Now Available Online via  
***GPO Access***

Free online access to the official editions of the *Federal Register*, the *Code of Federal Regulations* and other Federal Register publications is available on *GPO Access*, a service of the U.S. Government Printing Office at:

<http://www.access.gpo.gov/nara/index.html>

For additional information on *GPO Access* products, services and access methods, see page II or contact the *GPO Access* User Support Team via:

- ★ Phone: toll-free: 1-888-293-6498
- ★ Email: [gpoaccess@gpo.gov](mailto:gpoaccess@gpo.gov)

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see <http://www.nara.gov/fedreg>.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at <http://www.access.gpo.gov/nara>. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to [swais.access.gpo.gov](http://swais.access.gpo.gov), or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at [gpoaccess@gpo.gov](mailto:gpoaccess@gpo.gov); by fax at (202) 512-1262; or call (202) 512-1530 or 1-888-293-6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday-Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is \$555, or \$607 for a combined **Federal Register**, **Federal Register Index** and **List of CFR Sections Affected (LSA)** subscription; the microfiche edition of the **Federal Register** including the **Federal Register Index** and **LSA** is \$220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is \$8.00 for each issue, or \$8.00 for each group of pages as actually bound; or \$1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 63 FR 12345.

Title 3—

Proclamation 7082 of April 15, 1998

The President

National Recall Round-Up Day, 1998

**By the President of the United States of America****A Proclamation**

More than 21,000 Americans lose their lives each year in accidents involving consumer products, and more than 29 million are injured. These accidents cost our Nation over \$200 billion annually, and the cost in terms of human suffering is immeasurable.

The Consumer Product Safety Commission (CPSC) is on the front line of the Federal Government's efforts to protect the safety and well-being of our citizens, especially our children. The CPSC monitors the performance of more than 15,000 types of consumer products and secures the recall of those that prove to be defective and potentially hazardous. Last year alone, the CPSC negotiated 362 recalls involving over 76 million individual consumer products that presented a significant risk to the public. But getting dangerous products off store shelves is only the first step. The real challenge is getting them out of the homes of people who have already purchased them.

On April 16, the CPSC, in conjunction with State and local governments and community organizations across the country, will conduct the second annual Recall Round-Up Day. This initiative is a public safety campaign to warn Americans that they may still be exposing themselves and their families to recalled products that could seriously injure or even kill them. Despite recalls and safety alerts issued by the CPSC, many of these hazardous products are still in consumers' homes or can be purchased at secondhand stores and garage sales.

This year's Recall Round-Up effort will spotlight the dangers associated with five types of previously recalled consumer products: playpens, bunk beds, halogen floor lamps, hand-held hair dryers, and lawn darts. The CPSC encourages government officials, health, safety, and consumer agencies, community organizations, and the media to alert the American people—particularly parents and child care providers—to the importance of repairing, returning, or destroying any of these products if they have been recalled. I encourage all Americans to make use of this vital information to protect the safety and health of their families and to avoid preventable tragedies.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 16, 1998, as National Recall Round-Up Day. I call upon all Americans to observe this day by working with safety, health, and consumer agencies and other appropriate community organizations to organize and conduct local round-ups of dangerous and defective consumer products and to warn parents, child care providers, and the general public about the hazards of using recalled consumer products.

IN WITNESS WHEREOF, I have hereunto set my hand this fifteenth day of April, in the year of our Lord nineteen hundred and ninety-eight, and of the Independence of the United States of America the two hundred and twenty-second.

*William Clinton*

# Rules and Regulations

Federal Register

Vol. 63, No. 74

Friday, April 17, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

#### 9 CFR Part 78

[Docket No. 98-036-1]

#### Brucellosis in Cattle; State and Area Classifications; Alabama

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Interim rule and request for comments.

**SUMMARY:** We are amending the brucellosis regulations concerning the interstate movement of cattle by changing the classification of Alabama from Class A to Class Free. We have determined that Alabama meets the standards for Class Free status. This action relieves certain restrictions on the interstate movement of cattle from Alabama.

**DATES:** Interim rule effective April 14, 1998. Consideration will be given only to comments received on or before June 16, 1998.

**ADDRESSES:** Please send an original and three copies of your comments to Docket No. 98-036-1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comments refer to Docket No. 98-036-1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690-2817 to facilitate entry into the comment reading room.

**FOR FURTHER INFORMATION CONTACT:** Dr. R.T. Rollo, Jr., Staff Veterinarian, National Animal Health Programs, VS, APHIS, 4700 River Road Unit 43,

Riverdale, MD 20737-1231, (301) 734-7709; or e-mail: rrollo@aphis.usda.gov.

#### SUPPLEMENTARY INFORMATION:

##### Background

Brucellosis is a contagious disease affecting animals and humans, caused by bacteria of the genus *Brucella*.

The brucellosis regulations, contained in 9 CFR part 78 (referred to below as the regulations), provide a system for classifying States or portions of States according to the rate of *Brucella* infection present, and the general effectiveness of a brucellosis control and eradication program. The classifications are Class Free, Class A, Class B, and Class C. States or areas that do not meet the minimum standards for Class C are required to be placed under Federal quarantine.

The brucellosis Class Free classification is based on a finding of no known brucellosis in cattle for the 12 months preceding classification as Class Free. The Class C classification is for States or areas with the highest rate of brucellosis. Class B and Class A fall between these two extremes. Restrictions on moving cattle interstate become less stringent as a State approaches or achieves Class Free status.

The standards for the different classifications of States or areas entail (1) maintaining a cattle herd infection rate not to exceed a stated level during 12 consecutive months; (2) tracing back to the farm of origin and successfully closing a stated percent of all brucellosis reactor cases found in the course of Market Cattle Identification (MCI) testing; (3) maintaining a surveillance system that includes testing of dairy herds, participation of all recognized slaughtering establishments in the MCI program, identification and monitoring of herds at high risk of infection (including herds adjacent to infected herds and herds from which infected animals have been sold or received), and having an individual herd plan in effect within a stated number of days after the herd owner is notified of the finding of brucellosis in a herd he or she owns; and (4) maintaining minimum procedural standards for administering the program.

Before the effective date of this interim rule, Alabama was classified as a Class A State.

To attain and maintain Class Free status, a State or area must (1) remain

free from field strain *Brucella abortus* infection for 12 consecutive months or longer; (2) trace back at least 90 percent of all brucellosis reactors found in the course of MCI testing to the farm of origin; (3) successfully close at least 95 percent of the MCI reactor cases traced to the farm of origin during the 12 consecutive month period immediately prior to the most recent anniversary of the date the State or area was classified Class Free; and (4) have a specified surveillance system, as described above, including an approved individual herd plan in effect within 15 days of locating the source herd or recipient herd.

After reviewing the brucellosis program records for Alabama, we have concluded that this State meets the standards for Class Free status. Therefore, we are removing Alabama from the list of Class A States in § 78.41(b) and adding it to the list of Class Free States in § 78.41(a). This action relieves certain restrictions on moving cattle interstate from Alabama.

##### Immediate Action

The Administrator of the Animal and Plant Health Inspection Service has determined that there is good cause for publishing this interim rule without prior opportunity for public comment. Immediate action is warranted to remove unnecessary restrictions on the interstate movement of cattle from Alabama.

Because prior notice and other public procedures with respect to this action are impracticable and contrary to the public interest under these conditions, we find good cause under 5 U.S.C. 553 to make it effective upon signature. We will consider comments that are received within 60 days of publication of this rule in the **Federal Register**. After the comment period closes, we will publish another document in the **Federal Register**. It will include a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

##### Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the brucellosis

status of Alabama from Class A to Class Free will promote economic growth by reducing certain testing and other requirements governing the interstate movement of cattle from this State. Testing requirements for cattle moved interstate for immediate slaughter or to quarantined feedlots are not affected by this change. Cattle from certified brucellosis-free herds moving interstate are not affected by this change.

The groups affected by this action will be herd owners in Alabama, as well as buyers and importers of cattle from this State.

There are an estimated 32,230 cattle herds in Alabama that would be affected by this rule. All of these are owned by small entities. Test-eligible cattle offered for sale interstate from other than certified-free herds must have a negative test under present Class A status regulations, but not under regulations concerning Class Free status. If such testing were distributed equally among all animals affected by this rule, Class Free status would save approximately \$4 per head.

Therefore, we believe that changing the brucellosis status of Alabama will not have a significant economic impact on the small entities affected by this interim rule.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

#### Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

#### Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

#### Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

#### List of Subjects in 9 CFR Part 78

Animal diseases, Bison, Cattle, Hogs, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, 9 CFR part 78 is amended as follows:

#### PART 78—BRUCELLOSIS

1. The authority citation for part 78 continues to read as follows:

**Authority:** 21 U.S.C. 111–114a–1, 114g, 115, 117, 120, 121, 123–126, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.2(d).

#### § 78.41 [Amended]

2. In § 78.41, paragraph (a) is amended by adding "Alabama," immediately before "Alaska," and paragraph (b) is amended by removing "Alabama."

Done in Washington, DC, this 14th day of April 1998.

**Charles P. Schwalbe,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

RIN 2120–AA64

#### Airworthiness Directives; Twin Commander Aircraft Corporation 500, 600, and 700 Series Airplanes

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD) that applies to all Twin Commander Aircraft Corporation (Twin Commander) 500, 600, and 700 series airplanes. This AD

requires installing access holes in both wing leading edges and repetitively inspecting the forward attach brackets and straps for cracks. Reports of cracks in the wing to fuselage attachment brackets and straps, wing station (WS) 24, and fuselage frames prompted this action. The actions specified by this AD are intended to detect cracks at the wing to fuselage attach points, which, if not detected and corrected, could cause structural failure and loss of control of the airplane.

**DATES:** Effective May 18, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 18, 1998.

**ADDRESSES:** Service information that applies to this AD may be obtained from Twin Commander Aircraft Corporation, P. O. Box 3369, Arlington, Washington, 98223; telephone (360) 435–9797; facsimile: (360) 435–1112. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 95–CE–92–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

#### FOR FURTHER INFORMATION CONTACT:

Jeffrey Morfitt, Aerospace Engineer, FAA, Seattle Aircraft Certification Office, 1601 Lind Ave. S.W., Renton, Washington, 98055–4056; telephone (425) 227–2595; facsimile (425) 227–1181.

#### SUPPLEMENTARY INFORMATION:

#### Events Leading to the Issuance of This AD

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to Twin Commander 500, 600, and 700 series airplanes was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on August 19, 1997, (62 FR 44096). The NPRM was the result of reports of cracks in the wing to fuselage attachment brackets and straps, wing station (WS) 24, and fuselage frames. The NPRM proposed to require:

	A	B	C
Part I .....	Installing access holes in left and right wing leading edges and inspecting the forward attach brackets and straps for cracks. For any airplanes that have wings modified with titanium leading edges through an STC, remove the wing root fairings to accomplish the required inspections, in lieu of installing the access holes.	If cracked, prior to further flight, replacing the brackets and straps or repairing the part with an approved repair scheme. Then accomplish Part II of this AD.	If no cracks, repeat the inspection at regular intervals until cracks are found, then accomplish Part II.
Part II .....	Inspecting for cracks on both wing leading edge closeouts, upper & lower return flange radius, fuselage frame where tee bracket attaches, inboard side of attached bracket and frame tee bracket.	If cracked, prior to further flight, replacing any cracked part or repairing the part with an approved repair scheme.	After repairing or replacing the damaged part, continuing to inspect at regular intervals.
Part III .....	Inspecting fuselage station (f.s.) 100 for cracks.	If cracked, prior to further flight, repairing with an approved repair scheme, and continuing to inspect at regular intervals.	If no cracks, repeating the inspection at regular intervals until cracks are found, then accomplishing Part III B of this AD.

Accomplishment of the proposed action as specified in the NPRM would be in accordance with the Compliance section and Part I, II, and III of the ACCOMPLISHMENT INSTRUCTIONS sections of Twin Commander Aircraft Corporation (Twin Commander) Service Bulletin (SB) No. 223, dated October 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.

#### Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. Several comments were received in response to the proposed action. Due consideration has been given to the following comments.

#### *Turbine Engine Versus Reciprocating Engine Models*

One commenter opposes the AD for reciprocating engine powered models. The commenter asks if turbine models have different loads than reciprocating engine powered models, suggesting that the AD should apply only to turbine models.

The FAA does not concur. The type of powerplant is not relevant. However, the turbine models are pressurized, which affects the configuration of the structure, and service reports indicate pressurization does affect cracking in the fitting. This effect is accounted for in the compliance times for Part III of the service bulletin. Cracks have been discovered in both pressurized and non-pressurized airplanes and in every structural configuration present in the airplane models listed in the proposed AD. The final rule will not change as a result of this comment.

#### *Low Level Survey Versus Non-Survey Operations*

Two commenters oppose the proposed action for airplanes that are not used for low level survey operations. The commenters ask if the airplanes found cracked are engaged in low level survey operations, suggesting that the proposed action apply only to airplanes operated in such a manner.

The FAA does not concur. FAA data indicates that 6 of 47 airplanes inspected were in survey operations for a portion of their total hours of operation. All six showed cracking. The data indicates that 24 additional airplanes were found cracked. These airplanes were not engaged in survey operations for a significant portion of their total hours of operation. The service data supports the need for the proposed action regardless of whether the affected airplane is used in a low level survey type operation. The final rule will not change as a result of this comment.

#### *Evidence of an Unsafe Condition*

One commenter suggests that there is insufficient evidence of an unsafe condition to justify the proposed action. The commenter asks if the basis for this action was the 1978 Calumet, Oklahoma accident involving an in-flight structural breakup, suggesting that one accident that occurred 19 years ago does not justify an AD.

The FAA does not concur. While this accident is a source of concern, there is more evidence that an unsafe condition exists. There have been 14 other in-flight breakups that involved leading edge failures, as well as 8 incidents involving in-flight damage to the wing leading edge. One other accident is currently under investigation by the National Transportation Safety Board. These accidents and incidents demonstrate the critical nature of the

leading edge on these airplane models. The numerous reports of cracking (63 percent of the inspected airplanes) indicate that an unsafe condition exists. The final rule will not change as a result of this comment.

#### *Cracks Due To Poorly Manufactured or Improperly Installed Parts*

One commenter suggests that the cracks found in the bracket were due to overload during installation. The commenter asks the FAA to conduct a metallurgical analysis of the cracked parts.

The FAA does not concur. A metallurgical analysis has been conducted that shows that the crack propagation was fatigue, not installation overload. A developmental problem resulted in some early parts that did not fit correctly. However, the manufacturing process has been refined so that the fit problem has been alleviated. The final rule will not change as a result of this comment.

#### *Airplanes Equipped With Titanium Leading Edges*

One commenter suggests that the proposed action be changed to allow alternative inspection techniques that would not necessitate installing the access doors in airplanes that have a titanium leading edge modification for flight into known icing conditions, or exempt these airplanes from the proposed action entirely. The commenter states that the titanium leading edges installed per Supplemental Type Certificate (STC) on 23 of his airplanes cannot be modified as required by the service bulletin. The commenter also states that the leading edge modifications per this STC would add significant strength to the leading edge, suggesting that airplanes so equipped would not be susceptible to cracking.

The FAA partially concurs. The effect of the leading edge modification on the cracking, which is the subject of this AD, is unknown. However, stiffening of the leading edge could increase the load in the attachment bracket, thereby aggravating the situation. The unsafe condition is therefore likely to exist in airplanes with the titanium leading edges, and these airplanes should be included in the proposed action.

The leading edge access doors are installed to make the required inspections easier and less time consuming. The leading edge modification installed on the commenter's airplanes is unique. Because of the small number of airplanes affected by this modification, the FAA can address the requests for alternative methods of compliance, as necessary.

The FAA has also changed the requirement for gaining access to the wing leading edges for airplanes with wings modified by an STC with titanium leading edges. For these airplanes, the wing root fairings can be removed to accomplish the inspections for cracks.

The final rule will reflect these changes.

#### *Need for Terminating Action*

One commenter suggests that the proposed action be changed to include a modification that terminates the repetitive inspection requirements.

The FAA partially agrees. A modification to the airplane to terminate the repetitive inspections that are proposed would be desirable. However, neither the manufacturer, nor any other party has proposed a permanent fix to the cracking. The unsafe condition necessitates that the proposed action be taken at this time. If a terminating action should become available in the future, the FAA would incorporate it into a superseding AD. The final rule will not change as a result of this comment.

#### *Work To Be Done at a Twin Commander Service Center*

One commenter states that the service bulletin recommends that the work be done at a Twin Commander service center which could be difficult to schedule, given the limited service centers and the number of airplanes affected. The commenter states that requiring the modification be accomplished at these Twin Commander service centers would be a hardship for some owners.

The FAA partially agrees that it may be difficult for all of the owners/operators to schedule the work at a Twin Commander service center.

Revision Notice No. 1 is included in the service bulletin that is incorporated by reference into the proposed action. This revision clarifies that it is recommended by the manufacturer, but not required, that the work be done by a Twin Commander service center. The final rule will not change as a result of this comment.

#### *Projected Cost Impact Unrealistically Low*

One commenter argues that the economic analysis reflected the cost per side, not the total cost and that the total cost quoted was unrealistically low.

The FAA does not concur. The type certificate holder verified that the hours quoted were for the entire airplane, not one side. The total inspection hours are based on two prototype installations. The cost impact provided in the NPRM presents a conservative estimate of the time required for a mechanic to install two access doors and conduct a dye penetrant inspection. There will be additional cost if the inspection turns up cracked fittings or leading edge ribs. The additional cost of repairing damaged wing structure found by the inspections cannot be determined, since it depends on the magnitude of the damage found and the repair technique used. The final rule will not change as a result of this comment.

#### **The FAA's Determination**

After careful review of all available information related to the subject presented above, including the related service information, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed, except for the changes discussed above and minor editorial corrections. The FAA has determined that these changes and minor corrections will not change the meaning of the AD and will not add any additional burden upon the public than was already proposed.

#### **Cost Impact**

The FAA estimates that 1,464 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 82 workhours for PART I; 100 workhours for PART II (if required); and 7 workhours for PART III per airplane (if required) to accomplish this action. The average labor rate is approximately \$60 an hour. Parts cost approximately \$410 for PART I and approximately \$450 for PART II (if required) per airplane. Based on these figures, the total cost impact for PART I will be \$5,330 per airplane, PART II (if required) will be \$6,450 per airplane, and PART III will be \$420 per airplane

(if required). The U.S. fleet cost is estimated to be \$11,127,650, or \$5,950 per airplane if no damage is found; and \$23,021,400 for the U.S. fleet, or \$12,200 per airplane if damage is found. For purposes of estimating the cost of this AD, the FAA is presuming that none of the owners/operators have had any of the actions accomplished on any of the affected airplanes. In addition, the cost impact does not take into consideration the costs of the repetitive inspections. The FAA has no way of determining the number of repetitive inspections that may be incurred over the life of the airplane.

#### **Regulatory Flexibility Act Economic Analysis**

Because the estimated cost for the inspection and possible repairs are expensive, the FAA conducted a Cost Analysis and Initial Regulatory Flexibility Determination and Analysis for this AD.

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to assure that small entities are not unnecessarily and disproportionately burdened by Government regulations. The RFA requires agencies to review rules that may have a "significant economic impact on a substantial number of small entities," and, in cases where they would, to conduct a Regulatory Flexibility Analysis in which alternative actions are considered.

FAA Order 2100.14A, Regulatory Flexibility Criteria and Guidance, defines "significant economic impact" as an annualized net compliance cost, adjusted for inflation, which is greater than a threshold cost level for defined entity types. A "substantial number" is defined as a number that is at least eleven and that is more than one-third of the small entities subject to a rule, or any number of small entities subject to a rule which is substantial in the judgment of the rulemaking official. "Small entities" are defined as small businesses, small not-for-profit organizations which are independently owned and operated, or airports operated by small governmental jurisdictions.

With limited information available to airplane specific costs, a range of per airplane costs can be estimated by constructing hypothetical low-and high-cost scenarios. These scenarios are based on three general presumptions: first, that these airplanes have accumulated 6,000 hours TIS and are subject to this AD within the next 100 hours TIS; second, that all of these airplanes are at the minimum and maximum extremes of annual TIS (200 or 300 hours) with a remaining

operating life of 10 and 20 years, and the extent of cracking is unknown (no cracking or cracking in the inspected areas); and third, that these airplanes are of the model types incurring either the lowest or highest costs.

The total low-cost scenario in 1997 dollars will be \$5,570 (\$4,805 discounted) per airplane over 10 years, with \$5,330 of the costs incurred in the first year. The annualized cost (again over 10 years) will be \$641 per airplane.

The total high-cost scenario in 1997 dollars will be \$25,285 per airplane (\$16,487 discounted) over 30 years, with \$15,865 of the costs incurred in the first year. The annualized cost (again over 30 years) will be \$1,556.

This AD will affect approximately 1,464 airplanes, of which 366 are owned by individuals, 38 are owned by federal and state agencies, and 847 are owned by 697 separate entities. Of the 697 entities, one entity owns 28 airplanes, three entities own between 10 and 12 airplanes, nineteen separate entities own between 3 and 9 airplanes, thirty-two entities own 2 airplanes, and six-hundred forty-two entities own 1 airplane each. The FAA cannot determine the size of all 697 owner entities, or the type of business each entity is engaged in. The FAA also cannot conclusively determine the costs of this AD. For illustration purposes, it has been calculated that the AD will have hypothetical annualized costs between \$641 (the low-cost scenario) and \$1,556 (the high-cost scenario) per airplane. Due to the uncertainties involved with these calculations, as well as with the ownership information, no determinations can be made regarding "significant economic impact on a substantial number of small entities."

The FAA has considered three alternatives to this AD: (1) take no federal action and rely on voluntary compliance with the Twin Commander Service Bulletin No. 223. The FAA finds this alternative unacceptable because of the consequences that could result, if the unsafe condition is not eliminated; (2) mandate inspecting fewer parts, and at longer intervals in the areas where the wings attach to the fuselage. This

alternative is unacceptable because less stringent inspections could fail to locate cracking in key parts of the airplane for too long a period of time; (3) defer Federal action pending review of additional data to determine whether to require the specified inspections. This alternative is unacceptable because evidence already exists of cracking in the wing and fuselage at the attach points which would be considered structural failure.

Consequently, the FAA is unable to conclusively make an economic impact evaluation based on information available.

#### Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) could have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation

Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

**98-08-19 Twin Commander Aircraft Corporation:** Amendment 39-10468; Docket No. 95-CE-92-AD.

**Applicability:** Models 500, 500A, 500B, 500S, 500U, 520, 560, 560A, 560E, 560F, 680, 680E, 680F, 680FL, 680FLP, 680FP, 680T, 680V, 680W, 681, 685, 690, 690A, 690B, 690C, 690D, 695, 695A, 695B and 720 airplanes, all serial numbers, certificated in any category.

**Note 1:** This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

**Compliance:** Required as indicated in the body of this AD after the effective date of this AD, unless already accomplished.

To prevent cracks at the wing to fuselage attach points, which, if not detected and corrected, could cause structural failure and loss of control of the airplane, accomplish the following:

(a) For all models except Models 520, 560, 690C and 695, accomplish the actions in the following table in accordance with the Compliance section and Part I, I, and III of the ACCOMPLISHMENT INSTRUCTIONS sections of Twin Commander Service Bulletin No. 223, dated October 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997:

	A	B	C
Part I .....	<p>Upon the accumulation of 6,000 hours total time-in-service (TIS) or within the next 100 hours TIS, whichever occurs later, install access holes in left and right wing leading edges and inspect the forward attach brackets and straps for cracks.</p> <p>For any airplanes that have wings modified with titanium leading edges through an STC, remove the wing root fairings to accomplish the required inspections, in lieu of installing the access holes.</p> <p>(Accomplish in accordance with PART I of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>	<p>If cracked, prior to further flight, replace the brackets and straps or repair the part by an approved repair scheme (see paragraph (b) of this AD). Then, accomplish PART II of this AD.</p> <p>(Accomplish in accordance with PART I of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>	<p>If no cracks are found, repeat inspection at 1,000 hour (hr.) intervals until cracks are found, replace the cracked part or repair by an approved repair scheme (see paragraph (b) of this AD), then accomplish PART II.</p> <p>(Accomplish in accordance with PART I of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>
Part II .....	<p>Inspect for cracks at the wing leading edge close-outs, upper &amp; lower return flange; a diaphragm, fuselage frame where tee bracket attaches, inboard side of attach bracket and frame tee bracket.</p> <p>(Accomplish in accordance with PART II of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997, and Revision Notice No. 2, dated August 18, 1997.)</p>	<p>If cracked, prior to further flight, replace any cracked part or repair the part with an approved repair scheme (see paragraph (b) of this AD). If no cracks are found, continue to repetitively inspect at 1,000 hour TIS intervals.</p> <p>(Accomplish in accordance with PART II of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>	<p>After repair or replacement is accomplished, continue to inspect at 6,000 hr. intervals.</p> <p>(Accomplish in accordance with PART II of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>
Part III .....	<p>For pressurized airplanes, at 6,000 hr. total TIS or within the next 100 hours TIS whichever occurs later, inspect fuselage station (F.S.) 100 for cracks.</p> <p>For non-pressurized airplanes, at 12,000 hr. total TIS or within the next 100 hours TIS whichever occurs later, inspect F.S. 100 for cracks.</p> <p>(Accomplish in accordance with PART III of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>	<p>If cracked, prior to further flight, repair with an approved repair scheme (see paragraph (b) of this AD), and continue to inspect at 1,000 hr. intervals.</p> <p>(Accomplish in accordance with PART III of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>	<p>If no cracks, repeat inspection at 1,000 hr. intervals until cracks are found, then accomplish PART III B of this AD.</p> <p>(Accomplish in accordance with PART III of Compliance Section in Twin Commander SB 223, dated Oct. 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997.)</p>

(b) Obtain a FAA-approved repair scheme from the manufacturer through the Manager of the Seattle Aircraft Certification Office at the address specified in paragraph (f) of this AD.

(c) For Twin Commander Models 520 and 560 airplanes, upon the accumulation of 6,000 hours total TIS or within the next 100 hours TIS, whichever occurs later, accomplish PART II of the table in paragraph (a) of this AD. Accomplish PART III in accordance with the compliance times in the above table of paragraph (a). These models are excluded from the wing leading edge access hole installation in PART I of the table in paragraph (a) of this AD.

(d) For Twin Commander Models 690C and 695 airplanes, accomplish PARTS I and II in accordance with the compliance times in the above table of paragraph (a). These Models are excluded from PART III of the table in paragraph (a) of this AD.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to

a location where the requirements of this AD can be accomplished.

(f) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Seattle Aircraft Certification Office, 1601 Lind Ave. S.W., Renton, Washington, 98055-4056. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Seattle Aircraft Certification Office.

**Note 2:** Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle Aircraft Certification Office.

(g) The inspections and installations required by this AD shall be done in accordance with the Twin Commander Service Bulletin No. 223, dated October 24, 1996 as amended by Revision Notice No. 1, dated May 8, 1997 and Revision Notice No. 2, dated August 18, 1997. This incorporation

by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Twin Commander Aircraft Corporation, P.O. Box 3369, Arlington, Washington, 98223. Copies may be inspected at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

(h) This amendment becomes effective on May 18, 1998.

Issued in Kansas City, Missouri, on April 3, 1998.

**Michael Gallagher,**

*Manager, Small Airplane Directorate, Aircraft Certificate Service.*

[Docket No. 97-CE-130-AD; Amendment 39-10471; AD 98-08-22]

RIN 2120-AA64

**Airworthiness Directives; Pilatus Aircraft Ltd. Model PC-7 Airplanes**

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD) that applies to certain Pilatus Aircraft Ltd. (Pilatus) Model PC-7 airplanes. This AD requires inspecting the elevator and rudder attachment brackets for cracks and/or corrosion, and repairing or replacing any cracked or corrosion-damaged parts, as applicable. This AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Switzerland. The actions specified by this AD are intended to prevent failure of the elevator and rudder attachment brackets because of cracks or corrosion damage, which could result in the elevator and/or rudder separating from the airplane with consequent loss of airplane control.

**DATES:** Effective May 31, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 31, 1998.

**ADDRESSES:** Service information that applies to this AD may be obtained from Pilatus Aircraft Ltd., Customer Liaison Manager, CH-6371 Stans, Switzerland; telephone: +41 41 619 6509; facsimile: +41 41 610 3351. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97-CE-130-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. Roman T. Gabrys, Aerospace Engineer, FAA, Small Airplane Directorate, Airplane Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; telephone: (816) 426-6932; facsimile: (816) 426-2169.

**SUPPLEMENTARY INFORMATION:**
**Events Leading to the Issuance of This AD**

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain Pilatus PC-7 airplanes was published in the *Federal Register* as a notice of proposed rulemaking (NPRM) on January 20, 1998 (63 FR 2911). The NPRM proposed to require inspecting the elevator and rudder attachment brackets for cracks and/or corrosion, and repairing or replacing any cracked or corrosion-damaged parts, as applicable. Accomplishment of the proposed action as specified in the NPRM would be in accordance with Pilatus Service Bulletin No. 55-002, dated November 7, 1997.

The NPRM was the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Switzerland.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public.

**The FAA's Determination**

After careful review of all available information related to the subject presented above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD and will not add any additional burden upon the public than was already proposed.

**Cost Impact**

The FAA estimates that 8 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 7 workhours per airplane to accomplish the inspection required by this AD, and that the average labor rate is approximately \$60 an hour. Inspection kits cost approximately \$106 per airplane. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be \$4,208, or \$526 per airplane.

**Regulatory Impact**

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism

implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

**List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

**PART 39—AIRWORTHINESS DIRECTIVES**

1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

**§ 39.13 [Amended]**

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

**98-08-22 Pilatus Aircraft Ltd.:** Amendment 39-10471; Docket No. 97-CE-130-AD.

**Applicability:** Model PC-7 airplanes, serial numbers MSN 001 through MSN 612, certificated in any category.

**Note 1:** This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

**Compliance:** Required as indicated in the body of this AD, unless already accomplished.

To prevent failure of the elevator and rudder attachment brackets because of cracks

or corrosion damage, which could result in the elevator and/or rudder separating from the airplane with consequent loss of airplane control, accomplish the following:

(a) Within the next 100 hours time-in-service after the effective date of this AD, inspect the elevator and rudder attachment brackets for cracks and/or corrosion in accordance with Pilatus Service Bulletin No. 55-002, dated November 7, 1997.

(b) If cracked or corrosion-damaged parts are found during the inspection required by paragraph (a) of this AD, prior to further flight, repair or replace any cracked or corrosion-damaged parts, as specified in and in accordance with Pilatus Service Bulletin No. 55-002, dated November 7, 1997.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate, 1201 Walnut, suite 900, Kansas City, Missouri 64106. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

**Note 2:** Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Small Airplane Directorate.

(e) Questions or technical information related to Pilatus Service Bulletin No. 55-002, dated November 7, 1997, should be directed to Pilatus Aircraft Ltd., Customer Liaison Manager, CH-6371 Stans, Switzerland; telephone: +41 41 619 6509; facsimile: +41 41 610 3351. This service information may be examined at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri.

(f) The inspection, repair, and replacement required by this AD shall be done in accordance with Pilatus Service Bulletin No. 55-002, dated November 7, 1997. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Pilatus Aircraft Ltd., Customer Liaison Manager, CH-6371 Stans, Switzerland. Copies may be inspected at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on May 31, 1998.

Issued in Kansas City, Missouri, on April 8, 1998.

**Marvin R. Nuss,**

*Acting Manager, Small Airplane Directorate, Aircraft Certification Service.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. 97-CE-74-AD; Amendment 39-10469; AD 98-08-20]

RIN 2120-AA64

#### Airworthiness Directives; AlliedSignal Aerospace Bendix/King Model KSA 470 Autopilot Servo Actuators, Part Numbers 065-0076-10 Through 065-0076-15

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD) that applies to certain AlliedSignal Aerospace Bendix/King Model KSA 470 autopilot servo actuators, part numbers 065-0076-10 through 065-0076-15, that are installed on aircraft. This AD requires replacing the autopilot servo actuator with a modified actuator. This is the result of two reports of the affected autopilot servo actuators containing loose roll pins within the servo housing. Loose roll pins could fall out, become lodged in the output shaft clutch mechanism, and prevent this mechanism from disengaging. The actions specified by this AD are intended to prevent such an occurrence, which could result in increased effort by the pilot to control the aircraft and possible loss of control of the affected flight control axis.

**EFFECTIVE DATE:** June 2, 1998.

**ADDRESSES:** Service information identified in this AD may be obtained from AlliedSignal Aerospace, Commercial Avionics Systems, 400 N. Rogers Road, Olathe, Kansas 66062-1212. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97-CE-74 AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

**FOR FURTHER INFORMATION CONTACT:** Mr. Joel Ligon, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209; telephone: (316) 946-4138; facsimile: (316) 946-4407.

**SUPPLEMENTARY INFORMATION:**

#### Events Leading to the Issuance of This AD

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain AlliedSignal Aerospace

Bendix/King Model KSA 470 autopilot servo actuators, part numbers 065-0076-10 through 065-0076-15, that are installed on aircraft was published in the Federal Register as a notice of proposed rulemaking (NPRM) on December 19, 1997 (62 FR 66565). The NPRM proposed to require replacing the autopilot servo actuator with a modified actuator. Accomplishment of the proposed action as specified in the NPRM would be in accordance with Bendix/King Service Bulletin No. SB KSA 470-3, dated May 1997.

The NPRM was the result of two reports of the affected autopilot servo actuators containing loose roll pins within the servo housing. Loose roll pins could fall out, become lodged in the output shaft clutch mechanism, and prevent this mechanism from disengaging.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the one comment received. No comments were received on the FAA's determination of the cost to the public.

#### Comment Disposition

The commenter states that the reference to the Raytheon 350 series aircraft in the proposal is incorrect. The commenter explains that the Raytheon 350 series is actually a Raytheon 300 series aircraft. The commenter requests that the FAA reference these aircraft accordingly.

The FAA concurs that these aircraft should be referenced as Raytheon 300 series instead of Raytheon 350 series. Since the Raytheon 300 series is already referenced in the AD, the FAA will remove all reference to the Raytheon 350 series in the final rule.

#### The FAA's Determination

After careful review of all available information related to the subject presented above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the change referenced above and minor editorial corrections. The FAA has determined that this change and the minor corrections will not change the meaning of the AD and will not add any additional burden upon the public than was already proposed.

#### Cost Impact

The FAA estimates that 500 of the affected servo actuators could be installed on aircraft in the U.S. registry. This replacement will take approximately 2 workhours per aircraft to accomplish, at an average labor rate

of approximately \$60 an hour. Servo actuators with Mod 3 incorporated cost \$2,350. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be \$1,235,000, or \$2,470 per aircraft. These figures are based on the presumption that no owner/operator of the affected aircraft has accomplished this replacement.

AlliedSignal has informed the FAA that costs of the required labor and modification of the servo actuators on affected aircraft may be recovered under an AlliedSignal conditional warranty program. Information regarding warranty claims associated with this action can be obtained directly from AlliedSignal at the address included in the ADDRESSES section of this AD.

#### Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612,

it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption ADDRESSES.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

#### Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation

Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

**98-08-20 AlliedSignal Aerospace:**  
Amendment 39-10469; Docket No. 97-CE-74-AD.

**Applicability:** Bendix/King Model KSA 470 Autopilot Servo Actuators; part numbers 065-0076-10 through 065-0076-15; serial numbers 0001 through 3081; that are installed on, but not limited to, the following aircraft, certificated in any category:

**Note 1:** This subject is addressed in AlliedSignal Bendix/King Service Bulletin No. SB KSA 470-3, dated May 1997. This service bulletin references serial number 3082. Regardless of this reference, serial number 3082 is not affected by this AD.

Aircraft	FD/AP system	KSA 470 part No.	Location
Raytheon 400 Series .....	KFC 400 .....	065-0076-11 065-0076-15	Yaw Axis. Roll Axis.
Raytheon 200 Series .....	KFC 400 .....	065-0076-11	Yaw Axis.
Raytheon 300 Series .....	KFC 400 .....	065-0076-15	Yaw Axis.
Dassault Falcon 20 .....	KFC 400 .....	065-0076-15	Pitch Axis. Roll Axis.
Fairchild C26A/C26B .....	KFC400 .....	065-0076-11	Yaw Axis.
Fairchild SA227-AC/AT/BC/CC/DC .....	KFC400 .....	065-0076-15	Roll Axis.
Learjet 31A .....	KFC 3100 .....	065-0076-12 065-0076-14 065-0076-15	Pitch Axis. Yaw Axis. Roll Axis.
Lockheed S-2 Tracker .....	KFC 325 .....	065-0076-10	Special.
Piper 400LS and PA-42-1000 .....	KFC 400 .....	065-0076-15	Yaw Axis.

**Note 2:** This AD applies to each airplane identified in the preceding applicability provision that has one of the affected actuators installed, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

**Compliance:** Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent the servo actuator roll pins from becoming loose; falling out; becoming

lodged in the output shaft clutch mechanism; and preventing this mechanism from disengaging, which could result in increased effort by the pilot to control the aircraft and possible loss of control of the affected flight control axis, accomplish the following:

(a) Replace the autopilot servo actuator with an actuator that incorporates Mod 3 in accordance with the applicable maintenance manual. This modification changes the size of the servo actuator roll pin holes to assure that the pins do not become loose and fall out.

(b) As of the effective date of this AD, no person may install, on aircraft, one of the affected servo actuators that does not incorporate Mod 3.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

**Note 3:** Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita ACO.

(e) All persons affected by this directive may obtain copies of the documents referred to herein upon request to AlliedSignal Aerospace, Technical Publications, Department 65-70, P.O. Box 52170, Phoenix, Arizona 85072-2170; or may examine these documents at the FAA, Central Region, Office

of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) This amendment becomes effective on June 2, 1998.

Issued in Kansas City, Missouri, on April 8, 1998.

**Marvin R. Nuss,**

*Acting Manager, Small Airplane Directorate, Aircraft Certification Service.*

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. 95-CE-71-AD; Amendment 39-10470; AD 98-08-21]

RIN 2120-AA64

#### **Airworthiness Directives; SOCATA-Groupe AEROSPATIALE Models TB10 and TB200 Airplanes**

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD) that applies to certain SOCATA-Groupe AEROSPATIALE (Socata) Models TB10 and TB200 airplanes. This AD requires inspecting the wing rear attachment fittings for cracks, replacing any cracked fitting, and incorporating wing rear attachment fitting reinforcement kits. This AD is the result of mandatory continued airworthiness information (MCAI) issued by the airworthiness authority for France. The actions specified by this AD are intended to prevent structural failure of the wing rear attachment fittings caused by cracks in this area, which could result in the wing separating from the airplane if the airplane is operated with cracked wing rear attachment fittings over an extended period of time.

**DATES:** Effective June 3, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 3, 1998.

**ADDRESSES:** Service information that applies to this AD may be obtained from the SOCATA-Groupe AEROSPATIALE, Socata Product Support, Aeroport Tarbes-Ossun-Lourdes, B P 930, 65009 Tarbes Cedex, France; telephone: 62.41.74.26; facsimile: 62.41.74.32; or the Product Support Manager, SOCATA Aircraft-Groupe AEROSPATIALE, North Perry Airport, 7501 Pembroke Road, Pembroke Pines, Florida 33023; telephone: (954) 893-1160; facsimile:

(954) 964-4141. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 95-CE-71-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. Karl Schletzbaum, Aerospace Engineer, FAA, Small Airplane Directorate, 1201 Walnut Street, suite 900, Kansas City, Missouri 64106; telephone: (816) 426-6934; facsimile: (816) 426-2169.

#### **SUPPLEMENTARY INFORMATION:**

##### **Events Leading to the Issuance of This AD**

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain Socata Models TB10 and TB200 airplanes was published in the Federal Register as a notice of proposed rulemaking (NPRM) on December 16, 1997 (62 FR 65768). The NPRM proposed to require inspecting the wing rear attachment fittings for cracks, replacing any cracked fitting, and incorporating wing rear attachment fitting reinforcement kits. Accomplishment of the proposed action as specified in the NPRM would be in accordance with Socata Service Bulletin No. SB 10-082-57, Amdt. 1, dated April 1996. Accomplishment of the proposed reinforcement kits would be in accordance with the technical instructions included with each kit.

The NPRM was the result of mandatory continued airworthiness information (MCAI) issued by the airworthiness authority for France.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the four comments received from one commenter.

##### **Comment No. 1: Allow for Repetitive Inspections Instead of Mandatory Replacement**

The commenter suggests that the proposal incorporate Socata Service Bulletin SB 10-082-57, Amendment 1, as written. This service bulletin allows for repetitive inspections of the wing rear attachment fitting rather than replacement.

The FAA does not concur. The FAA's policy is to provide corrective action, when available, that will eliminate the need for repetitive inspections. The FAA has determined that long-term operational safety will be better assured

by design changes that remove the source of the problem, rather than by repetitive inspections or other special procedures. Therefore, since a design change exists for the wing rear attachment fittings that eliminates the need for repetitive inspections, no changes to the final rule are necessary as a result of this comment.

##### **Comment No. 2: The FAA Has Exaggerated the Severity of the Unsafe Condition**

The commenter believes the FAA has exaggerated the severity of the unsafe condition with the statement " \* \* \* which could result in a wing separating from the airplane with consequent loss of control of the airplane." The commenter states that the Models TB10 and TB200 airplanes, even without the wing rear attachment fittings, resist the ultimate flight loads throughout the flight envelope, and that the wing rear attachment fittings on these airplanes resist the ultimate landing loads up to a weight of 1,092 kilograms.

The FAA partially concurs. The FAA infers that the commenter does not believe that the wing rear attachment fittings are considered primary structure since the commenter states that the design of the airplane is such that this area resists ultimate flight and landing loads. In this area, the FAA does not concur, and has determined that the wing rear attachment fittings are ultimate flight and landing load bearing areas and considers the wing rear attachment fittings primary structure.

The FAA does concur that the statement of the wing separating from the airplane with consequent loss of control of the airplane could be considered extreme. Wing separation would only occur after continued operation over a long period of time. The FAA will change the above statement that the commenter believes is exaggerated to read: " \* \* \* which could result in the wing separating from the airplane if the airplane is operated with cracked wing rear attachment fittings over an extended period of time."

##### **Comment No. 3: Incorrect Formula for Converting Hours Time-in-Service Into Landings**

The commenter states that the AD contains the wrong formula for converting hours time-in-service (TIS) into landings for the conditions of the proposed AD. The commenter states that hours TIS should be multiplied by 1.5 to obtain the number of landings, instead of divided by 1.5 (multiplied by .67).

The FAA concurs and has changed the final rule accordingly.

**Comment No. 4: No Justification To Require Kit Incorporation Prior to Further Flight on Wing Rear Attachment Fittings Not Found Cracked**

The commenter believes that there is no justification for requiring the incorporation of Socata Kit OPT 10 920300 prior to further flight, as is presented in the AD.

The FAA concurs that mandating the incorporation of this kit prior to further flight after the effective date of the AD would be unjustified. However, the FAA's intent is to require the incorporation of this kit prior to further flight after the inspection required by the AD. This inspection compliance time is stated as "upon accumulating 3,000 landings on each wing rear attachment fitting (total of four; two per wing) or within the next 75 landings after the effective date of this AD, whichever occurs later." The FAA will change the kit incorporation compliance time to read "prior to further flight after the inspection required by paragraph (a) of this AD" to eliminate any confusion.

**The FAA's Determination**

After careful review of all available information related to the subject presented above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the changes described above and minor editorial corrections. The FAA has determined that these changes and minor corrections will not change the meaning of the AD and will not add any additional burden upon the public than was already proposed.

**Cost Impact**

The FAA estimates that 71 airplanes in the U.S. registry will be affected by this AD. Accomplishing the actions of this AD (both the inspection and incorporation of the reinforcement kits) will take approximately 11 workhours per airplane (3 workhours for the inspection of all four wing rear attachment fitting areas, and 2 workhours to incorporate the reinforcement kit at each of the four wing rear attachment fitting areas), at an average labor rate of approximately \$60 an hour. Parts to accomplish this AD cost approximately \$200 per airplane (\$50 per kit X 4 kits). Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be \$61,060, or \$860 per airplane.

**Regulatory Impact**

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption ADDRESSES.

**List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

**PART 39—AIRWORTHINESS DIRECTIVES**

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

**§ 39.13 [Amended]**

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

**98-08-21 Socata—Groupe Aerospatiale:**  
Amendment 39-10470; Docket No. 95-CE-71-AD.

*Applicability:* Models TB10 and TB200 airplanes, serial numbers 804; 807; 808; 816 through 819; 823 through 1701; 1707 through 1733; and 1737 through 1761, certificated in any category.

**Note 1:** This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the

requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

**Compliance:** Required as indicated in the body of this AD, unless already accomplished.

To prevent structural failure of the wing rear attachment fittings caused by cracks in this area, which could result in the wing separating from the airplane if the airplane is operated with cracked wing rear attachment fittings over an extended period of time, accomplish the following:

**Note 2:** The compliance times of this AD are presented in landings instead of hours time-in-service (TIS). If the number of landings is unknown, hours TIS may be used by multiplying the number of hours TIS by 1.5.

**Note 3:** The paragraph structure of this AD is as follows:

Level 1: (a), (b), (c), etc.

Level 2: (1), (2), (3), etc.

Level 3: (i), (ii), (iii), etc.

Level 2 and Level 3 structures are designations of the Level 1 paragraph they immediately follow.

(a) Upon accumulating 3,000 landings on each wing rear attachment fitting (total of four; two per wing) or within the next 75 landings after the effective date of this AD, whichever occurs later, inspect the wing rear attachment fittings for cracks in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of Socata Service Bulletin (SB) No. SB 10-082-57, Amdt. 1, dated April 1996.

(1) If any fitting is found cracked on the wing side, prior to further flight after the inspection required by paragraph (a) of this AD, replace the cracked fitting and incorporate wing rear attachment fitting reinforcement kit No. OPT10 920300 in accordance with the Technical Instruction of Modification, OPT10 9203-57, Wing Rear Attachment Bracket, dated April 1996.

(2) If any fitting is found cracked on the fuselage side, prior to further flight after the inspection required by paragraph (a) of this AD, accomplish the following:

(i) Incorporate wing rear attachment fitting reinforcement kit No. OPT10 920500 in accordance with the Technical Instruction of Modification, OPT10 9205-57, Wing Rear Attachment Rod, dated April 1996; and

(ii) Incorporate wing rear attachment fitting reinforcement kit No. OPT10 920300 in accordance with the Technical Instruction of Modification, OPT10 9203-57, Wing Rear Attachment Bracket, dated April 1996.

(3) If any fitting is not found cracked, prior to further flight after the inspection required by paragraph (a) of this AD, incorporate wing rear attachment fitting reinforcement kit No. OPT10 920300 in accordance with the Technical Instruction of Modification, OPT10 9203-57, Wing Rear Attachment Bracket, dated April 1996.

(b) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

**Note 4:** Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Small Airplane Directorate.

(d) Questions or technical information related to the service information referenced in this AD should be directed to SOCATA—Groupe AEROSPATIALE, Socata Product Support, Aeroport Tarbes-Ossun-Lourdes, B P 930, 65009 Tarbes Cedex, France; telephone: 62.41.74.26; facsimile: 62.41.74.32; or the Product Support Manager, SOCATA—Groupe AEROSPATIALE, North Perry Airport, 7501 Pembroke Road, Pembroke Pines, Florida 33023; telephone: (954) 964-6877; facsimile: (954) 964-1668. This service information may be examined at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri.

(e) The inspection required by this AD shall be done in accordance with Socata Service Bulletin No. SB 10-082-57, Amtd. 1, dated April 1996. The replacements and modifications required by this AD shall be done in accordance with the Technical Instruction of Modification, OPT10 9203-57, Wing Rear Attachment Bracket, dated April 1996; and the Technical Instruction of Modification, OPT10 9205-57, Wing Rear Attachment Rod, dated April 1996. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from SOCATA—Groupe AEROSPATIALE, Socata Product Support, Aeroport Tarbes-Ossun-Lourdes, B P 930, 65009 Tarbes Cedex, France; Product Support Manager, SOCATA Aircraft—Groupe AEROSPATIALE, North Perry Airport, 7501 Pembroke Road, Pembroke Pines, Florida 33023. Copies may be inspected at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

**Note 5:** The subject of this AD is addressed in French AD 94-249(A)R1, dated June 19, 1996.

(f) This amendment becomes effective on June 3, 1998.

Issued in Kansas City, Missouri, on April 8, 1998.

**Marvin R. Nuss,**

*Acting Manager, Small Airplane Directorate, Aircraft Certification Service.*

BILLING CODE 4910-13-U

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. 97-NM-40-AD; Amendment 39-10473; AD 98-08-24]

RIN 2120-AA64

#### **Airworthiness Directives; McDonnell Douglas Model DC-9-10, -20, -30, -40, and -50 Series Airplanes, and C-9 (Military) Airplanes**

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-9-10, -20, -30, -40, and -50 series airplanes, and C-9 (military) airplanes, that requires a one-time visual inspection to determine if all corners of the forward lower cargo doorjamb have been previously modified. This amendment also requires low frequency eddy current inspections to detect cracks of the fuselage skin and doubler at all corners of the forward lower cargo doorjamb, various follow-on repetitive inspections, and modification, if necessary. This amendment is prompted by fatigue cracks found in the fuselage skin and doubler at the corners of the forward lower cargo doorjamb. The actions specified by this AD are intended to detect and correct such fatigue cracking, which could result in rapid decompression of the fuselage and consequent reduced structural integrity of the airplane.

**DATES:** Effective May 22, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 22, 1998.

**ADDRESSES:** The service information referenced in this AD may be obtained from The Boeing Company, Douglas Products Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Dept. C1-L51 (2-60). This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules

Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

#### **FOR FURTHER INFORMATION CONTACT:**

Wahib Mina, Aerospace Engineer, Airframe Branch, ANM-120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (562) 627-5324; fax (562) 627-5210.

#### **SUPPLEMENTARY INFORMATION:**

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC-9-10, -20, -30, -40, and -50 series airplanes, and C-9 (military) airplanes was published in the *Federal Register* on July 25, 1997 (62 FR 39975). That action proposed to require a one-time visual inspection to determine if all corners of the forward lower cargo doorjamb have been modified previously. That action also proposed to require low frequency eddy current (LFEC) inspections to detect cracks of the fuselage skin and doubler at all corners of the forward lower cargo doorjamb, various follow-on repetitive inspections, and modification, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received. One commenter supports the proposed AD.

#### **Permit Repairs in Accordance With Designated Engineering Representative (DER) Approval**

One commenter requests that proposed paragraphs (b)(3) and (c) be revised to permit the repair of cracked structure to be accomplished in accordance with the DER of The Boeing Company, Douglas Products Division for a temporary basis, rather than the Manager of the Los Angeles Aircraft Certification Office (ACO). The commenter states that such an approval would expedite the process for repair approval for a crack condition beyond the allowable repair limits (i.e., greater than 2 inches in length) and for existing repairs that are not in accordance with the DC-9 Structural Repair Manual (SRM) or Service Rework Drawing.

The FAA does not concur that revision of the AD is necessary. The FAA is currently in the process of implementing procedures by which AD-mandated structural repairs may be approved by certain DER's employed by

type certificate holders. Once the procedures are implemented, these DER's will be authorized to issue such approvals, and no change to the AD is necessary to allow for this.

#### Request To Revise Requirements of Proposed AD

One commenter requests that paragraph (c) of the proposed AD be revised to read as follows:

"(c) If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward lower cargo doorjamb have been modified by FAA approved repairs other than the DC-9 SRM or Service Rework Drawing, prior to further flight, accomplish an initial Low Frequency Eddy Current inspection of the fuselage skin adjacent to the repair.

(c)(i) If no cracks are detected, within (6) months after the initial LFEC inspection, accomplish a repair approved by the Manager, Los Angeles ACO.

(c)(ii) If cracks are detected, prior to further flight, repair in accordance with a method approved by the Manager, Los Angeles ACO."

This commenter states that, as paragraph (c) of the AD is currently worded, it will cause an unnecessary operation impact since FAA-approved non-standard SRM or Service Rework Drawing repairs are known to exist in this area of the doorjamb. The commenter contends that obtaining approval for such repairs from the Los Angeles ACO, prior to further flight, will be time consuming and will result in an unwarranted extended ground time for the airplane.

The FAA does not concur with the commenter's request to revise paragraph (c) of the AD. The FAA in conjunction with McDonnell Douglas has conducted further analysis of this issue. The FAA has determined that, for cargo doorjamb which are found to be modified previously but not in accordance with the DC-9 SRM or Service Rework Drawing, an initial LFEC inspection of the fuselage skin adjacent to those existing repairs will not detect any cracking under the repairs. In light of these findings, no change to the final rule is necessary.

#### Request To Revise DC-9 Supplemental Inspection Document (SID)

One commenter requests that, prior to issuance of the final rule, the DC-9 SID be revised to incorporate the actions required by this AD. The commenter states that such a revision will eliminate confusion between the DC-9 SID and the AD. The FAA does not concur. The actions required by this AD are

necessary to ensure inspection continuity for the affected Principal Structural Element (PSE). After issuance of the final rule, the manufacturer may revise the DC-9 SID.

#### Request to Develop Standard Repairs

One commenter request that, for previously repaired corners and for cracks greater than 2 inches long, McDonnell Douglas develop additional "standard repairs" that are pre-approved by the Manager, Los Angeles ACO, FAA, Transport Airplane Directorate. The commenter contends that the cargo door area is one of the most easily damaged areas on the airplane and that there are many non-SRM or Service Rework Drawing repairs that exist in this area. The commenter states that such an approval would minimize the amount of time required to obtain the approved repair and the impact to flight and maintenance schedules.

The FAA does not concur with the commenter's request to pre-approve "standard repairs." The manufacturer has indicated that it has not received many requests for approval of repairs required by paragraph (b)(3) or (c) of this AD. Therefore, a repair approved by the Manager of the Los Angeles ACO will be developed on a case-by-case basis. In addition, the Manager and staff of the Los Angeles ACO are working very closely with the manufacturer to expedite repair approval requests. Such requests may be made under the provisions of paragraph (e) of the final rule.

#### Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

#### Cost Impact

There are approximately 899 McDonnell Douglas Model DC-9-10, -20, -30, -40, and -50 series airplanes, and C-9 (military) airplanes of the affected design in the worldwide fleet. The FAA estimates that 622 airplanes of U.S. registry will be affected by this AD.

It will take approximately 1 work hour per airplane to accomplish the required visual inspection, at an average labor rate of \$60 per work hour. Based on these figures, the cost impact of the visual inspection required by this AD on U.S. operators is estimated to be \$37,320, or \$60 per airplane.

Should an operator be required to accomplish the LFEC inspection, it would take approximately 1 work hour per airplane to accomplish, at an

average labor rate of \$60 per work hour. Based on these figures, the cost impact of the LFEC inspection required by this AD on U.S. operators is estimated to be \$60 per airplane.

Should an operator be required to accomplish the modification, it would take approximately 14 work hours per airplane to accomplish, at an average labor rate of \$60 per work hour. Required parts will cost approximately \$936, or \$2,807 per airplane, depending on the service kit purchased. Based on these figures, the cost impact of the modification required by this AD on U.S. operators is estimated to be \$1,776 or \$3,647 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

#### Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

### § 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

**98-08-24 McDonnell Douglas:** Amendment 39-10473. Docket 97-NM-40-AD.

**Applicability:** Model DC-9-10, -20, -30, -40, and -50 series airplanes, and C-9 (military) airplanes, as listed in McDonnell Douglas Service Bulletin DC9-53-277, dated September 30, 1996; certificated in any category.

**Note 1:** This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

**Compliance:** Required as indicated, unless accomplished previously.

To detect and correct fatigue cracking in the fuselage skin or doubler at the corners of the forward lower cargo doorjamb, which could result in rapid decompression of the fuselage and consequent reduced structural integrity of the airplane, accomplish the following:

**Note 2:** Where there are differences between the service bulletin and the AD, the AD prevails.

**Note 3:** This AD is related to AD 96-13-03, amendment 39-9671, (61 FR 31009, June 19, 1996), and will affect Principal Structural Element (PSE) 53.09.001 of the DC-9 Supplemental Inspection Document (SID).

(a) Prior to the accumulation of 48,000 total landings, or within 3,500 landings after the effective date of this AD, whichever occurs later, perform a one-time visual inspection to determine if the corners of the forward lower cargo doorjamb have been modified prior to the effective date of this AD.

(b) If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward lower cargo doorjamb *have not been modified*, prior to further flight, perform a low frequency eddy current (LFEC) or x-ray inspection to detect cracks of the fuselage skin and doubler at all corners of the forward lower cargo doorjamb, in accordance with McDonnell Douglas Service Bulletin DC9-53-277, dated September 30, 1996.

(1) If no crack is detected during the LFEC or x-ray inspection required by this paragraph, accomplish the requirements of

either paragraph (b)(1)(i) or (b)(1)(ii) of this AD.

(i) **Option 1.** Repeat the inspections as follows until paragraph (b)(1)(ii) of this AD is accomplished:

(A) If the immediately preceding inspection was conducted using LFEC techniques, conduct the next inspection within 3,500 landings.

(B) If the immediately preceding inspection was conducted using x-ray techniques, conduct the next inspection within 2,850 landings.

(ii) **Option 2.** Prior to further flight, modify the corners of the forward lower cargo doorjamb, in accordance with the service bulletin. Prior to the accumulation of 28,000 landings after accomplishment of that modification, perform a LFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with the service bulletin. Repeat the LFEC inspection thereafter at intervals not to exceed 20,000 landings.

(A) If no crack is detected on the skin adjacent to the modification during any LFEC or x-ray inspection required by this paragraph, repeat the LFEC inspection thereafter at intervals not to exceed 20,000 landings.

(B) If any crack is detected on the skin adjacent to the modification during any LFEC or x-ray inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(2) If any crack is found during any LFEC or x-ray inspection required by this paragraph and the crack is 2 inches or less in length: Prior to further flight, modify it in accordance with the service bulletin. Prior to the accumulation of 28,000 landings after accomplishment of the modification, perform a LFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with the service bulletin.

(i) If no crack is detected during the LFEC inspection required by this paragraph, repeat the LFEC inspection thereafter at intervals not to exceed 20,000 landings.

(ii) If any crack is detected during the LFEC inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(3) If any crack is found during any LFEC or x-ray inspection required by this paragraph and the crack is greater than 2 inches in length: Prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(c) If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward lower cargo doorjamb *have been modified*, but not in accordance with the DC-9 Structural Repair Manual (SRM) or Service Rework Drawing, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(d) If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward lower cargo doorjamb *have been modified* in accordance with DC-

9 SRM or Service Rework Drawing, prior to the accumulation of 28,000 landings since accomplishment of that modification, or within 3,500 landings after the effective date of this AD, whichever occurs later, perform a LFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with McDonnell Douglas Service Bulletin DC9-53-277, dated September 30, 1996. Repeat the LFEC inspection thereafter at intervals not to exceed 20,000 landings.

(1) If no crack is detected during any LFEC inspection required by this paragraph, repeat the LFEC inspection thereafter at intervals not to exceed 20,000 landings.

(2) If any crack is detected during any LFEC inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

**Note 4:** Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(g) Except as provided by paragraphs (a), (b)(1)(ii)(B), (b)(2)(ii), (b)(3), (c), and (d)(2) of this AD, the actions shall be done in accordance with McDonnell Douglas Service Bulletin DC9-53-277, dated September 30, 1996. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from The Boeing Company, Douglas Products Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Dept. C1-L51 (2-60). Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(h) This amendment becomes effective on May 22, 1998.

Issued in Renton, Washington, on April 9, 1998.

**Darrell M. Pederson,**

*Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.*

[FR Doc. 98-10056 Filed 4-16-98; 8:45 am]

BILLING CODE 4910-13-U

## DEPARTMENT OF TRANSPORTATION

## Federal Aviation Administration

## 14 CFR Part 39

[Docket No. 98-SW-09-AD; Amendment 39-10479; AD 98-04-40]

RIN 2120-AA64

**Airworthiness Directives; Eurocopter France Model SA.315B, SA.316B, SA.316C, SA.319B, and SE.3160 Helicopters**

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule; request for comments.

**SUMMARY:** This document publishes in the Federal Register an amendment adopting Airworthiness Directive (AD) 98-04-40 which was sent previously to all known U.S. owners and operators of Eurocopter France Model SA.315B, SA.316B, SA.316C, SA.319B, and SE.3160 helicopters by individual letters. This AD requires, for certain blades, inspecting each blade spar for cracks using a dye-penetrant inspection, and visually inspecting each blade cuff for cracks. If a crack is discovered in either a blade spar or cuff, removal and replacement of the blade with an airworthy blade is required prior to further flight. This amendment is prompted by an accident in which a Model SA.315B helicopter lost a main rotor blade (blade) just prior to take-off. The cause of the blade failure was determined to be fatigue cracks that originated from the outboard blade-to-cuff attachment bolt hole and progressed through the blade spar and cuff. This condition, if not corrected, could result in separation of a blade and subsequent loss of control of the helicopter.

**DATES:** Effective May 4, 1998, to all persons except those persons to whom it was made immediately effective by priority letter AD 98-04-40, issued on February 12, 1998, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 4, 1998.

Comments for inclusion in the Rules Docket must be received on or before June 16, 1998.

**ADDRESSES:** Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 98-SW-09-AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

The applicable service information may be obtained from American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053-4005, telephone (972) 641-3460, fax (972) 641-3527. This information may be examined at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. Shep Blackman, Aerospace Engineer, FAA, Rotorcraft Directorate, Rotorcraft Standards Staff, 2601 Meacham Blvd., Fort Worth, Texas 76137, telephone (817) 222-5296, fax (817) 222-5961.

**SUPPLEMENTARY INFORMATION:** On February 12, 1998, the FAA issued priority letter AD 98-04-40, applicable to Eurocopter France Model SA.315B, SA.316B, SA.316C, SA.319B, and SE.3160 helicopters, which requires, for blades with 400 or more hours time-in-service (TIS), within 25 hours TIS, inspecting each blade spar for cracks using a dye-penetrant method, and visually inspecting each blade cuff for cracks using a 10-power or higher magnifying glass. If a crack is discovered in either a blade spar or cuff, removal and replacement of the blade with an airworthy blade is required prior to further flight. That action was prompted by an accident in which a Model SA.315B helicopter lost a main rotor blade (blade) just prior to take-off. Although the main gearbox and the remainder of the main rotor assembly separated from the helicopter and passed through the cockpit, there were no fatalities. The cause of the blade failure was determined to be fatigue cracks that originated from the outboard blade-to-cuff attachment bolt hole and progressed through the blade spar and cuff. This condition, if not corrected, could result in separation of a blade and subsequent loss of control of the helicopter.

The FAA has reviewed Eurocopter France Service Telex No. 00055/0034/98, dated February 3, 1998 (Eurocopter Service Telex: 316/319 No. 01-64 and 315 No. 01-29), which describes procedures for inspecting each blade spar for cracks using a dye-penetrant method, and visually inspecting each blade cuff for cracks using a 10-power or higher magnifying glass. Additionally, the Direction Generale De L'Aviation Civile, which is the airworthiness authority for France, has issued AD 98-088-055(A) and 98-089-038(A), both dated February 25, 1998, to mandate these actions.

Since the unsafe condition described is likely to exist or develop on other Eurocopter France Model SA.315B, SA.316B, SA.316C, SA.319B, and SE.3160 helicopters of the same type design, the FAA issued priority letter AD 98-04-40 to prevent separation of a blade and subsequent loss of control of the helicopter. The AD requires, for blades with 400 or more hours time-in-service (TIS), within 25 hours TIS, inspecting each blade spar for cracks using a dye-penetrant method, and visually inspecting each blade cuff for cracks using a 10-power or higher magnifying glass. If a crack is discovered in either a blade spar or cuff, removal and replacement of the blade with an airworthy blade is required prior to further flight. The actions are required to be accomplished in accordance with the service telex described previously.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on February 12, 1998 to all known U.S. owners and operators of Eurocopter France Model SA.315B, SA.316B, SA.316C, SA.319B, and SE.3160 helicopters. These conditions still exist, and the AD is hereby published in the Federal Register as an amendment to section 39.13 of the Federal Aviation Regulations (14 CFR 39.13) to make it effective to all persons.

The FAA estimates that 106 helicopters of U.S. Registry will be affected by this AD, that it will take approximately 4 work hours per helicopter to inspect each helicopter and 4 work hours to replace a main rotor blade, and that the average labor rate is \$60 per work hour. Required parts will cost approximately \$49,700 per helicopter. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be \$5,319,080, assuming one blade replacement per helicopter.

**Comments Invited**

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All

communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 98-SW-09-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979) if it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### Adoption of the Amendment.

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

**98-04-40 Eurocopter France:** Amendment 39-10479. Docket No. 98-SW-09-AD.

**Applicability:** Model SA.315B, SA.316B, SA.316C, SA.319B, and SE.3160 helicopters, with main rotor blades, part numbers 3160S11-10000 all dash numbers, 3160S11-30000 all dash numbers, 3160S11-35000 all dash numbers, 3160S11-40000 all dash numbers, 3160S11-45000 all dash numbers, 3160S11-50000 all dash numbers, 3160S11-55000 all dash numbers, installed, certificated in any category.

**Note 1:** This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any helicopter from the applicability of this AD.

**Compliance:** Required as indicated, unless accomplished previously, for helicopters with main rotor blades (blades) having 400 or more hours time-in-service (TIS).

To prevent separation of a blade and subsequent loss of control of the helicopter, accomplish the following:

(a) Within 25 hours TIS, inspect each blade spar for cracks using a dye-penetrant method in accordance with paragraphs CC.1 through CC.4 of the Operational Procedures in Eurocopter France Service Telex No. 00055/0034/98, dated February 3, 1998 (Eurocopter Service Telex: 316/319 No. 01-64 and 315 No. 01-29).

(b) Within 25 hours TIS, visually inspect the upper and lower surfaces of each blade cuff for cracks, especially around the attachment pins, using a 10-power or higher magnifying glass.

(c) If a crack is found in a blade spar or cuff, remove the blade and replace it with an airworthy blade prior to further flight.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Rotorcraft Standards Staff, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Rotorcraft Standards Staff.

**Note 2:** Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Rotorcraft Standards Staff.

(e) Special flight permits will not be issued.

(f) The inspection shall be done in accordance with paragraphs CC.1 through CC.4 of the Operational Procedures in Eurocopter France Service Telex No. 00055/0034/98, dated February 3, 1998 (Eurocopter Service Telex: 316/319 No. 01-64 and 315 No. 01-29). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053-4005, telephone (972) 641-3460, fax (972) 641-3527. Copies may be inspected at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on May 4, 1998, to all persons except those persons to whom it was made immediately effective by Priority Letter AD 98-04-40, issued February 12, 1998, which contained the requirements of this amendment.

**Note 3:** The subject of this AD is addressed in Direction Generale De L'Aviation Civile (France) AD 98-088-055(A) and 98-089-038(A), dated February 25, 1998.

Issued in Fort Worth, Texas, on April 3, 1998.

**Henry A. Armstrong,**  
Manager, Rotorcraft Directorate, Aircraft Certification Service.

#### 21 CFR Part 558

#### New Animal Drugs For Use In Animal Feeds; Bacitracin Zinc; Technical Amendment

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Final rule; technical amendment.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the animal drug regulation for use of bacitracin zinc Type A medicated articles to make Type C medicated feeds

in combination with other drugs to include certain other drugs that have been approved elsewhere in the animal drug regulations. This action is being taken to ensure the accuracy and consistency of the regulation because the cross-references were not updated at the time the combination drug uses were approved.

**EFFECTIVE DATE:** April 17, 1998.

**FOR FURTHER INFORMATION CONTACT:** David L. Gordon, Center for Veterinary Medicine (HFV-6), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-594-1739.

**SUPPLEMENTARY INFORMATION:** In § 558.78(d)(3) (21 CFR 558.78(d)(3)) FDA codified a list of combinations in which bacitracin zinc is approved for use with certain drugs that have been approved elsewhere in 21 CFR part 558. Several cross-references to approved combination drug uses were not included in that list. Section 558.78(d)(3) is amended to add those cross-references.

#### List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 558 is amended as follows:

#### PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR part 558 continues to read as follows:

**Authority:** 21 U.S.C. 360b, 371.

2. Section 558.78 is amended by revising paragraph (d)(3) to read as follows:

#### § 558.78 Bacitracin zinc.

\* \* \* \* \*

(d) \* \* \*

(3) Bacitracin zinc may be used as approved in combination as follows:

- (i) Amprolium as in § 558.55.
- (ii) Amprolium and roxarsone as in § 558.55.
- (iii) Amprolium and ethopabate as in § 558.58.
- (iv) Amprolium and ethopabate with roxarsone as in § 558.58.
- (v) Carbarsone as in § 558.120.
- (vi) Clopidol as in § 558.175.
- (vii) Clopidol and roxarsone as in § 558.175.
- (viii) Decoquinat as in § 558.195.
- (ix) Decoquinat and roxarsone as in § 558.195.
- (x) Hygromycin B as in § 558.274.
- (xi) Hygromycin B and penicillin as in § 558.274.

(xii) Lasalocid sodium and roxarsone as in § 558.311.

(xiii) Monensin as in § 558.355.

(xiv) Monensin and roxarsone as in § 558.355.

(xv) Robenidone as in § 558.515.

(xvi) Salinomycin as in § 558.550.

(xvii) Salinomycin and roxarsone as in § 558.550.

(xviii) Zoalene as in § 558.680.

(xix) Zoalene and arsanilic acid as in § 558.680.

(xx) Zoalene and roxarsone as in § 558.680.

Dated: March 31, 1998.

**Andrew J. Beaulieu,**

*Deputy Director, Office of New Animal Drug*

*Evaluation, Center for Veterinary Medicine.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

#### 21 CFR Part 814

[Docket No. 98N-0171]

#### Medical Devices; Humanitarian Use of Devices

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Direct final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the regulations governing humanitarian use devices. These amendments are being made to implement provisions of the Federal Food, Drug, and Cosmetic Act (the act) as amended by the Food and Drug Administration Modernization Act of 1997 (FDAMA). Elsewhere in this issue of the *Federal Register*, FDA is publishing a companion proposed rule, under FDA's usual procedures for notice and comment, to provide a procedural framework to finalize the rule in the event the agency receives any significant adverse comment and withdraws the direct final rule.

**DATES:** This rule is effective August 31, 1998. Submit written comments on or before July 1, 1998. Submit written comments on the information collection provisions on or before June 16, 1998. If FDA receives no significant adverse comments within the specified comment period, the agency intends to publish a document confirming the effective date of the final rule in the *Federal Register* within 30 days after the comment period on this direct final rule ends.

**ADDRESSES:** Submit written comments on the direct final rule to the Dockets

Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857.

#### FOR FURTHER INFORMATION CONTACT:

Joanne R. Less, Center for Devices and Radiological Health (HFZ-403), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20857, 301-594-1190.

#### SUPPLEMENTARY INFORMATION:

#### I. Background

The Safe Medical Devices Act of 1990 (Pub. L. 101-629) added section 520(m) to the act (21 U.S.C. 360j(m)). Section 520(m) creates an incentive for the development of humanitarian use devices (HUD) for use in the treatment or diagnosis of diseases or conditions affecting a small number of individuals. Section 520(m) authorizes FDA, by regulation, to exempt a HUD from the effectiveness requirements of section 514 and 515 of the act (21 U.S.C. 360d and 360e) (i.e., "reasonable assurance that the device is effective") provided that: (1) The device is to be used to treat or diagnose a disease or condition that affects fewer than 4,000 individuals in the United States; (2) the device would not be available to a person with such a disease or condition unless the exemption is granted; (3) no comparable device (other than a device that has been granted such an exemption) is available to treat or diagnose the disease or condition; and (4) the device will not expose patients to an unreasonable or significant risk of illness or injury, and the probable benefit to health from using the device outweighs the risk of injury or illness from its use, taking into account the probable risks and benefits of currently available devices to alternative forms of treatments.

In the *Federal Register* of June 26, 1996 (61 FR 33232), FDA published a final rule prescribing the procedures for submitting humanitarian device exemption (HDE) applications, amendments, and supplements; procedures for obtaining an extension of the exemption; and the criteria for FDA review and approval of HDE's. This rule amended part 814 (21 CFR part 814) of FDA's regulations.

On November 21, 1997, the President signed into law FDAMA (Pub. L. 105-115). Section 203 of FDAMA made the following changes to section 520(m) of the act:

(1) FDAMA added a new provision to section 520(m) of the act that requires FDA to issue an order approving or denying an HDE within 75 days after receiving the application.

(2) FDAMA provided for an exemption from the requirement that a

HUD may not be used without approval from an institutional review board (IRB) for cases in which a physician determines in an emergency situation that approval cannot be obtained in time to prevent serious harm or death to a patient. In such cases, the physician must, after use of the device, notify the chairperson of the IRB. The notification must include the name of the patient, the date on which the device was used, and the reason for the use.

(3) FDAMA eliminated the requirement that the sponsor of an HDE obtain approval for continued use every 18 months. Instead, FDA may require a sponsor to demonstrate continued compliance with the requirements of section 520(m) of the act, if FDA believes that such a demonstration is necessary to protect the public health, or if FDA has reason to believe that the criteria for exemption are no longer met.

(4) FDAMA added a provision to section 520(m) of the act stating that FDA may suspend or withdraw an HDE approval only after providing notice and an opportunity for an informal hearing.

(5) FDAMA eliminated the "sunset" provision in section 520(m) of the act, under which new approvals of HDE's would not have been permitted 5 years after the effective date of the rule originally implementing section 520(m).

Section 203 of FDAMA became effective on February 19, 1998, and FDA is implementing the statute as of that date. FDA is issuing this direct final rule to amend the existing regulations to conform to certain amendments by FDAMA to section 520(m) of the act.

## II. Highlights of Part 814—Subpart H—Humanitarian Use Devices

Section 814.100 has been amended to implement new section 520(m)(5) of the act, which provides that FDA may require an HDE applicant to demonstrate continued compliance with the HDE requirements, if such a demonstration is necessary to protect the public health or if FDA has reason to believe that the criteria for exemption are no longer met. FDAMA also allows FDA to withdraw or suspend approval of an HDE after providing notice and an opportunity for an informal hearing if any conditions of the HDE are no longer met.

Section 814.104 has been amended to repeal the sunset provision for submitting an original application, as provided in new section 520(m)(5) of the act.

In addition to the changes required by FDAMA, FDA is amending § 814.104(b)(5) to allow a sponsor who is charging more than \$250 per HUD, to submit, in lieu of a report by an

independent certified public accountant (CPA), an attestation by a responsible individual of the organization, verifying that the amount charged does not exceed the device's cost of research, development, fabrication, and distribution. The submission of any report or attestation is unnecessary for HUD's for which an HDE applicant is charging \$250 per HUD or less because, in most circumstances, a charge for a HUD that is \$250 or less is evidence that the charge does not exceed the cost of research, development, fabrication, and distribution. This modification to the regulation will decrease the burden associated with submitting an HDE application for some devices by eliminating the time and cost associated with obtaining a report by a CPA or an attestation by a responsible individual in the organization.

Sections 814.106, 814.108, 814.112, and 814.114 have been revised or amended to comply with a new provision of section 520(m) of the act. This new provision states that FDA will issue an order approving or denying an application 75 days after receiving it. In accordance with the new provision, FDA has adjusted its extension, review, and response timeframes for applications, amendments, and supplements.

Section 814.116 also has been amended to implement the new provision of section 520(m) of the act and to incorporate the 75-day provision. This section is amended to adjust the applicable timeframes in cases where panel review is necessary or an applicant has received a not approvable letter.

The last sentence of § 814.118 has been amended because extensions are no longer required under new section 520(m)(6) of the act.

Section 814.120 has been revised because the 18-month term and 5-year sunset provision were repealed by FDAMA. Under new section 520(m)(6) of the act, § 814.120 has been revised to provide for the temporary suspension of approval of an HDE or an HDE supplement after the sponsor has had an opportunity for an informal hearing under 21 CFR part 16.

Section 814.124 is amended in accordance with section 520(m)(4) of the act, to allow physicians, faced with an emergency situation, to administer a HUD prior to obtaining IRB approval if the physician determines that the wait will cause patient serious harm or death. This section has also been amended to reflect the requirement that physicians who use a HUD in such emergencies must notify the IRB following such use.

Section 814.126 has been amended to incorporate the provision of section 520(m)(5) of the act, which provides FDA the authority to require an HDE applicant to demonstrate continued compliance with the HDE requirements, if FDA believes that such a demonstration is necessary to protect the public health or has reason to believe that the criteria for the HDE exemption are no longer met. FDA believes that it cannot fulfill its statutory obligation to protect the public health unless it obtains certain information about these products on a regular basis. Prior to FDAMA, HDE's were approved for a period of 18 months. Under the amended provision, marketing authorization is no longer temporary. Accordingly, FDA is adding an annual reporting requirement that will permit the agency to obtain sufficient information for the agency to determine whether there is reason to question the continued exemption of the device from the act's effectiveness requirements. The submission of annual reports is consistent with the premarket approval application (PMA) reporting requirements for other marketed devices, but the HDE annual reports will contain additional information because of the unique nature of these device approvals. The information required in these annual reports is the same type of information that was previously required in requests for extensions. If these annual reports or any other information in FDA's possession give FDA reason to believe that a particular device raises public health concerns or that the criteria for exemption are no longer met, the agency may require the HDE holder to submit additional information to demonstrate compliance with the HDE requirements.

## III. Rulemaking Action

In the Federal Register of November 21, 1997 (62 FR 62466), FDA described when and how it will employ direct final rulemaking. FDA believes that this rule is appropriate for direct final rulemaking because FDA views this rule as making noncontroversial amendments to an existing regulation, incorporating amendments to section 520(m) of the act made by FDAMA; and FDA anticipates no significant adverse comments. Consistent with FDA's procedures on direct final rulemaking, elsewhere in this issue of the Federal Register FDA is publishing a companion proposed rule to amend the existing HUD regulations. The companion proposed rule is identical to the direct final rule. The companion proposed rule provides a procedural framework within which the rule may be finalized in the

event the direct final rule is withdrawn because of any significant adverse comments. The comment period for the direct final rule runs concurrently with the comment period of the companion proposed rule. Any comments received under the companion proposed rule will be considered as comments regarding the direct final rule.

FDA is providing a comment period on the direct final rule of 75 days after April 17, 1998. If the agency receives any significant adverse comments, FDA intends to withdraw this final rule by publication of a notice in the **Federal Register** within 30 days after the comment period ends. A significant adverse comment is defined as a comment that explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without change. In determining whether a significant adverse comment is sufficient to terminate a direct final rulemaking, FDA will consider whether the comment raises an issue serious enough to warrant a substantive response in a notice-and-comment process. Comments that are frivolous, insubstantial, or outside the scope of the rule will not be considered significant or adverse under this procedure. For example, a comment requesting the inclusion of HDE applications for HUD's intended to benefit patients in the treatment and diagnosis of diseases or conditions that affect more than 4,000 individuals per year in the United States (§ 814.102(a)(5)) will not be considered a significant adverse comment because it is outside the realm of the rule. On the other hand, a comment recommending an additional change to the rule may be considered a significant adverse comment if the comment explains why the rule would be ineffective without the additional change. In addition, if a significant adverse comment applies to part of a rule and that part can be severed from the remainder of the rule, FDA may adopt as final those parts of the rule that are not the subject of a significant adverse comment.

If FDA withdraws the direct final rule, all comments received will be considered under the companion proposed rule in developing a final rule under the usual notice-and-comment procedures under the Administrative Procedure Act (5 U.S.C. 552 *et seq.*). If FDA receives no significant adverse comments during the specified comment period, FDA intends to publish a confirmation notice in the **Federal Register** within 30 days after the comment period ends. FDA intends to make the direct final rule effective 30

days after the date the confirmation notice is published in the **Federal Register**.

#### IV. Environmental Impact

The agency has determined under 21 CFR 25.30(h) that this action is of a type that does not cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

#### V. Analysis of Impacts

FDA has examined the impact of this direct final rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601-612) (as amended by subtitle D of the Small Business Regulatory Fairness Act of 1996 (Pub. L. 104-121)), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). Executive Order 12866 directs agencies to assess all costs of available regulatory alternatives and, when regulatory action is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this direct final rule is consistent with the regulatory philosophy and principles identified in the Executive Order. In addition, this direct final rule is not a significant regulatory action as defined by the Executive Order and so is not subject to review under the Executive Order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. The rule codifies applicable statutory requirements imposed by the FDAMA. Because the rule allows physicians more flexibility without compromising the public health and reduces the requirements imposed on sponsors, it may permit more small competitors to enter the marketplace. The agency certifies that this direct final rule will not have a significant economic impact on a substantial number of small entities. This direct final rule also does not trigger the requirement for a written statement under section 202(a) of the Unfunded Mandates Reform Act because it does not impose a mandate that results in an expenditure of \$100 million or more by State, local, or tribal governments in the aggregate, or by the private sector, in any 1 year.

#### VI. Paperwork Reduction Act of 1995

This direct final rule contains information collection provisions that

are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The title, description and respondent description of the information collection provisions are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing each collection of information.

FDA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Title:** Amendments to Humanitarian Use Device Requirements.

**Description:** Section 520(m) of the act was created as an incentive for the development of HUD's for use in the treatment or diagnosis of diseases or conditions affecting fewer than 4,000 individuals in the United States. FDA is issuing this rule to amend the existing regulations governing HUD's, found in part 814, to conform to the amendments made by FDAMA to section 520(m) of the act.

Section 814.124(a) is amended to allow physicians in emergency situations to administer a HUD prior to obtaining IRB approval. In such situations, the physician is required to provide written notification, including the identification of the patient involved, the date of use, and the reason for use, to the IRB within 5 days after emergency use. FDA anticipates that five physicians will use HUD's in emergency situations before obtaining approval from an IRB. FDA estimates that notifications under this section will take an average of 1 hour per response.

FDA is amending § 814.126(b)(1) to delete the requirement for a final report and to include an annual reporting requirement for HDE holders that will permit the agency to obtain sufficient information for it to determine whether there is reason to question the continued exemption of the device from the act's effectiveness requirements.

FDA estimates that 15 HDE holders will submit annual reports. FDA believes that much of the information will already be in the HDE holder's possession, and the agency estimates that reports will take an average of 120 hours per response.

In addition to the changes required by FDAMA, FDA is amending § 814.104(b)(5) to allow a sponsor who is charging more than \$250 per HUD to submit, in lieu of a report by an independent CPA, an attestation by a responsible individual of the organization, verifying that the amount charged does not exceed the device's

cost of research, development, fabrication, and distribution. In addition, the amendments to § 814.104(b)(5) waive the requirement for submission of any CPA report or attestation for HUD's for which an HDE applicant is charging \$250 or less. FDA anticipates, based on past experience, that 7 of the anticipated 15 HDE holders per year will charge less than \$250 per HUD, and thus be exempt from the § 814.104(b)(5) requirement altogether. For the remaining eight HDE holders, FDA anticipates that all will submit attestations in lieu of CPA reports, and

estimates that these submissions will require 2 hours to complete.

Section 814.126(b)(2) modifies the current recordkeeping requirement for HDE holders to require that HDE holders retain records indefinitely instead of only for the duration of the period for which the HUD is approved for marketing. FDA believes that this change will not affect the total time required to maintain the records.

*Description of Respondents:* Business or other for profit organizations.

FDA estimates the burden for this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN

21 CFR Section	No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
814.104(b)(5)	8	1	8	2	16
814.124(a)	5	1	5	1	5
814.126(b)(1)	15	1	15	120	1,800
Total					1,821

TABLE 2.—ESTIMATED ANNUAL RECORDKEEPING BURDEN<sup>1</sup>

21 CFR Section	No. of Recordkeepers	Annual Frequency per Recordkeeping	Total Annual Records	Hours per Recordkeeper	Total Hours
814.126(b)(2)	15	1	15	2	30

<sup>1</sup>There are no operating and maintenance costs or capital costs associated with this information collection.

As provided in 5 CFR 1320.5(c)(1), collections of information in a direct final rule are subject to the procedures set forth in 5 CFR 1320.10. Interested persons and organizations may submit comments on the information collection requirements of this direct final rule by June 16, 1998 to the Dockets Management Branch (address above).

At the close of the 60-day comment period, FDA will review the comments received, revise the information collection provisions as necessary, and submit these provisions to OMB for review. FDA will publish a notice in the **Federal Register** when the information collection provisions are submitted to OMB, and an opportunity for public comment to OMB will be provided at that time. Prior to the effective date of the direct final rule, FDA will publish a notice in the **Federal Register** of OMB's decision to approve, modify, or disapprove the information collection provisions. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

## VII. Comments

Interested persons may by July 1, 1998, submit written comments regarding this rule to the Dockets Management Branch (address above). This comment period runs concurrently with the comment period for the companion proposed rule. Two copies of any comment are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in the brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. All comments received will be considered comments regarding the proposed rule and this direct final rule. In the event the direct final rule is withdrawn, all comments received regarding the companion proposed rule and the direct final rule will be considered comments on the proposed rule.

### List of Subjects 21 CFR Part 814

Administrative practice and procedure, Confidential business information, Medical devices, Medical research, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 814 is amended as follows:

### PART 814—PREMARKET APPROVAL OF MEDICAL DEVICES

1. The authority citation for 21 CFR part 814 continues to read as follows:

**Authority:** 21 U.S.C. 351, 352, 353, 360, 360c-360j, 371, 372, 373, 374, 375, 379, 379e, 381.

2. Section 814.100 is amended by revising paragraphs (a)(2) and (d) and by adding new paragraph (e) to read as follows:

#### § 814.100 Purpose and scope.

(a) \* \* \*

(2) Marketing approval for the HUD notwithstanding the absence of reasonable assurance of effectiveness that would otherwise be required under sections 514 and 515 of the act.

\* \* \* \* \*

(d) A person granted an exemption under section 520(m) of the act shall submit an annual report as described in § 814.126(b).

(e) FDA may suspend or withdraw approval of an HDE after providing notice and an opportunity for an informal hearing.

3. Section 814.104 is amended by removing paragraph (b) and redesignating paragraphs (c) through (e) as paragraphs (b) through (d), by revising redesignated paragraph (b)(5) and the first sentence in redesignated paragraph (c), and by revising redesignated paragraph (d) to read as follows:

**§ 814.104 Original applications.**

\* \* \* \* \*

(b) \* \* \*

(5) The amount to be charged for the device and, if the amount is more than \$250, a report by an independent certified public accountant, made in accordance with the Statement on Standards for Attestation established by the American Institute of Certified Public Accountants, or in lieu of such a report, an attestation by a responsible individual of the organization, verifying that the amount charged does not exceed the costs of the device's research, development, fabrication, and distribution. If the amount charged is \$250 or less, the above requirement will be waived.

(c) *Omission of information.* If the applicant believes that certain information required under paragraph (b) of this section is not applicable to the device that is the subject of the HDE, and omits any such information from its HDE, the applicant shall submit a statement that identifies and justifies the omission. \* \* \*

(d) *Address for submissions and correspondence.* Copies of all original HDE's, amendments and supplements, as well as any correspondence relating to an HDE, shall be sent or delivered to the Document Mail Center (HFZ-401), Office of Device Evaluation, Center for Devices and Radiological Health, Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850.

4. Section 814.106 is revised to read as follows:

**§ 814.106 HDE amendments and resubmitted HDE's.**

An HDE or HDE supplement may be amended or resubmitted upon an applicant's own initiative, or at the request of FDA, for the same reasons and in the same manner as prescribed for PMA's in § 814.37, except that the timeframes set forth in § 814.37(c)(1) and (d) do not apply. If FDA requests an HDE applicant to submit an HDE amendment, and a written response to FDA's request is not received within 75 days of the date of the request, FDA will

consider the pending HDE or HDE supplement to have been withdrawn voluntarily by the applicant.

Furthermore, if the HDE applicant, on its own initiative or at FDA's request, submits a major amendment as described in § 814.37(c)(1), the review period may be extended up to 75 days.

5. Section 814.108 is revised to read as follows:

**§ 814.108 Supplemental applications.**

After FDA approval of an original HDE, an applicant shall submit supplements in accordance with the requirements for PMA's under § 814.39, except that a request for a new indication for use of a HUD shall comply with requirements set forth in § 814.110. The timeframes for review of and FDA action on an HDE supplement are the same as those provided in § 814.114 for an HDE.

6. Section 814.112 is amended by revising the introductory text of paragraph (a) and by revising paragraph (b) to read as follows:

**§ 814.112 Filing an HDE.**

(a) The filing of an HDE means that FDA has made a threshold determination that the application is sufficiently complete to permit substantive review. Within 30 days from the date an HDE is received by FDA, the agency will notify the applicant whether the application has been filed. FDA may refuse to file an HDE if any of the following applies:

\* \* \* \* \*

(b) The provisions contained in § 814.42(b), (c), and (d) regarding notification of filing decisions, filing dates, the start of the 75-day review period, and applicant's options in response to FDA refuse to file decisions shall apply to HDE's.

7. Section 814.114 is revised to read as follows:

**§ 814.114 Timeframes for reviewing an HDE.**

Within 75 days after receipt of an HDE that is accepted for filing and to which the applicant does not submit a major amendment, FDA will send the applicant an approval order, an approvable letter, a not approvable letter (under § 814.116), or an order denying approval (under § 814.118).

8. Section 814.116 is amended by revising the last sentence in paragraph (a), adding a sentence to the end of paragraph (a), revising the last sentence of paragraph (d), and adding paragraph (e) to read as follows:

**§ 814.116 Procedures for review of an HDE.**

(a) \* \* \* If the HDE is referred to a panel, the agency shall follow the procedures set forth under § 814.44, with the exception that FDA will complete its review of the HDE and the advisory committee report and recommendations within 75 days from receipt of an HDE that is accepted for filing under § 814.112 or the date of filing as determined under § 814.106, whichever is later. Within the later of these two timeframes, FDA will issue an approval order under paragraph (b) of this section, an approvable letter under paragraph (c) of this section, a not approvable letter under paragraph (d) of this section, or an order denying approval of the application under § 814.118(a).

\* \* \* \* \*

(d) \* \* \* The applicant may respond to the not approvable letter in the same manner as permitted for not approvable letters for PMA's under § 814.44(f), with the exception that if a major HDE amendment is submitted, the review period may be extended up to 75 days.

(e) FDA will consider an HDE to have been withdrawn voluntarily if:

- (1) The applicant fails to respond in writing to a written request for an amendment within 75 days after the date FDA issues such request;
- (2) The applicant fails to respond in writing to an approvable or not approvable letter within 75 days after the date FDA issues such letter; or
- (3) The applicant submits a written notice to FDA that the HDE has been withdrawn.

9. Section 814.118 is amended by revising paragraph (e) to read as follows:

**§ 814.118 Denial of approval or withdrawal of approval of an HDE.**

\* \* \* \* \*

(e) Unless FDA otherwise determines that continued marketing under the HDE is inconsistent with the intent of section 520(m) of the act, FDA will not withdraw approval of an HDE solely because it is subsequently determined that the disease or condition for which the HUD is intended affects or is manifested in more than 4,000 people in the United States per year.

10. Section 814.120 and the heading is revised to read as follows:

**§ 814.120 Temporary suspension of approval of an HDE.**

An HDE or HDE supplement may be temporarily suspended for the same reasons and in the same manner as prescribed for PMA's in § 814.47.

11. Section 814.124 is amended by adding three sentences at the end of paragraph (a) to read as follows:

**§ 814.124 Institutional Review Board requirements.**

(a) \* \* \* If, however, a physician in an emergency situation determines that approval from an IRB cannot be obtained in time to prevent serious harm or death to a patient, a HUD may be administered without prior approval by the IRB located at the facility or by a similarly constituted IRB that has agreed to oversee such use. In such an emergency situation, the physician shall, within 5 days after the use of the device, provide written notification to the chairman of the IRB of such use. Such written notification shall include the identification of the patient involved, the date on which the device was used, and the reason for the use.

12. Section 814.126 is amended by revising the first sentence in paragraph (a) and by revising paragraph (b) to read as follows:

**§ 814.126 Postapproval requirements and reports.**

(a) An HDE approved under this subpart shall be subject to the postapproval requirements and reports set forth under subpart E of this part, as applicable, with the exception of § 814.82(a)(7). \* \* \*

(b) In addition to the reports identified in paragraph (a) of this section, the holder of an approved HDE shall prepare and submit the following complete, accurate, and timely reports:

(1) *Annual report.* An HDE applicant is required to submit an annual report on the anniversary date of marketing approval. The annual report shall include:

(i) An update of the information required under § 814.102(a) in a separately bound volume;

(ii) An update of the information required under § 814.102(c)(2), (c)(3), and (c)(5);

(iii) The number of devices that have been shipped or sold since initial marketing approval under this subpart H and, if the number shipped or sold exceeds 4,000, an explanation and estimate of the number of devices used per patient. If a single device is used on multiple patients, the applicant shall submit an estimate of the number of patients treated or diagnosed using the device together with an explanation of the basis for the estimate;

(iv) Information describing the applicant's clinical experience with the device since the HDE was initially approved. This information shall include safety information that is known or reasonably should be known to the applicant, medical device reports made under part 803 of this chapter, any data generated from the postmarketing

studies, and information (whether published or unpublished) that is known or reasonably expected to be known by the applicant that may affect an evaluation of the safety of the device or that may affect the statement of contraindications, warnings, precautions, and adverse reactions in the device's labeling; and

(v) A summary of any changes made to the device in accordance with supplements submitted under § 814.108. If information provided in annual reports, or any other information in the possession of FDA, gives the agency reason to believe that a device raises public health concerns or that the criteria for exemption are no longer met, the agency may require the HDE holder to submit additional information to demonstrate continued compliance with the HDE requirements.

(2) *Other.* An HDE holder shall maintain records of the names and addresses of the facilities to which the HUD has been shipped, correspondence with reviewing IRB's, as well as any other information requested by a reviewing IRB or FDA.

Dated: March 31, 1998.

**William B. Schultz,**

*Deputy Commissioner for Policy.*

**DEPARTMENT OF TRANSPORTATION****Coast Guard****33 CFR Part 160****46 CFR Part 4**

[CGD 94-027 and CGD 94-030]

RIN 2115-AE82 and 2115-AE89

**Notice of Hazardous Conditions/ Immediate Reporting of Casualties**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Final rule.

**SUMMARY:** The Coast Guard is issuing a final rule which amends the rules that describe what marine casualties and hazardous conditions require immediate notice. This rule also clarifies notice procedures. The reason for the change is to provide mechanisms that will help prevent another disaster such as the derailment of a passenger train near Mobile, Alabama, in September 1993. The final rule combines the Notice of Hazardous Conditions and the Immediate Reporting of Casualties interim rules that became effective on August 3, 1994. The Notice of Hazardous Conditions interim rule

amending 33 CFR part 160 is adopted as final without change.

**DATES:** This final rule is effective on May 18, 1998.

**ADDRESSES:** Documents indicated in this preamble are available for inspection or copying at the office of the Executive Secretary, Marine Safety Council (G-LRA/3406), U.S. Coast Guard Headquarters, 2100 Second Street SW., room 3406, Washington, DC 20593-0001, between 9:30 a.m. and 2 p.m., Monday through Friday, except Federal holidays. The telephone number is 202 267-1477.

**FOR FURTHER INFORMATION CONTACT:** Mr. Kenneth W. Olsen, Project Manager, Office of Investigations and Analysis, (G-MOA-1), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001, telephone (202) 267-1430.

**SUPPLEMENTARY INFORMATION:****Regulatory History**

On August 3, 1994, the Coast Guard published in the *Federal Register* two interim rules entitled Notice of Hazardous Conditions (59 FR 39458) and Immediate Reporting of Casualties (59 FR 39469). The Notice of Hazardous Conditions interim rule amended 33 CFR part 160, and the Immediate Reporting of Casualties interim rule amended 46 CFR part 4. These rules were published as interim rules because the Coast Guard determined that it would be contrary to the public interest to delay publication of rules, which clarified existing law, imposed no new regulatory requirements, and involved no significant change in policy. The Coast Guard combined the interim rules into a single final rule because both were initiated as a result of the derailment of the Amtrak Sunset Limited passenger train near Mobile, AL. The Coast Guard received 15 letters commenting on the rulemaking for Immediate Reporting of Casualties and two additional letters which presented comments on both the rulemaking for Immediate Reporting of Casualties and the rulemaking for Notice of Hazardous Conditions. No public hearing was requested, and none was held as a result of these comments.

**Background and Purpose**

The derailment of the Amtrak Sunset Limited, a passenger train, on September 22, 1993, with extensive injury and loss of life, resulted in a study by the Coast Guard entitled Review of Marine Safety Issues Related to Uninspected Towing Vessels. This study provided the Commandant of the Coast Guard with a number of

recommendations to enhance safety in the towing industry.

One of those recommendations called for a regulatory project to improve how information concerning allisions is reported. Another recommendation called for a regulatory project to amend 33 CFR 160.215 to clearly indicate that the required notice of a hazardous condition includes a hazardous condition caused by a vessel or its operation even when the hazardous condition is not on board the vessel.

The Commandant concurred with these and other recommendations and directed the appropriate offices to initiate the regulatory projects.

On March 2, 1994, the Coast Guard published a notice in the *Federal Register* (59 FR 10031) announcing a public meeting to review the study and seek public comment on the recommendations identified in the study. The meeting took place on April 4, 1994, at Coast Guard Headquarters, in Washington, DC. This public meeting, comprised mainly of representatives from the towing industry and the Coast Guard, solicited and elicited detailed comments concerning the recommendations. These comments were considered when the Coast Guard developed the interim rules for the immediate reporting and hazardous condition regulatory projects.

#### Discussion of Comments and Changes

##### 1. 33 CFR 160.215

Two comments recommended revising the rule to include language to protect vessel personnel from employer retaliation when a hazardous condition or casualty is reported directly to the Coast Guard. An existing law, 46 U.S.C. 2114, prohibits the discharge of or discrimination against a seaman by the owner, charterer, managing operator, agent, master or individual in charge of a vessel when the seaman in good faith reports or is about to report to the Coast Guard a violation of 46 U.S.C. subtitle II or related regulations. This statute clearly expresses that a seaman discharged or discriminated against in violation of 46 U.S.C. 2114 may bring an action in an appropriate district court of the United States. The Coast Guard believes that this statute provides suitable protection and remedy for seamen in such cases.

##### 2. 46 CFR 4.05-1(a)(1)

One comment questioned the use of the term "allision" and suggested its removal.

However the Coast Guard considers the term "allision" to be appropriate when describing collisions involving

vessels and stationary objects and no change was made to the rule as a result of this comment.

##### 3. 46 CFR 4.05-1(a)(1)

One comment expressed the need to include collisions as reportable casualties in 46 CFR subpart 4.05. The Coast Guard does not believe that every collision needs to be reported. Only those collisions that result in the conditions presented in 46 CFR 4.05-1(a)(4) through (a)(7), or those that are the result of a loss detailed in 46 CFR 4.05-1(a)(3), must be reported.

##### 4. 46 CFR 4.05-1(a)(2)

Another comment suggested that all intended and unintended strikes with bridges should be considered reportable casualties. The Coast Guard does not agree with this suggestion. Intended strikes that do not meet any criterion of 46 CFR subpart 4.05-1(a)(3) through (a)(7), and that do not create a hazardous condition, a hazard to navigation, the environment, or the safety of a vessel; are considered non-reportable casualties.

##### 5. 46 CFR 4.05-1(a)(3)

Two comments questioned the purpose of requiring immediate reporting of casualties which occur at sea when no other vessel is involved. Additionally, the comments contended that there was no added value in reporting mechanical breakdowns when the breakdowns are rectified by vessel personnel. The Coast Guard disagrees with these comments. The collection of casualty related system and vessel operational data is essential to the Coast Guard's effort in measuring the effectiveness of its marine safety programs. Thus, no change was made to the rule as a result of these comments.

##### 6. 46 CFR 4.05-1(a)(6) and 4.05-10(a)

Two comments expressed concern about the increased workload that may emerge as a result of reporting certain injuries and of reporting injuries on commercial vessels that render crewmen unfit for duty. The rule does not create a substantial workload increase to vessel owners, agents, masters, operators, or persons in charge because it clarifies an existing requirement and does not place any new requirement on the public. This eliminates misunderstanding as to what events require a written report and results in an even greater reduction in workload.

##### 7. 46 CFR 4.05-1(a) and (b) and 4.05-10(b)

Three comments suggested that the phrase "filed without delay," and the term "delivered" used in 46 CFR 4.05-10 required clarification. The Coast Guard has considered these comments and has concluded that no change is necessary and that the phrase "filed without delay" and the term "delivered" are appropriately used in the rule.

##### 8. 46 CFR 4.05-10(a)

Three comments questioned the use of the phrase "any marine casualty" in 46 CFR 4.05-10(a). The Coast Guard recognizes that "any marine casualty" could mean those casualties defined by 46 CFR 4.03-1. However, the Coast Guard only requires written reports for casualties reported under 46 CFR 4.05-1(a). Therefore, the rule has been amended to clarify that the term "marine casualty" refers only to those defined in § 4.05-1.

##### 9. 46 CFR 4.05-10(a)

One comment had no suggestions regarding the interim rules, but requested better instruction on form CG-2692 (Report of Marine Accident, Injury or Death). The Coast Guard considered this request and determined that making revisions to form CG-2692 is beyond the scope of this rulemaking.

##### 10. 46 CFR 4.05-10(b)

The Coast Guard clarifies this section. The term "notice" used in the phrase "the notice required by paragraph (a) of this section" is incorrect. The rule has been amended because paragraph (a) of § 4.05-10 requires a written report, not a notice.

#### Regulatory Evaluation

This final rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of the Order. It has not been reviewed by the Office of Management and Budget under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) [44 FR 11040 (February 26, 1979)].

The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10(e) of the regulatory policies and procedures of DOT is unnecessary. This finding rests on the determination that this rule clarifies existing requirements and does not place any new requirements on the industry.

### Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Coast Guard must consider whether this final rule will have a significant economic impact on a substantial number of small entities. "Small entities" may include small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard reviewed this rule for potential impact on small entities and has determined that it does not place any new requirements on the public or any small entity, because it only clarifies existing law. Therefore, the Coast Guard certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that this final rule will not have a significant economic impact on a substantial number of small entities.

### Assistance for Small Entities

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104-121), the Coast Guard offers to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process. Assistance with provisions of this final rule can be obtained by contacting Commandant (G-MOA-1), Office of Investigations and Analysis, 2100 Second Street, SW., Washington, DC 20593-0001, telephone 202-267-1430.

### Collection of Information

This final rule contains no new collection-of-information requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

### Federalism

The Coast Guard has analyzed this final rule under the principles and criteria contained in Executive Order 12612 and has determined that the rule does not have sufficient implications for federalism to warrant the preparation of a Federalism Assessment.

### Environment

The Coast Guard considered the environmental impact of this final rule and concluded that, under paragraph 2.B.2 e.(34)(a) of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. This rule concerns administrative matters which clearly have no environmental impact. A Categorical Exclusion Determination is available in the docket for inspection

or copying where indicated under ADDRESSES.

### List of Subjects in 33 CFR Part 160

Administrative practice and procedure, Hazardous materials transportation, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Vessels, Waterways.

### TITLE 33—NAVIGATION AND NAVIGABLE WATERS

#### PART 160—PORTS AND WATERWAYS SAFETY—GENERAL

Accordingly, the interim rule amending 33 CFR part 160 which was published at 59 FR 39458 on August 3, 1994, is adopted as a final rule without change.

### List of Subjects in 46 CFR Part 4

Administrative practice and procedure, Alcohol abuse, Drug abuse, Drug testing, Investigations, Marine safety, National Transportation Safety Board, Reporting and recordkeeping requirements, Safety, Transportation.

For the reasons discussed in the preamble, the Coast Guard is adopting the interim rule published at 59 FR 39458, August 3, 1994, amending 46 CFR part 4 as final with the following changes:

### TITLE 46—SHIPPING

#### PART 4—MARINE CASUALTIES AND INVESTIGATIONS

1. The authority citation for part 4 continues to read as follows:

**Authority:** 33 U.S.C. 1231; 43 U.S.C. 1333; 46 U.S.C. 2103, 2306, 6101, 6301, 6305; 50 U.S.C. 198; 49 CFR 1.46, Authority for subpart 4.40: 49 U.S.C. 1903(a)(1)(E); 49 CFR 1.46.

2. Section 4.05-10 is revised to read as follows:

#### § 4.05-10 Written report of marine casualty.

(a) The owner, agent, master, operator, or person in charge shall, within five days, file a written report of any marine casualty required to be reported under § 4.05-1. This written report is in addition to the immediate notice required by § 4.05-1. This written report must be delivered to a Coast Guard Marine Safety Office or Marine Inspection Office. It must be provided on Form CG-2692 (Report of Marine Accident, Injury or Death), supplemented as necessary by appended Forms CG-2692A (Barge Addendum) and CG-2692B (Report of Required Chemical Drug and Alcohol Testing Following a Serious Marine Incident).

(b) If filed without delay after the occurrence of the marine casualty, the report required by paragraph (a) of this section suffices as the notice required by § 4.05-1(a).

Dated: April 9, 1998.

R. C. North,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Marine Safety and Environmental Protection.

BILLING CODE 4910-15-P

### ENVIRONMENTAL PROTECTION AGENCY

#### 40 CFR Part 300

[FRL-5991-7]

#### National Oil and Hazardous Substances Pollution Contingency Plan, National Priorities List

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of partial deletion of portions of the Celanese Corporation Shelby Fiber Operations superfund site located in Shelby, Cleveland County, North Carolina from the national priorities list.

**SUMMARY:** The Environmental Protection Agency (EPA) Region 4 announces the deletion of portions of the Celanese Corporation Shelby Fiber Operations Superfund Site from the National Priorities List (NPL) in Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended. The only portions of the Site that are being deleted are: the *Outer Tier* groundwater extraction well system and the associated treatment system of Operable Unit #1 (OU#1), and the former source area and remediated creeks of Operable Unit #2 (OU#2). (This partial deletion does NOT include the remaining portions of OU#1 the Inner Tier extraction and treatment system.) EPA and the State of North Carolina Department of Environment, Health, and Natural Resources have determined that all appropriate actions have been implemented to protect public health, welfare and the environment under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This partial deletion does not preclude future action under Superfund deemed necessary.

**EFFECTIVE DATE:** April 17, 1998.

**FOR FURTHER INFORMATION CONTACT:** McKenzie Mallary, Remedial Project Manager, U.S. Environmental Protection Agency, Region 4, North Site Management Branch, 61 Forsyth Street, S.W., Atlanta, Georgia 30303-3014, (404) 562-8802 or 1-800-435-9233.

**SUPPLEMENTARY INFORMATION:** The Site affected by this partial deletion from the NPL is: Celanese Corporation Shelby Fiber Operations, Shelby, Cleveland County, North Carolina.

A Notice of Intent of Partial Deletion for this Site was published in the **Federal Register** on February 9, 1998 (63 FR 6508). The closing date for comments on the Notice of Intent for Partial Deletion was March 10, 1998. EPA received no comments.

See the February 9, 1998, **Federal Register** publication for more details describing OU#1 and OU#2 areas being

deleted and those remaining as part of the Site.

EPA identifies sites that appear to present a significant risk to the public health, welfare and the environment and it maintains the NPL as the list of those sites. Any site or portion thereof deleted from the NPL remains eligible for Fund-financed remedial actions in the future. Section 300.425(e)(3) of the NCP states that Fund-financed actions may be taken at sites deleted from the NPL. Deletion of a site or portions of a site from the NPL does not affect responsible party liability or impede Agency efforts to recover costs associated with response efforts.

**List of Subjects in 40 CFR Part 300**

Environmental protection, Air pollution control, Chemicals, Hazardous Waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping

requirements, Superfund, Water pollution control, and Water supply.

Dated: March 27, 1998.

**A. Stanley Meiburg,**  
Deputy Regional Administrator, Region 4.

For reasons set out in the preamble, 40 CFR Part 300 is amended as follows:

**PART 300—[AMENDED]**

1. The authority citation for Part 300 continues to read as follows:

**Authority:** 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601-9657; E.O. 12777, 56 FR 54757, 3 CFR 1991 Comp., p 351; E.O. 12580, 52 FR 2923; 3 CFR, 1987 Comp., p. 193.

2. Table 1 of Appendix B to Part 300 is amended by revising the entry for "Celanese Corp. (Shelby Fiber Operations)" in North Carolina to read as follows:

**Appendix B to Part 300—National Priorities List**

**TABLE 1.—GENERAL SUPERFUND SECTION**

State	Site name	City/county	Notes <sup>a</sup>

**Acquisition Regulation: Requesting Debriefings at GSA; Electronic Sales Reporting; Schedule for Submission of Reports; Fees for Industrial Funding Under Federal Supply Service Schedule Contracts**

**AGENCY:** Office of Acquisition Policy, GSA.  
**ACTION:** Final rule.

**SUMMARY:** The General Services Administration Acquisition Regulation (GSAR) is amended to provide for electronic reporting of sales under the Federal Supply Service (FSS) Schedule program and to require reporting of

sales and payment of the industrial funding fee (IFF) on a calendar quarter basis. The GSAR is also amended to define General Services Administration (GSA) business hours for purposes of requesting postaward debriefings.

**DATES:** *Effective Date:* April 17, 1998.  
**FOR FURTHER INFORMATION CONTACT:** Gloria Sochon, GSA Acquisition Policy Division, (202) 208-6726.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

FSS, in consultation with industry, identified sales reporting under FSS Schedule contracts as an area in need of updating to make it more consistent with commercial business practices. The prior system required contractors to submit sales reports quarterly on paper forms. Quarters were based on the contract's start date and did not necessarily coincide with calendar quarters. These changes revise the system to require FSS Schedule contractors to submit sales reports electronically via the Internet and to eliminate the use of paper forms. Contractors will continue to report

quarterly, but based on "standard business" (i.e., calendar) quarters.

The transition to electronic reporting facilitates contractors' compliance with sales reporting requirements. The updated system enables FSS Schedule contractors to use the Internet to eliminate the time-consuming paperwork required to manually complete paper reports. Since reports for all contracts are now due at the same time, contractors no longer have to maintain a unique reporting schedule for each contract. Furthermore, this streamlined transmittal method allows the Government to process reports more efficiently and allocate resources more effectively.

Federal Acquisition Regulation (FAR) sections 15.505 and 15.506 establish standards for timely submission of preaward protest requests and timely receipt of postaward debriefing requests. This rule defines GSA business hours to help offerors make timely debriefing requests and avoid unnecessary protests over timeliness.

**B. Executive Order 12866**

This regulatory action was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993, and is not a major rule under 5 U.S.C. 804.

**C. Regulatory Flexibility Act**

This final rule is not a significant revision requiring public comments and therefore the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, does not apply.

**D. Paperwork Reduction Act**

The revised clause at 552.238-72, Contractor's Report of Sales, contains an information collection requirement subject to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). However, the revisions to the clause made by this rule do not affect the information collection requirement which was approved previously by OMB and assigned control number 3090-0121.

The revised clause at 552.238-77, Industrial Funding Fee, contains an information collection requirement subject to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). However, the revisions to the clause made by this rule do not affect the information collection requirement previously approved under GSA's blanket approval under control number 3090-0250 from OMB for information collections with a zero burden estimate.

**E. Determination To Issue a Final Rule**

GSA expects this rule will have no significant cost or administrative burden on contractors or offerors. First, the rule requires contractors under the FSS program to report the industrial funding fee electronically. The requirement for reporting is not new, only the method of reporting is changed from paper-based to electronic. Contractors require Internet access to make the reports electronically. For those without Internet capability at their place of business, free access is readily available at public facilities such as libraries. Electronic reporting will be simpler, quicker, and less expensive than paper-based reporting. Second, the rule requires reporting sales on a calendar quarter schedule rather than quarters based from date of contract award. This change does not increase the frequency of reporting, but makes it simpler for contractors to track and follows more closely with other customary business reports and records. Finally, defining agency business hours will help offerors make timely debriefing requests and avoid unnecessary protests over timeliness. Therefore, GSA is promulgating this final rule without prior opportunity for public comment.

**List of Subjects in 48 CFR Parts 501, 515, 538, and 552**

Government procurement.

Accordingly, 48 CFR 501, 515, 538, and 552 are amended as follows:

1. The authority citation for 48 CFR Parts 501, 515, 538, and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c)

**PART 501—GENERAL SERVICES ADMINISTRATION ACQUISITION REGULATION SYSTEM****§ 501.103 [Amended]**

2. Section 501.103 is amended in paragraph (b) by adding "515.406," immediately after "515.1," in the first sentence.

**PART 515—CONTRACTING BY NEGOTIATION**

3. Section 515.406-1 is amended by revising paragraph (b) to read as follows:

**515.406-1 Uniform contract format.**

\* \* \* \* \*

(b) All solicitations and contracts must include the two notices in paragraphs (b)(1) and (2), except solicitations for leases and leases of real property must include only the notice in paragraph (b)(1):

(1) "The information collection requirements contained in this solicitation/contract that are not required by regulation have been approved by the Office of Management and Budget pursuant to the Paperwork Reduction Act and assigned OMB Control No. 3090-0163."

(2) "GSA's hours of operation are 8:00 a.m. to 4:30 p.m. Requests for preaward debriefings postmarked or otherwise submitted after 4:30 p.m. will be considered submitted the following business day. Requests for postaward debriefings delivered after 4:30 p.m. will be considered received and filed the following business day."

**PART 538—GSA SCHEDULE CONTRACTING**

4. Section 538.203-71 is amended by revising paragraph (a) to read as follows:

**538.203-71 Solicitation provisions and contract clauses.**

(a) The Contracting Officer shall insert the clause at 552.238-72, Contractor's Report of Sales, in solicitations issued and contracts awarded under GSA's schedule program.

\* \* \* \* \*

**PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES**

5. Section 552.238-72 is revised to read as follows:

**552.238-72 Contractor's Report of Sales.**

As prescribed in 538.203-71(a), insert the following clause:

**Contractor's Report of Sales (Apr 1998)**

(a) The Contractor must report the quarterly dollar value (in U.S. dollars and rounded to the nearest whole dollar) of all sales under this contract by calendar quarter (i.e., January-March, April-June, July-September, and October-December). The dollar value of a sale is the price paid by the schedule user for products and services on a schedule contract delivery order, as recorded by the Contractor. The reported contract sales value must include the industrial funding fee (see Clause 552.238-77).

(b) The Contractor must report the quarterly dollar value of sales on electronic GSA Form 72A, Contractor's Report of Sales, to the FSS Vendor Support Center (VSC) Website at Internet, <http://VSC.gsa.gov>. The Contractor must report sales separately for each National Stock Number (NSN), Special Item Number (SIN), or subitem. If no sales occur, the Contractor must show zero on the report for each separate NSN, SIN, or subitem.

(c) The Contractor must register with the VSC before using the automated reporting system. To register, the Contractor (or its authorized representative) must call the VSC at (703) 305-6235 and provide the necessary information regarding the company, contact name(s), and telephone number(s). The VSC will then issue a 72A specific password and provide other information needed to access the reporting system. Instructions for electronic reporting are available at the VSC Website or by calling the above phone number.

(d) The Contractor must convert the total value of sales made in foreign currency to U.S. dollars using the "Treasury Reporting Rates of Exchange," issued by the U.S. Department of Treasury, Financial Management Service. The Contractor must use the issue of the Treasury report in effect on the last day of the calendar quarter. The report is available from: Department of the Treasury, Financial Management Service, International Funds Branch, 3700 East-West Highway, PGCI, Room 5A19, Hyattsville, MD 20782, Telephone: (202) 874-7994, Internet: <http://www.fms.treas.gov/intn.html>

(e) The report is due 30 days following the completion of the reporting period. The Contractor must provide a close-out report within 120 days after the expiration date of the contract. This close-out report must cover all sales not shown in the final quarterly report and reconcile all errors and credits. If the Contractor reported all contract sales and reconciled all errors and credits on the final quarterly report, then show zero sales in the close-out report.

(End of Clause)

6. Section 552.238-77 is revised to read as follows:

**552.238-77 Industrial Funding Fee.**

As prescribed in 538.203-71(f) insert the following clause:

**Industrial Funding Fee (Apr 1998)**

(a) The Contractor must pay the Federal Supply Service, GSA, an industrial funding fee (IFF). The Contractor must remit the IFF in U.S. dollars within 30 days after the end of each quarterly reporting period as established in clause 552.238-72, Contractor's Report of Sales. The IFF equals \_\_\_\_\_\* of total quarterly sales reported. The IFF reimburses the GSA Federal Supply Service for the costs of operating the Federal Supply Schedules Program and recoups its operating costs from ordering activities. Offerors must include the IFF in their prices. The fee is included in the award price(s) and reflected in the total amount charged to ordering activities.

(b) The Contractor must remit any monies due as a result of the close-out report required by Clause 552.238-72 at the time the close-out report is submitted to GSA.

(c) The contractor must pay the IFF amount due by check, or electronic funds transfer through the Automated Clearing House (ACH), to the "General Services Administration." If the payment involves multiple special item numbers or contracts, the Contractor may consolidate the IFFs into one payment. To ensure that the payment is credited properly, the Contractor must identify the check or electronic transmission as an "Industrial Funding Fee" and include the following information: contract number(s); report amount(s); and report period(s). If the Contractor makes payment by check, provide this information on either the check, check stub, or other remittance material.

(1) If paying the IFF by check, the Contractor must forward the check to the

\* The Commissioner, Federal Supply Service, or a designee determines and provides to contracting officers the percentage amount of the fee to insert in the above clause.

following address: General Services Administration, Accounts Receivable Branch, P.O. Box 70500, Chicago, IL 60673-0500.

(2) If paying by electronic funds transfer through the ACH, the Contractor must call GSA, Financial Information Control Branch, Receivables, Collections and Sales Section (6BCDR) at [Contracting Officer to insert phone number] to make arrangements.

(d) If the full amount of the IFF is not paid within 30 calendar days after the end of the applicable reporting period, it constitutes a contract debt to the United States Government under the terms of FAR 32.6. The Government may exercise all rights under the Debt Collection Act of 1982, including withholding or setting off payments and interest on the debt (see FAR 52.232-17, Interest).

(e) If the Contractor fails to submit sales reports, falsifies sales reports, or fails to pay the IFF in a timely manner, the Government may terminate or cancel this contract. Willful failure or refusal to furnish the required reports, falsification of sales reports, or failure to pay the IFF timely constitutes sufficient cause for terminating the Contractor for cause under the termination provisions of this contract.

(End of Clause)

Dated: April 10, 1998.

## Proposed Rules

Federal Register

Vol. 63, No. 74

Friday, April 17, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

### DEPARTMENT OF HEALTH AND HUMAN SERVICES

#### Food and Drug Administration

##### 21 CFR Part 814

[Docket No. 98N-0171]

#### Medical Devices; Humanitarian Use of Devices; Companion to Direct Final Rule

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is proposing to amend certain regulations governing humanitarian use devices. This proposed rule is a companion document to the direct final rule published elsewhere in this issue of the *Federal Register*. The amendments are being made to implement provisions of the Federal Food, Drug, and Cosmetic Act (the act) as amended by the Food and Drug Administration Modernization Act of 1997 (FDAMA). This companion proposed rule is being issued under FDAMA and the act as amended.

**DATES:** Comments must be received on or before July 1, 1998. Comments on the information collection requirements must be received on or before June 16, 1998.

**ADDRESSES:** Submit written comments on the companion proposed rule to the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Joanne R. Less, Center for Devices and Radiological Health (HFZ-403), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20857.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

This proposed rule is a companion to the direct final rule published in the final rules section of this issue of the *Federal Register*. The direct final rule

and this companion proposed rule are substantively identical. FDA is publishing the direct final rule because the rule contains noncontroversial changes, and FDA anticipates that it will receive no significant adverse comments. A detailed discussion of this rule is set forth in the preamble of the direct final rule. If no significant comment is received in response to the direct final rule, no further action will be taken related to this proposed rule. Instead, FDA will publish a confirmation notice within 30 days after the comment period ends confirming that the direct final rule will go into effect on August 31, 1998. Additional information about FDA's direct final rulemaking procedures is set forth in a guidance published in the *Federal Register* of November 21, 1997 (62 FR 62466).

If FDA receives any significant adverse comment regarding this rule, FDA will publish a document withdrawing the direct final rule within 30 days after the comment period ends and will proceed to respond to all of the comments under this companion proposed rule using usual notice-and-comment procedures. The comment period for this companion proposed rule runs concurrently with the direct final rule's comment period. Any comments received under this companion proposed rule will also be considered as comments regarding the direct final rule.

A significant adverse comment is defined as a comment that explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. In determining whether a significant adverse comment is sufficient to terminate a direct final rulemaking, FDA will consider whether the comment raises an issue serious enough to warrant a substantive response in a notice-and-comment process. Comments that are frivolous, insubstantial, or outside the scope of the rule will not be considered adverse under this procedure. For example, a comment recommending a rule change in addition to the rule will not be considered a significant adverse comment, unless the comment states why the rule would be ineffective without the additional change. In addition, if a significant adverse

comment applies to part of a rule and that part can be severed from the remainder of the rule, FDA may adopt as final those parts of the rule that are not the subject of a significant adverse comment.

This action is part of FDA's continuing effort to achieve the objectives of the President's "Reinventing Government" initiative, and it is intended to reduce the burden of unnecessary regulations on medical devices without diminishing the protection of public health.

Section 520(m) of the act (21 U.S.C. 360j(m)) was added by the Safe Medical Devices Act of 1990 (Pub. L. 101-629). Section 520(m) creates an incentive for the development of humanitarian use devices (HUD) for use in the treatment or diagnosis of diseases or conditions affecting a small number of individuals. Section 520(m) of the act authorizes FDA, by regulation, to exempt a HUD from the effectiveness requirements of sections 514 and 515 of the act (21 U.S.C. 360d and 360e) (i.e., "reasonable assurance that the device is effective") provided that: (1) The device is to be used to treat or diagnose a disease or condition that affects fewer than 4,000 individuals in the United States; (2) the device would not be available to a person with such a disease or condition unless the exemption is granted; (3) no comparable device (other than a device that has been granted such an exemption) is available to treat or diagnose the disease or condition; and (4) the device will not expose patients to an unreasonable or significant risk of illness or injury, and the probable benefit to health from using the device outweighs the risk of injury or illness from its use, taking into account the probable risks and benefits of currently available devices to alternative forms or treatments.

In the *Federal Register* of June 26, 1996 (61 FR 33232), FDA published a final rule prescribing the procedures for submitting humanitarian device exemption (HDE) applications, amendments, and supplements; procedures for obtaining an extension of the exemption; and the criteria for FDA review and approval of HDE's. This rule amended part 814 (21 CFR part 814) of FDA's regulations.

On November 21, 1997, the President signed FDAMA into law. Section 203 of

FDAMA made the following changes to section 520(m) of the act:

(1) FDAMA added a new provision to section 520(m) of the act that requires FDA to issue an order approving or denying an HDE within 75 days after receiving the application.

(2) FDAMA provided for an exemption from the requirement that a HUD may not be used without approval from an institutional review board (IRB) for cases in which a physician determines in an emergency situation that approval cannot be obtained in time to prevent serious harm or death to a patient. In such cases, the physician must, after use of the device, notify the chairperson of the IRB. This notification must include the name of the patient, the date on which the device was used, and the reason for the use.

(3) FDAMA eliminated the requirement that the sponsor of an HDE obtain approval for continued use after 18 months. Instead, FDA may require a sponsor to demonstrate continued compliance with the requirements of section 520(m) of the act, if FDA believes that such a demonstration is necessary to protect the public health, or if FDA has reason to believe that the criteria for exemption are no longer met.

(4) FDAMA added a provision to section 520(m) of the act that FDA may withdraw an HDE approval only after providing notice and an opportunity for an informal hearing.

(5) FDAMA eliminated the "sunset" provision in section 520(m) of the act under which new approvals of HDE's would not have been permitted 5 years after the effective date of the rule originally implementing section 520(m).

FDA is issuing this companion proposed rule to amend the existing regulations to conform to revised section 520(m) of the act. For a discussion of the specific provisions of the regulation, see the preamble to the direct final rule published elsewhere in this issue of the *Federal Register*.

## II. Environmental Impact

The agency has determined under 21 CFR 25.30(h) that this proposed action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

## III. Analysis of Impacts

FDA has examined the impact of this companion proposed rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601-612) (as amended by subtitle D of the Small Business Regulatory Fairness

Act of 1996 (Pub. L. 104-121)), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety and other advantages; distributive impacts; and equity). The agency believes that this proposed rule is consistent with the regulatory philosophy and principles identified in the Executive Order. In addition, the proposed rule is not a significant regulatory action as defined by the Executive Order and so is not subject to review under the Executive Order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. The rule codifies applicable statutory requirements imposed by FDAMA. Because the companion proposed rule allows physicians more flexibility without compromising the public health and reduces the requirements imposed on sponsors, it may permit more small competitors to enter the marketplace. The agency, therefore, certifies that this proposed rule if issued, will not have a significant economic impact on a substantial number of small entities. In addition, this proposed rule will not impose costs of \$100 million or more in either the private sector or State, local, and tribal governments in the aggregate, and therefore a summary statement of analysis under section 202(a) of the Unfunded Mandates Reform Act of 1995 is not required.

## IV. Paperwork Reduction Act of 1995

This companion proposed rule contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501-3520). The title, description, and respondent description of the information collection provisions are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing each collection of information.

FDA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will

have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

*Title:* Amendments to Humanitarian Use Device Requirements.

*Description:* Section 520(m) of the act was created as an incentive for the development of HUD's for use in the treatment or diagnosis of diseases or conditions affecting fewer than 4,000 individuals in the United States. FDA is issuing this rule to propose amending the existing regulations governing HUD's found in part 814, to conform to the amendments made by FDAMA to section 520(m) of the act.

Section 814.124(a) would allow physicians in emergency situations to administer a HUD prior to obtaining IRB approval. In such situations, the physician would be required to provide written notification, including the identification of the patient involved, the date of use, and the reason for use, to the IRB within 5 days after emergency use. FDA anticipates that five physicians will use HUD's in emergency situations before obtaining approval from an IRB. FDA estimates that notifications under this section will take an average of 1 hour per response.

FDA is proposing to amend § 814.126(b)(1) to delete the requirement for a final report and to include an annual reporting requirement for HDE holders that will permit the agency to obtain sufficient information for it to determine whether there is reason to question the continued exemption of the device from the act's effectiveness requirements. FDA estimates that 15 HDE holders will submit annual reports. FDA believes that much of the information will already be in the HDE holder's possession, and the agency estimates that reports will take an average of 120 hours per response.

In addition to the changes required by FDAMA, FDA is proposing to amend § 814.104(b)(5) to allow a sponsor who is charging more than \$250 per HUD to submit, in lieu of a report by an independent certified public accountant (CPA), an attestation by a responsible individual of the organization, verifying that the amount charged does not exceed the device's cost of research, development, fabrication, and distribution. In addition, the proposed

amendments to § 814.104(b)(5) would waive the requirement for submission of any CPA report or attestation for HUD's for which an HDE applicant is charging \$250 or less. FDA anticipates, based on past experience, that 7 of the anticipated 15 HDE holders per year will charge less than \$250 per HUD, and thus be exempt from the § 814.104(b)(5) requirement

altogether. For the remaining eight HDE holders, FDA anticipates that all will submit attestations in lieu of CPA reports, and estimates that these submissions will require 2 hours to complete.

Section 814.126(b)(2) would modify the current recordkeeping requirement for HDE holders to require that HDE holders retain records indefinitely

instead of only for the duration of the period for which the HUD is approved for marketing. FDA believes that this change will not affect the total time required to maintain the records.

*Description of Respondents:* Business or other for profit organizations.

FDA estimates the burden for this collection of information as follows:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN

21 CFR Section	No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
814.104(b)(5)	8	1	8	2	16
814.124(a)	5	1	5	1	5
814.126(b)(1)	15	1	15	120	1,800
Total					1,821

TABLE 2.—ESTIMATED ANNUAL RECORDKEEPING BURDEN<sup>1</sup>

21 CFR Section	No. of Recordkeepers	Annual Frequency per Recordkeeping	Total Annual Records	Hours per Recordkeeper	Total Hours
814.126(b)(2)	15	1	15	2	30

<sup>1</sup>There are no operating and maintenance costs or capital costs associated with this information collection.

For consistency with the direct final rule to which this proposed rule is a companion, FDA is following the PRA comment procedures for direct final rules in this proposed rule. As provided in 5 CFR 1320.5(c)(1), collections of information in a direct final rule are subject to the procedures set forth in 5 CFR 1320.10. Interested persons and organizations may submit comments on the information collection provisions of this proposed rule by June 16, 1998, to the Dockets Management Branch (address above).

At the close of the 60-day comment period, FDA will review the comments received, revise the information collection provisions as necessary, and submit the provisions to OMB for review. FDA will publish a notice in the *Federal Register* when the information collection provisions are submitted to OMB, and an opportunity for public comment to OMB will be provided at that time. Prior to the effective date of the direct final rule, FDA will publish a notice in the *Federal Register* of OMB's decision to approve, modify, or disapprove the information collection provisions. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

**V. Submission of Comments**

Interested persons may, on or before July 1, 1998, submit to the Dockets

Management Branch (address above) written comments regarding this proposal. This comment period runs concurrently with the comment period for the direct final rule. Two copies of any comments are to be submitted except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. All comments received will be considered as comments regarding the direct final rule and this proposed rule. In the event, the direct final rule is withdrawn, all comments received will be considered comments on this proposed rule.

**List of Subjects 21 CFR Part 814**

Administrative practice and procedure, Confidential business information, Medical devices, Medical research, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 814 is amended as follows:

**PART 814—PREMARKET APPROVAL OF MEDICAL DEVICES**

1. The authority citation for 21 CFR part 814 continues to read as follows:

**Authority:** 21 U.S.C. 351, 352, 353, 360, 360c-360j, 371, 372, 373, 374, 375, 379, 379e, 381.

2. Section 814.100 is amended by revising paragraphs (a)(2) and (d) and by adding new paragraph (e) to read as follows:

**§ 814.100 Purpose and scope.**

(a) \* \* \*

(2) Marketing approval for the HUD notwithstanding the absence of reasonable assurance of effectiveness that would otherwise be required under sections 514 and 515 of the act.

\* \* \* \* \*

(d) A person granted an exemption under section 520(m) of the act shall submit an annual report as described in § 814.126 (b).

(e) FDA may suspend or withdraw approval of an HDE after providing notice and an opportunity for an informal hearing.

3. Section 814.104 is amended by removing paragraph (b) and redesignating paragraphs (c) through (e) as paragraphs (b) through (d), by revising redesignated paragraph (b)(5) and the first sentence in redesignated paragraph (c), and by revising redesignated paragraph (d) to read as follows:

**§ 814.104 Original applications.**

\* \* \* \* \*

(b) \* \* \*

(5) The amount to be charged for the device and, if the amount is more than \$250.00, a report by an independent certified public accountant, made in accordance with the Statement on Standards for Attestation established by the American Institute of Certified Public Accountants, or in lieu of such a report, an attestation by a responsible individual of the organization, verifying that the amount charged does not exceed the costs of the device's research, development, fabrication, and distribution. If the amount charged is \$250.00 or less, the above requirement will be waived.

(c) *Omission of information.* If the applicant believes that certain information required under paragraph (b) of this section is not applicable to the device that is the subject of the HDE, and omits any such information from its HDE, the applicant shall submit a statement that identifies and justifies the omission. \* \* \*

(d) *Address for submissions and correspondence.* Copies of all original HDE's, amendments and supplements, as well as any correspondence relating to an HDE, shall be sent or delivered to the Document Mail Center (HFZ-401), Office of Device Evaluation, Center for Devices and Radiological Health, Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850.

4. Section 814.106 is revised to read as follows:

**§ 814.106 HDE amendments and resubmitted HDE's.**

An HDE or HDE supplement may be amended or resubmitted upon an applicant's own initiative, or at the request of FDA, for the same reasons and in the same manner as prescribed for PMA's in § 814.37, except that the timeframes set forth in § 814.37(c)(1) and (d) do not apply. If FDA requests an HDE applicant to submit an HDE amendment, and a written response to FDA's request is not received within 75 days of the date of the request, FDA will consider the pending HDE or HDE supplement to have been withdrawn voluntarily by the applicant. Furthermore, if the HDE applicant, on its own initiative or at FDA's request, submits a major amendment as described in § 814.37(c)(1), the review period may be extended up to 75 days.

5. Section 814.108 is revised to read as follows:

**§ 814.108 Supplemental applications.**

After FDA approval of an original HDE, an applicant shall submit supplements in accordance with the requirements for PMA's under § 814.39, except that a request for a new

indication for use of a HUD shall comply with requirements set forth in § 814.110. The timeframes for review of and FDA action on an HDE supplement are the same as those provided in § 814.114 for an HDE.

6. Section 814.112 is amended by revising the introductory text of paragraph (a) and by revising paragraph (b) to read as follows:

**§ 814.112 Filing an HDE.**

(a) The filing of an HDE means that FDA has made a threshold determination that the application is sufficiently complete to permit substantive review. Within 30 days from the date an HDE is received by FDA, the agency will notify the applicant whether the application has been filed. FDA may refuse to file an HDE if any of the following applies:

(b) The provisions contained in § 814.42 (b), (c), and (d) regarding notification of filing decisions, filing dates, the start of the 75-day review period, and applicant's options in response to FDA refuse to file decisions shall apply to HDE's.

7. Section 814.114 is revised to read as follows:

**§ 814.114 Timeframes for reviewing an HDE.**

Within 75 days after receipt of an HDE that is accepted for filing and to which the applicant does not submit a major amendment, FDA will send the applicant an approval order, an approvable letter, a not approvable letter (under § 814.116), or an order denying approval (under § 814.118).

8. Section 814.116 is amended by revising the last sentence in paragraph (a), adding a sentence to the end of paragraph (a), revising the last sentence of paragraph (d), and adding paragraph (e) to read as follows:

**§ 814.116 Procedures for review of an HDE.**

(a) \* \* \* If the HDE is referred to a panel, the agency shall follow the procedures set forth under § 814.44, with the exception that FDA will complete its review of the HDE and the advisory committee report and recommendations within 75 days from receipt of an HDE that is accepted for filing under § 814.112 or the date of filing as determined under § 814.106, whichever is later. Within the later of these two timeframes, FDA will issue an approval order under paragraph (b) of this section, an approvable letter under paragraph (c) of this section, a not approvable letter under paragraph (d) of this section, or an order denying

approval of the application under § 814.118(a).

(d) \* \* \* The applicant may respond to the not approvable letter in the same manner as permitted for not approvable letters for PMA's under § 814.44(f), with the exception that if a major HDE amendment is submitted, the review period may be extended up to 75 days.

(e) FDA will consider an HDE to have been withdrawn voluntarily if:

(1) The applicant fails to respond in writing to a written request for an amendment within 75 days after the date FDA issues such request;

(2) The applicant fails to respond in writing to an approvable or not approvable letter within 75 days after the date FDA issues such letter; or

(3) The applicant submits a written notice to FDA that the HDE has been withdrawn.

9. Section 814.118 is amended by revising paragraph (e) to read as follows:

**§ 814.118 Denial of approval or withdrawal of approval of an HDE.**

(e) Unless FDA otherwise determines that continued marketing under the HDE is inconsistent with the intent of section 520(m) of the act, FDA will not withdraw approval of an HDE solely because it is subsequently determined that the disease or condition for which the HUD is intended affects or is manifested in more than 4,000 people in the United States per year.

10. Section 814.120 and the heading is revised to read as follows:

**§ 814.120 Temporary suspension of approval of an HDE.**

An HDE or HDE supplement may be temporarily suspended for the same reasons and in the same manner as prescribed for PMA's in § 814.47.

11. Section 814.124 is amended by adding two sentences at the end of paragraph (a) to read as follows:

**§ 814.124 Institutional Review Board requirements.**

(a) \* \* \* If, however, a physician in an emergency situation determines that approval from an IRB cannot be obtained in time to prevent serious harm or death to a patient, a HUD may be administered without prior approval by the IRB located at the facility or by a similarly constituted IRB that has agreed to oversee such use. In such an emergency situation, the physician shall, within 5 days after the use of the device, provide written notification to the chairman of the IRB of such use. Such written notification shall include the identification of the patient

involved, the date on which the device was used, and the reason for the use.

12. Section 814.126 is amended by revising the first sentence in paragraph (a) and by revising paragraph (b) to read as follows:

**§ 814.126 Postapproval requirements and reports.**

(a) An HDE approved under this subpart shall be subject to the postapproval requirements and reports set forth under subpart E of this part, as applicable, with the exception of § 814.82(a)(7). \* \* \*

(b) In addition to the reports identified in paragraph (a) of this section, the holder of an approved HDE shall prepare and submit the following complete, accurate, and timely reports:

(1) *Annual report.* An HDE applicant is required to submit an annual report on the anniversary date of marketing approval. The annual report shall include:

(i) An update of the information required under § 814.102(a) in a separately bound volume;

(ii) An update of the information required under § 814.102(c)(2), (c)(3), and (c)(5);

(iii) The number of devices that have been shipped or sold since initial marketing approval under this subpart H and, if the number shipped or sold exceeds 4,000, an explanation and estimate of the number of devices used per patient. If a single device is used on multiple patients, the applicant shall submit an estimate of the number of patients treated or diagnosed using the device together with an explanation of the basis for the estimate;

(iv) Information describing the applicant's clinical experience with the device since the HDE was initially approved. This information shall include safety information that is known or reasonably should be known to the applicant, medical device reports made under part 803 of this chapter, any data generated from the postmarketing studies, and information (whether published or unpublished) that is known or reasonably expected to be known by the applicant that may affect an evaluation of the safety of the device or that may affect the statement of contraindications, warnings, precautions, and adverse reactions in the device's labeling; and

(v) A summary of any changes made to the device in accordance with supplements submitted under § 814.108. If information provided in annual reports, or any other information in the possession of FDA, gives the agency reason to believe that a device raises public health concerns or that the

criteria for exemption are no longer met, the agency may require the HDE holder to submit additional information to demonstrate continued compliance with the HDE requirements.

(2) *Other.* An HDE holder shall maintain records of the names and addresses of the facilities to which the HUD has been shipped, correspondence with reviewing IRB's, as well as any other information requested by a reviewing IRB or FDA.

Dated: March 31, 1998.

[AD-FRL-5996-7]

RIN 2060-AE97

**National Emission Standards for Hazardous Air Pollutants for Primary Lead Smelters**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed rule; notice of public hearing.

**SUMMARY:** This action proposes national emission standards for hazardous air pollutants (NESHAP) for new and existing primary lead smelters pursuant to section 112 of the Clean Air Act (Act) as amended in November 1990. Primary lead smelters have been identified by the EPA as significant emitters of lead compounds, and other metal hazardous air pollutants (HAP) including arsenic, antimony, and cadmium. Exposure to lead compounds may result in adverse effects on the blood, central nervous system and kidneys. Chronic exposure to arsenic is associated with skin, bladder, liver and lung cancer and other developmental and reproductive effects. This proposed NESHAP provides protection to the public by requiring all primary lead smelters to meet emission standards that reflect the application of maximum achievable control technology (MACT).

**DATES:** *Comments.* Comments on the proposed rule must be received on or before June 16, 1998.

*Public Hearing.* If anyone contacts the EPA requesting to speak at a public hearing by May 8, 1998, a public hearing will be held on May 18, 1998, beginning at 10:00 a.m.

**ADDRESSES:** *Comments.* Written comments should be submitted (in

duplicate, if possible) to: Docket No. A-97-33 at the following address: U.S. Environmental Protection Agency, Air and Radiation Docket and Information Center (6102), 401 M Street, SW., Washington, DC 20460. The EPA requests that a separate copy of the comments also be sent to the contact person listed below.

Electronic comments can be sent directly to EPA's Air and Radiation Docket and Information Center at: "A-and-R-Docket@epamail.epa.gov." Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number (A-97-33). No Confidential Business Information (CBI) should be submitted through electronic mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries.

*Docket.* Docket No. A-97-33 contains supporting information used in developing the proposed standards. The docket is located at the U. S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460 in room M-1500, Waterside Mall (ground floor), and may be inspected from 8:30 a.m. to 12:00 p.m. and 1:00 to 3:00 p.m., Monday through Friday. The proposed regulatory text and other materials related to this rulemaking are available for review in the docket or copies may be mailed on request from the Air Docket by calling (202) 260-7548. A reasonable fee may be charged for copying docket materials.

*Public Hearing.* If anyone contacts the EPA requesting a public hearing by the required date (see **DATES**), the public hearing will be held at the EPA Office of Administration Auditorium, Research Triangle Park, NC. Persons interested in presenting oral testimony or inquiring as to whether a hearing is to be held should notify the contact person listed below.

**FOR FURTHER INFORMATION CONTACT:** For information concerning the proposed standards and technical aspects of primary lead smelting emissions and control, contact Mr. Kevin Cavender, Environmental Protection Agency MD-13, Research Triangle Park, NC 27711, telephone number (919) 541-2364, facsimile number (919) 541-5600, electronic mail address "cavender.kevin@epamail.epa.gov."

**SUPPLEMENTARY INFORMATION:**

## Regulated Entities

The regulated category and entities affected by this action include Primary Lead Smelting (SIC 3339). This action will affect three existing primary lead smelting facilities and any new primary lead smelting facilities built in the future.

## Technology Transfer Network

The text of today's notice will also be available on the Technology Transfer Network (TTN), one of EPA's electronic bulletin boards. The TTN provides information and technology exchange in various areas of air pollution control. The service is free, except for the cost of a phone call. Dial (919) 541-5742 for up to a 14,400 BPS modem. The TTN also is accessible through the Internet at "http://www.epa.gov/ttn". If more information on the TTN is needed, call the HELP line at (919) 541-5348. The HELP desk is staffed from 11 a.m. to 5 p.m.; a voice menu system is available at other times.

## Outline

The information presented in this preamble is organized as follows:

- I. Statutory Authority
- II. Initial List of Categories of Major and Area Sources
- III. Background
  - A. Description of Source Category
  - B. Emissions and Factors Affecting Emissions
  - C. Regulatory History
- IV. NESHAP Decision Process
  - A. Source of Authority for NESHAP Development
  - B. Criteria for Development of NESHAP
  - C. Determining the MACT Floor
- V. Summary of the Proposed Standards
  - A. Sources to be Regulated
  - B. Proposed Standards for Process and Process Fugitive Sources
  - C. Proposed Standards for Fugitive Dust Sources
  - D. Compliance Dates
  - E. Compliance Test Methods
  - F. Monitoring Requirements
  - G. Notification Requirements
  - H. Recordkeeping and Reporting Requirements
- VI. Summary of Environmental, Energy, and Economic Impacts
- VII. Rationale for Selecting the Proposed Standards
  - A. Selection of Pollutants and Source Category
  - B. Selection of Affected Sources
  - C. Selection of Basis and Level for the Proposed Standards for New and Existing Sources
  - D. Reconstruction Considerations
  - E. Selection of Compliance Dates
  - F. Selection of Emission Test Methods and Schedule
- VIII. Administrative Requirements
  - A. Solicitation of Comments
  - B. Public Hearing

- C. Docket
- D. Executive Order 12866
- E. Enhancing the Intergovernmental Partnership Under Executive Order 12875
- F. Unfunded Mandates Reform Act
- G. Regulatory Flexibility Act/Small Business Regulatory Enforcement Fairness Act
- H. Paperwork Reduction Act
- I. Clean Air Act
- J. Pollution Prevention Considerations

## I. Statutory Authority

The statutory authority for this proposal is provided by sections 101, 112, 114, 116, and 301 of the Clean Air Act, as amended (42 U.S.C. 7401, 7412, 7414, 7416, and 7601).

## II. Initial List of Categories of Major and Area Sources

Section 112 of the Act requires that the EPA promulgate regulations requiring the control of HAP emissions from major and area sources. The control of HAP's is achieved through promulgation of emission standards under sections 112 (d) and (f) and work practice standards under section 112(h).

An initial list of categories of major and area sources of HAP's selected for regulation in accordance with section 112(c) of the Act was published in the *Federal Register* on July 16, 1992 (57 FR 31576). Primary lead smelting is one of the 174 categories of sources listed. The category consists of smelters that process lead bearing ore concentrates into lead metal. The listing was based on the Administrator's determination that primary lead smelters may reasonably be anticipated to emit several of the 189 listed HAP's in quantities sufficient to designate them as major sources. Information subsequently collected by the EPA as part of this rulemaking confirms that all three operating primary lead smelters have the potential to emit greater than 9.1 megagrams per year (Mg/yr) [10 tons per year (tpy)] of a single HAP or greater than 22.7 Mg/yr (25 tpy) of a combination of HAP's (Docket ID No. II-B-4). Therefore, all three primary lead smelters are major sources.

## III. Background

### A. Description of Source Category

Primary lead smelters smelt lead bearing ore concentrates producing lead metal. The primary lead smelting source category does not include secondary lead smelters, lead remelters, or lead refiners.

There are three operating primary lead smelters in the United States. The Doe Run Company owns and operates a primary lead smelter in Herculaneum, Missouri (Doe Run). The ASARCO Inc.

owns and operates two primary lead smelters, one located in East Helena, Montana (ASARCO-MT), and a second located in Glover, Missouri (ASARCO-MO). No new primary lead smelters have been built in the last 10 years, and one smelter has closed during that time. No new primary smelters are anticipated in the foreseeable future.

Lead sulfide (PbS) ore concentrates are the main feed material to primary lead smelters. The two smelters located in Missouri obtain their concentrates from local mines. The ore concentrates coming from these mines have very high lead contents (about 70%), and low impurities. The ASARCO-Montana smelter buys its concentrates on the world market. These concentrates often have higher impurity contents.

The primary lead smelting process consists of: (1) Concentrate storage and handling, (2) sintering of ore concentrates, (3) sinter crushing and handling, (4) smelting of sinter to lead metal, (5) drossing, refining, and alloying of lead metal, and (6) smelting of drosses.

Lead concentrate, limestone, iron ore, silica and coke are received by truck and/or rail car where they are transferred to storage bins or piles. These materials and other in-process materials (including recycled flue dust) are weighed and mixed prior to charging into the sinter machine.

A sinter machine is essentially a continuous steel pallet conveyor belt. Each pallet consists of perforated or slotted plates. The purpose of sintering is to reduce the sulfur content of the lead sulfide concentrate by oxidizing it to lead oxide and sulfur dioxide, while simultaneously producing a hard porous clinker material ("sinter") suitable for processing in the blast furnace. The charge is ignited in two stages. In the first stage, the charge is dumped onto the pallets to a depth of approximately 1 inch. Gas burners are directed to the upper surface of the charge. Air and combustion gases are pulled through the top of the charge and are removed from the bottom. This is conducted over the first several feet of the machine. After this layer is completely ignited, a second layer of sinter is placed on top of the first to obtain a total depth of roughly one foot. At the same time the second layer is added, the airflow through the bed is reversed, blowing up through the bottom of the charge, and is removed from the top of the machine. This allows the oxygen and hot combustion gases to ignite and burn the remainder of the charge.

As sinter is discharged from the machine, it falls into a series of crushers and screens where it is reduced and

sized into two fractions, smaller than and greater than 1.5 inches in diameter. The greater than 1.5 inch fraction is transferred to the blast furnace for smelting. The smaller than approximately 1.5 inch fraction is further crushed to a size of less than 1/4 inch and is returned to the sinter machine bedding area for reprocessing.

Smelting of the sinter takes place in a blast furnace. The two ASARCO facilities operate two blast furnaces, while the Doe Run facility operates three blast furnaces. At all three facilities one blast furnace is typically shutdown for service at any given time. A blast furnace is a rectangular shaped shaft furnace. Tuyeres through which combustion air is admitted under pressure are located near the bottom, and are evenly spaced on either side of the furnace. The combustion zone of the furnace is at the same level as the tuyeres, and the hot combustion gases filter through the charge, preheat the charge, and are discharged through the top of the furnace.

The furnaces are charged periodically through the top by a charge car as frequently as needed to maintain a constant bed height in the furnace. A typical charge consists of 90 percent sinter and 10 percent coke.

As the smelting reaction takes place, molten metal and slag pool at the bottom of the furnace, where it is continuously tapped into a settling chamber. In this chamber the slag is tapped from the top, and the lead bullion is tapped from the bottom. Bullion is transferred to drossing kettles. Slag is tapped into a chamber where water is injected and the slag is granulated. The granulated slag is then either sent to storage for charge to the sinter machine, or is sent to a "slag pile" for disposal.

The bullion is allowed to cool in the drossing kettles. While cooling, copper dross floats to the surface and is periodically skimmed. Once the dross is removed, the bullion is transferred to other kettles for further refining and alloying. Once the desired product is obtained, the lead is cast into various size molds, ranging in size from 65 pounds to 2000 pounds.

The dross obtained from the drossing kettles may be sent off-site for processing, or may be processed on-site in a small reverberatory furnace. The reverberatory furnace, referred to as a dross furnace, uses direct heat supplied by a natural gas burner to further reduce and separate the dross into lead bullion, copper matte, and copper speiss which contains arsenic. The lead bullion is added back to the dross kettles, while

the matte and speiss are sent off-site to a copper smelter for copper recovery.

#### B. Emissions and Factors Affecting Emissions

Hazardous air pollutants (HAPs) are emitted from primary lead smelters as: (1) Process emissions, (2) process fugitive emissions, and (3) fugitive dust emissions. Table 1 summarizes the estimated HAP emissions from each of the primary lead smelters (Docket ID No. II-B-4). These estimates represent potential to emit estimates based on current Federally enforceable emission limits and air pollution controls.

TABLE 1.—SUMMARY OF POTENTIAL TO EMIT HAP EMISSION ESTIMATES FROM PRIMARY LEAD SMELTERS (TPY)

Company	Lead compounds	Total metal HAP	Total organic HAP
ASARCO—MO ..	60	80	6
ASARCO—MT ...	70	90	5
Doe Run—MO ...	90	110	10

#### 1. Process Emissions

Process emissions include emissions associated with the exhaust gases from sinter machines and blast and dross furnaces. Metal HAP emissions from process sources are produced through the volatilization of the metals contained in the feed materials by the elevated smelting temperatures and by the entrainment of metal-containing PM in the furnace exhaust. Both sinter machines and blast furnaces emit substantial quantities of metal HAP. Dross furnaces, being considerably smaller, emit lesser amounts. About 80 percent of metal HAP emissions are lead compounds, with lesser amounts of antimony, arsenic, and other metal compounds.

Organic HAP emissions from blast furnaces result from incomplete combustion of organic-containing materials (coke) in the furnace charge. None of the existing primary lead blast furnaces are equipped with organic emissions controls (e.g., afterburners). Emissions testing was performed by the EPA on the uncontrolled blast furnace exhaust at the Doe Run—MO smelter to determine the magnitude of organic HAP emissions from primary lead blast furnaces (Docket ID No. II-A-1). The emissions data obtained indicate low (part per billion) levels of several organic HAP compounds. The five compounds with the highest measured emission rates were benzene (62 ppb, 0.29 lb/hr), methylene chloride (50 ppb,

0.26 lb/hr), acetaldehyde (60 ppb, 0.15 lb/hr), carbon disulfide (33 ppb, 0.15 lb/hr), and formaldehyde (87 ppb, 0.15 lb/hr). Combined, the measured organic HAP emissions total 2.3 lb/hr, which is equivalent to an annual emission rate approaching 10 tons per year. The EPA believes these levels of organic HAP emissions are not significant enough to warrant regulation.

Furthermore, the organic HAP concentrations measured at primary lead smelters are far below what the EPA has historically considered achievable with add-on controls (e.g., thermal oxidizers). The EPA generally considers thermal oxidizers capable of achieving a 98 percent emission reduction or an outlet concentration of 20 ppm, which ever is greater (Docket ID No. II-B-6). As stated above, organic HAP concentrations at primary lead smelters are on the order of 50 to 60 ppb, or three orders of magnitude less than what the EPA has considered achievable with thermal oxidizers. Therefore, the EPA believes that it is technically infeasible to reduce organic HAP emissions from primary lead blast furnaces through the use of add-on controls.

#### 2. Process Fugitive Emissions

Process fugitive emissions result from sinter machine and furnace charging, sinter crushing and sizing, furnace tapping, drossing, refining, and casting. Process fugitive emissions contain metal HAP's. The majority of process fugitive sources at primary lead smelters are currently hooded and ventilated to control devices. Ventilated enclosures are also used to further reduce process fugitive emissions at some sources.

#### 3. Fugitive Dust Emissions

Fugitive dust emissions result from the entrainment of dust due to material handling, vehicle traffic, and wind erosion from storage piles. Fugitive dust emissions contain metal HAP's. The quantity of fugitive dust emissions is dependent on the size of the facility and the fugitive dust controls and practices in place. These emissions can not be measured directly, and can only be roughly estimated using emission factors and facility-specific data or through indirect monitoring methods. Fugitive dust sources are typically controlled by reducing the potential for entrainment through measures such as wetting, pavement cleaning, use of chemical stabilizers, and protection from wind.

### C. Regulatory History

#### 1. New Source Performance Standards

The EPA promulgated new source performance standards (NSPS) for primary lead smelters on January 15, 1976 (40 CFR part 60, subpart R). The NSPS limits emissions of particulate matter (PM) from blast and reverberatory furnaces (including rotary furnaces) to a concentration of 50 milligrams per dry standard cubic meter (mg/dscm) [0.022 grains per dry standard cubic foot (gr/dscf)] and emissions from refining kettles (pot furnaces) to 10 percent opacity. However, none of the primary lead smelters have undergone any major construction or reconstruction since the rule became effective, and are, for the most part, not subject to the NSPS requirements.

#### 2. State Implementation Plans for Lead

On October 5, 1978, the EPA promulgated National Ambient Air Quality Standards (NAAQS) for lead at a level of 1.5 micrograms of lead per cubic meter of air averaged over a calendar quarter. The NAAQS defines levels of air quality that are determined by EPA to be necessary, with an adequate margin of safety, to protect the public health (42 U.S.C. 7409). The areas around all three primary lead smelters were and continue to be designated as nonattainment areas for lead. Since the early 1980's, all three primary lead smelters and states have been involved in an ongoing effort to develop Federally enforceable control strategies to be incorporated into State Implementation Plans (SIP) in order to bring the areas into attainment with the lead NAAQS. The following paragraphs detail the history of the SIP development for the three primary smelters.

**ASARCO-MT.** Ambient air quality monitoring data collected during the period of 1977-1981 by the state of Montana indicated that there were recorded violations of the NAAQS for lead in the East Helena area. On September 29, 1983, the State of Montana submitted a plan for the control of lead emissions from the ASARCO-MT facility as part of the Montana State Implementation Plan for lead. The EPA published a final approval of the SIP on July 9, 1984 (49 FR 27944).

As of December 31, 1986, all of the control strategies in the 1983 lead SIP were implemented. Ambient monitoring data for the fourth quarter of 1988 indicated that the lead NAAQS was not met. On November 6, 1991, the EPA designated the East Helena area as a

nonattainment area for lead (56 FR 56694), effective January 6, 1992. As a result of this designation, Montana was required to submit a revised lead SIP that meets the requirements of the NAAQS. The State of Montana submitted a new SIP proposal to the EPA on August 16, 1996 (Docket ID No. II-1-2). This submittal is still under review by the EPA.

**ASARCO-MO.** The original Glover lead SIP was approved by EPA in 1981. On November 6, 1991, the EPA designated the Liberty and Arcadia Townships which surround the ASARCO-MO facility as nonattainment for lead. This designation became effective on January 6, 1992. On August 14, 1996, the State of Missouri submitted a revised SIP (Docket ID No. II-1-1). The EPA promulgated final approval of the submittal on March 5, 1997 (62 FR 9970).

**Doe Run-MO.** On June 3, 1986, the EPA issued a call for a revision to the Missouri SIP in response to violations of the NAAQS for lead near the Doe Run primary lead smelter in Herculaneum, Missouri. The state of Missouri submitted a SIP revision on September 6, 1990, with additional materials submitted on May 8, 1991. Before the EPA acted on the state's submission, the EPA promulgated a nonattainment designation for the area in the vicinity of Doe Run. The designation was published on November 6, 1991 (56 FR 56694), and became effective on January 6, 1992. As a result of the nonattainment designation, the Part D requirements of the act became applicable to the Missouri SIP revision for Doe Run. The EPA granted limited approval for Missouri's 1990 SIP revision on March 6, 1992 (57 FR 8076). The EPA explained that the basis for the limited approval was that the state would be required to submit a supplemental SIP revision meeting the applicable Part D requirements. On July 2, 1993, The state of Missouri submitted a lead attainment plan for the Doe Run-MO facility meeting the Part D requirements. In response to the EPA's comments, the state submitted revisions to the SIP on June 30, 1994, and November 23, 1994 (Docket ID No. II-1-3). The EPA found that these SIP components satisfy the Part D requirements of the Act. The EPA promulgated final approval of the submittals on May 5, 1995 (52 FR 22274).

#### 3. National Emission Standards for Hazardous Air Pollutants

On July 16, 1992, the EPA published an initial list of categories of major and area sources selected for regulation in accordance with section 112(c) of the

Act (57 FR 31476). Primary lead smelters were among the listed categories. Today, the EPA is issuing a notice of proposed rulemaking for primary lead smelters and is soliciting comments on the proposed rule.

### IV. NESHAP Decision Process

#### A. Source of Authority for NESHAP Development

Section 112 specifically directs the EPA to develop a list of all categories of all major and such area sources as appropriate emitting one or more of the 189 HAP listed in section 112(b) (section 112(c)). Section 112 of the Act replaces the previous system of pollutant-by-pollutant health-based regulation that proved ineffective at controlling the high volumes and concentrations of HAP in air emissions. The provision directs that this deficiency be redressed by imposing technology-based controls on sources emitting HAP, and that these technology-based standards may later be reduced further to address residual risk that may remain even after imposition of technology-based controls. A major source is any source that emits, or has the potential to emit considering Federally enforceable controls, 10 tons per year or more of any one HAP or 25 tons per year or more of any combination of HAP. The EPA published an initial list of source categories on July 16, 1992 (57 FR 31576), and may amend the list at any time.

#### B. Criteria for Development of NESHAP

The NESHAP are to be developed to control HAP emissions from both new and existing sources according to the statutory directives set out in section 112, as amended. The statute requires the standard to reflect the maximum degree of reduction of HAP emissions that is achievable taking into consideration the cost of achieving the emission reduction, any non-air quality health and environmental impacts, and energy requirements.

Emission reductions may be accomplished through application of measures, processes, methods, systems, or techniques, including, but not limited to: (1) Reducing the volume of, or eliminating emissions of, such pollutants through process changes, substitution of materials, or other modifications, (2) enclosing systems or processes to eliminate emissions, (3) collecting, capturing, or treating such pollutants when released from a process, stack, storage, or fugitive emissions point, (4) design, equipment, work practice, or operational standards

(including requirements for operator training or certification) as provided in subsection (h) of section 112, or (5) a combination of the above (section 112(d)(2)).

To develop a NESHAP, the EPA collects information about the industry, including information on emission source characteristics, control technologies, data from HAP emissions tests at well-controlled facilities, and information on the costs and other energy and environmental impacts of emission control techniques. The EPA uses this information to analyze possible regulatory approaches.

Although NESHAP are normally structured in terms of numerical emission limits, alternative approaches are sometimes necessary. In some cases, for example, physically measuring emissions from a source may be impossible, or at least impractical, because of technological and economic limitations. Section 112(h) authorizes the Administrator to promulgate a design, equipment, work practice, or operational standard, or a combination thereof, in those cases where it is not feasible to prescribe or enforce an emissions standard.

If sources in the source category are major sources, then a MACT standard is required for those major sources. The regulation of the area sources in a source category is discretionary. If there is a finding of a threat of adverse effects on human health or the environment, then the source category can be added to the list of area sources to be regulated.

#### C. Determining the MACT Floor

After the EPA has identified the specific source categories or subcategories of major sources to regulate under section 112, it must set MACT standards for each category or subcategory. Section 112 limits the EPA's discretion by establishing a minimum baseline or "floor" for standards. For new sources, the standards for a source category or subcategory cannot be less stringent than the emission control that is achieved in practice by the best-controlled similar source, as determined by the Administrator (section 112(d)(3)).

The standards for existing sources can be less stringent than standards for new sources, but they cannot be less stringent and may be more stringent than the average emission limitation achieved by the best-performing 12 percent of existing sources (excluding certain sources) for categories and subcategories with 30 or more sources, or the best-performing 5 sources for

categories or subcategories with fewer than 30 sources (section 112(d)(3)).

After the floor has been determined for a new or existing source in a source category or subcategory, the Administrator must set MACT standards that are no less stringent than the floor. Such standards must then be met by all sources within the category or subcategory.

Section 112(d)(2) specifies that the EPA shall establish standards that require the maximum degree of reduction in emissions of hazardous air pollutants

\* \* \* that the Administrator, taking into consideration the cost of achieving such emission reduction, and any non-air quality health and environmental impacts and energy requirements, determines is achievable \* \* \*.

In establishing standards, the Administrator may distinguish among classes, types, and sizes of sources within a category or subcategory (section 112(d)(1)). For example, the Administrator could establish two classes of sources within a category or subcategory based on size and establish a different emissions standard for each class, provided both standards are at least as stringent as the MACT floor for that class of sources.

The next step in establishing MACT standards is the investigation of regulatory alternatives. With MACT standards, only alternatives at least as stringent as the floor may be selected. Information about the industry is analyzed to develop model plant populations for projecting national impacts, including HAP emission reduction levels, costs, energy, and secondary impacts. Several regulatory alternative levels (which may be different levels of emissions control or different levels of applicability or both) are then evaluated to select the regulatory alternative that best reflects the appropriate MACT level.

The selected alternative may be more stringent than the MACT floor, but the control level selected must be technically achievable. In selecting a regulatory alternative that represents MACT, the EPA considers the achievable emission reductions of HAP (and possibly other pollutants that are co-controlled), cost, and economic impacts, energy impacts, and other environmental impacts. The objective is to achieve the maximum degree of emissions reduction without unreasonable economic or other impacts (section 112(d)(2)). The regulatory alternatives selected for new and existing sources may be different because of different MACT floors, and

separate regulatory decisions may be made for new and existing sources.

The selected regulatory alternative is then translated into a proposed regulation. The regulation implementing the MACT decision typically includes sections on applicability, standards, test methods and compliance demonstration, monitoring, reporting, and recordkeeping. The preamble to the proposed regulation provides an explanation of the rationale for the decision. The public is invited to comment on the proposed regulation during the public comment period. Based on an evaluation of these comments, the EPA reaches a final decision and promulgates the standard.

## V. Summary of the Proposed Standards

### A. Sources to be Regulated

Standards are being proposed to limit metal HAP emissions from: (1) Process sources, (2) process fugitive sources, and (3) fugitive dust sources at primary lead smelters. Process source emissions are discharged as the main exhaust of a sinter machine or smelting furnace through a chimney, flue, or ductwork. Process sources that would be regulated include sinter machines, blast furnaces, and dross furnaces.

Process fugitive emission sources that would be regulated include sinter machine charging and discharging, sinter crushing and sizing, blast furnace tapping, and dross furnace charging and tapping.

Fugitive dust sources that would be regulated include plant yards and roadways subject to wind and vehicle traffic, process areas, and materials handling and storage areas.

### B. Proposed Standards for Process and Process Fugitive Sources

A "plant wide" emission limit is being proposed for lead compounds from process and process fugitive emission sources. The lead compound emission limit is being proposed as a surrogate for all metal HAP's and will apply to both existing and new sources. The aggregated lead emissions from the following process and process fugitive sources would be limited to 500 mg/Mg of lead produced (1.0 lb/ton of lead produced):

- (1) Sinter machine;
- (2) Blast furnace;
- (3) Dross furnace;
- (4) Dross furnace charging location;
- (5) Blast and dross furnace tapping locations;
- (6) Sinter machine charging location;
- (7) Sinter machine discharge end;
- (8) Sinter crushing and sizing equipment; and

(9) Sinter machine area.

In addition to the emission limit, work practice standards are proposed for the above listed fugitive sources (items 4 through 9). The proposed rule requires that the charging, tapping, and sinter handling sources identified above (items 4 through 8) be equipped with a hood ventilated to a control device. The hood design and ventilation rate shall be consistent with the American Conference of Governmental Industrial Hygienists (ACGIH) recommended practices. In addition, the proposed rule requires that the sinter machine and sinter crushing and sizing equipment be located in a building ventilated to a baghouse or equivalent device at a rate that maintains the building at a lower than ambient pressure, ensuring in-draft through any doorway opening.

#### C. Proposed Standards for Fugitive Dust Sources

The proposed standards for fugitive dust sources are in the form of work practice and operating standards. The EPA is proposing work practice and operating standards based on the determination in accordance with § 112 (h)(2)(A) that the HAPs controlled by those standards cannot be emitted through a conveyance designed and constructed to emit or capture those HAP. Again, the standards apply to fugitive dust sources at both new and existing smelters. Each primary lead smelter would be required to develop a Standard Operating Procedures (SOP) manual for fugitive dust sources that details procedures to limit fugitive dust emissions. Each smelter's SOP manual would be reviewed and subject to approval by the Administrator. Existing manuals developed as part of a facilities SIP control strategy may be used to meet this requirement if the existing manuals address the identified fugitive dust sources.

#### D. Compliance Dates

Compliance with the standards would be achieved within 24 months of promulgation for existing primary lead smelters, and upon startup for new and reconstructed smelters.

#### E. Compliance Test Methods

Testing of lead compound emissions from process and process fugitive emission control devices would be conducted according to EPA reference method 12 (40 CFR part 60, appendix A). Sampling locations for all compliance tests would be determined by EPA reference method 1. Stack gas velocity and volumetric flow rate would be determined by EPA reference method 2. Gas analysis would be conducted

according to EPA reference method 3 for CO<sub>2</sub>, oxygen, excess air, and molecular weight on a dry basis. The previous 12 calendar months worth of production data will be used to calculate lead production based on the mass produced, and the lead content of lead products, copper speiss, and copper matte.

#### F. Monitoring Requirements

Each owner or operator subject to the proposed NESHAP would be required to develop and operate according to a SOP manual for operation and maintenance of the control devices used to comply with the emission limits. Each smelter's SOP manual would be reviewed and subject to approval by the Administrator. The minimum SOP requirements identified in the proposed rule would serve as the criteria by which the Administrator would decide whether to approve a smelter's SOP.

As proposed, the owner or operator must install a bag leak detection system for each fabric filter used on a process or process fugitive source. The bag leak detection system would be equipped with an audible alarm that automatically sounds when an increase in particulate emissions above a predetermined level is detected. The proposed rule requires that the monitor be capable of detecting PM emissions at concentrations of 10 milligrams per actual cubic meter (0.004 grains per actual cubic foot) and provide an output of relative PM emissions. Such a device would serve as an indicator of the performance of the fabric filter and would provide an indication of when maintenance of the fabric filter is needed. An alarm by itself does not indicate noncompliance with the lead limit, but would indicate an increase in PM emissions and trigger an inspection of the fabric filter to determine the cause of the alarm. The owner or operator would initiate corrective actions according to the procedures in their operation, maintenance, and monitoring plan. The owner or operator would be considered out of compliance upon failure to initiate corrective actions within 1 hour of the alarm.

#### G. Notification Requirements

The owner or operator of a primary lead smelter would be required to submit the notifications described in section 63.9 of the General Provisions to part 63, (40 CFR part 63, subpart A). These would include the initial notification, notifications of performance tests, and the notification of compliance status. In addition, each owner or operator would be required to submit the baghouse operation and maintenance SOP manual and the

fugitive dust control SOP manual along with a notification to the Administrator requesting review and approval of the smelter's SOP manuals.

#### H. Recordkeeping and Reporting Requirements

The owner or operator of a primary lead smelter would be required to comply with the recordkeeping and reporting requirements described in section 63.10 of the General Provisions to part 63, (40 CFR part 63, subpart A). In addition, the owner or operator of a primary lead smelter would be required to retain for 5 years records of: (1) production data of the weight and lead content of lead products, copper matte, and copper speiss, (2) an identification of the date and time of all bag leak detection system alarms, their cause, and an explanation of the corrective actions taken, (3) records demonstrating implementation of the baghouse SOP, and (4) records demonstrating implementation of the fugitive dust controls contained in the smelter's SOP manual.

In addition to the information required by the General Provisions to part 63, (40 CFR part 63, subpart A), the owner or operator of a primary lead smelter would be required to submit semi-annual reports containing (1) records of all alarms from the bag leak detection system including a description of the procedures taken following each bag leak detection system alarm, (2) a summary of the records maintained as part of the practices described in the baghouse SOP, and (3) a summary of the fugitive dust control measures performed during the required reporting period.

#### VI. Summary of Environmental, Energy, and Economic Impacts

There are only three existing primary lead smelters that would be subject to the proposed standards, and no new facilities are anticipated in the next 5 years. The proposed levels of control are based on existing SIP emission limits for lead. No additional emission controls would be required to comply with the proposed standards. Therefore, no quantifiable emission reduction or other environmental impacts are anticipated to result from this rulemaking. However, it is anticipated that improved baghouse operation and maintenance procedures coupled with continuous bag leak detection may result in unquantifiable reductions in emissions of lead compounds and other metal HAP.

Similarly, cost and economic impacts are expected to be minimal. The only costs associated with the proposed standards are those required to perform

compliance assurance activities such as performance testing, monitoring, reporting, and recordkeeping. These costs are minimal, and will not result in any significant economic impact.

#### VII. Rationale for Selecting the Proposed Standards

This section describes the rationale for the decisions made by the Administrator in selecting the proposed standards.

##### A. Selection of Pollutants and Source Category

Primary lead smelters emit several of the 189 HAP's listed in section 112(b) of the Act. Metal HAP's emitted include primarily compounds of lead, antimony, and arsenic, with lesser quantities of compounds of chromium, nickel, manganese, mercury, and cadmium. Organic HAP's are emitted at insignificant levels by primary lead smelters. Criteria pollutants emitted include lead, PM, SO<sub>2</sub>, NO<sub>x</sub>, CO, and hydrocarbons.

All three primary lead smelters in the United States are major sources of HAP's, based on potential-to-emit estimates that take into account air pollution control measures currently in place at each smelter. Although no new primary lead smelters are anticipated, any new primary lead smelter would certainly be a major source of metal HAP emissions. As such, area sources are not addressed by this proposed standard.

The emission, equipment, and work practice standards being proposed today are based on existing SIP requirements that substantially limit emissions of metal HAP's from primary lead smelters. The lead emission limit being proposed is a surrogate for individual metal HAP compounds. Strong correlations exist between lead emissions and other metal HAP emissions. In addition, the technologies identified for the control of metal HAP's are the same as those used to control lead emissions. Therefore, emissions standards requiring good control of lead will also achieve good control of the other metal HAP's emitted from primary lead smelters. Further, establishing emission limits for each of the numerous metal HAP compounds

emitted from primary lead smelters is considered impractical because measuring each compound would be too costly and would pose unreasonable compliance and monitoring costs while achieving little, if any, emission reduction above the surrogate pollutant approach.

##### B. Selection of Affected Sources

Nearly all activities at a primary lead smelter have the potential to emit metal HAP. In selecting the affected sources for this subpart, the EPA attempted to identify all operations that have the potential to emit appreciable quantities of HAP. As a result, the proposed standards apply to three types of emission sources at primary lead smelters: (1) Process sources, (2) process fugitive sources, and (3) fugitive dust sources.

Process source emissions are discharged as the main exhaust of a sinter machine or smelting furnace through a chimney, flue, or ductwork. Process sources that would be regulated include sinter machines, blast furnaces, and dross furnaces. Process sources have the potential to emit significant amounts of metal HAP.

Process fugitive emission sources that would be regulated include sinter machine charging and discharging, sinter crushing and sizing, blast furnace tapping, and dross furnace charging and tapping. Process fugitive sources are also a significant source of metal HAP.

Fugitive dust sources that would be regulated include plant yards and roadways subject to wind and vehicle traffic, process areas, and materials handling and storage areas. Fugitive dust sources emit appreciable quantities of metal HAP.

##### C. Selection of Basis and Level for the Proposed Standards for New and Existing Sources

Each of the three primary lead smelters are subject to federally enforceable SIP emission limitations and work practice requirements for the control of lead. In developing a SIP, the State and facility work together to develop an emission inventory which includes process, process fugitive, and fugitive dust sources. Once the emission inventory is developed, dispersion

modeling is performed to identify the emission sources contributing to NAAQS violations. Emission control options are identified and evaluated for each of the sources contributing to the NAAQS violation. The combination of controls, including contingency measures, found to be technically feasible and that bring the modeled air concentrations below the NAAQS are selected for the "Control Strategy". The facilities and the State agree to a Consent Order which legally binds them to implement the Control Strategy. The Consent Order also sets forth the administrative requirements for the implementation of the control measures. The state then submits a revision to the existing SIP to the EPA for approval.

As part of this rulemaking, the EPA has reviewed the proposed SIP requirements and Control Strategies for each of the three facilities, and has determined that the SIP emission limits and work practice requirements represent MACT for this industry. As such, the EPA's goal in this rulemaking is to develop MACT limitations compatible with the SIP requirements. The following paragraphs provide the rationale and supporting information for selection of MACT for the primary lead smelting source category.

##### 1. Selection of MACT for Process and Process Fugitive Sources

Metal HAP emissions from all of the major process and process fugitive sources are well controlled at the three primary lead smelters and all three facilities have SIP lead emission limits for the process and main process fugitive emission sources (Tables 2-4). Baghouses are used to control emissions from all existing blast furnace exhausts. ASARCO-MO uses a baghouse to control emissions from their sinter machine exhausts, while the other two facilities send the sinter machine strong gasses to an acid plant for SO<sub>2</sub> control, and the weak gasses to a baghouse. Due to the extensive cooling and precleaning associated with an acid plant, it is believed that an acid plant provides a higher level of control of metal HAP emissions as compared to baghouses alone.

TABLE 2.—SUMMARY OF SIP EMISSION LIMITS FOR ASARCO—MO

Emission point	Sources included	Lead emission limits (lb/day)
Main Stack .....	Sinter Machine .....	184.2
	Sinter Machine Charging	
	Sinter Machine Discharge	
	Sinter Crushing

Dross Plant Baghouse .....	Dross Furnace .....	36.2
	Dross Furnace Talling .....	
	Dross Kettle Ventilation .....	

All of the process fugitive sources identified at primary lead smelters are hooded, and ventilated to a baghouse with the exception of blast furnace charging and drossing and refining kettles. At the ASARCO—MT facility, the drossing and refining kettles are located in a totally enclosed building ventilated to a baghouse, and the blast furnace charging location is hooded and

ventilated to a baghouse. At the other two facilities, the blast furnace charging location and the drossing and refining kettles are located in partially enclosed buildings which are not ventilated to a baghouse. The sinter machine and sinter crushing and sizing equipment at all three smelters are housed in buildings which are ventilated to an air pollution control device.

Several approaches were identified and evaluated for determining MACT for process and process fugitive sources at primary lead smelters. One common regulatory approach is to establish emission limits for each individual source (sinter machine, blast furnace, etc.). For the primary lead smelting category, this approach has several disadvantages. Due to the manner in

which many of the process and process fugitive sources are "commingled" into a single stack, emission from individual sources can not be isolated. As a result, it would not be possible to monitor compliance with emission limits for individual sources. In addition, this approach would result in emission limits inconsistent with the existing SIP, where emission limits are set for stacks rather than for individual emission sources.

The EPA proposes to establish MACT for process and process fugitive sources at primary lead smelters based on a "plant wide" approach (Docket ID No. II-B-5). Using this approach, the emissions from all of the process and process fugitive sources are aggregated, and then divided by the facility's lead production rate to provide a production based lead emission rate in units of grams of lead emitted per megagram of lead produced. The plant wide emission limit approach has several advantages. It

is very compatible with the existing SIPs, and it provides facilities with more flexibility in complying with the MACT standard. Furthermore, the plant wide production based emission limit helps promote pollution prevention within the facilities by giving each facility the ability to meet the emission limit through any combination of source reduction and control technology options. Table 5 summarizes the calculations used to derive the production based MACT floor.

TABLE 5.—SUMMARY OF PLANT WIDE LEAD EMISSION RATES

Company	Lead SIP emission limit [Mg/day/(lb/day)]	Lead production capacity [Mg/day/(ton/day)]	Plant wide emission rate [g/Mg/(lb/ton)]
ASARCO—MO .....	0.178(392)	357(394)	500(1.0)
ASARCO—MT .....	0.145(319)	279(307)	520(1.0)
Doe Run .....	0.236(520)	559(616)	420(0.84)

The median value was selected to represent the MACT floor—500 grams lead per megagram of lead produced (1.0 pounds of lead per ton of lead produced).

In addition to the lead emission limit, the EPA is proposing equipment standards for several process fugitive sources at primary lead smelters including dross furnace charging and tapping locations, blast furnace tapping locations, sinter machine charge and discharge points, and sinter crushing and sizing equipment. The proposed standard would require that each of these sources be hooded and ventilated to a baghouse or equivalent control device. The hood design and ventilation rate shall be consistent with ACGIH recommended practices. In addition, the rule will require that sinter machines and sinter crushing and sizing equipment be located in a building which is ventilated to a baghouse or equivalent control device at a rate that would maintain the building at a lower than ambient pressure. Based on observations at operating primary lead smelters (Docket ID No.'s II-B-1, II-B-2, and II-B-3), the EPA believes that the capture and ventilation systems currently installed and operated at primary lead smelters are consistent with the proposed requirements. These controls consequently establish the MACT floor. Therefore, the EPA is proposing to incorporate these specifications into the proposed MACT for new and existing process fugitive sources.

## 2. Selection of MACT for Fugitive Dust Sources

The EPA is proposing that each smelter develop and submit to the Administrator for approval an SOP manual that would describe the controls and work practices that would be implemented to control fugitive dust emissions. The EPA is proposing to require the implementation of work practices based on its determination in accordance with § 112(h)(2)(A) that the HAPs controlled by those practices cannot be emitted through a conveyance designed and constructed to emit those HAPs. The use of a site-specific SOP manual is being proposed, rather than a list of required work practices, because there are several equivalent control options available for fugitive dust. The flexibility of the SOP approach is needed because the best control option for a particular smelter would be determined by the physical layout of the smelter and the control measures that are already in place. These two factors vary greatly among smelters.

All three facilities currently operate according to SOP manuals, required as part of their SIP control strategy, that address the control of fugitive dust from these sources. Existing manuals developed as part of a facilities SIP control strategy may be used to meet this requirement provided the existing manuals address the fugitive dust sources identified in this proposed rule.

### D. Reconstruction Considerations

Section 112(a) of the Act defines a new source as a stationary source, the construction or reconstruction of which is commenced after the proposal date of a relevant regulation. An existing source

is defined as any stationary source other than a new source.

Reconstructed sources are considered to be new sources. Reconstruction means the replacement of components of an existing source to such an extent that: (1) The fixed capital cost of the new components exceeds 50 percent of the fixed capital cost that would be required to construct a comparable new source, and (2) it is technologically and economically feasible for the reconstructed source to meet all relevant promulgated standards for new sources.

Some changes can be made at primary lead smelters that may be deemed reconstructions under section 63.5 of the General Provisions. However, the proposed standards for primary lead smelters are the same for both existing and new sources. As a result, the designation of a change as a "reconstruction" has limited practical significance.

### E. Selection of Compliance Dates

The proposed regulation would require owners or operators of existing primary lead smelters to achieve compliance with the proposed standards within 24 months of promulgation. This schedule would allow the affected sources the time necessary to modify existing processes and control equipment; design, fabricate, and install new control equipment as needed; develop and implement the SOP for equipment and work practice standards; and complete installation of all required continuous monitoring systems. The EPA believes that a 2-year period is realistic and practical to accomplish these required tasks. The proposed standard is also

consistent with compliance deadlines allowed by section 112(i) of the Act, which allows existing sources up to 3 years to achieve compliance.

Owners or operators of new or reconstructed primary lead smelters would be required to achieve compliance upon startup or promulgation of this NESHAP (whichever is later) and must perform compliance testing within 6 months of startup or promulgation, pursuant to sections 63.6 and 63.7 of the General Provisions.

#### F. Selection of Emission Test Methods and Schedule

Testing requirements are being proposed for lead emissions and total enclosure pressure.

##### 1. Lead Emissions

Lead emissions would be measured using EPA reference method 12. EPA reference method 1 would be used to determine the number and locations of sampling points, method 2 would be used to determine stack gas velocity and volumetric flow rate, method 3 would be used for flue gas analysis, and method 4 would be used to determine the volume percent moisture content in the stack gas.

Each test would consist of three runs conducted under representative operating conditions. The average of the three runs would be used to determine compliance.

The lead emission rates from the affected sources would be summed, and the sum divided by the average daily lead production rate for the previous 12 calendar months. The lead production rate would be calculated based on the sum of the lead contained in the lead products, copper matte, and copper speiss produced.

The proposed standard would require initial and annual tests of lead emissions from the identified process and process fugitive sources.

##### 2. Total Enclosure Pressure

Compliance with the ventilation requirements for total enclosures would be determined using a hand-held anemometer capable of demonstrating that air flow is into the building at all openings. Alternatively, a differential pressure gauge installed on the leeward wall of the enclosure can be used to demonstrate that the building is maintained at a negative pressure as compared to the outside of the building of no less than 0.02 mm Hg when all doors are in the position they are in during normal operation.

### VIII. Administrative Requirements

#### A. Solicitation of Comments

The EPA seeks full public participation in arriving at its final decisions, and strongly encourages comments on all aspects of this proposal from all interested parties. Full supporting data and detailed analyses should be submitted with comments to allow the EPA to make maximum use of the comments. All comments should be directed to the Air and Radiation Docket and Information Center, Docket No. A-97-33 (see ADDRESSES). Comments on this notice must be submitted on or before the date specified in DATES.

Commenters wishing to submit proprietary information for consideration should clearly distinguish such information from other comments, and clearly label it "Confidential Business Information" (CBI). Submissions containing such proprietary information should be sent directly to the following address, and not to the public docket, to ensure that proprietary information is not inadvertently placed in the docket: Attention: Kevin Cavender, c/o Ms. Melva Toomer, U.S. EPA Confidential Business Information Manager, OAQPS (MD-13); Research Triangle Park, NC 27711. Information covered by such a claim of confidentiality will be disclosed by the EPA only to the extent allowed and by the procedures set forth in 40 CFR part 2. If no claim of confidentiality accompanies the submission when it is received by the EPA, the submission may be made available to the public without further notice to the commenter.

#### B. Public Hearing

If a request to speak at a public hearing is received, a public hearing on the proposed standards will be held in accordance with section 307(d)(5) of the Act. Persons wishing to present oral testimony or to inquire as to whether a hearing is to be held should contact EPA (see ADDRESSES). To provide an opportunity for all who may wish to speak, oral presentations will be limited to 15 minutes each.

Any member of the public may file a written statement on or before June 16, 1998. Written statements should be addressed to the Air and Radiation Docket and Information Center (see ADDRESSES) and refer to Docket No. A-97-33. A verbatim transcript of the hearing and written statements will be placed in the docket and be available for public inspection and copying, or mailed upon request, at the Air and Radiation Docket and Information Center.

#### C. Docket

The docket is an organized and complete file of all the information considered by the EPA in the development of this rulemaking. The docket is a dynamic file because material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to readily identify and locate documents so that they can effectively participate in the rulemaking process. Along with the proposed and promulgated standards and their preambles, the contents of the docket will serve as the record in the case of judicial review. [See section 307(d)(7)(A) of the Act.]

#### D. Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the EPA must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. The Executive Order defines "significant regulatory action" as one that is likely to result in a rule that may:

- (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities;
- (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
- (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligation of recipients thereof; or
- (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is not a "significant regulatory action" because none of the listed criteria apply to this action. Consequently, this action was not submitted to OMB for review under Executive Order 12866.

#### E. Enhancing the Intergovernmental Partnership Under Executive Order 12875

In compliance with Executive Order 12875, the EPA has involved State regulatory experts in the development of this proposed rule. No tribal governments are believed to be affected by this proposed rule. Although not directly impacted by the rule, State

governments will be required to implement the rule by incorporating the rule into permits and enforcing the rule upon delegation. They will collect permit fees that will be used to offset the resources burden of implementing the rule. Comments have been solicited from state partners and have been carefully considered in the rule development process. In addition, all states are encouraged to comment on this proposed rule during the public comment period, and the EPA intends to fully consider these comments in the development of the final rule.

#### F. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), P.L. 104-4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, the EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures by State, local, and tribal governments, in aggregate, or by the private sector, of \$100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires the EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows the EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before the EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

The EPA has determined that this rule does not contain a Federal mandate that may result in expenditures of \$100

million or more for State, local, and tribal governments, in the aggregate, or the private sector in any one year. Thus, today's rule is not subject to the requirements of sections 202 and 205 of the UMRA. In addition, the EPA has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments because it contains no requirements that apply to such governments or impose obligations upon them. Therefore, today's rule is not subject to the requirements of section 203 of the UMRA.

#### G. Regulatory Flexibility Act/Small Business Regulatory Enforcement Fairness Act

As amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA), the Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, as well as take other actions intended to minimize the rule's potential impact on small entities, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small government jurisdictions.

The EPA has determined that none of the existing primary lead smelters are small entities, and has concluded that this proposed rule would not have a significant economic impact on a substantial number of small entities. Therefore, I certify that this action will not have a significant economic impact on a substantial number of small entities.

#### H. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the OMB under the requirements of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An information collection request (ICR) document has been prepared by EPA, and a copy may be obtained from Sandy Farmer, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M Street SW., Washington, DC 20460, or by calling (202) 260-2740.

The proposed information requirements are based on notification, recordkeeping, and reporting requirements in the NESHAP general provisions (40 CFR part 63, subpart A), which are mandatory for all owners or operators subject to national emission standards. These recordkeeping and reporting requirements are specifically

authorized by section 114 of the Act (42 U.S.C. § 7414). All information submitted to the EPA pursuant to the recordkeeping and reporting requirements for which a claim of confidentiality is made is safeguarded according to Agency policies set forth in 40 CFR part 2, subpart B.

The proposed rule would require maintenance inspections of the control devices but would not require any notifications or reports beyond those required by the general provisions. The proposed recordkeeping requirements require only the specific information needed to determine compliance.

The annual monitoring, reporting, and recordkeeping burden for this collection (averaged over the first 3 years after the effective date of the rule) is estimated to be 1,000 labor hours per year at a total annual cost of \$64,000. This estimate includes a one-time performance test and report (with repeat tests where needed); one-time purchase and installation of bag leak detection systems; one-time submission of a startup, shutdown, and malfunction plan with semiannual reports for any event when the procedures in the plan were not followed; semiannual excess emission reports; maintenance inspections; notifications; and recordkeeping. Total capital/startup costs associated with the monitoring requirements over the 3-year period of the ICR are estimated at \$93,000, with operation and maintenance costs of \$4,500/yr.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information; processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a request for the collection of information; search existing data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An Agency may not conduct or sponsor, and a person is not required to respond to, a request for the collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

Comments are requested on the EPA's need for this information, the accuracy

of the provided burden estimates, any suggested methods for minimizing respondent burden, including through the use of automated collection techniques. Send comments on the ICR to the Director, OPPE Regulatory Information Division; U.S. Environmental Protection Agency (2137), 401 M Street SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, marked "Attention: Desk Officer for EPA." Include the ICR number in any correspondence. Because OMB is required to make a decision concerning the ICR between 30 and 60 days after April 17, 1998, comment to OMB is best assured of having its full effect if OMB receives it by May 18, 1998. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

**I. Clean Air Act**

In accordance with section 117 of the Act, publication of this proposal was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies. This regulation will be reviewed 8 years from the date of promulgation. This review will include an assessment of such factors as evaluation of the residual health risks, any overlap with other programs, the existence of alternative methods, enforceability, improvements in emission control technology and health data, and the recordkeeping and reporting requirements.

**J. Pollution Prevention Considerations**

The Pollution Prevention Act of 1990 (42 U.S.C. 13101 *et seq.*, Pub. L. 101-508, November 5, 1990) establishes the national policy of the United States for pollution prevention. This act declares that: (1) Pollution should be prevented or reduced whenever feasible; (2)

pollution that cannot be prevented or reduced should be recycled or reused in an environmentally-safe manner wherever feasible; (3) pollution that cannot be recycled or reused should be treated; and (4) disposal or release into the atmosphere should be chosen only if none of the other options is available.

The plant wide emission limit approach proposed by the EPA promotes the use of pollution prevention alternatives by giving facilities full credit for source reduction in determining compliance with the emission limit. Furthermore, the focus of the fugitive dust requirements is on work practice and operating standards that reduce emission potential, rather than capture and treatment options.

**List of Subjects in 40 CFR Part 63**

Environmental protection, Air pollution control, Hazardous substances, Reporting and recordkeeping requirements, Primary lead smelters.

Dated: April 9, 1998.

**Carol M. Browner,**  
*Administrator.*

For reasons set out in the preamble, it is proposed that 40 CFR part 63 be amended as follows:

**PART 63—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES**

1. The authority citation for part 63 continues to read as follows:

**Authority:** 42 U.S.C. 7401 *et seq.*

2. Part 63 is amended by adding subpart TTT, to read as follows:

**Subpart TTT—National Emission Standards for Hazardous Air Pollutants for Primary Lead Smelters.**

- Sec.
- 63.1541 Applicability.
- 63.1542 Definitions.
- 63.1543 Standards for process and process fugitive sources.

- 63.1544 Standards for fugitive dust sources.
- 63.1545 Compliance dates.
- 63.1546 Test methods.
- 63.1547 Monitoring requirements.
- 63.1548 Notification requirements.
- 63.1549 Recordkeeping and reporting requirements.
- 63.1550 Delegation of Authority.

**Subpart TTT—National Emission Standards for Hazardous Air Pollutants for Primary Lead Smelters**

**§ 63.1541 Applicability.**

(a) The provisions of this subpart apply to the following affected sources at primary lead smelters: sinter machine, blast furnace, dross furnace, process fugitive sources, and fugitive dust sources. The provisions of this subpart do not apply to secondary lead smelters, lead refiners, or lead remelters.

(b) Table 1 of this subpart specifies the provisions of subpart A that apply and those that do not apply to owners and operators of primary lead smelters. The following sections of part 63 apply to this subpart as stated in subpart A and Table 1: § 63.1 (Applicability), § 63.2 (Definitions), § 63.3 (Units and abbreviations), § 63.4 (Prohibited activities and circumvention), § 63.5 (Construction and reconstruction), § 63.7 (Performance testing requirements), § 63.12 (State authority and delegations), § 63.13 (Addresses of State air pollution control agencies and EPA Regional Offices), § 63.14 (Incorporations by reference), and § 63.15 (Availability of information and confidentiality). The following sections of part 63 apply to the extent specified in this subpart and Table 1: § 63.6 (Compliance with standards and maintenance requirements), § 63.8 (Monitoring requirements), § 63.9 (Notification requirements), and § 63.10 (Recordkeeping and reporting requirements). Sections § 63.11 (Control device requirements) does not apply to this subpart.

**TABLE 1.—GENERAL PROVISIONS APPLICABILITY TO SUBPART TTT**

	Reference	Applies to subpart TTT	Comment
63.1	.....	Yes	
63.2	.....	Yes	
63.3	.....	Yes	
63.4	.....	Yes	
63.5	.....	Yes	
63.6	(a), (b), (c), (e), (f), (g), (i) and (j).	Yes	
63.6	(d) and (h)	No	No opacity limits in rule.
63.7	.....	Yes	
63.8	.....	Yes	
63.9	(a), (b), (c), (d), (e), (g), (h)(1-3), (h)(5-6), (i), and (j).	Yes	
63.9	(g)	No	No CMS required by rule.

TABLE 1.—GENERAL PROVISIONS APPLICABILITY TO SUBPART TTT—Continued

	Reference	Applies to subpart TTT	Comment
63.9 .....	(f) and (h)(4) .....	No .....	No opacity or visible emission limits in rule.
63.10 .....	.....	Yes .....	
63.11 .....	.....	No .....	Flares will not be used to comply with the emission limits.
63.12 to 63.15 .....	.....	Yes .....	

**§ 63.1542 Definitions.**

Terms used in this subpart are defined in the Act, in subpart A of this part, or in this section as follows:

*Blast furnace* means any reduction furnace to which sinter is charged and which forms separate layers of molten slag and lead bullion.

*Charging location* means the physical opening through which raw materials are introduced into a sinter machine, blast furnace, or dross furnace.

*Dross furnace* means any smelting furnace to which drosses are charged and which chemically and physically separates lead from other impurities.

*Drossing and refining kettle* means an open-top vessel that is constructed of cast iron or steel and is indirectly heated from below and contains molten lead for the purpose of drossing, refining, or alloying lead. Included are pot furnaces, receiving kettles, and holding kettles.

*Fugitive dust source* means a stationary source of hazardous air pollutant emissions at a primary lead smelter resulting from the handling, storage, transfer, or other management of lead-bearing materials where the source is not associated with a specific process, process vent, or stack. Fugitive dust sources include roadways, storage piles, materials handling transfer points, and materials transport areas.

*Furnace area* means any area of a primary lead smelter in which a blast furnace or dross furnace is located.

*Materials storage and handling area* means any area of a primary lead smelter in which lead-bearing materials (including ore concentrate, sinter, granulated lead, dross, slag, and flue dust) are stored or handled between process steps, including areas in which materials are stored in piles, bins, or tubs, and areas in which material is prepared for charging to a sinter machine or smelting furnace.

*Plant roadway* means any area of a primary lead smelter that is subject to vehicle traffic, including traffic by fork lifts, front-end loaders, or vehicles carrying ore concentrates or cast lead ingots. Excluded from this definition are employee and visitor parking areas, provided they are not subject to traffic

by vehicles carrying lead-bearing materials.

*Primary lead smelter* means any facility engaged in the production of lead metal from lead sulfide ore concentrates through the use of pyrometallurgical techniques.

*Process fugitive source* means a source of hazardous air pollutant emissions at a primary lead smelter that is associated with lead smelting or refining but is not the primary exhaust stream and is not a fugitive dust source. Process fugitive sources include sinter machine charging locations, sinter machine discharge locations, sinter crushing and sizing equipment, furnace charging locations, furnace taps, drossing kettles, and refining kettles.

*Refining and casting area* means any area of a primary lead smelter in which drossing or refining operations occur, or casting operations occur.

*Sinter machine* means any device in which a lead sulfide ore concentrate charge is heated in the presence of air to eliminate sulfur contained in the charge and to agglomerate the charge into a hard porous mass called sinter.

*Sinter machine area* means any area of a primary lead smelter where a sinter machine, or sinter crushing and sizing equipment is located.

*Sinter machine discharge end* means the physical opening at the end of a sinter machine where the sinter exits the sinter machine.

*Tapping location* means the opening thru which lead and slag are removed from the furnace.

*Total enclosure* means a roofed and walled building with limited openings to allow access and egress for people and vehicles.

**§ 63.1543 Standards for process and process fugitive sources.**

(a) No owner or operator of any existing, new, or reconstructed primary lead smelter shall discharge or cause to be discharged into the atmosphere lead compounds in excess of 500 grams of lead per megagram of lead metal produced (1.0 pounds of lead per ton of lead metal produced) from the aggregation of emissions discharged from the air pollution control devices used to control emissions from the

sources listed in paragraphs (a)(1) through (a)(9) of this section.

- (1) Sinter machine;
- (2) Blast furnace;
- (3) Dross furnace;
- (4) Sinter machine charging location;
- (5) Blast furnace and dross furnace tapping location;
- (6) Sinter machine charging location;
- (7) Sinter machine discharge end;
- (8) Sinter crushing and sizing equipment; and
- (9) Sinter machine area.

(b) The process fugitive sources listed in paragraphs (a)(4) through (a)(8) of this section shall be equipped with a hood and shall be ventilated to a baghouse or equivalent control device. The hood design and ventilation rate shall be consistent with American Conference of Governmental Industrial Hygienists recommended practices.

(c) The sinter machine area shall be enclosed in a building that is ventilated to a baghouse or equivalent control device at a rate that maintains the building at a lower than ambient pressure to ensure in-draft through any doorway opening.

(d) Following the initial test to demonstrate compliance with paragraph (a) of this section, the owner or operator of a primary lead smelter shall conduct a compliance test for lead compounds on an annual basis (no later than 12 calendar months following the previous compliance test).

**§ 63.1544 Standards for fugitive dust sources.**

(a) Each owner or operator of a primary lead smelter shall prepare, and at all times operate according to, a standard operating procedures manual that describes in detail the measures that will be put in place to control fugitive dust emissions from the sources listed in paragraphs (a)(1) through (a)(5) of this section:

- (1) Plant roadways;
- (2) Material storage and handling area;
- (3) Sinter machine area;
- (4) Furnace area; and
- (5) Refining and casting area.

(b) The standard operating procedures manual shall be submitted to the Administrator or delegated authority for review and approval.

(c) Existing manuals that describe the measures in place to control fugitive emission sources required as part of a State Implementation Plan for lead shall satisfy the requirements of paragraph (a) of this section provided they address the sources listed in paragraphs (a)(1) through (a)(5) of this section.

#### § 63.1545 Compliance dates.

(a) Each owner or operator of an existing primary lead smelter shall achieve compliance with the requirements of this subpart no later than [date 24 months after publication of the final rule].

(b) Each owner or operator of a primary lead smelter that commences construction or reconstruction after April 17, 1998 shall achieve compliance with the requirements of this subpart by [Insert date of publication of final rule] or upon startup of operations, whichever is later.

#### § 63.1546 Test methods.

(a) The following procedure shall be used to determine compliance with the emissions standard for lead compounds under § 63.1543(a):

(1) The lead compound emission rate, in units of grams of lead per hour, for each source listed in § 63.1543(a)(1) through (9) shall be determined according to the following test methods in appendix A of part 60 of this chapter:

(i) Method 1 shall be used to select the sampling port location and the number of traverse points.

(ii) Method 2 shall be used to measure volumetric flow rate.

(iii) Method 3 shall be used for gas analysis.

(iv) Method 4 shall be used to determine moisture content of the stack gas.

(v) Method 12 shall be used to measure the lead emission rate of the stack gas. The minimum sample volume shall be 0.85 dry standard cubic meters (30 dry standard cubic feet) and the minimum sampling time shall be 60 minutes for each run. Three runs shall be performed and the average of the three runs shall be used to determine compliance.

(2) The lead production rate, in units of megagrams per hour, shall be determined based on production data for the previous 12 calendar months according to the procedure detailed in paragraphs (a)(2)(i) through (v) of this section:

(i) Total lead products production multiplied by the fractional lead content shall be determined in units of megagrams.

(ii) Total copper matte production multiplied by the fractional lead content

shall be determined in units of megagrams.

(iii) Total copper speiss production multiplied by the fractional lead content shall be determined in units of megagrams.

(iv) Total lead production shall be determined by summing the values obtained in paragraphs (a)(2)(i) through (iii) of this section.

(v) The lead production rate, in units of megagrams per hour, shall be calculated based on the total lead production obtained in paragraph (a)(2)(iv) of this section divided by 8760 hours.

(3) The sum of lead compound emission rates for the sources in § 63.1543(a)(1) through (9) obtained in paragraph (a)(1) of this section shall be divided by the lead production rate obtained in paragraph (a)(2)(v) of this section to obtain a production based lead compound emission rate in units of grams of lead per megagram of lead metal produced. The production based lead compound emission rate shall be used to determine compliance with the emissions standard for lead compounds under § 63.1543(a).

(b) Owners and operators shall determine compliance with the doorway in-draft requirement for buildings in § 63.1543(b) and § 63.1544(c) using the procedures in paragraphs (b)(1) or (b)(2) of this section.

(1)(i) Owners and operators shall use a propeller anemometer or equivalent device.

(ii) Doorway in-draft shall be determined by placing the anemometer in the plane of the doorway opening near its center.

(iii) Doorway in-draft shall be demonstrated for each doorway that is open during normal operation with all remaining doorways in their customary position during normal operation.

(2)(i) Owners and operators shall install a differential pressure gage on the leeward wall of the building to measure the pressure difference between the inside and outside of the building.

(ii) The pressure gage shall be certified by the manufacturer to be capable of measuring pressure differential in the range of 0.02 to 0.2 mm Hg.

(iii) Both the inside and outside taps shall be shielded to reduce the effects of wind.

(iv) Owners and operators shall demonstrate the inside of the building is maintained at a negative pressure as compared to the outside of the building of no less than 0.02 mm Hg when all doors are in the position they are in during normal operation.

#### § 63.1547 Monitoring requirements.

(a) Owners and operators of primary lead smelters shall prepare, and at all times operate according to, a standard operating procedures manual that describes in detail procedures for inspection, maintenance, and bag leak detection and corrective action for all baghouses that are used to control process, process fugitive, or fugitive dust emissions from any source subject to the lead emission standards in §§ 63.1543 and 63.1544 including those used to control emissions from building ventilation.

(b) The standard operating procedures manual for baghouses required by paragraph (a) of this section shall be submitted to the Administrator or delegated authority for review and approval.

(c) The procedures specified in the standard operating procedures manual for inspections and routine maintenance shall, at a minimum, include the requirements of paragraphs (c)(1) through (c)(9) of this section.

(1) Daily monitoring of pressure drop across each baghouse cell.

(2) Weekly confirmation that dust is being removed from hoppers through visual inspection, or equivalent means of ensuring the proper functioning of removal mechanisms.

(3) Daily check of compressed air supply for pulse-jet baghouses.

(4) An appropriate methodology for monitoring cleaning cycles to ensure proper operation.

(5) Monthly check of bag cleaning mechanisms for proper functioning through visual inspection or equivalent means.

(6) Quarterly check of bag tension on reverse air and shaker-type baghouses. Such checks are not required for shaker-type baghouses using self-tensioning (spring loaded) devices.

(7) Quarterly confirmation of the physical integrity of the baghouse through visual inspection of the baghouse interior for air leaks.

(8) Quarterly inspection of fans for wear, material buildup, and corrosion through visual inspection, vibration detectors, or equivalent means.

(9) Except as provided in paragraphs (g) and (h) of this section, continuous operation of a bag leak detection system.

(d) The procedures specified in the standard operating procedures manual for maintenance shall, at a minimum, include a preventative maintenance schedule that is consistent with the baghouse manufacturer's instructions for routine and long-term maintenance.

(e) The bag leak detection system required by paragraph (c)(9) of this section, shall meet the specifications

and requirements of paragraphs (e)(1) through (e)(8) of this section.

(1) The bag leak detection system must be certified by the manufacturer to be capable of detecting particulate matter emissions at concentrations of 10 milligram per actual cubic meter (0.0044 grains per actual cubic foot) or less.

(2) The bag leak detection system sensor must provide output of relative particulate matter loadings.

(3) The bag leak detection system must be equipped with an alarm system that will alarm when an increase in relative particulate loadings is detected over a preset level.

(4) The bag leak detection system shall be installed and operated in a manner consistent with available written guidance from the U.S. Environmental Protection Agency or, in the absence of such written guidance, the manufacturer's written specifications and recommendations for installation, operation, and adjustment of the system.

(5) The initial adjustment of the system shall, at a minimum, consist of establishing the baseline output by adjusting the sensitivity (range) and the averaging period of the device, and establishing the alarm set points and the alarm delay time.

(6) Following initial adjustment, the owner or operator shall not adjust the sensitivity or range, averaging period, alarm set points, or alarm delay time, except as detailed in the approved SOP required under paragraph (a) of this section. In no event shall the sensitivity be increased by more than 100 percent or decreased more than 50 percent over a 365 day period unless such adjustment follows a complete baghouse inspection which demonstrates the baghouse is in good operating condition.

(7) For negative pressure, induced air baghouses, and positive pressure baghouses that are discharged to the atmosphere through a stack, the bag leak detector must be installed downstream of the baghouse and upstream of any wet acid gas scrubber.

(8) Where multiple detectors are required, the system's instrumentation and alarm may be shared among detectors.

(f) The standard operating procedures manual required by paragraph (a) of this section shall include a corrective action plan that specifies the procedures to be followed in the event of a bag leak detection system alarm. The corrective action plan shall include, at a minimum, the procedures used to determine and record the time and cause of the alarm as well as the corrective actions taken to correct the control device malfunction or minimize

emissions as specified in paragraphs (f)(1) and (f)(2) of this section.

(1) The procedures used to determine the cause of the alarm must be initiated within 30 minutes of the alarm.

(2) The cause of the alarm must be alleviated by taking the necessary corrective action(s) which may include, but not be limited to, paragraphs (f)(2)(i) through (f)(2)(vi) of this section.

(i) Inspecting the baghouse for air leaks, torn or broken filter elements, or any other malfunction that may cause an increase in emissions.

(ii) Sealing off defective bags or filter media.

(iii) Replacing defective bags or filter media, or otherwise repairing the control device.

(iv) Sealing off a defective baghouse compartment.

(v) Cleaning the bag leak detection system probe, or otherwise repairing the bag leak detection system.

(vi) Shutting down the process producing the particulate emissions.

(g) Baghouses equipped with HEPA filters as a secondary filter used to control process or process fugitive sources subject to the lead emission standards in § 63.1543 are exempt from the requirement in paragraph (c)(9) of this section to be equipped with a bag leak detector. The owner or operator of an affected source that uses a HEPA filter shall monitor and record the pressure drop across the HEPA filter system daily. If the pressure drop is outside the limit(s) specified by the filter manufacturer, the owner or operator must take appropriate corrective measures, which may include, but not be limited to, those set forth in paragraphs (g)(1) through (g)(4) of this section.

(1) Inspecting the filter and filter housing for air leaks and torn or broken filters.

(2) Replacing defective filter media, or otherwise repairing the control device.

(3) Sealing off a defective control device by routing air to other control devices.

(4) Shutting down the process producing the particulate emissions.

(h) Baghouses that are used exclusively for the control of fugitive dust emissions from any source subject to the lead emissions standard in § 63.1544 are exempt from the requirement in paragraph (c)(9) of this section to be equipped with a bag leak detector.

#### § 63.1548 Notification requirements.

(a) *Initial notifications.* As required by § 63.9(b) of subpart A, the owner or operator shall submit the following written notifications to the Administrator:

(1) The owner or operator of an area source that subsequently becomes subject to the requirements of the standard shall provide notification to the applicable permitting authority as required by § 63.9(b)(1) of subpart A.

(2) As required by § 63.9(b)(2) of subpart A, the owner or operator of an affected source that has an initial startup before [the effective date of the final rule] shall notify the Administrator that the source is subject to the requirements of the standard. The notification shall be submitted not later than 120 calendar days after [the effective date of the final rule] (or within 120 calendar days after the source becomes subject to this standard) and shall contain the information specified in § 63.9(b)(2)(i) through (b)(2)(v) of subpart A.

(3) As required by § 63.9(b)(3) of subpart A, the owner or operator of a new or reconstructed affected source, or a source that has been reconstructed such that it is an affected source, that has an initial startup after [the effective date of the final rule] and for which an application for approval of construction or reconstruction is not required under § 63.5(d) of subpart A, shall notify the Administrator in writing that the source is subject to the standards no later than 120 days after initial startup. The notification shall contain the information specified in § 63.9(b)(2)(i) through (b)(2)(v) of subpart A, delivered or postmarked with the notification required in § 63.9(b)(5) of subpart A.

(4) As required by § 63.9(b)(4) of subpart A, the owner or operator of a new or reconstructed major affected source that has an initial startup after [the effective date of the final rule] and for which an application for approval of construction or reconstruction is required under § 63.5(d) of subpart A shall provide the information specified in § 63.9(b)(4)(i) through (b)(4)(v) of subpart A.

(5) As required by § 63.9(b)(5) of subpart A, the owner or operator who, after [the effective date of the final rule], intends to construct a new affected source or reconstruct an affected source subject to this standard, or reconstruct a source such that it becomes an affected source subject to this standard, shall notify the Administrator, in writing, of the intended construction or reconstruction.

(b) *Request for extension of compliance.* As provided by § 63.9(c) of subpart A, if the owner or operator of an affected source cannot comply with this standard by the applicable compliance date for that source, or if the owner or operator has installed BACT or technology to meet LAER consistent

with § 63.6(i)(5) of subpart A, they may submit to the Administrator (or the State with an approved permit program) a request for an extension of the applicable compliance date as specified in § 63.6(i)(4) through (i)(6) of subpart A.

(c) *Notification that source is subject to special compliance requirements.* As required by § 63.9(d) of subpart A, an owner or operator of a new source that is subject to special compliance requirements as specified in § 63.6(b)(3) and (b)(4) of subpart A shall notify the Administrator of his/her compliance obligations not later than the notification dates established in § 63.9(b) of subpart A for new sources that are not subject to the special provisions.

(d) *Notification of performance test.* As required by § 63.9(e) of subpart A, the owner or operator of an affected source shall notify the Administrator in writing of his or her intention to conduct a performance test at least 60 calendar days before the performance test is scheduled to begin to allow the Administrator to review and approve the site-specific test plan required under § 63.7(c) of subpart A, if requested by the Administrator, and to have an observer present during the test.

(e) *Notification of compliance status.* The owner or operator of an affected source shall submit a notification of compliance status as required by § 63.9(h) of subpart A when the source becomes subject to this subpart.

(f) *Additional notification requirements.* The owner or operator of a primary lead smelter shall submit the fugitive dust control standard operating procedures manual required under § 63.1544(a) and the standard operating procedures manual for baghouses required under § 63.1547(a) to the Administrator or delegated authority along with a notification that the smelter is seeking review and approval of these plans and procedures. Owners or operators of existing primary lead smelters shall submit this notification no later than *[Insert date 18 months after publication of final rule]*. The owner or operator of a primary lead smelter that commences construction or reconstruction after April 17, 1998, shall submit this notification no later than 180 days before startup of the constructed or reconstructed primary lead smelter, but no sooner than *[Insert date 90 days after publication of final rule]*.

**§ 63.1549 Recordkeeping and reporting requirements.**

(a) *General recordkeeping requirements.* As required by

§ 63.10(b)(2) of subpart A, the owner or operator shall maintain the following records for five years from the date of each record:

(1) The occurrence and duration of each startup, shutdown, or malfunction of process equipment;

(2) The occurrence and duration of each malfunction of the source or air pollution control equipment;

(3) All maintenance performed on the air pollution control equipment;

(4) Actions taken during periods of startup, shutdown, and malfunction (including corrective actions to restore malfunctioning process and air pollution control equipment to its normal or usual manner of operation) when such actions are different from the procedures specified in the startup, shutdown, and malfunction plan;

(5) All information necessary to demonstrate conformance with the startup, shutdown, and malfunction plan when all actions taken during periods of startup, shutdown, and malfunction (including corrective actions) are consistent with the procedures specified in such plan. This information can be recorded in a checklist or similar form [see § 63.10(b)(2)(v) of subpart A.];

(6) All required measurements needed to demonstrate compliance with the standard and to support data that the source is required to report, including, but not limited to, performance test measurements (including initial and any subsequent performance tests) and measurements as may be necessary to determine the conditions of the initial test or subsequent tests;

(7) All results of initial or subsequent performance tests;

(8) If the owner or operator has been granted a waiver from recordkeeping or reporting requirements under § 63.10(f) of subpart A, any information demonstrating whether a source is meeting the requirements for a waiver of recordkeeping or reporting requirements;

(9) If the owner or operator has been granted a waiver from the initial performance test under § 63.7(h) of subpart A, a copy of the full request and the Administrator's approval or disapproval;

(10) All documentation supporting initial notifications and notifications of compliance status required by § 63.9 of subpart A; and

(11) Records of any applicability determination, including supporting analyses.

(b) *Subpart TTT records.* In addition to the general records required by paragraph (a) of this section, each owner or operator of a primary lead smelter

shall maintain for a period of 5 years, records of the information listed in paragraphs (b)(1) through (b)(4) of this section.

(1) Production records of the weight and lead content of lead products, copper matte, and copper speiss.

(2) An identification of the date and time of all bag leak detection system alarms, their cause, and an explanation of the corrective actions taken.

(3) Any recordkeeping required as part of the practices described in the standard operating procedures manual required under § 63.1544(a) for the control of fugitive dust emissions.

(4) Any recordkeeping required as part of the practices described in the standard operating procedures manual for baghouses required under § 63.1547(a).

(c) General records and subpart TTT records for the most recent two years of operation must be maintained on site. Records for the previous three years may be maintained off site.

(d) *General reporting requirements.* As required by subpart A, the owner or operator shall submit the following reports to the Administrator or delegated authority:

(1) As required by § 63.10(d)(2) of this part, the owner or operator of an affected source shall report the results of the initial and any subsequent performance tests.

(2) The owner or operator of an affected source who is required to submit progress reports under § 63.6(i) of subpart A shall submit such reports to the Administrator (or the State with an approved permit program) by the dates specified in the written extension of compliance.

(3) Section 63.6(e) of subpart A requires the owner or operator of an affected source to operate and maintain each affected emission source and associated air pollution control equipment in a manner consistent with good air pollution control practices for minimizing emissions (at least to the level required by the standard) at all times, including during any period of startup, shutdown, or malfunction. Malfunctions must be corrected as soon as practicable after their occurrence in accordance with the startup, shutdown, and malfunction plan.

(i) As required by § 63.6(e)(3) of subpart A, the owner or operator shall develop and implement a written startup, shutdown, and malfunction plan that provides a detailed description of the procedures for operating the emission source or control system during a period of startup, shutdown, or malfunction and a program of corrective action for malfunctioning process and

air pollution control equipment. The plan shall be submitted to the Administrator for review and approval no later than the compliance date given in § 63.1545 of this subpart.

(ii) As required by § 63.10(d)(5)(i) of subpart A, if actions taken by an owner or operator during a startup, shutdown, or malfunction of an affected source (including actions taken to correct a malfunction) are consistent with the procedures specified in the startup, shutdown, and malfunction plan, the owner or operator shall state such information in a semiannual report. The report, to be certified by the owner or operator or other responsible official, shall be submitted semiannually and delivered or postmarked by the 30th day following the end of each calendar half; and

(iii) Any time an action taken by an owner or operator during a startup, shutdown, or malfunction (including actions taken to correct a malfunction) is not consistent with the procedures in the startup, shutdown, and malfunction plan, the owner or operator shall comply with all requirements of § 63.10(d)(5)(ii) of subpart A.

(e) *Subpart TTT Reports.* In addition to the information required under § 63.10 of the General Provisions, the owner or operator shall provide semiannual reports containing the information specified in paragraphs (e)(1) through (e)(4) of this section to the Administrator or designated authority.

(1) The reports shall include records of all alarms from the bag leak detection system specified in § 63.1547(e).

(2) The reports shall include a description of the procedures taken following each bag leak detection system alarm pursuant to § 63.1547(f)(1) and (2).

(3) The reports shall contain a summary of the records maintained as part of the practices described in the standard operating procedures manual for baghouses required under § 63.1547(a), including an explanation of the periods when the procedures were not followed and the corrective actions taken.

(4) The reports shall contain a summary of the fugitive dust control measures performed during the required reporting period, including an explanation of any periods when the procedures outlined in the standard operating procedures manual required by § 63.1544(a) were not followed and the corrective actions taken. The reports shall not contain copies of the daily records required to demonstrate compliance with the requirements of the standard operating procedures manuals

required under §§ 63.1544(a) and 63.1547(a).

#### § 63.1550 Delegation of Authority.

(a) In delegating implementation and enforcement authority to a state under section 112(d) of the Act, the authorities contained in paragraph (b) of this section shall be retained by the administrator and not transferred to a state.

(b) Authorities which will not be delegated to States: no restrictions.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 68

[FRL-5997-2]

RIN 2050-AE46

#### Accidental Release Prevention Requirements: Risk Management Programs Under Clean Air Act Section 112(r)(7); Amendments

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

**SUMMARY:** On June 20, 1996, EPA published risk management program regulations, mandated under the accidental release prevention provisions of the Clean Air Act (CAA). These regulations require owners and operators of stationary sources subject to the regulations to submit risk management plans (RMPs) by June 21, 1999, to a central location specified by EPA. EPA is proposing amendments to these rules to reflect the government's adoption of a new industrial classification system, to add some data elements to the RMP, to establish explicit procedures for protecting confidential information, and to clarify certain items. These changes will bring the rule up to date with the new industrial classification system, provide information in the RMP that will make the data more useful, and clarify procedures and requirements. The proposed amendments in this rule address the submission of RMP information to EPA; the amendments do not address the means by which the public could access RMP information.

**DATES:** Comments are due on June 1, 1998. Anyone requesting a public hearing must contact EPA no later than May 4, 1998. If a hearing is held, EPA will publish the date, time and location in the Federal Register.

**ADDRESSES:** Comments should be mailed to the U.S. Environmental Protection Agency, Attn: Docket A-98-08, Room 1500, 401 M St. SW, Washington, DC 20460. E-mail comments should be sent to: A-AND-R-DOCKFT@epamail.epa.gov; if comments are filed as an attachment to an e-mail, the attachment must be in WordPerfect 6.1 or an ASCII file. Paper comments should be submitted in triplicate; comments may be submitted on disk in WordPerfect 6.1 or an ASCII file.

Persons interested in presenting oral testimony or inquiring as to whether a hearing is to be held should notify the person listed in **FOR FURTHER INFORMATION CONTACT** section.

**FOR FURTHER INFORMATION CONTACT:** Sicy Jacob, Chemical Engineer, Chemical Emergency Preparedness and Prevention Office, Environmental Protection Agency (5101), 401 M Street SW, Washington, DC 20460, (202) 260-7249, or the Emergency Planning and Community Right-to-Know Hotline at 1-800-424-9346 (in the Washington, DC metropolitan area, (703) 412-9810).

#### SUPPLEMENTARY INFORMATION:

##### Regulated Entities

Entities potentially regulated by this action are those stationary sources that have more than a threshold quantity of a regulated substance in a process. Regulated categories and entities include:

Category	Examples of regulated entities
Chemical Manufacturers.	Basic chemical manufacturing, petrochemicals, resins, agricultural chemicals, pharmaceuticals, paints, cleaning compounds.
Petroleum .....	Refineries.
Other Manufacturing.	Paper, electronics, semiconductors, fabricated metals, industrial machinery, food processing.
Agriculture .....	Agricultural retailers.
Public Sources .....	Drinking water and wastewater treatment systems.
Utilities .....	Electric and gas utilities.
Other .....	Propane retailers and users, cold storage, warehousing and wholesalers.
Federal Sources ....	Military and energy installations.

This table is not meant to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. The table lists the types of entities that EPA is aware

of that could potentially be regulated by this action. Other types of entities not listed on the table could also be regulated. To determine whether a stationary source is regulated by this action, carefully examine the provisions associated with the list of substances and thresholds under § 68.130 and the applicability criteria under § 68.10. If you have questions regarding applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

The following table of contents is provided to aid in reading this preamble:

#### I. Introduction and Background

##### A. Statutory Authority

These amendments are being proposed under sections 112(r) and 301(a)(1) of the CAA (42 U.S.C. 7412(r), 7601(a)(1)).

##### B. Background

The 1990 CAA Amendments revised section 112 by adding a paragraph (r), to prevent accidental releases to the air and mitigate any accidents that occur. Section 112(r) mandates that EPA promulgate a list of regulated substances, with threshold quantities. This list defines the processes at stationary sources that are subject to accidental release prevention regulations that EPA is mandated to promulgate under section 112(r)(7). EPA promulgated the list of substances on January 31, 1994 (59 FR 4478) (the "List Rule") and the accident release prevention regulations, the risk management program rule, on June 20, 1996 (61 FR 31668) (the "RMP rule"). Together, these two rules are codified as

part 68 of title 40 of the CFR. On January 6, 1998 (63 FR 640), EPA amended the listing requirements to adopt provisions related to certain flammables that had previously been stayed.

The list of regulated substances covers 77 acutely toxic substances and 62 flammable gases and highly volatile flammable liquids. The accidental release prevention regulations require stationary sources with one or more processes with more than a threshold quantity of a regulated substance to develop and implement a risk management program that includes an offsite consequence analysis, a five-year accident history for covered processes, a prevention program, and an emergency response program. Sources must summarize this program and submit a risk management plan (RMP) to a central location specified by EPA prior to June 21, 1999. The risk management program rule includes a tiered approach to requirements. Processes that pose low risk of offsite consequences from a worst-case release are subject to minimal requirements (Program 1). Processes in industry sectors that have significant accident histories are required to implement the process safety management (PSM) standard, which EPA adopted, with minor changes, from the Occupational Safety and Health Administration's (OSHA) PSM standard (29 CFR 1910.119) (Program 3). To eliminate inconsistent requirements, EPA also requires processes already subject to the OSHA PSM standard to implement Program 3. All other processes are subject to a streamlined prevention program (Program 2). (Program eligibility requirements are provided at 40 CFR 68.10.)

When EPA promulgated the risk management program rule, the Agency stated that it intended to work toward electronic submission of RMPs. The final rule provided that RMPs shall be submitted in a method and format to a central location as specified by EPA prior to the submission date. To provide advice to the Agency on deciding issues related to electronic submission, the Accident Prevention Subcommittee of the CAA Advisory Committee created the Electronic Submission Workgroup in October 1996 to examine the technical and practical issues associated with creating a national electronic repository of risk management plans. The Workgroup was charged with recommending how the regulated community should submit their risk management plans, and how EPA, State and local governments, and the public should have access to this information.

The Workgroup included 35 representatives from State and local government, industry, environmental and public interest groups, and EPA. The Workgroup, with the approval of the Accident Prevention Subcommittee, concluded its work in June of 1997 with a Final Report. The Final Report, all meeting summaries and meeting materials can be obtained from the EPA homepage ([www.epa.gov/ceppo/acc-pre.html](http://www.epa.gov/ceppo/acc-pre.html)) under "Accident Prevention Subcommittee" and the "Electronic Submission Workgroup."

Based on the Workgroup's recommendations, EPA is in the process of developing two systems, a user-friendly PC-based submission system (RMP\*Submit™) and a searchable database of RMPs, available on the Internet (RMP\*Submit™). RMPs must be submitted electronically (on diskette), with a provision for an "electronic waiver" for sources that lack the resources to file electronically.

#### II. Discussion of Proposed Rule

The purpose of today's proposed amendments is to revise part 68 to:

- Reflect the new industrial classification system that the U.S. government has adopted;
- Respond to recommendations on RMP data elements provided by the Electronic Submission Workgroup and clarify other elements;
- Provide explicit requirements for the submission of confidential business information; and
- Make technical corrections and clarifications to the rule.

This proposed rulemaking addresses only these subjects. The Agency is not, by this proposal, reconsidering any aspects of part 68, except as explicitly noted below. The proposed amendments in this rule address the submission of RMP information to EPA; the amendments do not address the means by which the public could access RMP information. EPA discourages any comments not addressed to these specific amendments.

##### A. NAICS Codes

On January 1, 1997, the U.S. Government, in cooperation with the governments of Canada and Mexico, adopted a new industrial classification system, the North American Industrial Classification System (NAICS) to replace the Standard Industrial Classification (SIC) codes. Because the applicability of Program 3 is driven, in part, by SIC codes and because part 68 requires the reporting of SIC codes in the RMP, EPA proposes to revise the rule to reflect the new NAICS codes.

Section 68.10(d)(1) provides that processes in the following four-digit SIC codes are subject to Program 3 requirements (unless they are eligible for Program 1): 2611 (pulp mills), 2812 (calor-alkali manufacturing), 2819 (industrial inorganics, not elsewhere classified (nec)), 2821 (plastics and resins), 2865 (cyclic crudes and intermediates), 2869 (industrial organic chemicals, nec), 2873 (nitrogen fertilizers), 2879 (agricultural chemicals, nec), and petroleum refineries (2911). As explained in the March 13, 1995, supplemental notice (60 FR 13526) and June 20, 1996 (61 FR 31668), final rule, these SIC codes were selected because these industrial sectors have significant accident histories, based on data in EPA's Accidental Release Information Program (ARIP) database and on data on accidental releases involving flammables. In each case, a substantial percentage of the sector (usually more than 20 percent) had reported releases of regulated substances and many of those releases had impacts (deaths, injuries, hospitalizations, evacuations, and shelterings). In selecting NAICS codes, EPA has used the same criteria to the extent possible; in some cases, the accident data for sectors are not detailed enough to make it possible to allocate the accidents among the new codes.

Five of the listed SIC codes have been assigned NAICS codes that include all of the sources covered by the SIC codes and no others. EPA is proposing to adopt these five NAICS codes in place of the SIC codes. (NAICS codes are either five or six digits, depending on the degree to which the sector is subdivided.)

SIC	NAICS	Sector
2812	325181	Alkalies and chlorine
2821	325211	Plastics and resins
2873	325311	Nitrogen fertilizer
2879	32532	Pesticide and other agricultural chemicals
2911	32411	Petroleum refineries

The remaining four SIC codes listed in § 68.10 (2611, 2819, 2865, and 2869) have been subdivided as follows.

*SIC Code 2611* (pulp mills) has been split into three NAICS codes:

- 32211 Pulp mills only
- 32212 Pulp mills producing paper (includes part of old 2621)
- 32213 Pulp mills producing paperboard (includes part of old 2631)

EPA has examined the accident history of these groups. Neither paper mills (NAICS code 32212) nor paperboard mills (NAICS code 32213) meet the accident history criteria EPA used to select industry sectors. EPA,

therefore, is proposing to list only NAICS code 32211.

*SIC Code 2819* (industrial inorganics, nec) has been divided into four NAICS codes:

- 325998 Activated carbon and charcoal, which has moved to miscellaneous chemical products (old 2899)
- 331311 Alumina, moved to alumina refining in primary metals manufacturing
- 325131 Inorganic dyes, moved to inorganic dyes and pigments (old 2816)
- 325188 Other, in "all other inorganic chemical manufacturing"

Activated carbon and charcoal (NAICS code 325998) have been placed in a sector with a very limited accident history. In addition, there are no releases in the ARIP database that appear to be related to the manufacture of these substances. Alumina refining (NAICS code 331311) is a new NAICS code. Research indicates that alumina is produced at approximately 19 locations; three of these companies reported releases, but none were impact releases. There were no reported releases for dyes (NAICS code 325131). Consequently, EPA is proposing to list only NAICS code 325188, all other inorganic chemical manufacturing, as it includes almost all of the releases that led to the original listing of SIC code 2819.

*SIC Code 2865* (cyclic crudes and intermediates) has been split into three NAICS codes:

- 32511 Aromatics have been combined with aliphatics from SIC code 2869 to form a new petrochemical manufacturing code
- 325132 Organic dyes and pigments is a new code
- 325192 Other covers the cyclic crude and intermediate manufacturing

Organic pigments are manufactured at about 30 locations. These sources reported three releases, one of which was an impact release. There were no reported releases from dye manufacturers. NAICS code 325132, therefore, does not meet the eligibility criteria. Although it is difficult to determine with any certainty into which of the other two NAICS codes the sources reporting releases in old SIC code 2865 will fall, both of these sectors have a significant accident history, as demonstrated both by the ARIP data and by accidents involving flammables, which are generally not reported in ARIP. EPA, therefore, is proposing to list both NAICS codes 32511 (petrochemicals) and 325192 (other cyclic crude and intermediate manufacturing).

*SIC Code 2869* (industrial organic chemicals) has been divided into five NAICS codes:

- 32511 Aliphatics, joined with aromatics in petrochemical manufacturing
- 325188 Carbon bisulfide, moved to all other inorganic chemical manufacturing
- 325193 Ethyl alcohol, a new separate code
- 32512 Fluorocarbon gases, moved to industrial gases with what used to be SIC code 2813
- 325199 Other, moved to all other basic organic chemical manufacturing with fatty acids from old SIC code 2899

As explained above, EPA is proposing to list NAICS codes 32511 and 325188, which draw sectors from SIC code 2869. Ethyl alcohol is produced at approximately 27 locations, mostly from grains. Two of these locations reported releases, one of which led to an evacuation. This sector, therefore, does not meet the criteria and is not being proposed for listing. Fluorocarbon gases are produced at about 15 locations; only one release was reported. These gases are being merged into a sector with more than 500 sources that reported 21 releases, 4 with impacts. Neither fluorocarbon gases themselves nor the combined sector meet the criteria and, therefore, EPA is not proposing them for listing. As with SIC code 2865, it is difficult to determine from the existing data whether the remaining sources in SIC code 2869 that reported releases will be classified in petrochemicals or other basic organic chemical manufacturing. Nonetheless, the release history of the remaining sources for flammables and toxics is significant enough that EPA is proposing to list both. EPA recognizes that including NAICS code 325199 will extend coverage to fatty acids, which were previously not included. EPA, however, does not believe that the fatty acid processes involve regulated substances, and, therefore, does not expect them to be subject to the rule.

In summary, EPA is proposing to replace the list of nine SIC codes with the following ten NAICS codes: 32211, 32411, 32511, 325181, 325188, 325192, 325199, 325211, 325311, and 32532. Some processes originally subject to Program 3 because of the SIC codes would no longer be subject to Program 3 on that basis. EPA expects that most of the processes that were part of listed SIC codes, but are not in the proposed list of NAICS codes, will either continue to be subject to Program 3 because they are subject to OSHA PSM (e.g., fluorocarbon gases) or are not subject to the rule at all because they do not

include regulated substances above the thresholds. In its review of the NAICS codes, EPA also considered whether any newly created NAICS codes might meet the accident criteria; no such codes were identified. For the most part, manufacturing sectors have been assigned codes that cover the same industries as were covered by the SIC code. (A full list of the new NAICS codes and further information is available from the U.S. Bureau of the Census, [www.census.gov](http://www.census.gov).)

At every point in part 68 where sources are required to report the SIC code for a process (registration and both prevention programs), the rule would instead be changed to require sources to report the NAICS code for the process.

## B. RMP Data Elements

### 1. New RMP Data Elements

The Electronic Submission Work Group recommended that EPA add three mandatory data elements that it believed are important for the success of RMP\*Info™. In addition, the group recommended that some optional data elements be included in the final RMP format. Consequently, EPA is proposing to add the following mandatory data elements: The method and description for latitude and longitude, the Title V permit number, and the percentage weight of regulated toxic substances in mixtures reported in both the offsite consequence analyses and accident history. EPA also is proposing to add the NAICS code for the process that had the release to the five-year accident history section.

*a. Latitude/Longitude method and description.* As a matter of Agency policy, EPA requires that when latitude and longitude are reported, the method of determining latitude/longitude be stated and a description of what location the numbers represent (e.g., center of the site, fence line) be provided. The RMP\*Submit™ will include check lists that sources will be able to use to indicate the method and location description.

The State/EPA Data Management Program is a successful multi-year initiative linking State environmental regulatory agencies and EPA in cooperative action. The Program's goals include improvements in data quality and data integration based on location identification. Reliable and consistent location identification data are critical to support the Agency-wide development of environmental risk management strategies, methodologies, and assessments. Documentation of the method and description of the location will permit other users to evaluate

whether those coordinates can support secondary uses, thus addressing EPA data sharing and integration objectives.

*b. Title V permit number.* Listing a Title V permit number will make it easier for EPA, states, and local agencies to identify sources that are also subject to Title V. Including this number will impose a minimal burden on sources; those who have Title V permits will have permit numbers readily available.

*c. Percentage weight of a toxic substance in a mixture.* The percentage weight of a regulated toxic substance in a mixture would provide useful information to those trying to understand how worst-case and alternative release scenarios have been modeled. Released in their pure forms, substances will generally travel greater distances before the concentration falls below the toxic endpoint (toxic endpoints are listed in Appendix A to 40 CFR part 68) than they will travel if the substance is released as part of a mixture. Without reporting on whether a substance was modeled as being released as part of a mixture, users of the database may assume that a substance would be released in its pure form. The distances reported for mixture releases would then appear to be understated because they are likely to travel far less than the distances that would be derived for the same substance quantity released in its pure form. This information will make it easier for users of the data to understand what a source has done without needing to seek additional information from the source. On accident history, it is important to know the physical state and concentration of a substance that was released. With such data, it is possible to determine whether certain concentrations pose a substantial hazard to the public and to help validate models.

*d. NAICS code.* Including the NAICS code for the process that had a release in the five-year accident history section will make it possible for EPA and others to identify industry sectors that have specific types of accidents and have a significant accident history. The ability to search its ARIP database by SIC code made it possible for EPA to identify industry sectors with significant accident histories. This information is particularly important for the chemical industry and a few other industry sectors where multiple NAICS codes may be represented at the source.

### 2. Optional RMP Data Elements

In addition to proposed data elements that sources would be required to report, the work group recommended

that EPA include the following data elements, on an optional basis:

*a. Local Emergency Planning Committee (LEPC).* A source would enter its LEPC name (from a pick list tied to the source county and zip code). The LEPC data element would provide a way for LEPCs to quickly search all of the facilities in their jurisdiction. The LEPC data element would also allow EPA to determine which LEPC(s) to notify when it receives an updated RMP.

*b. Source (or Parent Company) E-mail address.* The source may want to provide its E-mail address to make it easier for the public to send an inquiry to the source. Including an E-mail address will aid communication efforts between industry, local government, and interested community members.

*c. Source Homepage address.* The source may want to provide additional graphics and information on its homepage. The database could either list the address as any other data element or set up a hyperlink to the source homepage, depending on the technical issues involved with the latter.

*d. Phone number at the source for public inquiries.* The source may want to provide a phone number for public inquiries. Currently the RMP data elements list the owner/operator and the emergency contact phone numbers, but no other phone numbers. A source could enter the phone number for their public liaison office or the technical contact who filled out the RMP. This data element would provide sources another option for directing public inquiries.

*e. VPP status.* In addition to the four optional data elements recommended by the workgroup, EPA also plans to give sources an opportunity to indicate whether they have achieved Star or Merit status under OSHA's Voluntary Protection Program (VPP). These sources are exempt from audits under § 68.220(b)(2) and (b)(7). Including this information will help implementing agencies as they develop audit plans.

EPA seeks comments on whether these items should be included on the form. EPA emphasizes that these items would be optional; a space would be provided, but sources would not be required to complete the items. EPA recognizes that many smaller sources will not have e-mail addresses or home pages and, therefore, will leave these blank.

### C. Clarification of Prevention Program Reporting

EPA is proposing to revise the language in §§ 68.170 and 68.175 to clarify how prevention program

information must be reported. The definition of process, which EPA adopted verbatim from the OSHA PSM standard, is very broad. EPA believes it is important that its interpretation of process be consistent with OSHA's. That interpretation, particularly when applied to interconnected or co-located production and storage units, is so inclusive that multiple production units and, in some cases, entire sources will be considered to be a single process. OSHA and EPA have always recognized that prevention program implementation is likely to involve dividing these aggregated units into their components. For example, because all units at petroleum refineries are usually interconnected, they will count as a single process for threshold determination, but each production unit will require a separate process hazard analysis (PHA), different operating and maintenance procedures, different process safety information, and different training. OSHA included a PHA implementation schedule in its standard to recognize that large sources, such as refineries and large chemical production sources, needed time to conduct multiple PHAs even if the source is technically a single process under the definition of process.

Throughout its part 68 rulemakings and associated economic analyses, EPA has always considered that RMP reporting would be done based on the units that require separate implementation of prevention program elements, particularly the PHA and hazard review. In the preamble to the final part 68 rule, EPA stated that large chemical companies and refineries could be reporting on 30 or more processes (61 FR 31694). EPA's Economic Impact Analysis (EIA) for the part 68 rules explicitly assumed that the chemical industry, refineries, utilities, POTWs, and even drinking water systems would be implementing the prevention program elements and reporting on multiple production and storage units. In the case of the chemical industry and refineries, the EIA assumed that data on up to 25 to 30 prevention programs would be reported in the RMP.

To ensure that prevention program data are reported on the parts of larger processes that require separate program implementation, EPA is proposing to clarify the basis for prevention program reporting. The rule would be revised to make it explicit that RMP data for both Program 2 and Program 3 prevention programs would be submitted on each part of the process for which a separate hazard review or PHA was conducted. For example, a propane distribution

source that conducted one hazard review on its two storage tanks would submit data on one prevention program. A refinery that conducted 25 PHAs on its 25 production units would submit information on 25 prevention programs. Separate hazard reviews or PHAs means analyses that are conducted by different people or at different times. This change is consistent with EPA's original intention. EPA believes this approach also will be more straightforward for sources. Reporting on processes that aggregate multiple production and storage units would have required collecting all of the data on individual prevention programs and merging them into a single report, increasing the likelihood of errors.

Sources are still required to determine threshold quantity and Program level using the definition of process; that is, if units are considered to be interconnected or co-located, all of the regulated substances in the aggregated units must be included in the threshold determination. EPA is not proposing to change reporting on the registration section of the RMP. Sources may report chemical identities, quantities, NAICS codes, and Program levels by process even if those processes represent multiple prevention programs. Sources may elect to list the separate units in the registration section to parallel their prevention programs, but they are not required to do so.

EPA is also proposing to drop the second sentence in paragraph (a) of both §§ 68.170 and 68.175. This sentence—"If the same information applies to more than one covered process, the owner or operator may provide the information only once, but shall indicate to which processes the information applies"—does not impose a regulatory requirement on sources, but is advisory in nature. At this time, the RMP\*Submit™ system is not being designed to allow sources to enter prevention program data once and indicate to which reported prevention programs the answers apply. Consequently, EPA is proposing to remove this sentence.

The data required for the RMP are specified in §§ 68.155–180. To make a searchable database possible, some of the items will be required to be reported from checklists, which are not in the rule. For example, the rule requires that the source list the major hazards identified during the hazard review or process hazard analysis; the RMP format will provide a list of potential hazards that sources must use when filing. During the process of developing the electronic format, some of these checklists may change to provide more

options for sources and to ensure that the data give the needed information (e.g., on-site deaths and injuries will be reported for employees/contractors, public responders, and others). The current version of the draft format is available at: <http://www.epa.gov/ceppo/rules/dataelem.html> or from the EPCRA hotline.

#### *D. Confidential Business Information (CBI)*

Members of the Electronic Submission Work Group and others have asked how EPA plans to handle information within the RMP that is "confidential business information." Part 68 provides protection for "classified" information, but this applies only to Federal agencies and their contractors. Part 68 does provide, in § 68.210, that information will be available to the public under CAA section 114(c), which limits how the Administrator must handle certain confidential or proprietary information.

In response to these questions and to clarify procedures for submitting RMPs that contain confidential business information (CBI), EPA is proposing to add two sections to the rule to govern CBI claims with regard to RMP data. The rules governing CBI that already exist in 40 CFR part 2 will continue to provide the substantive criteria that must be met to assert such claims. To qualify for CBI protection, the substantive criteria set forth at 40 CFR 2.301 require that the data be commercial or financial, that they not be available to the public through other means, that the source take appropriate steps to prevent disclosure, and that disclosure of the data would be likely to cause substantial harm to the source's competitive position. In new § 68.151, EPA would provide a list of RMP data elements that are not claimable as CBI and specify procedures and timing for submission of claims and substantiation.

In the following paragraphs, EPA discusses those RMP data elements that the Agency proposes are not CBI and are, therefore, not claimable as such. EPA solicits comment on these assessments. EPA also notes that certain of the data elements that would be claimable as CBI under the proposed rule (release rate and release duration, among others) would appear to be "emission data" and, therefore, not be CBI under 40 CFR 2.301, considering the Agency's existing policy regarding "emission data." See 56 FR 7042 (Feb. 21, 1991). EPA specifically requests comment on the appropriateness of applying this policy to the RMP data elements for purposes of the final rule.

EPA is proposing that the following Registration data elements could not be claimed as CBI:

- Source identification information (name, address, telephone numbers, Dun & Bradstreet numbers, emergency contact data);
- Name or title of the person responsible for risk management program implementation;
- The Program level and NAICS codes of the processes registered;
- Number of employees;
- Whether the source is subject to other rules; and
- Date of the last safety inspection.

These data elements are generally available from other filings with Federal, state, or local agencies, and from other sources and, therefore, do not meet the criteria for CBI claims. Source identification data and NAICS codes are filed with EPA, states, and local entities and are publicly available under EPCRA, among other requirements, and are available from many other public sources, including industrial directories. Number of employees is submitted to the Census Bureau and is available for many facilities from industrial directories. Whether a source is subject to other rules and the date of safety inspections can be obtained from public agencies and are unlikely to affect a source's competitive position. The name or title of the person responsible for program implementation will not be available elsewhere, but would not affect a source's competitive position. The program level of the process also is not available elsewhere, but, by itself, reveals no confidential business information. Therefore, none of these elements is eligible for protection.

EPA is proposing that the following offsite consequence analysis data could not be claimed as CBI:

- Basis of the results (model used).
- Topography.
- Distance to an endpoint; and
- Public and environmental receptors (including population potentially affected) within the distance to the endpoint.

EPA believes that certain offsite consequence analysis data may be eligible for CBI protection, specifically, chemical identity and quantity released. Because of the ability to derive chemical identity and quantity released from other data included in the offsite consequence analysis (e.g., release rate and duration), EPA is also proposing that sources may claim CBI for those other data elements. However, EPA is proposing that some offsite consequence analysis items are not CBI. Without the information on the chemical identity,

quantity, release rate, and duration, the model used and topography could not be used to derive the chemical identity or quantity and, therefore, by themselves provide no confidential information. Further, EPA believes distance to an endpoint and public and environmental receptors are of most interest to the public, and, their disclosure reveals no source business data.

EPA is proposing that CBI treatment may not be claimed for any accident history data. The date, time, and duration of the release, the chemicals and quantities released, type of event, source, and impacts will be reported to EPA or other agencies under existing laws before the RMP is submitted; more importantly, databases with this information are publicly available. Moreover, the initiating event and contributing factors are generic enough that reporting them will reveal no confidential business information.

EPA is proposing that all dates reported for prevention program elements could not be claimed as CBI. These dates reveal no confidential business information. They are merely evidence of having complied with EPA rules and would not affect a source's competitive position. Similarly, because all emergency response information must be available to public responders and because it reveals no data that would affect a source's competitive position, EPA proposes that it be excluded from CBI claims.

EPA believes that only a limited number of sources, primarily chemical manufacturers, will have a basis for claiming the remaining RMP data elements as CBI. EPA's justifications for its specific CBI findings appear in an appendix to this preamble. An even more detailed analysis of all RMP data elements and proposed CBI determinations is available in the docket (see the ADDRESSES section).

To assert a CBI claim, a source would be required to submit to EPA its RMP in two versions: (1) a redacted ("sanitized"), electronic version, which would become part of the RMP database, and (2) an unredacted ("unsanitized"), paper copy. The redacted version would identify each data element, except chemical identity, claimed as CBI by entering "CBI" into the data field or leaving the field blank. For chemical identity, the source would be required to provide a generic chemical category or class name in lieu of the actual chemical name. At the time of RMP submission, the source would also be required to submit to EPA its substantiation for each item claimed. Information contained in a

substantiation may be claimed as CBI in accordance with 40 CFR 2.301. If all or part of the substantiation is claimed as CBI, a redacted version of substantiation must also be filed with EPA. This approach of submitting dual substantiations is the same as that used for trade secret claims filed under the Emergency Planning and Community Right to Know Act of 1986 (EPCRA). Review of these CBI claims will be conducted in accordance with 40 CFR part 2 and the present rulemaking.

EPA will make the redacted (sanitized) versions of the RMPs available to the public, States, and local governments by including them in RMP\*Info™. Should States or LEPCs want to obtain the unsanitized version from EPA, they may do so by filing a written request with EPA for the information. EPA will respond to such requests consistent with 40 CFR 2.301(h)(3), which governs disclosures to States and local agencies having duties or responsibilities under the Clean Air Act and its implementing regulations. A State or local government may, under this provision, obtain CBI from EPA under two circumstances: (1) it provides EPA a written opinion from its chief legal officer or counsel stating that the State or local agency has the authority under applicable State or local law to compel the business to disclose the information directly; or (2) the businesses whose information is disclosed are informed and the State or local government has shown to an EPA legal office's satisfaction that its use and disclosure of the information will be governed by State or local law and by "procedures which will provide adequate protection to the interests of affected businesses."

Notwithstanding the foregoing process, State and local governments may always obtain the unsanitized versions of the RMP by enacting regulations to require sources in their jurisdiction to submit the CBI directly to State and local entities. EPA encourages those State and local authorities wishing to receive the unsanitized RMPs to use their own authority to require such information, rather than seeking it under EPA's disclosure regulations.

EPA is also proposing to amend part 68 by adding § 68.152. This section would reference the substantive criteria set forth at 40 CFR 2.301 and require sources to claim, and substantiate, CBI at the time RMP data are submitted. Failure to do so would be considered a waiver of CBI by the source, and the data would be disclosed to the public and made part of the RMP\*Info database. Section 68.152 also would require the source's owner, operator, or

senior official to certify the accuracy of its CBI substantiation claims. Adopting the § 2.301 criteria without change ensures that there will be no conflicting interpretations between existing CBI criteria and the proposed set of rules. Because the existing CBI criteria are used under many environmental statutes, they are familiar to industry.

It should be noted that information properly claimed as CBI in accordance with this regulation may nevertheless be disclosed to the public pursuant to the community right-to-know provisions of other environmental laws. Under EPCRA section 303, local emergency planning committees (LEPCs) must prepare and make publicly available comprehensive emergency response plans for their jurisdictions. These plans must address, among other things, facilities that are subject to the emergency planning and notification requirements of EPCRA sections 302 and 303 ("EPCRA Planning facilities"). Accordingly, section 303(d)(3) permits an LEPC to compel an owner or operator of an EPCRA Planning facility to provide any information (except trade secret information properly withheld pursuant to section 322 of EPCRA) necessary to enable the LEPC to develop and implement the emergency plan. An EPCRA Planning facility which receives from its LEPC a proper section 303(d)(3) request for information contained in its RMP must therefore provide the information promptly, irrespective of a valid CBI claim under this rule. Similarly, a proper CBI claim under this part will bind only the Administrator and will not prevent an LEPC from disclosing certain confidential information collected under EPCRA section 303(d)(3), because information included in an emergency plan must be made public under EPCRA section 324(a) and because State or local laws may require the LEPC to make such information public. Furthermore, once that information is requested by the LEPC and available to the public, that information would no longer be subject to CBI protection under Federal CBI rules.

#### E. Other Changes

When part 68 was promulgated, § 68.79(a), which was adopted from the OSHA PSM standard, was not revised to reflect the different structure of EPA's rule. The OSHA PSM standard is contained in a single section; EPA's Program 3 prevention program is contained in a subpart, with OSHA paragraphs handled as separate sections. Rather than referencing "this section," the paragraph should have referenced the "subpart." The section would be

changed to correct this error and ensure that the compliance audit covers the entire prevention program.

Under § 68.180(b), EPA intended that all covered sources report the name and telephone number of the agency with which they coordinate emergency response activities, even if the source is not required to have an emergency response plan. However, the rule refers only to coordinating the emergency plan. EPA is proposing to revise the rule to include both the plan and response activities.

#### III. Section-by-Section Discussion of the Proposed Rule

In Section 68.3, Definitions, the definition of SIC would be removed and the definition of NAICS added.

*Section 68.10*, Applicability, would be revised to replace the SIC codes with NAICS codes, as discussed above.

*Section 68.42*, Five-Year Accident History, would be revised to require the percentage concentration by weight of regulated toxic substances released in a mixture and NAICS code for the process that had the release.

*Section 68.79*, Compliance Audits, the word "section" in paragraph (a) would be replaced by "subpart."

*Section 68.150*, Submission, would be revised by adding a paragraph to state that procedures for asserting CBI claims and determining the sufficiency of such claims are provided in new §§ 68.151 and 68.152 and in 40 CFR part 2.

*Section 68.151* would be added, as discussed above.

*Section 68.152* would be added, as discussed above.

*Section 68.160*, Registration, would be revised by adding the requirements for the method and description of latitude and longitude, replacing SIC codes with NAICS codes, and adding the requirement to report a Title V permit number, when applicable.

*Section 68.165*, Offsite Consequence Analysis, would be revised by adding the requirement that the percentage weight of a regulated toxic substance in a mixture be reported.

*Section 68.170*, Prevention Program/Program 2 would be revised to clarify the basis for reporting to make it clear that RMP data for prevention programs must be submitted for each part of the process for which a separate hazard review is conducted and to replace SIC codes with NAICS codes.

*Section 68.175*, Prevention Program/Program 3 would be revised to clarify the basis for reporting to make it clear that RMP data for prevention programs must be submitted for each part of the process for which a separate PHA is

conducted and to replace SIC codes with NAICS codes.

*Section 68.180* would be revised to clarify paragraph (b) as discussed above.

*Section 68.210*, Availability of information to the public, would be revised to include references to §§ 68.150 through 68.152 and to replace the reference to CAA section 114© with a reference to 40 CFR part 2.

#### IV. Administrative Requirements

##### A. Docket

The docket is an organized and complete file of all the information considered by the EPA in the development of this proposed rulemaking. The docket is a dynamic file, because it allows members of the public and industries involved to readily identify and locate documents so that they can effectively participate in the rulemaking process. Along with the proposed and promulgated standards and their preambles, the contents of the docket will serve as the record in the case of judicial review. (See section 307(d)(7)(A) of the Act.)

The official record for this rulemaking, as well as the public version, has been established for this rulemaking under Docket No. A-98-08 (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official rulemaking record is located at the address in ADDRESSES at the beginning of this document.

Electronic comments can be sent directly to EPA's Air and Radiation Docket and Information Center at: "A-and-R-Docket@epamail.epa.gov". Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 6.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number A-98-08. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries.

##### B. Public Hearing and Written Comments

A public hearing will be held, if requested, to discuss the proposed amendments in accordance with section 307(d)(5) of the Clean Air Act. If a public hearing is requested and held,

the EPA will ask clarifying questions during the oral presentation but will not respond to the presentations or comments. Written statements and supporting information will be considered with equivalent weight as any oral statement and supporting information subsequently presented at a public hearing, if held. Persons wishing to present oral testimony or to inquire as to whether a hearing is to be held should contact the EPA (see ADDRESSES). To provide an opportunity for all who may wish to speak, oral presentations will be limited to 15 minutes each.

Any member of the public may file a written statement on or before June 1, 1998. Written statements should be addressed to the Air and Radiation Docket and Information Center (see ADDRESSES), and refer to Docket No. A-98-08. A verbatim transcript of the hearing and written statements will be placed in the docket and be available for public inspection and copying, or mailed upon request, at the Air and Radiation Docket and Information Center.

#### C. E.O. 12866

Under Executive Order (E.O.) 12866, EPA must determine whether a regulatory action is "significant" and, therefore, subject to OMB review and the requirements of the E.O. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

- (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal government or communities;
- (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
- (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or
- (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the E.O.

It has been determined that today's proposed rule is not a "significant regulatory action" under the terms of E.O. 12866 and is, therefore, not subject to OMB review.

#### D. E.O. 12875

To reduce the burden of Federal regulations on States and small governments, President Clinton issued Executive Order 12875 on October 26,

1993, entitled "Enhancing the Intergovernmental Partnership." Under Executive Order 12875, EPA may not issue a regulation which is not required by statute unless the Federal Government provides the necessary funds to pay the direct costs incurred by the State and small governments or EPA provides to the Office of Management and Budget a description of the prior consultation and communications the agency has had with representatives of State and small governments and statement supporting the need to issue the regulation. In addition, Executive Order 12875 requires EPA to develop an effective process permitting elected and other representatives of State and small governments "to provide meaningful and timely input in the development of regulatory proposals containing significant unfunded mandates."

The present proposed rule satisfies the requirements of Executive Order 12875 because it is required by statute and because it does not contain a significant unfunded mandate. Section 112(r) of the Clean Air Act requires that facilities submit risk management plans containing certain essential information. This rulemaking, together with the rule it amends, implements that statutory command. In addition, this rule contains no mandate binding upon State or small governments. Nevertheless, EPA has taken independent efforts to involve such entities in this regulatory effort; specifically, much of the rule responds to issues raised by the Electronic Submission Workgroup discussed above, which included State and local government stakeholders.

#### E. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act of 1980, as amended by the Small Business Regulatory Enforcement Fairness Act, Federal agencies must evaluate the impacts of rules on small entities. EPA has examined this proposed rule's potential effects on small entities as required. EPA has determined that this proposed rule will have a negligible effect on small entities because the proposed rule would, if promulgated, only impose real costs on those small businesses that claim CBI when submitting the RMP. EPA estimates that very few small entities (approximately 500) will claim CBI and that these few entities represent a small fraction of the small entities (less than 5 percent) affected by the RMP rule. Finally, EPA estimates that those small businesses filing CBI will experience a cost which is significantly less than one percent of their annual sales. Therefore, I certify that today's proposed rule will not have a significant

economic effect on a substantial number of small entities. For a more detailed analysis of the small entity impacts of this proposed rulemaking, see Document Number II-B-03, available in the docket for this rulemaking (see ADDRESSES section).

#### F. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request (ICR) document has been prepared by EPA (ICR No. 1656.04) and a copy may be obtained from Sandy Farmer, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2137), 401 M St, SW, Washington, DC 20460, by e-mail at farmer.sandy@epamail.epa.gov or by calling (202) 260-2740. A copy may also be downloaded off the Internet at <http://www.epa.gov/icr>.

The submission of the RMP is mandated by section 112(r)(7) of the CAA and demonstrates compliance with part 68. The information collected also will be made available to state and local governments and the public to enhance their preparedness, response, and prevention activities. Information in the RMP may be claimed as confidential business information under 40 CFR part 2 and part 68.

EPA estimates that the new data elements will impose little burden on sources; latitude and longitude method and description will be selected from a list of options. The Title V permit number is available to any source to which it applies. Percentage weight of a toxic substance in a mixture is usually provided by the supplier of the mixture. The NAICS code is simply a change from one code to another; sources will have determined their NAICS codes for the 1997 Census of Manufacturers prior to RMP submission.

The public reporting burden for CBI claims is estimated to be 15 hours for chemical manufacturers with Program 3 processes. EPA estimates that approximately 20 percent of the 4000 chemical manufacturers may file CBI claims (800 sources). The total annual public reporting burden for filing CBI claims is estimated to be about 12,000 hours over three years, or an annual burden of 4,000 hours. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire,

install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

Comments are requested on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques. Send comments on the ICR to the Director, OPPE Regulatory Information Division, 2137, U.S. Environmental Protection Agency, 401 M Street SW, Washington D.C. 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, "Attn: Desk Officer for EPA." Include the ICR number in any correspondence. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after April 17, 1998, a comment to OMB is best assured of having its full effect if OMB receives it by May 18, 1998. The final rule will

respond to any OMB and public comments on the information collection requirements contained in this proposed notice.

**G. Unfunded Mandates**

Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995 (109 Stat. 48), requires that the Agency prepare a statement, including a cost-benefit analysis, before promulgating a rule that includes a Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more in any one year. Where the rule might significantly affect small governments, section 203 requires the Agency to establish a plan for obtaining input from small governments and informing, educating, and advising them on compliance with the requirements of the rule.

Under section 205 of the Unfunded Mandates Act, the Agency must identify and consider a reasonable number of regulatory alternatives before promulgating a rule for which a statement must be prepared. The Agency must select from those alternatives the least costly, most cost-effective, or least burdensome alternative for State, local, and tribal governments and the private sector that achieves the objectives of the rule, unless the Agency explains why this alternative is not selected or unless the selection of this alternative is inconsistent with law.

The EPA has determined that the total nationwide capital cost for these rule amendments is approximately zero and the annual nationwide cost for these

amendments is less than \$1 million. Because this rule is estimated to result in the expenditure by State and local governments, in the aggregate, or by the private sector of less than \$100 million in any one year, the Agency has not prepared a statement or engaged in an alternatives analysis pursuant to sections 202 and 205 of the Unfunded Mandates Act.

Because small governments will not be significantly or uniquely affected by this rule, the Agency is not required to develop a plan with regard to small governments in accordance with section 203 of the Unfunded Mandates Act.

**H. National Technology Transfer and Advancement Act**

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Pub L. 104-113, section 12(d) (15 U.S.C. 272 note), directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, business practices, etc.) that are developed or adopted by voluntary consensus standards bodies. The NTTAA requires EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This proposed regulatory action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the NTTAA. EPA invites public comment on this analysis.

**Appendix to Preamble—Data Elements That May Not Be Claimed As CBI**

Rule element	Comment
68.160(b)(1). Stationary source name, street, city, county, state, zip code, latitude, and longitude; 68.160(b)(2) Stationary source Dun and Bradstreet number; 68.160(b)(3) Name and Dun and Bradstreet number of the corporate parent company; 68.160(b)(4) The name, telephone number, and mailing address of the owner/operator.	This information is filed with EPA and other agencies under other regulations and is made available to the public and, therefore, does not meet the criteria for CBI claims. It is also available in business and other directories.
68.160(b)(5) The name and title of the person or position with overall responsibility for RMP elements and implementation.	This information provides no information that would affect a source's competitive position.
68.160(b)(6) The name, title, telephone number, and 24-hour telephone number of the emergency contact.	This information is filed with state and local agencies under EPCRA and is made available to the public and, therefore, does not meet the criteria for CBI claims.
68.160(b)(7) Program level and NAICS code .....	This information provides no information that would affect a source's competitive position.
68.160(b)(8) The stationary source EPA identifier .....	This information provides no information that would affect a source's competitive position.
68.160(b)(9) The number of full time employees .....	This information is available for many sources from public directories. This information provides no information that would affect a source's competitive position.
68.160(b)(10) Whether the source is subject to 29 CFR 1910.119 .....	This information provides no information that would affect a source's competitive position.

Rule element	Comment
68.160(b)(11) Whether the source is subject to 40 CFR part 355 .....	Sources are required to notify the state and local agencies if they are subject to this rule; this information is available to the public and, therefore, does not meet the criteria for CBI claims.
68.160(b)(12) Whether the source has a CAA Title V operating permit	This information will be known to state and federal air agencies and is available to the public and, therefore, does not meet the criteria for CBI claims.
68.160(b)(13) The date of the last safety inspection and identity of the inspecting agency.	This information provides no information that would affect a source's competitive position.
68.165(b)(3) Basis of the results (give model name if used) .....	Without the chemical name and quantity, this reveals no business information.
68.165(b)(9) Topography (toxics only) .....	Without the chemical name and quantity, this reveals no business information.
68.165(b)(10) Distance to an endpoint .....	By itself, this information provides no confidential information. Other elements that would reveal chemical identity or quantity may be claimed as CBI.
68.165(b)(11) Public and environmental receptors within the distance ...	By itself, this information provides no confidential information. Other elements that would reveal chemical identity or quantity may be claimed as CBI.
68.168 Five-year accident history .....	Sources are required to report most of these releases and information (chemical released, quantity, impacts) to the federal, state, and local agencies under CERCLA and EPCRA; these data are available to the public and, therefore, do not meet the criteria for CBI claims. Much of this information is also available from the public media.
68.170(b), (d), (e)(1), and (f)-(k); 68.175(b), (d), (e)(1), and (f)-(p); NAICS code, prevention program compliance dates and information.	NAICS codes and the prevention program compliance dates and information provide no information that would affect a source's competitive position.
68.180 Emergency response program .....	This information provides no information that would affect a source's competitive position.

#### List of Subjects in 40 CFR Part 68

Environmental protection, Administrative practice and procedure, Air pollution control, Chemicals, Hazardous substances, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: April 9, 1998.

Carol M. Browner,  
Administrator.

For the reasons set out in the Preamble, Title 40, Chapter I, Subchapter C, Part 68 of the Code of Federal Regulations is proposed to be amended to read as follows:

#### PART 68—CHEMICAL ACCIDENT PREVENTION PROVISIONS

1. The authority citation for part 68 continues to read as follows:

**Authority:** 42 U.S.C. 7412(r), 7601(a)(1), 7661-7661f.

2. Section 68.3 is proposed to be amended by removing the definition of SIC and by adding in alphabetical order the definition for NAICS to read as follows:

#### § 68.3 Definitions.

NAICS means North American Industrial Classification System.

3. Section 68.10 is proposed to be amended by revising paragraph (d)(1) to read as follows:

#### § 68.10 Applicability.

\* \* \* \* \*

(d) \* \* \*

(1) The process is in NAICS code 32211, 32411, 32511, 325181, 325188, 325192, 325199, 325211, 325311, or 32532; or

\* \* \* \* \*

4. Section 68.42 is proposed to be amended by revising paragraph (b)(3), redesignating paragraphs (b)(4) through (b)(10) as paragraphs (b)(5) through (b)(11) and by adding a new paragraph (b)(4) to read as follows:

#### § 68.42 Five-year accident history.

\* \* \* \* \*

(b) \* \* \*

(3) Estimated quantity released in pounds and, for mixtures of regulated toxic substances, percentage concentration by weight of the released regulated substance in the mixture;

(4) NAICS code for the process;

\* \* \* \* \*

5. Section 68.79 is proposed to be amended by revising paragraph (a) to read as follows:

#### § 68.79 Compliance audits.

(a) The owner or operator shall certify that they have evaluated compliance with the provisions of this subpart at least every three years to verify that procedures and practices developed under this subpart are adequate and are being followed.

\* \* \* \* \*

6. Section 68.150 is proposed to be amended by adding paragraph (e) to read as follows:

#### § 68.150 Submission.

\* \* \* \* \*

(e) Procedures for asserting and determining that some of the information submitted in the RMP is entitled to protection as confidential business information are set forth in §§ 68.151 and 68.152 and in 40 CFR part 2.

7. Section 68.151 is proposed to be added to read as follows:

#### § 68.151 Assertion of claims of confidential business information.

(a) Except as provided in paragraph (b) of this section, a claim of confidential business information may be made for any data elements that meet the criteria provided in 40 CFR 2.301.

(b) Notwithstanding the procedures specified in 40 CFR part 2, the following data elements shall not be claimed as confidential business information for the purposes of complying with this part:

(1) Registration data set forth in § 68.160(b)(1) through (b)(6) and (b)(8) through (b)(13) and NAICS code and Program level of the process set forth in § 68.160(b)(7);

(2) Offsite consequence analysis set forth in § 68.165(b)(3), (b)(9), (b)(10) and (b)(11);

(3) Accident history data set forth in § 68.168;

(4) Prevention program data set forth in § 68.170(b), (d), (e)(1), (f) through (k);

(5) Prevention program data set forth in § 68.175(b), (d), (e)(1), (f) through (p);

(6) Emergency response program data set forth in § 68.180.

(c) Notwithstanding the procedures specified in 40 CFR part 2, to assert a claim that one or more data elements are entitled to protection as confidential business information, the owner or operator shall submit to EPA the following:

(1) An unsanitized (unredacted) paper copy of the RMP that clearly identifies each data element that is being claimed as confidential business information;

(2) A sanitized (redacted) copy of the RMP that shall be identical to the unsanitized copy of the RMP except that the submitter shall replace each data element, except chemical identity, claimed as confidential business information with the notation "CBI" or a blank field. For chemical identities claimed as CBI, the submitter shall substitute a generic category or class name; and

(3) At the time of submission of the RMP, a sanitized and unsanitized document substantiating each claim of confidential business information.

8. Section 68.152 is proposed to be added to read as follows:

**§ 68.152 Substantiating claims of confidential business information.**

(a) Claims of confidential business information must be substantiated by providing documentation that demonstrates that the information meets the substantive criteria set forth in 40 CFR 2.301.

(b) The submitter may claim as confidential information submitted as part of the substantiation. To claim materials as confidential, the submitter shall clearly designate those portions of the substantiation to be claimed as confidential by marking them as confidential business information. Information not so marked will be treated as public and may be disclosed without notice to the submitter.

(c) The owner, operator, or senior official with management responsibility shall sign a certification that the signer has personally examined the information submitted and that based on inquiry of the persons who compiled the information, the information is true, accurate, and complete, and that those portions of substantiation claimed as confidential business information would, if disclosed, reveal trade secrets or other confidential business information.

9. Section 68.160 is proposed to be amended by revising paragraphs (b)(1), (b)(7), and (b)(12) to read as follows:

**§ 68.160 Registration.**

\* \* \* \* \*

(b) \* \* \*

(1) Stationary source name, street, city, county, state, zip code, latitude and longitude, method for obtaining latitude and longitude, and description of location that latitude and longitude represent;

\* \* \* \* \*

(7) For each covered process, the name and CAS number of each regulated substance held above the threshold quantity in the process, the maximum quantity of each regulated substance or mixture in the process (in pounds) to two significant digits, the NAICS code of the process, and the Program level of the process;

\* \* \* \* \*

(12) If the stationary source has a CAA Title V operating permit, the permit number; and

\* \* \* \* \*

10. Section 68.165 is proposed to be amended by revising paragraph (b) to read as follows:

**§ 68.165 Offsite consequence analysis.**

\* \* \* \* \*

(b) The owner or operator shall submit the following data:

- (1) Chemical name;
- (2) Percentage weight of the chemical in a mixture (toxics only);
- (3) Physical state (toxics only);
- (4) Basis of results (give model name);
- (5) Scenario (explosion, fire, toxic gas release, or liquid spill and evaporation);
- (6) Quantity released in pounds;
- (7) Release rate;
- (8) Release duration;
- (9) Wind speed and atmospheric stability class (toxics only);
- (10) Topography (toxics only);
- (11) Distance to endpoint;
- (12) Public and environmental receptors within the distance;
- (13) Passive mitigation considered; and

(14) Active mitigation considered.

11. Section 68.170 is proposed to be amended by revising paragraphs (a) and (b) to read as follows:

**§ 68.170 Prevention program/Program 2.**

(a) For each part of a Program 2 process for which a separate hazard review was conducted, the owner or operator shall provide in the RMP the information indicated in paragraphs (b) through (k) of this section.

(b) The NAICS code for the part of the process.

\* \* \* \* \*

12. Section 68.175 is proposed to be amended by revising paragraphs (a) and (b) to read as follows:

**§ 68.175 Prevention program/Program 3.**

(a) For each part of a Program 3 process for which a separate process hazard analysis was conducted, the owner or operator shall provide in the RMP the information indicated in paragraphs (b) through (p) of this section.

(b) The NAICS code for the part of the process.

\* \* \* \* \*

13. Section 68.180 is proposed to be amended by revising paragraph (b) to read as follows:

**§ 68.180 Emergency response program.**

\* \* \* \* \*

(b) The owner or operator shall provide the name and telephone number of the local agency with which emergency response activities or the emergency response plan is coordinated.

\* \* \* \* \*

14. Section 68.210 is proposed to be amended by revising paragraph (a) to read as follows:

**§ 68.210 Availability of information to the public.**

(a) The RMP required under subpart G of this part shall be available to the public except as provided in §§ 68.150 through 68.152 and 40 CFR part 2.

\* \* \* \* \*

[FR Doc. 98-10145 Filed 4-16-98; 8:45 am]

BILLING CODE 6560-50-P

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Part 73**

[MM Docket No. 98-43; FCC 98-57]

**1998 Biennial Regulatory Review—Streamlining of Mass Media Applications, Rules, and Processes**

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of proposed rule making.

**SUMMARY:** The Commission proposes to streamline broadcast application and licensing procedures and reduce licensee administrative and filing requirements. The Commission also proposes to eliminate rules and procedures that no longer advance key objectives. In addition, the Commission seeks comment on whether to mandate electronic filing for certain broadcast application and reporting forms. By these proposals, the Commission seeks

to preserve the public's ability to participate fully in the FCC broadcast licensing process, reduce unwarranted applicant and licensee burdens, and realize benefits of the Mass Media Bureau's electronic filing initiative. This NPRM contains proposed or modified information collections subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. It has been submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the proposed or modified information collections contained in this proceeding.

**DATES:** Comments must be filed on or before June 16, 1998. Reply comments are due July 16, 1998. To file formally in this proceeding, interested parties must file an original plus six copies of all comments, reply comments, and supporting comments. If parties filing comments want each Commissioner to receive a personal copy of the comments, the parties must file an original plus eleven copies. Written comments by the public on the proposed and/or modified information collections on or before June 16, 1998. Written comments must be submitted by the Office of Management and Budget (OMB) on the proposed and/or modified information collections on or before June 16, 1998.

**ADDRESSES:** All comments should be addressed to the Office of the Secretary, Federal Communications Commission, 1919 M Street, NW, Washington, DC 20554. In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 234, 1919 M Street, NW, Washington, D.C. 20554, or via Internet to [jboley@fcc.gov](mailto:jboley@fcc.gov), and to Timothy Fain, OMB Desk Officer, 10236 NEOB, 725-17th Street, NW, Washington, D.C. 20503 or via the Internet to [fain\\_t@al.eop.gov](mailto:fain_t@al.eop.gov).

**FOR FURTHER INFORMATION CONTACT:** Peter H. Doyle, Audio Services Division, Mass Media Bureau, (202) 418-2780; James J. Brown, Video Services Division, Mass Media Bureau (202) 418-1600; or Mania K. Baghdadi, Policy and Rules Division, Mass Media Bureau (202) 418-2130. For additional information concerning the information collections contained in this NPRM contact Judy Boley at (202) 418-0214, or via the Internet at [jboley@fcc.gov](mailto:jboley@fcc.gov).

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Notice of

Proposed Rulemaking in MM Docket No. 98-43 and FCC No. 98-57, adopted April 2, 1998 and released April 3, 1998. The complete text of this Notice of Proposed Rule Making is available for inspection and copying during regular business hours in the FCC Reference Center (Room 239), 1919 M Street, NW, Washington, DC 20554 and may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800 (phone), (202) 857-3805 (facsimile), 1231 20th Street, NW, Washington, DC 20036.

## Synopsis of Proposed Rulemaking

### I. Introduction

1. These proposals are designed to reduce filing burdens and increase the efficiency of the Mass Media Bureau application processing. They recognize that this approach is feasible only if the Commission retains the capacity to verify compliance with our rules and the accuracy of application information through audits and inquiries. Therefore, these proposals include the establishment of a formal system of random audits along with the Commission's commitment to sanction applicants that do not meet their obligations of full disclosure and complete candor. We have tentatively identified certain policies that either consume significant staff resources or create burdens that may no longer be warranted. Accordingly, we propose to eliminate: payment restrictions on the sale of unbuilt stations, the requirement to submit contracts with assignment and transfer applications, and several rules that add unwarranted filing burdens on commercial new station and facility change applicants. We consider relaxing and conforming ownership report filing requirements for commercial and noncommercial stations. This proceeding also proposes fundamental changes in our construction permit extension procedures. These changes would reduce the need for repetitive extension filings. The Commission seeks comments on procedures we can adopt, consistent with statutory restrictions, to expedite the processing of *pro forma* assignment and transfer applications. Finally, we invite comment on other measures which may advance our streamlining goals.

### II. Issue Analysis

#### A. Electronic Filing of Applications

2. The Mass Media Bureau is currently working on facilitating electronic filing for 15 key broadcasting

application and reporting forms.<sup>1</sup> The Commission invites comment on whether electronic filing of these applications should be mandatory or permissive, and, if mandatory, whether this requirement should be phased in. If electronically filed applications are made available on the Internet, interested parties could examine them at home, at the office, or perhaps at the public library. The Commission invites comment on these tentative views. Additionally, the Commission seeks comment on whether FCC Form 398, the Children's Programming Report, be filed electronically. The Commission seeks comment on these proposals, as well as on any legal, technical, or other issues raised by mandatory electronic filing.

3. The Commission seeks comment on whether it should create exemptions to mandatory filing for small businesses or other qualifying entities, and what the criteria or waiver standards should be. In addition, the Commission seeks comment on whether there should be a transition period for mandatory filing and if so, should this period be based on whether the filer is a small entity? Should the phase-in be done on a form by form basis, and what phase in dates should be used? The Commission also seeks comment on whether voluntary electronic filing could or should be encouraged during the transition period. To spur electronic filing, the Commission requests comments on possible measures such as higher filing fees for paper filers. However, the Commission notes its lack of statutory authority to structure filing fees based on whether a filing is submitted in paper or electronic form. If Mass Media Bureau electronic filing is phased in, should parties also be required to submit traditional paper copies of any electronic filings during the transition? Would such a requirement be consistent with the Paperwork Reduction Act of 1995, increase administrative burdens, processing, or discourage electronic filing?

4. Pursuant to the Debt Collection Improvement Act ("DCIA"), Omnibus Consolidated Rescissions and Appropriations Act of 1996, Public Law 104-34, Chapter 10, 110 Stat 1321, 1321-1358 (1996), the Commission is required to monitor and provide information about its regulatees to the U.S. Treasury. The statute includes a requirement that the Commission collect Taxpayer Identifying Numbers

<sup>1</sup> The Mass Media Bureau is developing electronic versions of the following 15 forms: FCC Forms 301, 302-AM, 302-FM, 302-TV, 307, 314, 315, 316, 340, 345, 346, 347, 349, 350, and 5072. We also propose to require the electronic filing of Form 398, which already is available in electronic form.

(TIN), and share them with the U.S. Treasury. Individuals use their Social Security Number as their TIN.<sup>2</sup> Employers use their Employer Identification Number ("EIN") as their TIN.

5. The Commission invites comment on using TINs in a manner analogous to their proposed use in the Wireless Bureau's Universal Licensing System. We seek comment on whether requiring the use of TINs would satisfy the requirements of the DCIA, and whether it would provide a unique identifier for parties filing broadcast applications that would ensure that the system functions properly. The Commission would take steps to prevent misuse of TINs. Alternatively, we seek comment on using the Bureau's unique database generated identifiers that would be assigned to filers based on the date of filing and a three-character alphanumeric sequence. Finally, a Privacy Act submission would be published in the *Federal Register* to obtain the requisite public and congressional comment and Office of Management and Budget ("OMB") approval prior to implementation of the electronic filing system.

#### B. Streamlining Application Processing

6. The current versions of most Mass Media Bureau forms rely to a significant extent on open-ended narrative exhibits and document submissions. Accordingly, the Commission believes it is necessary to undertake a thorough review of its broadcast forms and to reconsider both the information that is collected and the form in which it is submitted. Thus, the Commission considers changes to the license and permit assignment and transfer forms—Forms 314, 315 and 316; the new commercial station/technical modification form—Form 301; the construction permit extension form—Form 307; and the annual ownership report for commercial stations—Form 323. For Forms 314, 315, 316, and 301, the Commission has recast as many questions as possible into an electronic "filing friendly" format, replacing required exhibits with certifications and "yes/no" questions. We tentatively conclude that the broadcast application forms should restrict the use of exhibits to waiver requests or where additional information is necessary to support application elements potentially inconsistent with precedent or processing standards. At the same time the Commission proposes to reduce the

amount of information applicants are now required to file. For Forms 307 and 323, we propose to restructure filing requirements altogether.

7. As part of this process the Commission is making revisions to the instructions to the Mass Media Bureau application forms and adding worksheets, where applicable, to help clarify Commission processing standards and rule interpretations. The Commission's goal is to provide applicants with sufficient guidance to intelligently certify compliance with our rules and policies. The expanded application form instructions are viewed as crucial to this process and therefore, the Commission proposes to require each applicant to certify that it has read the instructions and disclosed fully in exhibits all matters about which there is any question regarding full compliance with the standards and criteria set forth in the instructions. The Commission invites comment on this proposal, and on whether it should require licensees to retain worksheets to assist the Commission in its compliance efforts, or alternatively, whether licensees should be required to place worksheets in their public inspection files. We also propose to narrow or eliminate application questions of marginal importance and believe these changes will not undermine the Commission's ability to make informed public interest determinations.

8. The Commission also proposes to eliminate or relax a number of technical and non-technical rules and filing requirements. If adopted, these changes would both reduce applicant filing burdens and streamline our processing of sales, new station, and facility modification applications.

#### Assignment and Transfer Applications: Forms 314 and 315

9. The Commission proposes substantial revisions to the sales application forms (FCC Forms 314 and 315), including eliminating the rule that restricts payments upon assignment or transfer of unbuilt stations, and the requirement that applicants file sales agreements as part of the assignment or transfer application. In addition, the Commission proposes other changes that are not subject to the rulemaking requirements of the Administrative Procedure Act<sup>3</sup> and therefore may be implemented without notice and comment. Nonetheless, the Commission discusses these changes here.

#### Rule Changes

10. *Payment Restrictions on the Sale of Unbuilt Stations.* Section 73.3597(c) of the Commission's rules restricts payments upon assignment or transfer of an unbuilt station to reimbursement of a seller's expenses ("no profit" rule).<sup>4</sup> In addition, § 73.3597(d) provides that where the seller retains an interest in an unbuilt station, the Commission must consider whether the transaction involves actual or potential gain to the seller over and above reimbursement of expenses.<sup>5</sup> In such cases, Commission rules provide that the assignment or transfer application must be designated for hearing unless the transferor or assignor has obligated itself to provide the station with a capital contribution proportionate to the transferor's or assignor's equity share in the station for the one-year period commencing with program tests.<sup>6</sup>

11. The Commission proposes to eliminate the "no profit" rule. We believe that there is no statutory proscription against the for-profit sale of construction permits for unbuilt broadcast stations. With the initiation of competitive bidding for broadcast spectrum in situations where mutually exclusive applications are filed, the winning bidder's payment of fair market value for a construction permit combined with a restricted construction permit extension policy proposed *infra* will promote the prompt construction of broadcast facilities.<sup>7</sup> Thus, we tentatively conclude that we should follow the same construction permit sale policy which is followed in other services subject to auction procedures.<sup>8</sup> Recognizing that auctions may not be used to award construction permits in every context, for example, non-commercial station construction permits or where there are no competing commercial stations, the Commission seeks comment on whether the fact that a construction permit may not be issued through auction should cause us to retain the "no profit" rule in such situations. Commenters are invited to discuss the benefits and drawbacks of applying the "no profit" rule in cases where no auction takes place.

12. The Commission tentatively concludes that reimbursement restrictions should also be eliminated

<sup>4</sup> 47 CFR 73.3597(c).

<sup>5</sup> 47 CFR 73.3597(d)(1).

<sup>6</sup> 47 CFR 73.3597(d)(2).

<sup>7</sup> See *Implementation of Section 309(j) of the Communications Act—Competitive Bidding for Commercial Broadcast and Instructional Television Fixed Service Licenses, Notice of Proposed Rulemaking*, 62 FR 65392 (December 12, 1997) ("Auction NPRM").

<sup>8</sup> See e.g., 47 CFR 24.839.

<sup>2</sup> Therefore, for the purposes of this NPRM, the term "Taxpayer Identification Number" shall mean "Social Security Number" for individuals.

<sup>3</sup> See 5 U.S.C. 553(b)(3)(A).

for outstanding construction permits. We tentatively conclude that we also should permit the for-profit sale of these construction permits, which to a certain extent have already been subject to private competitive forces. We seek comment on these tentative conclusions.

13. If the current "no profit" rule were retained, the Commission proposes allowing permittees to certify compliance with the rule by answering a series of "yes/no" questions. The Commission would continue to have the authority to request an itemized accounting of expenses on a case-by-case basis where disclosures in an application raise issues or concerns.<sup>9</sup> The Commission seeks comment on the appropriateness of allowing permittees to certify compliance, and particularly on our proposal to allow a seller to certify that it will not be reimbursed for more than its out-of-pocket expenses. The Commission also seeks comment on whether it would be sufficient to require sellers to place copies of all expense documentation in a station's public file if the no-profit rule is retained.

#### Requirement To Submit Contracts With Assignment and Transfer Applications

14. The current sales forms, FCC Forms 314, 315 and 316, require that the seller submit a copy of the contract and/or agreement for the assignment or transfer of the station, or if the agreement has not been reduced to writing, a written description of the complete oral agreement. In addition, § 73.3613(b) of the Commission's rules requires that licensees and permittees file with the Commission any documents relating to the present or future ownership or control of the licensee or permittee within thirty days of execution. The Commission proposes to eliminate the requirement that such contracts and/or agreements be filed as part of assignment or transfer applications as well as the portion of § 73.3613(b) that requires that such agreements be filed with the Commission within thirty days of execution. In lieu of this requirement, the Commission proposes to require applicants to carefully and thoroughly review their sales and organizational documents against the detailed standards set forth in the instructions to Forms 314 and 315. We also propose to expand application instructions to cover both the sales and loan agreements and also issues relating to non-party investor influence over the assignee or transferee. Applicants would be required to disclose fully any sales,

financing or investor information where the transaction or the assignee entity does not conform fully to the standards set forth in the instructions. However, copies of agreements may be requested on a case-by-case basis where disclosures made in an application raise issues or concerns. The Commission seeks comment on whether the proposed application procedures and certifications would suffice instead of the requirement that applicants file the sales agreements with their applications. In particular, the Commission requests comment on whether the proposed instruction materials and related certifications would suffice instead of individualized review of agreements and contracts where complex transactions are involved. Finally, comment is sought on whether these procedures are sufficient to discharge our obligation under § 310(d) of the Act to grant only those applications that serve the public interest, convenience and necessity.

15. If the Commission eliminates the requirement that applicants file sales agreements with their applications and the rule requiring that such agreements be filed with the Commission within thirty days of execution, it proposes to require that applicants place all such agreements in the station's public inspection file and to modify our public inspection file rule accordingly. The Commission seeks comment on the impact of ending the practice of having sales agreements available for inspection in the Commission's Washington, D.C. public reference room.

#### Requirement to Submit Contour Overlap Maps

16. With regard to radio applicants, the Commission proposes to reduce administrative burdens on broadcasters and at the same time streamline the staff review process by eliminating the requirement that applicants submit contour overlap maps to demonstrate compliance with our local radio ownership rules. The Commission proposes reliance on applicant certifications in place of contour maps. An applicant would be in a position to make this local radio ownership certification only after completing a worksheet. To the extent a proposed transaction would involve more than one "market," as that term is defined in § 73.3555(a)(4)(ii), applicants would be required to complete the worksheet with regard to each such market. The Commission seeks comment on this proposal, and whether our elimination of the requirement that applicants submit contour overlap maps will detrimentally affect the public's ability

to access the information necessary to monitor station sales and thereby undermine the opportunity for meaningful public participation under § 309(d) of the Act.<sup>10</sup> The Commission seeks comment on whether applicants should be required to place a copy of the contour overlap map in the station's public inspection file. The Commission also seeks comment on whether applicants should be exempt from the public file requirement in those situations in which compliance is obvious, e.g., where a certification is premised on the fact there are forty-five or more stations in a major market. The Commission seeks comment on whether applicants should be required to prepare a map solely for placement in the station's public inspection file in such circumstances.

#### Other Revisions

17. Certain proposed revisions to the sales forms (FCC Forms 314 and 315) do not require changes in our rules. These changes are intended to maximize the advantages of electronic filing and processing and eliminate burdensome disclosure requirements. These proposed form changes are not subject to the Administrative Procedure Act's notice and comment rulemaking requirements.<sup>11</sup> Nevertheless, interested parties are urged to review the draft forms carefully so that meaningful comments may be submitted regarding the proposed revisions in the forms.

#### New Commercial Station and Facility Change Applications: Form 301 Rule Revisions

18. *Section 73.316(c)*. The Commission proposes to modify § 73.316(c) to shift the filing requirements now codified in subsections (1)-(2) and (4)-(7) from the construction permit phase to the license phase of the FM authorization process.<sup>12</sup>

19. *Section 73.1030(a)*. The Commission seeks comment on its proposal to modify § 73.1030(a) by eliminating the requirement that applicants indicate in their applications the date of radio astronomy observatory notification.

20. *Section 73.1675(a)*. The Commission seeks comment on its proposal to modify this rule to eliminate the map requirement for auxiliary facilities for the FM and TV broadcast services. Although the Commission believes that the rationale for eliminating the § 73.1675(a) map requirement is equally applicable to the

<sup>9</sup> See 47 CFR 1.17.

<sup>10</sup> See 47 U.S.C. 309(d).

<sup>11</sup> See 5 U.S.C. 553(b)(3)(A).

<sup>12</sup> See 47 CFR 73.316(c).

FM and TV broadcast services, it proposes to retain the map requirement for AM auxiliary facility permit applications.

The Commission believes that adoption of these changes would not jeopardize the technical integrity of the broadcast services or the consistent enforcement of our core rules and policies. The Commission seeks comments on these modifications, and request additional suggestions to eliminate or streamline reporting and filing requirements which relate to Form 301 filings.

#### Form Revisions

21. The Commission also proposes to reorganize and streamline FCC Form 301. It proposes to conform Forms 301, 314 and 315 non-technical questions where regulatory concerns are identical. In addition, the Commission proposes to reorganize the FM technical data section of the application, section V-B. The revised section V-B would require applicants to certify compliance with our technical rules for routine and non-waiver issues. The technical data required for engineering review would be organized in such a manner as to facilitate electronic entry and processing of data.

#### C. Enforcement

22. The Commission's proposals would significantly streamline the amount of information that applicants must furnish to the Commission. Consequently, the Commission would rely more heavily on certifications by applicants that they comply with the applicable rules. These proposals do not signify any lessening of the Commission's expectation that licensees conduct themselves as public trustees. Current enforcement measures applied by the Commission range from admonitions to forfeitures to conducting hearings to determine whether to revoke or deny renewal of a broadcaster's license. The Commission invites comment as to whether our existing enforcement measures and policies remain sufficient.

23. If the proposed revisions to the Commission's application forms and processing procedures are adopted, the Commission intends to have a formal program of random audits to ensure that licensees continue to comply with our rules and we intend to rely heavily on such audits. The Commission invites comments to how it should implement such audits and whether such audits are sufficient means of ensuring continued licensee compliance with our rules and policies. If not, the Commission invites

comment as to what additional measures, if any, it should adopt.

#### D. Modifying Construction Permit Extension Procedures

24. For new or modified facilities, the Commission issues a construction permit for either 24 months (for full power TV) or 18 months (for AM, FM, International Broadcast, low power TV, TV translator, TV booster, FM translator, FM booster, broadcast auxiliary, or Instructional TV Fixed station ("ITFS")). Within the specified time frame, a permittee must complete construction and file an application for a license to cover. Additional time may be granted only if the licensee or permittee can demonstrate one of the following three conditions, the so-called "one-in-three" showing: (1) construction is complete and testing is underway looking toward the prompt filing of a license application; (2) substantial progress has been made; or (3) no progress has been made for reasons clearly beyond the control of the permittee but the permittee has taken all possible steps to expeditiously resolve the problem and proceed with construction.

25. While many permittees are now able to complete construction within the initial construction period afforded under the current rules, a significant number of permittees do not succeed in constructing their proposed facilities prior to permit expiration. As a result, the staff receives large numbers of extension applications, creating a tremendous burden on staff resources. Therefore, the Commission proposes to: (1) issue all construction permits for a uniform three-year term; (2) extend permits only in circumstances where the permit itself is the subject of administrative or judicial appeal or where construction delays have been caused by an "act of God;" (3) eliminate the current practice of providing extra time for construction after a permit has been the subject of a modification or an assignment or transfer of control; and (4) make construction permits subject to automatic forfeiture upon expiration. Additionally, the Commission proposes to apply these rules to any construction permit that is within its initial construction period at the time these rules are adopted.

26. The Commission invites comment on the need for, and relative merits of, a uniform period and seeks comment as to whether a three year term is appropriate. The Commission solicits comments on typical construction time lines and problems, particularly where commenters support alternative permit time frames. It also seeks comment as to

whether the proposed longer construction period would remove an incentive for prompt construction by permittees who are capable of completing construction much earlier than the proposed three-year deadline. Commenters are specifically asked to comment on the extent to which construction permit applicants are unprepared and unwilling to proceed promptly with construction when they apply, but rather are applying to warehouse spectrum. The Commission also seeks comment on whether we should impose a shorter construction period, e.g., one year, for construction permits for minor modifications to licensed facilities. The Commission does not propose to apply the three-year construction period to the digital television ("DTV") facilities constructed by initial DTV licensees, which are on their own construction schedule.<sup>13</sup> However, in its *Memorandum Opinion and Order on Reconsideration of the Fifth Report and Order* the Commission established special construction rules for new NTSC permittees whose applications remained pending on April 3, 1997.<sup>14</sup> This limited class of permittees, which are not eligible for an initial DTV paired license, may construct either an analog or a digital station. These permittees also must complete construction with the "traditional" two-year construction period applied to NTSC stations,<sup>15</sup> and, if they initially construct analog facilities, may convert to DTV by the 2006 deadline. If the proposed three-year construction period is adopted, the Commission proposes to increase to three years the initial period afforded these NTSC permittees to construct either analog or digital facilities. The Commission does not propose a change in the 2006 deadline for converting to DTV. The Commission invites comment as to whether the two-year period for this group of NTSC permittees should be extended to three years if we adopt the three-year proposal discussed herein.

#### Restrict Extensions to Circumstances Where Delays Are Beyond the Permittee's Control

27. The Commission also proposes to strictly limit the circumstances that would qualify for an extension under

<sup>13</sup> See *Fifth Report and Order*, 62 FR 26996 (May 16, 1997) on reconsideration, 63 FR 15774 (April 1, 1998). See also *Sixth Report and Order* 62 FR 26684 (May 14, 1997), on reconsideration, 63 FR 13546 (March 20, 1998).

<sup>14</sup> *Memorandum Opinion and Order on Reconsideration of the Fifth Report and Order*, 63 FR 15774 (April 1, 1998).

<sup>15</sup> *Id.* para. 11.

the "circumstances beyond control" criterion. Specifically, the Commission seeks comment on whether it can limit the tolling of the construction period to when the grant of a construction permit is the subject of administrative or judicial appeals or when construction has been delayed by an "act of God." The Commission proposes to define "acts of God" very narrowly in terms of natural disasters (e.g., floods, tornados, hurricanes, and earthquakes) and even then to only toll the construction period for the length of time which a diligent permittee would need to recover from the effects of the event, up to a maximum of one year. It also proposes to require strict documentation of a permittee's efforts to build subsequent to such events. Commenters are requested to address both the legal and economic consequences of this proposal and to suggest a mechanism by which a permittee would inform the Commission of natural disasters which have delayed construction and request the tolling of a construction period. The Commission seeks comment on whether this proposed rule change would be consistent with § 319(b) of the Act. Finally, it seeks comment as to whether difficulties in obtaining local zoning authorization are sufficiently beyond the permittee's control to warrant treatment similar to that of delays caused by administrative and judicial review. The Commission's tentative conclusion is that zoning delays can be overcome and construction can be completed within the proposed three-year construction period if a permittee pursues the zoning process diligently.

#### Eliminate Post-Modification and Post-Assignment Extensions

28. When a permittee for a new facility files an application to modify its construction permit, or an application to assign or transfer control of its construction permit in the second half of the construction permit's initially authorized period, the Commission currently requires a "one-in-three" showing and, upon grant, the permittee, in most instances, is provided additional time to complete construction. The Commission proposes to eliminate both the restriction on second-half construction period modifications and assignments and the extended construction periods provided under our rules. The Commission seeks comment on whether elimination of automatic extensions when unbuilt stations have been modified, assigned, or transferred is consistent with § 319(b) of the Act. In addition, we propose to eliminate the requirement that permittees that modify unbuilt stations

certify that construction will commence immediately upon grant.<sup>16</sup> We also propose to eliminate the analogous certification requirement for assignees and transferees.<sup>17</sup> The Commission seeks comment on these proposals.

#### Automatic Forfeiture of Expired Construction Permits

29. While § 319(b) of the Act provides for the automatic forfeiture of an expired construction permit (unless the Commission authorizes additional time or the delay was caused by circumstances outside the permittee's control), the Commission's practice has been to take an affirmative action canceling a construction permit before it is forfeited. In an effort to streamline this process, the Commission proposes to make a construction permit subject to automatic forfeiture, without further Commission action, upon expiration of the proposed three-year construction period. The Commission seeks comment on whether an automatic cancellation policy for expired construction permits should be adopted and its tentative conclusion that such a procedure would be consistent with the Act's automatic forfeiture provision.

#### Application of New Rules to Outstanding Permits

30. Finally, the Commission proposes that the rules regarding construction permits, and extensions thereof, adopted in this rulemaking proceeding be applied to any construction permit that is currently in its initial construction period (i.e., the first 24 months for a full power TV facilities permit and the first 18 months for an AM, FM, International Broadcast, low power TV, TV translator, TV booster, FM translator, FM booster, or broadcast auxiliary permit). The Commission invites comment on whether to extend the proposed extension policy to outstanding permits, whether implementation would cause unjustifiable hardship to permittees, and whether this approach would result in a disservice to the public. The Commission believes, however, that it would be administratively unworkable to apply the proposed rules to construction permits that are already beyond their initial construction periods (whether through extension, assignment, transfer of control, or modification). Because many of these permits have already been afforded a construction period close to (or, in many instances, in excess of) the three-year term proposed in this Notice, the

Commission proposes to continue to apply the rules as they exist today to permits outside their initial periods. The Commission invites comment on the tentative conclusion that it is more appropriate to continue to apply its current rules to construction permits that are beyond their initial periods.

#### E. Modifying Pro Forma Assignments and Transfers

31. Approximately 35 percent of radio and television assignment and transfer applications propose *pro forma* transactions and are filed on FCC Form 316. Applications are typically processed and disposed of within 10 working days. For certain *pro forma* transfers and assignments, which do not affect actual control of the licensee or permittee and which are routinely granted by the Commission, broadcasters have questioned whether they should be required to file an application and wait for a grant. The Commission invites commenters to identify any specific situations or transactions negatively impacted by the Mass Media Bureau's current rate of disposal. Some types of *pro forma* assignments or transfers may be suited for streamlined procedures. For example: (1) court-ordered transfers to a bankruptcy trustee; (2) certain corporate reorganizations (such as a change in an intermediate wholly-owned subsidiary); (3) reorganization by a corporate licensee in another state where no other changes are made; (4) involuntary assignment or transfer of control of license or construction permit due to death or legal disability of the individual permittee or licensee; and (5) assignment of less than a controlling interest in a partnership. The Commission invites comment on whether these and/or other categories of *pro forma* transfers and assignments should be subjected to a streamlined procedure and whether this may be done while complying with § 310(d).

32. Under such a streamlined procedure certain assignments and transfers, as listed above, could be carried out by licensees or permittees, subject only to a requirement that the Commission be notified of the assignment or transfer within a certain period thereafter (say 30 days) and the requirement that an Ownership Report Form be filed within 30 days after the assignment or transfer.<sup>18</sup> Would § 310(d) permit adoption of such a notification procedure? In the context of Cable Television Relay Service ("CARS"), we have streamlined transfers by providing

<sup>16</sup> See 47 CFR 73.3535(b).

<sup>17</sup> See 47 CFR 73.3535(a).

<sup>18</sup> See 47 CFR 73.3615(f).

that prior Commission consent is not required for assignments or transfers of control "in cases where the change in ownership does not affect the identity or controlling interest of the licensee."<sup>19</sup> The Commission invites comment as to whether this precedent is applicable to broadcast transfers.

33. The Commission also invites comment on the procedures that should be followed for notifications of transactions that are determined to fall outside the scope of *per se* grantable applications. Commenters should also consider the procedures the Commission should adopt in response to notifications for transactions that the Commission concludes are both voluntary and involve a substantial change in ownership or control, and thus are subject to the public notice and petition to deny provisions of § 309(d). Finally, the Commission invites comment on the sanctions that should be imposed for such erroneous notifications.

34. The Commission also uses "short form" procedures in connection with tender offers and proxy contests to acquire control of entities that hold Commission licenses.<sup>20</sup> We question whether the streamlining options considered in this Notice should apply to our tender offer and proxy contest processing policies. Accordingly, we seek comment on our tentative conclusion that the proposed streamlining procedures should not be extended to cover the processing of "short form" applications relating to tender offers and proxy contests for control of Commission licensees. Assuming that a notification procedure could be adopted consistent with § 310(d), are there benefits to obtaining prior consent to such transactions that would be lost if the Commission adopts a notification requirement? Should the Commission require that a notification and Ownership Report both be filed with the Commission or, in the alternative, would an Ownership Report be sufficient in this regard? Is the thirty-day period an appropriate time limit for the notification requirement? Should the Commission require that a notification letter be filed, or should the Commission adopt a new notification form for this purpose? If the Commission requires that a notification letter or form be filed, what information should be required to be filed in the

letter? Finally, should the Commission place such notifications on public notice to permit the public an opportunity to seek reconsideration of the application of the "blanket" consent to a particular transaction? Alternatively, would a requirement that the notification be placed in the station's public file be sufficient in this regard?

35. As an alternative to a notification procedure, the Commission could keep the current application process but, in the case of certain specified *pro forma* assignments and transfers, permit applicants to proceed, at their own risk, to consummate the transfer or assignment if Commission action denying the application is not taken within a set short period after the application is filed. The Commission invites comment as to whether this alternative would be consistent with § 310(d). The Commission would, in the event that this proposal is adopted, retain the authority to deny the assignment or transfer even after such a consummation and require that the transaction be unwound. Thus, the Commission believes its authority under section 310 of the Act would be retained.

36. Assuming such an alternative procedure is consistent with § 310(d), the Commission invites comment as to the appropriate time period for Commission action, *e.g.*, ten business days. Further, the Commission invites comment as to whether such a proposal would significantly and meaningfully reduce regulatory burdens and provide adequate relief. The Commission notes its concern that it may be difficult to unwind sales transactions after they have occurred. It invites comment as to whether this is a significant negative factor that should be considered or whether it should rely on applicants to make a reasoned judgment as to whether they should assume the risk that a transaction consummated prior to FCC consent must be subsequently unwound. The Commission notes that this proposal would apply only to narrow categories of *pro forma* transfers and assignments, as specified above, where Commission consent is routinely granted. The Commission invites comment on all aspects of this proposal.

#### F. Streamlined Ownership Reporting Requirements

37. The Commission proposes to reduce the frequency with which Ownership Reports (FCC Forms 323 and 323-E) for commercial and noncommercial educational AM, FM and TV broadcast stations must be filed with the Commission. Currently, most

licensees of commercial broadcast stations are required to file Ownership Reports annually. This proposal would relax this requirement so that such licensees would have to file Ownership Reports when they file their stations' license renewal applications and four years thereafter, at the mid-point of their scheduled license term. In addition, the Commission proposes to formalize the Commission's current practice of requesting an Ownership Report within 30 days of an approved assignment or transfer by amending § 73.3615 of the Commission's Rules to specifically require that every commercial and noncommercial educational licensee or permittee file an Ownership Report on FCC Form 323 or 323-E within 30 days of consummation of an approved license assignment or transfer of control. In the event the Commission adopts a notification procedure for certain *pro forma* assignments and transfers, the Commission proposes to require the filing of an Ownership Report within thirty days of the consummation of those transactions. Comment on all aspects of these proposals is invited. We also seek comment on whether it should adopt the same proposed relaxed ownership reporting requirements for noncommercial educational AM, FM and TV broadcast station licensees and permittees.

38. The Commission invites comment on its tentative conclusion that the proposed relaxation in ownership reporting would ease paperwork burdens on licensees and permittees without impairing the public's ability to ascertain the identities of broadcast station owners. The Commission also tentatively concludes the proposal would not adversely affect its ability to monitor ownership of commercial and noncommercial educational broadcast stations and compliance with the Commission's multiple ownership limitations and the alien ownership and prior consent provisions of § 310 of the Communications Act of 1934, as amended. We also invite comment as to whether our proposals would hinder members of the public and other broadcasters in obtaining necessary ownership information and monitoring ownership changes.

39. The current ownership reporting requirements are stricter for noncommercial stations than for commercial stations. The Commission proposes, therefore, to conform Form 323-E and Form 323 reporting requirements. We seek comment on whether eliminating the 30-day supplemental reporting requirement, coupled with the addition of a regular four-year filing requirement, would

<sup>19</sup> 47 CFR 78.35(c); *Report and Order*, 50 FR 23417 (June 4, 1985).

<sup>20</sup> See generally *Tender Offers and Proxy Contests*, 59 Rad. Reg. 1536 (1986), appeal dismissed sub nom. *Office of Communication of the United Church of Christ v. FCC*, 826 F.2d 101 (D.C. Cir. 1987).

result in an overall reduction of the burden on noncommercial educational licensees.

40. The Commission invites comment as to whether a two-year or other reporting interval would be more appropriate or beneficial. In this regard, commenters contending that a four-year reporting requirement would be detrimental to the public's or the Commission's ability to monitor adequately significant changes in the ownership of broadcast stations should provide specific examples and arguments to substantiate their position.

#### Ordering Clauses

41. Accordingly, it is ordered, that pursuant to the authority contained in Sections 4(i), 4(j), 303, 308, 309, and 310 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 303, 308, 309, and 310, this *Notice of Proposed Rule Making* is adopted.

42. It is further ordered, that the Commission's Office of Public Affairs, Reference Operations Division, shall send a copy of this Notice, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

### III. Administrative Matters

#### A. Initial Paperwork Reduction Act of 1995 Analysis

This Notice proposes rule and procedural revisions which may contain an information collection requirement. As part of our continuing effort to reduce paperwork burdens, we invite the general public and OMB to take this opportunity to comment on the information collection contained in this Notice, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. Public and agency comments are due at the same time as other comments on this Notice; OMB comments are due 60 days from the date of publication of this Notice in the Federal Register. Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. In addition to filing comments with the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judy

Boley, Federal Communications Commission, Room 234, 1919 M Street, N.W., Washington, DC 20554, or via the Internet to jboley@fcc.gov and to Timothy Fain, OMB Desk Officer, 10236 NEOB, 725—17th Street, N.W., Washington, DC 20503 or via the Internet to fain\_t@al.eop.gov.

#### B. Ex Parte Rules

This proceeding will be treated as a "permit-but-disclose" proceeding subject to the "permit-but-disclose" requirements under § 1.1206(b) of the rules. 47 CFR 1.1206(b), as revised. *Ex parte* presentations are permissible if disclosed in accordance with Commission rules, except during the Sunshine Agenda period when presentations, *ex parte* or otherwise, are generally prohibited. Persons making oral *ex parte* presentations are reminded that a memorandum summarizing a presentation must contain a summary of the substance of the presentation and not merely a listing of the subjects discussed. More than a one or two sentence description of the views and arguments presented is generally required. See 47 CFR 1.1206(b)(2), as revised. Additional rules pertaining to oral and written presentations are set forth in § 1.1206(b).

#### C. Initial Regulatory Flexibility Analysis

With respect to this Notice, an Initial Regulatory Flexibility Analysis ("IRFA") is contained in the Attachment. As required by the Regulatory Flexibility Act,<sup>21</sup> the Commission has prepared an IRFA of the expected significant economic impact on small entities by the policies and rules proposed in this Notice. Written public comments are requested on the IRFA. The Commission asks a number of questions in its IRFA regarding the prevalence of small businesses in the industries covered by this Notice. Comments on the IRFA must be filed in accordance with the same filing deadlines as comments on the Notice and must have a distinct heading designating them as responses to the IRFA.

Federal Communications Commission.  
Magalie Roman Salas,  
Secretary.

#### Attachment

As required by the Regulatory Flexibility Act ("RFA"),<sup>22</sup> the Commission has prepared

<sup>21</sup> Public Law 96-354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1981), as amended.

<sup>22</sup> See 5 U.S.C. 603. The RFA, see 5 U.S.C. 601 *et seq.*, has been amended by the Contract with America Advancement Act of 1996, Public Law 194-12, 110 Stat. 848 (1996) ("CWAA"). Title II of

this present Initial Flexibility Analysis ("IRFA") of the possible significant economic impact on small entities by the policies and rules proposed in this Notice of Proposed Rule Making ("Notice"). Written public comments are requested on this IRFA.

Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments of the Notice. The Commission will send a copy of the Notice, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. See 5 U.S.C. 603(a). In addition, the Notice and IRFA (or summaries thereof) will be published in the Federal Register. See *id.*

#### A. Need For and Objectives of the Proposed Rules

With this Notice, the Commission commences a proceeding to review its broadcast applications and related rules. The Commission's goals are to streamline its procedures, speed introduction of new and expanded services to the public, reduce administrative burdens on regulatees, increase public access to information about the Bureau's actions and processing activities, and maximize efficiency in the use of Commission resources, while maintaining the technical integrity of broadcast services, fostering the Commission's goals of competition and diversity, continuing enforcement of the Commission's core rules and policies, and permitting members of the public a continued opportunity to monitor station performance. This review is taken in conjunction with the Commission's 1998 biennial regulatory review. Although Congress did not mandate this area of review, the Commission nonetheless undertakes it to assure that its rules and processes are no more regulatory than necessary to achieve Commission goals.

#### B. Legal Basis

Authority for the actions proposed in this Notice may be found in sections 4(i), 4(j), 303, 308, 309, and 310 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 303, 308, 309, and 310.

#### C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

Under the RFA, small entities may include small organizations, small businesses, and small governmental jurisdictions. 5 U.S.C. 601(6). The RFA, 5 U.S.C. 601(3), generally defines the term "small business" as having the same meaning as the term "small business concern" under the Small Business Act, 15 U.S.C. 632. A small business concern is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration ("SBA"). Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies "unless an agency after consultation with the Office of Advocacy of the SBA and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the

the CWAA is the Small Business Regulatory Enforcement Fairness Act of 1996 ("SBREFA").

activities of the agency and publishes such definition(s) in the Federal Register."<sup>23</sup>

The proposed rules and policies will apply to television broadcasting licensees, radio broadcasting licensees and potential licensees of either service. The Small Business Administration defines a television broadcasting station that has no more than \$10.5 million in annual receipts as a small business.<sup>24</sup> Television broadcasting stations consist of establishments primarily engaged in broadcasting visual programs by television to the public, except cable and other pay television services.<sup>25</sup> Included in this industry are commercial, religious, educational, and other television stations.<sup>26</sup> Also included are establishments primarily engaged in television broadcasting and which produce taped television program materials.<sup>27</sup> Separate establishments primarily engaged in producing taped television program materials are classified under another SIC number.<sup>28</sup> There were 1,509 television stations operating in the nation in 1992.<sup>29</sup> That number has remained fairly constant as indicated by the approximately 1,569 operating television broadcasting stations in the nation as of January 31, 1998.<sup>30</sup> For 1992,<sup>31</sup> the number of television stations that produced less than

\$10.0 million in revenue was 1,155 establishments.<sup>32</sup>

Additionally, the Small Business Administration defines a radio broadcasting station that has no more than \$5 million in annual receipts as a small business.<sup>33</sup> A radio broadcasting station is an establishment primarily engaged in broadcasting aural programs by radio to the public.<sup>34</sup> Included in this industry are commercial religious, educational, and other radio stations.<sup>35</sup> Radio broadcasting stations which primarily are engaged in radio broadcasting and which produce radio program materials are similarly included.<sup>36</sup> However, radio stations which are separate establishments and are primarily engaged in producing radio program material are classified under another SIC number.<sup>37</sup> The 1992 Census indicates that 96 percent (5,861 of 6,127) radio station establishments produced less than \$5 million in revenue in 1992.<sup>38</sup> Official Commission records indicate that 11,334 individual radio stations were operating in 1992.<sup>39</sup> As of January 31, 1998, official Commission records indicate that 12,241 radio stations were operating, of which 7,488 were FM stations.<sup>40</sup>

Thus, the proposed rules will affect many of the approximately 1,569 television stations, approximately 1,208 of which are considered small businesses.<sup>41</sup> Additionally, the proposed rules will affect some of the 12,241 radio stations, approximately 11,751 of which are small businesses.<sup>42</sup> These estimates may overstate the number of small entities since the revenue figures on which they are based do not include or aggregate revenues from non-television or non-radio affiliated companies.

In addition to owners of operating radio and television stations, any entity who seeks or desires to obtain a television or radio broadcast license may be affected by the proposals contained in this item. The number of entities that may seek to obtain a television

or radio broadcast license is unknown. We invite comment as to such number.

#### D. Description of Projected Recording, Recordkeeping, and Other Compliance Requirements

The measures proposed in this Notice would reduce the reporting required of prospective and current applicants, permittees and licensees. All proposals aim to reduce the overall administrative burden upon both the public and the Commission. We propose to make the electronic filing of many broadcast related applications mandatory and seek comment as to whether to do so on a phased-in basis. We note that such a phased-in procedure has been used elsewhere to benefit small businesses. For example, the SEC incorporated its mandatory filing rules in stages. While most companies were phased into the electronic filing system in 1993, small businesses were not completely phased in until May 1996. We believe that electronic filing could, among other things, speed the processing of applications, save Commission resources, and make filing easier for regulatees by informing them of certain errors in their applications before they are actually sent.

The full benefits of electronic filing and processing would not be realized simply by converting the current version of each form into an electronic format. We have therefore concluded that it is necessary to undertake a thorough review of broadcast forms and to reconsider both the information that is collected and the form in which it is submitted. Accordingly, we propose to delete or narrow overly burdensome questions and to rely more on applicant certifications. If adopted, these changes would both reduce applicant filing burdens and streamline our processing of sales, new station, and facility modification applications. We also tentatively propose to eliminate the rule restricting payments upon assignment or transfer of unbuilt stations. Further, we tentatively propose to eliminate the requirement that applicants file sales agreements as part of the assignment or transfer application, and that such agreements be filed with the Commission within thirty days of execution. Instead, we propose that such agreements would have to be placed in the station's public inspection file and the current permittee or licensee would be required to certify to such placement. In addition, we propose to make revisions to the sales forms that are intended to maximize the advantages of electronic filing and processing.

We further propose to reduce the frequency with which Ownership Reports (FCC Forms 323 and 323-E) for commercial and noncommercial educational AM, FM, and TV broadcast stations must be filed with the Commission. We tentatively believe that this proposal would ease the paperwork burden on licensees and permittees without impairing the public's ability to ascertain the identities of broadcast station owners.

#### E. Steps Taken to Minimize Significant Economic Impact on Small Entities and Significant Alternatives Considered

This Notice solicits comment on a variety of alternatives discussed herein. These

<sup>23</sup> While we tentatively believe that the SBA's definition of "small business" greatly overstates the number of radio and television broadcast stations that are small businesses and is not suitable for purposes of determining the impact of the proposals on small television and radio stations, for purposes of this Notice, we utilize the SBA's definition in determining the number of small businesses to which the proposed rules would apply, but we reserve the right to adopt a more suitable definition of "small business" as applied to radio and television broadcast stations or other entities subject to the proposed rules in this Notice and to consider further the issue of the number of small entities that are radio and television broadcasters or other small media entities in the future. See *Report and Order*, 61 FR 43981 (August 27, 1996) (*Children's Television Programming*), citing 5 U.S.C. 601(3).

<sup>24</sup> 13 CFR 121.201, Standard Industrial Code (SIC) 4833 (1996).

<sup>38</sup> The Census Bureau counts radio stations located at the same facility as one establishment. Therefore, each co-located AM/FM combination counts as one establishment.

<sup>39</sup> FCC News Release No. 31327, Jan. 13, 1993.

<sup>40</sup> FCC News Release "Broadcast Station Totals as of January 31, 1998."

<sup>41</sup> We use the 77 percent figure of TV stations operating at less than \$10 million for 1992 and apply it to the 1998 total of 1569 TV stations to arrive at 1,208 stations categorized as small businesses.

<sup>42</sup> We use the 96% figure of radio station establishments with less than \$5 million revenue from the Census data and apply it to the 12,241 individual station count to arrive at 11,751 individual stations as small businesses.

alternatives are intended to streamline our rules and procedures. Our goals are to reduce applicant and licensee burdens, realize fully the benefits of the Mass Media Bureau's current electronic filing initiative, and preserve the public's ability to participate fully in our broadcast licensing processes. These proposals are designed to reduce filing burdens and increase the efficiency of application processing. Any significant alternatives presented in the comments will be considered.

**F. Federal Rules that Overlap, Duplicate, or Conflict with the Proposed Rules**

The initiatives and proposed rules raised in this proceeding do not overlap, duplicate or conflict with any other rules.

It is further ordered, that the Commission's Office of Public Affairs, Reference Operations Division, SHALL SEND a copy of this Notice, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration. A copy of this IRFA will also be published in the Federal Register.

**Paperwork Reduction Act**

This NPRM contains either a proposed or modified information collection. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collections contained in this NPRM, as required by the Paperwork Reduction Act of 1995, Public Law No. 104-13. Public and agency comments are due at the same time as other comments on this NPRM; OMB comments are due 60 days from date of publication of this NPRM in the Federal Register. Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

**OMB Approval Number:** None.

**Title:** NPRM—Streamlining of Mass Media Applications, Rules and Processes.

**Form Nos.:** FCC 301 (3060-0027), FCC 302-AM (3060-0627), FCC 302-FM (3060-0506), FCC 302-TV (3060-0029), FCC 307 (3060-0407), FCC 314 (3060-0031), FCC 315 (3060-0032), FCC 316 (3060-0009), FCC 340 (3060-0034), FCC 345 (3060-0075), FCC 346 (3060-0016), FCC 347 (3060-0017), FCC 349 (3060-0405), FCC 350 (3060-0404), FCC 398 (3060-0754), FCC 5072 (change of address form), FCC 323 (3060-0010)/FCC 323-E (3060-0084)

**Type of Review:** New collection.

**Respondents:** Businesses or other for-profit, not-for-profit institutions.

**Number of Respondents:** 13,767 (this number includes respondents for all forms listed above).

**Estimated Time Per Response:** Varies from 2.5 hours to 1,016 hours (this represents the lowest burden/highest burden forms).

**Frequency of Response:** Reporting requirement, on occasion.

**Estimated Cost to Respondent:** \$65,898,600 (this number represents a total of all information collections involved).

**Estimated Total Annual Burden:** 174,082 hours (this number represents a total of all information collections).

**Needs and Uses:** With this NPRM, the Commission seeks comment on streamlining broadcast applications and licensing procedures, reducing administrative and filing requirements and eliminating rules and procedures that no longer advance key regulatory objectives. The Commission also seeks comment on whether to mandate electronic filing for broadcast application and reporting forms.

[FR Doc. 98-10309 Filed 4-16-98; 8:45 am]

BILLING CODE 6712-01-P

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**50 CFR Part 644**

[Docket No. 980413091-8091-01; I.D. 030998B]

RIN 0648-AK90

**Options for Implementing Vessel Monitoring Systems Requirements for Highly Migratory Species Fisheries**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Advance notice of proposed rulemaking (ANPR); request for comments.

**SUMMARY:** NMFS is requesting comments on options for implementing a recommendation of the International Commission for the Conservation of Atlantic Tunas (ICCAT), requiring each member country with vessels greater than 24 meters (78.74 ft) in overall length and fishing for ICCAT species on the high seas outside the fisheries jurisdiction (Exclusive Economic Zone, EEZ) of that country, to adopt a pilot program for a satellite-based vessel monitoring system (VMS). The 3-year ICCAT-recommended VMS pilot program is to be implemented effective January 1, 1999.

**DATES:** Written comments on this ANPR must be received on or before June 1, 1998.

**ADDRESSES:** Written comments should be addressed to Rebecca Lent, Chief, Highly Migratory Species Management Division (F/SF1), Office of Sustainable

Fisheries, NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

**FOR FURTHER INFORMATION CONTACT:**

Buck Sutter, 813-570-5447; fax: 813-570-5364; or Jill Stevenson, 301-713-2347; fax: 301-713-1917.

**SUPPLEMENTARY INFORMATION:**

**Background**

At the 1997 annual meeting held in Madrid, Spain, ICCAT adopted a recommendation that each member country institute a VMS pilot project for vessels greater than 24 meters (78.74 ft) in total length fishing on the high seas outside the EEZ of a member country. The ICCAT recommendation calls for each member country to require the installation of a VMS unit on 10 percent of the vessels or on 10 qualified vessels, whichever is greater, that target fisheries under ICCAT jurisdiction. In order for the United States to meet ICCAT obligations, 10 U.S. vessels must be equipped with operational VMS units by January 1, 1999.

The Secretary of Commerce has the responsibility, under the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*), to implement ICCAT recommendations. Fisheries that are affected by the ICCAT recommendation include those that target Atlantic swordfish and Atlantic tuna (Atlantic albacore, bluefin, bigeye, skipjack and yellowfin tunas) in waters outside the U.S. EEZ. NMFS is developing a program to implement the ICCAT recommendation and is seeking public comment's before proceeding with program development and implementation by January 1, 1999. A draft plan of the U.S. program must be provided to ICCAT by June 1, 1998.

The U.S. Atlantic swordfish fishery is managed under the Fishery Management Plan for Atlantic Swordfish and its implementing regulations at 50 CFR part 630, under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) and ATCA. The Atlantic tunas fishery is managed under the authority of ATCA and regulations at 50 CFR part 285. Commercial vessels of the United States fishing in the Atlantic Ocean must obtain federal fisheries permits to land swordfish and tunas (50 CFR 630.4 and 50 CFR 285.21, respectively). In addition, under the High Seas Fishing Compliance Act (HSFCA) of 1995 and its implementing regulations (50 CFR part 300), U.S. vessels fishing beyond the EEZ are required to obtain a HSFCA permit and comply with applicable requirements, including reporting.

The ICCAT VMS pilot program applies only to vessels larger than 24

meters (78.74 ft) fishing for highly migratory species on the high seas, outside the EEZ of a member country. The most direct mechanism NMFS has to identify U.S. vessels that fulfill these ICCAT requirements is to query the HSFCA database for vessels that meet the ICCAT size criteria. The subset of HSFCA permitted vessels 79 feet and larger was further reduced by identifying which vessels also hold an Atlantic swordfish and/or Atlantic tuna permit. NMFS estimates that approximately 33 U.S. vessels meet all ICCAT requirements. However, some of these vessels (e.g., trawling vessels) do not target highly migratory fish species, but hold HMS permits to allow retention of incidentally caught swordfish and tunas. These vessels would not be included in the pilot program because the ICCAT recommendation specifies selection of vessels targeting species under ICCAT jurisdiction. Excluding these trawling vessels, approximately 20 U.S. commercial vessels fit the criteria set forth by the ICCAT recommendation for the VMS pilot program; therefore, the United States must have at least 10 vessels equipped with operational VMS units by January 1, 1999, to meet ICCAT obligations.

VMS is an automated, real-time, satellite-based tracking system coupled with a Global Positioning System (GPS) that obtains accurate position reports of vessels at sea. Real-time vessel location information is sent automatically from a transceiver on board the fishing vessel. ICCAT requires that any VMS used in the pilot program: (1) be tamper proof; (2) be fully automatic and operational at all times regardless of environmental conditions; (3) provide real time data; and (4) provide latitude and longitude, with a position accuracy of 500 meters or better. Several companies manufacture and distribute VMS units. Not all systems, however, are compatible. NMFS has initially determined that system compatibility is necessary to avoid confusion and to establish effective, cost-efficient communication protocols. The use of VMS by NMFS in other fisheries is discussed in 59 FR 15180, March 31, 1994. In addition to the four ICCAT VMS requirements listed above, the following system parameters have been identified by NMFS for the use of VMS in other fisheries, and will be required components for the ICCAT VMS pilot program: (1) A fully integrated International Maritime Satellite (Inmarsat)-C and GPS Transceiver; (2) flexible position reporting capabilities; (3) acceptance (e.g., trawling vessels) by

the International Maritime Organization as meeting the requirements for the Global Maritime Distress and Safety System; (4) password protected configuration to prevent unauthorized reconfiguration of the transceiver; (5) incorporation of a low-cost data reporting mode over the signal channel to allow the transmission of the vessel identifier and the location of the vessel; (6) capability of sending and receiving Telex, E-mail and computer data; (7) secure, private two-way communications; (8) capability to poll the transceiver unit remotely to determine vessel position; (9) ability to automatically generate position reports during power up, power down, antennae disconnection, and antenna blockage; (10) global coverage; and (11) ability to store and forward communication.

The installation of a VMS unit on board high-seas fishing vessels will provide several benefits to the vessel and the supporting industries. A VMS transceiver is capable of sending and receiving confidential communications (data and text messages) with the addition of a personal computer. A personal computer, however, is not part of the required system for the ICCAT VMS pilot program, although there would be benefits to the vessel owner or operator. Secure communications with business partners, owners and/or seafood dealers could provide participating vessels a mechanism to market their products in a manner that could enhance ex-vessel price and increase the vessel's competitive advantage. The captain and crew could also communicate with family regardless of distance from shore. The communication linkage with shore, via the VMS units, would allow a vessel to fish more efficiently and decrease the incidence of interrupted trips. For example, broken gear could be ordered while at sea, and shipped to a convenient location or brought out on another vessel, reducing the time wasted traveling to retrieve needed gear that could otherwise have been spent fishing.

The VMS units will provide an enhanced safety feature to the fishing vessel. Qualified VMS units have a safety feature on the transceiver that could be easily activated so that an immediate distress signal could be sent from anywhere in the Atlantic Ocean and alert rescue authorities of the vessel's exact real-time position. The VMS unit would also provide the added safety of a second GPS on board. For example, in the Hawaii longline pilot VMS study between January 1, 1996, and March 15, 1997, the U.S. Coast

Guard estimated that the VMS assisted in approximately 120 search and rescue cases.

Another benefit could be that vessels targeting swordfish that participate in the ICCAT VMS program would be eligible for the 1998 directed swordfish closure VMS pilot program. Under that program, a vessel with a qualified VMS unit can apply for an Exempted Fishing Permit and will be allowed to retain swordfish on board the fishing vessel after the directed swordfish fishery has closed, provided all requirements to participate in that program are met. Swordfish can then be offloaded in a location and time that maximizes ex-vessel price. Information on the current swordfish pilot program can be obtained from NMFS, Highly Migratory Species Division (SEE ADDRESSES). NMFS is also investigating the possibility of providing low-interest loans for this program through the Fishing Finance Program.

The ICCAT VMS pilot study will allow NMFS to monitor vessel position on a real-time basis anywhere in the Atlantic Ocean. All automated data reports received by NMFS to monitor vessel positions will be treated consistent with NMFS guidelines for confidential information. In the Hawaii longline VMS study, NMFS determined that remote vessel monitoring greatly enhanced the effectiveness and efficiency in enforcing regulatory constraints on a high-seas fishery. Installation of VMS units enabled law enforcement to monitor a high percentage of the vessels participating in the longline fishery, at a greatly reduced cost in comparison to traditional surveillance methods (i.e., aircraft and surface vessels).

The cost of the VMS is approximately \$3,500 to \$5,000 per vessel for the initial purchase of the equipment, including the transceiver and antenna. Installation of the equipment will cost approximately \$1,000, and communication charges for required automated position reports are about \$2.50 per day. Repair and maintenance costs may approach \$1,000 per year. Additional costs would include the purchase of an optional personal computer and text messages (approximately \$0.01 per character) that are sent or received by the vessel.

#### Alternatives

Should it be determined that rulemaking is necessary to implement this mandatory ICCAT program, NMFS is currently considering the following alternatives to implement the ICCAT VMS pilot program:

(1) NMFS would solicit 10 volunteers from the qualified HSFCA and Highly

Migratory Species (HMS) permit (Atlantic swordfish and Atlantic tunas) database with vessel lengths greater than 24 meters (78.74 ft) and utilizing longline gear to either purchase or use existing VMS equipment that qualifies under the requirements set forth in this Advanced Notice of Proposed Rulemaking (ANPR) for the duration of this 3-year project.

(2) NMFS would select 10 qualified vessels (holders of valid HSFCA and HMS permits, with vessel lengths greater than 24 meters (78.74 ft), and utilizing longline gear) and require purchase of a qualified VMS unit, as described by this ANPR. These vessels would be required to send automated position reports over the 3-year period covered by this pilot study.

(3) NMFS would require purchase of a qualified VMS unit, as described by this ANPR, by all holders of valid HSFCA and HMS permits with vessel lengths greater than 24 meters (78.74 ft), that fish with longline gear. These vessels would be required to send automated position reports over the 3-year period covered by this pilot study.

(4) NMFS would require purchase of a qualified VMS unit, as described by this ANPR, by all holders of an HMS

permit with a vessel length greater than 24 meters (78.74 ft) and utilizing longline gear, regardless of the possession of a HSFCA permit. These vessels would be required to send automated position reports over the 3-year period covered by this pilot study.

NMFS will not consider purchasing the individual VMS units for the ICCAT pilot program. The western Pacific longline pilot VMS program was funded by the government solely for the purposes of testing the application of VMS technology in longline fisheries. That study has been completed, and the study report is available from NMFS (See ADDRESSES). As a result of the success of the Hawaii VMS pilot program, NMFS has pursued the use of VMS in other fisheries to improve the enforcement of fisheries regulations. Installation of a VMS unit is now required by NMFS in other U.S. fisheries, at the vessel owners' or operators' expense, including, but not limited to, the Western Pacific Crustacean Fishery, Atlantic Sea Scallop Fishery, Northeast Multispecies Fishery, and Alaska Groundfish Fisheries. NMFS has convened an internal team to discuss the potential benefits of VMS in

HMS fisheries and will be preparing a required document to ICCAT by June 1, 1998, outlining the planned implementation of the ICCAT VMS pilot program for the United States.

#### Request For Comments

NMFS solicits comments on implementation of the ICCAT requirement to initiate, by January 1, 1999, a VMS pilot program for vessels larger than 24 meters (78.74 feet), that fish outside the United States EEZ. Comments received on this ANPR will assist NMFS in determining the options for rulemaking to implement the requirements of this international agreement.

#### Classification

This advance notice of proposed rule making has been determined to be not significant for purposes of E.O. 12866.

## Notices

Federal Register

Vol. 63, No. 74

Friday, April 17, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### DEPARTMENT OF AGRICULTURE

#### Animal and Plant Health Inspection Service

[Docket No. 98-042-1]

#### National Wildlife Services Advisory Committee (Formerly Known as the National Animal Damage Control Advisory Committee); Notice of Solicitation for Membership

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice of solicitation for membership.

**SUMMARY:** We are giving notice that we anticipate renewing the National Wildlife Services Advisory Committee for a 2-year period. The Secretary is soliciting nominations for membership for this Committee.

**DATES:** Consideration will be given to nominations received on or before June 1, 1998.

**ADDRESSES:** Nominations should be addressed to the person listed under **FOR FURTHER INFORMATION CONTACT**.

**FOR FURTHER INFORMATION CONTACT:** Mr. Martin Mendoza, Director, Operational Support Staff, WS, APHIS, 4700 River Road Unit 87, Riverdale, MD 20737-1234, (301) 734-7921.

**SUPPLEMENTARY INFORMATION:** The National Wildlife Services Advisory Committee (the Committee) advises the Secretary of Agriculture on policies, program issues, and research needed to conduct the Wildlife Services (WS) program. The Committee also serves as a public forum enabling those affected by the WS program to have a voice in the program's policies.

The Committee Chairperson and Vice Chairperson shall be elected by the Committee from among its members.

Terms will expire for the current members of the Committee in June 1998. We are soliciting nominations from interested organizations and individuals

to replace members on the Committee. An organization may nominate individuals from within or outside its membership. The Secretary will select members to obtain the broadest possible representation on the Committee, in accordance with the Federal Advisory Committee Act (Pub. L. 92-463) and U.S. Department of Agriculture (USDA) Regulation 1041-1. Equal opportunity practices in line with the USDA policies, will be followed in all appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by the Department, membership should include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities.

Done in Washington, DC, this 13th day of April 1998.

**Charles P. Schwalbe,**  
*Acting Administrator, Animal and Plant Health Inspection Service.*

#### National Oceanic and Atmospheric Administration

#### Proposed Collection; Comment Request

**TITLE:** Sea Grant Control.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

**DATES:** Written comments must be submitted on or before June 16, 1998.

**ADDRESSES:** Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington DC 20230.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument(s) and instructions should

be directed to Dr. Francis M. Schuler; Executive Director, National Sea Grant College Program, NOAA (R/SG), Silver Spring, MD 20910 (301-713-2445).

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

NOAA's Sea Grant Program exists to increase the understanding, assessment, development, utilization, and conservation of the Nation's ocean, coastal, and Great Lakes resources. It does this by promoting a strong educational base, responsive research, and training. Grant monies are available for related activities. NOAA Form 90-1 summarizes certain information about the content of grant proposals, especially information about the organizations and personnel that would be involved. The information is needed to ensure that the terms and conditions of the law will be met.

##### II. Method of Collection

The information is submitted on a form as part of the application process.

##### III. Data :

*OMB Number:* 0648-0008.

*Form Number:* NOAA Form 90-1.

*Type of Review:* Regular Submission.

*Affected Public:* Not-for-profit

institutions, State or local governments.  
*Estimated Number of Respondents:*

40.

*Estimated Time Per Response:* 30 minutes.

*Estimated Total Annual Burden*

*Hours:* 20 hours.

*Estimated Total Annual Cost:* \$0 (no capital expenditures).

##### IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or

included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: April 13, 1998.

Linda Engelmeier,  
Departmental Forms Clearance Officer, Office  
of Management and Organization.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Licensing of Private Remote-Sensing Space Systems

**ACTION:** Proposed collection; comment request.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104-13 (44 U.S.C. 3506(c)(2)(A)).

**DATES:** Written comments must be submitted on or before June 16, 1998.

**ADDRESSES:** Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Richard Roberts, NOAA/OFA 1x1, Station 8118, 1305 East-West Highway, Silver Spring, MD 20910 (301-713-3525, ext. 115).

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

Pub. L. 102-555 requires that any person subject to the jurisdiction of the United States who operates a private remote-sensing space system must obtain a license. Before issuing such a license NOAA must obtain certain information (see 15 CFR 960) in order for it to determine whether U.S. interests will be protected. NOAA is currently working on a revision of the applicable regulations, but some issues concerning those revisions may not be resolved prior to the expiration of the Office of Management and Budget's Paperwork Reduction Act approval of the existing regulations. This notice announces NOAA's intent to request extension of that approval for the

existing requirements so that they can remain in force until the revised requirements take effect.

##### II. Method of Collection

No forms are used. Respondents must address the requirements as set forth in the regulation.

##### III. Data

**OMB Number:** 0648-0174.

**Form Number:** None.

**Type of Review:** Regular Submission.

**Affected Public:** Businesses and other for-profit.

**Estimated Number of Respondents:** 6.

**Estimated Time Per Response:** 16 hours.

**Estimated Total Annual Burden**

**Hours:** 96 hours.

**Estimated Total Annual Cost:** \$0 (no capital expenditures).

##### IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: April 14, 1998.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[I.D. 033198B]

RIN 0648-AH77

#### Atlantic Shark Fisheries; Notice of Availability

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** NMFS announces that the Highly Migratory Species Management Division has prepared a draft consideration of the economic effects and potential alternatives to the 1997 quotas on the Atlantic large coastal shark fishery as ordered by the Middle District Court of Florida, Tampa Division, on February 26, 1998. Written comments are requested from the public.

**DATES:** Written comments must be received on or before April 24, 1998.

**ADDRESSES:** Send comments to Rebecca Lent, Chief, Highly Migratory Species Management Division (F/SF1), National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910. Requests for copies of the draft should be sent to Margo Schulze at the same address.

**FOR FURTHER INFORMATION CONTACT:** Margo Schulze or Karyl Brewster-Geisz, 301-713-2347; fax: 301-713-1917.

**SUPPLEMENTARY INFORMATION:** The fishery for Atlantic sharks is managed under the Fishery Management Plan for Sharks of the Atlantic Ocean prepared by NMFS under authority of section 304(g) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), as amended, and was implemented on April 26, 1993, through regulations found at 50 CFR part 678.

On April 2, 1997 (62 FR 16648), NMFS reduced the large coastal shark commercial quota and recreational bag limit by 50 percent as proposed, with an exception for an additional recreational allowance of two Atlantic sharpnose sharks per person per trip. The prohibition on possession of white sharks was modified to allow for a catch-and-release-only recreational fishery. Otherwise, all measures were implemented as proposed. Partly because NMFS received comments that indicated the proposed measures may have a significant economic impact on a substantial number of small entities and because it wanted to ensure that the impacts were thoroughly analyzed, NMFS prepared a Final Regulatory Flexibility Analysis (FRFA) that assessed the economic impacts of the regulation on small entities engaged in the Atlantic shark fishery in the final rule. In that FRFA, NMFS reaffirmed its conclusion from the proposed rule stage that the 1997 quotas would not have a significant economic impact on a substantial number of small entities engaged in the large coastal shark fishery.

On May 2, 1997, a coalition of commercial shark fishermen, dealers, and organizations sued the Secretary of Commerce (Secretary) to set aside the 1997 commercial shark quotas based on allegations of uncertainty in the data used in stock assessments, on lack of international management, and on NMFS' determination that there would be no significant economic impact on a substantial number of small entities engaged in the Atlantic shark fishery. On February 27, 1998, Judge Steven D. Merryday, U.S. District Court, Middle District of Florida, Tampa Division, issued an amended order that found "that the Secretary acted within his regulatory discretion in setting the quotas but failed to conduct a proper analysis to determine the quota's economic effect on small businesses" (p. 1). Judge Merryday ordered that the agency submit further analyses on or before May 15, 1998, and retained jurisdiction over the case pending review of the analyses. The quotas are maintained until further order of the Court.

The draft consideration of the economic effects and potential alternatives to the 1997 quotas on the Atlantic large coastal shark fishery responds to the judicial order. Public comment is requested on the assumptions, analysis, and conclusions in the draft document. NMFS must submit the final document to the United States District Court for the Middle District of Florida, Tampa Division, on or before May 15, 1998.

NMFS is soliciting comments on what factors (e.g., percentage reduction in gross revenues, one-time total reduction in gross revenues), singly or in aggregate, would force a participant to cease operations in one fishery or in all fisheries, and where displaced fishing effort might be directed as a result of regulations in the Atlantic shark fishery. NMFS is also soliciting comments and data on the costs of re-rigging from gears used in the Atlantic shark fishery to participate in other fisheries.

**Authority:** 16 U.S.C. 1801 *et seq.*

**Dated:** April 13, 1998.

**Gary C. Matlock,**

*Director, Office of Sustainable Fisheries,  
National Marine Fisheries Service.*

**BILLING CODE 3510-22-F**

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[Docket No. 980401083-8083-01 ; I.D. 021398C]

RIN 0648-ZA36

#### Financial Assistance for Research and Development Projects in the Northeastern Coastal States; Marine Fisheries Initiative (MARFIN)

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** NMFS announces that funding will be available to assist persons in carrying out research and development projects that optimize the use of fisheries in the Northeastern Coastal States, focusing on the New England region. Priority funding consideration in 1998 is given to projects involving the assimilation and analysis of economic, social, and cultural information to assist in the formulation of marine fishery management decisions. NMFS issues this notice describing the conditions under which applications will be accepted and selected for funding.

**DATES:** Applications for funding under this program will be accepted between April 17, 1998 and 5 p.m. eastern daylight time on May 18, 1998. Applications received after that time will not be considered for funding.

**ADDRESSES:** Send applications to: Harold C. Mears, Director, State, Federal & Constituent Programs Office, Northeast Regional Office, NMFS, One Blackburn Drive, Gloucester, MA 01930. Copies of Stock Assessment Workshop (SAW) Reports are available from: Helen Mustafa, Northeast Fisheries Science Center, NMFS, 166 Water Street, Woods Hole, MA 02543-1026. No facsimile application will be accepted.

**FOR FURTHER INFORMATION CONTACT:** Harold C. Mears, 978-281-9243.

**SUPPLEMENTARY INFORMATION:**

#### I. Authority

The Secretary of Commerce (Secretary) is authorized under 15 U.S.C. 713c-3 to conduct any biological, technological, or other research pertaining to American fisheries and, under 16 U.S.C. 742f, to take such steps as may be required for the development, advancement, management, conservation, and protection of the fisheries resources.

## II. Catalog of Federal Domestic Assistance

This program is described in the "Catalog of Federal Domestic Assistance" (CFDA), under program number 11.433, Marine Fisheries Initiative.

## III. Program Description

MARFIN financial assistance began in FY 1986 in the NMFS Southeast Region and is being expanded to New England for the first time in FY 1998. MARFIN is a competitive Federal assistance program that promotes and endorses programs which seek to optimize benefits from U.S. marine fishery resources through cooperative research and development efforts. Projects to be funded under the Northeastern MARFIN Program are envisioned as multi-sector partnerships to complement the goals and objectives of the NOAA Fisheries Strategic Plan, a copy of which is available from the Northeast Regional Office (see **ADDRESSES**). The Plan's elements include shared stewardship responsibilities relating to sustainable fisheries, recovered protected species, and healthy living marine resource habitat. Applications from multiple cooperating applicants that address conservation and management needs over the broad scope of a fishery or fisheries are encouraged.

Overall MARFIN emphasis will be placed upon funding projects that have the greatest probability of recovering, maintaining, improving, or developing fisheries; improving the understanding of factors affecting recruitment success; and/or generating increased values and opportunities for commercial and recreational marine fishery industries. During this first year of the Northeastern MARFIN Program, priority funding consideration will be given to projects involving the assimilation and analysis of social and cultural information to assist in the formulation of marine fishery management decisions. Projects will be evaluated as to the likelihood of achieving these benefits through both short-term and long-term research efforts, with consideration of the magnitude of the eventual economic or social benefits that may be realized. However, short-term projects which emphasize immediate benefits will receive priority consideration.

## IV. Funding Availability

This solicitation announces that funding of approximately \$500,000 will be available in FY 1998. There is no guarantee that sufficient funds will be available to make awards for all approved projects. Publication of this

notice does not obligate NMFS to award any specific project or to obligate all or any parts of the available funds.

#### V. Matching Requirements

Cost-sharing is not required for the MARFIN program. If an applicant chooses to share costs, and if that application is selected for funding, the applicant will be bound by the percentage of the cost share reflected in the award document signed by the Grants Officer.

#### VI. Type of Funding Instrument

The cooperative agreement has been determined to be the preferred appropriate funding instrument, dependent upon the nature and scope of the submitted project(s). NMFS is substantially involved in developing program research priorities, conducting cooperative activities with recipients, and evaluating the performance of recipients for effectiveness in meeting national and regional goals for fishery research in the northeastern United States.

#### VII. Eligibility Criteria

A. Applications for MARFIN projects may be made, in accordance with the procedures set forth in this notice, by:

1. Any individual who is a citizen or national of the United States.
2. Any individual who is a citizen of the Northern Mariana Islands (NMI), being an individual who qualifies as such under Section 8 of the Schedule on Transitional Matters attached to the constitution of the NMI.
3. Any individual who is a citizen of the Republic of the Marshall Islands, Republic of Palau, or the Federated States of Micronesia.
4. States or local governments, universities, corporations, partnerships, or other entity, non-profit or otherwise, if such an entity is a citizen of the United States within the meaning of section 2 of the Shipping Act, 1916, as amended (46 app. U.S.C. 802).

B. Federal agencies, Federal instrumentalities, Federal employees, including NOAA employees (full-time, part-time, and intermittent personnel or their immediate families), and NOAA offices or centers are not eligible to submit an application under this solicitation, or aid in the preparation of an application during the 30-day solicitation period, except to provide information about the MARFIN program and the priorities and procedures included in this solicitation. However, NOAA employees are permitted to provide information about ongoing and planned NOAA programs and activities that may have implication for an

application. Potential applicants are encouraged to contact Harold C. Mears at the NMFS Northeast Regional Office (see ADDRESSES) for information on NOAA grant programs.

#### VIII. Award Period

Generally, the awards will be for a period of 1 year, but no more than 18 months at a time. If an application is selected for funding, NMFS has no obligation to provide any additional prospective funding in connection with that award in subsequent years. Any subsequent proposal to continue work on an existing project must be submitted to the competitive process for consideration and will not receive preferential treatment. Renewal of an award to increase funding or to extend the period of performance is at the total discretion of the Department of Commerce (DOC).

#### IX. Indirect Costs

The budget may include an amount for indirect costs if the applicant has an established indirect cost rate with the Federal government. The total dollar amount of the indirect costs proposed in an application under this program must not exceed the indirect cost rate negotiated and approved by a cognizant Federal agency prior to the proposed effective date of the award, or 100 percent of the total proposed direct costs dollar amount in the application, whichever is less. The Federal share of the indirect costs may not exceed 25 percent of the total proposed direct costs. Applicants with indirect cost rates above 25 percent may use the amount above the 25-percent level up to the 100-percent level as part of the non-Federal share. A copy of the current, approved, negotiated Indirect Cost Agreement with the Federal Government, if applicable, must be included with the application.

#### X. Application Forms and Kit

Before submitting an application under this program, applicants should contact the NMFS Northeast Regional Office for a copy of this solicitation's MARFIN Application Package (see ADDRESSES).

Applications for project funding under this program must be complete and in accordance with instructions in the MARFIN Application Package. Each application must include all specified sections as listed in the Application Package, including, but not limited to the following: Cover sheet (SF 424), Project Summary, Project Budget, and Narrative Project Description (Goals & Objectives; Impacts; Evaluation; Need for Governmental Assistance;

Participation by Persons Other Than the Applicant; Federal, State and Local Government Activities and Permits; Project Statement of Work; and Project Management). Project applications must identify the principal participants and include copies of any agreements describing the specific tasks to be performed by all participants. Applications should give a clear presentation of the proposed work, the methods for carrying out the project, its relevance to managing and enhancing the use of fishery resources in the New England Coastal States, and cost estimates as they relate to specific aspects of the project. Budgets must include a detailed breakdown by category of expenditures with appropriate justification for both the Federal and non-Federal shares. Applicants should not assume prior knowledge on the part of NMFS as to the relative merits of the project described in the application. Applications are not to be bound in any manner and must be printed on one side, only. All incomplete applications will be returned to the applicant. Ten copies (one signed original and nine signed copies) of each application are required and must be submitted to the NMFS Northeast Regional Office, State, Federal & Constituent Programs Office (see ADDRESSES). OMB has approved 10 copies, under Approval #0648-0175.

#### XI. Project Funding Priorities

Proposals should exhibit familiarity with related work that is completed or ongoing. Where appropriate, proposals should be multi-disciplinary. Coordinated efforts involving multiple institutions or persons are encouraged. The areas of emphasis for FY 1998 are as follows: The highest priority is the development of social, economic, and cultural information to assist in fisheries management, focusing on the New England region. To the extent that funding may be available, the secondary priority is research which addresses species and information needs (discussed here) identified during recent Stock Assessment Workshops hosted by the NMFS Northeast Fisheries Science Center. In addition to referencing specific area(s) of special interest, proposals should state whether the research will apply to the New England coastal states only or to other areas as well.

Successful applicants may be required to collect and manage the following data in accordance with standardized procedures and formats approved by NMFS and to participate with NMFS in specific cooperative activities which will be determined by consultations

between NMFS and successful applicants before project grants are awarded:

A. Social, Economic, and Cultural Information. The following priorities concern the assimilation and analysis of socio-economic and cultural data to assist in inter-jurisdictional marine fishery management decisions.

1. Development of Input-Output Models for Marine Fishery-Related Sectors. Input-Output modeling efforts using IMPLAN software as a development platform which employs common data and analytical protocols for each geographical jurisdiction (e.g., state) are strongly encouraged. At the commercial harvest level, cost and employment data by major gear types are required. Similar product flow and employment data would be desirable for shore-side businesses, including dealers, processors, wholesalers and retailers. For recreational related service and retail industries, data are required on the number of establishments, value of sales, trade flows and employees. Appropriate commercial and recreational fishery harvest and expenditure data available from the NMFS Northeast Fisheries Science Center can be requested during the course of the investigation. A demonstrated cooperative relationship by the applicant with appropriate state marine resource agencies will strengthen the proposal.

2. Development of Fishing Community Profiles. Develop studies to identify and characterize fishing communities, with emphasis on the coastal New England states, particularly communities involved in critical fisheries, i.e., those where stocks are overfished and/or highly restrictive management measures are being proposed or implemented. A fishing community is defined in the Magnuson-Stevens Fishery Conservation and Management Act as "a community which is substantially dependent on or substantially engaged in the harvest or processing of fishery resources to meet social and economic needs, and includes fishing vessel owners, operators and crew and United States fish processors that are based in such community." In profiling these communities, it is important to include a description of current and historical participation in each fishery, the number of fishermen, vessels, dealers, wholesalers, processors, and fishery-dependent industries; basic demographic data on harvesting and processing sector households; and an ethnographic description of relevant social, cultural, and economic institutions.

Cooperation among applicants, academic researchers, state fishery management agencies, and fishing industry (harvesting, processing and marketing) associations will enhance proposals addressing this priority.

B. Studies in Support of Stock Assessments for Northeast Fishery Resources. The following needs for research and management information are based upon data priorities discussed during recent SAW hosted by the NMFS Northeast Fisheries Science Center (NEFSC). Copies of SAW reports are available from the NEFSC (see ADDRESSES).

1. Organize and conduct a workshop on closed areas, their size and location, and opening/closing rotation strategies as a tool in fishery management, with special reference to the management of sea scallops.

2. Conduct augmented sampling of fishing areas which are presently closed to fishing and, in particular, develop monitoring sites for benthos. The purpose of this work is to develop data sufficient to assess long-term effects of bottom-tending fishing gear.

3. Develop a module for catch/survey methods for incorporation into the Woods Hole Assessment "Toolbox." In particular, this work should produce enhancements to the Collie/Sissenwine stock assessment modeling software.

4. Conduct basic biological sampling of Atlantic halibut landings to record and analyze basic population biology.

5. Conduct mark-recapture studies, shell biochemical studies, clapper/live animal ratios, and longevity of clappers to improve the estimation of natural mortality rate of surf clams, based on historical ageing information and field and laboratory studies.

## XII. Evaluation Criteria

Cooperatively developed applications that propose activities of two or more qualified applicants to address important fishery conservation and management issues or problems identified in the Project Funding Priorities for this solicitation may be evaluated as a group by NMFS. If selected for funding, individual cooperative awards may be made to each individual applicant. Application procedures for this type of proposal are also included in the FY 1998 MARFIN Application Package.

A. Unless otherwise specified by statute, in reviewing applications for cooperative agreements, including those that include consultants and contracts, NOAA will make a determination regarding the following:

1. Is the involvement of the applicant necessary to the conduct of the project

and the accomplishment of its goals and objectives?

2. Is the proposed allocation of the applicant's time reasonable and commensurate with the applicant's involvement in the project?

3. Are the proposed costs for the applicant's involvement in the project reasonable and commensurate with the benefits to be derived from the applicant's participation?

B. Applications meeting the above requirements will be forwarded for technical evaluation. Applicants submitting applications not meeting the above requirements will be notified. Evaluations may involve experts from NOAA organizations as well as from non-NOAA entities (such as universities, state fishery agencies, and members of the fishing industry). All reviewers will be required to sign non-disclosure and conflict of interest statements concerning the application they are reviewing. The reviewers will assign scores to applications based on the following evaluation criteria:

1. Does the proposal have a clearly stated goal(s) with associated objectives that meet the needs outlined in the Project Narrative? (30 points)

2. Does the proposal clearly identify and describe, in the Project Outline and Statement of Work, scientifically valid methodologies and analytical procedures that will adequately address project goals and objectives? (30 points)

3. Do the principal investigators provide a scientifically realistic timetable to enable full accomplishment of all aspects of the Statements of Work? (20 points)

4. Do the principal investigators define how they will maintain stewardship of the project performance, finances, cooperative relationships, and reporting requirements for the proposal? (10 points)

5. Are the proposed costs appropriate for the scope of work proposed? (10 points)

## XIII. Selection Procedures

All applications, along with their technical evaluation comments and scores, will be considered by a NMFS Science Group and ranked into two categories: "Recommended," and "Not Recommended." Proposals ranked as "Not Recommended" will not be given further consideration for selection and funding. Proposals ranked as "Recommended" will be presented to a Constituent Panel of non-NOAA fishery experts who will individually consider the significance of the problem addressed in each project proposal, the technical scores and evaluations, and the need for funding. These panel

members will provide individual recommendations to NMFS on each proposal classified as "Recommended." No consensus advice will be given by the panel. The non-NOAA panel members' individual comments, recommendations and evaluations, the recommendations of the NMFS Science Group, and the NMFS Program Officer (serving in an advisory capacity) will be considered, in accordance with project funding priorities, by the Regional Administrator, Northeast Region. The Regional Administrator, in consultation with the Assistant Administrator for Fisheries, will (a) determine which projects do not substantially duplicate other projects which are currently being funded by NOAA or are approved for funding by other Federal offices, (b) select the projects to be funded, (c) determine the amount of funds available for each project, and (d) determine which components of the selected projects shall be funded. The exact amount of funds awarded, the final scope of activities, the project duration, and specific NMFS cooperative involvement with the activities of each project will be determined in pre-award negotiations among the applicant, the NOAA Grants Office, and the NMFS Program Staff. Projects must not be initiated by recipients until a signed financial assistance award is received from the NOAA Grants Office. Successful applicants will be generally recommended within 210 days from the date of publication of this notice. The earliest start date of awards will be approximately 90 days after each project is selected and after all NMFS/applicant negotiations of cooperative activities have been completed (the earliest start date of awards will be approximately 300 days after the date of publication of this notice). Applicants should consider this selection and processing time in developing requested start dates for their applications.

#### XIV. Other Requirements

**A. Federal policies and procedures.** Recipients and subrecipients are subject to all Federal laws and Federal and DOC policies, regulations, and procedures applicable to Federal financial assistance awards. Women and minority individuals and groups are encouraged to submit applications under this program. **B. Past performance.** Any first-time applicant for Federal grant funds under this announcement is subject to a pre-award accounting survey prior to execution of the award. Unsatisfactory performance under prior Federal awards may result in an application not being considered for funding.

**C. Pre-award activities.** If applicants incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal or written assurance that they may have received, there is no obligation on the part of DOC to cover pre-award costs.

**D. No obligation of future funding.** If an application is selected for funding, DOC has no obligation to provide any additional future funding in connection with the award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of DOC.

**E. Delinquent Federal debts.** No award of Federal funds shall be made to an applicant or to its subrecipients who have any outstanding delinquent Federal debt or fine until either:

1. The delinquent account is paid in full;
2. A negotiated repayment schedule is established and at least one payment is received; or
3. Other arrangements satisfactory to DOC are made.

**F. Name check review.** All non-profit and for-profit applicants are subject to a name check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of, or are presently facing, such criminal charges as fraud, theft, perjury, or other matters that significantly reflect on the applicant's management, honesty, or financial integrity. Potential non-profit and for-profit recipients may also be subject to reviews of Dun and Bradstreet data or other similar credit checks.

**G. Primary applicant certifications.** All primary applicants must submit a completed Form CD 511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying," and the following explanations are hereby provided:

1. **Nonprocurement debarment and suspension.** Prospective participants (as defined at 15 CFR 26.105) are subject to 15 CFR part 26, "Nonprocurement Debarment and Suspension," and the related section of the certification form prescribed above applies;

2. **Drug-free workplace.** Grantees (as defined at 15 CFR 26.605) are subject to 15 CFR part 26, subpart F, "Government-wide Requirements for Drug-Free Workplace (Grants)," and the related section of the certification form prescribed above applies; also please enter the Principal Place of Performance, i.e. where the work will be done, on the form.

3. **Anti-lobbying.** Persons (as defined at 15 CFR 28.105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form prescribed above applies to applications/bids for grants, cooperative agreements, contracts for more than \$100,000, loans and loan guarantees for more than \$150,000, or the single family maximum mortgage limit for affected programs, whichever is greater; and

4. **Anti-lobbying disclosures.** Any applicant who has paid or will pay for lobbying using any funds must submit a Form SF-LLL, "Disclosure Form to Report Lobbying," as required under 15 CFR part 28, appendix B.

**H. Lower tier certifications.** Recipients shall require applicants/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD 512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions and Lobbying" and disclosure form SF-LLL, "Disclosure of Lobbying Activities." Form CD 512 is intended for the use of recipients and should not be transmitted to DOC. A form SF-LLL submitted by any tier recipient or subrecipient should be submitted to DOC in accordance with the instructions contained in the award document.

**I. False statements.** A false statement on the application is grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

**J. Intergovernmental review.** Applications under this program are subject to the provisions of E.O. 12372, "Intergovernmental Review of Federal Programs."

**K. Requirement to buy American-made equipment and products.** Applicants are hereby notified that they are encouraged, to the extent feasible, to purchase American-made equipment and products with funding provided under this program.

#### Classification

Prior notice and an opportunity for public comments are not required by the Administrative Procedure Act or by any other law for this notice concerning grants, benefits, and contracts. Therefore, a regulatory flexibility analysis is not required for purposes of the Regulatory Flexibility Act.

This action has been determined to be not significant for purposes of E.O. 12866.

Cooperative agreements awarded pursuant to pertinent statutes shall be in accordance with the Fisheries Research Plan (comprehensive program of fisheries research) in effect on the date of the award.

Federal participation under the MARFIN Program may include the assignment of DOC scientific personnel and equipment. Reasonable, negotiated financial compensation will be provided under awards for the work of eligible grantee workers. Information-collection requirements contained in this notice have been approved by the Office of Management and Budget (OMB control number 0648-0175, 0348-0043 and 0348-0046) under the provisions of the Paperwork Reduction Act.

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

Public reporting burden for agency-specific collection-of-information elements, exclusive of requirements specified under applicable OMB circulars, is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this reporting burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to NMFS (see ADDRESSES).

Dated: April 10, 1998.

**Rolland A. Schmitten,**

*Assistant Administrator for Fisheries, National Marine Fisheries Services.*

BILLING CODE 3510-22-F

**COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS**

**Adjustment of Import Limits and Increase of a Guaranteed Access Level for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Costa Rica**

April 13, 1998.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs adjusting import limits and increasing a guaranteed access level.

**EFFECTIVE DATE:** April 17, 1998.

**FOR FURTHER INFORMATION CONTACT:** Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these levels, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-5850. For information on embargoes and quota re-openings, call (202) 482-3715.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for Categories 443 and 447 are being increased for swing, reducing the limits for Categories 340/640 and 342/642, respectively. Also, upon a request from the Government of Costa Rica, the U.S. Government has agreed to increase the current guaranteed access level for Category 447.

A description of the textile and apparel categories in terms of HTS numbers is available in the

**CORRELATION:** Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 62 FR 66057, published on December 17, 1997). Also see 62 FR 63520, published on December 1, 1997.

**Troy H. Cribb,**

*Chairman, Committee for the Implementation of Textile Agreements.*

**Committee for the Implementation of Textile Agreements**

April 13, 1998.

Commissioner of Customs,  
*Department of the Treasury, Washington, DC 20229.*

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on November 24, 1997, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Costa Rica and exported during the twelve-month period which began on January 1, 1998 and extends through December 31, 1998.

Effective on April 17, 1998, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit <sup>1</sup>
340/640 .....	1,044,155 dozen.

Category	Adjusted twelve-month limit <sup>1</sup>
342/642 .....	385,679 dozen.
443 .....	230,187 numbers.
447 .....	12,411 dozen.

<sup>1</sup> The limits have not been adjusted to account for any imports exported after December 31, 1997.

The current guaranteed access level (GAL) for Category 447 is being increased to 19,000 dozen. The GALs for Categories 340/640, 342/642 and 443 remain unchanged.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Troy H. Cribb,

*Chairman, Committee for the Implementation of Textile Agreements.*

[FR Doc. 98-10205 Filed 4-16-98; 8:45 am]

BILLING CODE 3510-DR-F

**CONSUMER PRODUCT SAFETY COMMISSION**

**Commission Agenda and Priorities; Public Hearing**

**AGENCY:** Consumer Product Safety Commission.

**ACTION:** Notice of public hearing.

**SUMMARY:** The Commission will conduct a public hearing to receive views from all interested parties about its agenda and priorities for Commission attention during fiscal year 2000, which begins October 1, 1999. Participation by members of the public is invited. Written comments and oral presentations concerning the Commission's agenda and priorities for fiscal year 2000 will become part of the public record.

**DATES:** The hearing will begin at 10 a.m. on May 21, 1998. Written comments and requests from members of the public desiring to make oral presentations must be received by the Office of the Secretary no later than May 7, 1998. Persons desiring to make oral presentations at this hearing must submit a written text of their presentations no later than May 14, 1998.

**ADDRESSES:** The hearing will be in room 420 of the East-West Towers Building, 4330 East-West Highway, Bethesda, Maryland 20814. Written comments, requests to make oral presentations, and texts of oral presentations should be captioned "Agenda and Priorities" and mailed to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, or delivered to

that office, room 502, 4330 East-West Highway, Bethesda, Maryland 20814. Comments, requests, and texts of oral presentations may also be filed by telefacsimile to (301) 504-0127 or by e-mail to [cpssc-os@cpssc.gov](mailto:cpssc-os@cpssc.gov).

**FOR FURTHER INFORMATION CONTACT:** For information about the hearing or to request an opportunity to make an oral presentation, call or write Rockelle Hammond, Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 504-0800, extension 1232; telefax (301) 504-0127.

**SUPPLEMENTARY INFORMATION:** Section 4(j) of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2053(j)) requires the Commission to establish an agenda for action under the laws it administers, and, to the extent feasible, to select priorities for action at least 30 days before the beginning of each fiscal year. Section 4(j) of the CPSA provides further that before establishing its agenda and priorities, the Commission shall conduct a public hearing and provide an opportunity for the submission of comments.

The Office of Management and Budget requires all Federal agencies to submit their budget requests 13 months before the beginning of each fiscal year. The Commission is formulating its budget request for fiscal year 2000, which begins on October 1, 1999.

Accordingly, the Commission will conduct a public hearing on May 21, 1998 to receive comments from the public concerning its agenda and priorities for fiscal year 2000. The Commissioners desire to obtain the views of a wide range of interested persons including consumers; manufacturers, importers, distributors, and retailers of consumer products; members of the academic community; consumer advocates; and health and safety officers of state and local governments.

The Commission is charged by Congress with protecting the public from unreasonable risks of injury associated with consumer products. The Commission enforces and administers the Consumer Product Safety Act (15 U.S.C. 2051 *et seq.*); the Federal Hazardous Substances Act (15 U.S.C. 1261 *et seq.*); the Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*); the Poison Prevention Packaging Act (15 U.S.C. 1471 *et seq.*); and the Refrigerator Safety Act (15 U.S.C. 1211 *et seq.*). Standards and regulations issued under provisions of those statutes are codified in the Code of Federal Regulations, title 16, chapter II.

While the Commission has broad jurisdiction over products used by consumers, its staff and budget are limited. Section 4(j) of the CPSA expresses Congressional direction to the Commission to establish an agenda for action each fiscal year and, if feasible, to select from that agenda some of those projects for priority attention.

Persons who desire to make oral presentations at the hearing on May 21, 1998, should call or write Rockelle Hammond, Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, telephone (301) 504-0800, telefax (301) 504-0127, or e-mail, [cpssc-os@cpssc.gov](mailto:cpssc-os@cpssc.gov), no later than May 7, 1998.

Presentations should be limited to approximately ten minutes. Persons desiring to make oral presentations must submit the written text of their presentations to the Office of the Secretary not later than May 14, 1998. The Commission reserves the right to impose further time limitations on all presentations and further restrictions to avoid duplication of presentations. The hearing will begin at 10 a.m. on May 21, 1998 and will conclude the same day.

Dated: April 14, 1998.

**Sadye E. Dunn,**

#### Prospective Grant of Exclusive Patent License

**AGENCY:** Headquarters, U.S. Army Materiel Command (AMC), DOD.  
**ACTION:** Notice.

**SUMMARY:** In accordance with the provisions of 15 U.S.C. 209(c)(1) and 37 CFR Part 404.7(a)(1)(i), AMC hereby gives notice that it is contemplating the grant of an exclusive license in the United States to practice the inventions embodied in U.S. Patent Application Serial No. 08/796,772, filed February 6, 1997, entitled "Detection of Multiple Antigens and Antibodies," and U.S. Patent Application (no number assigned), filed February 18, 1998, entitled "Method and Apparatus for Detection of Multiple Nucleic Acid Sequences and Multiple Antigens" to Epitope, Inc., having a place of business in Beaverton, Oregon.

**FOR FURTHER INFORMATION CONTACT:** Mr. Bill Medsger, Headquarters, U.S. Army Materiel Command, ATTN: AMCCC-IP,

5001 Eisenhower Ave., Alexandria, VA 22333-0001. Phone: (703) 617-2556; FAX: (703) 617-2556.

**SUPPLEMENTARY INFORMATION:** The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted, unless within sixty days from the date of this published Notice, AMC receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

## DEPARTMENT OF ENERGY

### Office of Fossil Energy; National Coal Council Meeting

**AGENCY:** Office of Fossil Energy, Department of Energy (DOE).

**ACTION:** Notice of open meeting.

**SUMMARY:** Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. No. 92-463, 86 Stat 770), notice is hereby given of a meeting of the National Coal Council.

**DATE AND TIME:** Friday, May 8, 1998, 8:30 AM.

**PLACE:** Phoenix Park Hotel, 520 North Capitol Street, NW, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE-5), Washington, DC 20585, (202) 586-3867.

**SUPPLEMENTARY INFORMATION:**

*Purpose of the Council:* To provide advice, information, recommendations to the Secretary of Energy on matters relating to coal and coal industry issues.

**Tentative Agenda**

- Call to order and opening remarks by Clifford Miercort, Chairman of the National Coal Council
- Remarks by the Honorable Federico Peña, Secretary of Energy (invited).
- Remarks by the Honorable Frank H. Murkowski, Chairman of the Senate Energy Committee (invited).
- Remarks by Congressman Michael G. Oxley (invited).
- Remarks by the Honorable James Hoecker, Chairman of the Federal Energy Regulatory Commission (invited).
- Remarks by Fred L. Smith, Jr., President of the Competitive Enterprise Institute, on "Climate Change Policy and its Implications" (invited).
- Administrative reports.
- Remarks of outgoing Chairman, Clifford R. Miercort.
- Report of the Nominating Committee and election of new officers.
- Remarks of incoming chairman.
- Public comment—10-minute rule.
- Adjournment.

*Public Participation:* The meeting is open to the public. The Chairman of the Council is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Council will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least five days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

*Transcripts:* Available for public review and copying at the Public

Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between 9:00 AM and 4:00 PM, Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 14, 1998.

**Rachel M. Samuel,**  
*Deputy Advisory Committee Management Officer.*

**DEPARTMENT OF ENERGY****National Electric and Magnetic Fields Advisory Committee**

**AGENCY:** Department of Energy.

**ACTION:** Notice of open meeting.

**SUMMARY:** Pursuant to the provisions of the Federal Advisory Committee Act (Public Law No. 92-463, 86 Stat. 770), notice is hereby given of a meeting of the National Electric and Magnetic Fields Advisory Committee.

**DATES:** Thursday, May 7, 1998: 9:00 a.m.—5:00 p.m.; Friday, May 8, 1998: 9:00 a.m.—1:30 p.m.

**ADDRESSES:** Westin City Center, 1400 M Street, NW, Washington, DC 20005.

**FOR FURTHER INFORMATION CONTACT:** Dr. Imre Gyuk, EMF Program Manager, EE-14, 1000 Independence Avenue, SW, Washington, DC 20585, (202) 586-1482.

**SUPPLEMENTARY INFORMATION:**

*Purpose of the Committee:* The National Electric and Magnetic Fields Advisory Committee (NEMFAC) advises the Department of Energy and the National Institute of Environmental Health Sciences on the design and implementation of a five-year, national electric and magnetic fields (EMF) research and public information dissemination (RAPID) program. The Secretary of Energy, pursuant to Section 2118 of the Energy Policy Act of 1992, P.L. No. 102-486, has overall responsibility for establishing the national program which includes health effects research, development of technologies to assess and manage exposures, and dissemination of information.

**Tentative Agenda**

*Thursday, May 7, 1998*

- 9:00 a.m.—Welcome and opening remarks
- 9:15 a.m.—Summary of FY98 non-Federal contributions
- 9:30 a.m.—Completion of grant research
- 10:15 a.m.—Discussion
- 10:45 a.m.—Break
- 11:00 a.m.—Report on epidemiology symposium
- 12:00 noon—Lunch

1:30 p.m.—Report on in vivo symposium

2:30 p.m.—Break

2:45 p.m.—Report on engineering symposium

3:30 p.m.—Expectations for the working group

4:00 p.m.—Discussion

5:00 p.m.—Adjourn

*Friday, May 8, 1998*

9:00 a.m.—Reports to National Academy of Sciences

9:30 a.m.—Format of final report

10:15 a.m.—Break

10:30 a.m.—Future of EMF research

11:15 a.m.—Future of EMF public communication

12:00 a.m.—Discussion

12:30 p.m.—Open time for public comments

1:30 p.m.—Adjourn

A final agenda will be available at the meeting.

*Public Participation:* The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Dr. Gyuk at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. Depending on the number of requests, comments may be limited to five minutes. The Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

*Transcript and Minutes:* A transcript and minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays. Copies of the minutes will also be available by request.

Issued at Washington, DC, on April 14, 1998.

**Rachel M. Samuel,**  
*Deputy Advisory Committee Management Officer.*

[FE Docket No. 98-19-NG]

**Office of Fossil Energy; Husky Gas Marketing Inc., Order Granting Long-Term Authorization to Import Natural Gas from Canada**

**AGENCY:** Office of Fossil Energy, DOE.

**ACTION:** Notice of Order.

**SUMMARY:** The Office of Fossil Energy of the Department of Energy gives notice that it issued DOE/FE Order No. 1373 on April 7, 1997, granting Husky Gas Marketing Inc. long-term authorization to import up to 21,881 Mcf per day of natural gas from Canada. The term extends from the date of authorization until August 1, 2003. This gas will be sold to San Diego Gas & Electric Company (SDG&E). SDG&E is a public utility which provides electric, gas, and steam service to customers in San Diego and Orange counties, California. The natural gas will be imported near Eastport, Idaho, under a supply arrangement with Husky Oil Operations Ltd.

This order is available for inspection and copying in the Office of Natural Gas & Petroleum Import and Export Activities, Fossil Energy, Room 3E-042, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585-0350, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., April 13, 1998.

**John W. Glynn,**

*Manager, Natural Gas Regulation, Office of Natural Gas & Petroleum Import and Export Activities, Office of Fossil Energy.*

BILLING CODE 6450-01-P

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 2016, WA]

#### City of Tacoma, Washington; Notice of Scoping Meeting Pursuant to the National Environmental Policy Act of 1969 for an Applicant Prepared Environmental Assessment and a Site Visit

April 13, 1998.

The Commission's regulations allow applicants to prepare their own Environmental Assessment (EA) for hydropower projects and file it with the Federal Energy Regulatory Commission (Commission) along with their license application as part of the applicant-prepared EA (APEA) process.<sup>1</sup> On February 24, 1998, the Commission approved the use of the APEA process in the preparation of license application for Tacoma Public Utilities' (Tacoma) Cowlitz Hydroelectric Project, No. 2016.

Tacoma will hold three public meetings, pursuant to the National Environmental Policy Act (NEPA) of

1969, to identify the scope of environmental issues that should be analyzed in the EA. At the scoping meetings, Tacoma will: (1) Summarize the environmental issues tentatively identified for analysis in the EA; (2) outline any resources they believe would not require a detailed analysis; (3) identify reasonable alternatives to be addressed in the EA; (4) solicit from the meeting participants all available information, especially quantitative data, on the resources at issue; and (5) encourage statements from experts and the public on issues that should be analyzed in the EA.

Although Tacoma's intent is to prepare an EA, there is the possibility that an Environmental Impact Statement (EIS) will be required. Nevertheless, this meeting will satisfy the NEPA scoping requirements, irrespective of whether an EA or EIS is issued by the Commission.

#### Scoping Meetings

The times and locations of the scoping meeting are:

##### Agency Scoping Meeting

May 5, 1998—1:00 pm to 4:00 pm, US Fish and Wildlife Service Office, 510 Desmond Drive, Sawyer Hall, Lacey, WA

##### Public Scoping Meetings

May 6, 1998—7:00 pm to 10:00 pm, Lewis County, Courthouse Annex, 345 W. Main St., Room 1, Chehalis, WA

May 7, 1998—7:00 pm to 10:00 pm, Mossyrock High School Gymnasium, Mossyrock, WA

All interested individuals, organizations, and agencies are invited and encouraged to attend any or all of the meetings to assist in identifying and clarifying the scope of environmental issues that should be analyzed in the EA.

To help focus discussions, Tacoma prepared and distributed a scoping document on April 3, 1998. Copies of the Scoping Document can be obtained by calling Joan Nichol, Harza Engineering Company, at (425) 602-4000. Copies of the document will also be available at the scoping meetings.

#### Site Visit

Tacoma has also scheduled a site visit to the Cowlitz River Project on Thursday, May 7, 1998, if sufficient interest exists. Those wishing to attend the site visit must notify Toby Freeman, Tacoma City Light at (253) 502-8862 by April 24, 1998. Also contact Toby for information on the meeting time and place.

#### Meeting Procedures

The meetings will be conducted according to the procedures used at Commission scoping meetings. Because this meeting will be a NEPA scoping meeting under the APEA process, the Commission does not intend to conduct a NEPA scoping meeting after the application and draft EA are filed with the Commission. Instead, Commission staff will attend the meetings on May 5, 6, and 7, 1998.

All the scoping meetings will be recorded by a stenographer or tape recorder, and will become part of the formal record of the proceedings for this project.

Those who choose not to speak during the scoping meetings may instead submit written comments on the project. Written comments should be mailed to: Joan Nichol, Harza Engineering Company, 2353 130th Avenue N.E., Bellevue, WA 98005, by June 8, 1998. All correspondence should show the following caption on the first page: Scoping Comments, Cowlitz River Hydroelectric Project (2016).

For further information please contact Joan Nichol at (425) 602-4000 or David Turner of the Commission at (202) 219-2844.

**Linwood A. Watson, Jr.,**

*Acting Secretary.*

BILLING CODE 6717-01-M

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

#### Notice of Application Filed With the Commission and Intent To Prepare an Environmental Impact Statement

April 13, 1998.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Proposal To Amend Minimum Flow Releases.

b. *Project No:* 77-110.

c. *Date Filed:* March 31, 1998.

d. *Licensee:* Pacific Gas and Electric Company.

e. *Name of Project:* Potter Valley Project.

f. *Location:* Eel River and East Fork Russian River, in Lake and Mendocino Counties, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Licensee Contact:* Mr. Terry Morford, Manager—Hydro Generation, Pacific Gas and Electric Company, P.O.

<sup>1</sup> 81 FERC ¶ 61,103 (1997).

box 770000, Mail Code N11C, San Francisco, CA 94177, (415) 973-4603.

i. *FERC Contact:* Dr. John M. Mudre, (202) 219-1208.

j. *Comment Date:* June 8, 1998.

k. *Description:* Pacific Gas and Electric Company (PG&E), licensee for the Potter Valley Project (FERC No. 77) has filed the final report on its 10-year study of the effects of its article 38 minimum flow schedule on salmonids, and its associated proposal for changes to the required minimum flows at the project. The flow proposal represents the culmination of negotiations among technical staff of PG&E, the California Department of Fish and Game (CDFG), the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service. Under these "Joint Recommendations" (JR), flows to the Eel River would be adjusted up to three times per day in response to changes in streamflow in the downstream Tomki Creek. The quantity of flow released would be proportional to Tomki Creek flow and would range, in normal years, from 5 to 200 cfs. During dry years, "water conservancy" measures would be implemented that could reduce releases by up to one half, but flow would never be less than 5 cfs. The JR also reserve a block of 5,000 acre-feet of water annually to maintain pre-specified flows during protracted droughts when the release schedule prescribes flow reductions in response to natural conditions.

Because the project serves as an inter-basin transfer, increased minimum flow releases to the Eel River would result in decreases in diversions to the East Fork Russian River. Under the JR, diversions to the East Fork Russian River would decrease from an estimated 8 percent in the wettest years to 25 percent in the driest years. From a volumetric perspective, the annual reduction in diversions would range from an estimated 13,000 to 18,000 acre feet.

The JR also contain non-flow provisions for protecting and enhancing aquatic resources. These include: (1) PG&E will provide \$20,000 annually to fund a scientific aide position at the Van Arsdale Fishery Station; (2) PG&E will fund annual chinook salmon carcass surveys at selected sites on the Eel River and Tomki Creek; (3) PG&E will provide CDFG \$10,000 annually for Sacramento squawfish suppression; (4) PG&E will provide CDFG up to \$30,000 annually for CDFG's chinook salmon and stock rescue program; (5) PG&E will continue to cooperate in releasing warm water from the spillway of Scott Dam in the late winter/spring period to promote the timely migration of juvenile chinook salmon from the Eel River between Scott

and Cape Horn Dams; (6) the Tomki Creek flow gage will be updated to improve the precision of low flow measurements and to allow data telemetry for flow calculation; and (7) Cape Horn Dam will be modified to allow accurate regulation of the higher minimum flows provided under the JR.

Commission staff has determined that amendment of the minimum flow requirements at the Potter Valley Project could constitute a major Federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an Environmental Impact Statement (EIS) for the proposed amendment. The EIS will also consider reasonable alternatives to the proposed amendment. A draft EIS will be issued and circulated for review to those on the mailing list for this proceeding. All comments filed on the draft EIS will be analyzed by Commission Staff and considered in the Final EIS.

As part of the EIS process, we will be conducting a series of scoping meetings in the project vicinity. The purpose of the scoping process is to identify the scope of environmental issues that should be analyzed in the EIS and to provide us with information that may be useful in preparing the EIS. The dates, times, and locations of the scoping meetings will be announced in a subsequent public notice. We will also accept written scoping comments from any interested party, either prior to, or for a limited period following, the scoping meetings. To help focus comments on the environmental issues, a scoping document outlining subject areas to be addressed in the EIS will be sent to those on the mailing list for this proceeding prior to the scoping meetings. The deadline for receiving scoping comments will be specified at that time. Those not on the mailing list may request a copy of the scoping document from the project coordinator, whose telephone number is listed below.

Those wishing to be added to the mailing list or to submit comments, information, or other correspondence pertaining to this proceeding should file their correspondence with the commission at the following address: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426.

All filings should show the following on the first page: "Potter Valley Project," FERC No. 77-110.

For further information, please contact the FERC Project Coordinator, John M. Mudre, at (202) 219-1208.

1. *This notice also consists of the following standard paragraphs: B, C1, and D2.*

*B. Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

*C1. Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

*D2. Agency Comments*—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

**Linwood A. Watson, Jr.,**

*Acting Secretary.*

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-5998-5]

### Agency Information Collection Activities: Proposed Collection; Comment Request; Municipal Water Pollution Prevention Program Evaluation (Self-Audit)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

---

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Municipal Water Pollution Prevention Program Evaluation (Self-Audit), EPA ICR Number 1728.03, OMB Control Number 2040-0181, expires May 31, 1998. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

**DATES:** Comments must be submitted on or before June 16, 1998. All public comments shall be submitted to: DMR ICR Comment Clerk (W-98-17), Water Docket MC 4101, U.S. EPA, East Tower basement, 401 M Street, S.W., Washington, D.C. 20460.

Please submit the original and three comments and enclosures (including references). Comments must be received or post-marked by midnight no later than June 16, 1998. Commenters who want EPA to acknowledge receipt of their comments should enclose a self-addressed stamped envelope. No facsimiles (faxes) will be accepted. Comments may also be submitted electronically to: [ow-docket@epamail.epa.gov](mailto:ow-docket@epamail.epa.gov)

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and forms of encryption. Electronic comments must be identified by the docket number W-98-17. No Confidential Business Information (CBI) should be submitted through e-mail. Comments and data will also be accepted on disks in WordPerfect 5.1 format or ASCII file format. Electronic comments on this notice may be filed online at many Federal Depository Libraries. The record for this proposed Information Collection Request (ICR) revision has been established under docket number W-98-17 and includes supporting documentation as well as printed, paper versions of electronic comments. It does not include any information claimed as CBI. The record is available for inspection from 9 am to 4 pm, Monday through Friday, excluding legal holidays, at the Water Docket, East Tower basement, 401 M Street S.W., Washington, D.C. 20460. For access to the docket materials, please call (202) 260-3027 to schedule an appointment.

**ADDRESSES:** A copy of the proposed ICR will be available at the Water Docket (W-98-17), Mailcode 4101, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

Copies of the proposed ICR can be obtained without charge by writing to this address.

**FOR FURTHER INFORMATION CONTACT:** Patrick Ogbebor, 202/260-6322; fax: 202/260-9544; [ogbebor.patrick@epamail.epa.gov](mailto:ogbebor.patrick@epamail.epa.gov)

**SUPPLEMENTARY INFORMATION:**

**Affected entities:** Entities potentially affected by this action are wastewater facilities.

**Title:** Municipal Water Pollution Prevention Program Evaluation (Self-Audit) (OMB Control No. 2040-0181; EPA ICR No. 1728-03) expiring 05/31/98.

**Abstract:** This is a request for clearance to collect information via self-audit form on the operation, physical capabilities and financial status of Municipal Water Pollution Prevention (MWPP) programs. EPA will collect the information from more than nine municipal wastewater treatment facilities in any of the ten Regions (currently operated in two regions) with non-approved National Pollutant Discharge Elimination System (NPDES) States.

Since the enactment of the Federal Water Pollution Control Act of 1972, more than \$85 billion in federal, State and local funds have been invested in constructing and upgrading municipal wastewater treatment facilities. The 1996 Needs Survey total estimates to be \$139.5 billion, to satisfy all program categories eligible for State Revolving Fund (SRF) funding for the design year (2016) population, including \$44.0 billion for wastewater treatment; \$10.3 billion for upgrading existing wastewater collection systems; \$21.6 billion for new sewer construction; and \$44.7 billion for controlling Combined Sewer Overflows (CSOs). The availability of federal funds which support the construction and upgrade of wastewater facilities is decreasing and EPA program managers and the States have identified that monitoring of early warning systems could detect potential operating and financial problems at wastewater treatment facilities. Early detection and resolution of problems help facilities to maintain compliance and promote proper planning and corrective actions to prevent costly repairs and environmental degradation. The result of the self-audit will be used by the facilities owners and EPA to assess the compliance needs at facilities.

The MWPP program is authorized under section 104 of the Clean Water Act (CWA). Section 104(b) (7) of the Act authorizes EPA to develop effective and practical processes, methods, and prototype devices for prevention,

reduction, and elimination of pollution. MWPP program will contribute to the protection of this public investment and will provide an early warning system of potential problems. The information collected will be used to assist communities to become aware of their multimedia pollution prevention efforts such as water conservation, industrial pretreatment practices, energy management, beneficial use of biosolids and management of household hazardous wastes. EPA Regional Offices use this information to target technical, training and compliance assistance; determine needs for grant assistance; and develop operating program priorities to better meet facility and municipality needs. It is an improved approved approach to managing municipal sewage treatment facilities which can benefit local communities, States and federal governments. Facility participation in the program will be at the discretion of the EPA Regional Office. All information collected is available to the public. A hard copy is available for perusal in the Regional Office, or copies of audits may be obtained by mail through a Freedom of Information Act request.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**Burden Statement:** The reporting burden for completion of the self-audit by each facility is estimated to be 26 hours. This estimate includes time to receive and review the self-audit form, gather the requested information, complete the form, develop corrective actions, prepare municipal resolution and submit the completed package to the governing body. The reporting burden for approval of the self-audit by each municipal governing body is estimated to be 2.5 hours. This estimate includes time to review and approve the

self-audit and corrective action plan, sign the resolution and submit the package to the Agency. Approximately 865 facilities will be subject to this information collection for an estimated burden of approximately 24,653 hours. The total estimated burden for this information collection activity, including the Agency, is 27,780 hours nationally.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: April 8, 1998.

Michael Quigley,

Director, Municipal Support Division.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB) pursuant to the procedures described in 5 CFR 1320.12: "Application for New or Amended Pesticide Registration" (EPA ICR No. 277.10; OMB No. 2070-0060). Before submitting the following ICR to OMB for review and reapproval, EPA is soliciting comments on specific aspects of and recent changes to activities associated with the information collection which is briefly described below. This ICR relates to section 3 of

the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and covers the information collection related pesticide registration. This ICR has recently undergone several changes that impact the Agency's burden estimates. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9.

**DATES:** Comments must be submitted on or before June 16, 1998.

**ADDRESSES:** Submit written comments to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 119 of Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically to: opp-docket@epamail.epa.gov. Follow the instructions under Unit III. of this document. No Confidential Business Information (CBI) should be submitted through e-mail.

All comments which contain information claimed as CBI must be clearly marked as such. Three sanitized copies of any comments containing information claimed as CBI must also be submitted and will be placed in the public record for this document. The public docket is available for public inspection in Rm. 119 at the Virginia address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. Persons submitting information any portion of which they believe is entitled to treatment as CBI by EPA must assert a business confidentiality claim in accordance with 40 CFR part 2 for each such portion. This claim must be made at the time that the information is submitted to EPA. If a submitter does not assert a confidentiality claim at the time of submission, EPA will consider this a waiver of any confidentiality claim and the information may be made available to the public by EPA without further notice to the submitter.

**FOR FURTHER INFORMATION CONTACT:** Cameo Smoot, Field and External Affairs Division, Mail Code (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: (703) 305-5454, e-mail: smoot.cameo@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:**  
**Electronic Availability:**

### Internet

Electronic copies of this document and the ICR are available from the EPA Home Page at the Federal Register - Environmental Documents entry for this document under "Laws and Regulations" (<http://www.epa.gov/fedrgstr/>).

### Fax-on-Demand

Using a faxphone call 202-401-0527 and select item 6052 for a copy of the ICR.

## I. Background

**Affected entities:** Entities potentially affected by the activities covered by this ICR are individuals or entities engaged in activities related to the registration of a pesticide product.

For the collection of information addressed in this notice, EPA would like to solicit comments to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate, automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The Agency is particularly interested in comments and information about the burden estimates, including examples that could be used to reflect the burdens imposed.

## II. Information Collection

EPA is seeking comments on the following ICR, as well as the Agency's intention to renew the corresponding OMB approval.

**Expiration date:** This ICR is currently scheduled to expire on May 31, 1998. However, EPA will be seeking an extension until August 1998, in order to provide adequate time for comments to be received and evaluated, and any necessary changes made to the ICR prior to its submission to OMB.

**Title:** Application for New or Amended Pesticide Registrations.

**ICR numbers:** EPA No. 277.10 and OMB No. 2070-0060.

**Abstract:** In compliance with the Paperwork Reduction Act (44 U.S.C.

3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing ICR to the Office of Management and Budget (OMB) pursuant to the procedures described in 5 CFR 1320.12: "Application for New or Amended Pesticide Registration" (EPA ICR No. 277.10; OMB No. 2070-0060). EPA requires individuals or entities seeking a registration for a pesticide product to submit an application package consisting of information relating to the identity and composition of the product, and supporting data (or compensation for other's data) for the product as outlined in 40 CFR part 158. EPA bases registration decisions for pesticides on its evaluation of a battery of test data provided primarily by the applicants for registration. Required studies include testing to show whether a pesticide has the potential to cause unreasonable adverse human health or environmental effects. The Agency currently collects data on physical chemistry, acute and chronic toxicology, environmental fate, ecological effects, worker exposure, residue chemistry, and product performance. If the data show that the benefits of the pesticide product outweigh the risks, then a registration is approved. All pesticides, under FIFRA, must be registered by EPA before they may be sold or distributed in U.S. commerce. Responses to this collection of information are voluntary.

As part of the registration process, applicants are asked to complete and submit at least four forms which are necessary in order to register and/or amend a pesticide product registration. These forms include:

- EPA Form 8570-1 ("Application for Pesticide Registration, Amendment, Other").
- EPA Form 8570-4 ("Confidential Statement of Formula").
- EPA Form 8570-27 ("Formulator's Exemption Statement").
- EPA Form 8570-34 & 35 ("Certification With Respect to Citation of Data" and Data Matrix").

Applicants may also submit additional forms, which are available upon request, that can be useful in the process of registering a pesticide:

- EPA Form 8570-36 ("Summary of the Physical/Chemical Properties").
- EPA Form 8570-37 ("Self-Certification Statement for the Physical/Chemical Properties").

In addition, registrants of EPA-registered pesticide products at times become subject to regulations that include labeling revision requirements. A revised label is submitted as an amendment to the Agency along with the basic application form, EPA Form

8570-1, to notify EPA that revised product labeling is being submitted.

This information collection request has changed since the last OMB approval. After extensive consultation with stakeholders, the Office of Pesticide Programs has streamlined several forms and created two new ones. The revised and new forms take less time to complete and reduce the volume of paper pesticide registrants send to the Agency. Burden time and cost will decrease for the industry and the Agency. The first streamlining measure created two forms from three existing ones. The revised data compensation form (EPA Form 8570-34) replaced two older forms. This new form allows pesticide registrants to indicate the data requirements they have completed and to reference existing data produced by another company. The second revised form, the data matrix (EPA Form 8570-35), replaced an older form by clarifying the instructions and providing more protection for data submitters. For consistency, both revised forms are used for registration and reregistration.

In response to the President's Reinventing Government Initiative, EPA developed through a public notice and comment process a self-certification initiative. The outcome of this effort was the creation of two new forms, (EPA Forms 8570-36 and 8570-37), for the voluntary self-certification of product chemistry data for manufacturing-use and end-use products. The forms reduce industry's paperwork burden, expedite the review process, and reduce the amount of time the Agency needs to review the product chemistry for registration or reregistration of these products.

Other changes in this information collection request will result in the reduction of the burden hours because certain information collection activities are no longer a part of this information collection. This new information collection request no longer includes burden hour estimates for activities conducted for the EPA Training Verification Program because this information is now collected under a separate information collection request. Additionally, information previously collected as a one-time information collection to support amended labeling requirements for termiticide products, Pesticide Regulation Notice 96-7, is no longer estimated in this information request.

**Burden statement:** According to the Paperwork Reduction Act, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal

agency. For this collection it includes the time needed to determine applicability; review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources and review the collection of information; and transmit or otherwise disclose the information.

The information covered by this request is collected when an individual or entity applies for registration of a pesticide product. EPA makes small businesses aware of the "Formulators' Exemption Statement" (EPA Form 8570-27) that allows an applicant to reduce their data submission burden when the pesticide product is comprised of an EPA-registered pesticide product by exempting the applicant from furnishing much of the data. Estimates for the annual applicant respondent burden for collection of information associated with the four categories of pesticide product applicants average: 188 hours per application for "Type A" antimicrobial products; 188 hours per application for new active ingredient, biochemical, new food use and new use products; 8 hours per application for "Type B" antimicrobial products; and 8 hours per application for amendments and notifications, etc. These estimates include the time reading the regulations, planning the necessary data collection activities, conducting tests, analyzing data, generating reports and completing other required paperwork, and storing, filing, and maintaining the data. The estimate of the number of respondents for the four categories of pesticide product applicants include: 60 applicants for "Type A" antimicrobial products; 200 applicants for new active ingredient, biochemical, new food use and new use products; 2,100 applicants for "Type B" antimicrobial products; and 10,000 applications containing amendments and notifications, etc. The total burden hours for this information collection request would decrease the annual respondent burden from 218,938 to 162,640.

### III. Public Record and Electronic Submissions

The official record for this notice, as well as the public version, has been established for this document under docket control number "OPP-00531"

(including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official rulemaking record is located at the Virginia address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comment and data will also be accepted on disks in Wordperfect 5.1/6.1 or ASCII file format. All comments and data in electronic form must be identified by the docket control number "OPP-00531." Electronic comments on this notice may be filed online at many Federal Depository Libraries.

### Agency Information Collection Activities: Submission for OMB Review; Comment Request; Reporting and Recordkeeping Requirements Under EPA's Natural Gas STAR Program

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: "Reporting and Recordkeeping Requirements under EPA's Natural Gas STAR Program," OMB Control Number 2060-0328, and expiration date 6/30/98. The ICR describes the nature of the information collection and its expected burden and

cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before May 18, 1998.

#### FOR FURTHER INFORMATION CONTACT:

Sandy Farmer at EPA by phone at (202) 260-2740, by email at farmer.sandy@epamail.epa.gov, or download off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1736.02.

#### SUPPLEMENTARY INFORMATION:

**Title:** "Recordkeeping and Reporting Requirements under EPA's Natural Gas STAR Program". (OMB Control No. 2060-0328; EPA ICR No. 1736.02) expiring 6/30/98. This is a request for extension of a currently approved collection.

**Abstract:** Natural Gas STAR is an EPA-sponsored, voluntary program that encourages natural gas companies to adopt cost effective methods for reducing methane emissions. Natural Gas STAR Partners agree to implement cost effective Best Management Practices (BMPs), which will both save participants money and improve the protection of the environment. EPA needs to collect information to establish program participation and to obtain general information on new Natural Gas STAR Partners. EPA also uses the information collection to evaluate a Partner's progress and performance, and assess overall program results. Participation in the Natural Gas STAR program is voluntary. Natural Gas STAR Partners may designate information submitted under this ICR as confidential business information. EPA will treat all such information as confidential business information and will not make the company or agency-specific information collected under this ICR available to the general public. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Federal Register document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 12/20/97; No comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 39 hours per facility. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions;

develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Natural Gas Companies.

**Estimated Number of Respondents:** 78.

**Frequency of Response:** On occasion.

**Estimated Total Annual Hour Burden:** 3,692 hours.

**Estimated Total Annualized Cost Burden:** 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1736.02 and OMB Control No. 2060-0328 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460; and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: April 13, 1998.

Joseph Retzer,

Director, Regulatory Information Division.

## ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-5490-9]

### Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 30, 1998 Through April 03, 1998 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564-7167. An explanation of the

ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 11, 1997 (62 FR 16154).

#### Draft EISs

ERP No. D-FHW-B40082-VT Rating EC2, Rutland Transportation Improvement Project, between US 4 and US 7 in the City of Rutland and the Towns of Rutland, Mendon, Clarendon and Shrewsbury, Funding, EPA Permit and COE Section 404 Permit, Rutland County, VT.

*Summary:* EPA expressed environmental concerns regarding wetland, water supply and secondary impacts of the various alternatives studied in the DEIS. EPA also requested additional traffic analysis information and asked FHWA to consider a modified Upgrade Alternative to achieve the project purpose.

ERP No. D-FHW-B40083-NH Rating EC2, Manchester Airport Access Road Highway Improvement Project, Bedford-Manchester-Londonderry-Litchfield-Merrimack, Funding and NPDES Permit and COE Section 404 Permit, Hillsborough and Rockingham Counties, NH.

*Summary:* EPA had environmental concerns that the alternatives analysis in the DEIS does not rebut the presumption that practicable and less damaging alternatives exist to the preferred option. EPA requested additional information concerning direct and indirect impacts, and measures to protect groundwater and drinking water resources. Additionally, until various issues concerning the analysis of alternatives and the final shape of the mitigation plan are resolved, EPA believes the project does not comply with the EPA Section 404(b)(1) guidelines and should not receive a permit.

ERP No. D-FHW-G40147-NM Rating EC2, Paseo del Volcon Corridor, Acquisition of Right-of-Way and Construction of Roadway, from the Intersection of I-40 to Intersection of NM-44 near the Town of Bernalillo, Bernalillo and Sandoval Counties, NM.

*Summary:* EPA expressed environmental concerns regarding compliance with the National Historic Preservation Act, noise attenuation and barrier design, Environmental Justice, and NEPA compliance assurances for future or planned east to west arterial connectors.

ERP No. D-FHW-K40230-CA Rating EO2, CA-58 Transportation Corridor, Route Adoption and Purchases Right-of-Way Acquisition Project, between CA-99 in the Bakerfield Metropolitan Area and Interstate 5 in Kern County,

Funding and COE Section 404 Permit, Kern County, CA.

*Summary:* EPA raised environmental objections with the corridor alignment alternatives. EPA suggested that other alternatives be examined and raised concerns with the Purpose and Need, alternatives analysis, impacts to water resources, threatened and endangered species, and cumulative effects of the project.

ERP No. D-FTA-E40775-FL Rating EC1, Miami North Corridor Project, Transit Improvements between NW 62 Street at Dr. Martin Luther King Jr. Station and NW 215th Street at the Dade/Broward Counties Line, Funding, Major Investment Study, Dade County, FL.

*Summary:* EPA had environmental concerns because of the unavailability of some impacts, mitigation will be very important to this project.

ERP No. D-IBR-K28019-CA Rating EO2, East Bay Municipal Utility District, Supplemental Water Supply Project, American River Division of the Central Valley Project (CVP), Sacramento County, CA.

*Summary:* EPA objected to the narrow scope of alternatives and the restrictive alternative screening criteria which inherently limited feasible alternatives to those with diversions from the American River. EPA urged evaluation in detail of a wider range of alternatives that encompass water management measures and water supply sources other than just American River water. If a diversion from the American River is deemed necessary, EPA urged selection of diversion points on the Sacramento River below the confluence with the American River or as far downstream on the American River as feasible. Given the significant adverse cumulative impacts of additional American River diversions and the fact that other utilities are able to utilize other water sources. EPA recommended that the Final EIS clearly demonstrate that high quality American River water is essential for meeting drinking water standards and that the use other water sources is not feasible.

ERP No. D-TVA-E09801-MS Rating EC2, Red Hills Power Project, Proposal to Purchase 440 megawatts (MW) of Electrical Energy, COE Section 404 Permit, Town of Ackerman, Choctaw County, MS.

*Summary:* EPA expressed environmental concern regarding forested wetland impacts and mitigation, truck noise, air toxics screening against state thresholds and identification of water uses of wells and springs potentially impacted by mining.

ERP No. D-UAF-A11074-00 Rating EC2, Evolved Expandable Launch Vehicle (EELV) Program, Development, Operation and Deployment, Proposed Launch Locations are Cape Canaveral Air Station (AS), Florida and Vandenberg Air Force Base (AFB), California, Federal Permits and Licenses, FL and CA.

*Summary:* EPA expressed environmental concerns regarding air issues resulting from ozone depleting substance; the effects on plant-life; and waste disposal.

ERP No. DA-COE-K36009-CA Rating EC2, Napa River and Napa Creek Flood Protection Project, New Information, City of Napa, Napa County, CA.

*Summary:* EPA expressed environmental concerns that the Corps may not be taking advantage of the numerous opportunities to avoid, reduce and minimize adverse impacts to wetlands and other aquatic resources. EPA expressed concerns because the EIS did not provide discussion or data regarding construction-related emissions of particulates from sources other than equipment; indicate whether PCBs are present in electrical equipment or other utilities subject to removal or relocation; and discuss whether vegetation maintenance would use herbicides, potentially impacting water quality, fish and wildlife, public health and non-target species.

#### Final EISs

ERP No. F-FHW-B53012-RI, Rhode Island Northeast Corridor Freight Rail Improvement Project, Major Investment Study, Implementation, Boston Switch in Central Falls to the Quonset Point/Davisville Industrial Park in North Kingtown, Funding, COE Section 10 and 404 Permits, Providence County, RI.

*Summary:* EPA had lack of objection to the FHWA preferred alternative and indicated that several water supply and water quality issues should be resolved prior to construction of the project.

ERP No. F-FHW-L50005-AK, Kenai River Bridge Crossing Project, Construction from Sterling Highway to Funny River Road, Funding, COE Section 10 and 404 Permits, US CGD Permit and EPA NPDES Permit, Kenai Peninsula, AK.

*Summary:* EPA continued to have environmental objections based on lack of mitigation for wetland 3 and potential impacts to the Brown Bear.

ERP No. F-GSA-L80016-WA, Seattle New Federal Courthouse, Construction, King County, WA.

*Summary:* Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

Dated: April 14, 1998.

### Public Meetings of the Urban Wet Weather Flows Advisory Committee, the Storm Water Phase II Advisory Subcommittee, and the Sanitary Sewer Overflow Advisory Subcommittee

**AGENCY:** Environmental Protection  
Agency.

**ACTION:** Notice.

**SUMMARY:** Notice is given that the  
Environmental Protection Agency (EPA)  
is CANCELLING the May 7-8 public  
meeting of the Storm Water Phase II  
Advisory Subcommittee. The June 25-  
26 meeting is still being held. The June  
25-26 meeting is open to the public  
without need for advance registration.  
During the June 25-26 meeting, the  
Storm Water Phase II Advisory  
Committee will discuss the proposed  
rule and other related topics for program  
implementation.

**DATES:** May 7-8, 1998 (CANCELLED)  
and June 25-26, 1998.

On the first day, the meeting will start  
at 10:00 a.m. EST and end at 5:00 p.m.  
On the second day, the meeting will  
begin at 8:00 a.m. and end at  
approximately 5:00 p.m.

**ADDRESSES:** The June 25-26 meeting  
will be held at The Arlington Hilton &  
Towers, 950 N. Stafford Street,  
Arlington, VA. The telephone number is  
(703) 812-5109.

**FOR FURTHER INFORMATION CONTACT:**  
Sharie Centilla, Office of Wastewater  
Management, at (202) 260-6052, or  
Internet: centilla.sharie@epa.gov.

Dated: April 8, 1998.

[OPP-34124; FRL 5782-6]

### Notice of Receipt of Requests for Amendments to Delete Uses in Certain Pesticide Registrations

**AGENCY:** Environmental Protection  
Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In accordance with section  
6(f)(1) of the Federal Insecticide,  
Fungicide and Rodenticide Act (FIFRA),  
as amended, EPA is issuing a notice of  
receipt of request for amendment by

registrants to delete uses in certain pesticide registrations.

**DATES:** Unless a request is withdrawn, the Agency will approve these use deletions and the deletions will become effective on October 14, 1998.

**FOR FURTHER INFORMATION CONTACT:** By mail: James A. Hollins, Office of Pesticide Programs (7502C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location for commercial courier, delivery, telephone number and e-mail: Rm. 216, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703) 305-5761; e-mail: hollins.james@epamail.epa.gov.

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

Section 6(f)(1) of FIFRA, provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be amended to delete one or more uses. The Act further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, the Administrator may approve such a request.

##### II. Intent to Delete Uses

This notice announces receipt by the Agency of applications from registrants

to delete uses in the 17 pesticide registrations listed in the following Table 1. These registrations are listed by registration number, product names, active ingredients and the specific uses deleted. Users of these products who desire continued use on crops or sites being deleted should contact the applicable registrant before October 14, 1998 to discuss withdrawal of the applications for amendment. This 180-day period will also permit interested members of the public to intercede with registrants prior to the Agency approval of the deletion. (Note: \*\* Indicate a 30-day comment period)

TABLE 1.—REGISTRATIONS WITH REQUESTS FOR AMENDMENTS TO DELETE USES IN CERTAIN PESTICIDE REGISTRATIONS

EPA Reg No.	Product Name	Active Ingredient	Delete From Label
000100-00501	Supracide 25WP	Methidathion	Pecans, sorghum, sunflower, tobacco, nursery stock
000100-00719	Supracide 2E	Methidathion	Pecans, sorghum, sunflower, tobacco, nursery stock
000100-00754	Supracide	Methidathion	Pecans, sorghum, sunflower, tobacco, nursery stock
000655-00489	Prentox Pyronyl Crop Spray	Piperonyl butoxide; Pyrethrins	Uses on dogs & cats
000655-00501	Prentox Pyronyl Oil	N-Octyl bicycloheptene dicarboximide; Piperonyl butoxide; Pyrethrins	Use on dogs
000769-00621	SMCP Malathion EM-5	Malathion	Household insects, mosquito larvae in standing water, indoor uses, animal use, poultry, dog & cats, animal quarters, mosquitoes and small flying insects
000769-00809	Superior EC5 Malathion Concentrate	Malathion	Dogs, animal sleeping quarters, cattle, poultry houses, food handling establishments, homes, dairy and food processing plants
005481-00447	Technical Bidrin Insecticide	Dicrotophos	Use on soybeans
007056-00180	CSA Aerosol Insecticide Formula Seven	Resmethrin	All pet care uses
000829-00257	SA-50 Brand Home and Garden Oftanol Insecticide	Isufenphos	Use in lakes, streams, ponds, ornamental areas, commercial and recreational turf grass areas, ornamental beds & nurseries, non-crop areas such as fence rows and roadsides, container stock, soil mix for ornamentals
007122-00042	Malathion WE	Malathion	Beef cattle, poultry, Poultry houses, household insects, food handling establishments
**019713-00399	Drexel Endosulfan 3EC	Endosulfan	Alfalfa (grown for fodder), artichokes, barley, oats, rye, wheat, peas (seed crop only), safflower, sugar beets, sunflower
019713-00410	Drexel Acephate Technical	Acephate	Pasture/rangeland uses
051036-00236	Acephate 75SP	Acephate	Pasture/rangeland uses
059639-00026	Orthene 75S Soluble	Acephate	Pasture/rangeland uses
059639-00041	Orthene Technical		Pasture/rangeland uses
056939-00089	Orthene 75 WSP		Pasture/rangeland uses

Note: \*\* Indicate a 30-day comment period

The following Table 2, includes the names and addresses of record for all registrants of the products in Table 1, in sequence by EPA company number.

TABLE 2.—REGISTRANTS REQUESTING AMENDMENTS TO DELETE USES IN CERTAIN PESTICIDE REGISTRATIONS

Company No.	Company Name and Address
000100	Norvaris Crop Protection, P.O. Box 18300, Greensboro, NC 27419.
000655	Prentiss Incorporated, C.B. 2000, Floral Park, NY 11002.
000769	SureCo, Inc., 10012 N. Dale Mabry., Ste. 221, Tampa, FL 33618.
000829	Southern Agricultural Ins., Inc., P.O. Box 218, Palmetto, FL 34220.
005481	Amvac Chemical Corporation, 4100 E. Washington Blvd., Los Angeles, CA 90023.
007056	IQ Products Co., 16212 State Hwy 249, Houston, TX 77086.
007122	ArChem Corporaion, 1514 - 11th St., P.O. Box 767, Portsmouth, OH 45662.
019713	Drexel Chemical Co., P.O. Box 13327, Memphis, TN 38113.
051036	Micro Flo Company, P.O. Box 5948, Lakeland, FL 33807.
059639	Valent USA Corporation, 1333 N. California Blvd., Ste. 600, Walnut Creek, CA 94596.

### III. Existing Stocks Provisions

The Agency has authorized registrants to sell or distribute product under the previously approved labeling for a period of 18 months after approval of the revision, unless other restrictions have been imposed, as in special review actions.

#### List of Subjects

Environmental protection, Pesticides and pests, Product registrations.

Dated: April 2, 1998.

Linda A. Travers,

Director, Information Resources Services Division, Office of Pesticide Programs.

### ENVIRONMENTAL PROTECTION AGENCY

[FRL-5998-8]

#### Agency Information Collection Activities; OMB Responses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notices.

**SUMMARY:** This document announces the Office of Management and Budget's (OMB) responses to Agency clearance requests, in compliance with the Paperwork Reduction Act (44 U.S.C. 3501 et seq.). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

**FOR FURTHER INFORMATION CONTACT:** Call Sandy Farmer at (202) 260-2740, or E-mail at

"farmer.sandy@epamail.epa.gov," and please refer to the appropriate EPA Information Collection Request (ICR) Number.

#### SUPPLEMENTARY INFORMATION:

#### OMB Responses to Agency Clearance Requests

##### OMB Approvals

*EPA ICR No. 1425.04;* Application for Reimbursement to Local Governments for Emergency Response; was approved 03/31/98; OMB No. 2050-0077; expires 03/31/2001.

*EPA ICR No. 1647.02;* Exports from and Imports to the United States under the OECD Decision (40 CFR 262, Subpart H; was approved 03/24/98, OMB No. 2050-0143; expires 03/31/2001.

##### EPA ICR Withdrawn

*EPA ICR No. 1657.02;* Recordkeeping and Reporting Requirements for NESHAP for Total HAP Emissions from the Pulp and Paper Production Source Category, Process Operations; was withdrawn from OMB 01/05/98.

##### OMB Extension of Expiration Dates

*EPA ICR No. 1758.02;* Measures of Success for Compliance Assistance Reporting Form; OMB No. 2060-0346; expiration date was extended from 03/31/98 to 09/30/98.

*EPA ICR No. 1741.01;* Correction of Misreported Chemical Substances on the Toxic Substances Control Act (TSCA) Chemical Substance Inventory; OMB No. 2070-0145; expiration date was extended from 05/31/98 to 08/31/98.

*EPA ICR No. 1704.03;* Alternate Threshold for Low Annual Reportable Amounts, TRI; OMB No. 2070-0143; expiration date was extended from 05/31/98 to 08/31/98.

*EPA ICR No. 1735.01;* AGSTAR Program; OMB No. 2060-0329;

expiration date was extended from 03/31/98 to 06/30/98.

*EPA ICR No. 1736.01;* Natural Gas Star Program; OMB No. 2060-0328; expiration date was extended from 03/31/98 to 06/30/98.

*EPA ICR No. 1639.02;* Water Quality Guidance for Great Lakes System; OMB No. 2040-0180; expiration date was extended from 03/31/98 to 06/30/98.

Dated: April 13, 1998.

Joseph Retzer,

Director, Regulatory Information Division.

### ENVIRONMENTAL PROTECTION AGENCY

[OPP-00530; FRL-5780-7]

#### Clarification of Treated Articles Exemption; Availability of Draft PR Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

**SUMMARY:** EPA is soliciting comments on proposed guidance clarifying the criteria that pesticide products must meet to be eligible for the "treated articles exemption." The proposal is available as a draft Pesticide Registration (PR) notice entitled "Eligibility of Pesticide Products For Exemption From Registration as Treated Articles pursuant to 40 CFR 152.25(a)," which is available upon request as indicated under Unit IV.

**DATES:** Written comments, identified by the docket number [OPP-00530], must be received on or before May 18, 1998.

**ADDRESSES:** By mail, submit written comments to: Public Information and Records Integrity Branch, Information Resources and Services Division

(7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 119, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically to: [opdocket@epamail.epa.gov](mailto:opdocket@epamail.epa.gov). Follow the instructions under Unit IV of this document. No Confidential Business Information (CBI) should be submitted through e-mail.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by EPA without prior notice. The public docket is available for public inspection in Rm. 119 at the Virginia address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Walter Francis, Environmental Protection Agency, (7502C), 401 M St., SW., Washington, DC 20460. Office location and telephone number: 6E, Crystal Station #1, 2800 Crystal Drive, Arlington, VA, (703) 308-6419, fax: (703) 308-4687, e-mail: [francis.walter@epamail.epa.gov](mailto:francis.walter@epamail.epa.gov).

**SUPPLEMENTARY INFORMATION:**

**ELECTRONIC AVAILABILITY:** Electronic copies of this document and various support documents are available from the EPA Home page at the **Federal Register** - Environmental Documents entry for this document under "Laws and Regulations" (<http://www.epa.gov/fedrgstr/>).

**Fax on Demand**

Using a faxphone to call (202) 401-0527 and select item (6110) for a copy of this document and the PR notice.

40 CFR 152.25(a) was promulgated in 1988. Since that time enforcement actions have been taken by the Agency where it deemed necessary. The products involved in those actions were dealt with so as to resolve individual issues arising in each matter. As noted in the proposed PR notice, in recent years, a large variety of treated products and substances with diverse claims have appeared in the marketplace. To address this, the Agency has decided to replace this approach with comprehensive guidance set forth in a PR notice. Until such guidance is finalized, the Agency

will continue the approach it has been utilizing in this area. This **Federal Register** notice announces the availability of the draft Pesticide Registration (PR) Notice and solicits comments on the proposed guidance. If, after reviewing any comments, EPA determines that changes to the Notice are warranted, the Agency will revise the draft PR notice prior to release.

**I. Purpose**

The purpose of the proposed PR notice is to clarify current EPA policy with respect to the scope of the "treated articles exemption." It addresses the types of claims which are permitted for pesticide products that may be exempt from registration under this provision.

**II. Applicability**

The proposed PR notice will apply to manufacturers, formulators, producers and registrants of pesticide products, and to manufacturers, producers, and distributors who incorporate pesticides into consumer articles that are intended for sale or distribution under the terms of the "treated articles exemption." Examples of consumer articles that are potentially affected include cutting boards, sponges, cat litter, toothbrushes, juvenile toys, pillows, tablecloths, and clothing.

**III. Contents of the PR Notice**

This notice clarifies the conditions under which the "treated articles exemption" will apply. To qualify for the "treated articles exemption," (1) a product must be treated with a pesticide registered under FIFRA specifically for protecting the product, and (2) the claims allowed for such treatment must be limited to protection of the treated article only. If these two conditions are met, the product would qualify for the treated articles exemption and would be exempt from all FIFRA requirements. The draft PR notice provides examples of acceptable and unacceptable wording for use on labels and advertisements for products that qualify for the "treated articles exemption."

Companies will not be expected to be in immediate compliance with any new elements specified in the draft PR notice; where label language is included or precluded as part of this clarification, companies will have a period to conform their product labels and literature to the PR notice. The final PR notice will establish a date after which EPA will expect full compliance with the guidance; the draft PR notice announced today states that full compliance with the PR notice will be expected no later than 60 days following issuance of the final PR notice. While

immediate compliance with the new elements specified in the guidance is not expected before the expiration of any grace period, the Agency strongly encourages companies to conform their marketing of products to this guidance as soon as they can, and if possible well in advance of the expiration of any grace period in the final PR notice.

Even though this **Federal Register** notice and the draft PR notice indicate that EPA will not expect immediate compliance with the new elements of the final guidance until the expiration of any grace period specified in the PR notice, EPA wants to make it clear that this position does not authorize marketing of treated articles which do not comply with EPA's interpretation of the Treated Articles Exemption in 40 CFR 152.25(a). The Agency has consistently interpreted and applied this rule to prohibit implied or explicit public health claims for unregistered products, and continues to regard any public health claims as not consistent with the provisions of the rule. Furthermore, for the present and until the expiration of any grace period specified in the final PR notice, EPA will maintain and enforce the policy articulated below, as extracted from the settlements of multiple recent enforcement proceedings on what claims may be made for treated articles without obtaining registration. Those settlements collectively indicate that unregistered products may be marketed, even though they may not comply with the guidance in the draft PR notice, provided that: (1) no implied or explicit public health claims of any kind are made; (2) the claims concerning the presence of a pesticide in the treated article are limited to protection of the treated article only; (3) when such claims involve antibacterial properties, (a) the words "antibacterial," "antimicrobial," or "germicidal," or related terms, are not a part of the name of the product, and (b) the permissible claims are qualified by statements indicating that the presence of the antibacterial properties does not protect users and others against disease and that users should follow prudent hygienic measures, i.e., cleaning and washing the article; and (4) the pesticide in a treated article is present only as a result of using a pesticide product which is registered under FIFRA and labeled for use in treating the article in question. The following language is an example of an acceptable formulation of such claims and contains appropriate qualifying statements:

"Antibacterial properties are built-in to inhibit the growth of bacteria that may affect this product. The antibacterial properties do

not protect users or others against bacteria, viruses, germs, or other disease organisms. Always clean and wash this product thoroughly before and after each use."

If applicable, the following statement may also be used:

"Antibacterial properties will not wash off and are intended only to protect the product."

All references to "antibacterial" properties and the required qualifying statements must be located together, must be printed in type of the same size, style, and color, and must be given equal prominence. Moreover, such references may not be given any greater prominence than other described product features.

#### IV. Public Record and Electronic Submissions

The official record for this notice, as well as the public version, has been established under docket control number "OPP-00530" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official record is located at the Virginia address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at:  
opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comment and data will also be accepted on disks in Wordperfect 5.1/6.1 or ASCII file format. All comments and data in electronic form must be identified by the docket control number "OPP-00530". Electronic comments on this notice may be filed online at many Federal Depository Libraries.

#### V. Schedule for Finalizing the PR Notice

EPA plans to issue and make effective the final PR notice as soon as possible. We anticipate that the guidance will be made final and effective within the next 6 months.

#### List of Subjects

Environmental protection, Antimicrobial pesticides, Treated articles exemption.

Dated: April 8, 1998.

Marcia E. Mulkey,  
Director, Office of Pesticide Programs.

### FEDERAL DEPOSIT INSURANCE CORPORATION

#### General Counsel's Opinion No. 10; Interest Charges Under Section 27 of the Federal Deposit Insurance Act

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice of General Counsel's Opinion No. 10.

**SUMMARY:** The FDIC's Legal Division has received a request for guidance regarding the types of charges that constitute "interest" for purposes of section 27 of the Federal Deposit Insurance Act. This General Counsel's Opinion is being provided for the benefit of the public, as well as institutions subject to section 27, because the statute speaks only in terms of "interest" but does not define the term. It is the Legal Division's opinion that the term "interest," for purposes of section 27, includes those charges that a national bank is authorized to charge as interest under section 85 of the National Bank Act (NBA).

**FOR FURTHER INFORMATION CONTACT:** Barbara I. Taft, Assistant General Counsel, (202) 898-6830 or Rodney D. Ray, Counsel, (202) 898-3556, Federal Deposit Insurance Corporation, Legal Division, 550 17th Street, N.W., Washington, D.C. 20429.

#### Text of General Counsel's Opinion

General Counsel's Opinion No. 10; Interest Charges Under Section 27 of The Federal Deposit Insurance Act.

By: William F. Kroener, III, General Counsel.

#### Background

Federal statutes establish the maximum amounts of interest that insured depository institutions may charge their customers. The interest charges are governed by section 85 of the National Bank Act (NBA) (12 U.S.C. 85) for national banks; section 27 of the Federal Deposit Insurance Act (FDI Act) (12 U.S.C. 1831d) for state-chartered insured depository institutions and insured branches of foreign banks; and section 4(g) of the Home Owners' Loan Act (HOLA) (12 U.S.C. 1463(g)) for

savings associations.<sup>1</sup> Although contained in different parts of the United States Code, the latter two provisions are patterned after section 85 of the NBA and generally authorize interest to be charged on loans to customers at the greater of:

(1) A rate not more than one percent above the discount rate on 90-day commercial paper in effect at the Federal Reserve Bank for the federal reserve district in which the lender is located; or

(2) At the highest rate allowed by the laws of the state where the lender is located.

Congress initially addressed the issue of the maximum rates of interest that national banks could charge borrowers by enacting section 85 of the National Bank Act. That statute was enacted to foster a strong national banking system and protect national banks from potentially anti-competitive state legislation. *Tiffany v. National Bank of Missouri*, 85 U.S. 409, 412-13 (1873).

Currently, section 85 authorizes national banks to charge their customers interest rates allowed by the laws of the state where the bank is located.<sup>2</sup> The statute has been construed to authorize national banks to charge interest at rates authorized by state law for competing state institutions (the "most favored lender doctrine"). *Tiffany*, 85 U.S. at 413.<sup>3</sup> It also has been construed to authorize the use of interest rates authorized by the state where the lender is located no matter where the borrower resides. *Marquette Nat'l Bank v. First Omaha Serv. Corp.*, 439 U.S. 299 (1978).

#### I. Construction of Section 27

In the high interest rate environment of the late 1970s Congress recognized that section 85 of the NBA provided national banks with a distinct competitive advantage over state-chartered lending institutions, whose interest rates were constrained by state laws.<sup>4</sup> To establish competitive equality between state-chartered banks, savings associations, and national banks, section 27 was added to the FDI Act by section

<sup>1</sup> See also section 501 of the Depository Institutions Deregulation and Monetary Control Act of 1980 (DIDMCA) (12 U.S.C. 1735f-7a) which addresses interest rates on certain types of residential real estate loans, and section 528 of the DIDMCA (12 U.S.C. 1735f-7a note (Choice of Highest Applicable Interest Rate)).

<sup>2</sup> Section 85 also contains several alternative interest rate formulations which are not relevant to this opinion.

<sup>3</sup> See also 12 CFR 7.4001(b) (1997) (National bank may charge the maximum rate permitted to any state-chartered or licensed lending institution by the law of the state where the national bank is located).

<sup>4</sup> See 126 Cong. Rec. 30665 (1979) (statements of Senators Pryor and Bumpers).

521 of the Depository Institutions Deregulation and Monetary Control Act of 1980 (DIDMCA), Pub. L. 96-221, 94 Stat. 132 (1980). Section 27 was intended to give state-chartered banks the benefit of section 85 and purposefully engrafted, at several points, language from the NBA.<sup>5</sup> *Greenwood Trust Co. v. Commonwealth of Massachusetts*, 971 F.2d 818, 826 (1st Cir.), cert. denied, 506 U.S. 1052 (1993).

Because similar language and concepts appear in both statutes they frequently have been cited and discussed together in court opinions and construed in *pari materia*. See e.g., *Greenwood Trust*, 971 F.2d at 827; *Hill v. Chemical Bank*, 799 F. Supp. 948, 953 (D. Minn. 1992); *Stoorman v. Greenwood Trust Co.*, 908 P.2d 133, 135 (Colo.), cert. denied, 116 S.Ct. 2498 (1996); *Copeland v. MBNA America Bank, N.A.*, 907 P.2d 87, 93 (Colo.), cert. denied, 116 S.Ct. 2498 (1996); *Hunter v. Greenwood Trust Co.*, 272 N.J. Super. 526, 532-38, 640 A.2d 855 (N.J. Super. 1994), reinstated, 146 N.J. 65, 679 A.2d 652 (N.J. 1996). The FDIC's practice also has been to construe the two provisions similarly. See FDIC Advisory Opinion No. 81-3, February 3, 1981, reprinted in [1988-1989 Transfer Binder] Fed. Banking L. Rep. (CCH) P 81,006 (state-chartered banks have the same "most favored lender" status under section 27 as national banks have under section 85 of the NBA); FDIC Advisory Opinion No. 81-7, March 17, 1981, reprinted in [1988-1989 Transfer Binder] Fed. Banking L. Rep. (CCH) P 81,008 (state-chartered banks have the same right to export interest rates under section 27 as national banks have under section 85 of the NBA).

## II. Charges Constituting Interest

While neither section 85 nor section 27 defines what charges constitute "interest," court decisions have not limited the scope of the term solely to a state's numerical percentage rate, but have broadly construed the term to include various other types of credit charges. See e.g., *Smiley v. Citibank (South Dakota), N.A.*, 116 S.Ct. 1730, 1734 (1996) (deferring to the Office of the Comptroller of the Currency's (OCC) regulation interpreting "interest," for purposes of section 85, as including payments compensating a creditor for making a loan, extending a line of credit, or any default or breach by a borrower of a condition upon which credit was extended, but excluding other types of payments, such as,

payments to reimburse a creditor for loan processing fees, collateral insurance, or appraisal fees); *Greenwood Trust*, 971 F.2d at 824 (late payment fees and kindred charges may constitute "interest" under section 27); *Fisher v. First Nat'l Bank of Omaha*, 548 F.2d 255, 258-61 (8th Cir. 1977) (cash advance fees); *Watson v. First Union Nat'l Bank*, 837 F. Supp. 146, 150 (D.S.C. 1993) (overlimit fees); *Tikkanen v. Citibank (South Dakota), N.A.*, 801 F. Supp. 270, 278-79 (D. Minn. 1992) (late payment, over the limit fees, and similar charges); *Hill*, 799 F. Supp. at 954 (over the limit fees); *Stoorman*, 908 P.2d at 136 (late payment fees); *Copeland*, 907 P.2d at 94 (late payment fees); *Sherman v. Citibank (South Dakota), N.A.*, 272 N.J. Super. 435, 640 A.2d 325 (N.J. Super. 1994), reinstated, 146 N.J. 65, 679 A.2d 652 (N.J. 1996) (late payment fees); *Hunter*, 272 N.J. Super. at 537 (late payment fees).

## III. Other Agency Interpretations

The OCC has defined "interest" for purposes of the NBA by interpretive ruling as follows: "The term 'interest' as used in 12 U.S.C. 85 includes any payment compensating a creditor or prospective creditor for an extension of credit, making available of a line of credit, or any default or breach by a borrower of a condition upon which credit was extended. It includes, among other things, the following fees connected with credit extension or availability: numerical periodic rates, late fees, not sufficient funds (NSF) fees, overlimit fees, annual fees, cash advance fees, and membership fees. It does not ordinarily include appraisal fees, premiums and commissions attributable to insurance guaranteeing repayment of any extension of credit, finders' fees, fees for document preparation or notarization, or fees incurred to obtain credit reports." 12 CFR 7.4001(a) (1997). Virtually the same definition also has been adopted by the Office of Thrift Supervision in connection with section 4(g) of the HOLA for savings associations.<sup>6</sup> See 12 CFR 560.110 (1997).

Although the OCC's interpretive ruling was only recently published in the Code of Federal Regulations, the ruling is consistent with the OCC's

<sup>6</sup> The statutory language contained in section 4(g) of HOLA was enacted in section 522 of DIDMCA and was originally codified as section 414 of the National Housing Act (NHA) (12 U.S.C. 1730g (a)). The language was later transferred from the NHA to section 4(g) of HOLA by section 301 of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), Pub. L. No. 101-73, 103 Stat. 183, 282 (1989).

earlier legal interpretation of the term<sup>7</sup> and the United States Supreme Court has determined that it constitutes a reasonable interpretation of the statute. *Smiley*, 116 S.Ct. at 1736.

## Conclusion

Section 27 and section 85 of the NBA have been and should be, in the Legal Division's opinion, construed in *pari materia* because section 27 is patterned after section 85 and the provisions embody similar terms and concepts. Congress also clearly intended to establish competitive equality between state-chartered lending institutions and national banks with regard to interest rates by enacting section 27. In addition, the OCC and OTS have adopted similar regulatory definitions of "interest" for purposes of section 85 of the NBA and section 4(g) of HOLA, respectively. Therefore, it is the Legal Division's opinion that the term "interest," for purposes of section 27, includes those charges that a national bank is authorized to charge under section 85 of the NBA. See 12 CFR 7.4001(a) (1997).

Authorized to be published in the **Federal Register** by Order of the Board of Directors, dated at Washington, D.C., this 24th day of March, 1998.

Federal Deposit Insurance Corporation.

**James D. LaPierre,**

*Deputy Executive Secretary.*

## FEDERAL DEPOSIT INSURANCE CORPORATION

### Sunshine Act

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:07 a.m. on Tuesday, April 14, 1998, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider matters relating to the Corporation's corporate and supervisory activities.

In calling the meeting, the Board determined, on motion of Director Joseph H. Neely (Appointive), seconded by Director Julie Williams (Acting Comptroller of the Currency), concurred by Director Ellen S. Seidman (Director, Office of Thrift Supervision), and Acting Chairman Andrew C. Hove, Jr., that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did

## FEDERAL ELECTION COMMISSION

[Notice 1998-9]

### Filing Dates for the New Mexico Special Election

**AGENCY:** Federal Election Commission.

**ACTION:** Notice of filing dates for special elections.

**SUMMARY:** New Mexico has scheduled a special election on June 23, 1998, to fill the U.S. House seat in the First Congressional District held by the late Congressman Steve Schiff.

Committees required to file reports in connection with the Special General Election on June 23 should file a 12-day Pre-General Election Report on June 11 and a 30-day Post-General Report on July 23, 1998.

**FOR FURTHER INFORMATION CONTACT:** Ms. Bobby Werfel, Information Division, 999 E Street, N.W., Washington, DC 20463, Telephone: (202) 694-1100; Toll Free (800) 424-9530.

**SUPPLEMENTARY INFORMATION:** All principal campaign committees of candidates who participate in the New Mexico Special General Election and all other political committees not filing monthly which support candidates in the Special Election shall file a 12-day Pre-General Report on June 11, 1998, with coverage dates from the close of the last report filed, or the day of the committee's first activity, whichever is later, through June 3, 1998; and a Post-General Report on July 23, 1998, with coverage dates from June 4 through July 13, 1998.

## CALENDAR OF REPORTING DATES FOR NEW MEXICO SPECIAL ELECTION FOR COMMITTEES INVOLVED IN THE SPECIAL GENERAL (6/23/98)

Report	Close of books *	Reg./cert. mailing date **	Filing date
Pre-General .....	06/03/98	06/08/98	06/11/98
July Quarterly .....	(1)	(1)	(1)
Post-General .....	07/13/98	07/23/98	07/23/98

<sup>1</sup> Waived.

\* The period begins with the close of books of the last report filed by the committee. If the committee has filed no previous reports, the period begins with the date of the committee's first activity.

\*\* Reports sent by registered or certified mail must be postmarked by the mailing date; otherwise, they must be received by the filing date.

Dated: April 13, 1998.

Joan D. Aikens,

Chairman, Federal Election Commission.

## FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-1210-DR]

### Republic of the Marshall Islands; Major Disaster and Related Determinations

**AGENCY:** Federal Emergency Management Agency (FEMA).

**ACTION:** Notice.

**SUMMARY:** This is a notice of the Presidential declaration of a major disaster for the Republic of the Marshall Islands (FEMA-1210-DR), dated March 20, 1998, and related determinations.

**EFFECTIVE DATE:** March 20, 1998.

**FOR FURTHER INFORMATION CONTACT:** Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3260.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that, in a letter dated March 20, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the Republic of the Marshall Islands, resulting from a severe drought beginning on January 17, 1998, and continuing is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, P.L. 93-288, as amended ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the Republic of the Marshall Islands.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide emergency protective measures (Category B) under the Public Assistance program and Hazard Mitigation in the designated areas, and any other forms of assistance under the Stafford

Act you may deem appropriate. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance or Hazard Mitigation will be limited to 75 percent of the total eligible costs. In accordance with current FEMA policy, you are authorized to make a determination whether a cost share adjustment for the Public Assistance program is warranted when more definitive information is available. The cost share arrangement for the Hazard Mitigation Grant Program under Section 404 is limited by the law to 75 percent of the total eligible costs.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint William L. Carwile, III of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the Republic of the Marshall Islands to have been affected adversely by this declared major disaster:

Emergency protective measures (Category B) for Ailinglaplap, Ailuk, Armo, Aur, Bikini, Ebeye, Ebon, Enewetak, Jabat, Jaluit, Kili, Kwajalein, Lae, Lib, Likiep, Majuro, Maloelap, Mejit, Mili, Namorik, Namu, Ujae, Utrik, Wotho, Wotje.

All islands and atolls within the Republic of the Marshall Islands are eligible to apply for assistance under the Hazard Mitigation Grant Program.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing Program; 83.548, Hazard Mitigation Grant Program)

## FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-1212-DR]

### Minnesota; Major Disaster and Related Determinations

**AGENCY:** Federal Emergency Management Agency (FEMA).

**ACTION:** Notice.

**SUMMARY:** This is a notice of the Presidential declaration of a major

disaster for the State of Minnesota (FEMA-1212-DR), dated April 1, 1998, and related determinations.

**EFFECTIVE DATE:** April 1, 1998.

**FOR FURTHER INFORMATION CONTACT:** Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3260.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that, in a letter dated April 1, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Minnesota, resulting from severe storms and tornadoes on March 29, 1998, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, P.L. 93-288, as amended ("the Stafford Act").

I, therefore, declare that such a major disaster exists in the State of Minnesota.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts, as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance, debris removal and emergency protective measures (Categories A and B) under the Public Assistance program, and Hazard Mitigation in the designated areas, and any other forms of assistance under the Stafford Act you may deem appropriate. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance or Hazard Mitigation will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Timothy J. Monteen of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Minnesota to have been affected adversely by this declared major disaster:

Brown, LaSueur, and Nicollet Counties for Individual Assistance and Categories A and B under the Public Assistance program.

All counties within the State of Minnesota are eligible to apply for

assistance under the Hazard Mitigation Grant Program.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing Program; 83.548, Hazard Mitigation Grant Program)

## GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090-0250]

### Proposed Collection; Comment Request Entitled Zero Burden Information Collection Reports

**AGENCY:** Office of Acquisition Policy, GSA.

**ACTION:** Notice of request for public comments regarding reinstatement to a previously approved OMB clearance 3090-0250, Zero Burden Information Collection Reports.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Office of Acquisition Policy has submitted to the Office of Management and Budget (OMB) a request to review and approve a reinstatement of a previously approved information collection requirement concerning Zero Burden Information Collection Reports. GSA proposed to use a single, general control number for information collections that impose no burden upon the public.

**DATES:** Comment Due June 16, 1998.

**ADDRESSES:** Comments regarding this collection of information should be submitted to: Edward Springer, GSA Desk Officer, Room 3235, NEOB, Washington, DC 20503 and to Marjorie Ashby, General Services Administration (MVP), 1800 F Street NW, Washington, DC 20405.

**FOR FURTHER INFORMATION CONTACT:** Al Matera, Office of GSA Acquisition Policy (202) 501-1224.

**SUPPLEMENTARY INFORMATION:** The GSA is requesting the Office of Management and Budget (OMB) to reinstate information collection, 3090-0250, Zero Burden Information Collection Reports. This information collection consists of reports that do not impose collection burdens upon the public. These collections require information which is already available to the public at large or that is routinely exchanged by firms during the normal course of business. A general control number for these collections decreases the amount of paperwork generated by the approval process. Since May 1992, GSA has published two rules that fall under Information Collection 3090-0250: "Implementation of Public Law 99-506" published at 56 FR 29442, June 27, 1991, and "Industrial Funding Fee" published at 62 FR 38475, July 18, 1997.

#### Copy of Proposal

A copy of this proposal may be obtained from the GSA Acquisition Policy Division (MVP), Room 4011, GSA

Building, 1800 F Street, NW, Washington, DC 20405 or by telephoning (202) 501-3822, or by faxing your request to (202) 501-3341.

Dated: April 7, 1998.

**Ida M. Ustad,**

*Deputy Associate Administrator for Acquisition Policy.*

[FR Doc. 98-10246 Filed 4-16-98; 8:45 am]

BILLING CODE 6820-61-M

## GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090-0248]

### Submission for OMB Review; Comment Request Entitled Placement of Orders and Ordering Information

**AGENCY:** Office of Acquisition Policy, GSA.

**ACTION:** Notice of request for public comments regarding an extension to an existing OMB clearance (3090-0248). A request for public comments was published at 63 FR 5384, February 2, 1998. No comments were received from the public.

**SUMMARY:** The GSA hereby gives notice under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), that it is requesting the Office of Management and Budget (OMB) to reinstate information collection, 3090-0248, Placement of Orders and Ordering Information. This information collection advances improved information technology usage by facilitating the use of electronic data interchange (EDI). GSA's Federal Supply Service has discontinued placing paper delivery orders and now maximizes the use of computer to-computer EDI. As an alternative, a contractor can receive EDI delivery orders through facsimile transmission. This extended use of EDI furthers congressional and executive branch policies that Federal agencies provide leadership in advancing environmental objectives through technology and the expanded use of electronic commerce.

**DATES:** May 18, 1998.

**ADDRESSES:** Send comments to Edward Springer, GSA Desk Officer, Room 3235, NEOB, Washington, DC 20503, and to Marjorie Ashby, General Services Administration (MVP), 18th & F Streets, NW, Washington, DC 20405.

#### ANNUAL REPORTING BURDEN:

Respondents: 260; annual responses: 260; average hours per response: .30; burden hours: 130.

**FOR FURTHER INFORMATION CONTACT:** Al Matera, Office of GSA Acquisition Policy (202) 501-1224.

**Copy of Proposal**

A copy of this proposal may be obtained from the GSA Acquisition Policy Division (MVP), Room 4011, GSA Building, 18th & F Streets NW, Washington, DC 20405, or by telephoning (202) 501-3822, or by faxing your request to (202) 501-3341.

Dated: April 10, 1998.

Ida M. Ustad,

Deputy Associate Administrator, Office of Acquisition Policy.

[FR Doc. 98-10247 Filed 4-16-98; 8:45 am]

BILLING CODE 6820-61-M

Regulations to government aircraft, the role of GSA in Federal aircraft management, including, specifically, the responsibilities, authority and goals of the Interagency Committee for Aviation Policy (ICAP) and the efficacy of the Federal Aircraft Management Information Systems (FAMIS).

The meeting will be open to the public. The public is hereby afforded the opportunity to submit written statements and to speak at the meeting.

**FOR FURTHER INFORMATION CONTACT:** Marty College (202) 208-7420, Executive Assistant to the GSA Aircraft Management Policy Advisory Board.

Dated: April 9, 1998.

Beverly J. Sharkey,

Designated Federal Officer.

[FR Doc. 98-10245 Filed 4-16-98; 8:45 am]

BILLING CODE 6820-34-M

**GENERAL SERVICES ADMINISTRATION**

**Aircraft Management Policy Advisory Board (AMPAB) of the Governmentwide Policy Board, Meeting**

**AGENCY:** General Services Administration.

**ACTION:** Meeting notice.

**SUMMARY:** Notice is hereby given that the General Services Administration (GSA) Aircraft Management Policy Advisory Board (AMPAB) of the Governmentwide Policy Board will meet from 1:00 p.m. to 3:00 p.m. on Monday, May 4, 1998 in the Main Auditorium at the General Services Administration Building, 18th & F Streets, NW., Washington, DC 20405. Notice is required by the Federal Advisory Committee Act, 5 U.S.C. App. 2, and the implementing regulation, 41 CFR 101-6.

The purpose of the meeting is to provide a forum for the AMPAB to present its findings and recommendations following a review of the management, operations and safety of aircraft owned or operated by, or for, the various Federal agencies. The scope of the AMPAB review included the state of aviation safety in non-Department of Defense government aircraft operations; the applicability of the Federal Aviation

agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

**Proposed Projects**

1. *Contents of a Request of Health Hazard Evaluation (0920-0102)*—Extension—In accordance with its mandates under the Occupational Safety and Health Act of 1970 and the Federal Mine Safety and Health Act of 1977, the National Institute for Occupational Safety and Health (NIOSH) responds to approximately 400 requests for health hazard evaluations each year to identify potential chemical, biological or physical hazards at the workplace. A NIOSH form is available for requesting these health hazard evaluations. This form provides the mechanism for employees, employers, and other authorized representatives to supply the information required by the regulations which govern the NIOSH health hazard evaluation program (42 CFR 85.3-1). The information provided is used by NIOSH to determine whether or not there is reasonable cause to justify conducting an investigation. The main purpose of investigations conducted in the health hazard evaluation program is to help employers and employees identify and eliminate occupational health hazards. Without the information requested on this form, NIOSH would be unable to perform its legislated function of conducting health hazard evaluations in workplaces. The total estimated annual cost to respondents is \$1,220.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Centers for Disease Control and Prevention**

[INFO-98-17]

**Proposed Data Collections Submitted for Public Comment and Recommendations**

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639-7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the

Respondents	Number of respondents	Number of responses/respondent (in hrs.)	Average burden/response (in hrs.)	Total burden (in hrs.)
Employees and Representatives .....	260	1	.2	52
Employers .....	140	1	.2	28
<b>Total .....</b>				<b>80</b>

2. *Assessing the Structure and Organizational Effectiveness of Community-Based Organizations (CBOs) for the Delivery of HIV*

*Prevention Programs—New—The Centers for Disease Control and Prevention, National Center for HIV, STD, and TB Prevention, Division of*

*HIV/AIDS Prevention—Intervention Research and Support, Program Evaluation Research Branch is planning to collect primary and secondary data*

as part of this study to identify and assess the organizational structure and collaborative efforts that contribute to the ability of CBOs to access their target populations, deliver HIV prevention services, and provide referrals over a sustained period of time. For the purposes of this study, a CBO is defined as any not-for-profit organization that provides direct prevention services to persons at high risk for infection within

a designated area. Evaluation is necessary to understand the impacts of CDC's expenditures and efforts to support CBOs, and for modifying and improving the prevention efforts of CBOs.

Interviews and document reviews will be conducted with community-based organizations, health departments, collaborating organizations, other organizations in the community, and

community members in seven geographical areas at four different points in time. Four CBOs from each area will be included in the study. The first wave of data collection is planned for the summer 1998, and data collection will end during the winter of 2000. The total burden in hours is estimated at 10,080.

Respondents	Number of respondents	Number of responses/respondent	Average burden/response (in hrs.)	Total burden (in hrs.)
CBOs .....	224	4	1	896
Health Department .....	56	4	1	224
Collaborating Organizations .....	840	4	1	3360
Other Community .....	840	4	1	3360
Community Members .....	560	4	1	2240
<b>Total .....</b>				<b>10080</b>

**3. PHS Supplements to the Application for Federal Assistance SF 424 (0920-0428)—Extension—**The Centers for Disease Control and Prevention (CDC) is requesting a three-year extension and revision of OMB approval for continued use of the Supplements to the Request for Federal Assistance Application (SF-424). We also plan on modifying the SF 424 form. The Checklist, Program Narrative, and the Public Health System Impact Statement (third party notification)

(PHSIS) are a part of the standard application for State and local governments and for private non-profit and for-profit organizations when applying for financial assistance from PHS grant programs. The Checklist assists applicants to ensure that they have included all required information necessary to process the application. The Checklist data helps to reduce the time required to process and review grant applications, expediting the issuance of grant awards. The PHSIS

Third Party Notification Form is used to inform State and local health agencies of community-based proposals submitted by non-governmental applicants for Federal funding.

The current OMB approval for the supplements was previously submitted by the Department of Health and Human Services, Office of the Assistant Secretary of Health (OASH) under OMB number 0937-0189. The total annual cost to the respondents is \$1,184,452.

Respondents	No. of respondents	No. of responses/respondent	Avg. burden/response (in hrs.)	Total burden (in hrs.)
State and local health departments; non-profit and for-profit organizations .....	7,643	1	4.215	32,215
<b>Total .....</b>				<b>32,215</b>

Dated: April 13, 1998.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Administration for Children and Families**

**Proposed Information Collection Activity; Comment Request**

**Proposed Projects**

*Title:* National Directory of New Hires Reporting Results Survey.

*OMB No.:* New Collection.

*Description:* Pub. L. 104-193, the "Personal Responsibility and Work Opportunity Reconciliation Act of 1996," required the Office of Child Support Enforcement (OCSE) to develop a National Directory of New Hires (NDNH) to improve the ability of State

child support agencies to locate noncustodial parents and collect child support across State lines. In order to encourage continued and even improved cooperation with the requirements of the program, OCSE would like to conduct a brief telephone survey to solicit any information already collected by the States as to improve collection and other programmatic savings attributable to the program. That information would then be condensed into a report to be published through newsletters or press releases.

*Respondents:* State, Local or Tribal Govt.

## ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
New Hire Results Survey .....	54	4	.5	108

*Estimated Total Annual Burden Hours: 108.*

In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Information Services, 370 L'Enfant Promenade, SW, Washington, DC 20447, Attn: ACF Reports Clearance Officer. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Dated: April 13, 1998.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. 98D-0193]

#### Draft Guidance for Industry on Manufacturing, Processing, or Holding Active Pharmaceutical Ingredients; Availability

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled "Manufacturing, Processing, or Holding Active Pharmaceutical Ingredients." This draft guidance is intended to provide guidance on current good manufacturing practices (CGMP's) for manufacturing, processing, packing, or holding active pharmaceutical ingredients (API's). The draft guidance is intended to help ensure the quality and suitability of API's for use in the manufacture of drug products.

**DATES:** Written comments may be submitted on the draft guidance by May 18, 1998. General comments on agency guidances are welcome at any time.

**ADDRESSES:** Copies of this draft guidance are available on the Internet at <http://www.fda.gov/cder/guidance/index.htm> or <http://www.fda.gov/cber/guidelines.htm>.

Submit written comments on the draft guidance to the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** Edwin M. Rivera, Center for Drug Evaluation and Research (HFD-322), 7520 Standish Pl., Rockville, MD 20855, 301-594-0095; John A. Eltermann, Center for Biologics Evaluation and Research (HFM-205), 1401 Rockville Pike, Rockville, MD 20852, 301-827-3031; or Jose R. Laureano, Center for Veterinary Medicine (HFV-230), 7500 Standish Pl., Rockville, MD 20855, 301-594-1785.

**SUPPLEMENTARY INFORMATION:** FDA is announcing the availability of a draft guidance for industry entitled "Manufacturing, Processing, or Holding Active Pharmaceutical Ingredients." It provides guidance on CGMP's for the manufacture, processing, packing, or holding (i.e., storage) of API's.

The draft guidance is a result of extensive efforts that began in July 1995 when FDA decided to develop an industry guidance for the manufacture

and control of API's. An initial draft of this guidance for industry was widely distributed during 1996. It was reviewed at a September 1996 international conference on API's in Canberra, Australia, sponsored by the Pharmaceutical Inspection Convention/Pharmaceutical Inspection Convention Scheme (PIC-PIC/S), and at the October 1996 annual FDA/Parenteral Drug Association Forum in Bethesda, MD. It also was distributed to numerous pharmaceutical trade associations in a letter from the Center for Drug Evaluation and Research's (CDER) Office of Compliance, dated November 8, 1996. The initial draft was posted on CDER's website on November 12, 1996, with a request for comments by December 10, 1996. On December 9, the deadline for comments was extended until January 31, 1997. This draft guidance incorporates recommendations received at the two conferences and comments from 27 organizations, including API manufacturers, dosage manufacturers, and pharmaceutical associations.

At a February 4 and 5, 1998, meeting of the International Conference on Harmonisation (ICH) Steering Committee in Tyson's Corner, VA, FDA supported the decision to develop internationally harmonized guidance on CGMP's for API's through the ICH process. The agency agreed to participate in an expert working group that will review numerous guidance documents developed by industry and regulatory bodies to develop a single harmonized ICH guidance. API/CGMP guidances to be reviewed by the working group include those prepared by the European Chemical Industry Council/European Federation of Pharmaceutical Industries' Association, the Pharmaceutical Research and Manufacturers of America, PIC-PIC/S, and the World Health Organization. This draft guidance will also be considered by the working group.

The draft guidance applies to the manufacture and control of drug and biologic API's for use in human and veterinary drug products. In addition, it applies to the later chemical isolation and purification steps of API's derived from biological or fermentation processes and to sterile API's, but only up to the point where the API is

rendered sterile. The document also identifies CGMP's for the manufacture of API's used in the production of drug products for clinical trials.

The draft guidance incorporates the following two fundamental concepts in API production: (1) Application of CGMP controls to all steps in the manufacturing process, beginning with the use of starting materials; and (2) validation of those steps determined to be critical to the quality and purity of the final API. The guidance clarifies the agency's expectations regarding application of CGMP's (i.e., extent of written instructions, in-process controls, sampling, testing, monitoring, and documentation) to different steps of an API process.

This draft guidance represents the agency's current thinking on the manufacture and control of API's. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirement of the applicable statute, regulations, or both.

Written requests for single copies of the guidance "Manufacturing, Processing, or Holding Active Pharmaceutical Ingredients" should be submitted to the Drug Information Branch (HFD-210), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Send one self-addressed adhesive label to assist that office in processing your requests. Requests should be identified with the docket number found in brackets in the heading of this document. A copy of the draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 14, 1998.

William K. Hubbard,  
Associate Commissioner for Policy  
Coordination.

### Health Resources and Services Administration

#### HRSA Competitive Grants Preview; Long Term Training in Leadership Education in Neurodevelopmental and Related Disabilities (LEND)

AGENCY: Health Resources and Services Administration, HHS.

**ACTION:** Notice of extension of deadline date.

**SUMMARY:** This notice extends the due date for applications for Long Term Training in Leadership Education in Neurodevelopmental and Related Disabilities (LEND) program grants, previously published in the Federal Register on October 9, 1997 as part of the *General Notice: Availability of the HRSA Competitive Grants Preview* (62 FR 52894-52914). Authorized under Title V of the Social Security Act, these LEND grants are intended to improve the health status of infants, children, and adolescents with, or at risk for, neurodevelopmental and related disabilities, including mental retardation, neurodegenerative and acquired neurological disorders, and multiple handicaps. The LEND programs prepare health professionals to assist children and their families to achieve their developmental potentials by forging a community-based partnership of health resources and community leadership.

In the table on page 52893 and on page 52909 in the third column, the application deadline date published in the Federal Register has been extended to October 1, 1998.

Dated: April 13, 1998.

James J. Corrigan,

Acting Associate Administrator for  
Management and Program Support.

#### Advisory Council; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1998.

**Name:** Maternal and Child Health Research Grants Review Committee.

**Date and Time:** June 17-19, 1998; 8:00 a.m.-5:00 p.m.

**Place:** The Executive Boardroom, the Bethesda Ramada, 8400 Wisconsin Avenue, Bethesda, Maryland.

The meeting is open to the public on Wednesday, June 17, 1998, 9:00 a.m. to 10:00 a.m. Closed for the remainder of meeting.

**Agenda:** The open portion of the meeting will cover opening remarks by the Director, Division of Systems, Education and Science, who will report on program issues, congressional activities, and other topics of interest to the field of maternal and child health. The meeting will be closed to the public on Wednesday, June 17, 1998 from 10:00 a.m. for the remainder of the meeting for the review of grant applications. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., and the Determination by the Associate Administrator for Management and Program Support, Health Resources and Services Administration, pursuant to Public Law 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write or contact Gontran Lamberty, Dr. P.H., Executive Secretary, Maternal and Child Health Grants Review Committee, Room 18A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, or by telephone at (301) 443-2190.

Agenda items are subject to change as priorities dictate.

Dated: April 10, 1998.

Jane M. Harrison,

Acting Director, Division of Policy Review  
and Coordination.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**
**Health Resources and Services Administration**
**Creation of Ryan White Title IV List of Research Protocols**

**AGENCY:** Health Resources and Services Administration.

**ACTION:** Notice of creation of Ryan White Title IV List of Research Protocols.

**SUMMARY:** This will begin the process of establishing a list of research protocols of potential clinical benefit in the treatment or prevention of HIV to be used as a resource for the Ryan White CARE Act Title IV program.

To fulfill its legislative mandate under the Ryan White Comprehensive AIDS Resources Emergency Care (CARE) Act of 1990 (Pub. L. 101-381), as amended by the Ryan White CARE Act Amendments of 1996 (Pub. L. 104-146), which amended Title XXVI of the Public Health Service Act, Part D section 2671(c)(2)(A), the HIV/AIDS Bureau, Health Resources and Services Administration (HRSA), is creating a list of research protocols for dissemination to programs that receive Title IV funds to provide clients of those programs the opportunity to consider participating in the research. The list will consist of those protocols that have been determined by the Secretary to possess the potential to contribute to the prevention or treatment of HIV disease in women, children, infants or youth with findings that are generalizable. HRSA is now soliciting research protocols to be considered for the initial listing. Under the Ryan White Title IV program, HRSA is prohibited from funding the research projects.

**DATES:** Research protocols must be postmarked by May 1, 1998, to be considered for the initial listing. All research protocols received after the May 1, 1998, date will be considered on an on-going basis for updated listings.

**FOR FURTHER INFORMATION CONTACT:** To submit a project description for consideration for placement on this list of protocols and for further information on the criteria for selection, please contact Ms. Elaine Gross at 1-800-362-0071.

Dated: April 13, 1998.

**National Institute of Mental Health; Notice of Closed Meeting**

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting of the National Institute of Mental Health Special Emphasis Panel:

*Agenda/Purpose:* To review and evaluate grant applications.

*Committee Name:* National Institute of Mental Health Special Emphasis Panel.

*Date:* April 21, 1998.

*Time:* 5 p.m.

*Place:* Parklawn, Room 9C-18, 5600 Fishers Lane, Rockville, MD 20857.

*Contact Person:* Gloria B. Levin, Parklawn, Room 9C-18, 5600 Fishers Lane, Rockville, MD 20857, Telephone: 301-443-1340.

The meeting will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than fifteen days prior to the meeting due to the urgent need to meet timing limitations imposed by the review and funding cycle. (Catalog of Federal Domestic Assistance Program Numbers 93.242, 93.281, 93.282)

Dated: April 10, 1998.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-4341-N-06]

### Federal Property Suitable as Facilities to Assist the Homeless

**AGENCY:** Office of the Assistant Secretary for Community Planning and Development, HUD.

**ACTION:** Notice.

**SUMMARY:** This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

**FOR FURTHER INFORMATION CONTACT:** Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708-1226; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1-800-927-7588.

**SUPPLEMENTARY INFORMATION:** In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess of surplus Federal property. This notice is also published in order to comply with the December 12, 1998 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to

HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brian Rooney, Division of Property Management, Program Support Center, HHS, room 5B-41, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the *Federal Register*, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (i.e., acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the

following addresses: COE: Mr. Bob Swieconeck, Army Corps of Engineers, Management & Disposal Division, Pulaski Building, Room 4224, 20 Massachusetts Avenue, NW, Washington, DC 20314-1000; (202) 761-1749; GSA: Mr. Brian K. Polly, Assistant Commissioner, General Services Administration, Office of Property Disposal, 18th and F Streets, NW, Washington, DC 20405; (202) 501-2059; NAVY: Mr. Charles C. Cocks, Department of the Navy, Director, Real Estate Policy Division, Naval Facilities Engineering Command, Code 241A, 200 Stoval Street, Alexandria, VA 22332-2300; (703) 325-7342; (These are not toll-free numbers).

Dated: April 9, 1998.

**Fred Karnas, Jr.,**

*Deputy Assistant Secretary for Economic Development.*

## DEPARTMENT OF THE INTERIOR

### Office of the Secretary

#### Science Advisory Board

**AGENCY:** Office of the Secretary, Interior.

**ACTION:** Science Advisory Board--notice of establishment.

**SUMMARY:** This notice is published in accordance with Section 9(a)(2) of the Federal Advisory Committee Act of 1972 (Pub. L. 92-463). Following consultation with the General Services Administration, notice is hereby given that the Secretary of the Interior has established the Science Advisory Board. The purpose of the Advisory Board will be to advise and assist the Director of the Bureau of Land Management on issues pertaining to science and the application of scientific information in the management of public lands and their resources.

The Advisory Board will be comprised of up to nine members from among the following categories: natural resource management, energy and minerals, conservation biology, and ecology and genetics.

**SUPPLEMENTARY INFORMATION:** Under provisions of the Federal advisory committee management regulations (41 CFR Part 101-6.1015(a)(2)), the General Services Administration may waive the requirement that committee establishment notices appear 15 calendar days before the charter is filed. The General Services Administration has granted this waiver, at the request of the Department of the Interior, so that the Bureau of Land Management can meet commitments it made with regard to scheduling the first meeting of the Science Advisory Board.

**FOR FURTHER INFORMATION CONTACT:** Christine Jauhola, Bureau of Land Management, 1849 C Street, N.W., LSB-204, Washington, D.C. 20240, 202-452-7761, or Jack E. Williams, Bureau of Land Management, 1387 South Vinell Way, Boise, Idaho 83709, 208-373-4049.

**Certification**

I hereby certify that the establishment of the Science Advisory Board is necessary and in the public interest in connection with the Secretary of the Interior's responsibilities to manage the public lands and resources administered by the Bureau of Land Management.

Dated: April 15, 1998.

BILLING CODE 4310-84-P

**DEPARTMENT OF THE INTERIOR****Bureau of Land Management**

[MT-060-08-1610-00, 1613P]

**Notice of Intent to Prepare an Area of Critical Environmental Concern Plan Amendment for the Judith-Valley-Phillips Resource Management Plan**

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given that the Bureau of Land Management (BLM) will amend the Judith-Valley-Phillips Resource Management Plan (RMP). The Bureau of Land Management is amending the RMP to address special management for two potential Areas of Critical Environmental Concern (ACEC); Bitter Creek and Mountain Plover. The public land being considered is located in Valley County, Montana. An environmental assessment will be prepared by the Valley Resource Area to analyze the impacts of this proposal and any alternatives.

**DATES:** Comments and recommendations on this notice to amend the Judith-Valley-Phillips RMP should be received on or before May 18, 1998.

**ADDRESSES:** Address all comments concerning this notice to Richard M. Hotaling, Area Manager, Valley Resource Area, RR1-4775, Glasgow, MT 59230.

**FOR FURTHER INFORMATION CONTACT:** Jerry Majerus, 406-538-7461.

**SUPPLEMENTARY INFORMATION:** An ACEC is an area within the public lands where special management attention is required to protect important historic, cultural or scenic values, fish and wildlife resources or other natural systems, or to protect life and safety from natural hazards.

In November 1990, the BLM received the Mixed Grass Prairie ACEC nomination which encompasses

approximately 350,000 acres of public land in north Valley County. This area was nominated by several organizations for its natural integrity, scenic values, vegetation and on the basis that it is one of the largest and most intact sections of prairie remaining in the United States and a continuation of the Canadian Grasslands National Park. The BLM evaluated this nomination to determine it met both the relevance and importance criteria as outlined in the BLM's procedural guidance to ACECs (BLM Manual 1613). In summary, the entire nomination area was found to be relevant in terms of the scenic, cultural, and wildlife resources. In addition, two areas of approximately 100,000 acres in size were found relevant from a natural process or systems perspective. However, only the Bitter Creek Wilderness Study Area (WSA) (59,660 acres) was found to meet the importance criteria due to the scenic diversity and variety of vegetation types and wildlife habitats. The Bitter Creek WSA does qualify for further consideration as an ACEC.

In addition to the Mixed Grass Prairie nomination, the BLM previously evaluated the Mountain River (9,600 acres) nomination in south Valley County and determined it is a potential ACEC. This area was nominated for the mountain plover, a candidate species identified by the U.S. Fish and Wildlife Service. The area provides natural habitat for the mountain plover which is not associated with black-tailed prairie dogs. It is one of the last areas of native plover habitat and is more than locally significant.

The next step before either of these areas could become designated ACEC's is to determine if they require special management. Alternatives for special management will be considered through this plan amendment to the Judith-Valley-Phillips RMP. Meetings for the plan amendment are not yet scheduled. If meetings are scheduled, the public will be notified through an informational letter and/or local news releases.

The BLM is seeking comments from individuals, organizations, and agencies who may be interested or affected by the potential ACECs. Specifically, comments on nominations, issues, concerns or alternatives that should be addressed in the plan amendment.

This notice meets the requirements of 43 CFR 1610.7-2 for designation of ACECs.

(Authority: Sec. 202, Pub. L. 94-579, 90 Stat. 2747 (43 U.S.C. 1712))

Dated: April 9, 1998.

BILLING CODE 4310-DN-M

**DEPARTMENT OF THE INTERIOR****Bureau of Land Management**

[WO-230-1110-00-24 1A]

**Science Advisory Board; Meeting**

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Announcement of meeting.

**SUMMARY:** The Bureau of Land Management (BLM) announces a meeting of its Science Advisory Board on Thursday, April 30, 1998, at the Embassy Suites Hotel, 150 Anza Boulevard, Burlingame, California, telephone (650) 342-4600. Meeting hours will be 11:00 a.m. to 4:00 p.m.

The proposed agenda for the meeting is:

- Welcome by BLM Director Pat Shea;
- Existing needs and capabilities for inventory and monitoring within the BLM;
- Emerging research and assessment efforts;
- Inventory and monitoring assistance needed;
- Communication and coordination of needs and results;
- Suggestions for future action;
- Developing a coordinated inventory and monitoring strategy; and
- Public comment period.

All meetings of the Board are open to the public. Members of the public wishing to make oral statements to the Board will have an opportunity to do so beginning at 3:30 p.m. Persons wishing to make statements should register with the BLM by noon at the meeting location. Depending on the number of speakers, the Board may limit the length of presentations. Speakers should address specific issues listed on the agenda and provide a written copy of their statement.

**DATES:** Thursday, April 30, 1998. Science Advisory Board meeting.

**ADDRESSES:** The Board meeting will be held at the Embassy Suites Hotel, 150 Anza Boulevard, Burlingame, California.

**FOR FURTHER INFORMATION CONTACT:** Christine Jauhola, Bureau of Land Management, 1849 C Street, N.W., LSB-204, Washington, D.C. 20240, 202-452-7761, or Jack E. Williams, Bureau of Land Management, 1387 South Vinell Way, Boise, Idaho 83709, 208-373-4049.

**SUPPLEMENTARY INFORMATION:** The Science Advisory Board advises the Director of the Bureau of Land Management on issues pertaining to science and the application of scientific information in the management of public lands and their resources.

Under the Federal advisory committee management regulations (41 CFR 101-6.1015(b)(2)), in exceptional circumstances an agency may give less than 15 days notice of a committee meeting if the reasons for doing so are included in the meeting notice published in the *Federal Register*. In this case, BLM made commitments with regard to scheduling the first meeting of the advisory committee based on the approval of the charter within a certain time frame. Delays in obtaining approval of the charter within the Department of the Interior resulted in publication of the meeting notice less than 15 days prior to the committee meeting.

Dated: April 15, 1998.

**Tom Fry,**

*Acting Director.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[UTU-69025]

#### Utah; Proposed Reinstatement of Terminated Oil and Gas Lease

April 13, 1998.

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (P.L. 97-451), a petition for reinstatement of oil and gas lease UTU-69025 for lands in Uintah County, Utah, was timely filed and required rentals accruing from May 1, 1997, the date of termination, have been paid.

The lessee has agreed to new lease terms for rentals and royalties at rates of \$10 per acre and 16½ percent, respectively. The \$500 administrative fee has been paid and the lessee has reimbursed the Bureau of Land Management for the cost of publishing this notice.

Having met all the requirements for reinstatement of the lease as set out in Section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate lease UTU-69025, effective May 1, 1997, subject to the original terms and conditions of the

lease and the increased rental and royalty rates cited above.

## INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-407]

### Certain Remodulating Channel Selectors and Systems Containing Same; Notice of Investigation

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Institution of investigation pursuant to 19 U.S.C. 1337.

**SUMMARY:** Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on March 12, 1998, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Ciena Corporation, 920 Elkridge Landing Road, Linthicum, MD 21090. On April 8, 1998, Ciena filed an amended complaint and a supplementary letter. The complaint, as amended and supplemented, alleges violations of section 337 in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain remodulating channel selectors and systems containing same by reason of infringement of claims 1, 5, and 10 of U.S. Letters Patent 5,715,076. The complaint further alleges that there exists an industry in the United States as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a permanent exclusion order and a permanent cease and desist order.

**ADDRESSES:** The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, S.W., Room 112, Washington, D.C. 20436, telephone 202-205-2000. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-205-1810.

**FOR FURTHER INFORMATION CONTACT:** Thomas S. Fusco, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202-205-2571. General information concerning

the Commission may also be obtained by accessing its internet server (<http://www.usitc.gov>).

**Authority:** The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (1997).

### Scope of Investigation

Having considered the complaint, the U.S. International Trade Commission, on April 10, 1998, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain remodulating channel selectors or systems containing same by reason of infringement of claims 1, 5, or 10 of U.S. Letters Patent 5,715,076 and whether there exists an industry in the United States as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Ciena Corporation, 920 Elkridge Landing Road, Linthicum, MD 21090.

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint is to be served: Pirelli, S.p.A., Viale Sarca 222, 20126 Milano (Milan), Italy; Pirelli Cavi, S.p.A., Optical Communications Systems, Viale Sarca 222, 20126 Milano (Milan), Italy; Pirelli Cables and Systems LLC, 705 Industrial Drive, Lexington, SC 29072

(c) Thomas S. Fusco, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW, Room 401-O, Washington, D.C. 20436, who shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, the Honorable Sidney Harris is designated as the presiding administrative law judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d) and 210.13(a), such responses will be considered by the Commission if received no later than 20 days after the date of service by the

Commission of the complaint and notice of investigation. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

By order of the Commission.

Issued: April 13, 1998.

**Donna R. Koehnke,**

Secretary.

### Employment Standards Administration Wage and Hour Division

#### Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in

accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S-3014, Washington, D.C. 20210.

#### Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document

entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

## General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts." This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487-4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512-1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions including an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 10th day of April 1998.

Margaret J. Washington,  
 Acting Chief, Branch of Construction Wage Determinations.

## DEPARTMENT OF LABOR

## Occupational Safety and Health Administration

[Docket No. NRTL-2-93]

## Entela, Inc., Request for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Notice of request for expansion of recognition as a nationally recognized testing laboratory (NRTL), and preliminary finding.

SUMMARY: This notice announces the application of Entela, Inc. for expansion of its recognition as a NRTL under 29 CFR 1910.7, for test standards, and presents the Agency's preliminary finding.

DATES: The last date for interested parties to submit comments is June 16, 1998.

ADDRESSES: Send comments concerning this notice to: NRTL Program, Office of Technical Programs and Coordination Activities, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room N3653 Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Bernard Pasquet, NRTL Recognition Program at the above address, or phone (202) 219-7056.

## SUPPLEMENTARY INFORMATION:

## Notice of Application

Notice is hereby given that Entela, Inc. (ENT) has applied to the Occupational Safety and Health Administration (OSHA), pursuant to 29 CFR 1910.7, for an expansion of its current recognition as a Nationally Recognized Testing Laboratory (NRTL). ENT requests recognition for additional test standards. ENT's previous application pursuant to 29 CFR 1910.7 was for an expansion of its recognition (62 FR 8041, 2/21/97), which OSHA granted on May 22, 1997 (62 FR 28066).

The address of the ENT laboratories covered by this application are: Entela, Inc., 3033 Madison, S.E., Grand Rapids, Michigan 49548  
 Entela Taiwan Laboratories, 3F No. 262 Wen, Lin North Road, Pei Tou, Taipei, Taiwan

## Background

This Federal Register notice announces ENT's request for expansion of recognition as a Nationally Recognized Testing Laboratory for additional test standards, dated September 29, 1997 (see Exhibit 11). In

a recommendation dated February 17, 1998, staff for the NRTL Program recommended that ENT's recognition be expanded to include the additional test standards. The recommendation also incorporated the limitations on the recognition of the Taipei, Taiwan facilities and personnel, when applicable to the testing and evaluation of products under the test standards listed below. These limitations are repeated herein.

In its request for expansion, ENT included a specific reference to an International Electrotechnical Commission (IEC) standard for many of the test standards listed below. Each specific reference is apparently intended to show the IEC standard equivalent to the U.S. national test standard requested. While there may be some equivalence, this expansion of recognition does not apply to or cover any of the IEC standards referenced in ENT's current request for expansion. This clarification is provided since it may not be readily apparent to some reviewers of the public record concerning this notice.

ENT requests recognition for the following standards when applicable to equipment or materials that will be used in environments under OSHA's jurisdiction. ENT desires recognition for testing and certification of products tested for compliance with these test standards, which are appropriate within the meaning of 29 CFR 1910.7(c):

ANSI/UL 130 Electric Heating Pads  
 ANSI/UL 858 Household Electric Ranges  
 ANSI/UL 969 Marking and Labeling Systems  
 ANSI/UL 1431 Personal Hygiene and Health Care Appliances  
 ANSI/UL 2157 Electric Clothes Washing Machines and Extractors  
 UL 2601-1 Medical Electrical Equipment, Part 1: General Requirements for Safety  
 UL 6500 Audio/Video and Musical Instrument Apparatus for Household, Commercial, and Similar General Use  
 UL 8730-1 Electrical Controls for Household and Similar Use; Part 1: General Requirements  
 UL 8730-2-3 Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Thermal Motor Protectors for Ballasts for Tubular Fluorescent Lamps  
 UL 8730-2-4 Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Thermal Motor Protectors for Motor Compressors or Hermetic and Semi-Hermetic Type

UL 8730-2-8 Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Electrically Operated Water Valves

#### Limitation

The following limitations apply to the recognition of the Taiwan facility:

a. The Taiwan facility shall be limited to carrying out minor mechanical and electrical testing of instruments and small appliances.

b. Performance of inspections shall be limited to Entela personnel.

#### Preliminary Finding

Based upon a review of the complete application, and the recommendations of the staff, including the recommendation dated February 17, 1998, the Assistant Secretary has made a preliminary finding that Entela, Inc. can meet the requirements as prescribed by 29 CFR 1910.7 for the expansion of its recognition to include the eleven (11) test standards previously listed.

All interested members of the public are invited to supply detailed reasons and evidence supporting or challenging the sufficiency of the applicant's having met the requirements for expansion of its recognition as a Nationally Recognized Testing Laboratory, as required by 29 CFR 1910.7 and Appendix A to 29 CFR 1910.7. Submission of pertinent written documents and exhibits shall be made no later than the last date for comments (see "DATES" above), and submitted to the address provided above (see "ADDRESS"). Copies of the ENT application letters and supporting documentation, the recommendation on the programs and procedures, and all submitted comments, as received, are available for inspection and duplication (under Docket No. NRTL-2-93) at the Docket Office, Room N2634, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address.

The Assistant Secretary's final decision on whether the applicant (Entela, Inc.) satisfies the requirements for expansion of its recognition as an NRTL will be made on the basis of the entire record including the public submissions and any further proceedings that the Assistant Secretary may consider to be appropriate in accordance with Appendix A to Section 1910.7.

Signed at Washington, DC this 13th day of April, 1998.

**Charles N. Jeffress,**  
Assistant Secretary.

## NATIONAL CREDIT UNION ADMINISTRATION

### Agency Information Collection Activities: Submission to OMB for Review; Comment Request

**AGENCY:** National Credit Union Administration (NCUA).

**ACTION:** Request for comment.

**SUMMARY:** The NCUA has submitted the following revised information collection to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995 (P.L. 104-13, 44 U.S.C. Chapter 35). This information collection is published to obtain comments from the public.

**DATES:** Comments will be accepted until June 16, 1998.

**ADDRESSES:** Interested parties are invited to submit written comments to NCUA Clearance Officer or OMB Reviewer listed below:

**Clearance Officer:** Mr. James L. Baylen (703) 518-6411, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314-3428, Fax No. 703-518-6433, E-mail: jbaylen@ncua.gov.

**OMB Reviewer:** Alexander T. Hunt (202) 395-7860, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

#### FOR FURTHER INFORMATION CONTACT:

Copies of the information collection requests, with applicable supporting documentation, may be obtained by calling the NCUA Clearance Officer, James L. Baylen, (703) 518-6411.

**SUPPLEMENTARY INFORMATION:** Proposal for the following collection of information:

**OMB Number:** 3133-0149.

**Form Number:** NCUA 5300.

**Type of Review:** Revision of a currently approved collection.

**Title:** 12 CFR 701.26, 701.27, 701.36(a)(4)(iv), 704.11(e) and part 712—Credit Union Service Organization Rule.

**Description:** The final regulation updates, clarifies and streamlines existing rules concerning credit union service organizations (CUSOs), a common means of outside provision of services to federal credit unions (FCUs) and to credit union members.

The final rule clarifies NCUA's authority to review CUSO books, records, and operations, adds corporate separateness requirements and additional permissible services, changes the legal opinion requirements, maintains safety and soundness criteria, and ensures the continuity and growth

of services to FCUs and their members conducted through CUSOs.

**Respondents:** Credit unions with CUSOs.

**Estimated No. of Respondents/Recordkeepers:** 3,357.

**Estimated Burden Hours Per Response:** 1.17 hours.

**Frequency of Response:** Annually.

**Estimated Total Annual Burden Hours:** 4,566.

**Estimated Total Annual Cost:** \$1,921,000.

By the National Credit Union Administration Board on April 10, 1998.

**Becky Baker,**

Secretary of the Board.

BILLING CODE 7535-01-U

## NUCLEAR WASTE TECHNICAL REVIEW BOARD

### Board Workshop; May 18-19, 1998—Falls Church, Virginia; Waste Package Concepts and Identification of Research Needs

Pursuant to its authority under section 5051 of Pub. L. 100-203, Nuclear Waste Policy Amendments Act of 1987, the Nuclear Waste Technical Review Board (Board) will sponsor a workshop May 18-19, 1998, beginning at 8:30 a.m. both days. The workshop, which is open to the public, will use a facilitated, brainstorming approach that should allow participants to explore and discuss waste package concepts for direct disposal of commercial spent nuclear fuel in a hypothetical repository designed for Yucca Mountain in Nevada.

The purpose of the workshop is to develop a firm technical basis for the Board to review and evaluate the scientific and technical merits of any waste package designs that may arise from the Department of Energy's program for managing the geologic disposal of commercial spent nuclear fuel and high-level nuclear waste.

The workshop will be held at the Doubletree Hotel at Tysons Corner, 7801 Leesburg Pike, Falls Church, Virginia; Tel (703) 893-1340; Fax (703) 749-8528. Reservations for accommodations should be made by April 29, 1998. Please mention that you are attending the Nuclear Waste Technical Review Board's workshop to receive the preferred rate.

The format of the workshop will be a roundtable discussion among invited panelists and members of the Board and its staff, assisted by an impartial facilitator. Beginning with several short

presentations describing the current Department of Energy repository and waste package designs, the workshop will move to discussion by the participants to alternative design concepts that are compatible with the Department of Energy's current repository design for Yucca Mountain, or other repository designs that reasonably could be implemented there. The discussion also will include research and development that might be required to support each design concept.

Time will be set aside during the workshop for technical comments from the public that pertain to the discussion. Depending on the number of people wanting to make comments, time limits may have to be set. Written comments of any length may be submitted for the record. Those wanting to make comments will be asked to sign up at the registration table.

Transcripts of this meeting will be available on computer disk, via e-mail, or on a library-loan basis in paper format from Davonya Barnes, Board staff, beginning June 30, 1998. For further information, contact Frank Randall, External Affairs, 2300 Clarendon Blvd., Suite 1300, Arlington, Virginia 22201; (tel) 703-235-4473; (fax) 703-235-4495; (e-mail) info@nwtrb.gov.

The Nuclear Waste Technical Review Board was created by Congress in the Nuclear Waste Policy Amendments Act of 1987 to evaluate the technical and scientific validity of activities undertaken by the DOE in its program to manage the disposal of the nation's high-level radioactive waste and commercial spent nuclear fuel. In that same legislation, Congress directed the DOE to characterize a site at Yucca Mountain in Nevada for its suitability as a potential location for a permanent repository for disposing of that waste.

Dated: April 14, 1998.

**William Barnard,**

*Executive Director, Nuclear Waste Technical Review Board.*

[FR Doc. 98-10220 Filed 4-16-98; 8:45 am]

BILLING CODE 6820-AM-M

## SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC-23109; 812-9544]

### State Street Bank and Trust Company; Notice of Application

April 13, 1998.

AGENCY: Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for exemption under sections 6(c) and 17(b) of the Investment Company Act of 1940 (the "Act") from sections 17(a)(1) and 17(a)(2) of the Act.

**SUMMARY OF APPLICATION:** Applicant State Street Bank and Trust Company requests an order that would permit it to engage in repurchase agreements and currency transactions with certain affiliated registered management investment companies (the "Funds") for which applicant serves as custodian. Applicant will be an affiliated person, or an affiliated person of an affiliated person, of a Fund solely by reason of applicant's owning, controlling, or holding 5% or more (but less than 20%) of the outstanding voting securities of the Fund. The requested order would not extend to transactions between applicant and a Fund when applicant or an affiliated person of applicant is the investment adviser to the Fund.

**FILING DATES:** The application was filed on March 17, 1995, and amended on December 20, 1995. Applicant has agreed to file another amendment during the notice period, the substance of which is included in this notice.

**HEARING OR NOTIFICATION OF HEARING:** An order granting the application will be issued unless the SEC orders a hearing. Any interested person may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on May 8, 1998 and should be accompanied by proof of service on applicant in the form of an affidavit, or for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

**ADDRESSES:** Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicant: 225 Franklin Street, Boston, Massachusetts 02110.

**FOR FURTHER INFORMATION CONTACT:** David W. Grim, Staff Attorney, at (202) 942-0571, or Nadya B. Roytblat, Assistant Director, at (202) 942-0564 (Division of Investment Management, Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch (tel. 202-942-8090).

### Applicant's Representations

1. Applicant is a wholly-owned subsidiary of State Street Boston Corporation, a publicly held bank holding company. Applicant is organized as a trust company under the laws of the Commonwealth of Massachusetts and is a member of the Federal Reserve System. Applicant is a "bank" as that term is defined by section 2(a)(5) of the Act and meets the qualifications set forth in section 26(a)(1) of the Act for an investment company custodian. Applicant offers a wide variety of commercial and trust services, including custodian services to registered investment companies.

2. One division of applicant, Capital Markets, is a dealer in government securities, foreign currency, and other instruments. Another division of applicant, Global Advisors, manages money on a discretionary basis for registered investment companies, collective and common trust funds, and separate accounts. Global Advisors may invest client funds in a wide variety of investment products, including shares of Funds. As a result of the investment activities of Global Advisors, applicant may at times own, hold, or control with the power to vote more than 5% of the shares of a Fund.

3. Applicant proposes to enter into repurchase agreements and currency transactions with the Funds for which applicant serves as custodian. As a Fund's custodian, applicant is in a unique position to afford the Fund certain advantages, such as added investment flexibility, advantageous prices, and accurate and efficient settlements for these types of transactions.

### Applicant's Legal Analysis

1. Sections 17(a)(1) and 17(a)(2) of the Act prohibit an affiliated person of a Fund, or an affiliated person of an affiliated person of the Fund, from knowingly selling to or purchasing from the Fund any security or other property. Applicant represents that the purchase and sale of repurchase agreements are the types of transactions covered by section 17. Applicant also states that the proposed currency transactions may be covered by section 17 to the extent they involve the purchase or sale of property.

2. Section 2(a)(3) of the Act defines an "affiliated person" of another person to include: (a) any person directly or indirectly owning, controlling, or holding with power to vote 5% or more of the outstanding voting securities of the other person; (b) any person 5% or more of whose outstanding voting securities are directly or indirectly

owned, controlled, or held with power to vote, by the other person; and (c) any person directly or indirectly controlling, controlled by, or under common control with, the other person.

3. Applicant states that, as a result of the investment activities of Global Advisors, as described above, applicant may at times own, control, or hold with the power to vote 5% or more of the outstanding shares of a Fund and therefore constitute an affiliated person of the Fund. Furthermore, Funds may be affiliates of each other when they share common officers, directors, or investment advisers because the Funds may be deemed to be under common control. As a result, applicant states that, when it owns, controls, or holds with power to vote 5% or more of the outstanding shares of a Fund, it may be deemed to be an affiliated person of an affiliated person of all Funds in the same complex as the Fund.

4. Under section 17(b), the SEC may issue an order of exemption from section 17(a) if evidence establishes that: (a) the terms of the proposed transaction are reasonable and fair and do not involve overreaching on the part of any person; (b) the proposed transaction is consistent with the policy of each registered investment company concerned; and (c) the proposed transaction is consistent with the general purposes of the Act. Under section 6(c), the SEC may exempt any person, security, or transaction from any provision of the Act or any rule thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant asserts that the proposed transactions meet the standards set forth in sections 6(c) and 17(b).

5. Applicant represents that the requested relief would be conditioned on a Fund's adoption of certain procedures (the "Procedures"). Applicant asserts that the Procedures require careful monitoring by a Fund of securities transactions with applicant. Applicant states that the Procedures provide a mechanism to determine that: (a) the security to be purchased or sold by a Fund is consistent with the investment policy and objectives of that Fund and with the interests of its shareholders and is comparable to other similar securities in which the Fund is authorized to invest and currently is purchasing; (b) the terms of the proposed transaction are reasonable and fair to the shareholders of that Fund and do not involve overreaching on the part of any person concerned; and (c) the

proposed transaction is consistent with the general purposes of the Act.

6. Applicant submits that the primary purpose of section 17(a) is to prevent persons with the power to control an investment company from using that power to such persons' own pecuniary advantage (*i.e.*, to prevent self-dealing). Applicant asserts that the degree of its affiliation with a Fund, coupled with the Procedures to be adopted by a Fund with respect to repurchase agreements and currency transactions with applicant, ameliorate the concerns underlying section 17. Further, applicant represents that there is or will be no express or implied understanding between applicant and the investment adviser of any Fund that such investment adviser will cause any Fund to enter into the transactions with applicant or give a preference to applicant in effecting such transactions between the Funds and applicant.

7. Applicant states that preventing a Fund from effecting repurchase agreement ("repo") transactions with applicant when applicant is the Fund's custodian would significantly limit the Fund's opportunity to obtain operational and processing cost savings on its repo transactions as well as impede its flexibility to invest cash balances late in the day. Applicant asserts that repo transactions with third parties which involve a transfer of securities through the Fed Wire to a Fund's custodian bank cannot be effected after 3:00 p.m. because the Fed Wire closes at that time. As a practical matter, applicant notes that such repo transactions generally have to be initiated well before 3:00 p.m. in order to insure consummation prior to the close. By contrast, applicant believes that repo transactions can be effected with applicant by Funds, for which applicant is custodian, after the close of the Fed Wire, because a transfer of securities can be effected through internal bookkeeping entries by applicant.

8. Applicant states that, in circumstances in which applicant is a Fund's custodian and is effecting repo transactions with the Fund, applicant has adopted detailed procedures designed to give the Fund an ownership and/or perfected security interest in the collateral (*i.e.*, the securities underlying the repo transaction). Applicant believes that these procedures ameliorate the risks associated with repo transactions when custody is maintained by the repo counterparty and not transferred to a third party. These risks may involve the insolvency of, and consequent default by, the repo counterparty, an attempt by the repo counterparty to retain assets (or

offset against assets) when a dispute arises between the parties, or losses resulting from fraud or operational error due to the Fund's inability to determine whether the collateral exists.

9. Applicant states that the securities underlying the repo transaction are maintained either in the Fund's custody account or on behalf of the specific Fund in an omnibus custodial account maintained by applicant at the Federal Reserve Bank of Boston. Applicant states that, in both cases, the securities are transferred to, or identified in, the custody account against a transfer of moneys out of the Fund's account to applicant's proprietary account. Applicant contends that the repo transaction securities so maintained are the assets of the Fund, not of applicant. Accordingly, applicant asserts that the risk of insolvency and the risks associated with commingling of assets are eliminated. Moreover, applicant states that in its capacity as custodian for the Fund, applicant marks its books and records to reflect the Fund's interest in the repo transaction securities. In addition, applicant states that written confirmations specifying the particular securities which are the subject of the repo transactions currently are sent to the Funds at the end of each trading day. In applicant's view, these procedures provide the Funds the same types of protections as would be the case if the securities were transferred to a third party.

10. Applicant states that the inability of a Fund to effect foreign currency transactions with applicant, when applicant is custodian for the Fund, could inhibit the ability of the Fund to obtain best price and execution on its foreign currency transactions and deprive the Fund of certain operational advantages and efficiencies.

11. Generally, the settlement of Fund transactions in foreign equity and debt securities is effected in the currency of the country of the issuer or the country in which the securities are traded. Thus, the Funds buy foreign currency to settle purchase transactions within foreign markets and sell foreign currency that they receive in the settlement of transactions in foreign markets. In addition, Funds often convert dividends or interest payments denominated in a particular currency into U.S. dollars or another currency. Some of the Funds also may enter into forward currency exchange contracts as a means of managing exchange rate risks. A Fund may enter into a foreign currency contract covering foreign securities held by the Fund in order to reduce or eliminate foreign currency exposure. Applicant states that the Funds will

represent that they will enter into foreign currency contracts in compliance with Investment Company Act Release No. 10666 (Apr. 18, 1979).

12. Currency transactions are entered into by telephone or computer. There is no centralized trading floor. Commercial banks act as the core of this market, quoting bid/asked prices and acting as principals. The spread between the bid and the asked price in the foreign exchange markets represents the potential profit to the market maker and the compensation for its perceived risk in quoting the price and selling or holding the currency. Foreign exchange rates generally are obtained through automated quotation systems. Applicant states that the Reuters Monitor Money Rates Service ("Reuters") is the money rate quote service that currently is recognized in the currency markets as the most reliable.

13. Applicant asserts that of particular importance to Funds in many cases are "odd lot" currency transactions, established by industry practice as those involving a United States dollar value of less than \$1 million. Currency dealers generally do not make an active market in odd lot currency transactions, and indications for such transactions are not reported on Reuters. The exchange rate that can be obtained for an odd lot currency transaction generally varies directly with the size of the transaction and the type of currency.

14. Applicant is a dealer in foreign currency and provides competitive quotations twenty four hours a day five days a week on over forty currencies. The most favorable price and execution on foreign currency transactions are normally achieved by requesting competitive quotations from foreign currency dealers with respect to a particular currency. The character of the market for a particular currency may vary widely in terms of price and availability. Therefore, applicant believes that it is important that the Funds have the ability to obtain quotations from as many major currency dealers as possible, including itself, to ensure that they are obtaining the most favorable price. Particularly when applicant is among a small number of competitive dealers in a currency, a Fund's ability to obtain the most favorable price or prompt execution would be directly restricted if a Fund is denied access to applicant.

15. Applicant represents that access to applicant is particularly significant in connection with odd lot currency transactions. When applicant serves as a Fund's custodian, it will ordinarily accommodate any odd lot currency transaction required for securities

settlement or related to the conversion of dividend and/or interest payments denominated in a particular currency into U.S. dollars or another currency. Because currency dealers do not make an active market in odd lot transactions, a Fund could have difficulty obtaining favorable prices and executions for these transactions absent the ability to effect transactions with applicant.

16. Applicant states that the inability to effect foreign currency transactions with applicant when applicant is the Fund's custodian also would deprive the Fund of certain operational advantages and efficiencies. Settlement procedures for transactions with applicant in these cases are simpler and more easily coordinated than transactions with third parties, resulting in a lower trade settlement failure rate. In addition, applicant can execute foreign currency transactions for the Fund after normal business hours. Moreover, applicant, in its role as custodian, monitors the settlement process for all foreign exchange and security transactions. As a result, if there is a trade settlement failure, applicant is positioned to quickly identify the failure and minimize the costs to the Fund.

17. Applicant states that its experience has been that Funds may at times engage in foreign currency transactions representing a significant percentage of their assets. As a result, applicant proposes that there will be no limit on the amount of a Fund's total assets that may be committed to foreign currency transactions with applicant. Applicant also represents that a significant percentage of currency transactions effected by applicant involve settlement terms that may range from one day to six months. Accordingly, applicant proposes that there will be no limit on the length of the currency contracts permitted under the requested relief.

#### **Applicant's Conditions**

If the requested relief is granted, applicant agrees to comply with the following conditions.

##### **A. General Conditions**

1. The board of directors of each Fund, including a majority of the directors who are not interested persons of the Fund, (a) will adopt procedures that are reasonably designed to provide that the conditions set forth below have been complied with; (b) will make and approve such changes to the procedures as deemed necessary; and (c) will determine no less frequently than quarterly that the transactions made pursuant to the order during the

preceding quarter were effected in compliance with such procedures. The investment adviser of each Fund may implement these procedures, subject to the direction and control of the board of directors of each Fund. Applicant will only engage in repurchase agreements and currency transactions with Funds that agree to adhere to the specific conditions set forth below and have furnished evidence to applicant that they will agree to abide by the conditions.

2. Each Fund (a) will maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) and a copy of the notice and order issued on the application; and (b) will maintain and preserve for a period of not less than six years from the end of the fiscal year in which any transaction occurred, the first two years in an easily accessible place, a written record of each transaction setting forth a description of the transaction, including the identity of the person on the other side of the transaction, the terms of the transaction, and the information or materials upon which the determinations described below were made.

3. No Fund will engage in transactions with applicant if applicant exercises a controlling influence over that Fund. Applicant will have no affiliation with a Fund, except that applicant may directly or indirectly own, control, or hold less than 20% of the outstanding voting securities of the Fund.

4. The transactions entered into by a Fund will be consistent with the investment objectives and policies of that Fund as recited in that Fund's registration statement and reports filed under the Act.

##### **B. Repurchase Agreements**

1. Any repurchase agreement will meet the portfolio quality requirements set forth in paragraph (c)(3) of rule 2a-7 under the Act and be "collateralized fully" as defined in rule 2a-7.

2. The quality, yield, and maturity of any repurchase agreement will be at least as favorable to a Fund as compared to other repurchase agreements that are appropriate for that Fund and that are being entered into during a comparable period of time.

##### **C. Currency Transactions**

1. At the time any currency transaction is consummated, applicant's short-term debt instruments will meet the portfolio quality requirements of a "First-Tier Security" set forth in rule 2a-7 under the Act.

2. Before any currency transaction is entered into, the Fund or its adviser must obtain such available market information as they deem necessary to determine that the price to be paid or received for, and the terms of, each transaction are at least as favorable as that available from other sources. This shall include the following information, without limitation:

With respect to round lot currency transactions, the Fund must obtain and document the competitive indications with respect to the specific proposed transaction, either from two other currency dealers or from one currency dealer and from an automated quotation system approved by the board of directors of the Fund, including a majority of non-interested directors. In the case of odd lot currency transactions, the Fund must obtain and document the competitive indications with respect to (a) the specific proposed transaction from two other currency dealers; and (b) a round lot transaction of the same currency with the same settlement terms from one other currency dealer or an automated quotation system. Competitive quotation information must include price and settlement terms. Dealers must be those who, in the experience of the Fund's adviser, have demonstrated the consistent ability to provide professional execution of currency transactions at competitive market prices in the currencies of the type desired. The dealers also must be those who, in the experience of the Fund's adviser, are in a position to quote favorable prices.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,  
Deputy Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-39853; File No. SR-Amex-97-48]

### Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to Listing and Trading of Index Warrants on the Merrill Lynch 1998 Equity Focus Index

April 13, 1998.

#### I. Introduction

On December 22, 1997, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities

and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> a proposed rule change to approve for listing and trading index warrants based on the Merrill Lynch 1998 Equity Focus Index ("Index").

The proposed rule change was published for comment in the *Federal Register* on February 3, 1998.<sup>3</sup> No comments were received on the proposal. This order approves the proposed rule change.

#### II. Description of the Proposal

The purpose of the proposed rule change is to permit the Exchange to list and trade cash-settled index warrants based on the Index, an equal-dollar weighted index developed by Merrill Lynch, Pierce, Fenner & Smith, Inc. The Exchange has represented that the listing and trading of warrants based on the Index will comply in all respects with Amex Rules 1100 through 1110 and Section 106 of the Amex Company Guide.

#### Design of the Index

The Exchange has represented that the Index is narrow-based<sup>4</sup> and composed of the stocks (or American Depositary Receipts ("ADRs") thereon) of 17 companies<sup>5</sup> representing various industries that are traded on the New York Stock Exchange ("NYSE") or through the facilities of the National Association of Securities Dealers Automated Quotation system ("Nasdaq"). The Index is equal-dollar weighted and is, therefore, designed to ensure that each of the component securities is initially represented in an approximately "equal" dollar amount in the Index. Accordingly, each of the 17 companies included in the Index will represent approximately 5.882 percent of the weight of the Index at the time of issuance of the warrant. The Index multipliers will be determined to yield an Index value of 100.00 on the date the

warrant is priced for initial offering to the public.

According to the Amex, the total market capitalization of the Index totaled \$380 billion on December 10, 1997. The median capitalization of the companies in the Index on that date was \$9.4 billion and the average market capitalization of these companies was \$22 billion. The individual market capitalization of the companies ranged from \$1.7 billion to \$106 billion. In addition, minimum monthly trading volume in the Index stocks ranged from approximately 330,000 shares to 54.4 million shares during the six month period from June through November 1997.

According to the Exchange, 15 of the Index's 17 component securities meet the current criteria for standardized options trading set forth in Rule 915. Only two component securities, Telecom Italia SpA and Toyota Motor Corporation, are represented by ADRs and according to the Amex, in both instances, comprehensive surveillance sharing arrangements are in place with the appropriate regulatory authorities in each relevant country. The Amex represents that no component security represents more than 25% of the weight of the index and the five highest weighted securities do not account for more than 50% of the weight of the Index.

Amex contemplates listing a single issuance of warrants based on the Index,<sup>6</sup> with a term ranging from one to three years. If the Amex seeks to list and trade other products based on the Index, including other issuances of Index warrants, the Exchange will advise the Commission to determine whether an additional filing pursuant to Rule 19b-4<sup>7</sup> is necessary. In addition, if the term of the warrants exceeds one year, the Exchange will monitor the options eligibility of the underlying securities. If less than 75% of the weight of the Index is composed of securities that are options eligible, the Amex will notify the Commission.<sup>8</sup>

#### Maintenance of the Index

Shares of a component stock may be replaced (or supplemented) with other securities under certain circumstances, such as the conversion of a component stock into another class of security, the

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> See Securities Exchange Act Release No. 39580 (January 26, 1998) 63 FR 5577.

<sup>4</sup> Telephone conversation between Claire McGrath, Vice President and Special Counsel, Amex, and Deborah Flynn, Division of Market Regulation ("Division"), Commission, on January 22, 1998.

<sup>5</sup> The component securities of the Index are as follows: Bank of New York Co., Inc.; Chubb Corp.; Comcast Corporation; Cracker Barrel Old Country Stores; Delta Airlines, Inc.; DST Systems, Inc.; Federal National Mortgage Association; Guidant Corporation; Masco Corp.; Office Depot, Inc.; Pfizer, Inc.; Protective Life Corp.; Questar Corp.; Tenet Healthcare Corp.; Telecom Italia SpA; KLM Royal Dutch Airlines; and Toyota Motor Corporation.

<sup>6</sup> Telephone conversation between Claire McGrath, Vice President and Special Counsel, Amex, and Deborah Flynn, Division, Commission, on January 22, 1998.

<sup>7</sup> 17 CFR 240.19b-4.

<sup>8</sup> Telephone conversation between Claire McGrath, Vice President and Special Counsel, Amex, and Deborah Flynn, Division, Commission, on April 8, 1998.

termination of a depository receipt program or the spin-off of a subsidiary. If the stock remains in the Index, the multiplier of that security in the portfolio may be adjusted to maintain the component's relative weight in the Index at the level immediately prior to the corporate action. In the event that a security in the Index is removed due to a corporate consolidation and the holders of such security receive cash, the cash value of such security will be included in the Index and will accrue interest at LIBOR to term, compounded daily.

#### *Trading of the Index Warrants*

The Index warrants will be direct obligations of their issuer subject to cash-settlement during their term, and either exercisable throughout their life (*i.e.*, American style) or exercisable only on their expiration date (*i.e.*, European style). Upon exercise, or at the warrant expiration date (if not exercisable prior to such date), the holder of a warrant structured as a "put" would receive payment in U.S. dollars to the extent that the Index has declined below a pre-stated index level. Conversely, holders of a warrant structured as a "call" would, upon exercise or at expiration, receive payment in U.S. dollars to the extent that the Index has increased above the pre-stated index level. If "out-of-the-money" at the time of expiration, the warrants would expire worthless.

#### *Calculation and Dissemination of the Value of the Index*

Similar to other stock index values published by the Exchange, the value of the proposed Index will be calculated continuously and disseminated every 15 seconds over the Consolidated Tape Association's Network B.

The multiplier of each of the 17 component stocks in the Index portfolio will remain fixed except in the event of certain types of corporate actions. Such corporate action includes the payment of a dividend other than an ordinary cash dividend, stock distribution, stock split, reverse stock split, rights offering, distribution, reorganization, recapitalization, or similar event. The multiplier of each component stock may also be adjusted, if necessary, in the event of a merger, consolidation, dissolution or liquidation of an issuer or in certain other events such as the distribution of property by an issuer to shareholders, the expropriation or nationalization of an issuer or the imposition of certain foreign taxes on shareholders of a foreign issuer.

#### *Listing and Trading of the Index Warrants*

As stated above, the listing and trading of the proposed warrants on the Index will comply in all respects with Amex Rules 1100 through 1110 and Section 106 of the Amex Company Guide. These provisions will govern all aspects of the listing and trading of the Index warrants, including issuer eligibility,<sup>9</sup> position and exercise limits,<sup>10</sup> reportable positions,<sup>11</sup> and trading halts and suspensions.<sup>12</sup>

In addition, these warrants will be sold only to accounts approved for the trading of standardized options<sup>13</sup> and the Exchange's options suitability standards will apply to recommendations regarding Index warrants.<sup>14</sup> Finally, the Amex will distribute a circular to its membership, prior to the commencement of trading, calling attention to specific risks associated with warrants on the Index.

#### **III. Discussion**

The Commission finds that the proposed rule change, as amended, is consistent with the requirements of Section 6 of the Act<sup>15</sup> and the rules and regulations thereunder applicable to a national securities exchange.<sup>16</sup> Specifically, the Commission believes that the proposed rule change is consistent with and furthers the objectives of Section 6(b)(5) of the Act<sup>17</sup> in that the trading of warrants based on the Index will serve to protect the public interest and will help to remove impediments to a free and open market by providing investors holding positions in some or all of the securities underlying the Index with a means to hedge exposure to the market risk associated with their portfolios.<sup>18</sup>

Nevertheless, the trading of warrants on the Index raises several concerns relating to the design and maintenance

of the Index, customer protection, surveillance, and market impact. The Commission believes however, for the reasons discussed below, that the Amex has adequately addressed these concerns.

The Commission finds that it is appropriate and consistent with the Act for the Amex to designate the Index as narrow-based for warrant trading as the Index is composed of a limited number of stocks. The Commission believes that the liquid markets, large capitalizations and relative weightings of the Index's component stocks significantly minimizes the potential for manipulation of the Index. First, the 17 stocks that comprise the Index, of which 14 trade on the NYSE and 3 trade on Nasdaq, are actively-traded. During the six month period from June 1997 through November 1997, minimum monthly trading in the Index stocks ranged from approximately 330,000 shares to 54.4 million shares. Second, the market capitalization of the stocks comprising the Index is very large. Specifically, the total capitalization of the Index, as of December 10, 1997, was approximately \$22 billion, with the market capitalization of the individual stocks in the Index ranging from \$1.7 billion to \$106 billion. In addition, the median capitalization of the companies in the Index on that date was \$9.4 billion, and the average market capitalization of these companies was \$22 billion. Third, no one particular stock dominates the Index. Specifically, no single stock accounts for more than approximately 5.882 percent of the Index's value.

The Commission notes that with respect to the maintenance of the Index, shares of a component stock will only be replaced or supplemented under certain limited circumstances, such as the conversion of a component stock into another class of security, the termination of a depository receipt program or the spin-off of a subsidiary. Accordingly, all replacement or supplemental Index component securities will be related to the original component stock.<sup>19</sup>

Although the Index, as currently composed, contains highly capitalized and actively-traded issues reflected in an equal-weighted manner, the Amex has not proposed Index maintenance criteria that ensures the Index will remain this way. The Commission understands that the Index is designed

<sup>9</sup> See Section 106 of the Amex Company Guide.

<sup>10</sup> See Amex Rules 1107 and 1108.

<sup>11</sup> See Amex Rule 1110.

<sup>12</sup> See Amex Rule 1109.

<sup>13</sup> See Amex Rule 1101.

<sup>14</sup> See Amex Rule 1102.

<sup>15</sup> 15 U.S.C. 78f.

<sup>16</sup> In approving this rule, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

<sup>17</sup> 15 U.S.C. 78f(b)(5).

<sup>18</sup> Pursuant to Section 6(b)(5) of the Act, the Commission must predicate approval of any new securities product upon a finding that the introduction of such product is in the public interest. Such a finding would be difficult with respect to a warrant that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns.

<sup>19</sup> In addition, as noted above, in the event that a security in the Index is removed due to a corporate consolidation and the holders of such security receive cash, the cash value of such security will be included in the Index and will accrue interest at LIBOR to term.

to reflect a static portfolio of stocks and the active Index maintenance (i.e., including replacing Index components) generally is inconsistent with such approach. In order to address the possibility that the quality of the stocks in the Index could deteriorate or one or several stocks could dominate the Index, the Amex has represented that it is seeking only to list and trade a single issuance of warrants on the Index with a limited duration of one to three years. The Commission notes that if the Exchange proposes to list and trade other products based on Index, including other index warrants, the Exchange will advise the Commission in order to determine whether a rule filing pursuant to Section 19(b) of the Act<sup>20</sup> will be necessary. In addition, the Commission notes that if the term of the warrants exceeds one year, the Exchange will monitor the options eligibility of the underlying securities. If less than 75% of the weight of the Index is composed of securities that are options eligible, the Amex will notify the Commission. Given the high quality of the component stocks, as well as the other factors noted above, the Commission believes that the absence of active Index maintenance criteria is not fatal to the Commission's approval of the listing and trading of a single issuance of warrants on the Index.

The Commission further notes that the rules and procedures of the Exchange adequately address the special concerns attendant to the trading of Index warrants. Specifically, the applicable suitability, account approval, disclosure, and compliance requirements of the applicable Amex provisions satisfactorily address potential public customer concerns. Moreover, the Amex plans to distribute a circular to its membership calling attention to specific risks associated with warrants on the Index. Finally, pursuant to the Exchange's listing guidelines, only companies capable of meeting the Amex's index warrant issuer standards will be eligible to issue Index warrants.<sup>21</sup>

The Commission believes that the listing and trading of warrants on the Index will not adversely impact the underlying securities because the Index is comprised of highly-capitalized securities that are actively-traded. In addition, the Amex has established

reasonable position and exercise limits for narrow-based stock index warrants,<sup>22</sup> which will serve to minimize potential manipulation and other stock market concerns.

Finally, the Amex represents<sup>23</sup> that its existing surveillance procedures will allow the Exchange to detect and deter potential manipulations and other trading abuses in the derivatives and underlying securities markets. The Exchange further represents that comprehensive surveillance sharing agreements are in place with the appropriate regulatory authorities in the countries that oversee the primary markets for the two securities in the Index that are represented by ADRs. Accordingly, the Commission believes that the Amex should have available to it the regulatory tools necessary to properly surveil for abuses in the trading of warrants on the Index.

#### V. Conclusion

For the foregoing reasons, the Commission finds that the Amex's proposal to list and trade warrants based on the Index is consistent with the requirements of the Act and the rules and regulations thereunder.

*It Is Therefore Ordered*, pursuant to Section 19(b)(2) of the Act,<sup>24</sup> that the proposed rule change (SR-Amex-97-48) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.<sup>25</sup>

BILLING CODE 8010-01-M

#### SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-39851; File No. SR-PHLX-97-35]

April 10, 1998.

#### Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change To Amend Its By-Law Article XII, Section 12-10, With Respect to the Eligibility of Persons To Serve as Inactive Nominees

On December 15, 1997, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b-4 thereunder<sup>2</sup> to amend its By-Law Article XII, Section 12-10, with respect to the eligibility of persons to serve as inactive nominees. On January 14, 1998, the Exchange submitted Amendment No. 1 to the filing, in which it proposed a new rule, Phlx Rule 21, defining "Inactive Nominee," and explained the role of an Inactive Nominee on the Phlx.<sup>3</sup>

Notice of the proposed rule change, including Amendment No. 1, was published in the *Federal Register*.<sup>4</sup> The Commission received no comment letters in response to the filing. This order approves the proposed rule change, as amended.

#### I. Description of the Proposal

Phlx's proposal would amend its By-Law Article XII, Section 12-10, with respect to the eligibility of persons to serve as Inactive Nominees.<sup>5</sup>

Phlx By-Law Article XII, Section 12-10, sets forth the eligibility requirements

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> See Letter from Murray L. Ross, Vice President and Secretary, Phlx, to Richard Strasser, Assistant Director, Division of Market Regulation, Commission, dated January 14, 1998. Amendment No. 1 is described further below.

<sup>4</sup> See Securities Exchange Act Release No. 39622 (Feb. 4, 1998) 63 FR 7488 (Feb. 13, 1998).

<sup>5</sup> In Amendment No. 1 to the filing, the Phlx proposed a new rule, to be designated as Rule 21, which would define an Inactive Nominee as follows:

*The term inactive nominee shall mean a natural person associated with and designated by a member organization who has applied for and been approved by the Admissions Committee for such status and is registered as such with the Office of the Secretary. An inactive nominee shall have no rights or privileges of membership unless and until said inactive nominee becomes a member of the Exchange pursuant to the By-Laws and Rules of the Exchange. An inactive nominee merely stands ready to assume legal title to a membership upon notice by the member organization to the Office of Secretary to be transferred intra-firm on an expedited basis.*

<sup>22</sup> The Commission notes that position limits for narrow-based stock index warrants are set at a level roughly equivalent to 75 percent of narrow-based index options. As a result, position limits for warrants based on the Index will be nine million.

<sup>23</sup> Telephone conversation between Claire McGrath, Vice President and Special Counsel, Amex, and Deborah Flynn, Division, Commission, on March 16, 1998.

<sup>24</sup> 15 U.S.C. 78s(b)(2).

<sup>25</sup> 17 CFR 200.30-3(a)(12).

<sup>20</sup> 15 U.S.C. 78s(b).

<sup>21</sup> See Section 106 of the Amex Company Guide which requires, among other things, that the issuer have tangible net worth in excess of \$250 million and otherwise substantially exceed size and earnings requirements in Section 101(A) of the Company Guide or meet the alternative guideline set forth in paragraph (a).

with respect to persons designated to serve as Inactive Nominees. An Inactive Nominee must be a person affiliated with a member organization who has submitted a membership application and has met all membership qualification requirements, including an examination administered by the Phlx's Market Surveillance Department. The amendment to By-Law Article XII, Section 12-10, will allow an approved Inactive Nominee to assume the legal title to a membership on an intra-firm and expedited basis in the event of an emergency due to illness or other factors. In Amendment No. 1, the Phlx stated that an Inactive Nominee would serve in the "event of an emergency due to illness or other factors," and "would allow a member organization to have a full compliment of traders or specialists available to conduct business on the Exchange trading floors by transferring legal title intra-firm to the inactive nominee thereby making that person an Exchange member."<sup>6</sup>

The rule change will subject a person designated as an Inactive Nominee to the existing membership application process, including fees. Additionally, the member organization with whom an Inactive Nominee is affiliated will be subject to a fee for the privilege of maintaining an Inactive Nominee's status.

A member organization seeking to designate an affiliated person as an Inactive Nominee shall submit a membership application on behalf of a proposed Inactive Nominee, who would go through the existing membership application process. Upon meeting all membership requirements and after posting for a two-week period in the membership Bulletin, this person will be registered as an Inactive Nominee. Upon notice filed with the Phlx Office of the Secretary in writing prior to 9:00 A.M. on any business day that the Exchange is open, an Inactive Nominee may assume the legal title to a membership on an intra-firm basis and would be eligible to transact business on the Exchange that day or for such longer period consistent with the seat lease or membership title and use agreement (ABC agreement).

<sup>6</sup> For example, an Inactive Nominee might serve on behalf of a trader who needs to take leave for surgery, or could serve when specialist take vacation leave. It is anticipated that Inactive Nominees would be used particularly following "triple-witching" days to assist firms in processing the greater number of transactions during those periods. Telephone conversation between Murray L. Ross, Vice President and Secretary, Phlx, and Marie D'Aguzzo Ito, Special Counsel, Division of Market Regulation, Commission, April 8, 1998.

## II. Discussion

The Commission finds that the proposed rule change is consistent with Section 6 of the Act in general, and in particular, with Section 6(b)(5). Under Exchange Act Section 6(b)(5), the rules of an exchange must be designed, among other things, to promote just and equitable principles of trade and to prevent fraudulent and manipulative acts and practices. By creating a pool of eligible individuals who can substitute for traders or specialists on the trading floor, the proposal should assist the Exchange in facilitating the smooth functioning of its market operations, consistent with Exchange Act Section 6(b)(5). Such an effort to have a prepared and available roster of substitute traders should help to facilitate transactions in securities and remove impediments to, and perfect the mechanism of, a free and open market, also consistent with Exchange Act Section 6(b)(5).

## III. Conclusion

*It is therefore ordered*, pursuant to Section 19(b)(2) of the Act,<sup>7</sup> that the proposed rule change (SR-PHLX-97-45), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.<sup>8</sup>

Margaret H. McFarland,  
Deputy Secretary.

BILLING CODE 8010-01-M

## DEPARTMENT OF STATE

[Public Notice 2782]

### Advisory Committee on International Economic Policy Notice of Partially Closed Meeting

The Advisory Committee on International Economic Policy (ACIEP) will meet 1:00 pm-5:00 pm on Monday, April 20, 1998, in Room 1107, U.S. Department of State, 2201 C Street, NW, Washington, DC 20520. The meeting will be hosted by Committee Chairman Mike Gadbow and by Assistant Secretary of State for Economic and Business Affairs Alan P. Larson.

The ACIEP will first meet in closed session, which will be devoted to organizational matters, the Asian financial crisis, and state/local economic sanctions. The closed briefings involve discussions of classified information, pursuant to section 10(d) of the Federal Advisory

<sup>7</sup> 15 U.S.C. 76S(b)(2).

<sup>8</sup> 17 CFR 200.30-3(a)(12).

Committee Act (FACA), 5 U.S.C. 552b(c)(1), 5 U.S.C. 442b(c)(4), and 5 U.S.C. 552b(c)(9)(B). The open session will focus on the OECD Multilateral Agreement on Investment and the Anti-Bribery Convention as well as African issues. Members of the public may attend the open session beginning at 3:00 p.m. as seating capacity allows.

As access to the Department of State is controlled, persons wishing to attend the meeting should notify the ACIEP Executive Secretary by Monday, April 13, 1998.

Each person must provide his or her name, company or organization affiliation, date of birth, and social security number to the ACIEP Secretariat at (202) 647-5968 or fax (202) 647-5713 (Attn: Sharon Rogers). A list will be made up for Diplomatic Security and the Reception personnel will direct them to Room 1107.

**FOR FURTHER INFORMATION CONTACT:** Sharon Rogers, Secretariat, U.S. Department of State, Bureau of Economic and Business Affairs, Room 6828, Main State, Washington, DC 20520. She may be reached at telephone number (202) 647-5968 or fax number (202) 647-5713.

Dated: April 14, 1998.

Alan P. Larson,

Assistant Secretary for Economic and Business Affairs.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

[Summary Notice No. PE-98-6]

### Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of petitions for exemption received and of dispositions of prior petitions.

**SUMMARY:** Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication

of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

**DATES:** Comments on petitions received must identify the petition docket number involved and must be received on or before May 6, 1998.

**ADDRESSES:** Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC-200), Petition Docket No. \_\_\_\_\_, 800 Independence Avenue, SW., Washington, D.C. 20591.

Comments may also be sent electronically to the following internet address: 9-NPRM-CMTS@faa.dot.gov.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-200), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 267-3132.

**FOR FURTHER INFORMATION CONTACT:** Tawana Matthews (202) 267-9783 or Angela Anderson (202) 267-9681 Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C. on April 3, 1998.

**Donald P. Byrne,**

*Assistant Chief Counsel for Regulations.*

#### Petitions for Exemption

**Docket No.:** 29146.

**Petitioner:** B F Goodrich Aerospace.

**Sections of the FAR Affected:** 14 CFR 145.45(f).

**Description of Relief Sought/**

To permit B F Goodrich to maintain its repair station Inspection Procedures manual (IPM) on a compact disc read only memory system available for viewing by all supervisory and inspection personnel, rather than provide a paper copy of the IPM to each of these individuals.

**Docket No.:** 144CE.

**Petitioner:** Sino Swearingen Aircraft Company.

**Sections of the FAR Affected:** 14 CFR 23.35, 23.29, 23.235, 23.471, 23.473, 23.477, 23.479, 23.481, 43.483, 23.485, 23.493, 23.499, 23.723, 23.725, 23.726, 23.727, 23.959, 23.1583(c)(1), (2), Appendix C23, and Appendix D23.1.

**Description of Relief Sought:** To permit Sino Swearingen Aircraft

Company to modify the SJ30-2 airplane landing gear loads and associated airframe loads.

#### Dispositions of Petitions

**Docket No.:** 25506.

**Petitioner:** Department of the Navy.

**Sections of the FAR Affected:** 14 CFR 91.215(c).

**Description of Relief Sought/**

**Disposition:** To permit the Navy to provide realistic air combat training in airspace defined in the exemption as the "Transponder-Off Area. GRANT, March 20, 1998, Exemption No. 6741.

**Docket No.:** 29009.

**Petitioner:** United Airlines, Inc.

**Sections of the FAR Affected:** 14 CFR 93.217(a) (5) and (6) and 93.223.

**Description of Relief Sought/**

**Disposition:** To prevent the withdrawal of takeoff and landing slots from United at Chicago's O'Hare International Airport to accommodate requests from carriers engaged in international operations at O'Hare. DENIAL, March 25, 1998, Exemption No. 6743.

**Docket No.:** 29099.

**Petitioner:** Embry-Riddle Aeronautical University.

**Sections of the FAR Affected:** 14 CFR 61.55(b)(2); 61.56(c)(1); 61.57 (a), (b), (c), and (d); 61.58(a) (1) and (2); and 61.195(e).

**Description of Relief Sought/**

**Disposition:** To permit ERAU, which is developing a 14 CFR part 142 certificated training center, to use Level D flight simulators to meet certain flight experience and recency of experience requirements of part 61 for its instructor pilots before certification of the training center. GRANT, March 25, 1998, Exemption No. 6746.

**Docket No.:** 28148.

**Petitioner:** Capital City Air Carrier, Inc.

**Sections of the FAR Affected:** 14 CFR 135.143(c).

**Description of Relief Sought/**

**Disposition:** To permit CCAC to operate certain aircraft without a TSO-C112 (Mode S) transponder installed. GRANT, March 30, 1998, Exemption No. 6747.

**Docket No.:** 17681.

**Petitioner:** Kenmore Air Harbor, Inc.

**Sections of the FAR Affected:** 14 CFR 135.203(a)(1).

**Description of Relief Sought/**

**Disposition:** To permit Kenmore to conduct seaplane operations under visual flight rules, outside controlled airspace, overwater, at an altitude below 500 feet. GRANT, March 30, 1998, Exemption No. 2528J.

**Docket No.:** 26103.

**Petitioner:** Northwest Seaplanes, Inc.

**Sections of the FAR Affected:** 14 CFR 135.203(a)(1).

**Description of Relief Sought/**

**Disposition:** To permit Northwest Seaplanes to conduct part 135 operations outside of controlled airspace, over water, at an altitude below 500 feet above the surface. GRANT, March 30, 1998, Exemption No. 6461A.

**Docket No.:** 27712.

**Petitioner:** American Airlines.

**Sections of the FAR Affected:** 14 CFR 121.401(c), 121.433(c)(1)(iii), 121.440(a), and 121.441 (a)(1) and (b)(1); appendix F to part 121; and Special Federal Aviation Regulations No. 58.

**Description of Relief Sought/**

**Disposition:** To permit American to (1) combine recurrent flight and ground training and proficiency checks for American's pilots in command, seconds in command, and flight engineers in a single annual training and proficiency evaluation program (i.e., a single-visit training program), and (2) meet the line-check requirements of § 121.440(a) and SFAR No. 58 through an alternative line-check program. GRANT, March 30, 1998, Exemption No. 5950B.

**Docket No.:** 28137.

**Petitioner:** Kansas Highway Patrol.

**Sections of the FAR Affected:** 14 CFR 91.159(a) and 91.209 (a) and (d).

**Description of Relief Sought/**

**Disposition:** To permit Kansas Highway Patrol to conduct air operations in support of drug law enforcement and drug traffic interdiction. GRANT, March 27, 1998, Exemption No. 6137A.

**Docket No.:** 5010.

**Petitioner:** Federal Aviation Administration, Office of System Standards.

**Sections of the FAR Affected:** 14 CFR 91.119 (b) and (c), 91.159, 91.175 (a) and (b), and 91.179(b).

**Description of Relief Sought/**

**Disposition:** To permit the FAA AVN and the USAF FIC to deviate from certain flight rules required by subpart B of 14 CFR part 91 while conducting flight inspections of air navigation facilities and instrument approach procedures. GRANT, March 31, 1998, Exemption No. 5118C.

**Docket No.:** 28176.

**Petitioner:** Raytheon Aircraft Services.

**Sections of the FAR Affected:** 14 CFR 135.143(c)(2).

**Description of Relief Sought/**

**Disposition:** To permit Raytheon Aircraft Services to operate without a TSO-C112 transponder installed in its aircraft operating under the provisions of part 135. GRANT, March 30, 1998, Exemption No. 6120A.

**Docket No.:** 142CE.

*Petitioner:* Sino Swearingen Aircraft Company.

*Sections of the FAR Affected:* 14 CFR 23.3(d).

*Description of Relief Sought/*

*Disposition:* To permit type certification of the Sino Swearingen SJ30-2 airplane in the commuter category. *GRANT, March 23, 1998, Exemption No. 6742.*

*Docket No.:* 28400.

*Petitioner:* Skydive, Inc.

*Sections of the FAR Affected:* 105.43(a)(1).

*Description of Relief Sought/*

*Disposition:* To allow Skydive to permit individuals who have completed a course of instruction in main parachute packing administered by an FAA-certificated parachute rigger to pack main parachutes for others to make parachute jumps. *DENIAL, March 27, 1998, Exemption No. 6748.*

[Docket No. 97-3D]

**Copyright Restoration of Works in Accordance With the Uruguay Round Agreements Act; List Identifying Copyrights Restored Under the Uruguay Round Agreements Act for Which Notices of Intent To Enforce Restored Copyrights Were Filed in the Copyright Office**

**AGENCY:** Copyright Office, Library of Congress.

**ACTION:** Publication of Eighth List of Notices of Intent to Enforce Copyrights Restored Under the Uruguay Round Agreements Act.

**SUMMARY:** The Copyright Office is publishing its eighth list of restored copyrights for which it has received and processed Notices of Intent to Enforce a copyright restored under the Uruguay Round Agreements Act. Publication of the lists creates a record for the public to identify copyright owners and works whose copyright has been restored for which Notices of Intent to Enforce have been filed with the Copyright Office. Generally, this is the concluding NIE list of titles for copyright owners whose eligibility to file in the Office expired on December 31, 1997.

**EFFECTIVE DATE:** April 17, 1998.

**FOR FURTHER INFORMATION CONTACT:** Marilyn J. Kretsinger, Assistant General Counsel, or Charlotte Douglass, Principal Legal Advisor to the General Counsel, Copyright GC/I&R, Post Office Box 70400, Southwest Station, Washington, D.C. 20024. Telephone: (202) 707-8380. Telefax: (202) 707-8366.

**SUPPLEMENTARY INFORMATION:****I. Background**

The Uruguay Round General Agreement on Tariffs and Trade and the Uruguay Round Agreements Act (URAA) (Public Law No. 103-465; 108 Stat. 4809 (1994)) provide for the restoration of copyright in certain works that were in the public domain in the United States. Under section 104A of title 17<sup>1</sup> of the United States Code as provided by the URAA, copyright protection was restored on January 1,

1996, in certain works by foreign nationals or domiciliaries of World Trade Organization (WTO) or Berne countries that were not protected under the copyright law for the reasons listed below in (2). Specifically, for restoration of copyright, a work must be an original work of authorship that on the date of restoration:

(1) was not in the public domain in its source country through expiration of term of protection;

(2) was in the public domain in the United States due to:

(i) noncompliance with formalities imposed at any time by United States copyright law, including failure of renewal, publishing the work without a proper notice, or failure to comply with any manufacturing requirements;

(ii) lack of subject matter protection in the case of sound recordings fixed before February 15, 1972; or

(iii) lack of national eligibility (e.g., the work is from a country with which the United States did not have copyright relations at the time of the work's publication); and

(3) has at least one author (or in the case of sound recordings, rightholder) who was, at the time the work was created, a national or domiciliary of an eligible country. If the work was published, it must have been first published in an eligible country and not published in the United States within 30 days of first publication. See 17 U.S.C. 104A(h)(6).

A work meeting these requirements is protected "for the remainder of the term of copyright that the work would have otherwise been granted in the United States if the work never entered the public domain in the United States." 17 U.S.C. 104A(a)(1)(B).

Under the URAA, copyright in restored works vests automatically on the date of restoration. 17 U.S.C. 104A(a)(1)(A). That date is January 1, 1996, if the particular nation was already a member of the World Trade Organization (WTO) or the Berne Convention. Otherwise, the effective date of restoration is the date of a particular nation's adherence to the WTO or the Berne Convention or the date when the President issues a proclamation extending copyright restoration to that nation.

Although the copyright owner may immediately enforce the restored copyright against individuals who infringe his or her rights on or after the effective date of restoration, the copyright owner's right to enforce the restored copyright is delayed against reliance parties. Typically, a reliance party is one who was already using the work before December 8, 1994, the date

the URAA was enacted. See 17 U.S.C. 104A(h)(4). Before a copyright owner can enforce a restored copyright against a reliance party, the copyright owner must file a Notice of Intent (NIE) with the Copyright Office or serve an NIE on such a party.

An NIE may be filed in the Copyright Office within 24 months of the date of restoration of copyright. Alternatively, an owner may serve an NIE on an individual reliance party at any time during the term of copyright; however, such notices are effective only against the party served and those who have actual knowledge of the notice and its contents. NIEs appropriately filed with the Copyright Office and published herein serve as constructive notice to all reliance parties.

**II. Administrative Processing**

Pursuant to the URAA, the Office is publishing its eighth list identifying restored works for notices of intent to enforce a restored copyright filed with the Office. 17 U.S.C. 104A(e)(1)(B). The earlier lists were published between May 1, 1996, and January 30, 1998. 61 FR 19372 (May 1, 1996), 61 FR 46134 (Aug. 30, 1996), 61 FR 68454 (Dec. 27, 1996), 62 FR 20211 (April 25, 1997), 62 FR 44842 (Aug. 22, 1997), 62 FR 66766 (Dec. 19, 1997), and 63 FR 5142 (Jan. 30, 1998). To allow for processing this NIE information, the Office closed the record for publication approximately two weeks before forwarding this record for publication. Accordingly, the NIEs listed herein are those entered into the public records of the Office between January 21, 1998 and April 3, 1998. NIEs not processed by April 3, 1998, will appear on the next four-month list, to be published on August 14, 1998.

NIEs for works restored to copyright on January 1, 1996, must have been postmarked on or before December 31, 1997, to be accepted in the Copyright Office for publication in the **Federal Register**. See 17 U.S.C. 104A(d)(2). NIEs that were received in the Office too late for **Federal Register** publication will be returned to the remitter unrecorded, and the fee will be refunded. On the other hand, owners of works that are still within their eligible filing period may continue to file such notices with the Copyright Office and receive constructive notice, and the Office will continue to publish a list of eligible NIEs in the **Federal Register**.

**III. Correction of Previously Filed NIEs**

Correction NIEs for major errors (essentially, major errors in title and owner information) on any NIE filed must be submitted within the eligibility period. 37 CFR 201.34 (d)(6)(i). Minor

<sup>1</sup> The URAA's amendment of 17 U.S.C. 104A replaced section 104A under the North American Free Trade Agreement Implementation Act (Public Law No. 103-182, 107 Stat. 2057, 2115 (1993)). The Uruguay Round Trade Agreements, Texts of Agreements, Implementing Bill, Statement of Administrative Action, and Required Supporting Statements, H.R. Doc. No. 316, 103d Cong., 2d Sess. 324 (1994). See 60 FR 50414 (Sept. 29, 1995).

errors may be corrected at any time without regard to eligibility for filing, pursuant to the interim regulation on Correction NIEs, published at 62 FR 55736 (Oct. 28, 1997).

#### IV. On-Line Availability of NIE Lists

Using the information provided herein, one may search the Office's database to obtain additional information about a particular NIE. NIEs are located in what is known as the Copyright Office History Documents (COHD) file, which is available from computer terminals located in the Copyright Office itself or from terminals located in other parts of the Library of Congress through the Library of Congress Information System (LOCIS). Alternative ways to connect through Internet are (i) the World Wide Web (WWW), using the Copyright Office Home Page at: <http://www.loc.gov/copyright>; or (ii) connect directly to LOCIS through the telnet address at [locis.loc.gov](telnet://locis.loc.gov). WWW is available 24 hours a day. LOCIS is available 24 hours a day Monday through Friday, U.S. Eastern Time; Saturday, until 5 p.m.; and Sunday after 11 a.m.<sup>2</sup>

Information available online includes: the title or brief description if untitled; an English translation of the title; the alternative titles if any; the name of the copyright owner or owner of one or more exclusive rights, the date of receipt of the NIE in the Copyright Office; the date of publication in the *Federal Register*; and the address, telephone and telefax number of the copyright owner. If given on the NIE, the online information will also include the author, the type of work, and the rights covered by the notice. See 37 CFR 201.33(f). For the purpose of researching the full Office record of NIEs on the Internet, the Office has made online searching instructions accessible through the Copyright Office Home Page. Researchers can access them through the Library of Congress Home Page on the World Wide Web by selecting the copyright link. Select the menu item "Copyright Office Records" and/or "URAA, GATT Amends U.S. law." In addition to online records, images of the complete NIEs as filed are on optical disc and available from the Copyright Office.

#### V. Alien Properties Custodian Act

The Register of Copyrights has received several inquiries about the "Alien Property Custodian" exclusion in the Uruguay Round Agreements Act

(URAA), Pub. L. No. 103-465, 108 Stat. 4809 (1994). That provision excludes from copyright restoration under the URAA "[a]ny work in which the copyright was ever owned or administered by the Alien Property Custodian and in which the restored copyright would be owned by a government or instrumentality thereof." 17 U.S.C. 104A(a)(1)(B)(2). The legislative history of the URAA is silent on the application and scope of this exception. See Statement of Administrative Action, H. Doc. No. 103-316 (1994). The purpose of this notice is to provide background information to guide those seeking to determine whether or not the exception applies to a particular work.

#### A. Background—Alien Property Custodian

The Office of Alien Property was established under the authority of the Trading with the Enemy Act (50 U.S.C. app. sec. 39, 62 Stat. 1246 (1948)), to handle problems involving assets in the United States owned by nationals of enemy countries in the Second World War. The Alien Property Custodian was empowered to "hold" copyrights in works in which an enemy foreign country or its nationals had an interest, and require that all royalties due for use of those works be paid to the United States government. As many as 300,000 vested copyrights were controlled by the government in 1960, according to a House Report (No. 2091, July 31, 1962, to accompany H.R. 9045). The acquisitions were accomplished through a series of vesting orders, recorded with the U.S. Copyright Office and published in the *Federal Register*. These vesting orders caused ownership of the physical materials (for example, film prints) and copyrights for specific works to "vest" with the Attorney General of the United States.

In 1962, Congress returned most of the remaining seized copyrights to the copyright owners in their countries of origin, although the United States retained the right "to reproduce, for its own use, or exhibit any divested copyrighted motion picture films." Pub. L. No. 87-846 (1962). Title to the physical prints of these motion pictures was transferred to the Library of Congress under Pub. L. No. 87-861 (1962), giving the Library "complete discretion to retain such prints and to reproduce copies thereof, or to dispose of them in any manner it deems appropriate."

The current copyright status of works once held by the Alien Property Custodian will depend on a number of variables. One such variable is the age

of the work; the term of protection for pre-1923 published works will have expired. Another variable is the extent of compliance with formalities under prior U.S. law. While some copyrights were renewed by the Alien Property Custodian, some of the works may have fallen into the public domain for reasons including failure to renew or other lack of compliance with formalities. These works that did fall into the public domain due to lack of compliance with formalities may have been restored to copyright by the restoration provisions of the URAA, described below. Assuming that such works were otherwise eligible, whether they were restored turns on whether they fell within the Alien Property Custodian exception to restoration.

#### B. The Exception to Restoration Under the URAA for Works Held by the Alien Property Custodian

Under a new section 104A of title 17 of the United States Code created by the URAA, copyright protection was restored on January 1, 1996, in certain works of foreign nationals or domiciliaries of World Trade Organization (WTO) or Berne countries, or at a later date for countries subsequently joining WTO or Berne. To qualify for restoration, a work must be an original work of authorship that is not a United States work and is not in the public domain in its source country through expiration of term of protection. Rather, the work must be in the public domain in the United States due to noncompliance with formalities, lack of subject matter protection in the case of sound recordings fixed before February 15, 1972, or lack of copyright relations between the country of origin and the United States. 17 U.S.C. 104A(h)(6).

One category of works, however, was not restored even if the work met the above requirements. Specifically, under the "Alien Property Custodian Exception," a work was not restored if (1) the copyright was ever owned or administered by the Alien Property Custodian, and (2) the restored copyright would, as of January 1, 1996, be owned by a government or its instrumentality. 17 U.S.C. 104A(a)(2). A work is excluded from restoration under the exception only when both elements of the exception are met.

Determining whether a particular work falls within the exception may be complicated. As to the first element of the exception, the vesting orders described above would indicate which works had been held or administered by the Alien Property Custodian. There is no one source where these vesting orders may be found. However, the

<sup>2</sup> Not all files are available after 9:30 p.m. on weekdays. On Sundays, all files may not be available from 5 p.m.—8 p.m.

following are the publicly available sources of those lists or copies of vesting orders of which the Office is aware: on file at the U.S. Copyright Office (LM-403) are the "Annual Reports of the U.S. Office Of Alien Property, 1942-1949," which contain lists of vesting orders; on file at the Motion Picture, Broadcasting, and Recorded Sound Division of the Library of Congress (LM-336) is a list, "Motion Pictures of German Origin Subject to Jurisdiction of the Office of Alien Property." Finally, vesting orders are searchable under "Alien Property Custodian" in the Copyright Office Documents File at the U.S. Copyright Office (LM-459). All the rooms referred to above are located in the James Madison Building of the Library of Congress, 101 Independence Avenue, S.E., Washington, D.C.

In addressing the second element, ownership of a restored copyright is determined by the law of the source country of the work. 17 U.S.C. 104A(b). It appears that some Axis countries nationalized certain producers of creative works during World War II, and ownership of their works may therefore have vested with the then-current government. In cases where this occurred, if the government or its instrumentality still owned the copyright as of January 1, 1996, the URAA would not have restored copyright protection in the United States for that work.

The recent inquiries regarding the Alien Property Custodian exception concern the validity of Notices of Intent to Enforce (NIE) filed with the Copyright Office for works potentially subject to this provision. Under the URAA, the owner of a right in a restored work may file an NIE to notify reliance parties<sup>3</sup> of its intention to enforce its right. The Copyright Office is required by law to publish in the *Federal Register* "lists identifying restored works and the ownership thereof if a notice of intent to enforce a restored copyright has been filed." 17 U.S.C. 104A(e)(1)(B)(i). The Office does not research the facts stated in Notices of Intent to Enforce to determine whether a work is or is not eligible for restoration. Nor does the Office adjudicate between competing parties who have filed NIEs for identical works. (Under section 104A, however, a material false statement knowingly made with respect to any restored copyright identified in an NIE makes void all claims and assertions made with respect to such restored copyright.

<sup>3</sup> In general terms, a reliance party is a business or individual who, relying on the public domain status of a work, was already using the work prior to the date of enactment of the URAA on December 8, 1994. 17 U.S.C. 104A(h)(4).

17 U.S.C. 104A(e)(3)). Accordingly, the filing of an NIE indicates only that a party has claimed to own rights in a restored work; the filing does not represent a determination by the Copyright Office that this claim is valid. In all cases, the validity of such a claim is governed by the terms of the relevant law, including the URAA, as applied to the relevant facts.

#### VI. Eighth List of Notices of Intent To Enforce

The following restored works are listed alphabetically by copyright owner; multiple works owned by a particular copyright owner are listed alphabetically by title. Works having more than one copyright proprietor are listed under the first owner and cross-referenced to the succeeding owner(s). A cross-reference to the composite owner (e.g., Title I owned by "A B & C") will state, "SEE A B & C" at the listing for each individual owner (e.g., for Owner A, for Owner B and for Owner C).

## **Part III**

### **National Archives and Records Administration**

---

**36 CFR Part 1228**

**General Records Schedule (GRS) 20;  
Notice and Final Rule**

**NATIONAL ARCHIVES AND RECORDS ADMINISTRATION****General Records Schedule (GRS) 20**

**AGENCY:** National Archives and Records Administration.

**ACTION:** Notice regarding General Records Schedule (GRS) 20.

**SUMMARY:** In accordance with the Order of the United States District Court for the District of Columbia, dated April 9, 1998, in *Public Citizen v. Carlin*, Civil No. 96-2840, the Archivist of the United States issues the following statement:

Notices previously published by the Archivist in the *Federal Register* on December 16,<sup>1</sup> 1997, 62 Fed. Reg. 65737-65738, and January 14, 1998, 63 Fed. Reg. 2268, which stated that disposition practices for electronic records are "currently authorized under the National Archives and Records Administration's General Records Schedule 20 ('GRS 20')," should have instead stated that GRS 20 has been declared null and void by the United

States District Court for the District of Columbia.

The government has filed an appeal of the Court's declaratory judgment, but GRS-20 remains null and void pending resolution of that appeal. All federal agencies are advised that when submitting agency schedules to NARA for approval, electronic versions of records created on office automation applications should be scheduled in accordance with paragraph 5 of NARA Bulletin 98-02. NARA is currently working to develop an alternative approach to GRS-20 for the disposition of records created on word processing and electronic mail applications and has formed an interagency Electronic Records Work Group, consisting of select NARA staff, Federal records officers, and information management specialists, with oversight by the Deputy Archivist of the United States. The Work Group is to have recommendations to the Archivist by July 1 and an implementation plan by September 30, 1998. The Court has authorized the Archivist to state that a federal agency may continue to follow

its present disposition practices for electronic records until: (1) September 30, 1998; (2) the agency has submitted and received approval from NARA on a Request for Records Disposition Authority; (3) notification by NARA that the appeal has been resolved and NARA has provided further guidance as a result of the appellate court's decision; or (4) further Order of the District Court.

**FOR FURTHER INFORMATION CONTACT:** Michael Miller, Modern Records Program (NWM), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, (301) 713-7110. NARA Bulletin 98-02 is available on NARA's web site at <<http://www.nara.gov/records/grs20/bltn-grs.html>>. Further information about the Electronic Records Work Group is available at <<http://www.nara.gov/records/grs20/index.html>>.

Dated: April 14, 1998.

**AGENCY:** National Archives and Records Administration.

**ACTION:** Notification regarding General Records Schedule (GRS) 20.

**SUMMARY:** Pursuant to the Order of the United States District Court for the District of Columbia, dated April 9, 1998, in *Public Citizen v. Carlin*, Civil No. 96-2840, NARA is notifying agencies that General Records Schedule Number 20, "Electronic Records," cited in NARA's regulations on disposition of

Federal records (36 CFR 1228.44), has been declared null and void. The notice required by that Order is published elsewhere in this issue of the *Federal Register*.

**EFFECTIVE DATE:** April 17, 1998.

**FOR FURTHER INFORMATION CONTACT:** Michael Miller, Modern Records Program (NWM), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, (301) 713-7110.

**SUPPLEMENTARY INFORMATION:** 36 CFR 1228.44 lists the General Records Schedules that are currently approved by the Archivist of the United States. In its Order of October 22, 1997, the United States District Court for the District of Columbia declared General

Records Schedule 20 null and void. In its April 9 Order, the Court has authorized the Archivist to state that a federal agency may continue to follow its present disposition practices for electronic records until: (1) September 30, 1998; (2) the agency has submitted and received approval from NARA on a Request for Records Disposition Authority; (3) notification by NARA that the appeal has been resolved and NARA has provided further guidance as a result of the appellate court's decision; or (4) further Order of the District Court.

Dated: April 14, 1998.

**John W. Carlin,**

*Archivist of the United States.*

## Part IV

### Department of Energy

---

Office of Energy Efficiency and  
Renewable Energy

---

10 CFR Part 490  
Alternative Fueled Vehicle Acquisition  
Requirements for Private and Local  
Government Fleets; Proposed Rule

## DEPARTMENT OF ENERGY

## Office of Energy Efficiency and Renewable Energy

## 10 CFR Part 490

[Docket No. EE-RM-98-507]

RIN 1904-AA98

## Alternative Fueled Vehicle Acquisition Requirements for Private and Local Government Fleets

AGENCY: Department of Energy (DOE).

ACTION: Advance notice of proposed rulemaking and notice of public hearings.

**SUMMARY:** The Department of Energy is today publishing an advance notice of proposed rulemaking, as required by the Energy Policy Act of 1992 (the Act), Pub. L. 102-486, that begins a process to determine whether alternative fueled vehicle acquisition requirements for certain private and local government automobile fleets should be promulgated under the terms of section 507(g) of the Act. The establishment of such an acquisition program is reliant on whether this program is necessary for achieving the Act's replacement fuel goals and whether this program will enable the actual realization of these goals. Thus, this notice requests comments on the replacement fuel goals set forth in section 502(b)(2) of the Act, identifying the problems with achieving the goals, assessing the adequacy and practicability of the goals, and considering all actions necessary to meet the goals. Additionally, this notice requests comments on whether DOE should propose the inclusion of alternative fueled urban bus acquisition requirements for private and local government fleets in conjunction with a fleet requirement program that may be established under section 507(g) of the Act. This notice is intended to stimulate comments that will inform DOE's decisions concerning future rulemaking actions and non-regulatory initiatives to promote alternative fuels and alternative fueled vehicles.

**DATES:** Written comments (8 copies) must be received by DOE by July 16, 1998. Where possible, commenters should identify the specific section and question number to which they are responding.

Oral views, data, and arguments may be presented at the public hearings, which are scheduled as follows:

1. In Los Angeles, CA, beginning at 9:30 a.m. on May 20, 1998.
2. In Minneapolis, MN, beginning at 9:30 a.m. on May 28, 1998.

3. In Washington, DC, beginning at 9:30 a.m. on June 4, 1998.

The hearings will end after all persons who have requested an opportunity to speak have made oral presentations. Requests to speak at any of the hearings should be phoned to Andi Kasarsky, (202) 586-3012, and received no later than 4:00 p.m., May 18, 1998, for the Los Angeles, CA, hearing; May 26, 1998, for the Minneapolis, MN, hearing; and June 2, 1998, for the Washington, DC, hearing. Each oral presentation is limited to 10 minutes.

**ADDRESSES:** The hearings will be held at the following addresses:

1. Los Angeles, CA—Roybal Federal Building, 255 E. Temple Street (at Los Angeles Street), 2nd Floor Conference Room, Los Angeles, CA.
2. Minneapolis, MN—U.S. Court House, 300 South 4th Street (at 3rd Avenue), Skyway Conference Center (Room 259—2nd level), Minneapolis, MN.
3. Washington, DC—U.S. Department of Energy, Room 1E-245, 1000 Independence Avenue, SW., Washington, DC 20585.

Written comments should be addressed to: U.S. Department of Energy, Office of Transportation Technologies, EE-34, Docket No. EE-RM-98-507, 1000 Independence Avenue, SW., Washington, DC 20585, telephone (202) 586-3012. Copies of the public hearing transcripts, written comments received, technical reference materials mentioned in the notice, and any other docket material received may be read and copied at the DOE Freedom of Information Reading Room, U.S. Department of Energy, Room 1E-190, 1000 Independence Ave., SW., Washington, DC 20585, telephone (202) 586-3142, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays. The docket file material will be filed under "EE-RM-98-507."

For more information concerning public participation in this rulemaking proceeding, see section V of this notice (Public Comment Procedures).

**FOR FURTHER INFORMATION CONTACT:**

  - c. Public Hearings
    1. Procedure for Submitting Requests to Speak
    2. Conduct of Hearing

**I. Introduction****A. Authority**

The Energy Policy Act of 1992 (Pub. L. 104-486) authorizes DOE to pursue a rulemaking concerning alternative fueled vehicle acquisition requirements for private and local government fleets on two distinct schedules. First, section 507(b) provides for an early rulemaking, which was to be completed by December 15, 1996. As part of that rulemaking, section 507(a)(3) of the Act required DOE to publish an Advance Notice of Proposed Rulemaking (ANOPR) to begin a rulemaking process for determining whether alternative fueled vehicle (AFV) acquisition requirements for private and local government fleets are necessary to achieve the Act's energy security and other goals. 42 U.S.C. 13256(a)(3). If no rule was promulgated by December 15, 1996, then sections 507(b)(3), (c), and (e) require a later rulemaking to determine by January 1, 2000, whether vehicle acquisition requirements are "necessary," as described in section 507(e). 42 U.S.C. 13256(b)(3), (c) and (e).

DOE published an ANOPR for the purposes described in section 507(a) and (b) on August 7, 1996. 61 FR 41032. This notice was intended to stimulate comments to assist DOE in making decisions concerning future rulemaking actions and non-regulatory initiatives to promote alternative fuels and alternative fueled vehicles. Three hearings were held to receive oral comments on the ANOPR. They were held on September 17, 1996, in Dallas, Texas; on September 25, 1996, in Sacramento, California; and on October 9, 1996, in Washington, DC. A total of 70 persons spoke at the three

hearings, and 105 written comments were received by November 5, 1996.

On April 23, 1997, DOE published a Notice of Termination stating that DOE would not promulgate regulations to implement alternative fueled vehicle requirements for certain private and local government fleets according to the early schedule of section 507(a)(1) of the Act. 62 FR 19701. As required by sections 507(b)(3), (c), and (e), DOE today begins a rulemaking under section 507(g) of the Act to determine, no later than January 1, 2000, whether alternative fueled vehicle acquisition requirements for private and local government automobile fleets under the later schedule of section 507(g) are considered "necessary" to achieve the Act's "replacement fuel" goals. (A "replacement" fuel is the non-petroleum portion of an "alternative fuel" as those terms are defined in section 301 of the Act. (42 U.S.C. 13211).)

Section 504(c) of the Act provides additional, albeit limited, rulemaking authority to develop and implement programs, *other than regulatory alternative fueled vehicle acquisition mandates*, to meet the general program goals set forth in section 502(a) of the Act. (42 U.S.C. 13254(c).) Section 502(a) describes goals to promote availability of domestic replacement fuels to the maximum extent practicable in order to have the greatest impact in reducing oil imports, improving the Nation's economy, and reducing greenhouse gas emission. (42 U.S.C. 13252(a).) The predicate for using the rulemaking authority under section 504(c) is a determination that achievement of the specific numerical goals in section 502(b)(2) would result in a "significant and correctable" failure to meet the general program goals in section 502(a). Section 504(c) precludes DOE from promulgating rules that would mandate: production of alternative fueled vehicles; vehicle marketing or pricing practices, policies, or strategies; and production or delivery of alternative fuels. In preparing a notice of proposed rulemaking following evaluation of comments received in response to this advance notice, DOE will be considering whether to propose rules under section 504(c).

From prior rulemaking activities under title V of the Act, DOE knows that there are diverse interests with strongly held views about the general program goals of the Act and the role that Government should play in achieving those goals. Broad acceptance of final rules setting forth an affirmative program would be desirable and, to that end, DOE may use a neutral and

experienced convener under the Negotiated Rulemaking Act of 1990 to assist DOE in determining whether to develop proposed rules using consensus rulemaking procedures. 5 U.S.C. 563.

#### *B. Program Background and Goals*

The transportation sector currently accounts for approximately two-thirds of all U.S. petroleum use and roughly one-fourth of total U.S. energy consumption. A virtual one-to-one relationship exists between additional gasoline and diesel fuel consumption and America's increased use of imported oil. The gap between the transportation sector's demand for petroleum and our domestic petroleum production continues to widen. Today, the U.S. consumes 4 million barrels per day more than it produces for transportation purposes alone; that gap is projected to rise to 8 million barrels per day by the year 2010. According to the latest projections by the Energy Information Administration (EIA), the transportation sector will consume 15.8 million barrels per day of petroleum in 2010, if no significant changes are made to usage patterns and vehicle efficiency. About 8.4 million of these barrels are projected to be used by light duty vehicles. The transportation sector represents one of the major sources of energy vulnerability for American society and the American economy today.

U.S. dependence on imported petroleum has also grown since the Act's enactment. In 1992, 41 percent of total U.S. petroleum consumption was derived from foreign sources. By 1996, imports had increased to 46 percent. EIA projects U.S. petroleum import dependence to reach approximately 52 percent of consumption by 2000 and 60 percent of petroleum consumption by 2010. Congress enacted the Act, in part, to address these energy security concerns, many of which are more critical now than at the time of passage. Titles III, IV, V, and VI of the Act contain provisions requiring DOE to establish a variety of programs aimed at displacing substantial quantities of oil consumed by motor vehicles.

Title III sets forth mandatory requirements for Federal fleet acquisitions of alternative fueled vehicles, which began in fiscal year 1993. Since that time, approximately 30,000 alternative fueled vehicles have been acquired by the Federal fleet. Federal agencies have gained considerable experience with many types of alternative fuels and alternative fueled vehicles.

Title IV directs DOE to establish a program to certify alternative fuel

technicians, acquire data about alternative fuels and alternative fueled vehicles, and establish a public information program. DOE has established a cooperative program with the auto service industry and numerous technical colleges to develop and implement national standards for certification of alternative fuel training programs.

Title IV also includes programs related to demonstrating the feasibility of the commercial application of using alternative fuels for urban buses and other motor vehicles used for mass transit. Since 1992, many fleets across the country have begun replacing their buses with alternative fueled buses. Currently, alternative fueled transit buses are operated in thirty-eight States. According to the American Public Transit Association and the Federal Transit Association, more than 2,600 alternative fueled buses were in use in 1996. That number is estimated to increase to about 4,500 in 1998. Approximately 22 percent of new buses on order for the January 1998 through April 1998 time frame will be operated on alternative fuels. In comparison, 14 percent of new buses ordered in 1996 operated on alternative fuels.

Over the last several years, DOE has analyzed the costs and benefits of alternative fuel and AFV use in the transportation sector. A series of technical reports recorded the results of these analyses and is entitled "Assessment of Costs and Benefits of Flexible and Alternative Fuel Use in the U.S. Transportation Sector." These reports will be placed in the public docket for this rulemaking in DOE's Freedom of Information Reading Room.

Section 502 requires DOE to establish a program to promote development and use of replacement fuels, especially domestic replacement fuels, in light duty motor vehicles. DOE is required to focus on those replacement fuels having the most impact in: Reducing oil imports, improving the health of the Nation's economy, and reducing emissions of greenhouse gases. DOE is in the process of performing analytical work to guide the design of this replacement fuel demand and supply program. Section 502(b) requires DOE to assess, among other things, the feasibility of producing adequate replacement fuels to displace 10 percent of U.S. motor fuel by 2000 and 30 percent by 2010. DOE has undertaken such a study, the partial results of which have been published by DOE's Office of Policy as Technical Report Fourteen: Market Potential and Impacts of Alternative Fuel Use in Light-Duty Vehicles: A 2000/2010 Analysis. This

analysis was conducted in 1994 under a set of premises (i.e., estimated future oil prices) that were more favorable to alternative fuel use than the expectations found in the Annual Energy Outlook 1998 (DOE/EIA-0383(98)). This report is available by calling the National Alternative Fuels Hotline at 1-800-423-1DOE or 703-528-3500. A copy will be placed in the docket file for this rulemaking.

The following key results and conclusions emerged from the analysis contained in this report:

- For the year 2000, ten percent replacement of light duty motor fuel use with alternative and replacement fuels is feasible and appears likely with existing practices and policies.

- Displacing thirty percent of light duty motor fuel use by 2010 also appears feasible, however, feasibility is based on several assumptions that may not be realized without additional alternative fuel incentives.

- With a fully established refueling infrastructure and sufficient vehicle availability, market forces would continue to support 30 percent use of alternative fuels and would sustain even higher levels as alternative fueled vehicles assume an increasingly larger share of the total light duty vehicle population.

- In long-run equilibrium, making alternative fuels and alternative fueled vehicles available would provide an estimated net annual economic benefit of up to \$10.3 billion in 2010. Much of this benefit—\$4.2 billion—consists of an increase in consumer satisfaction from the availability of new classes of vehicles and less expensive fuels; the remaining \$6.1 billion reflects dollar cost savings from alternative fuel use, mainly through the reduced cost of fuel imports.

- Benefits from reduced emissions of criteria pollutants are estimated to be up to \$3.7 billion annually. Although this analysis indicates that a free market could sustain a large volume of alternative fuel use, it does not appear at the present that the market will move toward such a scenario without Government action. The report states that in order to realize any substantial use of alternative fuels by 2010, the Federal and/or State governments will have to take steps soon to encourage the increased use of alternative fuels and vehicles.

DOE is also required by section 506 to prepare a Technical and Policy Analysis of various issues related to replacement fuels and alternative fueled vehicles for submission to the President and Congress. On October 27, 1997, DOE published a Notice of Availability and

Request for Comments (62 FR 55622) on a proposed analysis on these issues, prior to its final transmission to the President and Congress. Comments were due to DOE by January 26, 1998. Copies of the proposed Technical and Policy Analysis may be obtained from the National Alternative Fuels Hotline, 9300 Lee Highway, Fairfax, VA 22301-1207, (800) 423-1DOE, or electronically from the Office of Energy Efficiency and Renewable Energy's Transportation Technologies website at: <http://www.ott.doe.gov/office.rules.html>. DOE is required by section 506(c) to preserve all comments received on the analysis for use in required rulemaking proceedings under section 507, including the rulemaking, covered in today's notice, for determining whether local government and private fleets should be required to acquire alternative fueled vehicles. Public comments on the section 506 Technical Analysis can be reviewed at DOE's Freedom of Information Reading Room under Docket Number EE-NOA-97-506. Currently, twelve written comments have been received on the analysis.

The preliminary partial results of the section 506 Technical Analysis indicate that the potential use of replacement fuels sustainable by the market could be as high as 30 to 38 percent under various scenarios and ultimately could be greater than 50 percent. In order to reach these levels of replacement fuel use, major transitional impediments would have to be overcome, including changes in the relative fuel/vehicle prices to consumers. Changes to the price that customers pay for alternative fueled vehicles and alternative fuels may require the establishment of additional financial, and non-financial, incentives both for the end user and for the vehicle and fuel providers.

For example, the analysis states that the Act's suggested goals of displacing 10 percent of transportation fuels in the year 2000 and 30 percent in the year 2010 would require that AFV sales:

- ◆ Grow to between 35 and 40 percent of total new light duty vehicle sales by 1999 to meet the 2000 goal; and

- ◆ Stay in the range of 30 to 38 percent to build an AFV population sufficiently large enough to meet the 2010 goal.

If the 30 percent goal applied to year 2020, instead of 2010, the analysis states that AFV growth would have to:

- ◆ Double every year between 1995 and 2000, going from approximately 30,000 to 500,000 sales per year;

- ◆ Increase by 50 percent per year to 4,000,000 in the period from 2001 through 2005; and

- ◆ Remain at a constant 32 percent of total light duty vehicle sales in the period from 2005 through 2010.

Under this scenario, the AFV population in 2020 would be large enough so that 30 percent of light duty vehicle motor fuel would be replacement fuel. This scenario is believed to be more representative of new vehicle technology market introduction generally, than the growth paths necessary to meet the Act's suggested goals. However, the draft analysis indicates that it is unlikely that the estimated growth in alternative fueled vehicles and alternative fuel use will occur solely due to the Federal, State, local government, and fuel provider alternative fueled vehicle acquisition requirements of the Act. The draft analysis suggests that new policies may need to be established before these projections of alternative fuel and alternative fueled vehicle use can be realized. These policies could result in additional grant programs, budget increases for existing grant programs, additional financial and non-financial incentives, additional excise tax changes, and/or the establishment of new programs.

In addition to the hearings, reports and analyses required by Title V, DOE held two stakeholder forums in 1997 for the purpose of discussing the replacement fuel goals, the potential private and local government fleet acquisition requirements, and the issue of mandates versus incentives. These forums took place on June 24, 1997, in Long Beach, CA, and on November 19, 1997, in Dallas, TX. Issues discussed at these forums included the current availability and use of alternative fuels and alternative fueled vehicles; existing governmental incentives, both financial and non-financial; taxes on alternative fuels; alternative fuel economics; and the need for additional programs and incentives that will catalyze the alternative fuels market. In preparation for the Dallas forum, DOE produced a "Fleet Forum White Paper" that summarized the current status of these issues, characterized the types of incentives and provided a basis for discussion. This document will be placed in the docket for this rulemaking and can be reviewed at DOE's Freedom of Information Reading Room.

Pursuant to section 505 of the Act, 42 U.S.C. 13255, DOE is promoting voluntary use of alternative fueled vehicles through its Clean Cities Program. Under this program, DOE joins with local governments and organizations in public/private partnerships aimed at developing markets for alternative fueled vehicles.

The program aims to bring together enough participants in each local area to reach the necessary volume of alternative fueled vehicle use to justify installation of refueling infrastructure and other joint facilities, as well as to promote other forms of cooperation. As of March 1998, 61 U.S. communities have signed agreements to participate.

Title V also contains non-discretionary alternative fueled vehicle acquisition requirements. Sections 501 and 507(o) of the Act require certain alternative fuel provider and State government fleets to include increasing percentages of alternative fueled vehicles in their annual acquisitions of new light duty vehicles. DOE published a final rule to implement these vehicle acquisition requirements on March 14, 1996. 61 FR 10621. As a result of these requirements, alternative fuel provider and State fleets have reported, to date, the acquisition of approximately 5,000 alternative fueled vehicles to DOE. This quantity is expected to increase after additional reports are received and tabulated.

The use of alternative fueled vehicles, alternative fuels, and replacement fuels has been steadily growing since 1992. According to the EIA report entitled, "Alternatives to Traditional Transportation Fuels 1996" (December 1997), the following estimates apply in respect to the use of alternative fueled vehicles, alternative fuels, and replacement fuels:

- ◆ More than 380,000 alternative fueled vehicles were in use in 1997; a 51 percent increase since 1992.
  - ◆ An additional 50,000 alternative fueled vehicles are expected to be in use by the end of 1998.
  - ◆ From 1992 to 1996, gasoline-equivalent gallon consumption of alternative and replacement fuels increased by 76 percent, while consumption of traditional fuels increased just 10 percent.
  - ◆ From 1992 to 1996, alternative and replacement fuel consumption increased from 2,106,000 to 3,707,000 billion gasoline-equivalent gallons, while consumption of traditional fuels increased from 134,000,000 to 148,000,000 billion gasoline-equivalent gallons.
  - ◆ United States consumption of alternative fuels is expected to grow by more than 45 million gasoline-equivalent gallons from 1996 to 1998.
- The availability of alternative fueled vehicles from Original Equipment Manufacturers (OEMs) has been increasing steadily. Several types of alternative fueled vehicles, including light-, medium-, and heavy-duty vehicles are available from OEMs.

Alternative fueled vehicles are available from Chrysler, Ford, General Motors, Honda, and Toyota. Manufacturers have announced plans for new offerings of alternative fueled vehicles in the next few years. Both Chrysler and Ford announced that they intend to produce large numbers of flexible-fuel vehicles (including sedans, minivans, and compact pickup trucks) that are capable of operating on E85, a blend of 85 percent ethanol and 15 percent gasoline, and/or gasoline. Currently, available model types include compact and full-size pickup trucks; cargo and passenger vans; minivans; compact sport utility vehicles; delivery trucks; and subcompact, compact, mid-size, and full-size passenger cars. Available fuel types include 85 percent ethanol (E85), 85 percent methanol (M85), compressed natural gas (CNG), liquefied natural gas (LNG), propane (liquefied petroleum gas or LPG), and electricity.

### C. Required Rulemaking

This advance notice of proposed rulemaking is the first step in a required rulemaking under section 507(g) of the Act for determining whether local government and private fleets (other than alternative fuel providers subject to section 501) should be required to acquire alternative fueled vehicles. 42 U.S.C. 13257(g). A DOE decision to impose alternative fueled vehicle acquisition requirements on private and local government fleets is dependent on a determination that such requirements are "necessary" to achieve the replacement fuel goals of section 502(b)(2)(B), or as modified by DOE under section 504 or 507(e), and that the requirements would enable the actual realization of these goals. If the replacement fuel goals, as modified, cannot be met by the imposition of these acquisition requirements, the Act does not permit DOE to go forward with such a program.

Such a fleet mandate would cover local government and private fleets (excluding alternative fuel provider fleets covered by section 501 of the Act) of 20 or more light duty motor vehicles (including passenger cars and trucks under 8500 lbs. gross vehicle weight rating), which are:

- Centrally fueled or capable of being centrally fueled;
- Operated primarily within a metropolitan statistical area with a population of at least 250,000 according to the 1980 census; and
- Owned, leased, operated or otherwise controlled by an entity which owns or operates 50 or more such vehicles in the United States.

Various classes of light duty motor vehicles are excluded from the basis for determining coverage. Excluded categories are listed in section 490.3 of DOE's final rule for State government fleets and certain alternative fuel providers. 10 CFR part 490. Appendix A to subpart A of 10 CFR part 490 provides a list of the 125 metropolitan statistical areas with a population of at least 250,000, according to the 1980 Census.

The statutory authority for the required rulemakings is described below. Each may require a separate rulemaking action, or may be combined into a single rulemaking. Additionally, a third optional rulemaking, as described below in section D, may require a separate rulemaking, or may be included in this single rulemaking action.

### 1. Advance Notice of Proposed Rulemaking

Section 507(c) of the Act requires DOE to publish an advance notice of proposed rulemaking for the purposes of: (a) evaluating progress toward the goals of producing replacement fuels to replace, on an energy equivalent basis, at least 10 percent of motor fuel consumption by the year 2000 and at least 30 percent by the year 2010; (b) identifying the problems with achieving those goals; (c) assessing the adequacy and practicability of those goals; and (d) considering all actions necessary to achieve those goals. Today's notice is issued to comply with this statutory requirement.

### 2. Later Rulemaking

Sections 507(e) and (g) of the Act require DOE to initiate a rulemaking to determine if the statutory conditions for a later mandate, beginning in model year 2002 or thereafter, are met. In order to determine that a mandate is "necessary," section 507(e) of the Act, 42 U.S.C. 13257(e), requires that DOE make the following findings by rule:

- (a) The goal of replacement fuel use described in section 502(b)(2)(B), or as modified by section 504, is not expected to be actually achieved by 2010 by voluntary means or pursuant to Title V or any other law without such a fleet requirement program, taking into consideration the status of the achievement of the interim goal described in section 502(b)(2)(A); and
- (b) Such goal is practicable and actually achievable within periods specified in section 502(b)(2) (or such other date as is established under section 504) through implementation of such a fleet requirement program in combination with voluntary means and the application of other programs relevant to achieving such goals.

Section 507(g) provides the following alternative fueled vehicle acquisition schedule for a program established by this later rulemaking:

- 20 percent of the light duty motor vehicles acquired in model year 2002;
- 40 percent of those acquired in model year 2003;
- 60 percent of those acquired in model year 2004; and
- 70 percent of those acquired in model year 2005 and thereafter.

Under section 507(e)(2), these percentages can be reduced by rule, to no less than 10 percent. Additionally, section 507(g)(2) allows DOE the option of starting the acquisition schedule later than model year 2002.

If DOE were eventually to determine under section 507(f) that a fleet requirement program is unnecessary, DOE would be required by section 509 of the Act to submit to Congress recommendations for possible requirements or incentives applying to fuel suppliers, vehicle suppliers, and motorists that would achieve the Act's fuel replacement goals.

#### *D. Law Enforcement Vehicle and Urban Bus Optional Rulemakings*

Section 507(k)(1) allows the Secretary, by rule, to include fleets of law enforcement vehicles in a fleet requirement program established under section 507(g), if it is determined that this inclusion would contribute to achieving the goal described in section 502(b)(2)(B) (or such other date as is established under section 504). 42 U.S.C. 13257(k)(1). A DOE decision to include law enforcement motor vehicles in a fleet requirement program established under section 507(g) is dependent upon a determination that this inclusion will not hinder the use of motor vehicles for law enforcement purposes. Only one rulemaking may be initiated under section 507(k)(1). Under section 507(k)(3), this rulemaking may not occur unless a rulemaking is carried out under section 507(g).

Many law enforcement agencies currently are using alternative fueled vehicles satisfactorily. In some cases, alternative fuels can reduce life-cycle operation costs for high-mileage patrol vehicles. The operational characteristics of many administrative law enforcement vehicles create a good match with those of alternative fueled vehicles. However, DOE recognizes that many law enforcement agencies have unique operational practices and requirements that would reduce opportunities for alternative fueled vehicles. DOE is interested in receiving comments as to whether acquisition requirements for

alternative fueled law enforcement motor vehicles should be included in a fleet requirement program and how this program should be structured, including the program start date and acquisition percentages.

Section 507(k)(2) allows the Secretary, by rule, to include new urban buses, as defined by the Environmental Protection Agency (EPA) under title II of the Clean Air Act, in a fleet requirement program established under section 507(g), if it is determined that this inclusion would contribute to achieving the goal described in section 502(b)(2)(B) (or such other date as is established under section 504). 42 U.S.C. 13257(k)(2). An urban bus is defined by EPA as:

A heavy-duty diesel-powered passenger-carrying vehicle with a load capacity of fifteen or more passengers and intended primarily for intra-city operation, i.e., within the confines of a city or greater metropolitan area. Urban bus operation is characterized by short rides and frequent stops. To facilitate this type of operation, more than one set of quick-operating entrance and exit doors would normally be installed. Since fares are usually paid in cash or tokens rather than purchased in advance in the form of tickets, urban buses would normally have equipment installed for collection of fares. Urban buses are also typically characterized by the absence of equipment and facilities for long distance travel, e.g., rest rooms, large luggage compartments, and facilities for stowing carry-on luggage. The useful life for urban buses is the same as the useful life for other heavy-duty diesel engines. 40 CFR 86.091-2.

A DOE decision to include new urban buses in a fleet requirement program established under section 507(g) is dependent upon a determination that this inclusion will be consistent with energy security goals and the needs and objectives of encouraging and facilitating the greater use of such urban buses by the public, taking into consideration the impact of such application on public transit entities. Only one rulemaking may be initiated under section 507(k)(2). Under section 507(k)(3), this rulemaking may not occur unless a rulemaking is carried out under section 507(g).

#### **II. General Issues Relating to Replacement Fuel Goals**

As explained in Section I of this notice, section 507(c) of the Act requires DOE to publish an advance notice of proposed rulemaking for the purposes of: Evaluating progress toward the replacement fuel goals of producing replacement fuels to replace, on an energy equivalent basis, at least 10 percent of motor fuels consumption by the year 2000 and at least 30 percent by the year 2010 (or as modified under

section 504); identifying the problems with achieving those goals; assessing the adequacy and practicability of those goals; and considering all actions necessary to achieve those goals.

Section 502(a) lays out a specific goal for a "Replacement Fuel Supply and Demand Program": To promote the development and use in light duty motor vehicles of domestic replacement fuels to substitute for imported petroleum motor fuels to the maximum extent practicable. 42 U.S.C. 13252.

In designing the program, DOE is to focus on those replacement fuels having the most impact in reducing oil imports, improving the health of the Nation's economy, and reducing emissions of greenhouse gases. Section 502(b)(2) further requires DOE to assess, among other things, the feasibility of producing adequate replacement fuels to displace 10 percent of U.S. motor fuel by 2000 and 30 percent by 2010. 42 U.S.C. 13252(b)(2).

DOE invites comments on the following general issues related to achieving the Act's suggested replacement fuel goals:

1. Can the goal of replacing 30 percent of motor fuel consumption be achieved by 2010? What are the problems with achieving the goal?

2. If the 30 percent goal cannot be achieved by 2010, then what is an achievable goal in terms of percentage and time frame?

3. What methods or criteria should DOE use to assess the adequacy and practicality of specific replacement fuel goals (i.e., the 10 percent and 30 percent targets) or for determining whether the goals should be modified?

4. What type of a replacement fuels program should DOE establish that would maximize usage of alternative fuels, replacement fuels, and energy efficient vehicles? How should such a program be structured and implemented?

5. What types of programs could be employed in combination with, or in place of, mandated fleet AFV acquisitions to help achieve the 30 percent replacement fuel goal in 2010?

6. What specific types of incentives, should be employed to help achieve the 30 percent replacement fuel goal in 2010? What form should these incentives take (e.g., financial, non-financial)? Who should benefit from these incentives (e.g., consumers, fleet operators, vehicle manufacturers, fuel providers, equipment suppliers) and how?

7. How should the potential for dramatic changes in the price and availability of petroleum (e.g., due to a sharp curtailment in world petroleum

supplies) be factored into the design of a replacement fuels program?

8. How should DOE estimate the fuel replacement impacts from other Federal or State alternative fueled vehicle mandates, voluntary commitments, use of dual fueled vehicles (that operate only part time on alternative fuels), and other measures?

9. What methods are currently being used by fleets for tracking the use of alternative fuel in dual fueled vehicles? How should DOE use this data to verify alternative fuel use?

10. How should DOE encourage alternative fuel use in dual fueled vehicles?

11. What factors should DOE take into account when estimating the impact of replacement fuels on reducing oil imports, improving the health of the Nation's economy, and reducing greenhouse gas and other emissions?

### III. Issues Related to Fleet Requirement Determinations

Sections 507(e) and (g) require that DOE publish a rule in the *Federal Register*, no later than January 1, 2000, for the purpose of determining whether a fleet requirement for local government and private fleets to acquire alternative fueled vehicles is necessary. Such a program shall be considered necessary if the Secretary finds that:

(a) the goal of replacement fuel use described in section 502(b)(2)(B) (or as modified under section 504) is not expected to be actually achieved by 2010 (or other such date as established under section 504) by voluntary means or pursuant to Title V or any other law without such a fleet requirement program; and

(b) the goal (or as modified under section 504) is practicable and actually achievable through implementation of such a fleet requirement program in combination with voluntary means and the application of other programs relevant to achieving the goal.

Section 507(e)(2) requires that the rule published under section 507(g) also must modify the goal described in section 502(b)(2)(B) and establish a revised goal pursuant to section 504 if the Secretary determines that the 30 percent motor fuel replacement goal by 2010 is inadequate or impracticable, and not expected to be achieved. The goal as modified and established is applicable in making these findings.

Under section 507(e)(2), if DOE modifies the suggested 30 percent motor fuel replacement by 2010 goal, it also may modify the annual fleet acquisition requirements with the minimum percentage being no less than 10 percent of new light duty vehicle acquisitions.

Likewise, section 507(g)(2) provides that DOE may, by rule, establish a lesser AFV acquisition requirement for any model year and that DOE may establish a fleet requirement program start date later than 2002. However, DOE may not establish acquisition percentages greater than those in section 507(g)(1).

Regarding local government entities, section 507(i)(1)(C) provides an exemption for a local government entity if it can demonstrate to DOE that a fleet requirement program, under section 507(g), would pose an unreasonable financial hardship on the entity. The Act does not provide a similar exemption for private fleets that may be covered. However, for all fleets, sections 507(i)(1)(A) and (B) allow an exemption if the fleet demonstrates that alternative fueled vehicles that meet the normal requirements and practices of the principal business of the fleet owner are not reasonably available for acquisition or the alternative fuels that meet the normal requirements and practices of the principal business of the fleet owner are not available in the area in which the vehicles are to be operated.

DOE seeks comment on the following issues that may be relevant to any future DOE decision to propose alternative fueled vehicle acquisition requirements for local government and private fleets:

1. If a fleet requirement program is established, should the acquisition percentages be the same as those provided in section 507(g) for the acquisition of new light duty motor vehicles or should a different acquisition schedule apply? If a different schedule should apply, what should the schedule look like (e.g., program start date, acquisition percentages)?

2. If the Act's suggested goal of replacing 30 percent of the motor fuel used by 2010 is impracticable and not expected to be achieved, what should the modified fuel replacement goal be in terms of percentage replacement and the year the goal is expected to be achieved?

3. What methods or criteria should DOE use to determine the contribution of a fleet requirement program towards meeting the fuel replacement goal as modified?

4. What types of programs should be established, instead of a fleet requirement program, that will result in market penetration of alternative fueled vehicles and alternative fuels to the maximum extent practicable? And what market penetration(s) would be possible with the establishment of these programs?

5. What types of voluntary and incentive measures should be undertaken, either in conjunction with

fleet AFV requirements or in lieu of such mandates, such as a program that awarded credits for the amount of petroleum displaced or replaced, that would encourage progress toward the fuel replacement goals?

6. DOE is required by section 507(l) to take into consideration the following factors: energy security, costs, safety, lead time requirements, vehicle miles traveled annually, effect on greenhouse gases, technological feasibility, energy requirements, economic impacts including impacts on fleets, workers, and consumers, such as users of the alternative fuels for other (non-transportation) purposes, and the availability of alternative fuels and alternative fueled vehicles.

What bearing or weighting factor, if any, should these factors have on a DOE determination as to whether it should impose alternative fueled vehicle acquisition requirements on local government and private fleets?

### IV. Issues Related to the Inclusion of Urban Buses in a Fleet Requirement Program

DOE seeks comment on the following issues that may be relevant to any future DOE decision to propose the inclusion of alternative fueled urban bus acquisition requirements for local government and private fleets under a fleet requirement program that may be established under section 507(g) of the Act:

1. What methods or criteria should DOE use in determining whether the inclusion of alternative fueled urban buses in a fleet requirement program under section 507(g) would contribute to achieving the goal of section 502(b)(2)(B) (or other such goal as modified by section 504)?

2. What methods or criteria should DOE use in determining whether the inclusion of alternative fueled urban buses in a fleet requirement program will be consistent with the energy security goals and the needs and objectives of encouraging and facilitating the greater use of alternative fueled buses by the public?

3. What factors should DOE take into consideration when estimating the impact on public transit entities of a program requiring the acquisition of alternative fueled buses?

4. If a fleet requirement program is established, should requirements for the acquisition of alternative fueled urban buses apply to both local government and private fleets? Or, should requirements only apply to local government fleets?

5. Should the acquisition percentages be the same as those that apply to local

government and private fleets for new light duty vehicles under section 507(g) or should a different acquisition schedule apply? If a different schedule should apply to the acquisition of alternative fueled urban buses, what should the schedule look like (e.g., program start date, acquisition percentages)?

6. What types of exemptions and/or exclusions should be included in such a fleet requirement program?

#### V. Review and Analysis Requirements

DOE provided to the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget a copy of this notice for comment. At the proposal stage for this rulemaking, DOE and OIRA will determine whether this rulemaking is a significant regulatory action under Executive Order 12866, Regulatory Planning and Review, 58 FR 51735 (Oct. 4, 1993). Were DOE to propose alternative fueled vehicle acquisition requirements for local government and private fleets, the rulemaking could constitute an economically significant regulatory action, and DOE would prepare and submit to OIRA for review the assessment of costs and benefits required by section 6(a)(3) of Executive Order 12866. Other procedural and analysis requirements in other Executive Orders and statutes also may apply to such future rulemaking action, including the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*; the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*; and the Unfunded Mandates Act of 1995, Pub. L. 104-4; and the National Environmental Policy Act, 42 U.S.C. 4321 *et seq.*

#### VI. Public Comment Procedures

##### A. Participation in Rulemaking

DOE encourages the maximum level of public participation possible in this rulemaking. Individual fleet operators; representatives of trade groups; local governments; consumers of fleet services; vehicle manufacturers; fuel providers, including producers; distributors and service station operators; associations; States or other governmental entities; and others are urged to submit written comments on the proposal. DOE also encourages interested persons to participate in the public hearings to be held at the times

and places indicated at the beginning of this notice.

DOE has established a period of 90 days following publication of this notice for persons and organizations to comment on this advance notice of proposed rulemaking. All public comments, public hearing transcripts, and other docket material will be available for review and copying in the DOE Freedom of Information Reading Room at the address shown at the beginning of this notice. The docket file material will be filed under "EE-RM-98-507."

##### B. Written Comment Procedures

Interested persons are invited to participate in this proceeding by submitting written data, views or arguments with respect to the subjects set forth in this notice. Instructions for submitting written comments are set forth at the beginning of this notice and below. Where possible, commenters should identify the specific section and question number to which they are responding.

Comments (8 copies) should be labeled both on the envelope and on the documents, "Fleet AFV Acquisition Requirements Rulemaking (Docket No. EE-RM-98-507)," and must be received by the date specified at the beginning of this notice. All comments and other relevant information received by the date specified at the beginning of this notice will be considered by DOE in the subsequent stages of the rulemaking process.

Pursuant to the provisions of 10 CFR 1004.11, any person submitting information or data that is believed to be confidential and exempt by law from public disclosure should submit one complete copy of the document and 3 copies, if possible, from which the information believed to be confidential has been deleted. DOE will make its own determination with regard to the confidential status of the information or data and treat it according to its determination.

##### C. Public Hearings

###### 1. Procedure for Submitting Requests to Speak

The dates, times and places of the public hearings are indicated at the beginning of this notice. DOE invites any person who has an interest in these proceedings, or who is a representative of a group or class of persons having an

interest, to make a request for an opportunity to make an oral presentation at the public hearings. Requests may be telephoned to the telephone number given at the beginning of this notice. The person making the request should give a telephone number where he or she may be contacted. Persons will be notified by DOE as to the approximate time they will be speaking.

Each person is requested to submit 8 copies of his/her statement at the registration desk prior to the beginning of the hearing. In the event any person wishing to testify cannot meet this requirement, that person may make alternative arrangements by calling (202) 586-3012 in advance.

###### 2. Conduct of Hearing

DOE reserves the right to select the persons to be heard at the hearings, to schedule the respective presentations, and to establish the procedures governing the conduct of the hearings. Each presentation is limited to 10 minutes.

A DOE official will be designated to preside at the hearings. The hearings will not be judicial or evidentiary-type hearings, but will be conducted in accordance with the Administrative Procedure Act, 5 U.S.C. 553, and section 501 of the DOE Organization Act, 42 U.S.C. 7191. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity to make a rebuttal or clarifying statement, subject to time limitations. Any further procedural rules regarding proper conduct of the hearings will be announced by the presiding official.

Transcripts of the hearings will be made and the entire record of this rulemaking, including the transcripts, will be retained by DOE and made available for inspection at the DOE Freedom of Information Reading Room as provided at the beginning of this notice. Any person may purchase a copy of the transcripts from the transcribing reporter.

Issued in Washington, DC, on April 8, 1998.

**Dan W. Reicher,**

*Assistant Secretary, Energy Efficiency and Renewable Energy.*

Income taxes:

State and political subdivision obligations; cross-reference; comments due by 4-22-98; published 1-22-98

#### LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current

session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202-523-6641. This list is also available online at <http://www.nara.gov/fedreg>.

The text of laws is not published in the *Federal Register* but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202-512-1808). The text will also be made available on the Internet from GPO Access at [http://www.access.gpo.gov/su\\_docs/](http://www.access.gpo.gov/su_docs/). Some laws may not yet be available.

#### S. 750/P.L. 105-167

To consolidate certain mineral interests in the National Grasslands in Billings County, North Dakota, through the exchange of Federal and private mineral interests to enhance land management capabilities and environmental and wildlife protection, and for other purposes. (Apr. 13, 1998; 112 Stat. 40)

Last List April 8, 1998

#### Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, send E-mail to [llstproc@etc.fed.gov](mailto:llstproc@etc.fed.gov) with the text message: **subscribe PUBLAWS-L** (your name)

**Note:** This service is strictly for E-mail notification of new public laws. The text of laws is not available through this service. PENS cannot respond to specific inquiries sent to this address.

## The United States Government Manual 1997/1998

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix B, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

## Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

### LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. \$27 per year.

### Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. \$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register
