**GLADIOLI
OF
DISTINCTION**

Goldedge Gladiolus Gardens
34 Sumner Street
North Attleboro, Mass.

CULTURE DIRECTIONS

Plant in any garden soil, away from the shade of trees or buildings, four to six inches deep, about four to six inches between each bulb in the row, and twelve to twenty inches between the rows.

Use sheep manure or bone meal well mixed with the soil when planting the bulbs. Keep the top soil loose around the plants and free from weeds.

When the first flower opens on the flower spike, cut on a slant with a sharp knife, leaving four or five leaves to mature the bulb. When cut in this manner and given fresh water daily, the blooms will last for ten days.

Dig the bulbs in the fall. Cut the tops off close to the bulb and dry for two weeks before storing in a dry, frost proof cellar where a temperature of about 42 degrees can be maintained.

DIRECTIONS FOR ORDERING AND TERMS

Bulbs will be shipped postpaid to all points in the United States. Orders will be accepted for as low as fifty cents.

On orders of five dollars or more we will accept twenty-five per cent with the order and the balance to be paid before the delivery of bulbs. Orders not fully paid on April 1st will be sent C.O.D.

All stock offered subject to prior sale.

We advise you to order early, as all stocks are not of the same size.

We consider bulbs one and one-quarter inches and up good blooming size. If by any chance you should receive stock not true to name, we will consider it a favor if you will notify us at once, and we will replace it two for one. We wish to have our customers satisfied and will make every effort to keep them so.

Remittance must accompany all orders, and should be made payable to John H. Paton, 34 Sumner Street, North Attleborough, Mass.

Won by Goldedge Gladiolus Gardens at the annual exhibition of the North Attleborough Garden Club, Aug. 22, 1925.

This year we again won this trophy for the best display at their exhibition.

GREETINGS FOR 1927

It is with real pleasure that we greet you with our new catalog for 1927 for it offers to our customers, old and new, a splendid list of modern gladiolus.

This year we have moved to our new location at 34 Sumner Street where we have greatly enlarged quarters for storing our bulbs, as well as keeping them in the very best condition through the winter.

Again this season, we feature the introductions of Mr. L. Merton Gage whom we consider one of the leading hybridists in New England.

Quoting from Mr. Montague Chamberlain's article in the Garden Magazine (October number 1923) Mr. Chamberlain says, in part, "Gage is another of our most skillful hybridizers. He has already produced a number of exceptional quality, though he has not yet offered many of them to the public, for he will offer none but those which he decides are of real merit after several years of trial and Gage is rather conservative. Not that I blame him for that—there are too many inferior sorts thrust on the market and growers should combine to prevent their increase."

Mr. Chamberlain is a man of wide experience with this flower and when he says Gage is a skillful hybridizer, it means something, for Mr. Chamberlain certainly knows the Gladiolus.

Mr. Gage's introductions are given a very high rating by the eminent Mr. Charles E. Gersdorff, who is considered the highest authority on this flower in the United States.

By all means try some of his varieties, they are sure to please you.

At the annual Gladiolus Exhibition of the North Attleboro Garden Club, held August 29, 1926, we again won the silver cup for the Best General Display against the keenest kind of competition, it being the second consecutive year we have won this trophy.

Also in the Seedling class at the same show, we had the honor of winning second and third prizes, our seedlings being in competition with one of the most famous hybridizers in New England.

Perhaps it might be well to call your attention at this time to the first three of our own introductions listed on page which we are to disseminate in 1928.

We feel sure that when you grow them, they will meet with your approval.

Finally we wish to thank our many friends for their generous patronage this past season, which was by far the most successful we have yet enjoyed and to assure you again of our hope to continue to supply you with Gladiolus of Distinction.

With best wishes for a very Happy and Prosperous New Year.

GOLDEDGE GLADIOLUS GARDENS.

INTRODUCTIONS OF GOLDEDGE GLADIOLUS GARDENS.

The following three beautiful novelties will be ready for distribution in 1928. Orders will be booked now for shipment in the Fall of 1927. Positively none sold this season and only one of each to a customer.

|--|------------------------|
| GOOD HOPE | Each
\$1.00 |
| <p>Splendid spike of snow white flowers, 5 inches in diameter with intense blotch of Armaranth Purple on the three lower petals. Entirely different from any variety now on the market. This past season when all other whites in our garden "flaked," Good Hope has been white as snow.</p> | |
| CREAM BEAUTY | 50c |
| <p>Erect stem of very delicate sea foam yellow, a trifle deeper in the throat, very lightly pencilled with pale hortense violet. Winner of 2nd prize in the seedling class in 1925.</p> | |
| LADYBIRD | Each
50c |
| <p>Very tall graceful spike of rich rose doree with white lip and just a faint trace of sulphur yellow. The throat is overlaid with beautiful feathering of carmine. Winner of the American Gladiolus Society's trophy for the best seedling, North Attleboro Garden Club, 1925.</p> | |

GLADIOLUS MAURICE FULD

Rich rose doree with a blotch of tyrian rose
on a pure white throat.

Rated at 95 by Charles E. Gersdorff.

Introductions of Mr. L. Merton Gage

- | | |
|--|-------------|
| ALMA GLUCK | Each
15c |
| The new sensational peach red primulinus, a beauty in every respect. | |
| AFRICA | 35c |
| Pomegranite purple with a blotch of bordeaux, having the effect of being black, from which emanates a white stripe or point. | |
| BRONZE BEAUTY | 75c |
| The ground color of this beautiful prim hybrid is colonial buff, but it is so densely marked with fine hair lines of old rose as to give the flower a remarkable light bronze tone, a distinctively new color in gladioli. | |
| CYNTHIA GLOUGH | 35c |
| A geranium pink, three lower petals scarlet red with a white line running through the center of each. | |
| MAURICE FULD | \$1.00 |
| One of the finest gladioli ever sent out, a giant flower of wonderful substance and great beauty, rich rose doree with a blotch of tyrian rose on a pure white throat. | |
| MAJORIE GAGE | 25c |
| Clear white with a blotch of fiery scarlet, a beautiful variety of the "Pendleton" type and one of our favorites. | |
| MR. FRANK MORTON | 25c |
| A very beautiful fancy variety. White, the tips of each petal splashed with geranium pink, bearing a patch of pomegranite purple on a yellow throat. | |

GAGE INTRODUCTIONS FOR 1927

DR. JOHN A. D. MILLS **\$1.00**

White, edged with rose pink with blotches of rose red on the three lower petals. Very tall spike of eight or more flowers open at the same time. Similar to, but much better than "Mrs. Frank Morton." Keeps a long time after cutting.

KATHERINE GAGE Each
25c

White, tinted amaranth pink, striped with rose and fine speckled with rhodamite purple in the throat.

WM. R. TUCKER **50c**

Scarlet, shading to nopal red with a purple edge. Creamy throat flecked with carmine. Quite unusual color combination but a very handsome gladiolus.

MOLLY BURNHAM **\$2.00**

This is a very large white flower with deep pink throat markings, something of the style of Mrs. Richard Lohrman. The original (grown from the first bulb), bulb flowered for the fourth time last summer, and although it had borne seed for three years, the spike and flowers were fine as ever. A very beautiful Glad. One bulb to a customer.
