department of the Government which has awarded the contract. The Minister of that department has authority to pay the men in eash himself and deduct the amount which is paid to them from the amount due the contractor. We

have paid in our department during the past month and a half six claims of that character. The check was sent over to us from the Department of Public Works, that check was paid to the men, we sent the receipt back to the Department of Public Works, and when that department settled with the contractor that amount (was deducted from the payment made to him.

This fair-wages policy is being carried to other branches of Government work. It has been adopted by the Postofice and Militia Departments and the Department of Public Works, and recently by the Department of Marine and Fisheries; and we hope that in time it will be used in not only the work which is let directly by contract, but in work where a Government subsidy is granted, the granting of that subsidy being based upon that among other conditions.

This work has had a very direct effect on public policy throughout the whole of Canada. It can be seen that the reports we issue have influenced municipalities to adopt similar measures, requiring, in connection with their contracts, some clause as to the way in which the work is to be performed, whatever it may be, and I believe that in the course of a very few years we will have in Canada, as they have had in England, a development of this method radiating from the centre, but through the work of public bodies wherever they may be, beginning with the federal work, touching then the work in the different Provinces, the work of municipalities, the work of county and town councils, and finally the work of institutions, as hospitals, schools, and then the work of individuals, whether grouped collectively in societies of by themselves, if it be of a public nature whatever. Further, I think it will have the effect of influencing private individuals in the matter of the rate of wages which they are to pay, because by gradually accustoming the public to this conception of a fair wage for a fair day's work and giving sufficient prominence to the current rate of the district, others are encouraged to follow the example.

I may inform the gentlemen here that it is the intention of our department to ascertain just the exact extent to which this movement has spread in Canada, and it is also our intention to publish, either by special report or by a series of reports in the Labor Gazette, what has been done in the countries of Europe in this direction. This movement has had a large following and has made considerable progress, not only in England, Scotland and Ireland, but also in France, Belgium and to some extent in Switzerland, and Italy, while it has been touched upon indirectly in other countries as well. So far as we are in possession of the facts, we intend to print them in the Gazette, and to make this one phase of the work of the Department of Labor, so that we will have for all time a record of present public conditions in our country.

Ontario.—Mr. Glockling: Mr. President and gentlemen of the convention: The age of the Ontario bureau precludes any very large estimate of its beneficial influence on public policy. I agreed with that section of the excellent paper read by the Commissioner from Kansas when he told us it is quite difficult to present in tangible form many of the influences arising from the existence of a bureau. There are many small incidents in my mind which convince me of the influence of such a bureau as guiding public policy along certain lines. From the limited experience I have had, I am perfectly satisfied of the stimulus the bureau of Ontario has given to economic and sociological thought of the Province. It is not alone the work presented to the people in the shape of reports that demonstrates the value of the bureau. As our friend from Massachusetts (Mr. Wadlin) said yesterday, there are many other evidences of the influence the bureaus has exerted in the shape of information sought by people who, until its existence had no official means of getting that information. The mere fact of the existence of a bureau seems to me to lead one justly to presume that it has an influence on public policy.

In connection with the work of our bureau there are many incidents I could relate which, though small in themselves, would, I think, aggregate a very large influence. During the last session of our Legislature, which is synonymous with your General Assembly meetings, the bureau was frequently visited by the members of that Legislature, who had given practically no thought to the questions involved in the work of the bureau, and as a result of those visits a stimulus was given to thought along lines that had no place in their minds before. That of itself indicates a very large and beneficent influence.

The effect of the bureau was felt, I think, in the legislation that was enacted during the last session of our Legislature. It had an influence on the members who before had no conception of the questions that were brought up largely at the instigation and under the direction of the bureau. Amendments to existing laws furnish a notable instance, and I would like to say here that Ontario has not by any means lagged behind in labor legislation. We have on our statute books many laws bearing upon the direct interests of the industrial population of our Province. One of the amendments that was sought largely under the direction of the bureau, as a result of complaints received by the bureau, was an amendment to the Factory Act. The original act defined a factory as an establishment employing not less than six persons. Complaints have been received many times by our bureau from the industry of metal polishing of the dangers of dust arising from the polishing work, and we found that as a general rule the act did not apply by reason of the number of employees that was necessary under the act to constitute a factory. We found that in the smaller towns of our Province many of those engaged in this particular industry had small places, employing, perhaps, not more than two or three persons and so were not regulated by the provisions of the act. We recognized the importance of that, and we impressed the importance of it upon the Government to the extent that they acceded to the representations made in the report and amended the act so that it would apply to any place where polishing is done, irrespective of the number of persons employed. In that particular industry, therefore, there is a specific benefit arising from the influence of the bureau.

Another very beneficent result of the intervention, of the bureau, brought about by inquiries and complaints, was an amendment to the shopsregulation acts. The law in relation to bake shops provided that a bake shop should have certain conditions surrounding it and, among other things, provided that a baker should not work more than sixty hours a week, nor more than twelve hours in one day, and particularly made Sunday labor in that industry a violation of the law. It had been endeavored to so construe and interpret the law that it would permit bakers to work from a certain hour on Sunday till a certain hour on Monday, making a continuous working period of twelve hours, and the law was not clear upon this point. The act states very clearly now that no work shall be done on a Sunday.

Another incident worthy of note occurs to my mind. It was the introduction into bills relating to subsidized railroads of our Province of certain clauses protecting the interests of the workers, particularly in regard to the payment of the current rate of wages, which was an inspiration received from the legislation of the Dominion, so ably recounted by my colleague, Mr. King. In all contracts for the construction of railroads subsidized by the Government have been inserted clauses providing that the men employed on the work shall in all cases be paid the current rate of wages in the locality in which they are working. It is also provided that the food furnished those working on such constructions shall be sold at a reasonable rate. Heretofore the workers have suffered very greatly from exorbitant prices charged for their food. There was no limitation as to the price charged. That was a matter of contract between the men and those supplying the food. The clauses contain certain provisions for hospital arrangements; certain conditions must be provided for the sick of those working on these railroads.

The foregoing instances demonstrate, to some extent at least, notwithstanding the short period of its existence, the beneficent influence of our labor bureau. There are a thousand and one things connected with such a bureau that could be presented to show its good effects. I am perfectly satisfied that the general reception our bureau has received up to date is of a character that will warrant us in assuming that it has a beneficent effect upon general policy along industrial lines, at least.

I would like to say a word in regard to that portion of Mr. Johnson's paper that speaks of the method of appointment of Commissioners. I feel like differing from the Commissioner from Maryland (Mr. Schonfarber) in that particular. At different times we have in our country enacted legislation for certain objects, and our experience has been that the expected effect of that legislation has been very largely vitiated by the character of the person who has been appointed to carry out that legislation. I am inclined to think that, while I would not make it a distinct policy, it is a matter of serious consideration whether, in the appointment of persons who have to give effect to legislation that usually pertains to a labor bureau and to the general interests of the industrial community, it is not better to appoint those who have had that practical experience which others could not possibly have obtained or could not possibly have gathered, their environ-ment having been different, and whose sympathies are altogether different from those of the persons who have had practical experience, always provided, of course, that those who are appointed to these positions possess the necessary qualifications. I do not think a man should be appointed for the simple reason that he is from the ranks of labor, but I am inclined to think that if there can be found one with the necessary qualifications he is deserving of preference. That is my idea of the matter.

I certainly have been very much gratified with the general trend of the discussion upon Mr. Johnson's paper. I think it will be valuable to us and that it will stimulate thought upon these lines.

## RECENT ONTARIO LEGAL DECISIONS AFFECTING LABOR.

(Reported by Labor Gazette, 1903.)

#### RIGHT OF TRADE UNION TO ASK EMPLOYEES TO STRIKE.

An interesting decision was recently given at Toronto in the pending case of Small vs. American Federation of Musicians. Small, who was the manager of an opera house, has brought an action against the defendant claiming that it or its officers have interfered with the men in its employment, and asking for a perpetual injunction restraining them from so doing.

l to Small that unless

No. 29

It appears that the Federation of Musicians intimated to Small that unless he reinstated the former leader of his orchestra other members of the same would be ordered to go out on strike, and it is alleged that some of them were actually asked to stop work. Small obtained a temporary injunction restraining any further interference with his employees. Later it was sought to have this injunction kept in force until the action was tried, which was opposed by the Federation of Musicians. The decision on this point was given by Chancellor Boyd, who came to the conclusion that the injunction should be continued until the trial. In the course of his judgment his Lordship said : "According to Mr. Carey's evidence, the action of the body he represented was based mainly upon the conclusion that Small had engaged Evans and his orchestra for the season of 1902-3, or at all events negotiations tending that way were in progress and not determined when counter-negotiations were opened by Small with Creswell, which led to his orchestra being actually engaged for that season. The right of interposition in such a case is based upon what he calls a "local law" not in print or to be found in the rules or constitution of the musical organization defendants, and of which the defendant says he was not informed. Apart from this the plaintiff's evidence is that there were no pending negotiations with Evans when Creswell was engaged—that they had not been begun with his authority—and, whatever they cover, all had been ended as to his engaging Evans before he applied to Creswell. On this alleged footing the defenddants insist that Evans be reinstated with his orchestra at the plaintiff's opera house, though the plaintiff prefers to have Creswell, and has a contract with him for the season. Both parties seem to agree that the kind of engagement in question was for the season.

"The machinery of the defendants' organization has been brought to bear against the plaintiff in his management of the business at London on this assumption of fact and law, which are both disputed, and weighing the advantages against the disadvantages, it is more convenient in the interests of the plaintiff to have the present orchestra continued in his employment till the trial than to have any interruption or discontinuance by the active intervention of the defendants. And this course will be in no wise detrimental to the defendants, even if they are found to be in the right on the merits.

"Relevant issues of fact present themselves for determination. At present it seems to me that Mr. Justice Darling's language is pertinent to the situation. 'It is not enough that the defendants were not actuated by improper motives. Their sufficient justification for interference with plaintiff's right must be an equal or superior right in themselves, and no one can legally excuse himself to a man of whose contract he has procured the breach on the ground that he acted on a wrong understanding of his own rights or without motive or bona fide or in the interests of himself, nor even that he acted as an altruist, seeking only the good of another and careless of his own advantages."

"Read vs. Friendly Society of Operative Stonemasons, of England, Ireland and Wales (1900), 2 c. B., '88-'96.

"I do not interfere, therefore, with the present injunction, but the case should be tried at the earliest opportunity. Reserved till the hearing of further order."

(Small vs. American Federation of Musicians.—Decision given by Boyd, C., at Toronto, January 2nd, 1903.)

#### GRAND TRUNK RAILWAY CO. PROVIDENT SOCIETY CASE.

W. H. was employed by the Grand Trunk Railway Company as an engine driver. As he was a permanent employee of the company he was also a member of the Insurance and Provident Society, which is carried on in connection with and for the benefit of the employees of that company. In the course of his work he was acting as driver on an engine of a passenger train which was derailed near Hamilton, in which accident he was killed. His widow sued the company for damages, alleging that the accident vas caused by the negligence of its employee in charge of the points and signals at the place where the engine went off the track. The trial judge came to the conclusion that there was no evidence of negligence, and that, therefore, the case should not be submitted to the jury. He also added that, on account of the deceased having been a member of the Insurance and Provident Society, to the funds of which the company contributed, and being bound by a rule that as a member of such society he could not sue the company for injuries received in its employment, there would have been no right of action if he had survived, nor could his wife now bring action against the company for his death.

From this decision the plaintiff appealed to the Court of Appeal, but that tribunal maintained the judgment given at the trial and dismissed the appeal.

(Holden vs. Grand Trunk Railway Company.—Decision rendered by the Court of Appeal at Toronto, January 22, 1902.)

#### IS THE USE OF SOFT COAL A NUISANCE.

A decision was recently given in the Division Court at Hamilton, which, in view of the prevailing scarcity of hard coal, is of peculiar interest at present. Mrs. Patterson sued her neighbor, Mrs. Freeborn, for S60 damages, claiming that the latter had created a nuisance by using soft coal in her stove, thereby not only causing Mrs. Patterson great annoyance, but also spoiling her wash which was on the clothes line, and damaging the contents of her house. On the other hand, Mrs. Freeborn contended that the stove was managed as well as possible, that no more soot than necessary was sent into the adjoining yard, and that the use of soft coal was justified by the scarcity of hard coal.

The Court dismissed the action, holding that no blame could attach to Mrs. Freeborn for using soft coal this winter.

Patterson vs. Freeborn.—Decision given by Judge Snider in the First Division Court of the County of Wentworth at Hamilton.)

#### REDUCTION OF DAMAGES DEMANDED.

Amelia Pierce was employed by the Royal Laundry Company. In the course of her work her hand was caught in a mangle, and as a result of the accident she lost part of it. She sued the company for damages, alleging that this would not have occurred had the mangle been properly guarded in complaince with the law relating to dangerous machines. She asked for \$3,000 damages, but, while the jury found that the company had been negligent in not having the mangle properly guarded, they only awarded \$422.80. It is said that an appeal will be taken from this judgment.

(Pierce vs. Royal Laundry Company.-Judgment given at the January Assizes by Chancellor Boyd.)

12 в. г.

#### HEAVY FINES IMPOSED ON INTIMIDATORS.

Severe penalties were meted out in the Toronto Police Court to men who were proved to have intimidated and interfered with a fellow-employee, who was not a union man.

During the recent garment workers' strike several non-union men were brought from Hamilton by W. R. Johnston & Co.; when the strike was settled some of these men were still kept at work, amongst them being W. G. Stevenson. Recently when the latter was on his way home, he was stopped by a number of union men, and two of them assaulted him. Stevenson had proceedings taken against them, and, in giving his evidence, he swore that during the strike he had been molested and urged to stop work by picketers, who offered to pay his railway fare home if he would do so; and that since the strike he had been continually tormented by the accused, Calhoun and Clegg, and by other union men.

The defence was that the trouble was started by Stevenson himself threatening to hit Calhoun, but the Magistrate did not take that view of the incident. He imposed a fine of \$75 and costs on each of the accused, or sixty days in jail; and, in giving this sentence, he is reported to have said: "I find that there were two sets of workmen, and that one set were determined that the other set should not work, and it ended in violence on the street. It all arose out of intimidation, and that is what the Act is intended to stop."

On the same day another similar case came up in the Toronto Police Court. McCann is employed as a moulder at Gurney's foundry, which is a non-union concern. On coming out of the works one day he was met by Joseph Ferguson, who called him a "scab" and other names. A charge of intimidation was laid against Ferguson, who pleaded guilty. He was fined \$75.80 and costs or sixty days in jail.

(Decisions rendered by the Police Magistrate, Toronto, March 19, 1903.)

#### Accident Caused by Negligence of Strangers.

R. was employed by the Ottawa Electric Co. as lineman, and in the course of his work was injured by a current from an electric wire. He sued his employers, the Ottawa Electric Co. and Messrs. Ahearn & Soper, Ltd., to whom it appeared that the line or wire in question belonged, were also made defendants.

At the trial the judge declared that R. had no cause of action against his employers, the Ottawa Electric Co. As regards the liability of Ahearn & Soper, Ltd., he left three questions to the jury. In answer to two of these questions the jury found (1) that the negligence of Ahearn & Soper was the proximate cause of the accident; and (2) that their negligence consisted in using uncovered wires and in careless construction of the wires. The jury, however, did not answer the third question, which was, whether or not R. might have avoided the accident by the exercise of ordinary care. The trial judge considered that these answers amounted to a disagreement on the part of the jury and discharged it.

Both parties appealed to a higher court, R. asking for a judgment in his favor upon the answers given by the jury, and Ahearn & Soper, Limited, asking that the action should be dismissed.

The court refused the motion of both parties, and directed that the case should be tried again.

In the course of its judgment the court said "that the standard for measuring the duty which Ahearn & Soper owed to R. was not the same standard as that which would have been applicable if the line and current from which, as it was alleged, caused the injury to R. had belonged to his employers, and the action had been against the employers; but the duty which was owed by Ahearn & Soper to R. was to take reasonable care that he should not suffer injury from the dangerous current of electricity which they were conducting on their line in close proximity to the place where he was working. It was for the jury to say whether there was 'absence of care according to the circumstances,' having regard, on the one hand, to the highly dangerous character of the element which Ahearn & Soper were dealing with and the means that were open to them of avoiding altogether or reducing to a minimum the danger; and, on the other hand, to the obvious and ordinary means of protection and of avoiding injury that were available to R. in circumstances. The circumstance that bare wires were used for tie wires, which was apparent to the eve, and the circumstance that R. was not wearing gloves when he was engaged in the work, were not sufficient to justify the withdrawal of the case from the judy."

(Randall v. The Ottawa Electric Company. Judgment by a Divisional Court of the High Court of Justice for Ontario, rendered February 13, 1903.)

#### LIABILITY OF A TRADE UNION FOR PICKETING AND BOYCOTTING.

One of the most important judgments ever given in Canada respecting the rights and liabilities of members of a trade union on strike was rendered in April by Mr. Justice Meredith in the case of the H. Krug Furniture Company of Berlin vs. the Berlin Union, No. II2, Amalgamated Woodworkers' International Union of America.

Members of the local union employed by the Krug Co. went on strike, and then attempted to induce other employees to break their contracts with the company or tried to prevent them working for it. Their efforts in this respect were directed, it was alleged, by one Mulcahy, the International Union representative, who came from the United States to deal with the matter.

The Krug Co. sued the union, certain of its officers and members and Mulcahy for S2,000 damages for wrongfully and maliciously procuring its workmen to break their contracts: for \$5,000 damages for conspiring against the company, and for a perpetual injunction restraining them from watching or besetting the railway station at Berlin, the works of the company, or the dwelling place of its employees, for the purpose of persuading the latter to break their contracts with the company, or from preventing others from entering into its service.

That the members of the union had a right to strike was not disputed.

The whole point at issue was whether, having gone on strike themselves, they were legally entitled to attempt to prevent others from continuing or commencing to work, by means of picketing and boycotting. The Court held that these methods, as pursued in this strike, were illegal; granted the perpetual injunction asked for, restraining the union from using the same, and awarded the Krug Co. \$100 damages against the defendants, together with the costs of the action.

The exact view which the court took of the whole question will be seen from the following extracts from a report of the judgment:

Boycotting is, in some of its forms, very obnoxious to the law. That defendants were guilty of that crime, and of the wrongs complained of, is, upon the evidence, very plain. Because of some disagreement between plaintiffs and their finishers, the woodworkers left the plaintiff's employment and begun a sympathetic strike. They had a right to do so, so long as they broke no contract; and no complaint is made in that respect; what is complained of is the subsequent conduct of defendants. Their main purpose in striking was to compel plaintiffs to accede to the demands of the finishers.

Their plan to force plaintiffs to submit was to prevent other workmen taking the places of the strikers, and to constrain such of plaintiffs' workmen as had not left to leave their employment, and to prevent the sale of the goods made by them, so that plaintiffs would be put in the position that they must submit or close their factory. So long as the workmen resorted to lawful means to accomplish a lawful object, they were within their right; but an unlawful object, or unlawful means to obtain a lawful object, should meet with prompt prevention and punishment.

#### UNLAWFUL METHODS.

One of the first acts of the workmen who had struck, and of other members of the organized body to which they belonged, was to organize watches to beset and watch every day all trains, with a view to intercepting anyone who might have the appearance of a workman employed or seeking employment by plaintiffs, and to beset and watch plaintiffs' factory and premises for the purpose of preventing new workmen from entering plaintiffs' employment, and of constraining their workmen to leave such employment. The conduct of those who beset and watched the factory was often of an offensive and highly reprehensible character. In regard to boycotting, that mainly relied upon and proved was the intimidation of persons who bought and sold the product of plaintiffs' factory. The result has, in one case at least, been an intimidation of the dealer to such an extent that he is afraid to disclose the facts, except secretly. The defendants must be held to really intend that which is the plain effect of their actions, the injury of the plaintiffs by intimidation.

#### CANNOT PLEAD IMMUNITY.

It is too late for the defendant union, the organized body, to contend that they are not incorporated, and, therefore, that the action should be dismissed as against them. They have, without objection, appeared, pleaded, and consented to the interlocutory order against them by the name under which they are sued.

As to the individual defendants (other than Mulcahy) the judgment goes on to say:

They took an active part in the wrongs mentioned, and so are individually answerable for the injury done. All that was done was the result of organized, combined action on the part of the members of the union, under the leadership and encouragement of these individual defendants.

Defendant Mulcahy was the chief presiding officer of the whole organized body, and came to this country for the purpose of aiding, encouraging and directing the operations of the striking workmen and their associates. He is chiefly answerable for the concerted acts of the strikers during the time he was with them. It is no answer to plaintiffs' complaint to say that he was a stranger here, and unacquainted with the laws of the land. Before undertaking or encouraging any act aimed at the injury of another, and especially any act likely to cause a breach of the peace, he ought first to have ascertained whether it was lawful or unlawful. This defendant was a party to the unlawful and wrongful acts committed by the co-defendants, and is answerable with them for the consequences.

## A FINE IMPOSED.

The judgment concludes by stating, that the plaintiffs are entitled to a perpetual injunction restraining defendants from unlawfully besetting or watching plaintiffs' factory, and from all wrong obstruction or of interference with plaintiffs in their trade and business, and to damages, against all the defendants, assessed at \$100, with costs.

(The H. Krug Furniture Company, of Berlin, vs. The Berlin Union No. 112, Amalgamated Woodworkers, International Union of America. Judgment given by Mr. Justice Meredith, April 2, 1903.)

Since the decision in the above case, what appears to have been a similar case has been decided in Vermont. There the striking employees (members of Protection Lodge, No. 215, of the International Union of Machinists) of the F. R. Hatch Manufacturing Company, of Rutland, Vt., resorted to boycotting and picketing to prevent the company from getting employees or from selling its goods. The company sued the union and its members for \$10,000 damages. The case was tried with a jury, which awarded damages to the extent of \$2,500. It may be remarked that both these judgments seem to be in accord with the English case of Quinn vs. Leathem, which was reported in the Labor Gazette soon after its decision in 1901.

## SERVICE OF A WRIT OF SUMMONS ON A LABOR UNION.

The question whether or not service of legal process upon an officer of a labor union will, in this country, be good service upon the union itself, has recently been decided in favor of the labor organizations.

In the case of the Metallic Roofing Company of Canada vs. Local Union No. 30, Amalgamated Sheet Metal Workers' International Union and others a Divisional Court of the High Court of Justice for Ontario recently held (reversing the decision of two lower courts in the same case) that such service was not effective.

In this case the union had been added as defendant after the commencement of the action, and it was attempted to serve it by leaving the writ with one of its officials.

The judgment pointed out that in the ordinary course only an individual or individuals. a corporation. or a partnership could sue or be sued, and that the union did not come under any of these heads. It added, however, that, in the words of one of the judgments in the famous Taff Vale Railway Company case, the Legislature has the power to give an association of individuals. which is neither a corporation nor a partnership nor an individual. a capacity for owning property and acting as agents, and such capacity, in the absence of express enactment to the contrary, involves the necessary correlative of liability to the extent of such property for the acts and defaults of such agents.

It was held, however, that in Canada a union did not possess such capacity, thus making the distinction between the positions occupied by such organizations in England and in this country. (The Metallic Roofing Company of Canada vs. Local Union No. 30, Amalgamated Sheet Metal Workers' International Association and others. —Judgment of a Divisional Court of the High Court of Justice for Ontario, March 3, 1903.)

In a similar case decided since the above judgment was given, it was held that service of a writ of summons upon an executive officer of a union was not a good service; but that service upon all the individual defendants would be good service on the members of the association.

(Small vs. American Federation of Musicians.—Judgment of a Divisional Court of the High Court of Justice for Ontario, April 8th, 1903.)

#### INJUNCTION RESTRAINING INTIMIDATION.

In the Metallic Roofing Company case, above referred to, an injunction was granted in October, 1902, restraining Local Union No. 30, etc., its officers, servants and agents from using any threats or making any communications in writing or otherwise to the company's customers or any of them with intent to cause them to stop dealing with the company. This injunction was to last until the action between the company and the union was tried.

The union appealed upon the grounds that there was no evidence that either its officers or members had made any threats; and that, in any event, whatever they had done they were legally entitled to do.

From this statement of the facts it will be seen that the case was, in one respect, like the Krug Company case.

The court, which decided against the union, and continued the injunction to the trial, gave the following judgment:

"The motion and argument before us on the part of the defendants were based upon the contention that no case had been made out before the learned Chief Justice of the Common Pleas upon which he should have granted an injunction to the trial to restrain the defendants from the acts complained of.

"The plaintiffs failed to agree with the union as to the terms upon metal goods, and the defendants are a trade union and individual members of it.

"The plaintiffs failed to agree with the union as to the terms upon which their employees should work for them, and they fell under the displeasure of the union. The union thereupon, with the object of enforcing the plaintiffs to come to their terms, proceeded to notify the plaintiffs' customers that the men employed by the customers would refuse, after a certain date, to handle any of the good manufactured by the plaintiffs, because the plaintiffs were an unfair firm to organized labor. There was sufficient evidence of concerted action on the part of the defendants to make out a prima facie case of combination on their part, and the object of the notices sent out to the plaintiffs' customers may, without any stretch of the imagination, be assumed for the purpose of the motion to have been to injure the plaintiffs' trade to such an extent that they would be forced to accede to the terms proposed by the defendants, unless they preferred to stand out and be ruined.

All these matters may bear a different aspect when the trial comes on, but in the meantime I think it would not be advisable to discuss them further in detail lest in doing so we should prejudice the trail. It is sufficient for the purposes of the present motion that we find in the evidence upon which the Chief Justice acted, facts and circumstances making out a case upon which it was proper for him to grant an interlocutory injunction to the trial as he has done. The case appears upon the material before us to be brought within the authority of Quinn vs. Leathem ,1901) A.C. 495, and we think the motion should be dismissed with costs."

## JUDGMENT REVERSED IN FAVOR OF EMPLOYEE.

B. had been employed for some ears in working a derrick used by his employer for hoisting coal out of a vessel on the St. Lawrence River, and loading it upon cars. While going down the ladder he was struck on the head and killed by a piece of coal which fell from some part of the derrick.

B.'s widow sued his employers for damages, on the ground that the accident was caused by their negligence. The trial Judge held that the fact that this derrick had been working for fifteen years with the same appliances and in the same condition, and that during that time no coal had fallen over the platform until the fall of the piece by which B. was killed, negatived any negligence on the part of the employers with respect to the condition of the derrick. He, therefore, dismissed the action.

The widow appealed from this judgment, and in a higher court held that these facts did not, in themselves, negative negligence. It also held that there was negligence on the part of the employers of another nature, the court stating the same in the following words:

The opening in the platform through which the coal was shot from the upper into the lower one was marked and scored all around its edges by the coal striking as it passed down; and witnesses for defendants also stated that pieces of coal occasionally escaped on the platform instead of passing through the opening, although they said the pieces were not large. Now the edge of the platform was only 3 feet 9 inches from the nearest edge of the opening, and there was nothing to prevent a piece of coal which had escaped to the platform in falling from the hopper from rolling over the edge of the platform if it rolled that far. The facts, it seems to me, therefore, put defendants into this difficulty. If the derrick was safe with ordinary care on the part of defendants or their servants for which defendants are liable. On the other hand, if coal was liable to escape, even the exercise of ordinary care, detendants were negligent in not having a fence along the edge of the platform to prevent it from falling down.

The appeal was, therefore, allowed with costs, and judgment given for \$1,000 in favor of B.'s widow.

(Bisnaw vs. Shields.—Judgment of a Divisional Court of the High Court of Justice of Ontario, given at Toronto, 27th April, 1903).

#### EMPLOYER'S RESPONSIBILITY FOR DEFECTIVE MACHINERY.

T. was injured by the falling of the elevator which he was using in the course of his daily work. He sued his employers for damages, alleging that they were liable for the accident, because the elevator was unsafe, and because that fact was known to the manager. It was proved that a machinist, who had repaired part of the machine at the establishment, had found, some time before, that that part which ran the elevator was "chattering," which ran the pinion, showed that the machinery was worn out. A year prior to the accident he had informed the then manager of the fact; the next manager that the

pinion gear and the driving gear has connected with the elevator machinery was worn out and should be renewed. The machinist also stated that in his opinion the chattering caused the key to come out. It was also proved that the elevator had been in use for twenty-one years, and that the life of such an elevator was from ten to twelve years.

At the trial the jury was asked, amongst other questions, what in their opinion had caused the falling of the key. They replied, "Vibration and general delapidation of the running gear."

Upon this answer the court gave T. payment for \$3,150.

(Traplin vs. Canadian Woolen Mills, Limited.-Judgment given at Toronto by Mr. Justice McMahon, 16th April, 1903).

#### AN ALLEGED CONSPIRACY.

A charge of conspiracy against a number of lumber dealers was recently investigated in the Toronto Police Court. The private prosecutor was a carpenter, who, some months before, had gone on strike by order. of his union. He took a contract to erect a building himself, and claimed that when he went to purchase the necessary materials from one of the lumber dealers, he was told that he would first have to go to the Builders' Exchange, where, if he could show that he employed no carpenters who were paid more than 30 cents an hour, he would be given a certificate allowing the dealers to sell him supplies. He also alleged that he went to the Builders' Exchange, and saw the secretary, who, however, never gave him any certificate, but put off doing so from day to day.

The evidence adduced, however, did not, in the opinion of the Magistrate, support the charge. The secretary of the Builders' Exchange swore that he had never heard of such certificate, and that he had no recollection of ever having seen the private prosecutor. Moreover, the manager of the company, which, it was claimed, had refused to sell the lumber, swore that he had never ordered his foreman to send anyone to the Builders' Exchange for a certificate before selling him supplies. The charge was therefore dismissed.

(Case heard in the Police Court, Toronto, June 1, 1903).

This prosecution was brought under section 520 of the Criminal Code, which came in force January 1, 1901. The section reads as follows:

Combination in Restraint of Trade.—Every one is guilty of in indictable offence, and and liable to a penalty not exceeding four thousand dollars and not less than two hundred dollars, or to two years' imprisonment, or, if a corporation, is liable to a penalty not exceeding ten thousand dollars, and not less than one thousand dollars, who conspires, combines, agrees or arranges with any other person, or with a railway, steamship, steamboat or transportation company—

(a) to unduly limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any article or commodity which may be a subject of trade or commerce; or

(b) to restrain or injure trade or commerce in relation to any article or commodity; or

(c) to unduly prevent, limit or lessen the manufacture or production of any such article or commodity, or to unreasonably enhance the price thereof; or

(d) to unduly prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation or supply of any such article or commodity, or in the price of insurance upon person or property. (e) Nothing in this section shall be construed to apply to combinations of workmen or employees for their own reasonable protection as such workmen or employees.

## ACTIONS AGAINST TRADE UNIONS.

Two somewhat similar cases, settling a point of practice of interest to trade unions were recently decided in Toronto.

In the first action was brought by S. for an injunction to restrain certain members of the London Musical Protective Association from doing any act which would induce C. to break his contract with S.

The motion was made on behalf of S. for an order authorizing and directing the defendants, who were members of the London Musical Protective Association, to defend the action on behalf of all the other members of that association, who had not been made special parties to the action.

The court refused this motion with costs.

(Small vs. Hyttenrauch.-Judgment given by Ferguson, J., at Toronto, April 16th, 1903).

In the second of these cases the action was being brought by a member of a trade union for an injunction to restrain the pretended dissolution of the union, the taking of any steps to substitute a new charter, and the conspiring in any way to exclude C., the plaintiff, from membership in the union.

The motion made on behalf of C. was similar to that made on behalf of S. in the preceding case. It was also dismissed with costs.

(Cresswell vs. Hyttenrauch.—Judgment given by Maclaren, J.A., at Toronto, May, 14, 1903).

The plaintiff in this case, Creswell, had been engaged by Small, the plaintiff in the preceding case, as an orchestra leader. Both actions arose out of alleged attempts on the part of members of the Musical Protective Association to induce Creswell to break his contract with Small, who was under the ban of the association; followed, on Creswell's refusal to do so, by certain steps taken to exclude him from further membership in the association.

## EMPLOYER'S DUTY TO GUARD DANGEROUS MACHINERY.

P., a young woman, was employed in a laundry to work at a machine used for mangling and ironing clothes. While she was so engaged, her hand was caught between two of the rollers, and was seriously injured. P. brought an action to recover damages, and the notice of the accident, which she gave to her employers, as required by the statute, stated that it was caused by the absence of a guard to the machine. The statement of the claim also alleged that the machine was not properly guarded, and that it was of a dangerous nature.

At the trial the evidence was contradictory, as to whether or not it was guarded at the time of the accident. The machine itself, with the guard on, was shown to the jury, and it was contended on behalf of P. that, even if the guard was on (which was denied), it was not a proper and sufficient one.

The case was left to the jury without, any written questions being put. and a verdict was brought in stating that the guard was insufficient. and awarding P. \$422.80 damages. Judgment was, therefore, entered for P, for this amount. P.'s employers appealed, but the Divisional Court held that the verdict was justified by the evidence, and confirmed the judgment.

Pearce vs. Elwell.—Judgment given by a Divisional Court at Toronto, June 13th, 1903).

ACCIDENT CAUSING DEATH OF ELECTRIC COMPANY'S EMPLOYEE.

G., who was employed by the Hamilton Electric Light, etc., Company, was killed by an accident, which occurred while he was engaged in doing his ordinary work for the company. His father, who was appointed administrator of his estate, brought an action against the company for damages, alleging that G.'s death had been caused by its negligence in allowing its cable, wires, etc., to be in an unsafe and dangerous condition.

At the trial the action was dismissed on the ground that there was not sufficient evidence as to how the accident had happened.

An appeal was taken from this judgment.

The Court of Appeal reversed the decision given at the trial, and held that there was sufficient evidence to submit to the jury. The appeal was, therefore, allowed with cost, and a new trial ordered, the costs of the former trial to be paid by the company.

The facts of the case, and the gist of the reasons for the judgment of the Court of Appeal, are contained in the following extracts from that judgment:

The deceased was a laborer, and, with his fellow-workman, one Higgins, was, on the 1st of July, 1902, ordered to cut a trench or opening at two places in the concrete floor of the defendants' power house. This floor may be said to be covered with the various sorts of electrical apparatus used for the development and transmission of electric power, such as cables, wires, switchboards, transformers. etc., access to and among which is obtained by alleys or alleywas, some passing east and west, lengthwise through the room. and others traversely, called the north and outh alleys, crossing the former from one side of the room to the other. On each side of the former is a series of switch-boards, from each of which depend two loose loops or coils of wire, the ends of which are attached to a movable handle. These wires pass through the switch-board, and are connected through the transferrer with the generators. The trenches were to be cut in the transverse or north and south alleys at the east end of the room. The cables in the works adjoining the north alley were dead, and there was no danger in working there. Those in the south alley were alive. According to the evidence of Higgins, he and his fellow-workman wer directed to clear up and remove the rubbish which would be made in cutting the trench in the concrete, which, from its hard and brittle character, was apt to fly and make a litter in every direction. They were engaged in doing this when the accident happened. Higgins said that he had gone into the east alley, i.e., that part of the east alley which is east, and immediately opposite or at right angles to the south alley, in which one of the trenches had been cut, and was sweeping out the litter from there towards the trenches, when he suddenly became unconscions, receiving, as there can be no doubt he in some way did, a severe electric shock. He had last before this noticed the deceased stooping over the trench about four feet distant from Live wires, it may be said, were proved to have been in the east alley him. within arm's length of anyone working in the trench. The bodies of both men were discovered lying near each other, just east of the switch-board in

the east alley, that of Higgins being a little above to the north of the two switchboards. From the evidence, it may also be inferred that the deceased in some way received an electric shock, and that this was the cause of his Whether this was at the same time as Higgins. or immediately or death. soon afterwards, does not appear. To prove defendants' negligence. it was shown that there was a break or rupture in the insulation of the loose loop or coil of cable, hanging from the switch-board directly over where Higgins was lying, such as might be caused by its being bent backwards and forwards in There was also evidence that, having regard to the enorits constant use. mous voltage passing through the wires, their insulation was quite insufficient for the purpose of safety to anyone working among them in an unprotected condition, even though he did not actually come in contact with them, and also that the depending loop or coil might easily have been better guarded than it actually was.

Whatever may be said of the case hereafter, when the evidence of both sides is in, I think that as it stood at the close of the plaintiffs' case there was evidence in support of it which could not properly have been withdrawn from The men were not forbidden to go in the east alley, and it would the jury. be quite permissible for the jury to find, on the evidence of Higgins, that their instructions were such as to require them to clean up any litter or rubbish which got there in the course of their work. I by no means intend to say that the jury would be bound to infer this, or that there was not evidence, such as putting up the slab or lath across the east alley, which would justify the contrary inference. As to the cause,—if the men were lawfully in the place where they were found, one of them dangerously shocked and the other dead,-they were working there without having had any special warning on the subject, in a place where a single unguarded movement might bring either of them in contact with death from the ruptured wire, or even if, as one witness suggests, the rupture might have occurred at the moment, then from a wire insufficiently insulated or insufficiently guarded. There is no reason that I can see to look further and imagine possible negligence on the part of the men themselves.

There was evidence that the death of the deceased was owing to the neglect of some precaution of this nature, or to the damaged condition of the wire, close to which the body was found. I think it quite immaterial, whethe men received the shock concurrently, one through the other, or whether Griffith's shock came after his fellow-servant had been struck. It is enough enough that he was not wrongfully in the place where he met his injury.

Griffiths vs. The Hamilton Electric Light Company.—Judgment given by the Court of Appeal, June 29th, 1903).

## Accident Caused By Negligence of Employee.

B., who was employed as an assistant carpenter, was helping to cover the top of a wall of a canal, which was being built by his employer. In obedience to the orders of the superintendent in charge of the work, B. went to the canal bed, where there were a number of long planks, and delivered three of them to C. a fellow-employee. who was on the top of the wall. The place these planks were to be delivered was unobstructed and perfectly safe. B. then returned to where the planks were, took another out, and, noticing then that C. was at the top of the wall, at a distance of about fifty feet from the place where the planks were to be delivered, made a few steps in the direction of where C. was, and in so doing stepped on a board with a nail in it, which went through the sole of his boot and into his foot, thereby seriously injuring him. B. subsequently brought an action for damages on account of this injury against his employers, alleging that they were liable, on the ground that the place, or where he had been required to do this work, was unsafe and dangerous.

The court came to the conclusion that the course which B. took in bringing the plank was not a "way" at all, as at that point the bottom of the canal was dangerous, on account of the large number of pieces of plank lying about with nails in them, and that as C. had chosen to use this dangerous route. when his employers had furnished a safe one at the point where the plnaks were required to be delivered, the latter was not liable.

(Birmingham vs. Larkin.—Judgment given by Mr. Justice McMahon at Toronto, June, 22, 1903).

#### JUDGMENT AWARDING DAMAGES CONFIRMED.

R. was employed by a firm which manufactured hinges, etc., and was put to work at a pin-cutting machine to carry away the pins as they came out. While so employed he was caught betwn two cog-wheels of the machine, and thereby lost part of his left hand. He brought an action against his employers for damages, alleging that the machine was not properly guarded as required by law, and also that he had been employed contrary to the provisions of the Ontario Factories Act, as he was under fourteen years of age. The employers defended the action and claimed that the machine was properly guarded, and that when R. had been employed by them he had stated that he was over 14 years of age.

The trial Judge decided that the evidence supported R.'s contention and awarded him \$1,000 damages. The employers appealed from this judgment, which, however, was confirmed by a Divisional Court.

(Ryan vs. Britton.-Judgment given at Toronto, June 1st, 1903).

#### Alleged Defects in Machinery,

T. met with an accident while employed by C. He subsequently brought an action for damages against the latter on the ground that the accident was caused by the defective machinery used in C.'s sawmill.

The following extract from the judgment given at the trial contains the facts and the result of the litigation.

Plaintiff was employed as a general laborer, with the particular duty of keeping the boiler supplied with fuel. Among the machinery in the mill was a circular rip saw fixed in a table. This saw was operated by a belt connecting a man drill on the saw shaft, and on the counter shaft was a split pulley, one half slack and the other fixed, and this was connected by a belt with a pulley on the main shaft. On June 6th, 1901, while plaintiff was attempting to rip a strip off a piece of board about six inches wide by two and a half feet long, his left hand came in contact with the saw, resulting in the loss of two fingers. The plaintiff alleged as defects in the machinery, the absence of a guard or hood over the saw; that the belt connecting the counter shaft with the main shaft did not fit properly; and the absence of guide to prevent the belt slipping from the tight to the loose pulley and vice versa.

A guard or hood enclosing the upper part of the saw was not practical without great inconvenience and delay in operating the saw. The guide described on the evidence as "a strap guide," was not a necessary and reasonable device that defendants were bound to attach. . . The slipping of the belt did not endanger the operator, assuming that he possessed ordinary knowledge and skill in using the saw, and it did not, in fact, induce plaintiff's injury.

But, even if these defects were proved, plaintiff must fail on the ground of contributory negligence. He was not employed to operate the saw and was not experienced at the work; his attempt to operate it on this occasion was purely voluntary, though he had not been forbidden to use it: he should have used the guide or fence instead of attempting to guide the board wih his left hand; trying to saw a short and narrow piece of board without the guide was an unskillful and careless act, and was the proximate cause of his misfortune, which could have been avoided by the exercise of ordinary care on his part. The action was, therefore, dismissed with costs.

(Taylor vs. Conlon.—Judgment given by Mr. Justice Teezel at Toronto, 31st July, 1903).

## EMPLOYEE FINED FOR LEAVING HIS EMPLOYER.

S. hired L. in Toronto to work for him in Bradford, and, as L. had no money, S., at his request, paid for railway ticket to Bradford. After his arrival there, L. worked for  $\leq$  for a few hours, but did not do sufficient to repay him for the money so spent; and he then refused to do any further work, and left S.'s employment.

S. subsequently had a warrant issued against L., on the ground that he accepted the sum of \$1.30 to pay his fare to Bradford on condition that the amount was to be worked out, and that L. had refused to do sufficient work to recompense him for that outlay. The information on which the warrant was issued was under "The Masters and Servants Act, 1901."

The Magistrate before whom the matter was tried fined L. \$5.00, and directed that he should also pay the costs, or that in default he should be imprisoned for ten days.

An appeal which was taken from this conviction was not allowed.

(Rex vs. Lewis.—Judgment given by the Divisional Court at Toronto, April 4th, 1903).

## Alleged Defective Machinery.

G. was employed to work at a paper-cutting machine, in the use and management of which he was instructed by his employer's foreman. The object of the machine is to cut blocks of paper, and its mode of operating (according to an extract from the judgment) is as follows:

The operator standing in front of it places upon the table of the machine the block or pad of paper intended to be cut. By a double movement of the throw-off handle by the operator, parts of the machinery are set in motion by means of which the power is communicated; a clamp descends, which fastens the block firmly in position; this is followed immediately by the knife which makes the cut required. When the double movement of the handle has been completed, it is at once released by the operator, the cut is made and the clamp and knife return to their former position automatically, as the witnesses say, or in the course of the motion imparted to the shaft by the driving gear. In the upward movem nt, the machine is thrown out of gear or locked, ready to be again set in motion by a repetition of the double movement of the throw off handle. On June 19th, 1902, when plaintiff had been working at the machine for a week, he placed a block of paper on the table, cut it in the usual way, and, as the knife was ascending, proceeded to take out or turn round one of the parts in order to trim the edges by another cut. In doing this his hands were necessarily under or partly under the knife, which, unexpectedly and without having been set in motion by him, fell, severing one of his hands and mutilating the other. The knife had never come down in this way before, while he was working the machine, without using the handle, and from his instructions as to its use and mode of operation he had no reason to expect that it would do so.

The action was tried by a jury, which, in answer to certain questions, stated that the injury was caused by some defect in the machinery, which was known to the employer's foreman, and that the latter had been negligent in not having the same remedied. In answer to another question, however, the jury stated that it was unable to state what the defect in the machinery was. It also awarded G. \$2,500 damages.

The employers appealed, and the Court of Appeal directed that there should be a new trial, upon the ground that the findings of the jury were inconsistant, since, while they stated that the accident was caused by a defect known to the employers, yet they could not say what the defect was. The court was also of the opinion that the evidence was unsatisfactory in not show ing clearly the construction and operation of the machine, and suggested that on the second trial the Judge and jury should see the machine itself and the operation of the several parts.

(Glasgow vs. The Toronto Paper Manufacturing Company.--Judgment given by the Court of Appeal at Toronto, Sept. 14th, 1903).

#### WITHDRAWAL FROM A JURY.

G., a minor, together with another person, who was working for an electric company, was directed to clear up and remove the rubbish caused by their cutting a trench in a concrete floor of an alleyway in a power house. The alleyway was crossed at right angles with others and on each side were electric machines and live wires, all of which were at arm's length of any one working in the trench. One of the live wires was ruptured, probably by its having been constantly bent. The person working with G. went into a cross alleyway where the live wires were, although there had been a slat nailed across it when the two were put to work; and was sweeping towards the trench the litter that had been scattered about, when he suddenly became unconscious from an electric shock. The bodies of both men were found near a switchboard. plaintiff's son being dead. It was shown that there was a rupture in the insulation of a loose loop or cable hanging from the switchboard directly over where the survivor was lying, and that the insulation of the wires was, with respect to the voltage passing, insufficient for the safety of anyone working among them, and that the hanging loop might easily have been guarded better than it was.

G.'s father brought an action against the electric company, alleging that the accident was caused by negligence for which it was responsible.

At the trial the Judge withdrew the case from the jury, upon the ground that there was no definite evidence to show what had caused the accident. An appeal was taken, and it was held that there was evidence which could not properly be withdrawn from the jury. A new trial was, therefore, ordered.

(Griffith vs. The Hamilton Electric and Cataract Power Company.-Judgment given by Mr. Justice Falconbridge at Toronto).

#### BUREAU OF LABOR.

#### SERVICE OF PROCEEDINGS ON A UNION.

In an action brought by the Metallic Roofing Company of Canada against Local Union No. 30 of the Amalgamated Sheet Workers' International Association, an important decision was given last month on a point of procedure. The Local Union, which is being sued, holds its charter from the association, which has its head office in Kansas City, U.S.A. The persons served with the writ of summons and other proceedings were the officers of the Local Union and the members of a committee which it had appointed.

The court held that service on these persons constituted service on the other members of the local union.

It was held, however, that such service was not service on the association, which was a foreign body.

(Judgment given by Mr. Justice McMahon, at Toronto, October 5th, 1903).

#### CIVIC CORPORATIONS AND UNION LABELS.

Some time age the City of Toronto passed a by-law enacting that all clothing bought by the city should bear the union label. In pursuance of this bylaw, when tenders were called for firemen's clothing, the proposed contract contained a clause that each article should bear the label of the Journeymen Tailors' Union. A Mr. Anderson, who carries on business as the "Crown Tailoring Company, and who does not employ members of the Tailors' Union, considered himself aggrieved by this provision, and he, therefore, brought an action asking for an injunction which would have the effect either of eliminating this clause from the contract, or of having his goods taken without the union label.

The matter was gone into very fully, and the court came to the conclusion that the city had no right to say that all people tendering for such supplies must necessarily have their work done by members of the Journeymen Tailors' Union. The injunction asked for was, therefore, made perpetual. As the point is an important one, the judgment is here given in full. The remarks of the Chancellor having a bearing on fair wages stipulations in public contracts are also of general interest:

Chancellor Boyd: This case has been very fully and ably argued by Mr. Lobb, and if it involved the consideration of conflicting authorities. I should look more fully into it than just listening to the case as now argued. Both counsel concede there is nothing which covers the point, and it seems to me that it is quite in accordance with what has been said. The cases cited, both from the States, Manitoba, and also from British Columbia, do not touch the matters with which we are concerned here. If it were corect as argued that this was a matter of discretion, or if internal economical distribution of funds on the part of the corporation, I should entirely eccede to his argument, that unless some gross abuse were proved in the exercise of the powers the court would not interfere. It does not strike me, however, that this is a case of that character at all. This is a case which is to be judged of rather in the light of those authorities which deal with by laws passed by a municipality where the matters concern the public. The action is not by Mr. Anderson, a contractor, who wishes to get rid of the objectionable contract, or to have his goods taken. It is by Mr. Anderson the ratepayer on behalf of himself, and all others. And the broad question that comes before me is whether an injunction already granted should be continued with respect to this clause in the contracts that are put forth for the tenders for the firemen's clothing, that is, that each article of clothing supplied shall bear the label of the Journeymen Tailors' Union. That is the objectionable point. In this contract there is a provision that was sanctioned by the Manitoba courts as being a legitimate exercise of power, that is, that the minimum rate of wages as stipulated shall be 18 cents an hour. There is no minimum rate to be paid for each garment, expressed in this contract, though it has been in some of the That would probably be on the same footing as the 18 cents an hour, others. and under the authority of the Manitoba case that would be a legitimate restriction exercised by the municipality, not only to secure good work, but to see that the people were reasonably well paid for their work. This is a matter in the public interest. That is not a matter which is before me in this litigation. I have not to pass upon it at all. It does seem to me right enough to have that stipulation in, that there shall be living wages paid, and that the garments shall be up to a certain standard. There is no objection to the municipality providing that there shall be a certain standard of workmanship, or that there shall be a certain standard for payment, but that is not the point which comes before me in this particular case. The question is the label of the Journeymen Tailors' Union being a pre-requisite before the contract can be effected. I am not concerned at present at all about how the amount is to be applied, or what is paid to these workmen. The evidence here is that the workmen have been paid more than 18 cents, or certainly as much as 18 cents per hour, and have been paid more than \$4.75. It is said that cannot be traced to the particular workmen. I am not concerned just now about that, because it is not one of the issues raised before me, and the employer was not prepared to explain where and how he was making his profit while tendering for the goods. The true way of securing what is wanted in this case seems to me to be what was done. That is, there was bad workmanship, then they insisted that the rate of wages should be increased or a better rate should be paid per hour, a better rate should be paid per piece, and then a proper inspection after the work is done. That is the true way of securing a remedy, and, although one of the witnesses says that the employment of this term, the label of the Journeymen Tailors' Union, had a sort of a magic operation, that all the work became immediately better after that. I cannot exactly give credit to that view of the case. You may have scamp work among journeymen tailors, as well as anywhere else. You may pay them good wages, and yet have improper and botched work. You may pay them good wages, and yet have insufficient men doing the work. There is no magic result. The test is, pay men fairly, see that the work is done properly, and have proper inspection. There is no short and efficacious course for the municipality to adopt. It seems to me that this stipulation in the contract is objectionable on the same ground that it would be objectionable in by-law. That is to say, it is an unreasonable condition. There is a want of equality and fairness in inserting that stipulation, on many grounds. First of all, there is a restriction at once imposed upon the area from which the skilled labor can be obtained. I do not deal with this particular man who is making the complaint, but in his case one can see how it operates. He has a large factory there, well equipped, able to do the work under that roof, able, as he says, by the employment of up-to-date machinery, expensive machinery, to do better work, he says. I am not here to judge whether that is so or not. Mr. McGowan will have to look to that when he inspects the stitches and so on, as to whether it is better or not, but he says he is in a position to better work and at a cheaper rate, and that the effect of his system is that there is more skill in the operators, and it can be done under the same roof.

193

One of the defences raised here upon which there has been a total failure of proof is that the label of the Journeymen Tailors' Union was inserted for sanitary purposes are concerned, the work is much better done in a factory The whole value of the evidence is the other way. That so far as upon it. sanitary purposes are concerned, the work is much better done in a factory which is open to public inspection than it could be by these journeymen tailors who may take their work home to their own houses, which will not be up to the standard required by the inspection of factories. But this particular man has all this machinery, has these workmen, has his concern going, has expended large moneys in that, and he can do all the work under his own roof. Now he and all others in his condition, and anyone else tendering, could not rely upon what staff they might have on hand of operators, but would have to cast around and see where they could get Journeymen Tailors' Union people to do the work. The evidence shows here that only about onehalf of all the tailors in the city belong to this union, so that those men out of the union are cast out altogether, and, though it may be, as it is said in the evidence here, if there is a scarcity of workmen, the journeymen tailors may sanction the employment of outsiders, why should employers of labor be subjected to that restriction, of going to the labor union and asking whether they may employ other workmen? So at once there is a restriction, an unreasonable restriction it seems to me, imposed in the area from which the skilled labor can be drawn. Then, again, there is a restriction imposed upon the employer in regard to the rate of wages which he must pay. There is a minimum imposed here. I am not talking about that, but these labor unions have it in their hands to control the rate of wages, and, while 18 cents may be the minimum which the corporation requires, it is in the power of this labor union to raise that scale, and to impose more and to raise it during the progress of the work. It is in evidence already about the three scales of wages for work done on three different streets in the city. I do not know anything more about this labor organization, what means they have of letting people in or out, or making their arrangements, but there is that much at least appears, that there are three scales of wages for different streets, and that the factory of this plaintiff is not in any of those streets, so that he does not know and no one knows, I do not know, and there has been no evidence given on the point, as to what he should have to pay to get work done. his factory being on Wellington street. So that there is a hampering of the employer. Then at once it gives a preference, a privilege or priority, to those who are union workers. They may not be as good workers as outsiders, he may get better labor or better assistance from those who are not in the union, but under this union workmen have priority, they have the prior rights, and it is only when there is any shortage perhaps he can go outside.

Now, that is all wrong in the public point of view. The test of a man's capacity should be whether or not he is a good work man, whether he has skill, and the employer should certainly be free to go where he can get the best work, giving good pay for it, but this gives the privilege to the union man at the expense perhaps of more competent workmen who are outside of it.

Then, again, one cannot help seeing that this is an attempt, veiled, it may be, but still an attempt to set up the virtue of the hand labor against the beneficial employment of machinery where parts of the garments are made by that means. It is said by some of the witnesses called here that this handwork is very much better done than machine work. Well, that is one of the questions that was discussed long ago at the beginning of this century when machines were brought into operation, and when the operations in the harvest

13 B.L.

field was affected by machinery instead of handwork. There was a rebellion, an uproar and cry, just in the same direction, that those machines would undo It has turned out that those are the greatest benefits the poor could the poor. have, bettered the condition of the working classes, and this is a phase of the same struggle, that the men who are working by hand are going to be interfered with, and the city apparently has been trying to give effect to that by introducing this direction that the label of the Journeymen Tailors' Union, where the men only work by hand, shall be a prerequisite, so that the machinery by which the operations are done quickly, and more certainly, and it is said more effectually, are cut out. It is impossible to say upon this evidence that the work done by this particular plaintiff is inferior at all to the best handwork that has been done. Machine seaming, sewing and stitching, is employed by both of them at certain stages, and all the advantages that are claimed by the hand workers as to fitting and shaping and the canvas and all this kind of thing. These burly firemen all look very well dressed, and I have no doubt when they have their garments fitted on they will see that proper fits are given to them, just as well by Mr. Anderson as any other per-The work turned out will likely be as well done by the employment of son. machinery, although the men are not Journeymen Tailors' Union men. I do not take any stock, to use a familiar expression, in that argument, that better workmanship can be secured. The evidence fails entirely to prove that. Then, again, there is the other evidence which has been given, that the only distinction, so far as I can see, between what is claimed on the part of the city, representing the working people, or representing the Journeymen Tailors' Union, is that the plaintiffs' work is done in detachments, that is to say, one part of a garment is made by one person who makes all of that part, and the other parts are made by another set of workmen, instead of the whole garment and the whole suit being made by one hand. One man does the whole in the one case of the Journeymen Tailors' Union, that is, in theory, but it is not practically so, because the work is turned over to female workmen. hand may superintend it. Well, that is a contest rather between the plaintiff's work and someone else's. That is a matter that Mr. McGowan will have to look to when the results come to him, but upon this evidence better results may be expected from the plaintiff's way of doing things than the other. The evidence is that these women or men who are working on the parts of the garment become more skilful, they have better experience in that particular way, and the result may be expected to be better than if one man does the That is a matter of dispute. I do not know whether that is so or whole. not, but that is really the only distinction there seems to be between the journeymen tailors' case and the plaintiff's workmen. That is all beside the question as to whether it is right to have the restriction put upon all people tendering, that they must have their work done by the Journeymen Tailors' Union I touched upon the sanitary question. I can see no reason for disagreeing with Mr. Fullerton's advice given to the Council, not this year, but some time ago. It is said that another complaint has been made about this before. They called for Mr. Fullerton's opinion some time ago, I do not know how long ago, but he gave them the same opinion he does now, a considered opinion, that this was an undue restriction which it was not possible for the city to carry out. I think he advised the city rightly, and they will not be surprised if I affirm his opinion in this action and grant the injunction, with costs.

## UNIONS AND INJUNCTIONS.

A new proceeding was recently taken in the case now pending between the Canada Foundry Company and the Moulders' Union. An injunction has been granted restraining the union from interfering with the company or the men in its employment. During the continuance of this injunction, certain members of the union gave some of the company's employees the money necessary to enable them to leave Toronto. The company sought to have the men who advanced the money imprisoned, on the ground that they had violated the terms of the injunction previously granted. The court, however, held that it was not a violation of the injunction to give such financial assistance if the men had already left the company's employment or desired of their own free will to do so.

(The Canada Foundry Company vs. The Moulders' Union.—Judgment given at Toronto by Chief Justice Meredith, Nov. 20th, 1903).

#### THE PROGRESS OF THE GURNEY COMPANY CASE.

The Gurney Foundry Company recently issued a writ against a number of members of the Toronto Trades and Labor Council for an injunction restraining them from interfering with or intimidating the company's workmen; from wrongfully interfering with the company's customers; from boycotting its goods and from publishing wrongful statements that they are made by incompetent workmen, and from wrongfully and maliciously conspiring against the company; and also for damages for having already committed these acts.

These actions have not yet been tried, but on the ground that the company made out a prima facie case, a temporary injunction to last until the trial was granted.

# Negligence of Employer and Question as to Contributory Negligence of Employee.

G. was employed in a big factory. In the course of his work in the factory his hand was caught in the fans of a "dryer," and, as a result, had subsequently to be amputated.

The dryer was a room 16 feet long by 10 feet wide. In it were two fans. These fans were put in motion by a belt being put upon a tight pulley, which, when the fans were not going, ran upon a loose pulley. The plaintiff left work one Saturday at noon, and he subsequently said that time he noticed the tendency of the belt to go upon the tight pulley, and that he had been obliged to hold the belt on the loose pulley until the machinery stopped. On the following Tuesday he again commenced work. He noticed that the belt was upon the loose pulley, and then he went to the dryer to oil up. He noticed that none of the machinery was then in motion. He took off one panel of the drying-room and filled the oil cup of one of the fans. He then commenced to make his way through between the folds of the cloth with which the place was filled, and while he was doing so he heard the machinery start up. He held the oil can in his left hand and put his right hand up to feel for the oil cup; instead of reaching it, however, his hand went against the fan, which was then in motion, having been started after the driving machinery commenced, by the slipping of the belt from the loose pulley to the tight pulley.

G. in his action, alleged that the arrangement for running the fans was defective, and that his employers were aware of the fact; that the belt was somewhat wider than the loose pulley, and was liable to extend to the tight pulley and start the fans, without anyone using the shifter. The action was tried with a jury, and the jurors visited the factory. In answer to the questions submitted, they found that the injury in question was attributable to the negligence of the employers in having the arrangement of shifting lever and pulley so defective as to allow the belt to slip upon the tight pulley and start the fans. They also found that G. had exercised reasonable care, and awarded him \$1,250 damages.

The employers contended that, even according to G.'s evidence, he was guilty of contributory negligence, because he went to the drying room in the dark, and they, therefore, asked that judgment should be given in their favor. The trial Judge, however, came to the conclusion that the jury could have brought in a finding to that effect, if it had seen fit to do so. He, therefore, gave judgment according to the verdict, giving G. \$1,250 damages.

(Gordainer v. The John Dick Co.—Judgment given in the High Court of Justice of Ontario by Mr. Justice Britton, November 26, 1903).

## Accident to an Electric Lineman; Question of Liability of Strangers for Negligence.

R. was employed by the Ottawa Electric Co. to do certain work in connection with the wiring for the illuminations prepared for the visit of the Duke of York to Ottawa. In the course of such work R., without having any right to do so, placed a transformer on a pole belonging to the Great North-Western Telegraph Co. The employees of Ahcarn & Soper had previously placed on the same poles wires connected with illuminations, and, according to R.'s contentions, these wires were so negligently affixed and so dangerous, that he came in contact with them and then fell from the pole, sustaining severe injuries.

R. sued both the Ottawa Electric Co. and Ahearn & Soper for damages. At the trial the action against the Ottawa Electric Co. was dismissed. As regards Ahearn & Soper, the jury, in answer to certain questions, found that the negligence of the employees of that firm in using uncovered wires and in the careless construction of the wires was the approximate cause of the accident to R. The jury, however, did not answer another question, as to whether R., by the exercise of ordinary care, might have avoided the accident. These findings were treated by the trial Judge as a disagreement on the part of the jury. The whole case was subsequently taken to the Court of Appeal, which found :

(1) That as R. had used the pole in question without any authority from the owners, or without having been invited by Ahearn & Soper to do so, he took all risk of the wires being out of order or imperfectly insulated, and that therefore, he could not recover against Ahearn & Soper for any accident arising from these causes: and

(2) That in any event the evidence showed that R. had been guilty of such contributory negligence as would debar him from obtaining damages for the accident, since at the time he had been working without gloves, although he had been warned and instructed by his employers to always wear them working at the wires.

R.'s action was, therefore, dismissed.

(Randall *vs.* The Ottawa Electric Co. and Ahearn & Soper.-Judgment given by the Court of Appeal of Ontario, November 16, 1903).

## SYNOPSIS OF THE LABOR LAWS OF ONTARIO.

## The Mines Act.

R. S. O., 1897, chap. 36, provides that no boy under the age of fifteen years shall be employed in or allowed to be for the purpose of employment in any mine to which this Act applies, below ground. The Act applies to all mines, quarries and pits, and oil, gas and salt wells, and other openings from which ores and minerals of any kind or class are raised or taken, and to all furnaces or works for smelting or otherwise treating rocks, ores or clays, sands, oils, brines or other minerals for any economic object.

No boy, or young male person of the age of fifteen and under the age of seventeen shall be employed or allowed to be for the purpose of employment in any mine to which this Act applies below the ground on Sunday or for more than forty-eight hours in any one week, or more than eight hours in any one day.

Any appliance used for the purpose of entrance to, or communication to or from any part of the mine, and which is operated by steam or other mcchanical power, or by animal or manual labor, must be in charge of a male of at least twenty-one years of age. Where the motive power is supplied by an animal, the driver of such must be at least sixteen years of age.

No wages shall be paid to any person employed in or about any mine, etc., at or within any public house, beer shop or place for the sale of intoxicating liquors.

Each owner is required to make returns to the Bureau of Mines each year of the number of employees, their ages and hours of labor, the rate of wages of each class. together with weights and estimates of values of minerals, dressed and undressed, etc., and may be required by the Bureau of Mines to make such returns monthly or quarterly.

Provision is also made for proper ventilation, also care of explosives used in or about mines, etc., also for the appliances of safety in the operation of the shafts, cage, etc. Accommodation is also required near the entrance of the mine for the conveniently drying and changing of clothes of those employed in or about the mine, etc.

Provision is made for the reporting of any accident in writing within twenty-four hours of the occurrence of such accident, giving full particulars thereof.

## MECHANICS' AND WAGE EARNERS' LIENS.

R. S. O., 1897, cap. 153, provides protection to wage earners and contractors for loss on account of labor or material furnished in the erection of buildings or the construction of machinery.

The Act not merely recognizes the new form of liability, but provides the means of establishing and enforcing claims arising under it. The original Act has been several times amended, with a view to make it more simple and perfect in its working. The Act also provides that the liens for wages shall to a certain amount have a priority over all other liens, and over any claims by the owner against the contractor, on account of failure to complete his contract.

In 1890 an Act was passed to simplify procedure for enforcing mechanics' liens. One clause provides that without issuing a writ of summons or taking any other preliminary proceedings, the plaintiff may file a statement of claim in the office of a master or official referee, having jurisdiction in the county wherein the lands are situate. It is also provided that any number of lien holders may join in one action. The ruling or certificate of the master or official referee when filed in the proper office shall become a judgment of the High Court, when the sum is \$400.00 or over, of the County Court when less than \$400.00, but over \$100.00, and of the Division Court when the sum is less than \$100.00. The fees payable for entering such certificate as a judgment are as follows: In the High Court, \$1.60, in the County Court 80c., in the Divison Court 50c.

A further amendment provides that a device by any owner or contract, or which shall be adopted in order to defeat the priority of wage-earners for their wages under the several acts relating to mechanics' liens, shall as respects such wage earners be null and void.

A further provision regulates that in the case of wages due to any mechanic or other person in respect of work referred to in the 4th section of the Mechanics' Lien Act, the jurisdiction of a police magistrate in a city under the act respecting master and servant shall extend wages for thirty days or for a balance equal to the wages for thirty days, though the same or the balance thereof exceed the sum of \$40.00 in the said section mentioned.

It is also provided that where no specific rate of wages has been expressly agreed to between the parties, the city police magistrate may order payment of the wages, reckoning the amount thereof according to the current rate of wages in the city in like cases, or according to what may appear to be a just and reasonable allowance, and any order of a city police magistrate for the payment of such wages as aforesaid shall be payable forthwith.

## WOODMEN'S LIENS.

R. S. O., 1897, cap. 154.—This Act applies to the Districts of Muskoka, Parry, Sound, Nipissing, Algoma, Manitoulin, Thunder Bay, and Rainy River, and to the provisional County of Haliburton, its purpose being to protect the wages of all engaged in those localities, in cutting, skidding. felling, hauling, scaling, banking, driving, running, rafting or booming any logs, or timber, and any work done by cooks, blacksmiths or others, usually employed in connection therewith, giving them priority of right for wages above all other claims, except such right as the Crown may have upon logs or timber for, or in respect of any dues or charges, or which any timber slide company, or owner of slides and booms, may have thereon for or in respect of tolls. This Act also provides that no payment of wages shall be made or offered to any person for any labor or services performed upon, or in connection with any logs or timber in the said districts or provisional county, by any cheque, order, I.O.U., bill of exchange, promissory note, or other undertaking other than a bank note, or bill drawn upon or payable at or within an place or locality not within the Province of Ontario. A violation of this provision incurs a penalty of not less than \$5.00 or more than \$20.00, recoverable by summary

#### LABOR ON PUBLIC WORKS.

proceedings before a stipendiary or police magistrate or justice of the peace,

under the Ontario Summary Convictions Act.

R. S. O., 1897, cap. 155.—This Act secures payment of wages for labor performed in the construction of public works. Any foreman, workman or laborer, or by any team employed on the work, giving notice not later than two months after the wages are due to the member of the Executive Council entering into the contract, for and on behalf of her Majesty, or having the supervision of the execution of the contract where the same is made, may cause such claim to be paid to the extent of any moneys or securities at the time of the filing of the said claim in the hands of the Crown for securing the performance of the contract.

The Act also provides that he said member of the Executive Council may in writing require every contractor or sub-contractor to forward a list each month, showing the names, rates of wages, amounts due and unpaid for wages for labor done, such list to be attested on oath.

Failure to comply with this demand incurs a penalty of not less than \$10 or more than \$100 for every day during which default continues.

#### WAGES.

R. S. O., 1897, cap. 156.—An Act respecting wages—applies to wages or salary, whether payable by the day, week, piece, job or otherwise. When an assignment is made for the general benefit of creditors, the assignee shall pay in priority to the claims of the ordinary or general creditors of the person making said assignment, the wages or salary of all persons in the employment of such person at the time of making such assignment or within one month before the making thereof, not exceeding three months' wages or salary, and such persons shall be entitled to rank as ordinary or general creditors for the residue, if any, of their claims. This provision also applies to the liquidation in distributing the assets of a company under the provisions of the joint stock companies winding-up act, also to the sheriff who has made seizure, under the creditors' relief act, also under the act respecting absconding debtors, and also applies to the administration of the estate of deceased person. This Act is not intended to apply to an assignment made under the provision of any Act of the Parliament of Canada relating to or respecting bankruptcy or insolvency.

By an amendment of 1899 it was also provided that where an estate was not sufficient to meet priority of claims for wages over ordinary or general debtors, that the priority extends to the wage earner over all others excepting the cost of liquidation.

It is also provided that the executor, liquidator, administrator, or other person engaged in winding up the estate, may forthwith, upon such estate coming into his hands, pay all claims for wages, without being chargeable, in case it shall in the end appear that said estate was insufficient to cover such payment, provided that he has acted in good faith, and had reasonable ground to believe that the estate would be sufficient.

#### THE TRADES ARBITRATION ACT.

To Facilitate the Adjustment of Disputes Between Master and Workmen, R. S. O., 1897, chap. 159.

This Act provides that any number of masters and workmen in any city. town, township or village in Ontario, may mutually agree to the formation of a board of arbitration for the purpose of settlement of any industrial disputes that may arise at any time between them in their relations as employers and employees.

The masters and workmen shall jointly sign a memorandum, whereby it is mutually agreed to establish such board; such memorandum to be filed with affidavits verifying the signatures thereto in the registry office of the registry division within which the masters and workmen reside. The board shall consist of not less than two masters and two workmen, nor more than ten masters and ten workmen and a Chairman, and the number to constitute the board other than the Chairman shall be inserted in the memorandum, but no member of the board shall adjudicate in any case in which he or any relation of his are one of the parties.

The Board shall have the power to appoint their own Chairman and two clerks, one for the masters and the other for the workmen's portion thereof. The Board is given all the powers conferred upon arbitration by the Arbitration Act, R.S.O., 1897, chap. 140, s. 10.

Any award made by the Board is final and conclusive between the parties thereto, without being subject to review or challenge by any court or authority whatsoever.

A committee of the Board, to be denominated the committee of reconciliation, shall be appointed by the Board, consisting of one master and one workman, who shall sit at such times as shall be appointed, and shall be renewed from time to time as occasion may require; and all cases or questions of dispute which are submitted to the Board by both parties thereto shall in the first instance be referred to the committee, who shall endeavor to reconcile the parties in difference. When such reconciliation is not effected, the matter in dispute shall be referred to the Board, to be disposed of as contested matter.

AN ACT RESPECTING MASTER AND SERVANT.

R.S.O., 1897, cap. 157.—Provides that no voluntary contract or services or indentures entered into by any parties shall be binding on them or either of them for a longer time than a term of nine years from the day of the date of such contract. Where an agreement is entered into between the master and the servant, either in lieu of or additional to his salary, wages or other remuneration, and such agreement not creating any relation in the nature of a partnerhip, such agreement shall be deemed lawful, provided that in such case the servant must accept the statement of the said master as to proceeds. involved in the agreement, and shall not have power to examine accounts of said master.

An agreement, whether verbal or written, entered into between master and servant, for the performance of any duty or service whatsoever shall be binding, but a verbal agreement shall not exceed the term of one year.

The Act also provides that no tavern keeper or boarding house keeper shall keep the wearing apparel of any servant or laborer in pledge for an expense incurred to a greater amount than \$6, and shall surrender immediately any goods kept by said tavern or boarding house keeper under such circumstances upon the tender of said \$6 or less sum due. This does not apply to other property of the servant or laborer.

Any agreement, verbal or written, between any person, and any other person not a resident in Canada, for the performance of labor or service in the Province of Ontario shall be void and of no effect as against the person only migrating or coming. This foregoing provision does not apply to teachers, professional actors, artists, lecturers or singers, or to such skilled workmen not procurable in Canada.

Proceedings may be taken under this Act for the collection of wages within one month after the engagement or employment has ceased, or within one month after the last instalment of wages under the agreement of hiring has become due. Where proceedings are taken under this Act before a police magistrate, and payment of wages is ordered by him to be made by the master or employer to the servant or laborer, and the same are not paid within the time limited by order, the same proceedings may be taken by the person claiming the benefit of the order as may be taken by a party having an unsatisfied judgment or order in the Division Court for the payment of any debt, damages, or costs, as respects the examination of the judgment debtor touching his estate and effects, the means he has of discharging his liability, and the disposal he has made of any property, and the police magistrate shall have the like power and authority to enforce payment of the debt as are possessed by the Division Court Judge in like cases. The police magistrate may also, if he thinks fit, name in the order for the payment of wages such time not exceeding twenty-one days, as to him may seem just and reasonable for the payment of the same and costs, and in case of non-payment within such time the complainant shall be entitled to take forthwith the proceedings for enforcement provided by the Division Court Act with respect to judgment debtors.

In the case of wages due and no specific rate has expressly been agreed upon between the parties, the police magistrate has the power to fix the rate on the basis of the current rate of wages in the city in like cases, or according to what may appear to be a just and reasonable allowance.

Every agreement or bargain, verbal or written, expressed or implied, entered into, having for its object the waiving of the provisions of this Act is declared null and void and of no effect as against any workman, servant, laborer, mechanic or other person.

### TRADES DISPUTES.

R.S.O., 1897, cap., 158.—An Act respecting Councils of Conciliation and Arbitration for settling industrial disputes.

The preamble to the Act recites: There is reason to believe that the establishment of councils of conciliation and arbitration for the friendly settlement of disputes between employers and employees, would conduce to the cultivation and maintenance of better relations and more active sympathies between employers and employees, and would be of benefit in the public interest by providing simple methods for the prevention of strikes and lock-outs, from which industrial operations and the welfare of the country generally may suffer injury.

No. 29

The Act applies to any person or body of persons, incorporated or unincorporated, employing not less than ten workmen in the same business in which the trade dispute has arisen, and their employees.

A claim or dispute under this Act shall include any disagreement between any employer and his employees in respect of any of the matters following:

1. The price to be paid for work done or in course of being done, whether such disagreement shall have arisen with respect to wages or to the Lours or time of working.

2. Damage alleged to have been done to work, or delay in finishing the same; not finishing the same according to agreement; or dispute respecting materials supplied to employees or alleged to be bad, unfit or unsuitable.

3. The price to be paid for mining any material or substance mined or obtained by mining, hewing, quarrying or other process; or the allowances, of any, to be made for bands, refuse, faults, or other cause whereby the mining of the mineral substance is impeded.

4. The performance or non-performance of any stipulation or matter alleged to have been in the agreement, whether in writing or not.

stores of and the man went down to the river and the man went down to the
5. Insufficient or unwholesome food supplied to employees where there is an agreement to victual them, or to supply them with provisions or stores of any kind.

6. Ill-ventilated or dangerous workings or places in mines, or unwholesome or insanitary rooms or other places of accommodation, in which work is being performed, or want of necessary conveniences in connection with such rooms or places.

7. The dismissal or employment under agreement of any employee or number of employees.

S. The dismissal of any employee or employees for their connection with any trade or labor organization.

## DUTIES, ETC., OF THE REGISTRAR.

It shall be the duty of the Registrar under this Act to deal with all applications coming within the meaning of the Act: to keep a register in which shall be entered all particulars of cases referred to the Council of Conciliation, and the settlement thereof. The Registrar shall have the power to summon witnesses and issue notices in connection with the sittings of each Council of Conciliation.

## COUNCIL OF CONCILIATION.

Such council as above mentioned shall consist of four councillors, two two to be rominated by each of the parties in dispute; each nomination in writing to be lodged with the Registrar.

The council shall deal with cases in which the parties of the dispute jointly agree to refer the claim or dispute to the Council of Conciliation for settlement. Upon receipt of application the Registrar shall refer same to the Council, and under the Act shall carry out the directions of the Council in the endeavor to affect a settlement of the dispute or claim. Lither party of the dispute or claim may, for the purpose of this Act, be represented by one or more persons, not exceeding three, authorized by such party as manager or managers in that behalf, and such party shall be bound by the acts of this representative or representatives; where the party number fewer than twenty, the manager must be authorized in writing, signed by the members of the party, to act for and on their behalf. Where the party number twenty or more, the manager may be elected in such manner as the members of the party think proper.

The statements of those thus agreeing to refer their dispute to the Council of Conciliation should be forwarded to the Registrar before the meeting of the Council. When the parties of the dispute or claim have nominated their conciliators, the Registrar shall by notice in writing convene a meeting of the conciliators, mentioning time and place of meeting, the same being selected with due regard to the convenience of all concerned. The Council of Conciliation shall transmit to the Registrar a report setting forth the results of the reference. In case such report is to the effect that the Council has failed to bring about any settlement or adjustment of the dispute or claim, the Registrar shall transmit a copy of the report to each party of the dispute or claim: whereupon either party may require the Registrar to refer the dispute to the Council of Arbitration for settlement.

#### COUNCIL OF ARBITRATION.

There shall be two Councils of Arbitration, one for the settlement of disputes and claims between railway companies (including street railway companies), and their employees, both in respect of railway construction or traffic on railways, and a Council of Arbitration for the settlement by award in respect of disputes and claims other than between railway companies and wage-earners employed in respect of railway construction or traffic.

Each council shall consist of three members, one to be appointed by the Lieutenant-Governor on the recommendation of the employees, and one to be appointed by him on the recommendation of the employers. The third member to be appointed shall be President of the Council, and may be appointed by the Lieutenant-Governor on the recommendation of the two members already appointed, within twenty-one days of their appointment. Failing in this, the Lieutenant-Governor shall appoint as President of the Council an impartial person, not likely to be biased in favor of or against employers or employees. The same person may be President of both Councils.

As soon as practicable after the appointments have been made, the names of the members of the Council shall be notified by the Registrar in the Ontario Gazette. The Lieutenant-Governor may cancel the appointment of any member on the recommendation of the authority by which his appointment was recommended, the term of office of a member of a Council shall be three years; and at the end of every term of two years, a first appointment of members shall be made in manner aforesaid. Every member shall be eligible for reappointment.

QUALIFICATION OF VOTERS IN THE INTEREST OF EMPLOYEES.

For the person to be recommended by the employers every employer in the Province, having at least ten persons in his employment, shall be entitled to one vote; every organization in the Province, whether incorporated or unincorporated, representing the interests of employers, each membar of which has at least ten persons in his employment, shall be entitled to one vote.

Every Board of Trade in the Province, legally constituted, shall be entitled to one vote for a representative of the employers in each council.

## QUALIFICATION OF VOTERS IN THE INTEREST OF EMPLOYEES.

For a person to be recommended by employees in matters not belonging to railways, every trades and labor council, every district assembly of the Knights of Labor, every federated Council of building trades, every lawfully incorporated trades union, every organization of wage-earners of an industrial calling primarily constituted for, and actually and bona fide operated for the regulation of the wages and hours of labor as between employers and employed, shall be entitled to one vote; but this shall not be deemed to include co-operative associations or societies formed under the Revised Statutes respecting Co-operative Associations.

For choosing the person to be recommended by employees of railway companies as a member of the Council of Arbitration in matters belonging to railways, every organization in the Province, whether incorporated or unincorporated, exclusively representing the interest of wage-earners employed in respect of railway construction or traffic on railways shall be entitled to one vote; but this shall not be deemed to include co-operative societies or associations.

The Registrar shall give notice in the Ontario Gazette, calling on all organizations and persons entitled to vote for a member to be recommended to either Council, or claiming to be so entitled, to communicate with him on or before the 1st day of August, 1898, and every second year thereafter. Such notice is to be inserted for at least four weeks before the said day in each of the said years.

The Registrar shall forthwith, after the 1st day of August aforesaid, prepare a list of the persons and organizations appearing to be entitled to vote for a person to be recommended for appointment to each of the said Councils respectively, and may refer any doubtful claim to the Minister of Agriculture for his advice or direction.

Each list so to be prepared shall give the last known postoffice address of every person and organization entitled to vote as employers and employees respectively for the said Councils respectively, and shall be published in The Ontario Gazette, and shall be open to inspection at any time by any person without fees, in the office of the Registrar, during office hours.

Between the 1st and 30th days of September, 1898, and between the same days of every second year thereafter, the Rgistrar shall transmit by post to the address of each person and organization entitled to vote, a voting paper: and such voting paper may be in the following form:

Voting paper of (naming the person or organization.

A. B. (person recommended), is hereby recommended to be appointed a member of the Council of Arbitration for disputes between railway companies and their employees (or in matters not relating to railway disputes), under the Ontario Trades Disputes, Conciliation and Arbitration Act, on behalf of the employers or employees, as the case may be).

(Signed)

The voting paper of any person entitled to vote under this Act as an employer shall be signed by himself or by some duly authorized person; and the voting paper of any organization entitled to vote shall be signed by the president or vice-president of the organization, or, in the absence of such president or vice-president, by any office-bearer of the organization other than the Secretary thereof, and shall be countersigned by the Secretary or the acting secretary, or, in the absence of such secretary or acting secretary, by any two members not being office-bearers. The voting papers of a Board of Trade shall be under the corporate seal of the Board.

The voting paper shall be forwarded to the Registrar in a stamped envelope, addressed to the Registrar of Councils of Conciliation and Arbitration, Toronto, and endorsed, "Voting paper under the Ontario Trades Dispute, Conciliation and Arbitration Act."

Every voting paper shall be forwarded by mail or otherwise to the Registrar, before the 15th day of October, in the year in which the voting is to be held, and no voting paper received after said date shall have any effect or validity.

After the 15th day of October the Registrar shall count the recommendations of employers and employees for each council, and shall forward same to the Minister of Agriculture, with report thereon; and the Minister of Agriculture shall publish in the Ontario Gazette the names of the persons appointed by the Lieutenant-Governor upon such recommendations to be members of each Council; and also the names of, and number of votes of the five persons who shall receive the greater number of votes for each council on behalf of employers and employees respectively.

In case either employers or employees, or both, fail to recommend any person to represent them on either or both the councils, as provided for in this section, the Lieutenant-Governor in Council may appoint a person or persons to fill the vacancy or vacancies.

The Mayor of any city or town, upon being notified that a strike or lockout is threatened, or has actually occurred within the municipality, shall at once notify the Registrar thereof by writing, stating the name of the employer, the nature of the dispute, and the number of the employees involved as far as his information will enable him to do so.

Upon being notified that a strike or lock-out is threatened or has taken place, it shall be the duty of the Councils of Arbitration, under this Act, to communicate with the parties concerned as soon as practicable, and endeavor by mediation to effect an amicable settlement, and if deemed best, to enquire into the causes of controversy, it shall proceed as provided in this Act in the case of a reference.

The Council of Arbitration shall sit and conduct its proceedings as an open court, and in making its decision shall be governed by the principles of equity and good conscience. The President shall for the purpose of preserving order during any sitting of the Council have all the powers of a judge of a High Court of Justice, save that he shall not have the power of committing for contempt.

Any two members shall constitute a quorum for the transaction of business, and may hold meetings at any time and at any place in the Province of Ontario.

The Council may order that an examination or investigation may be held before any one member of the Council, but such member shall report to the Council, and his decision shall not be considered binding until approved of by the Council or a majority thereof.

The report of award of the Council shall be made within one month after its hearing of a reference, and shall be by, and under the hands of, a majority of the members of the Council.

The report of award. or a copy thereof, shall be deposited in the office of the Registrar, and shall be open to inspection during office hours without charge.

## MISCELLANEOUS PROVISIONS.

For the purpose of this Act the Councils of Conciliation and Arbitration shall have power (a) to visit the locality where the dispute has arisen and hear all persons interested who may come before them; (b) to summon witnesses and to administer oath, or to take the affirmations of any person attending as a witness before the Council. On refusal of any person to attend as a witness, application may be made in a summary way to a Justice of the Peace for an order compelling such attendance.

No fees shall be paid to the Registrar by any party in respect of any proceedings under this Act.

Every member of such Council shall be remunerated as follows:

Preliminary meetings		
Whole-day sittings	4	00
Half-day sittings	2	00

AN ACT TO AMEND THE ACT RESPECTING COUNCILS OF CONCILIATION AND OF ARBITRATION FOR SETTLING INDUSTRIAL DISPUTES, S.O., CAP. 22, 1902.

His Majesty, by and with the advice and consent of the Legislature Assembly of the Province of Ontario, enacts as follows:

1. Section 4 of the Trades Disputes Act is amended by adding the following sub-sections:

(4) If any difference shall arise between any corporation or person employees or by the employer, or by the Mayor or Reeve of the municipality in resulting in a strike on the part of such employees, it shall be the duty of the Registrar, when requested in writing to do so by five or more of said employees or by the employer, or by the Mayor or Reeve of the municipality in which the industry is situated, to visit the place of such disturbance and diligently seek to mediate between such employer and employees.

(5) It shall be the duty of the Registrar to promote conditions favorable to a settlement by endeavoring to allay distrust, to remove causes of friction, to promote good feeling, to restore confidence and to encourage the parties to come together and themselves effect a settlement, and to promote agreements between employers and employees with a view to the submission of differences to conciliation or arbitration before resorting to strikes or lockouts.

WORKMEN'S COMPENSATION FOR INJURIES, R.S.O., 1897, CAP. 160.

This act applies to all wage-earners while engaged in their daily occupation for injuries received by reason of any defect in the condition or arrangement of the ways, works, machinery, plant, buildings or premises connected with, intended for or used in the business of the employer, or by reason of the negligence of any person in the service of the employer, who has had any superintendence entrusted to him, or who has the charge or control of any points, signal, locomotive, engine, machine or train upon a railway, tramway or street railway.

If the injuries received result in the death of the workman, his legal representative, or those entitled in case of death, shall have the same right of compensation and remedies against the employer, as if the workman had not been a workman of, nor in the service of the employer, nor engaged in his work.

## WORK DONE UNDER CONTRACT.

Where the execution of any work is being carried into effect under any contract, and personal injury is sustained by any workman, through any defect or negligence, as mentioned above, the person for whom the work is done shall be liable to pay compensation for the injury as if the workman had been employed by him, and for that purpose shall be deemed to be the employer of the workman within the meaning of this Act.

Personal injury caused to workman employed on or about any railway.

Such injury shall be deemed to have been caused by reason of a defect within the meaning of the clause numbered 1 of section 3 of this Act.

The amount recoverable under this Act shall not exceed a sum equivalent to the earnings during three years previous to the injury received, in like employment within this Province, or the sum of \$1,500, whichever is the larger sum, and such compensation shall not be subject to any deduction or abatement, save as it specially provided for in section 12 of this Act.

When compensation is awarded in the case of the death of a workman, through an injury sustained by him in the course of his employment, the amount recovered may be divided between the wife or husband, parent or child, of the deceased, as the case may be, in such shares as the Court or Judge may direct, or if tried by jury, as the jury may determine.

No action shall be maintainable against any employer, unless notice that the injury has been sustained is given within twelve weeks of the accident, and the action is commenced within six months of the occurrence of the accident, or in case of death, within twelve months from the time of death; in the latter case the want of such notice shall be no bar to the maintenance of such action, if the Judge be of the opinion that there was reasonable cause for want of such notice.

Notice under this Act shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury, the date on which it was sustained, and the amount of compensation claimed, and shall be served on the employer, either at his residence or place of business. The notice may also be served by post in a registered letter, and may be deemed to have been served when the letter containing the notice would be delivered in the ordinary course of post.

If the defendant in any action intends to rely for his defence on insufficient notice, or on the ground that he was not the employer of the workman injured, he shall, not less than seven days before the hearing of the action, give notice to the plaintiff of his intention to rely on such defence.

In the trial of an action for the recovery for compensation under this Act before a Judge without a jury, one or more assessors may be appointed by the Court or Judge, for the purpose of ascertaining the amount of compensation. In any such action a party who desires assessors to be appointed shall, ten clear days before the trial, file application stating the number of assessors he proposes to be appointed, and the names, addresses and occupations of the persons who have expressed, in writing, their willingness to act as assessors. If the applicant has obtained the consent of the other party to the persons named being appointed, he shall file such consent with his application.

This Act, by an amendment in 1899, gives the choice of settlement of claims for injuries, under the Act, by either action or arbitration, subject to appeal by either party to the High Court of Justice.

#### Apprentices and Minors, R.S.O., 1897, Cap. 161.

Any parent, guardian or other person having the care of a minor, or any charitable society authorized to exercise the powers conferred by this Act, may, if the minor consent, if the minor is a male not under the age of fourteen years, or a female not under the age of twelve years, and without consent if he or she is under such age, constitute to be the guardian of the child, any trustworthy person who is willing to assume the duty of a parent toward the child, but the parent shall remain liable for the performance of any duty imposed by law, in case the guardian fails in the performance thereof.

The guardian shall thereupon possess the same authority over the child as he or she would have were the ward his or her own child, and shall be bound to perform the duties of a parent toward such child.

## RIGHTS AND LIABILITIES OF MINORS.

No minor who is dependent upon charity for support shall be removed from any charitable institution or from the control of any private person who is charitably taking care of the minor, by the father or mother or guardian, against the will of the head of such charitable institution or of such private person, without an order from the Judge of the High Court, or the Mayor or Police Magistrate of the city or town where the minor is; and the Judge or other person so empowered may refuse to grant the order unless he is satisfied that the removal will tend to the advantage of the minor. When a minor, who was no parent or legal guardian enters into an engagement to perform any service, he shall be liable upon the same, and shall have the benefit thereof, as if he were of legal age.

#### APPRENTICING MINORS.

A parent, guardian or other person having the care of a minor, or any charitable society authorized to exercise the powers conferred by this Act, may, with the consent of the minor, if a male not under the age of fourteen years, bind him as an apprentice by indenture to any respectable master, mechanic, farmer, or other person carrying on a trade or calling for a term not to extend beyond the minority of the minor; or in the case of a female not under the age of twelve years, may, with her consent, bind the minor to any respectable person carrying on a trade or calling, or to domestic service with any trustworthy person, for a term not to extend beyond the age of eighteen years.

14 BL.

When the father of an infant child abandons and leaves the child with the mother, the mother, with the approbation of two Justices of the Peace, may bind the child as an apprentice to any person as mentioned in the last section, until the child attains the age of twenty-one years in the case of a male, and eighteen in the case of a female, and an indenture to that effect under the hand and seal of the mother and countersigned by such justices, shall be valid, but no child, having attained the age of fourteen years, shall be so apprenticed, unless he or she consents.

In a city or town, the Mayor, Judge of the County Court or Police Magistrate, and in a county, the Judge of the County Court or of the county, may put and bind for a like period to any person mentioned in the several sections of this Act, with the consent of any such person and of the minor (or if such minor is a male under the age of fourteen years, or a female under the age of twelve years, then without the consent of such minor), any minor who is an orphan or who has been deserted by his or her parents or guardian, or any minor who is dependent upon charity for support; and such apprentice and the master of such apprentice shall be held in the same manner as if the apprentice had been bound by his or her parents.

All wages reserved by any indenture or otherwise to be paid for the services of any minor, shall, if not payable to the parent, be either payable to the minor or to some person for the benefit of the minor.

If the master of an apprentice dies, the apprentice, if a male, shall be transferred to the person who continues the establishment of the deceased and such person shall hold the apprentice, on the same terms as the deceased, if living, would have done."

A master may transfer his apprentice, with his consent to any person who is competent to take or receive an apprentice, and who carries on the same kind of a business.

Every master shall provide his apprentice with suitable board. lodging and clothing or such equivalent therefor as is mentioned in the indenture, and shall also properly instruct him in his trade or calling.

Every apprentice shall faithfully serve his master, and obey all his lawful and reasonable commands, and shall not absent himself from his service without his consent.

An indentuied apprentice leaving his employment is liable to the penalties of the Act, if apprehended in the Province of Ontario, up to three years of his described.

#### AN ACT RESPECTING INNKEEPERS, R.S.O., 1897, CAP. 187.

Every innkeeper, boarding-house keeper and lodging-house keeper shall have a lien on the baggage or property of his guest for the value and property of his guest for the value or price of any food or accommodation furnished and in addition to all other remedies provided by law, shall have the right, in case the same remains unpaid for three months, to sell by public auction the property of such guest, on giving one week's notice by advertisement in in a paper of the intended sale, stating the name of the guest, the amount of his indebtedness, and giving a description of the property to be sold, and shall pay over the surplus of such sale (if any) to the person entitled thereto on application being made by him therefor.

Where an innkeeper, etc., or livery stable keeper has by law a lien on a horse or other animal for the price of any food or accommodation supplied

to such animal or care bestowed therein, he shall have the right, in addition to the other remedies provided by law, if such price remains unpaid for the space of two weeks, to sell by public auction such horse or other animal, on giving two weeks' advertisement in a newspaper, stating (if known) the name of the person who brought such horse or other animal to the inn, etc., the amount of the indebtedness, and the name of the auctioneer, and giving the description of the horse or other animal, and after the sale the innkeeper, etc., shall pay over the surplus (if any) to the person entitled thereto on application being made by him therefor.

No innkeeper shall be liable to make good to any guest any loss or injury to goods or property to a greater amount than the sum of \$40.00, except in the following cases:

Where such goods or property have been stolen, lost or injured through the wilful act, default or neglect of such innkeeper, or any servant in his employ; where such goods or property have been deposited expressly for safe custody with such innkeeper.

### PAWNBROKERS, R.S.O., 1897, CAP. 188.

The Act defines any person who takes and receives, by way of a pawn, pledge or exchange any goods for the repayment of money lent thereon, shall be deemed a pawnbroker within the meaning of the Act.

Any person carrying on the trade of pawnbroker shall have license issued by the treasurer of the municipality in which he is carrying on the business of pawnbroker without a license shall forfeit \$50.00 for every pledge he takes, recoverable with costs before police magistrate.

Each pawnbroker is required to exhibit sign with the word pawnbroker thereon, under a penalty of \$40.00.

Each pawnbroker is required to have painted or printed in a conspicuous place in his shop the rates of profits he is allowed to charge under the Statutes of Canada, which rates are as follows:

R.S.O., cap. 128, provides that every pawnbroker may take the following rates above the principal sum advanced before he is obliged to re-deliver the goods pawned, that is to say, upon every pledge upon which there has been left out exceeding 50c. the sum of one cent for any time not exceeding one month, and the same for every month afterwards, including the current month, in which the pledge is redeemed, although such month has not yet expired; and so on progressively, and in the same proportion for every sum of nity cents up to twenty collars.

When the sum lent exceeds twenty dollars, the pawnbroker may take up all beyond the amount after at the rate of five cents for every four dollars by the month, and so on in proportion for any fractional sum.

Such sums respectively shall be in lieu of and taken as full satisfaction for all interest due and charges for warehouse room.

On all pledges where the sum lent exceeds \$1.00 the pawnbroker is required to make entry of such in a book kept for the purpose, giving the description of the goods received, in pledge, the sum lent thereon, the date and the name and address of the person making the pledge, and whether he is a housekeeper or lodger. When the amount lent is above \$2.00 a separate book must be kept for purpose of entry, the pledges received to be numbered in consecutive order in the book. The pawnbroker shall issue to the person making the pledge a note or memorandum written or printed, containing a description of the goods pawned, and money advanced thereon, the date and name and address of the person making the pledge, and whether a housekeeper or lodger. On the back shall be printed or written the name and address of the pawnbroker.

For such ticket or memorandum he will be allowed to charge the following rates:

If the sum lent is under \$1.00, the ticket shall be free.

If the sum lent is over \$1.00 and under \$2.00, the charge shall be one cent.

If the sum lent is over \$2.00 and under \$5.00, two cents may be charged.

If the sum lent is over \$4.00 and under \$20.00, three cents may be charged.

When the sum lent is over \$20.00 and upwards seven cents may be charged.

No goods pledged can be sold by the pawnbroker until one year has expired after the pledge of such goods. If the amount lent exceeds \$2.00 the sale must be by public auction, and must be exposed to the public view. And a description of the goods, the date of the pledge, etc., published on two separate days in a public newspaper at least two days before the sale.

Should the goods be sold for more than was due thereon, and in case of demand within three years after the sale, the overplus, after deducting the costs, shall be paid to the person on whose account the goods were pawned.

No pawnbroker shall:

1. Purchase, receive or take any goods in pledge from any person who appears to be under the age of fifteen years, to be intoxicated with liquor, nor

2. Purchase or take in pawn, pledge or exchange the ticket or memorandun. of any other pawnbroker.

3. Employ any servant or any other person under sixteen years of age to take any pledge.

4. Receive any goods by way of pawn, pledge or exchange on any fast or Thanksgiving day appointed by authority, or on Sunday, or any other day before 8 o'clock in the morning, nor after 8 o'clock in the evening, except on Saturday and the evening preceding Good Friday and Christmas Day. On such days he may keep open his place of business until 10 o'clock p.m.

# LIABILITY OF DIRECTORS OF COMPANIES FOR WAGES, R.S.O., 1897, CAP. 191.

The directors of the company shall be jointly and severally liable to the laborers, servants and apprentices thereof for all debts not exceeding one year's wages due for services performed for the company; but no director shall be liable to an action therefor, unless the company has been sued therefor within one year after the debt became due, nor yet before an execution against the company has been returned unsatisfied in whole or in part; and the amount due on such execution shall be the amount recoverable with costs against the directors.

## LIABILITY OF DIRECTORS OF MINING COMPANIES FOR WAGES. R.S.O., 1897, CAP. 197.

All mining companies in force in Ontario, shall be subject to the provisions of this Act.

The directors of a company shall be jointly and severally liable to the laborers, etc., for all debts not exceeding one year's wages due for services performed; but no director shall be liable to an action therefor unless the company has been sued therefor within one year after the debt became due, nor yet before an execution against the company has been returned unsatisfied in whole or in part: and the amount due on such execution shall be the amount recoverable with costs against the directors.

### CO-OPERATIVE ASSOCIATIONS. R.S.O., 1897, CAP. 202.

Any seven or more persons who desire to associate themselves together for the purpose of carrying on any trade, labor or business, whether wholesale or retail, except the working of mines, minerals, or quarries, and except also the business of banking and insurance. and the business of a loan corporation within the meaning of the Loan Corporations Act, may make, sign and acknowledge before a Notary Public or Justice of the Peace, in duplicate, and file in the office of the Registrar of the Registry Division in which the business of the association is intended to be carried on, a certificate in writing on the form set forth in the schedule of this Act, or of the same effect together with a copy of the rules agreed upon for the regulation, government and management of the association, signed by such persons respectively.

Upon the filing of the certificate and rules as aforesaid, the members of the association shall become a body corporate by the name therein described, with power to hold such lands as are required for the convenient management of the business.

No association shall be registered under a name identical with that by which any other existing association has been registered, or so nearly resembling such name as to be likely to deceive the members or the public; and the word limited shall be the last word in the name of any association registered under this Act.

A member of an association incorporated under this Act may have shares therein to an amount mentioned in any by-law of the association, provided the same does not exceed \$1,000,000.

The liability of the shareholders shall be limited, that is to say : No shareholder shall be in any manner liable for or charged with the payment of any debt due by the association, beyond the amount of his share, and having fully paid up the amount of his share shall not be subject to any further liability.

Every person appointed to an office touching the receipt, management, or expenditure of money, or with the receipt or goods, ware or mechandise for the purpose of the association, shall before entering upon the duties of his office, give such security as is deemed sufficient by the trustees, which security shall be renewed from time to time as the amount of business, or other circumstances, may in the discretion of the trustees be rendered necessary.

The business of the association shall be a cash business exclusively; no credit shall be either given or taken, and no officer, member of servant of the

association shall have power to contract any debt in its name, except in respect of rent of the premises required for the business, the salary of clerks and servants, and such like contracts, necessary in the management of the affairs of the association; everything shall be bought and sold for cash only.

## INSURANCE BY TRADE UNIONS, R. S. O. 1897, CAP. 203.

Where a friendly society registered under this Act has its head office elsewhere than in the Province of Ontario the Grand or other Provincial body, or the Lodges situated in the Province may file with the Insurance Registrar, an application for Provincial incorporation, setting forth the facts of the case, and the proposed corporate name and head office, and the purpose and rules of the society; also the names of those persons who are to be its first trustees, and stating the mode in which their successors are to be elected; also furnishing such other information as the Registrar requires.

Upon due application the Insurance Registrar shall have the authority ing of the application, and such public hearing of the application shall be given in The Ontario Gazette and otherwise as the Registrar directs.

If, upon the hearing, it appears to the Registrar that such incorporation ought to be granted, he shall have authority to certify in duplicate, or in as many parts as may be required, under his hand and the seal of his office, that he find entitled to incorporation under the name and for the purposes specified in the certificate, the persons mentioned therein.

One of the original parts of the certificate shall be filed in the office of the Provincial Registrar, together with such other documents as the Insurance Registrar by his certificates requires to be filed; and from the day of such filing the persons mentioned in the Insurance Registrar's certificate and their associates and successors shall henceforth be a body corporate and politic, and shall have the powers, rights and immunities vested by law in such bodies.

Upon due application the Insurance Registrar shall have the authority to admit to registry as a friendly society the body so incorporated.

Upon like proceedings taken as enacted in the first section under this Act, incorporation may be granted in either of the two following cases :

Where any trade or labor union, or trade or labor organization purposes to undertake contracts with its own members exclusively, for any of the insurance benefits enumerated in and permitted by clause 3 of section 62, or contracts to furnish tools or to pay unemployed or superannuation benefits to the said members.

Where any organization of persons resident in Ontario, consisting of not less than twenty-five members and managed and operated as a friendly society under rules conforming to this Act purposes to contract with its own members exclusively for sick benefits, not exceeding five dollars a week and a funeral benefit of not more than one hundred dollars, or either of such benefits.

The body so incorporated may upon due application, be admitted to register as a friendly society; but unless and until so registered, the corporation shall not undertake, nor agree to offer to undertake, any contract insuring the said or other insurance benefits.

Where any society, association, union, organization or lodge already incorporated under a prior Act of this Province becomes incorporated under this Act, such prior incorporation shall be deemed to have been merged in and superseded by the said incorporation.

In addition to friendly societies standing duly registered as such, at the passing of this Act, the following shall be admissible to registry on the Friendy Society Register:

Societies incorporated from time to time by virtue of sections 33, 34, 36, 37 and 38 of this Act :

Any incorporation not provided for elsewhere herein which has, by virtue of an Act of the Parliament of Canada, an insurance and provident society or association, or an insurance or guarantee fund in connection with the corporation, may upon due application for registry under this Act, be registered on the Friendly Society Register.

Provided that where any bona fide trade union or labor organization provides by its constitution, by-laws or rules for the assistance, relief or support of its members, the Registrar may, by writing, under his hand and the seal of his office, declare the organization exempt from the operation of this Act; and such certificate shall remain valid until by like writing revoked; and the organization so exempted shall not be subjected to any penalty imposed by this Act:

Any corporation in Ontario which at the passing of this Act has under authority of an Act of Canada created a fund for paying a gratuity on the happening of death, sickness, infirmity, casualty, accident, disability or any change of physical or mental condition, shall, upon due application for registry hereunder, be entitled to be registered on the Friendly Society Register:

Any association of the civil servants or employees of the Dominion of Canada, incorporated by virtue of an Act of the Parliament of Canada, may, upon due application, be admitted to registry.

### RAILWAY COMPANIES-BY-LAWS AFFECTING EMPLOYEES, R.S.O., 1897, Cap. 207.

Every railway company shall make such by-laws, rules and regulations to be observed by the conductors, engine-drivers and other officers and servants of the company, and by all other persons and companies using the railway of such company and such regulations with regard to the construction of the carriages and other vehicles. to be used in the trains of the railway of the company, as are requisite for the perfect carrying into effect of the provisions of this Act and the orders and regulations of the Lieutenant-Governor in council.

Any railway company, may, by a by-law, impose upon any officer, servant or person who, before the contravention of such by-law has had notice thereof, and is employed by the company, a forfeiture to the company of not more than thirty days' pay of such officer or servant, for any contravention of such by-law, and may retain such forfeiture out of the salary or wages of the offender.

The notice of the by-law, or of any order or notice of the Commissioner of Public Works, may be proved by proving the delivery of a copy thereof to the officer, servant or person, or that he signed the copy thereof, or that a copy thereof was posted in some place where his work or his duties, or some of them, were to be performed.

Such proof, with evidence of the contravention, shall be a defence to the company in any action for the recovery from it of the amount so retained. The Electric Railway Act, R.S.O., 1897, cap. 209, contains four sections (137-140) exactly similar in terms to the above.

STREET RAILWAYS-LIEN OF WAGES. R.S.O., 1897, CAP. 208.

Every mechanic, laborer or other person who performs labor for wages upon the construction or maintenance of the railway or the works connected therewith, shall have upon the said railway and other property of the company a lien for such wages not exceeding the wages for thirty days, and the said lien may be enforced in the manner provided for enforcing liens for wages by the Mechanics' and Wage-earners' Lien Act.

IMMIGRATION AID SOCIETIES. R. S. O. 1897, CAP. 212.

The Minister of Agriculture shall from time to time divide the Province of Ontario into immigration districts, either by counties, ridings, municipalities, as seems to him most expedient; and in each of such districts there shall be an immigration office and an immigration agent; and such division and any future alteration thereof, shall be notified in The Ontario Gazette as the immigration district of the place where the immigration office is kept.

In each of the above districts an Immigration Aid Society may be formed and constituted under this Act, for the purpose of assisting immigrants to reach Ontario from Europe and elsewhere; and of obtaining employment for them on their arrival in the Province; and of enabling persons in the Province in want of laborers, artizans or servants to obtain them by such immigration; for every such society shall consist of not less than twenty-five persons, whether resident or not in the immigration district, agreeing to form such society and to subscribe among them, as the capital of the society, not less than \$500.00, in fifty shares of \$10.00 each, onefourth of which, at least, shall be paid on_subscribing the declaration of membership into the hands of a person agreed upon as their secretary-treasurer, by the persons present at the meeting at which it is agreed to form the society.

The Act also provides for the regulation and control of such societies under the inspection of a district agent, to be appointed by the Minister of Agriculture. Such societies have power to make loans to immigrants, and provision is made for their inspection by the Minister of Agriculture.

AN ACT RESPECTING MUNICIPAL MATTERS. R. S. O., 1897. CAP. 223.

This Act provides that the hours for the nomination of candidates for the offices of aldermen in cities, may, by by-law be fixed at half-past seven o'clock in the evening, and for polling from nine in the morning until seven o'clock in the evening. This latter provision applies only to cities of 100,-000 inhabitants and over. A by-law to extend the time of holding the election until seven o'clock in the evening, must be passed before the fifteenth day of November of the year in which such by-law is to take effect. In all other cases the polls shall be opened at nine o'clock in the morning, and shall continue open until five in the afternoon and no longer.

POWERS OF POLICE COMMISSIONERS AS TO LIVERY STABLES, ETC.

The Board of Commissioners of Police shall, in cities, license and regulate second-hand shops and junk stores, and the owners of livery stables and of horses, cabs, carriages, carts, trucks, sleighs, omnibuses and other vehicles regularly used for hire within the said city and shall establish the rates of fare to be taken by the owners or drivers of such vehicles for the conveyance of goods or passenger from any point within the city and to any point not more than three miles beyond the limits of such city and may provide for enforcing such rates.

The Board of Commissioners of Police in any city may pass by-laws defining areas or districts in the city within the limits of which no livery stable, sale, or boarding stable in which horses are to be kept for hire or for express purposes shall be established or maintained.

The Board of, etc., in any city shall pass by-laws regulating the hours of labor of persons employed in livery or boarding stables, or as drivers of cabs, carriages or sleighs kept for hire within the city, and also the hours of labor of persons employed by owners of horses, carts, etc., kept for hire within the city, and for licensing drivers of cabs within the said city.

The Board, etc., shall also regulate and control children engaged as :

(a) Express or despatch messengers;

(b) Vendors of newspapers and small wares

(c) Bootblacks.

The Board in any city, and the council in any town, may regulate and prohibit the playing of bands and of musical instruments on any street, highway, park or public place in the city, but this shall not apply to any military band attached to any corps of the militia of Canada when on duty under command of its regular officer.

### PROTECTION OF WORKMEN AND OTHERS ON BUILDINGS.

By-laws may be passed by the councils of municipalities, townships, cities, towns and villages for inspecting and regulating the construction and erection of hoists, scaffolding and other constructions used in erecting, repairing, altering or improving buildings, chimneys or other structures; and for making all necessary regulations for the protection and safety of workmen and other persons thereon; and for appointing inspectors of scaffolding.

EGRESS FROM AND CONSTRUCTION OF BUILDINGS.

By-laws may be passed as above for regulating the number of doors on churches, theatres, halls or other buildings used for worship, public meetings or places of amusement, and the street gates leading thereto; and the construction and width of stairways, in churches etc., and in factories, warehouses, hotels and boarding houses; and also the size and number of doors and other means of egress from all hospitals, schools, colleges and other buildings, and the strength of beams, walls and joists and their supports, and for compelling the production of plans for inspection and for enforcing the observance of such regulations.

For preventing the obstruction of the halls, aisles, passage-ways, etc., in any such buildings or leading thereto during the occupation of same by any public assemblage.

## HOISTS AND ELEVATORS.

For licensing and inspecting elevators and hoists for passengers or freights, used by the public or by employees, and for imposing and enforcing penalties for the infringement of such by-laws, and for prohibiting and preventing the use of elevators and hoists contrary to the provisions of such by-laws. But the provisions in this clause contained shall be subject to the Ontario Factories Act and of any other Act making provisions applicable to elevators and hoists.

## BY THE COUNCILS OF CITIES, TOWNS AND VILLAGES.

For regulating the construction of cranes, hoists and elevators, and for determining the manner in which elevators in buildings shall be constructed and worked, and for providing for the inspection of all granes, etc., but none of the provisions of such by-laws shall be inconsistent with the Ontario Factories Act so far as the same provides for the regulation or construction of cranes, etc.

#### CAB STANDS AND BOOTHS.

By-laws may be passed by the councils of cities, etc., for authorizing and assigning stands for vehicles kept for hire on the public streets and places; and for the erection and maintenance of covered stands for booths on streets, etc., and for the protection or shelter of the drivers of such vehicles. Provided that no such booth shall be placed upon any sidewolk without the previous consent of the owner or lessee of the property fronting or adjoining such stand or booth.

By-laws may be passed by the councils of cities, etc., for building, equipping and maintaining and operating street railways in, along and over such streets of the city or town and subject to and upon such terms as the Lieutenant-Governor in Council may approve; and for leasing the same from time to time on such terms as may be determined on; and for levying an annual special rate to defray the yearly interest on the expenditure therefor, and to form a yearly sinking fund for the payment of the principal within a time not exceeding thirty years.

A municipal corporation which builds, constructs, owns or manages a Street Railway Act, except where the same conflict with or are repugnant to subject to the same liabilities as street railways and companies under the Street Railway Act, except where the same conflict with or are repugnant to the rights, powers, liabilities or duties of a municipal corporation as provided by law.

### ELECTRIC STREET RAILWAYS.

By-laws may be passed by the councils of cities for compelling every electrical railway company, operating its railway within the limits of such city, to provide proper and sufficient enclosed vestibules upon its street cars to protect the motormen and persons in charge of such cars, from exposure to cold, snow, rain or sleet, during the months of November, December, January, February and March in every year while engaged in operating the cars.

#### SCHOOLS FOR ARTISANS.

By-laws may be passed by the councils of municipalities, counties, cities, and towns, for establishing schools for the training and education of artisans, mechanics and workmen in such subjects as may promote a knowledge of mechanical and manufacturing arts, and for acquiring such real property as may be requisite for such schools: and the erection and maintenance of suitable buildings thereon; and for improving and repairing such school buildings, and for disposing of such property when no longer required. Councils establishing such schools may appoint boards of trustees to conduct the schools, giving them such authority as the councils may deem expedient.

For making grants in aid of such schools, or to art schools, approved by the Department of Education, as they may deem expedient.

#### AN AMENDMENT TO THE MUNICIPAL ACT OF 1900.

Provides that in cities having a population of more than 15,000 the council may, by by-law, provide that the aldermen shall be elected by a general vote of the electors, and either by general vote, or in two electoral divisions with a population exceeding 40,000 one-half the number to be elected by each division, but such by-law shall not come into force until it shall have been first submitted to a vote of the electors, and the persons entitled to vote at municipal elections. Upon a petition being presented by 400 of the electors, it shall be submitted at the next municipal election following, and such by-law being carried by a majority of the electors voting thereon, shall come into effect at the next annual municipal election.

. Such a by-law may be repealed by a by-law to be submitted to the electors at any annual municipal election held not later than five years after its first coming into effect. The repealing by-law to be submitted to a vote of the municipal electors after being petitioned for by at least 400 of such electors. Where such vote has not been in favor of the election of mayor and aldermen by a general vote of the electors, and not by ward, a by-law bringing the Act into force may be passed by the council of the municipality before the first day of July next, without submitting the same to a vote of the municipal elecors.

### PUBLIC MEETINGS, R. S. O., 1897, CAP. 230.

The notice to be issued by the sheriff of any county, or by the mayor of any city or town, or by two or more justices of the peace, for calling any public meeting shall be issued at least three days before the day on which such meeting is appointed to be held, and shall set forth the names of the requisitionists, or of a competent number of them. Also that the meeting is called within conformity of the provisions of this Act. and that such meeting, and all persons attending the same, will be within the protection of this Act, and that all persons are required to take notice and govern themselves accordingly.

Every person required by law; or who has in the usual way been appointed at such meeting to preside over the same, shall cause order to be kept at such meetings, and shall commence the proceedings of the meeting by causing the summons of notice calling the meeting. or the declaration whereby the same is declared to be a public meeting, under the protection of this Act. to be publicly read. The person who presides over such public meeting shall cause any person who attmepts to interrupt or disturb such meeting to be removed to such a distance from the same as may effectually prevent such interruption or disturbance, and may adjudge any person who makes such an attempt guilty of such attempted disturbance, upon which conviction any justice of the peace may, by warrant under his own hand, forthwith commit such person to the common goal of the county or district, for any period not exceeding forty-eight hours from the time of commitment signed, and until the lawful costs of the constable and gaoler for the arrest, transmission and detention of such person are paid or satisfied.

Every action to be brought against any person for anthing by him done under authority of this Act, must be brought within twelve months next after the cause of such action accrued.

#### THE ONTARIO FACTORIES ACT, R. S. O., 1897, CAP. 256.

An Act for the protection of persons employed in factories.

Provided that where not more than five persons are employed within any place coming within the foregoing definition of a factory, and that where children, young girls or women are employed at home, that is to say, in a private place, house or room used as a dwelling, wherein neither steam, water or other mechanical power is used in aid of the manufacturing process carried on there, and wherein the only persons employed are members of the same family dwelling there, the provisions of this Act shall not apply.

A part of a factory may for the purposes of this Act be taken to a separate factory; and a place used as a dwelling shall not be deemed to form any part of the factory for the purposes of this Act.

Where a place situate within the precincts of a factory is used solely for some other purpose than the manufacturing process carried on in the factory, such place shall not be deemed to form any part of the factory for the purposes of this Act, but shall de deemed to be a separate factory and regulated accordingly.

No place shall be excluded from the definition of a factory by reason only that such place is in the open air.

Where any owner, occupier or tenant of any premises, building, workshop, structure, room or place, who has the right of access thereto and control thereof, lets or hires out or contracts for work or labor to be done therein by any other person, and such other person employs therein any workman, child, young girl or woman, in or for the carrying out or performing of any such work or labor, every person thus employed shall, for the purposes of this Act, be considered and taken as being in the service of the said owner, tenant or occupier, and in computing the number of persons employed in any place in order to ascertain if such places comes within the definition of a factory according to the intent and meaning of this Act, every such person shall be taken into account.

"Child" shall mean a person under the age of fourteen years.

"Young girl" shall mean a girl of the age of fourteen years and under the age of eighteen years.

"Woman" shall mean a woman of eighteen years and upwards.

No child shall be employed in any factory, except in the business of canning or dessicating fruits and vegetables and the work incidental thereto, as provided above.

The Lieutenant-Governor-in-Council may, from time to time, by order in Council, notice of which shall be published in The Ontario Gazette, prohibit the employment of girls under the age of eighteen years, and of boys under the age of sixteen years in factories the work in which is deemed by the Lieutenant-Governor-in-Council to be dangerous or unwholesome. It shall not be lawful to employ in a factory any child, young girl or woman so that the health of such child, young girl or woman is likely to be permanently injured, and whoever so employs any child, etc., shall upon summary conviction thereof incur and be liable to imprisonment in the common gaol of the county wherein the offence has been committed for a period not exceeding six months, or to a fine of not more than \$100, with costs of prosecution, and in default of immediate payment of such fine and costs, then to imprisonment as aforesaid.

It shall not be lawful for any child, young girl or woman to be employed for more than ten hours in one day, nor more than sixty hours in one week, unless a different apportionment of the hours of labor per day has been made for the sole purpose of giving a shorter day's work on Saturday. In every factory the employer shall allow every child, etc., therein employed not less than one hour at noon of each day for meals, but such hour shall not be counted as part of the time herein limited as respects the employment of children, etc.

If the inspector so directs in writing the employer shall not allow any child, etc., to take meals in any room wherein any manufacturing process is then being carried on. And if the inspector so directs in writing the employer shall at his own expense provide a suitable room in the factory, or in connection therewith, for the purpose of a dining and eating room for the persons employed in the factory.

Notwithstanding anything contained in this Act, women may during the months of July, August, September and October in any year, be employed to a later hour than nine o'clock in the afternoon of any day in any factory wherein the only work or operations carried on relate to and are exclusively such as may be necessary for the canning or dessicating of fruits or vegetables, and the preparation thereof; but no woman shall be employed during the said months to a later hour than nine o'clock on the afternoon of any day for more than twenty days in the whole, and in reckoning such period of twenty days every day on which any woman has been employed to

a later hour shall be taken into account.

Where any woman is employed on any day to a later hour than seven o'clock in the afternoon, she shall, on every such day, and in addition to the hour provided at noon, be allowed not less than forty-five minutes for an evening meal between the hours of five and eight o'clock.

Subject to the regulations which may be made in that behalf by the Lieutenant-Governor in Council, it shall be lawful for the inspector, where any accident, which prevents the working of any factory happens to the motive power of any machine, or where the exigencies of certain trades requires that children, young girls or women working in a factory shall be employed for a longer period than is herein provided, on due proof of such accident or exigency, to give permission for such exemption, as, in his judgment, will, fairly to all parties concerned. make up for any loss of labor from such accident, or meet the requirements of any exigency of trade. In such cases no woman, etc., shall be employed before the hours of six o'clock in the morning, nor after nine in the evening, and the hours of labor shall not be more than twelve in any one day, nor more than seventy-two and a half in any week. And such exemptions shall not comprise more than thirty-six days, on the whole in any twelve months.

A child shall not be allowed to clean any part of the machinery in a factory while the same is in motion by the aid of steam, water, or other mechanical power.

A young girl or woman shall not be allowed to clean any part of the machinery in a factory as is mill-gearing, while the same is in motion for the purpose of propelling any part of the manufacturing machinery. A child or young girl shal not be allowed to work between the fixed and traversing part of any self-acting machine, while the same is in motion.

Every factory shall be kept in a cleanly state and free from effluvia arising from any drain, privy or other nuisance.

A factory shall not be overcrowded while work is being carried on therein, as to be injurious to the health of the employees.

Every factory shall be ventilated in such a manner as to render harmless, so far as is reasonably practicable, all the gases, vapors, dust and other impurities generated in the course of the manufacturing process that may be injurious to health. In every factory there shall be kept a sufficient number and description of privies, earth and water closets and urinals for the use of the employees, which shall at all times be kept clean and well ventilated, and separate sets thereof shall be provided for the male and female employees.

In every factory all dangerous parts of mill-gearing, machinery, vats, pans, caldrons, reservoirs, wheel-races, flumes, water channels, doors, openings in the floors or walls, bridges and all other like dangerous places shall as far as practicable, be securely guarded.

No machinery other than steam engines shall be cleaned while in motion if the inspector so directs by written notice.

The openings of every hoistway, hatchway, elevator, etc., shall be provided with and protected by trap-doors or self-closing hatches, and such trap-doors, etc., shall be kept closed at all times except when in actual use by the persons authorized by the employer to use the same.

In every factory there shall be such means of extinguishing fire as the inspector acting under the regulations made in that behalf, directs in writing.

The main inside and outside doors shall open outwardly, and any door leading to or being the principal or main entrance to the factory or to any tower, stairway, or fire-escapes therein, or belonging thereto, shall not be bolted, barred or locked at any time during the ordinary and usual working hours of the factory.

In case of a fire or accident in any factory accasioning any bodily injury to a person employed therein, whereby he is prevented from working for more than six days, notice shall be sent to the inspector in writing by the employer forthwith, after the expiration of the said six days: in case of an explosion occurring in any factory, whether any person is injured thereby or not, the fact shall be reported to the inspector within twenty-four hours of the occurrence. Where in any factory any person is killed or injured through any cause, written notice shall be sent to the inspector within twenty-four hours.

In case of neglect on the part of any employer to comply with the foregoing provisions with respect to sending written notices to the inspector, such employer shall be liable to a fine not exceeding \$30.00.

The provisions of this Act which relate to cleanliness, ventilation, etc., and to children, etc., being during any part of the time allowed for meals in any factory, and to sending notices of accidents, shall not apply where persons are employed at home, that is to say, in any private room, house, place, etc., used as a dwelling.

Nothing in this Act shall extend to any person being a mechanic, artisan or laborer, working only in repairing the machinery in, or any part of, a factory. The Lieutenant-Governor in Council may from time to time, for the purpose of carrying out this Act, make such rules and regulations for enforcing its provisions and for the conduct and duties of inspectors, as may be deemed necessary. And also from time to time appoint a female inspector, in addition to the other inspectors directed by law.

Every person shall, within one month after he begins to occupy a factory, serve on the inspector a written notice, stating the name of the factory, the place where it is situated, the address to which he desires his letters to be addressed, the nature of the work, the amount of moving power therein and the name of the firm under which the business of the factory is to be carried on, and in default shall be liable to a fine not exceeding \$30.00.

Such annual or other report of the inspector as the Lieutenant-Governor from time to time directs, shall be laid before the Legislative Assembly.

#### INDUSTRIES INCLUDED UNDER FACTORIES ACT.

Agricultural Implement Factories. Auger Factories. Axle and Spring Factories. Bakehouses and Bakeshops. Barb Wire Factories. Barrel Factories. Bell Factories. **Billiard Table Factories** Bird Cage Factories. Blacking Factories. Blanket Factories. Boiler Factories. Bolt and Nut Factories. Bookbinding Factories. Boot and Shoe Factories. Box Factories. Brass Factories. Breweries. Biscuit Factories. Broom Factories. Brush Factories. Bustle and Hoopskirt Factories. Button Factories. Canning Factories. Cap Factories. Carpet Factories. Carriage Factories. Carriage Goods (Iron) Factories. Carriage Woodwork Factories. Cartridge Factories. Car Shops. Cheese Box Factories. Chemical Works. Child's Carriage Factories. Cider Factories. Cigar Factories. Cigar Box Factories. Clay Pipe Factories. Clock Factories. Clothing Factories. Coffin Factories. Confectionery Factories. Coopers' Factories. Cork Factories. Corset Factories. Corset and Hoopskirt Steel Factories. Cotton Factories. Distilleries.

Domestic Utensils Factories. Dress Shield Factories. Drop Forging Factories. Dye Works. Edge Tool Factories. Electric Machinery Factories. Electrotype Foundries. Emery Wheel Foundries. Envelope Factories. Extracts and Essential Oil Factories. Felt Factories. File Works. Flax Mills. Foundries. Fringe and Tassel Factories. Fruit Desiccating Factories. Furniture Factories. Furriers' Workshops. Galvanized and Pressed Ironwork Factories. Glass Works. Glove Factories. Glucose Factories. Gun and Small Arms Factories. Hair Cloth Factories. Hames Factories. Hammer Factories. Hat Factories. Hinge Factories. Horn Comb Factories. Hobby Horse Factories. Hosiery Factories. Iron Bridge Works. Jams, Jellies and Pickle Works. Jewellery Factories. Kaoka Factories. Knitting Factories. Knitting Machine Factories. Knitting Needle Factories. Lace Factories. Lamp Goods Factories. Last Factories. Laundries. Laundry, Bluing and Washing Crystal Factories. #### REGULATION OF SHOPS.

R. S. O., 1897, CAP. 257.

An Act Respecting Shops and Places Other Than Factories.

No child, young girl or woman shall be employed in or about the shop on any day of the week, other than Saturday or the day next before a statutory holiday, before the hour of seven o'clock in the morning, or after the hour of six o'clock in the evening.

Saturday labor shall not commence before the hour of seven o'clock in the morning nor continue after the hour of ten o'clock in the evening.

There shall be allowed for each child, etc., so employed, not less than one bour for the noonday meal, and not less than forty-five minutes for the evening meal.

If any child, young girl or woman is employed in a shop on the day next a statutory holiday until ten o'clock in the evening, in that case such child, etc., shall not be employed after six o'clock in the evening on Saturday of the same week. Nothing in this section contained shall apply or be in force as to any shop, from the 14th day of December to the 24th day of December, inclusive, in each year.

In any shop where females are employed the employer shall at all times provide and keep therein a sufficient or suitable seat or chair for the use of every such female, and shall permit her to use such chair when not necessarily engaged in her work.

Any person offending against the provisions of this Act shall be liable to a fine of not less than \$10.00, nor more than \$25.00, with the costs of prosecution, and in default of immediate payment of such fines and costs, to be imprisoned in the common gaol of the county for not less than one month or more than three months.

The provisions of this Act relating to the sanitary conditions of shops, and the means of extinguishing fire, etc., are practically the same as the provisions of the Factories Act in this respect.

The inspector shall have the right to exercise such powers as may be necessary for carrying this Act into effect.

#### BAKE SHOPS.

All bake shops to which this Act applies shall be constructed as to lighting, heating, ventilating and draining in such a manner as not to be injurious to the health of any person working therein, and shall be kept at all times in a clean and sanitary condition, so as to secure the production and preservation of all food products therein in a good and wholesome condition.

Every bake shop shall be supplied with a proper washroom, closet and other conveniences necessary for the health and comfort of the persons employed therein.

The sleeping places of the employees shall be entirely separate from the bake shop, and no person shall be allowed to sleep in such shop.

No employer shall allow or require any employee to be in any bake shop to work on Sunday, nor to work more than twelve hours on any day, or more than sixty hours in any one week, except by permission of inspector.

No employer shall knowingly require or permit any person to work in his bake shop who is affected with consumption of the lungs or with scrofula, or with any venereal disease, and every employer is hereby required to maintain himself and his employees in a clean and healthy condition, while engaged in the manufacture, handling or sale of such food products.

Any employer who violates any of the provisions of this Act which relate to bake shops shall for the first offence pay a penalty of not less than \$20.00, besides costs thereof, and not more than \$50.00; and for the second offence shall pay a penalty of not less than \$50.00, besides costs, and not more than \$100.00, and in default of payment shall be imprisoned in the common gaol of the county in which the offence is committed for a period not less than thirty days, or more than six months, and be kept at hard labor at the discretion  $c^4$  the Magistrate, and for the third and subsequent offences shall be imprisoned in gaol for a period of not less than six months nor more than one year, to be kept at hard labor at the discretion of the Magistrate.

15 B.L.

## AN ACT TO AMEND THE ONTARIO SHOPS REGULATION ACT.

S.O., 1900, Cap. 43, provides that every person contracting for the manufacture of coats, vests, trousers, overalls, cloaks, caps, drawers, blouses, waists, waist bands, underwear, neckwear, shirts, or any parts thereof, or any other garment or article of clothing, or giving out for improvement, manufacture or alteration, incomplete material from which the said articles or any of them are to be made, or to be wholly or partially altered or improved, shall keep a written register of the names and addresses, serially numbered of all the persons to whom such work or material is given to be made, altered or improved, or with whom he may have contracted to do the same; and such register shall at all times be kept prominently posted up in the office of the person thus giving out such articles for manufacture, alteration or improvement.

Every article thus made, altered or improved, as aforesaid, shall bear upon a label attached thereto the register number of the name and address of the person to whom the same was given for manufacture, alteration or improvement, and any false statement upon such label shall render the person making the same liable to the penalties provided by this Act for making false entry in any register, notice, certificate or document.

No person shall knowingly sell or expose for sale any of the articles mentioned in this section and made in any dwelling house, tenement house or building in the rear of any tenement, etc., without a permit from the inspector, stating that the place of manufacture is thoroughly clean, and otherwise in good sanitary condition. Such permit shall state the maximum number of persons allowed to be employed upon the said premises, and shall not be granted until an inspection of the premises is made by the inspector.

When any article mentioned under this section is found by the inspector to be made under unclean or unhealthy conditions, or upon any unregistered premises, he shall seize and impound the same, and affix thereto a label bearing the words "unsanitary" printed on a tag not less than four inches in length.

The owner of such article shall, after it has been disinfected, be entitled to have the same returned to him, upon first paying the costs of such seizure and disinfection.

If the inspector finds evidence of unhealthy conditions, or of infectious or contagious disease present in any workshop, tenement or dwelling, where any of the articles herein mentioned are manufactured, etc., he shall forthwith report the same to the local board of health, and the board shall issue such an order as the public health may require, or may condemn or destroy all such infectious and contagious articles or 'any articles manufactured under unsanitary conditions, as aforesaid.

#### IMMIGRATION OF CHILDREN.

R.S.O. 1897, Cap. 262, provides that no child shall be brought or caused to be brought into the Province of Ontario by any society or agent or by any person other than the parent of the child, or person standing in loco parentis to such child, from any port in Great Britain or Ireland, unless a certificate has first been obtained from an examiner stating that he has satisfied himself that the child named in the certificate has not been convicted of any crime, nor displayed any criminal tendencies, and that in other respect he is a child who may lawfully be brought into the Province.

Every society or agent shall maintain a careful supervision over every child caused by them to be brought into the Province, until such child attains the age of eighteen years, and shall provide a permanent home or shelter, to which such child may be returned after being placed out in a foster home, or as an apprentice, if the person with whom the child has been placed is unable or unwilling to retain the custody of the child; and the address of such shelter shall be specified in every agreement made with persons receiving children into foster homes or as apprentices, and every such person shall, when so required by the society or agent, furnish full particulars as to the health, conduct, progress and welfare of such child.

Any complaints received that a child placed out in a foster home, or as an apprentice, is being ill-treated or overworked, etc., shall be immediately investigated by the society or agent, and the necessary steps taken to protect the child from future ill-treatment or neglect.

Every society or agent having the custody of any child brought into the Province shall be entitled to send such child to the public or separate schools of the municipality in which the child resides, in the same manner as the child of any ratepayer.

If any child hereafter so brought into the Province of Ontario, within three years thereafter, becomes dependent on public or private charity, the society or agent, if so ordered by the inspector, shall pay to the Province or to any person maintaining the child, the cost of the maintenance of the child, and may be required to return the child to the place from which he came into this Province.

Any society or agent who brings into the Province any child, who from defective intellect or disease or physical infirmity, or any other defect, is unable to follow any trade or calling, or any child of known vicious tendencies, or any child who is known to be an habitual criminal, or whose parents have been criminals, lunatics or idiots, or weakminded or defective constitutionally, or confirmed paupers or diseased, shall be liable to a penalty of not more than \$100 or less than \$10, and in default of payment shall be imprisoned for any period not exceeding three months.

#### HORSE POWER FOR THRESHING MACHINES.

R.S.O. 1897, Cap. 265, provides that all persons owning or running any threshing machine, wood-sawing or other machine, which is connected to a horsepower by means of a tumbling rod or line of shafting, shall cause each of the knuckles, couplings and joints, etc., of such tumbling rod or line of shafting to be safely boxed or secured while running, with wood, leather or metal covering, in such manner as to prevent injury to persons passing over or near such tumbling rod, etc., and shall cause all oiling cups attached to arbors or journals to which driving belts are attached, to be furnished with tubes of tin or other material, which shall extend above the belt so as to prevent damage from oiling when the machine is in motion; and shall further cause a driver's platform to be placed on any horse-power used for driving machinery, of such size as to cover the gearing and to prevent accident to any person from contact with said gearing.

Any person who refuses to comply with the provisions of this Act shall be liable to a fine of not less than \$1 nor more than \$20, over and above the costs of prosecution, and in default of payment shall be imprisoned in the nearest common gaol for a period of not less than two or more than twenty days.

#### TECHNICAL SCHOOLS.

R.S.O. 1897, Cap. 301, provides that the trustees of any high school or board of education may, by resolution passed at a special meeting, called for the purpose, establish a technical school, or may change any high school already established into a technical school, providing that such resolution shall not take effect until ratified by by-law of each municipality composing the high school district, and also by the county council (if any) required by the High Schools Act to contribute the equivalent of the legislative grant towards the maintenance of such high school.

The provisions of the High Schools Act shall apply to technical schools subject to any regulations of the Education Department, with respect to fees, etc.

### TECHNICAL SCHOOLS FOR ADULTS.

It shall be lawful for the municipality corporation of any city or town to appropriate such sums of money as may be deemed expedient for the establishment of a technical school for adults within the meaning of this Act.

The general management of the schools for adults shall be vested in and exercised by a board of management, to be appointed as provided in section 9 of the Public Libraries Act. In cities and towns where there is a Public Library, technical schools for adults shall be under the control of the board of such library.

#### EMPLOYMENT OF PRISONERS.

R.S.O. 1897, Cap. 316, provides that the Lieutenant-Governor in Council may, from time to time, direct the employment upon any work or duty, the nature of which is to be specified, beyond the limits of any common gaol, of any prisoner who is sentenced to hard labor under the authority of any statute of Ontario, or for breach of the by-laws of any municipal corporation in this Province. Every prisoner shall during such employment be subject to the rules and regulations of the gaol so far as applicable. No prisoner shall be so employed, save under the strictest care and supervision of officers appointed to that duty.

An account shall be kept of the amount earned by the labor of prisoners, and shall be divided between the Province and the county in proportion to the amount contributed by them respectively towards the maintenance of such prisoners.

On April 4th, 1900, the following resolution was passed by the Legislature of Ontario:

Resolved, "That in the opinion of this House all Government contracts should contain such conditions as will prevent abuses which may arise from the sub-letting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the districts where the work is carried out, and that this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect thereto; and it is hereby resolved that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all works aided by a grant of provincial public funds, and that the aforesaid policy shall be forthwith applied to every department of the public service, and te all parties now performing services for the Government That this House is further of the opinion that in all appropriate cases the legislation of this House should be in harmony with this resolution."

# S. O. 1900, CAP. 14. AN ACT RESPECTING THE BUREAU OF LABOR.

Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. There shall be attached to the Department of the Commissioner of Public Works a bureau, to be styled "The Bureau of Labor."

2. The Lieutenant-Governor may appoint a Secretary of the said Bureau and may also appoint such other officers as may be necessary for the proper conduct of the Bureau.

3. It shall be the object of the Bureau to collect, assort and systematize and publish information and statistics relating to employment, wages and hours of labor throughout the Province—co-operation, strikes, or other labor difficulties, trades unions, labor organizations, the relations between labor and capital, and other subjects of interest to workingmen, with such information relating to the commercial, industrial and sanitary condition of workingmen, and the permanent prosperity of the industries of the Province, as the Bureau may be able to gather.

An Act Respecting Aid to Certain Railways, S. O., 1901, chap. 22, contains clauses for the protection of workmen engaged thereon, as follows:

8. The workmen, laborers or servants employed on or about the construction of the said railway, each of them shall be charged fair and reasonable prices for any board, provisions, clothing and other necessaries of life and reasonable comfort, supplied by the company, their agents or any person or persons authorized by the said company to supply such goods and accommodation, and upon the breach of any of the provisions of this section or in the event of exorbitant charges, being made by the railway company, their agents or other person or persons authorized by the railway company, there may be deducted and retained from moneys payable in respect of such unearned subsidy, or hereafter to be granted subsidy, such amount as the Lieutenant-Governor in Council may think proper.

12. The Lieutenant-Governor in Council may instruct the Secretary of the Provincial Board of Health to enforce such reasonable sanitary regulations on the works and in the camps connected therewith during the construction of the said railways, as may be deemed necessary to maintain proper sanitary conditions and accommodations, and contractors shall have at such camps a tent and store, where in case of emergency a patient suffering from a contagious disease may be isolated at once, so as not to endanger the men in camp.

18. All the provisions of the "Act to secure payment of wages for labor performed in the construction of public works," of the "Act respecting subsidies to railways and to encourage the manufacture of railway steel and iron in the Province." and of "The Ontario Railway Act," shall apply to the subsidies granted by this Act, and the wages paid on any of the said works shall be such as are generally accepted as current for competent workmen in the respective districts where such railways are to be constructed.

An Act Respecting Sanitary Regulations in Unorganized Territories. S. O., 1901, chap. 34, provides that the Lieutenant-Governor may from time to time make regulations applicable only to those parts of the Province which are without municipal organization.

(1) Respecting any particular industry, and the conditions under which the same may be carried on, for the purpose of preventing nuisances and the outbreak or spread of disease.

(2) For the cleansing, regulating and inspection of lumbering camps, mining camps, and railway construction, and other places where labor is employed.

(3) For providing for the inspection of houses and premises.

(4) For providing for the employment of duly qualified medical practitioners by employers of labor in lumber and mining camps, and railway construction and other works where labor is employed, and for the erection of permanent or temporary hospitals for the accommodation of persons so employed.

## S. O., 1901, CAP. 35. AN ACT TO FURTHER IMPROVE THE FACTORIES ACT.

1. Subsection (4) of section 15 of the Factories Act is amended by inserting in the first line after the word "provided" the words "by the owner of the factory," and subsection (5) of the same section is amended by adding thereto the following:

"And the owner of any factory who does not provide the equipment, accommodation or conveniences required in subsections (3) and (4) of this section within two months after receiving from the inspector notice in writing in regard to the same shall be deemed to be guilty of a contravention of the provisions of this Act, and shall be liable to the penalty provided in section 19 of this Act."

2. Section 20 of the Factories Act is hereby amended by adding thereto the following subsections:

(f) Inflammable material such as coal oil or petroleum, benzine and naphina, and explosives of all kinds shall be kept stored when not in actual use in a building separated from the other parts of the factory, or in a fireproof compartment of the factory approved of by the inspector.

(g) No boiler shall be used that is not insured in some boiler inspection company duly authorized in the Province for that purpose, or that has not been inspected within one year by a competent inspector, such inspector to be a man who has had charge of a boiler and engine for a period of not less than five years, or who holds a certificate as a stationary engineer, and the manager or proprietor shall, whenever so requested by the inspector, produce for examination the insurance policy or the certificate of inspection.

3. Subsections (2) and (3) of section 21 of the Factories Act are hereby repealed and the following substituted therefor:

(2) The owner of every factory over two stories in height, and where deemed necessarv by the inspector, the owner of every factory over one storey in height, shall within six months from the time of the passing of this Act, provide the said factory with one or more systems of fire escape as follows, and shall keep the same in good repair:

(a) A sufficient number of tower stairways with iron doorways within reach of or having easy communication with all the working rooms of the factory; or

(b) A sufficient number of iron or other uninflammable fire escapes on the outside of the building such fire escapes to consist of stairways with railing or iron ladders and to be connected with the interior of the building by iron or tinned doors or windows with iron shutters, and to have suitable landings at every storey including the attic if the attic is occupied as a workroom, and the said stairways to start at a distance of not more than eight feet from the ground or pavement: or

(c) Any other system or form or fire escapt that may be sanctioned under this Act by the Lieutenant-Governor in Council on the recommendation of the Factories Inspectors.

(3) The owner or proprietor of any factory refusing or neglecting to provide the means of safe exit in case of fire prescribed in this section shall upon conviction thereof incur and be liable to a fine of not more than \$500 with costs of prosecution, and in default of immediate payment of such fine and costs, be liable to imprisonment within the common gaol of the county for a period of not more than twelve months.

4. The following is added to the Ontario Factories Act as section 51;

51. The owner, proprietor or manager of any factory hereafter established and to which this Act applies, shall not begin operations until he shall have received from the factory inspector a certificate of inspection of the factory a permit to operate the same; and any such person violating the provisions of this section shall be liable to the penalties provided for in section 19 of this Act.

S. O., 1901, Cap. 36. An Act to Amend the Ontario Shops Regulation Act.

1. Section 13 of the Ontario Shops Regulation Act is amended by adding thereto the following subsections:

(3) The owner of every shop shall be held responsible for the providing of the sanitary conveniences provided under subsection (2) of this section, and on failure or refusal to provide the same within two months after receiving written notice from the inspector, shall be liable on conviction to a fine of not more than \$500; or in default of payment of the same, shall be imprisoned for a period of not more than twelve months.

(4) Where grinding, polishing or buffing is carried on in any shop, the provisions of section 16 of the Ontario Factories Act shall apply to such shop.

2. Section 39 of the Ontario Shops Regulation Act is repealed, and the following substituted therefor:

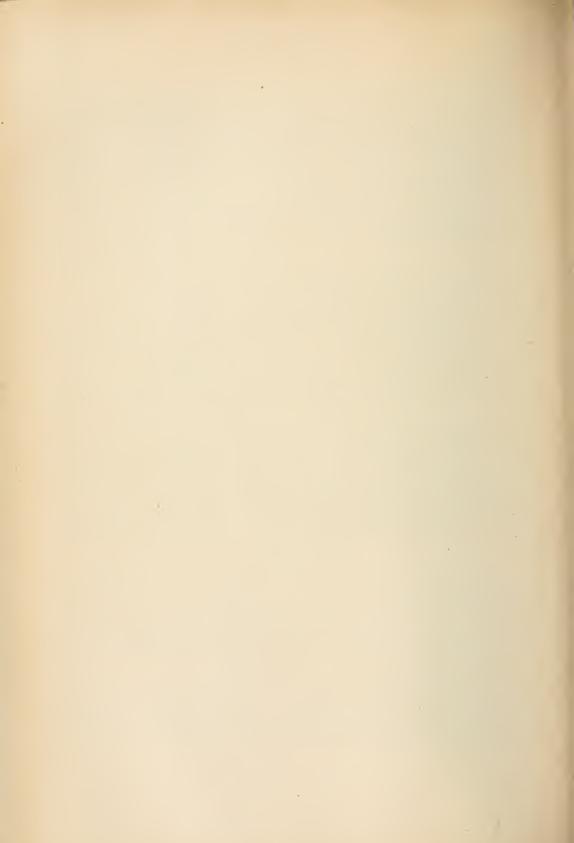

39. No person shall require, permit or suffer any employee in any bake shop to work on Sunday, nor for more than twelve hours out of every twenty-four hours, computed from the time when the employee commences to work, nor more than sixty hours in any one week, to be computed as commencing on Monday and ending on Saturday, both days inclusive, except by permission of the inspector given in writing to the employer; and a copy of such permission shall be posted in a conspicuous place in the bake shop.

### BARBER SHOPS.

3. The said Act is further amended by adding thereto the following as sections 45 and 46.

45. No employer shall require, permit or suffer any employee in any harber shop to work on Sunday, and no proprietor of any barber shop shall open his barber shop or permit the same to be opened to the public or carry on any business or work therein at any time between the hours of 12 o'clock on Saturday night and 12 o'clock on Sunday night.

46. Any employer or any proprietor of a barber shop who violates the provisions of the preceding section shall on conviction thereof be liable to a penalty of not less than \$20. besides costs, and of not more than \$50, besides costs, and in default of payment of the same, shall be imprisoned for a period of not less than thirty days and of not more than six months.

### FIFTH REPORT

#### OF THE

# BUREAU OF LABOR 1904.

TO THE HONORABLE J. O REAUME, Commissioner of Public Works, Ontario.

SIR,—I have the honor to submit herewith the Fifth Report of the Bureau of Labor.

I have the honor to be, sir,

Your obedient servant.

R. GLOCKLING, Secretary.

#### INTRODUCTION.

The fifth report of the Ontario Labor Bureau covering the year 1904 is devoted to the following subjects:

#### WAGE-EARNERS' STATISTICS.

As in past years, the Bureau has made investigation into the hours of labor, wages, benefits paid, periods of payment, etc., showing comparison between those organized and unorganized workers, also suggestions and remarks bearing upon the general improvement of the conditions of wageearners. The returns, while far from being complete, will give a fair idea of the general condition, as has been stated in previous reports. Much diffficulty is experienced in getting returns through the system of circular through the mails. Personal application through special agents is the method most satisfactory, as is the experience of all Labor Bureaus both on this continent and in other countries. The Secretary has, as in previous years, visited as many localities as time from office duties would permit.

#### BUSINESS OPENINGS.

For the purpose of ascertaining what opportunities existed for new business enterprises in the province, circulars were sent to the clerks of cities, towns and villages, asking the necessary information. Their replies will be found herein. In this connection the editor of "Commercial Intelligence," an eminent trade journal published in London, England, and who has published verbatim in its columns the Town Clerks' replies, wrote to say, "You could not have hit upon a happier plan."

#### DIRECTORY OF LABOR ORGANIZATIONS.

To the fullest extent possible, a Directory of Labor Organizations of the Province has been prepared, the fullest attention given to accuracy from all available sources. This feature has been favorably commented upon in the past by many among the workers, for which reason it is continued.

#### CONCILIATION IN TRADE DISPUTES.

Under this head is given cases of disputes, in which the services of the Secretary of the Bureau has been asked for in the capacity of mediator.

#### STRIKES AND LOCKOUTS.

Statistics are given of trade disputes in the Provinces of the Dominion as reported by the Labor Gazette, also disputes in Great Britain and the United States.

#### INDUSTRIAL STATISTICS.

Giving details of returns from manufacturers of the Province, also table showing wage rate and labor cost in manufactures.

#### LEGAL DECISIONS AFFECTING LABOR.

Decisions affecting labor in the Province of Ontario, compiled from the Labor Gazette for the year 1904.

The publishing of these decisions from year to year will form a correct history of Ontario decisions.

#### ONTARIO LABOR LAWS.

The chronology and synopsis of the Labor Laws of the Province, with amendments to date.

#### MISCELLANEOUS.

Apart from the subjects enumerated above, such other matter is included which is thought will be of material interest to the wage-workers and others of the Province.

#### CIRCULARS TO TOWN CLERKS.

The following circular was issued in May, 1904, to the Clerks of the cities, towns and incorporated villages of the Province. In reply to the 760 circulars sent out 560 answers were received.

A record is given of answers, available which includes new industries established and openings for new enterprises, together with remarks and suggestions regarding industrial development, etc.

#### THE BUREAU OF LABOR.

DEAR SIR,—The Bureau of Labor of Ontario again asks the co-operation of the city, town, incorporated village and township clerks of the Province to assist in the continuance of collection of data as to the growth of the industries of the Province, to gether with opportunities for new industries. Will you be good enough to make answer to the following questions and return in enclosed envelope? No postage is required if not sealed. Thanking you in advance for this courteer. I am

Thanking you in advance for this courtesy, I am,

Respectfully yours,

#### R. GLOCKLING,

Secretary, Bureau of Labor, Ontario.

æ

1. Name of industries started during 1903. Give name and nature of business and post office address .....

- 3. Do you consider there is any opening in your locality for new industries? If so, of what character?.....

#### REMARKS FROM CLERKS.

ARMOW—A fruit canning industry would be a good investment in this locality.

Avr-Would consider that a good opening for the manufacture of white goods exists here.

ARDOCH—The Clarendon Mining Co., established. Gold mining. Good opening for any mining industry.

BLIND RIVER—A tannery would do well here, as hemlock bark is plentiful. There are several good site's for saw mills, box factory or furniture factories.

ALTON—A partly improved water-power is now for sale here, and suitable for manufacturing. There is an opening for boot and shoe or furniture industry, where cheap power and good railway facilities are required.

ALVINSTON—A flax mill is in course of erection. There is a good opening for the manufacture of vitrified brick and artificial stone.

ABERFOYLE—There are considerable quarries along line of C. P. R. in Puslinch, near Shaw Station. Good limestone as well as building stone. Two firms at work now doing large business in summer time supplying building stone and road metal to contractors in Toronto. Plenty of opening for other work of same nature. There are also large peat bogs in this township which could be utilized for fuel.

ARDEN—Good opening for the manufacture of brick and lime. There is excellent water-power which might be utilized for any industry which requires power.

AVLMER—There is an opening here for a good cooperage. Almost any manufacturing establishment would be welcomed. There is a good grist mill with water power for sale.

ALFRED-Sinkin~ wells for oil and gas. Good opening for grist mill, brick-yard and cheese box factory. A bank is greatly needed.

AMELIASBURG—A general canning factory would be a paying industry at Rednerville in this township.

ANTRIM—A saw mill, hashing mill, a cheese box factory and cooperage have been established recently in the township. Good opening for flour mill at Galletta. Best and easiest controlled water power on the Mississippi. mill burned two years ago and water power now for sale. The Canada Atlantic Railway runs through the village. Farming country as good as any in Canada.

ANCASTER-Good opening for fruit evaporator.

Alliston-Good opening for boot and shoe industry and for a woodenware factory.

BOBCAYGEON—Good opening for lime kiln, boat and canoe factory, wagon and sleigh factory, chair and woodenware factory. We have the limestone and the required woods. A large summer resort is very greatly needed. The C. P. R. line will be open in August.

BAYFIELD—Good opening here for a steam roller mill.

BEETON-Good opening for a carriage factory or furniture factory.

BOLTON-Good opening for a creamery, also a brewery.

BATH-Good opening for grist mill and canning factory.

BRUCE MINES—There has been a large furniture factory started, also a veneer and hardwood mill. The Bruce Mines & Algoma Railway Co., are building a coal dock for handling coal for Copper Cliff and other points. Good opening for tannery, as tan bark can be obtained in abundance, there being plenty of hemlock in the country. Good openings also along the Bruce Mines and Algoma Railway for saw mills, hardwood mills, furniture factories, creameries and cheese factories, also brick-yards. Excellent shipping facilities by rail and water.

BOULTER—This county is in great want of a flour and lumber mill. There is a very prosperous settlement, but no flour mill within 18 miles. There is also room for a corundum mill as there are large quantities of mineral in the township.

BLEZARD VALLEY—A cheese or butter factory would do well here, also a grist mill would be of great benefit to the country around and would promise well for the one establishing it.

BRUDENELL-Good opening for butter or cheese factory.

Byng-Good opening for a brick kiln.

BEATRICE-Opening for brick and drain tile making here.

BURK'S MILLS-New saw mill established. Good opening for a grist mill.

BONFIELD-A woodenware factory would be a good investment here.

BELLWOOD—If there were a flour and chopping mill put into operation here, it would be a good thing, as the old mill here could be bought at right price, and it is only used for chopping purposes. There is a fairly good water privilege in this village on the site of the old mill.

BRUSSELS-Woollen mill would find a good opening here, also opening for planing mill and sash and door factory.

BRACEBRIDGE—The industries that have been started are the Hess Furniture Co., the Bracebridge Brick Co., and the Watson Brick Co., and a linen factory.

BRANTFORD—Brantford knitting mills have been established. This city is open to receive manufacturing industries of any description. This is a live, growing city, and all are welcome.

BEAMSVILLE-New planing mill. Good opening for fruit and vegetable factory, fruit evaporator.

BAYSVILLE-Plenty of hardwood timbers suitable for furniture here. There are several sawmills that ship their lumber here in the rough.

BROCKVILLE-Opening for a good machine shop for heavy work.

BEAVERTON-Good opening for a carriage factory.

BRIDGEBURG-Good opening for brick yard and planing mill.

BOWMANVILLE—Opening for the manufacture of agricultural implements, furniture, and any specialty works.

BELLEVILLE-Good opening here for car works and ship building.

BANCROFT-There is an opening for cheese box factory. Indeed any industry where hardwood is required. Good water power.

BALA—There is a good opening for a wooden-ware factory. Good water power, and there will be a station of the C. P. R. in about a year.

Bothwell-Opening for a canning factory.

BERLIN-New industries started during 1903 are: Redpath Motor Co., manufacturers of automobiles: Berlin Foundry Co., furnaces, etc.; Interior Hardwood Co., bank and barroom fixtures. Good opening for a large iron works.

BENNINGTON—A saw mill and chopper has started business. Good opening for cement, tile and brick industry.

BARRIE—The Barrie Carriage Co., for the manufactures of buggies, carriages, wagons, cutters and sleighs, has been established during 1903. There is a good opening for agricultural implement factory, furniture of all kinds, boot and shoe industry, woodware. The corporation will deal liberally with any manufacturing industry that will locate in town. Good shipping centre, direct railway connection with Toronto, Hamilton, Collingwood, Midland, Penetang and North Bay and intermediate points.

BIDDULPH-A canning factory in this township, at the Napanee boundary would be a fine thing as there is a lot of their "stock" raised here.

BRIGHTON-Good opening for industries in connection with handling apples, such as cold storage buildings and barrel making.

CARLETON PLACE-Good opening for furniture factory, also a first-class machine shop.

COLPOX'S BAY-Good opening for a blacksmith shop and also a woodworking industry.

COLUMBUS-A bakery has been started.

CALEDONIA-Good opening for any kind of manufacturing industry.

CASSELMAN-Good opening for brick-yard, site close to railway which has been left vacant.

CHESLEY-Good opening for knitting factory and for the manufacture of ready-made clothing.

CUMBERLAND—A saw mill and provinder grinder have been established. There is a good opening for grist mill of 25 to 50 barrels daily in the village of Cumberland and at Varo.

CLINTON-Knitting works for the manufacture of hosiery has been started.

CHESLEY-Good opening for an evaporating factory.

COLBORNE-

CORNWALL—The Cornwall Furniture Co., has been established. Excellent shipping facilities in this town both by rail and water.

CREEMORE-There is a good opening here for a fruit evaporator and canning factory.

COBOURG-Good opening for pork packing industry, and fruit and vegetable industry.

COBDEN—As the country is very flat there should be a good opening for a drain tile industry, as a great amount of tile is used, and all of it has to be shipped from outside points.

COPPER CLIFF—There is a fair opening here for a grist mill. The soil is very fertile and brings good wheat. The nearest mill now is in the neighborhood of North Bay.

CALABOGIE—There is here an excellent opening for a grist mill and a woolen mill. There is splendid water power to run them. A cheese factory would also do well. CAIRO—Good opening for blacksmith shop, as there is none in the villiage. There is no physician here, and it is a desirable place for one to settle in.

CORNWALL—There is a good opening for a paper industry, hardware and farming implements. First-class water power.

CUMBERMERE-A good shoemaker would do well here.

CAMLACHIE—Boot and shoemaker would do well here, also a brick and tile factory.

CHERRY VALLEY—There is an excellent opening for barrel factory and cheese box factory. New industries established are, one mill for grinding feed, one cider mill and one machine shop, consisting of one heavy drop hammer, one large turning lathe (for iron or steel) and one large drill, all propelled by gasoline engine.

CLARKSBURG-Good opening for a canning factory.

COBDEX-Good opening for foundry and machine repairing shop. Also for manufacture of farm tile.

CARTERTON—Good opening for creamery and cheese factory and grist mill. There is none on the island at present. A factory for the manufacture of furniture, brush handles, etc., would find a good opening. Good water power to let.

CANNINGTON-Good opening for woolen manufactory, canning factory, tannery and a brick or tile industry.

CATARAQUI-A beet sugar factory would be a success here, as the soil is everything that could be desired for the growing of sugar beets.

COLLINGWOOD-Good opening for wooden-ware, basket making, wood-working industry.

CACHE BAY-Good opening for furniture factory.

DUTTON-Good opening for a canning factory. A stave, heading and veneering factory has been established.

DRAYTON-Good opening for brick-yard as there is good clay. Also good opening for machine and repair shop, pump factory and cooperage.

DENBIGH—A steam saw and shingle mill has been started, run by steam power. A tannery on a small scale could be run here to advantage. A shoemaker as well as a harness maker are also wanted, but the business done would be purely local, owing to want of shipping facilities.

DESERONTO—Good opening for canning factory, also any manufacutring business that use Bessemer iron, as there is a smelter of charcoal iron in the town.

DRESDEN-There has been a small saw mill and planing mill started in Camden Township, makes all kinds of small stuffs, such as fence slats, doubletrees, whiffle trees, etc. The Town of Dresden is open for new industries of any kind and will bonus such.

DURHAM-New cream separator manufactory. Good opening for carriage factory, wagons, and almost any light goods.

DIXON'S CORNERS—Good opening for tile factory, as the material is here in abundance. Sent sample of same to Toronto and it was pronounced A 1 for the manufacture of tile. The water power in the immediate vicinity (Iroquois village) is unsurpassed. DUTTON—Stave, saw and veneer mill established employing about 30 men. Also a creamery. Good opening for canning factory, shoe factory, furniture factory, waggon and buggy manufactory, knitting factory and woolen mills.

DRVDEN—Good opening for pulp mill, grist mill, or any other industry requiring power. There are four magnificent natural water falls within two and one-half miles of the place. There is gold bearing quartz, enough has been found to show that gold in paying quantities is to be found here.

DUNNVILLE—The Township of Moulton, in which Dunnville is situated, has a generous supply of natural gas, and is traversed by three lines of railways—Michigan Central, Wabash, and Grand Trunk. Has also water communication with Welland Canal, and any industry requiring cheap power and good transportation facilities would find here a good opening. A canning factory, sugar beet industry, and brick and tile yard would do well. A machine shop is also needed for iron works.

DESBORO—A cheese factory would find a good opening here.

DESBARATS—A lathe and saw mill has been established. There is a fine opening for a cheese factory, also a stave and box factory at port Findlay in the same township.

DIEUX RIVIERS—Opening for a pulp mill or similar industry.

DELHI-Good opening here for industries with experience, push and capital behind them. Good water power, healthy, low tax, good schools and no debt.

DELAWARE-Good opening for a Radial Railway.

DUBLIN—A chopping mill for grinding coarse grain has been started. Good opening for any industry.

DUNDAS—The Barclay Glass Co., established. Dundas, with its unrivaled shipping facilities and cheap electric power supplied by the Cataract Power Co., affords an opening for almost any line of manufacturing.

DUNCHURCH—Good opening for portable saw mill, wood-working industry, and tannery.

DORCHESTER STATION-Cheese factory started.

DRUMBO—Good opening for machine shop.

ELMIRA—A furniture factory has been established. Good opening for almost any industry.

ELMVALE—A butter factory has been established. A cement industry would find a good opening here as two lake beds of cement of excellent quality are in the vicinity.

EGANVILLE—A factory for making tubs, barrels, pails, brooms, etc., would do well here. Good water power.

EMSDALE—A saw mill has been established. A wood-working industry would do well here.

EMBRO-Good opening for brick and tile yard, also cement brick.

EXETER-Good opening for furniture factory, machine shop, canning factory and sugar beet factory.

ESSEX—A brick and tile factory has been established. Good opening for canning factory, tobacco factory, and twine and cordage factory. The raw material for such industries are all grown in Essex County. FORT FRANCIS—The Bell Furniture Co., has been established. Good opening for sash and door factory.

FORT WILLIAM—Sash and door factory, planing mill and saw mill, general foundry, stoves and ranges, etc. The Ogilvie Flour Mills are being built. Good opening for lumber business, wholesale groceries and forwarding warehouses for the West. The boats in the fall of the year come laden with merchandise for the Northwest. These could be stored here very cheaply and forwarded as the demand called for.

. FLINTON-A good saw mill and flour mill with latest improved machinery would do well here, also machinery for dressing lumber for building purposes is much needed. The nearest place for such industries is 17 miles from here.

FRANKFORD—There is a good opening here for almost any large manufacturing business requiring water power. Could be purchased at a reasonable figure.

FONTHILL—A canning factory or basket factory would do well here.

FULLARTON—Mill for chopping grain for feeding purposes established. Good opening for flour mill at Fullarton. Electric railway is being built connecting the village with Stratford.

FLESHERTON—A saw mill on a large scale, also sash and door factory splendid opening for a grist mill.

FORRESTER'S FALLS-A concrete tile industry has been established.

FLETCHER—An industry for the manufacture of cement, concrete, sewer pipe, etc., by the municipality of the Township of Tilbury East has been established.

FORT FRANCIS—There is need here of a few more saw mills doing custom work.

GRIMSBY—Good opening for box or basket factory, also any industry wanting free sight of about four acres near to G. T. R. and trolley line and cataract power.

GANANOQUE-Good opening for carriage factory, cabinet factory, shoe factory, foundry.

GRAVENHURST—Good opening for most any line, more especially in furniture or wooden-ware, tanning and glove making. There is a large number of unemployed young people who could work in shoe or knitting factories.

GORE BAY-Good opening in the township for either a cheese factory or creamery.

GREEN BAY-Good opening for a portable saw and shingle factory.

GOODERHAM—Butter factory has been established. Good opening for woolen mill and carding factory. Fine water power.

GRAFTON-Good opening for canning factory and evaporator, and a company is being formed with a capital of \$25,000.

GRAND VALLEY—Good opening for a peat manufacturing industry. Village ready to help along any industry employing a number of hands.

GORE BAY—A woolen mill is needed at Gore Bay, having a fine island for sheep and the quantity of wool shipped from the island would pay a mill all right.

GORDON-Good opening for manufacture of sugar from sugar beets, also for a fruit and vegetable canning factory. GLENCOE-A tinsmithing business established. Good opening for a fruit evaporting factory. A pork packing business might prove a good investment also.

GODERICH—A mantel factory will be built this year. A chair factory or any similar factory would do well here. The C. P. R: will be built here shortly.

GRANTON-Good opening for a brick and tile yard, cement works. Farm laborers are very scarce here and cannot be got at all.

GLENMORRIS-Ontario Portland Cement works started.

HARRISON-Good opening for a shirt and shirt waist factory. A knitting factory properly managed would also do well.

HAGERSVILLE—An excellent opening for a sash and door factory and planing mill. The building and machinery for that purpose are lying dormant since the death of the former owner of the mill. The premises adjoin the G.T.R. and M.C.R., and there is a large space between the mill and tracks for a lumber yard, which is also badly needed.

HILLVIEW—There is a first-class opening at this place for a complete sawmill. Splendid chance for saw mill, shingle mill, planer and machines for manufacturing handles, box, shooks, etc.

HANBURY-Saw mill established. Good opening for an enormous lime business as soon as the railroad reaches here. The limestone is of first-class quality.

HIGHGATE—Good opening for manufacture of any kind of small wares. Also for canning and evaporating industry and vinegar works.

HENSALL-Good opening for foundry, machine shop, carriage factory and pork packing industry.

HAVELOCK—An electric light and power company has been established. Good opening for furniture factory, woolen mill, and the manufacture of brush backs and handles.

HOLLAND LANDING—good opening here for almost any industry. Splendid localities for building, excellent water, artesian wells, and railway facilities.

HAMILTON—The following industries have been started during 1903: International Harvester Co.; Pittsburg Steel Co.; Dominion Belting Co.; Canadian Steel & Wire Co.: Canadian Westinghouse Manufacturing Co.; Canadian Otis Elevator Co.: Canadian Corundum Works; Chipman, Holton Knitting Co.; Ellis Knitting Co.; Edward Ellsworth & Co. (Force Food); Allith Manufacturing Co.; Petrie Manufacturing Co.; Mansfield Glass Works; Shaw Syrup Manufacturing Co.; Shoultz Lantern Co.; Campbell Harness Polisher; Wentworth Brick Co.; Hamilton Wire Tack Specialty Company. This city offers many advantages, both natural and acquired, to all classes of manufacturing concerns, equal, if not superior to any other place in Canada. It is a well-known fact that electric power is at a lower figure here than any other point in Canada. Have first-class railway facilities, being closer in touch with the American railways than any of the other cities of the province, and have one of the best harbors of the chain of lakes.

HALLEYBURY-Good opening for sash and door factory, harness maker, brick maker, shoe maker, painter, stonemason and plasterer and tailor.

HARROWSMITH—Cheese box factory and barrel factory combined established. A canning factory would find here an excellent opening. Good shipping facilities. HILLIER-Good opening for a barrel factory.

HARROW-Good opening for a canning factory, as this is a good fruit district.

HAMPTON-A cooperage has been started for the manufacture of apple barrels and cheese boxes.

HALLVILLE-Basket factory started, making fruit baskets.

HUNTSVILLE-A brick yard and a shingle mill have been started.

INVERARY-Good opening for a flour and feed mill.

ISLINGTON—Fire Brick Co., and Menzie Wallpaper Company, have been established. Splendid opening along the line of the Toronto & Niagara Power Company, between Islington and Toronto for any industry using electric power. Easy of access to Toronto and generally desirable locality. Any industries looking for a location are referred to Montgomery, Fleury & Montgomery, 46 King St. W., Toronto.

JASPER-Good opening for cheese box factory and grist mill. This is the centre of a fine farming country and on the line of the C. P. R.

**IROQUOIS**—The Excelsior Shoe Company has established a factory. Almost any industry requiring water power could be accommodated here.

KEMPTVILLE-Good opening here for any manufacturing industry. Good shipping facilities by rail and water.

KILLALOE—Creamery started. Good opening for lime kiln and brick yard.

KAGAWONG—Shingle mill started. Good opening for cheese factory and cement plant. There is an immense amount of marl and clay and fine water power.

KATRINE-Shingle mill and also saw mill established. Good opening for a grist mill.

KINCARDINE-Opening for canning industry, stove foundry, and almost any industry. Good facilities for shipping to the Northwest.

KINGSVILLE—Planing mills have been started. Good opening for tobacco and eigar manufacturing. Excellent facilities for such industries.

KIRKFIELD-An industry for the manufacture of peat has been started.

LANCASTER-A machine shop might be operated here to advantage, but capital is required to establish such an industry.

LUCAN-Good opening for an industry for the manufacture of farm implements.

LITTLE CURRENT—Good opening for a foundry.

LINDSAY-Good opening for a woodworking industry.

LONDON-London Rolling Mills and the Canadian Tinplate Decorating Company have been established. Good opening for agriculture implement manufacturing, furniture, cotton and woolen mills.

LAKEFIELD-Saw mill established. Good opening for woolen mill, cement bricks and blocks and other products in which cement could be used.

LIONS' HEAD—A brick-yard is greatly needed. There is good clay convenient to harbor with a splendid chance to ship to lake points.

LAIRD—Two saw mills have been established, manufacturing lumber and lath. Good opening for brick and tile industry.

LOMBARDY-A cheese and butter industry has been established.

2 г

MILVERTON—Good opening for woolen mill, foundry, cheese box and barrel factory.

MARMORA—Good opening for veneering factory, plenty of good material. Also fine location for manufacturing sulphuric acid as ore is mined in vicinity. Greatest arsenic mine in America within three miles, hence an industry for the making of paris green, etc., would find here a good opening.

MARKDALE-Good opening for furniture or other wooden-ware factory.

MCGILLIVRAY-Good opening for a brick and tile factory.

MIDLOTHIAN—Two saw mills have been established in the neighborhood. There is a good opening for a saw mill at Shea's Landing, on the Magnetawan River, about seven miles from Burk's Falls. The mill was burned down, and the owner died when he was starting to build again. There is also an opening at Rainy Lake, about three miles from Sprucedale village, for a saw mill.

MANITOWANING—The Great Northern Oil & Gas Co., established their plant here last fall, as oil has been found in several places. Good opening for creamery and cheese factory.

MOUNT BRYDGES—Good opening here for a canning factory. Good railway facilities both by G. T. R. and C. P. R.

MINDEN—Good opening for a furniture factory. There is an abundance of hardwood, as none has ever been taken out of the locality. Splendid water power the year round. Badly in need of some wood-working industry.

MAYNOOTH-Good opening for roller flour mills, also woolen mills. A railroad is about to go through the place.

MILFORD—Good opening for a canning factory.

MILTON-Good opening for wood-working industry. A good industry would be generously dealt with.

MOUNT FOREST—The Mount Forest Carriage Co. has been established. Good opening for a moulding factory.

MOONSTONE—Good opening for a chair and furniture factory, or woodenware factory in Coldwater Village, also a canning factory and evaporator.

MATTAWA-A shingle mill and saw mill have been established. Good opening for sash and door factory, furniture veneering, spools and any woodenware industry, as hardwood is abundant.

MATTAWA—Opening for pulp industry in Mattawa Township.

MARKSVILLE—A lumber and shingle mill has been started.

MAFEKING—A flour mill and two saw mills have been established, also a cheese factory.

MARMORA—There is a good opening here for the manufacture of woolen goods.

MILDMAY—An upholstering business has been started which employs from 10 to 15 hands. Good opening for a brick-yard.

NEWBURY-Good opening for a harness shop here.

NEW LISKEARD-Good opening for small foundry or machine shop, also woodworking industry.

Norwood—A cheese box and veneering factory has been established. Good opening for a furniture factory.

NORWICH—Broom and brush industry established. Good opening for flour and chopping mill. There is a large mill standing idle which could be rented or bought. A good box or barrel factory would do well.

NEWCASTLE—Good opening for produce exchange. A cold storage plant especially designed for small fruits would find here a good opening.

NAPANEE—Barrel and barrel stock industry started. The town is willing to grant aid to almost any kind of industry, such as furniture factory, canning factory, farm implement works, etc. Possesses good rail and water facilities, gas and electric light service, and first-class fire protection.

NEW DURHAM—A cheese factory has been established at Burford Village in the township. Good opening for almost any industry.

NORTH BAY—A sash, door and planing mill and machine shops have been started. Excellent opening for any industry using wood in the raw state, as there is an unlimited supply within each reach. A small foundry would also do well.

NEW DUBLIN—A steam mill for sawing lumber, manufacturing wooden measures, and grinding provender has been established. Good opening for a tile and sewer pipe and brick industry.

NEWBURG—Good opening for most any industry as water power and cheap labor can easily be procured.

NEWMARKET—A clothing factory for the manufacture of men's clothing, also a cigar manufactory have been established. Good opening for sash and door factory. There is also needed some one to build dwelling houses to sell on the installment plan or to rent. Dwellings are at a premium, as there is not a vacant one in town.

NEWBURY—First-class opening for a harness shop in this village.

NAIRN CENTRE-Good opening for electric plant.

NIAGARA FALLS—Jenek's Machine Co., structural iron industry has been started. Any kind of industries requiring cheap power would do well here. Three power companies are now here, and power in large quantities will be obtainable at reasonable rates.

NORTH TORONTO—A canning factory has been started here.

NEWMARKET-Beet sugar factory would find here a good opening.

ORRVILLE-Any wood-working industry would do well here.

OIL SPRINGS-Good opening for flax mill, planing mill, or other small industry. Are prepared to give bonus and exemption.

OWEN SOUND—The Canadian Ventilating and Heating Co., who manufacture stoves and all kinds of heating plant, and the Linseed Oil Co., have been established. Good opening for any industry that timber or limestone enters into the manufacture of. There is abundance of first-class hardwood timber within easy reach, and white and blue limestone in abundance.

OSHAWA—The T. Eaton Co., for the manufacture of white goods. Good opening for manufacture of agricultural implements, harness factory, or any industry will be welcome and will be dealt liberally with in the way of assessments.

OTTAWA-The Ottawa Steel Casting Co., for the conversion of cast metal into steel. Good opening for almost any class of industry.

OTTERVILLE-Good opening for almost any branch of business. Lots of water power running to waste.

ORANGEVILLE—The Superior Portland Cement Co., has been established here. On the 14th of May, 1904, the electors assented to a by-law granting a loan of \$15,000, and exemption from taxation, for the establishment of a furniture factory. It is expected that it will be established this year. The town is open to bonus industries.

OTTAWA EAST—The Silicate Brick Company have started an industry here. Good opening for any wood-working industry.

OAKWOOD-Good opening for a tinsmith, also a shoemaker.

PORT HOPE—The Standard Ideal Sanitary Co., for the manufacture of enamelware and bath room fixtures, established here. Good opening for a brass factory, or a business that requires sand for moulding as there is plenty of good core earth.

PORT COLBORNE-Good opening for dry dock, ship yard, machine shop.

PINKERTON—Good opening for a furniture factory.

PAISLEY—Good opening for a foundry, sash and door factory, furniture factory or any wood-turning industry, oatmeal mill, woolen mill, ready-made clothing. Water power going to waste and building to be had on easy terms. Encouragement offered.

PORT DOVER-Good opening for a planing mill, electric railway, electric light, woolen factory, glass factory, summer hotel, steam boat company, natural gas company, or any industry would be liberally dealt with.

PICTON—A very large canning factory has been established. Good opening for a grist mill, canning and preserving factory to can and preserve small fruits and vegetables, a pork packing industry.

PEMBROKE-Good opening for cheese factory. Good water power.

PORT ARTHUR—An industry for the manufacture of artificial blocks of concrete, and the Algoma Builders' Supply Co., have been started. Good opening for a match factory, woolenware factory, smelting works, and woolen mill.

PRESQUE ISLE—A new dock has been built and steam saw mill. Good opening for almost any kind of wood-working machinery. Raw material very convenient and shipping facilities right at the door. The Council of Sarawak will give inducements in the way of exemptions of taxes, etc.

PENETANGUISHENE-Gasoline works, also launch, skiff and canoe factory have been started. Good opening for industry to manufacture tubs, pails, clothes pins, etc.

PLANTAGENET-Splendid opening for manufacture of sash and door, for lime, brick, etc.

POWASSAN-New saw mill has been started. Good opening for butter and cheese factory, also tannery.

PRESCOTT-Marine and Fisheries Department has been established.

PRESTON-The Hallam Furniture Co., has been started.

Ромоха—Lumber mill established.

PEMBROKE—It is thought that a manufacturer of woodenwares in connection with our saw mills would be a paying investment.

PORT STANLEY-Good opening for canning factory, creamery.

**PETERBORO**—Colonial Weaving Co., for the manufacture of woven silk labels, etc. Good opening for iron industries of all kinds, industries utilizing wood, beet sugar factory, tannery, carpet factory, carriage factory, canning factory, boot and shoe factory, biscuit factory. Electric power very cheap and excellent shipping facilities.

RAINY RIVER-The Rainy River Lumber Co. Good opening for sash and door factory, brick-yard and furniture factory.

RAT PORTAGE-Good opening for flour mills, wood-working factory. Unlimited water power available.

Rostock—Good opening for a peat industry.

ROSSEAU-Good opening for saw mill.

RIPLEY-Good opening for a grist mill and for wood and lumber yards.

RENFREW—The P. R. Cummings Manufacturing Co. for the manufacture of woodenware broom and mop handles and steel kitchen utensils. Good opening for any wood-working industry or brick and tile works or cement manufacturing, furniture, etc.

RIDGETOWN-Good opening for pork packing and canning industry.

STRATHROY-Waterworks system has been established, also an upholstering[®] business. Good opening for most any industry.

SOUTHAMPTON-Good opening for flour mill, flax mill, upholstering and furniture factory. Excellent shipping facilities.

SPRINGFIELD—A saw mill has been started, a bank also has been established. Good opening for brick and tile business and a foundry.

SUDBURY-Good opening for a wood-working industry, furniture, foundry. A flour and feed mill is also badly needed. The growing of wheat in this country, from North Bay to Larchwood, 18 miles west of here, has been very successful, but as there is no mill the farmers only grow enough for hen feed; hence a mill here would accommodate nearly all there is grown.

SUNDRIDGE—Any industry for the manufacture of woodenware as there is an unlimited amount of good timber and excellent water power. A furniture factory and tannery would do well here.

SHELBURNE-Planing mill, saw and lath mill have been established. Good opening for woolen mill, and flax mill.

SHENSTON-A cheese factory would do well here, and a site could be obtained free.

SHEBESHEKONG-There are a number of mines here awaiting development.

SLATE RIVER—There has been a chopping mill and shingle mill established. There is a brick industry started also which employs 100 men. Good opening for cheese factory or creamery, a general store, and a tannery.

STERLING-An evaporator or canning factory would pay well here.

SHIPLEY-A grist mill.

SARNIA-A factory for wire fences started.

SUTTON-Good opening for a woolen mill.

SPRUCEDALE-Excellent opening for planing mill and sash factory.

SIMCOE-Good opening for the manufacture of concrete tile.

STAFFORD—Splendid opening for a brick and drain tile factory. Firstclass material for the purpose.

STAYNER—Good opening for cement works as there is an almost inexhaustible supply of marl to be found in the township suitable for cement.

SELBY-A canning factory would do well here.

STREETSVILLE—Good opening for almost any industry as there is firstclass water power available and the village is situated on the main line of the C. P. R.

ST. CLEMENTS—A saw mill and heading mill have been started. Good opening for sash and door factory.

South MARCH-Good opening for a carriage and wagon factory.

SAULT STE. MARIE-Good opening for chair factory.

ST. OLA-Good opening for a cheese factory.

SEABRIGHT—Good opening for a cheese factory.

ST. THOMAS—A new industry for the manufacture of white goods, employing about 30 hands has been started. Good opening for almost any industry, as shipping facilities are unsurpassed.

SMITH'S FALLS—Any industry would find here a good opening. Excellent water power.

SIMCOE—Glove, Mitt & Robe Co., wholesale manufacturing of harness, mattress factory, have been established. Any wooden-ware industry on a small scale would find here a good opening.

STOUFFVILLE—First-class opening for a foundry, boot and shoe factory, tobacco factory, cigar factory and shirt and button factory, in fact any industry employing labor.

STURGEON POINT-Good opening for a first-class summer hotel.

ST. CATHARINES—Opening for a canning factory.

SOUTH RIVER—Two small saw mills have been started. Good opening for flour mill and woolen mill. Excellent water power. The municipality is prepared to give exemption from all taxes for 10 years.

TILSONBURG—The Maple Leaf Harvest Tool Co., and the Wilson Vinegar Works have been started. First-class location for any industry, five railways water power, cheap fuel, and a great centre for cheese, butter and dairy products.

Tweed-The Madoc Mining Co. are taking out large quantities of ore (iron pyrites). Good opening for brick yard.

TILBURY-Good opening for planing mill, and canning factory.

THOROLD—An asbestos pipe covering factory and the Montrose Paper Co., have been established. Good opening for artistic wood-turning, such as scroll work, bannister, railings, etc.

THAMESVILLE-Good opening for creamery, pork packing industry, foundry and machine shop.

THESSALON—A saw mill, with a capacity of 4,000,000 ft. per month has moved here from Michigan, cuts lath as well as lumber. Good opening for furniture factory, a tannery and laundry.

TEESWATER-Good opening for a furniture factory, carriage factory, stove foundry. The village would assist with a loan for the establishment of a carriage factory, and a new building (the owner having died) could be purchased.

TOLEDO-Good opening for a canning factory. Good fruit country.

UXBRIDGE—A cheese factory would find a good opening here, tannery or woolen manufacture, also canning factory.

UFFINGTON—There is a good opening for a saw mill to cut hardwood in the vicinity of Uffington, on the south branch of the Muskoka River at Mathiasville.

VANBRUGH-Good opening for a creamery. There are large deposits of phosphate and corundum in this locality.

VARNA-A cheese factory might do well here.

VITTORIA-A canning factory would find a good opening here.

VANKLEEK HILL-Good opening for canning factory, boot and shoe factory, butter factory, beet sugar factory.

VICTORIA ROAD-The Raven Lake Portland Cement Co. has been started here, and a creamery for butter making.

VERSCHOYLE-A process of reducing milk has been established.

WARREN-A cheese factory has been started. Good opening for a grist mill.

WATERDOWN—Good opening for a creamery.

WROXETER-A harness maker is needed very much here.

WALLACEBURG—Any good industry would do well here as there are excellent facilities for shipping.

WINGHAM-Good opening for a casket factory, foundry, etc.

WHITEY—A co-operative harvesting machine company has been established. A splendid opening for wood-working industries, also small industries of almost any kind, as the railway and other facilities are of the best, with prospects in the near future of still more electric and steam railway connection.

WALKERTON-Good opening for oatmeal mill, have plant for biscuit and confectionery business and want a buyer for it.

WEBBWOOD—The Shakespeare Gold Mining Co. has been started. Good opening here for a small saw mill with sash and door factory in connection.

WOODBRIDGE-Good opening for a foundry business.

WYOMING-Good opening for foundry and machine shop for general repairs of agricultural machinery. Also for planing mill, sash and door factory.

WHEATELY-The United Gas & Oil Co. have established their plant here. Good opening for tobacco or sugar beet factory.

WHITEVALE—An industry for the manufacture of office fittings, packing boxes, etc., has been established. Excellent water privileges.

WOODVILLE-Good opening for foundry and repair shops.

WOOLER-A brick-yard has been started.

WATERLOO-The Williams, Greene Co., collars and cuffs, also boot and shoe industry.

WARKWORTH-Good opening for a canning factory.

WATERFORD—A barrel factory has been started.

WINCHESTER—Cement works, the making of cement blocks for building purposes, established.

#### CIRCULAR TO LABOR ORGANIZATIONS.

The following circular and accompanying schedule was forwarded to the labor organizations in the Province of Ontario :

#### DEPARTMENT OF PUBLIC WORKS, ONTARIO.

#### THE BUREAU OF LABOR.

DEAR SIR,—The Bureau of Labor of the Province of Ontario again seeks the co cperation of the labor organizations of the Province to assist them in the continuance of the investigation of certain conditions of the wage-earners of Ontario. The value of this data will become more valuable, from a comparative point of view, as the years pass on. The present year is the fourth of the collection of data as to wages, hours of labor, etc. Such information being classified each year will mark the progress vr otherwise of the wage-earning class.

Confidence in the Labor Bureau increases year by year. Much of the suspicion felt toward it is passing away. Slowly its purpose is being understood, and with that understanding will the task become easier to collect the necessary statistics as may be desired, to enable the Bureau to present accurate and complete information through its reports as will enable our legislators and others to evolve solutions of public questions that will tend to the general prosperity of the Province. Copies of the report of the Labor Bureau for 1904, have been forwarded to secre-

Copies of the report of the Labor Bureau for 1904, have been forwarded to secretaries of all labor organizations whose addresses could be obtained. If none have been received by your union, please drop a post card notifying me to that effect, and copies will be at once forwarded.

The Bureau also cordially invites any remarks of a general character that, in the opinion of your body, will be of benefit to yours and other organizations.

You are respectively requested to answer as fully and as accurately as possible the questions on accompanying schedule, and return same in enclosed envelope as soon as convenient. No postage is required if not sealed.

I am,

Respectfully yours,

#### R. GLOCKLING,

Secretary Labor Bureau, Ontario.

P.S.-If you are not now secretary of your organization, will you please hand this to your successor.

The Bureau asks that the name and address of the corresponding secretary of your organization be forwarded whenever a change of officers takes place.

The following questions refer to the year ending December 31st, 1903:

DIRECTORY OF LABOR ORGANIZATIONS IN ONTARIO. Continued.

96

THE REPORT OF THE

#### REMARKS FROM LABOR ORGANIZATIONS.

No. 86.—Would suggest as an improvement, that Parliament bring in an Eight Hour Bill and rass it. It would help working men to get better employment during slack times, besides, it would improve the health and education of the laboring classes. Sometimes we work overtime, which gives us no time to think, only how to get rest. Many a good working man has lost his job through being tired out. He has offended the boss by giving him a snappy answer, which he would not have done if he had been only working ordinary time. This shows that too long hours are not good for man or boss. The employer does not gain much by working too long hours, as men only play the more through drunkennness or sickness. Have noticed this many times.

No. 100.—Regarding difference between members of our union and those two who are not members, it might be said that there is very little trade done, as these two were very indifferent about joining Union. Very little interest is taken in them by union, and the supposition is that the boss pays them any old price.

No. 140.—We are decidedly against assisted emigration of mechanics, thereby overstocking the labor market, which has a tendency to lower the wages, and also to undo all the benefits we have secured of shorter hours, etc. We also think that all emigrants should have sufficient funds before being allowed to land, to keep them from want for a month or so. At the present time the emigration laws are an injustice to the Canadian mechanic. Unlike the Canadian manufacturer, who is protected from competition from other countries, the mechanics have free trade in labor competing against the world, and even worse against assisted competition.

No. 141.—The attention of the Labor Bureau should be called to the fact that there are too many carpenters coming to this country from the Old Country through the slackness of work over there, and that the Government do not hold out any inducements for them to come over here, or we will be in as bad a position as in South Africa at present.

No. 160.—We think a license law would better our conditions and serve the public better, provided it is founded well and arranged by the barbers who are trying to make our craft one to be looked up to, and who understand the necessities of the barbers in general.

No. 236.—Would like something to be done to prevent employers working their men after 12 o'clock Saturday night.

No. 238.—That all Government buildings be done by day labor.

No. 415.—Enact and enforce a proper Alien Labor Law, or one that would not work so much in the American mechanic's favor. They can work on this side of the line, but we must stay in our own yard.

No. 418.—A Bill put through the House and enforced to make all men in charge of stationery engines, such as steam hoists, threshing mills, and stationery boilers, to pass an examination and get out papers before being allowed to have charge of same.

No. 471.—We advocate the principle of public ownership applied to all the means of production. distribution and exchange of the necessaries of life.

7 L.

No. 494.-Legislation that will improve the condition of the toiler. We again affirm the importance of a just and fair system of arbitration. We would remind you that the capitalist has many investments in the country, as has also the farmer many crops and varieties of stock. If one investment or one crop fails, the capitalist or the farmer may hope to pull up on the other investment or crop. The manual toiler has only one pro-duct to bring to the market, and that is his labor and skill, and, as Sydney Webb remarks, "it is the most perishable goods on the market." The wages lost by the manual toiler for his out of work time are completely You see then how important it is to the manual toiler that his emlest. ployment should be continuous, and the conditions of trade undisturbed. The hard facts that we have learned by experience has compelled us to form and maintain our Unions. In 1875 carpenters' wages in Toronto were 15 cents per hour, and plenty of men were only getting 121 cents per hour. In 1880 wages rose to 171 cents an hour. In 1881, under pressure of an organized strike, wages rose to  $22\frac{1}{2}$  cents per hour, and there they stuck, sometimes dropping to 20 cents per hour, till 1900. With the recovery from the disastrous boom, but chiefly owing to the increased strength of the unions, carpenters' wages have risen, in the last four years to 30 cents, and  $32\frac{1}{2}$  cents an hour. We know that this increase of wages is not due to the greater knowledge and skill required in the carpenters' trade as compared with the other building trades, it is not on account of the many expensive tools with which we have to supply ourselves, it is simply owing to the organized strength of our unions and the loyal way in which our members stand by each other. What are the opposing forces with which we have to contend? Our chief trouble just now in Toronto is the cruelly unjust immigration policy being passed by the Dominion Government, over which we know the Ontario Government has some influence. Our employers, the manufacturers, are protected by an unjust duty of 30 or 40 per cent. Add to this the profit made by the retailer and the wholesaler, and we get 50 cents on every dollar that the producer has to pay to the non-producer for the privilege of using what he makes himself. So that we, the producers, have to toil and sweat for \$10 worth of wages to buy \$7 worth of goods. Yet the Government, that so securely protects the manufacturer in the possession of the textile and the hardware market, is paying and encouraging its emigration agents in Europe to flood our market with foreign labor, so that our bosses are able to say to us, "If you will not work for 5 cents an hour less than the union rate, we can get plenty of immigrants who will." These injustices serve to emphasize the teachings of the socialist. The Highest Authority has said, "With the same measure that you mete, it shall be measured to you again," and so surely as we are now paying \$10 for \$7 worth of goods now, we shall some day be getting \$10 worth of goods for \$7, and it will be at the expense of those who, at present, have the power and disposition to inflict this cruel injustice on us. A fair and just system of arbitration that would legally fix the rate of wages, the hours of labor, and the other conditions of trade for the several districts of Ontario, as is done in New Zealand, would improve our situation by preventing the cutting of wage-rates and other irregularities on the part of the employers. It would also remove that miserable discord and strife, which is more conducive to anarchy than it is to harmonious citizensbip. We do not expect arbitration to give us all that we ask for. Strikes have not done We are also free to confess that a selfish, despotic labor government 50. would be just as bad for Canada, as is at present a selfish, despotic capitalistic government. Yet we hardly expect that legal compulsory arbitration

will work satisfactorily until labor has its representatives in Canadian Parliaments as labor has in Australia. Still, in our opinion, fair and just, legal and compulsory arbitration on the fundamental principle that every trade and occupation must pay a comfortable living wage for reasonable hours, is the only method that will bring lasting peace to the industrial interests of this Dominion.

We also give it as our opinion that the inordinate love of money making has so demoralized the financiers of this continent, competition is so keen, that greed and trickery are the dominating principles with the majority of business men, that the quickest and safest cure for the oppression, bribery and corruption that characterizes the present social and political condition of our Dominion, is the public ownership of the utilities and necessities of life.

We again assert our claim to old age pensions for such old men and women as are approved and endorsed by the society to which they belong, which society shall also pay one-eighth of the pension. We affirm that a producer, who has served his country by developing her resources, bringing up a family, paying his way, and honorably discharging his duties as a citizen, until he is 65 years of age, and all on the small average wage, most likely of about \$350 or \$400 a year, is much more entitled to an old age pension than are the teachers, preachers, military and civil servants, who have done less for their country on salaries of from one thousand to five thousand dollars per year.

Lastly, we appeal for woman suffrage in the Province of Ontario. We believe the women's vote would work here as elsewhere, for the uplifting of humanity, and that it would satisfactorily break the stagnant dead-lock which at present exists between the two political parties in Ontario.

No. 406.—Our organization it national only, as our certificates are not accepted on American boats where boats of all description require a certificated engineer, but in Canada only passenger boats are compelled to have them. The result is, with our present parody on an alien law in Canada, and the want of a proper Steamboat Act, Americans are allowed to come over and take some of our best tugs. As long as our Government inspector examines the boiler and machinery in the spring the owner of the tug is at liberty to engage a shoemaker to take charge of it if he wishes. So you see, we have not much protection for our certificate that takes years of work and study to get.

No. 514.—We think something might be done to assist men when they are permanently disabled, or are too old to work, and believe the question of housing the poor and lots of that kind of talk would be solved by some kind of pension scheme and paying men better while they are able to work, so that they could live in a decent home.

No. 519.—A more rigid enforcement of the Alien Labor Law, as certain wholesales continue to import, and go as far as to send representatives to the States to hire men, whilst our members, with wives, families and homes, may remain idle, while the Americans employed here send the money they earn here over to the States to support the wives and families who reside there. Whereas, if we were working in the States and sending our money over here to support our wives and families, we would be deported at once if the authorities knew. On the other hand, the machinery in the large packing houses is unsafe in as much as the animals quite frequently fall off the tracks and injure employees. Again, the engineers have to leave their engines and do steam-fitting, when quite frequently the boilers are next to being dry, and often incompetent engineers are hired at low wages. We claim that all engineers should pass an examination, and should be licensed, and granted their certificate, which should be framed and hung in their engine room where the machinery is in operation, otherwise we may expect sooner or later to see more than one plant blown up. In New York State no man is allowed to run an engine unless he has his license, and he must remain at his post.

526.—It is to be deplored that the laboring class is practically unrepresented in Parliament. This Assembly would, therefore, be pleased to see an Act passed allowing the following rights:

(1) The power to initiate legislation by direct vote of the people.

(2) The power of the referendum, so that the people could confirm or veto legislation.

(3) The grouping of constituencies and proportional representation.

This Assembly is also of the opinion that the assistance to immigration is very unfair to the laboring classes, subjecting them to the most intense competition, while the employers are protected from competition. The taxation laws, unfortunately, discriminate against the employment of industry and capital in production, and in favor of speculation. Then the industry which brings prosperity is discouraged, while speculation which comes to snatch prosperity from the producers, thereby is encouraged. To rectify this injustice taxes should be removed from the products of industry and concentrated on the value of the land. This Assembly also believes that the granting of bonuses is, as a rule, the despoiling of the poor for the benefit of the rich, and therefore, it would be wise to abolish all bonuses. As railroads, telephones, telegraphs, gas works, and other public functions must, in the nature of things, be monopolies, this Assembly believes that it would be for the public interest to have these functions operated by the Government or the municipality.

528.—We believe that the enforcement of "Ontario Factories Act" should be under the control of the Bureau of Labor instead of the Department of Agriculture, as at present, believing such a change would be to the best interests of all factory workers. We also believe the present number of factory inspectors to be entirely inadequate, and would advise that an inspector be appointed for each city in the Province, which, with inspectors for the out-lying districts, are necessarily required to handle the work assigned them.

Upholsterers, International Union of America, Anton J. Engel, 29 Greenwood Terrace, Chicago, Ill.

Woodworkers, Amalgamated International Union of America, John G. Meiler, Bush Temple, Chicago, Ill.

#### LIST OF BUREAUS OF LABOR STATISTICS.

That the utility and general value of accurate statistics in those branches of a nation's wealth, comprising subjects of mechanical and manual labor, is recognized by most civilized countries, is evidenced by the following list of existing labor bureaus, compiled from official records.

Ontario.—The Bureau of Labor was created by an Act passed by the Ontario Legislature, April 25th, 1900, under the direction of the Hon. F. R. Latchford, Commissioner of Public Works. R. Glockling, Secretary of the Bureau of Labor.

Canada.—The Department of Labor was established in July, 1900, and practically supersedes the Bureau of Labor of the Department of Agriculture established in 1890,, with Mr. George Johnson as chief clerk. The Department is under the direction of the Minister of Labor. the Hon. William Mulock. The Act establishing the Department provides for the monthly issuing of a Labor Gazette, the editor of which is W. L. Mackenzie King, B.A., Deputy Minister of Labor. The first number of the Gazette was issued in September, 1900.

Great Britain.—The Labor Bureau of the Board of Trade was established March 2nd, 1886. In 1893 the service was greatly enlarged, and given its present name, "Board of Trade Labor Department." A. Wilson Fox, Chief Secretary. It publishes monthly The Labor Gazette; also annual reports.

Stephen Bauer, Office International du Travail, Basle, Switzerland.

### CONCILIATION IN TRADES DISPUTES.

The amendment to the Trades Disputes Act, passed March, 1902, providing for conciliation in Trades Disputes, has been called into action officially in twenty-three disputes, as follows:

1902

Journeymen Tailors, Lindsay.

Jewelry Workers, Toronto.

Street Railway Carpenters, Toronto.

Machinists, Kingston.

Machinists, London.

Brickmakers, Toronto.

Harness Makers, Toronto. Carpet Weavers, Toronto.

Bookbinders (female), Toronto.

Iron Moulders, etc., Toronto.

Carpenters, St. Catharines and Thorold.

Sheet Metal Workers, Toronto.

Carriage and Wagon Workers, Toronto.

#### 1903.

Garment Workers, Toronto.

Electrical Workers, Toronto.

Ship Yard Employees, Collingwood.

Broom Makers, Toronto.

Rock Drillers and Helpers, Niagara Falls.

Plumbers and Steamfitters, Toronto. Employees Agricultural Implement Makers, Smith's Falls, Ont.

Quarrymen, Sherkston.

Textile Workers, Hespeler.

Leather Workers, Toronto.

Rubber Workers, Port Dalhousie. Leather Workers, Hamilton.

#### 1904.

Rock Drillers and Helpers, Niagara Falls. Hoisting Engineers, Niagara Falls. Suspender and Neckwear Workers, Niagara Falls.

Bricklayers, Hamilton.

Paper Makers, Merriton.

Sulphide Workers, Merriton.

The Secretary of the Bureau of Labor, who is also Conciliator under the Act referred to, has, in addition to the above official cases, also acted in the capacity of adviser in a number of other cases in which disputes have been averted and adjusted.

The principle of conciliation and arbitration is fast becoming the chief factor in trades disputes; its principle being applied in many cases between employers and employees in the Province. The existence of a Provincial Conciliator is unknown to many, yet time will undoubtedly extend the usefulness of this adjunct of Government in trades disputes.

The following resolution explains itself:

## RESOLUTION OF THE EXECUTIVE OF TRADES AND LABOR CONGRESS OF CANADA.

That this Executive Board of the Trades and Labor Congress, having in view the growing tendency to submit industrial disputes to conciliation or arbitration, and it being a fixed principle of organized labor, we would recommend to all unions of labor in Ontario, that, as there has been an Act passed by the Ontario Legislature, commonly known as the "Preston" Bill,

8 L.

under which power is given to the Secretary of the Labor Bureau of Ontario, as follows:

An Act to amend the Act respecting Councils of Conciliation and Arbitration for settling industrial disputes.

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. Section 4 of the Trades Disputes Act is amended by adding the following subsections:

(4) If any difference shall arise between any corporation or person, employing ten or more employees, and such employees, threatening to result, or resulting in a strike, on the part of such employees, or a lock-out on the part of such employer, it shall be the duty of the Registrar, when requested in writing to do so by five or more of said employees, or by the employers, or by the Mayor or Reeve of the municipality in which the industry is situated, to visit the place of such disturbance and diligently seek to mediate between such employer and employees.

(5) It shall be the duty of the Registrar to promote conditions favorable to a settlement by endeavoring to allay distrust, to remove causes of friction, to promote good feeling, to restore confidence, and to encourage the parties to come together and themselves effect a settlement, and also to promote agreements between employers and employees, with a view to the submission of differences to conciliation or arbitration before resorting to strikes or lock-outs.

Knowing Mr. R. Glockling, the present Secretary, as a man in sympathy with the work of his department, and thoroughly experienced in the operation and methods along trades union lines, the Executive recommend that labor organizations give their co-operation to make this department useful, and to the benefit of those for whom it is intended to apply.

(Sgd.) P. M. DRAPER, Secretary. (Sgd.) RALPH SMITH, President.

1

#### TRADE DISPUTES IN ONTARIO.

During 1904 the aggregate number of trade disputes, resulting in strikes, reported is 54, involving 171 establishments and 8,945 persons, covering an aggregate of 878 days, giving an average duration of each dispute of 14.41 days, or 10.18 days per person, compared with 82 disputes, involving 429 establishments, 10,564 persons, aggregating 994 days, an average of 12.12 days to each dispute, and 10.62 days per person in 1903.

#### TRADE DISPUTES IN CANADA.

The Labor Gazette in its review of Labor disputes in Canada during 1904, says:

The year 1904 was singularly free from industrial disturbances, being marked by a large decrease in the number and magnitude of trade disputes compared with the preceding year, and the only localities where there were serious interruptions to industry for a long period were at Sydney, N. S., Montreal, Que., and Toronto, Ont. There were in all 103 strikes or lockouts in Canada during 1904, compared with 160 during 1903, 123 in 1902, and 104 in 1901.

#### MAGNITUDE OF TRADE DISPUTES.

During the year there were approximately 15,665 workpeople involved directly and indirectly in trade disputes, the numbers for the different months being as follows:—

#### GREAT BRITAIN.

#### STRIKES AND LOCKOUTS IN GREAT BRITAIN.

The 1903 report of strikes and lockouts in Great Britain, published by the Labor Department of the British Board of Trade, show a continual decrease in the number of Trade disputes during the year 1903. The report says:

"The year 1903 was, on the whole, comparatively free from industrial sloppages. For some years past the number of disputes has been steadily decreasing, and in 1903 there were only 387, the average for the five years, 1898-1902, being 632, and for five years 1893-1897, being 816. The number of persons affected and the aggregate number of working days lost in 1903, were less than in any year for which figures have been recorded. The total number of work people involved in the 387 new disputes in 1903, was 117,000, or about one per cent. of the industrial population of the United Kingdom, exclusive of agricultural laborers and seamen. The disputes, new and old, in progress during the year, resulted in a loss of about 2,300,000 working days, nearly three-fifths of this total being accounted for by disputes in the mining and quarrying industries. The amount of working time lost if spread over the whole industrial population, amounted to less than one-fourth of a day per head during the year.

In the five years, 1898-1902, the average annual number of workpeople affected was 212,000, and the average duration of disputes was 5,716,000 days. In the five years 1893-1897 the corresponding averages for workpeople affected were 330,000, and for the duration of disputes, 11,962,000 days. It is satisfactory to note that the decrease in the amount of industrial disturbances due to strikes and lockouts, has continued during the first part of 1904. Among the causes of trade disputes in 1903, the question of remuneration, was by far the most important. The number of work people directly affected by disputes arising out of refusals to work with non-union men and other questions of trade union principle was less than in the preceding year, but comprised nearly a fifth of the total. The principle agencies for arbitration and conciliation are mainly concerned with the prevention, rather than with the settlement of disputes. During the year 1903, the various Boards of Conciliation and Arbitration are known to have settled 788 cases. Most of the actual stoppages were settled by the parties themselves or their representatives. The number of stoppages settled by arbitration and conciliation was 26, involving 21.700 workpeople.

#### STRIKES AND LOCKOUTS IN UNITED STATES.

The latest data on the subject of strikes and lockouts for 1903, in the United States, is furnished by Mr. Frank Morrison, Secretary of the American Federation of Labor, in his Annual Report to the 24th Annual Convention of that body, held at San Francisco, Cal., in November, 1904; also valuable information as to the movements of the 120 International Trades and Labor Unions of the United States and Canada, *re* changes of wages, hours of labor, benefits dispensed, etc., that will be of interest to the workers of Ontario. The following is culled from the report.:

#### From Secretary's Morrison's Report :

Charters: Reports from the Secretaries of 117 of our international Organizations furnish us with the information that there has been issued during the past year 4,010 charters; 2,643 charters surrendered. 1,409 of the charters surrendered were Locals of International Unions. and 1.234 affiliated direct with the American Federation of Labor. Of the latter number 704 were suspended for non-payment of per capita tax; 352 were ordered to join newly formed International organizations; 178 disbanded, and six charters revoked.

Strikes: Full and complete reports have been received from 109 International Organizations, and from a small number of Local Unions, which show that there were 1,806 strikes in which there were 245,174 involved. Of that number 121,340 were benefitted, and 18,829 not benefitted. The total cost of strikes reported on was \$2,860,620,63..

The following tabulated statement of reports from International Organizations, show that there was a total gain in their membership of 253,845.

#### a Local unions.

b Locals.

NOTE,—In addition to the benefits paid by the International Unions as above stated, in most cases, the local unions attached to Internationals expend larger sums in benefits to their members than do the parent bodies. As these investigations develop, efforts should be made in the near future to obtain this data.

9 L.

A resume of the progress made numerically and financially by the American Federation of Labor, during the past eight years, can not but encourage the trades unionists in their efforts to educate, organize, and federate the wage workers. The growth of the American Federation of Labor has been phenomenal; particularly so in many localities. Where organizations spring up within a few months, it must be expected that in adjusting the members into unions, the membership must decrease somewhat from the high water mark which it reached during the time that the organization wave held sway. A careful investigation and tabulation of the membership of the affiliated organizations of the American Federation of Labor show an increase of over one-fifth of a million of members. My report last year showed an average membership of 1,465,800, while the average membership this year is 1,676,200, a clear gain of 210,400. A remarkable increase, when you consider the number of strikes that have taken place, and the organized effort of the citizens' alliances to retard organization and disrupt unions now in existence.

The following is the average membership reported or paid upon during the past eight years:

1896	
1897	264,825
1893	278,016
1899	349,422
1900	548,321
1902	1,024,399
1903	
1904	1,676,200

# COST OF LIVING AND RETAIL PRICES OF FOOD IN THE UNITED STATES.

The Eighteenth Annual Report of the United States Commissioner of Labor (Carrol D. Wright), recently completed—gives the results of an exhaustive investigation into the subject of Retail Prices of Food and Cost of Living of Workingmen's Families in the United States.

The figures of income and expenditure furnished in detail by 2,567 families in 33 States, representing the leading industrial centres of the country, formed the material for the detailed study of the cost of living. Certain data which do not enter so much into detail were collected in regard to the cost of living in 25,440 families, and the results are extensively summarized in the report.

The table herewith shows, for five geographical divisions and for the United States, the number of families investigated in detail, the average size of family, the average income per family, the average expnditure per family for food, the income and expenditure being for the year 1901.

Number of Families. Average size of family. Average income per family. Average Expenditure per family for all purposes, and average expr nditure for food during the year 1901:

Geographical Divisions.	Families.	Average size of family.	Average income per family.	Average expendi- ture per family for all pur- poses.	Average expendi- ture per family for food.
North Atlantic States North Central States South Atlantic States South Central States Western States United States	1,415721219122902,567	$5 25 \\ 5 46 \\ 5 30 \\ 5 65 \\ 4 69 \\ 5 31$	\$834 83 842 60 762 78 715 46 891 82 827 19	\$777 04 785 95 700 62 690 11 751 46 768 54	\$338 10 321 60 298 64 292 68 308 53 326 90

This table shows that 2,567 families consisted on an average of 5.31 persons, 0.7 person above the average of private families in the whole country as shown by the census of 1900. This larger size of family was not due to any intentional selection of larger families, for the only basis of selection was that the head of the family must be a wage worker or a salaried man earning not over \$1,200 during the year, and must be able to give information in regard to his expenditure in detail. The average income for the year of these 2,567 families from all sources was \$827.19. The average expenditure for all purposes was \$768.54, and the average expenditure for food was \$326.90 per family, or 42.54 per cent. of the average expenditure for all purposes.

That part of the investigation which relates to retail prices is, it should be stated the first extended investigation that has been made into retail prices in this country. All previous price studies covering a period of years have dealt solely with wholesale prices, which, of course, do not represent accurately the cost to the small consumer. In the general trend retail prices follow the wholesale prices, but their fluctuations are smaller and less rapid, and this is clearly brought out in the full report. A comparison of the relative wholesale and retail prices (simple averages) of 25 similar articles or group of articles of food, covering the period 1890 to 1902, inclusive, shows a range of 37.2 per cent. in wholesale prices, but only 15.4 per cent. in retail prices.

In order to ascertain the course of retail prices of food for a series of years and the consequent changes in the cost of living as regard food, the Bureau, through its agents, secured from the books of 814 retail merchants, in the same localities from which data relating to family expenditures were obtained, the retail prices of the principal staple articles of food. Prices were taken for each month during the 13 years of 1890 to 1902, inclusive, which was as far back as it was possible to go. These covered 30 distinct articles, and under each article, various grades and descriptions of that article. From the prices thus obtained relative prices were calculated, the average prices for the ten-year period, 1890 to 1899, being taken as equal to 100. The importance of the various articles or groups of articles of food in the family consumption being known from the expenditures of the 2,567 families referred to above, the relative prices of the several articles of food were weighted according to this importance. The result shown in the following table gives for five geographical divisions and the United States for the period 1890 to 1902 the relative retail price of the food consumed in one year by a working man's family compared with the average price for the ten-year period 1890 to 1899:

## RELATIVE RETAIL PRICE OF FOOD, WEIGHTED ACCORDING TO THE AVERAGE FAMILY CONSUMPTION, 1890 TO 1902.

## (AVERAGE PRICE FOR 1890 TO 1899-100.)

This table shows that the cost of food considered as a whole, reached, its highest in 1902 the average for that year being 10.9 per cent. above the average for the ten-year period 1890 to 1899. Compared with 1896, the year of lowest prices, the cost in 1902 showed an increase of 16.1 per cent.

To assist in making easy a comparison of 1902 prices with those of each of the other years, the following table has been prepared, showing the per cent. of increase of 1902 prices over the prices of each previous year of the period:

#### PER CENT. OF INCREASE IN RETAIL PRICES OF FOOD IN 1902 OVER PRICES IN PREVIOUS YEARS, WEIGHTED ACCORDING TO FAMILY CONSUMPTION.

		Per cent. of increase in 1902 over

If the relative prices of food given above be taken in connection with the average actual expenditure for food in 1901 of the 2,567 families investigated by the Bureau, the amount of the average expenditure for food in each year may be calculated. This has been done, and the results showing for five geographical groups and for the United States the average cost of food per family in each year from 1890 to 1902, inclusive, are given in the following table:

#### AVERAGE COST OF FOOD PER FAMILY, 1890 TO 1902, BASED ON AVERAGE COST PER FAMILY IN 1901 AND THE RELATIVE RETAIL PRICES OF FOOD WEIGHTED ACCORDING TO FAMILY CONSUMPTION.

Year.	North Atlantic States, 1,415 families.	North Central States, 721 families.	South Atlantic States, 219 families.	South Central States, 122 families.	Western States, 90 families.	United States, 2,567 families.
1890	$\begin{array}{c} 312 \ 91 \\ 319 \ 05 \\ 321 \ 31 \\ 326 \ 80 \\ 338 \ 10 \end{array}$	$\begin{array}{c} \$310 & 08 \\ 316 & 75 \\ 308 & 57 \\ 319 & 48 \\ 304 & 93 \\ 297 & 05 \\ 286 & 74 \\ 289 & 77 \\ 298 & 26 \\ 299 & 78 \\ 305 & 54 \\ 321 & 60 \\ 338 & 57 \end{array}$	\$282 72 285 23 282 44 288 30 279 36 275 73 270 42 271 26 277 41 280 76 286 67 298 64 312 33	$\begin{array}{c} \$279 & 54\\ 283 & 64\\ 275 & 71\\ 283 & 37\\ 273 & 79\\ 268 & 59\\ 266 & 40\\ 270 & 50\\ 273 & 51\\ 276 & 80\\ 292 & 68\\ 310 & 75\\ \end{array}$	332 61 335 72 324 90 317 80 306 68 298 65 287 84 286 29 294 01 304 21 302 97 308 53 322 43	318 20 322 55 316 65 124 41 309 81 296 76 299 24 306 70 311 05 314 16 326 90 344 61

From this table it will be seen that the average cost of food per family and in 1902 reached the highest point of the period, being \$344.61, an increase in in 1902 reached the highest point of the period, being \$344.61, an increase, as has already been stated of 16.1 per cent. over 1896, or of 10.9 per cent. when compared with the average for the ten-year period 1890 to 1899. The increase in the cost of living as shown by the results of this investigation relates to food alone, representing 42.54 per cent. of all family expenditures in the 2,567 families furnishing information.

Of the remaining articles, constituting 57.46 per cent. of the family expenditure, certain ones are from their nature affected only indirectly in very slight degree by any rise or fall in prices. Such are payments on account of principal and interest of mortgage, taxes, property and life insurance, labor and other organization fees, religion, charity, books and newspapers, amusements and vacations, intoxicating liquors, and sickness and death. These together constituted 14.51 per cent. of the family expenditure in 1901 of the 2,567 families investigated. Miscellaneous purposes, not reported, for which, from their very character, no prices are obtainable, made up 5.87 per cent. and rent, for which also no prices for the several years are available, made up the 12.95 per cent.

The remaining classes of family expenditure, 24.13 per cent. of all, consist of clothing, 14.04 per cent.; fuel and lighting, 5.25 per cent.; furniture and utensils, 3.42 per cent., and tobacco, 1.42 per cent. For these no retail prices covering a series of years are available, but, accepting as true of wholesale and retail prices here what this investigation has found true in the case of food, namely, that retail prices rise and fall more slowly and in smaller degree than wholesale prices, and examination of the relative wholesale prices of these classes of articles in Bulletin No. 45, giving them their proper weight according to family consumption, leads to the conclusion that the retail prices of these articles as a whole in 1902 could have been but little, if at all, above the level indicated by food.

It is apparently a safe and conservative conclusion, therefore, that the increase in the cost of living, as a whole, in 1902, when compared with the year of lowest prices, was not over 16.1 per cent., the figures given above as the increase in the cost of food as shown by this investigation. This assumes, of course, always the purchase of the same articles and the same quantities in years of low prices, low wages, and more or less irregular employment, and in years of higher prices, higher wages and steady employment.

#### INDUSTRIAL STATISTICS, ONTARIO.

Tables 1-22 record in detail information received from manufacturers 174 schedules only were available for use in Tables A to V, the object of which is primarily to show the relative percentage of the labor cost to the gross value of product. As was pointed out in last year's Report the value of this information will increase as the years go by, as progress or otherwise in this direction will be ascertained by comparison.

The tabulation of the 174 schedules show there were 11,503 persons employed in the 174 establishments reporting. The aggregate number of days in operation, 47.990, and the average number of days worked by each person 275. The gross value of the product of these 174 establishments aggregated \$25,714,296. The amount paid in wages by the same was \$4,400,626 an annual average earning person of \$382.56, or a daily wage-rate of \$1.39. The per cent. labor cost of production being 17.15 per cent. as against 21.69 per cent in 1901, and 25 per cent. in 1903, or a decrease over last year of 7.85, 5.9 in 1902, and 4.54 in 1901. In studying these tables it will be found that many establishments which, while being classified under similar captions, show a considerable discrepancy when the rates of wages paid to the value of the produce is considered. This will be understood when it is explained that in many cases much of the material used in the manufacture by one establishment may be, and often is, the unfinished product of another. Hence, a smaller labor cost in one instance and greater in the other. Of course, therefore, there will be a reversal of conditions as to the cost of material, etc., in such instances. The following circular was forwarded to a large number of the manufacturers throughout the Province:

#### DEPARTMENT OF PUBLIC WORKS, ONTARIO.

#### THE BUREAU OF LABOR.

To the Manufacturers, Contractors, etc., of the Province of Ontario:

GENTLEMEN,—In accordance with the provisions of chap. 14, Statutes of Ontario, 1900, the Bureau of Labor is again seeking the co-operation of the manufacturers, etc., to provide data that will show the industrial development of the Province during the year 1903. The success of the Bureau steadily increases in removing misapprehension and doubt as to the true purpose of the Bureau of Labor, and which has in the past caused hesitancy on the part of the business men in giving the desired information.

As in vast years, the Bureau in asking your co-operation in providing the necessary statistics as will give information *re* industrial and manufacturing progress, gives you the fullest assurance that any information you may give will be received in the strictest confidence, and will only be used in tabulated form, and in such manner as will in no wise disclose the identity of the informant.

The Bureau requests that you will, at your earliest convenience, fill in answers to the questions on accompanying schedule, and have same returned to this office in enclosed envelope. No postage is required.

Respectfully yours,

#### R. GLOCKLING,

Secretary, Bureau of Labor, Ontario.

#### BUREAU OF LABOR.

#### DEPARTMENT OF PUBLIC WORKS, ONTARIO.

# THE BUREAU OF LABOR.

The following questions refer to the year ending 31st December, 1903:

1.	Name of firm
2.	Post office address
3.	Character of business
4.	Capital employed, including plant
5.	Number of days in operation during year
6.	Gross value of product manufactured during year
7.	Has the production increased or decreased during year
8.	If either, what per cent
9.	Value of materials used in production during year, including fuel, gas, etc
10.	Total taxes paid during year
11.	Total insurance paid during year
12.	Amount invested, if any, in permanent repairs or plant enlargement during
	year
13.	Total number of employees during year (wage-earners only), male
	female
14.	Total wages paid during year to wage-earners only, male
	female
15.	Highest weekly wages paid, male female
16.	Lowest weekly wages paid, male female
17.	Total number of salaried clerks and officials, male
18.	Total salaries paid to clerks, officials, etc., during year
19.	Have wages been increased or decreased during the year
<b>2</b> 0.	If either, what per cent
21.	Which class of employees has increase or decrease affected; if both, what per
	cent. in either case
22.	Do you pay your wage-earners weekly, fortnightly or monthly

#### GOVERNMENT EMPLOYMENT BUREAUS.

The system of Government Free Employment Bureaus, first inaugurated by the State of Ohio, U. S. A., in 1890, is fast becoming a factor in all the other States of the Union, also Great Britain, the Australasian Colonies, and throughout Europe. France, Germany, Bavaria, and even Russia have all reached the common conviction by a common experience, that the needs of the unemployed are a legitimate concern of the State.

The system is adopted to the greatest extent on this Continent by the States of Ohio and Illinois, although it is rapidly spreading through the States of New York, Missouri, Connecticut and others. Ohio leads with offices in five cities, viz., Cleveland, Columbus, Cincinnati, Dayton, and Toledo. Illinois follows with three offices in Chicago, and one in Peoria; other States having adopted them in one or two cities. London, England, has five Labor Bureaus, and five in other cities in England, together with a number of agencies of the Salvation Army, and of the Association for Befriending Young Servants; these agencies alone, securing free of charge, situations for 14,994 persons in one year out of 16,382 applications.

France reports situations secured free of charge in a single year for 47,979 persons; in Germany 222,595 idle persons secured situations without cost in the same period. Thus, are the helpless, the hopeless, enabled to secure employment, many of whom would be in their hopeless condition, a greater menace to Society by reason of their inability to meet the extortion of the private employment agencies in the various cities who are ever feeding on the necessities of the unemployed, exacting often the last dollar from the unfortunate, and in the majority of cases without securing the promised "job."

A few years ago, the Commissioner for Ohio, in a Report, said: "The a w creating the Free Employment Office was undoubtedly an experimental departure in legislation. The result of that Act has been a success. I am glad to say that these offices stand well in favor with employers of labor, and working men and women consider it a great privilege to have a place of this kind in their city, where they can go for information, or to secure employment without being charged a fee or being imposed upon in any way."

Before the inauguration of the free public employment offices by the state, private employment offices were springing up in every corner, and were getting fat by their methods of doing business. There are now, few of them left, and where they still exist they are not working in that high-handed manter as was the case a few years ago.

The Twenty-Seventh Annual Report, (1903) of the Commissioner of Labor for Ohio, in Part VIII., dealing with free public employment offices of that State, show as marked increase in business year by year. The summary for the fourteen years of their existence is shown in the following table:

## SUMMARY.

From reports of five offices, with population of cities in which offices are ccated :

			Applications Filled.			
Cities	Population.	Situations Wanted,	Help Wanted	Positions Secured	For Situations.	For Help.
Cleveland	381,768	82,598	62,114	43,527	Per ct. 52 7,10	per ct. 70
Columbus	125,560	59,254	50,821	33,717	56 9.10	66 ¹ 3
Cincinnati,	325,902	69,964	49.361	34.396	49 1.5	697 3
Daytou	\$5,333	\$1.563	74,568	45,605	539.10	•61 1.5
Toledo		67.966	66,424	47,617	70	71 ¹² 3
Grand Total	1.050.3*5	364.345	303.255	204,862		$67^{-1}_{-2}$

The Fifth Annual Report of the Illinois Free Employment offices for year ending October 1st, 1903, says:

"The work of these offices still continues successfully. Their popularity with working people seeking employment and persons desiring to employ help, is unabated. The Superintendents of the offices report that they have not only their regular customers wanting help, but receive many additional requests from large employers of labor, as well as from numerous persons needing only one person, man or woman, a boy or girl."

The following table shows the result of the work of the four offices, from the date of their organization (August 2, 1899) to October 1st, 1903:

	Applicat	tions for Empl	Application for Help.		
Year.	Number Filed	Number Positions Secured.	Number unfilled.	Number Filed.	Number Unfilled
1.83	13,097	6,497	б,600	10.370	3, 273
1900	37.255	31.215	6.067	35,542	4.324
• 1971	27,605	23,996	3,609	28,124	4,125
1962	44.900	40,131	4.719	47,497	7,316
19.63	43,510	39.227	4.255	47,559	5,252
Total	166,397	141.113	25,278	169,092	27,973

### CONSANGUINITY OF LABOR AND EDUCATION.

## An address by William J. Tucker, D.D., President of Dartmouth College, Hanover, N. H.

#### TO THE TWENTIETH ANNUAL CONVENTION OF THE ASSOCIATION OF OFFICIALS OF BUREAUS OF LABOR STATISTICS OF AMERICA, CONCORD, N. H., JULY 12, 1904.

What I have to say is in the nature of some reflections upon the mind of the wage-earner-an expression which I borrow from the opening sentence of the recent book by John Mitchell on organized labor: "The average wage-earner has made up his mind that he must remain a wage-earner."* I would not take this generalization in any unqualified way. The author has himself qualified it by the use of the word "average." But when reduced to its lowest terms, it is, I think, the most serious statement which has been made of late concerning the social life of the country, for it purports to be the statement of a mental fact. If Mr. Mitchell had said that in his opinion the conditions affecting the wage-earner were becoming fixed conditions, that would have been a statement of grave import, but quite different from the one made. Here is an interpretation of the mind of the wageearner, from one well qualified to give an interpretation of it, to the effect that the average wage-earner has reached a state of mind in which he accepts the fixity of his condition. Having reached this state of mind, the best thing which can be done is to organize the wage-earner into a system through which he may gain the greatest advantage possible within his accepted limitations. I am not disposed to take issue with the conclusion of the argument (I am a firm believer in trade-unions), but I do not like the major premise of the argument. I should be sorry to believe that it was altogether true. And in so far as it is true-in so far, that is, as we are confronted by this mental fact—I believe that we should address ourselves to it quite as definitely as to the physical facts which enter into the labor problem.

If "the average wage-earner has made up his mind that he must remain a wage-earner," we have a new type of solidarity, new at least to this country. No other man amongst us has made up his mind to accept his condition. The majority of men are accepting the conditions of their daily work, but it is not an enforced acceptance. This is true of the great body of people engaged in farming, in mercantile pursuits, and in most of the underpaid professional employments.

In the social order, one of two things must be present to create a solidarity—pride or a grievance. An aristocracy of birth is welded together by pride. It perpetuates itself through the increasing pride of each new generation. An aristocracy is an inheritance, not of wealth, for some "families" are very poor, but of an assured state of mind. An aristocrat does not have to make up his mind; it has been made up for him. An aristocracy

*The paragraph from which this quotation is made is as follows: "The average wage-earner has made up his mind that he must remain a wage-earner. He has given up the hope of a kingdom to come, where he himself will be a capitalist, and he asks that the reward for his work be given to him as a working man. Singly, he has been too weak to enforce his just demands, and he has scught strength in union, and has associated himself into organizations." is in this respect entirely different from a plutocracy. A plutocracy is at any given time merely an aggregation of wealth. People are struggling to get into it and are continually falling out of it. There is no mental repose in a plutocracy. It is a restless, struggling, disintegrating mass. It has no inherent solidarity.

Next to pride, the chief source of solidarity is a grievance. The solidarity may be transient or permanent. It lasts as long as the sense of grievance lasts. Sometimes the sense of grievance is worn out; then you have to invent some other term than solidarity to express the deplorable condition into which a mass of people may fall. But whenever the sense of dissatisfaction is wide-spread and permanent it deepens into a grievance which creates solidarity. The human element involved is at work to intensify and to perpetuate itself.

Now, when it is said that "the average wage-earner has made up his mind that he must remain a wage-earner," the saying assumes unwillingness on his part, the sense of necessity, and therefore a grievance which, as it is communicated from man to man, creates a solidarity. If you can eliminate the grievance, you break up the solidarity. The wage-earner then becomes, like the farmer, the trader, the schoolmaster, a man of a given occupation. The fact of the great number of wage-earners signifies nothing in a social sense, unless they are bound together by a grievance, unless they have made up their mind to some conclusion which separates them from the community at large or the body politic.

We have come, it seems to me, to the most advanced question concerning "labor," as we find ourselves in the presence of this mental fact which Mr. Mitchell asserts. What can be done to so affect "the mind of the wageearner" that it will not work toward that kind of solidarity which will be of injury to him and to society?

It is, of course, entirely obvious that a greater freedom of mind on the part of the wage-earner may be expected to follow the betterment of his condition. This betterment of condition is the one and final object of the tradeunion. I doubt if one-half of that which the trade-union has gained for the wage-earner could have been gained in any other way. I doubt if onequarter of the gain would have been reached in any other way. Trade-unionism is the business method of effecting the betterment of the wage-earner under the highly organized conditions of the modern industrial world. But tradeunionism at its best must do its work within two clear limitations.

In the first place, every advance that trade-unionism tries to make in behalf of the wage-earner as such finds a natural limit. The principle of exclusiveness, of separate advantage, is a limited principle. At a given point, now here, now there, it is sure to react upon itself, or to be turned back. Organization meets opposing organization. Public interests become involved. Moral issues are raised. The co-operating sympathy of men, which can always be counted upon in any fair appeal to it, turns at once into rebuke and restraint if it is abused. The wage-earner in a democracy will never be allowed to get far beyond the average man through any exclusive advantages which he may attempt through organization.

In the second place, trade-unionism can deal with the wage-earner only as a wage-earner, and he is more than a wage-earner. There comes a time when he cannot be satisfied with wages. The betterment of his condition creates wants beyond those which it satisfies. The growing mind of the wage-earner, like anybody's growing mind, seeks to widen its environment. It wants contact with other kinds of minds. When once it becomes aware of its provincialism it tries to escape from it—a fact which is clearly attested in the broadening social and political relations of the stronger , labor leaders.

But while I believe that trade-unionism is the business method of enlarging the mind of the wage-earner through the betterment of his condition, I think that the time has come for the use or adaptation of other means which may give it freedom and expansion. One means of preventing a narrow and exclusive solidarity of wage-earners is greater identification on their part with the community through the acquisition of local property. Mobility is, in the earlier stages of the development of the wage-earner, the source of his strength. He can easily change to his interest. No advantage can be taken of his fixity. He can put himself without loss into the open market. He can avail himself at once of the highest market price, provided his change of place does not affect injuriously his fellow workers in the union—an exception of growing concern.

But in the more advanced stages of labor the wage-earner gains the privilege of localizing himself, and in so doing he takes a long step in the direction of full and free citizenship. A good deposit in a savings-bank adds to his social value, but that value is greatly enhanced by exchanging it for a good house.

I am aware that in advancing the acquisition of local property I touch upon the large and as yet undetermined question of the decentralization of labor. If the great cities are to be the home of the home of the industries, then this idea can be realized in only a partial degree through suburban homes.' But if the industries are to seek out or establish smaller centres, then the wage-earner has the opportunity to become more distinctly and more conspicuously a citizen.

Another means of giving freedom and expansion to the wage-earning population in place of a narrow and exclusive solidarity is by giving to it ready access to the higher education. There is no reason why the former experience of the New England farmer and the present experience of the Western farmer should not be repeated in the family of the intelligent wage-earner. The sons of the New England farmer who were sent to college identified their families with the state and church and with all public interests. They lifted the family horizon. I have said that this experience may be repeated in the families of the wage-earner. It is being repeated. Let me give you an illustration with which I am familiar. The students at Dartmouth are divided about as follows, according to the occupation of their fathers: Forty per cent. are the sons of business men, twentyfive per cent. of professional men, fifteen per cent. of farmers; of the remaining thirty per cent., more than half are the sons of wage-earners. The per cent. from the shops now equals that from the farm. I have no doubt that this proportion will hold in most of our Eastern colleges and universities. The home of the wage-earner is becoming a recruiting ground for higher education which no college can afford to overlook. As Professor Marshall, the English economist, has said, "Since the manual-labor classes are four or five times as numerous as all other classes put together, it is not unlikely that more than half of the best natural genius that is born into the country belongs to them." And from this statement he goes on to draw the conclusion that "there is no extravagance more prejudicial to the growth of the national wealth than that wasteful negligence which allows genius which happens to be born of lowly parentage to expend itself in lowly work." So much for the necessity of flesh, virile and self-supporting stock to the higher education, if it is to discharge its obligation to society. Virility is as necessary to educational progress as it is to industrial progress. I am in the habit of saying that, from an educational point of view, it is on the whole easier to make blue blood out of red blood than it is to make red blood of blue blood. The reaction from the higher education upon the family of the wage-earner is yet to be seen, but no one can doubt its broadening influences. As the representatives of these families became more numerous in our colleges and universities, and as they have time to make a place for themselves in all the great callings, they will of necessity lift those whom they represent toward their own level. Some of them will become captains of industry. I believe that in that capacity they will also become leaders of labor. For, as it seems to me, the settlement of the relation of capital and labor is to be more and more, not in the hands of men who have been trained away from one another, but in the hands of men who have been trained toward one another. The industrial world is becoming a great school in which men must learn to practice the industrial virtues. And among these virtues I put, next to honesty in work and in the wage of work, and absolute fidelity in keeping agreements at any cost, that sense of justice which comes of the ability to put one's self in another's place. When we have capitalists and leaders of labor, it must be both at one and the same time, who are really able "to reason together," we shall have industrial peace. This will mean arbitration at first hand.

I mention another source of freedom and breadth and power to the wageearner-a source which is common to all-namely, satisfaction in his work. The wage is not and never can be the sufficient reward of labor. This is just as true of the salary as of the wage. The difference at present lies in the fact that the person on a low salary is apt to take more satisfaction in his work than the person on a high wage-the school-teacher on \$800 or \$1,000 a year, in distinction from the mechanic on four or six dollars a day. The present ambition of the high wage-earner seems to incline more to the pecuniary rewards of his work than to the work itself. Doubtless this tendency is due in no slight degree to the fact that the wage-earner is brought into constant and immediate contact with the money-making class. He sees that the value of the industry is measured chiefly by its profits. Sometimes the profits are flaunted in his face. At all times the thing most in evidence to him is money. I deprecate this constant comparison between the capitalist and the labor. The comparison were far better taken between the workman and the other men whose chief reward is not money. The old-time professions still live and maintain their position though a certain detachment from pecuniary rewards. The exceptional doctor may receive large fees, but his profession forbids him to make a dollar out of any discovery which he may make in medicine. The exceptional minister may receive a large salary, but his profession puts the premium upon self-denying work. Even the law is more distintively represented by the moderate salary of the average judge than by the retainer of the counsel for a wealthy corporation. The skilled workman, the artisan, belongs with these men, not with the money-makers. In allowing himself to be commercialized he enters upon a cheap and unsatisfying competition. His work is an art, and he has the possible reward of the artist. Under medievalism the guild and the university were not far apart. I should like to see the relation restored and extended.

I am not speaking in this connection of the unskilled laborer. There is a point below which it is impossible to idealize labor. The man who works in ceaseless and petty monotony, and under physical discomfort and danger, cannot do anything more than to earn an honest livelihood, if, indeed, he receives the living wage. But he is as far removed from the advanced wageearner of our days as he is from any of the well-supported and well-rewarded classes. For him we are all bound to work, and to act, and to think—not as an object of our charity, but as a part of our industrial brotherhood; and whenever a great labor leader, be he John Burns or John Mitchell, goes to his relief and tries to give him self-supporting and self-respecting standing, we should count it not a duty but an honor to follow the leading; but equally do I hold it to be a duty and an honor that, as the wage-earner advances in intelligence, in pecuniary reward, and in position, he should take his place without any reservation whatever among those who are trying to meet the responsibilities which attach to citizenship in a democracy.

I have not attempted, gentlemen, to enter at all in his brief discussion into the technical aspects of your work, but I am aware that I have covered ground entirely familiar to you. Very likely your broader judgment and clearer insight into details may modify some of my positions or make them untenable. But viewing the present disposition and purpose of the bestintentional leaders in the ranks of organized labor, with many of whom you have to do, I am convinced that their avowed object is not commensurate I am convinced that the interpretation put upon with their opportunity. the mind of the wage-earner, if it represents a present fact, ought to suggest a duty toward the mind of labor. That duty is to give it freedom, breadth, expansion; to incorporate it into the common mind of aspiration and hope, the American type of mind. In saying this I do not overlook or minimize the imperative duty of raising the lowest wage-earner to the highest place to which he can be lifted, and of giving a future to his children and to his children's children. I would urge, in the full apostolic sense, the old apostolic injunction-""We that are strong ought to bear the infirmities of the weak." But I would not stop with this duty. I would make the wageearner, as he grows strong, a helper all round; a partner in all the serious work of the republic; an active power in that commonwealth which draws no line within the wants or hopes of man.

Mr. BEALIN, (superintendent free employment office, New York city): I would like to ask President Tucker a question. In speaking of the advantages of higher education when obtained by the children of wage-workers, the the paper read would leave the impression that this advantage would create a kind of messenger of peace between the two classes of society-between the employing class and the employed. While I am in favor of education, I rather think there is danger that, instead of the boy who goes from the home of the wage-worker to college remaining in contact and in sympathy with his family in all things, in spirit and in body, the chances are that he would be ashamed of his low origin, and that in after-life he would not be found associating with the people of his birth and of his early environment; that he would be in the opposite class, doing injury instead of service in a great many instances. I think that perhaps it would result in his getting in on the outer edge of what is called our better class, and that this would create a cleavage between the son and his father and between the child and the home.

President TUCKER: I will give a single illustration of what lies within my observation. I have said that at Dartmouth perhaps fifteen per cent. of our students are sons of wage-earners. In connection with our graduating exercises is a social reception, at which the students very generally bring their friends, and I do not know of anything that has touched me more than the invariable custom of these men in bringing their fathers and mothers and introducing them with a loyalty and a pride into the class of people variously represented without the slightest embarrassment and with the utmost naturalness. So far as my observation goes, I do not see the danger to which reference has been made. I understand entirely what the possibilities are in that direction; but if the training of our colleges is to take the snobbery out of men and quicken their sympathy, I think that this result ought to hold with regard to the son of the wage-earner as well as with the son of anybody. It is all in the atmosphere, I think—in the manner in which colleges go about their work and the way in which they create or fail to create a social democracy.

MARYLAND (Mr. Schonfarber, assistant commissioner). While I do not wish to enter into a discussion of the subject, I desire to say one word. If think the teachings of labor organizations for the past forty years have been on the lines discussed and advocated by President Tucker. I know of one organization, particularly, which was very strong and powerful in this country at one time, and which made its basic principle education, and which had for the first plank of its platform some such suggestion as that offered by President Tucker.

President WRIGHT: So far as I know, Mr. Schonfarber, all the labor organizations have in their platforms a declaration in favor of education.

NEW YORK (Mr. McMackin): I feel more than pleased with the address that has been delivered. I think it is one of the very best that have been delivered before this association since I became a member of it, and is somewhat in line with the discussion we had at St. Louis-if you will allow your minds to travel back-and that was brought up by my friend from Kansas (Mr. Johnson). The paper, if it shows anything, shows what all men who take any interest in reform most have recognized the last ten years, perhaps-that there is a growing affinity between the toiler and the university man; and that sympathy. if T may so term it. is one of the great saving qualities of the whole country. It is a fact to-day that if we can only centralize thought in the subject, if we can only bring together the minds of the university man and the laboring man and the enlightened employer, we will do more to solve what is termed the labor question than can be done by any other neanle on this earth. We are doing the most now I think the question which Mr. Realin brings up-the tendency of the child to feel that he is above his own immediate relatives-will fade away in the light that education gives him: that he will not be ashamed of his parents or of his home: that the proverty-stricken parents are in that condition, not through any fault of their own. but for the want of a common understanding: that is due to a false system of economy, and hence the child's natural affinities ought to grow stronger as his education is broadened. I think, in that way, the paper is one of the best, and I am deeply thankful to the president of Dartmouth College for delivering it here to-day.

President WRIGHT: I may say, generally, that I would like to supplement President Tucker's observation by my own experience in the new college over which I have the honor to preside. More than three-quarters of the students are sons of mechanics. That is naturally so in a city like Worcester. devoted, as it is, to skilled trades. I notice that those young men introduce me to their fathers and mothers with as much pride and with as little feeling of humiliation as the sons of more wealthy parents. And this other observation may be made: Not one of us knows of any man or woman who is struggling to secure a living—our immigrants, if you please—who does not wish his or her sons and daughters to have an education of which they were deprived. I think that is the very strongest feeling among people who have to work—who are, perhaps on account of lack of training, obliged to work with their hands. Of course, as the gentleman from New York (Mr. Bealin) remarked, there are times when a broader education produces a certain kind of restlessness and discontent, but it is the discontent that comes of knowledge of past conditions and that spurs them on to newer and higher ambitions. I think, as Mr. McMackin remarked, that the affinity between the wage-earner and the colleges and universities is growing stronger and stronger. We have discussed that in some of our conventions, especially in the one at St. Louis. While forty or fifty years ago-maybe less-there was a feeling on the part of the workers and the toilers of society antagonistic to universities and colleges, that was because the colleges and the universities felt that they were the sole custodians of knowledge. The attitude of all higher institutions of learning to-day is the reverse of that, and every college that hopes to advance its works feels incumbent upon it to show that it is in sympathy with the public at large, and aims to do something for the public beyond what it does under its curriculum and for its students alone. I believe that is true of all progressive colleges. President Tucker observes that it is true at Dartmouth. I think the little danger which comes from the old adage "A little knowledge is a dangerous thing" can be relieved only by more knowledge, which will show that knowledge is not a dangerous thing, but something advantageous to the one that possesses it.

MASSACHUSETTS (Mr. Pidgin): I have been greatly interested in and much impressed by the paper read by the president of Dartmouth College, and I think that we, as officers of the labor bureaus of the country, can do something to ascertain whether the statement made by Mr. John Mitchell and quoted by President Tucker is correct. I think if we should send out letters to these wage-earners in their respective states and ask them the question whether they were satisfied with their condition-whether they were contented to remain wage-earners and satisfied to have their children remain so -we would get broad light on the subject. I feel sure, in Massachusetts, I should find that in eighty or ninety per cent. there is certain contentment with their condition as being the best possible at the present time, but that they are looking forward to something better for themselves and for their sons and daughters. As an illustration: I am a graduate of the English high school, in Boston. There has been a great change in that school—in the nationalities of the pupils attending it. Two years ago I was interested in one of the classes from that school. I became acquainted with one of its prominent members. At the time of the graduation of the class I found that five of the leading scholars bore Jewish or Italian names, and one of the brightest was a Russian Jew, who had made his preparation to go to Harvard. His father was a comparatively poor man, yet he recognized the necessity of pushing his children forward in this country, and was economizing in every way to put his son through college. I think that can be taken as a pretty strong indication that the new immigrants to this country have strongly in their minds the idea that their children ought to occupy much better positions than themselves, and are not satisfied to be simply hewers of wood and drawers of water, as in the olden days.

Mr. NORTH (census office): I would like to add a word to the commendation which has been given President Tucker's address. I was very much impressed by what he said. I think it will have more influence because of his candid statement of personal sympathy with the trade-union idea. Starting with that statement, his address is one which ought to be read and circulated among the trade-unionists themselves. I believe he is entirely right in controverting John Mitchell's statement that the average working man does not hope to lift himself above his immediate environment. That statement may possibly be true of the class of working men with whom John Mitchell is most familiar—the miners—the class in which the predominance of unskilled labor is the greatest. It certianly is not true of mechanical labor; and in justification of that statement, I am able to say, after a long and intimate association with manufacturers, that a very large proportion of the most successful manufacturers I have known, particularly here in New England, have been men who have come straight up from the ranks of labor. President Tucker's suggestion about the relationship of education to tradeunionism and to the future of the working man is potent to the last degree, not so much perhaps for the university and the college, as for the common school and the high school. If there is any danger in trade-unionism-and at times it appears as though there were great danger—that danger, in my judgment, is going gradually to disappear through the influence of education, and the common school and the high school are going to be even more potent than the university in teaching the trade-unionist whatever he may yet have to learn about his duties to society. Trade-unionism exists in no other country where the opportunities for education are so great as in this country, and therefore it is in the United States that the future of trade-unionism is the most promising and the most auspicious.

ONTARIO (Mr. Glockling): As one coming from the country to the north of you, I am moved to add briefly my quota of appreciation for the paper we listened to yesterday from President Tucker. I come from the simple ranks of labor. My parents were unable to afford me an education. In my experience of labor then till now I have discovered that one of the fundamental desires of labor organizations has been the desire for *equality of opportunity*. To me the paper read by President Tucker breathed that spirit of equality of opportunity, and the strongest element of encouragement and hope that I derive from the paper was that a gentleman in President Tucker's position had the courage to express the sentiments he expressed. We have little difficulty in finding incidents where men of President Tucker's standing in public life have had the courage to express these sentiments, but they found it to their material disadvantage, and that has, to some extent, precluded others in like positions from expressing them.

I believe that words such as fell from President Tucker's lips yesterday, coming from him in his official position, will do more than any other one thing for the settlement of these questions. I believe that the great majority of our public instructors have sentiments similar to those expressed by President Tucker, but material environment prevents their expression. The hope I have is that it will be an inspiration to other men in similar positions to ience from then till now I have discovered that one of the fundamental decrease the forces of opposition so falsely assumed by men who have retarded the growth of such sentiments. That is the encouragement I have, and which I will take home to my people, and it will be appreciated. We feel that if the public instructors of this country will take up this position as they find it with frankness, and with the opportunity of giving expression to their thoughts, it will go further to settle this question of dissension between capital and labor than any source I am aware of. From the spoken truth will come that correct understanding of economic relations that will preclude the present hostility existing between these two great forces.

11 I.

PRESIDENT WRIGHT: It affords me great pleasure to introduce to the association at this time Judge Wallace, of Newcastle, Pa.

Mr President and Members of the Association: Several weeks ago your secretary (Mr. Clark) asked me to accompany him to the city of Concord. At that time I was busily engaged in my work, and informed him when that was through I would be glad to take a vacation and come with him to New Hampshire, but that I would put one limitation upon my visit, which was that I would not be asked to make a speech. I talk for about ten months in the year, and I think that when I get a vacation at the end of those ten months I ought not to be asked to talk the other two. But you all know the tricks your secretary will do, even on his best friends. So I am here now, through Mr. Clark's art, or artifice, and I could not get away without saying a few words of appreciation. This is my first opportunity of listening to any discussion of this kind, and I have enjoyed it. I have enjoyed the hospitality by the citizens of New Hampshire and of Concord. I have enjoyed the visit I have had with your president, and as I sat here and listened to the reports from the several states I was impressed with the importance of your work. Coming as I do from a thickly populated settlement—a settlement made up almost entirely of wage-earners—it is of more importance to me.

As I sat here and listened to the eloquent address of President Tucker, it raised some thoughts in my mind which I think ought to be considered; and while I am not here to deliver any address upon the sentiments that were expressed by President Tucker, or in any way to criticize that able paper, at the same time I feel like saying what the boy used to say: "Those are my sentiments." And when President Tucker took up the words of John Mitchelland I would not detract one jot from Mr. Mitchell's reputation, or his ability, or his knowledge of the wage-earner—I beg to differ with Mr. Mitchell when he says that the average wage-earner is contented or is satisfied. I might say from my experience—and I have been one of them—that the average wage-earner is, perhaps, more contented than any other worker, be he in a professional line or not. In our community the average worker has his home; he owns it. The ownership of property by the worker is not the exception but the general rule; and when that worker finishes his daily, toil and goes home to meet his loving wife and family, tired as he is, and retires to visit with them, with no thought about the work of to-morrow, what more could he ask of contentment and happiness? Compare him, if you will, with the man who goes home from his office or place of business, with stocks fluctuating as they have been. Is there contentment there, or is the contentment in the wage-worker's home? I need not answer.

But we have these questions that come before us for the betterment of the wage-earner, if it can be done. What means can we suggest, if any, to bring together the capitalist and the wage-earner? Your Association has sought this for years, and has been of great benefit to both; but when we come to look on it from the standpoint of some of us who have been elevated from the ranks, all these questions coming before us go back to these: How can we help them? How can we bring about the equality of the masses? As President Tucker said yesterday, it is easier to bring up the red blood than to bring down the blue. Let us see if we can make any suggestion whereby we can do away with the red and the blue blood, and have the color white. This is what we ought to do—make one color, and that pure and white.

We, as lawyers, are taught, and we practise, the drawing of examples or comparisons, and those to the extreme, in order to reach our client's interest and to show our cause to the best advantage. It has been suggested by the remark of Mr. Schonfarber, in his discussion as to the cost of living, that we Jo not all live alike, and that the cost is not the same in all states or places. That is true, and we might as well go back to the very center of the cost of living-the home-when we undertake to seek some means of accomplishing cur object of bringing the color to white, because education is what it will re-Habits are what it will require. The common school, as was said auire. yesterday, is the foundation, you may say, but that is built upon home train-From the mother comes the first principles that ought to be enlarged ing. upon. The germs that are going to bring this color to white ought to be started in the home, and under the influence of the mother, carried from that to the public school, and from that to the high school. And then we come to the climax when I say to you, gentlemen of this Association, that I believe the thing that is going to do more to bring that color to white is the education of the wage-worker in our universities and in our colleges. Gentlemen of this Association, I say to you that I think we ought to do all we can to induce our colleges and our universities to bring more of the wage-earners to collegiate and university education. I said to you a moment ago that we seek extremes when we undertake to show our side of the cause.

With all due respect to the different professions, the best way to show how these habits, this education, will bring about benefits is to compare one of my own profession with a minister after they leave college together. This is simply for the purpose of giving you the idea that I hold in my own mind of going back to the foundation and of seeing how there can be some means of reaching the desired effect. The lawyer and the minister enter college, and they graduate. The lawyer goes to the office or to the law school, and is udmitted to the bar-the proudest day of his life. The minister, after his graduation, goes to the seminary and is turned over to a charge. The lawyer, gentlemen of this Association, in our state, and even in our community, does not make a fortune the first year; he is fortunate if he can make ends meet, without even having much left to purchase a library. In that first year the very foundation of his success is formed, because upon his entry in bis profession he forms the habits that make him economical, make him careful, make him saving; so, as the years go by and his fees increase, those habits formed that first year follow him through, and when he reaches middle age his earnings have increased, and he has accumulated something; those habits have taught him to take care of those earnings. He lives in the way he started, and in after-years you point to him with sufficient of the world's goods and with ability to lend a helping hand to others.

Take the minister-and I am speaking of the average, of course. After he leaves college and goes to the seminary he gets a salary. Circumstances make him keep up appearances and live as he thinks he ought to live. Hia sa'ary is constant. His living is different the first year of his life professional from that of an attorney. The result is that the foundation of his future life The habits are there; they follow him, and he goes along with is formed. an increased salary those habits increase. He does not have the habits of frugality or of carefulness that the lawyer is compelled to form, so that when he comes to the middle age he must look around and see whether his classmate can help him in his old age. I draw this illustration simply to lead you to my idea of the education of the wage-worker, of the kind of feeling that one ought to have toward the other, because, through this education, which starts at the home and goes through the college, must be some means of helping us to bring the color to the white.

Gentlemen of the Association, I assure you that I appreciate my visit here. I have learned much from your proceedings. This is a new experience to me; I am going home wiser, and with many ideas to broaden me. MARYLAND (Mr. Schonfarber): There was one part of President Tucker's paper which struck me, as one of the wage-earning class, and which it seems to me ought to attract the attention not only of the members of this convention but of the entire country, and that is the very radical acknowledgment of President Tucker, probably for the first time in the history of this country, from his position as an educator, that wages are not all of the compensation due the wage-earner. There is very much more due him, as implied in the paper. How much more it is almost impossible for any man to say. But this we do know: that all this republic is—all that this country is commercially, patriotically, and in every other way that can be mentioned—is due to the discontent, the energetic discontent, of the wage-earner.

I want to say, as an humble follower of some of the labor leaders in my early youth, that I disagree with them when they say that the wage-earning class of his country ever has been, or is to-day, or ever will be, content and satisfied with the limitations and environment that have been reached. The man who digs in the ditch does it with the hope and inspiration nerving his arm that when he has passed away the child who follows him may be on top of that ditch, superintending the work. With that inspiration, he is seeking to avail himself of all the educational advantages of the country, which are so gloriously advancing and improving, and it is probably his greatest pride tocay to see his child able to take a position in life's struggles a step or two in advance of that which he occupied when he started out. This applies not only to the immigrant, but to the native as well; not only to the laborer in the city, but to the farm laborer in the country. It is due to that inspiration that the vast sums of money are contributed daily and weekly and yearly by our cities and our states to the upbuilding of our public-school system. recognize, probably as well as others, the great benefits to be derived from higher education, from the co-operative work of college-bred men with labor organizations or with men in labor's ranks, and I want to say, not only from my experience in the city of Baltimore, but from my observation in other cities of the country, that that co-operation has been of the greatest help to the wage-worker and to the organized laboring men of this country. broad-minded, liberal student of the college has gone into the callings occupied by the wage-earner, has uplifted him, and has extended his hand and his encouragement; and the use of his education in such a way has uplifted the laboring man and helped him to build up his defensive organization, and has increased his aspirations and his hopes for his children. I believe that labor o ganizations have recognized this element.

I believe also that they have recognized more than the unorganized classes, probably, the value of education for the children that are to come after them, and for their own benefit as well. I alluded yesterday or called attention to the fact that a certain labor organization had made the ability to stad and write one of the necessities before becoming a member of that organization. It went further than that. When a man applied for membership in the organization, and he was unable to read and write by reason of his env'ronment or his lack of opportunity in early life, he was taught, before entering the sanctum of the lodge, how to write his name on a piece of paper. Some of you who were members of that organization will remember very well that one of the ceremonies attendant upon becoming a member-one of the first ceremonies, the first *real* ceremony, upon entering the lodge room of that organization-was to write your own name. That was certainly a recognition of the necessity of education of the masses. The same organization had this plank, the first plank in its platform : "That industrial and moral worth, not wealth, should be the standard of individual and national greatness."

Certainly there could be no higher standard, and that standard cannot be reached without education, industrial as well as moral and intellectual.

I therefore believe that President Tucker is entirely right when he says that the discontent of the masses is making this country grow; and that discontent is not particularly with the home environment which the labors of the wage-worker have created, but the general discontent with lack of opportunity and the disadvantages of opportunity offered to the wage-earner. He is striving by means of education to secure that equality of opportunity which Judge Wallace implied is what we demand and what the wage-worker of this country only needs to secure all that he is entitled to ; and he is not entitled to any more than what he earns and what he deserves by his own efforts and  $b' \varepsilon$  own aspirations.

IowA (Mr. Brigham): I want to say, in regard to President Tucker's paper, that I thoroughly agree with him on the whole, and hail with delight the expression, by men of President Tucker's class, of friendship, sympathy and desire to co-operate with and help the laboring man. But what I desire t · call attention to this morning in the discussion of President Tucker's paper is the statement made in regard to laboring men owning their homes, and I want to say something about what was disclosed to me in the inquiry made in our wage-earners' blank for the last biennial period, where a man was "Do you own your own home?" and replies were made by the difasked : ferent craftsmen who filled out these blanks. One man, in reply to the ques-tion "Do you own your own home?" said : "Not on your life. while I work for this company; would not consider it safe for a station agent on this line to invest in property; the wages are already so low that I barely make a liv-, g, but they would be cut as soon as the company found I was tied." That That man was a station agent and telegraph operator, a very is one case. much overworked class in our state. You will notice, by looking at the Iowa tenth biennial report, a special chapter devoted to telegraphers and station agents. What is true of the telegrapher is also true of the train and engine men, in railroad service, in a great many cases. The fact that they are tied up in the purchase of property on payments is a powerful lever in the hands of the company to hold wages down or prevent a demand for an increase, and only those who have sufficient amount to make a large payment down can be induced to invest. Of the wage-earners of Iowa, in all crafts, who reported to the bureau for 1901-'02, only thirty-three per cent. owned their own homes.

It is evident to me that there are some things closely identified with the trade-union movement that men in President Tucker's position are unable to learn or become acquainted with until they have rubbed up against the wageworker himself. I am exceedingly glad to know, however, that we have such men as President Tucker all over this land of ours. and they are becoming awakened to the necessity of taking their position and contributing their part to the solution of this important question. I want to say that every professor of political economy in Iowa, as also every college and school within the borcers of the state. is communicating from time to time with our bureau and requesting all the information and data we are able to furnish; and we are furnishing right along material for debating societies, not only in the state of Iowa but in adjoining states. In my judgment, as a member of a tradeunion, I believe it is the most hopeful sign of the times that these gentlemen who have had the advantages of a higher education and are in educational work are taking hold with a will to assist in the solution of this question, but I desire to add that there are still some things in connection with the tradeunion movement for such gentlemen to investigate.

INDIANA (Mr. Johnson): Having lived all my life in the less populous section of our country (the middle West), the question of existence or subsistence, possibly, has not appealed to me with the same earnestness it has to those living in the more populous sections, where the race for a living would appear to be a little more strenuous. I was greatly pleased with the address by Doctor Tucker yesterday morning, the more so because it touched upon lines in harmony with my own experiences. For the greater part of my active life I have been a teacher in the public schools, and from this standpoint have had to do with young men and women in preparing them for the activities of life. From observation and experience in this field, I am decidedly of the opinion that, so far as education has to do with the life and future success of the boy or girl, much depends upon its being along proper The tendency of all true education is, or at least should be, to dignify lines. labor of all kinds. Having studied the labor question from an educational standpoint, I am inclined to the opinion that many of the difficulties found is the solution of this problem have had their origin, primarily, in the education of the young man. We take the boys and girls as we find them, and by education make them what they should be; it too often happens that they have wrong conceptions of life, and by education and training must be brought to see it in its reality. It is not an unusual thing to hear of the boy, emerging from the public school at the age of sixteen or eighteen, "seeking a position, or discussing the salary question," when in fact he should be looking for "work," with a willingness to do it at such compensation as his services are worth.

A few years ago it was my pleasant duty to assist a young man, educated in one of our universities, in obtaining a place in harmony with his education. Everywhere I was confronted with the questions, "What are his habits?" "Does he smoke?" "Does he drink?" "Is he honest?" The matter of training, while regarded, was a secondary matter. Men whose business it was to employ men said their greatest difficulty was "in securing trustworthy men; young men upon whom they could rely to do honest, faithful service in the various departments of labor." My young man was finally rewarded in his efforts, by securing a place as a special apprentice in the motive-power depertment of the Pennsylvania Railroad Company. The period of apprenticeship was for four years, and his wage schedule, fixed by the company, was from nine to fifteen cents per hour for the four years, respectively. He completed his four years' apprenticeship period in three years, and, at the end of the third year, was assigned to an important position on a salary basis of \$900 per year, and now, after six years with the company, he is sent back to the same shop in which he began, with increased responsibilities and a corre-sponding increase in salary. During this period, not one word ever passed between him and his employers concerning his pay. In the beginning, he accepted cheerfully the compensation offered, and every increase in salary was a recognition of his worth, brought about by an interested service shorn of all "pulls and demands." When I have had occasion to advise young men seeking employment, I have invariably said to them : "Leave out of your consideration the question of wages. Accept such a position as by education and training you may be fitted for; throw into it your honest effort and time will bring you your reward, just as surely as water seeks its level." Poverty is no Farrier to the energetic young man seeking to get on in life, and there can be no good excuse for his not having by education and training such preparation as will bring to him the opportunity to exercise his talent in fields bounded only by his own limitations of power.

No. 29

While listening to President Tucker I was deeply impressed with the idea cf contentment, as suggested by the quotation from John Mitchell relating to the attitude of the average wage-earner. Content! Content! What a word! The man who has but little and is content with what he has is, after all, the really happy man. After having worked behind my desk all day, I have gone home at night with my brain racked and perplexed with difficult problems before me, and I have envied the happiness and comfort of my neighbor who, with his dinner-pail in hand, covered with the dust from the factory or field, comes into his modest home, sits down with his family to his scanty meal, it may be, and for the evening quietly rests in the bosom of his family, retiring at an early hour to enjoy the sweet sleep that comes after a hard day's tcil. I have lived upon the farm; I have spent many hours as teacher in the public schools; I have worked in the office behind the desk; but the happiest years of my life were those I spent on the farm doing farm work.

MARYLAND (Mr. Schonfarber): When you find a man who is absolutely contented, is he not a dead man?

INDIANA (Mr. Johnson): No, sir.

MINNESOTA (Mr. O'Donnell): Supposing the condition of affairs to be that the young men who start in life by seeking employment of railroad companies are so vast in numbers that they come in competition with men who have families to support; do you mean to say that they should not ask for wages, but should be satisfied with what the railroad companies would give them? In what position would that place men who must earn a living for themselves and their families?

INDIANA (Mr. Johnson): I do not know whether I shall be able to answer Mr. O'Donnell's question to his satisfaction, but it occurs to me that difficulties he mentions are largely imaginative. The burdens of life of today are enough for me to bear, without assuming those of to-morrow. I do not know whether that answers Mr. O'Donnell's question or not.

NEW YORK (Mr. McMackin): There is nothing I wish to say in addition to what I said yesterday, except in relation to that quotation from John Mitchell as to contentment. It may have applied to the miners, with whom Mitchell was dealing—a hopeless class of men. Our friend from Indiana (Mr. Johnson) talks of contentment. It is a great Christian virtue to be content with your lot, whatever and wherever it is, but when contentment eliminates from the human system ambition, then the mere physical being becomes a mere instrument, and there stops all progress. It is that very element in the human system that make our society; that makes the progress we have today. Thinking men are coming to the conclusion that if man is not allowed to live as a human being—as a rational, moral, esthetic being—his animal instincts wil get the mastery and make of him one of those abnormal types that from time to time involve humanity in the throes of revolution

And President Tucker opens up another vista, broad and far-reaching, when he says the wages paid to the laborer is not all that is coming to him. What does the doctor mean by that? Why, he must mean that the digger in the sewer, the railroad builder, the humblest man who helps along progress, has some claim that has not been requited. What is that claim? We all know that as population grows, as it becomes dense, the opportunities for employment in all lines of work, for progress, for education, for everything, become less. We supplement it by good men founding colleges, founding hospitals, founding all manner of institutions to help the ignorant, the afflicted, and every other class. Does it not occur to you that this thing that is doled out—this charity—is often what may be justly termed the unrequited claim of the workers?

It is in the solving of these questions, in bringing them clearly before the minds of the rising generation, that we may hope to solve what is termed the labor question. When we deal, in this same question, with how much wage a man receives, and how many hours constitute a day's work, we are dealing only with primary necessities of life of the animal man—with mere subsistence. The American growing up to-day wants more than that; his family wants more. That great desire has been cultivated, and is growing all the time. He wants recreation; he wants music, art; he wants all that which helps to brighten life and to make life pleasant.

The ideal of Mr. Johnson is not the ideal of Christianity as I have learned it He does not seem to distinguish between resignation and happiness or c.ntentment. A man may be resigned to a hopeless condition of affairs, but it would be a sad mistake to suppose that because he is resigned he is contented and happy. It would still be a sadder mistake to proclaim that Christianity requires a man to be happy and contented with a state of things which blights or stifles all that is highest, all that is noblest, all that is inspiring in human nature.

When you talk of the happiness of the poor daily wage-worker, going home to his little family with his face lit up, it is simply because that man's whole life is a perfect hell on earth *except* the few minutes that he looks on the smiling faces of his own children. The slave, the exile, may be resigned, but who shall say that he is contented and happy? Christianity unshackled the slave; its glorious mission to-day is to emancipate man from the shackles of ambition and greed, to direct and aid him in the development of his rational, moral and esthetic nature, and thus elevate him to the dignity for which the creator destined him.

Mr. Johnson's ideal may be all right in a certain sense, and yet Christianity teaches us that the nominal wage that is paid to the laborer is not all that is coming to him; that if I cannot find work and am hungry, I am justified in stealing—taking by force, to keep me alive. We are getting beyond that sort of thing; we are bettering this condition, and any man who can allow himself to travel back will be convinced of this. I can go back to 1870, the year of the first strike that I entered into in New York, and when I look back to these years and see the vast progress that has been made though it has been slow, it is perfectly wonderful.

The only reason we do not progress here in a more practical sense is because we have not arrived at a common understanding as to just what is best to be done. It is our business, in conjunction with such gentlemen as President Tucker, and others, to show the way, to show the truth; and never hesitate to speak the ruth when you know it. It is in that sense that these bureaus of labor amount to anything, and when they do not do that they ought to be abolished and cease to exist. If they simply become places for recordirg the reports of wages and of production, they are of no earthly use at all. Take the quesion proposed by our friend from Maryland (Mr. Schonfarber) -the primary cost, etc. Just look at the questions that arise in trying to solve it, all the elements that enter into it-transportation, nearness to market, and everything else! Then, when you get even to the city the question of rent enters into the retail price of the commodity. In a large city you will find that a farm selling the same article will charge more in one locality than in another, simply on account of the difference in rent. These are the perplexing obstacles that we meet in trying even to get at exact statistics, but through continued work we arrive at some understanding of it; but when we do, it does not amount to much after all.

It is not a very great question to settle how cheaply a man can live; not a very profitable one. It would be a good thing to know just what others are making out of the profit, what the original producer gets, and the approximate price that is paid in the retail market; but it will never solve anything; it will never bring about any great change; and if we continue to drift as we have been drifting, it will be really a question whether we are dealing a all with the individual as a producer or even as a retailer, in the complications that have arisen in the organization of purchasing companies, distributing companies, etc. Every year, as we progress, these things become more complicated and more difficult to analyze. But we have one great consolation, and that is, that in the progress of this labor movement-which, at times, has been ill advised, we must concede, not at all times governed by the hest ideas-we have succeeded in making the question a common question. We have succeeded in bringing together all the classes that labor, whether by brain or by hand; and having succeeded in doing that, we will in very good time solve these fundamental questions, on the settlement of which depends the welfare of the whole people.

Mr. BEALIN (superintendent free employment office, New York city): I was greatly pleased and delighted while listening to President Tucker's address yesterday—pleased because I recognize that the life labor of so many men has not been in vain; that men in the ranks of organized labor, working daily at their toil, at night improving their education, and by organization bringing these labor questions before the public, have succeeded in making such a convert to the cause as the gentleman who spoke here yesterday. Many and many a night, after working hard in a shop all day would these men meet and discuss these questions with the hope that by reasoning out this thing by talking the truth in their own crude way, men such as he, would some time, in God's own providence, come inside of our ranks and fight for our cause, because we fight for the true liberty, for the true civilization, for the maintenance of the American home, based on the American wage-scale.

When I look back twenty years and realize the class of men that were talking just the kind of speech and giving expression to just such sentiments and truth as President Tucker gave expression to yesterday, but in homelier phrases, and see the change that has taken place, I am satisfied that the future is bright, and that the labor question will be solved here in this country o' ours. When I think of the men who, twenty years or more ago, were speaking for labor's cause, the men who were striving and struggling to show that it was right, that it was a God-given right, not only to maintain and keep in existence the animal man, but to keep that animal man in existence in such surroundings as would give development, force and character to all the instincts and attributes that God endowed him with-plain, simple men, I say—and now see the change that has taken place, presidents of colleges and of universities more radical than the men who were then called anarchists and sccialists because they spoke the truth, I think it is a change for the better. I desire to say, again, that I am delighted I was here vesterday to hear President Tucker deliver his address. It is a bright streak on the horizon, and things will be brighter in the future.

## RECENT ONTARIO LEGAL DECISIONS AFFECTING LABOR.

## (Reported by Labor Gazette, 1904.)

## THE CANADA FOUNDRY CASE.

The Canada Foundry Company has gained another victory in its litigation with the Iron Moulders Union in the judgment of the Divisional Court at Toronto Dismissing the appeal recently taken from the order of Meredith J., which required the production of certain books of the union. The Financial Secretary of the union on his examination for discovery by the foundry company was called upon to produce the books of the union in order to establish payment by the union to employees to induce them to quit the service of the company contrary to an injunction already obtained. The officers of the union declined to produce the books contending that they were the property of the union and not of the official who kept them, the latter being one of the defendants in the case inasmuch as the union was not incor-The Divisional Court has now held that the order appealed from porated. was right, and that the books were in the custody of the proper official of the union and must be produced upon examination of their custodian inasmuch as the union itself, its officers and many of its members were parties in the action.

(Canada Foundry Company vs. Emmett, Toronto Divisional Court, 14th January, 1904, Falconbridge, C.J., and Street and Britton, J. J.)

INTERPRETATION OF BENEFIT SOCIETIES' REGULATIONS.

The interpretation of the regulations of benefit societies with reference to suspension for non-payment of dues has been recently before the courts. A. C. B. instituted proceedings against the Journeymen Barbers' International Union of America for the sum of \$60, being the amount claimed in connection with the death of his son, a member of the union. It appears that the deceased had fallen into arrears in July, 1903, and was suspended for not having paid his dues. He was reinstated, however, in October, having paid the reinstatement fee, and his dues were paid for September and He died on November 20, and was said to be in benefit standing October. at the time of his death. The principal question before the court was the interpretation of the expression "benefit standing"—whether it meant sick benefit standing or death benefit standing. It appeared that a provision in the clause relating to sick benefits relieved the union from paying sick benefits to a member who had been suspended within six months of the time of the claim. The clause relating to death benefits seemed to be open to The plaintiff contended that it provided for the payment of two readings. \$60 funeral benefits to any member of the union "in benefit standing," and this benefit standing was not affected by the suspension clause or the reinstatement of a member. For the defence it was urged that there was connection with the suspension clause, and consequently the union refused to pay the \$60. At the trial Mr. Justice Monk reserved his decision, but has now given judgment for the full amount sued for.

The ruling in this case is somewhat similar in principal to a case decided in the Province of Quebec in 1897, by Mr. Justice Pagnuelo (Maille vs. l'Union des Ouvriers Boulangers, R.J.Q., 12 S.C., 526). In this case His Lordship laid down the following principle of these penalty clauses : "That with regard to the interpretation the deprivation of the benefits arising from the benefit society is a penalty which should be rigorously confined to, the clearly defined cases, and cannot be extended by inference."

(Bishop vs. Journeymen Barbers' International Union of America, Local No. 131, Mr. Justice Monck, February, 1904, Hamilton, Ont.)

## EXTENSION OF EMPLOYERS' LIABILITY.

A recent decision in Markle vs. Donaldson by the Divisional Court, indicates a certian variance between the English Act on the subject of workmen's compensation and that of Ontario, with the effect of extending the liability of employers in this Province. The case in point was as follows :-The plaintiff claimed damages for injuries whch he sustained while in the employment of defendant as a carpenter, owing, as he alleged, to the negligence of defendant. Plaintiff was shingling a roof when the cleat upon which he was supporting himself gave way and he fell to the ground and was severely injured. The court held that the cleat was part of the ways, works, etc., of the premises used in the business of the employer within the meaning of section 3, subsection 1, of the Workmen's Compensation Act: that there was evidence that it was defective in that it was not securely fastened; that the defective condition was the approximate cause of the injury, and that the defect was due to the negligence of the workman of the defendants who did the work of putting on the cleats (the plaintiff not being one of the workmen employed in that work) and that there was evidence, therefore, upon which defendant might be found liable.

Order was accordingly made setting aside non-suit and directing a new trial.

It will be seen from the foregoing that the law affecting the liability of employers is carried further than it has yet gone. The learned judges point out that the provisions of the Ontario Workmen's Compensation for Injuries Act are different from those of the English Act, and express the view "that the legislature of this Province intended to place upon the employer a higher duty towards his employee than it was thought right in England to place upon him, and to make him answerable as far as the condition or arrangement of ways, etc., is concerned, for the negligence of any person, whether in his service or not, to whom he intrusts the duty mentioned in the sub-section, in the performance of that duty, in the same way and to the same extent as he would have been answerable at common law had he taken upon himself personally the performance of the duty. Where an appliance necessary for the safety of the workmen is required in the course of the work, and the employer directs any one to provide it ready for the use of the workmen, that person is one entrusted with the duty of seeing that the appliance is proper. This, no doubt, is a wide extension of the common law liability of the employer, but it is to be borne in mind that, if he is made liable, he has his remedy against the person he has employed."

(Markle vs. Donladson, Toronto, February, 1904. Meredith, C. J., McMahon and Teetzel, J. J.)

## COMMON LAW ACTION FOR DAMAGES.

The Court of Appeal on January 25th, 1904, unanimously confirmed the jury's verdict in the case of Thomas H. Traplin against the Canada Woolen Mills. This was an action to recover damages for injuries sustained by the plaintiff while working in the defendant's mill at Hespeler, owing to the fall of an elevator. The case was originally tried at Milton, and the jury, in answer to questions submitted by the judge, found in effect that the elevator was in a dilapidated condition of which the defendants were aware, and that although it was an elevator for lifting goods, yet the defendants permitted their workmen to use it and the plaintiff had used it with their knowledge. The jury found the damages in favor of the plaintiff, \$3,150, and judgment was entered for the plaintiff for that amount and costs. The case was carried to the Court of Appeal with the result above mentioned.

This case is of some interest inasmuch as under the Workmen's Compensation Act the limit for damages which workmen may recover for injuries is \$1,500. In the present case, however, the plaintiff contended successfully that he was entitled to damages at common law, in which case there was no limit fixed.

(Traplin vs. Canada Woolen Mills, January 25, 1904, Court of Appeal, Toronto.)

#### UNAUTHORIZED CONDUCT OF FELLOW WORKMEN.

The Court of Appeal has given judgment in an interesting question arising out of an action for damages under the "Fatal Injuries" Act.

The trial court, with a jury, awarded the plaintiff \$1,000 damages. In appeal the judgment was reversed. The facts are as follows :---

The plantiff is the widow and administratrix of one James Alexander, who was a workman in the defendant's employ, and at the time of his death was working in the defendant's sash and door factory. His bench was on the first floor of the factory. There was an opening in the floor through which boards were passed from the lower to first floor when required. The usual method in vogue at the time was when a load of boards was put upstairs, a workman was sent up and stood by the hole to receive each board as it passed through the hole. When only a few boards were to be pushed up the man below pushed a board up a short distance and rattled it to attract the attention of those on the first floor, when one of the men engaged there would go forward to receive the boards. On the occasion in question, however, one William Mills, an employee of the defendant, found three boards standing with their upper ends in the opening above, and desired to remove them out of the way. He pushed one of them up a short distance and rattled it. His signal not being attended to, he became impatient and violently shoved the board up, so that it shot up through the hole and landed on the first floor. He repeated this with a second and a third. The last one, unfortunately, struck the deceased, who was walking past the hole at the time, and caused his death. At the trial it was contended for the plaintifi that the defendant should have had some rule or system for warning or protecting the workmen above when boards were being put through, and upon that theory guestions were submitted to the jury, who found, first, that the defendant should have had a rule or system for warning or protecting the workmen, and, secondly, that he had no such rule or system, and, thirdly, that the system he had was not sufficient to give proper warning.

His Lordship, the Chief Justice of Ontario, was of opinion that the defendant was not responsible for the accident. The Court was of opinion that the course adopted by William Mills was highly dangerous, and almost certain to lead to accidents of a more or less serious nature. Not only was it not the usual course, but was wholly unprecedented. The defendant or her superintendent could not be blamed for not assuming that a workman would resort to any such unlikely and hazardous measures for removing boards from the lower floor. As it was usually and ordinarily performed, there could be no necessity for providing for giving warning. The accident could not have happened but for the unforeseen and unauthorized conduct of a fellow workman.

Inasmuch as the plaintiff's case rested entirely upon the alleged want of a rule or system, the Court allowed the appeal, and the action was dismissed. (Alexander vs. Mills, Court of Appeals, Toronto, January 15, 1904.)

#### Annuel vis. Billis, Court or reprodust, rereites, encoded

## BREACH OF CONTRACT.

This was an action tried at Toronto with a jury, the plaintiff being a merchant tailor, and the defendant, until the end of May, 1903, being in the service of plaintiff under a written agreement as follows;

"I hereby agree to an engagement of your services as outfitter and salesman from August 1, 1902, to January 1st, 1904, at a salary of \$35 per week.

A. E. TREBILCOCK."

"I hereby accept the above agreement.

#### FRANK BURTON."

The plaintiff complained that the defendant in breach of this contract left his employment about the end of May, 1903. Defendant replied that he left with the consent and by the leave of plaintff. Plaintiff also charged the defendant with wrongfully using the plaintiff's books in order to procure a list of his customers, and, upon leaving, wrongfully used this list to the detriment of plaintiff's business. Plaintiff further charged the defendant with procuring copies of orders given by customers to plaintiff, and endeavouring to induce customers to break their contracts with him and to give them to defendant. Plaintiff also charged defendant with inducing his servants or workmen to leave his service, and also converting to his own use certain patterns, the property of the plaintiff.

On all these points plaintiff failed to establish his case by evidence, and the only point on which he was successful was his claim for \$75 advanced to defendant in January, 1903, for the purpose of enabling defendant to attend a custom tailors' convention at St. Paul, the object being that the defendant should have an opportunity of exchanging ideas with cutters of the principal houses in the United States and Canada. On this point the court held that this was for the benefit of both parties, and that this money was advanced to the defendant on the implied condition and understanding that he should remain in the employment of the plaintiff during the time called for by his agreement. Judgment was rendered for plaintiff for \$75.

(Trebilcock vs. Burton, Toronto, March 12; Falconbridge, C. J.)

#### LIABILITY FOR DEFECTIVE BOILER.

J. was employed in Toronto as a fireman, by the Grand Trunk Railway Company. He was directed to clean a certain boiler, to do which he had to go into what is known as the pit. He found the ordinary way blocked by a flood caused by a defect in the boiler, and in attempting to get there by another way he inadvertently touched an unprotected valve of another boiler, the result being that he was severely scalded. J. brought an action against the railway company, alleging that the accident was caused by the defective condition of its appliances. Before the action was tried, however, a settlement was arrived at, J. being paid \$350, as damages for his injuries.

(Joufrett v. G. T. R. Co.)

# SUNDAY OBSERVANCE—WORK MAY BE A NECESSITY BY REASON OF ITS CONTINUOUS NATURE.

Recently an action was brought by the Provincial Lord's Day Alliance against two employees of the Ontario Sugar Co., Berlin, Ont, on a charge of operating a beet slicing machine in the company's factory on a certain Sunday.

The action was brought before the Police Magistrate and a considerable amount of evidence was put in. The defence was to the effect that if the factory were to close on Saturday night the juices passing through the crystalizers would deteriorate, and the sugar would thereby lose its color. It was also claimed that the factory could not be operated profitably if it was obliged to stop every week.

The evidence of an expert witness was also practically to that effect.

The Police Magistrate finally gave judgment, coming to the conclusion that the process of making sugar from beets, as followed in the factory, was a continuous one, and that it was a work of necessity that operations should be continued on Sundays. The charges were therefore dismissed.

(Judgment given by Police Magistrate Weir at Berlin, Ont., 7th April, 1904.)

Two Examples of Employers' Liability for Carelessness of Employees.

P. was employed as a railway fireman. While his engine was standing at St. Thomas he fell from it and sustained serious injuries. He brought an action against the railway company for damages, claiming that his engineer had ordered him to clean out the fire-box, and that when he was doing so the engine started suddenly throwing him over the side of a bridge upon which the locomotive was then standing. It was also alleged that some of his injuries would be permanent.

The action was tried with a jury which brought in a verdict of \$1,500 damages—the company being held liable for the carlessness of its employees.

(Parker v. the L. E. & D. Ry. Co. Judgment at St. Thomas, February, 1904.)

S. was employed in a foundry in which was an arc lamp which the Toronto Electric Light Company was required to keep in order. One evening this lamp went out and a message was sent to the Toronto Electric Light Company, who sent S. to fix it. S. lowered the lamp, which was directly over the end of a mould-box into which was put molten iron for the castings, and commenced working at it. The lamp-trimmer for the Electric Light Co., who trimmed this lamp every day, arrived at that time and they commenced to trim it together. The men in the foundry were carrying a ladle filled with molten iron from the place where the iron was melted to the the result being that all the men carrying the ladle were knocked down and mould near the arc lamp. S. was one of the men carrying the front handle of the ladle. When he came near the arc lamp it knocked against him—that S. was severely burned, being unable to work for ten or twelve weeks.

S. brought an action against the Toronto Electric Light Co., claiming that it was the negligence of its employee in letting the lamp swing when the ladle was near it which caused the accident, and that it was liable for such negligence. A jury awarded S. \$1,000 damages, and on appeal this was confirmed.

(Sedore v. Toronto Electric Light Co. Judgment given by a Divisional Court at Toronto,, 5th April, 1904.)

## EMPLOYER LIABLE WHEN ACCIDENT CAUSED BY DEFECTIVE MACHINERY.

Joseph Graham was employed by the International Harvester Co. as a blacksmith's helper. On August 19, 1903, while attending to his work in the ordinary way, he was killed by a piece of steel which was sent flying from under a steam hammer. The widow and six children brought an action against the company for \$5,000 damages, alleging that the defective condition of the steam hammer had caused the accident. The company contended that there was no defect in the hammer, and that the accident was caused by Graham's own negligence.

The action was tried with a jury at Hamilton, and a verdict was given for \$1,500, of which \$500 was apportioned to the widow and the balance to the children.

(Graham vs. International Harvester Co. Judgment given at Hamilton, 30th March, 1904.)

In a somewhat similar case, H., who was employed as a blacksmith, had his right eye destroyed by a splinter from a large hammer which suddenly broke while he was using it. He sued his employers for \$2,500 damages, alleging that the hammer was defective and that the employers were aware of the defect before the accident happened. At the trial judgment was given in his favor, and was afterwards confirmed by the Court of Appeal, to which the employers took the case.

(Henry vs. Hamilton Brass Co. Judgment given by the Court of Appeal for Ontario, 18th April, 1904.)

#### VERDICT SET ASIDE BY JUDGE.

H. was employed by the T., H. & B. R. R. Co. as a brakeman. While in the yard of the company he was fatally injured while working at a brake. This brake was stiff at first and then suddenly gave way. His widow brought an action against the railway company for \$5,000 damages alleging that the brake was defective, and also that the foreman, under whose orders H. was acting, had been negligent. It appeared from the evidence that this foreman was also working at the brake, and that when it seemed to be stiff he got off the car and pried down the dog, releasing the brake and causing the T. handle to fly around and strike H. and knock him off the car. The company denied all liability.

The action was tried at Hamilton with a jury. The judge charged strongly in favor of the company, but submitted a number of questions to the jury. In answer to these questions the jury found that the brake was dangerous, and that the company were negligent in allowing it to be used; also that the foreman had been careless and that there had not been any negligence on the part of H. The jury therefore awarded \$1,000 damages. When the verdict was brought in the presiding judge stated that it was directly contrary to the weight of evidence and he subsequently set it aside.

(Hodgson vs. The Toronto, Hamilton & Buffalo Railroad Co. Action tried before Chief Justice Meredith, March, 1904.)

#### ACTION DISMISSED ON ACCOUNT OF CONTRIBUTORY NEGLIGENCE.

One Ineson, a minor, was employed by the Hamilton Cotton Co. A carding machine at which he was working becoming clogged, Ineson pulled off the belt which was on the machine, and commenced to remove the cotton waste which occasioned the stoppage. While he was doing so the belting slipped on the pulley and set the machine in motion, and Ineson's hand was crushed so badly that it was necessary to amputate three fingers.

Ineson brought an action against his employer for damages, alleging that the machine was defective, and that there should have been a guard to prevent the belt from slipping on again. The company denied all liability.

The action was tried with a jury, which found that the accident was caused, not by any defective machinery, but by Ineson's own negligence and carelessness. He appealed from this decision, but a Divisional Court confirmed the judgment given at the trial, and dismissed the appeal with costs.

(Ineson v. Hamilton Cotton Co. Judgment given by a Divisional Court at Toronto.)

#### EMPLOYER'S RIGHT TO DISMISS EMPLOYEE.

An interesting point recently arose in an action taken by an employee for wrongful dismissal. From the evidence in the case (which was tried in an Ontario Police Court) it appeared that the employer had asked the employee on a certain Monday to print a sign 'Mechanics Wanted' to put in the window; the employee had refused to do so, because at the time his fellow-workmen were on strike. He was therefore dismissed at once, although his week did not end until the following Thursday. The employee claimed his wages for the whole week, and the Magistrate decided that he was entitled to them, holding that while the employer was justified in dismissing him, yet he should have given him notice.

#### ACCIDENT CAUSED BY ALLEGED DEFECTIVE CONSTRUCTION OF WALL-

V., the employee of C., was engaged in F.'s boiler house, putting in machinery under a contract which C. had with F. While B. was at work in the boiler house the end fell in, killing him instantly. V.'s widow and children brought an action against F., and also against G., a contractor, who did the brick work in the erection of the boiler house. It was claimed that both F. and G. had been guilty of negligence which rendered them liable for damages.

In the course of the evidence it appeared that F. had no architect to prepare plans for the building in question, but had adopted the plans prepared by a well-known Chicago firm of architects and contractors for a building belonging to another company. F. had these plans copied by a Mr. Pooper, who was no architect by profession, but, who had had considerable experience in contracting work of that nature. It also appeared that on the day of the accident the building was complete with the exception of the putting in of some machinery.

The wall, which fell down while a strong gale was blowing, was near the edge of a lake which faced a stretch of two or three miles of open water. The court was of the opinion that while it could not be expected that the wall should withstand a cyclone or tornado, yet it was reasonable to expect that, on account of its position, it would be sometimes subjected to more

31

than ordinary wind strain; it was also held that as a matter of fact the wall was not sufficiently strong to meet such ordinary wind pressure. Nevertheless the court was of the opinion that F. was not liable and and could not be made so unless it was proved that he knew or ought to have known of the defect in the wall, or that he had employed an incompetent superintendent or one who was guilty of negligence. There was no obligation on the part of F. to guarantee the absolute safety of the building.

It was also held that it was not unreasonable for F. to adopt plans of another building, or to employ a person who was not an architect to take charge of the construction.

As regards the claim against G. it was held there was no evidence of any negligence on his part.

The action was therefore dismissed, but without costs.

(Valiquette v. Fraser. Action tried before Mr. Justice Teetzel, 11 July, 1904.)

## EMPLOYEE FINED FOR BREACH OF CONTRACT.

A case in which an employee was charged with breach of contract was recently tried by the Police Magistrate at Hamilton.

Elizabeth Leonard signed in Liverpool, England, an agreement with the Hamilton Cotton Company, whereby that company undertook to pay her passage to Canada, and to give her \$5 a week for work there, the passage money to be gradually repaid out of the wages, and the girl being at liberty to leave the Company as soon as same was repaid in full. She worked for a short time for the Hamilton Cotton Company, but when she had only repaid about \$7 of her passage money she left in order to take a better position.

It was argued that no such action could be taken upon this agreement, because it had been signed in England but the magistrate ruled against this contention. It was held that the girl had deserted her employer without any reason or excuse, and in direct violation of the signed contract. A fine of \$25 was therefore imposed.

(The Hamilton Cotton Company v. Leonard. Action tried before the Police Magistrate at Hamilton, 7th June, 1904.)

A CONVICTION UNDER THE ALIEN LABOR LAW.

A charge of an infraction of the Alien Labor Law, was recently tried by the Police Magistrate of Hamilton.

J. Amberg, a tailor, who carried on business in Dundas, was charged with having brought two or more men from New York to work in his establishment. The charge was laid by F. Weaver, who formerly worked for Amberg.

The evidence seemed to show that Amberg had spoken to the two men in question, in New York, and told them he could give them work in Dundas. He paid, through his son, the railway fare of one of these men from New York to Dundas.

The magistrate held that it was a clear case of an infringement of the Alien Labour Law. As he could not impose a fine of less than fifty dollars (\$50), together with the costs, he allowed Amberg to go on suspended sentence, upon his paying costs of the prosecution.

(Case tried before the Police Magistrate at Hamilton, August 21, 1904.)

12 L.

#### NON-REGISTERED UNIONS DOING INSURANCE BUSINESS.

In the Hamilton Police Court recently, the secretary of the Local Barbers' Union was charged with a breach of the Insurance Act. It appeared that the private prescutor had demanded from the Union \$60 for the funeral expenses of his son. As the union did not pay the claim, he took an action in the civil courts and recovered judgment against the local union for the amount in question. As this judgment was not paid, he laid a charge against the secretary of the union, charging him with a breach of the Insurance Act, inasmuch as he acted as an agent for the union in getting people to pay money for insurance or funeral benefits, while the union was not registered in accordance with the provisions of the Insurance Act.

The magistrate held that the secretary of the union had committed a breach of the law by so acting, and he accordingly imposed a fine of \$20.

(Bishop vs. Halford. Judgment given by the Police Magistrate at Hamilton, August 23, 1904.)

#### CONVICTION FOR BREACH OF FACTORY ACT.

In the Police Court, at Hamilton, recently B., a baker, was charged by a former employee with a breach of that section of the Factory Act which says that no employee shall be obliged to work for more than twelve hours out of twenty-four without permission for such overtime having first been obtained by the employer from the Factory Inspector.

The former employee who laid the charge, testified that he himself had been compelled to work once or twice for more than 12 hours. The principal charge, however, was in regard to the case of another employee. O'Neill. O'Neill himself swore that he started to work at 6.30 p.m. one evening, that he went home at 7 a.m. for an hour and then came back for two or three hours more: he stated that the bread was not coming out right and that as a matter of fact, he did not do more than 12 hours' actual work.

The employer stated that he did not knowing infringe the law, but the magistrate was of the opinion that the evidence showed a breach of the Act, and he, therefore, imposed the lowest possible fine, namely, \$20.

(Burrows vs. Beckett. Action tried before the Police Magistrate, at Hamilton, July 25, 1904.)

#### Employment of Child Who Misrepresents His Age.

The Ontario Factories Act provides that no person under fourteen years of age shall be employed in certain factories.

M., a boy ten years old, obtained employment in a factory coming within that Act, representing himself as being fourteen years of age. The work he was given to do was to put glue on boxes. In making his way to his glue-pot some days after he was employed, he put his right hand on a planer and the little finger of his right hand was taken off.

M., brought an action for damages, claiming that his employers committed a breach of the Factories Act in employing him when he was under fourteen years of age, and also that there was a defect in the 'ways' of the factory.

At the trial the case was withdrawn from the jury, and M.'s action was dismissed upon the ground that the misrepresentation as to his age precluded him from recovering damages. An appeal was taken, and the higher court allowed the appeal, and directed that there should be a new trial, the employers to pay the costs of the former trial and of the appeal.

In the course of his judgment the Chancellor of Ontario said, in reference to the provisions of the Factories Act above referred to : "This prohibition of the Act is for the benefit of young children— to protect them from dangerous employment—it enacts a rule of safety for the preservation of children even as against themselves. It is not enough to take the statement of a child as to his age; the employer must take steps to satisfy himself by reasonable means that the applicant for work is a legal worker. In case of controversy it would be for the jury to be satisfied that reasonable precautions had been taken on this head—by inquiry from the parents or other ordinary means of information as to age.

And this illegal employment may be, in some circumstances, evidence of negligence if inquiry has arisen in the course of the work. The boy was not put to work at a dangerous machine, but he was left to find his way to has work through a room which had elements of danger and without any warning or notice given to him as to the proper passage. There was a roundabout way which was safe, but he saw workmen taking the short cut, and this he took at noon on the first day of his work at the glue-pot. Finding it blocked with boxes, he stooped down to get under the corner of the planer, not appreciating the danger. His attention being called off by another boy, he suddenly made a movement which brought his hand upon the knives of the planer and caused the loss of the finger. He thought that he could have got under or through the place safely, and probably would have done so but for the call which disturbed him.

Upon this state of facts, in the plaintiff's evidence, it would be for the jury to say, having regard to his age and the danger of the place, whether sufficient warning had been given by the employer to protect the lad, who should not have been in the factory at all. I need not elaborate the matter, but I will refer to a very apt (English) case, as containing the latest law. Mr. Justice Wills, who speaks knowledgeably about the small boy, said : 'Every one knew that if boys were not well watched, they would get themselves into danger where there was an opportunity of doing so.'

(McIntosh vs. The Firstbrook Box Company. Judgment given by a Divisional Court of the Hight Court of Justice, June 30, 1904.)

#### IMPROVIDENT COMPROMISE OF CLAIM SET ASIDE.

D., a painter, was employed in painting the ceilings of an engineroom. He was working, with the knowledge of the superintendent of the works, on a raised scaffold near a revolving shaft.

In the course of the work his clothing caught on part of the shaft, and he was then drawn in and received injuries from which he died.

D.'s wife and mother brought an action for damages against the proprietors of the works in which the engine-room was situated. The jury brought in a verdict, giving seven hundred and fifty dollars (\$750) to each, but the judge gave judgment in favour of the defendants and dismissed the action.

An appeal was taken, and the court, while holding that the evidence was not shown that the mother's interest was sufficient to entitle her to recover, yet was of the opinion that there was evidence of negligence on the part of the proprietors of the works, and that D.'s wife was entitled to the damages of seven hundred and fifty dollars (\$750), awarded her by the jury. It also appeared that there was some question of D. having another wife, who was alive at the time of his death, and that, by the use of this and other arguments, representatives of the defendants had shortly after D.'s death, induced the wife, who brought an action to give a release to the defendants,'in exchange for a small sum which they then paid her. The court held that under the circumstances, this release was not binding upon the wife, and referred to it in the following terms :—

The woman was in needy circumstances; she was naturally of weak constitution (anaemic); had been unnerved by the sudden death of her husband, and was further shocked by the intimation that she was not his wife. Confessedly she was unfit for business for a fortnight after his death, and it is not proved that she had become fit a month after, when the release was signed.

The argument was pressed upon her that if she did not take the small sum offered, it would go to the other wife, said to be the lawful one. This was a rather unfair argument, for the other wife had long been away from the deceased and had apparently at that time no claim for his support. The woman was sadly in need of disinterested advice, and she had none. Though it was known to the company that she then had solicitors, who were prosecuting her claim, it was not suggested that she should resort to them before accepting the sum offered. To use her own expression, 'she was worried to death,' by the importunity, of those acting on behalf of the company defendants, and the insurance company, who are really defending the action, and so, without knowledge of the facts which established the legality of her marriage (which she might have quickly ascertained had fitting advice and opportunity been given her), she was pressed into an improvident settlement by adversaries who over-matched her. Fair play demands that better consideration should have been extended to her before seeking to extinguish her rights. It is not the ordinary case of the compromise of a doubtful claim, but one in which the parties were not dealing on equal terms and in which the woman's competence for such business admits of the gravest doubt.

(Doyle vs. The Diamond Flint Glass Company. Judgment given by the Divisional Court of the High Court of Justice, June 30, 1904.)

## EMPLOYEE VOLUNTARILY ACCEPTING RISK OF WORK.

C. was employed as a foreman by a contractor who was building a power-canal near Niagara Falls.

In the course of the work, a shaft had been sunk to the depth of about 155 feet, and from the bottom of this shaft a tunnel had been made, horizontal, extending from the shaft to a joint under the Niagara River. The construction work was interfered with by water leaking through and filling or partly filling the tunnel, and this water had to be got rid of by pumping. Four pumps were placed in the shaft, and were about fifteen feet from the bottom. The power for pumping was on the surface, and the men at this time could do nothing in the shaft except to keep the pumps oiled and in good working order. There were two gangs of men, one for night, the other for day, and C. was foreman of the day gang.

One day when C. and another employee were lowered down the shaft to oil the pump, a large stone fell from the shale side of the shaft and struck C. on the head, and so injured him that death resulted.

C.'s widow brought an action, under the Workmen's Compensation Act, for damages against the contractor, claiming that he was negligent in not having had the wall of the shaft lined with timber or made secure in some other way, so that the loose rocks would not fall from the wall. At the trial, the judge, before deciding the main point of law involved, submitted questions to the jury so as to avoid the necessity of another trial in case he should find that the law was in favour of the widow's contentions. The jury found that the contractor had been guilty of negligence in not having had the shaft lined, and awarded two thousand dollars (\$2,000) damages

The judge stated that there was no statutory duty compelling the contractor to have the shaft lined, the point not being covered by either the Ontario Mines Act or the Ontario Factories Act.

The trial judge also came to the conclusion that the evidence showed (1) that the shaft was in a dangerous condition: and (2) that C. was well aware of the danger from loose stones falling that he had been warned against it, and that as foreman of the shift, he had been at liberty to 'trim' the shaft, and that he should have done so. He, therefore, held that C. had been aware of, and had voluntarily accepted the risk by going down the shaft under the prevailing conditions, and that the case was governed by a maxim of law, the effect of which is that no action for damages will lie in respect of an injury caused to a person, who, of his own accord and with full knowledge of the risk, undertakes to do the work to which such risk is attached.

The action was, therefore, dismissed, but without costs.

(Cameron vs. Douglass. Judgment given in High Court of Justice. By Mr. Justice Britton, June 22, 1904.)

# RAILWAY ACCIDENT CAUSED BY DISPLAY OF WRONG SIGNAL.

B. was employed as a conductor on the Grand Trunk Railway Company. On the night of October 7, 1901, he brought his train from Stratford to London, east, where he arrived at about 10 p.m. The usual track for his train was the second from the station platform, and leaving the train upon that track, he got off as it was about to stop, and while going toward the telegraph operator's door in the stationhouse, he was struck and instantly killed by an engine which was backing or reversing upon the track next the stationhouse.

B.'s widow brought an action for damages against the railway company.

At the trial the case was withdrawn from the jury, and judgment given in favour of the railway company, upon the ground that B. had been guilty of negligence inasmuch as he had broken one of the rules of the company, which is to the effect, 'the employees must not get off moving trains.'

An appeal was taken, and the higher court in the course of its judgment, pointed out that while B. did get off his train before it actually stopped, yet that did not in itself cause the accident; and that, on the other hand, there are two rules of the company to the effect (1) that engines reversing at night must display a white light; and (2) that no engine shall pass instance, both of these rules had probably been broken, and the first certainly had. The reversing engine not only did not have a white light, but it carried a red light which was worse than no light at all, inasmuch as it indicated a stationary object, and not a moving or approaching one. It was quite possible that B, who was a railway man of 25 years experience, might have seen this red light and crossed the track, naturally thinking that he was safe in so doing. In view of these circumstances, the court allowed the appeal, and directed that there should be a new trial, the railway company to pay the costs of the former trial and of the appeal. (Birkett vs. The Grand Trunk Railway Company. Judgment given by the Court of Appeal for Ontario, June 29, 1904.)

#### LIABILITY OF EMPLOYER FOR ACCIDENT ON PREMISES.

K. was employed by a manufacturer of engines and other machinery.

A dredge engine which had been built for shipment to British Columbia was, at the time of the accident in question, standing near a railway track, which was built into part of the shop. This engine weighed four or five tons, and each end of it rested on a piece of timber about twelve inches (12 inches) square, and was also supported by timbers against flanges at the side. A large wagon had been backed into the shop in order to get a retort, which it was taking away. When on the wagon the retort extended over the edge about a foot or fifteen inches (15 inches), but there was still room for it to pass the engine, as it had to do on the way out. K. was at this time working at a bench about three or four feet from the engine. From some cause, not ascertained, the horses started suddenly, and as they swerved, the engine was struck by the wagon, and was thrown over upon K., killing him.

K.'s widow brought an action against his employers on behalf of herself and her invalid daughter. At the trial a jury found that the accident was caused by the negligence of the manufacturer of the engine (K.'s employer), in not having it properly braced, so as to withstand any shocks it was reasonably likely to receive from passing drays and that K. himself had not been guilty of any negligence. They, therefore, awarded one thousand two hundred dollars (\$1,200) damages—one thousand dollars (\$1,000) to the widow, and two hundred dollars (\$200) to the daughter.

The employer appealed but the Court of Appeal sustained the judgment. A further appeal was taken to the Supreme Court of Canada, which also gave judgment in favour of K.'s widow.

(Miller vs. King. Judgment given by the Supreme Court of Canada, May 4, 1904.)

ACTION FOR DAMAGES DISMISSED, CAUSE OF DEATH BEING CONJECTURED.

B. was employed in certain engine works, and, in the course of his work was engaged, together with other employees, in carrying materials from the ground floor of the factory to a gallery or floor above by means of a crane. When the materials reached the floor above, they were deposited on the platform.

B. fell to the floor below in the course of this work, and received injuries which eventually caused his death. His widow brought an action for damages, claiming that the platform was a part of the ways connected with the employers' works, that therefore it should have been 'as far as practicable securely guarded' in accordance with the provisions of section 20 of the Ontario Factories Act, and that B. had met his death as a result of the negligence of his employers in leaving it unguarded.

At the trial the jury found that the projecting platform in question was a dangerous place for the man working on it, because, it did not have a railing; that the employers were guilty of negligence in not providing such a railing; that the accident was caused by the lack of it; and that B. by the exercise of reasonable care, could not have avoided the accident. They therefore, awarded the widow one thousand dollars (\$1,000) damages. The employers appealed from the judgment which was given in accordance with this verdict. The higher court held that even if the platform was 'a dangerous structure or place', within the meaning of the Ontario Factories Act, yet there was no evidence whatever which showed that the want of a railing caused B. to fall. The court, therefore, considered that the cause of death was purely a matter of conjecture. The appeal was allowed and the action dismissed, but without costs.

(Brown vs. The Waterous Engine Works Company. Judgment given by a Divisional Court of the High Court of Justice, July 2, 1904.)

## EMPLOYER NOT LIABLE FOR UNAUTHORIZED ACTS OF EMPLOYEES.

A. was employed in a door factory. He worked on the first floor, in which there was an opening through which boards were passed from the floor below. It was usual, when a number of boards had to be sent up, to have one of the employees stand by the hole and receive the boards one by one. But when only a few boards were to be passed up, it was usual for the man on the floor below to shove one board up a little way, and then rattle it about until some one came to take it.

On the occasion, in question, an employee on the ground floor, finding three boards with there ends in the opening, shoved one up a little way and rattled it in the usual way. As no attention was paid to this he shoved the board up violently, so that it went through the hole and landed on the first floor. He did the same thing with the second and third boards, and the last one struck A, who happened to be walking past the hole, and caused his death.

A.'s widow brought an action against the employers, claiming that the accident was caused by negligence, for which they were responsible.

The case was tried with a jury, and judgment was given awarding A.'s widow one thousand dollars (\$1,000) damages.

The employers appealed, and the Court of Appeal held that they were not liable, as the act of the employee, which caused the accident was unauthorized by them, and opposed to the usual system in force; and they could not be blamed for not assuming that any one would attempt to remove the boards in such an extraordinary manner.

(Alexander vs. Miller. Judgment given by the Court of Appeal at Toronto.)

# WRONGFUL ABANDONMENT OF EMPLOYMENT.

N. B. and J. B., of Montreal, were charged before the Police Magistrate of Deseronto, Ont., with having entered into an argreement with the Rathbun Company of Deseronto, to perform work and services for the said company at Deseronto, under which they received from the Rathbun Company, as an advance of wages, the sum of \$5.60 each in railway tickets for their transportation from Montreal to Deseronto, and with having without the consent of the Rathbun Company, left its employment before the costs of such transportation had been repaid; contrary to the provisions of the Act respecting Masters and Servants, R.S.O., 1897, ch. 157, as amended by I Edw. VII., ch. 12, sec. 14. J. B. pleaded guilty. Evidence was given in behalf of the prosecution, and the prisoner N. B. gave evidence in his own behalf. The magistrate adjudged that each prisoner should be fined \$5 and costs, and that if the amounts were not paid within 10 days, they should be committed to the common jail at Belleville for 10 days.

(Gaulin v. Bernier and Bigras, tried before Police Magistrate Bedford, of Deseronto, Ontario, on the 30th August, 1904.)

# THE RUNNING OF THE STREET CARS ON SUNDAYS.

At the instance of the Lord's Day Alliance, an information was recently laid against J. H. Rutherford, a conductor on the Kingtson, Portsmouth and Cataraqui Electric Railway Company, charging him with having illegally engaged in running cars on Sunday, August 28, 1904; the object of the proceedings being to test the right of the railway company to operate on Sundays.

A recent Ontario Statute (part of 4 Edward VII., Chap. 10) provides that no company or municipal corporation operating a street railway, tramway or electric railway, subject as such to the jurisdiction of the Province of Ontario, shall operate the same or employ any person there on Sunday, except for the purpose of keeping the track clear of snow and ice or of doing some other work of necessity. It is, however, further provided that the above shall not apply: (1) to companies which have regularly run cars on Sunday before April 1, 1897; (2) to any company which has, by its charter any special Act, the right or authority to run cars on Sunday.

It appeared that the railway company was incorporated in 1875, and by its Act of Incorporation it was authorized to run over the streets of certain municipalities, under and subject to agreements which should subsequently be made between the company and such municipalities. It was also proved that according to an agreement so made, it was contracted in one case that the cars should be run "daily"; and in the case of an agreement with another municipality that they should be run "each day". It was also in evidence that the company operated cars on Sunday in 1877 and 1878.

The police magistrate before whom the case was argued held that not only had the company the right to operate on Sundays, but that under the terms of its charter, taken in connection with the agreements with the municipalities above referred to, it was bound to operate the cars "every day", and that it, therefore, came within the exception above quoted as being a company which, by its charter, had authority to run cars on Sundays.

The magistrate, therefore, held that the Act of 4, Edward VII., did not apply, and that, therefore, the question as to whether or not such Act was beyond the powers of the Ontario legislature (which point had been argued at great length) did not call for any decision. The prosecution was, therefore, dismissed.

(Judgment given by the Police Magistrate at Kingston, October 1, 1904.)

#### ACCIDENT CAUSED BY DEFECTIVE APPLIANCES.

M. was employed in the construction of the iron work upon a large building in course of erection. The steel trusses had been erected, and M. was engaged with three other men in placing and fastening in position the purlins which unite the trusses in longitudinal directions. In the early stages of the work, a gin pole was used for raising the purlins to their place on the truss, but, by direction of the superintendent, its use was given up, and a davit or morkey used, or a block was fastened to a purlin or strut which had already been placed in position above, and the lower purlin drawn up by means of a line running through the block. The latter contrivance was used on the occasion in question. The distance between the strut and the place for the purlin on the top chord was not sufficient to permit of the purlin being hoisted to a height that would enable it to swing above and drop into its position. It was necessary for the men to lift or shove the ends up so that they would get into place. For that purpose they had to descend to a brace of the truss below. M. wen down, and while on the brace he fell to the floor, a distance of forty-eight feet, and received injuries from which he died the next day. His widow and children brought an action for damages. The case was tried with a jury, which gave the following replies to questions submitted by a judge: (1) That there was a defect in the condition or arrangement of the appliances; (2) That the defect was neither the davit nor the block would raise the purlin high enough; (3) That the failure to discover or remedy the defect was due to the negli-gence of defendants or their foreman; (4) That the injuries to the deceased were caused by the defect; (5) That B. was intrusted with the duty of seeing that the condition or arrangement of the appliances was proper; (6) That the deaceased could not, by the exercise of reasonable care, have avoided the accident; (i) that the purlin could not have been raised above the upper chord, either by the use of the davit or the block lashed to the strut; (8) That B. was guilty of negligence; (9) That his negligence was in not using proper appliances, and that the gin pole was the proper appliance; (10) That the mode of lashing the block to the strut was adopted with B.'s approval; (11) Damages, \$1,872; (12) That deceased knew and fully appreciated the risk he ran in doing the work with the appliances which were used; (13) That he did not voluntarily incur the risk, but was working under protest; (14) That the equivalent of deceased's earnings for three years preceding the accident was \$1,872.

Upon these findings judgment was given in favour of M.'s widow and children for \$1,872.

The employers appealed to the Court of Appeal, but it was there held that the findings were supported by ample evidence, and that the damages awarded were moderate.

(Mitchell vs. The Canada Foundry Co. Judgment given by the Court of Appeal for Ontario, June 29, 1904.)

MEANING OF THE WORD "RAILWAY" IN THE WORKMEN'S COMPENSATION ACT.

In a recent case the interesting point as to the meaning of the word "railway", as used in the Workmen's Compensation Act, was decided by the Court of Appeal.

C. was employed by manufacturers of iron and steel, who carried on a large business and who had on their premises a line of railway with switches, etc., which connected with the line of the Grand Trunk Railway. Ordinary freight cars and locomotives were used, and C. was employed as brakesman in connection with this railway. While uncoupling some cars his foot was caught either in an unpacked frog or in the unpacked space between the line rail and the frog, or between the guard rail and other fixed rail, and was injured by a car passing over it.

At the trial the judge took the case from the jury, and gave judgment in favour of the employers. An appeal was taken to a Divisional Court, which reversed this judgment and directed that there should be a new trial, and this was confirmed by the Court of Appeal to which the employers then took the case.

It was, among other things, contended on behalf of C., that his case came within section 5 of the Ontario Workmen's Compensation Act, which provides that when personal injury is caused on or about any railway by reason of the absence of packing where it is prescribed by the following sub-sections, then such injury shall be taken to have been caused by reason of a defect in the ways, etc., for which the employer is responsible. In reply it was argued for the employers that the word "railway" as there used, meant a railway operated by an incorporated company under statutory powers, and that it did not apply to a railway such as the one in question. The Court of Appeal, however, came to the conclusion that a private railway was within the meaning of the word as used in the Act.

(Cooper vs. The Hamilton Steel & Iron Co. Judgment given by the Court of Appeal for Ontario, June 29, 1904.)

#### A CONVICTION QUASHED.

In the September number of the Labour Gazette, at page 303, a report was given of the conviction in the Hamilton Police Court, of H. Halford, Secretary of the local Barber's Union, upon the ground that he had committed a breach of the Insurance Act. An appeal was taken and the conviction was subsequently quashed.

#### CONSPIRACY TO PREVENT PAINTER FROM GETTING WORK.

Albert Clay recently commenced working in St. Catharines as a painter. The firm by which he was employed told him to get a permit from the Painter's Union, which he did, pending some action on his application for membership in the union. Finally his application for membership was refused, and the foreman then told him that he could not work for the firm any longer, as the union men would go on strike if he was kept. As a result the president and two members of the local union were arrested on a charge of conspiring to prevent Clay from working at his trade. At the hearing before a magistrate, Clay swore that he had several

At the hearing before a magistrate, Clay swore that he had several years' experience and that since the union had refused his application for membership he had been unable to obtain work anywhere in St. Catharines, as every one was afraid to employ a non-union man.

The foreman under whom Clay had worked, stated that his work was satisfactory, but that he had been obliged to let him go because otherwise none of the union men would have stayed. As a result of all the evidence, the magistrate committed the accused for trial on the charge above mentioned.

## STREET RAILWAY COMPANY COMPELLED TO SELL WORKMEN'S TICKETS.

In the dispute between the City of Hamilton and the Hamilton Street Railway Company, judgment has been given obliging the Street Railway Company to sell on its cars workmen's tickets at the rate of eight for twentyfive cents.

This trouble grew out of the fact that some time ago the Street Railway Company enacted a by-law to the effect that it would only sell workmen's tickets at its own office, or at the factories of large employers who requested that tickets should be put on sale there. This was done on the ground that these tickets (which the company, under its agreement with the city, was bound to furnish during certain hours) were being used by people who had no right to them—the company claiming for itself the right to decide who should be entitled to this privilege. In this connection the company issued the following list of the occupations which would entitle persons to these limited tickets;

Barbers, butchers, bakers, bill-posters, biscuit makers, blacksmiths, boat builders, bookbinders, box-makers, brewers, brickmakers, brush-makers, carriage builders, carters, carpenters, cigarmakers, confectioners, coopers, dressmakers, draughtsmen, engineers, engravers, jewellers, lithographers, machinists, Milliners, nurses, painters, plumbers, printers, shoemakers, stenographers, tailors, tailoresses, tuners, window dressers, watchmen, waiters, waitresses, telephone operators, telegraph operators.

The city brought an action against the company, claiming breach of the agreement between them; and the company defended the action, setting up amongst other things, that in any event the city could not maintain such action unless the Attorney-General was made a party to the proceedings. At the trial of the action, the court held that the company had broken its agreement with the city, and that it was bound under the terms of that agreement, to sell the limited tickets on its cars to anybody demanding the same at the hours mentioned in the agreement, and at the rate of the company.

eight for twenty-five cents. The costs of the action were also given against (The City of Hamilton vs. The Hamilton Street Railway Co. Judgment given in the High Court of Justice for Ontario, November 3, 1904.

#### ACCIDENT CAUSED BY DEFECTIVE RAILWAY TIES.

R., a boy, was employed by a limestone company, which was using a train to take limestone from its crusher to a lake about half a mile distant. The train was composed of a light engine and twelve (12) cars and ran on a three foot track, being in charge of an engineer and brakeman. About half way in this journey were placed scales for weighing, and each car was there weighed separately. It was R.'s duty to throw the switches, make the couplings and block the cars as they were weighed.

On the 14th of May, 1903, eight or nine of these cars were derailed and wrecked, and R., who was on the car furthest from the engine, was instantly killed.

R.'s father brought an action against the company, on behalf of himself and his wife, alleging that the accident was caused by the bad condition of the track, for which the company was responsible.

The evidence showed that R. had been earning one dollar per day, and that he had helped to support his father and mother, as the health of the former was such that he could not do any hard work. Evidence was also given to the effect that the track was in very poor condition, although this was denied by some of the employees of the company.

The jury brought in a verdict awarding \$1,500 damages, \$1,000 to R.'s mother, and \$500 to his father.

(Rogers vs. The Empire Limestone Company. Action tried at Welland, Ont., by Chancellor Boyd and a jury, 21st November, 1904.)

#### ACCIDENTS CAUSED BY DEFECTIVE APPLIANCES.

F. was employed by a railway company. Part of his duty was to couple cars, and to do this he had to put his hand between the draw-heads in order to insert the pin. While doing this on one occasion, the drawheads came together, and closed on his hand, and as a result of this accident he lost the thumb and forefinger of that hand.

F. brought an action for damages against the railway company, alleging negligence. The evidence showed that in order to prevent accidents of that nature, links from eight to eighteen inches in length were generally used to keep the drawheads from closing, but that in this instance the link was only six inches long. It was claimed that the company was negligent, both on account of not having the links of the proper length, and also on account of not having provided sticks to lift the links, which, it appeared from the evidence, was done after this accident occurred.

The case was tried with a jury, which brought in a verdict awarding F. \$1,000 damages.

(Fulford vs. The International Railway Company of Niagara Falls. Action tried at Welland, Ont., by Chancellor Boyd and a jury, 21st Novvember, 1904.)

#### ACCIDENT CAUSED BY DEFECTIVE ELEVATOR.

T. Was employed by the Canada Woolen Mills at Hespeler, Ont. In the course of his employment, he was one day obliged to go from the second floor in the mill to the machine shop on the ground floor, in order to have some repairs made to part of the machinery which was under his charge. He stepped into the elevator for the purpose of going down to the machine shop, but the elevator fell to the bottom of the shaft, a distance of about twenty-five (25) feet, and T. was thereby seriously and permanently injured.

T. brought an action against his employers, alleging that the elevator was defective, and in an unsafe and improper condition, and that they were, therefore, liable for the accident thus caused.

The employers denied that they were guilty of any negligence, or that the elevator was in any way defective, and alleged that the accident was caused by T.'s own negligence.

At the trial, a jury brought in a verdict of \$3,150 in T.'s favour. This judgment was confirmed by the Court of Appeal for Ontario, and the Canada Woolen Mills then appealed again, taking the case to the Supreme Court of Canada. This latter Court also gave judgment confirming the judgment given at the trial.

(Traplin vs. Canada Woolen Mills. Judgment given by the Supreme Court of Canada, 14 December, 1904.)

# SYNOPSIS OF THE LABOR LAWS OF ONTARIO.

#### THE MINES ACT.

R. S. O., 1897, chap. 36, provides that no boy under the age of fifteen years shall be employed in or allowed to be, for the purpose of employment, in any mine to which this Act applies, below ground. The Act applies to all mines, quarries and pits, and oil, gas and salt wells, and other openings from which ores and minerals of any kind or class are raised or taken, and to all furnaces or works for smelting or otherwise treating rocks, ores or clays, sands, oils, brines or other minerals for any economic object.

No boy, or young male person of the age of fifteen and under the age of seventeen shall be employed or allowed to be for the purpose of employment in any mine to which this Act applies below the ground on Sunday or for more than forty-eight hours in any one week, or more than eight hours in any one day. • Any appliance used for the purpose of entrance to, or communication to or from any part of the mine, and which is operated by steam or other mechanical power, or by animal or manual labor, must be in charge of a male of at least twenty-one years of age. Where the motive power is supplied by an animal, the driver of such must be at least sixteen years of age.

No wages shall be paid to any person employed in or about any mine, etc., at or within any public house, beer shop or place for the sale of intoxicating liquors.

Each owner is required to make returns to the Bureau of Mines each year of the number of employees, their ages and hours of labor, the rate of wages of each class, together with weights and estimates of values of minerals, dressed and undressed, etc., and may be required by the Bureau of Mines to make such returns monthly or quarterly.

Provision is also made for proper ventilation, also care of explosives used in or about mines, etc., also for the appliances of safety in the operation of the shafts, cage, etc. Accommodation is also required near the entrance of the mine for the conveniently drying and changing of clothes of those employed in or about the mine, etc.

Provision is made for the reporting of any accident in writing within twenty-four hours of the occurrence of such accident, giving full particulars thereof.

#### MECHANICS' AND WAGE EARNERS' LIENS.

R. S. O., 1897, cap. 153, provides protection to wage earners and contractors for loss on account of labor or material furnished in the erection of buildings or the construction of machinery.

The Act not merely recognizes the new form of liability, but provides the means of establishing and enforcing claims arising under it. The original Act has been several times amended, with a view to make it more simple and perfect in its working. The Act also provides that the liens for wages shall, to a certain amount, have a priority over all other liens, and over any claims by the owner against the contractor, on account of failure to complete his contract.

In 1890, an Act was passed to simplify procedure for enforcing mechanics' liens. One clause provides that without issuing a writ of summons or taking any other preliminary proceedings, the plaintiff may file a statement of claim in the office of a master or official referee having jurisdiction in the county wherein the lands are situate. It is also provided that any number of lien holders may join in one action. The ruling or certificate of the master or official referee, when filed in the proper office, shall become a judgment of the High Court, when the sum is \$400.00 or over, of the County Court when less than \$400.00, but over \$100.00, and of the Division Court when the sum is less than \$100.00. The fees payable for entering such certificate as a judgment are as follows: In the High Court, \$1.60, in the County Court, S0 cents, in the Division Court, 50 cents.

A further amendment provides that a device by any owner or contract, or which shall be adpoted in order to defeat the priority of wage-earners for their wages under the several Acts relating to mechanics' liens, shall, as respects such wage-earners, be null and void.

A further provision regulates that in the case of wages due to any mechanic or other person in respect of work referred to in the 4th section of the Mechanics' Lien Act, the jurisdiction of a police magistrate in a city under the Act respecting master and servant shall extend wages for thirty days or for a balance equal to the wages for thirty days, though the same or the balance thereof exceed the sum of \$40.00 in the said section mentioned. It is also provided that where no specific rate of wages has been expressly agreed to between the parties, the city police magistrate may order payment of the wages, reckoning the amount thereof according to the current rate of wages in the city in like cases, or according to what may appear to be a just and reasonable allowance, and any order of a city police magistrate for the payment of such wages as aforesaid shall be payable forthwith.

# WOODMEN'S LIENS.

R. S. O., 1897, cap. 154.—This Act applies to the Districts of Muskoka, Parry Sound, Nipissing, Algoma, Manitoulin, Thunder Bay, and Rainy River, and to the provisional County of Haliburton, its purpose being to protect the wages of all engaged in those localities, in cutting, skidding, felling, hauling, scaling, banking, driving, running, rafting or booming any logs, or timber, and any work done by cooks, blacksmiths or others, usually employed in connection therewith, giving them priority of right for wages above all other claims, except such right as the Crown may have upon logs or timber for, or in respect of any dues or charges, or which any timber slide company, or owner of slides and booms, may have thereon or in respect of tolls.

This Act also provides that no payment of wages shall be made or offered to any person for any labor or services performed upon, or in connection with any logs or timber in the said districts or provisional county, by any cheque, order, I.O.U.. bill of exchange, promissory note, or other undertaking other than a bank note, or bill drawn upon or payable at or within any place or locality not within the Province of Ontario. A violation of this provision incurs a penalty of not less than \$5.00 or more than \$20.00, recoverable by summary proceedings before a stipendiary or police magistrate or justice of the peace, under the Ontario Summary Convictions Act.

#### LABOR ON PUBLIC WORKS.

R. S. O., 1897, cap. 155.—This Act secures payment of wages for labor performed in the construction of public works. Any foreman, workman or laborer, or by any team employed on the work, giving notice not later than two months after the wages are due to the member of the Executive Council entering into the contract, for and on behalf of her Majesty, or having the supervision of the execution of the contract where the same is made. may cause such claim to be paid to the extent of any moneys or securities at the time of the filing of the said claim in the hands of the Crown for securing the performance of the contract.

The Act also provides that the said member of the Executive Council may, in writing, require every contractor or sub-contractor to forward a list each month, showing the names, rate of wages, amounts due and unpaid for wages for labor done, such list to be attested on oath.

Failure to comply with this demand incurs a penalty of not less than \$10 or more than \$100 for every day during which default continues.

#### WAGES.

R. S. O., 1897, cap. 156.—An Act respecting wages—applies to wages or salary, whether payable by the day, week, piece, job or otherwise. When an assignment is made for the general benefit of creditors, the assignee shall pay in priority to the claims of the ordinary or general creditors of the person making said assignment, the wages or salaries of all persons in the employment of such person at the time of making such assignment or within one month before the making thereof, not exceeding three months' wages or salary, and such persons shall be entitled to rank as ordinary or general creditors for the residue, if any, of their claims. This provision also applies to the liquidation in distributing the assets of a company under the provisions of the Joint Stock Companies Winding-up Act, also to the sheriff who has made seizure, under the Creditors' Relief Act, also under the Act respecting Absconding Debtors, and also applies to the administration of the estate of deceased person. This Act is not intended to apply to an assignment made under the provision of any Act of the Parliament of Canada relating to or respecting bankruptcy or insolvency.

By an amendment of 1899, is was also provided that where an estate was not sufficient to meet priority of claims for wages or general debtors, that the priority extends to the wage-earner over all others excepting the cost of liquidation.

It is also provided that the executor, liquidator, administrator, or other person engaged in winding up the estate, may forthwith, upon such estate coming into his hands, pay all claims for wages, without being chargeable, in case it shall in the end appear that said estate was insufficient to cover such payment, provided that he has acted in good faith, and had reasonable ground to believe that the estate would be sufficient.

#### THE TRADES ARBITRATION ACT.

To Facilitate the Adjustment of Disputes Between Master and Workmen, R. S. O., 1897, chap. 159.

This Act provides that any number of masters and workmen in any city, town, township or village in Ontario, may mutually agree to the formation of a board of arbitration for the purpose of settlement of any industrial disputes that may arise at any time between them in their relations as employers and employees.

The masters and workmen shall jointly sign a memorandum, whereby it is mutually agreed to establish such board; such memorandum to be filed with affidavits verifying the signatures thereto in the registry office of the registry division within which the masters and workmen reside. The board shall consist of not less than two masters and two workmen, not more than ten masters and ten workmen and a Chairman, and the number to constitute the board other than the Chairman shall be inserted in the memorandum, but no member of the board shall adjudicate in any case in which he or any relation of his are one of the parties.

The board shall have the power to appoint their own chairman and two clerks, one for the masters and the other for the workmen's portion thereof. The board is given all the powers conferred upon arbitration by the Arbitration Act, R. S. O., 1897, chap. 140, s. 10.

Any award made by the board is final and conclusive between the partties thereto, without being subject to review or challenge by any court or authority whatsoever.

A committee of the board, to be denominated the committee of reconciliation, shall be appointed by the board, consisting of one master and one workman, who shall sit at such times as shall be appointed, and shall be renewed from time to time as occasion may require; and all cases or questions of dispute which are submitted to the board by both parties thereto shall, in the first instance, be referred to the committee, who shall endeavor to reconcile the parties in difference. When such reconcilation is not effected, the matter in dispute shall be referred to the board, to be disposed of as contested matter.

#### AN ACT RESPECTING MASTER AND SERVANT.

R. S. O., 1897, cap. 157.—Provides that no voluntary contract or services or indentures entered into by any parties shall be binding on them or either of them for a longer time than a term of nine years from the day of the date of such contract. Where an agreement is entered into between the master and the servant, by which a definite share of the profits or proceeds of a business is allotted to a servant, either in lieu of or additional to his salary, wages or other remuneration, and such agreement shall be deemed lawful, provided that in such case the servant must accept the statement of the said master as to proceeds involved in the agreement, and shall not have power to examine accounts of said master.

An agreement, whether verbal or written, entered into between master and servant, for the performance of any duty or service whatsoever, shall be binding, but a verbal agreement shall not exceed the term of one year.

The Act also provides that no tavern keeper or boarding house keeper shall keep the wearing apparel of any servant or laborer in piedge for an expense incurred to a greater amount than \$6, and shall surrender immediately any goods kept by said tavern or boarding house keeper under such circumstances upon the tender of said \$6 or less sum due. This does not apply to other property of the servant or laborer.

Any agreement, verbal or written, between any person, and any other person not a resident of Canada, for the performance of labor or service in the Province of Ontario, shall be void and of no effect as against the person only migrating or coming. This foregoing provision does not apply to teachers, professional actors, artists, lecturers or singers, or to such skilled workmen not procurable in Canada.

Proceedings may be taken under this Act for the collection of wages within one month after the engagement or employment has ceased, or within one month after the last instalment of wages under the agreement of hiring has become due. Where proceedings are taken under this Act before a police magistrate, and payment of wages is ordered by him to be made by the master or employer to the servant or laborer, and the same are not paid within the time limited by the order, the same proceedings may be taken by the person claiming the benefit of the order as may be taken by a party having an unsatisfied judgment or order in the Division Court for the payment of any debt, damages, or costs, as respects the examination of the judgment debtor touching his estate and effects, the means he has of discharging his liability, and the disposal he has made of any property, and the police magistrate shall have the like power and authority to enforce payment of the debt as are possessed by the Division Court judge in like cases. The police magistrate may also, if he thinks fit, name in the order for payment of wages such time, not exceeding twenty-one days, as to him may seem just and reasonable for the payment of the same and costs, and in case of non-payment within such time, the complainant shall be entitled to take forthwith the proceedings for enforcement provided by the Division Court Act with respect to judgment debtors.

In the case of wages due and no specific rate has expressly been agreed upon between the parties, the police magistrate has the power to fix the rate on the basis of the current rate of wages in the city in like cases, or according to what may appear to be a just and reasonable allowance.

Every agreement or bargain, verbal or written, expressed or implied, entered into, having for its object the waving of the provisions of this Ac 13 L. is declared null and void and of no effect as against any workman, servant, laborer, mechanic or other person.

By an amendment of 1904—a clause exacting repayment of advances paid to employee—prior to commencing employment and inflicting penalty for leaving before such advances were repaid—was repealed.

#### TRADES DISPUTES.

R. S. O., 1897, cap. 158.—An Act respecting Councils of Conciliation and Arbitration for settling industrial disputes.

The preamble to the Act recites: There is reason to believe that the establishment of councils of conciliation and arbitration for the friendly settlement of disputes between employers and employees, would conduce to the cultivation and maintenance of better relations and more active sympathies between employers and employees, and would be of benefit in the public interest by providing simple methods for the prevention of strikes and lock-outs, from which industrial operations and the welfare of the country generally may suffer injury.

The Act applies to any person or body of persons, incorporated or unincorporated, employing not less than ten workmen in the same business in which the trade dispute has arisen, and their employees.

A claim or dispute under this Act shall include any disagreement between any employer and his employees in respect of any of the matters following:

1. The price to be paid for work done or in course of being done, whether such disagreement shall have arisen with respect to wages, or to the hours or time of working.

2. Damage alleged to have been done to work, or delay in finishing the same; not finishing the same according to agreement; or dispute respecting materials supplied to employees or alleged to be bad, unfit or unsuitable.

3. The price to be paid for mining any material or substance mined or obtained by mining, hewing, quarrying or other process; or the allowances, if any, to be made for bands, refuse, faults, or other cause whereby the mining of the material substance is impeded.

4. The performance or non-performance of any stipulation or matter alleged to have been in the agreement, whether in writing or not.

5. Insufficient or unwholesome food supplied to employees where there is an agreement to victual them, or to supply them with provisions or stores of any kind.

6. Ill-ventilated or dangerous workings or places in mines, or unwholesome or insanitary rooms or other places of accommodation, in which work is being performed,, or want of necessary conveniences in connection with such rooms or places.

7. The dismissal or employment under agreement of any employee or number of employees.

8. The dismissal of any employee or employees for their connection with any trade or labor organization.

# Duties etc., of the Registrar.

It shall be the duty of the Registrar under this Act to deal with all applications coming within the meaning of the Act; to keep a register in which shall be entered all particulars of cases referred to the Council of Conciliation, and the settlement thereof. The Registrar shall have the power to summon witnesses and issue notices in connection with the sittings of each Council of Conciliation.

# Council of Conciliation.

Such council as above mentioned, shall consist of four councillors, two to be nominated by each of the parties in dispute; each nomination in writ ing to be lodged with the Registrar.

The council shall deal with cases in which the parties of the dispute jointly agree to refer the claim or dispute to the Council of Conciliation for settlement. Upon receipt of application the Registrar shall refer same to the Council, and under the Act shall carry out directions of the Council in the endeavor to affect a settlement of the dispute or claim.

Either party of the dispute or claim may, for the purpose of this Act, be represented by one or more persons, not exceeding three, authorized by such party as manager or managers in that behalf, and such party shall, be bound by the Acts of this representative or representatives; where the party number fewer than twenty, the manager must be authorized in writing, signed by the members of the party, to act for and on their behalf. Where the party number twenty or more, the manager may be elected in such manner as the members of the party think proper.

The statements of those thus agreeing to refer their dispute to the Council of Concutation, should be forwarded to the Registrar before the meeting of the Council. When the parties of the dispute or claim have nominated their conciliators, the Registrar shall, by notice in writing, convene a meeting of the conciliators, mentioning time and place of meeting, the same being selected with due regard to the convenience of all concerned. The Council of Conciliation shall transmit to the Registrar a report setting forth the result of the reference. In case such report is to the effect that the Council has failed to bring about any settlement or adjustment of the dispute or claim, the Registrar shall transmit a copy of the report to each party of the dispute or claim; whereupon either party may require the Registrar to refer the dispute to the Council of Arbitration for settlement.

# Council of Arbitration.

There shall be two Councils of Arbitration, one for the settlement of disputes and claims between railway companies (including street railway companies), and their employees, both in respect of railway construction or traffic on railways, and a Council of Arbitration for the settlement by award in respect of disputes and claims other than between railway companies and wage- $\epsilon_{..1}$ ners employed in respect of railway construction or traffic.

Each council shall consist of three members, one to be appointed by the Lieutenant-Governor on the recommendation of the employees, and one to be appointed by him on the recommendation of the employers. The third memher to be appointed shall be President of the Council, and may be appointed to the Lieutenant-Governor on the recommendation of the two members already appointed, within twenty-one days of their appointment. Failing in this, the Lieutenant-Governor shall appoint as President of the Council an impartial person, not likely to be biased in favor of or against employers or employees. The same person may be President of both Councils.

As soon as practicable after the appointments have been made, the names of the members of the Council shall be notified by the Registrar in the Ontario Gazette. The Lieutenant-Governor may cancel the appointment of any member on the recommendation of the authority by which his appointment was recommended. The term of office of a member of a council shall be two years; and at the end of every term of two years, a fresh appointment of members shall be made in manner aforesaid. Every member shall be eligible for reappointment.

## Qualification of Voters in the Interest of Employers.

For the person to be recommended by the employers every employer in the Province, having at least ten persons in his employment, shall be entitled to one vote; every organization in the Province, whether incorporated or unincorporated, representing the interests of employers, each member of which has at least ten persons in his employment, shall be entitled to one vote.

Every Board of Trade in the Province, legally constituted, shall be entitled to one vote for a representative of the employers in each Council.

## Qualification of Voters in the Interest of Employees.

For a person to be recommended by employees in matters not belonging to railways, every trades and labor council, every district assembly of the Knights of Labor, every federated Council of building trades, every lawfully incorporated trades union, every organization of wage-earners of an industrial calling primarily constituted for, and actually and *bona fide* operated for the regulation of the wages and hours of labor as between employers and employed, shall be entitled to one vote; but this shall not be deemed to include co-operative associations or societies formed under the Revised Statutes respecting Co-operative Associations.

For choosing the person to be recommended by employees of railway companies as a member of the Council of Arbitration in matters belonging to railways, every organization in the Province, whether incorporated or unincorporated, exclusively representing the interest of wage-earners employed in respect of railway construction or traffic on railways shall be entitled to one vote; but this shall not be deemed to include co-operative societies or associations.

The Registrar shall give notice in The Ontario Gazette, calling on all organizations and persons entitled to vote for a member to be recommended to either Council, or claiming to be so entitled to communicate with him on or before the 1st day of August, 1898, and every second year thereafter. Such notice is to be inserted for at least four weeks before the said day in each of the said years.

The Registrar shall forthwith, after the 1st day of August aforesaid, prepare a list of the persons and organizations appearing to be entitled to vote for a person to be recommended for appointment to each of the said Councils respectively, and may refer any doubtful claim to the Minister of Agriculture for his advice or direction.

Each list so to be prepared, shall give the last known postoffice address of every person and organization entitled to vote as employers and employees respectively, for the said Councils, respectively, and shall be published in The Ontario Gazette, and shall be open to inspection at any time by any person without fees, in the office of the Registrar, during office hours.

Between the 1st and 30th days of September, 1898, and between the same days of every second year thereafter, the Registrar shall transmit by post to the address of each person and organization entitled to vote, a voting paper; and such voting paper may be in the following form:

Voting paper of (naming the person or organization).

A. B. (person recommended), is hereby recommended to be appointed a member of the Council of Arbitration for disputes between railway companies and their employees( or in matters not relating to railway disputes), under the Ontario Trades Disputes, Conciliation and Arbitration Act, on behalf of the employees or employees, as the case may be).

#### (Signed)

The voting paper of any person entitled to vote under this Act as an employer shall be signed by himself or by some duly authorized person; and the voting paper of any organization entitled to vote shall be signed by the president or vice-president of the organization, or, in the absence of such president or vice-president, by any office-bearer of the organization other than the Secretary thereof, and shall be countersigned by the Secretary or the acting secretary, or, in the absence of such secretary or acting secretary, by any two members not being office- bearers. The voting papers of a Board of Trade shall be under the corporate seal of the Board.

The voting paper shall be forwarded to the Registrar in a stamped envelope, addressed to the Registrar of Councils of Conciliation and Arbitration, Toronto, and endorsed, "Voting paper under the Ontario Trades Dispute, Conciliation and Arbitration Act."

Every voting paper shall be forwarded by mail or otherwise to the Registrar, before the 15th day of October, in the year in which the voting is to be Leld, and no voting paper received after said date shall have any effect or validity.

After the 15th day of October, the Registrar shall count the recommendations of employers and employees for each council, and shall forward same to the Minister of Agriculture, with report thereon; and the Minister of Agriculture shall publish in The Ontario Gazette the names of the persons appointed by the Lieutenant-Governor upon such recommendations to be membors of each Council; and also the names of, and the number of votes of the five persons who shall receive the greater number of votes for each council on behalf of employers and employees, respectively.

In case either employers or employees, or both, fail to recommend any person to represent them on either or both the councils, as provided for in this section, the Lieutenant-Governor-in-Council may appoint a person or persons to fill the vacancy or vacancies.

The Mayor on any city or town, upon being notified that a strike or lockout is threatened, or has actually occurred within the municipality, shall at once notify the Registrar thereof in writing, stating the name of the employer, the nature of the dispute, and the number of the employees involved, as far as his information will enable him to do so.

Upon being notified that a strike or lock-out is threatened or has taken place, it shall be the duty of the Councils of Arbitration, under this Act, to communicate with the parties concerned as soon as practicable, and endeavor by mediation to effect an amicable settlement, and if deemed best, to enquire into the causes of controversy, it shall proceed as provided in this Act in the case of a reference.

The Council of Arbitration shall sit and conduct its proceedings as an open court, and in making its decision shall be governed by the principles of equity and good conscience. The President shall for the purpose of preserving order during any sitting of the Council, have all the powers of a Judge of a High Court of Justice. save that he shall not have the power of committing for contempt. Any two members shall constitute a quorum for the transaction of business, and may hold meetings at any time and at any place in the Province of Ontario.

The Council may order that an examination or investigation may be held before any one member of the Council, but such member shall report to the Council, and his decision shall not be considered binding until approved of by the Council or a majority thereof.

The report of award of the Council shall be made within one month after its hearing of a reference, and shall be by, and under the hands of, a majority of the members of the Council.

The report of award, or a copy thereof, shall be deposited in the office of the Registrar, and shall be open to inspection during affice hours without charge.

# Miscellagueous Provisions.

For the purposes of this Act the Councils of Conciliation and Arbitration shall have power (a) to visit the locality where the dispute has arisen and hear all persons interested who may come before them; (b) to summon witnesses and to administer oath, or to take the affirmations of any person attending as a witness before the Council. On refusal of any person to attend as a witress, application may be made in a summary way to a Justice of the Peace for an order compelling such attendance.

No fees shall be paid to the Registrar by any party in respect of any proceedings under this Act.

Every member of such Council shall be remunerated as follows:

v	Preliminary meetings	\$3.00
	Whole-day sittings	4.00
	Half-day sittings	2.00

AN ACT TO AMEND THE ACT RESPECTING COUNCILS OF CONCILIATION AND OF ARBITRATION FOR SETTLING INDUSTRIAL DISPUTES, S.O., CAP. 22, 1902.

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. Section 4 of the Trades Disputes Act is amended by adding the following sub-sections:

(4) If any difference shall arise between any corporation or person employing ten or more employees, and such employees, threatening to result, or resulting in a strike on the part of such employees, or a lock-out on the part of such employer, it shall be the duty of the Registrar, when requested in writing to do so by five or more of said employees or by the employer, or by the Mayor or Reeve of the municipality in which the industry is situated, to visit the place of such disturbance and diligently seek to mediate between such employer and employees.

(5) It shall be the duty of the Registrar to promote conditions favorable t.) a settling by endeavoring to allay distrust, to remove causes of friction, to promote good feeling, to restore confidence and to encourage the parties to come together and themselves effect a settlement, and to promote agreements between employers and employees with a view to the submission of differences to conciliation or arbitration before resorting to strikes or lock-outs.

WORKINGMEN'S COMPENSATION FOR INJURIES, R.S.O., 1897, CAP. 160.

This Act applies to all wage-earners while engaged in their daily occupation for injuries received by reason of any defect in the condition or arrangement of the ways, works, machinery, plant, buildings or premises connected with, intended for or used in the business of the employer, or by reason of the negligence of any person in the service of the employer, who has had any superintendence entrusted to him, or who has the charge or control of any points, signal, locomotive, engine, machine or train upon a railway, tramway or street railway.

If the injuries received result in the death of the workman, his legal r. presentative, or those entitled in case of death, shall have the same right of compensation and remedies against the employer, as if the workman had not been a workman of, nor in the service of the employer, nor engaged in his work.

#### Work Done Under Contract.

Where the execution of any work is being carried into effect under any contract, and personal injury is sustained by any workman, through any defect or negligence, as mentioned above, the person for whom the work is done shall be liable to pay compensation for the injury as if the workman had been employed by him, and for that purpose shall be deemed to be the employer of the workman within the meaning of this Act.

Personal injury caused to workman employed on or about any railway.

Such injury shall be deemed to have been caused by reason of a defect within the meaning of the clause numbered 1 of section 3 of this Act.

The amount recoverable under this Act, shall not exceed a sum equivalent to the earnings during three years previous to the injury received, in 1 ke employment within this Province, or the sum of \$1,500, which ever is the larger sum, and such compensation shall not be subject to any deduction or abatement, save as is specially provided for in section 12 of this Act.

When compensation is awarded in the case of the death of a workman, through an injury sustained by him in the course of his employment, the amount recovered may be divided between the wife or husband, parent or child, of the deceased, as the case may be, in such shares as the Court or Judge may direct, or if tried by Jury, as the jury may determine.

No action shall be maintainable against any employer, unless notice that the injury has been sustained is given within twelve weeks of the accident, and the action is commenced within six months of the occurrence of the accident. or in case of death, within twelve months from the time of death; in the latter case, the want of such notice shall be no bar to the maintenance of -uch action, if the Judge be of opinion that there was reasonable cause for want of such notice.

Notice under this Act shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury, the date on which it was sustained, and the amount of compensation claimed, and shall be served on the employer, either at his residence or place of business. The notice may also be served by post in a registered letter, and may be accemed to have been served when the letter containing the notice would be ciclivered in the ordinary course of post.

If the defendant in any action intends to reply for his defence on insufficient notice, or on the ground that he was not the employer of the workman injured. he shall, not less than seven days before the hearing of the action, give notice to the plaintiff of his intention to rely on such defence.

In the trial of an action for the recovery for compensation under this Act before a Judge without a jury, one or more assessors may be appointed by the Court or Judge, for the purpose of ascertaining the amount of compensation. In any such action a party who desires assessors to be appointed shall, ten clear days before the trial, file application stating the number of assessors he proposes to be appointed, and the names, addresses and occupations of the persons who have expressed, in writing, their willingness to act as assessors. If the applicant has obtained the consent of the other party to the persons named being appointed, he shall file such consent with his application.

This Act, by an amendment of 1899, gives the choice of settlement of claims for injuries. under the Act, by either action or arbitration, subject to a peal by either party to the High Court of Justice.

#### Apprentices and Minors, R.S.O., 1897, Cap. 161.

Any parent, guardian or other person having the care of a minor, or any charitable society authorized to exercise the powers conferred by this Act, may, if the minor consent, if the minor is a male not under the age of fourteen years, or a female not under the age of twelve years, and without consent if he or she is under such age, constitute to be the guardian of the child. any trustworthy person who is willing to assume the duty of a parent toward the child, but the parent shall remain liable for the performance of any duty imposed by law, in case the guardian fails in the performance thereof.

The guardian shall thereupon possess the same authority over the child as he or she would have were the ward his or her own child, and shall be bound to perform the duties of a parent toward such child.

#### Rights and Liabilities of Minors.

No minor who is dependent upon charity for support shall be removed from any charitable institution or from the control of any private person who is charitably taking care of the minor. by the father or mother or guardian, against the will of the head of such charitable institution or of such private person, without an order from the Judge of the High Court, or from the Judge of the County Court, or the Mayor or Police Magistrate of the city or town where the minor is; and the Judge or other person so empowered, may refuse to grant the order unless he is satisfied that the removal will tend to the advantage of the minor. When a minor, who has no parent or legal guardian, enters into an engagement to perform any service, he shall be liable upon the same, and shall have the benefit thereof, as if he were of legal age.

#### Annrenticing Minors.

A parent, guardian or other person having the care of a minor, or any charitable society authorized to exercise the powers conferred by this Act, may, with the consent of the minor, if a male not under the age of fourteen years, bind him as an apprentice by indenture to any respectable master, mechanic, farmer, or other person carrying on a trade or calling for a term not to extend beyond the minority of the minor; or in the case of a female not under the age of twelve years, may, with her consent, bind the minor to any respectable person carrying on a trade or calling, or to domestic service with any trustworthy person, for a term not to extend beyond the age of eighteen years.

When the father of an infant child abandons and leaves the child with the mother, the mother, with the approbation of two Justices of the Peace, may bind the child as an apprentice to any person as mentioned in the last section, until the child attains the age of twenty-one years in the case of a male, and eighteen in the case of a female, and an indenture to that effect under the hand and seal of the mother and countersigned by such justices, shall be valid, but no child, having attained the age of fourteen years, shall be so apprenticed, unless he or she consents.

In a city or town, the Mayor, Judge of the County Court or Police Magistrate, and in a county, the Judge of the County Court of the county, may put and bind for a like period to any person mentioned in the several sections of tris Act, with the consent of such person and of the minor (or if such minor is a male under the age of fourteen years, or a female under the age of twelve years, then without the consent of such minor), any minor who is an orphan or who has been deserted by his or her parents or guardian, or any minor who is dependent upon charity for support: and such apprentice and the master of such apprentice shall be held in the same manner as if the apprentice had Leen bound by his or her parents.

All wages reserved by any indenture or otherwise to be paid for the services of any minor, shall, if not payable to the parent, be either payable to the minor or to some person for the benefit of the minor.

If the master of an apprentice dies, the apprentice, if a male, shall be ransferred to the person who continues the establishment of the deceased and such person shall hold the apprentice on the same terms as the deceased, if living, would have done.

A master may transfer his apprentice, with his consent to any person who is competent to take or receive an apprentice, and who carries on the same kind of a business.

Every master shall provide his apprentice with suitable board, lodging and clothing or such equivalent therefor as is mentioned in the indenture, and shall also properly instruct him in his trade or calling.

Every apprentice shall faithfully serve his master and obey all his lawful and reasonable commands, and shall not absent himself from his service without his consent.

An indentured apprentice leaving his employment is liable to the penalties of the Act, if apprehended in the Province of Ontario, up to three years of his desertion.

# AN ACT RESPECTING INNKEEPERS, R.S.O., 1897, CAP. 187.

Every innkeeper, boarding-house keeper and lodging-house keeper shall have a lien on the baggage or property of his guest for the value and property of his guest for the value or price of any food or accommodation furnished, and in addition to all other remedies provided by law. shall have the right, in case the same remains unpaid for three months, to sell by public auction the property of such guest, on giving one week's notice by advertisement in a newspaper of the intended sale, stating the name of the guest, the amount of bis indebtedness, and giving a description of the property to be sold and shall pay over the surplus of such sale (if any) to the person entitled thereto, on application being made by him therefor.

Where an innkeeper, etc., or livery stable keeper has by law a lien on a horse or other animal for the price of any food or accommodation supplied to such animal or care bestowed therein. he shall have the right, in addition to the other remedies provided by law, if such price remains unpaid for the space of two weeks, to sell by public auction such horse or other animal, on giving two weeks' advertisement in a newspaper, stating (if known) the name of the person who brought such horse or other animal to the inn. etc., the amount of the indebtedness, and the name of the auctioneer, and giving the accorption of the horse or other animal, and after the sale the innkeeper, etc., shall pay over the surplus (if any) to the person entitled thereto on application being made by him therefor.

No innkeeper shall be liable to make good to any guest any loss or injury to goods or property to a greater amount than the sum of \$40.00, except in the following cases.

Where such goods or property have been stolen, lost or injured through the wilful act, default or neglect of such innkeeper, or any servant in his employ; where such goods or property have been deposited expressly for safe custody with such innkeeper.

#### PAWNBROKERS, R.S.O., 1897, CAP. 188.

The Act defines any person who takes and receives, by way of a pawn, pledge or exchange any goods for the repayment of money lent thereon, shall b deemed a pawnbroker within the meaning of the Act.

Any person carrying on the trade of pawnbroker shall have license issued by the treasurer of the municipality in which he is carrying on the business. Any person carrying on the business of pawnbroker without a license shall forfeit \$50.00 for every pledge he takes, recoverable with costs before police magistrate.

Each pawnbroker is required to exhibit sign with the word pawnbroker thereon, under a penalty of \$40.00.

Each pawnbroker is required to have painted or printed in a conspicuous place in his shop, the rates of profits he is allowed to charge under the Statutes of Canada, which rates are as follows:

R.S.C., cap. 128, provides that every pawnbroker may take the following rates above the principal sum advanced before he is obliged to re-deliver the goods pawned, that is to say, upon every pledge upon which there has been left out exceeding 50c the sum of one cent for any time not exceeding one month, and the same for every month afterwards, including the current month, in which the pledge is redeemed, although such month has not yet expired; and so on progressively, and in the same proportion for every sum of fi⁴ty cents up to twenty dollars.

When the sum lent exceeds twenty dollars, the pawnbrokers may take up .!! beyond the amount after at the rate of five cents for every four dollars by the month, and so on in proportion for any fractional sum.

Such sums respectively, shall be in lieu of and taken as full satisfaction for all interest due and charges for warehouse room.

On all pledges where the sum lent exceeds \$1.00 the pawnbroker is required to make entry of such in a book kept for the purpose, giving a description of the goods received, in pledge, the sum lent thereon, the date and the name and address of the person making the pledge and whether he is a house keeper or lodger.

When the amount lent is above \$2.00 a separate book must be kept for purpose of entry, the pledges received to be numbered in consecutive order in the book. The pawnbroker shall issue to the person making the pledge, a note or memorandum written or printed, containing a description of the goods pawned, and money advanced thereon, the date and name and address of the person making the pledge, and whether a housekeeper or lodger. On the back shall be printed or written the name and address of the pawnbroker.

For such ticket or memorandum he will be allowed to charge the following rates:

If the sum lent is under \$1.00, the ticket shall be free.

If the sum lent is over \$1.00 and under \$2.00, the charge snall be one cent.

If the sum lent is over \$2.00 and under \$5.00, two cents may be charged.

If the sum lent is over \$4.00 and under \$20.00, three cents may be charged.

When the sum lent is over \$20.00 and upwards seven cents may be charged.

No goods pledged can be sold by the pawnbroker until one year has expired after the pledge of such goods. If the amount lent exceeds \$2.00 the sale must be by public auction, and must be exposed to the public view. And a description of the goods, the date of the pledge, etc., published on two separate days in a public newspaper at least two days before the sale.

Should the goods be sold for more than was due thereon, and in case of demand within three years after the sale, the over plus, after deducting the costs, shall be paid to the person on whose account the goods were pawned.

No pawnbroker shall:

1. Purchase, receive or take any goods in pledge from any person who appears to be under the age of fifteen years, to be intoxicated with liquor, nor

2. Purchase or taken in pawn, pledge or exchange the ticket or memor: ndum of any other pawnbroker.

3. Employ any servant or any other person under sixteen years of age to take any pledge.

4. Receive any goods by way of pawn, pledge or exchange on any fast or Thanksgiving day appointed by authority, or on Sunday, or any other day before 8 o'clock in the morning, nor after 8 o'clock in the evening, except on Saturday and the evening preceding Good Friday and Christmas Day. On such days he may keep open his place of business until 10 o'clock p.m.

LIABILITY OF DIRECTORS OF COMPANIES FOR WAGES. R.S.O., 1897, CAP. 191.

The directors of the company shall be jointly and severally liable to the laborers, servants and apprentices thereof for all debts not exceeding one year's wages due for services performed for the company; but no director shall be liable to an action therefor, unless the company has been sued therefore within one year after the debt became due, nor yet before an execution against the company has been returned unsatisfied in whole or in part; and the amount due on such execution shall be the amount recoverable with costs against the directors.

# LIABILITY OF DIRECTORS OF MINING COMPANIES FOR WAGES. R.S.O., 1897, CAP. 197.

All mining companies in force in Ontario, shall be subject to the provisions of this Act.

The directors of a company shall be jointly and severally liable to the inborers, etc., for all debts not exceeding one year's wages due for services  $\mathbf{r}$ . rformed; but no director shall be liable to an action therefor unless the company has been sued therefor within one year after the debt became due, nor yet before an execution against the company has been returned unsatisfied in whole or in part; and the amount due on such execution shall be the amount recoverable with costs against the directors.

# Co-operative Associations. R.S.O., 1897, Cap. 202.

Any seven or more persons who desire to associate themselves together for the purpose of carrying on any trade, labor or business, whether wholesale or retail, except the working of mines, minerals, or quarries, and except also the business of banking and insurance, and the business of a loan corporation within the meaning of the Loan Corporations Act, may make, sign and acknowledge before a Notary Public or Justice of the Peace, in duplicate, and file in the office the Registrar of the Registry Division in which the business of the association is intended to be carried on, a certificate in writing on the torm set forth in the schedule of this act, or of the same effect together with a copy of the rules agreed upon for the regulation, government and management of the association, signed by such persons respectively.

Upon the filing of the certificate and rules as aforesaid, the members of the association shall become a body corporate by the name therein described, , ith power to hold such lands as are required for the convenient management of the business.

No association shall be registered under a name identical with that by which any other existing association has been registered, or so nearly resembling such name as to be likely to deceive the members or the public; and the word limited shall be the last word in the name of any association registered under this Act.

A member of an association incorporated under this Act may have shares therein to an amount mentioned in any by-law of the association, provided the same does not exceed \$1,000,000.

The liability of the shareholders shall be limited, that is to say: : No shareholder shall be in any manner liable for or charged with the payment of any debt due by the association, beyond the amount of his share, and having fully paid up the amount of his share shall not be subject to any further liability.

Every person appointed to an office touching the receipt, management, or expenditure of money, or with the receipt of goods, ware or merchandise, for the purpose of the association, shall before entering upon the duties of his office, give such security as is deemed sufficient by the trustees, which security shall be renewed from time to time as the amount of the business, or other circumstances, may, in the discretion of the trustees be rendered necessary.

The business of the association shall be a cash business exclusively; no credit shall be either given or taken, and no officer, member or servant of the association shall have power to contract any debt in its name, except in respect of rent of the premises required for the business, the salary of clerks and servants, and such like contracts, necessary in the management of the affairs of the association; everything shall be bought and sold for cash only.

#### INSURANCE BY TRADE UNIONS. R.S.O., 1897, CAP. 203.

Where a friendly society registered under this Act has its head office elsewhere than in the Province of Ontario, the Grand or other Provincial body, or the Lodges situated in the Province may file with the Insurance Registrar, an application for Provincial incorporation, setting forth the facts of the case, and the proposed corporate name and head office, and the purpose and rules of the society; also the names of those persons who are to be its first trustees, and stating the mode in which their successors are to be elected; also furnishing such other information as the Registrar requires. Upon due application made the Registrar may name a day for the hearing of the application, and such public hearing of the application shall be given in The Ontario Gazette and otherwise as the Registrar directs.

If, upon the hearing, it appears to the Registrar that such incorporation ought to be granted, he shall have authority to certify in duplicate. or in as many parts as may be required, under his hand and the seal of his office, that he finds entitled to incorporation under the name and for the purposes specified in the certificate, the persons mentioned therein.

One of the original parts of the certificate shall be filed in the office of the Provincial Registrar, together with such other documents as the Insurance Registrar by his certificates requires to be filed; and from the day of such filing the persons mentioned in the Insurance Registrar's certificate and their associates and successors shall henceforth be a body corporate and politic, and shall have the powers, rights and immunities vested by law in such bodies.

Upon due application the Insurance Registrar shall have authority to admit to registry as a friendly society the body so incorporated.

Upon like proceedings taken as enacted in the first section under this Act, incorporation may be granted in either of the two following cases:

Where any trade or labor union, or trade or labor organization purposes to undertake contracts with its own members exclusively, for any of the insurance benefits enumerated in and permitted by clause 3 of section 62, or contracts to furnish tools or to pay unemployed or superannuation benefits to the said members.

Where any organization of persons resident in Ontario, consisting of not less than twenty-five members and managed and operated as a friendly society under rules conforming to this Act purposes to contract with its own members exclusively for sick benefits, not exceeding five dollars a week and a funeral benefit of not more than one hundred dollars, or either of such benefits.

The body so incorporated may upon due application, be admitted to regiver as a friendly society; but unless and until so registered, the corporation shall not undertake, nor agree to offer to undertake, any contract insuring the said or other insurance benefits.

Where any society, association, union, organization or lodge already incorporated under a prior Act of this Province becomes incorporated under this Act, such prior incorporation shall be deemed to have been merged in and superseded by the said latter incorporation.

In addition to friendly societies standing duly registered as such, at the passing of this Act, the following shall be admissible to registry on the friendly Societies Register:

Societies incorporated from time to time by virtue of sections 33. 34. 36, 37 and 38 of this Act:

Any corporation not provided for elsewhere herein which has, by virtue of an Act of the Parliament of Canada, an insurance and provident society or association, or an insurance or guarantee fund in connection with the corporation, may upon due application for registry under this Act. be registered on the Friendly Society Register.

Provided that where any *bona file* trade union or labor organization provides by its constitution, by-laws or rules for the assistance, relief or support of its members, the Registrar may, by writing, under his hand and the seal of his office, declare the organization exempt from the operation of this Act: and such certificate shall remain valid until by like writing revoked; and the organization so exempted shall not be subjected to any penalty imposed by this Act:

Any corporation in Ontario which at the passing of this Act has under authority of an Act of Canada created a fund for paying a gratuity on the happening of death, sickness, infirmity, casualty, accident, disability or any change of physical or mental condition, shall, upon due application for registry hereunder, be entitled to be registered on the Friendly Society Register:

Any association of the civil servants or employees of the Dominion of Canada incorporated by virtue of an Act of the Parliament of Canada, may, upon due application, be admitted to registry.

# KAILWAY COMPANIES-BY-LAWS AFFECTING EMPLOYEES....R.S.O., 1897, CAP. 207.

Every railway company shall make such by-laws, rules and regulations to be observed by the conductors, engine-drivers and other officers and servants of the company, and by all other persons and companies using the railway of such company and such regulations with regard to the construction of the carriages and other vehicles, to be used in the trains of the railway of the company, as are requisite for the perfect carrying into effect of the provisions of this part of this Act and the orders and regulations of the Lieutenant-Governor-in-Council.

Any railway company, may, by a by-law, impose upon any officer, servant or person who, before the contravention of such by-law has had notice thereof, and is employed by the company, a forfeiture to the company of not more than thirty days' pay of such officer or servant, for any contravention of such by-law, and may retain such forfeiture out of the salary or wages of the offender.

The notice of the by-law, or of any order or notice of the Commissioner of Public Works, may be proved by proving the delivery of a copy thereof to the officer, servant or person, or that he signed the copy thereof, or that a copy thereof was posted in some place where his work or his duties, or some of them , ere to be performed.

Such proof, with evidence of the contravention, shall be a defence to the company in any action for the recovery from it of the amount so retained. The Electric Railway Act, R. S. O., 1897, cap. 209, contains four sections (137-140) exactly similar in terms to the above.

# STREET RAILWAYS-LIEN FOR WAGES. R.S.O., 1897, CAP. 208.

Every mechanic, laborer or other person who performs labor for wages  $u_{\rm b}$  on the construction or maintenance of the railway or the works connected therewith, shall have upon the said railway and other property of the company a lien for such wages not exceeding the wages for thirty days, and the said lien may be enforced in the manner provided for enforcing liens for wages by the Mechanics' and Wage-earners' Lien Act.

# Immigration Aid Societies. R.S.O., 1897, Cap. 212.

The Minister of Agrictulture shall from time to time divide the Province of Ontario into immigration districts, either by counties, ridings, municipalities, as seems to him most expedient; and in each of such districts there shall be an immigration office and an immigration agent; and such division and any future alteration thereof, shall be notified in The Ontario Gazette as the immigration district of the place where the immigration office is kept.

In each of such districts an Immigration Aid Society may be formed and constituted under this Act, for the purpose of assisting immigrants to reach Ontario from Europe and elsewhere; and of obtaining employment for them on their arrival in the Province; and of enabling persons in the Province in want of laborers, artizans or servants to obtain them by such immigration; te every such society shall consist of not less than twenty-five persons, whether resident or not in the immigration district, agreeing to form such society and to subscribe among them, as the capital of the society, not less than \$500.00, in fifty shares of \$10.00 each, one-fourth of which, at least, shall be paid on subscribing the declaration of membership into the hands of a person agreed upon as their secretary-treasurer, by the persons present at the meeting at which it is agreed to form the society.

The Act also provides for the regulation and control of such societies under the inspection of a district agent, to be appointed by the Minister of Agri-Such societies have power to make loans to immigrants, and proculture. vision is made for their inspection by the Minister of Agriculture.

## AN ACT RESPECTING MUNICIPAL MATTERS. R. S. O., 1897, CAP. 223.

This Act provides that the hours hours for the nomination of candidates for the offices of aldermen in cities may, by by-law be fixed at half-past seven o'clock in the evening, and for polling from nine in the morning until seven J'clock in the evening. This latter provision applies only to cities of 100,000 ichabitants and over. A by-law to extend the time of holding the lection until seven o'clock in the evening must be passed before the fifteenth day of November of the year in which such by-law is to take effect. In all (ther cases the polls shall be opened at nine o'clock in the morning, and shall continue open till five in the afternoon and no longer.

#### Powers of Police Commissioners as to Livery Stables, etc.

The Board of Commissioners of Police shall, in cities, license and regulate second-hand shops and junk stores, and the owners of livery stables and of horses, cabs, carriages, carts, trucks, sleighs, omnibuses and other vehicles regularly used for hire within the said city and shall establish the rates of fare to be taken by the owners or drivers of such vehicles for the conveyance of goods or passengers from any point within the city to any point not more than three miles beyond the limits of such city, and may provide for enforcing such rates.

The Board of Commissioners of Police in any city may pass by-laws defining areas or districts in the city within the limits of which no livery stable, sale, or boarding stable in which horses are to be kept for hire or for express purposes shall be established or maintained.

The Board of, etc., in any city shall pass by-laws regulating the hours of labor of persons employed in livery or boarding stables, or as drivers of cabs, carriages or sleighs kept for hire within the city, and also the hours of labor of persons employed by owners of horses, carts, etc., kept for hire within the city, and for licensing drivers of cabs within the said city.

The Board, etc., shall also regulate and control children engaged as:

(a) Express or despatch messengers;

Vendors of newspapers and small wares; (b)

Bootblacks. (c)

The Board in any city, and the council in any town, may regulate and prohibit the playing of bands and of musical instruments on any street, highway, park or public place in the city, but this shall not apply to any military band attached to any corps of the militia of Canada when on duty under command of its regular officer.

## Protection of Workmen and Others on Buildings.

By-laws may be passed by the councils of municipalities, townships, cities, towns and villages for inspecting and regulating the construction and erection of hoists, scaffolding and other constructions used in erecting, repairing, altering or improving buildings, chimneys or other structures; and for making all necessary regulations for the protection and safety of workmen and other persons employed thereon; and for appointing inspectors of scaffolding.

#### Egress from and Construction of Buildings.

By-laws may be passed as above for regulating the number of doors on churches, theatres, halls or other buildings used for worship, public meetings or places of amusement, and the street gates leading thereto; and the construction and width of stairways, in churches, etc., and in factories, warehouses, botels and boarding houses; and also the size and number of doors and other means of egress from all hospitals, schools, colleges and other buildings of a hke nature, and also the structure of stairs and railings in all such buildings, and the strength of beams, walls, and joists and their supports, and for compelling the production of plans for inspection and for enforcing the observance of such regulations.

For preventing the obstruction of the halls, aisles, passage-ways, etc., in any such buildings or leading thereto during the occupation of the same by any public assemblage.

#### Hoists and Elevators.

For licensing and inspecting elevators and hoists for passengers or freight, used by the public or by employees, and for imposing and enforcing penalties for the infringement of such by-laws, and for prohibiting and preventing the use of elevators and hoists contrary to the provisions of such bylaw. But the provisions in this clause contained shall be subject to the Ontario Factories Act and of any other Act making provisions applicable to elevators and hoists.

# By the Councils of Cities, Towns and Villages.

For regulating the construction of cranes, hoists and elevators, and for determining the manner in which elevators in buildings shall be constructed and worked, and for providing for the inspection of all cranes, etc., but none of the provisions of such by-laws shall be inconsistent with the Ontario Factories Act so far as the same provides for the regulation or construction of cranes, etc.

#### Cab Stands and Booths.

By-laws may be passed by the councils of cities, etc., for authorizing and assigning stands for vehicles kept for hire on the public streets and places; and for the erection and maintenance of covered stands for booths on streets, etc., and for the protection or shelter of the drivers of such vehicles. Provided that no such booth shall be placed upon any sidewalk without the previous consent of the owner or lessee of the property fronting or adjoining such stand or booth.

By-laws may be passed by the councils of cities, etc., for building, equipping and maintaining and operating street railways in, along and over such streets of the city or town and subject to and upon such terms as the Lieutenant-Governor-in-Council may approve; and for leasing the same from time to time on such terms as may be determined on; and for levying an annual special rate to defray the yearly interest on the expenditure therefor, and to form a yearly sinking fund for the payment of the principal within a time not exceeding thirty years.

A municipal corporation which builds, constructs, owns or manages a street railway shall have and exercise the same rights and powers and be subject to the same liabilities as street railways and companies under the Street Railway Act, except where the same conflict with or are repugnant to the rights, powers, liabilities or duties of a municipal corporation as provided by law.

#### Electric Street Railways.

By-laws may be passed by the councils of cities for compelling every electric railway company, operating its railway within the limits of such city, to provide proper and sufficient enclosed vestibules upon its street cars to protect the motormen and persons in charge of such cars, from exposure to cold, snow, rain or sleet, during the months of November, December, January, February and March in every year, while engaged in operating the cars.

# Schools for Artisans.

By-laws may be passed by the councils of municipalities, counties, cities and towns for establishing schools for the training and education of artisans, mechanics and workmen in such subjects as may promote a knowledge of mechanical and manufacturing arts, and for acquiring such real property as may be requisite for such schools; and the erection and maintenance of suitable buildings thereon; and for improving and repairing such school buildings, and for disposing of such property when no longer required. Councils establishing such schools may appoint boards of trustees to conduct the schools, giving them such authority as the councils may deem expendient.

For making grants in aid of such schools, or to art schools, approved by the Department of Education, as they may deem expedient.

# AN AMENDMENT TO THE MUNICIPAL ACT OF 1900.

Provides that in cities having a population of more than 15,000 the council may, by by-law, provide that the aldermen shall be elected by a general vote of the electors, and either by general vote, or in two electoral divisions with a population exceeding 40,000, one-half the number to be elected by each division, but such by-law shall not come into force until it has been first submitted to a vote of the electors, and the persons entitled to vote on such by-law shall be the persons entitled to vote at municipal elections. Upon a petition being presented by 400 of the electors, it shall be submitted at the next municipal election following, and such bylaw being carried by a majority of the electors voting thereon, shall come into effect at the next annual municipal election.

14 L.

Such a by-law may be repealed by a by-law to be submitted to the electors at any annual municipal election held not later than five years after its first coming into effect. The repealing by-law to be submitted to a vote of the municipal electors after being petitioned for by at least 400' of such electors. Where such vote has not been in favor of the election of mayor and aldermen by a general vote of the electors, and not by ward, a by-law bringing the Act into force may be passed by the council of the municipality before the first day of July next, without submitting the same to a vote of the municipal electors.

#### PUBLIC MEETINGS, R. S. O., 1897, CAP. 230.

The notice to be isued by the sheriff of any county, or by the mayor of any city or town, or by two or more justices of the peace, for calling any public meeting, shall be issued at least three days before the day on which such meeting is appointed to be held, and shall set forth the names of the requisitionists, or of a competent number of them. Also that the meeting is called within conformity of the provisions of this Act, and that such meeting, and all persons attending the same, will be within the protection of this Act, and that all persons are required to take notice and govern themselves accordingly.

Every person required by law, or who has in the usual way been appointed at such meeting to preside over the same, shall cause order to be kept at such meetings, and shall commence the proceedings of the meeting by causing the summons or notice calling the meeting, or the declaration whereby the same is declared to be a public meeting, under the protection of this Act, to be publicly read. The person who presides over such public meeting shall cause any person who attempts to interrupt or disturb such meeting to be removed to such a distance from the same as may effectually prevent such interruption or disturbance, and may adjudge any person who makes such an attempt guilty of such attempted disturbance, upon which conviction any justice of the peace may, by warrant under his own hand, forthwith commit such person to the common gaol of the county or district, for any period not exceeding forty-eight hours from the time of commitment signed, and until the lawful costs of the constable and gaoler for the arrest, transmission and detention of such person are paid or satisfied.

Every action to be brought against any person for anything by him done under authority of this Act, must be brought within twelve months next after the cause of such action accrued.

#### THE ONTARIO FACTORIES ACT.

#### Revised Statutes of Ontario 1897, Chap. 256, as amended to 1904.

AN ACT FOR THE PROTECTION OF PERSONS EMPLOYED IN FACTORIES.

1. This Act may be cited as "The Ontario Factories Act." R.S.O. 1887, c. 208, s. 1.

2. Where the words following occur in this Act they shall be construed in the manner hereinafter mentioned, unless a contrary intention appears:

1. "Factory" shall mean:

(a) Any building, workshop, structure or premises of the description mentioned in Schedule A to this Act, together with such other building, structure or premises as the Lieutenant-Governor in Council from time to time adds to the said Schedule; and the Lieutenant-Governor in Council may, from time to time, by proclamation published in the Ontario Gazette, add to or remove from the said schedule such description of premises as he ueems necessary or proper;

(b) Any premises, building, workshop, structure, room or place wherein or within the precincts of which steam, water, or other mechanical power is used to move or work any machinery employed in preparing, manufacturing or finishing, or in any process incidental to the preparing, manufacturing, or finishing of any article, substance, material, fabric or compound, or is used to aid the manufacturing process carried on there;

(c) Any premises, building, workshop, structure, room or place wherein the employer of the persons working there has the right of access and control, and in which, or within the precincts of which any manual labor is exercised by way of trade or for purposes of gain in or incidental to the following purposes, or any of them, that is to say: the making of any article or part of any article; the altering, repairing, ornamenting or finishing of any article; or, the adapting for sale of any article;

Provided that where not more than five persons are employed in any place coming within the foregoing definition of a factory, and that where children, young girls or women are employed at home, that is to say in a private house, place or room, used as a dwelling, wherein neither steam, water nor other mechanical power is used in aid of the manufacturing process carried on there, and wherein the only persons employed are members of the same family dwelling there, the provisions of this Act shall not apply.

A part of a factory may, for the purposes of this Act, be taken to be a separate factory; and a place used as a dwelling shall not be deemed to form part of the factory for the purposes of this Act.

Where a place situate within the close or precincts forming a factory is solely used for some purpose other than the manufacturing process or handicraft carried on in the factory, such place shall not be deemed to form part of that factory for the purposes of this Act, but shall, if otherwise it would be a factory, be deemed to be a separate factory, and be regulated accordingly.

Any premises or place shall not be excluded from the definition of a factory by reason only that such premises or place are or is in the open air. R.S.O. 1887, c. 208, s. 2, (1); 52 V. c. 43, s. 3 (1-2).

Where any owner, occupier or tenant of any premises, building, workshop, structure, room or place, who has the right of access thereto, and control thereof, lets or hires out or contracts for work or labor to be done therein by any other person, and such other person engages or employs therein any workman, child, young girl, or woman, in or for the carrying out or performing of such work or labor, or any part thereof, every such workman, child, young girl or woman shall, for all the purposes of this Act, be considered and taken as being in the service and employment of said owner, tenant, or occupier, and in computing the number of persons employed in any place in order to ascertain if such place comes within the definition of a factory according to the meaning and intent of this Act, every such workman, child, young girl or woman shall be taken into account. 52 V. c. 43, s. 3 (4).

2. "Inspector" shall mean any one of the inspectors appointed by order of the Lieutenant-Governor in Council under the authority and for enforcing the provisions of this Act. 2 Edw. VII., c. 36, s. 2 (2).

3. "Employer" shall mean any person who in his own behalf, or as the manager, superintendent, overseer or agent for any person, firm, company or corporation, has charge of any factory and employs persons therein.

4. "Week" shall mean the period between midnight on Sunday night and midnight on the succeeding Saturday night.

5. "Child" shall mean a person under the age of fourteen years.

6. "Young girl" shall mean a girl of the age of fourteen years, and under the age of eighteen years.

7. "Woman'' shall mean a woman of eighteen years of age and upwards.

8. "Parent" shall mean a parent or guardian of, or a person having the legal custody of, or the control over, or having direct benefit from the wages of a child or young girl.

9. "Court of summary jurisdiction" shall mean the Justices of the Peace or Police Magistrate, as the case may be, to whom jurisdiction is given by this Act to hear and determine prosecutions under this Act.

10. "Mill-gearing" shall comprehend every shaft, whether upright, oblique or horizontal, and every wheel, drum or pulley, by which the motion of the first moving power is communicated to any machine appertaining to a manufacturing process. R.S.O. 1887, c. 208, s. 2 (2-10); 52 V. c. 43, s. 2.

3. No child shall be employed in any factory, except in the business of canning or desiccating fruits and vegetables, and the work incidental thereto, as provided for in section 5 of this Act. 58 V. c. 50, s. 2.

4. The Lieutenant-Governor in Council may from time to time by Order in Council, notice of which shall be published in The Untario Gazette, prohibit the employment of girls under the age of eighteen, and of boys under the age of sixteen in factories, the work in which is deemed by the Lieutenant-Governor in Council to be dangerous or unwholesome. 58 V. c. 50, s. 12.

5. Boys and girls under fourteen years of age may be employed during the months of June, July, August, September and October in any year in such gathering in and other preparation of fruits or vegetables for canning or desiccating purposes, as may be required to be done prior to the operation of cooking or other process of that nature requisite in connection with the canning or desiccating of fruits or vegetables. The place, room or apartment in which such boys or girls may be so employed shall be separate from any other wherein the cooking or other process aforesaid, or the canning or desiccating of said fruits or vegetables is carried on. R.S.O. 1887, c. 208, s. 6 (6); 52 V. c. 43, s. 4 (2-3); 4 Edw. VII. c. 26, s. 6.

6.—(1) If a person is found in a factory, except at meal times or while all the machinery of the factory is stopped, or for the sole purpose of bringing food to the persons employed in the factory, such person shall, until the contrary is proved, be deemed for the purposes of this Act to have been then employed in the factory.

(2) Yards, playgrounds and places open to the public view, waiting nooms, and other rooms belonging to the factory in which no machinery is used or manufacturing process carried on, shall not be taken to be any part of the factory within the meaning of this section.

(3) Where a child or young girl is, in the opinion of the court, apparently of the age alleged by the informant, it shall lie on the defendant to prove that the child or young girl is not of that age. R.S.O. 1887, c. 208, s. 3. 7. A child, young girl or woman who works in a factory, whether for wages or not, either in a manufacturing process or handicraft, or in cleaning any part of the factory used for any manufacturing process or handicraft, or in cleaning or oiling any part of the machinery, or in any other kind of work whatsoever incidental to or connected with the manufacturing process or handicraft, or connected with the article made, or otherwise the subject of the manufacturing process or handicraft therein shall, save as is otherwise provided by this Act, be deemed to be employed in such factory within the meaning of this Act, and for the purpose of this Act an apprentice shall be deemed to work for hire. R.S.O. 1887, c. 208, s. 4.

(1) Young girls and women in factories shall, during working hours, wear their hair rolled or plaited and fastened securely to their heads, or confined in a close-fitting cap or net so as to avoid contact with working machinery or shafting or material being handled. It shall be the duty of managers, superintendents, foremen and others in charge, to see that employees are fully notified of the provisions of this section. 4 Edw. VII., c. 26, s. 1.

8. It shall not be lawful to employ in a factory any child, young girl or woman so that the health of such child, young girl or woman is likely to be permanently injured, and whoever so employs any child, young girl or woman shall, upon summary conviction thereof, incur and be liable to imprisonment in the common gaol of the county wherein the offence has been committed, for a period not exceeding six months, or to a fine of not more than \$100, with costs of prosecution, and in default of immediate payment of such fine and costs then to imprisonment as aforesaid. R.S.O. 1887, c. 208, s. 5.

9. To employ in a factory any child or any young girl or woman shall be deemed to be not lawful, and so that the health of such child, young girl or woman is likely to be permanently injured, if in that factory there is any contravention of the following provisions of this section, that is to say:

1. It shall not be lawful for a child, young girl or woman to be employed for more than ten hours in one day, nor more than sixty hours in any one week, unless a different apportionment of the hours of labour per day has been made for the sole purpose of giving a shorter day's work on Saturday.

The hours of working in any one day shall not be later than half past six o'clock in the evening, unless a special permit in writing is obtained from the Factories Inspector. 4 Edw. VII., c. 26, s. 2.

2. In every factory the employer shall allow every child and every young girl and woman therein employed not less than one hour at noon of each day for meals, but such hour shall not be counted as part of the time herein limited as respects the employment of children, young girls and women.

3. If the inspector so directs in writing, the employer shall not allow any child, young girl or woman to take meals in any room wherein any manufacturing process is then being carried on. And if the inspector so directs in writing the employer shall, at his own expense, provide a suitable room or place in the factory or in connection therewith, for the purposes of a dining and eating room for persons employed in the factory. R.S.O. 1887, c. 208, s. 6 (3-5).

10.--(1) Notwithstanding anything contained in this Act, women may, during the months of July, August. September and October in any year, be employed to a later hour than nine o'clock in the afternoon of any day in any factory wherein the only work or operations carried on relate to and are exclusively such as may be necessary for the canning or desiccating of fruits or vegetables, and the preparation thereof for being so canned or desiccated; but no woman shall be so employed during the said months to a later hour than nine o'clock in the afternoon of any day for more than twenty days in the whole, and in reckoning such period of twenty days, every day on which any woman has been so employed to a later hour than nine o'clock in the afternoon shall be taken into account.

(2) Where under the provisions of this section, any woman is employed on any day to a later hour than seven o'clock in the afternoon, she shall, on every such day and in addition to the hour for the noonday meal provided for by section 9 of this Act, be allowed not less than forty-five minutes for another or evening meal between five and eight of the clock in the afternoon. 52 V. c. 43, s. 10.

11.—(1) Subject to any regulations which may be made in that behalf by the Lieutenant-Governor in Council, it shall be lawful for the Inspector

(a) Where any accident which prevents the working of any factory happens to the motive power of any machinery; or

(b) Where from any other occurrence beyond the control of the employer the machinery, or any part of the machinery, of any factory cannot be regularly worked; or

(c) Where the customs or exigencies of certain trades require that the children, young girls or women working in a factory, or in certain processes in a factory, shall be employed for a longer period than as herein above provided.

on due proof to his satisfaction of such accident, occurrence, custom or exigency of trade, to give permission for such exemption from the observance of the foregoing provisions of the Act as will, in his judgment, fairly and equitably to the proprietors of, and to the women, young girls and children in such factory, make up for any loss of labour from such accident or occurrence, or meet the requirements of such custom or exigency of trade;

(2) In the case of the inspector permitting such exemption,

(a) No woman, young girl or child shall be employed before the hour of six o'clock in the morning nor after the hour of nine o'clock in the evening; and

(b) The hours of labour for women, young girls and children shall not be more than twelve and a half in any one day, nor more than seventy-two and a half in any one week, and

(c) Such exemption shall not comprise more than thirty-six days, in the whole, in any twelve months; and in reckoning such period of thirtysix days, every day on which any child, young girl, or woman has been employed overtime shall be taken into account; and

(d) During the continuance of such exemption there shall, in addition to the hour for the noon-day meal provided for by section 9 of this Act, be allowed to every woman, young girl or child so employed in the factory on any day to an hour later than seven of the clock in the afternoon, not less than forty-five minutes for another or evening meal between five and eight of the clock in the afternoon; and

(e) In every factory to, or with respect to, which any such permission for exemption is so given, there shall, in compliance with the provisions of section 34 of this Act, be affixed a notice specifying the extent and particulars of such exemption. R.S.O. 1887, c 208, s. 8; 52 V. 43, ss. 5 and 6. or woman is employed in any factory on any day for a longer period than is by the employer in a register, which shall be in such form as may be required by any regulations made in that behalf by the Lieutenant-Governor in Council. R.S.O. 1887, c. 208, s. 9.

12. When under the exemptions allowed herein any child, young girl or woman is employed in any factory on any day for a longer period than is allowed herein, the duration of such employment shall be daily recorded by the employer in a register, which shall be in such form as may be required by any regulations made in that behalf by the Lieutenant-Governor in Council. R.S.O., 1887, c. 208, s. 9.

13. Notice of the hours between which children, young girls or women are to be employed, shall be made in such form as may be required by the regulations made in that behalf by the Lieutenant-Governor in Council, and shall be signed by the inspector and by the employer, and shall be hung up during the period affected by such notice in such conspicuous place or places in the factory as the inspector requires. R.S.O. 1887, c. 208, s. 10.

14.—(1) A child shall not be allowed to clean any part of the machinery in a factory while the same is in motion by the aid of steam, water or other mechanical power.

(2) A young girl or woman shall not be allowed to clean such part of the machinery in a factory as in mill-gearing, while the same is in motion for the purpose of propelling any part of the manufacturing machinery.

(3) A child or young girl shall not be allowed to work between the fixed and traversing part of any self acting machine while the machine is in motion by the action of steam, water, or other machinery power.

(4) A child, young girl, or woman, allowed by an employer to clean or work in contravention of this section, shall be deemed to be employed by him contrary to the provisions of this Act, and to have contravened said provisions. R.S.O. 1887, c. 208, s. 7.

15.—(1) (a) The owner of every factory shall provide a sufficient number and description of privies, earth or water-closets and urinals for the employes of such factory, including separate sets for the use of male and female employees, and shall have separate approaches to the same, the recognized standard being one closet for every 25 persons employed in the factory.

(b) The owner of every factory shall be held responsible for the remedying of any effluvia arising from any drain, or defective plumbing, and for any repairs required to keep the building in a safe and habitable condition.

(c) The owner of every factory shall arrange for a supply of pure drinking water available for each tenant in the factory.

(2) The owner of every factory who for thirty days refuses or neglects to comply with the above requirements or conditions, after being notified in writing in regard to the same by the Factories Inspector, shall, because thereof, be deemed to be guilty of a contravention of the provisions of this Act. 4 Edw. VII. c. 26, s. 3.

16.—(1) (a) The employer of every factory shall keep the factory in a clean and sanitary condition, and free from any effluvia arising from refuse of any kind.

(b) The employer of every factory shall keep privies, earth or waterclosets and urinals in good repairs and in a sanitary condition, and shall be held responsible for keeping closets separated for male and female employees. (c) The employer of every factory shall heat each compartment used by him and regulate the temperature so as not to be injurious to the health and comfort of the employees, and to be consistent with the work performed therein, but in no case shall the temperature be less than 60 degrees Fahhenheit unless specially authorized by the Inspector in writing.

(d) The employer of every factory shall be held responsible for ventilating the factory in such a manner as to keep the air reasonably pure, and so as to render harmless, as far as reasonable practicable, all gases, vapors, dust or other impurities generated in the course of the manufacturing process or handicraft earried on therein that may be injurious to health.

(e) The employer of every factory shall not allow overcrowding while work is carried on therein, so as to be injurious to the health of the persons employed therein, the standard to be allowed being 300 cubic feet of room space for each employee.

(f) The Inspector of Factories shall have power in his discretion to requine the employer to provide a sufficient number of spittoons and place the same in different parts of the factory, and keep the same clean.

(g) In every factory where any process is carried on by which dust is generated and inhaled by the workers to an injurious extent if such inhalation can by mechanical means be prevented or partially prevented, the inspector may, subject to such regulations, if any, as may be made in that behalf, direct that such means shall be provided within a reasonable time by the employer, who in such cases shall be bound so to provide them.

(h) The employer of every factory shall provide a supply of wholesome drinking water and proper drinking cups for employees, which must be at least eight feet distant from water-closets and urinals.

(2) Where grinding, polishing or buffing is carried on in any shop the preceding clause (g) shall apply irrespective of the number of persons employed herein.

(3) The employer of every factory who for thirty days refuses or neglects to comply with the above requirements or conditions after being notified in writing in regard to the same by the Factories Inspector shall be deemed to be guilty of a contravention of the provisions of this Act. 4 Edw. VII. c. 26, s. 4.

17. Where two or more persons occupy or use the same room or premises for carrying on any work or business within the meaning of this Act, and employ in the aggregate six persons or more, no one of such persons employing so many as six, each of the several employers shall be held responsible for providing proper and sufficient water-closets, and the other requirements set forth in sections 15 and 16 of this Act; which said sections shall apply to each and every of such employers as if they were partners in all the work or business of the said room or premises. 58 V. c. 50, s. 4.

18. The inspector may, for the purposes of the next preceding three sections, take with him into any factory a physician, health officer, or other officer of the local sanitary authority. R.S.O. 1887, c. 208, s. 13.

19. It shall not be lawful to keep a factory so that the safety of any person employed therein is endangered, or so that the health of any person employed therein is likely to be permanently injured, and whoever so keeps a factory shall, upon conviction thereof, incur and be liable to imprisonment within the common gaol of the county within which the offence was committed, for a period of not more than twelve months, or to a fine of not more than \$500 with costs of prosecution, and in default of immediate payment of such fine and costs, then to imprisonment as aforesaid. R.S.O. 1887, c. 208, s. 14.

(a) It shall not be lawful to have a bedroom or sleeping place on the same floor of a building as a shop, bake house or factory, nor to have a bedroom or sleeping place in the same building as a shop, bake house or factory without the written consent of the inspector.

(b) It shall not be lawful to have a stable under the same roof as a factory, unless there is between the stable and factory a sufficient brick or other partition wall, approved by the inspector, separating the one from the other. 3 Edw. VII. c. 7, s. 45.

20.-(1) In every factory,

(a) All dangerous parts of mill gearing, machinery, vats, pans, caldrons, reservoirs, wheel-races, flumes, water channels, doors, openings in the floors or walls, bridges, and all other like dangerous structures or places shall be as far as practicable securely guarded. 58 V. c. 50, s. 3.

(b) No machinery other than steam engines shall be cleaned while in motion if the inspector so directs by written notice.

(c) The openings of every hoistway, hatchway and well-hole used for power elevators shall be at each floor, including the basement, provided with and protected by good and sufficient trap doors or self closing hatches, or by gates closing automatically, which gates shall not be less than five feet six inches high, and may be in sections, if desired. The sides of the shaft on all floors, including basement, not guarded by gates, shall be protected by enclosures at least six feet high, approved by the inspector. Where the elevator is enclosed in a tower having walls over six inches thick, it may be provided with an extra operating rope outside the tower. In every case the elevator must be provided with a lock to secure the operating rope. In case of elevators operated by hand power the gates must not be less than three feet in height, and must be automatic closing gates, and the sides not protected by gates must be protected by enclosures not less than four feet in height, approved by the inspector. A clearly painted sign marked "Dangerous," having letters not less than four inches in height, must be affixed or stencilled on the bottom rail of every gate, where it will be plainly visible from 'the outside. The top of every elevator platform shall be provided with a sufficient guard to protect the occupants, approved by the inspector. 4 Edw. VII., c. 26, s. 5.

(d) All elevator cabs or cars, whether used for freight or passengers, shall be provided with some suitable mechanical device to be approved by the inspector, whereby the cab or car will be securely held in the event of accident to the shipper, rope or hoisting machinery, or from any similar cause. R.S.O. 1887, c. 208, s. 15 (2-4).

(e) Any other particulars which any inspector from time to time considers dangerous, and in regard to which he gives notice to that effect to the employer, shall likewise as far as practicable, be secured or securely guarded. 58 V. c. 50, s. 6.

(f) Inflammable material, such as coal oil or petroleum, benzine and naphtha, and explosives of all kinds, shall be kept stored when not in actual use in a building separated from the other parts of the factory, or in a fire-proof compartment of the factory approved of by the inspector. 1 Edw. VII. c. 35, s. 2.

(g) No boiler shall be used that is not insured in some boiler inspection company duly authorized in the Frovince for that purpose, or that has not been inspected within one year by a competent inspector, such inspector to be a man who has had charge of a boiler and engine for a period of not less than five years, or who holds a certificate as a stationery engineer, and the manager or proprietor shall, whenever so requested by the inspector, produce for examination the insurance policy or the certificate of inspection. 1 Edw. VII., c. 35, s. 2.

(2) A factory in which there is a contravention of this section or of the regulations made for the enforcement of this section, shall be deemed to be kept unlawfully, and so that the safety of any person employed therein is endangered. R.S.O. 1887, c. 208, s. 15, *last part*.

21.—(1) In every factory.

(a). There shall be such means of extinguishing fire as the inspector, acting under the regulations made in that behalf, directs in writing;

(b) The main inside and outside doors shall open outwardly, and any door leading to or being the principal or main entrance to the factory or to any tower stairways, or fire-escapes therein, or belonging thereto, shall not be bolted, barred, or locked at any time during the ordinary and usual working hours in the factory. R.S.O. 1887, c. 208, s. 16 (1, 2).

(2) The owner of every factory over two stories in height, and where deemed necessary by the inspector, the owner of every factory over one storey in height, shall within six months of the time of passing of this Act, provide the said factory with one or more systems of fire escape as follows, and shall keep the same in good repair:

(a) A sufficient number of tower stairways with iron doorways within reach of or having easy communication with all the working rooms of the factory; or

(b) A sufficient number of iron or other uninflammable fire escapes on the outside of the building, such fire escapes to consist of stairways with railing or in case the special approval of the inspector is given in writing then of iron ladders, and every such stairway or ladder shall be connected with the interior of the building by iron or tinned doors or windows with iron shutters, and to have suitable landings at every storey, including the attic, if the attic is occupied as a workroom, and the said stairways to start at a distance of not more than eight feet from the ground or pavement; or to be

(c) Any other system of fire escape that may be sanctioned under this Act by the Lieutenant-Governor in Council on the recommendation of the Factories Inspector.

(3) The owner or proprietor of any factory refusing or neglecting to provide the means of safe exit in case of fire prescribed in this section shall upon conviction thereof incur and be liable to a fine of not more than \$500 with costs of prosecution, and in default of immediate payment of such fine and costs, be liable to imprisonment within the common gaol of the county for a period of not more than twelve months. 1 Edw. VII., c. 35, s. 3.

(4) A factory or workshop in which there is a contravention of this section shall be deemed to be kept unlawfully and to that the safety of any person employed therein is endangered. R.S.O. 1887, c. 208, s. 16 (3).

22. In case of a fire or accident in any factory occasioning any bodily injury to any person employed therein, whereby he is prevented from working for more than six days next after the fire or accident, a notice shall be sent to the inspector in writing by the employer forthwith after the expiration of the said six days, and if such notice is not so sent the employer shall be liable to a fine not exceeding \$30. 58 V. c. 50, s. 7.

23. In case of an explosion occurring in the factory, whether any person is injured thereby or not, the fact of such explosion having occurred shall be reported to the inspector in writing by the employer within twentyfour hours next after the explosion takes place. And if such notice is not so sent, the employer (shall be liable to a fine not exceeding \$30. 58 V. c. 50, s. 8.

24. Where in a factory any person is killed from any cause, or is injured from any cause, in a manner likely to prove fatal, written notice of the accident shall be sent to the inspector within twenty-four hours after the occurrence thereof, and if such notice is not so sent, the employer shall be liable to a fine not exceeding \$30. 58 V. c. 50, s. 9.

25. Where in a factory the owner or hirer of a machine or implement moved by steam, water, or other mechanical power, in or about or in connection with which machine or implement children, young girls or women are employed, is some person other than the employer as defined by this Act, and such children, young girls or women are in the employment and pay of the owner or hirer of such machine or implement, in any such case such owner or hirer shall, so far as respects any offence against this Act, which may be committed in relation to such children, young girls or women, be deemed to be the employer. R.S.O. 1887, c. 208, s. 20.

26.-(1) The provisions of this Act which relate

(a) To the cleanliness or to the freedom from effluvia, or to the overcrowding or ventilation of a factory; and

(b) To children, young girls and women being during any part of the times allowed for meals in a factory employed in the factory or being allowed to remain in any room; and

(c) To the affixing of any notice or abstract in a factory or specifying any matter in the notice so affixed, save and except where such notice is a notice of the name and address of the inspector; and

(d) To the sending notice of accidents; shall not apply where persons are employed at home, that is to say, to a private house, room, or place which, though used as a dwelling, might by reason of the work carried on there be a factory within the meaning of this Act, and in which neither steam, water nor other mechanical power is used, and in which the only persons employed are members of the same family dwelling there.

(2) The provisions of this Act which relate

(a) To children, young girls and women being during any part of the times allowed for meals in a factory, employed in a factory or being allowed to remain in any room; and

(b) To the affixing of any notice or abstract in a factory or specifying any matter in the notice so affixed, save and except where such notice is a notice of the name and address of the inspector;

shall not apply to a factory which is conducted on the system of not employing children or young girls therein, and the occupier of which has served on the inspector notice of his intention to conduct his factory upon that system.

(3) Where an employer has served on an inspector notice of his intention to conduct his factory on the system of not employing children or young girls therein, the factory shall be deemed for all the purposes of this Act to be conducted on the said system until the employer changes it, and no changes shall be made until the employer has served on the inspector notice of his intention to change the system, and until the change a child or young girl employed in a factory shall be deemed to be employed contrary to the provisions of this Act; a change in the said system shall not be made oftener than once in every three months, unless for special cause allowed in writing by the inspector. 52 V. c. 43, s. 8. 27. Nothing in this Act shall extend to any person being a mechanic, artisan or labourer, working only in repairing either the machinery in, or any part of, a factory. R.S.O. 1887, c. 208, s.23.

28. The Lieutenant-Governor in Council may from time to time, for the purpose of carrying out this Act-

1. Make such rules, regulations and orders for enforcing its provisions, and for the conduct and duties of the inspector, as may be deemed necessary;

2. Appoint the inspectors who shall be paid such salary or compensation as from time to time may be appropriated for the purpose by the Legislature. 2 Edw. VII., c. 36, s. 3.

29. The Lieutenant-Governor in Council may from time to time appoint a female inspector for the purpose of carrying out this Act, in addition to the other inspectors by law directed. 58 V. c. 50, s. 10.

30.—(1) The inspector shall for the purposes of the execution of this Act, and for enforcing the regulations made under the authority thereof, have power to do all or any of the following things, namely,

(a) To enter, inspect and examine at all reasonable times by day or night any factory and any part thereof when he has reasonable cause to believe that any person is employed therein, and to enter by day any place which he has reasonable cause to believe to be a factory;

(b) To require the production of any register, certificate, notice or document required by this Act to be kept, and to inspect, examine, and copy the same.

(e) To take with him in either case a constable into a factory in which he has reasonable cause to apprehend any serious obstruction in the execution of his duty.

(d) To make such examination and inquiry as may be necessary to ascertain whether the provisions of this Act are complied with, so far as respects the factory and the persons employed therein;

( $\epsilon$ ) To examine either alone or in the presence of any other person, as he thinks fit, with respect to matters under this Act, every person whom he finds in a factory, or whom he has reasonable cause to believe to be, or to have been, within the two preceding months employed in a factory, and to require such person to be so examined, and to sign a declaration of the truth of the matters respecting which he is so examined;

(f) For the purpose of any investigation, inquiry or examination made by him under the authority of this Act, to administer an oath to and to summon any person to give evidence;

(g) To exercise such other powers as may be necessary for carrying this Act into effect.

(2) The employer and his agents and servants shall furnish the means required by the inspector as necessary for any entry, inspection, examination, inquiry, or the exercise of his powers under this Act in relation to such factory.

(3) Every person who wilfully delays the inspector in the exercise of any power under this section, or who fails to comply with a requisition or summons of the inspector in pursuance of this section, or to produce any certificate or document which he is required by or in pursuance of this Act to produce, or who conceals or prevents a child, young girl or woman from appearing before or being examined by the inspector, or 'attempts 30 to conceal or prevent a child, young girl or woman, shall be deemed to obstruct an inspector in the execution of his duties under this Act; but no one shall be required under this section to answer any question, or to give any evidence, tending to criminate himself.

(4) Where the inspector is obstructed in the execution of his duties under this Act, the person obstructing him shall be liable to a fine not exceeding \$30; and where an inspector is so obstructed in a factory, the employer shall be liable to a fine not exceeding \$30, or where the offence is committed at night \$100. R.S.O. 1887, c. 208, s. 2. 31.-(1) The inspector, before entering, in pursuance of the powers

31.—(1) The inspector, before entering, in pursuance of the powers conferred by this Act, without the consent of the occupier, any room or place actually used as a dwelling, as well as for a factory, shall on an affidavit or statutory declaration of facts and reasons, obtain written authority to do so from the Lieutenant-Governor in Council, or such warrant as is hereinafter mentioned, from a Justice of the Peace or Police Magistrate.

(2) The affidavit or statutory declaration above mentioned may be inspected or produced in evidence, in all respects the same as an information on oath before a Justice.

on oath before a Justice. (3) A Justice of the Peace or Police Magistrate, if satisfied by information on oath, that there is reasonable cause to suppose that any enactment of this Act is contravened in any such room or place as aforesaid may, in his discretion, grant a warrant under his hand, authorizing the inspector named therein, at any time within the period named therein, but not exceeding one month from the date thereof, to enter, in pursuance of this Act, the room or place named in the warrant, and exercise therein the powers of inspection and examination conferred by this Act, and the fines and provisions of this Act, with respect to obstructions of the inspector, shall apply accordingly. R.S.O. 1887, c. 208, s. 26.

32. Every inspector under this Act shall be furnished with a formal certificate of his appointment, under the hand and seal of the Minister of Agriculture, (or other member of the Executive Council to whom the duty of the administration of this Act may from time to time be assigned under *The Act respecting the Executive Council*, and on applying for admission to a factory shall, if required, produce to the employer the said certificate. R.S.O. 1887, c. 208, s. 27; 52 V. c. 43, s. 9.

33.—(1) Every person shall, within one month after he begins to occupy a factory, serve on the inspector a written notice containing the name of the factory, the place where it is situated, the address to which he desires his letters to be addressed, the nature of the work, the nature and amount of the moving power therein, and the name of the firm under which the business of the factory is to be carried on, and in default shall be liable to a fine not exceeding \$30.

(2) In every factory the employer shall keep in the form and with the particulars prescribed by any regulation made by the Lieutenant-Governor in Council in that behalf, a register of the women, young girls and children employed in that factory, and of their employment, and of other matters under this Act; and shall send to the inspector such extracts from any register kept in pursuance of this Act as the inspector from time to time requires for the execution of his duties under this Act, and in default thereof such employer shall be liable to a fine not exceeding \$30. R.S.O. 1887, c. 208, s. 28.

34. There shall be affixed at the entrance of a factory and in such other parts thereof as the inspector directs, and be constantly kept so affixed in the form directed by the inspector and in such position as to be easily read by the persons employed in the factory—

1. Such notices of the provisions of this Act, and of any regulations made thereunder as the inspector deems necessary to enable the persons employed in the factory to become acquainted with their rights, 'liabilities and duties under this Act.'

2. A notice of the names and address of the inspector;

3. A notice of the clock (if any) by which the period of employment and times for meals in the factory are regulated;

4. Every other notice and document (if any) required by this Act to be affixed in the factory.

In the event of a contravention of any provision or requirement of this section in a factory the employer shall be liable to a fine not exceeding \$20. R.S.O., 1887, c. 208, s. 29. See sec. 11 (2e).

35. A notice of the name and address of the inspector shall, in compliance with such directions as the inspector may give under the provisions of section 34 of this Act, be affixed in every factory. 52 V. c. 43, s. 11.

36.-(1) Any notice, order, requisition, summons and document under this Act may be in writing or print, or partly in writing or partly in print.

(2) Any notice, order, requisition, summons and document required, or authorized to be served or sent, for the purposes of this Act may be served and sent by delivering the same to or at the residence of the person on or to whom it is to be served or sent, or where that person is an employer, within the meaning of this Act, by delivering the same, or a true copy thereof, to his agent or to some person in the factory of which he is employer; it may also be served or sent by post by a pre-paid letter, and if served or sent by post shall be deemed to have been served and received respectively at the time when the letter containing the same would be delivered in the ordinary course of post, and in proving such service or sending it shall be sufficient to prove that it was properly addressed and put into the post; and where it is required to be served on or sent to an employer it shall be deemed to be properly addressed, if addressed to him at the factory in respect of which he is employer, with the additon of the proper postal address, but wthout naming the person who is the employer. R. S. O. 1887, c. 208, s. 30.

37. Every person who wilfully makes a false entry in any register, notice, certificate or document required by this Act to be left or served, or sent, or who wilfully makes or signs a false declaration under this Act, or who knowing makes use of any such false entry or declaration, shall upon conviction thereof, be liable to imprisonment in the common gaol of the county wherein the offence was committed for a period not exceeding six months or to a fine of not more than \$100, with costs of prosecution, and in default of immediate payment of such fine and costs, then to imprisonment as aforesaid. R. S. O. 1887, c. 208, s. 22.

38. The parent of any child or young girl employed in a factory in contravention of this Act shall, unless such employment is without the consent, connivance or wilful default of such parent, be guilty of an offence in contravention of this Act, and shall for each offence on summary conviction thereof incur and pay a fine of not more than \$50 and costs of prosecution, and in default of immediate payment of such fine and costs shall be imprisoned in the common gaol of the county wherein the offence was committed for a period not exceeding three months. R. S. O. 1887, c. 208, s. 17.

39. If any of the provisions of this Act, or of any regulations, rules or orders made under the authority thereof by the Lieutenant-Governor in Council or by any inspector are contravened, and no other penalty is herein provided for such contravention, the employer guilty of such contravention, shall on summary conviction thereof incur and pay a fine of not more than \$50 with costs of prosecution, and in default of immediate payment of such fine and costs shall be imprisoned in the common gaol of the county within which the offence was committed, for a period not exceeding three months. R. S.O. 1887, c. 208, s. 31.

40. If a factory is not kept in conformity with this Act, the Court of summary jurisdiction, in addition to, or instead of inflicting a fine, penalty or other punishment upon the employer, may order certain means to be adopted by the employer, within the time named in the order, for the purlose of bringing his factory into conformity with this Act; the Court may also, upon application, enlarge the time so named, but if, after the expiration of the time as originally named or enlarged by subsequent order, the order is not complied with, the employer shall be liable to a fine not exceeding \$10 for every day that such non-compliance continues. R. S. O. 1887, c. 208, s. 32.

41. Where the employer is charged with an offence against this Act he shall be entitled, upon information duly laid by him, to have any other person whom he charges as the actual offender brought before the Court or tribunal at the time appointed for hearing the charge; and if after the commission of the offence has been proved the employer proves to the satisfaction of the Court that he had used due diligence to enforce the execution of the Act, and that the said other person had committed the offence in question without the knowledge, consent or connivance of him the employer, the said other person shall be summarily convicted of such offence and the employer shall be exempt from any fine, penalty or punishment. R. S. O. 1887, c. 208, s. 33.

42. Where it is made to appear to the satisfaction of the inspector at the time of discovering the offence that the employer had used all due diligence to enforce the execution of this Act, and also by what person such offence was committed and also that it was committed without the knowledge, consent or connivance of the employer and in contravention of his orders, then the inspector shall proceed against the person whom he believes to be the actual offender in the first instance. without first proceeding against the employer. R. S. O. 1887, c. 208, s. 34.

43. Where an offence for which an employer is liable under this Act to a fine has in fact been committed by some agent, servant, workman or other person, such agent, servant, workman or other person shall be liable to the same fine, penalty or punishment for such offence as if he were the employer, R. S. O. 1887, c. 208, s. 35.

44. A person shall not be liable in respect of a repetition of the same kind of offence from day to day to any larger fine, penalty or punishment than the highest fine, penalty or punishments fixed by this Act for the offence, except—

1. Where the repetition of the offence occurs after an information has been laid for the previous offence; or,

2. Where the offence is one of employing two or more children, young girls or women, contrary to the provisions of this Act. R. S. O. 1887, c. 208, s 36.

45. All fines or penalties in money imposed or recovered under or in pursuance of this Act, shall be paid by the convicting Justices or Police Magistrates, as the case may be, to the inspector, who shall forthwith pay the same over to the Treasurer of the Province to and for the use of the Province. R. S. O. 1887, c. 208, s. 37.

46. All prosecutions under this Act may be brought and heard before any two of Her Majesty's Justices of the Peace in and for the county where the penalty was incurred or the offence was committed or wrong done, and in cities and towns, in which there is a Police Magistrate, before such Police Magistrate; and save where otherwise provided by this Act the procedure shall be governed by The Ontario Summary Convictions Act. R. S. O. 1887, c. 208. s. 39.

47. The following provisions shall have effect with respect to summary proceedings for offences and fines under this Act :

1. The information shall be laid within two months, or where the offence is punishable at discretion by imprisonment, within three months after the offence has come to the knowledge of the inspector. 58 V. c. 50, s. 11.

2. The description of an offence in the words of this Act, or in similar words, shall be sufficient in law.

3. Any exception, exemption, proviso, excuse or qualification, whether it does or does not accompany the description of the offence in this Act, may be proved by the defendant but need not be specified or negatived in the information, and if so specified or negatived, no proof in relation to the matters so specified or negatived shall be required on the part of the informant.

4. It shall be sufficient to allege that a factory is a factory within the meaning of this Act, without more.

5. It shall be sufficient to state the name of the ostensible employer or the title of the firm by which the employer employing persons in the factory is usually known.

6. A conviction or order made in any matter arising under this Act, either originally or on appeal, shall not be quashed for want of form, and a conviction or order made by a Court of summary jurisdiction against which a person is authorized by this Act to appeal, shall not be removed by *certiorari* or otherwise, either at the instance of the Crown or of any private person, into the High Court except for the purpose of the hearing and determination of a special case. R. S. O. 1887, c. 208, s. 38 (2-6).

48. On the trial of any complaint, proceeding, matter or question under this Act, the person opposing or defending, or who is charged with any offence against or under any of the provisions of this Act, shall be competent and compellable to give evidence in or with respect to such complaint, proceeding, matter or question. 52 V. c. 43, s. 12.

49. Such annual or other report of the inspector as the Lieutenant-Governor from time to time directs, shall be laid before the Legislative Assembly. R. S. O. 1887, c. 208, s. 40.

50. Unless, and until otherwise ordered or directed by any regulation in that behalf made by the Lieutenant-Governor in Council.

(a) The register mentioned in and required by section 33 of this Act shall, so far as the same relates to children and young girls, be according to form A in Schedule B to this Act; and, so far as the same relates to women, he according to form B in the said Schedule;

(b) The register mentioned in and required by section 12 of this Act shall be according to form C in said Schedule;

(c) On the first page of any register kept by an employer pursuant to this Act, or to any rule, order or regulation made in that behalf by the Lieutenant-Governor in Council, shall be printed the form D in the said Schedule, or one to the like effect; and the same shall be properly filled up and signed by the inspector and the employer, when such register is commenced to be kept:

(d) Notice of the hours between which children, young girls or women are to be employed in any factory, as required by section 13 of this Act, shall be according to form E in said Schedule :

(e) Notice to an inspector. under sections 22 to 24 of this Act may be in the form of F of said Schedule.

(f) Notice to an inspection under section 26 of this Act may be according to such of the forms G and H of said Schedule as the case requires; and

(g) Notice to an inspector, under section 33 of this Act, may be in the form I of the said Schedule. 52 V. c. 43. s. 14.

51. The owner, proprietor or manager of any factory hereafter established and to which this Act applies, shall not begin operations until he shall have received from the Factories Inspector a certificate of inspection of the factory and a permit to operate the same and any such person violating the provisions of this section shall be liable to the penalties provided for in section 19 of this Act. 1 Edw. VII. c. 35, s. 4.

REGULATION OF SHOPS. R. S. O., 1897, Cap. 257.

An Act Respecting Shops and Places Other Than Factories.

No child, young girl or woman shall be employed in or about the shop on any day of the week, other than Saturday or the day next before a statutory holiday, before the hour of seven o'clock in the morning, or after the hour of six o'clock in the evening.

Saturday labor shall not commence before the hour of seven o'clock in the morning nor continue after the hour of ten o'clock in the evening.

There shall be allowed for each child, etc., so employed not less than one hour for the noonday meal, and not less than forty-five minutes for the evening meal.

If any child, young girl or woman is employed in a shop on the day next a statutory holiday until ten o'clock in the evening, in that case such child, etc., shall not be employed after six o'clock in the evening on Saturday of the same week.

Nothing in this section contained shall apply or be in force as to any shop, from the 14th day of December to the 24th day of December inclusive, in each year.

In any shop where females are employed the employer shall at all times provide and keep therein a suitable seat or chair for the use of every such female and shall permit her to use such chair when not necessarily engaged in her work.

Any person offending against the provisions of this Act shall be liable to a fine of not less than \$10.00, nor more than \$25.00, with the cost of prosecution, and in default of immediate payment of such fines and costs, to be imprisoned in the common gaol of the county for not less than one month or more than three months.

The provisions of this Act relating to the sanitary conditions of shops, and the means of extinguishing fire, etc., are practically the same as the provisions of the Factories Act in this respect.

The inspector shall have the right to exercise such powers a may be necessary for carrying this Act into effect.

#### BAKE SHOPS.

All bake shops to which this Act applies shall be constructed as to lighting, heating, ventilating and draining in such a manner as not to be injurious to the health of any person working therein, and shall be kept at all times in a clean and sanitary condition. so as to secure the production and preservation of all food products therein in a good, and wholesome condition. Every bake shop shall be supplied with a proper washroom, closet and other conveniences necessary for the health and comfort of the persons employed therein.

The sleeping places of the employees shall be entirely separate from the bake shop and no person shall be allowed to sleep in such shop.

No employer shall allow or require any employee to be in any bake shop to work on Sunday, nor to work more than twelve hours on any day, or more than sixty hours in any one week, except by permission of inspector.

No employer shall knowingly require or permit any person to work in his bake shop who is affected with consumption of the lungs or with scrofula, or with any venereal disease, and every employer is hereby required to maintain himelf and his employees in a clean and healthy condition, while engaged in the manufacture, handling or sale of such food products.

Any employer who violates any of the provisions of this Act which relates to bake shops shall for the first offence pay a penalty of not less than \$20.00, besides costs thereof, and not more than \$50.00; and for the second offence shall pay a penalty of not less than \$50.00, besides costs, and not more than \$100.00 and in default of payment shall be imprisoned in the common gaol of the county in which the offence is committed for a period not less than thirty days, or more than six months, and be kept at hard labor at the discretion of the Magistrate, and for the third and subsequent offences shall be imprisoned in gaol for a period not less than six months nor more than one year, to be kept at hard labor at the discretion of the Magistrate.

#### AN ACT TO AMEND THE ONTARIO SHOPS REGULATION ACT.

S.O., 1900, Cap. 43, provides that every person contracting for the manufacture of coats, vests, trousers, overalls, cloaks, cap, drawers, blouses, waists, waist bands, underwear, neckwear, shirts, or any parts thereof, or any other garment or article of clothing, or giving out for improvement, manufacture or alteration, incomplete material from which the said articles or any of them are to be made, or to be wholly, or partially altered or improved, shall keep a written register of the names and addresses, serially numbered of all the persons to whom such work or material is given to be made altered or improved, or with whom he may have contracted to do the same; and such register shall at all times be kept prominently posted up in the office of the person thus giving out such articles for manufacture, alteration or improvement.

Every article thus made, altered or improved, as aforesaid, shall bear upon a label attached thereto the register number or the name and address of the person to whom the same was given for manufacture, alteration or improvement, and any false statement upon such label shall render the person making the same liable to the penalties provided by this Act for making false entry in any register, notice, certificate or document.

No person shall knowingly sell or expose for sale any of the articles mentioned in this section and made in any dwelling house, tenement house or building in the rear of any tenenment, etc., without a permit from the inspector, stating that the place of manufacture is thoroughly clean, and otherwise in good sanitary condition. Such permit shall state the maximum number of persons allowed to be employed upon the said premises, and shall not be granted until an inspection of the premises is made by the inspector. When any article mentioned under this section is found by the inspector to be made under unclean or unhealthy conditions, or upon any unregistered premises, he shall seize and impound the same, and affix thereto a label bearing the words "unsanitary" printed on a tag not less than four inches in length.

The owner of such article shall, after it has been disinfected, be entitled to have the same returned to him. upon first paying the costs of such seizure and disinfection.

If the inspector finds evidence of unhealthy conditions, or of infectious or contagious disease present in any workshop, tenement or dwelling, where any of the articles herein mentioned are manufactured, etc., he shall forthwith report the same to the local board of health, and the board shall issue such an order as the public health may require, or may condemn or destroy all such infections and contagious articles or any articles manufactured under unsanitary conditions, as aforesaid.

#### IMMIGRATION OF CHILDREN.

R. S. O., 1897, Cap. 262, provides that no child shall be brought or caused to be brought into the Province of Ontario by any Society or agent of by any person other than the parent of the child, or person standing in *loco parentis* to such child, from any port in Great Britain or Ireland unless a certificate has first been obtained from an examiner stating that he has satisfied himself that the child named in the certificate has not been convicted of any crime, nor displayed any criminal tendencies, and that in other respect he is a child who may lawfully be brought into the Province.

Every society or agent shall maintain a careful supervision over every child caused by them to be brought into the Province, until such a child attains the age of eighteen years, and shall provide a permanent home or shelter, to which such child may be returned after being placed out in a foster home, or as an apprentice, if the person with whom the child has been placed is unable or unwilling to retain the custody of the child; and the addresses of such shelter shall be specified in every agreement made with persons receiving children into foster homes or as apprentices, and every such person shall, when so required by the society or agent, furnish full particulars as to the health, conduct, progress and welfare of such child.

Any complaints received that a child placed out in a foster home, or as an apprentice is being ill-treated or overworked, etc., shall be immediately investigated by the society or agent, and the necessary steps taken to protect the child from future ill-treatment or neglect.

Every society or agent having the custody of any child brought into the Province shall be entitled to send such child to the public or separate schools of the municipality in which the child resides, in the same manner as the child of any ratepayer.

If any child hereafter so brought into the Province of Ontario, within three years thereafter, becomes dependent on public or private charity, the society or agent, if so ordered by the inspector, shall pay to the Province or to any person maintaining the child, the cost of the maintenance of the child, and may be required to return the child to the place from which he came into this Province.

Any society or agent who brings into the Province any child, who from defective intellect or disease or physical infirmity, or any other defect, is unable to follow any trade or calling, or any child of known vicious tendencies, or any child who is known to be an habitual criminal, or whose par-

No. 29

ents have been criminals, lunatics or idiots, or weakminded or defective constitutionally, or confirmed paupers or diseased, shall be liable to a penalty of not more than \$100 or less than \$10, and in default of payment shall be imprisoned for any period not exceeding three months.

#### HORSE POWER FOR THRESHING MACHINES.

R. S. O., 1897, Cap. 265, provides that all persons owning or running any threshing machine, wood-sawing or other machine, which is connected to a horepower by means of a tumbling rod or line of shafting shall cause each of the knuckles, couplings and 'joints, etc., of such tumbling rod or line of shafting to be safely boxed or secured while running, with wood or leather or mental covering, in such manner as to prevent injury to persons passing over or near such tumbling rod, etc., and shall cause all oiling cups attached to arbors or journals to which driving belts are attached, to be furnished with tubes of tin or other material, which shall extend above the belt so as to prevent damage from oiling when the machine is in motion; and shall further cause a driver's platform to be placed on any horse-power used for driving machinery, of such size as to cover the gearing and to prevent accident to any person from contact with said gearing.

Any person who refuses to comply with the provisions of this Act shall be liable to a fine of not less than \$1 nor more than \$20, over and above the costs of prosecution, and in defult of payment shall be imprisoned in the nearest common gaol for a period of not less than two or more than twenty days.

#### TECHNICAL SCHOOLS.

R. S. O., 1897, Cap 301, provides that the trustees of any high school or board of education may, by resolution passed at a special meeting, called for the purpose, establish a technical school, or may change any high school already established into a technical schol, providing that such resolution shall not take effect until ratified by by-law of each municipality composing the high school district, and also by the county council (if any) required by the High School Act to contribute the equivalent of the legislative grant towards the maintenance of such high school.

The provisions of the High School Act shall apply to technical schools, subject to any regulations of the Education Department, with respect to fees, etc.

#### Technical Schools for Adults.

It shall be lawful for the municipality corporation of any city or town to appropriate such sums of moneys as may be deemed expedient for the establishment of a technical school for adults within the meaning of this Act.

The general management of the schools for adults shall be vested in and exercised by a board of management, to be appointed as provided in section 9 of the Public Libraries Act. In cities and towns where there is a Puble Library, technical schools for adults shall be under the control of the board of such library.

#### Employment of Prisoners.

R. S. O., 1897, Cap. 316, provides that the Lieutenant-Governor in Council may, from time to time direct the employment upon any work or duty, the nature of which is to be specified, beyond the limits of any common gaol, of any prisoner who is sentenced to hard labor under the authority of any statute of Ontario, or for breach of the by-laws of any municipal corporation in this Province. Every prisoner shall during such employment be subject to the rules and regulations of the gaol so far as applicable. No prisoner shall be so employed, save under the strictest care and supervision of officers appointed to that duty.

An account shall be kept of the amount earned by the labor of prisoners, and shall be divided between the Province and the county in proportion to the amount contributed by them respectively towards the maintenance of such prisoners.

#### ON APRIL 4th, 1900, THE FOLLOWING RESOLUTION WAS PASSED BY THE LEGISLATURE OF ONTARIO.

Resolved, that in the opinion of this House all Government contracts shall contain such conditions as will prevent abuses which may arise from the sub-letting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the district where the work is carried out, and that this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect thereto; and it is hereby resolved that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all works aided by a grant of provincial public funds, and that the aforesaid policy shall be forthwith applied to every department of the public service, and to all parties now performing services for the Government. That this House is further of the opinion that in all appropriate cases the legislation of this House should be in harmony with this resolution.

#### S. O. 1900, CAP. 14. AN ACT RESPECTING THE BUREAU OF LABOR.

Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows :

1. There shall be attached to the Department of the Commissioner of Public Works a bureau, to be styled "The Bureau of Labor."

2. The Lieutenant-Governor may appoint a Secretary of the said Bureau and may also appoint such other officers as may be necessary for the proper conduct of the Bureau.

3. It shall be the object of the Bureau to collect, assort and systematize and publish information and statistics relating to employment, wages and hours of labor throughout the Province—co-operation, strikes, or other labor difficulties, trades, unions, labor organizations, the relations between capital and labor, and other subjects of interest to workingmen, with such information relating to the commercial, industrial and sanitary condition of workingmen, and the permanent prosperity of the industries of the Province, as the Bureau may be able to gather.

AN ACT RESPECTING AID TO CERTAIN RAILWAYS, S.O., 1901, CHAP. 22

Contains clauses for the protection of workmen engaged thereon, as follows:

8. The workmen, laborers or servants employed on or about the construction of the said railway, each of them shall be charged fair and reasonable prices for any board, provisions, clothing and other necessaries of life and reasonable comfort, supplied by the company, their agents or any person or persons authorized by the said company to supply such goods and accommodation, and upon the breach of any of the provisions of this section or in the event of exorbitant charges being made by the railway company, their agents or other person or persons authorized by the railway company, there may be deducted and retained from moneys payable in respect of such unearned subsidy, or hereafter to be granted subsidy, such amount as the Lieutenant-Governor in Council may think proper.

12. The Lieutenant-Governor in Council may instruct the Secretary of the Provincial Board of Health to enforce such reasonable sanitary regulations on the works and in the camps connected therewith during the construction of the said railways, as may be deemed necessary to maintain proper sanitary conditions and accommodation, and contractors shall have at such camps a tent and store, where in case of emergency a patient suffering from a contagious disease may be isolated at once, so as not to endanger the men in the camp.

18. All the provisions of the "Act to secure payment of wages for labor performed in the construction of public works," of the "Act respecting subsidies to railways and to encourage the manufacture of railway steel and iron in the Province," and of "The Ontario Railway Act," shall apply to the subsidies granted by this Act, and the wages paid on any of the said works shall be such as are generally accepted as current for competent workmen in the respective districts where such railways are to be constructed.

AN ACT RESPECTING SANITARY REGULATIONS IN UNORGANIZED TERRITORIES, .

S. O., 1901, chap. 34, provides that the Lieutenant-Governor may from time to time make regulations applicable only to those parts of the Province which are without municipal organization.

(1) Respecting any particular industry, and the conditions under which the same may be carried on, for the purpose of preventing nuisances and the outbreak or spread of disease.

(2) For the cleansing, regulating and inspection of lumbering camps, mining camps, and railway construction, and other places where labor is employed.

(3) For providing for the inspection of houses and premises.

(4) For providing for the employment of duly qualified medical practitioners by employers of labor in lumber and mining camps and railway construction and other works where labor is employed, and for the erection of permanent or temporary hospitals for the accommodation of persons so employed.

S.O., 1901. CAP. 36. AN ACT TO AMEND THE ONTARIO SHOP REGULATIONS ACT.

1. Section 13 of the Ontario Shops Regulation Act is amended by adding thereto the following sub-sections:

(3) The owner of every shop shall be held responsible for the providing of the sanitary conveniences provided under sub-section (2) of this section, and on failure or refusal to provide the same within two months after receiving written notice from the inspector, shall be liable on conviction to a fine of not more than \$500; or in default of payment of the same, shall be imprisoned for a period of not more than twelve months. (4) Where grinding, polishing or buffing is carried on in any shop, the provisions of section 16 of the Ontario Factories Act shall apply to such shop.

2. Section 39 of the Ontario Shops Regulation Act is repealed and the following substituted therefor :

39. No person shall require, permit or suffer any employee in any bake shop to work on Sunday, nor for more than twelve hours out of every twentyfour hours, computed from the time when the employee commences to work, nor more than sixty hours in any one week, to be computed as commencing on Monday and ending on Saturday, both days inclusive, except by permission of the inspector given in writing to the employer; and a copy of such permission shall be posted in a conspicuous place in the bake shop.

#### BARBER SHOPS.

3. The said Act is further amended by adding thereto the following as sections 45 and 46.

45. No employer shall require, permit or suffer any employee in any barber shop to work on Sunday, and no proprietor of any barber shop shall open his barber shop or permit the same to be opened to the public or carry on any business or work therein at any time between the hours of 12 o'clock on Saturday night and 12 o'clock on Sunday night.

46. Any employer or any proprietor of a barber shop who violates the provisions of the preceding section shall on conviction thereof be liable to a penalty of not less than \$20, besides costs, and not more than \$50, besides costs, and in default of payment of the same, shall be imprisoned for a period of not less than thirty days and of not more than six months.

## REPORT OF THE

## ONTARIO GAME COMMISSION

1904.

#### His Honor The Lieutenant-Governor of the Province of Ontario.

SIR,-We, your Commissioners, beg to present to you the Thirteenth Annual Report of the Ontario Game Commission.

The winter of 1903-4 will long be remembered for its length and severity, and the havoc it wrought among our Game Birds and Animals. In some localities quail were entirely swept out, and deer perished in large numbers through lack of food. Even that hardy little animal the wood hare succumbed to the severity of the weather and scarcity of food.

Finding in the spring that the breeding stock of quail was reduced to a minimum, your Commissioners asked for an Order-in-Council making the year 1904 a close season for quail. The order was granted, and very generally approved of by sportsmen in the Province. From the present outlook it may be considered expedient and wise to extend the close season over another year. After discussing different methods for the purpose of endeavoring to keep up a fair stock of quail in the country, your Commissioners have arrived at the conclusion that the best results are likely to be obtained by importing birds from the South in the spring and turning them down. And the Government will be asked to grant a sum of money annually for that purpose.

The shooting season of 1904 will not be looked back upon by the sportsman as a red-letter one. It being a close season for quail, he could not indulge in that grandest of all upland shooting; and ruffed grouse were very scarce in most localities. Woodcock were also scarce. These noble game birds are becoming scarcer year by year; this is to be accounted for by two reasons. One the destruction of their haunts and breeding-grounds, and the other the indiscriminate slaughter among them in their winter home in the Southern States.

Snipe afforded good sport during the season, and good bags were made; better than have been reported for several years past.

Duck were plentiful, and on some preserves good bags were made throughout the season; and from others came the report of indifferent sport. It is gratifying to know that the Mallard and Black Duck appear to be holding their own in numbers.

Deer and moose afforded good sport, and the numbers killed fell but a little short of the season of 1903. Our northern country is being visited by sportsmen in increasing numbers every year in quest of deer and moose, and your Commissioners feel that in the near future further restrictions must be placed on hunters. During the season 5,238 deer licenses and 132 moose licenses were granted: this speaks well for the popularity of Northern Ontario with the devotee of the rifle. Our fur-bearing animals are becoming scarcer year by year, owing, no doubt, to a large extent, to the market value of their pelts.

Reference was made in our last report to the importation of a number of Capercailzie from Europe. The birds were turned down in the Algonquin Park, and from reports received from the park superintendent it is very gratifying to know that the birds are doing well, broods of young birds having been seen in different localities. Should the birds continue to increase in numbers, they will form a valuable addition to the game birds of the Province.

Your Commissioners beg to urge on the Legislature the advisability of enacting legislation against the use of automatic and repeating shot-guns. When we see our game birds becoming scarcer year by year, and those carrying fire-arms increasing in numbers, it becomes an absolute necessity to stay the hand of the slayer by legislation.

It affords your Commissioners great pleasure to express their appreciation of the faithful and painstaking manner in which the Chief Game Warden, Mr. E. Tinsley, continues to discharge the duties of his office. Through his vigilance the Department continues to show gratifying financial results year by year. During the year 1904, the receipts from all sources were \$19,347.65, and the expenditure \$11,765.17; leaving a net balance to the Province of \$7,582.48.

All of which is respectfully submitted.

#### MONTAGUE A. A. SMITH, Chairman Ontario Game Commission.

#### REPORT OF THE CHIEF GAME WARDEN.

TORONTO, January, 1905.

MONTAGUE A. A. SMITH, ESQ., Chairman Ontario Game Commission.

SIR,— In presenting this, the thirteenth annual report of the Ontario Game Commission, I do so trusting it will meet the approval of yourself and colleagues, and that the result of the year's work has been satisfactory to the sportsmen of the Province and the public in general.

The usual statement of convictions, copies of Orders-in-Council, lists of license issuers, non-resident sportsmen and deputy wardens, with other important matters will be found herein, which I venture to hope will be satisfactory.

#### WARDENS.

The wardens in charge of districts have rendered most efficient service, as in the past; they have been energetic and fearless in the discharge of their somewhat onerous and manifold duties. They, and the Inspectors and Provincial Officers of the Attorney-General's Department, also the employees of the Crown Lands Department, deserve my warmest commendation for the effective and valuable assistance received from them in enforcing and carrying out the Game Laws of the Province.

#### DEPUTY WARDENS.

There were 320 on the roll in my last report. Three have resigned during the year and one was drowned. Forty more have been appointed, the number now on the roll being 356. Many of them have been very effective in their respective localities, and have done far more to enforce the Game Laws than could rightly be expected in return for their uncertain remuneration.

#### GAME LAWS.

The Game Laws are becoming each succeeding year more respected as they become better understood by the general public, who now realize that it must be either protection or extermination, and wisely choose the former. I regret the necessity of again having to allude to a number of men in business in various parts of the Province who have so little respect for their characters as business men. These men, whom I am glad to say are few in number, are in collusion with law breakers and poachers. Storekeepers who knowingly purchase from poachers raw furs or game illegally procured are to a large extent in the same class as receivers of stolen property, and should be punished to a similar extent. These merchants' stores are the depots from which the agents of firms in other Provinces purchase illegal furs and game for export. To such an extent does this illegal traffic prevail that we have to meet all trains and all express matter at the principal railway stations. During the year 1904 upwards of 1,500 brace of partridge have been seized and confiscated, nearly all of which, had they escaped the vigilance of our Deputy Wardens, would have been sold in New York and Boston. The penalty for those caught engaged in such transactions should be imposed to the fullest extent, for the purpose of paying the cost of the espionage made necessary by their illegal actions.

With one or two unfortunate exceptions the large number of American sportsmen hunting in the Province have conducted themselves as gentlemen and sportsmen would be expected to do, respecting our game laws and proving their title of gentlemen and sportsmen and all these words imply. Many have expressed themselves to me in glowing terms of the enjoyment and satisfaction derived from their visit to the Province; many of them allude in kindest terms to the uniform courtesy extended to them by the Wardens, Deputy Wardens, and others with whom they came in contact. In miserable contrast to the conduct of the above mentioned gentlemen was the conduct of four young Americans who from their appearance were intelligent enough to have known better, and whose names I omit in regard for the feelings of their relatives and connections. These four men, from a well known coal and iron district of the United States, on their arrival in the Province represented themselves to be residents of Ontario, securing licenses for five dollars instead of twenty-five dollars each, thus defrauding the Government to the extent of eighty dollars. Not satisfied with that, they went into the woods, several days before open season commenced, and not only killed game during the close season, but wantonly shot cow and calf moose, leaving the remains to rot in the woods. Too much cannot be said of "the prohibiting of the sale of game' as an effective factor in game protection. It removes the object for killing game by the market hunter and to some extent puts him out of business.

It will be necessary to further prohibit for a number of years the sale or barter of snipe, woodcock, quail, English or Mongolian pheasants, all species of grouse, including ruffed grouse, better known by its local name of partridge. I regret to say the necessity for further protection of wild turkey in the province no longer exists. I do not believe that there is a single specimen of this grand game bird at this time in its natural wild state in the province. Although protected for a number of years they have disappeared with the woods in the counties of Essex, Kent and Lambton, the last three counties in which they were found.

A large number of the best sportsmen in the province want the open season for ducks to commence September 15th instead of September 1st, a change I would strongly recommend. This change would result in all species of wild fowl except quail having the same open season. Sportsmen wanting this change allege that the ducks which reach our lakes and bays from the far northern breeding grounds during the latter part of August and early September, have not time to settle down and stay in our bays and marshes, as they would do if left undisturbed for two or three weeks after they arrive. It is further alleged that not only are the ducks driven away by this early shooting and never return, but that the ducks, after their long flight, are in poor condition, and to some extent unfit for food during the warm weather that prevails in the early part of September.

The action of the Legislature in reducing the open season for quail, and the order passed by the Lieutenant-Governor in Council, making the season of 1904 a close one for these little, but grand and useful game birds, has been strongly endorsed by field sportsmen.

It should be apparent to sportsmen who have given the question of game protection the consideration it deserves, that increased restrictive measures are necessary to meet the increased methods and weapons of destruction. To prohibit the use of four-bore guns and allow the use of far more destructive weapons would be unwise and inconsistent. I, therefore, respectfully recommend that the Browning automatic and repeating shot guns, for the killing of game in the Province of Ontario, be prohibited.

The use of steam yachts, sail boats and power launches should not be allowed in connection with the hunting and shooting of water fowl. The large increase in the number of power launches enable many duck hunters to have the ducks chased by these boats over the hides and submerged boats of these shooters. It is also alleged by the large number of sportsmen not able to indulge in the luxury of steam 'yachts or power launches that this system of harrassing the ducks drives them from the localities where such practices prevail. The use of these boats controlled by confederates acting in collusion with poachers enable the latter to escape when detected by our wardens.

Ducks have been as numerous as usual, but, owing to the prevailing mild weather during the open part of the open season and the early freezing of the marshes later on, the shooting on preserves was far from satisfactory. Those shooting in open waters, and market hunters, as a rule, had a successful season.

*Ruffed Grouse*, or Partridge, have been abundant in the backwoods, but are becoming scarce in the older settled portions of the province. This is to some extent due to the woods being depleted, destroying both cover and food, so essential to these valuable game birds.

Quail—It will require a strong and united effort of all interested in these beautiful and useful little birds to overcome the disastrous effects of wet breeding seasons and severe winters. It will be of no avail for the Government and private parties to import these birds for propagating and restocking the somewhat depleted quail grounds unless the sportsmen in general practise self-denial and be satisfied with three or four brace per day instead of twelve or fifteen brace until the quail again become as numerous in the province as they were a few years ago.

The improved system of farming that is making such rapid progress in the western counties and the substituting of wire fences for the old-time rail and pine stump fences has destroyed both food and cover so necessary for them during long and severe winters.

With the intention to some extent of meeting and overcoming these changed conditions, I respectfully request the active co-operation of all local sportsmen in the quail district in perfecting some plan by which the quail may to some extent be fed and protected during severe winters. I feel sure in making this appeal to the large-hearted genuine sportsmen who realize the necessity for concerted action, it will not be made in vain. The object of all true sportsmen should be to perpetuate, not exterminate, so that we may again have the pleasure, so dear to the hearts of sportsmen, of hearing the cheering call of "Bob-white" as frequently as of yore.

Snipe.—The somewhat difficult and exciting sport of snipe shooting was more satisfactory during the past open season than for many seasons preceding it, excellent sport having been reported from the various resorts of these elusive birds.

Woodcock.—I regret having to report that each successive year brings less of these grand game birds to the province. The extermination of these the most valued of all American game birds can only be prevented by the contemplated action of the U. S. Federal Government, which, it is rumored, is to make an attempt to do what single states have failed to accomplish. Unless prompt action is taken to prevent the present unwise and unrestricted slaughter in their winter home in the Southern States, the time is not long distant when the woodcock will be seen only in museums.

Deer and Moose.—The long and severe winter of 1903-1904, with the unprecedented fall of snow. covering a large portion of the northern districts of the province to a depth of four feet on the level, covering the usual winter food of the deer, also making it impossible for them to leave the yards in search of food, had a disastrous effect upon large numbers of yearlings, causing them to succumb to this unfortunate combination. Many carcases were found in the spring, but, fortunately, not nearly so many as anticipated. Large numbers were compelled, through being deprived of their usual food, to approach the lumber camps, where they were allowed to feed on the hay stored for the horses. Some of our deputy wardens made frequent trips to deer yards in their respective localities and cut down cedar and other trees for browse, large numbers of deer being saved by these methods.

Under such conditions it is surprising to learn that the number of deer killed during the last open season was little short of the number killed in the open season of 1903. The number carried by the express companies in 1903 was 3,366 and in 1904 3,040, a difference of 326. Heads of 73 moose were carried as baggage and by express companies, not as many as in 1903, no doubt owing to the elections taking place in the United States and Dominion during the open season. Some very fine moose heads were procured. Mr. John Hunter, of Hamilton, Ont., having one with a spread of horn 63 inches, the moose being killed near Sturgeon Falls.

Capercailzie.—From reports received from Mr. Bartlett, superintendent of Algonquin Park, where sixty of these imported birds were liberated, we have reasons for concluding that these, the largest of the grouse family, are here to stay and that the venture has been successful. They were liberated in the fall of 1903 and withstood the ensuing severe winter. A number of them were seen last spring forty miles from where they were released. During the summer two broods of young birds were seen in different localities many miles apart. The supposition is that these birds, being found so far from where released, is that they are retiring to the dense, uncut pine woods more suitable to their requirements.

1904

Fur-bearing animals.—From reports received otter are not increasing to the desired extent, due to the value obtained for the skins, prices ranging from \$15 to \$20 per skin, prove to be a strong inducement to Indians and others to trap them.

Beaver are making satisfactory increase, being numerous in many localities suitable for their requirements. An extensive business in the more common variety of furs is done in all parts of the province.

Insectivorous Birds.—Fifty-six permits to take insectivorous birds and their eggs have been issued during the year. I regret having to state that large numbers of these summer visitors, that make the lawns and gardens so attractive in the cities and towns of the province, are illegally killed by boys. Police officers and constables in their respective municipalities should be instructed to do everything possible to stop such wanton destruction and have the offenders punished. It will be readily understood that it is impossible for the Government to appoint deputy wardens for every city, town and village to protect insectivorous birds.

Licenses. 5,238 deer licenses, 275 non-resident licenses, 132 moose licenses, and 2,692 settlers' permits have been issued during the year. These returns are not complete, several issuers having failed to send in their returns.

All of which is respectfully submitted by,

Your obedient servant,

E. TINSLEY, Chief Game Warden.

#### Belleville, December 31st, 1904.

E. TINSLEY, ESQ., Chief Warden.

onier warden.

SIR,—Herewith I beg to submit my annual report concerning the condition of game and fur-bearing animals in this district.

Regarding moose I have very little information, but such as I have would indicate that they are not increasing to any appreciable extent in this district, due, no doubt, to the advance of settlement and the lumbering operations, retiring to the greater solitudes of the forest farther north, where, from all accounts, they are exceedingly plentiful.

Owing to the severity of the last winter red deer were somewhat scarce on the most southerly ranges, but quite plentiful farther north, the annual kill being larger than anticipated, due in a large measure to the extension of the hunting season, on account of the Dominion elections being held during the first week, which privilege was greatly appreciated by the sportsmen generally.

Partridge were numerous in many localities, but I regret having to report that settlers, storekeepers and pedlars in the back country have little or no regard for the law forbidding the sale and exportation of game, large quantities having been seized in course of transportation and confiscated, resulting in the prosecution of the shippers when known, many, however, escaping on account of our not being able to find out who the shippers were, no names being given in many cases and assumed ones in others, thus rendering prosecution impossible. I may say, however, that the different express and carrying companies have given us every assistance possible in our efforts to enforce the law. Ducks seem to be about in the same condition as in past years, but the early freezing up of the marshes in this district curtailed the shooting to a large extent.

Regarding the fur-bearing animals I may say that while muskrats are fairly numerous, beaver and otter show no signs of increasing, notwithstanding the protection given them for the past 12 years, Indians and trappers evidently thinking them their peculiar prey wherever they can get them, and encouraged by the buyers, who buy the pelts under all circumstances, and ship them in trunks and valises, and, in fact, by every other method one could think of, in order to get them out of the reach of the officers. Some heavy fines lately imposed, however, may have the effect of assisting them to make up their minds to observe the law better in the future.

As the continuous close season for beaver and otter will expire on the 31st of October, 1905, I would strongly recommend that the taking of them be prohibited for a further term of five years; otherwise without doubt, they will be exterminated in the older portions of the province.

I have the honor to be, Sir,

Your obedient servant, H. K. SMITH.

E. TINSLEY, ESQ.,

Chief Game Warden, Toronto.

SIR,—I have the honor of submitting my annual report in respect 10 game in that portion of the Province over which I have charge.

Not having received any return from the express or transportation companies, it is difficult to estimate the number of deer which were taken out during the past open season, but from personal observation there is a great falling off in places where a few years ago deer were numerous, and I think the closing off of certain sections for two or three years would be a means of restocking these almost depleted sections. I would suggest that portion of territory south of the Canada Atlantic Railway, with the exception of the District of Haliburton, in the northern portions of which deer are still numerous.

The severe weather experienced during the last winter proved most disastrous to thousands of deer. I have no hesitation in stating that more perished than would be killed in two or even three years' hunt. I had no idea of the numbers which died until recently when on a trip through Commanda, Loring, Restoul, etc., on making enquiry and hearing from reliable sources, of different parties finding such and such a number of dead deer within such and such a distance, and in reckoning that these conditions existed over the greater part of our deer country, I do not consider the above estimate excessive. I am however pleased to report that in the neighborhood above named, there are still any number of deer, the roads in places having more the appearance of sheep yards than public highways, from the way in which they were padded down by the deer.

I would respectfully call your attention to the fact that the privileges enjoyed by residents of unorganized townships are in many cases much abused, and would strongly recommend that section 32 of the Act be expunged. This provision in favor of such settlers north of say the C. P. Ry. line may be all right, but south of this line in many cases the settlers in the unorganized portions are far better off than many in the organized townships, and still enjoy privileges denied to the latter. At all events

11

BEAUMARIS, 31st Dec., 1904.

they should be forbidden to kill deer between the 1st January and the 15th July, during which time neither the meat or hide is good for anything.

The construction of the James Bay Railway is about to open out the best deer ground in Canada; in fact, I may say in the world, and I would beg to point out the absolute necessity of having a special man on the construction north of Byng Inlet, and another south of that place, as should this be neglected, I am afraid our game will suffer from the hundreds of employees now engaged on the work.

It is most gratifying to note the abundance of partridges in most places this fall. The absence of a crust on the snow last winter is no doubt a factor to this end. The laws have been well observed, the prosecutions being mainly for hunting out of season, illegal possession of game, etc.

I am pleased to report that the beaver in many places are on the increase.

There has been a marked scarcity of the red squirrel this fall. I am afraid the severity of last winter proved disastrous to many of these pretty little animals.

Wolves have been numerous in places and I am afraid that much of our fur-bearing animals are destroyed through eating the poisoned baits set out for these pests; principally marten, mink, etc. Our thanks are due to the general public for the increased interest they evince in our game, and their valuable assistance in seeing that the laws are observed, and I would mention in particular the humane manner in which many lumbermen behaved last winter; even feeding some of the poor starving deer on hay which in many cases was difficult to procure and transport even for their own purposes.

> I have the honor to be, Sir, Your obedient servant,

#### JOHN H. WILLMOTT,

Game Warden.

DUNNVILLE, Dec. 30th, 1904.

E. TINSLEY, ESQ.,

Chief Game Warden, Toronto, Ont.

 $S_{IR}$ : —I have again the honor of submitting to you my annual report concerning the state of the game animals and birds within the five counties of the south-eastern part of Ontario, under my charge during the year 1904.

Ducks on the whole have been in fair supply, those breeding in the woods and lowlands were found to be not fully matured on the first opening of the season, but later on attained good condition and offered fine sport. It is a great pity the open season could not be changed to the fifteenth at least in this portion of Ontario. The majority of sportsmen ask me to point out the advisability of this. The greatly increasing number of young sportsmen and boys who are annually taking to gunning at this time of the year makes the above named change imperative, if the game is to be kept even up to its present supply.

Partridges I have found less numerous than last year, which I think is owing to the severity of the past winter, but all that have been taken were found in good condition.

Quail have been almost exterminated by the very deep snow, severe storms and drifting, which were almost continuous last winter, and their natural shelters are decreasing very quickly in this district. Being an easy bird to hunt it is difficult to protect them properly. I find the opinion is general in this district that they should be put on the closed list for five years if possible.

Wild geese continue to hold their own, in large numbers this year. Many fine specimens have been taken.

Woodcock are not seen as much now as in the past. This bird can only be found in two small sections of this district.

Plover have been scarce this year in the centre of this district, being found in only two places in numbers at all worth hunting.

Snipe have been in fair numbers in a few localities.

Squirrels, black and gray, have been much less in evidence than last year. I fear they have reached the turning point and are gradually about to retire from their old haunts. The reason I think is the increasing number of boys or very young men who hunt them closely each season. Also their natural food and shelter, nuts and forest, are gradually disappearing.

Wood, cotton hare continue quite plentiful, but not destructive as some claim. I have failed to find a single fruit tree destroyed by cotton hare in their wild state during ten years' search in this district, but I have tound hundreds of good trees destroyed by field mice. The cotton hare is badly libelled in this respect. The Canadian white hare are still very scarce.

Muskrats are in as good supply as ever with no sign of growing scarcity.

The game laws in this district have been most carefully observed, it being hard to find many breaches capable of proof. Much more so than vsual.

Thanking you, Sir, for past advice, instructions and courtesies during the past year.

I have the honor to be, Sir,

Your obedient servant,

J. A. GILL, Game Warden.

WINDSOR, Dec. 31, 1904.

MR. EDWIN TINSLEY, Chief Game Warden, Toronto.

DEAR SIR:-I beg to submit my annual report as warden of the western district for the year ending Dec. 31st, 1904.

Quail.

In some portions of Essex, Kent and Lambton largely due to the close season of 1904, there is a number of quail left for next season's crop. In other portions of these counties there is very few left. The action of resident sportsmen and farmers cannot be too highly commended. Many of them at considerable expense and trouble fed the quail during the long and severe winter of 1903-1904. A large number of quail were imported and liberated last spring by the western sportsmen, which in some measure accounts for the number of birds left in certain localities.

#### Duck Shooting.

Ducks at the different resorts in my district have been as abundant as in past seasons. But owing to the long continued fine weather during the greater part of the open season not near so many ducks were killed as in other seasons. The dividing line on the Detroit River between the Province and the State of Michigan should be more clearly defined to enable me to convict a certain class of poachers who have so far escaped by falsely wearing they were in American waters.

#### Fur-bearing Animals.

Muskrats and mink are numerous as usual, large numbers of both being killed in the marshes and low lands of the western counties. It has been necessary for some of the townships to have the muskrats destroyed during the close season to protect the numerous drainage works constructed in these counties.

#### Swans and Geese.

These game birds were very plentiful last spring and fall, large numbers of both species being killed. Some of the farmers make a business of breeding wild geese for the purpose of selling and using them for decoys.

#### Wood Hares

Known as cotton-tails are found in large numbers on the shores of Lake Erie, and are blamed in many cases for the damage done by field mice. Some fine orchards were completely destroyed by the mice last winter, while little damage was done by the so-called cotton-tail rabbits.

#### Deer in Essex.

It is claimed that the deer are not increasing to the extent they should bave done from the number of years they have been protected. However I will make a number of trips to the large woods they inhabit during the winter and will let you know the result.

#### Partridge

Have been fairly plentiful in the portions of my district where the woods have not been cut down, some very good bags having been made.

The game laws with but few exceptions have been well observed during the past year.

I have received all possible assistance from the customs officials and provincial officers in the discharge of my duties, for which I extend to them my sincere thanks.

Trusting this will be satisfactory,

I am your obedient servant,

#### CHARLES QUALLINS.

Copy of an Order in Council approved by His Honor the Lieutenant-Gov. ernor the 2nd September, 1904.

Upon the recommendation of the Honorable the Commissioner of Public Works the Committee of Council advise that the killing or capture of Quail in the Province of Ontario be prohibited until the 1st day of November, 1905.

Certified,

### J. LONSDALE CAPREOL,

Assistant Clerk, Executive Council.

#### Copy of an Order in Council approved by His Honor the Lieutenant-Governor the 2nd September, 1904.

Upon the recommendation of the Honorable the Commissioner of Public Works the Committee of Council advise that in pursuance of the provisions of section 18 of *The Ontario Game Protection Act*, the hunting, taking or killing of deer on the Bruce Peninsula, with the exception of Cove Island, be prohibited for a period of three years from the 1st day of November next.

Certified,

J. LONSDALE CAPREOL,

Assistant Clerk, Executive Council.

Copy of an Order in Council approved by His Honor the Lieutenant-Governor, the 5th day of October, A. D. 1904.

Upon the recommendation of the Honorable the Commissioner of Public Works, the Committee of Council advise that Mr. H. S. Osler, K. C., or Toronto, and Mr. W. B. Wells of Chatham, whose term of office on the Ontario Game Commission expired on the 1st day of April, 1904, be reappointed members of the Ontario Game Commission for another term. • Certified,

J. LONSDALE CAPREOL,

Assistant Clerk, Executive Council.

Copy of an Order in Council approved by His Honor the Lieutenant-Governor, the 7th day of October, A. D. 1904.

Upon the recommendation of the Honorable the Commissioner of Public Works, the Committee of Council advise that pursuant to the provisions of section 7, sub-section 1 of the Ontario Game Protection Act, the open season for Moose, Reindeer or Caribou and Red Deer in all that portion of the Province lying to the north and west of French River, Lake Nipissing and Mattawa River be extended to the twentieth day of November in the year 1904 only.

Certified,

J. LONSDALE CAPREOL,

Assistant Clerk, Executive Council.

To His Honour The Honourable WILLIAM MORTIMER CLARK, Lieutenant-Governor of the Province of Ontario, Etc., Etc.

MAY IT PLEASE YOUR HONOUR,---

I have the honour to submit herewith, for the information of Your Hon-our and the Legislative Assembly, the Sixth Annual Report of the Depart-ment of Fisheries of this Province.

I have the honour to be, Your Honour's most obedient servant,

> J. O. REAUME, Commissioner of Fisheries.

TORONTO, 25th March, 1905.

# REPORT

OF THE

# DEPUTY COMMISSIONER OF FISHERIES FOR THE YEAR

# 1904

# To the Honourable

THE COMMISSIONER OF FISHERIES FOR ONTARIO:

The undersigned has the honor to submit herewith the Annual Report of the Department of Fisheries for the year ending 31st December, 1904.

Notwithstanding that the fishing season was late in opening, being from two weeks to one month later than usual, owing to the long and extremely severe winter of 1903-4, it is gratifying to be able to report that the fishermen have had a very prosperous year, judging from the returns, which show that the catch was 2,815,765 pounds greater than in 1903, and from the prices paid, which for all kinds of fish have ruled high during the whole season.

The total quantity of fish taken was 24,009,970 pounds, the estimated value of which was \$1,793,229. The amounts of the different kinds taken were Lake Trout, 6,275,430; Whitefish, 3,474,300; Herring, 4,252,580; Pickerel (Dore), 2,632,540; Pike (including Blue Pickerel), 1,775,700; Coarse Fish, 2,087,900; Perch, 922,600; Eels, 45,500; Tullibee, 5,800; Catfish, 520,150; Sturgeon, 485,200 pounds; and of caviare, 29,170.

Licenses to fish with 3,490,036 yards of gill net, 514 pound nets, 473 hoop or fyke nets, 120 seines, 75 dip nets, and three machines, besides several thousand hooks, have been issued.

The occupation has given employment to 3,125 men; and 128 tugs and 1,477 other boats have been in use.

An estimated capital of \$931,097 is invested in the industry.

A list of the Overseers with the territory under the jurisdiction of each will be found at p. 50.

Statements have been prepared showing:

1. The revenue derived from each division (p. 58);

2. The number in detail of fishermen, tonnage and value of tugs, vessels and -oats, quantity and value of fishing material, and the kinds and quantity of fish caught (pp. 60-75);

3. The gross yield of the different kinds of fish in each division in 1903 and 1904, and the increase or decrease (pp. 78-9);

4. The total quantity of each kind of fish taken, as compared with the quantity taken in 1903, and the increase or decrease (p. 80);

5. The value of the different kinds of fish taken (p. 80); 6. The number of tugs, men, boats, etc., engaged in the industry, the quantity of nets licensed, and the value thereof (p. 80);

7. The value of the Ontario Fisheries from 1870 to 1904, inclusive, (p. 81); and

8. The quantity of fry distributed by the Federal Government in the Province since Confederation (p. 81);

# THE COMMERCIAL FISHERIES.

The appeals of the fishermen for an extension of the fall fishing season urged upon the Federal authorities, who have exclusive jurisdiction in the matter, were again successful. No doubt their efforts in this direction, as in former years, have in some localities been justified by the inapplicability of the close season to the respective localities, and so long as this discrepancy exists a renewal of these applications may be expected from But the improvident habit of taking fish from the spawnyear to year. ing beds when congregating for the purpose of performing their natural functions has been too long practised in the waters of our Great Lakes, both in Canada and the United States and a remedy must soon be found. It is about as shortsighted a means of gain as was the killing of the goose that laid the golden egg. The appointment of a commission by the Federal authorities, who, as it has been said, are charged with fixing the close seasons, was early in the year announced, and one of its objects was to take evidence upon the subject, but the naming of dates for the holding of the sessions to suit the convenience of all the commissioners appeared to be a matter of some little difficulty, and the Commission did not meet. The necessity for decisive action has become none the less apparent with delay, and the work of the Commission will probably be undertaken during 1905. Its scope should not, however, be confined to settling the question of close seasons; and it is doubtful whether it can be of any general utility even in this respect unless its personnel should comprise representatives from the neighboring jurisdictions, and conclusions applicable to International waters be arrived at and subsequently adopted, for the old and embarrasing cry that Canadians are being denied privileges which Americans are enjoying would be again raised. But, so far, it does not appear that any steps by the Dominion in the direction of an International Conference have been recently taken, or are contemplated.

The Conference arranged by this Province, and held in Detroit in March last, at which were present representatives of the United States Commission at Washington, and from Pennsylvania, Ohio, Michigan and Ontario, marked an important era in the movement to establish uniform laws and regulations governing the great international waters, and the work so well inaugurated should not be allowed to lapse. Various resolutions were concurred in, all being contingent upon the whole being approved by the several jurisdictions interested, and all the delegates believed that the approval of their respective Legislatures in the resolutions passed could and would be obtained. It was unanimously agreed that with respect to the great lakes the only mutually satisfactory arrangement could be the adoption of identical laws and a uniform policy as to implements of capture to be authorized, and all felt sure that with the adoption of such laws and policy the benefits would soon be perceived. It was, however, conceded that any scheme of restoration must involve an increase in the artificial supply, and greater protection for natural production by limiting the period during which fishing may be carried on, and by the establishment of appropriate close seasons.

(With regard to black bass and maskinonge, a close season from 1st January to 15th June was considered absolutely necessary, if the destruction of these fish while in a gravid condition is to be prevented.)

If a sufficient number of fry are not annually planted, and a sufficient number of fish are not allowed to reach the spawning age, it will be impossible to increase from either source, and the depletion will continue. Americans, though well equipped with hatcheries, are experiencing the greatest difficulty in obtaining a sufficient supply of ova, and for some years have been obtaining large quantities from Canadian fishermen, our law that no trout or whitefish under two pounds in weight shall be taken allowing a greater number of these fish to mature and reproduce.

It was, however, made clear at the Conference that this Province could not longer justify limiting the number of licenses issued or the maintenance or enforcement of more stringent or even the present restrictions so long as indiscriminate fishing was permitted in adjacent waters, and under prac- . tically no restriction whatever; that there must, therefore, be no occasion for surprise if, in view of the fact that nearly the whole burden of restraint has heretofore fallen upon Canadian fishermen, they should be relieved from the observance of some of the restrictions which had hitherto been enforced; and that if the decline in the Great Lake fisheries was due to excessive fishing, the censure for it must rest principally, if not wholly, upon the American fishermen or authorities, as the failure to provide effective and protective measures and to regulate the fishing carried on had certainly been indefensible and unjustifiable. With the increasing number of fishermen operating in the lakes, and with the improved means of handling the nets which have of recent years been introduced, it is more than evident that if something is not immediately done to meet the effect of this increased attack, our lakes will soon be exhausted of their riches. But no sane people can expect that Canadians will enforce measures to prevent such a calamity which are not adopted or enforced by the Americans.

# DOMESTIC LICENSES.

These licenses continue to be issued for some of the interior lakes, particularly in the eastern part of the Province, the Department being of the opinion that where game fish do not abound, it will be advantageous to resument settlers to receive licenses at a nominal fee for small quantities of game to take fish for their own consumption, but not for barter or sale.

# HOOP NET LICENSES.

It has also been considered advisable to grant hoop net licenses in certain lakes in which fishing has not heretofore been carried on, where it has been reported that the coarse fish were multiplying at the expense of the better classes. It is impossible to restore or increase the game fish unless the worthless kinds are first exterminated; and the hoop net is the only implement of capture with which this can be done effectively without injury to the better classes. As an illustration of this, it may be mentioned that an Overseer reports that a fisherman in his division caught and destroyed 2,700 dog fish during the season in his hoop nets. In some places where these nets have been fished for a number of years, it might be advisable to discontinue them for a period.

# SPEARING LICENSES.

The privilege to spear coarse fish, carp, suckers and pike has been granted for a number of years to residents in the vicinity of Burlington Bay, and every year some 100 huts in which the spearing is done may be seen upon the ice. The fee charged for a license to spear has been but \$1.00, suffi-

cient only to pay for the expense of issuing and delivering the same. An extension of the privilege to other sections of the Province during the same period may properly be considered.

# NEW ONTARIO.

Many applications have been received for fishing privileges in the lakes of New Ontario, but the Department has been afforded no sufficient reason for reconsidering its policy that no licenses for commercial fishing should be granted within the agricultural belt. Intelligent settlers are not slow to investigate the natural resources of the locality in which they purpose settling, and they fully appreciate the fact that of these resources the waters in their vicinity must for many years be relied upon as an important source from which much of their food is to be derived. Indeed, for a considerable period this consideration will be of far greater importance than even the educational or social opportunities which the country may offer. Therefore, nothing should be permitted that is calculated to deprive these pioneers of such advantages, but rather that every practicable means should be adopted for their preservation and perpetuation. There is no doubt howev r that there may be many lakes in the vicinity of which the land is not suitable for tillage, and which do not contain game fish, in which licenses might be issued and a revenue derived therefrom.

# STURGEON.

The gradual decline in the catch of sturgeon has been referred to in former reports, and a comparison of the catch this year with that of last year is a further indication that there is no abatement in this decline, for the increase shown in some places can be attributed to more extensive operations having been carried on and not to an increase in supply, and if the destruction continues without regard to age or spawning season for a few years longer, its complete annihilation must, of course, follow. So alarmed at the prospect have Americans become that they have already been attempting artificial propagation, and though it has been demonstrated that ---- can be successfully done, yet the expense with which it is attended and the difficulty of obtaining the fish in proper condition would seem to indicate that its restoration can be accomplished more effectively by natural increase. Therefore, the resolution presented at the Detroit Conference unt in its opinion the time had come when the taking of these fish in any manner for commercial purposes should be prohibited for a period of five years was unanimously adopted. A regulation was passed by the Dominion Government in 1903 that none should be taken during the month of May and June, and none under four feet in length, but this regulation has not been enforced until such time as the border States may pass similar legislation. This Province has been asked to do something towards stocking depleted waters, but under existing conditions expenditure on this account would be practically wasted.

# TRAP NETS.

These nets are prohibited in Ontario by Dominion Act, 49 Vict. chap. 95, sec. 14, s.s. 7, but are extensively used in the Georgian Bay and in the North Channel of Lake Huron, and notwithstanding that thousands have

been destroyed during the years in which a patrol service has been maintained by both the Federal and Provincial Governments for the purpose of their suppression. Their use is permitted in American waters, and no doubt much can be said in favor of their being legalized in Ontario. If a size limit is established for all kinds of fish, as there should be, it does not appear to the undersigned why any implements with which this may be observed should not be authorized. There are objectionable features in the trap net as at present constructed and fished, but these could be modified, or wholly removed and a net approved which would be quite satisfactory to the fishermen. Conditions for its identification could be imposed, and the locations where it should be set specified in the license as in the case of other nets. It is believed that less objection could be urged to the nets under license than under existing conditions, as those who would pay for a ncense would not permit others to fish without a license, and the Province would receive an annual revenue of from \$15,000 to \$25,000 per annum if all were to take out licenses, it having been estimated that there are from 600 to 1,000 nets fished, and the fishermen have manifested a willingness to pay a license fee of \$25 for each net used.

# BLUE FINS.

The Blue Fin, a species of white fish, has been taken in considerable numbers in the lower end of Lake Superior, and has a ready sale in the home market, and especially in the rural districts where peddlers find a great demand for it. Its flavor and quality are said to be somewhat better than the lake herring. It is caught in very deep water.

# CARP.

The privilege of taking these fish has been granted wherever it appeared that this could be done without injury to the better species, and the subject whether the privilege might be further extended with profit to the fishermen and with advantage to the fisheries should receive every consideration. With so many finer varieties of fish to be had, it is not strange that the carp is regarded in Canada with disfavor as an edible fish; but in some localities it has already become an important fish of commerce, meeting the demand By making provision for retaining of the poorer classes. them during the summer months, when the catch exceeds the immediate During the fall, nine cents demand, much higher prices may be obtained. per pound was paid for carp in the wholesale markets of New York City and Chicago; and the carp weighs well. In portions of Lake Erie and Lake St. Clair it has become very abundant; and it is being taken almost everywhere in the open waters of Ontario in greater or lesser quantities, even as far north as the Manitoulin Island. It is said that 200,000 pounds were recently shipped from New York to Germany, the country of its nativity, and where it is still the most highly esteemed of the food fishes. Whether the product of this country will be held in as high esteem as that of the Old Land remains to be seen.

# AMERICAN HATCHERIES.

The request of the United States Fish Commission, and of some of the State Commissioners that permission be granted their representatives to arrange with Ontario fishermen for a supply of herring eggs, there being

# 1904

' 9

no close season for herring in Ontario, has been again granted, it being stipulated and agreed that the fry therefrom should be deposited near the International boundary line. It is reported that 44,000,000 eggs were collected, and that over 23,300,000 fry were planted near or in Canadian waters. As herring are not propagated artifically in Ontario, the fry so deposited were a clear gain to the Province.

# THE INLAND FISHERIES.

## STOCKING.

Soon after the establishment of a Department of Fisheries for this Province, the attention of the undersigned was drawn to the fact that our beautiful lakes and rivers were fast becoming depleted of their finny in-The wide-spread popularity of Ontario as a summer resort had habitants. induced thousands from a distance to come here year after year for many seasons, to enjoy our exquisite scenery, salubrious climate, and phenomenal trout and bass fishing. Many American clubs, mostly composed of men of wealth, men of leisure, men who enjoy out-door life and sport, men who are in particular fond of fishing, had come, and many had brought with them their families and their servants, and all were very welcome. They spent their money freely and liberally. And while it is a matter of gratification that they did come, and are still coming, the enormous drain upon our game fish by these visitors in conjunction with our own people, which day after day and week after week had continued for these many years, and with little, if any, regard to size or number of fish taken, has been the undoubted cause of the result above indicated—the gradual disappearance of these fish; and the Department was enforced to recognize that if the fishing was not soon to be completely ruined, and the country deprived of the benefits arising out of the tourist trade, heroic measures would have to be adopted for their And this led to the consideration of the question how could restoration. this best be accomplished? Finding that the bass could be obtained in sufficient numbers, their transportation long distances appeared to be the most formidable difficulty to overcome. The use of teams for the purpose had but to be mentioned to demonstrate its impracticability, and it was at once perceived that if the work was to be entered upon with any degree of success or magnitude, the railway companies must be approached and interested in the matter, with a view to their co-operation. All of the railways communicated with quickly recognized the pecuniary benefits to themselves, as well as the immense public benefits which were to be conferred by such a But the Grand Trunk Railway, whose lines ran more closely to the work. waters considered of first importance to be stocked, entered most actively into the proposition. They equipped a car for the purpose of carrying the fish, and have in addition each year borne some share of the expense of the undertaking. During the first year (1901) 9.481 adult bass were deposited at some eighteen different points, a greater number than had theretofore been distributed in the whole history of the Province by all Governments; and the close of last season saw nearly 32,367 deposited in some forty different lakes and rivers. It is needless to say that it would have been absolutely impossible to have carried on the work with the same success without the aid of the car. The Canadian Pacific Railway has also fitted up a car with a view to similar work being done along its lines. The past year was in point of number of fish deposited the most successful since the work was begun, 12,955 bass having been distributed. With the greater

experience gained from year to year in handling and caring for the fish, the loss in transit has been considerably less than in former years, 98 per cent. of the whole having been successfully transported, one carload of 5,000 fingerlings from three to six inches in length, though eleven hours on the road, having been carried a distance of over 200 miles, with a loss of but five fish. . The Department desires here to acknowledge its obligations to the railway companies for the assistance at all times promptly rendered by their employees, where water had to be changed, ice provided, and connections made with a minimum of delay. Notice of the arrival of the car is given by telegram as long ahead as possible, and, where conveyance by wagon from the car to the water has to be made, full instructions by letter are previously given as to the best means to be adopted for handling and caring for the fish in order to prevent injury and loss. Several points are sometimes reached with the one load. Applicants, in their desire for fish, should bear in mind, in order that results may be mutually satisfactory, that deposits should only be made in waters where the conditions are suitable for The small-mouthed bass require a large food range cold their reception. water, and water deep enough that it will not freeze to the bottom in the coldest weather. Applications have come from many sections for bass to be put into rivers which some years ago were noted trout waters, but in which from increased temperature trout will not now thrive, and for this reason any effort to restock with trout has been discouraged. Trout may live for years in such water, but they will not reproduce in anything like the same ratio as formerly.

# REARING PONDS FOR BASS.

If, however, it is considered of sufficient importance that the work of restoring and establishing bass fishing in the rivers and small lakes of the Province, as well as in the larger bodies of water, should be proceeded with in a manner that will enable this to be accomplished more speedily, other means for obtaining stock may have to be adopted; the erection of ponds for breeding and rearing bass is a subject which may profitably receive con-There are many waters which it may be desirable to stock to sideration. which a few cans of fry or fingerlings could be sent, but under existing circumstances there is no certain means, except for a limited period, of obtaining these. Another advantage of rearing ponds is that the young fish may be kept until of a size that when liberted in the waters to be their future home they will be able to a greater extent to escape their natural enemies than they would be if deposited in the fry state. The cost of construction would be inconsiderable, and should not be an obstacle in the way if on the whole it is thought the necessity for such ponds exists, and that it is advisable they should be erected. The parent fish as at present taken can only be secured for a short time; but it is believed that the period might be extended with the adoption of other, though perhaps more expensive, means of capture, namely, by hook and line. This is the method used by some of the States, enabling the work to be carried on late into the fall.

# OBSERVANCE OF THE LAW.

It is pleasing to record that in the work of protection the Overseers are receiving greater assistance and co-operation from the general public, particularly in the inland counties, where the immense benefits which good

fishing brings to the locality, are beginning to be appreciated. Of course, to do their work successfully, overseers should be on the alert at all times, not necessarily in patrolling their divisions, but by keeping their ears and eyes open for information.

On the Georgian Bay the "Gilphie" has kept up a constant and well directed patrol, and the sailing crafts have also done good work. The "Eva Bell" on the Ridezu chain of lakes has commanded respect for the law in that part of the Province; and on the St. Lawrence, between Prescott and Amherst Island, where two launches were employed during the summer months, the benefits were demonstrated by a better observance of the law, and by an increased revenue from American rod fishermen.

The Department has co-operated with the Minnesota authorities in the protection of the sturgeon fisheries upon the Rainy River with good results. A number of nets and lines were lifted, and a large quantity of caviare confiscated in American territory. A camp which was carrying on operations with the Indians was broken up. The patrol covered about eighty miles of territory. The overseer was provided with a steam launch.

Fishermen, it is feared, are inclined to disregard the provisions of their licenses that no seines shall be operated or pound nets set within 500 yards of the mouth of a river or stream, which provision was, of course, inserted that the fish might have free access to these tributaries at all times, but more particularly during the spawning period. It is also important that residents along the course of the streams and rivers should not be deprived of the opportunity of getting fish which they would be if the mouth of the stream were obstructed. Overseers in sending in applications are expected to see that this provision of the license is kept in mind and, subsequently, is strictly observed.

The Departmental instructions have been that the laws are made for all classes alike, and that where these are violated offenders must pay the penalty; and while it is not the desire of the Department to impose harsh or unnecessary restrictions upon fishermen, yet such protective regulations and restraints must be insisted upon as are requisite to prevent the serious impairment of so important an industry as is the fishing industry, and the fishermen themselves, who have so much at stake, and the security of whose investments depends so vitally upon the insistence of such protective regulations and restraints as above indicated, should for their own protection, if for no other reason, be the very first to propose and vigilantly to enforce whatever is necessary to that end.

# PROSECUTIONS AND CONVICTIONS.

The 'number of prosecutions have been somewhat fewer than during last year, there having been but 48 as compared with 105 in 1903, the principal offences being for illegal fishing, and the fines imposed amounting to only \$518 as compared with \$813 in 1903. Eighty-six trap nets, 115 gill nets, 10 jacklights, 5 dip nets, 29 night lines, about 10,000 hooks, 23 spears, 10 hoop nets, 4 boats, 7 seines, illegally used, and several hundred pounds of fish, were confiscated.

# PROTECTIVE ASSOCIATIONS.

The organization of Anglers' Associations has been encouraged. These Associations are capable of rendering invaluable aid to the Department, and every town and village in a county at least in which there is rod fishing should have a live association to aid in moulding public sentiment, the support of which is absolutely essential to a proper enforcement and observance of the law.

## SHIPPING AND ANGLING PERMITS.

The regulation requiring that foreigners desirous of taking home a sample of their catch should first obtain a shipping permit (the fee for which is \$1.00), with coupon to be attached to the box or package containing the fish has, it is believed, demonstrated that it was a step in the right direction. Only the legal catch of two days' angling can now be taken away, and when accompanied by the person to whom the fish belongs. It was believed that the effect of this regulation, if generally enforced, would soon be manifested by better fishing. Before the enactment of the law, tons of bass and other game fish were taken or sent out of the Province, and sold, a handsome return being realized therefor. Indeed, not a few visitors boasted that the expense of their outing was fully made up in this way. There does not, however, seem to have been a very general desire to comply with the regulation, as the fees from such permits only amounted to \$158, and, indeed, one or two deliberate attempts were made to evade the obligation. It is, therefore, a matter of consideration whether, in view of these facts, and of the large amounts which the Province is annually expending for the protection of its angling waters, and in the work of restocking, permits to angle should not be required from all foreigners on entering the Province irrespective of the fact that they employ Canadian guides or stop at Canadian hotels, which has relieved them from this obligation hitherto.

## SALE OF GAME FISH.

The law prohibiting the sale of speckled trout, bass and maskinonge has been made to apply to these fish wheresoever caught, and it is now illegal to sell or have them in possession for sale at any time. It was believed that the old proviso, that they could be sold so long as evidence was produced that they had been obtained outside of the Province, was frequently violated, and that trout and bass alleged to have been caught in other Provinces, and even in the States, but really caught in this Province, sent to Buffalo or some other place and returned here, were from time to time exposed for sale; and, therefore, the prohibition was made absolute. The penalty for a violation of the law is so severe that the risk of apprehension is too great to be hazarded, and no violations have, therefore, been brought to the attention of the Department this year.

## EXPORTATION OF FISH.

Owing to the frequent complaints of the scarcity of fish in the local market a circular letter was sent to every fisherman engaged in commercial fishing instructing him that he must make arrangements for supplying local needs and at the market price at the point of shipment, and that if such provision was not immediately made the Department would be compelled to insert in his license a condition that such provision must be made, and that the license would be subject to cancellation where the obligation was not fulfilled. The hope was expressed that this would not be necessary, and that no further cause would be given for the complaint that the people of our own province were not able to procure fish when ready and willing to pay the market price therefor; and the fishermen were enjoined to en-

1904

deavor to retain the friendship rather than incur the hostility of their fellow countrymen. No complaints have since been received, and it is, therefore, hoped that the letter has accomplished the object for which it was written.

#### REGULATIONS.

Another step in the direction of better preservation has been the passing of more stringent regulations, as follows :

#### FISHERY LAWS AND REGUATIONS.

The following is an extract from the Canada Gazette of Saturday, 11th June, 1904:

#### AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 30th day of May, 1904.

#### Present:

#### HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

The Governor-General in Council is pleased, in virtue of the provisions of section 16 of *The Fisheries Act*, chapter 95 of the Revised Statutes of Canada, to order that the General Fishery Regulations for the Province of Ontario, established by the Order in Council of the 18th day of July, 1889, shall be and the same are hereby amended by adding thereto the following sections:—

9. No one shall fish for, catch or kill in any of the waters of the Province, in one day by angling, or shall carry away a greater number than eight small or large-mouthed black bass, four maskinonge, twelve pickerel (doré), or four lake trout.

black bass, four maskinonge, twelve pickerel (doré), or four lake trout. 10. No one shall fish for, catch or kill, in any of the waters of the Province, in one day by angling, or shall carry away a greater number of speckled trout or brook trout than in the aggregate shall weigh more than ten pounds, and no greater number than thirty speckled trout or brook trout, though said number weigh less than ten pounds.

No small or large-mouthed black bass less than ten inches in length; no speckled trout less than six inches in length; no pickerel (doré) less than fifteen inches in length or no maskinonge less than thirty inches in length, shall be retained or kept out of the water, sold, offered or exposed for sale or had in possession; but anyone who takes or catches any of the fish mentioned of less than the minimum measurement named,---which measurement shall be from the point of the nose to the centre of the tail,---shall immediately return such fish to the water from which it was taken, alive and uninjured.

12. The sale and export of speckled trout, black bass and maskinonge, is hereby prohibited for a period of five years from the date of this Order in Council, provided, however, that any person from a foreign country, fishing in the waters of the Province, and applying and paying for an angler's permit, may, upon leaving the Province, when the same are accompanied by him, take with him the lawful catch of two days' fishing.

The Governor-General in Council is further pleased to order that any previous Orders in Council which are in conflict with these regulations, be rescinded in so far as the Province of Ontario is affected.

JOHN J. McGEE, Clerk of the Privy Council

#### MORTALITY IN LAKE SCUGOG.

The severe winter of 1903-4 was disastrous to the fish in Lake Scugog, thousands being suffocated by the freezing of the water in some places to the bottom of the lake, which was several feet lower than in previous years. Timely instructions were given this year to have airholes made at a number of points as a precaution against a recurrence of such a loss.

## COARSE FISH IN THE NIPIGON.

The work of capturing and destroying coarse fish in the River Nipigon was again carried on and 375 pike, 100 pickerel, and 380 suckers were caught.

## POLLUTIONS FROM SAWDUST AND OTHER CAUSES.

A number of complaints have been received of the pollution of waters from various causes, no fewer than twelve being with sawdust. Upon investigation, however, it was found that the practice had not been carried on to any great extent, and was at once stopped when attention was directed to the fact that it was illegal. One or two canning and sugar factories have also been warned that some other disposition of their refuse must be made, and they have acted accordingly.

## BLACK BASS IN FRANCE.

We gather from the English Fishing Gazette that the experiment of introducing the "American Black Bass" into French waters has been such as to warrant further enterprise in the same direction. In December of 1902, Mr. E. Roger received from the Max. v.d. Borne fish-breeding establishment at Berneuchen, near Custrin, Germany, a consignment of 200 large-mouthed black bass fry, which were put into a pond at his country home near Paris. The fry were about 2½ inches in length when put out. In March of 1903 he received and deposited in the same pond 22 fish which were about seven inches in length. The bass thrived in their new home, and this year in June it was discovered that they had spawned, "myriads" of fry being observed. In July a fish of nine inches was caught, and is said to have been "the first black bass ever served on a French breakfast table."

## FISHWAYS.

The Department has been advised by the Dominion that instructions for the erection of fishways in several dams had been given. The subject being one coming under the head of regulations, applications made to this Department have been transferred to Ottawa for whatever action might be considered proper or necessary. The prevailing opinion seems to be that if fishways were erected in all the dams of the Province, thus affording a roadway from one water to another, fish would soon be plentiful; but this would be far from desirable, as admitting into waters at present free therefrom fish of undesirable kinds. As has been recommended in former reports, it would be much better to stock the waters where suitable with the kinds desired and dispense with the fishways. The public should give the matter very thoughtful consideration.

## THE GEORGIAN BAY BIOLOGICAL STATION.

This is one of three stations established in Canada (the others being located in Quebec and British Columbia, respectively), in which to conduct biological investigations as to the habits of the larger fishes, but more particularly those of food and game value, the artificial rearing of their young, embryonic development, their natural food, and the microscopic life of the

No. 31

water upon which the adults of some fishes and the young of all are dependent. The subject is one of practical utility and of growing public interest, and the results of the investigations as they are from time to time published will be read with peculiar interest. The station is attached to the Department of Marine and Fisheries, Ottawa, and the expense of its maintenance is borne by the Dominion Government. Its only relation to this Department is in connection with the privilege which it obtains for the use of nets to facilitate the capture of needed specimens, which privilege has, of course, always been promptly and gladly extended.

## REVENUE AND EXPENDITURE.

The revenue from all sources has been \$47,883.14, and the expenditure \$34,352.17, leaving a balance on the right side of \$13,530.97. Details of the expenditure, including Departmental salaries, as well as those of overseers, are to be found in the Public Accounts, and it has, therefore, been considered unnecessary to reprint them here.

#### REPORTS.

The report of the captain of the "Gilphie," containing an account of the work done during the year, will be found at p. 47. The steamer sailed out of winter quarters on the 5th May, and was tied up on the 9th December.

The reports of the overseers deal with the condition of the fisheries in their respective divisions, state what disposition was made of the catch, whether the laws were observed, assign reasons for an increase or diminution in the quantity of fish taken, as the case may be, and, generally, contain much information not to be found in the statistical tables. They will wen repay a careful perusal.

## STATISTICS.

The tables which follow have been compiled with the utmost care, and it has been the endeavor of the Department that the data furnished shall be as complete and reliable as it was possible to make it with the means for its collection at the Department's command.

There having been no plan available by which the quantity of game fish—bass, speckled trout, and maskinonge, caught by tourists and other anglers throughout the whole Province, could be even estimated, the tables contain nothing upon the subject. Figures, of course, are meaningless and of no practical value unless arrived at upon a basis which will insure reasonably accurate results. It may be said, however, that angling nearly everywhere has been good, and that anglers have had no difficulty in securing the lawful number.

#### ACKNOWLEDGMENTS.

Several fine specimens have been received, for which the Department is under great obligation to the donors, a 54 lb. maskinonge from near Killarney, on the north shore of the Georgian Bay, a steel head salmon from Nipigon Bay, and an almost hitherto unknown visitor to Canadian waters, a paddle or spoonbill catfish 5 ft. in length taken near the mouth of the Spanish River, being perhaps the most prized. All have been mounted, and

may be seen at the Department. The spoonbill catfish is common to the Mississippi waters, where it is taken in considerable numbers. A record of its lonely journey to the north, probably occupying many years, would be interesting.

The Department also desires to acknowledge with grateful thanks the receipt of a second set in four volumes of Jordan and Evermann's Bulletin of the United States National Museum, the first set having been lost in the fire which last year destroyed the building of the Government printers where the volumes had been sent for binding; and the loan from the Grand Trunk, Canadian Pacific and Canada Atlantic Railway Companies, and from Mr. A. J. Henderson of Toronto, of most of the photo engravings with which this report is illuminated, and which materially enhance its value and interest.

All of which is respectfully submitted,

S. T. BASTEDO,

Deputy Commissioner.

Department of Fisheries, Toronto, 31st December, 1903.

## WATERS SET APART FOR PROPAGATION PURPOSES.

Fishing in the following waters, which have been stocked, has been

prohibited for short periods, that the fish may become established, namely : The Grand River, in the Township of East Luther, East and West Garafraxa, Nicol, Pilkington, South Dumfries, Brantford, Onondaga, and Tuscarora; also the canal at Brantford, and Lovejoy's Pond; for two years from 1st August, 1903.

Wilcox Lake, in the County of York; for two years from 1st August, 1903.

Long Lake, near Rat Portage; for two years from 1st August, 1903.

River Thames, between the City of London and J. D. Moore's dam, Iredale's Dam, and the rapids opposite Dawson's farm; for two years from 1st August, 1903.

Green (or McArthur's) Lake, in the Township of Caledon, in the County of Peel: for two years from 1st June, 1904.

Bear Creek, in the vicinity of Strathroy; for two years from the 1st August, 1903.

Suttons, Smith's, Brooks' and Edmunds' Pond, on the River Lynn, in the County of Norfolk; for two years from the 1st August, 1903.

The Credit River, from lot 5, Township of Caledon, to the Village of Cheltenham, in the Township of Chinguacousy; for two years from 1st June, 1904.

Bass Lake, in the Townsips of Oro and Orillia, in the County of Simcoe; for two years from 8th July, 1904.

Beaver River, at Cannington, in the Township of Brock, in the County of Ontario; for two years from 26th July, 1904.

# FACTS REGARDING FISH AND FISH EGGS, NOT GENERALLY KNOWN, USEFUL AND INTERESTING TO KNOW.

The first attempt to hatch fish anywhere is said to have been in France in the 15th century.

Little is known of the diseases that attack mature fish, the fungoid disease being perhaps the most common.

Eggs of fish are fertilized after being deposited.

Partially incubated eggs can be transported hundreds of miles without injury if properly packed.

The chief propelling power of a fish is not by means of its fins, their chief function being for balancing and steering the fish, but by the sinuous motions of its body.

All fish do not possess the same number of fins, the number depending upon the species. The names of the fins of a trout or whitefish are, the pectoral, near the head, the ventral on each side near the centre of the body, the dorsal or back fin, the caudal or tail, the adipose, and the anal.

The purpose of gills in fishes is to separate the air used by them in breathing, the water being taken by way of the mouth, and expelled through the gills.

Some fish build nests and depoist their eggs therein; others deposit them on stones, brush, and plants, the eggs adhering thereto by a glutinous substance; and others again merely expel them as they swim through the water.

The sunfish, bass, and catfish, are nest builders, and guard their nests and their eggs for some time after they are hatched; fish that do not build nests desert their eggs as soon as deposited.

About one per cent. of the eggs deposited in the natural way are hatched; about ninety-five per cent. artificially hatched produce young fish.

Bass cannot be profitably propagated artificially, but a few pairs in a rearing pond will produce many thousands of fry in a season, and a small number transplanted into waters into which they had not previously existed will in the course of a very few years thoroughly establish themselves.

The young of all game fish are cannibals; fry of the bass and trout a few weeks old will attack and devour their young and weaker companions. The brook trout has been known to devour its own eggs as soon as spawned, and

at some hatcheries attendants are frequently employed to guard the spawn at night in order that it may not be destroyed in this way.

Bass, pickerel, maskinonge, pike, catfish, sturgeon, rainbow trout, and steelhead salmon (which are now being taken along the north shore of Lake Superior), are spring spawners; brook and lake trout, whitefish and herring spawn in the fall.

Bass spawn in from ten days to two weeks in water of a temperature of 60 deg., F.; brook trout in from fifty to a hundred and twenty-five days in water from 37 to 50 deg.; pickerel (Dore or wall-eyed pike) in from 17 to 20 days in water of 45 deg.; maskinonge in two weeks in water of 55 deg.; sturgeon in six days, in water of 65 deg.; rainbow trout and steelhead salmon, in from 42 to 50 days in water of 50 deg.; lake trout in from 75 to 90 days in water of 40 to 50 deg.; lake herring in 130 days in water of 35 deg.; and white-fish in 150 days in water of 34 deg.

A black bass will deposit from 3,000 to 10,000 eggs a season; a brook trout from 500 to 2,500; a maskinonge from 100,000 to 265,000; a pickerel (Dore or wall-eyed pike), from 45,000 to 125,000; a sturgeon from 500,000 to 1,500,000; a rainbow trout,—a three-year-old trout will produce from 500 to 800 eggs, and one six years old from 2,500 to 3,000; a steelhead salmon from 3,000 to 5,000; a lake trout from 5,000 to 15,000; a lake herring an average of 3,500 (but 12,000 have been taken from a  $1\frac{3}{4}$  pound fish); a whitefish 35,000; and a carp 500,000.

Herring and whitefish eggs are known as "semi-buoyant," their specific gravity being slightly heavier than water; trout eggs as "heavy," and both as "non-adhesive."

There are estimated to be 70,000 herring, 74,000 maskinonge, 6,400 lake trout, 36,000 whitefish, 150,000 pickerel (Dore or wall-eyed pike), and 14,400 brook trout eggs to the fluid quart.

The egg of a brook trout is 1-6 of an inch in diameter, of a lake herring 1-10, of a lake trout 1-4, of a maskinonge 1-11, of a rainbow trout or steelhead salmon 1-5, of a sturgeon, 1-9, and of a whitefish 1-8.

(The above information is gathered from the Manual on Fish Culture issued by the United States Commission at Washington, and other sources.— S. T. B.)

Returning with the Spoil.

# OVERSEERS' REPORTS.

Overseer Allan, Wallaceburg, Lake St. Clair, reports that the catch of all kinds of fish was about the same as in previous years. The whole catch is exported to the United States markets. The close seasons and other regulations of the Department were well observed. There are no saw mills in his district. The law regarding the pollution of streams is strictly observed. There are no fishways in his division.

Overseer Barr, Douglas, Co. Renfrew, reports that there has been somewhat of a decrease in the quantity of fish caught as compared with last year, not owing to the scarcity of fish, for they have greatly increased, but from a less vigorous prosecution of the fishing caused by a scarcity of help on the farm and the consequent want of time on the part of the farmer to go fishing.

No fish are exported from his district.

There has been no violation of the close season, to his knowledge.

Several cases of illegal fishing came to his knowledge where the nets were confiscated and destroyed, but the perpetrators were not caught.

No notice of the law against sawdust being allowed to go into the river is being taken by mill owners.

There are no fishways in his district.

Overseer Beecher, Brockville, the St. Lawrence, reports that the fishing among the Thousand Islands this season has not been as good as usual, the bass as a rule have been small, and the pike were very scarce, the exception being the maskinonge of which a fair number were caught in October, trolling with copper wire, line and spoon from a gasoline launch. He thinks if the Department could procure a quantity of maskinonge fry in the srping, and have them placed in the river in this vicinity, it would be well worth the trouble. As there has never been any fry of any kind placed in the river here, he thinks it is deserving of some consideration.

There have been very few complaints of illegal fishing this season, the minnow seining almost entirely ceasing.

Overseer Bilton, Newboro, Rideau Waters. reports that there was a decrease of about one-third of the herring catch from last year, owing to fewer licenses being taken out, and also owing to the season for herring being late and short. Also there was a slight decrease in the hoop-net catch of catfish, owing to the waters being lowered on the Rideau Canal by the Canal Department for the purpose of repairing locks. etc.

There was an increase of summer tourists. They seem to increase each year, and are chiefly Americans who find plenty of bass and salmon to give them their day's catch; and as there is good hotel accommodation at Newboro, Westport, Portland and Jones Falls, this, together with the good fishing and fine scenery will in a short time become one of the best summer resorts in the Province, provided the fish are properly looked after and the supply kept up.

The close seasons were well observed, in fact so well that he did not have one case of violation of the fishery laws during the year.

Ling are so numerous in Little Rideau and Wolfe Lakes that he thinks greater inducement should be offered for their extermination, even if the license fees for hoop nets should be reduced.

Overseer Brady, Lindsay, Scugog Lake and River, reports that there were many complaints in the early part of the year about the absence of fish: maskinonge and bass were said to be scarce, but later on he found that there was no reason for any such complaints, there being not only plenty of fish taken but there were larger maskinonge taken he had seen for some years. The catch of bass was not so good. The water in Seugog Lake was unusually low during the winter, and no means of supplying either fresh water or air, and an enormous number of dead fish was the result. The shore of the lake and the banks of Seugog River were lined with dead fish in the spring, and coupled with this there was a big catch of bass through the ice during the months of January and February. He would strongly urge that this should be stopped, and the close season made to include the whole winter. It is exceedingly difficult to watch men on the ice, and the means they adopt to catch fish are more frequently unlawful than otherwise. The laws and regulations were fairly well observed.

Overseer Clark, Picton, Lake Ontario, reports that the catch of fish during the season has decreased considerably, noticeably herring, pike, perch, catfish, mixed and coarse fish. He attributes this to several causes, viz., (1) High winds prevailed to a great degree, rendering it difficult to reach the fish; (2) the laws were closely observed after several seizures early in the season, and a close watch where there was likely to be any illegal fishing; and (3) a more nearly correct statement of catch, and perhaps a scarcity by being driven away by high winds. There was an increase in the catch of whitefish, which appear to be more numerous than in many years past.

Fully 80 per cent. of the catch, he says, is exported to the United States, the balance being used for home consumption.

His warning to the fishermen to keep the close season and other regulations was not in vain, as all the regulations were well observed.

Several cases of illegal fishing, of nets being illegally set were discovered. He seized in April 6 gill nets, in August 2, and in September 2, making in all 10 nets seized.

There is no mill refuse to do injury dumped in the water.

There are no fishways in his district.

He is pleased to report that the replenishing of the several waters in his district by the depositing of salmon and whitefish fry is very highly appreciated by fishermen and all lovers of the finny tribe, and the concensus of opinion is that the waters will be greatly repleted thereby.

Overseer Couper, Dunnville, Lake Eric, reports that the fishermen in his division had a good season's catch, and the prices obtained were high. The laws and regulations of the Department were well observed, no cases of illegal fishing having come to fis notice.

Overseer Cousincau, Windsor, Detroit River and Lake St. Clair, reports that the catch of fish for the past season has been fairly remunerative. There have been but three complaints of infringement of the fishery laws—all three for illegal fishing, and in each case a conviction was obtained and the parties fined. The catch of German carp was not as large as that for the previous season; that fish apparently frequented United States waters in much larger numbers, as the catch of carp across the border was very large.

The abolition of the close season for whitefish in these waters materially benefited our fishermen. Whitefish did not reach the waters of the Detroit River and Lake St. Clair until the middle of November,

He is at times annoyed by foreign poachers, but it is almost impossible to reach them with a row boat. He thinks there should be at that point a power boat of some kind at the disposal of the officer, to be used in patrolling the waters of his district.

Overseer Craig, Glenburnie, Rideau River, reports that the catch of fish in his division on the Rideau Canal for the year 1904 was fully up to the average. Prices were good, and the fishermen were well satisfied with their catch. Exports are much larger than formerly, and the quantities used for home consumpton is also increasing. Fishermen inform him that all kinds of coarse fish are increasing very fast; dog fish in particular are multiplying rapidly, although many hundreds are being destroyed by hoop nets. G. Simmons caught and killed 2,700 dog fish during 1904, some of which were very large. The whitefish received at Glenburnie from the upper lakes are increasing in size, and becoming more numerous yearly.

The number of tourists is also increasing each season on the Rideau waters. The bass fishing last summer was good, and the sportsmen were well satisfied with their catch. Some very fine cottages are being built on the islands and shores of the lake, but a great many camp out during the summer months. With steamers, tugs and private yachts going between Kingston and Ottawa, the Rideau Canal is now a fine summer resort.

Overseer Crotty, Bothwell, River Thames, reports that no illegal practice has come to his notice.

The close season has been well observed.

There are no dams or mills in his division, therefore no sawdust or refuse.

The fishing season was very short on account of the long severe winter, and prices were high in consequence. All the fish caught were used for home consumption.

The catch was about as usual.

Overseer John Driscoll, Howe Island, St. Lawrence River, reports that the fishing has not been as good in his division this year as formerly; he thinks the cold rainy weather and high waters that prevailed throughout the season was the cause of the poor success of the anglers. He found the laws and regulations well observed. The fish that were caught were larger and of a very fine quality.

Overseer Donaldson, Donaldson Mills, County of Addington, reports that during the past year seven licenses were issued for domestic and local purposes only. The fishery laws were fairly well observed, no cases of illegal fishing having been brought to his notice. Trout Lake, in the towsnhip of Palmerston, was stocked some years ago with lake trout, and the lake is now teeming with these fish and affords excellent sport for tourists. Quite a number avail themselves of its advantages for this purpose, and express themselves well satisfied with the result of their visits. There are many other lakes in his district well adapted for the propagation of game fish of various kinds, but unfortunately there is no fish of value in them. Mapy people in the neighborhood have endeavored to stock these lakes by transporting fish from other lakes, but owing to the great distance in moving them their efforts have not been generally successful.

Overseer Duchesne, Treadwell, Ottawa River, reports that there has been very little change in his division, except that there has been an increase in the catch of bass and maskinonge by anglers and sportsmen, who have strictly observed the laws.

Many tourists camp along the Ottawa River during the summer months and enjoyed great sport in successful fishing.

Regarding the licensed fishermen, he had not noticed any illegal fishing among them: as he particularly warned them to observe the laws and regulations.

The fish caught in his division are all sold in Canada, about 25 per cent. being used for home consumption.

There are no fishways in his division, and none are needed. There was no mill refuse allowed to pass into the streams, all being used for fuel.

He finds that the fishermen and anglers are willing to obey the law, as they consider it much to their interest to do so.

Overseer Flynn, Mountain Grove, County of Addington, reports that the spring and summer catch of fish exceeded any prior year, both in quantity and quality. The tourists were in greatly increased numbers, seeking private boarding houses, also farm houses, as well as public houses, for accommodation, and were pleased in all. He found they approved of the new fishing regulations, and thankfully received a copy which he supplied to each party. great plea-They also expressed sure with their catch of fish. He gave special attention to the cisco herring fishing in Eagle Lake in the townships of Olden and Hinchinbrook, and found it mattered little what part of the lake a net was set—it was full of cisco in the morning. All the lakes of note in his division are good for ciscoe herring, which vary a little in size in different lakes. He strongly recommends that cisco herring net licenses be issued for 2½ inch mesh extension measure for 100 yards of net and that a fee of \$10 be charged; and for a domestic license 30 yards of net and a fee of \$3; and that hoop net licenses be granted for all lakes where ling are numerous.

Nearly all the fish caught by the fishermen were sold for local consumption. The salmon in Sharbot and Eagle Lakes are on the increase, especially Sharbot Lake, he having seen them in large numbers, to all appearances many of them 18 or 20 lbs. in weight.

He has had four cases of illegal fishing by fish poachers, who belong to the moving population, hence hard to capture. He also has sufficient information to strongly suspect two persons of using explosives in Crow Lake in the townships of Osa and Bedford, which will have his best endeavors to secure a conviction. He seized 15 yards of gill net and a night line with 61 hooks. He would advise the extension of time to six months for the prosecution of illegal fishing.

Overseer Freeman, Brighton, Lake Ontario, reports that the catch of fish in his division was less than in the year previous, but that prices have been higher, and the fishermen have made fully as much. He finds that the fishing apparatus is depreciating in value, on account of the fishermen not getting up any new nets. There are no fishways in his division, and no sawdust has been allowed to go into the water. The law has been well observed as no fines have been imposed, and no seizures made. He thinks it would be advisable to stop all spring fishing, especially in Presque Isle Bay, Bay of Quinte and Wellers Bay, as at that time a great many fish spawn, such as pike, pickerel and bull heads.

Overseer Gibson, Strathroy, reports that owing to the stream in that vicinity being stocked, and the waters closed for angling for a term of years, there has been no angling done; but the sportsmen are looking forward to the time when they can try their luck again. He does not expect when the season opens that the bass will be easily taken, as the river abounds with food, such as minnows, crawfish, etc.

There were no complaints of pollution of streams by sawdust or other refuse.

The laws and regulations were well observed.

Overseer Gillespie, Campbellford, On the Trent, reports that bass and maskinonge fishing was not so good as in the previous year. From Healey's Falls to the foot of Rice Lake both bass and maskinonge seem to be plentiful, but owing to the great quantity of small fish, such as minnows and perch, in these waters, they remain in the weed beds where their natural food is plentiful and consequently are slow to take the bait.

From Percy Boom to Chisholm Rapids the water has been lower than usual. Fishing with rod and line has been very good. Hoop net fishing has been poor, owing to the small catfish not being able to get to deep water.

The dam at Chisholm's Rapids is about all taken away, only onethird remaining, which had the effect of draining the orecaing grounds before the small fish were able to reach the channel.

The fishing regulations have been well observed. He thinks it would be better if anglers were allowed to keep a 5 lb. maskinonge which would measure from 24 to 27 inches; it would be more satisfactory, and would be greatly appreciated by the fishermen.

Overseer Goulette, Gananoque, Gananoque and St. Lawrence Rivers, reports that the fishing for pike in the St. Lawrence has been good. Black bass are plentiful, but small in size. In Gananoque Lake the bass fishing has been very good, but pike fishing not as good as last year. The fishing with hoop nets for coarse fish in the spring was good, but owing to the overflow of water in the fall the catch was not as good as formerly.

The laws and regulations were well observed, no violations coming under his notice.

He would recommend that two hoop net licenses be granted in South Lake to destroy the bull heads that frequent those waters in great numbers to the detriment of the better class of fish.

Overseer Guerord, Bonheur, Inunder Bay District, reports that the catch was about the same as last year. The fishermen that were engaged in the work did fairly well. The laws and regulations were well observed.

Overseer Hadgraft, Port Dalhousie, Lake Ontario, reports that this year has been on the whole more successful for commercial fishermen than last, and prices have been on the average higher than any year since he became overseer. The fall fishing was well within the average, and the weather was more favorable than last year.

The prices obtained were as follows : For herring  $2\frac{1}{2}c$  per lb. contract for season, perch 3c per lb., pickerel 3c and 4c per lb., trout and whitefish 6 to 8c per lb., the demand being first-class for all kinds of fish.

The angling at Niagara-on-the-Lake has been better than it had been for the last two years, while at Queenston it has been about the same as of late years. The cause of the falling off of angling in Niagara River is caused largely, so he has been given to understand, by the dumping of refuse in the river from factories situated at Niagara Falls, N.Y. He thinks some representations should be made to the N.Y. State fishery officers to abate this pollution of the waters, if it is found on investigation to be correct.

The fishermen of Niagara complain of the restrictions placed on them to the benefit of American fishermen, and he hopes that the Department may be able to induce the Americans to see the benefit of uniform laws on both sides of the line.

The fishing laws on the whole were were observed, with the exception of a seizure of nets in 20 Mile Pond and also in 16 Mile Pond, and an arrest and conviction for interfering with an overseer in the discharge of his duties.

He strongly advises that permits be granted to men that are reliable in all inland waters in his district to catch carp, and that all means possible be used to rid the water of this noxious fish.. He also recommends that the clause on the back of the license that it shall be the duty of every fisherman to make returns to the overseer not later than 31st Jan. be changed to read not latter than 5th Jan., as then it would be possible for overseers to get in their reports earlier.

In regard to circular sent out by the Department to all commercial fishermen in his district with reference to selling fish in Canada, they all declare that responsible buyers in Canada will have the preference if they contract for a year's fishing at ruling prices, and have agents in the district who are responsible for the payment of prices agreed upon. Some of the fishermen have sent fish to Toronto, and have not received any remuneration for them whatever.

All of the fish caught fresh have been sent to the Buffalo markets, with the exception of fish sold to peddlers on the wharf. Geo. Elliott of Port Dalhousie, and Frederick Depew of Jordan Harbor have shipped large quantities of herring smoked in twelve quart baskets to Toronto and Hamilton, and received large profits.

A. J. Hunter, Rainy River, Special Guardian appointed to co-operate with the guardian appointed by the State of Minne-sota to protect the sturgeon fisheries of the Rainy River, reports that on May 15th they seized a trap net, and on the 17th they confiscated several night lines. On May 16th they broke up a camp on the river, which was dealing largely in caviare and buying sturgeon from the Indians. On May 23rd they caught an Indian fishing illegally and confiscated two gill nets; on May 27th they confiscated 1 keg caviare; on June 17th they seized 75,000 hooks; and on June 14th they seized 4 kegs of caviare-about 600 lbs. This is worth about 75c The seizure would total \$450, adding the seizure of 1 keg on May per lb. 17th it would make a total value of about \$550 of caviare seized. He reports that there was more work to do on the American side, as most of the parties engaged in the curing of caviare resided on the U.S. side of the They had about 80 miles of river to cover, and found considerable river. difficulty in breaking up the illegal fishing, as the Indians were constantly on the watch for them, and the Captain and crew of the American steamboat plying on the river were bribed to watch all their movements and report. He says that from experience gained this year they will be in a better position to carry on the work successfully another year.

Overseer Johnson, Parry Sound, Georgian Bay, reports that the fishing has been good, and the fishermen have been successful in their operations during the season. The angling has been splendid, and the tourists are well satisfied with the way the regulations are being carried out. The law has been well observed, no poaching in the inland lakes, and less net fishing than usual. The Indians have abandoned the selling of bass and other fish prohibited by law, and the farmers are doing their utmost to protect the fish in the inland lakes. Every person is satisfied with the present regulations for the protection of fish.

Overseer Johnson, Brantford, The Grand River, reports that the angling in the waters tributary to the Grand River has been very good, but in the river there has been no angling on account of it being stocked and fishing therein prohibited until the month of August, 1905. The indications are that the fishing will be much improved, as the waters seem to be full of fish, thanks to the attention of the Department Wilkie's dam has now a good fishway, which was badly needed. Brook trout fishing has not been as good as in former years. The laws and regulations have been well enforced; he had three convictions, which had a good effect upon others. He would recommend that all angling should be prohibited until the opening of the bass season.

Overseer Johnson, Harwood, Rice Lake, reports that the catch of bass and maskinonge was not as good as last year, the cause of which he says was the continued rough weather. The spawning season was the best they have had for several years, on account of the water being kept at a high line, thus allowing the spawn an opportunity to fully hatch before the water receded leaving the spawn exposed, which has frequently happened in former years.

No illegal fishing came to his notice, the laws and regulations being well observed.

District Overseer Judd, Rideau Waters, reports that the past year has been characteristic of the two previous years in rough and stormy weather, and while it may have been unprofitable to the commercial industry, and unpleasant for anglers, it was a merciful Providence to the finny tribe, as it lessened the onslaught which is rapidly increasing. Although reports from anglers were to the effect that the catch in favorable weather noticeably increased and was correspondingly so in size, yet when one realizes that in addition to an overflow of hotels and boarding houses, almost a continuous avenue of tents for thirty miles on a line of Rideau waters were seen for six weeks, one wonders how long good fishing can hold out without some super-human aid in the preservation and perpetuation of the fisheries in this part cf the Province; and he presumes that what is true in this part is equally so in other parts of the Province, and indeed loudly calls for mature consideration in legislation, expenditure and administration.

During the fall, and before the close of navigation, he made a careful inspection of a large part of his territory, of many lakes and places of interest, and obtained all the information he could as to the condition of the lakes, their visitation by tourists and their requirement. It is surprising to realize, he says, the difficulty one experiences in keeping pace with the ever increasing changes in the condition of waters and the movements of the people. Indeed, the fish like the people seem to surge alternately to and from certain localities, according to favorable conditions. For the last two seasons the best bass fishing has been in drowned lands. In . certain lakes that have still and only deep water fishing, there is an apparent decrease of game fish, and in consequence applications are being made by anglers' associations and interested residents, by way of experiment, to issue licenses for hoop nets, presuming that the cause for such depletion may be found in an accumulation of coarse and destructive fish. This, however, does not always follow. In one instance where seven sets of hoop nets were experimented with, the coarse fish caught were insufficient to pay the license fees, and the licensee has not renewed his applica-He is of the opinion that in many cases where the catch has fallen tion. short, it may be attributed more to the migratory character of the fish than to depletion.

The recommendation for a revision of the close season in certain districts or zones as per report for last year he commends, and says it cannot come too quickly. By way of personal experiment and upon the best information that can be obtained, there is no doubt but what the close season for salmon trout in this district is one month too late. Many of the lakes are swarming with a fine quality of whitefish, which are of great commercial value, and the applications for licenses, even for local consumption, are surprisingly increasing. This catch can only be had in November during the present close season for salmon. It will therefore be readily understood what an acquisition it would be to the revenue, even where the license fee is but nominal, and to the food supply of the people when the close season for salmon trout is shifted a month earlier. The herring in his district are in great demand. They are in quantity and quality up to the mark, yet rough weather prevents the possibility of a large catch. The bull-head catch for the last season in many Rideau lakes has greatly diminished, while in several other lakes off the line of the Rideau the catch has largely increased, and in certain lakes where they have been fished continuously for many years it is a surprising fact to learn that the supply is correspondingly increasing.

Never were the fishery laws and regulations more carefully observed by natives and tourists than during the past season. At the close of the season of 1903, after the patrol boat "Eva Bell" left for winter quarters, over twenty convictions for illegal fishing were recorded; while at the close of this season, although he had carefully organized certain local means for reliable and quick information as to infractions, he was pleased to learn that the experience of the former fall had a salutary effect, and that infractions were unknown and unheard of. This is encouraging, and proves beyond doubt that once the machinery for protection becomes properly systematized, the control of our fisheries can be made as complete as that of any other department of administration. This leads to what he considers a very important matter along the line of better systematizing the machinery, and having given it considerable thought and experiment, he makes a few brief suggestions without interfering with the ideas or domain of others.

First, he would suggest as in a former report, that the organization of Anglers' Associations be encouraged in every possible way. This can only be done by an officer, such as a district overseer, spending considerable time in organizing, and keeping in touch and encouraging active interest in every association.

Second, that the appointment of local overseers be recommended by the district overseer, and be under his entire supervision. This would have the advantage of getting full information as to his fitness, reliability, and location for duty. The appointee would do duty better by reason of his responsibility to the district overseer, and he could for cause be dismissed without incurring the responsibility and displeasure of Government patronage.

Third, that guidesmen be licensed and amenable for infractions such as excessive catch while on duty. As they would have to be British subjects in order to procure licenses, it would preclude oarsmen from United States being brought into competition with home labor, and at the same time make them quasi fishery officers. He has conversed with many guidesmen on this suggestion, and it seems to meet with their approval.

Fourth, that licenses be granted to bait catchers, specifying the locality for their operations. This would preclude them from catching bait in one locality to supply others, a matter which is beginning to give considerable dissatisfaction, especially at summer resorts where each is desirous of obtaining bait for his guests. This would also be approved of by bait catchers.

Fifth, that certain small lakes known as feeding grounds and well adapted for propagation be reserved from all or any kind of fishing, and that a guard be placed on such for strict protection and maintenance. On the chain of Rideau lakes, there are three such, well known as the home of bass, and are eminently adapted for such reservation. They lead to other and larger lakes by a small outlet, and by holding them in reserve it will be a continuous growing hatchery, and hence a continuous supply to the other lakes. These three locations situate about equal distance apart would supply, without re-stocking a chain of ten lakes, having a distance of fifty miles. To guard these lakes would cost about \$100 per annum each, and in addition the overseers could be useful in protecting the waters in the immediate vicinity of such reservations. The forest wealth of the Province is being wisely protected by a reservation of millions of acres, and a like policy of reservation of certain lakes for the propagation and preservation of our valuable fish would meet the approval of public sentiment.

Sixth, that no netting be allowed between the 1st April and the fall fishing, as the spring fishing is without a doubt far more desctructive to game fish than any other season of the year.

The patrol boat "Eva Bell" did good service last season, and is in excellent condition for the coming season. She made no seizure, for the reason she was always there to do so, and as reported before is indispensable for the stretch of waters she patrols.

The people are becoming more and more interested in the protection of these waters. They never more realized the commercial value of their fisheries and the annual acquisition to their trade. Thev do not complain of the expenditure in consequence of such protection, but on the contrary will sanction a larger expenditure that better facilities be They well know that to guard this net work of waterways reafforded. quires close attention, determination and ample means. To maintain and keep them from depletion, in face of the complex solicitation of trade and the enormous drain by the summer tourists requires determined, well paid, men to enforce the laws and regulations. In the inland fisheries the future has in store the possibility of vast contributions of pleasure and of It is a heritage worthy of the most energetic and mature conwealth. sideration.

Overseer Labatt, Victoria Harbor, Georgian Bay, reports that the catch of the different kinds of commercial fish was about the same as 1903. Game fishing though was much better, maskinonge being very good, and are still increasing rapidly. He does not know of any existing abuses. The close seasons were well observed. The Act respecting the protection of navigable waters was also well observed. He does not know of any mill refuse being dumped in the water that would do any injury.

Overseer Laird, Guilds, Lake Erie, reports that, owing to the very severe winter of 1903-4, fishing did not commence as early as in some previous years, not until the 15th May did the fishermen get their nets in the water; but taken as a whole the season was better than that of 1903, both as regards the weather and as to the catch of fish. There were not so many gales as in 1903, and there was a very substantial increase in the catch of herring and whitefish as compared with some former years; in fact, the catch of whitefish came very near to the catch in the year 1901, which was a record year, the catch being 52,562 lbs., while for the past season it was 49,717 lbs. He thinks this was due to the fact that they had a very cool season, free from any heavy gales. The water did not get warm until late in the summer, and it was in the forepart of the season that most of these fish were caught; in fact, there were very few caught in the fall. The prices for all kinds

No. 31

of fish have ruled very high all season, so taking everything into consideration this has been the most profitable season the fishermen have had for a number of years. The fishermen all say that there should be no gill net fishing allowed in any waters that can be fished with pound nets; indeed, they view with alarm the introduction of gill nets in any part of Lake Erie. They would be all satisfied if the fishing of the gill nets were only abolished for all time to come; they all say that if gill nets are allowed to get a foothold in Lake Erie, they will be compelled to stop fishing with pound nets. He thinks this would be a very serious state of affairs. In the first place there would be a very great decrease in the revenue of the Province, and there would be a large amount of capital that is now invested in the pound net fishing industry that would not be worth ten cents on the dollar, to say nothing about the large number of men that would be thrown out of employment if such a calamity should come to pass. He says there is only one remedy to ward off this fatal day, and that is to license no gill nets, and to have a close season on all kinds of fish from the 15th November to April 1st. He says he would like to say a word about this gill net business. From what he can learn it is mostly carried on with the Booth Co's tugs, and he fails to see why any concession be granted by the Canadian Government to this grasping corporation. Then there is also the fact that during the close season on the American side of Lake Erie, there are scores of American gill net tugs engaged in fishing. At such time it is against the law to bring any fish to the American market caught in American waters, so to evade the law these tugs say that the fish were caught in Canadian waters; and he believes from what he can learn that the fish are caught in Canadian waters, for it is very well known that these American fishermen do not lay up their tugs nearly as soon as out protective cruiser goes into her winter quarters. Some seasons they are out for nearly a month after the cruiser is out of commission. He says this should not be, and thinks that if the two Governments could only come to some understanding and make it against the law to take fish in any waters during this close season, it would put a stop to a large amount of this very destructive business. He says he can call it by no milder term, for surely any one who has given this matter any thought can come to no other conclusion than that it is this wholesale destruction of the fish during the spawning season by these gill nets that is responsible for the large decrease of late years of the whitefish and herring catch in Lake Erie.

About the carp in Rondeau Bay, he says the men who are engaged in the work of catching them have not as yet been very successful in making any very great inroads into this most destructive robber of all kinds of game fish, but he is pleased to state that they are all making preparations to go at this work on a larger scale the coming season. He says these men have all lived up to the very letter of the law. He has been amongst them a good many times during the season and has examined their ponds, and has not at any time found anything in the ponds that should not be there. He thinks there should be some parent bass put in the bay so as to keep up the supply of this game fish. The Eau is a very popular resort for a large number of foreign tourists, and as these people spend a lot of money in that locality, there should be something done to keep them there as long as possible, but if the fishing gets scarce they will most surely go somewhere else.

District Overseer Lamarsh, Wheatley, Western Peninsula, reports that he was over the Detroit River and part of Lake St. Clair and Kent shore several times. In June last he found that some American fishermen had

30

set lines in Canadian waters just west of Bois Blanc Island in the Detroit River. He seized the fishing gear, but took precaution to know that he was on safe grounds in doing so. The owners made protest to the American or U. S. Consul at Amherstburg, who notified him that they claimed seizure was illegal, and made demand for compensation. He was enabled to convince Mr. Martin, the U. S. Consul, that the seizure was legally made, and the matter dropped.

Complaints were made by fishermen on Lake St. Clair that their nets were frequently robbed of fish by fish pirates from across the line. This is a matter which does not come under the scope of a fishery overseer's duty, according to the Book of Instructions to overseers. He made a seizure of some gill nets (8) and fish, which were confiscated, in Lake Erie some two or three miles west and north of Grubb's reef. The fishermen in the different divisions have had varying success. Some have done fairly well, while others have not. The fishermen in Kent have as a whole done better than in 1903. There has been a slight increase in most kinds of fish caught except yellow pickerel. The price received for the fish has compensated in some measure for the small catch, as compared with catches of former years.

He would again draw attention to the necessity of the Dominion Patrol Boat going into commission earlier in the spring, as the waters in Lake Erie generally open from middle to last of March, with the result that American gill net tugs seize the opportunity to get into Canadian waters and enjoy from three to six weeks' good fishing in our waters before the patrol boat gets out. They generally have three weeks' fishing in our waters in the fall after the boat is laid up for the winter. He is still opposed to gill netting in the fall in the shallow waters of Lake Erie. There is nothing more destructive, he thinks, to the herring of Lake Erie than the taking of spawn herring in the fall by gill nets operated by American and Canadian fishermen. Unless the Ontario Fishery Department and American States bordering on Lake Erie secure uniform laws or action in prohibiting all fishing from 20th Nov. to 1st April, the herring of Lake Erie will cease to be a commercial factor in the fishery markets.

Overseer Lamarsh, Wheatley, Lake Eric. reports that while there has been a slight increase in the number of pounds of whitefish, herring, perch, and soft and mixed fish, there has been quite a decrease in the other kinds caught. Herring increased from 93,500 lbs. to 98,192 lbs. The herring would have shown a great decrease but for the use of gill nets in the late fall by some of the fishermen. Whitefish increased 27,408 lbs. over 1903. Perch increased from 87,100 to 149,105 lbs. Soft and mixed fish increased from 152,600 to 214,945 lbs. Pickerel, pike, sturgeon, catfish and caviare show a falling off from last year. The price of the fish has materially aided the fishermen in its financial part of the business. Fully 96 per cent. of all the fish caught in his division is exported fresh to the United States.

The close seasons have been well observed, so far as he could ascertain by examination of shipments, etc.

The fishing season closed in these waters about the 1st December. There was very little loss of fishing gear in fall of 1904 as compared with 1902 and 1903, the fishermen being in that respect in better position than for three years past.

Overseer Loveday, Ottawa, reports that seven licenses were issued in his division during the year. Visits were made at intervals throughout his district. Four nets were seized, also five night lines. In May he visited Carp River, where he found seven men at work spearing; he seized their boat, spear, etc., and on one of the party a fine was imposed of \$10 and costs. He also had a person at Fitzroy Harbor before the magistrate for spearing. He was also fined \$10 and costs. He says there seems to be a tendency to observe the fishery laws more and more every year, and the general public are more in favor of protection. As Game Warden, he seized some 3,000 illegally shipped partridges, and fines were imposed in some cases; also some 400 beaver skins, 500 muskrat skins, and otter skins have been seized, and fines collected to the extent of about \$500. Fishing (angling) at times was good, but the rivers and streams seem to be teeming with small minnows, consequently, fish have plenty of food, and it is only occasionally that bass and pickerel are ravenous. He believes there are lots of fish, but they will not bite. Fly fishing was good for a short time. On the whole he considers the laws have been very well observed.

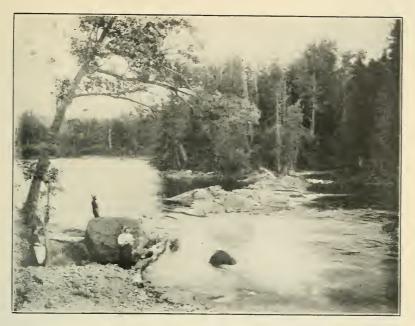

Overseer McCall, Vittoria, Lake Erie, reports a great falling off in the quantity of whitefish taken, which he attributes to the few pound nets now being fished off the County of Norfolk, and to the tug gill net fishermen not fishing for whitefish. The herring fishing during the months of September, October and November, he reports, to have been good; also at Port Dover pickerel were taken in large quantities. On the fishing grounds west of Long Point there seem to have been no blues, herring being on until the close of the season. The fishing in his district up to August was the poorest ever known, and from then on to the close of the season was the best in some years.

The Inner Long Point seine men who fished during the whole season did well, but the great majority do not fish after duck shooting starts.

There were large numbers of Americans visiting Port Rowan in the bass season for angling, and the bass appeared as numerous as ever. On the whole he thinks there is an improvement in the way of observing the laws, and the keeping of the various close seasons.

Overseer McAulay, Southampton, Lake Huron, reports that the fishing was not as good with some of the tug fishermen as in former years, but this can be accounted for in a measure by the fact that some of them did not fish all the season. The herring fishing was good, that species of fish being more numerous than they have been for the past twelve years. The laws and regulations were well observed.

District Overseer McCargar, Belleville, reports that the fishermen who took out licenses this year for the Bay of Quinte had good luck, as all kinds of fish were more plentiful than they have been for some years. The fishermen in Weller's Bay and Consecon Lake had very good luck, but the catch was not quite so large as last year. There is fine angling in Weller's Bay and Consecon Lake, and splendid hotel accommodation within three minutes' walk of the boat. The bass fishing is first-class in Weller's Bay, and east of the hotel to Consecon Lake there is first-class pickerel fishing. He advocates the stocking of the back lakes where there are no game fish, such as salmon trout, bass and makinonge. There are lots of fine lakes in most all of the northern parts of the counties east of Toronto that should be stocked with bass or some other good fish, and there are some places on the Trent River, and some on the Moira River, where fish hatcheries could be started with very small cost. There are, also, a few good places along the Bay of Quinte where there could be a great number of black bass hatched, and put in the bay at a small cost. The Dominion Government put a lot of black bass in the Bay of Quinte last fall, and in eight or ten lakes in the Counties of Hastings and Addington. The Government should assist in starting hatcheries, and stocking those lakes that have no bass in,

Muskoka River-near Baysvil'e. Trout Water.

Trout Fishing on the Muskoka River. "Highlands of Ontario."

Portage on the Petewawa River.

Cache Lake-Algonquin Park. (Stocked Waters.)

Petewawa Falls.

and restocking those that have been fished out. The Government should assist those hatcheries as liberally as it does the Dairymen's Association or the Bridges' Association. He thinks that every acre of those lakes properly stocked will in a very short time be worth as much or more than our land further south. Moira River and Trent River are good rivers to stock, as dog-fish, carp, and such fish cannot get up, there being no fish slides. There are good pike in the Trent River west of Campbellford. In the Trent River up to Campbellford there are bass, maskinonge, pickerel and pike; west of Campbellford to Crow Bay, bass and maskinonge; west of Healey's Falls there is fine bass and lunge fishing, and a good place to stop at Mr. Keller's with good boats and good board. From Mr. Keller's all the way to Rice Lake there is good lunge and bass fishing. There is a good hotel at Trent Bridge; it is about two miles from the C. P. R. station at Havelock. There are good hotels at Hastings, and good men with boats can be had Rice Lake can be reached from Peterboro or from Belleville by there. the G. T. R. Springbrook is about eight miles north of Stirling, where there is good speckled trout fishing; it can be reached by the C. O. R. from Trenton. In Crow Lake there is fine bass and lunge fishing, good hotel accommodation at Marmora, and a great many camps. C. O. R. to Marmora. In Salmon Lake, Devil Lake, and Deep Lake there is fine bass and trout fishing. The fish weigh from six to twenty pounds. C. O. R. to St. Ola boarding house and camp. In Eagle or Coe Hill Lake there is very fine trout fishing, some great catches being made there this year. The C. O. R. goes to Coc Hill, which is within a quarter of a mile of the lake. In Weslamacoun Lake, and Little Weslamacoun there is fine trout fishing, but it is a hard place to get into; it takes a day's hard work from Belleville to get there. You go to L'Amable by C. O. R., then by stage to those lakes, which takes about eight hours. There is good trout fishing in Eagum Creek and These creeks are about three or four miles from Bancroft. Bird's Creek. Låke St. Peter, where there is the finest speckled trout fishing in the country, is about twenty-three miles from Bancroft, to which you go by stage. There are other lakes west of Maynooth, where there is fine trout fishing also. In Papineau Creek and in Papineau Lakes there are fine lake trout. There was one caught there this year that weighed 27 lbs. There is also fine fishing in Baptiste Lake, which is reached by the I. B. & O. railway. There is good bass fishing about three miles below Belleville in the Bay of Quinte, and first-class hotel accommodation and lots of cottages to rent. There is also good bass and lunge fishing near Northport, where there is good hotel accommodation.

Overseer McComber, Port Arthur, Lake Superior, reports that no cases of infraction of the fishing laws were brought to his attention, and the law seems to have been generally observed. No seizures were made for illegal fishing. During the early part of the season the fishing was very good, but it fell off considerably during the latter part; but on the whole the amount of fish caught was equal to that of 1903. He calls the attention of the Government to the great need of a fish hatchery at Port Arthur or in its vicinity, and points to the fact there it not a single Canadian hatchery on Lake Superior, while there are at least three on the American side. At present the Booth Co., a United States corporation, collects spawn and distributes it every year, and to a certain extent does the work that should be done by a hatchery. If it pays the company to do this for its own benefit it would, no doubt, pay the Government to do it for the benefit of the Province in general, and the fishermen in particular. Even if a hatchery is not erected, he would recommend that, if possible, sturgeon be introduced

1904

No. 31

into Lake Superior. At present this fish cannot be found in that district, except in the smaller lakes and rivers. It would be a decided advantage to the fishermen if it could be introduced into Lake Superior. He has always considered that the close season, at least in that district, should commence at an earlier date. At present it commences on the 1st November, but he thinks it should commence at least on the 15th October. The Booth Co. collects the spawn before the close season as it exists at present, indicating that the fish from which the spawn is so collected should be protected at that particular time.

Overseer McKirdy, Nepigon, reports that the number of tourists visiting the Nepigon in 1904 was up to the average, there being \$1,075 returns from tourists' permits.

The fishing, while good, was not up to the average of other years; the fish were there, but for some unaccountable reason did not rise to the fly as freely as usual.

The river has been well protected, and perfect sanitary conditions of the camping grounds maintained.

A permanent dock has been built on Lake Helen, adding materially to the comfort of the tourists.

The work of destroying the coarse fish in the river has been continued. The result of the destruction of these fish is quite noticeable, large quantities of small brook trout being seen in the shallow water. He thinks, with this encouragement, more radical measures should be pursued to exterminate these coarse fish from the river.

A shipment of some 500 trout, of sizes varying from three inches up to those weighing four pounds, was made in the C. P. R. fish car (specially constructed) to the waters of the Bow River at Banff. This shipment was very successful, only some four fish being lost during the trip, notwithstanding long distance travelled without change of water.

The retention of the overseer on the river until the 20th October should in his opinion be a permanent thing, as from the 20th September until the 20th October the fish are spawning in all the shallow rapid waters, and during that season people are constantly traversing the river, many of whom would not hesitate to catch these fish; too much care cannot be taken to protect them. Overseer de Laronde says he never saw so many fish, nor such large ones, spawning before.

A new feature may probably develop in the Nepigon fishing. He refers to the steel head salmon, fry of which were a few years ago deposited in Lake Superior and Thunder Bay. One of these fish, 25 lbs. in weight, was caught in Lake Nepigon. The conditions of the Nepigon would be particularly suitable for these fish, and if salmon fishing should be added to the already famous trout stream it would be very desirable.

Overseer McNabb, Orillia, reports that the close season was well observed in his district. Whitefish and salmon trout, herring and bass were plentiful in Lake Simcoe. The law regarding the depositing of sawdust and mill refuse in the waters was well observed. During the year he got a net at Four Mile Point, and had the party fined. No other illegal fishing came to his notice. The car of bass that the Department sent out was distributed between Lake Couchiching and Bass Lake; they were all put in in first-class order, none of them having died. The anglers and tourists of Sparrow Lake said the fish were very plentiful, but they did not seem to bite so well. The maskinonge are on the increase, both in Lake Couchiching and Sparrow Lake. The carp seem to be very plentiful in Lakes Simcoe and Couchiching, and they are very destructive to the spawn of the other fish.

Overseer McRitchie, Bothwell, on the Thames, reports that the catch of fish during 1904 was small, owing to the hard winter and the great quantities of ice and snow; the water in the river rose to such a height that fishing could not be carried on with any degree of success till late in the season. The catch was not quite one-third of the catch of last year. Some of the fishermen did not put their nets in the water.

Overseer Miller, Wiarton, Georgian Bay and Lake Huron, reports that the fishing in his division was scarcely as good as last year. Some of the fishermen said that if the open season had not been extended, they would not have paid expenses. The fish appeared to have been later in coming in. He also reports that two salmon were caught in Lake Huron near Oliphant; John Walsh caught them in his pound net. They were described as a pair, male and female, about 20 or 22 inches long. The flesh was not so red as the sea salmon, but they were fine and in good condition. These are the only salmon he has known to be caught in these waters.

Overseer Moore, Lakefield, Stony Lake, reports that the catch of bass was about the same as last season; the catch of maskinonge was considerably less, owing to the new regulation that none less than 30 inches could be caught. A good number of tourists visited the waters of his district, principally Lakes Kachawanuck, Clear, Stoney and Lovesick, during the summer. The close season was well observed. He would respectfully suggest and recommend that the regulation as to size of the smallest maskinonge to be caught be changed from 30 to 24 inches, for the reason that a maskincnge 30 inches long in these waters is considered a good-sized fish; that the number of bass that may be caught in a day by any one person be changed to 6, and 2 maskinonge. And as in previous reports, he would again suggest that a foreign tourist should pay a small license fee; most good anglers would be willing and glad to contribute towards restocking and protecting the fish.

Overseer Moore, Huntsville, Fairy, Mary, Vernon, Peninsula Lakes, reports that during the year 1904 no violations of the fishing laws have been reported to him, nor has he made any seizure of nets or other illegal appliances, and, in consequence, he apprehends that the laws have been pretty This is due to a great extent to the notices which were well observed. supplied to him and which were carefully posted up at various points where, in his judgment, they would prove most advantageous. He finds also that people are beginning to realize more fully that it is to their own interest not to take under-sized bass out of the water. The black bass planted in the lakes continue to thrive well, as is evidenced by the larger fish which are being caught and the abundance of small ones. On the other hand, he does not think that salmon trout are caught as freely as in past years. He finds that bass are getting quite common in the river below Port Sydney, and he would recommend, if it is considered practicable, that a screen of some kind be placed at the dam at Port Sydney so as to save the fish from leaving the waters where they have been planted. This is a matter worthy of careful consideration.

Except in one small isolated case, which was speedily remedied as soon as the matter was brought to the notice of the owner, no sawdust has been deposited in the waters by sawmill owners. The number of summer tourists visiting this neighborhood continues to increase, and larger numbers than ever are erecting permanent summer residences.

Overseer Myers, Orchard, County of Grey, reports that the chief fish in his division are speckled trout, and that the catches this year were about the same as last; but there was an improvement in size, one trout caught in Normanby Township weighing 4 lbs. and 2 oz. The Mount Forest Fishing Club caught several nice ones on their reserve at Orchard.

No speckled trout were exported or sold, all being used for home consumption, and caught for sport only.

No abuses came to his notice, and the close seasons were well observed. He knows of no illegal fishing being done. No fines were imposed,

and no confiscations made.

The mill owners are all observing the law in respect to sawdust and rubbish being deposited in the water. He had to call the attention of the Holstein mill owners last winter to a little sawdust leaking into the water through a floor in their mill, and it was stopped at once.

There are three fish slides in his division in fairly good order; one is a new one replacing the old one which was useless. One of the dams at Woodland was let away, therefore, no slide is required there now.

The general wish of the sportsmen and others in his division is for the trout season to close on September 1st.

Overseer Nash, Rat Portage, Lake of the Woods, reports that this year's business shows a marked increase over that of 1903, the value of the catch being some \$9,600 in excess. The value of the boats, nets and fishing material has also increased and there appears every evidence of contentment amongst the fishermen, which is the best of signs. He has been over his district some time during each season, and is pleased to report that the close seasons have been well observed, and no infringement of the law has come under his notice for the year. The fishermen seem to be quite satisfied with the law as it now stands, and have made no complaints to him. The Dominion Fish Company, the largest license holders in his district, reports a most satisfactory year's business on the Lake of the Woods. He says that our many small lakes close to Rat Portage are fast becoming popular with the ever increasing number of tourists, which is largely owing to the foresight of the Department in stocking many of them.

Overseer Nicholls, Hall's Bridge, Peterboro County, reports that during the past season bass and maskinonge have been fairly plentiful in his district; tourists and their guides report having as a general rule caught their lawful number.

The fishery regulations and close seasons are well observed. A few cases of illegal fishing came under his notice, and were dealt with as mentioned in his monthly reports.

There are no fishways in his division, and the mill owners have taken every precaution to prevent the pollution of the waters by mill refuse.

He would suggest that the measurement for maskinonge be twentytwo instead of 30 inches, as at present.

Overseer Norris, Bolingbroke, County Lanark, reports that the past season was a quiet one, very little fishing being done. There was but one set of hoop nets fished during the year, and that only for one month. The run of pickerel was the smallest known for years; he thinks the cause of thus was that the spawning season was on before the ice was out of the lake, and the pickerel deposited their spawn on the shoals and in the small swamp creeks and did not come into the rapids at all. The laws and regulations of the Department were well observed, no violations having been brought to his notice. The anglers think it would be a benefit to the angling for game fish in Christie Lake if a license for a hoop net was granted to destroy the ling and other coarse fish that are numerous in those waters: he thinks if the coarse fish are thinned out, the better quality of fish will increase in

numbers. He made application, and got Big Silver Lake stocked with pickerel this season, which pleased the people living round the lake.

Overseer O'Connor, Long Point, Lyndhurst Waters, reports that during the last season he noticed a marked increase in the quantity of game fish taken from the waters under his supervision. The tourist fishermen report that they have no difficulty in securing the limited number of bass, and that they are uniform in size. They report the pike of these waters to be a very game fish. Some anglers from Buffalo and Fort Erie told him they found so much sport in fishing the pike that they gave up bass fishing entirely and devoted all their time to the pike. The number of tourists who visit those waters are increasing from year to year, and those in the northern waters fished fairly in keeping with the law. Those in the southern limits were reported to have abused their privileges. The difficulty can only be overcome, he thinks, by the people of the localities assisting the overseers by reporting immediately any transgression.

He would recommend relative to the whitefish that some provision be made in the regulations for catching them for local use. These fish are very plentiful in the rapids in the fall, but can only be caught by nets or spears, and even then it is difficult to secure many. At no other season can they be caught at all as they go to the deep waters. Hence he thinks the people in that neighborhood should be allowed some chance of taking them in the fall. Certain parties have made repeated and determined attempts at illegal fishing for salmon on the Red Horse waters, but he has put forth strenuous efforts to keep this down, and succeeded in taking a number of gill nets that had been set in that locality. It is on this stretch of water that the best fish are caught, and salmon weighing 20 lbs. and 25 lbs. are fre-Fishermen report a great catch of large fish last season. quently taken. It is certainly to be regretted that some so-called sports should endeavor to spoil the fishing at that place by illegal fishing. Since last year's report he has taken nine gill nets that had been set mostly for salmon, but some were set for pike and bass. These nets would average about five rods each.

In regard to granting licenses for hoop net fishing he thought it not the proper thing, as he feared too many game fish would be taken. But he telieves now, after seeing those nets taken up on different occasions, that it is a benefit in some places, especially where there are marshes and drowned lands.

There is one thing he has noticed, that the increase of tourists to those lakes has been very large, and if it continues there is great danger of their clearing our lakes of game fish in a few years.

Overseer Ogg, Hamilton, Lake Ontario, reports that he did not find any of the fishermen in his district violating the law as regards Lake Ontario. He had, however, to bring two young men up for setting gill nets in Big Creek, and he also confiscated two small drag nets from some parties who were dragging the creeks for suckers. The first two appeared before him and promised not to repeat the offence. They were fishing for suckers, and he did not impose a fine.

With regard to the extension of the close season for whitefish and trout, a few only of the fishermen in his district fish for them, and those that do had their nets hung up before the first of November, and did not take advantage of the extension granted.

The catch of whitefish for the year was 20,560 lbs., an increase over last year of 6,032 lbs. They were of a fair size, weighing from three to five pounds. Trout show an increase over last year's catch of 4,600 lbs. The catch of herring exceeds that of last year by 65,186 lbs. During the month of November the herring fishing was better than it has been for a good many years, and the fish caught were large. The fishermen sold their fish in Hamilton and Toronto markets, for which they realized good prices. During last winter 121 spearing licenses were granted, but it is impossible to get returns for the quantities speared, although they have promises to fill the returns attached to their license. Some make the excuse that they lay them away and cannot find them, and some forget about them. He has received about thirty, and has averaged the catch at 140 lbs. each, which would amount to 16,940 lbs. The angling season has been fairly good. There are no angling permits issued in his district, as the angling is done only by summer residents and Hamilton people. The carp and dogfish are getting to be so numerous that they seem to drive other fish out of the inlets, and the angling is not much good after they make their appearance.

As regards Forms B, C, D, F and G, nothing has come under his notice except that some farmers and fruit growers pile their brush on the shore, and when the sea gets high it washes it into the lake, which injures the fshermen's nets, and when he notifies them they claim it is their own property.

Overseer Oliver, Little Current, Manitoulin Island, reports that the season has been extraordinarily windy and rough. The catch in the east end of his division, i.e., the Bustard Islands Killarney and Squaw Island, was a little less than last year; in the west it was about the same as last year. The pound net catch in the east end was short, owing to the delay in the issuing of the licenses. The pound net catch west of Spanish River was greater than the previous year. Taking the season's catch as a whole, he thinks it was fully as good as last year. The prices obtained were good, averaging about 41 cents per lb. About 80 per cent. of the catch was shipped to the United States; the remaining 20 per cent, was sold and used in Ontario. He thinks the granting of pound net licenses in the vicinity of Killarney was a good thing; it not only gave the Government a revenue, but did away with more than 50 per cent. of the illegal fishing that has usually been done in that vicinity. He thinks it would be a good thing if the Department would grant pound net licenses from Killarney east as far as Bad River, also from Cape Smith westward to Owen Channel. There has not been much illegal fishing in his division this past year, excepting between Killarney and Bad River, and Cape Smith and Owen Channel; in that locality he thinks there has been considerable of it done.

The angling for bass, pickerel and maskinonge was very good. There were not nearly as many tourists this summer as the previous summer: he says the reason for the falling off was the Presidential election in the United States, and the St. Louis Exhibition. The tourists that did come were well satisfied with their catch. The fishing grounds are close to the steamboat lines, therefore, there is good hotel accommodation for those who desire it. There were quite a number of large steam and sailing yachts visiting his district during the season, and great numbers of tourists also camped on the numerous islands. The catch of herring was about the same as last year. The laws and regulations were fairly well observed.

District Overseer Pratt, Penetang, reports commercial fishing to be falling off very rapidly in the Georgian Bay, almost wholly by reason of the abnormally high wages in almost all other occupations, which, together with a more continuous employment that they give, naturally draw from the ranks of the fishermen, whose calling employs them for the secson of navigation only, and is precarious at best. On the other hand, line fishing by tourists and sportsmen is just as decidedly on the increase, largely due to the remarkable increase in bass and maskinonge.

In his last annual report, he submitted that "catering to the tourist. fraternity, especially in providing good fishing for them, is the largest factor to be taken into consideration in making and carrying out fishery regulations," and now another year's experience adds to the force of that contention. But with the changing conditions comes the necessity for changed methods and appliances for successful oversight, and it is now absolutely imperative that fishery officers be equipped with light and speedy craft. The territory to be covered is immense, yet, notwithstanding its immensity, the tourist is to be found in all holes and corners of it for at least two months in the year, and to a certain extent during the whole season of navigation. The tourist class as a whole are inclined to observe the laws, but there is always the sprinkling of the reckless and regardless who have to be kept in check.

A prespective cause of trouble lies in the fact that already a few choice localities are becoming congested with tourists during the season, and as the bulk of them fish in the immediate vicinity, depletion of game fish is a natural consequence. Then, a congestion of tourists in such localities, is followed by the influx of the tourist hanger on, the guide, the caterer, the ne'er-doweel, some of whom make permanent quarters in the vicinity, greatly to the destruction of fish; and he respectfully submits that the Crown Lands and Fishery Departments work in unison in this matter, so that none but bona fide settlers be allowed to occupy public lands.

Fishermen, as a whole, have not made money, although individually have done well. He does not think that commercial fish are becoming scarcer, but they are changing their feeding grounds. This is borne out by the fact that grounds pronounced worthless a few years ago gave good results this year, while a good many favorite places had to be abandoned after the bulk of the season had passed.

German carp, contrary to expectation, show no perceptible increase, and he is of the opinion that the waters of the Georgian Bay will prove unsuitable for them.

His operations in the sailing cruiser "Maud" were carried on in the usual way during the season of navigation. The Maud is a good boat of her kind, but the changed conditions call for a totally different kind of craft, and he would recommend that she be equipped with power, or else sold and a power launch put in her place.

He reports that illegal practices are largely on the decrease, and while bis district furnishes unusual facilities for the would-be law breaker, he is satisfied that continued vigilance with a proper equipment would eventually, if not totally, wipe it out, or at least practically eliminate it as a factor to be dealt with.

Overseer Roblin, Adolphustown, Bay of Quinte, reports that the catch for 1904 was over 25 per cent. of an increase over 1903, and nearly 50 per cent. over 1902, which plainly shows that the fish are increasing.

The fishery laws are very well complied with, and fishermen are well satisfied with the increase of their business.

There is not much change in the angling from that of last year.

The game fish seem to be on the increase.

There has been a large increase over 1903 in the catch of the different kinds of fish. About 90 per cent. were exported, and 10 per cent. used for home consumption. There have been no abuses, and his fisheremn have mostly observed the close seasons.

There have been three charges of illegal fishing in his district during 1904, which have been reported.

There are no mills in his district, and no fishways.

Overseer Sargent, Bronte, Lake Ontario, reports that there is a decrease in the catch of fish as compared with last year. The cause is owing to a less vigorous prosecution of the industry, as most of the fishermen lost a large portion of their nets during the months of January and February, the weather being the roughest and coldest ever experienced by the fishermen. Some of those who had fished two boats in former years were obliged to only fish one, as they had such heavy losses in nets, and it will take some time to puild them up again.

The ciscoe which they have had in former years, and which he mentioned in his last year's report, are returning; fully fifty per cent. of all the fish which were caught this year were pure ciscoes.

He is of the opinion that if there was a close season adopted for two months in the winter, say during the months of January and February, the fishermen would be hundreds of dollars in pocket, for during those months there are a great number of nets lost, and it must pollute the fishing ground to have the old and decayed fish left in the water. There were thousands of yards of net last year swept away by storms, and no doubt those nets would be full of fish.

He is pleased to report that the trout fishing is improving every year, and some fine specimens were taken this last season, a number weighing twenty pounds. The fishermen use six and seven inch mesh net, finding it pays a great deal better than a smaller mesh.

All fish were disposed of in the home markets.

Angling has been very good, and some very fine specimens of black bass has been taken from the Twelve and Sixteen Mile creeks.

The laws and regulations are well observed.

Overseer Shewen, Apsley, Peterboro County, reports that he does not think there was any increase in the catch of fish in his district for the past year. About the same number of American and Canadian tourists visited the district as last year. All fish caught were used for home consumption. He visited all the camps that came into his district, and posted up the fishery regulations at all places where they would be of most use. On his last round he found the linen ones that were furnished him by the Department had withstood the weather very satisfactorily.

He finds that there is a tendency for some of the tourists (not all) to exceed the limit in a day's catch, especially in Long Lake district, Township of Burleigh, where they imagine there should be no law. He interviewed a number of the guides, and urged them to assist in seeing that the law was strictly observed in this regard, and he showed them the folly of allowing wholesale catches, that it was against their own interests, for, if allowed, the lakes would be fished out and their occupation gone, no fish, no tourists to guide. He is convinced that his advice bore good fruits in this respect. No fish were wasted, as the settlers who supplied milk, eggs, etc., to the different camps, were always given any fish that were not wanted, to take home with them.

There was no damage done to fish by reason of mill refuse being dumped into the streams.

There are no fishways in his district. He would recommend that certain lakes in his district be stocked with fish, notably Wolf and Crab lakes in the Township of Anstruther. If the Department could see fit to put aside a small grant for this purpose, it would be a great boon to the settlers, and also extend the tourist traffic, which is a source of great benefit to the settler financially.

He has patrolled his district at different intervals during the year, and found no actual cases of illegal fishing, the close seasons and other regulations being observed.

Overseer Skeen, Harwood, Rice Lake, reports that the season just past on Rice Lake has been like the previous year, somewhat disappointing to lovers of good sport, not he thinks owing to the scarcity of fish, for during the spawning season fish seemed very plentiful, the marshes being literally alive with them. No open violation of the law came under his notice during the close season. He was pleased to note that the water this year was maintained at a higher level than formerly, thus enabling the spawn to hatch before the water fell low enough to cause it to be lost.

There was a larger number of summer visitors this year than the previous year, and though through climatic conditions, either wind or rain, the catch of maskinonge was not what might have been desired, still there were some good fish caught, several to his knowledge ranging beween 25 and 30 lbs. The bass fishing was not as good as last year either, through some unaccountable cause. Still the various visitors went away well pleased with the time they had had, expressing their intention of coming again next year.

He would strongly recommend that a change be made in regard to the granting of permits to foreigners; as it is at present they are not required to take one until leaving with their fish. The result has been that a good number have left without taking one, and from what he could hear they got away with their fish without being asked a question about them. He would ask that they be made pay the fee before putting a line in the water, which would save a lot of trouble.

Overseer Smith, Kemptville, on the Rideau, reports that there has been a decrease in catch of fish for the season on account of low water. The Government are repairing the dams and have let the water out, hence the fishermen were unable to use their nets properly.

The catch is all used for home consumption.

There are no abuses that he is aware of.

The close seasons have been fairly well observed.

There was some illegal fishing, for which he fined one party ten dollars and confiscated his fishing implements and fish. He was unable to obtain the names of some other violators of the law, but confiscated their fish and fishing gear in the shape of nets, jacks and spears.

There are no fishways on the Rideau.

Overseer Smith, Gravenhurst, Muskoka Lakes, reports that the supply of fish in the waters under his supervision during the past season, owing to the absence of netting, and the care and attention devoted to their protection, has in his opinion greatly improved. There were two cases of violation of the Fisheries Act before him, and a fine of \$10 in each case was imposed. One offence was fishing nets in Lake Joseph, and the other for offering fish for sale contrary to law. He also confiscated a quantity of net.

The efforts to restock the waters with bass and game fish are becoming manifest, and he thinks that during the next season the effects of the work which has been done will be even more apparent.

The close seasons were well observed, and illegal fishing has practically ceased.

Great care has been taken in disposing of all refuse to prevent the pollution of the waters.

Overseer Steed, Sarnia, River St. Clair and Lake Huron, reports that the past season was one of the most severe and disastrous to all engaged in this calling in this part of the Province for years. There is a slight decrease in the catch when compared with last season in the number of pounds taken, but, as this was principally in coarse fish, the others more than made this up, considering that the price paid for all kinds was almost \$4,000 more than the former seasons. Two causes for this decrease might be mentioned, viz., the lateness of the spring owing to the severe winter, and the ice being piled higher than ever on the lake shore with windrow after windrow outside, thus making their start almost a month later. The month of November was a record breaker for northwest gales of wind, when the fishermen had hardly a day to get out nets or stakes before the ice windrows were formed again on the beach. The result was that at least 30 per cent. of the twine, and the most of the stakes, were lost.

In regard to the run of fish, he states that on the lake shore the herring came in such large numbers that the fishermen had to dump them back into the lake, as they could not handle them, and they were small in size.

The close seasons were well observed, owing partly to the restrictions having been less rigid than usual. Cases of illegal fishing were as follows: In March one party had fish in his possession at a time prohibited by the Fishery Act, and a fine of \$10 and costs was imposed; during the month of May Americans came over and fish, from boats on the bay, when he made a raid on them, getting two boats containing two men and a boy, fining the men \$10 and costs each, and dismissing the boy, who was with his grandfather; and in June a party fishing without a license was fined \$10 and costs.

He says the mill owners have not yet learned the art of rafting saw logs, as the fishermen complain sadly of the damage done by logs to their pound nets, and wonder why they do not get the protection asked for.

Overseer Stephens, Chatham, River Thames, reports that there has been a small increase in the number of fish taken in his district this last year, owing to the rapid increase in the number of carp in Lake St. Clair; they are the largest source of revenue the fishermen have in that district. Nearly all the fish taken are exported to the United States, only a few being used for home consumption.

The close season was very well observed, no case of illegal fishing having come to his notice.

There is one sawmill on the river. No sawdust or other refuse is thrown into the water.

There are no fishways in this district, and none are necessary.

Overseer Wm. Stewart, Pelee Island, Lake Erie, reports that the statistical return which accompanies his report shows a large increase in the quantity of fish caught as compared with the year 1903. This increase, however, may not, he says, arise from the fish being more plentiful, but from a more vigorous prosecution of the fishing, 23 pound nets being in operation during the fishing seasons, while in 1903 there were 11 pound nets during the spring season, and 20 during the fall season, which commences about the first of September. So that there is an apparent decrease in the quantity of whitefish taken as compared with 1903 and 1902, had the same number of nets been used, but again this may not indicate a decrease of this kind of fish in these waters any more than an incorrectness in return. He has been informed that this kind of fish was very plentiful in the markets. On the whole the yield of fish is creditable, and an evidence that the waters are not being depleted. Carp were not nearly as plentiful as in former The run of herring was very good while it lasted, and the quality vears. These fish seem to increase in size each year. He weighed specigood. mens several times, and  $3\frac{1}{2}$  lb. and  $3\frac{3}{4}$  each was common, while a fisherman informed him that he had taken one that weighed 5 lbs. Practically all the fish caught were exported, and while the fishermen are willing to accommodate any person who may wish them for home consumption, the demand is small. Prices have ranged about the same as formerly, herring being, however, half a cent per lb. lower. Angling was very good, and some very fine fish were caught. The close seasons were fairly well observed, as were all other regulations: and, while the fishermen do not seem satisfied, the season appears to have been a favorable one. The catch from pound nets amounted to \$6,285.89, employing, say, 13 men would average \$483 per man for, say, eight months.

Overseer Taylor, Westmeath, the Ottawa, reports that there is prohably no finer place on the Ottawa than the famous Pacquets Rapids for scenery and lovely fishing spots. The waters have plenty of bass, pike, pickerel, whitefish, and all kinds of coarse fish, and can be easily fished by boat or from the shores, which are well adapted for fishermen. All those who have visited this part of the Ottawa during the past season are delighted with their fishing, and have stated their desire to return again. The catch probably is about the same as last season's, say 30,000 lbs. of all kinds for local use. There are no fishways in his division, but there should be fishways on all the waters, such as Pembroke, Indian River, the Chalk, Pettawa, etc. There are two good hotels there, and fisheremen can easily get to good fishing grounds in half an hour and procure boats, etc., on the spot.

District Overseer Thwaite, Oshawa, reports that the fishing in the different lakes in his district was not so good as in 1903, except in Rice Lake, where from all reports angling has been above the average, and would be much improved if mud cats and other coarse fish were taken out of the water, as there are immense quantities of these coarse fish in the lake. He would strongly recommend that a few hoop net licenses be granted in said lake for a few years. And he also recommends that a modern fishway be put in the dam in Indian River, so that lunge and bass can pass into Stoney Lake.

He regrets to report that nearly all the game fish in Scugog Lake perished last winter on account of the severe weather and the very low water. The principal cause of this is that the dam (68 years old) and locks are in such a bad state of repair that a large quantity of water is wasted. He understands the Dominion Government is taking control of the Trent waters. This, no doubt, will include the Lindsay locks and dam, and he trusts that the Department will be able to induce the Dominion Government to put in new locks and dam, and replace the ancient fishway by a modern one. If this is done, he says, that in a few years Lake Scugog, for a small lake, will be one of the best fishing waters in Ontario. He again urges the Department to make the possession of spears illegal wherever found, as their use is the cause of destroying millions of lunge spawn; in fact, he would make it illegal to manufacture spears in the district. He would also recommend that a fee of \$5 per rod be charged non-residents of Canada. This would produce a considerable revenue to the Department, which would enable it to give better remuneration to the local overseers, who perform their duties on the whole in a very creditable manner. In regard to a \$5 fee on American tourists, it would only be carrying

out a fair trade principle, as they impose a fee on Canadian anglers who

fish in their waters. The only objection against a fee is made by a few hotel men and proprietors of pleasure resorts, who are afraid it might deter parties from patronizing them. This, he thinks, is a poor argument, as Americans will come here anyway, because they find better fishing and cheaper living than they can get in their own country.

All parties are highly delighted that the Fishery Department are restocking the lakes with black bass, as all the lakes in his district are for the benefit of anglers, and not for commercial purposes. As no licenses are issued in his division, the revenue is small, derived principally from fines, whereas a license fee be imposed it would bring considerable into the Department.

He states that all parties interested in fishing, as well as all the overseers, condemn the new regulations, that no lunge shall be caucht under 30 inches in length. The general opinion is that 25 inches should be the extreme for lunge.

Overseer Trotter, Bobcaygeon, Kawartha Lakes, reports that the fishing during the past season was very good. From June 16th until the end of August there were thirty guides employed, and all of them had very good catches. After consulting some of the expert guides, and averaging the number of each guide's catch, he estimates that there were taken out of the Kawartha Lakes this season 21,600 lbs. of maskinonge, and 18,000 lbs. of A great many Americans visited the lakes, and quite a number of bass. them took home the quantity allowed. During the season he issued 53 permits. There was great objection raised by the tourists to the length limit of the maskinonge. It is a difficult matter for a person in a boat to tell whether he has a 24 in. or a 30 in. fish hooked. He strongly recom-mends that a reduction of the length to 24 inches be made, for during the past season many small lunge were caught, and when unhooked they were thrown back in the water to die from their injuries; others took them ashore and used them for the table. There were no fish offered for sale. No doubt some of the Indians exchanged them for provisions, but the fishery laws as a whole were well observed. But great vigilance on the part of the everseer, whoever he may be, is constantly required. He looks for a great many more tourists to those waters next summer, as the accommodation will be much better on account of the new hotel which has just been completed. He thinks that if a permit fee of five dollars was charged, instead of one, as at present, it would be paid just the same, as many of the American tourists think it is insignificant, and say they would come to those beautiful lakes if the fee was raised; and now that they have beter railway communication, there will be greater inducement for tourists to frequent those waters. He had some trouble at the beginning of the season to convince tourists that they could not ship fish without a permit. One man escaped him, and took his box of fish to Toronto and transhipped them from there to the American side. He went to the Trent Navigation Co. and forbade them to receive any more boxes of fish without a permit, and had no more trouble in that respect. He could mention many more tricks to evade the fishery regulations.

He again draws attention to the need of a proper fish slide in the Government dam. The bass and maskinonge last spring were seen in hundreds below the dam, but owing to the imperfection of the fishway they could not make the ascent, and it was a great temptation to some to do a little spearing illegally.

Overseer Van Norman, Sault Ste. Marie, Lakes Huron and Superior, reports a decrease in the catch of whitefish of about 100,000 lbs., which is attributed to the fact that the fishermen took out their nets in Lake Superior in September, and did no fishing after the first of October. All other kinds of fish will about compare with the catch of last season.

With the exception of three or four tons used for home consumption, all fish are exported to the United States.

No abuses of the regulations came to his knowledge, with the exception of two small mesh nets, one in Island Lake and one in Root River, which were taken out and destroyed, but the owners of which could not be located.

The several close seasons were most strictly observed. He is not aware of any injury having been done by mill owners allowing sawdust or other refuse being dumped into the waters. There are no fishways in his division.

Overseer Walker, Port Credit, Lake Ontario, reports that the herring trout and whitefish fishing has been about on the average, but in the line of angling it has been very bad. In the catch of bass and perch there was quite a falling off, due to the heavy rains and muddy water. The carp are becoming very numerous, and he thinks that some means should be provided whereby they could be destroyed, or in time the game fish will be driven out of the rivers, and the fishing from which so much sport is derived will soon be a thing of the past.

Overseer Waddell, Leith, Georgian Bay, reports that there has been excellent fishing in his district during the past year, and the fishermen have done well. He was notified of one case of illegal fishing, but the party suspected got away before he could get to him. He lifted two nets at Cape Commodore in close season with some fish in them, and had one net and the fish stolen the same night. About half the catch of fish in his division is exported, and the remainder is sold for home consumption. There have been no complaints about the saw-mills dumping their refuse in the water; most of the mills burn all the sawdust. Bass and speckled trout are nearly all fished out of the streams in his district, but there is good trolling for salmon trout during June and July. The close seasons have been fairly well observed.

Overseer Willis, Port Whitby, Lake Ontario, reports that the season on the whole was not as good as last year, on account of the spring and summer being so unusually cold and backward, and also on account of the prevailing high winds.

The laws and regulations were very well observed by the fishermen.

There was not more than half enough fish caught to supply the local market, except at Pickering Harbor, from which place quite a few were sent to Toronto. Both the herring and whitefish were larger than in previous years, and the price obtained correspondingly better.

Hook and line fishing was very good all summer, pike being much more plentiful than for a number of years.

Overseer Willmott, Beaumaris, Lake Muskoka, reports that the angling during the past season has on the whole been satisfactory, but there is a marked decrease in the fish in the waters which have been constantly fished for a number of years. The continued efforts of the Department to restock the depleted waters, and also to introduce adult bass into waters in which these fish have not hitherto been found, meet with the greatest success and with the approbation of both summer visitors and settlers in the northern districts; and it is astonishing how in many cases these fish have spread to other waters connected with those into which the fish have been introduced. The immense numbers of herring in many of our northern lakes would be thinks, warrant the Department in allowing bona fide settlers to use small nets, say fifty yards long, for the capture of these fish during the month of November when they are running; there would be little chance of other fish being caught where the herring would be found, except, perbaps, a few whitefish, or possibly an odd salmon trout. A few herring would be a boon to the settler if put by for winter use.

The laws have been well observed. He had some little trouble with mill men allowing rubbish to escape into some waters, also one or two netting cases, but beyond these there have not been any infractions brought under his notice.

Overseer C. W. Wonnacott, Copenhagen, Lake Erie, reports that the catch for 1904 was much larger than the previous year, owing, no doubt, to the increased gill net licenses issued, as both sail boat and tugs fishing gill nets had an exceptionally good catch, and some very large herring were taken. He would recommend that licenses for gill nets with less than a four inch mesh be not granted, for he finds that the larger mesh nets bring the fishermen a great amount of revenue, owing to the superior quality of fish taken, and allow the smaller fish to escape, thereby keeping up the supply for a greater length of time. He fears that with the greater number of licenses granted, the most valuable asset the fishermen of his district have will be depleted unless something is done to perpetuate the fish. The pound net fishermen in East Elgin did not have very good success the past year, owing, no doubt, to the fact of their having gill net licenses, which they paid more attention to in the fall, as it was an exceptionally nice fall for gill net fishing, and he is pleased to report very much smaller losses to the fishermen on account of storms than heretofore.

There has been very little violation of the fishery laws the past year, and a remonstrance from him generally prevented a repetition of any violation. He has caused the linen notices to be posted up conspicuously at each port, and he thinks it has had the effect of educating the otherwise ignorant people of the great benefits of the fishery laws.

Overseer Wood, Toronto, reports that during the year 1904 there has been a considerable falling off in the catch of the different kinds of fish taken in his district for commerical purposes. This may, in a measure, be accounted for by the fact that wages were good, and all kinds of employment easily obtained, so that when the season opened poor the fishermen resorted to other occupations. Strong easterly currents setting over the old feeding beds have done much damage to gill nets, and are causing the fishermen to look for other places to set them. The fishermen also complain that the refuse from the city is injuring the fishing beds. The size of the herring caught was much larger than usual, and on account of the large local demand good prices were obtained.

The angling remains about the same, with some improvement as regards black bass.

The close season was well observed, and no dealers were found having trout, bass or maskinonge in their possession. Four nets were seized which had been placed in prohibited waters, and in two cases fines were imposed for wrongfully setting nets.

Leaving for the fishing grounds.

#### REPORT OF CAPTAIN OF THE CRUISER GILPHIE.

#### S. T. BASTEDO, ESQ.,

Deputy Commissioner of Fisheries.

SIR,—I have the honor to submit my sixth annual report of the work done by the Fisheries Protection Steamer "Gilphie" during the season of 1904.

On the 12th of April we began to prepare the vessel for service, but ewing to the delay of having to put her in the dry dock, she was not ready for sea before the 5th May, and we were not able to leave Owen Sound before the 9th, owing to the rough weather. We reached Meaford at noon, and found the fishermen awaiting favorable weather to proceed to the fishing grounds. We arrived at Collingwood at 5 p.m., and saw Overseer Howard. On the following morning at seven we proceeded to the Christian Islands, a distance of twenty-five miles. It took us all day to reach our destination, owing to the heavy ice encountered. The next day we started out at 7 a.m., calling at Cedar Point and Giants Tomb Islands, and arrived at Penetang at 5 p.m. There was no fishing. On Thursday the 12th, while searching in the vicinity of Copper Head Island, we found one trap net and destroyed it. On Friday and Saturday we patrolled between Campbell's Rock and Parry Sound without finding any illegal nets. We captured one seine and 100 lbs. of fish on Monday while searching off Shawanaga Bay; the men escaped with their boat. The remainder of the week was spent in patrolling Shawanaga Bay, Shebashekong, Campbell's Rock, Gohome, Maxwell and Minnicognashene Islands, arriving at Penetang at 5 p.m. Saturday evening, but found nothing irregular. Monday and Tuesday were spent in washing out and testing our boiler, which we found all right. On Wednesday and Thursday we made diligent search for nets at Muskoka

⁶ Iomahawk Point, Honey Harbor and McRae's Lake, without finding any; but on Friday we succeeded in capturing two trap nets between Quarry and Moore's Point. On Saturday we took on coal and proceeded to Penetang, where we remained until Tuesday morning. Tuesday and Wednesday were spent in patrolling between Penetang and Shebeshekong without finding any nets, but on Thursday while searching the Freddy Channel we captured one very large trap net, which we burnt. Again on Friday we captured a trap net near the mouth of Byng Inlet, which was also burnt. We searched again on Saturday, but without success. We lay up at the French River on Sunday.

On Monday, the 6th June, we visited the Bustard Islands, and found five trap nets, which we burnt. We arrived at K'llarney on Tuesday evening, and learned that Overseer Oliver had left there during the day. On the following morning we left Killarney, and caught a party fishing illegally and fined him \$10. The following day being Dominion Day, no bus-iness was transacted. On Saturday, the 2nd, we washed out the boiler and fixed up generally. On Monday we went to Midland and took on thirteen tons of hard coal, returning to Penetang in the evening. On Tuesday we visited Jones Island, and succeeded in finding two trap nets, and on Wednesday captured two more at Shawanaga Bay. The remainder of the week was spent in visiting the Bustard Islands, Key River, Bad River, Killarney and Little Current. No illegal fishing was discovered. We left Little Current on Monday morning with Overseer Oliver on board, and spent the week in going over his division, returning to Little Current on Saturday afternoon. Monday, 18th July, we visited Point au Baril and Mink Is-lands, and on Tuesday Palestine Island, where we captured four trap nets. Wednesday and Thursday were devoted to patrolling among the islands and pasting up notices, and on Friday we succeeded in capturing two trap nets in the vicinity of Giants Tomb. The following week was spent in patrolling among the islands and in the vicinity of Nottawasaga, Vanvlack, Uollingwood, Meaford and Owen Sound. At the latter place we took on coal, and had our big boat repaired.

We left Owen Sound on Monday morning, patrolling as far as Meaford, and on Tuesday and Wednesday visited the Christian and Hope Islands, Giants Tomb, Maxwell, Go-home, Copper Head, Sans Souci and Campbell's At the latter place we captured two large trap nets, which we The search was continued without success until Monday, the 8th Rock. burnt. August, when we found five trap nets at Bad River. The remainder of the week was devoted to patrolling along the north shore, running down to Wiarton on Saturday. The following week we were occupied in searching along the south shore, and up as far as Minnecognashene, and found five trap nets near Giants Tomb, three on Thursday and the other two on Fri-On Saturday we towed a disabled boat to Penetang. We ran to day. Midland on Monday, and took on seven tons of hard coal, and on Tuesday made some buoys to replace those dragged away by rafts, off Alexander Is-On Thursday we captured another trap net near Waubuno Island, land. which we burnt in the presence of a number of tourists. On the following Monday we found three trap nets in the Freddy Channel, and three more at the limestone islands on Tuesday. The remainder of the week was spent patrolling among the islands. We arrived at Penetang on Saturday evening.

Monday, 5th September, being Labor Day, we remained in Penetang, and Tuesday was occupied by fixing and cleaning up the boat. The following day we went to Midland and took on six tons of coal, and the balance of the week was spent searching for nets among the islands. The following two weeks were spent among the islands on the north shore searching for illegal nets. We found one near the McCoy Islands on 13th September. We experienced some rough weather, and on the 21st September we had a fall of snow.

On Monday, the 26th September, we succeeded in capturing two trap nets at the Bustards. We then proceeded to search at Key River, and between there and Killarney. The fishing was light, and several of the stations were closing up. Thursday, Friday and Saturday were too rough to do any work, so we went to Little Current and remained there until Monday, 3rd October. We left at 8 a.m. through the Badgley Channel and Rattlesnake Harbor. On Tuesday we reached Tobermory, and Wednesday Lion's Head. The fishermen were complaining about the bad weather, and consequent scarcity of fish. The rest of the week was occupied visiting Cape Croker, Barrow and Sidney Bays, Whitecloud Island and Cape Commodore. We arrived at Owen Sound on Saturday afternoon, where we remained, owing to a heavy gale, until Thursday morning, when we left for Victoria Harbor. We succeeded in capturing three trap nets at the latter place.

The following two weeks were spent patrolling the North Channel among the islands. The weather was bad, and snowing for several days. We managed, however, to capture one trap net and one seine in the Voyager Channel on the 28th October. On Saturday we visited Bad River and also French River, and chased several boats. Monday, 31st October, was too rough to leave port, so we gave the hull of our boat a good scrubbing. On Tuesday both boats went out to look for nets, one to Grondine Point, and the other to Bad River. They reported that the Indians had all left, and that the herring were very plentiful at Bad River. The remainder of the week was spent principally in painting and fixing up the boat, as it was too rough to put to sea.

On the Mississaga—Mississaga Canoe Trip.

Aubrey Falls-- Mississaga Cance Trip.

Trout Fishing on the Opeongo River.

On Monday, the 7th November, we succeeded in capturing a trap net and a seine near Toad Island. On Tuesday we searched the inside channel down to Bad River, and saw several Indians fishing, but they were not getting many fish. The weather was getting very cold, and we were obliged to take our boats out of the water to save them from being injured by the ice. We came out to the Bustard Islands on Thursday, and found that most of the fishermen were getting ready to go home, and by Tuesday, the 15th November, there was not a fisherman remaining. It is claimed that the fall fishing is the poorest in twenty years.

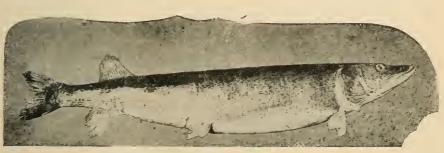

We left the Bustards on Wednesday, the 16th, calling at Point au Baril through Shawanaga Bay, Shebeshekomg, Campbell's Rock and Sans Souci, and found every place deserted. We continued to patrol through the islands, and on the 21st November we seized and destroyed two hoop nets at Honey Harbor. On the 23rd we captured three more in McRae's Lake, and at Green Islands on the following day we seized a trap net and one hoop net. We then proceeded to Midland, where we had to remain until Saturday, 26th November, on account of the storm. We then went to Penetang, and on Monday to Wiarton. It was snowing and freezing hard. We found that no fishing had been done in this locality for some time. We saw Overseer Miller on the 30th November, who reported that the fishing on his side of the bay had been good. As the winter had fairly set in, and it was no longer safe to put to sea, we went to Owen Sound and proceeded to lay the boat up for the winter. This work was completed by Friday, the 9th December, and the crew dismissed.

I have the honor to be, Sir,

Your obedient servant.

A. MCAULAY, Captain.

Taken near Killarney-Georgian Bay.

#### THE REPORT OF THE

SCHEDULE OF FISHERY OVERSEERS IN THE PROVINCE OF ONTARIO.

DISTRICT OVERSEERS.

Name.	Residence.	Districts.
Angus Macaulay	Southampton	Province of Ontario.
J. C. Judd	Morton	That part of the Co. of Frontenac lying north of the Twps. of Kingston and Pittsburg; the Twps. of North and South Crosby, Bastard, South Elmsley and Kitely, in' the Co. of Leeds; the Counties of Lanark, Carleton, Russell, Prescott, Glengarry and Stormont, and for those portions of Dundas and Grenville lying north of C.P.R.
Peter Lamarsh	Wheatley	Twps. of Anderdon, Malden, North Colchester, S. Col- chester, N. Gosfield, S. Gosfield and Mersea, in the Co. of Essex, with jurisdiction over so much of the waters of the Detroit River and Lake Erie as lies in front of said Townships.
Geo. M. Beechor	Broekville	That portion of Co. of Frontenac lying south of the Twps. of Portland and Storrington; for the Twps. of Leeds, Lansdowne, Front of Escott, Rear of Escott and Yonge and Elizabethtown, Co. of Leeds and for those portions of the Cos. of Dundas and Stormont lying south of the C.P.R.
J. K. McCargar	Belleville	Counties of Hastings, Lennox, Addington and Prince Edward, and the Electoral district of East Northum- berland.
Wm. Pratt	Penetang	County of Simcoe and Districts of Muskoka and Parry Sound, and all waters and islands in Georgian Bay fronting said counties.
M. Thwaite	Oshawa	Counties of Ontario, Durham, Victoria, Peterborough, Provincial County of Haliburton and Electoral District of West Northumberland, including the waters of Lakes Sincoe and Couchiching.

#### LOCAL OVERSEERS.

O. Allan	Wallaceburg [,]	County of Kent, fronting on Lake St. Clair, ex Dover West Tp., also Walpole and S Islands, Co. Lambton.	cclusive of t. Anne's
Jas. Avery	Dorset	Districts of Muskoka and Haliburton.	
•	New Liskeard	Temiscamingue and tributaries.	•
Fred Baechler	Nipissing	South River and South Bay, Lake Nipissing.	
Henry Barr	Douglas	County Renfrew and Tps. of Nipissing Dist east and south of Algonquin Park.	rict lying
Geo. L. Bailey	Callandar	Lake Nipissing, in the Districts of Parry S Nipissing.	ound and
J. D. Barstow	Harrowsmith	Township of Portland.	
A. W. Bate	St. Catharines	County of Lincoln.	

No. 31

## SCHEDULE OF FISHERY OVERSEERS.—Continued.

Name.	Residence.	District.
Geo. Bilton.	Newboro	Tps. of North Crosby, South Burgess, South Elmsley and over the Rideau waters as far as Smith's Falls.
J. M. Black	Killarney	Province of Ontario.
I. Blondin	Cornwall	Cos. Stormont and Glengarry and St. Lawrence River.
J. Bowerman	Port Perry	Tp. of Reach, Co. Ontario, and Tp. of Mariposa, Co. Victoria, also River Scugog, and joint jurisdiction over Lake Scugog.
Nicholas Brady	Lindsay	Tps. of Emily, Ops. Co. Victoria.
John Brown	Rockdale	Tps. of Belmont and Methuen, County Peterboro'.
Frederick Brown	Baysville	Tps. MacLean, Ridout, Franklin and Brunel.
Elisha Brown	St. Marys	That part of the Thames and Avon Rivers and tribu- taries lying within the Townships of Downie, Ful- lerton and Blanshard.
D. Cattanach	Wolfe Island	<ul> <li>Township of Wolfe Island and for the Islands of Sim- coe, Garden and Horseshoe, and any other islands comprised in the Tp. of Wolfe Island, with juris- diction over the waters of the River St. Lawrence</li> <li>and Lake Ontario surrounding the said Tp. of Wolfe Island and the Islands comprising the same.</li> </ul>
Ed. Charpontier	Sutton West	Tp. of Georgina, County of York.
M. Clark	Picton	Co. of P. Edward exclusive of the Twps. of Amelias- burg and Sophiasburg.
A. Clunis	Claude	In and for the Twps. of Chinguacousy, Caledon and Albion, in the County of Peel.
Geo. Clyde	Çataraqui	Twps. of Pittsburg and Kingston, Co. of Frontenac.
A. Corsant	Masonville	Co. Middlesex, East of boundary line between the Tps. of Westminster and Delaware, London and Lobo.
J. B. Cousineau	Windsor	For Tps. of Sandwich West, Sandwich East, Sandwich, Maidstone, Rochester and Tilbury West, Co. Essex.
Arch. Couper	Dunnville	Tps. of Moulton, Sherbrooke and Wainfleet, in the Dis- trict of Monck and Lake Erie.
Wm. Craig	Glenburnie	Tps. of Storrington, Loughboro, Portland and Bedford, Co. Frontenac.
John Crotty	Bothwell	River Thames and waters tributary thereto, lying be- tween the Village of Wardsville and the boundary line between the Tps. of Delaware and Westminster.
H. Davieau	Michipicoten Har.	Michipicoten Island.
Chas. de Laronde.	Nepigon	Nepigon River and tributaries.
J. Dickson	Westwood	That part of Trent River and tributaries lying between Rice Lake and Trent Bridge, Co. of Peterboro'.

## SCHEDULE OF FISHERY OVERSEERS.—Continued.

Name.	Residence.	District				
W. J. Donaldson	Donaldson Mills	Tps. of Palmerston, Clarendon, Barrie, Miller, North Canonto, and South Canonto, electoral district of Addington.				
John Driscoll	D'Arey	The waters of St. Lawrence River around Howe Is'and.				
W. Drummond	Keene	County of Peterboro'.				
H. Duchesne	Treadwell	Counties of Prescott, Russell, Stormont and Glengarry, with jurisdiction over so much of the Rivers Ot- tawa and St. Lawrence as lies in front of said counties.				
Joseph Ellis	Fort Erié	In and for the Electoral District of Welland, with juris- diction over so much of the waters of Lake Erie and the Niagara River, exclusive of the waters of said river north of the Niagara Falls, as lies in front of the said Electoral District.				
John Farrell	Cayuga	. Grand River from division line between Tuscarora at Onondaga Tps. and Oneida and Seneca Tps. to i mouth and waters tributary thereto, also for Tps. Dunn and South Cayuga.				
A. J. Flood	Delta	Upper and Lower Beverley lakes and rivers.				
Henry Forbes	Jeannettes Creek	County of Kent.				
John Free	Byng Inlet	Maganetawan River and waters of Georgian Bay in the vicinity of Byng Inlet.				
R. Flynn	Mountain Grove	Tps. of Hinchinbrooke, Oso, Olden and Kennebec, dis- trict of Addington.				
S. Freeman	Brighton	Lake Ontario fronting Counties of Northumberland and Durham, also inland waters tributary to said lake in the above counties.				
Wm. Gardner	McDonald's Cors	Tps. of Dalhousie and North Sherbrooke, Co. Lanark.				
Joseph Gerow	Port Perry	Tps. of Cartwright and Manvers, Co. Durham, also River Scugog, and joint jurisdiction over Lake Scugog.				
Chas. M. Gibson.	St. Catharines	County of Lincoln.				
J. R. Gibson	Mallorytown	River St. Lawrence, lying between Mallorytown Land- ing and Brockville.				
J. W. Gibson	Strathroy	Co. of Middlesex.				
C. S. Gillespie	Campbellford	Trent River and tributaries.				
W. H. Godwin	Kingston	Waters fronting Co. Frontenae and east as far as Gan- anoque.				
O. V. Goulette	Gananoque	Gananoque River and for that part of the River St. Lawrence lying between Wolfe Island and Rock- port.				
J. R. Graham	Fenelon Falls	Tps. Verulam, Fenelon, Eldon, Bexley, Summerville, Laxton, Digby, Dalton and Longford, Co. Victoria, and Tp. of Lutterworth, Co. Haliburton.				

#### SCHEDULE OF FISHERY OVERSEERS,—Continued.

Name.	Residence.	District.				
A. Guerord	Bonheur	Provisional Judicial District of Rainy River which lies east of the 5th meridian line, and for so much of the said district as lies between the 5th and 7th meridian line south of a line running due east from One Side Lake to White Fish Lake.				
R. Hadgraft	Port Dalhousie	County of Lincoln and over so much of the waters of Lake Ontario as lies in front of the said county, and with jurisdiction over the Niagara River between its mouth and the Falls.				
P. Howard	Collingwood	Tps. of Collingwood and Osprey, Co. Grey, and Tps. of Nottawasaga and Sunnidale, Co. of Simcoe, and Georgian Bay.				
Geo. Hughson	Ariel	Township of Laurier.				
S. A Huntington	North Bay	Lake Nipissing and tributaries thereto in district of Nipissing				
J. A. Johnson	Parry Sound	For the Tps. of Shawanaga, Burpee, Hagerman. Fer- guson. Carling, McDougall, McKellar, Christie, Foley, Parry Island, Cowper and Conger in the District of Parry Sound.				
F. Johnstone	Harwood	Tps. of Hamilton and Alnwick, Co. Northumberland, and over Rice Lake.				
Henry Johnson	Brantford	That part of Grand River lying between the southerly boundary of Town of Galt and the boundary line between Tuscarora and Onondaga Tps. in Co. Brant and the Tps. of Seneca and Oneida in Haldimand Co.; also concurrent jurisdiction with Overseer Messecar over Tributaries to the Grand River in Burford, Oakland and Brantford Tps. West of the Grand River.				
Joseph Kinder	Rockingham	Lake Charlotte, Tp. Brudenell, Co. Renfrew.				
F. Labatt	Victoria Harbour	Tps. of Freeman, Gibson, Baxter, Wood and Morrison, in Dist. of Muskoka; also over Severn River.				
J. K. Laird	Guilds	Lake Erie fronting Co. Kent, together with inland waters of said Co. tributary to Lake Erie.				
H. M. Lagault	Sturgeon Falls	Dist. of Nipissing, North and West Tps. of Widdifield, Merrick, Stewart and Osborne, exclusive of Lake Temiscaming and tributaries.				
E. T. Loveday	Ottawa	In and for the Tps. of Nepeau, Gloucester, North Gower and Osgoode, in the Co. of Carleton, with jurisdic- tion over so much of the River Ottawa and the River Rideau and the Rideau Canal as lies in front or within the said Tps. and over the tributaries to the said rivers and canal.				
E. Lynch	Hastings	Village of Hastings, Co. Northumberland.				
A. B. Messecar	Burford	County of Brant, comprising Tps. of Burford, Oakland and Brantford, west of Grand River, but exclusive of said river.

#### To His Honour WILLIAM MORTIMER CLARK, &c., &c., &c.,

#### Lieutenant-Governor of the Province of Ontario:

The Commissioners appointed by your Honour by Royal Commission under the Great Seal of the Province, bearing date the 2nd day of February, 1905, to inquire into and report to your Honour upon the matters referred to in a resolution of the Senate of the University of Toronto, passed on the 20th day of January, 1905, in the following words:—

"That the President and Professor McLennan having brought to the attention of the Senate certain anonymous communications which have appeared in the public press reflecting on their conduct in connection with the awarding of the 1851 Exhibition Scholarships in the years 1900 and 1904, and in other matters, and having requested that an investigation be made into these charges: Be it resolved that a Committee be appointed to inquire into the said matters and to report thereon and that the Committee do consist of the Vice-Chancellor and four other members of the Senate to be nominated by him,"

have the honour to report as follows : ---

The inquiry was opened on the 11th day of February, 1905, after notice of the meeting had been given to the President and Professor McLennan, and to the Editor of "Saturday Night," in which newspaper the anonymous communications referred to in the resolution appeared, and after public notice in the newspapers of Toronto.

Counsel appeared on behalf of certain persons who had intimated to your Commissioners their desire to be heard, and also for the President and for Professor McLennan.

The taking of evidence and the argument of counsel were completed on the 15th day of April, 1905.

At the opening of the inquiry and before its close as well as during the progress of it, your Commissioners publicly intimated their willingness and desire to hear any one who deemed himself to be in a position to throw light upon the subject of the inquiry and who should desire to be heard.

I.

The only specific charges pressed upon the consideration of your Commissioners were those relating to the awards in the years 1900 and 1904 of what is known as the "1851 Exhibition Science Research Scholarship." These scholarships of £150 a year tenable for two years are offered every second year by His Majesty's Commissioners for the Exhibition of 1851, to students of science in the University who have indicated high promise of capacity for advancing science or its application by original research. Regulations governing the award of the scholarships were passed by the Commissioners for the Exhibition of 1851, in England and forwarded to the University of Toronto. It will be convenient to discuss separately the two awards which have been questioned, and to take up first the award of 1900, made to Mr. John Patterson.

[3]

Of the regulations governing the award, the only one which it is necessary to consider in connection with the award of 1900 is the eighth, which is as follows:—

"8. The candidate must indicate high promise of capacity for advancing Science or its application by original research. Evidence of this capacity is strictly required, this being the main qualification for a scholarship. The most suitable evidence is a satisfactory account of a research performed, and the Commissioners will decline to confirm the nomination of a candidate unless such account is furnished, or there is other equally distinct evidence that he possesses the required qualification."

Upon receipt from the Commissioners of the Exhibition of 1851 of the offer of a scholarship to be competed for in the year 1892, the matter was considered by the University Council, on 29th September, 1890, and referred to a Committee who on 4th May, 1891, reported that "The scholarship shall be open only to Honour Candidates in Physics and Chemistry and shall be awarded to the candidate who sends in the best thesis on some branch of physical science. Such thesis must either furnish some evidence of originality or shew an intimate acquaintance with the present state of our knowledge with regard to such branch. Full references to the original papers must be furnished where necessary."

This report was adopted and was referred to a Committee to be put in proper form for insertion in the University Calendar, and this regulation has ever since remained in force.

In each of the calendars since that date until that for 1904-5, notice of of the scholarship has been inserted in the following form: "The 1851 Exhibition Science Scholarship of the value of £150 sterling given by the Commissioners for the International Exhibition of 1851, is awarded once in two years by the University Council for research in" (the subjects are, down to 1902-3, including that year, stated to be "Physics" or "Chemistry" and afterwards "Science.") "Subject to satisfactory report as to the progress in study, it is ordinarily tenable for two years at home and abroad."

In August, 1899, the Commissioners of the Exhibition of 1851 authorized the award of a Probationary Bursary, of the value of  $\pounds 70$  in any year in which the Universary authorities were unable to recommend a candidate as fully qualified for a scholarship.

On 6th November, 1899, the University Council instructed the Registrar "to post a notice concerning the award of the 1851 Science Scholarship in 1900, and with it the regulations for the award of the scholarship or in lieu thereof the bursary offered when no candidate of sufficient merit presents himself for the scholarship."

There is no evidence before your Commissioners as to what the notice so posted contained.

On 27th February, 1900, the University Council resolved: "That all theses in competition for the 1851 Science Scholarship should be handed in not later than Tuesday, March 20th," and notice to that effect was posted on the bulletin board of the University.

In pursuance of this notice theses were handed in to the Registrar within the prescribed time by Messrs. Davidson, Good and Hogg.

Mr. J. W. McBean had intended to compete and to hand in a thesis, but had failed to complete it by the time fixed; he applied to the University Council at its meeting on 28th March, 1900, to extend the time for putting it in, but the Council decided that no extension of the time should be allowed.

Professor McLennan's connection with the competition was detailed by him in his evidence to the following effect, and his statement is accepted by

#### UNIVERSITY OF TORONTO.

your Commissioners as being correct: Towards the 20th March, 1900, Mr. Patterson spoke to him about the scholarship and expressed some regret that he had not a thesis on the work he had done in the autumn under Dr. Chant's direction, and also about the advisability of his applying for a bursary, which after some conversation he decided to do. At this time Professor Mc-Lennan had never read the Regulations of the Royal Commissioners governing the award of the scholarship, but shortly after his conversation with Mr. Patterson he read them over and came to the conclusion that according to them a thesis was not absolutely necessary. Upon reaching this conclusion, he tried to find Mr. Patterson to tell him of it, not being aware of the Regulation of the University Council which made a thesis essential. Failing to find him, Professor McLennan himself took a report which Mr. Patterson had left with him, of his laboratory work, to the Registrar and offered it with an application for the scholarship on Mr. Patterson's behalf. He did this because he thought he should have been familiar with the regulations and should have told Mr. Patterson when he spoke to him about the bursary that a thesis was not essential in an application for the scholarship. The Registrar, however, refused to receive the application, because the time fixed by the University Council for handing it in had by this time expired. Professor McLennan then informed Mr. Patterson of his view of the regulations and a letter from Mr. Patterson, of 27th March, 1900, was prepared by him after consultation with Professor McLennan, and delivered to the Registrar. In this letter, Mr. Patterson applied for a bursary in case his work should not be deemed sufficient for a scholarship; and accompanying the letter was an account of the experimental work upon which he had been engaged.

Speaking generally, your Commissioners are of opinion that it is quite proper for a Professor or instructor to encourage any student to become a candidate for any prize or scholarship; but it is inadvisable that any one who has actively promoted the candidature of a student should afterwards accept the position of a judge in the competition.

Mr. Patterson's letter was read at a meeting of the University Council on 28th March, 1900, being the same meeting at which the application of Mr. McBean above mentioned was submitted and refused.

At the same meeting, the President, Dr. Miller, Mr. McLennan and Dr. Kenrick were appointed a committee "to examine and report upon the theses submitted in competition for the Science Scholarship."

The members of this committee (other than the President, who took no part in its deliberations) considered the qualifications not only of Messrs. Davidson, Good and Hogg, who had handed in theses within the time fixed by the Council, but also those of Mr. McBean, who had handed in no thesis owing to the refusal of the council to permit him to hand one in after the time fixed, and of Mr. Patterson, who had after the time fixed handed in an account of his scientific investigations; and they unanimously recommended Mr. Patterson for the scholarship. Their recommendation was adopted by the University Council on the 19th April, 1900. No written report from the committee is in evidence, but the resolution of the Council is as follows:—

"The Council resolved to recommend to Her Majesty's Commissioners that the 1851 Science Scholarship of 1900 be awarded to Mr. John Patterson. This recommendation was based on the report of the members of the staff appointed to read the theses submitted."

The report here referred to is that made to the Council by Dr. Miller, Dr. Kenrick and Professor McLennan.

Your Commissioners are of opinion that under the circumstances the recommendation that the scholarship should be awarded to Mr. Patterson was irregular, and should not have been made.

1904

5

The regulations passed by the University Council, supplementing those attached to the offer of the scholarship by the Royal Commissioners, prescribed a thesis as the basis of the award to be made, and the Council had fixed, and refused to extend, the date before which theses were to be handed in by students intending to compete. If no candidate had sent in a thesis in due time, or if all the candidates who did so were found unfit for the scholarship, it would no doubt have been competent to the Council to nominate some other student (if in the absence of a thesis there were other equally distinct evidence that he possessed the required qualifications.) But the evidence of Dr. Miller, Dr. Kenrick and Professor McLennan shews that the regulations passed by the University Council had been entirely lost sight of and that the scholarship was awarded to Mr. Patterson under the impression that the regulations sent out by the Royal Commissioners, which do not make a thesis imperative, were the only ones governing the Council in making the award. Considering, therefore, that a thesis was not essential, and that its late arrival or entire absence might be overlooked, notwithstanding the posted notice, and that other proofs of the qualifications of a candidate might be accepted in its stead, they selected, in good faith, the candidate whom they considered from their knowledge of his work, the best of the five before them, and treated his failure to comply with the notice calling for theses by a particular date as of no importance.

Although the President was a member of the University Council on 4th May, 1891, when the regulations in question were adopted, they were not present to his mind in 1900 when the recommendation was made. Professor McLennan had never been a member of the Council and is not shewn to have ever been aware of them. The same remark applies to Dr. Miller and Dr. Kenrick.

Your Commissioners are of opinion that it was competent to the University to make local regulations requiring candidates for the scholarship to submit a thesis within a given time. Having done so, and having posted a notice year by year of a given date for receiving the theses, it was unfair to recommend the award of the scholarship to a candidate not complying with such regulations when a candidate who had complied was deemed qualified on his merits to receive the award.

This being the case and the President and Professor McLennan being aware that the Council had notified intending candidates to hand in theses by a particular date, they must share in the responsibility of having treated the candidates who complied with this notice and those who did not do so as standing upon an equal footing.

After the announcement of the recommendation and after it had been despatched to the Royal Commissioners, a protest signed by thirty-six undergraduates, including the unsuccessful candidates, Messrs. Good, Hoor, Davidson and McBean, was made in writing to the council, in the following terms:—

TORONTO, 11th May, 1900.

#### "To the University Council,

"GENTLEMEN : ---

"We beg to call your attention to the following statements which we believe to be true, in connection with the recent award of the 1851 Exhibition Science Scholarship to Mr. Patterson.

"1. A notice was posted on the bulletin board announcing that all theses had to be handed to the Registrar by the 20th of March.

"2. A draft of a thesis was handed to the Registrar by Mr. McBean on the 20th of March, with an application to the council to have the time for handing in the theses extended, but the extension was not granted. "3. Mr. Patterson stated many times between Christmas and the 20th of

March that he had no intention of competing for the scholarship.

"4. About the 20th of March Mr. Patterson was advised to prepare a report of his laboratory work, and acting upon this suggestion he prepared such report, and handed in an application (not to the Registrar) to be permitted to compete for the bursary in case the scholarship were not awarded.

"5. Unknown to Mr. Patterson, Mr. McLennan presented this laboratory report to the Registrar in competition for the scholarship, but the Registrar refused to accept it, on the ground that the competition had been definitely closed at the time of the meeting of the Council on the 20th of March, by the rejection of Mr. McBean's application for the extension of the time, and by the appointment of examiners for the theses submitted on the 20th of March.

"And whereas this has given rise to very unfavourable comment among the student body at large, and has already injured the departments concerned, both in the sympathy and practical support of the students:

"And whereas there has apparently been some irregularity in the granting of the scholarship.

"We, the undersigned, your petitioners, humbly pray that steps may be taken by you to remove from the minds of the students the suspicion that there has been unfairness in the matter."

A meeting of the Council was held on the 16th May, 1900, to consider the protest, at which Dr. Miller, Dr. Kenrick and Professor McLennan were present by invitation, the President being also present as a member of the Council.

The committee to whom the theses of the candidates had been referred at the meeing of the Council on the 28th March, 1900, that is to say, the President, Dr. Miller, Dr. Kenrick and Professor McLennan, were asked for an explanation of the statements made in the protest, and they appear, according to the evidence of Dr. Kenrick (the only witness who deals with this part of the case) to have made a verbal report to the Council of the circumstances under which they had decided to recommend Mr. Patterson. From their verbal statements, a written report was prepared in a rough form at the Council meeting, several members of the Council and Committee, including the President taking part in its preparation. The report so drawn up is as follows : ---

"The Committee to select a nominee for the 1851 Exhibition Science Research Scholarship beg to report as follows on the petition of Mr. J. G. Davidson and others, dated May 11th, 1900:

"The statements of the petitioners that theses had to be handed in by the 20th March, and that Mr. McBean's application for an extension of the time was refused, are true. It is also the case that Mr. Patterson did not present a thesis in competition for the scholarship. He applied for the bursary which might be awarded in case no one was deemed fit for the scholarship. In this connection he sent in a report of work done by him in the laboratory during the winter.

"The Committee after full consideration of the theses and of the capacity for research exhibited by Messrs. Davidson, Good and Hogg unanimously concluded not to recommend any of them for the scholarship. The cases of Messrs. McBean and Patterson were then brought

7

before the Committee, although the Registrar informed the Committee that Mr. McBean had withdrawn his application in consequence of not being allowed an extension of time. The members of the Committee, who were familiar with Mr. McBean's work, were of the opinion that he was inferior to Mr. Good, and consequently refused to recommend him.

"In considering Mr. Patterson's application for a bursary, it appeared from the report of his laboratory work that he possessed those qualifications which the Royal Commission deem essential for a scholarship. These qualifications are set forth in Section 8 of their "General Regulations' as follows:—

"The candidate must indicate high promise of capacity for advancing Science or its applications by original research. Evidence of this capacity is strictly required, this being the main qualification for a scholarship. The most suitable evidence is a satisfactory account of a research already performed, and the Commissioners will decline to confirm the nomination of a candidate unless such an account is furnished, or there is other equally distinct evidence that he possesses the required qualification."

"It will be noted that in making nominations the Committee are not restricted to a consideration of the thesis presented but may nominate a student who has not sent in a formal thesis or made application either for a scholarship or bursary. The duty of the Committee is to select the student with the highest promise of capacity for advancing Science, or its applications, by original research. It was in accordance with this regulation that the Committee, instead of awarding the bursary for which he had applied, considered Mr. Patterson worthy of the scholarship, and they accordingly so reported to the Council. It will be seen from the above that in deciding the award of the scholarship the case of no candidate was prejudiced by failure to comply with the posted notice in respect of the date."

The language of this document does not convey a true impression of the real facts as given in evidence before your Commissioners by Dr. Miller, Dr. Kenrick and Professor McLennan; on the contrary it appears to your Commissioners and would naturally be understood by the students to mean that the qualifications of Messrs. Good, Hogg and Davidson were first considered and deemed insufficient before those of Messrs. McBean and Patterson were brought before the Committee.

The evidence of Dr. Miller, Dr. Kenrick and Professor McLennan shews that the claims of all five candidates were considered together and that Mr. Patterson was recommended for the scholarship because they thought him the best of the five.

Furthermore, the language used naturally though perhaps not necessarily leads to the conclusion that Mr. Patterson was the only candidate of the five who possessed the qualifications which the Royal Commissioners deemed essential to the scholarship, while the evidence before your commissioners shews that this was not the case.

Although the President took part in the preparation of this document he was not personally aware of what had taken place in the Committee and his knowledge must necessarily have been derived from the statements of the other members of the Committee as he had taken no part in its deliberations. Your Commissioners cannot find upon these facts any wilful misstatement by the President or Professor McLennan in the answer to the students' protest.

It cannot be assumed that Dr. Miller, Dr. Kenrick and Professor McLennan, all being present and able to explain to the Council the view of the regulations upon which they had acted in recommending Mr. Patterson, should have misstated in any way the acutal order in which they had taken up the claims of the various candidates; they could have had no motive for doing so, for it is carefully pointed out in the reply to the students that under the only regulations by which the Committee imagined the competition was governed, a candidate who had handed in a thesis in due time was in no better position than a candidate who had handed in no thesis at all. Your Commissioners therefore conclude that the incorrect or ambiguous language of the reply to the students should rather be attributed to the error of the draftsman than to intentional misstatements by any member of the Committee.

Many of the circumstances which have led your Commissioners to this conclusion were, however, not known to the students to whom the answer was furnished, and your Commissioners are not surprised that they should have considered the explanation an unsatisfactory one.

#### II.

The award to Mr. E. F. Burton of the scholarship offered for competition in the year 1904, by His Majesty's Commissioners for the Exhibition of 1851, was attacked upon the ground that Mr. Burton was not eligible under the regulations prescribed by the Royal Commissioners, and that the award to him was brought about by misrepresentation on the part of the President and Professor McLennan.

The only one of the regulations necessary to be considered in connection with this award is the seventh, which is as follows:

"7. The candidate must have been for the last full year prior to the time of nomination a student of the institution by which he is nominated; or must have been a student of such institution for a full year ending within twelve months prior to the time of nomination; and since ceasing to be such student have been engaged solely in scientific study.

Mr. Burton had obtained the degree of B.A. in June, 1901, and since that date had been at first tutorial fellow in mathematics in the University of Toronto, and latterly down to the time of his nomination for the Exhibition of 1851 Scholarship, he had been assistant demonstrator in Physics, in the University at a salary varying from \$530 to \$870 per annum.

He was also entered upon the Register of the University from the year 1901 to the year 1904 as a graduate-student and engaged in the work required for the degree of Ph.D.

Mr. Burton handed in to the Registrar a thesis within due time, as did also Mr. J. W. McBain, B.A., Mr. R. E. DeLury, B.A., and Mr. E. Forster, B.A., and four undergraduates. The receipt of these theses was reported by the Registrar to the University Council at a meeting held on 4th April, 1904. The following is a copy of the minutes of this meeting, shewing the action taken:—

"Professor Lang and Dr. Miller questioned the eligibility of Mr. Burton for the scholarship. On motion of Dr. Miller, seconded by Professor Mackenzie, the Council agreed that the application from Mr. Burton be not accepted. "On moton of Professor Lang, seconded by Professor Miller, it was agreed that Dr. Ellis should be one of the committee of award and that he should select his colleagues.

"In reply to an inquiry from Principal Galbraith it was decided that students from the School of Practical Science were eligible for the scholarship.

"On motion of Dr. Ellis, the Vice-President and Professor Baker were named as the additional members of the committee of award."

On 5th April, 1904, the Registrar notified Mr. Burton that the council had decided that he was ineligible.

On 6th April, 1904, Mr. Burton addressed the following letter to the Registrar:

#### "TORONTO, April 6, 1904.

#### "Mr. JAMES BREBNER, B.A.

#### Registrar, University of Toronto.

"DEAR MR. BREENER,—I beg leave to acknowledge the receipt of your letter of the 5th instant, together with my thesis submitted to you for competition for the 1851 Science Scholarship.

"You can easily understand that, after my interviews with President Loudon and yourself in December, 1902, such action came as a great surprise to me. I wish, therefore, to state my case to the members of the Council in the hope that they will reconsider their former action.

"It is as follows: In December, 1902, I asked the Registrar if I were eligible to try for the said scholarship. He could not tell me, so I laid my case before the President, who promised to look into it. After some days Mr. Brebner suggested to me that a test case might be submitted to the Scholarship Commissioners. On seeing the President, after he looked into the papers bearing on the matter, he told me that it was not necessary to submit the test case as I was manifestly eligible for the scholarship. From that time to this, no objection has been made to my candidature by any one until the action of the Council. I have shaped my course in accordance with the above assurance from President Loudon, and am, therefore, greatly disappointed at the decision of the Council.

"I beg leave to ask that the matter may be reopened at a subsequent meeting of the Council when this statement may be laid before them."

On 7th April, 1904, a special meeting of the Council was held. The minutes of this meeting shew the action taken, and are as follows:

"The Council was called together to consider a letter from Mr. E. F. Burton with regard to his eligibility as a candidate for the 1851 Scholarship. The President stated that he had informed Mr. Burton in 1902 that he would be eligible for the scholarship and stated the practice in McGill and Queen's Universities. It was suggested by Dr. Ellis that there might be two recommendations to the scholarship if Mr. Burton's thesis was considered worthy of the award. Professor Baker suggested that the matter be referred to the Commissioners by means of a cable message. It was moved by Dr. Reeve and seconded by the Vice-President and resolved that the Council reconsider the decision as to the eligibility of Mr. Burton for the scholarship. On motion of Chancellar Burwash, seconded by Professor Walker, it was resolved to submit Mr. Bur-

No. 32

ton's thesis to the examiners subject to the decision of the Commissioners as to the eligibility of the candidate in such circumstances. On motion of Chancellor Burwash, seconded by Professor Wrong, the President, the Vice-President, and Chancellor Burwash were appointed a committee to submit the case to the Commissioners with a request for the decision by cable. On motion by Dr. A. B. Macallum, the President, Principal Galbraith and the heads of all the science departments were appointed a committee to draw up regulations with respect to the award of the scholarship, hereafter.

"Dr. Ellis desired to resign as one of the committee of award, but the council declined to grant his request."

The Committee appointed by the Council at this meeting thereupon on the 9th April, 1904, prepared and forwarded the following letter, signed by the President, to the Secretary of His Majesty's Commissioners for the Exhibition of 1851:—

"DEAR SIR:

"I write to you to obtain a decision of the Board of Commissioners with regard to the following case:

"One of the competitors for the 1851 Exhibition Scholarship here, graduated (Bachelor of Arts) in June, 1901, with honors in Mathematics. having taken previously Mathematics and Physics in which he obtained honor standing throughout his course. Since then he has been tutorial fellow in Mathematics in the University and latterly assistant demonstrator in Physics at a small salary. I may say that in December, 1902, this gentleman announced his intention of becoming a candidate for the 1851 Exhibition Scholarship to be awarded this year (1904) at the University of Toronto. He was at that time informed by me that he would be eligible and accordingly proceeded to engage in research work. The question has now been raised as to whether under the regulations of the Commissioners such a candidate is eligible, and the University Council. before deciding between this candidate and others, desires to have the decision of your board upon the question of his eligibility.

"As the time is too short to receive a written communication from you. I shall be obliged if you will cable me at the expense of the University."

On the 25th April, 1904, a meeting of the Council was held. The minutes of this meeting are as follows: —

"The President laid on the table a copy of the letter to Major-General Ellis with reference to Mr. Burton's eligibility and stated that he had received a cable to the effect that Mr. Burton was eligible.

"On motion of the Vice-President, seconded by Professor Baker, the following report from the Committee of Award was received:

#### "To the University Council:

"Report of the committee appointed to make a recommendation in connection with the 1851 Scholarship.

"1. Eight theses were sumbitted to the committee for examination. "2. The subject matter of seven of these was chemical, of the eighth physical. "3. The committee had no difficulty in arriving at the opinion that of the chemical theses submitted that by Mr. McBain is the best.

"4. The committee has, however, been unable to agree on a recommendation as between Mr. McBain and Mr. Burton, the author of the physical essay, owing to the difficulty experienced in estimating the relative merits of researches on such different subject matters.

"5. The decision is therefore left to the Council.

"6. The committee is of the opinion that the Council might adopt some local regulations which would facilitate the award of this scholarship in the future.

"It was suggested by Dr. Ellis that the members of the staff under whom Mr. Burton and Mr. McBain had worked be asked to appear before the council.

"The Council agreed to the suggestion and adjourned to meet on Thursday, April 28th, at one p.m."

The cable message laid on the table by the President at this meeting is as follows:---

"President University, Toronto. Scholar eligible Exhibition 1851."

A meeting of the Council was held on 28th April, 1904, the minutes of which are as follows: —

"As Dr. McLennan was present the Council asked Dr. Miller and Dr. McLennan to speak on behalf of Mr. McBain and Mr. Burton respectively. After both these gentlemen had been heard, on a division the scholarship was awarded to Mr. Burton."

Your Commissioners do not feel it necessary to determine whether upon . the true construction of the regulations of the Royal Commissioners Mr. Burton was eligible or not, but think that at all events there is room for two opinions upon the question. The President in advising Mr. Burton beforehand that he was eligible for the scholarship acted not only upon his own view that the regulations should be so construed but also upon his knowledge of the fact that they had already been so construed in the case of a candidate from another University. Your Commissioners are unable to say that any fault can be found either with the President or Professor McLennan in connection with the award of this scholarship. The facts of the case were fairly laid before the Royal Commissioners in the letter which had been prepared by the committee appointed by the Council for the purpose, and the message cabled in reply was an absolute and unconditional decision that Mr. Burton was eligible for the scholarship upon the facts stated. On the strength of that decision, the Council were fully warranted in treating Mr. Burton as an eligible candidate.

A letter from the Secretary of the Royal Commissioners, dated 26th April, 1904, was received in due course and is as follows:—

"With reference to your letter to this office dated 9th instant and to the telegram I sent to you yesterday, I am directed to inform you that although it has been previously decided that a student who after graduation remains at his College as demonstrator remains eligible to a Science Research Scholarship it seems doubtful whether this construction of the rules should be applied after the lapse of twelve months from

12

the date of graduation. As, however, the candidate you refer to who graduated in 1901 was told that he remained eligible for the scholarship offered to the University in 1904, and proceeded to engage in research work accordingly, the Commissioners have decided to consider him eligible but they must not be taken to be laying down a general rule applicable to similar cases in the future."

This letter was not received until after the Council had acted upon the cable message above mentioned by recommending Mr. Burton, and their recommendation had been despatched to the Royal Commissioners.

The manner in which Professor McLennan advocated the merits of Mr. Burton as compared with those of Mr. McBain when he and Dr. Miller were requested by the Council at their meeting of 28th April, 1904, "to speak on behalf" of Mr. Burton and Mr. McBean respectively, has been made the subject of attack, and he has been accused of having dishonestly disparaged a portion of the thesis of Mr. McBain by a remark made in the course of the discussion.

The evidence satisfies your Commissioners that the matter referred to in the remark was of small importance and the incident does not call for further comment.

The suggestion that Mr. Burton was practically promised the award long before it was actually made was unsupported by any evidence, and it is in the opinion of your Commissioners entirely without foundation.

#### III.

Although the only specific charges pressed upon your Commissioners were those relating to the awards in the years 1900 and 1904, the inquirv was not confined to them. The general charges made against the President and Professor McLennan necessarily involved an investigation into the academic conduct and management of the University, and particularly of the Department of Physics, of which department the President is Senior Professor and Dr. McLennan is Associate Professor.

The general charges affecting the capacity, character and conduct of the President, your Commissioners find not to be supported by the evidence and to be unfounded. The evidence shews, however, that the Presidency is heavily weighted with a multiplicity of duties not necessarily attaching to the office and of such a nature as in the judgment of your Commissioners to interfere seriously with the general oversight and careful co-ordination which are necessary to efficient and harmonious working in any large institution.

Of the duties at present discharged by the President, as mentioned in the evidence, those which seem to belong more properly, though not all of them necessarily, to the office are the supervision of the teaching in all departments of the University; the conduct of examinations in all Faculties: the Chairmanship of the Educational Council; the Chairmanship of the University Council, of the Board of Arts Studies, of the Committee on Memorials and Petitions, of the Committee on Journals and Printing, of the Library Committee, and the Chairmanship or membership of many other committees of more or less importance: the conduct of a large correspondence: and the preparation of an Annual Report upon the progress and efficiency of the University.

Of the other duties with which, under the present arrangements and constitution the President is charged, but which seem naturally less closely connected with the Presidency, the most important are the following: As Head of the Department of Physics, the responsibility for that Department, with a certain amount of lecturing, devolves upon the President. As ViceChairman of the Board of Trustees, it becomes his duty to examine in detail all the accounts of the University before countersigning cheques for payment, about five thousand accounts having to be dealt with in this way in a year. The President also has the general superintendence of the grounds and buildings, including that of all workmen employed on the premises. It also falls within his duties as Vice-Chairman of the Board of Trustees to prepare the Annual Estimates of Receipts and Expenditures for submission to the Board. The President has also charge of the University Press, and oversees the publication of the annual volumes of University Studies.

To this wide range of duties, with their multiplicity of detail, which has characterized the Presidency, and not to any incompetency or inefficiency in the President himself, must be attributed whatever dissatisfaction or lack of harmonious co-operation may have existed in the University in regard to the matters of which complaint has been made. As likely to afford at least partial remedy for the evils complained of, your Commissioners venture to make the following recommendations:---

*First.*—That the President be relieved of some of the duties which in their nature are less closely connected with his office and in particular (a) that he be relieved of the position of Professor of Physics and of so much committee work: (b) that the financial and other details of work at present falling within his duties as Vice-Chairman of the Board of Trustees, be transferred to some officer to be appointed for that purpose; and

Second.—That in respect of duties essential to his office, the President's hands be strengthened by a clear definition of his responsibilities and powers and by the increase thereof where necessary, and in particular (a) that provision be made for a larger measure of personal supervision of the various departments, with a view to promoting co-ordination and central control; and (b) that the President be charged with more direct responsibility, and allowed to exercise more real power, in respect of appointments, suspensions and dismissals, co-operating therein with the Board of Trustees and so removing this vital department of University administration as far as possible from political control.

In respect of the general charges affecting Professor McLennan, your Commissioners find that they were not supported by the evidence, and the conclusion which they have reached is that Professor McLennan is an able member of the staff, indefatigable in the performance of his duties and in promoting the interests of the University, and that there does not appear to be any ground for the accusation that his activity in these respects was attributable to any undue desire on his part for professional advancement or personal aggrandizement.

Your Commissioners have the honour to submit with this report a copy of the testimony taken before them and the exhibits therein referred to.

#### ANNUAL REPORT

#### OF THE

# Inspector of Division Courts

#### FOR THE

# Province of Ontario

FOR THE YEAR ENDING 31ST DECEMBER, 1904.

To His Honour WILLIAM MORTIMER CLARKE, K.C., Lieutenant-Governor of Ontario. MAY IT PLEASE YOUR HONOUR :

I have the honour to submit the following report upon the Division Courts of the Province, for the year ending 31st December, 1904.

#### THE RETURNS.

The business of the courts, as shewn by the returns made by the several clerks and bailiffs, for the year, will be found under proper headings in Table "A" hereto annexed.

#### SUITS ENTERED AND THE AMOUNT OF CLAIMS.

The total number of suits entered during the year is 40,630, an increase of 666 over those of the preceding year.

These suits represent claims amounting to \$1,729,572.06, and shew an increase of \$265,436.48 over those of last year, and an increase of \$316,-200.91 over the amount of claims entered in 1902.

The largest volume of business in any one year, during the last twenty-five years, was reached in 1880, when 71,713 suits were entered, representing claims amounting to the large sum of \$2,377,333.03. The following year, however, shewed a falling-off of 33,138 in the number of suits and \$534,-298.82 in the amount of claims.

The years 1888 and 1889 shew the highest figures to which the claims have amounted, being \$2,447,196.68 and \$2,599,939.47 respectively.

The lowest point to which the business has fallen, during the same period, was in 1900, when 38,686 suits were entered, representing claims aggregating \$1,202,745.31. Since that year there has been a slow but gradual increase.

The increase of the last few years is not due to a revival of business in the courts in the rural parts of the older settled sections of the country, but

rather to the newer settlements, and the manufacturing and lumbering districts and cities.

Of the total number of claims entered in court for the year, 2,240 were for claims exceeding \$100 and not exceeding \$200, which before the increase in the jurisdiction would have gone to the County Courts. And 9,967 were for claims not exceeding \$10. Of the latter number, the Statutory Tariff of 1894 has effected a saving to suitors in costs of about \$10,000.

#### Collections.

The collections made during the year shew a corresponding increase, being \$23,502.65 in excess of the collections made in the previous year.

These collections are not, in any sense, a correct measure of the usefulness of the courts, as very many suits are settled between the parties out of court. Many of the settlements thus obtained are due to the easy facilities afforded by these courts, of which parties avail themselves freely, although figures to that effect cannot be obtained, as all suitors are at liberty to settle their differences at any time without giving notice to the clerk of the court.

#### SURETIES.

Each year shews an increase in the number of clerks and bailiffs who give the security of Guarantee Companies.

At 31st December, 1904, there were 149 clerks and 93 bailiffs so secured. This class of security is so much safer than that of private parties, and can now be had for such a small annual payment, that no hardship would result if all officers were required to give the security of a Guarantee Company. Such action would, I am satisfied, tend to strengthen public confidence in the courts and their officers.

#### Emoluments of Officers.

One sometimes meets very erroneous opinions regarding the fees received ed by the officers of these courts for their services each year. Indeed the public generally are so far astray in this matter that it will surprise many —and many doing business in these courts—to learn that there were in the year 1904, 101 clerks and 136 bailiffs whose fees and emoluments were under \$100

180 clerks and 133 bailiffs, whose emoluments exceeded \$100 but were under \$500, and 22 clerks and 10 bailiffs who received over \$500 but under \$1,000, and only 16 clerks and 5 bailiffs whose emoluments went over the \$1,000 mark.

These fees have fallen so low in many instances as to render it difficult to procure efficient officers for the positions.

#### COMPLAINTS.

During the year there were 95 complaints against clerks and 18 against bailiffs. It very frequently happens, however, that a complaint against the clerk should rather have been against the bailiff; so often is this the case that the above figures would be misleading without this explanation. These complaints were for various causes, such as refusing to give information sought by letter, and in this connection it is well to remind the writers that they, too often, fail to enclose the necessary postage for reply. They should remember that clerks cannot afford to pay the postage, and cannot in ordinary cases, such as are referred to above, collect disbursements of this nature as costs. Some complaints were for holding suitors' moneys and some for neglect of duty in many ways. It is pleasing, however, to have to say that the total of complaints against clerks and bailiffs falls far short of the number of complaints in the preceding year.

#### LEAVE OF ABSENCE.

During the year 35 clerks and 17 bailiffs had leave of absence granted them for short periods as by law permitted, accompanied in each case with the Inspector's approval of the party to be appointed a deputy.

#### REVENUE.

The percentages payable by clerks on their fees and emoluments for the year amounted to \$4,479.44, which is \$479.26 in excess of the revenue from the same source for the year 1903.

Much valuable information to interested parties will be found in the tables herewith respectfully submitted.

Table 'A' shews the business of the year under the several headings necessary to a proper understanding of the same, at the foot of this table will be found in the totals of similar returns for the three preceding years, which will be found useful as an easy means of comparison.

Tables B and C give lists of the Division Court officers, shewing the County or District in which they hold office, also the post office address of each. These lists are corrected up to date of printing.

Table D gives the several Division Court boundaries throughout the entire Province.

All of which is respectfully submitted.

I have the honour to be,

Your Honour's obedient servant,

#### J. DICKEY.

Inspector.

## List of Division Court Bailiffs, etc.-Concluded.

## TABLE D.

## DIVISION COURTS AND THE LIMITS OF THE RESPECTIVE DIVISIONS IN THE PROVINCE OF ONTARIO.

## NAMES OF COUNTY AND DISTRICT JUDICIAL OFFICERS.

## ALGOMA.

F. W. Johnston, Judge, Sault Ste. Marie.

Edward O'Connor, Jr., Judge, Sault Ste. Marie.

Norman Simpson, County Crown Atty. and Clk. P., Sault Ste. Marie.

1.—Bounded west by Thunder Bay District, 85th parallel of west longitude, and east by Barr River, including all the islands in front.

2.—Bounded west by Barr River, and east by the westerly boundary of the Townships of Thessalon River, Kirkwood, Bridgeland, and Houghton, and by said boundary line of the last three named townships produced northerly.

3.—Bounded west by the westerly boundary of the Townships of Thessalon River, Kirkwood, Bridgeland and Houghton, and the boundary line of the last named three townships, produced northerly, and on the east by the eastern boundary of the Township of Sprague, produced northerly.

4.—Bounded on the west by the boundary line between the Townships of Sprague and Lewis, produced north to the northern boundary of the District of Algoma, thence along the northern boundary of the said district, thence south along the eastern boundary to the waters of Lake Huron, thence westerly along the southern boundary of the District of Algoma, to a point opposite the boundary line between the Townships of Sprague and Long, thence northerly to said last-mentioned boundary line, thence easterly along the said southern boundary line of the Township of Sprague to the place of beginning, except the territory comprised in the limits of Division No. 5.

5.—The Townships of Rayside, Balfour, Snyder, Creighton, Fairbank, Dowling, Lanark, Morgan, Lumsden, Carscaden, Cartier, Ermatinger, Hart, Hess, Moncrief and Craig, and all those portions of Algoma lying adjacent to the main line of the Canadian Pacific Railway, south of said railway and west of the westerly boundary of the Township of Moncrief to the westerly boundary of the Provincial Judicial District of Algoma, and all that portion, of the said District lying north of the said C. P. R. and west of the said westerly boundary of the said Township of Moncrief. And that such portion of the said territory above described as has been and is a portion of the other Division Court divisions in said district shall be separated from such several divisions; and that the said divisions are altered accordingly.

6.—Consisting of St. Joseph's Island.

7.—To include the following territory—commencing at a point in the boundary line between the Townships of Lewis and Sheddon, produced south to the shore of Lake Huron, thence west, including the Village of Cutler and John's Island, to a point on the north shore of Lake Huron, between the Townships of Bright and Thompson, produced to the northern boundary of the said District of Algoma; thence east along the said northern boundary of the said District of Algoma to a point in the boundary line between the said Townships of Lewis and Sheddon, produced northerly, thence south along said boundary line, between the said Townships of Lewis and Sheddon, produced northerly to the place of beginning.

## BRANT.

A. D. Hardy, Judge, Brantford.

A. J. Wilkes, C.C.A. and C.P., Brantford.

1.—The City of Brantford and that part of the Township of Brantford not included in the other divisions hereinafter described. The Townships of Onondaga and Tuscarora and that part of the Township of Brantford lying south of the main road from Brantford to Hamilton and east of Fairchild's Creek.

2.—The Town of Paris and that part of South Dumfries west of the line between lots 18 and 19, and that part of the first concession of the Township of Brantford lying west of a constinuation of the last-mentioned line.

3.—The remainder of the Township of South Dumfries and of the first concession of the Township of Brantford.

4.—The ten northern concessions of the Township of Burford, and all that part of the 2nd, 3rd, 4th and 5th concessions of the Township of Brantford, west of the line between lots numbers 10 and 11, and that portion of the Kerr tract west of the continuation of the last-mentioned line.

5.—The Township of Oakland, the four southern concessions of the Township of Burford and lots numbers 1 to 5, inclusive, in the ranges east and west of the Mount Pleasant Road, in the Township of Brantford, adjoining the Township of Oakland.

#### BRUCE.

Wm. Barrett, Judge, Walkerton.

A. B. Klien, J.J., Walkerton.

Thomas Dixon, C.C.A. and C., Walkerton.

1.—The Town of Walkerton and the Township of Carrick and the Township of Brant, south of the 12th concession, in lots up to No. 26, and south of the 10th concession, in lots 26 to 34, inclusive.

2.—The Village of Teeswater, the Townships of Culrolss and Greenock south of the 12th concession.

3.—The Town of Kincardine, the Township of Kincardine, lying south and of the 10th concession.

4.—The Village of Paisley, and that part of the Township of Brant lying north of 11th concession and west of lot 26. That part of Greenock lying north of concession 11; lots 26 to 35, inclusive, in the 8th, 9th, 10th, 11th, 12th, 13th and 14th concessions of the Township of Bruce; and Saugeen, east of a line between lots 28 and 29, and south of the proportion of the town line between Aaron and Elderslie to the Saugeen River. All Elderslie lying west of the 25th side line and south to the 12th concession. And also, that part lying north of concession 11 and west of lot 17.

5.--All of the Township of Amabel lying north of the 10th concession. Port Elgin and Southampton, and all Saugeen not in No. 4, and Arran, west of the line between lots 10 and 11, north of Arran Lake and its outlet, and Amabel, south of concession 11, and west of concession C, and concessions 8, 9 and 10.

6.—The Village of Tiverton and all the Township of Bruce, except that part included in No. 4, and all Kincardine, north of the 9th concession.

7.—Tara and all Arran, not in No. 5, and all Elderslie, not in Nos. 4 and 12, and Amabel, south of the 8th concession and east of concession lettered C.

8.—The Town of Wiarton, the Township of Albemarle and that part of Amabel not in Nos. 5 and 7.

9.—The Township of Huron.

10.-The Townships of Eastnor, Lindsay, and St. Edmunds.

11.--Lucknow and the Township of Kinloss.

12.—Chesley and those parts of Brant and Elderslie not included in Nos. 1, 4 and 7.

## CARLETON.

D. B. McTavish, Judge, Ottawa.

Jno. J. O'Meara, J.J., Ottawa.

J. A. Ritchie, C.C.A., and C.P., Ottawa.

1.—Comprising all the City of Ottawa and the Township of Gloucester, to lot 15, inclusive, Rideau front and concessions 1 and 6, inclusive, Ottawa front and the islands in the Ottawa River opposite thereto.

2.—The Township of Goulbourne, the 8th, 9th and 10th concessions of the Township of Marlborough, all the Township of Nepean south of the River Goodwood, and the 4th, 5th and 6th concessions thereof north of the same river to the boundary line between lots 20 and 21 in the last mentioned concession.

3.—The Township of Huntley and the Township of March, except lots 1 to 5 inclusive, in concessions 1, 2, 3 and 4 thereof.

4.—The Townships of Fitzroy and Torbolton.

5.—The Township of North Gower, Long Island in the Rideau River, and 1st, Ind, 3rd, 4th, 5th, 6th and 7th concessions of Marlborough.

6.—The Township of Osgoode, the 6th, 7th and 8th concessions Ottawa front and from lots 16 to 30 inclusive, of the Rideau front of the Township of Gloucester.

7.—The Township of Nepean, except the City of Ottawa, and part of the said Township lying south of the River Goodwood and concessions 4, 5 and 6 north of the River Goodwood to the boundary line between lots 20 and 21 in the said last mentioned concessions, and, including also lots 1 to 5, inclusive, in concessions 1, 2, 3 and 4, in the Township of March.

## DUFFERIN.

M. McCarthy, Judge, Orangeville.

W. J. L. McKay, C.C.A., and C.P., Orangeville.

1.—The Town of Orangeville, the Township of East Garafraxa, and all that portion of the Township of Amaranth lying south of the southern boundary of lot number 26, in each concession in the Township of Amaranth.

2.—The Village of Shelburne, the Township of Melancthon, and all that portion of the Township of Amaranth lying north of the southern boundary of lot number 26, in each concession of the Township of Amaranth.

3.-The Township of Mulmur.

4.-The Township of Mono.

5.-The Township of East Luther.

## ELGIN.

C. W. Colter, Judge, St. Thomas.

C. O. Z. Ermatinger, J.J., St. Thomas.

N. McCrimmon, C.C.A. and C.P., St. Thomas.

1.-The Townships of Bayham, Malahide and South Dorchester.

2.—The Townships of Southwold and Yarmouth (except the City of St. Thomas).

3.—The City of St. Thomas.

4.-The Townships of Aldborough and Dunwich.

## ESSEX.

C. R. Horne, Judge, Sandwich.

M. A. McHugh, J.J., Sandwich.

A. H. Clarke, C.C.A. and C.P., Sandwich.

1.-Town of Sandwich and Township of Sandwich East.

2.-Town of Amherstburg and and Townships of Alden and Anderdon.

3.—The Village of Kingsville, and all that part of the Township of Gosfield not included in Division No. 8.

## REPORT

#### OF THE

## Inspector of Legal Offices, 1904.

#### To H18 Honour WILLIAM MORTIMER CLARK, K.C.,

Lieutenant-Governor of the Province of Ontario.

SIR,—I have the honor of presenting the twenty-second Annual Report of the Inspector of Legal Offices upon the affairs of the County Judicial Offices of the Province for the year ending December, 31st, 1904.

Of 316 offices the following were inspected during the year:—the offices of 45 Sheriffs, 37 Local Masters, 36 Local Registrars, six Deputy Registrars, six Deputy Clerks of the Crown, 44 County Court and District Court Clerks, 44 Surrogate Registrars, 44 County and District Crown Attorneys and 43 Clerks of the Peace. Nine offices were closed at the time of my visit.

I also visited several of the Justices of the Peace and conducted a number of investigations.

The following officers were appointed during the year:

#### SHERIFFS.

WILLIAM R. MACK, of the Town of Cornwall, in the County of Stormont, to be Sheriff in and for the United Counties of Stormont, Dundas and Glengarry, in the room and stead of Archibald McNab, Esquire, deceased. *Ga*zette, 24th September.

#### SURROGATE JUDGES.

His Honour TALBOT MACBETH, of the City of London, in the County of Middlesex, Judge of the County Court of the County of Middlesex, to be Judge of the Surrogate Court of the said County of Middlesex, in the room and stead of William Elliott, Esquire, retired. *Gazette*, 26th March.

His Monour DENNIS JOSEPH DONAHUE, of the Town of Pembroke, in the County of Renfrew, Judge of the County Court of the County of Renfrew, to be Judge of the Surrogate Court of the said County of Renfrew, in the room and stead of John Deacon, Esquire, retired. *Gazette*, 2nd April.

His Honour CHARLES WESLEY COLTER, of the City of Saint Thomas, in the County of Elgin, Judge of the County Court of the County of Elgin, to be Judge of the Surrogate Court of the said County of Elgin, in the room and stead of David John Hughes, Esquire, retired. Gazette, 9th April. His Honour GEORGE BENJAMIN DOUGLAS, of the Town of Cayuga, in the County of Haldimand, Judge of the County Court of the said County of Haldimand, to be Judge of the Surrogate Court of the said County of Haldimand, in the room and stead of His Honour Charles Wesley Colter, transferred to the County Court of the County of Elgin. *Gazette*, 4th June.

His Honour ALBERT CONSTANTINEAU, of the Town L'Orignal, in the United Counties of Prescott and Russell, Judge of the County Court of the United Counties of Prescott and Russell, to be Judge of the Surrogate Court of the said United Counties of Prescott and Russell, in the room and stead of Peter O'Brian, Esquire, retired. Gazette, 16th July.

#### LOCAL MASTERS.

His Honour ROBERT BALDWIN CARMAN, of the City of Saint Catharines, in the County of Lincoln, Judge of the County Court of the County of Lincoln, to be Local Master of the Supreme Court of Judicature for Ontario, in and for the said County of Lincoln, in the room and stead of Frederick William Macdonald, Esquire, deceased. *Gazette*, 5th March.

His Honour DENNIS JOSEPH DONAHUE, of the Town of Pembroke, in the County of Renfrew, Judge of the County Court of the said County of Renfrew, to be Local Master of the Supreme Court of Judicature for Ontario, in and for the said County of Renfrew, in the room and stead of John Deacon, Esquire, retired. *Gazette*, 30th April.

His Honour ALBERT CONSTANTINEAU, of the Town of L'Orignal, in the United Counties of Prescott and Russell, Judge of the County Court of the United Counties of Prescott and Russell, to be Local Master of the Supreme Court of Judicature for Ontario, in and for the said United Counties of Prescott and Russell, in the room and stead of Peter O'Brian, Esquire, resigned. *Gazette*, 16th July.

His Honour GEORGE BENJAMIN DOUGLAS, of the Town of Cayuga, Judge of the County Court of the County of Haldimand, to be Local Master of the Supreme Court of Judicature for Ontario, in the room and stead of Charles Wesley Colter, Esquire, resigned. *Gazette*, 24th September.

#### CROWN ATTORNEYS AND CLERKS OF THE PEACE.

JOHN RICHARDSON, of the Village of Scarboro', in the County of York, Esquire, to be Clerk of the County Court of the said County of York. in the room and stead of The Honourable Alexander McLagan Ross, deceased. Gazette, 17th December.

#### POLICE MAGISTRATES.

ERNEST CRUIKSHANK, of the City of Niagara Falls, in the County of Welland, Esquire, to be Police Magistrate for the said City of Niagara Falls, and also for the Village of Fort Erie, in the said County of Welland. Gazette, 9th January.

GEORGE HUDSON, of the Village of Arthur, in the County of Wellington, Esquire, to be Police Magistrate in and for the said Village of Arthur, without salary. *Gazette*, 11th March.

JUNIUS BRADLEY, of the Town of Aylmer, in the County of Elgin, Esquire, J.P., to be Police Magistrate in and for the said Town of Aylmer, and the Townships of Malahide, Bayham and South Dorchester, in the said County of Elgin, without salary. *Gazette*, 19th March.

WILLIAM BARCLAY CRAIG, of the Town of Renfrew, in the County of Renfrew, Esquire, B.A., Barrister-at-Law, to be Police Magistrate in and for the said Town, without salary. *Gazette*, 19th March.

DONALD JAMES CALDWELL MUNRO, of the Town of Thorold, in the County of Welland, Esquire, to be Police Magistrate in and for the said Town of Thorold. without salary, in the room and stead of William T. Fish, Esquire, deceased. *Gazette*, 2nd April.

ALBERT DUNCAN, of the Town of Petrolea, in the County of Lambton, Esquire, to be Police Magistrate in and for the said Town of Petrolea, without salary, in the room and stead of William H. Hammond, Esquire, deceased. *Gazette*, 2nd April.

DONALD ROBERTSON, of the Town of Rainy River, in the District of Rainy River, Esquire to be Police Magistrate for the said Town of Rainy River. *Gazette*. 9th April.

BASIL ROCH POULIN, of the Town of L'Orignal, in the County of Prescott, Esquire, to be Police Magistrate, in and for the said Town of L'Orignal, without salary. *Gazette*, 14th May.

THOMAS EZRA ALTON, of the Village of Port Rowan, in the County of Norfolk, Esquire, to be Police Magistrate, in and for the said Village of Port Rowan, without salary. *Gazette*, 28th May.

FREDERICK WILLIAM JEFFERY, of the Town of Midland, in the County of Simcoe, Esquire, to be Police Magistrate, in and for the said Town of Midland, without salary, in the room and stead of Duncan Stewart Storey, Esquire, resigned. Gazette, 4th June.

JOHN DUKE, of the Village of Hartfell, in the District of Parry Sound, Esquire, to be Police Magistrate for the territory in the said District of Parry Sound, embraced within the Townships of Perry, Bethune, Proudfoot, Armour, Patterson, McConkey, Croft, Chapman, Strong, Joly, Ryerson, Spence, Lount, Ferrie, Mills. Pringle, Laurier, Machar, Himsworth, Nipissing, Hardy, Wilson, Gurd and McMurrich. Gazetic, 4th June.

JOHN HENDERSON, of the Village of Bracondale, in the County of York, Esquire, to be Police Magistrate, in and for that part of the Municipality of the Township of York lying south of the side line known as Willson Avenue, which runs west from York Mills on Yonge Street, to a point on the Humber River, north of the village of Weston, without salary. *Gazette*, 18th June.

JEDIAH HAMILTON BURGAR, of the Town of Welland, in the County of Welland, Esquire, to be Police Magistrate in and for the said Town of Welland, without salary, in the room and stead of Egerton Ryerson Hellems, Esquire, deceased. *Gazette*, 25th June. JASI ALEXANDER MORTON, of the Town of Wingham, in the County of Huron, Esquire, Barrister-at-Law, to be Police Magistrate in and for the said Town of Wingham, without salary. *Gazette*, 20th August.

HENRY HERBERT SHAVER, of the Village of Cooksville, in the County of Peel, Esquire, to be Police Magistrate in and for the Township of Toronto, in the said County of Peel, without salary. Gazette, 17th September.

EDMOND HERMAN HOCKBERG, of the Village of Jewellville, in the County of Renfrew, Esquire, to be a Police Magistrate in and for the Township of Raglan, in the said County of Renfrew, without salary. *Gazette*, 10th December.

#### STIPENDIARY MAGISTRATES.

JOHN LOUGHRIN, of the Town of North Bay, in the Provisional Judicial District of Nipissing, Esquire, to be Stipendiary Magistrate in and for the said Provisional Judicial District of Nipissing. *Gazette*, 21st May,.

WILLIAM A. QUIBELL, of the Town of Sault Sainte Marie, in the District of Algoma, Esquire, to be Stipendiary Magistrate in and for the Provisional Judicial District of Algoma. *Gazette*, 5th November,

#### Associate Coroners.

SIDNEY NIXON DAVIS, of the Town of Parry Sound, in the District of Parry Sound, Esquire, M. D., to be an Associate Coroner in and for the said District of Parry Sound, in the room and stead of David Macfarlen, Esquire, resigned. *Gazette*, 9th January.

BYRON FIELD, of the Town of New Liskeard, in the District of Nipissing, Esquire, M.D., to be an Associate Coroner within and for the said District of Nipissing. *Gazette*, 16th January.

FABIAN BLANCHARD, of the Town of Lindsay, in the County of Victoria, Esquire, M.D., to be an Associate Coroner within and for the said County of Victoria. *Gazette*, 23rd January.

JAMES ALEXANDER SMITH, of the Village of Shelburne, in the County of Fufferin, Esquire. M.D., an Associate Coroner. within and for the said County of Dufferin, in the room and stead of Thomas Norton, Esquire, M.D. deceased. *Gazette* 20th February.

JAMES KING, of the Town of Learnington, in the County of Essex, Esquire, M.D., to be an Associate Coroner within and for the said County of Essex, in the room and stead of Eli Thomas Eede, Esquire, M.D., removed. *Gazette*, 27th February.

HERBERT BENJAMIN HUTTON, of the Township of Humberstone, in the County of Welland (Humberstone Post Office), Esquire, M.D., to be an Associate Coroner within and for the said County of Welland, in the room and stead of Fergus Black, Esquire. Gazette, 5th March.

WILSON MONTGOMERY, of the Township of South Monaghan, in the County of Durham (Bailieborough Post Office), Esquire, M.D., to be an Associate Coroner, within and for the United Counties of Northumberland and Durham. Gazette, 5th March.

HENRY CHARLES WALES, of the Town of Bracebridge. in the District of Muskoka, Esquire, to be an Associate Coroner. within and for the said District of Muskoka, in the room and stead of Samuel Bridgland, Esquire, deceased. *Gazette*, 5th March.

WILLIAM ALBERT GRAY, of the Town of Smith's Falls, in the County of Lanark, Esquire, M.D., to be an Associate Coroner within and for the said County of Lanark, in the room and stead of William I. Anderson, Esquire, deceased. Gazette, 11th March.

ALEXANDER THOMAS STEELE, of the Village of Shelburne, in the County of Dufferin, Esquire, M.D., to be an Associate Coroner within and for the said County of Dufferin. Gazette, 9th April.

WILLIAM ROBERT WATSON, of the Village of Burlington, in the County of Halton, Esquire, M. D., to be an Associate Coroner, within and for the said Gazette, 16th April. County of Halton.

WATSON PARISH CHAMBERLAIN, of the City of Toronto, in the County of York,, Esquire, M.D., to be an Associate Coroner, within and for the said City of Toronto. Gazette 23rd April.

NORBERT JOSEPH AMYOT, of the Township of Rochester, (Belle River Post Office,) in the County of Essex, Esquire, M.D., to be an Associate Coroner, within and for the said County of Essex, in the room and stead of Joseph Octave Reaume, Esquire, resigned. Gazette, 23rd April.

JOHN HENRY BULL, of the Village of Holland Centre, in the County of Grey, Esquire, M. D., to be an Associate Coroner within and for the said County of Grey. Gazette, 23rd April.

CHARLES FRANKLIN MCPHERSON, of the Town of Prescott, in the County of Grenville, Esquire, M. D., to be an Associate Coroner within and for the United Counties of Leeds and Grenville. Gazette, 23rd April.

CHARLES MCKINLAY, of the Town of Georgetown, in the County of Halton, Esquire, L.D.S., to be an Associate Coroner within and for the said County of Halton. Gazette, 11th June.

FRANK A. WHITE, of the Village of Wabigoon, in the District of Rainy River, Esquire, M.D., to be an Associate Coroner, within and for the said District of Rainy River. Gazette, 2nd July.

GEORGE WILLIAM FLETCHER, of the Village of Wilkesport, in the County of Lambton, Esquire, M.B., to be an Associate Coroner in and for the said County of Lambton. Gazette, 27th August.

CHARLES HAWKINS GILMOUR, Esquire, M.D., of the Township of York. (Wychwood Post Office), in the County of York, to be an Associate Coroner, in and for the said County of York. Gazette 17th September.

ARCHIBALD DAVIE NAISMITH, of the Village of Milverton, in the County of Perth, Esquire, M.D., to be an Associate Coroner in and for the said County of Perth. Gazette, 5th November.

JEROME F. HONSBERGER, of the Town of Berlin, in the County of Waterloo, Esquire, M.D., to be an Associate Coroner within and for the said County of Waterloo. Gazette, 12th November.

SAMUEL RESCOTT RICHARDSON, of the Village of Eglington, in the County of York, Esquire, M. D., to be an Associate Coroner within and for the said County of York. Gazette, 10th December.

ETHELBERT ELJAH LATTA, of the Village of Colborne, in the County of Northumberland, one of the United Counties of Northumberland and Durham, Esquire, M.D., to be an Associate Coroner within and for the United Counties of Northumberland and Durham. Gazette, 24th December.

No. 34

#### SHERIFFS' OFFICES.

The duties of the Sheriffs were generally well performed and their books carefully and neatly kept. Six however, disregarded my instructions with reference to the "Fee Book," apparently not appreciating the necessity for daily entries of their earnings and receipts. With two exceptions all had procured the book referred to in my last Annual Report as the "Suitors' Cash" book. A proper inspection is impossible unless the Fee and Cash books are kept entered to date.

A few failed to number entries of writs in the Execution book, or made no reference therein to corresponding entries in the Fee and Suitors' Cash books. All were prompt in paying over to the persons entitled thereto the moneys realized on writs of execution.

Some want of uniformity still exists with reference to the Jurors Book. It would be well for all to make this an original book of entry for the names as drafted for the Jury Panels, and in addition to their own signatures to have the Justices and the Clerk of the Peace sign them.

Fifteen were still without a book in which to keep a record of the fines, forfeitures, etc., received by them, their reason being that fines were seldom received. Returns must be made of these fines each quarter whether or not fines have been received during the quarter for which the return is made. Such returns are made to the Honourable The Provincial Treasurer and to the Inspector of Legal Offices. R. S. O., Cap. 17, sec. 47.

A number of Sheriffs do not insist upon collecting at the time writs of execution are placed in their hands, their fees for receiving, warrant, and return. These fees, though small, may amount to a considerable sum in the aggregate, and are often never collected. In view of the Statute 2 Ed. VII. Cap. 12, referred to below. I deem it important that the Sheriffs should insist upon their rights in this matter.

The remuneration of the Sheriffs is inadequate considering the importance of the office, the responsibilities they are required to assume and the amount of security they are obliged to furnish for the performance of their duties. The incomes of eight sheriffs, not paid wholly or in part by salary, were each less than \$1,000. These are entitled under 2 Ed. VII. Cap. 12, sec. 5, to receive from the Province sums sufficient to make their incomes \$1,000.00.

Appendix "A" gives in tabulated form the Statistical returns of the S¹eriffs for the year 1904.

#### LOCAL MASTERS.

There has been no improvement in the volume of business in the Masters' offices during the year. The incomes of those who have not commuted continue to decline. Two of the Masters whose fees are commuted, failed to affix stamps, the amount due the Province as represented by these stamps was \$159.90. All stamps should be collected, from day to day as the fees are earned, and affixed to the Draft report, or to a stamp voucher, and cancelled with the date opposite. This is an important matter, for Sec. 8 of the stamp Act (R. S. O. cap. 25) provides that, every paper or proceeding upon which a fee is payable to the Crown if not duly stamped shall be void.

There have been so many requests for a copy of the Annuity Table prepared by a former Inspector for the use of the Local Masters, that I have decided to republish it. From this table, which was prepared from Carlisle's table of Mortality, the value of a widow's dower, in gross, can be ascertained without unneccessary expense to the estate. It appears as appendix "H" to this report.

In appendix "B" I have set out in tabulated form the statistical returns of the Local Masters for the year 1904.

#### LOCAL REGISTRARS, DEPUTY REGISTRARS, DEPUTY CLERKS OF THE CROWN, COUNTY AND DISTRICT COURT CLERKS.

In five offices the Process, Procedure, and Judgment books were in arrears, and in six, entries therein were not numbered. They should be numbered consecutively each year. Actions should not be entered in the Procedure book until some step has been taken other than the issue of the writ, such as, apparance, order for substitutional service, or for a *Lis Pendens*, Judgment signed on default, or the like.

Five failed to make daily entries in their "Fee and Cash" books; in one office this important book was a month, in another a month and a half, while in a third it was three months in arrears. One officer omitted from this book the amounts secured by chattel mortgages, the amount of costs taxed, amounts paid into Court, etc.

In six offices books were not kept in which to copy orders made in the High Court of Justice and in County Courts, and in some the entries were not numbered. Five officers made no minutes of those orders which are not required by the rules to be entered in full—H. & L. notes to Rules 636.

Full and complete minutes of the business of the Assize and County Courts were not kept by some officers in their Assize and County or District Court Dockets. In a few offices these books were not written up; pencil notes taken in Court, on loose sheets of paper, being the only record. I would suggest that the dockets be taken into Court and the entries made as the trials proceed. It is better to sacrifice neatness for accuracy in such matters. All of these books did not shew the payment over to the County Treasurer of the Jury Fees, and in seven offices the fees had not been promptly paid over at the end of each Court.

Most of the officers have now the books which I prepared for a record of the moneys paid in and out of Court in County, District and Surrogate Court Cases. These books are required to be kept under Consolidated Rule 1222, which rule also provides that these officers shall in the month of January in each year prepare a statement of all moneys so paid in, or withdrawn, to the 31st of the preceding December, and shall transmit copies of such statement, verified by statutory declaration, to the Honourable The Provincial Secretary and to the Judge or Judges of said Courts.

In a few offices Bills of sale and Chattel Mortgages were not promptly entered as received, and in three they were not indexed under the name of Bargainee and Mortgagee. Six failed to enter in their Chattel Mortgage books, or to properly endorse upon the discharged Mortgages, the certificate required by sec. 26 of the Bills of Sale and Chattel Mortgage Act (R. S. O. Cap. 148). The name of the Officer, and not merely his initials, must be affixed to such certificate. The necessity for this certificate renders it important that the officer, before filing a discharge of Chattel Mortgage, should satisfy himself that the document tendered for registration is in fact a discharge of the Mortgage, which it purports to discharge; for the public as a rule, rely upon the correctness of the Officer's Certificate in such matters. A few had not as yet procured books in which to copy, as required by R. S. O. Cap. 151, sec. 7. the Certificates of Limited Partnership filed with them. In two offices I found declarations of Co-partnership. These under R. S. O. cap. 152, section one, should be left with the Registrar of Deeds and not with the County Court Clerk. In three offices, no Certificate of Limited partnership had, as the officers informed me, ever been filed. These they thought were being left with the Registrar of Deeds. In both cases, I requested the officers to mention these matters to the profession, in order that these documents may be lodged with the proper officer.

Some did not affix stamps for searches, made on behalf of Mercantile Agencies, of papers in High Court actions. Stamps representing the fees for such searches should be affixed to a præcipe, and filed with the suit papers in each case.

The various regulations passed by the Judges of the High Court of Justice I have caused to be revised to date and printed, copies of which I have supplied to these officers. These regulations are set out in Appendix "I."

Little improvement, if any, has been made by the Counties in the matter of vault accommodation for these officers. In some instances the accommodation afforded is not adequate to the growing needs of the offices.

Appendix "C" is a return of the business of the High Court of Justice in the offices of the Local Registrars, Deputy Registrars, and Deputy Clerks of the Crown, while appendix "D" is a return of the business done in the offices of the Clerks of the County and District Courts, for the year 1904.

#### SURROGATE REGISTRARS.

Again I have to report overcharges made by a few of these officers :---They were: 80 cents instead of 70 cents for search for will and certificate thereof, 70 cents for this search and certificate and \$1.00 for a bond in Probate cases. These are unnecessary in Probate cases. Five dollars instead of three dollars as the fee on grant where the personal property was under \$10,000. Too many letters, attendances or filings were charged for in four offices. I also found charged more than the actual number of folios in wills, and more than the actual amounts expended for postage, 50 cents instead of 10 cents for filing consent of the Solicitor to the Treasury, \$1.50 instead of \$1.00 for receiving and entering applications. In five offices the fees 70 cents for search for will and certificate, and \$1.40 for the notice, affidavit and filings, required by the Succession Duties regulations, were charged in estates the value of the realty and personalty of which was under \$400, I also found half fees charged in such estates. As stated in my report for last year these charges are unwarranted, the only sums allowed in addition to the \$2.00 fee provided by Sec. 76 of the Surrogate Courts Act being the amount actually expended for postage, and the 30 cents authorized by 1 Ed. VII. cap. 12, sec. 8, subsec. d, as a fee for the certificate of the Surrogate Clerk. In eight offices the fee on grant for the Registrar and for the Crown was charged in Guardianship cases. The Judge only is allowed a fee on grant in such cases, viz. : \$2.00.

Two did not collect in Guardianship Cases the fees for the Crown of 50 cents on the application, 50 cents for Surrogate Clerk's certificate, and 50 cents for Order approving bond.

A fee for the Judge, for a special attendance, was charged in cases in which triffing alterations were required in the papers filed, such as, dates omitted, jurats not filled in, place of residence not stated, or the like. In such cases, it is the duty of the Registrar to see that all the usual necessary papers leading to grant are in his hands and in order, before submitting them with the application for the approval of the Judge. A special attendance should only be charged where some "special care" and "a special adjudication" is required.—*Re* Dallas, 29 Q. B. 482.

The instructions given in my circular letter of October sixth, 1903, and embodied in my last annual Report were not complied with in one County, at least in so far as the Judge's fees were concerned, the Judge insisting that fees should be charged on the value of the realty in cases where the lands were by the will directed to be sold, or where a discretionary power merely was given to the executors to sell them. The following extract from said letter ought to have been sufficiently explicit on this point : "Prior to the passing of the Devolution of Estates Act in 1886, the Jurisdiction of the Surrogate Courts was, as that of the Probate Division of the High Court of Justice in England now is, confined to the Probate of Wills relating to personal property solely; and the equitable doctrine of conversion could not confer upon these courts jurisdiction over a will limited to realty and directing its conversion into personalty (Re Jane Barden, 1, P. & D. 325). And thus the fees payable on the letters were limited to the value of the personal estate alone. The passing of the Devolution of Estates Act did not, however, effect a change in the matter of the fees; for, while it abolished the distinction between real and personal property for the purpose of administration, and to devolve the realty as well as the personalty upon the legal personal representatives, it expressly enacted by sub-section six, of section four, that the fees were to be based "as hitherto" on what before that act was personal property." Fees must not be computed on the value of the land whether directed to be sold or not. In this connection, however, it is well to note that, the Inspector of Legal Offices has no control over the Judges in the matter of the Surrogate Judges' fees; he must content himself with directing attention to such errors.

Full fees were charged in some cases in Guardianship matters, where the value of the whole estate was \$400 or under. Since the Statute 3 Edward VII. Cap. 7, sec. 32, \$2.00 is the most that can be charged in such cases.

As a rule the Surrogate books were carefully kept, and the entries therein promptly made. In a few offices the copying was considerably in arrears; in two offices the affidavits of execution of bonds were not copied.

I found caveats not entered in the Caveat Book, process in the Process book, while one officer failed to copy into his register the wills along with the probates thereof. In another the Non-contentious Business book and the Guardian Book were some days in arrears. In four offices no record, save the papers filed, was kept of passing of accounts. An entry of the passing of all accounts should be made in the Collateral proceedings column of the Non-contentious Business book.

In every case but one I found the Surrogate papers neatly and carefully filed away; in one instance necessary papers were missing, and in one office the bonds in use did not contain an affidavit of execution. In some cases the notice of application required by the rules to be sent to Surrogate Clerk was unnecessarily delayed.

In several offices stamps were found missing from papers, although the Probate or Letters of administration had issued. The amount due the Province as represented by such stamps, and which under the authority of R. S. O. Cap. 25, sec. 14, I caused to be affixed and cancelled, was \$269.20. In a few offices stamps, though affixed, were not cancelled.

In appendix "E" I have set out in Tabulated form the business of the Surrogate Registrars for the year 1904.

#### COUNTY AND DISTRICT CROWN ATTORNEYS AND CLERKS OF THE PEACE.

No entries were made by two of these officers in their Sessions book from the time of my former visit. Two failed to enter in this book the names selected at the Sessions for the Jury Lists. Complete minutes were not always made in this, and the County Juages Criminal Court docket, of the business of the Courts; the names of the Grand Jury, of the witnesses, and of constables appointed, were omitted.

In five offices the Returns of Convictions made by Justices of the Peace were not copied. They should be copied into the Sessions book, or a special book for the purpose. This is all the more important now since the passing of 4 Ed. VII. Cap. 10, sec. 24, which dispensed with the publication of these returns in the newspapers. Especially is it necessary that Clerks of the Peace see that the various Justices of the Peace within their jurisdiction make complete returns of the cases tried by them. These returns should be insisted on from all acting Justices, whether or not any convictions were made during the quarter for which the return is required.

In three offices no minute book was kept in which to record the various resolutions passed by the County Selectors of Jurors, at their September meeting: It is the duty of the Clerk of the Peace to attend this meeting and keep accurate minutes thereof.

Six Clerks of the Peace neglected to file with the Local Registrar a copy of the Jurors Book, as required by sec. 33 of the Jurors Act, and in two instances the copies filed were not true copies of the original. A copy of this book should be filed immediately the Rolls have been entered, the lists may be written in at a later date. This is a very serious oversight for in the event c1 the loss or destruction of the original Jurors' book, this copy would be required.

Many of the Crown Attorneys had not procured books in which to keep a record of the fines, etc., received by them, the collection of which they are required to superintend by Order-in-Council of October 9th, 1885. Some were not prompt in their remittances of these fines to the Honourable The Provincial Treasurer, or failed to make prompt returns thereof to The Honcurable the Provincial Treasurer and to this office. These returns should be made whether fines are received or not.

In one or two instances only was there a lack of care in the filing of documents.

Those Clerks of the Peace who are distributors of Law Stamps do not all keep on hand a sufficient supply, nor stamps of the larger denominations, with the result that the public and the profession are inconvenienced.

#### GENERAL REMARKS.

The correspondence of this office has greatly increased during the past few years. While always anxious to help the officers where difficulties present themselves, nevertheless, much unnecessary correspondence would be avoided if the officers would make their returns promptly and in proper form.

In connection with their Annual Statistical Returns, and the returns of their fees and emoluments for the past year, I have found it necessary to write to all of the officers, and to some of them four or five times. Some have been in the habit of including in these returns as disbursements, such items as office rent, furniture, stationery and caretaking. As these must be furnished by the Counties they were disallowed—Sec. 506 of the Consolidated Municipal Act, 1903. (3 Ed. VII. Cap. 19). Newsome v. Oxford, 28 Ontario Reports.

In comparing the earnings, receipts and disbursements of the different Sheriffs, of the Crown Attorneys, and of the Clerks of the Peace, I found a want of uniformity in their methods of making up their annual returns, for example, some Sheriffs would include items of expenditure, such as travelling expenses incurred in transferring prisoners to the penitentiary, while others would omit them. Though "connected with" the business of the offlice they are not, strictly speaking office disbursements; but as they are paid by the officer, in the first instance, they must be included by him in his quarterly accounts, and are repaid to him after the Audit. Where shewn in the return as disbursements, they must also be included in the receipts; otherwise the net income would be affected. As the Statutes are not clear, and as it is desirable that uniformity should prevail in such matters, it has been thought best, for the present at least, to have such items of expenditure so included by all of the officers in their Annual Returns. It will, moreover, tend to a fairer comparison of the earnings, receipts and disbursements, of the different Sheriffs, Crown Attorneys and Clerks of the Peace from a perusal of Appendix "G" to this report.

In addition to the Regulations passed by the Judges of the Supreme Court of Judicature for Ontario above referred to, I have supplied the officers with printed copies of all the amendments that have been made to the Consolidated Rules of Practice to this date.

The payments to the Province under R. S. O. Cap. 18, amounted to \$7,839.25, as follows:-

Appendix "F" is a statement of the fees and emoluments of the several officers for the year 1904, and the sources from which they derive their incomes:

Appendix "G" is a table, prepared at the request of the Judges of the High Court of Judicature for Ontario, shewing the number of actions tried or otherwise disposed of by the Judges of the High Court and the Court of Appeal, and the disposition thereof, during the year 1904.

I have the honour to be, Sir,

Your obedient servant,

#### JAS. W. MALLON,

Inspector.

Osgoode Hall, Toronto, March 31st, 1905.

APPENDIX H.—Being an annuity table shewing, etc.—Continued.

To ascertain the dower of a widow in lands, multiply the value of the prorerty by the legal rate of interest, which is at present five per cent, this will give the income of the property for one year; the widow is entitled to one-third of this income; multiply this one-third by the value of the annuity in the five per cent. column opposite the widow's age. The amount thus ascertained will be the widow's dower in gross.

Example: Widow is forty years of age; property out of which dower is to be paid is worth \$3,000; five per cent. on this will give an annual income of \$150; widow is entitled to one third of this, or \$50, which, multiplied by the value opposite her age in the five per cent. column, namely, 13.390, produces \$669.50, the amount of her dower in gross.

### APPENDIX "I."

REGULATIONS MADE BY THE JUDGES OF THE HIGH COURT OF JUSTICE.

September 18, 1899.

# Orders Relating to Moneys in Court.

1. As a general rule all orders affecting money in Court, ought to be entitled in the cause or matter to the credit of which the said money is standing in Court, where there is any such cause or matter; and in cases where money has been, by mistake, paid into Court to the credit of some non-existing cause or matter, the order correcting the mistake should be entitled in the cause or matter to the credit of which the money was intended to be paid into Court, and should recite the mistake.

2. All orders affecting the moneys in Court of infants or other persons under disability, ought to be made on the application of such persons, by their guardians, next friends, or committees, as the case may be; or, if made on the application of any other person, it should appear by the order that the person under disability whose money is sought to be affected, had due notice of, and, if so, was properly represented on the application.

3. Officers are to be careful to see that all orders and judgments settled or issued by them, are drawn up in conformity with the foregoing Regulations.

Passing Records and Entering Causes for Trial or Hearing.

October 28, 1899.

4. From and after the first day of January next (1900), all officers passing records are hereby directed, and required, to see that they contain, in addition to a certified copy of the pleadings, a note or memorandum stating the state of the action as against every defendant or defendants who has, or have, put in no defence, or as against whom the action has been discontinued. No extra charge is to be made for such note or memorandum.

5. All officers and clerks when entering causes for trial, or for hearing on motion for judgment, are required to see that the same are in a proper state for trial, or hearing, and are not otherwise to enter the same: and for that purpose may require either the production of the Record, or a certificate of the state of the action, when the necessary information cannot be obtained from their own books of office.

The following Regulations were passed at a meeting of the Judges of the High Court held on the 17th December, 1904, and are to take effect from and after 31st December, 1904:—

# Transmission of Documents to Central Office.

6. When the Judge at a trial reserves judgment in any case, elsewhere than at Toronto, the Clerk of the Court shall forthwith forward the Record and Exhibits to the Central Office. 7. All Local Officers of the Court when sending papers or Exhibits to the Central Office shall endorse on the wrapper enclosing such papers or Exhibits, the short style of cause, the title of the Officer sending them, and the purpose for which they are sent,—e.g. "Jones v. Smith From Local Registrar at Brantford, for Appeal to Divisional Court" or "For Mr. Justice Magee"—or as may be:

#### Setting Down Causes.

8. When a case is required to be set down for a Divisional Court, Weekly Court, or Chambers, the officer shall require the party desiring the case to be set down to indorse on the notice of motion the name of the office in which the action or proceeding was commenced, and the officer shall not set down any case without such indorsement unless otherwise ordered by the Court or a Judge.

# ANNUAL REPORT

#### OF THE

# Inspector of Registry Offices

#### FOR THE

# PROVINCE OF ONTARIO

# 1904

#### GUELPH, 28th February, 1905.

#### To the Honourable J. P. WHITNEY, K. C.,

η

Attorney-General of the Province of Ontario.

SIR: I now beg leave to submit to you my report as Inspector of Registry Offices for the year 1904.

I have had during the past year as large a number of questions and disputes as to fees and other matters calling for my opinion and decision as ever, and that, notwithstanding the very considerable number of matters which have been before me in the past, and which have been decided and reported in previous reports.

Attached to this report will be found notes of some of the further opinions and decisions which I have been called upon to give since my last report.

The tabulated statement of returns appended hereto gives particulars of much of the work of the different Registry Offices during the past year, as compared with the work of 1903. The result may be summarized as follows:

Number of instruments registered in 1904	151,047
	145,641
Increase in number of instruments	5,406
Gross amount of fees earned by Registrars in 1894, \$	239,352 86
	219,628 41
Increase	19,724 45
The net fees were as follows.	
For 1904	19,652 26
For 1904	12,666 57
Increase	6,985 69

It is found in some counties and districts to be difficult to get the County and District Judges to certify the Registry Books as provided in section 31 of the Registry Act. I respectfully suggest that section 31 of the Act be amended, so as to permit the Registrar, for the time being, to certify the books.

I desire to emphasize for the benefit of the Registrars some of the directions I have had occasion to give them personally, as follows:

I. The marginal notes in the registers should be signed by the Registrar or Deputy as soon as the instrument has been copied into the register.

2. All instruments should be promptly entered, not only in the Abstract Index, but in the Alphabetical Index, that is to say entered not later than the day after registration.

3. Registrars should be careful to note in the Abstract Index all special clauses in deeds, also where an instrument or the like expressly covers machinery, or gives grants or reserves rights-of-way or is made subject to charges or conditions.

4. Where a plan or sketch is attached to a deed and forms part of it, the same should be copied into the registers, as it is really part of the instrument. Registrar's have requested that they be furnished with an extra copy of such plans, especially those they find it difficult to make copies of. As such plans are usually in connection with railway deeds, and the officers of the company who prepare them can, without much trouble or expense, furnish copies, it is found that where Registrars make the request, they usually succeed in procuring the extra copies to put in the register.

Where the description of land in an instrument is ambiguous or is evidently erroneous, it is well that Registrars should, if the opportunity presents itself, call the attention of the parties to the matter, so as to avoid, if possible, registering the instrument against the wrong land and thereby putting a cloud upon the title of a person whose land is not, in fact, intended to be affected by the instrument. Of course, if the description of land in an instrument is definite and sufficient, and is free from ambiguity, it is the Registrar's duty to register the instrument on receipt. even although he may consider there is a mistake in the description; but where the instrument is presented for registration by some one in person and a mistake in the description is observed by the Registrar, it is well that he should call the attention of the party to it and thus lead a correction of the error, before the instrument is registered.

I have much pelasure in bearing testimony to the generally efficient manner in which the work in the various Registry Offices of the Province is carried on.

With your concurrence I have prepared and I now append hereto a summary of the indexes of the decisions and opinions reported in my ten reports from 1895 to 1904 inclusive.

I have the honour to be,

#### Sir,

Your obedient servant,

#### DON. GUTHRIE,

Inspector of Registry Offices.

# NOTES OF DECISIONS, BY DONALD GUTHRIE, K.C., INSPECTOR OF REGISTRY OFFICES.

#### INSTRUMENT ENDORSED "NOT TO BE REGISTERED IN FULL." —QUESTION AS TO WHETHER IT IS A MORTGAGE OR NOT— CAPABLE OF BEING SO ENDORSED.

Some differences have arisen between the Registrar of the County of W., and Mr. A. B., Solicitor, and also between the same gentleman and the Registrar of M., touching the question whether or not an instrument dated 13th September, 1904, from X. to the Y., and endorsed "Not to be registered in full," is in reality a mortgage which could be so endorsed for registration in short form, or whether it is more than a mortgage. The Registrars both think as it contains trusts and other provisions of a special description, it is not a mere mortgage, but is rather a trust deed. The Solicitor contends that it is a mortgage, and may be properly endorsed "Not to be registered in full."

A copy of this instrument has been submitted to me and after perusing it I am of opinion that it is such an instrument as could properly be endorsed to be registered in short form. It is very long and contains a good many covenants, special trusts, etc. Yet it is in fact and in form the usual mortgage given by a company to trustees for securing the payment of a series of mortgage bonds. The special provisions and trusts are all incidental to such a security.

My decision, therefore, is in favor of the contention of the Solicitor.

#### DISCHARGE OF MORTGAGE EXECUTED BY SURVIVOR OF CO-MORTGAGEES—PERSONAL REPRESENTATIVES OF DECEAS-ED TO JOIN—SPECIAL AFFIDAVIT.

A question has arisen between the Registrar of the County of X, and Mr. A. B., Solicitor, which has been referred to me. The circumstances are these:

The Solicitor tendered for registration a Statutory Discharge of Mortgage. The mortgage is dated 16th January, 1884. It is made by M. L. to K. and R. The solicitor states that R. died in September, 1884, and that she left a will, but that the will has not been proved. Recently the mortgagor has completed paying off the mortgage and has obtained the discharge in question. This discharge purports to be made by Mrs. B. C., formerly K., the survivor of the mortgage as having been made by M. L. to the said K., now Mrs. B. C., and R., now deceased. By the discharge Mrs. B. C. certifies that she is the person entitled by law to receive the money. It is dated 26th December, 1903.

The affidavit of execution states that the discharge was executed by B. C., one of the parties thereto.

The Registrar objects to register this discharge, executed only by the surviving mortgagee. He thinks the legal personal representative of deceased should join.

The solicitor, in answer, relies upon chapter 121, R. S. O., sections 12, 13 and 14. I do not think section 12 affects the question here, as to who is competent to give a discharge of such a mortgage. It provides that the certificate shall be valid at whatever time given. That is to say whether it be given before or after the time limited by the mortgage for payment or performance. That section expressly says that the certificate must be in conformity with the Registry Act.

Section 13, as I have already pointed out to the solicitor, does not apply because this mortgage was made before 1st July, 1886; but section 13 may be referred to in another way. It shows that but for that section the survivor could not give a complete discharge.

Section 14 applies to the case of a bona fide payment, to a trustee or a mortgagee for any limited purpose.

The law was, and I think is, in respect of mortgages made before 1st July, 1886, that if one of two joint creditors, mortgagees, dies, his representatives are entitled in equity to his share of the debt; so that the personal representatives of R. ought in my opinion to join in this discharge. See Fisher on Mortgages, 3rd edition, section 1286; or any other work on mortgages.

I think it would be well if a new discharge is prepared for the witness in the affidavit of execution to identify Mrs. B. C. as having been formerly K.

#### INSTRUMENTS REGISTERED; SUBSEQUENTLY PRODUCED TO ALLOW SOLICITOR REGISTERING TO GET NUMBERS OF REGISTRATION—DOES NOT AMOUNT TO A SEARCH—FEE OF 10c. PER INSTRUMENT ALLOWED.

A matter has been submitted to me by the Registrar of the County of X., in respect of a difference as to fees between himself and Messrs. M. & Co., Solicitors.

The circumstances under which the dispute has arisen are as follows:

The solicitors presented at the Registry Office for registration a considerable number of oil and gas leases, covering lands in different municipalities in the county. These instruments were not in duplicate and copies were not furnished. The solicitor who was present in the office at the time of registration desired to make a schedule of the names, lands and registered numbers of each instrument as it was entered.

The solicitor admits that he prepared the schedule while he was in the **Registry** Office, and he states that he could have completed it outside of the office prior to registration, except as to the registration numbers of the instruments. He says the leases were presented by him for registration in

consecutive order, township by township, and he says that having obtained from the Registrar the number of the last preceding instrument for any particular township, the numbers would then follow in rotation for that township and in like manner for the other townships.

His view is that if the Registrar is entitled to any fee for a search it would be limited to the first instrument in each township as the numbers would then follow in consecutive order.

I judge that the solicitor in fact obtained the information, especially as to the numbers of the instruments, from the original instruments themselves, after the Registrar marked the same as registered.

The Registrar's view is that he is entitled to a fee of 10c. at least for each registered instrument, on the ground that what took place really amounted to a production of the original after registration, and possibly he thinks he may be entitled to the usual fee for search.

Both parties only desire to know what I think is right in the matter. The registrar does not desire to obtain more than he has a proper right to have. The solicitor desiring for his own protection that the matter be referred to me. He seems to consider the charge an unusual one so far as his experience has gone.

I do not think this is a case for allowing any fee for a search. I think, however. I should allow the Registrar 10c. an instrument, as he in fact produced each original instrument after registration to the solicitor to enable him to get the particulars he required, especially the registration numbers.

I decide this dispute accordingly.

#### LAND INCLUDED IN DIFFERENT PLANS IDENTICAL—AB-STRACTS INCOMPLETE—FEES FOR—ARRANGEMENT BE-TWEEN PARTIES SUGGESTED.

Messrs. W. & Co., Solicitors, and the Registrar of the County of X, have had a difference regarding fees for an abstract, which has been referred to me.

The solicitors sent to the Registrar for registration a deed of the east half of lot 2 and the west 6 feet of lot 1 in block Y in the Village of M, in the County of X; also a mortgage back on same property from the grantee in the deed to the grantors therein, and they requested the Registrar to furnish them with an abstract of the lands covered by these instruments from and including number 7150. This was a mortgage registered in 1883.

In reply to this the Registrar furnished three abstracts as follows:

1. Purporting to be of the east half of lot 2, and part of lot 1 in block Y, according to a plan by A. B., P. L. S. This goes on to state that block Y is laid out on lot 23, 1st concession of the Township of M., and was formerly known as part of lot 23 in the 1st concession of that township. This abstract further states it is of registrations subsequent to and including instrument 7150. It then goes on in the usual form of abstracts to state that "the following are correct extracts from the only instruments recorded" in the Registry Office which mention or refer to the above described property. Particulars are then given of instrument 7150 and nothing else. For this abstract fees are charged 95c. The solicitors complain that this abstract is incorrect and useless because there are several subsequent registrations which are omitted. I agree with them. I think the Registrar is not entitled to charge for this abstract in its present shape.

2. The second abstract purports to be of the east half of lot 2 in block Y., according to a plan of said village made by C. D., and filed on the 4th November, 1885, which block Y formerly formed part of plot 23 in the first concession of M. A. B.'s plan was filed before the registration of instrument 7150; C. D.'s plan subsequent thereto. Lots 2 and 1, block Y, are admitted to be the same on both plans. This abstract also plainly show that, because it contains particulars of two instruments numbers 768 B and 769 B, the first of which is an assignment and the second a discharge of the mortgage number 7150. Why should the mortgage be entered on one abstract and the assignment and discharge of it on another? The only other instruments referred to on this abstract are numbers 960 C and 961 C, being the deed and mortgage recently sent for registration by the solicitors at the time they asked for the abstract now in question. This abstract number 2 of the east half of 2 should have been commenced by including instrument number 7150. The Registrar says number 7150 was with other instruments entered on the township lot. That is the way the abstract index was then kept. The fact may entitle the Registrar to some increased fees for references, but it is not a ground for making a separate abstract or for leaving number 7150 off the abstract, now under consideration, called the second abstract. The assignment and discharge of the mortgage are put in this second abstract apparently because since the C. D. plan separate and perhaps better abstracts of lots 2 and 1 have been kept in the abstract index for M. The Registrar, is, I think, mistaken in supposing that the fact that he had in preparing the abstract of village lot 2 to search the abstract of township lot 23 as well as of village lot 2, is a ground for furnishing two abstracts instead of one.

Here the Registrar was required to make an abstract of parts of two village lots described by numbers on a registered map or plan, but even if they were considered as parts of township lot 23, I am of opinion from the abstracts that they were part of that lot which were "clearly described" and could "be identified in connection with the chain of title." See section 27, sub-section 1 of the Registry Act. There is no use, however, discussing this question at greater length, for the mode in which the Registrar recorded and abstracted both the assignment and the discharge of mortgage 7150 shows conclusively that there was no difficulty in identifying the particular lots or parts of lots for which an abstract was required.

3. A third abstract was furnished purporting to be for a part of village lot 1 in block Y, according to C. D.'s plan, etc. Precisely the same four instruments appear to be on lot 1 as are given on the second abstract and no others. In other words the instruments on village lot 2, east half and on the part of lot 1 are identical. I think this third abstract was unnecessary, and that one abstract containing the five entries beginning with 7150 might and should have been furnished.

I refer to section 118, subsection 5, of the Registry Act, as to the duty of the Registrar in preparing an abstract of title of two or more lots where the entries are identical. These abstracts show the entries were so in this case. It is true that on the township lot 23, there were other instruments to be examined in connection with the preparation of the abstract also on village lot I. On examination it was found that they did not affect the lands for which the abstract was required.

Even where the entries are only partly identical special provision is now made for including in one of the abstracts entries that affect both lots. See 62 Victoria, chapter 16, section 18; see also my opinion reported in my report for 1900, page 14.

If the solicitors insist on it they are entitled in my opinion to return the three abstracts which are really all incomplete and insufficient, and to require one abstract to be furnished. It should commence with 7150 and give particulars of the other four instruments.

However, reading the three abstracts together, they may substantially answer the purposes of the solicitors, if the latter are willing to treat them as one abstract. Perhaps the solicitors and the Registrar may arrange the matter in that way.

#### TRANSFERRING BOOKS, ETC., FROM ONE REGISTRY OFFICE TO ANOTHER—NOTHING IN ACT RENDERING COUNTY COUNCIL LIABLE FOR EXPENSES—REGISTRAR TO BEAR EXPENSES —EXPENSE OF TRANSFERRING BOOKS AND PAPERS FROM ONE REGISTRY OFFICE TO ANOTHER.

The question has arisen as to whether the county council of the County of X. is responsible for the sum of \$14.77, the expenses incurred by the Registrar of the North Riding of the County of X. in transferring the books and instruments relating to the Town of M. from the registry office for X. at the Town of W. to the registry office for U. X. at the Town of L. The Registrar of U. X. thinks the county council of X. should pay these expenses, and the county council are willing to pay them if it is their duty to do so. No question arises as to the amount of the account, which seems to be reasonable.

The Town of M. was transferred for registration purposes from the South Riding of the County of H. to the North Riding of that county by statute.

I do not think the provisions of section 9 of the Registry Act apply to expenses of the description of those in question here.

Section 32 of that Act makes provision for the transfer of certain registry books and documents, but does not say whether the Registrar, whose duty it is to hand over the books and documents, shall personally or otherwise convey them to the new office or whether the Registrar of the latter office shall go for them: and it makes no provision for the payment of expenses for transfer.

Subsection 9 of section 118 of the Registry Act makes provision for the payment of the expense of furnishing copies required under section 32, to be paid for at the rate of 10c. per folio.

I have been unable to find any clause in the Act which renders the county liable for the expenses referred to. I think it is a case where, in the absence of provision for paying the Registrar of U. X. for his trouble, he will have to submit to pay the expense himself. The hardship of this apepars to be less when we remember that the emoluments of the Registrar of the North Riding have been increased by the transfer for registration purposes of the Town of M., to his division.

#### STATUTORY DISCHARGE—EXACT FORM OF WORDS NOT NECES-SARY—"LIKE EFFECT"—SHOULD BE REGISTERED.

A difficulty has been referred to me which has arisen between Mr. A. B., Solicitor, and the Registrar of X.

The point is shortly this: Mr. A. B. tendered for registration a statutory discharge of mortgage executed by C. D. The discharge recited a mortgage by one W. M. to two men named Y. and Z, and it set forth particulars of the mortgage as required by the statute: It then went on to say that the mortgage had been assigned to her, C. D., by Y. and Z., by indenture of assignment, and it then gives the date of assignment and full particulars of the registration of it. It then goes on to say that she is the person entitled by law to receive the money, etc.

The Registrar declined to register this discharge, because the words "That such mortgage has not been further assigned" are not in it. He asks how he is to know that the mortgage was not further assigned by C. D., and reassigned back to her.

I think the requirements of section 76 of the Registry Act have been complied with in this case, that is, the discharge is in all respects in accordance with that section, unless the form given per schedule L to the Act makes any difference. It is to be observed that the form schedule L is not required to be literally followed; it may be to the like effect. Schedule L says that the discharge is to mention the day and date of each assignment of mortgage, and the names of the parties, or mention that such mortgage has not been assigned, as the fact may be. Now the date and registration of the assignment and other particulars are here given. I do not see anything either in section 76 of the Act or the form to require a statement that the mortgage has not been further assigned, especially where the person, as here, signing, certifies that he is the person entitled by law to receive the money, and where there is no pretense that from the registry books or otherwise there appears to have been any further assignment. This discharge also complies with the requirements of section 78 of the Registry Act.

I think the Registrar should register this discharge.

#### COURSE TO BE TAKEN WHERE AN INSTRUMENT NOT ENTERED IN ABSTRACT INDEX—HOW ENTRY TO BE MADE WHEN OMISSION DISCOVERED.

A difficulty which has arisen under somewhat unusual circumstances has been referred to me. It has arisen in this way:

In 1901 some land in North X., within the limits of the registry division of A. was sold, and the solicitors for the purchasers searched the registry office and got abstracts of title. These disclosed one mortgage only: this was to the C. L. A., who were the actual vendors. The transaction, however, was carried out by taking a deed from the mortgagor, one S. J., and a release of the mortgage. These were duly registered, and the title apparently thus freed from incumbrances.

Subsequently there was entered upon the abstract index a mortgage covering the lands in question with other lands. This mortgage had been made by one J. and registered some years before 1901, but had, through inadvertence, been omitted from the abstract index. It was a second mortgage. The first mortgage was for much more than the value of the land, and the second mortgage was therefore worthless so far as it was a charge upon these lands. After the sale by or for the benefit of the first mortgagees had been completed in good faith, the second mortgagees discovered the omission referred to and at their instance the late Registrar, who was the successor in office of the gentleman who was Registrar at the time of the registration of the second mortgage. I presume this was done in pursuance of the provisions of section 94 of the Registry Act, and in the manner required by that section.

The solicitors for the purchaser now require this entry to be cancelled or something to be done to remove what they consider is a cloud upon their client's title.

Although the date of the entry made in red ink shows it was made subsequent to the deed to the purchaser, and to the abstract of title, yet persons dealing with the property might be afraid or unwilling to accept the title without proof that the purchase was in fact a purchase for value without notice of the second mortgage. In other words I think the entry is a cloud upon the title.

But what power have I to interfere? Looking at sub-section 2 of section 94. I think it became the duty of the Registrar or his Deputy as promptly as possible after he became aware of the omission to cause to be made the entry, which I understand he did make, but where, as here, other instruments have been registered, I think such an entry should not be interlined so as to appear prior to them, but should take its place after them.

Of course the best and cheapest way to remove this cloud from the title would be for the second mortgagees, if they are satisfied to do so, to give a partial discharge of this land from their mortgage. I should judge from the correspondence before me, that they are not unwilling to do so, if they have not to pay the costs of this discharge. These costs cannot be much, and I venture to suggest that the former Registrar, in whose time the omission occurred, should, under all the circumstances, pay the small amount of costs this would involve, and thus settle the whole difficulty.

#### THE REPORT OF THE

#### FEES—DOUBLE REGISTRATION—PROPER MANNER OF COM-PUTING FEES.

Mr. A. B., Solicitor, objects to the fees charged by the Registrar of X, for the registration of the will of one C. D. The will had to be registered in two townships. The Registrar contends he is entitled to double fees. For registration in one municipality the proper fees would be \$1.70, there being 820 words. The Registrar claims double this, viz.: \$3.40. The solicitor's view is that the proper fee is \$2.75, made up thus:

700 words700 words more at 15c. per 100For 240 words more add at 10c.	$1 \ 05$	
	\$2 75	

I think the solicitor's view is right. It is true, as the Registrar points out, that section 118, sub-section 1, of the Registry Act provides that where the instrument embraces different parcels of land situate in different municipalities in the same county the registration and copying of the instrument, together with all necessary entries and certificates in connection therewith shall be considered separate and distinct registrations for each municipality in which the land is situate.

But it goes on to make express provision for the fees in such a case, saying after the word "situate" "and shall be paid for as follows: Where the aggregate copying does not exceed seven hundred words, \$1.40, etc." The word "aggregate" shows that the copying into the books of the two municipalities has to be added together, and that the fees depend on the aggregate amount of copying to be arrived at by adding together the copying in both books. That is the mode adopted by the solicitor in arriving at \$2.75 as the proper fee here

These fees include all certificates and necessary entries, and I think the extra certificate of registration on original probate is included.

I decide this dispute accordingly in favor of the solicitor.

#### REGISTRATION OF STATUTORY DISCHARGE BY EXECUTOR UNDER WILL NOT YET ADMITTED TO PROBATE—DIS-CHARGE MAY BE REGISTERED—COURSE TO BE FOLLOWED UNDER SEC. 70 OF ACT.

A difference has been referred to me which has arisen between Messrs. R. & Co., Solicitors, K., and the Registrar of that city. It arises thus: The solicitors desire to register a statutory discharge of mortgage, purported to be executed by the executors of the deccased mortgagee. The original will has been registered in the registry office. It has not been admitted to probate. The Registrar considers that executors have no power to discharge the mortgage until the will has been admitted to probate.

By section 76 of the Registry Act it is provided that the Registrar on receiving a certificate executed by the mortgagee or by such other person as may be entitled by law to receive the money and discharge the mortgage, shall, if the document of title of such other person executing the discharge, has been registered, register the discharge.

The executor derives his title from the will, not from the probate. (See Robinson v. Coyne, 14 Grant, at page 567, and other cases). Section 70 of the Registry Act expressly permits registration of an unprobated will, provided there be an affidavit sworn to by one of the witnesses to the will, proving the due execution thereof, by the testator. For registration purposes the execution of the will is thus proved. I think the contention of the solicitors is right, and that the discharge should be registered. The Registrar refers me to an opinion of mine, reported in my report for 1901, page 18, but that case was different. In that case the will had been admitted to probate, and the only question was whether the probate should be first registered in the registry office.

The Registrar may enter in the abstract index in the column for remarks, a note to the effect that the will has not been admitted to probate. I say this because my opinion on such a question has not the effect of a decision.

# NOTES OF OPINIONS, BY DONALD GUTHRIE, K.C., INSPECTOR OF REGISTRY OFFICES.

#### TWO MORTGAGES MAY NOT BE DISCHARGED BY ONE DIS-CHARGE—MAY BE BY AN INSTRUMENT UNDER SEAL.

#### To a Registrar.

DEAR SIR: -I am in receipt of your letter with discharge of mortgage  $\blacktriangle$ , to B. I return same.

In my report for 1897, page 16, you will find an opinion reported to the effect that I considered, that under section 76 of the Registry Act, only one registered mortgage can be discharged by the one certificate of discharge.

I have had occasion several times since to reconsider the matter, and I adhered and I now adhere to that opinion, but I notice that in this case the discharge seems to be under seal and is in duplicate. If it is presented to you as an ordinary instrument under seal, it is probably proper for you to register it, but the charge would then be different, and the effect of it may be different.

No doubt by one instrument under seal a man can discharge as many mortgages as he sees fit; but that would not be an instrument under section 75 of the Registry Act.

It is possible, the solicitor having furnished the duplicate, and under seal treats it as an instrument under seal and not as a statutory discharge under section 76, and he may be prepared to pay the regular fee for registering such instrument.

#### DEED PURPORTING TO BE MADE IN 1848 DESIRED TO BE REG-ISTERED—NO MEMORIAL FURNISHED—COURSE TO BE FOLLOWED.

#### To a Registrar.

DEAR SIR: -- I return the deed, A. B. to C. D., received with your favor of 24th inst. I am of opinion as follows:

1. This deed, which purports to have been made in 1848, and with which there is no memorial offered to you for registration, can not, owing to the absense of a memorial, be registered under section 73 of the Registry Act.

2. It can not be registered by the production of the original instrument and deposit of a copy with an affidavit verifying the copy as proposed by the solicitor; because such mode of registration under section 75 of the Registry Act, is only for a case where an instrument was registered by memorial prior to the 1st of January, 1866, etc. That section provides for re-registration of such instrument in full, if desired.

3. I suggest that this instrument may probably be registered under section 50, upon obtaining a Judge's order, on the ground that the witnesses are either dead or unknown; and the deed being produced from the proper custody and being more than 30 years old, in fact proves itself. If registered under a Judge's order you will have to retain the original instrument in your office, and you will have to copy it in full in your books along with the Judge's order.

#### ENDORSEMENT ON MORTGAGE MARKED "NOT TO BE REGIS-TERED IN FULL"—MUST BE AUTHENTICATED BY SIGNA-TURE OF MORTGAGEE OR HIS SOLICITOR OR AGENT—NAME OF SOLICITOR AT FOOT OF DOCUMENT. INSUFFICIENT— SOLICITOR TO BE NOTIFIED.

#### To a Registrar.

DEAR SIR: —I am in receipt of your favor of 9th inst. As I understand it the point submitted for my opinion arises under the following circumstances. A mortgage is sent to you for registration endorsed "Not to be registered in full," but this endorsement is not authenticated either by the signature of the mortgagee or the mortgagee's agent or solicitor.

At the foot, however, of the back of the mortgage, the words "E. C., Solicitor, T.," are printed or written.

I understand that you registered the mortgage in full, without further communication with the solicitor, and the solicitor now says you should not have done so, and contends that his name at the bottom of the endorsement is sufficient.

I have in many cases held that such an endorsement is not sufficient. There is nothing on the mortgage to show that he is the solicitor for the mortgagee. I come across many cases in practice and in the course of inspection where a solicitor's name is placed on the mortgage where Mr. E. C.'s is, yet the endorsement "Not to be registered in full" is signed by another solicitor. What the endorsement here indicates is merely that the mortgage was prepared by Mr. E. C. For all that appears he may be solicitor for the mortgagor. I have further found in experience that sometimes the solicitor for the mortgagor not only prepares the mortgage but attempts to register it in short form.

I must further call your atention to what I have frequently recommended as a proper course to be taken by Registrars, where they find a mortgage endorsed "Not to be registered in full," but such endorsement is either not properly authenticated or is placed upon an instrument that is not a mortgage.

What I have recommended in brief is that the better course before registering such an instrument in full is to communicate with the party tendering it for registration, and give him an opportunity to explain his views or to add to the endorsement.

On turning to my report for 1901, page 11, you will see that I there gave an opinion that a Registrar is only entitled to register a document when he is requested to do so, and in the form in which he is requested to do it. So that if you considered the instrument was not properly endorsed, you should have communicated with the solicitor, who clearly wanted registration in short form. In other words, registration in full was not asked for and was not authorized. A proper opportunity should have been given to the solicitor to consider your objection, and to remedy the omission of the signature of the mortgagee or his solicitor or agent if he saw fit.

#### 'REGISTRATION OF WILL NOT ADMITTED TO PROBATE-ONE OF THE WITNESSES MAY, AT THE TESTATOR'S DIRECTION AND IN HIS PRESENCE, EXECUTE THE WILL FOR HIM-STATUTE COMPLIED WITH-WILL TO BE REGISTERED.

To a Registrar.

DEAR SIR:-I am in receipt of your letter of 1st inst.

The case you put is this: The testator's name was signed to the will by one of the witnesses, because the testator was too weak to sign for himself, but the testator's name was so signed by his direction. There are two witnesses to the will, and the will is submitted for registration. The will has not been admitted to probate.

The question you ask is whether or not you are at liberty to register the will in absence of a direct statement that there were two witnesses to the execution of the will, other than the one that signed the testator's name.

In my opinion it is your duty to register the will, assuming that there is a proper copy, and that the proper affidavits are furnished to you without requiring proof that there were three persons in addition to the testator present in connection with the signing and attestation of the will.

My opinion is that all the statute, chapter 128, section 11, requires is, that the will should be signed either by the testator or some other person in his presence and by his direction, and that such signature shall be made or acknowledged by the testator in the presence of two or more witnesses, etc. Here, as I understand it, the signature was made by the direction of the testator, and it was acknowledged by him in the presence of two witnesses. I think it is not necessary that there should be three persons present in addition to the testator, namely, one person to write the testator's name and two others to be witnesses. In other words, I think one of the witnesses may be the person who writes the testator's signature by his direction.

#### REGISTRATION OF WILL NOT ADMITTED TO PROBATE—INCOM-PLETE AFFIDAVIT—HOW TO REGISTER SAME AGAINST PARTICULARLY DESCRIBED LANDS WHEN PROPER STEPS TAKEN.

To a Registrar.

DEAR SIR: -Re will of A. B.

I am in receipt of your favor with copy of will of A. B., and other papers which I now return. This will appears not to have been admitted to probate. The solicitor who sent you the will for registration has sent you a copy of the will with the original and an affidavit by one of the witnesses. He also sends you a statutory declaration by the widow of the deceased, setting forth that the will affects the south half of 10 in the 13th concession of M. The will appears to be signed by the mark of the testator, and is of a very informal character indeed. The names of the executors are written under his signature or mark, and then the witness' names under those of the executors.

I give my opinion as follows:

1. The alleged affidavit of execution of the will of one of the witnesses is insufficient. The deponent merely says he is one of the witnesses to the will; that the paper writing annexed to his affidavit is a true copy of the will, and that A. B. died 25th August last. There is not a word in this affidavit to show that  $\Lambda$ . B. in fact executed the will, or in this witness' presence. Where a will has not been admitted to probate, and it is desired to register the original will, the affidavit to be sworn to by one of the witnesses to the will, amongst other things must prove the due execution of the will by the testator. See section 70, Registry Act. According to the Wills Act in order to the due execution of the will the affidavit to be made by one of the witnesses to the will should amongst other things show the following : That it was signed at the foot or end thereof by the testator or by some other person in his presence and by his direction. That such signature was made or acknowledged by the testator in the presence of two or more present at the same time, of whom the deponent is one, and that such witnesses attested and subscribed the will in the presence of the testator. See section 12 of the Wills Act of Ontario. I consider the affidavit tendered to you is insufficient for the purpose of securing registration of the will.

2 R.O.

2. Under the Act of 1899, 62 Vic. (2), chap. 16, wills still go into the general register where they do not contain a local description of lands, and I think this will, if and when its execution is properly proved and registration of it is desired, should go into the general register in the first place. Then if it is desired by the parties to register it upon the lands above referred to, being lands not described in the will, it may be registered in the separate registry book for M., under sub-section C of section 2 of the Act of 1900 to amend the Registry Act, being chapter 19, 63 Vic. In that case the statutory declaration should follow schedule R of that Act.

# PLANS ON WHICH ROADS LESS THAN SIXTY-SIX FEET WIDE ARE LAID OUT NOT TO BE ACCEPTED UNLESS CONSENT OF MUNICIPAL COUNCIL REGISTERED THEREWITH.

To a Registrar.

DEAR SIR:-I am in receipt of your letter touching what is called "Queen Lane" on the plan of part of M., to which you refer.

The Act bearing on the question is the Registry Act, section 102, subsection 1, which provides that the Registrar shall not accept any plan on which a road less than sixty-six feet wide is laid out, unless the consent of the proper municipal ccuncil is registered therewith, where such assent is by law necessary.

Then the Municipal Act, section 630, sub-section 2, provides that no highway or street of a less width than sixty-six feet shall be laid out by any owner of land without the consent of the council of the municipality, by a three-fourths vote of the members thereof.

The Land Titles Act, section 110, makes similar provision to section 102 of the Registry Act.

According to the copy of the plan you have sent me and your letter, what is called "Queen Lane" on the plan is in reality a continuation of "Queen Street." I do not think naming or calling it a "lane" affects the question. It is plainly intended to be a road or highway.

I need scarcely point out that if the name by which a street, road or highway is called is to determine the point you have submitted, parties registering plans could always avoid the provisions of the Act, and make narrow streets, roads or highways, without the consent of the municipal council by simply calling them "lanes" or "avenues" or "places" or the like.

I therefore think the consent of the municipal council of M. must be registered before you can register this plan pursuant to section 102 of the Registry Act.

I express no opinion at present in regard to narrow ways sometimes laid out in rear of lots and generally called lanes.

#### INSPECTOR OF REGISTRY OFFICES.

# REGISTRY ACT DOES NOT PROVIDE FOR DEPOSIT OF NOTARIAL COPY OF STATUTORY DECLARATION.

#### To a Deputy Registrar.

DEAR SIR: —In answer to you letter I think the Registry Act does not provide for the deposit of a notarial copy of a statutory declaration. I refer to the custody of Title Deeds Act.

# REGISTRATION OF JUDGE'S ORDER AFFECTING HIGHWAY ONLY-NOT TO BE ENTERED IN GENERAL REGISTER-MODE OF REGISTRATION.

To a Registrar.

DEAR SIR: -- Registration of Judge's order regarding a bridge.

There is some doubt whether the order of Judge L. is an instrument capable of registration. It does not appear to affect the lands except perhaps a highway. Some Registrars keep at the end of the alphabetical index for townships a page headed "Miscellaneous," and probably the better way will be for you to enter the order in the book for West X., and open a page for "Miscellaneous" at the end of the abstract index for that township, and note this order there.

I agree with you that the order cannot go into the general register.

# ONLY NAMES OF LEGATEES OF MONEY CHARGED UPON LAND NEED BE INDEXED—IN UNCERTAIN CASES BETTER INDEX.

#### To a Deputy Registrar.

DEAR SIR: —In answer to your letter of 10th inst. I have to say that it is not necessary that the names of legatees of mere personal effects or chattels, such as you describe, should be indexed. The names of legatees of money should only be entered in the index where the legacies are charges upon lands. It is sometimes, however, difficult to tell when a legacy is,

1904

and when it is not charged on land; and as a matter of precaution, therefore, it may be well for you to continue to enter the names of legatees of pecuniary legacies in the index unless it is clear they are not charged on land. Where there is a doubt better enter them in the index.

# DISCHARGE OF MORTGAGE BY ONE MEMBER OF FIRM OF MORTGAGEES MAY BE REGISTERED—NOTE TO BE MADE IN ABSTRACT INDEX AND ALL CERTIFICATES.

#### To a Registrar

DEAR SIR:-I return the discharge of mortgage to A. B. and C. D.

I think as each member of the firm has power to receive and discharge debts due to the firm, and as this discharge appears to be executed in the name of the firm by one of the members of that firm, you may register it.

Note, however, in the column for remarks, in your abstract index and in all certificates you give touching the discharge, that it purports to be executed by A. B. and C. D. per A. B.

# REGISTRATION OF POWER OF ATTORNEY CLAUSE IN AN AS-SIGNMENT FOR CREDITORS—INSTRUMENT CANNOT BE CONSIDERED AS TWO INSTRUMENTS.

#### To a Registrar.

DEAR SIR :--- I am in receipt of your favor of 22nd June.

The case you put for my opinion is stated by you thus: "I am asked to register under 62 Vic. (2), chap. 6, sec. 1, part of a general assignment of lands and chattels (for creditors) being the concluding part of the document by which the assignee is appointed attorney for the assignor, ahe statement being made on tender of the instrument that it can be considered as two instruments and the power of attorney end only recorded."

I do not see how the instrument can be considered as two instruments, nor how one part of it may be registered. The power of attorney clause in such assignments is usually incidental, and now-a-days since choses in action are assignable, such a clause may be regarded as having been put in more from the force of old habit than for any practical or useful purpose.

I think it would be contrary to the intention and meaning of the amendment to the Registry Act, passed in 1889, to treat such an instrument for registration purposes, as a power of attorney.

If the assignee for creditors under an ordinary assignment were to sell the lands of the assignor assigned to him, he would make and complete the sale in his own name without the concurrence of the assignor; he would not act as attorney for, or in the name of the assignor. The assignor has parted by the assignment with all his interest in the lands.

# ERROR IN DESCRIPTION OF LAND DEVISED BY WILL-HOW TO REGISTER WILL AND CORRECT ERROR.

#### To a Registrar.

DEAR SIR:—Re S.

I am in receipt of your letter of 19th inst. with enclosures.

The facts seem to be that the will of the testator, J. M., devises the remainder of his real and personal property of every nature and kind to C. D., and he charges the payment of certain pecuniary legacies upon his farm, which he says he now owns the west half of lot 18 in the 8th concession of the Township of Z., and he directs his son, C. D., to supply his wife with support and maintenance during her life in the house on the above mentioned land and amongst other things to have the exclusive right to one bedroom in the said house, and he charges the said land with the support and maintenance of his wife and other benefits in her favor.

It appears that the land which really belonged to the testator was not correctly described in the will, and the land he really owned was the northwest quarter of lot 18 in the 7th concession.

It is sought to register this will accompanied by a statutory declaration of the widow, who is also executrix of the will, showing that the land intended to be devised was the lot in the 7th concession, and showing that the will does affect that lot and ought not to be registered against the lot in the 8th concession.

It seems to me the proper way of registering the will and getting over the difficulty created by the mis-description is the following: 1. The will should go into the general register and then it can be registered against the particular lot in the 7th concession which he really owned, by a statutory declaration under the Act.

2. I think you will have to note the will as against the lot in the 8th concession.

But it would be well when you inform the solicitor that you have to do this to suggest to him to get a quit claim or disclaiming deed from the executors and devisees and legatees under the will in favor of the real owner of the lot in the 8th concession.

I return the probate and copy.

# LICENSE OF OCCUPATION FOR NAVY ISLAND—MODE OF REGIS-TRATION OF—(1) AS REGARDS NAVY ISLAND—(2) AS RE-GARDS THE NIAGARA RIVER AND CHIPPEWA CREEK.

To a Registrar.

DEAR SIR: -- Re Navy Island.

I return copy of license of occupation, the Queen to W. D., and also the two letters of Mr. A. B. The question raised by you is a somewhat difficult one with regard to the license to lay cables, etc., at various points upon and under the shores and beds of the Niagara River and Chippewa Creek. So far as Navy Island is concerned the course you may take is this: Treat it for the purpose hereof as in the Township of Willoughby, and open a page in your abstract index for Willoughby under the head of Navy Island, and enter in it the instrument as a license of occupation for the purpose of erecting poles, etc., with the usual particulars.

Regarding the registration of the license so far as it affects the right referred to in respect to the shores, beds and waters of the river and creek, perhaps the best you can do is as follows: Register the instrument in the books of each of the Townships of Bertie, Willoughby and Stamford, and any other municipality opposite the Niagara River, then open pages in the abstract index of these municipalities for "Niagara River" and "Chippewa Creek" and make entries therein of the particulars of this license.

# REGISTRATION OF PATENT WHERE PART OF LANDS NOT LOC-ALLY DESCRIBED—MAY BE REGISTERED IN PART—COURSE TO BE FOLLOWED IF COMPLETE REGISTRATION REQUIRED.

#### To a Registrar.

DEAR SIR: --- I return the certified copy of patent, Dominion Government to a railway. I have to observe as follows:

1. Part of the lands conveyed by the patents are apparently described by sufficient local descriptions. As to these the patent may be registered in the appropriate book or books.

2. As to the lands affected which are not locally described the patent can not be registered in the general register, nor at all.

3. The better course for the railway company to take in order to secure full registration of this patent is to supply you with a statutory declaration by one of their officials giving descriptions of the lands in your registry division, sufficient to comply with the requirements of the Act to amend the Registry Act of 1889.

4. If the railway company will not do so, but desire the patent to be registered in respect to the lands sufficiently described by local descriptions, you will be justified in limiting your certificate of registration to the particular lands therein locally described, and to state in it that as regards other lands not locally described, the instrument has not yet been registered.
