THE OLD RELIABLE SEED AND SUPPLY HOUSE THAT SAVES YOU MONEY

Let's Double It Again—Fall 1928

THE wonderful success our customers are having with the elegant Darwin Tulips and other hardy bulbs is gratifying to us. Our sales on Darwin Tulips during Fall 1927 was double that of 1926 and we have received hundreds of letters and photographs from satisfied customers.

It would be impossible to conceive anything more beautiful than a bed or border of our brilliant Darwin, Cottage, Rembrandt and Breeder Tulips, stately Hyacinths, graceful Jonquils and Daffodils and the meek little Crocus that bobs up before the snow is gone. Tell your neighbors, get them interested in beautifying your neighborhood—it pays.

Send your orders in early and help us double it again for 1928.

Indoor Culture

Bulbs intended for blooming during the Winter can be planted in pots, pans or boxes, and left in the open air, covered with a few inches of ashes or soil, until the earth begins to freeze, and then placed in a cool greenhouse, cellar or room, at a temperature of 50 degrees. They will need, occasionally, moderate watering after they are brought inside. Or the pots, pans or boxes may be placed at once, after potting, in a cool, dark cellar, watering well and cover the same as above. The whole success of pot culture depends upon getting the roots well established in the pots, at a low temperature of say 40 or 50 degrees, before you begin to force the tops at 60 degrees or over. After this the bloom is easily developed by giving light and water; and one can have a supply of flowers from Christmas until after Easter by regulating the time of bringing them to the light.

A leaflet giving full cultural instructions on planting and care of bulbs mailed free to customers who ask for it when ordering.

Outdoor Culture

Apply well rotted cow or sheep manure or bone meal; fresh manure is injurious to bulbs. The soil should be well drained. A small quantity of sand or coal ashes at the base of each bulb when planted in stiff soil will be beneficial. In planting, the bulbs should be placed from an inch to four inches below the surface, according to the size of the bulb. Cover the bulbs with soil one and one-half times their own depth. When the ground freezes the bed should be covered with three or four inches of leaves or litter, to be removed in early Spring. Too early and heavy covering starts the tops prematurely.

You will find all prices in this catalog very reasonable and we urge you to plant generously this Fall.

Five Grand Single Early Tulips

This class gives us the first bright flowers in Spring, usually blooming about the middle of April to the first of May. The uniformity of their height and their upright short stems make them very desirable for planting in beds, parkways and similar locations. They are particularly good for forcing and pot culture, blooming very early and of dwarf habit.

ARTUS. Bright scarlet, good forcer and bedder. 60c per doz.; \$4.00 per 100.

COTTAGE MAID. C. 9 in. Delicate rose, center of petals feathered white. 60c per doz.; \$5.00 per 100.

DUCHESS DE PARMA. C. 15 in. Very large fine flower of orange-scarlet, yellow edge. 65c per doz.; \$6.00 per 100.

KEIZERSKROON. Scarlet, edged with golden yellow; very large flowers. 75c per doz.; \$6.00 per 100.

YELLOW PRINCE. Golden yellow; one of the best yellows for forcing. 60c per doz.; \$4.00 per 100.

Mixed Early Flowering Single Tulips

ARCHIAS' SPECIAL MIXTURE. Made up from named sorts, proper proportions of bright colors, all blooming together and of uniform height; extra fine bulbs. 40c per doz.; \$2.75 per 100, postpaid.

Keizerskroon Tulips.

Rembrandt Tulips

An attractive class of late-flowering Tulips similar to the Darwins in season and habit, but distinct from that type in color and marking. A variety that will become very popular when better known. The blooms are either striped, feathered or blotched. Same culture as the Darwins.

MIXED REMBRANDT TULIPS. A splendid mixture of all colors. 60c per doz.; \$4.00 per 100.

Breeder Tulip,
Bronze Queen.

Old Dutch Breeder Tulips

The Darwin's greatest rival. As tall and stately as that superb variety, and the most popular of all late Tulips today.

Their wonderful color combinations in harmonious blendings of purple and bronze, yellow and bronze, gray and lilac, old-gold and maroon, and buff tones, justly reward the admiration of every flower lover. While they are late to bloom, they surpass the Darwins in size and brilliancy of color. The flowers are excellent for cutting, many of them are elegantly sweet scented.

BRONZE QUEEN. Large, strong flower, purplish fawn, interior buff-yellow, bright lemon-chrome base. 85c per doz.; \$6.00 per 100.

CARDINAL MANNING. Dark rosy violet, changing to an almost pure orange at the extreme edges of the petals. 85c per doz.; \$6.00 per 100.

LORD BYRON. Very large perfect flower of rich purplish-red. 85c per doz.; \$6.00 per 100.

YELLOW PERFECTION. Light bronze-yellow, edged golden. 85c per doz.; \$6.00 per 100.

MIXED BREEDER TULIPS. Made up from above varieties. 75c per doz.; \$5.50 per 100.

Archias' Mammoth Named Crocus

These are larger and stronger bulbs than the mixtures and produce correspondingly finer flowers.

PRINCE ALBERT. Dark blue. 30c per doz.; \$2.00 per 100, postpaid.

CLOTH OF GOLD. Gold striped. 30c per doz.; \$2.00 per 100, postpaid.

SIR WALTER SCOTT. White striped. 30c per doz.; \$2.00 per 100, postpaid.

MONT BLANC. Large white. 30c per doz.; \$2.00 per 100, postpaid.

Crocus, the Harbingers of Spring.

Archias' Superfine Bedding Hyacinths

These are selected named sorts, grown in Holland, best adapted for beds and borders in the garden or for florists' greenhouse forcing for cut flowers and are of such superior quality as to be used in immense quantities for both purposes. Especially desirable where a grand display is desired at a low cost. If you wish bulbs for house culture and pots, we would strongly advise you to use the named sorts as the individual spikes will be larger and more perfect.

Dutch Miniature Hyacinths for Forcing

This superb form of Hyacinth has been neglected for a long time, because their beauty and ease of culture as pot plants is not generally known. They are, as the name implies, miniatures of the large exhibition sorts with spikes 3 to 5 inches long and nicely formed. A 7- or 8-inch pot with 9 or 10 of these bulbs in full bloom is indeed a thing of beauty. Plant same as the exhibition sorts, set away in a cool dark place for about 14 weeks and bring into bloom in a cool room. The following sorts have proven best in our trials.

Narcissi or Daffodils

This year, after having made careful check tests of bulbs from all the principal growing sections in this country, we are able to offer a strain of Narcissus second only to the highest pre-embargo quality.

Plant bulbs so that they are covered by 1½ times their own depth in a position where they need not be disturbed and where the leaves may be left to turn brown before cutting off. If planted in the lawn or shrubbery border, no Winter protection will be necessary.

Archias' Berry Plants for Quick Returns

Hardy, Vigorous, Thrifty Plants That Pay Big Profits

Latham Raspberry

(Minnesota No. 4).

Yields Twice as Much as Other Red Raspberries

Here is a new red Raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have spread with its planting throughout the middle and eastern states. The high yielding ability of the Latham is due largely to its resistance to Mosaic and other Red Raspberry diseases; wherever tried, reports have been most favorable. It possesses the hardiness of "King" and produces very strong, vigorous, thornless canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations. We have a fine stock of this splendid new variety and hope you will give it a thorough trial, as we are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. Each, 15c; 3 for 40c; 12 for \$1.00; 25 for \$1.65; 100 for \$4.50, postpaid.

Glass Cloth

In many ways superior to glass for hotbeds, cold frames, chicken houses, scratch sheds, for covering window openings and for making a screen porch into a sun parlor.

It is much cheaper than glass. Lighter to handle. Does not break. Is almost as transparent as glass. Does not burn the plants in a hotbed and lets through more of the beneficial ultra-violet rays than does glass.

The cloth is a medium weight white muslin treated with a special preparation which makes it water-proof, translucent, weather-proof and long lived. It comes in one width only, 36 inches or a trifle less, and in standard size bolt of 15 yards. Can also be had in 6-yard and 10-yard bolts. Try to order these regular sizes if possible.

Special Prices—Glass Cloth

15-yard bolt (135 sq. feet) postpaid \$5.00
10-yard bolt (90 sq. feet) postpaid 3.50
6-yard bolt (64 feet) postpaid 2.25

This figures out less than 4c per square foot in full bolts, or one-fourth to one-eighth the cost of glass.
