

Detipses for the year 1862

First Beginning on the 11th at 11h. 32m. atternoon. Beginas for total phase at 0h. 39m. in the morning of the 12th. Middle the eclipse 1h 1.m. End of total phase 1h. 42m. End of the eclipse at 2h. 49m. Duration of total phase 1h. 3m. Duration of tke eclipse 3h: 17m.

SECOND.—Of the sun, June 27th, at 1h. 44m. in the morning, invisible.

THIRD.—Of the sun, Nov. 21st, at 1h. 4m. afternoon, invisible.

FOURTH.—A total eclipse of the moon, December 6th, visible as follows: Beginning at 0h. 35m. in the morning. Leginning of total phase at 1h. 44m. Middle of the eclipse at 2h. 30m. End of total phase at 3h. 16m. End of the eclipse at 4h. 25m. Duration of total phase 1k. 32m. Duration of the eclipse 3h. 50m.

FIETE.—Of the sun, December 20th, at 11h. 54m. afternoon, in-

visibie.

Pisces-Feet.

The Caterpillar, which is so unsightly in our orchards at this season of the year, to say nothing of the injury it does to the foliage, and consequently to the tree, is easily destroyed, if taken in time, and at the proper time. Early in the morning, and in wet weather, at this season, they may be found concentrated in a small compass, under their web. If within reach, the whole colony may be crushed in a moment with the hand. To reach the more elevated webs, wind the end of a pole with rags, and with this destroy them. Or what is better, affix a Pickering brush to the end of the pole, and with this remove and destroy them. This brush is round and conical, somewhat resembling a battle brush. A man or boy will lear an orchard of this pest before breakfast; and the operation may be repeated, it necessary, without expense, or much loss of time.

Advancement is to merit, what the ornament of diess is to hand-some persons—French.

The most delicate, the most sensible of all pleasures, consists in promoting the pleasures of others.—La Bruyere. How happy would it be for the world, if all men were to make this sentiment the rule of their actions!

TWO IN A BED.

Ned and Charley are two room-mates, but they occupy different beds Ned's sleeping apparatus was so situated that he could get in on either side—that is to say, there were two fore-sides, which Ned

found very convenient.

One night, Ned and Charley had been out, and on returning, which they did near morning, both were considerably elevated. However, they walked to their room with an air that seemed to say, in ot so drunk after all." and sought long and patiently for matches and lamp. After knocking the pitcher off the wash-stand, and smashing the looking-glass, they finally gave up the search and went to bed.

ent to bed—yes, that's the word, but owing to the darkness and confusion of their senses, they made a slight mistake In short, Ned's bed had the honor of receiving the two friends—Charley getting in on one side, and his friend rolling in on the other

"I say, Ned," cried Charley, touching somebody's calf, "there's

a fellow in my bed."

"Wonderful coincidence," exclaimed Ned, feeling a strange elbow in the nei_hborhood of his ribs, "there's one in my bed too."

"Is there?" cried Charley; let's kick 'em out!"

"Agreed!" said Ned

And accordingly the two friends began to kick. It lasted about a minute and a half, and Ned was sprawling on the floor. Charley was left in possession of the bed. For a moment all was silent.

"I say, Ned," cried Charley.
" What?" asked Ned, sulkily.

"I've kicked my fellow out."

"You are luckier than I am," said Ned; "for he has kicked me out."

Brimstone for Cattle—Dr. Bartlett: It is probably not known to nearly of our farmers, that brimstone is valuable for cattle in keeping hem free from ticks. These vermin are not only filthy in their ppearance, but an injury to the cattle. A piece of brimstone as urge as a grain of corn, well pulverized, given in a little salt, will hause them to drop off and prevent others from getting on for eighter ten days. I consider brimstone as necessary for a cow in summer, as salt—Southern Planter.

To Steam Potatoes — Put them clean washed, with their skins on, ito a steam-saucepan, and let the water under them be about half orling; let them continue to boil rather quickly till they are done. If the water once relaxes from its heat, the goodness of the potato is sure to be affected, and to become soldened, be the quality ever so ood. A too precipitate boiling is equally disadvantageous; as the ligher part to the surface of the root begins to crack and open, while the centre part continues unheated and undecomposed.

* Showing how much a watch or clock should be faster (f) or slower (s) than the sun.

January—Prepare hot bed, and sow tomatoes, cucumbers, Early York Sugar-Loaf and flat Dutch cabbage, for an early crop. As little can be done in the garden, prepare dung, carry it to your beds, and spread it in fine weather? get pea sticks, and if the weather is open, sow early peas, plant potatoes, &c. Exercise slightly to preserve from frost.

February—Sow asparagus seed, Sugar Loaf and Early York cabbage beets and radishes twice. Parsnips, carrots, garden beans, lettuce, peas. Latter end transplant cautiflowers, dress asparagus beds, plant potatoel and strawberries; but a better season for strawberries is September of October. Plant out turnips, rutabaga, beets, parsnips, carrots, &c., for eed. Spade deep and make fine.

Thieves are as liberal as honest men; but then it is with other people's property.

April—Hartichokes were not slipped last month, do it now. Sow bushel and garden beans, peas cabbages, celery, cresses, beets nasturtiums, letture, radishes twice, turnips for an early crop; but 10th of August for a winter crop, salsafy, capsicum or red peppers, bene, brocoli, (the purple cape is the earliest,) melons, squashes, or cimblins, cauliflower the 12th. Plant potatoes. Jerusalem artichokes; keep your strawberry beds clean of weeds; hoe and stick peas when five or six inches high, top beans when they come to their full height. Keep all clear of weeds.

☐ Gemini, the Twins.

May—Continue to sow cauliflowers and brocoli, cucumbers, melons, peas, radishes twice snap beans, &c., thin onions, carrots, &c.; diligent in clearing off weeds. Turf this month, if not done last.

The benevolence of a humble mind may be compared to a rivulet in a meadow, which, though it glides along junseen and without noise, refreshes and fertilizes the soil, leaving it to display the benefit received by its increased verdure and truitfulness.

June—Sow cabbages for a fall crop. Brick out cauliflowers and brocoli, sow radishes, transplant cabbage, red pepper, &c Sow a few turnips for an early fall crop, to answer for soups. Cather herbs (which should be done when coming into flower) and In the shade to dry gradually, and then kept in a dry place for use.

True charity cannot only forbear a retaliation of injuries, but discern the spirit that offers them, which, if unresisted, commonly involves its own panishment, and sometimes its cure.

October.—Latter end cut down your asparagus, and cover your bed with dung, plant horse radish, prick out lettuce and Early York in rich ground, for a spring crop if planted in well manured ground they will stand the winter without covering them. In dry weather continue to earth up your celery and cardoons.

It was odd enough of the thieves who robbed the traveler, to tax him with dishonesty for concealing a part of his money.

November.—Take up your cabbage, or lay them down where they stand, with their heads to the North, and cover them with earth, just leaving the crown uncovered, they will keep well and grow all the winter. Continue to hill up celery, prune and plant out young trees, or any thing of the tree or shrub kind that has root to it; take up turnips, beets, carrots, &c., and put them away in sand for winter use.

To repel force by force, and fraud by fraud, are but Satans's ways of correcting sin.

December—Cover your endive, celery, turnips, and every thing else that needs shelter, with brush, straw, &c. Spread dung on your ground, turn it over and trench it, in order to mellow and pulverize it.

The benevolence of an humble mind may be compared to a rivulet in a meadow, which, though it glides along unseen and without noise, recreshes and certilizes the soil, leaving it to display the benefit received by its increased verdure and truitfulness.

The Government Offices open at 9 a m, and close at 3 p m.

A rolling stone gathers no moss.—Latin. This may be applied metaphorically to many dissatisfied mortals, whose "unstaid tends encies" will not permit them to remain long in any one place: who waste their substance in their migrations, and whose circumstances consequently never improve.

The discovery of what is true, and the practice of that which is good, are the two most important objects of philosophy.—Voltuire.

MEDICAL COLLEGE OF VIRGINIA,

RICHMOND, VA.

CHAS. BELL GIBSON, M. D., Prof. of Surgery and Surgical Anatomy DAVID H. TUCKER. M. D., Prof. of Theory and Practice of Medicine. B. R. WELFORD, M. D., Protessor of Materia Medica and Therapeutics.

The smiles of Divine favor, with which we may be occasionally indulged, should be considered not as a compensation for services, but as a coidfal we need, to encourage us to press on toward the mark set before us; of which, while we have any remaining defect, we may be sure we are yet short.

WHOLESALE DRUGGISTS,

NO. 122, CORNER OF MAIN AND GOVERNOR STREETS,

RIGHMOND, VA.

Dealers in Drugs, Medicines, Chemicals, Window Glass, Paints, Oils of every description, Indigo, Madder and other Dyes, &c.

ALL ORDERS PROMPTLY ATTENDED TO.

RATES OF POSTAGE

BETWEEN PLACES WITHIN THE CONFEDERATE STATES OF AMERICA

ON LETTERS.—Single letters, not exceeding a half onnce in weight, for any distance under 500 miles, 5 cents; for any distance over 500 miles, 10 cents. An additional single rate for each additional half ounce or less. Drop letters 2 cents each. In the foregoing cases, the postage to be prepaid by stamps or stamped envelopes. Advertised letters 2 cents each.

On Packages — Containing other than printed or written matter—money packages are included in this class—to be rated by weight as letters are rated, and to be charged double the rates of postage on letters, to wit: for any distance under 500 miles, 10 cents for each half ounce or less; for any distance over 500 miles, 20 cents for each half ounce or less. In all cases to be prepaid by stamps or stamped envelopes.

ON NEWSPAPERS.—Sent to regular and bona fide subscribers from the office of publication, and not exceeding 3 ounces in weight:

Within the State where Published — Monthly, 3 cents per quarter, or 1 cent for each number. Semi-monthly, 6 cents per quarter, or 1 cent for each number. An additional cent each number for every additional ounce or less beyond the first 1½ ounces. Bi-monthly or quarterly, 1 cent an ounce. In all cases, the postage to be paid quarterly in advance at the offices of subscribers.

Without the State where Published—Not exceeding 1½ ounces in weight: Monthly, 6 cents per quarter, or 2 cents for each number. Semi-monthly, 12 cents per quarter, or 2 cents for each number. Two cents additional for every additional ounce or less beyond the first 1½ ounces. Bi-monthly or quarterly, 2 cents an ounce. In all cases, the postage must be paid quarterly in advance at the offices of subscribers.

ON TRANSIENT PRINTED MATTER—Every other newspaper, pamphlet, periodical and ma az ne, each circular and sealed hand bill and engraving, not exceeding 3 ounces in weight, 2 cents for any distance; 2 cents additional for each additional ounce or less beyond the first 3 ounces. In all cases, the postage to be prepaid by stamps or stamped envelopes.

Cure for the Botts or Grubs in Horses.—If you will excuse the subject, (for although graceless, it is valuable, not only to the agriculturist, but to all classes using that valuable animal, the horse,) I send a remedy used while our coals were brought to market in road wagons, which obliged us to use a great number of horses; and I never knew it fail of giving relief in from one to five minutes. Pour but half a gill of spirit of turpentine into the hand and rub it on the breast of the animal while suffering. Let it be applied to the hollow or pit of the stomach, just at the point where the neck joins the breast, on a space six or eight inches in diameter. The relief is certain if the grubbs have not already cut through the coats of the stomach —Farmer's Reg.

To make Potato Bread — Boil the potatoes not quite so soft as common, then dry them a short time on the fire, peel them while hot, and pound them as fine as possible; next put a sind quantity of pearl ash to new yeast: while it is working briskly add as much rye meal or flour as can be worked in. Mix the whole well together, but do not add any water to it. After the dough is thus prepared, let it stand an hour and a half or two hours before it is put into the oven Observe it will not require so long baking as regular flour bread.

How to preserve Pigs in good health and in good appetites during the period of their fattening.—Mix with their food a few gall nuts, bruised with charcoal. We are unable to account how this operates so beneficially on the economy of the health of these animals, but we are wishful to make it public, as we have experienced the result to be decidedly good.—British Farmers' Magazine.

It is known to every farmer, that hogs, when fattening in a close pen, are hable to lose their appenite, become sick and die. There are several preventives for this evil; as occasionally mixing a little sulphur with their food, giving them charcoal, rotten wood, or permitting them to root in a small yard appended to the pen. Some of these

precautions are necessary.

CLOTHING! BALDWIN & WILLIAMS,

MANUFACTURERS AND DEALERS IN

SUPERIOR QUALITY CLOTHING,

Have always on hand one of the most complete stocks of

READY MADE CLOTHING

AND

GENTLEMEN'S FANCY DRESS ARTICLES

To be found in the South.

It has always been our aim to produce the best of every thing in our line and we file, by our rapidly increasing sales, that this point is fully appreciated by residents of Virginia, North Carolina, Tennessee, and others who trade in our city.

Those who have over-looked us heretofore are invited, with our old patrons, to call and see for themselves, as we always are produc-

ing something new and desirable.

KEEN, BALDWIN & WILLIAMS,

No. 116, Main Street, Richmond, Va.

Raising Ducks and Turkeys.—In the Agriculturist appeared two articles, one on the best mode of raising ducks, and the other of turkeys. Two seas as have since passed away, and the writer of this has been enabled to test the efficacy of those directions; and in every instance that has come under his knowledge, they have been attended with perfect success. The directions for raising ducks were to feed them on animal food and keep them dry. Individuals who have adopted this plan, have sent to our markets from 500 to 700 ducks of the finest kinds, and they have had no diseases among them, and found no difficulty in raising them.

Two or three individuals who tried the experiment of driving their turkeys, when young to a distance from the house, where the greatest number of insects were to be found, and feeding and housing them in the manner directed in the Agriculturist, have stated that they have raised from 100 to 300 turkeys, and have pronounced it to be a method, which of all others, they believed to be best calculated to be

attended with success. - Southern Agriculturist.

Economy of Manure.—Cattle fattened upon turnips and straw, or hay, are estimated in England to produce eleven and three-fourth tone manure each. (See Bordley) If every horse and bullock upon our farms produced a like quantity, and the whole was judiciously applied, our crops would be increased at least ten per cent—nanures are the means of substantial wealth to the former; but to be productive, they must be regularly deposited in the soil.

To destroy the Weevil in grain.—Soak linen cloths in water, wring them, and cover your grain with them; in two hours time you will find all the weevils upon the cloth, which must be carefully gathered off, that none of the insects may escape, and then immersed in water to destroy them.—Dom. Ency.

S. SUTHERLAND'S

No. 132 MAIN STREET, RICHMOND, VIRGINIA.

Guns, Rifles, Pistols, Fishing Tackling, Walking Canes, &c. imported directly from Europe upon as reasonable terms as similar goods can be purchased in the Northern or Eastern Cities, and better adapted to the wants of the Southern public.

RHODES, WILSON & CO.

IMPORTERS AND DEALERS IN

HARDWARE, CUTLERY, GUNS, SADDLERY, &c.

Always on hand a large assortment of genuine Anchor Bolting Cloths

No 22 Pearl Street, Richmond, Virginia.

Manus. - Arthur Young tock five equal portions of a field, one ortion of which he manured with dry cut straw; a second with traw soaked five hours in fresh urine; a third with straw soaked in ike manner fitteen hours; a fourth with straw soaked three days. and to the fifth portion he applied nothing. The whole was tilled slike, and sown with grain. The product, in grain, of the first was hirty-mine, of the second fifty, of the third sixty-three, of the fourth one hundred and twenty-six, and of the undunged portion nine. weight of grain and straw, the product of the several portions, in the arder above named, were found to be 100, 120, 130, 300 and 48. This experiment affords a pretty conclusive demonstration of the where of vegetable matter as food for plants, and particularly of the rulity imparted by the urine of animals, which latter, to us, is controlly lost to all useful purposes. It indicates the propriety of so constructing our cattle yards and stable floorings as to concentrate this liquid; and where there is no eistern to retain it, of applying straw and other litter to absorb it ere it is wasted. Another fact is worth noting; the ro ting process took place wholly in the soil; the fertility was induced by long manure, and the liquids which it held, and not by muck.

Money is a good servant, but a dangerous master—Bonhouse. When we employ it to good purposes, money is a great blessing; but when we use it for wicked ends, or become so devoted to it as to endeavor to acquire it by dishonest means, it is then indeed a bad master.
