# The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the Office by 5 o'clock p.m. on Fridays.

Scale of Price for Advertisements.	£ 8
Per page	14 14
- half-page	7 10
— quarter-page	4 0
— column	5 0
- line (eight words to a line)	Ninepence.
Six lines or under	Five Shillings

- A SUPPLEMENT, containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 19th October, 1872, will be published by the Economist on the 17th May.
- To Advertisers.—To insure insertion for this important number, advertisements should be sent not later than midday, Friday, the 16th inst.

On April 26 was Published No. 4 Vol, III., New Series, Price 8d; by post, 8½d,

# THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for April gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

# A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to April 23.

Advertisements for the next Number, to be published on May 31, must be sent, to insure insertion, on or before May 29.

THE MODE IN WHICH THE ALABAMA PENALTY IS REALLY TO BE PAID.

On Monday night Mr Lowe explained, more clearly than before, the mode in which he contemplates providing for the second half of the Alabama penalty. It seems that he expects a large surplus over revenue above his estimate, and that out of this extra revenue he proposes to pay the second half in question. But we hardly think this is a satisfactory mode of making such provision. It will be adopted, because it is an essential part of the Budget, and, as a whole, the Budget is popular. But finance which is the easiest and the most acceptable for the moment is not always the best finance. And, in this case, there are two objections. First, that many considerable authorities think the estimates of revenue given by the Government this year dangerously high. They are based on the principle that this year will be generally as good as last year, and that the spirit duty will be better. But last year's revenue was one of most singular productiveness, and the spirit duty was the most remarkably productive part of it. In case of a very bad harvest and an arrested trade, these estimates would not be nearly realised. And what is now proposed is to calculate not only that these high estimates will be realised, but that 1,600,000l will come in besides. The hope is to pay the second half of the Alabama penalty from the excess over an estimate of revenue which is already excessive. And, secondly, if the extra revenue from this source should be realised, it ought not to be spent on the Alabama penalty. excess of actual over estimated revenue is one of the principal funds from which we repay the comparatively small sams of debt which we do repay. The estimated revenue, as a rule, is sufficient for the expenditure, and any excess over estimate is so much "in hand," and so much available for the reduction of debt. By law and practice a surplus thus arising is always thus devoted. But now it is proposed to suspend this process, and to confiscate our "sinking fund" to pay part of the Alabama penalty. In a year of financial disaster this might, perhaps, be pardonable, but we much regret that it should have been thought of, or proposed, in a time of unexampled financial abundance.

As to what will happen if this money is not paid but borrowed, Mr Lowe also made a statement gravely objectionable, and scarcely consistent, we think, with his Budget speech. In reply to Mr Hunt, he said "the right hon. gentleman sup-" poses that the surplus of my successor next year, if we are unable to pay this 1,600,000l, will be applied to the payment " of this sum. There could be no greater mistake. The 1,600,000l " will become part of the unfunded debt, and will become liable to " be paid off by the Parliamentary sinking fund, or by any other " mode of paying off debt." So that we are not, as was at first understood, at the worst to spread the payment for the Alabama penalty over the income of two years, but may be going to borrow the second half permanently, and as a part of our fixed debt. Surely this is not finance worthy of these times of abundance, or of this great administration. We can hardly believe that Mr Lowe, who loves what is right and rigid and who despises popularity, should have made this proposal.

# THE PURCHASE OF THE IRISH RAILWAYS.

ON Tuesday Mr Gladstone made a speech on the purchase of Irish railways, some parts of which are in some degree disappointing to us. We entirely agree in Mr Gladstone's main proposition. No doubt he is right in saying that the Irish rail-

way companies held aloof; that they do not ask to be bought; that they do not offer their property at a cheap rate; that, on the contrary, they mean to strain every imaginable resource to sell that property at the dearest rate. No doubt he is right, too, in saying that if the State buys the Irish railways at all, it will buy them to make a great experiment; it will buy them to lower fares on a large scale upon which to benefit Ireland and with a hope of future profit. But in the mean time there will be a great loss, which Ireland would much dislike to bear, and which England and Scotland, which are not benefited, could hardly be asked to bear. Taking these two considerations together the purchase of the Irish railways is impossible.

But though in his present policy, and the arguments by which he defended it, Mr Gladstone was plainly right, some of the more general considerations which he used are, we think, open to exception. Thus, he accepted from a previous speaker the maxim "that the business of the State is not " to trade but to govern;" but the difficulty is how are you to govern when you have such powerful bodies as railway companies for your subjects. These companies are monopolists; the law has given them a large and, as yet, un-exhausted command over much money and many most important transactions. For many purposes the railway companies can rely on the contracts which have been made with them, and can render Government, at least, good Government-Government which looks to the well-being of the nation-impossible. A most important question for the future is this-can the welfare of the public be reconciled with the perpetual existence of these monopolies, or must they be purchased and abated without hesitation?

Now, we are not inclined absolutely to say, with Mr Gladstone, that a Parliamentary Government such as ours could not manage the railways. There would, no doubt, be a difficulty as to the patronage given, and the influence thence resulting, to the Government. But Mr. Gladstone says that this difficulty may be surmounted; and if so, we do not believe in the stupendous difficulty of railway administration. If an ingenious man set to work he could easily prove that, under our system, it would be impossible to manage a navy, and that no sensible man would undertake to manage it. Yet, after all, we have, beyond dispute, the finest navy in existence, and the test of results is in our favour. And railway administration is certainly more easy, more regular, more capable of being reduced to precedent and system than the management of a navy. The Government administration of railways would not be perfect, or would often be very faulty; but would it be less faulty on an average of years than that of Boards of Directors whom it superseded? Should we like to entrust the management of the English navy to an average Board? should we any of us feel safe for a week it it were so entrusted? And in the very case of railways, what was the practical result of the management by Directors? They had the management of almost the sole means of communication for travelling and traffic in the country; it was natural that as travelling and traffic steadily increased the revenue from, and the profit made by, such railways would steadily increase also, so that railway property ought to have been a property steadily improving in value from the beginning. But under the management of Boards of Directors railway property till a few years since had not improved in value, did not improve, and, in popular estimation, was not likely to improve. "He put his money into 'railways,'" was with many sober persons a natural prelude to saying that he lost What should have been the very best of investmost of it. ments Boards of Directors changed into the worst, and we believe that Mr Goschen, if instead of the navy he had had to manage the railways, would have produced a result very much better.

The great obstacle to the acquisition of the railways by the State is the price which must now be paid for them. If, some years ago—about the time when Mr Gladstone appointed his Railway Commission—an offer of purchase had been made to the companies, some good result might well have been obtained. An amount far in excess of the market value of the railway property at the time might, experience has since shown, have been safely offered, and most likely the offer would have been accepted. No railway shareholders properly appreciated their property at that time, and many of them hated it. The whole Great Western system might easily have been bought at

what now seems a fabulously low price. No one Statesman—no person anywhere—is to be blamed for the loss of this great opportunity. The opinion of the country was not prepared for it; the country disbelieved in railways even more than the shareholders. But any way the opportunity was lost; railway property revived; common shareholders expect not only a good present value, but an increment of future value. The price the English Government would now have to offer for the English railways may well frighten the boldest financier.

THE LOCAL TAXATION DEBATE.

THE debates this week on Mr Smith's amendment to the Budget on the subject of Local Taxation, and the conclusion to which the House of Commons has come, mark a considerable advance in the general knowledge of the subject. A year ago the House of Commons was induced to affirm, by a majority of 100, the obviously false proposition in abstract political economy, that it was unjust to levy taxation for local purposes on one description of property only, and to base upon this doctrine a resolution in favour of relieving the burden of rates by throwing certain charges on the Consolidated Fund. Now it declines to affirm the much more modest proposal which Mr Smith made, viz., to postpone giving assent to the remissions of taxation in the Budget, or rather the remission of the sugar duty only, until it was seen how much was to be surrendered from the Imperial Exchequer for the relief of local burdens. The House of Commons is thus not so hasty as it was. It is by no means so sure, after all the outcry about local rates, that the injustice is so crying as the agitators pretend, or that a solution is to be found in the rough suggestions which these agitators have made. The magnitude of the change of opinion is also shown by the fact that, although there was a majority of 100 last year for Sir Massey Lopes's motion, the parties who carried that motion are now so weakened that they dared not put the more modest proposal of Mr Smith to a vote. No doubt the vote this year was more critical, since it might have led to a Ministerial crisis; but if the party of last year had been quite sure of their ground, the critical character of the vote ought not to have deterred them. Much of the interest of discussion lies in fact in this, that on the question of local taxation coming to the front, as it is called, the people who have agitated it dare not say exactly what they want, or on what principles their claims are based. At the first touch of real Parliamentary discussion their failure is conspicuous, and the farther proceedings seem likely to be in directions which they did not foresee.

The most important point on which discussion has brought failure to the agitators about local rates is the one to which we referred last week. They have chosen to argue that it is unjust to impose rates on one description of property only, that personalty thereby escapes, that the owners of real property which is taxed have a right to be relieved at the expense of other property which escapes; that, at any rate, they have a right to be relieved of the recent increase of rates which has taken place. But discussion has made it plain, as we showed last week, that, strictly speaking, there has been no increase of rates of which the particular owners of real property who promote this agitation can complain. The general rate in the £ of all rates has not increased if we take a long series of years into account. If there has been any increase at all, it is mainly in improvement rates, which benefit the town property on which they are levied. The old burdens, of which the agitators complain, have not increased at all in the rate per £, and their increase in absolute amount has been much more than compensated by the increase of new property charged. The promoters of the agitation are thus found out to have been using the facts about rates generally to cover an appeal for relief against the particular rates to which these facts do not apply.

And on the question of theory which has been raised, the party are even more unfortunate. If they meant anything at all by their comparisons between real property and personalty, they meant that the burden of rates was to be shifted from real property to the payers of the income tax. But when the point is fairly raised in the discussion they will not stand to their position. Sir Massey Lopes, when challenged on Monday night, distinctly refused to say that they supported a

transference from real property to income tax. They refuse altogether to declare on what principle, or for what purpose, they have said so much about the personalty that escapes rates. And, on the other side, it is beginning to be clearly seen, what we have pointed out from the first, that the incidence of the rates on real property, at least of the rates on land, is not the same as that of an income tax on the owners of the property would be. The charge is on the property, and in deciding on it we must not treat it as an income tax, but regard it from the point of view of expediency as to whether good would accrue to the whole community from relieving property of the charge. In any case, we must beware of giving a bonus to the existing owners of real property under cover of doing something else, and without any prospect of benefit to the community whatever. As Mr Gladstone well said-"It will " also be a part of the duty of Government to consider what "changes are to be brought about in the position of owners, " and not to allow ourselves, under the pretext of relieving "the occupier, which taken at the best can be only a " temporary relief, to make a vast present and gift out of the "national resources to the owners of the real property of the " country." The wonder is that with a question which could be put in this light the party which agitated it should have gone so far as to make it almost a hustings question.

We may add that, in our opinion, the greater part of the rates do form such a charge upon real property that, if they were reduced to any extent by a levy on other sources of revenue or a grant from the Imperial Exchequer, the effect would be to make a present or gift out of the national resources to the owners of that property. The whole question of the incidence of local rates is most ably discussed in an article which Prefessor Fawcett has just contributed to the Fortnightly Review; and he there shows that, as regards agricultural land and houses in favoured situations, the real incidence of the rates is upon the property. About agricultural land there never was much doubt, but the point about houses in favoured situations is newer, and is so well put by Mr Fawcett that we

venture to quote his illustration :-

The price or rent paid for a house possessing exceptional advantages of situation is only in a small degree influenced by the cost of building of situation is only in a small degree influenced by the cost of building the house, but is determined by the highest price which any one is willing so pay who wishes to occupy the house, either for purposes of pleasure, or in order to secure the extra trade profits which will result from the occupation of premises in a peculiarly favourable situation. It is evident that this demand, whether prompted by pleasure, or by an anticipation of gain, is not influenced by the amount of rates which may be levied on the premises. Thus, assume that there are two sets of business premises, one in the Euston road, and the other at Charing cross, which, so far as regards the size and general character of the buildings, are identically the same, it is by no means unreasonable to suppose that if the premises in the Euston road let for 500/a year, those at Charing cross would let for 2,000/. If these should be the two rents respectively paid, the difference, 1,500/a year, would represent the pecuniary value posdifference, 1,500/ a year, would represent the pecuniary value possessed by premises of this character when situated at Charing cross. compared with the Euston road. In saying that the rents are 2,000/ compared with the Euston road. In saying that the relats are 2,0000 and 5000 respectively, it is assumed that these rents include the amount paid in rates. Suppose that there is a uniform consolidated rate in the metropolis of 5s in the pound; the aggregate rent of 2,0000 which is paid for the building at Charing cross will consist of 1,6000 paid as rent to the landlord, and 4000 paid as rates. The 5000 of rent for the building in Euston road is composed of rent to landlord, 4000, and rates 1000. Let us now inquire what would take place if rates were altogether remitted. What is true in the case of the entire remission of rates would are tento, held good in the case of reduction remission of rates would, pro tanto, hold good in the case of reduction of rates. As the two buildings which we are now considering are in every respect of the same size and character, it is man fest that the cost of erecting each must have been the same. Let it be assumed that this cost was 4,000/, upon which there is a return of 8 per cent. The Euston road premises, which let for 400/ a year, may consequently be regarded as yielding an ordinary rent of 320 a year and a ground rent of 80. The premises at Charing cross, in consequence of their erection costing the same as those in the Euston road, yield the same ordinary rent, viz., 320%, and the ground rent will consequently be 1,280%. The remission of rates would not in any way affect the pecuniary value for business purposes possessed by the house at Charing cross. The demand for this house would be the same as it was before the rates were remitted, consequently its owner would be able to secure the same rent for it, viz., 2,000l. This rent of 2,000l previously consisted of three distinct elements, viz., 400t rates, 1,280t ground rent, and 320t crdinary rent, or, in other words, the return for the money spent in building the house. The amount of this return is solely regulated by the ordinary rate of profit upon money invested in building, and is not, therefore, in any way affected by the remission of rates. Hence, when no rates are paid, the aggregate rent is still 2,000/a year, and as the ordinary rent still remains at 320l a year, it therefore follows that the ground rent will be increased by 400l, viz., from 1,280l to 1,680l. From these considerations it appears to be proved that in the case of buildings possessing exceptional advantages of situation, rates are not a charge on the owner of the house, but upon the owner of the ground, because it has just been shown that if rates were remitted, the saving resulting would simply represent so much added to the ground rent.

This is very clear, and we think that it will be found, on inquiry, that houses in favoured situations are the rule and not the exception. The inhabitants of towns must live to carry on their business under conditions which do give a monopoly to certain situations, and we doubt, for instance, whether there are many parts of the metropolis where a reduction of rates would not be instantly followed by an increase of rent. And what is true of the metropolis is true, with very few exceptions, of most great towns. Altogether there is very little doubt about the incidence of the mass of the rates; we may safely make the conclusion that the bulk of them is a charge upon real property, and that a serious reduction of them would be a vast present or gift to the owners of that property.

The above was the most important point on which light has been thrown by the discussion, but the debate has also been useful in bringing still more clearly into view the great complexity of the subject, and its intimate connection with the more general subject of the principles and method of local administration. With a democratic constitution, it has come to be considered essential that we should have representative government locally, as well as centrally, though there is no logical connection between the two. But in what way are we to get a local representative government? and how are we to secure that the burden of local rates really falls upon those who administer them? How also are we to divide the duties of home administration between the central Government in London and the local authorities throughout the country? These are not questions to be solved in a day, especially when the progress of communication is steadily destroying local feeling, and encouraging a preference for the action of the central Government in matters formerly considered local, just because the central Government is more intelligent, and more accessible to public opinion. The difficulties are further increased by the tangle of authorities and conflicting areas throughout the country, which it is almost a hopeless task to reorganise. All these considerations help to show that local taxation can only be dealt with slowly and carefully, and that the House of Commons must not stultify itself by hasty resolutions like that which it passed a year ago, and that which it has just refused to pass. Mr Stansfeld ought to be most thankful that the way has been so well cleared beforehand for a definite scheme for grappling with the whole difficulties such as he is expected to propose, or for such immediate measures as he may think proper to suggest with a view to a final solution at a future time.

# THE FRENCH ELECTIONS.

THE French elections are hardly reassuring. M. de Rémusat has been rejected by Paris, and his opponent, the ex-Mayor of Lyons, who has been more or less identified with the Reds of that city, has been returned by a majority of nearly forty-five thousand votes over his opponent. Candidates of an even more well-marked Red tinge have been elected for the mouths of the Rhone (Marseilles), and for the Gironde (Bordeaux). In fact, in all the departments in which any one of the great cities of France is included, the extreme Radicals have had a triumph; and, of course, in Paris, where the candidate was a distinguished member of the Government, who had gone a great way in the direction of the Radical party in order to satisfy the electors, and who came before the electors with all the prestige of the treaty which is so soon to rid France of the occupying army, the defeat is one of peculiar significance, and is a dangerous challenge to the Conservatives and the timid party. The Conservatives and their journals are already beginning to point out to M. Thiers that he cannot command the confidence of the Republicans without being willing to follow them into all the most dangerous extremes, and to invite him to join the party of reaction which is quite ready to regard him as the head of that "Government of combat" for which they are so eager, if he will only accept their policy and use the power of the administration to keep down the Radicals. The moderate Regulican papers, on the other hand, are indulging in the most gloomy forebodings as to the result of this election. They are recalling the events of 1850, as indicative of what is to happen when the Assembly meets again. In 1850 M. Eugene Sue presented himself to Paris as Radical candidate in circumstances not unlike those of the present day, and M. Eugene Sue was elected, like M. Barodet, by a great majority. Then, as now, the Radical party had denied that the election

of the Radical candidate meant extreme measures; it was only to mean a warning to the Government of the direction in which its policy was to be guided. But the result of the election was, that the Legislative Assembly threw itself into reaction with more ardour than ever, and within a month had discussed and voted the law of the 31st May-the law which put the most stringent restrictions on what M. de Rémusat called the other day "the integrity of universal suffrage," and which was but the first link in the series of political events that led to the coup d'état and the empire. It is remarkable enough that M. Thiers was himself the chief speaker in the Assembly on this law of the 31st May, 1850, in which the ardour of the reactionary movement commenced, and that he made the Paris elections one of the chief grounds for the reactionary law and for that still more reactionary language by which he supported it. M. Thiers said, on the 24th May, 1850, that of the two recent Paris elections-of M. de Flotte (who had fought "in the days of June," not on the side of General Cavaignac) and of M. Eugene Sue, "who represented ideas that we con-" sider as subversive, and which were much more frankly de-"clared at the electoral meetings than here"-"the first election," was the apology of insurrection, the "second, the acceptance of Socialism;" and on these elections he founded his attack on universal suffrage. " Examine history," said M. Thiers—then the apologist of reaction—and "you will see that it is the vile multitude that has at all "times betrayed and delivered up liberty." And of course imprudent denunciations, like these of "the vile multitude," stimulated at once the democratic violence against which the reaction was working, and also the reaction itself. M. Thiers is wiser now, and even if he accedes to those limitations of universal suffrage for which the present Assembly is so eager, he will not lend his sanction to any violent words likely to irritate still more deeply the spirit of the Radical party. But M. Thiers has not got the control of the reactionary party in the Assembly, and it is but too likely that there may be found members of the Right to use, in relation to the election of M. Barodet, words as violent as those which M. Thiers himself used in 1850 in relation to the election of M. Eugene Sue. There can be but little doubt that, as M. Thiers seems himself to have remarked to some of the Deputies of the Left, the Paris elections will enormously stimulate the anger and the fear of the cautious waverers between the two parties, and will make it all but impossible to get a majority for the Liberal Republicans, even with the help of the newly-elected deputies. It is greatly to be feared that the Assembly, on its return to Verseilles, will be thrown into more dangerous reaction than ever by the recent elections, and that we shall soon find a contest being waged, perhaps on the very subject of the contest of 1850-" the ' ntegrity of universal suffrage"—in a spirit as exciting and as menacing to the political peace of the country as that which divided the Legislative Assembly of that year.

We do not wish to be alarmists. We are very well aware that M. Thiers, if he lives, may now be trusted to act in a very different spirit to that which actuated either himself twenty years ago, or the Prince-President who then held the place which he holds now. M. Thiers has no chance of founding an Empire, and will, of course, never think of a coup d'état for such a purpose. It is his cue to adopt a moderate policy, and to restrain the extreme men of both parties as much as he can; while it was rather the cue of the Prince-President of 1850 to aggravate the violence of the opposite parties in the Assembly in order to furnish an excuse for the coup d'état by which he rid himself of its restraint. We may, therefore, fairly hope for a very different result in 1873 from the result of 1850, and, we hope we may add, that parties themselves may have learnt something by the fatal experience of the revolt of the Commune. The Radicals are to a considerable extent under the control of M. Gambetta, who knows that all government implies both order and authority, and really wishes to retain both. The Conservative Republicans again are under the influence of M. Thiers and M. Grévy, who are both of them aware that a certain moderation of tone on their part, not only in relation to Republican measures but in relation to the Royalist, Imperialist, and other Radical pretensions, will be quite essential to the duration of the Republic. We shall bear from them very little intolerance of any abstract principles, whether allowed by the absolutist or by the democratic party; they will be anxious to let talk alone as far as possible, for the sake of serving the Re-

We do not, therefore, mean in the least public. to say that the prospects of French politics now are as gloomy as in 1850. We quite hope they are much less gloomy. But we do think the situation very critical, and one needing the exercise of as much self-control as French parties are capable of, if events are not to tend to the same rude collision between the party of authority and the party of liberty as took place under the short-lived Republic which was established in 1848. If once the present Assembly could be dissolved, and one of steady liberal republican principles elected in its place, a good deal of the danger would be past. To this object M. Thiers should direct his best efforts; but before it can be attained. there will be plenty of room for severe recriminations. plenty of temptations to violence to be steadfastly resisted. In any case, the Paris election will prove a source of great danger and difficulty. A victory for the Government and its Liberal. ism, instead of a humiliating defeat, would have diminished every danger and added indefinitely to the weight of authority with which it governs. Nowhere in Europe does so much peril attend a weak and discredited Government as in France. There, to be weak is to be criminal. Fortunately, however, for the present, all the parties ranged against the Government are even weaker and more timid than itself.

THE ORDEAL OF THE JUDICATURE BILL. THE Lord Chancellor's Judicature Bill was not in a very healthy state when the expedient of referring it for revision to a Select Committee was suggested by Lord Cairns. We cannot say that it has taken a new lease of life and vigour from the labours of the law lords and their lay colleagues. As amended by the Committee the Bill is substantially the same Bill that was laid before the House within a few days from the opening of the Session, and this in spite of the remarkable protest addressed to the Lord Chancellor by the members of the Chancery bar. There is some doubt as to the precise scope of the changes made in the Bill by the Committee, but it is agreed on all hands that these changes do not touch the objections advanced by those critics who perceive in the so-called fusion of Law and Equity the destruction of the latter system of Jurisprudence. Lord Cairns was the principal critic in the Committee, and a very lenient and even partial critic, of the Bill. Lord Westbury, whose attacks were most to be feared, did not take any part at all in the discussion. Lord Penzance was not a member of the Committee; a fact regrettable for many reasons, but most of all because it testifies to the failing health of this eminent Judge. In every conflict of opinion Lord Cairns carried with him the majority of the law lords, while the Lord Chancellor had Lord Hatherley as his only backer. These circumstances will possibly detract from the value of the amended Bill, and may give occasion for assaults upon it, either during its passage through its remaining stages in the Lords, or afterwards in the Commons.

The composition of the High Court as distinguished from the Supreme Court of Appeal, was challenged by Lord Cairns, who wished to retain the Lord Chancellor as the President of the Equity or Second Division. The Bill relegates the Chancellor altogether to the Appellate Court, depriving him of his authority as a judge of first instance, and thus, as it is contended by the critics of the Bill, weakening the prestige and power of the Equity side of the High Court. There is little force in this objection, though we are aware how great is the influence of names and titles even in solid matters of business. But, in spite of his lesser dignity, we should feel implicit confidence in the ability of the Master of the Rolls to preserve equity jurisprudence intact, if he were given the powers which a Lord Chancellor at present enjoys. Such powers, however, will not be given him, but then they would not be given to a Lord Chancellor presiding in the equity division of the High Court; so that Lord Cairns's proposal for maintaining the Chancellor as a judge of first

instance would be in no way a security for the maintenance of equitable principles or traditions. It was rejected by the Select Committee—we do not say for the reasons we have ourselves given—by a majority of ten against nine, and when it reappeared in another shape in the discussion of a subsequent clause, it was abandoned without a division by Lord Cairns. In this respect, therefore, the Bill stands in its original form. The "divisions" of the High Court, with the peculiar segregation of the Equity Judges in a single division, are continued, and so, as we understand, is the distribution of the general business of the Equity Courts among the four divisions, while the administrative business is assigned to the second division alone. But these arrangements form the substance of the accusations brought against the Bill by the members of the Chancery bar, and unless these be altered it is clear there will be a vigorous opposition to the nominal "fusion" of law and equity which Lord Selborne proposes. The plain and easy remedy, suggested in so many quarters, is an increase of the judicial staff on the equity side, and a distribution of these judges among the various divisions or courts. In fact, if the fusion is to be a reality for the present generation, and until a new generation of lawyers, educated in the mixed jurisprudence, has grown up, we must have common lawyers and equity lawyers sitting in every court side by side. It is idle to suppose that a knowledge of equity principles comes by the light of nature to every man, and it is unreasonable to attempt to silence criticism by pointing to an exceptional case like that of Lord Justice Mellish. It is not to the occasional introduction of a Common Law element into Equity practice that exception has been taken, but to the absolute and entire transfer of the judicial business of Equity from judges bred in Chancery to judges bred in Common Law practice. The proof that such an experiment is likely to result in failure is not far to seek. equitable jurisdiction of the Common Law Courts has been from the beginning, and remains to this day, a dead letter.

Of course, an increase in the number of judges would cost money, and the present Administration is little disposed to spend money on judges' salaries at all events. But it is certain that, if we are to build up a new judicial edifice, worthy to compare with that we are surrendering-and old and inconvenient as it was we were proud of it, and had learned to prize its real excellencies, despite its many and ungainly faults -we must not err on the side of parsimony. We are glad to perceive, therefore, as an earnest we hope of other changes in the same direction, that Lord Cairns was successful in carrying against the Lord Chancellor and Lord Hatherley, an amendment to the 13th Clause of the Bill raising the salaries of the ordinary Judges of the Supreme Appellate Court from five thousand a year, as originally fixed by Lord Selborne, to six thousand a year, the sum which the Lords Justices of Appeal in Chancery are at present paid. We pointed out, when the Bill first appeared, the injurious policy of the reduction, which could at the utmost effect a saving for the country of some two or three thousand a year, and would certainly weaken the prestige, if not degrade the character, of the Appellate Court. We hardly hope to see the Bill pass in its present shape, and if it should be cast into a new shape, we trust it may not be deformed by any pitiful straining after small savings.

INCIDENCE OF POORS RATES ON PLACES RE-PRESENTED IN PARLIAMENT IN ENGLAND<sup>®</sup> 1868.

We have received the following tables from an able correspondent, who is also an authority upon matters of local taxation. The object is to show what would be the effect of levying the existing poor rate upon the income tax assessment of the localities named, which is the view that the rate agitators have apparently long contended for, though they already repudiate having done so. The transference on general grounds would be most unjust, amounting to a vast present or gift to the owners of real property at the expense of other people; but the table also shows (1) how impossible the new charge would be, and (2) that the inequalities of rates between different localities would be as great as ever. As regards the first point, it will be seen that in not a few localities the new income tax would range between 1s and 1s 9d per £, and

there would be very few places indeed where it would fall below 6d per £. In other words, if the change were made, many people would be called on to pay an income tax ranging between 5 per cent. and very nearly 10 per cent., and most others would have to pay upwards of 21 per cent.—all in addition to whatever income tax may be levied for Imperial purposes. Of course, no Government or responsible statesman could ever dream of proposing such a tax, and no member of Parliament who thought of his constituency at all would vote for it. As regards the second point, the fact shown by the tables is that while by the existing system the difference between the highest and the lowest rate is the difference between 100 and 11, the extremes on the new plan would be 100 and 6. If we leave out the last extreme, the differences between localities under the proposed new system would at least be as great as the differences under the present system. After such tables, we think there will be less disposition than ever to continue the outcry about personalty not being rated, of which so much has been heard.

I.-Existing Rates per £.

Norg.—This Table is based on Returns, 283 : f 1864 House of Commons, giving the

amount of Property and Income Tax charged in the year ended 5th April, 1863, under Schedules A, B, D, E, for each place named.

# BUSINESS NOTES.

The Clearing House Returns.—Sir John Lubbock has now laid before us the sixth annual summary of the Clearing House Returns which has been issued since the weekly publication commenced. The figures are now enormous, and continue to show a wonderful increase over previous periods. In 1872-3 the total was 6,003,335,000*l* as compared with 5,359,722,000*l* in 1871 2—an increase of 643,613,000*l*, or about 12 per cent. In 1871-2, however, the increase over the previous year had amounted to the enormous sum of 1,341,000,000*l*, or about 30 per cent.; so that the present increase, which rather exceeds the usual annual average of 9 or 10 per cent., becomes every way remarkable when it is considered that it is an increase upon an increase. Making the comparison of last year with 1870-1, we find that the transac-

tions of the Clearing House have in fact increased in the short space of two years from 4,018,464,000l to 6,003,335,000l, or 50 per cent. The wonder certainly is that so great an increase in the volume of business, arising, no doubt, from the multiplication of transactions due to good credit as well as from a general rise of prices, can have taken place without a much greater advance than what has occurred in the rates for the loan of money. It is noticeable that the rate of increase is now apparently tending to decline. The improvement we have seen for the whole Clearing House year just ended has been 12 per cent.; but taking the last eighteen weeks from the 1st of January, we find that the increase has been only as follows:—

	1873. £			1872.		Amount.		
1	First nine weeks	1,102,167,000 1,065,524,000	***	1,032.147,000 1,042,318,000	***	70,020,000 23,206,000	***	2: 3
İ	Total eighteen weeks	2,167,691,000		2,074,465,000		93,226,000	***	5

The increase is thus only 5 per cent. for the last 18 weeks as against 12 per cent. for the year, while in the first part of that 18 weeks the increase was 7 per cent., and in the second only  $2\frac{1}{3}$  per cent. That the increase is thus at a greatly diminishing rate is apparent, and conclusively proves the commencement of some arrest to the expansion of business—at least for a time. This conviction is strengthened if we notice how much of the recent improvement is due to the increase of Stock Exchange business. The settlements on the Stock Exchange settling days during the last 18 weeks, as compared with the corresponding period of last year, were as follows:—

	1873.		1872.		Amount.		4
First nine weeks	193,478,000		150,449,000	***	13,029,000	***	7
Second nine weeks	194,424,000	***	175,309,000		19,115,000	***	12
	-		-				-
Total eighteen weeks	887,902,000	***	3\$5,758,000	***	32,144,000	***	9

The general improvement of  $2\frac{1}{2}$  per cent. in the last 9 weeks was thus almost exclusively due to an increase of Stock Exchange transactions. The general increase, as we have seen, is 23,206,000l, and the Stock Exchange increase is 19,115,000l. The general business of the country, so far as the Clearing House returns are any indication, has not grown since last year, but is now of exactly the same amount as it was then.

THE SHAREHOLDERS' BENEFIT FROM RAILWAY AMALGA-MATION .- A curious confession was made by Mr Laing in the railway debate on Tuesday night, which we hope the railway shareholders interested will keep well in remembrance. Some time ago, he said, when a project for amalgamating three railways in the South of England was under discussion, it was calculated that the saving to the three companies would be between 60,000l and 70,000l a year. The question immediately arises—which railways were they? and why was a project so beneficial to the shareholders not carried out? Mr Laing may well be called upon to satisfy curiosity on these points. The number of railways in the South is limited, and there is a concurrence of evidence to the effect that the three railways to which Mr Laing referred are the Brighton, the South-Eastern, and the London, Chatham, and Dover. With the first be is himself identified; the case for the amalgamation of the three is stronger than for almost any set of railways that could be named; and there was a project for amalgamation under discussion in the autumn of 1871. The identification of the three lines named with the anonymous three referred to in Mr Laing's speech is thus almost complete. Why, then, was the scheme not carried out? The answer, we think, can only be the usual one in most cases where an amalgamation, clearly dictated by the interests of the shareholders concerned, and the terms of which ought not to be difficult to settle, is actually not carried out. The interests of directors are in this matter opposed to the interests of shareholders, and so the very most is made of obstacles, and nothing comes of the most anxious negotiations. The obvious conclusion is, that the shareholders of the southern railways ought to stir in the matter themselves. The net gain to all of them at 60,000l a-year is equal to a capital gain of 1,200,000l, or 5 per cent. on the nominal par value of the ordinary capital stocks, which may be roughly stated at 24,000,000l. Supposing the South-Eastern Company to participate only rateably, the capital gain would amount to 10 per cent, on their Deferred Stock. And the real benefit of amalgamation was, we should think, understated by Mr Laing. It would be nearer 100,000l than the smaller sums which he named.

THE PROGRESS OF AN AMERICAN BAILWAY.-In illustrating the question of the profits of joint stock enterprise, one of the most natural illustrations to select is that of railways; but, unfortunately, within the last few years, the most prominent example to an English mind, that of our home railways, would not have supplied the answer which theory would lead us to expect. Even now the rarity of the dividends above 7 per cent. on the English lines is very great, though probably in a few years the account will be different. In America, however, railway enterprise has had a wider field, and there are remarkable cases of what railway profits may be. The New York Chronicle puts, in a very neat form, the history of the Pennsylvania Central railroad for the past twelve years, from which it will be seen that the net earnings have steadily risen from 3,647,000 dollars in 1861, to 8,248,000 dollars in 1872, or about 150 per cent., while during the last few years 10 per cent. dividends have been paid upon an increasing ordinary capital, and in spite of a simultaneous increase of the debenture capital. There could not be a better example of the possibility of railways on a large scale paying 10 per cent. dividends, although it seems only beginning to be possible for the great English lines, which have been kept back by a variety of causes, to reach that degree of profit. The following is the table :-

Capital and Earnings of the Pennstlvania Railroad Company for Twelve Years-1861 to 1872.

Date.	Stocks.	Bonds.	Debt.	Gross Earnings.	Expenses.	Net Earnings.	Divi- dend
	dols.	dols.	dols.	dols.	dols.	dols.	
1861	13,264,100	16.637.400	1,322,915	7,300,000	3,653,062	3,646,938	6

1871	41,339,475	34,192,245	11,276,462	18,719,836	11,823,433	6,896,403	10
1872	53,271,037	35,072,300	15,330,197	22,012,525	13,764,678	8.247.852	10

An Arbitrage Operation.—The Stock Exchange is usually very quick in equalising the prices of stocks which are substantially the same, but it has perhaps been slower than usual in doing so in the most recent case—that of the amalgamation of the Atlantic telegraph companies. By that scheme, the Anglo-American, French cable, and Newfoundland telegraph companies were to become a united company with a total nominal capital of 7,000,000l, in which the respective companies were to participate in certain proportions. Certain bonuses, in addition, are given or held in suspense in the case of the French cable and Newfoundland companies, while the French cable shareholders are liable to a deduction of 5l per share for their debentures; but these points are easily calculable, and the only real question is—given the proportion of each company in the new capital, what is the equivalent price of each existing stock at the new par value, and what would be the equivalent prices at reductions from that par value? At the new par value it has been ascertained the equivalents are  $37\frac{3}{4}$  per 20l share of the French cable company,  $151\frac{1}{3}$  per 100l stock Anglo-American, and 23 per 20l share of the Newfoundland company. But these par values are considerably above market values, and the equivalents at a lower range, taking the French cable as the unit, are about as follows:—

			uivale		Equivalent	
French Ca	ble	Ang	lo-Am	eri-	Newfoundla	nd
at		ca	n Pric	e.	Price.	
374			1513		23	
35		****	141	******	211	
34	*********		1371	******	207	
33	********		1343	*******	207	
32	**********	****	131	******	20	
31	********		127	******	194	
30	**********	****	1233	******	194	

The use of the above table is that, whenever French Cable Shares are at the prices named in the first column, and the actual prices of the Anglo-American and Newfoundland exceed those set opposite, it would pay to sell Anglo-American and Newfoundland and buy French Cable Shares with the price, allowing of course for the expense of the operation. The property by the amalgamation will become substantially the same, and as the margin of difference is now considerable, a good opportunity is offered to the Anglo-American shareholder to take advantage of the market, and exchange his stock for French Cable Shares. Of course, in the case of the Newfound-

land Company, there is a sum of 135,000*l*, or about 3*l* per share, held in suspense, and the speculator who anticipates that he will get that 3*l* will, of course, buy Newfoundland at a higher price than the above equivalent, in which the chance has not been reckoned.

CHEQUES ON THE STOCK EXCHANGE.—The readiness with which all Stock Exchange transactions are settled by cheques, at least among members of the House, will perhaps cause surprise when it is known that the acceptance of cheques is not obligatory. In the case of Mr Roberts, a stockbroker charged with forgery, Mr Levien, the secretary to the committee of the Stock Exchange, has given evidence before the police magistrate to the effect that "it was the practice of the Stock Ex-"change to settle by cheques, and a rule required that those "cheques should be crossed, unless by consent or previous " notice requiring payment in bank-notes; it was a very ex-" ceptional circumstance for any demand to be made for bank-" notes; but whether exceptional or not there was a right to " demand bank-notes on the day of delivery." It is quite intelligible, however, that the right to demand bank-notes Often it would be impossible for should not be exercised. persons in the best of credit to obtain bank-notes, as the cash to meet the cheques for the immense sums which are paid is only obtainable by pledging the securities which are purchased. The great lending business on the Stock Exchange could not conceivably be carried on unless cheques were to pass. The wonder is that in these circumstances charges like the one in reference to which the above evidence was given are not more frequent. The temptation to fraud is overwhelming, and the infrequency of even alleged fraud or default is every way re-The explanation, we think, can only be that members of the Stock Exchange are guided by good rales in regard to the amount of credit they give, and that the opportunity of fraud on a great scale hardly arises unless in the case of members of standing and large private fortune, who have no motive to commit frauds. Should similar charges, however, become at all more common, it will be expedient for the members of the Stock Exchange both to increase the stringency of their rules as to guarantee in the admission of members, and to exercise an increased degree of vigilance in particular transactions, which for a time may rather tend to hamper business. Care must be taken that the confidence which makes it possible to settle immense transactions so easily, and without which the transactions themselves could not take place, is intrinsically well founded. It would be a great misfortune if the facilities now offered to the public by the Stock Exchange were in any way curtailed.

# THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Eevenue during the week ending April 26:—

	Receipts of
	Week Ending April 26.
	£
Customs	432,000

ADOPTION OF A SINGLE GOLD STANDARD AND OF AN INTERNATIONAL SILVER DOLLAR BY THE UNITED STATES.

TO THE EDITOR OF THE ECONOMIST.

SIR,-The United States Congress, after numerous discussions and meetings between committees of the Senate and of the House of Representatives, has revised and amended the laws relative to the Mints, Assay Offices, and Coinage. The "Coinage Act of 1873," as the enactment is termed, is of high importance as inaugurating another of the revolutions now taking place in the coinage systems of the world.

Until very recently, only England and Portugal had a legally as well as practically established single gold standard. But at the present time there are Germany, the Scandinavian nations, Holland, and the United States all giving effect to legislation in the same direction. Thus, the number of people all looking absolutely forward to the single metal, gold, as the medium by which their pecuniary obligations are to be in future discharged, will, at no distant date, be increased to fourfold its present aggregate.

The United States had an exelusive silver standard until 1853. From 1853 to April, 1873, the gold standard has, practically, been exclusively the basis of all contracts in metallic currency however, the silver dollar, or, as it may now be termed, the old, obsolete, silver dollar, and which weighed 26.729 metric gramobsolete, silver dollar, and which weighed 26.729 metric grammes, nine-tenths fine, was never finally repealed, the double standard still remained theoretically in force, although few silver dollars were either minted or remained in circulation. The silver coinage was for all ordinary purposes made a token currency, by reduction, in 1853, of the weight of the half-dollar piece, and of its subdivisions to 24.882 grammes per dollar's worth. Thus, whilst the proportion of gold to silver was 1 to 16 in the American mint system before 1853, it became, from that date, 1 to 14.883. The "Coinage Act of 1873" now reduces the weight of the half-dollar pieces and lesser coins to 25 grammes per dollar's worth, making the mint proportion between gold and silver 1 to 14.9539. It effects, moreover, a greater change in a legal point of view, as it absolutely over, a greater change in a legal point of view, as it absolutely demonetises the old silver dollar of 26.729 metric grammes, by excluding all mention of it from the list of coins that may be minted.

The weights of the gold coins are left unchanged, but the single gold metallic standard is formally proclaimed by making the gold one-dollar piece of 25.8 grains troy the unit of value in the United States.

Section 15 regulates the silver coinage as follows:

"That the silver coins of the United States shall be a trade-"That the silver coins of the United States shall be a trade"dollar, a half-dollar, or 50-cent. piece, a quarter-dollar, or
"25-cent. piece, a dime, or 10-cent. piece; and the weight of
"the trade-dollar shall be 420 grains troy; the weight of the
"half-dollar shall be 12 grams (grammes) and one-half of a
"gram (gramme); the quarter-dollar and the dime shall be,
"respectively, one-half and one-fifth of the weight of said
"half-dollar; and said coins shall be a legal tender at their
"nominal value for any amount not exceeding five dollars in
"any one payment."

"any one payment."

It must be admitted that this section of the American Act makes a somewhat confusing mixture of metrical weights and in this respect, very untroy weights, and that it contrasts, favourably with the more business-like and scientific manner in which the English Coinage Act of 1870 schedules the various coins of the United Kingdom into columns, showing the weights according to troy measure and to the metric

system.

The first of the new American coins, the silver trade-dollar, is exclusively for foreign use. It appears to have been adopted upon the report of the Finance Committee of the United States Senate, of which the Hon. J. Sherman was Chairman, and is professedly issued for the convenience of commerce with Japan and China; but, singularly enough, this new coin is not to be of the same weight as the international silver dollar or one-yen piece recently introduced by the Japanese Government (see my letter in Economist, August 3, 1872). This Japanese silver dollar is to weigh 26.957 metric grammes, supposed to be the weight of the Mexican dollar. An official supposed to be the weight of the Mexican dollar. An official report to the United States Treasury, made in November last by Dr Linderman, formerly of the Philadelphia Mint, and Professor Torrey, of the New York Assay Office, gave 0.27 of a cent. value to the new American silver trade-dollar over the Mexican dollar, but sets down the pure silver contents of the former coin at 0.80 of a cent. better in comparison. As the former coin at 0.80 of a cent. better in comparison. As the Mexican dollar bears a premium in the East, the above American officials consider that their new trade-dollar will, in a short time, command a premium of 6 or 8 per cent. According to Mr Ernest Seyd, the coinage of Mexico has always been rather uncertain in quality and weight. He gives its weight as 27.067 metric grams, the Japanese assume it to weigh

26.957 metric grams. But that the new American trade-dollar is so much heavier, viz., 27.212 metric grams, as with certainty to carry a larger premium does not admit of doubt. That would appear to have been the temptation to make it different from other international coins. This difference is to be regretted, but it is to be hoped that out of the midst of this agreement to differ, differences leading to agreement will some day

emerge.

The most important, however, of the changes to be effected by the United States Coinage Act of 1873 has nothing to do with the trade-dollar, which is unsuited for home use, and the best current alongside of a token coinage. The greater change, which we may now proceed to consider, consists in the alteration in the weight of the current silver coinage of the United States.

The Coinage Act of 1873 reduces the half-dollar and its lower denominations to 25 grammes exactly, per dollar's worth, from April 1, 1873, as against 24'882 grammes from 1853-73. The half-dollar is thus made equal in its weight to 2½ francs of silver token coinage of France, Italy, Belgium, Switzerland, and of their other monetary allies. The quarter-dollar piece is also assimilated in weight to 1½ franc, and the dime, or 10 cent. piece, to the 1 franc piece.

This is looked upon in the United States as a step towards internationalisation of their coinage. The New York Chamber of Commerce had, early in 1872, expressed a decided view upon of Commerce had, early in 1872, expressed a decided view upon the importance of securing an international coinage of silver. In October last, what is called the National Board of Trade, consisting of representatives from nearly all the Chambers of Commerce and Boards of Trade within the United States debated this question, which had been brought before them by the Honourable Samuel B. Ruggles, the chairman of their committee on coin and currency. Mr Ruggles has a just reputation, both in Europe and America, for the great ability and largeness of view shown by him in his persevering labours and largeness of view shown by him in his persevering labours to promote an international coinage in America. Senator Sherman and other members of the Houses of Representatives have warmly espoused the same cause in Congress. Mr Ruggles, on the 5th of last month (March), called the attention of the Chambers of Commerce to the difficulties which had to be got over in assimilating the gold coinage of the United States and other countries. He observed that no real progress had yet been made in diminishing the differences in weight and value between the principal gold coins of the various nations which still remain, "disregarding fractions of

Mr Ruggles thereupon advised that :-"This largely-increased discord between the existing gold coinages of the world renders it evident that the friends of a common international comage would do wisely to confine "their efforts, at least for the present, to the unification of "silver alone, and for the additional reason, that they would "thereby avoid the grave objection that, gold being a legal "tender for debts, any difference in the weight of any new "gold coin should be allowed, or accounted for, in the discharge of existing contracts."

Mr Ruggles is however far too much aware that the only

Mr Ruggles is, however, far too much aware that the only possible means of attaining a really international coinage is for America, England, Germany, and France to have a common gold coinage, not to have insisted, as he did, that:

"The National Board of Trade can hardly fail to consider "that any incorporations of the control of the

"that any inconvenience in accounting for any diminution " in the weight of any new gold coin, in settling existing contracts, must be only temporary; while it is morally certain that the advancing civilisation of the vast and rapidly peopling world of these modern days, cannot and will not permanently tolerate or endure the larger and needless expenditures, by millions and millions, in repeatedly and incessantly recoining its gold coin, and least of all for the purpose of ministering to the local and narrow provincial pride of any separate nationality."

Mr Ruggles then moved a resolution, which was unanimously dented by the Chamber of the control of the cont

Mr Ruggles then moved a resolution, which was unanimously adopted by the Chambers of Commerce, to the effect that measures should be taken for unifying the silver dollar of the United States with silver coins of other countries, by making it equal to twenty-five grammes of silver, the metrical weight of the five-franc piece of the Paris Monetary Convention, and of two florins of the proposed new Austrian coinage.

In the result the American Congress did not go so far as the Chamber of Commerce would have urged them to do by this resolution. Had Congress done so, they would have

this resolution. Had Congress done so, they would have established a system of coinage of full-weighted silver dollars, nine-tenths fine, agreeing indeed with the five-franc pieces of European mints, but doomed, like them, to be victime not the melting not whenever the melting not whenever the melting not whenever the mentions are the least tempts. multing-pot whenever the price of silver gives the least tempta-tion to turn the coin into bullion. Congress confined itself to the reforms already explained in the lesser coins of half-a-dollar and of 25 and 10 cents. But the intrinsic value of the new American coins is not, after all, the same as that of the European coins of the franc system in its token forms. The silver two-franc piece and its fractions are coined as tokens 835 fine, whilst the silver half-dollar and its fractions are

tokens 900 fine.

On the whole, what has been done in the United States can scarcely be viewed as realising more than what even the Germans, scarcely be viewed as realising more than what even the Germans, Swedes, Danes, Norwegians, Japanese, and Dutch are doing, in giving to some of their new gold coins certain points of contact with the metrical system of weight, and thus establishing certain easily calculated equations of intrinsic value. Mr Ruggles is surely too sanguine as to the effect of the American coinage of half-dollars weighing the same as, but containing 0-8125 of a grain more pure silver than, 2½ francs, when he speaks of this "metrical internationalisation" permitting the half-dollars:—

"Whenever carried to Continental Europe in commerce, or by travellers (to whom they will be reculiarly convenient and desirable) to pass without recoinage, discount, or other improvements the continents of the continents of the continents. "pediments, bearing the emblems of cur Republic through all "the populous nations now using the five-franc silver coin, "from the Atlantic Ocean to the Eastern boundaries of "Greece."

Nor can we recognise as possible that such a coin can have the slightest chance, even if it were made to be legal tender in Europe to the extent of five dollars in one payment, as it is made to be in the United States, of becoming, as Mr Ruggles thinks it would, so diffused and popularised as to make the "comparatively provincial circulation of the shilling, the thaler, and the rouble inevitably yield in time to a uniform metrical silver coin of a higher and broader civilisation." metrical silver coin of a higher and broader civilisation. The friends of international coinage may now (Mr Ruggles asserts) "reasonably indulge the hope that the enlightened natives of the European world will all unite ere long in carrying into practical effect the memorable and emphatic declaration at St Helena, by the First Napoleon, that among the civilising agencies most needed in Europe was a common money."

There is no doubt that others of the Napoleon family have

shown a very warm appreciation of the advantages to be derived from an international coinage. For instance, the late Emperor Napoleon III., and his cousin, Prince Napoleon, were warmly in its favour. But a period of really settled, peaceful, and friendly relations, and an extension of international coinage, promoted by men of the type of the late Prince Consort amongst sovereigns, and of the type of Richard Cobden amongst statesmen, will alone make up for the retrograde position since the Franco-German war led to the perversely uninternational scheme of Germany. The first Napoleon uninternational scheme of Germany. The first Napoleon would, however, have scarcely approved of the indirect method advocated in America of letting an experiment in silver-token coinage teach the world the advantages of international gold coinage. When Napoleon spoke of international silver, that metal was the leading standard of coin, and its international use had been more than once mooted in the English House of Commons as a fitting object for England to promote. But now, in 1873, times have altered, and the only feasible method is through the gold standard, which all great commercial nations have now substantially adopted.

In concluding this part of the present observations, the following table may prove not unwelcome to your readers, as showing the exact extent of the changes effected by the new "Coinage" Act of 1873" in the United States:—

After having had the advantage of a discussion, both in Europe and in America, of the comparative merits of a system of free mintage of gold coin—the English system—and of the contrary one of a mint charge or seignorage, the American legis lature has re-affirmed the principle of a mint charge, although it was much urged to alter it. By section 25 of the United States Coinage Act of 1873, which came into operation on the 1st April, it is provided—"that the charge for converting "standard gold bullion into coin shall be one-fifth of one per "converting that the charge for converting that the charge for converting that the charge for converting the charge for charge for converting the charge for charge fo cent.;" and that the charge for converting standard silver "cent.;" and that the charge for converting standard silver into trade-dollars, and for the various operations connected with the refining and preparation of that metal into bars, shall be fixed from time to time by the director of the mint, with the concurrence of the Secretary of the Treasury, so as to equal, but not to exceed in their judgment, the actual average cost to each mint and assay office of the material,

labour, wastage, and use of machinery employed in each of the cases aforementioned.

As regards gold coinage, which, under the new legislation of the United States is made the exclusive standard—the gold one-dollar piece of 25.8 grains troy being the unit of value—it should be observed that there is practically, in the United States, no such plan at work as we have in England, through the medium of the Bank of England, for immediate delivery of gold coin in exchange for bullion at an almost through the medium of the Bank of England, for immediate delivery of gold coin in exchange for bullion at an almost nominal charge of three halfpence per ounce. In America therefore we must add to the mint charge, now reduced from ½ to ½th per cent., a certain allowance for interest of money during the delay intervening between the dates of import of bullion into the mint and the delivery of coin in exchange. This is obviously an indeterminate quantity, as all depends on the amount of gold bullion that may be waiting for coinage at a particular moment. If a month intervene, then the addition to the mint charge of 1th per cent. is (taking interest at 6 per cent. per annum) ½ per cent., bringing up the total charge to 70 ths per cent. Even a delay of between 18 and 19 days only between import and delivery makes the charge ½ per cent.; and we are quite justified in assuming that under such a system one-half per cent. is about the minimum practical charge (including a moderate allowance for interest of money).

It is important to notice this re-enactment of a mint charge in the legislation of the United States just now put into effect; for although it is a reduction below what used to be provided for by their mint and coinage regulations, it is still substantially of considerable importance in international arrange-

It also deserves attentive notice in England by the public and by the Government, that a report to the United States, dated January 22, 1873, submitted by Senator Ames for the Committee of Finance, introduces a Bill which has been read and passed to a second reading by the Senate, entitled "a Bill "to establish the Custom-house value of the sovereign or pound sterling of Great Britain, and to fix the par of exchange.

A consideration of the provisions of this Bill suggests the urgent need of assimilation internationally to the practice of different countries as regards mint charge, or seignorage, as it may sometimes be termed, upon bullion converted into their respective standard coins. The Custom-house value of their respective standard coins. The Custom-house value of the sovereign has, for the last thirty years, been assessed in the United States, by Act of Congress of July 27, 1842, at \$4.84. And this value represents very closely the pure gold contents of the sovereign as compared with the pure gold con-tents of the gold dollar and half-eagle pieces. The sovereign, tents of the sovereign as compared with the pure gold contents of the gold dollar and half-eagle pieces. The sovereign, in point of fact, contains the same amount of pure gold as do \$4.86656, from which, deducting ½ per cent., or \$.02433, we have left \$4.84223, corresponding with sufficient accuracy to 4.84, the Custom-house value above given. This therefore allowed, in a rough but effective manner, for the old customary American mintage or seignorage charge on bullion. This seems to have been equitable as an international arrangement, as England would make practically no charge under its free mint system, upon converting American gold coin into English gold coin; whilst a charge of ½ per cent., at least, would be made in America upon converting English gold coin into American gold coin. The best illustration of the effect of such an alteragold coin. The best illustration of the effect of such an alteration as is contemplated by Senator Ames's Bill may be found in a calculation of what would be its practical effect in an inin a calculation of what would be its practical elect in an international arrangement, such, for instance, as the Alabama claims, supposing the award to have been in pounds sterling and not in dollars. In the discussions in the House of Commons the sum awarded by the Arbitrators has been always stated at 3,200,000l sterling. American statesmen have, very naturally, in their speeches adverted to the amount in dollars, are chiral of it roundly as \$15,500,000. Now this differs but naturally, in their speeches adverted to the amount in donars, speaking of it roundly as \$15,500,000. Now this differs but very slightly from the figures of \$15,488,000, at which the amount would come out upon the old calculation of \$4.84 per sovereign, under the Custom-house value still in force by the Act of Congress of 1842. But, if Mr Ames's Bill were passed so as to render applicable to claims like those in re the Alabama, the new valuation, which, in effect, throws the 1 per paintage or reignerate upon bullion on the shoulders of cent. mintage or seignorage upon bullion on the shoulders of England in international estimates, a different calculation would be necessary, and the equivalent of 3,200,000l of any future English compensatory damages would amount to 15,572,992 dollars, instead of 15,488,000 dollars, being 84,992 dollars too much, caused by the valuation of the sovereign at its gross intrinsic contents of 486656 dollars, instead of at its real intrinsic value in the United States, as bullion, of 4.84 dollars. If the Americans had a free mint, as we have, the larger valuation would be right enough; but whilst they treat our coin as bullion, and charge, directly and indirectly, at least a per cent. on converting that bullion into their coin, the estimate of the pound sterling at 4.84 dollars is the correct one to maintain in international tariffs and assessments of all kinds.

April 22, 1873.

The above return, compared with that of the preceding week, exhibits the following changes:—

Increase.	francs.
Circulation	25,492,860
Treasury account	15,779,762
Cash	2,935,359
Trade discounts	13,556,567
Decrease.	francs.

The disastrous effect produced by the result of the elections on the money market, instead of diminishing continues to increase. The first impression produced by the defeat of Count de Rémusat, manifested by a fall of from 1 to 1½ per cent. in the State funds, has become intensified by reflection, for no illusions can be now maintained, and it is quite clear to every one but those who refuse to see, that France is rapidly advancing towards a terrible crisis. The elections which have just taken place are a forecast of what may be expected when the dissolution so impatiently demanded by the revolutionary party shall take place. The return of M Barodet in Paris, although sufficiently alarming in itself, is aggravated by the elections in the departments where, of the eight members chosen, three belong to the Radical party, and

four others of more moderate views have only been returned because no Red candidates presented themselves. The elections on the 11th will be of even a more marked character than those which have just taken place; so far the new members have been only sympathisers with the Commune, we are now to have a member of the Commune itself. M. Ranc has come to have a member of the Commune itself. M. Ranc has come forward as a candidate for Lyons, and his success is so certain that the Conservatives will probably abstain from contesting the seat. The eyes of M. Thiers are evidently now open to the danger to which the country has been led, but whether he advances or recedes, the peril is now equally great. The Government is paralysed, and does not know on which side to look for safety. It is easy, says the Débats, to speak contemptuously of a policy of equilibrium, but we defy any one to incline to one side or the other without plunging the country into civil war. But while the Government is hesitating the revolutionary party is pushing on, and will no longer allow the Government to continue its policy of neutrality, and the Assembly, the only barrier its policy of neutrality, and the Assembly, the only barrier that could be opposed to the rising tide, has been wantonly discredited by those to whom it should have looked for support. The present feeling of dismay among the orderly classes can only be compared to that on the 18th March, 1871, at the moment of the outbreak of hostilities between the Government and the Commune. Speculation is deadened, operations ment and the Commune. Speculation is deadened, operations are being closed, and securities are being realised. Even the best French shares have not escaped depreciation; Bank of France have lost 115f in a single day. On the other hand, there is a disposition to invest in foreign stocks; even Italian, which have been folling from dayto day recovered 40 cents. which have been falling from day to day, recovered 40 centimes yesterday, while French rentes fell from one-half to three-quarters per cent. The improvement in the Italian funds was not, however, maintained. The denial given to the rumour that the future coupons abroad would be paid in paper has not restored confidence, for in the embarrassed state of the Treespars and with the increasing premium on cold has not restored confidence, for in the embarrassed state of the Treasury and with the increasing premium on gold, the payment in paper is only a question of time. The depreciation is now above 15 per cent., and if the corn and silk crops are not good it will probably amount to 20 per cent. before the end of the year. Russian and Turkish Bonds, and United States' Loan, however, command higher rates. Spanish Exterior has lost ‡ per cent. in the week, and Banque de Paris Shares have followed the movements of the Spanish funds. The rates of compensation fixed to-day for the funds. The rates of compensation fixed to-day for the monthly settlement were 53f 95c for the Three-per-Cents, 86f 30c for the Fives, and 88f 60c for the Loan, or from 1½ to 2 per cent. lower than at the commencement of April. Contangos are moderate, and, after 30c had been demanded for carrying over the Threes, and 29c the Lcan, 27c and 25c were accepted, there being a scarcity of money for short loans. To-day's market, after opening with a fall of 60c on the Threes, and 50c on the Loan, closed at better rates; 30c and 40c on the Stocke respectively were however lost in the day. 40c on the Stocks respectively were, however, lost in the day. The more optimist speculators hope that the fall may be stayed after the liquidation.

Last week had closed with a general improvement, as the return of Count de Rémusat was then looked on as certain; a comparison with Saturday's rates will show the effects of his defeat:—Threes have lost 2f 02½ centimes in addition to the month's interest; Fives, 2f 45c and the coupon; the Loan, 2f 55c; Bank of France, 230f; railways, from 10 to 20 francs; Banque de Paris, 42f; Credit Foncier, 27f, and Credit Mobilier, 17f 50c. Subjoined are to-day's prices for the account:—

The accounts from the wine-growing districts represent the crops as in great part destroyed by the frosts of last week. The loss in the Gironde is estimated at two-thirds of the entire yield, or about 200,000 tons of four hogsheads each, representing a value of 100 millions of francs. The other departments have suffered in the same proportions, and the loss for the whole of France is set down at 500 millions. The prices of ordinary wines at Bordeaux have advanced from 100f to 125f per tun.

suit of some importance relative to the powers of the Syndicate of Agents de Change, which exercises authority over transactions on the Paris Bourse, has just been heard before the Civil Tribunal of the Seine. In 1869 the Credit Foncier made an issue of 60,000 new shares in the subscription of which a right of priority was given to the proprietors of the old shares in the proportion of one of the new to two of the old. The subscription was to close on the 7th March, 1870, and in the meantime each of the old shares was marked after the delivery of the half share to which it had a right. The unmarked shares on which the privilege of subscribing had not been exercised naturally became rare on the market. In January, 1870, certain speculators, among others M. Sou-In January, 1870, certain speculators, among others M. Sourignes, the plaintiff in the present case, made purchases of unmarked shares for delivery at the end of that and the following months, anticipating that they would become so difficult to find that the sellers would be completely at their mercy. Towards the end of January it became evident that the unmarked shares had disappeared from the market, and that the sellers for subsequent liquidations would be completely "strangled." The Syndical Chamber then intervened, and on the 31st January decided that from the 7th be completely "strangled." The Syndical Chamber then intervened, and on the 31st January decided that from the 7th February sellers of the unmarked shares might liberate themselves by delivering the marked with the half share belonging to each. Buyers were by this measure deprived of the profits on which they had counted, and M. Sourignes actioned the Syndical Chamber to obtain compensation for the loss he had counted by an arbitrary intervention in an operation which Syndical Chamber to obtain compensation for the loss he had sustained by an arbitrary intervention in an operation which he maintained to be perfectly legitimate. The Chamber defended the regulation on the ground that it had not a retroactive effect, as, being announced before the settlement at the commencement of February, buyers might have refused to carry over the operation, and that in consenting to do so they implicitly accepted the new conditions of an equivalent between the two classes of shares. The Court took that view, and has given judgment for the defendants on the ground that the Chamber had not exceeded its powers. The verdict is, no doubt, a proper one, in so far as it concerned the right of the Syndies to exercise an act of the authority with which they are Syndics to exercise an act of the authority with which they are invested; but it is doubtful whether the Syndics acted wisely in interfering in contracts freely consented to, in order to relieve rash speculators from the consequence of foolish engagements. The Court also introduced into its judgment the rather puerile observation that the Syndical Chamber had performed an act of financial morality in defeating a manœuvre of speculation, overlooking the fact that the transaction was as much a speculation on the part of the seller as of the buyer, and that the risk must have been taken into account in the price.

The great banking companies are now holding their annual meetings, and the year 1872 not having been subject to the same disturbing influences as 1871, the results in all cases are satisfactory.

The report of the Credit Industrial shows that the deposits amounted to 204 millions, or an increase of 65 millions on 1871 and of 30 millions on 1869, the last normal year; the discounts represented a sum of 318 millions against 177 millions in 1871. The dividend for the year has been fixed at 24f, or 194 per cent. on the paid up capital.

The Credit Lyonnais pays 10 per cent., free of income tax, and adds 2½ millions to its reserve, which now amounts to 40 per cent. of its capital.

The Societe des Depots et Comptes Courants received in deposits in 1872 380 millions against 212 in 1871; its discounts increased from 235 millions to 451 millions. The dividend is fixed at 15f, or 12 per cent. This company proposes to double its capital by the issue of 120,000 new shares, one-fourth paid up. M. Deseilliguy, Deputy, was chosen a member of the board in the room of Mr William Cladatore decoared. Gladstone, deceased.

The Societe Algerienne shows in its report deposits to the amount of 92 millions and discounts for 385 millions. The company has taken part in the formation of the Soumah iron and copper mines. The domaine of the company in Algeria consists of 250,000 acres. A dividend of 9 per cent. was declared

declared. The Franco-Austrian Bank pays 9 to per cent. for the last

### GERMANY.

(FROM OUR OWN CORRESPONDENT.)

BERLIN, April 30.

The Coinage Bill having passed the second reading, I re-frain from giving any detailed description of the amendments brought forward during the course of the discussion. At present it remains uncertain whether the Bundesrath will accede to the desire expressed in the Reichstag for changing some important provisions of the Government draft. Besides the question, referred to in my last letter, of coining two-mark the question, referred to in my last letter, of colling two-mark pieces, there remains a controversy as to whether the sovereign Princes' profiles should be placed on the small coins, together with the Imperial eagle on the reverse. As to gold coins, it was held a prerogative of etiquette to remind the German public, while paying or receiving money, of their allegiance due to about twenty kings, dukes, and princelets. But, whether princely features should be delivered to immortality and to numignatic collections on coins of nickel or tality and to numismatic collections on coins of nickel or copper is a different thing, because the lower class, it is said, copper is a different thing, because the lower class, it is said, would more than pay for the advantage of having their sovereign's portrait by the illegibility of diminutive inscriptions on the coined tokens. Hence, the Reichstag has decided upon having no particular portraits at all on small coins. Whatever may be said against this proposal within the Bundesrath, will belong to small gossip rather than to serious contemplation. I am quite sure that there will be several alonicatentiaries leaving down the law and question precedent. plenipotentiaries laying down the law, and quoting precedent for having coined ducal "copper-heads" or "nickel-heads" on small coin. The most important amendment, however, and the principal cause of discussion, will be the relation between the actual circulation of about 300 million German bank-notes and of State paper currency on one side, and Imperial cold currency on the other Contrary to the Minister Mr Delay gold currency on the other. Contrary to the Minister Mr Delbruck's opinion, the Reichstag has resolved upon cancelling, before the 1st January, 1875, the State paper currency notes of under a hundred-mark value. As yet it appears very improbable that the Bundesrath will be willing to adopt such a measure, although it is quite clear that the actual circulation of so much State paper and Kassuch a measure, although it is quite clear that the actual circulation of so much State paper and Kassenscheine proceeding from the small German States is attended with serious inconvenience. A very remarkable article on the French War Money has just been published by Mr Bamberger in the last issue of the Preussische Jahrbücher. The subject of war indemnity having, until recently, received little attention on the part of political economists, I feel entitled to epitomise the more important conclusions of the writer, whose authority has been established in the discussions writer, whose authority has been established in the discussions of the Imperial Parliament. His remarks are to the following effect:—The sudden transfer of the amount of five milliards from the one country to the other, being unprecedented in financial history and impracticable within a short period of time, cannot be carried out in the way of sudden liquidation between the parties engaged in receiving and paying a sum equal in its amount to the maximum of coined money estimated to be circulating in France. Hitherto, for the most part, and altogether for what is yet to be paid, the transfers effected by France consisted, and must of necessity consist, of paper securities rather than of actual hard cash; the removal of so enormous a capital out of the property of one nation, and its absorption into the property of another, requiring much more time than actually has been allowed for by the stipulations agreed upon between the contracting parties. Hence it will be impossible to avoid contradiction between the nominal transfer of values and the real state of the money market. Economically considered, the distribution of instalments over a series of very short periods might be considered as an error to be condemned on the part of the German Government, entailing, as it does, such heavy consequences on the money market of a State that the winner might really, in the long run, turn out to be, financially, the loser. Therefore, it might have been preferable to accept sufficient financial guarantees, instead of asking for values to be immediately realised; seeing that this immediate realisa-tion leads to an unnatural increase in the circulation of values, and to an equally unnatural instigation of speculation and enterprise, to an advance in the price of all the necessaries of life, and to a rise in wages, laid out in work less productive than it would have been under ordinary circumstances, for it is inevitable that many thousands of working people should be overpaid on Government works, in the construction of fortifications, and in the fabrication of war implements of

all sorts. When this kind of public work, however, has terminated, the released working people, returning to ordinary occupations of industry and agriculture, might become importers of war premiums on wages into the daily work of either manufacturing towns or of agricultural pursuits. Therefore, the repayment of public debts out of the war funds should be delayed as long as possible on the part of Government, and it might be desirable, in the interests of Germany, that some indirect checks should be found for evading any sudden issue of very large amounts of capital. The last milliard due to Germany ought to be paid by means of some arrangement affording a sufficient degree of security to the creditor, and at the same time also a warrant against the dangers to be apprehended from violent changes in the regular circulation of moneyed values. Moreover, the writer, in proposing some secondary means, goes on to advocate the maintenance of a higher rate of discount on the part of the larger banking establishments, in order indirectly to discourage unsound speculation. I need not mention how much Mr Bamberger's opinion is in accordance with the general views I have expressed in my former letters to the Economist. Strange to say, they receive a good deal of corroboration from the evident dissatisfaction which is rapidly spreading, as much amongst the working people as within the middle classes of the German population, whose general feeling is very far from the elevation of victorious strength, and very much approaching depression. There is every reason to believe that, in consequence of a very sudden influx of foreign capital and its immediate circulation, German industry might, at least partly, lose that power of competition which it has been possessed of until recently; and it is no exaggeration to say that the state of the labour market is already in such a state of disorder as to

As to the money market and the Stock Exchange business, the last week has been unusually bad, all the railway bonds remaining inanimate, although the returns published by the companies show an increase in the figures of passengers and the goods transported. Most of all, banking shares underwent a considerable reduction, some of the metropolitan establishments losing on one day from 5 to 10 per cent. Sometimes, as on Thursday, it appeared that a new tide was beginning to set in for speculation. Very soon, however, it became evident that the retreating army of industrial and banking values required only a pause to gather new force for their steep descent to a valley the bottom of which still

remains unseen.

approach to calamity.

Not only the moneyed interest, but also the agricultural prospects have had to suffer intensely. At least, it is certain that in the higher regions of Western and Central Germany heavy snowfalls and severe frost have destroyed many fair expectations which were entertained in consequence of the first appearance of the spring. In the wine-growing districts of the Rhenish Provinces the quotations of the thermometer may be said to have caused a panic, a great many orchards having changed their green colours into black.

Bankers' Clearing-house, May 1, 1873.

We have received the following account of the Clearing-House operations for the last year :-

JOHN C. POCOCK, Deputy-Inspector.

### TO THE EDITOR OF THE ECONOMIST.

Sir,-I beg to forward you the subjoined statistics, showing the working of the Clearing-house for the year ending on the 30th April, which is the sixth during which these statistics have been collected. The total amounts for the six years have been :-

	Total for the Year.		On Fourths of the Month.		Stock Exchange Account Days.	On Consols Settling Days.
1867-68	3,257,411,000	***	147,113,000	***	444,443,000	 133,293,000
1868-69	3,531,039,000		161,861,000		550,622,000	 142,270,000
1869-70	3,720,623,000	***	168,523,000		549,763,000	 148,822,000
1870-71	4,018,464,000		186,517,000		635,946,000	 169,141,000
1871-72	5,359,722,000	***	229,629,000		942,446,000	 233,843,000
1872-73	6,003,335,000	***	265,965,000	***	1,032,474,000	 243,561,000

The total amount of bills, cheques, &c., paid at the Clearing-house during the year ending April 30, 1873, shows therefore an increase of 643,613,000l over 1872, and of 2,745,924,000l over 1868.

The amounts passing through on the 4ths of the month for 1873 have amounted to 265,965,000l, showing an increase of 36,336,000l over 1872.

The payments on Stock Exchange account days form a sum of 1,032,474,000l, being an increase of 90,028,000l over 1872.

The payments on Consols account days, for the same period, have amounted to 243,561,000l, giving an increase of 9,718,000l over 1872.

I am indebted to Messrs Derbyshire and Pocock, the inspectors of the Clearing-house, for the above figures, which will, I think, be interesting to many of your readers,—I am, Sir, your obedient servant,

JOHN LUBBOCK, Hon. Sec. London Bankers.

15 Lombard street, May 1, 1873.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities, Reserve, and Rate of Discount, for three months ending 30th April, 1873:-

	Date.	Circula- tion, excluding Bank Post Bills.	Coin and Bullion.	Deposits.	Securities in Banking Department	Reserve.	Rate of Discount

- Hamburg (3months)	18 71 71	13 101 104	13 101 111	13 11 111	2050
Clearing-house return	***	89,307,000	106,051,000	137,743,000	112,535,000

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1863, a deficiency of 4,238,995l; in 1870, a deficiency of 2,853,775l; in 1871, a deficiency of 215,177l; and in 1872, a deficiency of 4,100,673l. In 1873, there is a deficiency of 6,499,958l.

In 1863, the market was active, mainly because the Bank had reduced its rate in consequence of the abundance of money, and because the apprehensions regarding continental affairs had passed away. The Lancashire operatives continued to suffer from the stoppage of the cotton supply, and 410,000 were receiving relief.

In 1870, there was a little more inquiry at the Bank, and the private securities had gone up a million, but otherwise the market generally was quiet. The only foreign stocks advancing were Turkish and Spanish.

In 1871, the demand had improved slightly, but the supply of money was still great. Most good securities were advancing in consequence, and now that things were settling into order at Paris there were fears of a relapse.

In 1872, renewed firmness and activity characterised the exchange, and the rates for money were going up. In the stock markets there was some interruption of business, owing to the 1st of May holiday, but till the end of the week prices had been inclining upwards. The scarcity of money and the impending French loan acted, however, latterly as checks.

The account of the Bank of France for the week ending May 1 shows the following changes :-

Assets.	May 1.		April 24.		Increase		Decrease
Cash	32.474,000	***	32,356,000	***	118,000	***	***

DISCOUNT AND MONEY MARKET. - This has been another; quiet week in the money market, and the minimum rate outside has continued steadily under the Bank. The rate for three months' Bank bills is now 33 to 37, and for very short

fine paper the rate is 34. The demand at the Bank has also been very quiet. The abundance of short money has continued to be felt all through the week, very little difference being made by the Stock Exchange settlement. The rate on English Government securities at call on the Stock Exchange remains about 2 per cent., with very little business doing.

The changes in the Bank account during the week have not been great, but on the whole the Bank is not quite so strong as it was a week ago. The most favour able feature is that the private securities have run off to the extent of 950,366l. This has been done, however, at the expense of the deposits—the private deposits having diminished to the extent of 1,404,560l against an increase of 306,650l in the public deposits—so that the reserve has not increased by the repayments to the Bank. Instead of increasing, the reserve has in fact diminished 115,1521. At the same time, notwithstanding the influx of 150,000l from abroad during the week, the bullion in the Bank, in consequence of withdrawals for the country, has only increased 54,548/. Altogether, therefore, the account shows no improvement, and the reserve being so low as it is, the position is not satisfactory. In spite of the present ease, circumstances may at any moment occur to show that the Bank's margin against contingencies is inadequate, and then a sharp advance in the rate would be necessary.

There is still a strong demand for gold in the bullion market.

We subjoin our usual quotations for mercantile paper having various periods to run:

Bank		mont	hs	34	7	per cent.
Do Trade	-		18	44		per cent.
Do	4	-	****************	#	710	per cent.
Do	6	_	****************	44	5	per c

The allowances for money at the joint stock banks and discount houses are now

Private and Joint Stock Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do at seven days' notice		per cent.
Do at fourteen days' notice	31	per cent.

The discount quotations current in the chief continental cities are as follows:-

Vienna 5 5

THE STOCK MARKETS.—Business has been very much at a standstill this week. Indeed, the absence of speculation and of dealings generally in Stock Exchange securities has been clearly reflected in the Clearing-house returns, the amount passed through that establishment on Friday last, the half-monthly settling day, having been only  $37\frac{3}{4}$  millions as against  $48\frac{3}{4}$ on the corresponding settling-day of 1872. The slackness this week is in part accounted for by the fact that the "Account" was made to extend over four days, while the 1st May was a holiday, thus leaving only two clear days for new business, and those, too, preceding and following a holiday. Under such circumtances it cannot be surprising that the appearance of the Stock markets has been dull, and that in a few instances quotations have drooped. There has occurred but little variation in Home Government Securities, and almost the only feature in Foreign Stocks has been the relapse in French Rentes. The department of British Railways has remained unusually quiet, the movements, such as are recorded below, proving altogether fractional. Turning to Colonial Railway investments, the Grand Trunk Reconstruction bill has passed both Houses of the Canadian Legislature, and the quotations of the Stocks interested have somewhat recovered in consequence, while the previous fall in Great Western shares has been arrested. As regards United States securities, the Government bonds are slightly firmer, the Indian troubles in Nevada and Oregon, of course, in no way affecting the stability of those guarantees; and in the Railroad department the movements, with one exception, have not been of much account. In Atlantic and Great Western Third and Consolidated Mortgages, however, the fall has been

considerable, transactions on Wednesday having taken place in the former as low as 363. The reason assigned for this was the failure of weak speculators to pay their differences at the settlement, the "making-up price" having again entailed a heavy loss to the speculative holder, and in consequence there was a forced sale of their securities. Belgian lines, after the recent advance, have exhibited dulness. Banks and Finance shares have not attracted much attention, and for Mining ventures there has existed an unusually small inquiry. Atlantic Telegraph securities have continued the prey of conflicting rumours respecting the proposed amalgamation, and while French cable shares have recovered, Anglo-American stock has ruled flat, the terms of a provisional arrangement understood to have been arrived at between the two companies being regarded as relatively favourable to the former. The com panies representing the Eastern cables have ruled steady, the amalgamation of the companies beyond India, now completed, being viewed with favor. Land shares have been less prominently before the public, and Hudson's Bay shares fell sharply on Wednesday, fears being entertained of an Indian raid in Manitoba. London and St Katherine Dock Stock has risen considerably, and Gas Light and Coke Shares are a little higher on the powers obtained to raise the price of gas. Today's market has been somewhat more animated. An advance has occurred in Home Railways, and Atlantic and Great Western Securities, while, on the other hand, the Foreign department has generally been heavy. Amongst Telegraph Shares, Anglo-American Stock is again lower; but an active inquiry has existed for Telegraph Construction Shares.

ENGLISH GOVERNMENT SECURITIES.—An advance of  $\frac{1}{8}$  occurred in the Funds on Saturday last, which, however, was lost on Wednesday, a day of pretty general depression on the Stock Exchange. Tuesday next will be the monthly settling-day in Consols. India Stocks have been well supported at a slight advance.

COLONIAL GOVERNMENT SECURITIES.—There is hardly any change in these this week. Three stocks have risen—Victoria 5 per cent., ½; New Zealand Consolidated 5 per cent., ½; and Cape of Good Hope 5 per cent., 1. Only one has fallen—Canada 1874, 1.

FOREIGN GOVERNMENT SECURITIES .- The variations of the week in Foreign Stocks have proved fairly numerous, but of a miscellaneous character. The most noteworthy, however, have occurred in French Rentes of all kinds, which, after ruling firm on Saturday, fell rapidly upon the defeat of M. Rémusat, the Minister of Foreign Affairs, at the Paris elections on Sunday last, until yesterday evening the Three per Cents. on the Paris Bourse exhibited a fall of 13 per cent., as compared with Friday last. The alarming inferences drawn from the incident by the Paris press would appear, however, to have been a little exaggerated, and to-day some recovery has been noticeable. Spanish Stocks have shown no recovery this week; and there has been a further depression in Egyptian securities. Italian Five per Cents. of 1861 have fluctuated considerably in connection with the exchanges and dealings on foreign account and the resignation of the Ministry, and the net result at the end of the week has been that they are again lower. Costa Rica, Honduras, Argentine "Hard-Dollars," and Guatemala Securities have advanced, the first-named on the notification that Messrs Bischoffsheim are in receipt of funds sufficient to pay the next three half-yearly coupons. Arrange-

ments have also been come to with respect to the conversion of the existing debts of New Granada, which will be submitted on the 7th inst. for approval. Peruvian, Turkish, and Russian Stocks have varied but slightly; and the further movements have been of a trifling character. To-day's movements were adverse; Italian and Spanish receding in price.

English Railways.—The Home Railway Market has been exceptionally quiet throughout the week, the winding-up of the Account and yesterday's holiday distracting attention almost altogether from fresh speculations. Saturday's market was weak, Brighton stock being flat; and on Monday, though there was a rally in the afternoon, Lancashire and Yorkshire stock suffered upon the announcement of a serious fire at the company's carriage works in Manchester. Tuesday was the settling-day, and money being plentiful, and there being not much pressure of business, some purchases were made for the new Account, North-Eastern and South-Eastern stocks being in request. On Wednesday, however, the tendency of quotations was downward, the traffic returns from the Midland Counties not having been so satisfactory as those previously issued by the Southern companies had led the market to expect. The upshot of the debate in the Commons upon the purchase of the Irish lines, was also referred to as a cause for depression, though the effect upon the English companies could have been but trifling. Should the Irish system be hereafter absorbed by the State, it would appear that the companies will have to take the initiative, stating the terms they would be willing to accept. There is really very little else worthy of record in this department. The want of inquiry has caused a certain amount of dulness; and on balance, and though South-Eastern and the Scotch companies exhibit a trifling advance, there has been visible a fractional decline. During to-day increasing firmness companies being more particularly in request.

The following shows the principal changes for the week in the quotations of ordinary steeks, comparing the latest unofficial prices:—

Joint Stock Banks.—The business in these continues to be of a favourable character, though the changes are only small. The chief rise is in Bank of New Zealand shares, up 2. Bank of South Australia, Colonial, City of London, Provincial of Ireland, and Union of Australia have each gone up 1. City, Bank of British Columbia (new), London and County Scrip, London Joint Stock, and Union of London are each up \( \frac{1}{3} \); Anglo-Foreign has advanced \( \frac{1}{4} \), Consolidated and Land Mortgage of India each \( \frac{1}{3} \). These have gone down—Bank of British Columbia \( \frac{1}{2} \), London Bank of Mexico \( \frac{1}{2} \), and London and River Plate, new, \( \frac{1}{4} \).

TELEGRAPHS.—The shares of the French Cable have partially recovered the depression of last week, but otherwise the progress of the amalgamation scheme has not generally raised prices in this market, and on balance it is flat. Submarine have advanced 3; French Atlantic, 1\frac{3}{4}; and West India and Panama, \frac{1}{4}. Anglo-American have further receded 8; Newfoundland are down \frac{1}{2}; Cuba, \frac{1}{4}; Great Western, \frac{1}{2}; Indo-European, 1; Eastern, New, \frac{1}{3}; Submarine Cables Trust have receded 2. Construction shares have revived; and Indiarubber Works have advanced 1; Telegraph Construction, 2.

MINES.—British mining shares have not recovered during the past week, and the fall of the Cornish copper standard has added another element to the depression. The following have advanced:—West Seton,  $7\frac{1}{2}$ ; Hingston Downs,  $\frac{1}{2}$ ; Assheton,  $\frac{1}{4}$ . On the other side, Marke Valley have faller  $\frac{1}{2}$ ; Great Wheal Vor,  $\frac{1}{2}$ ; Tankerville,  $\frac{1}{2}$ ; East Caradon,  $\frac{1}{4}$ ; and Wheal Bassett,  $2\frac{1}{2}$ . In the foreign market, silver mining shares have risen, viz.:—Flagstaff,  $1\frac{1}{4}$ ; Last Chance,  $\frac{3}{8}$ . New Quebrada have also advanced  $\frac{1}{4}$ ; Richmond Consolidated,  $\frac{1}{4}$ ; Russia Copper,  $\frac{1}{4}$ . On the other side gold mining is out of favour; St John del Rey have receded  $2\frac{1}{2}$ ; London and California,  $\frac{1}{4}$ ; Sweetland Creek Gold,  $\frac{1}{4}$ ; Australian United Gold,  $\frac{1}{8}$ ; Scottish Australian,  $\frac{1}{8}$ .

MISCELLANEOUS.—The market has been very quiet in this department during the week, and there are few movements of much note either way. The most conspicuous change is another fall of  $2\frac{1}{2}$  in Australian Agricultural. The upward movement has been shared in by these:—Roumanian Government Iron, 1; United States,  $\frac{1}{2}$ ; Ebbw Vale Iron,  $\frac{1}{2}$ ; Ceylon Company,  $\frac{1}{2}$ ; Fore street Warehouse,  $\frac{1}{8}$ ; United States Rolling Stock,  $\frac{1}{4}$ ; Peninsular and Oriental Steam, 1; Royal Mail Steam,  $\frac{3}{4}$ ; Dublin Tramways,  $\frac{2}{8}$ ; North Metropolitan, New,  $\frac{1}{4}$ ; Anglo-Mexican Mint,  $\frac{1}{2}$ ; Native Guano,  $\frac{1}{4}$ . These have declined:—Share Investment Trust, 1; Nerbudda Iron, 1-16; City Offices,  $\frac{1}{2}$ ; International Financial Society,  $\frac{1}{8}$ ; London Financial Association,  $\frac{1}{2}$ ; North British and Mercantile,  $\frac{1}{4}$ ; Lisbon Steam Tramways,  $\frac{1}{4}$ ; French Asphalte Company,  $\frac{1}{2}$ ; Italian Irrigation,  $\frac{1}{4}$ ; and Patent Gunpewder,  $\frac{1}{4}$ .

According to the Gazette return of this evening, the movement in the precious metals during the week ended April 30, has been as follows:—Gold—import, 934,239l; export, 48,500l. Silver — import, 258,468l; export, 272,222l. There have been no gold operations of importance at the Bank to-day.

# NOTICES AND REPORTS.

# STOCKS.

Cape of Good Hope Loans Consolidation .- The Crown Agents for the Colonies have, in conformity with a recent Act of the Legislature of the Cape of Good Hope, issued proposals for the consolidation of the public debts of that colony into new debentures of uniform character, bearing interest at the rate of 41 per cent. per annum from the 15th April last. The old debentures now outstanding amount to about 1,500,000l; new 44 per cents, including those recently issued for the purchase of the Cape Railway, may be given in exchange for old debentures to the extent of 2,289,000/. The terms of consolidation will be found in our advertising columns.

New Granada Bonds.—A meeting of bondholders is called for the 7th May to consider the convention with the Govern-

ment. It appears:—
The Customs' duties are specially hypothecated to the new issue of 2,000,000/ bonds, bearing 42 per cent. interest till 1878, 43 thereafter, and 5 per cent. as soon as the Customs shall produce \$3,000,000. The nominal amount of old bonds given in exchange for each new bond will be specified, and, in case of default during one year, the bondholders will re-acquire the original terms. The coupons are payable quarterly, and receivable as cash by all Government offices. By an annual sinking-fund of 1½ per cent. from 1878, the bonds will be redeemed by the Government at par, instead of, as at present, by the bondholders themselves, at the low market price of the old bonds. Two million hectares, equal to 5,000,000 English acres, of public lands, are given in compensation for the conversion, and a company, with a sufficient capital out of the new bonds, is to be formed to make them available.

# RAILWAY COMPANIES.

Antwerp and Rotterdam.—The receipts of the Grand Central Railway during 1872 amounted to 612,741l, and in 1871 to 561,660l, showing an increase of 51,081l. The expenses amounted to 294,990/, and for 1871 to 272,830/, showing an increase of 22,160/. The general result of the working of the Grand Central undertaking was a profit for the year 1872 of 317,751l. The increase in the profit was 31,766l, as compared with that for the year 1871. The share of the Antwerp and Rotterdam Company in the profit, which in 1871 was 123,686l, increased in 1872 to 139,348l. The balance attributable to the shares was 101,213l. The excess of profit is sufficient to pay a dividend of 24f on the ordinary shares, and 11½f on the dividend shares, leaving a disposable 21,584l. The agreement made with the Luxembourg Railway Company has been made the pretext for unjust accusations.

Antwerp and Rotterdam.-The dividends for 1872 will be payable in Brussels as follows:-Ordinary shares, 24 francs per

share; and dividend shares, 11.50 francs per share.

Atlantic and Great Western Leased Lines Rental Trust.—The numbers are published of 29 bonds of the "1872" issue, and of 22 bonds of the "1873" issue, all of 200l each, which were drawn on the 1st inst. for redemption at par by Messrs Bischoffsheim and Goldschmidt on the 1st July.

Caledonian.—The directors have made a call of 2l on the

ordinary shares, payable on the 19th May.

Canada Southern.—The Stock Exchange Committee have appointed Wednesday, the 7th inst., a special settling day in the scrip of the issue of 500,000l sterling 7 per cent first

mortgage bonds to be officially quoted.

Demerara.—The accounts showed a net profit for the six months of 9,211l, making with the balance from the previous half-year 10,548l, out of which the directors recommended a dividend on the original stock at the rate of 8 per cent. per

annum (5,400l), and on the preference stock (4,025l), leaving

Dunaburg and Witepsk.—The gross receipts of 1872 amounted to 1,905,174 roubles, against 2,190,315 roubles in 1871; and the net profits amounted to 381,750 roubles, against 469,513 roubles in 1871, showing a decrease of 87,764 roubles. In addition to other causes, the directors believe that the breakage of rails on the line has been considerably in excess of previous years.

Glasgow and Cape Breton (Nova Scotia) Coal and Railway. The report refers to an arrangement entered into to work the colliery at a fixed rate per ton (to include loading into the railway trucks), with a guaranteed minimum monthly output of 6,500 tons. This contract, which commenced on the 1st March for the remainder of 1873, will enable the directors to arrive at their exact monthly expenditure for raising coal, and furnish them with accurate data on which to base their contracts. The board have undertaken so supply several steamers, and are in treaty to send trial cargoes for gas and smelting

Grand Trunk of Canada.—The revenue accounts for the past and corresponding half-years :-

ment bonds interest.	195,738	***********	174,727
Surolus	1.650		311

All available net revenue has been applied to improving the line. The very severe weather in December caused a loss of 13,000l in traffic, while it added to the working expenses. The number of miles re-laid during the year was 236, of which  $182\frac{1}{2}$  miles were laid with steel. The total length of steel rails laid up to December last was  $291\frac{1}{2}$  miles. The addition to capital during the six months was 1,018,037l, of which 464,075l was the capitalised interest, and 346,926l on account of the purchase of the Montreal and Champlain. Further sections of the Intercolonial will be opened during this year. After the expenditure of the proceeds of the 10,000,000l of new ordinary stock, which it proposed to issue, the directors feel that a new condition of things will be established on the Grand Trunk

Oude and Rohilkund .- The directors invite tenders for an issue of 4 per cent. debenture stock to the amount of 1,000,000l. The interest is guaranteed by Government, and the issne is redeemable at par in twenty-five years, at the option of the Secretary for India on his giving six months' notice.

West Flanders.-The accounts for the half-year ended December, show that there remains 9,135l, which, after payment of 5 per cent. per annum on the original capital, and providing 598l for reserve, leaves 415l divisible between the original and preference capital. The directors, therefore, propose to pay 6s 3d per orginal share, and 5s 8d preference share. No direct communication as yet has taken place from the Belgian Government to this company with regard to the purchase of the property. BANKS.

Bank of New South Wales.—At the meeting in Sydney on the 30th April, a dividend at the rate of 15 per cent. per annum was declared, which will be payable here on the

English of Rio de Janeiro. The directors recommend a dividend of 12s per share, making, with the dividend on account of 8s per share paid in December last, a division of profits for the year equal to 10 per cent., free of income tax; and they further recommend a return of 5s per share out of the sums reserved in previous years to meet the depreciation of capital caused by the fluctuations in exchange in Brazil.

London and Hanseatic Bank.—Business in London commenced

on the 1st May.

London and South African.—At the meeting a dividend of

10s per share was declared, making 19s for the year.
FINANCE, CREDIT, AND DISCOUNT COMPANIES.
Credit General Ottoman.—The dividend coupon due the 30th
April, is paid here by Messrs B. Tubini and Co. at the rate of 11 16s per share.

ASSURANCE COMPANIES. Phonix Fire.—At the meeting the usual dividend of 3/a share for the half-year was declared, together with a bonus for the year of 3l. 25,000l previously taken from the reserve on account of the Boston and Chicago fires, was restored, and, in addition, 20,000l was carried to reserve, raising that fund to 220,000l. The total assets were stated at 827,470l, and the outstanding claims, including dividends, at 323,155.

Standard Life.-The annual report stated that the amount proposed for assurance during 1872 (2,353 proposals) was

1,426,6651; and the amount of assurances accepted (1,965 policies) 1,190,453l; the annual premiums on new policies amounted to 40,660l; while the claims, exclusive of bonus additions, represented 334,249l. The subsisting assurances at 15th of November, 1872 (of which 983,419l is reassured with other offices), represented 17,244,084l. Revenue upwards of 700,000l per annum; assets upwards of 4,000,000l.

MISCELLANEOUS COMPANIES.

Atlantic Telegraphs Amalgamation.—The terms of amalgama-

tion have been agreed upon. It appears:—
The Anglo-American Company will increase its capital to 7,000,000/, and purchase the French and Newfoundland Companys; in this total capital 3,451,550*l* will represent the capital of the French Company (now 1,650,000*l*), 2,548,450*l* will represent the capital of the Anglo-American Company (now 1,675,000*l*), 1,000,000*l* will represent the capital of the Newfoundland Cumpany (now 864,520*l*); total, 7,000,000*l*. This company's new cable will now be laid from Valentia to Heart's Content, Newfoundland, and and from Placentia to Sydney (Cape Breton), in place of from Land's End to Halifax and New York. The capital 3,451,550l will represent the capital of the French Company shareholders in this company will receive for each present share of 201 about 41/15s in the shares of the amalgamated company, subject to the payment by this company of its existing debenture debt and the expenses of the liquidation, which may be estimated in round figures at 5l per share, As, however, the saving in cable, &c., made by the change of route will be considerable, two-thirds of which saving will accrue to the amalgamated company and one-third to this company, it is expected a portion of this 5l will be provided for. The Newfoundland Company reserves its own land rights, and of the 1,000,000l accruing to it in the amalgamated company, 135,480l will be placed in trust, to be handed over to the Newfoundland Company at the expiration of two years about the respiration of two years are respirated to the respiration of two years are respiration of the respiration of two years are respirated to tion of two years, should none of its present exclusive rights and privi-leges be withdrawn; otherwise, said 135,480l will revert to the amalga-

Beyrout Water Works, Limited,-Capital, 400,000l, in 20l shares, of which 12,500 shares, bearing a preferential dividend of 7 per cent., are offered to the public, while the balance are taken by the concessionaire and contractors. The concession to be obtained is described as important, being exclusive for 40 years, and giving the undertaking the right to supply a rapidly-increasing population, numbering at present 100,000. It appears that the inhabitants at present spend 120,000l on water of inferior quality, and, judging from the profits of the companies already established at Alexandria and Cairo, large

returns are looked for. Boston City 5 per Cent Sterling Loan .- Messrs Baring, Brothers and Co. invite applications for a loan of 1,000,000*l* in 5 per Cent. bonds of 500*l* and 100*l* each; both principal and interest being payable by them in London, the former in April 1893, and the latter on the 1st April and 1st October. The issue price is 91½ per cent.; the total debt of the city will be increased to 4,000,000l; and the money is required to

improve that part of the city destroyed by the fire.

Erazilian Submarine Telegraph.—The whole of the capital has been subscribed, and 469 miles of cable has been manufactured to the 25th April.

City of Buenos Ayres Tramways.-Dividends of 7s 4d per share of the first issue, and 6s 10d of the second issue have been declared.

Gas Light and Coke.—The commissioners appointed by the Board of Trade consider that during the current year 7d should be added to the 3s 9d, the present price of common

gas, and 10d to the 5s 5d, the present price of the cannel gas.

Phosphate Sewage.—The report states that the Metropolitan and Essex Reclamation Company have agreed to extend for twelve months the permission for experiments at Barking upon the sewage of North London. The directors are in communication with the San Domingo Government in reference to the island of Altovela. A Bill has been filed in Chancery to recover 65,000l for the voidable concesssions of the island. Nogotiations are proceeding to the app ication of the com-pany's process to Windsor and Leicester. The assets are over

90,000l, about 42,000l being in cash.

Regent's Canal.—Half-year's dividend, 10s 6d per share. Share Investment Trust .- At the meeting it was stated that the securities had increased in value by more than 35,000l. The revenue received up to March 15th was 38,773l, which, after payment of 2,500l for expenses, leaves 33,600l for appropriation to the 6 per cent. interest on the preference certificates, and 2,673l to the sinking fund. The revenue of the past year is not considered an average of the annual in-

Share Investment Trust .- The numbers have been published of twenty-four preference certificates, which were drawn on the 29th April for redemption, at 110l per certificate, on the 8th

Submarine Cables' Trust .- The revenue for the year amounted to 35,473l, and after payment of 2,000l for the expenses, and 282l to meet the coupons falling due on the 15th October last and the 15th inst, the balance available for the extinction of obligations was 9,191l, which has been employed in the purchase and cancellation of 78 trust certificates, with their corresponding reversionary coupons of the shares in the Eastern Company, amounting to 128,050l nominal value—2,000l were sold at a premium of over 30 per cent. more than the price at which they were acquired by the Trust.

# MINING COMPANIES.

Anglo-Brazilian Gold, Limited.—The liquidators notify that they are prepared to receive proposals for the purchase of both or either of the mining properties.

Dunraven Adare Coal and Iron,-The coupons are payable at

the rate of 10 per cent. per annum.

Liantwit Coal Consumers', Limited.—Capital, 15,000l, in 10l shares. The company is to acquire a colliery, situate at Rhusaeson, Llantrissant, Glamorgan, known as the Llantwit Wallsend Colliery, and to supply coal to shareholders at cost price. The property comprises about 70 acres.

Scottish Australian.—The sales of coal for the second half of 1872 were 86,133 tons, against 63,948 tons in 1871; and the net profit amounted to 6,5971. The balance available is 5,6111, from which a dividend is proposed at the rate of 8 per cent. per annum, free of income tax, leaving 511l.

Silkstone and Dodworth Coal and Iron, Limited. - Capital, 300,000l, in 50l shares. This company has been established to acquire the properties of the Old Silkstone Colliery Company (Limited), near Barnsley. The mines are connected with the River Don navigation, and with various railway systems. The purchase price is 223,587l, of which 50,000l will be in shares, and 50,000l in debentures. The property comprises nearly 1,000 acres, said to contain some 10,000,000 tons of unworked coal, and the royalties are stated to be moderate. There are also brickworks.

Stiperstones Consols, Limited.—Capital, 35,000l, in 1l shares. Object—to acquire the Heathmynd and Squilver Hill Mines in the Stiperstones district of Shropshire. The mines are stated to contain lead, baryta, and ochre.

Stura Valley Silver Lead Mining and Smelting, Limited.—Capital, 100,000l in 5l shares, of which 3l to be called up. The mines are situated in and near the valley of the Stura, between Turin and Nice, North Italy; and include the mines of Vinadio

in active work, besides several others.

Wheal Mary Tin Mining, Limited.—Capital, 50,000l, in 5l shares, of which 2,600 are offered to the public, the remainder having been privately subscribed. The company has been formed to take over the mineral property known as Wheal Mary Tin Mine, lately worked by a Cost Book Company.

# The Commercial Times.

### POST OFFICE ANNOUNCEMENT.

The packet of the 24th of the month for the West Coast of Africa and Madeira will in future make regular calls at the following ports and Madeira will in future make regular calls at the following ports cnly, viz.:—Madeira, Sierra Leone, Jellah Coffee, Lagos, Benin, Brass, Bonny, New Calabar, and Opobo. The following shows the ports of call of the several packets:—Madeira, Sierra Leone, Lagos, and Bonny by each packet.—Cape Palmas, Cape Coast Castle, Fernando Po, and Old Calabar by the packets of the 6th, 12th, 18th, and 30th.—Benin and Jellah Coffee by the packets of the 6th, 12th, 18th, and 24th.—Monview of the coast of the 6th, 12th, 18th, and 18th.—Monview of the coast of the 6th, 12th, and 18th.—Monview of the coast of the 6th, 12th, and 18th.—Monview of the coast of the 6th, 12th, and 18th.—Monview of the coast of the 6th, 18th, and 18th.—Monview of the coast of the 6th, 18th, and 18th.—Monview of the coast of the 6th, 18th, and 18th.—Monview of the call of the coast of the 6th, 18th, and 18th.—Monview of the call of t Jelian Coffee by the packets of the 6th, 12th, 18th, and 18th.—Grand Canary by the packets of the 6th and 12th.—Teneriffe by the packets of the 18th and 30th.—Gaboon, Blackpoint, Landana, Congo, Ambrizette, Kinsembo, Ambriz, and Leando by the packets of the 12th and 30th.—Bathurst and Half Jack by the packet of the 18th.—Brass, New Calabar, and Opobo by the packet of the 24th.

MAILS ARRIVED.

LATEST DATES.

On April 28, from United States and Canada, per Silesia—Boston, April 16; New York, 17; Philadelphia, 16; Hamilton, 16; Toronto, 15.

On April 29, from United States and Canada, per Adristic—Boston, April 18; Chicago, 17; New York, 19; Philadelphia, 18; Nassau, 14; Halifax, 16.

On April 29, from the United States and Canada, per Scandinavian—Chicago, April 16; Detroit, 17; Portland, 19; Hamilton, 17; Kingston, 18; Montreal, 18; Quedoc, 18; Toronto, 17; Ottawa, 18; Fredericton, N.B., 18; 8t John, N.B., 18; Halifax, 15.

On May 1, from United States and Canada, per Idaho—Boston, April 16; Chicago, 14; Detroit, 14; New York, 16; Philadelphia, 15; San Franci-co, 8; Hamilton, 14; Kingston, 14; Montreal, 14; Quebec, 12; Toronto, 14; Ottawa, 14; Halifax, 12.

On May 1, from British North America, per Neatorian—Fredericton, N.B., April 19; 8t John, N.B., 21; Sackville, 21; Bermuda, 9; Halifax, 22; Nuwfuuniland, 15; Prince Edward Island, 17.

On May 1, from Hayti, per American—Port au Prince, April 14.

# COMMERCIAL EPITOME. FRIDAY NIGHT.

There is little to report in the condition of the corn trade this week. For English wheat prices appear to be pretty generally inclining upwards, but the advance is not great, and is to some degree counteracted by the steadiness or decline of foreign sorts. Of these the supply continues to be abundant but is partly absorbed by the continent, the Australian crops coming in to make up for the exhaustion of one or two older sources. Partly because of the disastrous spring, which has told severely upon many districts of North Germany, and which seems to have been somewhat common on all the western side of the continent of Europe, the grain supply from that country has wholly stopped. In some cases stocks already at the ports there have been ordered back to the interior. The spring, with us, still promises well, and with warmth and absence of severe frosts, the time of danger should soon be past.

The cotton trade has been quiet during the week, and prices at Liverpool have lacked firmness, especially for cotton to arrive and in the inferior grades of the staple. Sales have been moderate in extent, but the market is dull on account of the well-sustained arrivals at American ports. Markets in the Southern States are much depressed, particularly as regards the lower grades. Prices on that side also for future delivery have nearly lost the recovery of last week since the unlooked-for improvement in the prospects of supply. The London market for East Indian has also been dull, and in the absence of inquiry flat. The business in Manchester goods has been dull in consequence of the inactivity at Liverpool, and manufacturers occasionally make concessions, though fairly engaged for the present on old contracts.

As compared with the previous wool sales, prices appear to be pretty well maintained at those now current in London. Australian samples realise quite previous rates, but in most descriptions of Cape wools there is a slight falling off. The competition is keen between home and foreign buyers; of the latter the French are the most prominent. The wool trade in America is, too unsatisfactory, and merchants there too overstocked to allow of competition from that quarter just at present; but their previous overbuying has had semething to do with the former advanced quotations here. Business is quiet in the wool market at Bradford, but the tone firm, mainly from the lightness of stocks in staplers' hands. In the yarn and piece departments trade is fairly good, the home demand continuing, and an increased demand coming from Germany, owing to the favourable reports of the Leipsig fair. Yarns, however, rule rather lower than last week.

The iron trade shows no accession of activity at the present prices, but as yet there is little inclination to make concessions either in pig or finished iron. The peculiar condition of the coal trade is the principal bar to any decided activity; in Belgium also the same state of things exists. With a falling market for coal, buyers have for some time held back; but so long as old contracts continue uncompleted, producers do not favour the expectation of lower prices, especially as in Durham and South Wales the action of the colliers is likely to prevent a great fall. At the meeting of the Iron and Steel Institute it was stated that the consumption of coal for iron-making purposes scarcely exceeded in 1872 its usual proportion of the total output; this is surprising, as it has generally been accepted that a stimulated iron trade caused the supply of coal to be overtaken. It is very probable that the utilisation of refuse and other means of economy have been actively adopted, as the price of coal has so great an effect on the cost of iron.

The sugar market remains firm, but with little inclination to buy or sell until the new duties come in force, business is of the smallest. The demand for coffee is active, and prices have recovered. A fair trade has been done in tea at steady rates. There has been some activity in the rice market, but it closes quietly. The jute market flat, owing to the dull state of affairs at Dundee. Tallow has been in quiet demand, and closes dull

Owing to some sharp weather which has prevailed in France during the past week, telegrams from the Bordeaux and Burgundy wine districts have announced that most of the vines were frozen. The prospects of the champagne vintage are also said to be seriously imperilled. A report to the same effect has come from Lyons. As the same misfortune seems to have extended to the Rhenish districts, this branch of the wine trade has but poor prospects.

EXTRACTS FROM TRADE CIRCULARS.

(From Messrs J. and C. Sturge's Corn Circular, dated Birmingham, May 1.)—The wheat trade during the past month has ruled dull, without much variation in price, the slight fall at the beginning recovered at the end. Late as the weather was in taking up, we still think that nearly the usual extent of wheat has been sown, and more than the average of potatoes. Autumn and early winter-sown wheat is very thin on the

ground, but may possibly stool so as to produce an average crop, but this we do not think probable; the later sown fields, on the other hand, look very promising. Arrivals, particularly from the Eastern States of America, have at length greatly fallen off, while those from California and Chili are as large as ever. The first shipment from Australia has now reached this country, the quality of which, like the new Chilian, is very fine. The large quantities of these wheats pressing on the market has caused them to become relatively cheap, and in some cases actually lower than reds. The drop which took place a fortnight since in the retail price of flour and bread has made the milling trade very unsatisfactory, the wholesale price of flour leaving no margin for profit on the cost of wheat, and we think millers' stocks must be greatly reduced. There are now fourteen cargoes of wheat waiting orders on the coast, and sixty-four on passage from ports cost of Gibraltar, against eighty a month since and seventy-five at this time last year; in addition to these, there are about two hundred on passage from the Pacific,

(From Messrs W. Nicol and Co.'s Cotton Circular, dated Bombay, April 5.)—A good average business has been done in this market during the week, and although at the close quotations differ very slightly from those given in our last circular, the larger portion of sales reported was concluded at rates about 3rs per candy in advance. On the spot the total sales amount to 9,000 candies, of which 2,300 consist of Dhollera descriptions, 2,200 machine-ginned Broach, 1,200 Khandeish, 800 Veraval, &c. In the up-country markets a brisk business has been done at well-maintained rates.

(From Messrs Helmuth Schwartze's Wool Price Current, dated April 28.)—The second series of London colonial wool sales commenced on the 24th inst., and up to date 25,343 bales have been catalogued. There is a very large attendance of both home and foreign buyers, and a fair amount of spirit in the biddings. Prices for washed Australian wools are substantially the same as at the close of the preceding series, the finest kinds perhaps excepted, which appear somewhat cheaper, though hardly enough has as yet been offered of this description to allow of a correct judgment being formed. Greasy wool is dearer, and may be quoted 1d above the lowest quotations of the February sales. The only Australian description which has suffered a fall is crossbred; it is about 2d cheaper than in March, when, it should be added, this class of wool stood on an exceptionally high level. Cape wools do not share in the brisk competition the Australian produce commands. They suffer from the absence of foreign demand, and are also to some extent affected by the low rates ruling for River Plate wools.

(From Messrs Durant and Co.'s Silk Circular, dated May 1.)—The deliveries are very small, as might have been anticipated, in consequence of the holidays, but so small have been the arrivals that stocks show some slight reduction. Japan silk has been thrown into the shade by the low prices of China silk, but holders remain firm, and no great reduction can be quoted. In Canton silk there have been some few very low sales, at one moment even good silk being sold at comparatively little above the lowest quality. Bengal silk has not shared in the great depression, but the deliveries are only moderate and our quotations show some reduction.

moderate and our quotations show some reduction.

(From Messrs Van Houten and Ebeling's Tin Circular, dated Rotterdam, April 30.)—The tin market opened strong this month, and, pending the Trading Company's spring sale, a very sanguine feeling prevailed. However, the result of the sale was rather disappointing to holders, as the 75,163 slabs Banca offered on the 2nd inst did not realise above 85fl (the biddings ruling from 87fl to 84fl), showing a decline of about 3fl. This moderate figure was favourably received by the trade, and since the sale considerable quantities have been bought for English and French account, while Germany has not been operating beyond immediate requirements. The combined returns of Banca and Billiton for 1873, compared with those for 1872, exhibit:—An increase of the import for April of 25,696 slabs, equal to 803 tons; an increase of the import for the four months of 56,140 slabs, equal to 1,754 tons; an increase of the total stock of 82,322 slabs, equal to 2,572 tons.

# THE COTTON TRADE.

LIVERPOOL .- MAY 1.

The cotton market was quiet in the early part of this week, and during the last two days has been heavy, with a further decline in almost every description. For Sea Island the demand has only been moderate, and chiefly for the better grades. Prices without change. In American the lower qualities are freely offered and irregular in price, at about \$\frac{1}{2}\$ decline; the middle and better grades are comparatively steady, being quoted only \$\frac{1}{1}\$ d to \$\frac{1}{2}\$ d per lb easier. New York advices to the 1st instant quote middling Upland \$19\frac{1}{2}\$ cents, costing to sell in Liverpool \$9\frac{1}{1}\$ d per lb, by steamer. In Brazil sales have been made at a partial decline of \$\frac{1}{2}\$ d per lb.

Egyptian continues depressed, and prices have been irregular, at a decline of ad to ad per lb. West Indian has been in limited demand, but being scarce prices remain unchanged. A fair amount of business has been done in Peruvian at steady rates. East Indian has been much pressed for sale, more especially new cotton, which has been very irregular, and is fully ad per lb lower. Quotations are generally reduced ad to ad per lb.

In cotton to arrive and for future delivery the transactions have been to a fair extent, but at declining rates, the latest quotations showing a fall of about \(\frac{1}{2}\)d per lb. American, basis of middling, from any port, not below good ordinary, shipment March, \(\text{9\frac{1}{16}}\)d, \(\text{9d}\); delivery May-June, not below low middling, \(\text{8\frac{1}{2}}\)d; not below good ordinary, \(\text{8\frac{1}{2}}\)d; June-July, \(\text{8\frac{1}{6}}\)d; New Orleans, shipment April-May, not below low middling, \(\text{9\frac{1}{3}}\)d; not below good ordinary, \(\text{9\frac{1}{3}}\)d; Mobile, not below low middling, shipment March, \(\text{9\frac{1}{3}}\)d; not below good ordinary, March, \(\text{9\frac{1}{16}}\)d, \(\text{9d}\); Dhollerah, Cape, fair new merchants, mutual allowances, shipment May-June, \(\text{6\frac{1}{3}}\)d per lb.

The sales of the week, including forwarded, amount to 60,260 bales, of which 6,040 are on speculation, and 7,390 declared for export, leaving 46,830 bales to the trade.

export, leaving 46,830 bales to the trade.

MAY 2.—The sales to-day will probably amount to fully 10,000 bales, with a steady market.

	A decrease of stock of	103,020

In speculation there is a decrease of 305,320 bales. The imports this week have amounted to 103,023 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 228,000 bales, against 195,000 bales at the corresponding period last year. The actual exports have been 7,143 bales this week.

LONDON Mari

LONDON.—MAY 1.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market has been very dull and depressed throughout the past week, and with only a limited demand prices on the spot and for arrival have declined \( \frac{1}{2} \)d per lb.

# MARKETS IN THE MANUFACTURING DISTRICTS.

Manchester, May 1.—We have still to report a continuance of those quiet markets which have now prevailed for so many weeks. The continued depression of our eastern markets, and the absence of any animation in the cotton demand, proving strong enough to check any attempt at business. Referring to the position of manufacturers, the operations concluded some four or five weeks ago have been sufficient to keep their looms well engaged, but now as their orders run out they find it difficult to make fresh engagements, except at a very great decline in price. The only exception to this may be made in shirtings, which still continue in fair demand at prices not disproportionate to the decline in yarns. The inquiry for export yarns is very small, and values are rather difficult to test. In the home trade only a retail business is offering, and in some varieties stocks are accumulating.

LEEDS.—The prices obtained and the tone shown at the wool sales have made a deep impression upon our clothiers. They are led to believe that wool is actually dearer than the public quotations would make it appear. Consequently they are very hard and stiff in their communications with buyers. This for a time has brought trade almost to a standstill.

ROCHDALE.—The flannel market shows more vigour since the demonstration made within the last few days by the buyers of wool in London, and the completeness with which the prices previously existing have reasserted themselves. There is no likelihood now of a want of demand. Stocks of wool here are light. Makers of Yorkshire woollens are fairly employed, but sales are neither large nor frequent.

NOTTINGHAM.—A moderate amount of business has been done during the past few days in lace goods for home con-sumption, and orders from the continent have been in course of execution. Lace yarns sell slowly at about late rates, and the demand for raw silk is without improvement. There is a fair business doing in the hosiery trade; some good foreign orders are on hand, and the home demand is steady.

## CORN.

## AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-April 18.

Flour has had a downward tendency during the past week. The receipts have materially increased, and there has been such a reduction of freights from the West as to render it probable that there will soon be a still further increase in our supplies. The weather has been bad part of the time, materially checking the demand, while the closeness of the money market and other attendant influences have conspired to increase the anxiety of holders to close out promptly from the wharf on arrival. The decline in prices has been about 25c per bbl. This decline has slightly stimulated business in common extras, and shippers have taken Western brands of this grade at \$6.75 to \$6.90 per barrel, with prime extra State as high as \$7.30, part for future delivery. To-day the market was dull, depressed, and unsettled. The market has also been depressed for Spring wheat, and prices show some decline. Receipts have been more liberal by rail, and they have been put on the market for the best prices they would bring. Late sales include No. 2 Chicago, received by rail, at \$1.56½ to \$1.57, and No. 2 Milwaukee \$1.60½ to \$1.63, the latter price for a boat-load for export. Winter red and amber wheats have boat-load for export. Winter red and amber wheats have remained very quiet. But in white wheats the demand has been more active; a line of 21,000 bushels No. 2 white Toledo, in store, was closed out at \$2, and choice white Genesee and Michigan have sold in considerable parcels at \$2.15 to \$2.25. Receipts at the West have fallen off, and appearances are that stocks of this crop will not further increase. To-day the market was quiet, but No. 2 Milwaukee sold moderately at \$1.62 to \$1.63 afloat. Indian corn has met with a brisk export demand, and prices have improved fully one cent. per bushel, with large sales of late at 63\frac{3}{4}c to 64c for prime old mixed in store, and 66\frac{1}{4}c to 66\frac{1}{4}c afloat. New corn has been in light supply and firmer. To-day the market was excited, prime old mixed Western, in store, sold at 644c to 642c, with rumours of business at 65c; also prime mixed for June at 64c, an advance of 2c over previous sales; also at 66c on the spot, afloat. Rye has remained dull. Barley has been dull and depressed; car loads have sold at \$1 for No. 3 Western, and \$1.20 to \$1.25 for fair to good Canada West, and the market closes unsettled. The stock of barley is much smaller than last year, but the end of the malting season approaches, and the market for malt is quite dull and heavy. Oats have been firm, but rather slow of sale. There has been some figuring on large lots, and a sale of 50,000 bushels new mixed, to arrive in May, has been reported, but at a private price. There has also been some effort to concentrate the stock in store. The demand from the trade has been fair and the receipts by rail small. To-day the market was quiet and quotations nominal.

# LONDON MARKETS.

# STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The weather during the week has undergone a favourable change, but its effect upon the trade is counteracted by the small supplies of home-grown produce brought forward, and the falling off in imports of foreign. From the continent quotations come again higher, and the export demand in our market is becoming more decided. Holders of all kinds of grain are consequently very firm, and the upward movement in prices continues. Transactions in the markets of the interior have not been very extensive; but a further advance of 1s and 2s per quarter on the value of wheat and barley has in many cases been realised.

At Mark lane the moderate supplies of English wheat to hand cleared off more freely in the early part of the week at 1s per or advance, but with finer weather at the close the market was more subdued, prices, however, remaining steady. Foreign

throughout has been firm, and red wheats have brought quit Is more money. White descriptions, whilst not dezrer, have Is more money. sold more readily at late rates. A second arrival of Austra-lian new wheat has taken place, this time by sailing vessel. The quantity is 8,000 qrs, the quality rather variable, and not quite up to the first parcel, but still fine. Sales have been made at 65s to 66s, ex ship. Flour meets a steady demand, and country marks are 6d per sack dearer. Malting barley has further improved in 6d per sack dearer. Malting barley has further improved in value to the extent of 6d to 1s per quarter, and the tendency is still upwards, but the market to-day was quiet. Beans and peas have realised slightly higher rates. Fine oats further risen, 6d to 1s, with a steady sale. Maize is the turn dearer and in better demand.

The annexed statement shows the imports of grain into and exports from the United Kingdom, during the week ended April 26, and since the beginning of the season (Sept. 1):-

# CULONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE POSTSCRIPT.

MINCING LANE, FRIDAY MORNING.

76280

SUGAR.—There is not any change in the general position of the market, which remains firm, some of the low qualities being slightly dearer, and the importers are not offering much sugar for sale, as the new scale of duties will be in operation on the 8th May. The refiners new scale of duties will be in operation on the 5th May. The renners have bought very sparingly, consequently only 514 casks had changed hands to yesterday (Thursday). Crystallised Demerara by auction, 32s 6d to 36s, small lets as high as 38s. 400 bags fine pale grainy at 36s 6d to 37s 6d. In other sorts, transactions on the spot are chiefly restricted to a few parcels, Manila and Jaggery at firmer rates. Some soft Mauritius by auction sold steadily. Fine grainy kinds are selling at extreme rates; some floating cargoes have sold. The change of wind will hasten arrivals. Home deliveries continue small from the above cause, only 1,870 tons being cleared last week. According to the latest return, the stock of sugar in the kingdom was 48,000 tons in excess of the previous season's at same date.

1873 1872 1871 1870 53100 60430 3190

58700 ... Mauritius.—3,427 bags offered by auction on Tuesday sold at steady prices, as follows: soft brown, 23s to 26s 6d; grey low to good, 27s

Madras.—1,600 bags Jaggery are reported sold privately at 18s 6d.

Manila.—10,092 mats clayed by auction were taken in above the value, viz., 25s to 27s for low to good. By private contract, 10,000 bags are reported at 23s to 26s 9d for low to very good quality. tons Ilo Ilo just arrived, at 21s.

Floating Cargoes.—A cargo of Trinidad at 22s 6d; one of 630 casks Trinidad concrete at 25s. One of 570 casks 70 barrels Porto Rico at 24s 6d; one of Bahia at 21s 3d; one of Pernambuco at 21s for the United Kingdom; one of 3,360 bags brown Bahia at 16s per cwt for a

Refined .- A steady demand prevails for pieces. Dry goods remain quiet, and the large quantity of foreign to be delivered at the new rate of duty is likely to keep the market unsettled. Dutch loaves have sold at a price equal to 37s 9d per cwt, laid down here at the new

Molasses. -30 puncheons St Lucia have sold at 13s 9d. 400 casks Australian by auction partly found buyers at 14s 6d per cwt.

Rum.—Sales of fair extent have been made in Demerara at full prices, from 1s 101d to 1s 11d, up to 2s 1d per proof gallon in small packages. Jamaica and other kinds steady. The market generally remains firm.

Cocoa.—The public sales have gone off without further alteration in prices; 1,781 bags Trinidad offered on Tuesday, about two-thirds sold; low and grey, 50s to 58s; ordinary to good, 59s to 90s; fine, 92s 6d to 123s; 139 bags Grenada were chiefly taken in: 1,102 bags Guayaquil, part sold at 58s; grey, 48s per cwt; 100 bags other foreign cocoa with-

Coffee. There has been an active market with prices again higher, cold for arrival, partly by speculators. Plantation Ceylon at 96s to 100s, according to conditions. 200 to 300 tons Native Ceylon at 87s; 25 tons at 88s. Other parcels also reported, including Manila at 87s 6d, East India Plantation at 97s 6d to 98s 6d, Native East India at is per cwt recovery. A large quantity in 88s 6d to 90s. The public sales of Plantation Ceylon have been small. 33 casks 21 bags sold at 97s 6d to 100s 6d for palish to rather bold. 570 bags Courtallam: middling, 98s to 99s; bold, 101s 64; small, 95s 6d to 96s 6d. 67 half-bales Mocha withdrawn. 10 half-bales long berry realised 105s 6d. 22 casks 123 barrels 930 bags Jamaica:

Good ordinary to fine ordinary, 87s 6d to 89s 6d; even greenish, 92s 6d to 97s. 1,142 bags St. Domingo sold at 85s to 87s. 6,915 bags other foreign: Guatimala, pale to colory, 90s 6d to 99s 6d; Central American and Costa Rica, 92s 6d to 102s 6d; low and ordinary Santos, 81s to 87s 6d.

TEA.—The market has been steady, with a fair demand, and sales of moderate extent passing at former rates. 6,848 packages China by auction sold at about last week's quotations. The supply of Indian is ample, and full rates generally paid. At auction this week the bulk of 5,100 chests sold, including some Darjeeling Company's teas. There have not been any fresh arrivals from China.

RICE.—Floating cargoes of soft grain have been in demand. Six of Rangoon are reported sold: March to May shipment at 9s 24d to 9s 3d, according to conditions; two cargoes old Raugoon at 8s 9d. 800 to 1,000 tons Bassein spring shipment at 9s Continental terms. By private contract a few parcls of white Bengal have sold at 11s 3d to 13s, and 5,000 bags new Rangoon at 9s ex ship, just arrived. At the close the market is quiet.

IMPORTS and DELIVERIES of Rice to April 26, with STOCKS on hand. | 1872 | 1871 | 1870 | 1872 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1870 | 1871 | 1871 | 1870 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 | 1871 |

port.

Sago Flour.—778 bags Singapore by auction were withdrawn. Privately business at 15s to 16s per cwt.

TAPIOCA.-222 bags Singapore by auction realised 21d per lb for small. A few lots pearl tapioca sold at 27s 6d to 33s 6d per cwt.

BLACK PEPPER.—The market is firm, and about d higher for the

week. By private contract some few parcels have changed hands at 7d to 7d for Penang, and 7d to 7d for Singapore. Sales have been made to arrive: Singapore at 7d to 7d By auction yesterday 873 bags Singapore were partly sold at 7d 327 bags Penang were taken in at 7d per 1b, and 353 bags Batavia withdrawn.

White Perper.—No change can be quoted in this market, which is

steady. The business by private contract includes Singapore to arrive at 1s. 334 bags by auction part sold at 1s 04d per lb.

OTHER SPICES.—12 cases Penang nutmegs sold at barely former rates:
110's, 2s 8d; 83's, 2s 10d; 70's, at 3s 4d. 13 casks Dutch were chiefly taken in. 17 cases Penang mace were bought in, only 2 cases low broken selling at 3s. 2d. 48 cases low Java were taken in at 3s. 6d. Of 344 bales Zanzibar cloves 300 bales ordinary greyish sold at 81d to  $8_3^4$ d, the remainder withdrawn at 9d. 5 cases Penang sold at 1s  $0_4^4$ d to 1s 3d. 544 bags cinnamon chips at  $3_4^4$ d to  $5_4^4$ d. Bark,  $2_3^4$ d to 3d per lb. 1-000 boxes unworked cassia lignea sold at 76s 6d to 77s, being 1s to 2s per cwt lower. 392 cases cochin ginger chiefly sold; mixed small to medium scraped, 63s to 67s; rather bolder, 70s to 71s. Of 264 bags African, a small portion sold at 49s to 49s 6d. 108 barrels, &c., Jamaica sold at 58s to 86s per cwt. 401 bags pimento at  $2\frac{3}{4}$ d to  $2\frac{7}{8}$ d

per lb for the sound. SALTPETRE.—The market is quiet; prices on the spot being partly nominal. 350 tens Bengal have sold to arrive, latterly at 26s 6d to

26s 71d per cwt. 

brought forward on Wednesday, barely one-third part sold, at rather low rates. Silver 2s 3d to 2s 5d, black 2s 3d to 3s 6d. 38 bags Honduras: silver 2s 2d to 2s 6d. 44 bags Mexican, part sold, black 2s 5d

to 2s 6d per lb. CTHER DRYSALTERY GOODS.—Further lusiness has been done in Gambia, to arrive, at 26s to 26s 3d, but the market is now quiet. Turmeric has been in limited demand; cutch remains quiet. 58 bales Bengal safflower were bought in. Business reported by private contract. Of 390 boxes China galls, a portion sold at 54s per cwt.

SHELLAC.—133 cases by auction, chiefly sold: second orange 9/ 2s 6d to 9/ 5s, livery orange 8/ 17s 6d to 9/, low and mixed button sorts 6l 2s 6d to 7l 12s 6d per cwt.

METALS.—Last week's quotations have not been maintained, and a quiet tone pervades the markets. The landings of tin at this port in April were very heavy, causing an increase in the stock at the close to 1,300 tons. Several sales have been effected in Straits since last Friday, up to 140l, but yesterday the price was 137l 10s to 138l 10s, with buyers at 138l. English unsettled. Spelter steady with a few sales, including common quality, at 27l 5s to 27l 10s and special brands in proportion. Stock in this kingdom 1,810 tons, against 3,950 tons last proportion. Stock in this kingdom 1,810 tons, against 3,950 tons last year. A rather heavy fall has taken place in Scotch pig iron; range of prices for cash 115s 6d to 111s 6d, latest sales at 112s. Lead fully supports the late advance. 120 tons London rolled sheet zinc, by anction, chiefly sold at 32t 12s 6d to 33t 2s 6d. Copper is dull with sellers at lower rates. Chili, last sold at 87t 10s, 88t for common. Walaroo at 94t 10s to 95t per ton. Quicksilver, 13t 12s 6d to 13t 15s per bottle.

HEMP.-Manila is dull, and there has been further arrivals this On Wednesday and yesterday there were 3,500 bales brought to auction, when about one-fourth part found buyers at 10s to 20s reduction. Ordinary to fair roping, 40l to 42l 15s; some low coarse mixed brown at 33l 10s. Sea damaged in proportion. 110 tons Russian, &c., by auction were chiefly bought in.

JUTE.-The state of the Dundee market, with the extensive supply here and affoat, keep down speculation; consequently the week's

transactions are very limited in extent. A considerable quantity sold

to arrive during the past fortnight, said to be at easier rates.

LANSRED.—The market is firmer, with some large transactions.

Calcutta held 63s 2d to 64s 3d. Some important sales for arrival at 61s 3d to 63s 3d, according to date of shipment. Two steamer cargoes of Azoff, on the way, sold at 60s per quarter, and other floating sales reported.

Ous. -The low prices of elive have caused more demand, and some large sales are reported, chiefly in Mogadore, at 38l on the spot and to arrive. Seville, 39l 10s to 40l; Gioga, 42l. Common fish oils remain firm in price. Sperm is steady at 95l per tun. Linseed oil has been quiet at 33l to 33l 17s; May to June, 33l 5s; last 6 months, 33l. All the Lagos offered has sold at 38l 10s to 39l, and there are now buyers at the latter. Cocoa-nut is still quiet. Ceylon, 34/ 10s to 35/; Cochin, 36/ to 39/; finest up to 40/ 10s, owing to scarcity. English brown rape oil is rather dearer, viz., 37/ 5s to 37/ 10s; next four months, 37/ 10s to 38/; last four, 38/ 5s to 38/!0s per ton.

Petroleum steady. American refined, 1s 7d; last four months, 1s 5d per gallon.

Tallow .- A quiet tone has prevailed in the foreign tallow market during the week, and there is a moderate quantity of other sorts declared for sale to-day. Petersburg, new, 44s; June, 44s to 44s 3d; October to December, 45s 9d to 46s; December, 46s 3d to 46s 6d per

POSTSCRIPT. FRIDA! EVENING. SUGAR.—At the public sales to-day 2,240 bushels 77 bags Java and 5,806 bags Mauritius were chiefly taken in above the value. A portion of the latter sold at 18s 9d for low soft brown. Of West India 410 casks found buyers, including a few lots cry callised Demerara by auction at previous rates. A floating cargo of Bahia sold at 21s per cwt for the United Kingdom.

COFFEE.—13 casks 21 barrels 247 bags Jamaica by auction sold at rather higher prices: pale to fine ordinary, 90s to 96s; a few lots middling, 106s to 113s 6d. 32 cases 473 bags fine Mysore, of the new crop, realised 114s to 127s 6d, small being in proportion.

LEA steady.

BLACK PEPPER.—No change.

METALS.—A quiet tone, and tusiness limited in extent. LAC DYE.—120 chests by auction were bought in.

OL.—315 casks Cochin cocoa-nut by auction were part sold at 39l. 350 casks Ceylon part sold at 35l to 35l 10s per ton.

Tallow.—Town tallow reduced to 45s. 1,291 casks Australian by auction about two-thirds sold: beef, 40s 6d to 41s 6d. 76 casks North American par sold at 39s 6d to 39s 9d. 150 casks Taganrog. Mutton realised 42s 6d per cwt.

# ADDITIONAL NOTICES.

GREEN FRUIT.-The report of Messrs Keeling and Hant states that the limited supply of oranges from Valencia and Lisbon causes the prices to be well maintained. Further arrivals of lemons from Messina and Palermo, which are selling at easier rates. An increased demand for Barcelona nuts, black Spanish without alteration. Market clear of West India cocoa-nuts.

DRY FRUIT.-All dried fruits are dull, and the market is weak. Clearances continue good, and stocks, especially of currants, are

English Wool.—Very quiet except for deep-grown wools.

COLONIAL WOOLS .- The sales centinue well attended and competition brisk; prices quite firm, at opening rates.

Seeds.—The trade continues quiet but firm, at unaltered quotations.

FLAX.—Not any business in Russian.

HEMP.—Manila: Lower prices being accepted at public sale, buyers have come forward, and some considerable business has been done on New Zealand from 1/ to 1/ 10s per tun lower. the spot.

Silk .- Market rather firmer in consequence of the unfavourable news

of the European crop. Tobacco.—There has been rather more activity in United States tobacco during the past week, but considering the present small stock the sales sum up a fair total at full market rates. Holders continue firm, and show no inclination to submit to concessions. In substitutes and segar tobacco there has been a fair business done, but of the latter

there is but a small supply. LEATHER .- The leather market still retains the dulness which has for some weeks prevailed. The limited sales that were made at Leadenhall on Tuesday showed very little change in prices. The supply was

moderate, and there is no material increase of stock. Metals .- The business of the week has been rather small, but with very little variation in quotations. Copper has yielded some 20s per ton in prices of foreign, and that has brought in a few buyers. Iron is unchanged in price, but rather slow of sale. Tin began this week at the depressed value of the previous one; and, after rallying for a day or two, has again relapsed. Spelter, lead, and tin plates keep steady; the

# METROPOLITAN CATTLE MARKET.

MONDAY, April 28.—The total imports of foreign stock into London last week consisted of 21,179 head. In the corresponding week last year we received 15,557; in 1871, 16,297; in 1870, 8,262; in 1869, 15,988; and in 1868, 4,999 head.

Quietness has been the feature of the eattle trade to-day. The supply of stock offering has been larger, and the quality has been good. As

regards beasts the foreign stock has been more numerous, comprising about 255 Spanish, 318 Gothenburg, 135 Christiana, 226 Danish, and 145 Dutch. Although the demand for them has not been active the trade has been firm, and full rates have been obtained. From our own grazing districts also the receipts have been more liberal, and frequently grazing districts also the receipts have been more liberal, and frequently of good quality. Quotations have ruled firm, with a moderate demand; the best Scots and crosses have made 5s 10d to 6s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received about 1,700, from Lincoln 14, other parts of England about 250, Scotland 7, and Ireland about 200. The sheep market has been decidedly weaker. Full average supplies have been effering, and with a slow dragging trade prices have realised 2d to 4d per 8 lbs, the best Downs and half-breds selling at 5s 10d to 6s per 8 lbs. For lambs the inquiry has been less active, at from 8s to 8s 6d per 8 lbs. Calves have been quiet at about late rates. Pigs have been disposed of at previous quotations.

&c. They are porous, light in texture and inexpensive
and are drawn an like an ordinary stocking. Price
4s Sd. 7s 6d, 10s, and 16s each, post free.

WHITE, MANUFACTURER, 22s Piccadilly, London.

# HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmo

sphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped-

"HUBBUCK'S, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children or returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—John Bull, September 14, 1850.

CAPE OF GOOD HOPE

AND NATAL—EXTRA MAIL
SERVICE.—The UNION STEAMSHIP COMPANY'S ROYAL MAIL
PACKETS SAIL from SOUTHAMPTON on the 5th,

15th, and 25th of each month. The packet of the 15th calls at St Helena. The packets of the 5th and 25th correspond with Mossel Bay, East London, and Natal, and that of the 5th with Mozambique and Zanzibar.

### CONSTITUTION. THE ENGLISH

By WALTER BAGEHOT.

A New Edition, revised and corrected, with an Introductory Dissertation on Recent Changes and Events. Crown 8vo, 7s 6d.

HENRY S. KING AND CO.

# WORKS BY ARTHUR CRUMP.

The FIFTH EDITION of THE KEY to THE LONDON MONEY MARKET is now ready. A new feature, a PRISMATIC CHART, is incorporated with the issue for 1873.

By ARTHUR CRUMP.

OPINIONS OF THE PRESS ON THE PRISMATIC CHART.

This is in a diagram form, now so much used in popularising statistics, a history of the Money Market in 1872.—Dally News.

Very elaborate and useful.—Echo.

A useful compilation.—CIVIL SERVICE GAZETTE.

Gives at a glance intelligence concerning the Bank of England, Bullion, &c., as influencing the Money Market in 1872.—NOTTINGHAM DAILY GUARDIAN.

Presents a bird's-eye view of the influence upon the Money Market, of the movements of Bullion, &c., in 1872.—Sunday Times.

Will be found very useful to commercial men.—Sheffield Daily Telegraph.

LONGMANS GREEN, AND CO.

Just Published, price 7s 6d,

### ECONOMIZED; BLACKSTONE

BEING A COMPENDIUM OF

### ENGLAND THE LAWS

TO THE PRESENT TIME.

By DAVID MITCHELL AIRD, Esq.,

Of the Middle Temple, Barrister-at-Law.

IN FOUR BOOKS :-

I. Laws in General. II. Bights of Things. III. Private Wrongs. IV. Public Wrongs.

Each Book embracing

# THE LEGAL PRINCIPLES AND PRACTICAL INFORMATION

Contained in the respective Volumes of Blackstone.

contains, in a form at once perspicuous and precise, an amount of valuable information on the constitution and general character of the laws of this country, such as we do not recollect to have seen in any other written document of the same bulk. The books on 'Private Wrongs' and 'Public Wrongs' would also form a most useful article of education among the adult population; so that, except as to Book II., which, as dealing with the laws of real property, is too tough a nut for ordinary readers, we have here a volume which has pretty nearly solved the problem how to make the people understand the policy of the laws under which they live."—Law Journal.

"There is much originality in the treatment of the subject. We are here it would be subject." \* "The work, which is dedicated, by permission, to the Lord Chancellor,

"There is much originality in the treatment of the subject. We are bound to say that Mr Aird has doue his work well."—LAW MAGAZINE.

"By simplifying much of Blackstone's language, and breaking up his work into divisions which may be easily mastered, Mr Aird has produced what may be called the First Book of Law."—Spectator.

"It is just the kind of book that every Englishman of any pretensions to general knowledge should have and carefully study."—CITY PRESS.

"The manner in which the whole of the information is preserved and the style impregnated with the spirit of Blackstone, is remarkable."-Sunday Times.

LONDON: LONGMANS, GREEN, AND CO., PATERNOSTER ROW.

NEW SERIES.

Published Monthly, price One Shilling,

THE FLORIST & POMOLOGIST:
A Pictorial Montally Magazine of Flowers, Fruits
and General Horticulture.

Conducted by Robert Hogg, LL.D., F.L.S., Thomas Moore, F.L.S., and William Paul, F.R.H.S., supported by a staff of able contributors.

Beautiful Coloured Plates of New Flowers and Fruits, By Walter Fitch, James Andrews, and other Leading Artists.

The Annual Volumes are complete in themselves. Communications for the Editor, Books for notice new plants or flowers for description or criticism, &c. should be addressed to Mr Thomas Moore, Botanic Garden, Chelsea, London, S.W

Publishing Office-171 Fleet street, London, E.C.

PUCATION IN GERMANY.—
anglo-german establishment, Bone, on-the-Rhine, founded in 1847.—The Principal, Horr THOMAS, pret ares Gentlemen's Sons for the Army, Civ'l Service, and Mercantile pursuits. Germa and French are constantly sphen in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS er Strasse, Bon-on-the-Rhine.—Frequent escorts.

NNEFORD' FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartourn, Headache. Gout and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants. DINNEFORD at CO., Chemista, 172 New Rood street London, and of all other chemists. 172 New Bond street, London, and of all other chemists throughout the world.

THE

TRUST AND COMPANY OF CANADA. LOAN

Incorporated by Royal Charter. Established 1851.

Capital, £1,000,000; paid up, £250,000; uncalled, £750,000: reserved fund, £85,005.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P.,
President.
Charles Morrison, Esq., Deputy-Chsirman.
James Hutchinson, Esq., W. Gordon Thomson, Esq.,
The Hon. Ashley Carr Glyn.
BANKERS.
Mesars Glyn. Mills Currie and Co.

Messrs Glyn, Milla, Currie, and Co.

This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, mon-y on deposit at a fixed rate of interest, and lending the same, together with the paidup capital, on mortgages of real estate in Canada.

The Company has been in successful operation since 1851.

The Directors are now issuing debentures for periods of from six to ten years. Any information required can be obtained an application to

HOLLOWAY, 8 PILLS.-Counsel and Comfort.—A disordered stemach throws the whole system out of gear, and ronders us unfitted both or work and awasement. A few dones of these purifying and strengthening pills, taken according to the accompanying directions, will, however, specifly restore order, and re-enable the stomach to digest its food without difficulty. These excellent pills are suirable alike for the peer as the peasant, the soldier and the solior, and particularly for some and foreign colonists. Hollowis's pills are very useful in checking feverish attacks, billous complants, and inflammations. They have also made the most signal cures of dropsy and diseases of the kidneys, heart, and lungs, when the sufferers seemed past the aid of medicine.

BOSTON CITY 5 PER CENT.
STERLING LOAN FOR £1.000,000.
Messrs BARING BROTHERS AND CO. are prepared to receive subscriptions for £1,000,000 Boston City Sterling Bonds, bearing interest fr.m the 1st April, 1873, at the rate of 5 per cent. per annum, payable by half-yearly dividend warrants on 1st April and 1st October of each year.
The Bonds are in amounts of £500 and £100; the principal is to be reimbursed on the 1st April, 1893, and

principal is to be reimbursed on the 1st April, 1893, and both principal and interest are domicilated at the Counting-house of Mesers Baring Brothers and Co., without any deduction for taxation in the United

without any deduction for taxation in the United States.

This loan is issued under the authority of an Act of the Government of the City of Boston, for the purpose of improving the streets in that part of the City which was destroyed by the recent great fire; and the value of property in that district will be materially enhanced by the contemplated improvements. The sinking fund is derived from an annual tax of 3 per cent on the amount of the loan, and the bett-rments on the estates benefited, and is invested in Boston by the "Board of Commissioners on the sinking funds."

The net debt of the City of Boston, including the present issue of £1,000,000, will be about 20,000,000 dols, or £4,000,000, and the relestate in the City, which is all liable for payment of the debt, as stated in the documents printed at foot, is worth about 400,000,000 dols.

The price of subscription is 913 per cent., payable as follows:—

follows :-

15 per cent. on allotment. on 4th June, 1873. on 4th July, 1873. on 6th August, 1873

on 8th September, 1873. 211 -

The failure to pay any instalment when due forfeits all previous payments.

The remaining instalments may be paid up in full, under discount at the rate of 4 per cent, per annum, on any day when an instalment falls due.

The subscription will Close on or before the 6th May, at 4 p.m., and the allotment will the made as soon as practicable. In cases where no answer is returned to applications, it will be understood that it has not been practicable to make any allotment.

By the laws of Massachusetts, the private estates of the citizens of Bos on are liable for debts of the City, in case of default, as appears by the following certificates:—

Boston, 18th May, 1852.

Office of the City Solicitor.

In the opinion of the undersigned, the private estates of the citizens of Boston are liable for debts inwfully contracted by the City, and whenever judgment is rendered against the said City, on account of any such debt, the execution may be levied upon the property of any inhabitant.

(Signed) inhabitant.

(Signed) P. W. CHANDLER, Ci'y Solicitor.

Upon the back of this opinion, given May 18th, 1852,
was the following indersement:—

"The foregoing opinion of Mr Chandler, the City
Solicitor, is undoubtedly in conformity with the law of
Massachusetts."

(Signed) DANIEL WEDGERFER

Massachusetts."

(Signed) DANIEL WEBSTER.
City Solioitor's Office, 48 Court street,
Boston, October 16th, 1869.
I certify that, by the laws of the Commonwealth of
Massachusetts, all debts of any City or town in said
Commonwealth are a lien upon all the estate, both real
and personal, of every inhabitant of the debtor City or
town; and all such estate may be levied upon to satisfy
such debts, if the City or town fail to make payment
when it is due.

(Signed) JOHN P. HEALY, City Solicitor.
Bishopsgate street, 2nd May, 1873.

BOSTON CITY 5 P R CENT. STERLING LOAN FOR £1,000,000.

To Mesers Baring Brothers and Co., London. Gentlemen.— request that you will allot to nominal capital in the abovementioned issue, and engage to accept that amount, or any less amount which may be all otted, and to pay the instalments thereon in conformity with your circular of the 2nd instant.

### FROSPECTUS.

The Company has been established for the purpose of taking up and developing a valuable concession granted by the Municipality of Beyrout and confirmed by the Sultan's firman, for the supply of water to the town and environs of Beyrout for a term of forty years, for domestic and municipal consumption, and also for purposes of

This town is the most thriving on the Syrian coast of the Mediterranean. The population, which about twenty years ago amounted to from 5,000 to 10,000 inhabit ants, is now e-timuted at 100,000, and is very rapidly increasing in numbers, wealth

The prodigality of Eastern habits, as regards the use of water in those cities where it can be obtained, is a matter of notoriety, it being used not only for ordinary purposes, but in very large quantities for purposes of religion and laxury. The population at present spends about £120,000 for water of inferior quality, brought in from a distance on the backs of conkeys, and it looks forward with cagerness to the prospect of an emilmited supply from the celebrated stream called the Nahr-el-Kelb, which issues from the heights of the Lebauon.

The Water Companies of Alexandria and Cairo are in a high state of prosperity. The shares of the latter Company are at a high premium, whilst the former has been purchased by the Viceroy at a considerable advance over the issue price of its shares.

The water rights, which form the basis of the supply, have been a matter of negotiation for many years with the Turkish authorities and the religious communities of the Rebanon. They have now been secured to this undertaking, and all vested interests in them have been bought up; they have become the absolute property of the concessionaire, and will be included in the transfer to the Company. The concession, confirmed so it is by Imperial firman, confers on the Company an inviolable title.

The Municipality of Beyrout have re-ognised the importance of an abundant supply of water to their city, and have granted a liberal scale of rates, but have stipulated that a supply shall be reserved, for purely municipal purposes, to the extent of 250,000 litres per diem, for which they will pay at the authorised tariff.

220,000 litres per diem, for which they will pay at the authorised tariff.

The cipital of the Company, as authorised by the Imperial Government at Constantinepic, is 250,000, in £25,000 shares of £20 each. But, in order to afford the Shareholders the furbest possible benefit from the large returns an icipated, it has been decided to issue only £400,000, in 20,000 shares. Of these, 12,500 shares, to which a preferential dividend of 7 per cent. is attached, are now offered for public subscription. The remaining 7,500 shares, to which no preference is given, will be issued as part rayment to the Concessionaire and Contractors. The Contractors have further agreed to take payment in Bonds to the ext. nt of £35,000 out of a total sum of £335,000, to be created at the first mee'ng of Shareholders. The Bonds will bear interest at £6 per cent. per annum, commencing only from the completion of the Works, and charged on the revenues of the Company.

The Engineers' plans recycle for the company.

The Engineers' plans provide for the construction of the Water Works on a sufficiently large scale to afford a daily supply of 6,000,000 gallons. The existing requirements for household and public purposes, and for irrigating the intervening districts between the sources and the town, and for supplying the silk farms which abound in the immediate neighbourhood,—Beyrout, being one of the most important silk centres of the Mediterranean,—will secure to the Company an immediate and rapidity-increasing revenue.

Arrangements have been made, and contracts entered into on behalf of the Arrangements have oven made, and contracts entered into on behalf of the Company, for the acquirement of the Concession and water rights, as well as for the construction of the entire series of works, including all preliminary expenses and interest during construction at the rate of 7 per cent, per annum, on terms within the capital of the Company, ample margin being left in the hands of the Company to defray the expenses of engineering, administration during construction, working capital, atc. The works are to be completed under heavy penalties within twenty-four months from the date of contract.

The estimated consumption, from the time when the works come into full peration, will, it is calculated, give a net revenue sufficient to pay 16 per cent. on the entire capital of the Company.

The business of the Company will be superintended by a Board consisting of entiemen connected with the management of some of the most successful Water contiemen connected : Conpeties of the day.

Water Works' Shares, it is well known, always command a high price on the sarket, being justly considered one of the most bond-fide investments of the day, ad not listle to sudden fluctuations in price, although constantly and steadily increasing in value.

The large premiums commanded by the shares of Water Companies afford evidence of this fact, as will be seen by the following table:—

					shares.	Present Selling Price.

The British and Foreign Water and Gas Company, &c., before inviting subscriptions to this undertaking, have satisfied themselves by special reports of their own Engineers and others, founded upon a local and exhaustive investigation, of the accuracy of the above statements, and of the feasibility of completing the Works within the specified time. An abstract of such reports, together with a Statement of H.M. Consul-General in Syria; Memorials signed by the notables of the town, the original concession, and contracts and copies of the Memorandum and Articles of Association, and other documentary evidence bearing upon the subject, may be seen at the offices of the Solicitors to the Company. A summary of the report of Messrs. Quick and Son, the Engineers is also annexed.

The total sum payable by the Company for the expenses of issue, including legal

The total sum payable by the Company for the expenses of issue, including legal expenses and the cost of advertising, is, by agreement with the British and Foreign Water and Gas Company, Limited, fixed at one per cent, on the authorised capital.

In view of the large interest of the Concessionaire and Contractors in the deferred shares, arrangements have been made under which the expenses of management in England, including the Directors' fees, will not exceed £2,150

The Interest will be payable half-yearly, on 1st April and 1st October in each year. The first payment will be made 1st October, 1873.

Failure to pay any instalments at the due date will render all previous payments liable to forfeiture.

Should any applicant receive no allotment, the deposit paid will be returned forthwith without deductions; and should a smaller amount be allotted than that applied for, the balance paid on application will be applied towards payment of the amount payable on allotment.

Application for Shares must be made on the Form annexed, accompanied by the deposit of £2 per Share.

the deposit of £2 per Snare.

Prospectuses and Forms of Application may be obtained at the offices of the Solicitors, Messrs. Nash, Field, and Layton, Suffolk Lane, Cannon Street, E.C.; of Messrs. Baxter, Rose, Norton, and Co., Solicitors to the British and Foreign Water and Gas Company (Limited), 6 Victoria Street, Westminster; of Messrs. Glyn, Mills, Currie, and Co., 67 Lombard Street, E.C.; and at the offices, Bartholomew House, E.C.—By order of the Board of Directors,

W. P. ANDREW, Chairman.

The following Contracts have been entered into by or on behalf of the

The following Contracts have been entered into by or on benail of the Company:—

1. Contract, dated the 9th April, 1873, between Théophile Thévenin, of the one part, and Robert Rainey Best, on behalf of the Company, of the other part, for the saie to the Company of the Concession and of the water rights for the supply of water to the City of Beyrout.

2. Contract, dated the 55th April, 1873, between the said R. R. Best, on behalf of the Company, of the one part, and T. Macneill and Company, of 2 Great George Street, Westminster, Contractors, of the other part, for the construction of the works.

Extracts from the Report of Messrs, Joseph Quick and Son, C.E., to the Directors of the British and Foreign Water and Gas Works Company

LIMITED).

There is at this moment a great dearth of water of good quality in Beyrout, and the springs and sources of water which have been purchased by the Concessionaire are sufficient to afford an ample supply of water of good quality, both present and prospective, for all the requirements of the town and for irrigation purposes. The necessary works both for water supply and frigation can be completed within 18 months from the time of their commencement, and at a comparatively moderate cost, taking into consideration the large quantity of water which they will be designed to supply in consequence of the great demand anticipated. In consequence of the want of water in the town, and the prodigality of Eastern habits, as regards its use in those cities where five an be obtained, the consumption of water at the tariff named in the Concession will probably produce a net revenue of at least from \$40,000 to \$50,000 per annum within a year after the completion of the works. This is, however, on the assumption that only one-half of the quantity to be provided will be subscribed for by that time. It may fairly be expected that this revenue will increase vary rapidly from the demand for domestic and public supplies and for irrigation purposes. In consequence of the confous supplies of water which have been secured by the purchase of mills, &c., water power can be employed for pumping to a great extent, thus reducing the working expenses to an unusually small per centage of the income. Generally, the scheme is a thoroughly bona-fide one, and would, in our opinion, prove very remunerative to a Company established for carrying it out."

### Great George Street, Westminster, February 25th, 1873.

29 Great George Street, Westminster, February 25th, 1873.

Issue of 12,500 "A" 7 per cent. Preferred Shares of £20 each, with further Participation in Profits, as referred to in Prospectus of the BEYROUT WATERWORKS COMPANY, LIMITE FORM of APPLICATION (to be retained by the Part

LIMITED. FORM of APPLICATION (to be retained by the Bankers). To the Directors of the BEYEOUT WATER WORKS COMPANY. Limited. London.
