**NEW. BUILDING FOR
COOLANGATTA**

**Block Of Shops,
Arcade & Dance Hall**

THE "Jazzland" dance palais, well-known to many North Coast visitors to Coolangatta, is being replaced by a modern block of shops, arcade and new dance hall. Work on the building is already well advanced, and will be completed before the Christmas holiday season.

Situated in the heart of Coolangatta, the new premises will cater for the large crowds which congregate for the holiday season. The dance palais has been re-built and increased in size to make one of the largest halls of its kind in Queensland. It measures 114 feet in length by 66 feet wide and contains retiring rooms for both sexes, cloak rooms, large state and orchestra room, crush space and foyer.

Entrance Through Arcade

The hall has been set back from the street, access being gained through an arcade 38 feet by 14 feet flanked by shops with continuous plate glass frontages. The hall is being carried out in

by clerestory windows above the annexe. All joinery has been kept plain, doors being of flush-sheeted "Masonite" and the furniture of chrome. For catering, a spacious kitchen, with modern appliances, has been provided, and the hall may be divided into sections for letting for small parties, card afternoons or other social functions.

The general design of the hall and approaches provides for a motion picture theatre, if such is required, with a seating capacity of about 1800 persons.

Four Shops

The street block includes four shops 40 feet deep carried out in cream Brisbane bricks. Two of the shops

**DISCUSS
ELECTRICITY
PROBLEMS**

Lismore Municipal Council's electrical engineer (Mr. E. W. Thorncroft) will be asked to discuss problems affecting electrical contractors in an address to the North Coast Master Builders' Association on Monday November 13.

This was decided after electrical contractors had referred to problems at a meeting of the association in Lismore on Monday night.

It is desired that all members and associates interested in electricity in building construction will make a special effort to attend.

In pursuance of the association's policy, it was left in the hands of Mr. Wagner to endeavour to arrange a meeting of the organisation at Casino in the near future.

Those present at the meeting were Messrs. W. Hughes (president), H. W. Stevenson, J. MacKinnon, W. Wagner, P. C. Parker, W. Marsden, P. Wunderlich, J. Martin, W. E. Weaver, W. H. Larsson, E. Downs, A. K. Barnes, V. Gaggin.

FOR SEASIDE RESORT

severe modern design, with walls faced with "Masonite" flush-jointed with horizontal beading, and plaster enrichment to the ceilings of the seating annexes, cloak rooms and toilets. The ceiling to the hall proper has banded "Tentest" and open ornamental grilles for ventilation, the lighting being kept flush with the ceiling. Auxiliary lighting includes inverted cones applied to the structural columns of the hall and capable of two-colour combination control, giving the effect of nollow supports.

SPECIAL FLOOR

The dance floor is of special design, being supported on brick foundations insulated on rubber pads and faced with teak kiln-dried and sanded flooring.

Ventilation has been carefully attended to by the inclusion of special opening Venetian shutters of ornamental design, while light is gained

front the arcade leading to the hall. The arcade is finished in cream tiled floors and tiled walls. Large sets of plate glass swing doors lead from the arcade to the foyer. Ticket boxes are recessed flush with the walls and are constructed in such a manner as to allow large crowds to be handled in a short time.

Externally, the premises are being finished in cream brick recessed joints, cream tiled shop fronts, stainless steel moulds, and large raised block letters denoting the names of the premises. The total cost of the building is about £4500.

The main feature of the building when viewed from the main street of Coolangatta is the large unbroken expanse of plate glass to the frontage, the largest clear span being 33 feet long.

The owner of the premises, Mr. R. Sutton (Coolangatta), is to be com-

mended for his enterprise. The designers and supervisors of the building are Messrs. F. J. Board and Son, A.R.I.B.A., architects and consultants (Lismore), and the contractor is Mr. J. Sutton (Murwillumbah).

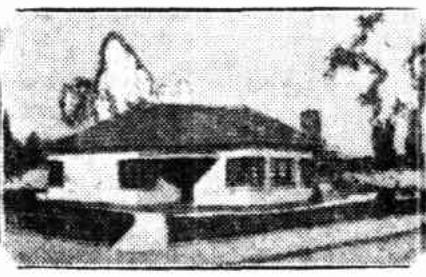

H. G. F. Petersen, D. Mitchell, W. A. Nott, M. Mulroy, K. Poole, P. McGeary, and the secretary (Mr. T. B. Osborne).
