### Non-Warranty

Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather or soil conditions, too deep or shallow planting, etc., which renders it impossible for us to guarantee success, and, although we take all possible care to supply only such goods as will, under proper conditions, produce satisfactory results, we will give no warranty as to description, quality or productiveness of any of the seeds, plants or bulbs we send out, and will not be in any way responsible for the crop, and every order for articles named in this catalogue will be executed on these conditions only. If they are not accepted on these conditions they must be returned at once. It must, however, be plain to every one who gives the matter the slightest thought, that it is to our best interest to send out only such stock as will not only grow, but prove true to name and description.

The vines run, making it a very productive variety. We were fortunate in growing a lot of nice seed the past season, and will have plants or draws ready May 1st. Type of Heads Grown From Frost-Proof Cabbage Plants. Variety: "Charleston Wakefield."

## Frost-Proof Cabbage Plants.

Ready January 1st.

These are hardy outdoor-grown plants that will stand any kind of weather. The seed is planted in October and November, in a section in the South especially suited for this purpose. We are growing several million of plants this year, and will be able to supply all orders. By recent experiments, we have located a desirable climatic condition near the Gulf, and the plants will be satisfactory in every way.

The use of open air, practically frost-proof, cabbage plants often enables the truck gardener to put full grown heads of cabbage on the market two to three weeks ahead of the ordinary home-grown plants, and of course he gets the top prices for his crop.

The Frost-Proof Plants may not look a bright, green color, like the tender hotbed seedlings, as naturally their outdoor winter growth, standing through frosts, light freezes, discolors them and gives them a stunted appearance. Set them out, and their excellent growth, as soon as the weather warms up, will make you forget how they looked.

These plants are from the very best grown seed, and will be sent both from Memphis and from our grower at purchaser's option at prices below.

Will have the following varieties: Early Jersey Wakefield, Charleston or Large Wakefield, Early Flat Dutch and Succession.

Prices, f.o.b. Memphis, 100 for 25c; 500 for \$1.25; 1000 for \$2.00. Prices, f.o.b. Growing Station, 500 for \$1.00; 1000 for \$1.50; 5,000 for \$6.25; 10,000 for \$10.00.

The handsome pods are four and one-half inches long, containing 8 to 10 large deep black green peas, not only large but they are of delicious flavor. Vines grow 15 inches in height and produce enormous crops, twice as many as the American Wonder, and besides the pods and peas are much larger. Burpee's Main Stay Cabbage

**Burpee's Main Stay Early Cabbage**—Medium size and very solid, round heads. Very near as early as Jersey Wakefield. The leaves fold close to the head, therefore, do not take up much space. Pkt., 10c; ½ oz., 40c; 1 oz., 75c, parcel post paid.

**Schwill's Frost-Proof Drumhead Cabbage**—This splendid sort was introduced by us a few years ago, and has proven the very best large hardy cabbage; stands out in the open field all winter without the slightest protection. It is by far the hardiest of any cabbage grown. Frost-proof, has a short stem and makes a deep blue and wide leaf, making a broad, flat, hard head, all very uniform in size. Pkt., 5c; ½ oz., 25c; 1 oz., 40c; 2 oz., 60c; ¼ lb., 90c; 1 lb., \$2.75, parcel post paid.

**Chinese Cabbage, Pi-Tsai**—Makes a rapid growth and has a very attractive appearance. It is the best of the Chinese vegetables for American conditions. It does best where there are warm days and cool nights. Although the Chinese name is translated Cabbage-in-English, it is not of the same habit of growth as the vegetable familiar to us by that name. Pi-Tsai grows like loose lettuce. When cooked it has a splendid flavor, and gives out no offensive odor when cooking. In preparing "Pi-Tsai" for the table, it should not be cooked too long, as its tendency is to become soft. It may be used in soup or boiled whole, or prepared as a slaw or salad. Pkt., 10c; oz., 35c.

**Copenhagen Market Cabbage**—The best early round or flat-head cabbage. The heads are nearly round, slightly flattened, good size, as large as Early Summer and will cut with the Charleston Wakefield. Heads are very hard; compact, of excellent quality. Pkt., 5c; 1 oz., 40c; 2 oz., 60; ¼ lb., \$1.00; 1 lb., \$3.00, parcel post paid.

Burpee's Spicy Cantaloupe

Mammoth Rocky Ford Cantaloupe

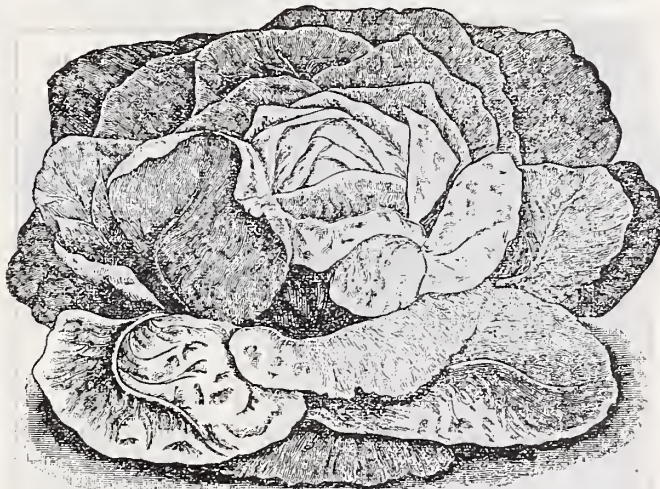

**Burpee's Spicy Cantaloupe**—This new cantaloupe is quite distinctive. Has a peculiar rich, sugary flavor. The flesh is of a rich, deep salmon, two inches thick, entirely stringless, soft and melting, the delicious flavor extending to the rind. The melons are good size, do not crack. Vines vigorous and almost blight proof. Do not fail to try Burpee's New Spicy Cantaloupe this season. Pkt., 10c; oz., 25c; 2 oz., 45c; ¼ lb., 75c; 1 lb., \$2.50, parcel post paid.

**Mammoth Rocky Ford Cantaloupe**—This is without doubt the finest strain of Rocky Ford on the market. Every melon is subjected to a rigid examination before being selected for seed, and they must conform to a standard set down by what the originator claims is the embodiment of an ideal melon. The general type of this melon is similar to the regular Rocky Ford, but they grow somewhat larger in size, making it a splendid variety for market. 1 oz., 15c; 2 oz., 25c; ¼ lb., 40c; 1 lb., \$1.25, parcel post paid.

**Henderson's Bush Cantaloupes**—This recent introduction is a very desirable addition to the list of melons, as it is a variety that can be grown to advantage in small gardens where there is not sufficient room for the running types. It is a small, green flesh melon, a dependable cropper, sweet, and of a good flavor. Pkt., 10c; oz., 40c.

**Delicious Gold-Lined Rocky Ford Cantaloupe**—Shape slightly oval, no ribs, heavily netted all over, very thick-meated, fine grained and sweet; the flesh is green with a gold margin next to the seed cavity. A splendid melon for market on account of its showy appearance and superb quality. In size it is very much like the ordinary Rocky Ford, Pkt., 5c; 1 oz., 15c; 2 oz., 25c; ¼ lb., 40c; 1 lb., \$1.25, parcel post paid.

**Schwill's Magnificent Cantaloupe**—Ten days earlier than Rocky Ford, twice as productive and larger in size. The melons are regular in size, form nearly round or slightly oval, and very closely netted, flesh bright green, luscious in flavor and ripens close to the rind. If you want a real good melon and at the same time one slightly larger than the Gem type, do not fail to order some of the Magnificent Cantaloupes. Pkt., 5c; 1 oz., 15c; 2 oz., 25c; ¼ lb., 40c; 1 lb., \$1.50, parcel post paid.

Burpee's Wayahead Lettuce.

**Burpee's Wayahead Lettuce**—A superb new heading lettuce that is wayahead of any variety, both in earliness, size and quality. Outer leaves light green, and the inner leaves blanch to a rich butter yellow tint; the heads are very large and solid. Our customers will find it as Mr. Burpee says, Wayahead of anything else. Pkt., 5c; ½ oz., 20c; 1 oz., 30c; 2 oz., 50c; ¼ lb., 75c; 1 lb., \$2.50, parcel post paid.

**Schwill's Famous Cabbage Head Lettuce**—This is one of the finest varieties of lettuce ever offered, and is superior to Big Boston in many ways. It does not scald in the heart and does not turn red from cold. It is just as large and as firm as Big Boston, and is a little lighter in color. It will hold up better and is an excellent shipping sort. Some market gardeners grow it throughout the season, but we especially recommend it for spring and fall use. If you have been using Big Boston, try this, for it will surely please you. Pkt., 5c; 1 oz., 25c; 2 oz., 40c., ¼ lb., 75c; 1 lb., \$2.25, parcel post paid.

**Burpee's Sweet Upright Pepper**—Grows on upright thick stalks. Fruits as early as Bell or Bull Nose, but much larger, thick meated and always mild, and the most productive variety of all real sweet peppers. Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.00, parcel post paid.

Burpee's Rapid Red Radish

**Pimento Pepper**—A delicious variety, most all meat. Very mild and of elegant flavor. Requires rich soil and plenty of moisture to make fruits grow to perfection. Pkt., 10c; ½ oz., 35c; oz., 60c.

**Texas or Sweet Italian Pepper**—A new sort, of recent introduction. The fruits are nearly heart-shaped, very mild and exceedingly prolific. They mature quite early, are green first, turning to red at maturity. It has become quite popular on account of its being both early and prolific. Pkt., 5c; ½ oz., 25c; 1 oz., 50c; 2 oz., 90c; ¼ lb., \$1.50; 1 lb., \$4.00, parcel post paid.

Neapolitan Giant Sweet Pepper

**Neapolitan Giant Sweet Pepper**—Decidedly the earliest of all large peppers, and the most productive. Most all the large varieties of peppers are shy bearers, but in Neapolitan we have a sure prolific and abundant cropper; the flesh is sweet and as mild as an apple; the fruit is extra large and will bear continuously until frost. Pkt. 5c; ½ oz., 20c; 1 oz., 40c; 2 oz., 75c; ¼ lb., \$1.00; 1 lb., \$3.00, parcel post paid.

Burpee's Dwarf Giant Tomato

**Burpee's Dwarf Giant Tomato**—The largest fruited dwarf tomato, averaging one pound each, color rich purple crimson. Meat solid and of rich sweet flavor, free from any acidity. Vines vigorous, leaves thicker and darker green than most sorts, therefore less subject to blight, leaf curl or other fungus diseases than running tomatoes. Burpee's Dwarf Giant is a cross between Ponderosa and Dwarf Champion, and inherits size and characteristics of the former, being slightly ribbed, but solid and do not crack. The fruit is almost seedless, without any hard core. We find the new Dwarf Giant to be satisfactory in every way, vines upright, vigorous and productive. Pkt., 10c; ½ oz., 35c; 1 oz., 65c; 2 oz., \$1.00. Parcel post paid.

**My Maryland Tomato**—A wonderful yielding variety. Will make any grower money. Large size, perfectly smooth, bright red in color, and bears throughout the season. It is the best second early main crop bright red tomato you can grow, as the grower says it is a real double yielder. Pkt., 5c; ½ oz., 25c; 1 oz., 40c; 2 oz., 70c; ¼ lb., \$1.00, Parcel post paid.

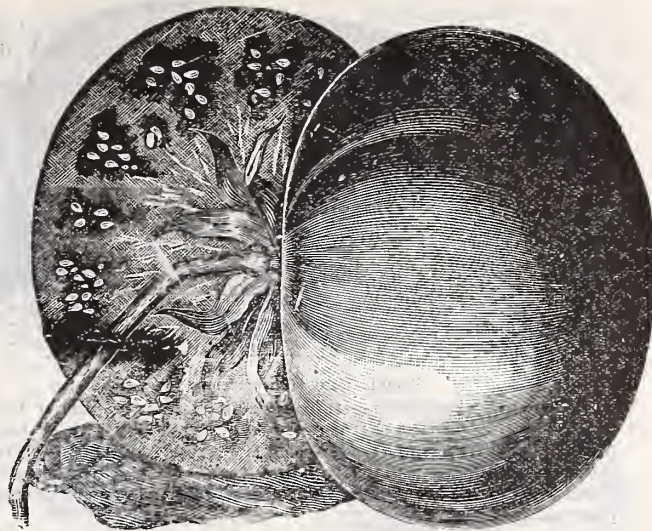

Schwill's Excelsior Tomato

**Schwill's Excelsior Tomato**—Without the slightest exaggeration we can safely say that this new tomato is all that can be desired, either for market or home use, the gardener usually securing the highest price before his neighbor has tomatoes fit to sell. The vines are stronger and more vigorous than most sorts, and bear in clusters of four and five large, handsome, deep purple fruits, which are of a delightful flavor, and for solidity and smoothness cannot be excelled by any variety now in cultivation. In our trials it proved to be the earliest and smoothest tomato in all the varieties tested. Pkt., 10c; ½ oz., 25; 1 oz., 40c; 2 oz., 75c; ¼ lb., \$1.25.

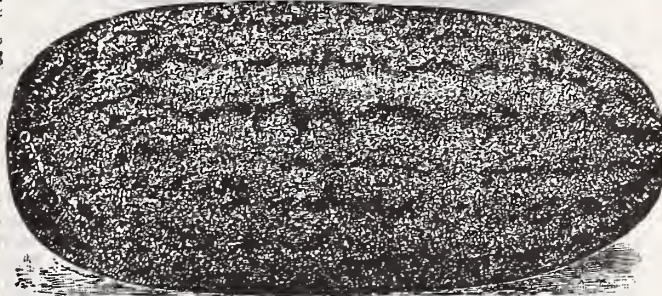

Maule's All Heart Watermelon

**Maule's All Heart Watermelon**—A wonderful new melon, having small seeds which are about the size of apple seeds, but notwithstanding this fact the average weight of this splendid variety is from 30 to 40 pounds, very solid and with thin rind. The deep red meat is sweet, crisp and tender, and pretty near all heart. A superb variety, both in quality, productiveness and size. Don't fail to plant it. Pkt., 10c; 1 oz., 20c; 2 oz., 35c; ¼ lb., 60c; 1 lb., \$2.25, parcel post paid.

John Baer Tomato

**John Baer Tomato**—The earliest large tomato in existence. Color bright red, smooth, solid and meaty. For early crop market gardeners will find it a money maker. We don't advise it, however, for general crop, on account of its color, as our markets prefer the pink tomatoes, but if you want real early fruit sow the John Baer Tomato. Pkt., 5c; ½ oz., 25c; 1 oz., 40c, parcel post paid.

New Excel Watermelon

**New Excel Watermelon**—A distinct new variety, having two colors of seed, caused in crossing, but nevertheless it is distinct. The Excel produces very long and large melons, weighing from forty to sixty pounds each. The dark green striped rind is tough and stands all kinds of handling. The deep red flesh is crisp and melting, of finest flavor and entirely free from any strings or hard cores, heart large and firm with unusually small seed cavity. This new melon comes from one of the best and most reliable growers in Florida, and you will find the melon all we claim for it. Pkt., 5c; oz., 15c; 2 oz., 25c; ¼ lb., 40c; 1 lb., \$1.25, parcel post paid.

**Burpee's Fordhook Early**—The earliest large fruited melon in cultivation. Fruit short and blocky in form with large diameter. Dark green striped rind, which is very thin but firm. Splendid quality, red meat and very crisp and tender. Its earliness and size make it desirable. Pkt., 5c; oz., 15c; ¼ lb., 40c; 1 lb., \$1.00, parcel post paid.

Frotsher Grafted Pecan

Six or eight acres in the grafted pecans will insure a good income every year. We can furnish the best large thin shell varieties. Stuart-Van Dceman-Schley-Frotsher.

## Perennial Flower Seed

Hardy Perennials are easily grown from seed. In many cases they are a little slower than annuals, but with intelligent care they are successfully raised, and from seed is an excellent way to get up a big stock of Perennials in a short time. Many Perennials, if sown in spring, bloom the first year from seed as freely as annuals. Others wait a year; that is, if sown this year they don't bloom until next year.

**Feterita.**

**Feterita**—Feterita is an early-maturing sorghum of considerable promise both for grain and forage. It has rather slender stems 5 to 7 feet high, which are semi-juicy and slightly sweet before ripening and only fairly leafy. The stems are of irregular height, owing to its stooing and branching habit, which also results in some unevenness in maturity. It resembles milo in habit except that the heads grow erect and seeds are larger and softer as well as bluish white. The seed tends to shatter if allowed to stand in the field until overripe. It is a week earlier than Dwarf Milo and about three weeks earlier than Black-hull Kafir. In drought resistance it compares favorably with any sorghum. Yields of 30 to 50 bushels per acre may be expected. Feterita should be planted in April, May or June in rows about 42 to 48 inches apart, when 1 to 3 pounds of seed per acre will be required. Price, 1 lb., 15c; 10 lb., 75c; 50 lb., \$3.00. By parcel post, 1 lb., 20c; 10 lb., 95c.

# Pedigreed Seed Corn

There is no crop of such importance to the farmer as the corn crop, none in which the comparative cost of good seed is so little per acre. Recent experiments prove conclusively that a pure bred corn will yield from five to ten bushels more per acre than the corn ordinarily planted. We have taken great pains to procure choice seed stock from our growers, which we offer at reasonable prices.

# Cotton Seed

**Quality of Our Cotton Seeds.**—We buy our seed of originators, or from scientific growers of seed bought from originators, in car lots. We know our growers; we know what is genuine seed of each type. When you buy of farmers or miscellaneous shippers, you are not certain what you are getting.

We have listed only the most popular and new varieties, and all are stocks that have been grown for us on contract. Any one wanting other cottons not shown here, write us for prices on same, as we are always in position to obtain pure seed of most all kinds. Prices subject to market changes. Write for special quotations on large amounts. All cotton seed sold at the rate of 30 pounds to the bushel.

Miss. Delta Planting Co's. Pedigreed Express Cotton

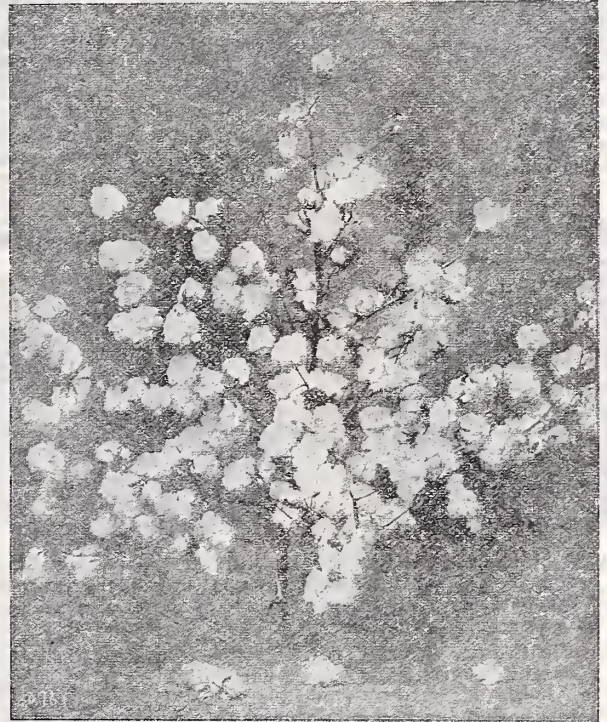

**Pedigreed Express Cotton**—Our seed is pure, grown by the Mississippi Delta Planting Co., Scott, Miss. We have exclusive sale of this stock in Memphis. Don't fail to plant Express Cotton, it is early, productive and makes staple 1 1-16 inches, easily picked. Most large planters have discarded all other varieties for Express, which is leading all kinds at the Mississippi Experimental Station. Price of Mississippi Delta Planting Cotton Seed in branded bags. Bu., \$2.00; per bag, 3 bu., \$5.00; 60 bu., for \$90.00.

**Early Triumph Big Boll Cotton**—It is the earliest of all big boll varieties. As a storm-proof cotton it beats all other cotton. It makes from 36 to 41 per cent. of lint (thirty-six to forty-one pounds of lint to 100 pounds of seed cotton.) Bolls are usually five lock, very large and solid, therefore making more cotton than other spongy large bolls. Lint of the Triumph Cotton is silky, 1 1-16 to 1 1/8 inches in length. Bu., \$1.50; 10 bu., \$14.00; 60 bu., \$80.00.

**Corona Cotton**—One of the finest benders. Originated in Tipton Co., Tenn., where the planters use it altogether, staple 1 3-16, large bolls, medium early, five locked, easily picked, fiber of excellent quality; a broad open plant, giving the bolls a clean chance to ripen. On good land it will yield 1 1/2 bales to the acre. At the gin this variety will turn out 35 to 37 per cent. Memphis buyers always pick up Corona on account of its good uniform length and quality of the cotton. Don't fail to plant it this year. We know that you will like it. Bu., \$1.75; 10 bu., \$15.00; 60 bu., \$80.00.

**Cleveland Big Boll**—Very early, big boll, staple 1 3/8 to 1 1/2 inches. Succeeds well on most all kinds of land. Bu., \$1.50; 10 bu., \$14.00; 60 bu., \$80.00.

**King's Early Improved**—A very early, small balled, small seeded variety, always thirds itself, and matures always two weeks ahead of any other sort. On account of its extreme earliness it is largely planted in boll weevil infected sections, as it matures the most of its crop before the weevil makes its appearance. King's is a very hardy variety, very resistant to rust and other diseases, and seems to hold its fruits without shedding better than any other sort. Bu., \$1.50; 10 bu., \$13.00; 60 bu., \$75.00.

Webber Cotton

**Webber Cotton**—Large boll, long staple. Was originated by D. R. Coker. A heavy fruiting variety, making lint 1 1/4 to 1 3/8 inches in length. Bu., \$1.75; 5 bu., \$8.00; 10 bu., \$15.00; 60 bu., \$85.00.

**Simpkins' Ideal Big Boll Cotton**—We have originator's stock. A new big boll variety, matures early, with open foliage, therefore, well adapted for boll weevil sections. Many farmers write strong testimonials of this new cotton. Write us for literature, etc., describing more fully its merits. Price, bu., \$2.00; 10 bu., \$18.50.

**Coker's Pedigreed Webber No. 49 Cotton**—The earliest of all staple cottons. One of the best varieties for boll weevil sections. Its earliness makes it especially profitable in short seasons, when an early frost kills the top crops of late cottons. Has large bolls, open foliage, ripens quickly—almost as early as the short cottons, makes a good average yield of good quality lint, 1 1/4 to 1 5-16 staple. We have originator's stock from Pedigreed Seed Co. Price, bu., \$4.00; 20 bu., at \$3.50 per bu.

**Coker's Pedigreed Hartsville No. 9 Long Staple Cotton Seed**—Originator's stock. A superior distinct selection, large bolls, easy to pick, practically storm-proof, makes a lint of remarkable uniformity and strength. It makes a long uniform fibre, running from 1 1/4 to 1 5-16 inches in staple. Also resistant to disease, withstands drouth better than any other staple. Don't fail to get started with this excellent variety. Our stock is from the grower. Price, bu., \$3.00; 10 bu., at \$2.75 per bu.

**Christopher's Improved Early Big Boll Cotton**—Bolls are very large, 40 of them making 1 pound seed cotton, 5 to 7 locks to the cluster; seed cotton about 40 per cent lint, easily picked. It produces more to the acre than any other cotton known; staple very strong and about 1 inch; matures very early. Bu., \$2.00; 10 bu., \$18.00.

**Snowbank Cotton**—A new variety, staple snow white, 1 1-16 inches. Yields well on all hill land, a few of our planters in this vicinity after trying it out the past season were more than pleased. **Fall or Everbearing Strawberries.**

A new species different from the ordinary strawberry, in that they bear in the fall. The regular sorts require a full year's growth to come into bearing and have berries then for only three or four weeks, while the Everbearing plants set out in the spring bear from July until freezing time the SAME YEAR THEY ARE PLANTED and then bear again the following spring, same as other kinds. Many persons have the impression that the fall—or everbearing strawberries are difficult to grow successfully. This is an error; their culture is almost as simple as the ordinary kinds. For full crops in autumn, it is best to remove all blossoms until about the first or middle of July. In all other respects they should be given the same treatment as other varieties of strawberries. Price, Superb Everbearing, the best variety, are as follows: By express, 25 for 75c; 50 for \$1.25; 100 for \$2.00; 500 for \$7.00. ## WHAT FARMOGERM IS

Farmogerm is a pure culture, or growth of nitrogen-fixing bacteria that have been selected and bred up to transform large amounts of nitrogen from the air into soluble nitrates. These bacteria are grown in a jelly, or food, in which they remain active for long periods of time, and sent out in a bottle which admits the necessary supply of pure air, yet keeps out destructive contaminations. If alfalfa can be grown on hot, sandy land of South New Jersey why can't you grow it?

## Alfalfa, Red, Alsike and Crimson Clover, Soja Beans, Vetch, Peas, Beans, Sweet Peas

yield earlier, longer and better when treated with Farmogerm. Farmogerm is endorsed by farmers, Federal and State Agricultural Departments and private estates. It is delivered to you in bottles ready for use—you can inoculate the seed for ten acres in ten minutes.

## The Kirke Automatic Lawn Feeder and Fertilizer and Insecticide Dispenser

Spraying Insecticides and Fertilizers with the Kirke Dispenser.

Abolishes the use of stable manure, so objectionable because of its disagreeable odors, and the abundance of weed seeds contained therein.

It applies the fertilizer while watering, and feeds the grass or garden with high grade, immediately available, concentrated plant food.

It is a neat device easily attached to any garden hose. It will last a life time, and can be used both for Kirke Fertilizer and Insecticide cartridges.

The cartridges that fit into the feeder are prepared from the highest grade of concentrated fertilizers, absolutely soluble and quick-acting. This combination will make plants grow and flourish, keep the grass green and the flowers in bloom.
