HOUSE OF REPRESENTATIVES

Document No. 1590

STATEMENT OF EXPENDITURES OF THE DEPARTMENT OF AGRICULTURE

FOR THE FISCAL YEAR ENDED JUNE 30

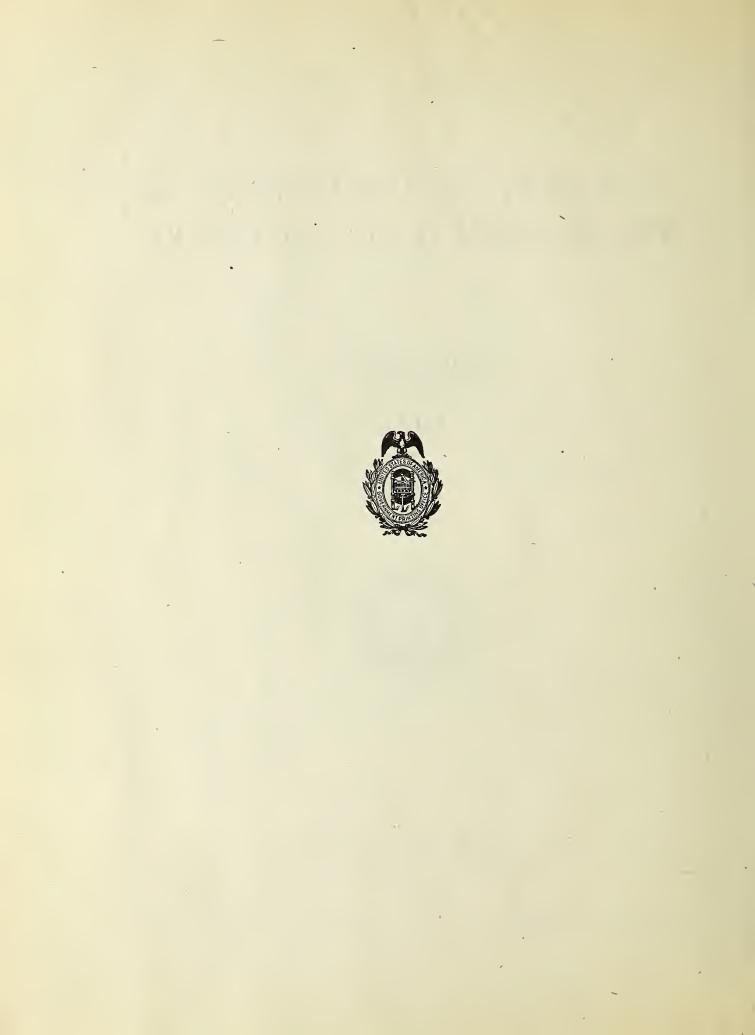

1918

1 . Alists

DECEMBER 16, 1918.—Referred to the Committee on Expenditures in the Department of Agriculture and ordered to be printed

> WASHINGTON 1919

LETTER OF TRANSMITTAL.

DEPARTMENT OF AGRICULTURE, Washington, December 12, 1918.

SIR: As required by section 529, Revised Statutes, and the act of March 3, 1885 (23 Stat. L., 356), I have the honor to transmit herewith a detailed statement of expenditures of the Department of Agriculture for the fiscal year ended June 30, 1918. A copy of this report has also been transmitted to the President of the Senate. Very respectfully,

D. F. HOUSTON, Secretary.

The Speaker of the House of Representatives.

² Printing, engraving, lithographing and binding, \$4,536.74; mechanics', engineers', and electricians' supplies, \$2,812.14; cleaning and toilet supplies, \$2,565.23; subsistence and care of animals, \$189.60; advertising and publication of notices, \$9.

immediate vicinity; also printing the same or issuing by other means, and disseminating by maps, bulletins, and by telegraph and telephone messages; preparing reports for the press of weather synopses, forecasts, and complete information concerning the current local weather conditions in all their phases... iver and food forecasting: Developing

River and flood forecasting: Developing and improving methods of river and flood forecasting; establishing and maintaining river-gauging stations and substations which observe and report rainfall, river stages, and like conditions; disseminating flood information to the public, especially to the parties and interests most directly benefited thereby. Climatological work: Collecting, compiling, charting, and discussing climatological data of the United States; printing and promptly disseminating the information to the public, to commercial exchanges, and to all parties and organizations interested in or benefited by the service that can be promptly reached by the usual means of communication available; collecting, compiling, and furnishing to the Hydrographic Office, for publication, marine meteorological and climatological data.

<mark>\$998</mark> , 752. 34	Agricultural meteorology: Collecting and disseminating information relative to the effect of weather and climate on crops; during the crop season, from Apr. 16 to Oct. 31, collecting daily telegraphic reports from selected substations, report- ing in the interests of cotton, corn, wheat, sugar, rice, tobacco, fruit, and other standard crops, for publication and dis-	
172, 065. 92	semination to the public; issuing weekly summaries of weather and crop condi- tions to commercial exchanges and to all parties and organizations interested in or benefited by the service that can be promptly reached by the usual means of communication available	\$78, 941. 39
	mitting marine intelligence for the bene- fit of commerce and navigation	9, 184. 22
	- Total	1, 611, 182. 57
-	INVESTIGATION AND RESEARCH	I.
	Total expenditure as above Outstanding liabilities, Aug. 31 (estimated) Unexpended balance (estimated)	666, 692. 62 7, 368. 44 1, 888. 94
352, 238. 70	Total allotment=	75, 950. 00

Distributed among the several subactivities as follows:

- Improvement of instrumental equipment: Selecting, testing, improving, and de-signing instrumental apparatus for use in the scientific work of the bureau.....
- Investigations of the problems of forecasting: Improving the accuracy of forecasts and formulating rules and enunciating principles in connection therewith River and flood investigations: Improving
- methods of flood forecasting ...
- Investigations in climatology: Determin-ing more fully the climate of the entire United States, including its insular possessions.
- Aerological investigations: Studying upper-air conditions by means of kites and balloons for the purpose of obtaining gen-eral meteorological data pertaining to the
- whole atmospheric mass. Solar-radiation investigations: Determin-ing the insolation received in heat units on a horizontal surface from the sun and sky under all sky conditions; determining the radiation received on a normal surface in gram calories; establishing normals for insolation; investigating the relation between polarization and insolation on clear days; determining the effect of atmospheric conditions on nocturnal radiation; and measuring the insolation received through ray filters under different conditions..... An empirical determination of the relative
- values of evaporation in the United States: Determining under standard con-ditions of exposure the relative values of evaporation in various portions of the United States, and establishing the rela-tion between the evaporation under the above standard conditions and the climatological factors that combine to bring
- ing the nature of meteorological phenomena and the laws of their actions.
- Seismological investigations: Mapping the United States according to seismological activity and locating geological faults; studying in detail earthquake vibra-tions and drawing inferences therefrom in regard, on the one hand, to the sci-

	entifically important problem of the structure of the earth and, on the other,	
	to the practical question of types of	
	building best adapted to withstand seis- mic shocks	\$2,891.36
\$2, 678.44	Investigations of the relation between cli-	4 -, 001.00
	mate and weather and plant develop-	
	ment: Investigating the effect of cur- rent meteorological factors upon the	•
4, 850. 20	growth of vegetation, the relation of cli-	
5, 241. 16	matological conditions to the growth of	
0, 241. 10	plants and the yield of crops, and the dis- tribution of crop areas.	11, 857. 28
	Ice-storm and sleet investigations: Im-	
4,964.32	proving and extending the issue of fore-	
4, 904. 02	casts and warnings of the approach of ice storms and sleet, and collecting and pub-	
	lishing statistical data thereon showing	
	distribution, frequency, and severity of	
14, 260. 00	ice storms, including details concerning the accompanying winds and other al-	
	lied weather conditions, the thickness,	
	weight, and damaging effects of ice coat-	
	ings to vegetation, overhead-line con- struction, etc., so as to enable the Weather	
	Bureau to meet the demands from tele-	
	graph and telephone companies, electric-	
	power companies, horticulturists, stu- dents, etc., for information relating to	
	such storms.	473.24
	Investigations of frost-protection methods:	
	Investigating the most economical and	
7,941.28	efficient methods of frost protection now in use, and correlating meteorological and	
1,011.20	climatological conditions in fruit and	
	truck producing areas with conditions at	
	key stations of the bureau, so that accurate minimum temperature forecasts may	
	be made for these districts	9, 398. 38

Unexpended balance (estimated)	29.051.48
- Total allotmont	422, 535. 15
Total allotment=	424, 000. 10
Distributed among the several subactivi-	
ties as follows:	
Administration.	
General direction of dairy investigations,	
including branch library, files, requisi- tions, and accounts; dairy engineering,	
compilation and indexing, editorial and	
stenographic work, and stores	45, 233. 01
Dairy farming.	
Supervision, Coneral supervision and office	
Supervision: General supervision and office correspondence and record work; compi-	
lation of material for use in field work and	
preparation of manuscripts	9,600.74
Southern dairying: The object of this work	•
is to encourage the development of the dairy business in the Southern States	
through instruction and demonstration.	19, 223. 38
Dairy demonstration farm: Operation of a	
dairy farm at Denison, Tex., for the pur-	
pose of demonstrating the practicability of reclaiming a worn-out cotton farm by	
dairying.	2, 160.00
Cow-testing associations and cooperation	
with county agents in dairy work: Ad-	
vice and assistance in the organization of cow-testing associations, with the object	
of increasing economically the average	
milk and butter production of the dairy	
cows in the United States; and assistance	•
to county agents in general dairy work,	
such as silo and dairy building construc- tion, feeding, care, and management of	
dairy cattle, demonstrations at fairs, etc.	31, 322. 20
Extension of bull associations: Inaugura-	
morest or the joint ownership of pure-	3, 214. 22
ion, feeding, care, and management of airy cattle, demonstrations at fairs, etc.	

395, 55 540, 90	Community development in dairying: De- termination of the practicability of the small community raising its economic statue through the employment of a field	
424. 38	status through the employment of a field instructor skilled in dairying Investigations in cow-testing associations: Determination of the best form of coop- cretics for the davidement and income	\$2, 682. 2 3
1	eration for the development and increase in production of the dairy herds of the United States.	5, 831. 60
936. 45	Investigations in bull associations: Deter- mination of the best form of cooperation and organization for the development of	4 000 00
FREED	bull associations. Holstein cattle breeding: Investigations in the production of cattle of this type	6, 282. 93
924.36 722.91 663.67	suitable for conditions in the semiarid portions of the West	54.92
	Dairy manufacturing.	
310. 94	Supervision: General direction of dairy manufacturing activities, including ex- tension work carried on with creamerics by correspondence; compilation of in-	
	formation collected Creamery extension: Advice and assistance	9, 483. 01
647. 27	to creamery operators and patrons looking to the improvement of the quality of milk and cream delivered to creameries,	
	the quality of the product, and the gen- eral efficiency of creameries Cheese-factory extension: Extension work	27, 371. 85
066.92 416.75	in representative dairy sections to en-	
051. 48	courage the building of cheese factories in localities where the industry will prove	
535.15	successful, to improve the quality of	
	milk delivered to cheese factories, to improve the methods of making and	
	hence the quality of cheese, and to in- crease the general efficiency of cheese	
	factories and their management	15, 537. 23
	Improvement of dairy products: Assist- ance, through demonstrations and other-	
	wise, for the purpose of increasing the	
	quantity and improving the quality of dairy products and encouraging a larger	
233. 01	consumption of these products on the farm	11, 291. 19
	Creamery management investigations: Study of methods for improving the	
	quality of the milk and cream delivered to creameries and the quality of creamery	
	butter, and for increasing the general	
	efficiency of creameries Cheese-factory investigations: Determina-	6, 591. 97
600.74	tion of the districts in which it would be	
	feasible to encourage the manufacture of cheese, what is being done in the manu-	
223.38	facture of cheese in districts other than the cheese centers, and particularly what	
440.00	kinds of cheese can be successfully and	
	profitably manufactured in certain sec- tions of the South; collection of data rela-	
100 00	tive to methods used in the best managed factories; determination of the machinery	
160.00	most efficient for cheese factories	1, 737. 54
	Renovated butter inspection: Inspection of renovated butter, the materials used in	
	its manufacture, and the factories pro-	
	ducing this product, as required by the act of May 9, 1902	6, 854. 06
	Butter inspection for Navy Department: Daily inspection at plants manufacturing	
	butter for the Navy Department to see	
322. 20	whether the product complies with the specifications and thus to assist the de-	
	partment in securing first-class tinned	
	and tub creamery butter and incidentally study the manufacture of butter for	
214.22	storage	2, 173. 85

.

-

2,608.00

Dairy research laboratories.

- Supervision: General direction and office work of the dairy research laboratories... Investigations of the manufacture and handling of commercial ice cream, to determine methods and conditions necessary for the practical, economical, and sanitary manufacture of this product....
- sanitary manufacture of this product.... Changes in butter: Experiments to determine the factors which control the flavor, both desirable and undesirable, of butter, including studies of the methods of handling cream, pasteurization, ripening of cream, changes in butter in storage, and methods of renovating.....
- Milk-condensing investigations: Investigations to secure a general knowledge of milk condensing, determine causes of spoilage, and develop logical methods of operation.
- Bacteriology of milk: Biological studies of the bacteria occurring in milk, their relation to one another and to similar groups occurring elsewhere, their physiology and action on the constituents of milk, their habitat and the means by which they get into milk, methods of preventing contamination, and means of destroying bacteria in milk.
- Physiology of milk secretion: Investigation of the mechanism of milk secretion and of the factors which control or influence this function, with a view to a more logical breeding and feeding of dairy cows
- Utilization of creamery and cheese-factory by-products: Study of methods for the utilization of by-products of creameries and cheese factories by converting them into products which will be useful in the arts or available as food for man or animals.
- Disposal of dairy, creamery, and cheesefactory wastes: Investigation of methods for the proper disposal of the wastes of dairy farms, creameries, and cheese factories.
- Manufacture and ripening of Swiss cheese: Studies of the factors producing the peculiar chemical and physical changes which give Swiss cheese its desirable character, and the application of this knowledge to practice.
- Soft-cheese investigations: Investigation of the manufacture and ripening of certain European varieties of soft cheese, including a detailed study of the microorganisms active in their production; also the chemical determination of standards of composition with reference to the complex changes involved in the ripening processes as applied to American milk and to the different climatic conditions encountered.....
- Cheddar-cheese investigations: Study of methods of securing a more uniform product, the extent of losses and means of prevention, and bacteriological and chemical factors involved in the development of desirable and undesirable flavors.
- Silage investigations: Study of the changes which take place in the material put into the silo.
- Chemical investigations in the feeding of dairy cattle: Chemical work in connection with the feeding experiments conducted at Beltsville, Md.....

\$3, 273. 35 Dairy sanitation investigations: Investigation of the sanitation of city milk sup-

plies, factors influencing the commercial quality of milk, and means of producing and handling milk of a superior quality.. Cost of handling milk: Determination of the cost of handling milk in cities, including the cost of various operations in preparing milk for the market, with a view to avoid uneconomical methods and suggest ways of lessening the cost of handling......

Milk investigations and demonstrations.

- - Dairy sanitation extension: Educational work among dairymen and milk handlers with the object of unifying and making more efficient inspections carried on by State and municipal boards of health...

Dairy Division experiment farm.

9, 104. 27 Supervision: General direction of dairy investigations at the Beltsville (Md.) experiment station ... Breeding of dairy cattle: Study of the breeding of dairy cattle and application of principles thus established..... Feeding of dairy cattle: Study of the effects of the various feeds and constit-uents of feeds upon the animal body, upon growth, and upon the yield and composition of milk, and of the relative values of feeds for dairy production.... 6, 165. 64 Housing and care of dairy cattle: Deter-1,884.95 mination of the best method of stabling cows, and investigations of problems in the milking and care of cows and in herd management. . Feed production: The production of feed for the dairy herd at the Beltsville farm; 523.76 detailed records being kept of the cost of all farm operations and observations made on the building up of the soil by fertilization, tillage, and drainage

Metabolism in dairy cows.

Western dairy extension.

	5
	Supervision: General direction of western dairy extension work, including corro-
426. 41	spondence and other clerical routine Dairy farming: Instructions to farmers in
	the Western States in the feeding of dairy
	cattle, the raising of calves, construction

mode of procedure to secure the former without suffering from the latter; study of the mode of inheritance of special traits; and, in general, investigations of the factors which determine the course of the life histories of animals Animal husbandry experiment farm. Maintenance of the farm at Beltsville, Md.,	4, 35 8. 84

- for the purpose of affording the bureau
- proper facilities for conducting investiga-tions in the feeding and breeding of farm animals, including poultry

Beef-cattle investigations.

Supervision: General direction of the beefcattle investigations, correspondence, and maintenance of record files pertaining to same.

- Beef production: Study the cost of main-taining breeding herds and the cost of producing beef animals to various ages, study of methods of fattening cattle and of the relative importance of various feedstuffs for such purposes, including work with calves, baby beeves, and steers; investigation of methods of wintering stocker and feeder cattle; and determination of the effect of beef-cattle
- shrinkage in live stock during transporta-tion: Study of the loss in weight of live stock in transit and of methods of improving conditions surrounding live-stock shipments.....

1, 470. 00

Organization of pig clubs: The object of this work is to stimulate an interest in swine production; to teach farm children improved methods of raising, fattening, and marketing hogs; to instill in them, while young, a love of animals which will result in their taking more interest in life upon the farm; and to furnish them at the same time with some work which will, in a practical way, give an insight into the business side of farm life.....

Horse and mule investigations.

- Supervision: General direction of horse and mule investigations, correspondence, and maintenance of record files pertaining to these projects ...
- Farm horse and mule investigations: Study of problems in feeding, breeding, and management of horses and mules, with particular reference to their use as farm work animals.....
- Breeding American carriage horses: Investigations in the production of a breed of horses from American material suitable
- horses from American material suitable for carriage and general purposes...... Breeding Morgan horses: The object of this project is to breed horses under New England conditions, establishing a stud and using horses of Morgan descent as the foundation, and, incidentally, to pre-serve the Morgan type and blood lines.. Breeding horses on Indian reservations: Improvement of the quality of horses bred on Indian reservations by proper selection and the use of pure-bred stallions.
- stallions
- Breeding horses for military purposes: The breeding of horses suitable for military purposes in localities where such horses are the most profitable type for farm use, and the encouragement, in general, of better horse-breeding methods among farmers.....

Poultry investigations.

1,

16, 356. 37

1, 343. 30

- Supervision: General direction of poultry investigations, correspondence, and maintenance of record files connected with these projects..
- Farm-poultry investigations: Study of the effect of rations, the inheritance of egg production and other characteristics, the incubation of eggs, brooding, and the effect on health of fowls and on fertility of eggs of free range, small and large yards, and various styles of houses..... Turkey and guinea investigations: Study of the effect of different rations on the health of here direction and the state of the state
- health of breeding stock, egg production, rate of growth of young stock, and fatten-ing for market; improvement of the quality of the different breeds; development and improvement of the meat qualities and meat-carrying capacity; study of methods of natural and artificial incubation and brooding; and investiga-tion of the general management of turkeys and guineas, such as free range confinement, various styles of housing and shelter, methods of killing and dressing on the farm, and methods for the control and prevention of mortality in turkeys.
- Pigeon and squab investigations: Study of beeding, breeding, breedin

the feeding of pigeons, and possible profits to be expected in this industry; tests of different breeds of pigeons and the crosses of these breeds to determine their suitability and value for the pro-duction of squabs; and study of the possible improvement in prolificacy of squab breeders in breeding, selection, and feeding ...

- Ostrich investigations: Investigations of \$32, 875.81 the problems underlying the breeding, incubation, and feeding of ostriches in the United States; cooperation with the pathological division of the bureau in studying the diseases and climatic conditions affecting them; study of the mar-keting of feathers; and assistance to ostrich breeders in the preparation of their product for market. 4, 983.65 Organization of boys' and girls' poultry clubs: The object of this work is to stimulate an interest in poultry among farm
 - 7, 400. 90 boys and girls; to give a better knowledge of the value and importance of the poultry industry; to encourage better poultry management and the breeding of standard-bred poultry; to standardize poultry and poultry products; and to show how increased revenue may be obtained by 5, 152.81 marketing a first-class uniform product ...

- Investigations of swamp fever: Determination of the nature, cause, and prevention of the so-called swamp fever of horses, and development of an accurate method of laboratory and clinical diagnosis; involves a general study of the so-called filterable or untravisible viruses and new methods of procedure in diagnostic technique
- technique. Diagnosis of and immunization against anthrax: Experiments having in view the differentiation between anthrax and other diseases which bear resemblance to it and the perfecting of means of immunization against the disease by vaccination.
- Investigations of disease of fowls: Study of the causes and methods of control of diseases of fowls.....
- Miscellaneous biological experiments and investigations: Development of methods for the control of hemorrhagic septicemia; determination of the specific nature of diseases affecting animals at the National Zoological Park for the purpose of controlling these diseases; investigations of market milk as it reaches the city after shipment from dairies in the country, for detection of pathological conditions; and miscellaneous investigations of animal diseases as required from time to time... Index catalogue and collection of parasites:
- Index catalogue and collection of parasites: Maintenance of a comprehensive card index to the literature of animal parasites and a collection of specimens of parasites for study and reference.....
- Investigation of roundworms of sheep: Development of methods for the control and
- eradication of these parasites..... Investigations of anthelminitics and the treatment of live stock for internal parasites: Determination of the relative values of remedies used against internal parasites and development of methods for the practical treatment of live stock to destroy or remove these organisms.
- Investigations of parasitic protozoa, with particular reference to blackhead in turkeys: Studies of the character and life history of these parasites, with a view to their eradication and control.....
- Investigations of cattle ticks, mange mites, and other external parasites: Investigations to develop the most effective methods for the eradication and control of external parasites of animals.....
- Miscellaneous investigations of animal parasites, their control and eradication: Investigations to develop methods for the control and eradication of miscellaneous animal parasites.
- General maintenance of Bethesda experiment station: This represents overhead charges incidental to the maintenance and upkeep of the buildings, fences, and equipment of the bureau experiment station at Bethesda, Md., together with the cost of planting and harvesting crops and other activities in connection with the operation of the farm, which items can not be segregated and charged against specific investigational projects.....
- Breeding and feeding small experiment animals for disease research: The object of this work is to breed and have available an abundant supply of small experiment animals of definite known history for the various investigations conducted by the several laboratories of the Bureau of Animal Industry.

	Investigations of stock poisoning by plants: Investigation of the losses of stock due to	•

STATEMENT OF EXPENDITURES OF THE DEPARTMENT OF AGRICULTURE.

- Supervision of operation conducted under certificates of exemption: Under this project premises are examined to ascertain whether the shippers are retail butchers, retail dealers, or farmers, and hence entitled to operate under certificates of exemption, as provided under the meat-inspection law; also to see that the premises in which animals are slaughtered or where meat and meat products are prepared by or for persons who make interstate shipments under exemption from inspection are maintained in a sanitary condition and that the articles so shipped are sound, healthful, wholesome, and fit for human food.....
- Examination of imported meats and meat food products: Operations under this project are directed to prevent the importation of meat and meat food products of cattle, sheep, swine, and goats which are not properly certified, or which are falsely labeled, or which are unsound, unhealthful, unwholesome, or otherwise unfit for human food, or which contain any prohibited dye, chemical, preservative, or other harmful ingredient.....
- any prohibited dye, chemical, preservative, or other harmful ingredient..... Field overhead and miscellaneous meat inspection: This includes the overhead charges, such as details of inspectors in charge, supervisors, clerks, etc., at the meat-inspection stations throughout the United States; also minor activities not included under other projects of this group....
- Bacteriological investigations of meat and meat food products: The object of these investigations is to aid inspectors to determine the proper disposition of questionable meat and to enable packers, by the use of proper methods, to prevent spoilage.
- Investigation of changes in meats during preservation: Study of the changes which take place in meats during preservation by various methods, with particular reference to the cause of such changes and their effect upon the wholesomeness and nutritive value of the product ... \$4,028.61 Investigation of canned meats: The object of this project is to develop, through chemical and bacteriological studies, information concerning the effect which prolonged storage has upon canned meats. Investigations of pathological conditions noted during meat inspection: Investi-6.85 gation of any obnormal, unusual, or hitherto unnoted condition of interest, \$4, 591. 10 directly or indirectly, from the meat-inspection viewpoint, which may be encountered during routine Federal meat inspection, special emphasis being laid upon infectious conditions and those characterized by malignancy... 4, 198. 47 Zoological investigations relating to meat inspection: Investigation of trichinosis and measles, and other zoological studies relating to meat inspection, with a view to improve methods of meat inspection 10, 961. 66 in so far as parasitic diseases of food animals are concerned..... 4, 915. 96 Investigations upon the control of the house fly and other insects in establishments operating under Federal meat 485.70 inspection..... 52,091.66 3, 707, 558. 64 Total..... The meat-inspection work described in the preceding paragraphs was conducted at Washington, D. C., and 253 stations and substations in the field. The approximate

paragraphs was conducted at Washington, D. C., and 253 stations and substations in the field. The approximate cost and the character of the work conducted at each of the 144 principal stations are given below, substations 334. 02

¹Includes 5 and 10 per cent increased compensation, amounting to \$56,725.77, provided by the agricultural appropriation act for the fiscal year 1918.

PROJECT STATEMENTS.

Administration.

Total expenditures as above	40	(
Total allotment 114, 696.	35	
This project covers the administration of the business affairs of the bureau and general direction of all its investigational activities, and includes the offices of chief and asso- ciate chief of bureau, the office of the assist- ant to the chief, editorial office, office of records, library, central files section, and supply section	. 28	
LABORATORY OF PLANT PATHOLOGY.		
Total expenditures as above\$53, 107.Outstanding liabilities, Aug. 31 (estimated)5, 587.Unexpended balance (estimated)12, 802.	. 03	
Total allotment	. 94	

Distributed among the several subactivities as follows:

- Central laboratory of plant pathology: Study and identification of fungi and bacteria parasitic on plants, with a view to the discovery of remedies and methods of preventing diseases caused by them. Diseased material is received from all parts of the United States and abroad for examination and advice given as to methods of treatment.
- treatment.... Pathological collections. Maintenance of an herbarium of pathogenic specimens, also mycological and host indexes of new species and lists of plants which they attack, and a mycological exchange with American and foreign scientists; and the identification of pathological material received by correspondence or otherwise.....
- Plant-disease survey: Recording the geographical distribution and prevalence of plant diseases and the losses occasioned by

.

Distributed among the several subactivities as follows:

Supervision: General direction of investigations and clerical routine. .

- Vegetable handling, transportation, and stor-age: Determination of the factors which govern the successful handling, transporta-tion, and storage of vegetables, with a view to reduce decord
- to reduce decay. Vegetable production: Surveys of truck-crop and market-gardening districts to determine the factors which limit crop production or cause crop deterioration; study of the best cultural methods, also of the value of or-ganic soils with reference to their utility in the growing of vegetables; a comprehensive study of the peanut industry; and investigation of the commercial production of veg-
- etable and flower seeds. Vegetable improvement through breeding, selection, and domestication: Development of better strains and varieties; standardization of different varieties of vegetables with a view to secure uniformity in size, season,
- a view to secure uniformity in and, productiveness, etc. Irish-potato investigations: A comprehensive study of the culture, handling, and utiliza-tion of the potato, including the development of disease-resistant varieties.....
- Investigations in systematic olericulture: Accumulation of data relating to the origin and history of varieties of vegetables, and establishment of a simple and stable nomenclature for the cultivated vegetables. .
- Vegetable utilization: Investigations of the best and most practical methods of using the lower grades of vegetables and surplus stock which can not be marketed profitably in a fresh state.
- Landscape-gardening and floriculture investigations: Study of the arrangement, ef-fects, and uses of trees, shrubs, and plants on streets, parks, and lawns, and investigation of the efficiency of various systems of plant propagation

*STATEMENT OF EXPENDITURES OF THE DEPARTMENT OF AGRICULTURE.

Development of commercial methods for the utilization of cull citrus fruits, especially for the purpose of increasing the quantity and quality of the vield of essential oils from the peel and of juice from the fruit; study of methods for the extraction of other by-products from citrus fruits; and investi- gation of methods for determining maturity of fruits and vegetables	\$ 16, 854. 97	Investigation and demonstration of processes for preparing sugar-cane and sorghum sirup of superior quality which will not crystal- lize or ferment, and of methods by which variability of flavor and color of the product may be overcome; the adoption of which methods, it is believed, will greatly stimu- late sirup production and prevent serious losses from spoilage

SOIL PHYSICAL INVESTIGATIONS.

, 950. 00	Total expenditures as above. Outstanding liabilities, Aug. 31 (estimated) Unexpended balance (estimated)	\$15, 145. 92 1, 957. 73 45. 56
	Total allotment	17, 149. 21
700. 00	Distributed among the several subactivities as follows: Supervision: Planning, direction, and super- vision of the routine and investigational work in soil physics; correspondence and other clerical details	3, 200. 00
, 300. 00	Designing, construction, and standardization of instruments: Routine work in the repair of instruments and apparatus, and the de-	
, 013. 57 , 163. 57	signing and construction of special pieces of apparatus for the various divisions of the bureau	2, 950. 00

Inorganic composition of soils: A systematic inquiry, in cooperation with the soil sur-vey, into the chemical composition of imvey, into the chemical composition of im-portant agricultural soils of the United States. Hydrolytic decomposition of soil-forming minerals: Study of the action of water and such substances as may exist in the soil solution upon the decomposition and degra-dation of soil minerals and the possible synthesis of new mineral species. Routine laboratory analyses: Chemical analy-sis of soils, waters, and similar materials for

sis of soils, waters, and similar materials for this bureau and other bureaus of the de-

Liming of soils: Study of the effects of liming and determination of a proper basis for the practice of liming soils. 5, 3,

Total..... 23, -

.

 Physical examination of soils: Quantitative determination of the mechanical composition for an expression of the textural characteristics of soils; investigation of the physical composition of soils; and determination of the relation of the different components to the physical condition of the soil. Movement of the soil solution: Study of the movement and distribution of moisture in the soil and of methods for determining the critical moisture content; and devising an instrument that can be used in the field for 	\$5, 620. 00	Concentration of low-grade phosphates: De- termination of economical, mechanical, and chemical methods of separating phosphoric acid from impurities with which it is asso- ciated in the waste material resulting from mining operations Production of concentrated fertilizer prod- ucts: Investigation of the possibility of producing combinations of nitrogen, phos- phorus, and potash, or combinations of any two of these elements, by methods which may make it possible to use such compounds for fertilizer purposes	\$3, 450. 00
determining the moisture content of soils. Fixation of nitrogen by catalytic processes: Investigation of methods of fixing nitrogen by the aid of catalytic reagents, with a view to increase the efficiency of the known	480. 00 4, 853. 65	Production of raw materials suitable for fertilizer purposes: The purpose of this project is to obtain accurate and authentic data, by correspondence with producers and by occasional visits to mines and fac-	1, 900. 00
methods and to devise new ones Total Investigations of Fertilizer Resou	17, 103. 65	tories, regarding available or partially available fertilizer resources Effect of harvesting and other factors on the growth of kelp: Determination of the effect of different methods of harvesting on the growth of kelp; study of the influence of	1, 440. 00
Total expenditures as above. Outstanding liabilities, Aug. 31 (estimated). Unexpended balance (estimated).	\$173, 056. 29 7, 843. 81 10, 828. 14	fresh water and of the effect of storms on the kelp beds. Analysis of samples: Examination of samples of materials which give promise of value for	360.00
Total allotment	191, 728. 24	fertilizer use Total. 1	1, 550.00
Distributed among the several subactivities as follows:		Soil-Survey Investigations.	180, 900. 10
Supervision: Planning, direction, and super- vision of the investigations of fertilizer re- sources of the United States	4, 200. 00	Total expenditures as above. Outstanding liabilities, Aug. 31 (estimated) Unexpended balance (estimated)	1,666.90
Extraction of potash salts from kelp: Investi- gation and demonstration on a semicommer- cial scale of the practicability and economic		Total allotment	223, 342. 20
value of various methods used for the ex- traction of potash salts from the giant kelps	100 000 50	Distributed among the several subactivi- ties as follows:	
on the Pacific coast. Production of potash from feldspar and other mineral sources: Determination of commer- cially possible methods for utilizing feld- spar, alunite, natural brines, etc., as sources of potash for fertilizer production	139, 803. 50 · 2, 856. 00	Supervision: General direction and super- vision of the soil-survey investigations, including office correspondence, compila- tion of field reports, assignments of the field force, and all other matters relating to the administration of the work	14, 939. 26
Fertilizer value of city and trade wastes: De- termination of the amount and value of city and trade waste as sources of commercial fertilizer material	2, 250. 00	Soil surveys: These activities comprise the surveying, mapping, and classifying of the soils of important areas in different parts of the country; the preparation of re-	11, 000. 20
Fertilizer value of nitrogenous materials: De- termination by chemical and other methods of the actual fertilizer value of various		ports containing descriptive matter re- lating to the soils, their character, origin, and value for crops, and to the agricultural	
nitrogenous materials. Fixation of nitrogen by catalytic processes: Investigation of methods of fixing nitrogen by the aid of catalytic reagents, with a view to increase the efficiency of the known	3, 228. 00	conditions found in each area surveyed; the preparation of maps showing the distri- bution of the soils; and the dissemination of information relating to the use of soils. The purpose is to acquire a knowledge of	
methods and to devise new ones Fixation of atmospheric nitrogen: Investiga-	6, 849. 60	the soils of the United States and make it available for use by other bureaus and de-	
tion of new processes of fixing nitrogen by reduction methods. Extraction of phosphoric acid from natural phosphates: Investigation of the sulphuric- acid and electrical methods used for the extraction of phosphoric acid from natural	6, 413. 00	partments, agricultural colleges, experi- ment stations, and others engaged in the development of agriculture. The follow- ing areas were surveyed in whole or in part during the fiscal year 1918, aggregating 42,871 square miles:	
phosphates and devising improvements in these processes. Phosphate industry of the United States:	3, 700 . 00	Alabama: Marengo County, ¹ \$3,068.45; Morgan County, ¹ \$4,424.88; St. Clair County, ¹ \$276.82; Shelby County, ¹ \$379.11.	8, 149. 26

CEREAL AND FORAGE INSECT INVESTIGATIONS.

Total expenditures as above	\$127, 897.32
Outstanding liabilities, Aug. 31 (estimated).	3,079.52
Unexpended balance (estimated)	5, 253.08

Total	allotment	136,	229.	92
2		-		

Distributed among the several subactivities as follows:

- Supervision: General supervision of all the cereal and forage insect investigations, preparation of results for publication, and usual office routine. Cereal insects: Investigations of insects at-
- tacking cultivated grains, including the white grub, corn earworm, European corn borer, cutworms, western army cutworm, jointworm, wireworm, chinch bug, Hessian fly, corn rootworms, and miscellaneous insects affecting rye, barley, and other small grains; and experiments in the utilization of natural enemies of such insects, besides remedial and preventive measures
- through mechanical means. Forage insects: Studies of insects attacking plants used as forage, including the alfalfa weevil, alfalfa seed chalcis, insects affecting the production of clover seed, and those attacking soy bean, cowpea, vetch, and other plants and grasses used for forage; and investigation of methods of combating these insects through the employment of their natural enemies and the utilization of mechanical, remedial, and preventive measures.....

OUTHERN FIELD-CROP INSECT INVESTIGA

.

SOUTHERN FIELD-OROP INSECT INVESTIG	ATIONS.
Total expenditures as above	\$93, 438. 65
Outstanding liabilities, Aug. 31 (estimated).	638.09
Unexpended balance (estimated)	4,751.63
-	<u>e</u> ,
Total allotment	98, 828. 37

Distributed among the several subactivities as follows:

Supervision: General supervision of southern field-crop insect investigations and con-

duct of usual office routine.....

Cotton insects: Investigation of the cotton boll weevil, including life-history studies, experiments in methods of cultivation, determination of the efficiency of hand picking of squares, experiments with in-secticides, value of parasitic enemies as a control measure, and collection of data as to the status and dispersion of the weevil; study of the habits and extent of damage caused by cotton root aphids, cutworms, red spider, cotton bugs, and other insects, and development of methods of control; determination of the injury caused by thrips and other insects affecting cotton in the Imperial Valley, Cal., and of appropriate remedies; study of the relation of insects to the shedding of the cotton fruit, with a view to reduce loss from this cause

- Tobacco insects: Study of insects attacking tobacco, including hornworms, budworms, wireworms, and the large tobacco beetle; determination of methods of control, by spraying and otherwise, and demonstra-tion to planters of such methods; determi-nation of fonzible means to methods; nation of feasible means to prevent losses in warehouses and factories due to the cigarette beetle; and investigation of insects which transmit the mosaic disease. Rice insects: Life-history studies of the insect
- species responsible for injury to this crop, and determination and demonstration of 51.89 control measures..... Sugar-cane insects: Investigation of the moth borer, mealy bug, beetles, leafhoppers, and
- other insect enemies of sugar cane, with a view to discover means of suppressing them. 5,387.73

ROAD BUILDING AND MAINTENANCE.

Total expenditures as above	\$156, 683. 13
Outstanding liabilities, Aug. 31 (estimated).	1,999.35
Unexpended balance (estimated)	

Total allotment...... 168, 194. 40

Distributed among the several subactivities as follows:

- Supervision: Direction of the various research and extension activities under this group and conduct of routine office business, including correspondence, maintenance of records, purchase of supplies and equipment, and other clerical work.....
- Investigation of costs of road maintenance: Study of costs of maintenance in counties where roads have been systematically improved under the direction of competent engineers, with a view to secure accurate cost data for various types of road......
- Investigations of various types of road construction and costs: Study of certain types of road construction which have been developed locally with available material and labor, as the basis for giving advice as to proper types of construction, such as bituminous-sand, rock-asphalt, bituminoussurfaced gravel, patented types, etc.....
- Object-lesson roads: Demonstration of the proper methods of construction and the most efficient use of materials, for the purpose of instructing road officials in the art of road building, and correlation of conclusions drawn from laboratory tests with those resulting from field service tests....
- County road systems: Study of the roads of a county or other political subdivision and preparation of general plans and specifications for their administration, improvement, and maintenance.....
- Inspection, advice, and lectures: Inspections by high way engineers and studies of specific local problems in road construction and maintenance; preparation of definite recommendations for the solution of these problems, and the imparting of this information to road officials, high way associations, mass meetings of citizens, and others who require it.
- Superintendence of county roads: Demonstration to county officials of the advantages accruing from the supervision of all county roads by one skilled in highway construction and maintenance and of the advantages of centralized control over all roads in a county.....
- Bridge construction in connection with road building and maintenance: This work consists of furnishing to local officials plans and specifications for bridges and investigating conditions and advising the authorities interested as to the best methods of bridge construction to meet their peculiar needs and conditions.
- Road maintenance (advice and inspection): Supervision of the maintenance of certain post-road projects for the purpose of determining accurately the relation between the cost of effective maintenance and the available local funds and of determining main-

92 40	the Post Office Department, under the terms of the act of Aug. 24, 1912, by making inspections, furnishing estimates of cost and other data, and providing the services of engineers to supervise the construction and improvement of highways over which United States mail are carried	1, 231. 13

to shippers a better understanding of their rights, duties, and joint responsibilities with the carriers in the safe transportation of their products to consumers; cooperation with shippers and carriers in a campaign of education for the use of better packages and better methods of harvesting, packing, and loading, so as to reduce the present great economic loss of foodstuffs in transit; encouraging the proper construction of coldstorage houses wherever desirable; accurate determination of the amount, kind, and location of all available public storage space in the United States for foodstuffs (except grains), as well as its ownership and the rates charged for its use; ascertaining the relative quantity of foodstuffs held in public storage, as well as that held in private storage for sale, the points at which these foodstuffs are so held, and the relation of these points to producing sections, the length of time they are held, and the effect upon prices of holding them; issuing reports regarding the cold-storage holdings

- Miscellaneous problems in marketing and cooperation: Cooperation with other governmental agencies already conducting investigations in the marketing of specific products; and investigations relative to the preparation, handling, preservation, and marketing of food and miscellaneous products, and regarding rural-organization work not specifically provided for in other projects.
- Direct marketing: Determination of the feasibility, both from a physical and economic viewpoint, of marketing farm products by parcel post and by express from producer to consumer direct, and ascertaining the best methods to be used.....
- Marketing live stock, meats, and animal byproducts: Conduct of a thorough study of existing markets and methods of marketing

live stock through the large central and small local markets, including transportation, yardage, sale, and delivery of live stock and the slaughter, packing, and wholesale and retail distribution of meat products and by-products derived therefrom; classification and grading of live stock and meats; and other allied subjects, with a view to improve the methods and reduce the cost of marketing live stock, meats, and animal by-products.....

- with a view to improve the methods and reduce the cost of marketing live stock, meats, and animal by-products..... Market business practice: Investigation of the business practices of cooperative and farmers' marketing, distributing, purchasing, and rural business organizations and other marketing agencies, with special reference to their accounting systems and methods of auditing, business organization, and financing, and the devising of suitable methods of business practice and accounting systems for these organizations and agencies for the purpose of increasing their efficiency....
- Marketing grain and hay: Study of the primary and terminal marketing of grain and hay, including the cost of marketing; comparison of services rendered by independent and line elevators and cooperative purchasing and selling associations; future transactions and exchange practices, scalping, prices, market quotations, supply and demand, export trade, and related subjects, in order to suggest possible improvements and economies in marketing the grain and hay crops.

age, market quotations, factors affecting supply and demand, relations of vegetableseed production to seed marketing agencies, forms of advance growing contracts, factors affecting commercial quality and germination of seeds, cleaning methods and machinery, and exports and imports of seeds and their bearing on domestic production and markets.....

- Marketing cotton seed and its products: Investigation of present methods of handling, marketing, and utilizing cotton seed and its crude products, with a view to suggest means whereby improvements may be made and economics effected; and studies regarding future trading, the establishment of standard grades, and the standardization of conditions under which cotton seed and its products are handled and stored.....
- Marketing dairy products: Study of the marketing of dairy products and dairy substitutes, including the agreements under which they are sold, the methods and costs of their preparation for market, market grades and classification of dairy products, market quotations and quotation systems, market requirements and conditions, marketing methods and facilities, and related subjects, in order to suggest measures by which market conditions and marketing methods may be improved and the cost of marketing dairy products reduced
- Cotton warehousing investigations: Accumulation and dissemination of useful information relating to the warehousing of cotton, insurance rates while in storage, and benefits, including better arrangements for financing, to be derived from conserving cotton in storage houses, the construction of different types of warehouses, and the relation of present methods and practices of compressing cotton to warehousing.....
- Foreign market investigations: Investigation of foreign markets for American farm and manufactured food products. from the handling at the American seaboard to the distribution in foreign countries, and assistance in the development of the export trade in such products; investigation especially of the export facilities at the American seaboard and beyond, the methods and costs of physically handling products intended for shipment abroad. transoceanic and foreign transportation, the methods of distribution and sale in foreign countries, their sources of supply, the consumptive demand, trade practices and preferences, and the various competitive factors encountered abroad by American producers and shippers; incidentally, investigation of successful foreign systems, cooperative and otherwise, for purchasing farm supplies and marketing farm products, including a study of representative consumers' organizations and municipal markets, and the conditions under which they have been developed; and investigation of the importation by the United States of farm and manufactured food products and the influence of such imports on the domestic markets.
- Preservation of fruits and vegetables in transportation and storage: Determination of the effect on the keeping qualities of fruits and vegetables of commercial methods and facilities used in harvesting and preparing them for shipment and of the amount of deterioration superinduced by the con-

	ditions under which they are stored and transported, in order to demonstrate im- proved methods of and facilities for har- vesting, precooling, loading, refrigeration- in transit, transporting, and storing such	_
