## P R E F A C E.

---

WHILE this book is intended primarily for students of Romance Philology, it will, I hope, be of some interest to Classical scholars as well. Although it has been long in the making, I have endeavored to keep it, at every stage, abreast of current scholarship. I have tried, furthermore, to treat all portions of the subject, not exhaustively, but with even fulness; I fear, however, that the Syntax—perhaps unavoidably—is somewhat scanty as compared with the other parts. It will be seen that I have continually furnished abundant references for the guidance of those who wish to look further into special topics. My principal authorities are listed in the Bibliography; others are cited in the appropriate places in the text.

C. H. GRANDGENT.

## TABLE OF CONTENTS.

	PAGES
MAPS . . . . .	x, xi
THE ROMAN EMPIRE . . . . .	x
THE NEO-LATIN TERRITORY IN EUROPE . . . . .	xi
BIBLIOGRAPHY, WITH ABBREVIATIONS . . . . .	xiii-xvi
PHONETIC ALPHABET AND OTHER SYMBOLS . . . . .	xvii
INTRODUCTION . . . . .	1-5
VOCABULARY . . . . .	6-29
WORDS AND THEIR MEANINGS . . . . .	6-12
<i>Words used alike in Classic and in Vulgar Latin</i> . . . . .	6
<i>Words used differently in Classic and in Vulgar Latin</i> . . . . .	7-8
Sense Restricted . . . . .	7
Sense Extended . . . . .	7-8
<i>Words used in Classic but not in Vulgar Latin</i> . . . . .	8-9
Synonyms . . . . .	9
Substitutes . . . . .	9-10
Particles . . . . .	10
<i>Words used in Vulgar but not in Classic Latin</i> . . . . .	10-12

# PHONETIC ALPHABET

## AND OTHER SYMBOLS.

---

$\beta$  = bilabial *v*, the sound of Spanish *v* and *b*.

$\eth$  = the sound of *th* in English *this*.

$\jmath$  = the sound of *e* in French *me*.

$\eta$  = the sound of *ng* in English *long*.

$\ddot{o}$  = rounded *e*, the sound of German *ö*.

$\mathfrak{p}$  = the sound of *th* in English *thin*.

$\ddot{u}$  = rounded *i*, the sound of German *ü*.

$\chi$  = the sound of *ch* in German *ach*.

• (a dot) under a vowel letter shows that the vowel is close.

⏟ (a hook) under a vowel letter shows that the vowel is open.

⤿ (a semicircle) under a vowel letter shows that the vowel is not syllabic.

ⵀ (an acute accent) after a consonant letter shows that the consonant is palatal.

\* (an asterisk) before a word shows that the form is conjectural, not attested.

> indicates derivation, the *source* standing at the *open* end of the figure, whichever way it be turned.

SMALL CAPITALS mean that the forms so printed occur in inscriptions (but this indication is used only when for some special reason it seems desirable).

The other marks and abbreviations employed are so generally accepted as to need no explanation.

## AN INTRODUCTION TO VULGAR LATIN.

---

I. The extent of the Roman Empire is shown by the map on p. x. Throughout this territory the official language was Latin, originally the speech of Latium, a little district on the Tiber. The Latin tongue was thus extended to many peoples, representing different races, civilizations, and linguistic habits. In central Italy it was adopted by Etruscans and by various Italic tribes, in northern Italy by Ligurians, Celts, and Illyrians, in southeastern and southwestern Italy respectively by Illyrians and Greeks; beyond the peninsula it spread among Iberians, Ligurians, Celts, Aquitanians, Semites, Germanic tribes, and others still. The Latinization of these peoples was the work of several centuries<sup>1</sup>: by 272 B. C. all Italy was subdued south of the Macra and the Rubicon; Sicily became a province in 241, Sardinia and Corsica in 238; Venetia cast her lot with Rome in 215; Spain was made a province in 197; Illyria was absorbed after 167, Africa after the fall of Carthage in 146, southern Gaul in 120; the Cimbri and Teutones were destroyed in 102-1; northern Gaul was a province in 50, Rætia in 15; Dacia was colonized in 107 A. D., forsaken in the third century, and quite cut off from the rest of the Latin-speaking world in the sixth. The Latin language never gained a foothold in Greece; political changes drove it from Great Britain, the Orient, and Africa; in the rest of the Empire it has remained, for the most part,

---

<sup>1</sup> See Mohl, *Chronologie*; also Meyer-Lübke, *Lat. Spr.*, pp. 451-455.

until the present day, and has been carried thence to America, Africa, and Asia. The map on p. xi marks the parts of Europe where Latin in its modern forms is now spoken.

2. The Latin tongue, like every living language, has always been in an unstable condition. The evidence of inscriptions and of grammarians indicates that from the beginning to the end of Roman history speech was constantly changing, the alteration being most rapid in the earliest and the latest periods. Furthermore, there were at all times, but especially before the Social War, considerable local divergences. The Latin-speaking peoples were not homogeneous, and their speech reflected their varied origin. In Italy the language of Latium was adopted by tribes using, in the main, kindred languages. At first there was sturdy resistance; until the conflict of 90-89 B. C. all southern Italy was under Oscan influence, and Oscan was used in inscriptions until the first century of our era.<sup>1</sup> When Latin conquered, it blended more or less with the native idioms; the resulting geographical discrepancies are manifest in early monuments. The Social War, however, had a levelling effect, and speech in Italy became more uniform; but there doubtless were still noticeable differences in pronunciation and even in vocabulary.<sup>2</sup> In the outlying provinces, and to some degree in the peninsula, Latin was simply substituted for foreign tongues, and there was little or no mixture; nevertheless a few native words were kept, and there must have been a variety of accent. It should be remembered, moreover, that the language carried

---

<sup>1</sup> See *Chronologie* 133 and 116-120. Oscan forms are *ligud* for *lēge*, *pru* for *pro*, *ni* for *nē*, etc.

<sup>2</sup> The S. Italian *nn* for *nd*, *i* for *ē*, and *u* for *ō* may be Oscan. *Pomex*, *ēlex* for *pūmex*, *īlex* are perhaps Umbrian: *Lat. Spr.* 445, 464. The Italian word *zavorra* is possibly Etruscan: *Chronologie* 98-99.

to the several provinces was not identical: it represented different chronological stages and different local dialects of Italic Latin; the earlier acquisitions received a more popular, the later colonies a more official speech. Administration and military service tended to obliterate distinctions; under the Empire the variations probably came to be no greater than those now to be found in the English of the British Empire. We may say in general that the Roman territory, excepting Greece and the East, was completely Latinized by the fourth century after Christ.

3. With the beginnings of culture and literature there came inevitably a divergence between the language of the upper and that of the lower classes, and also between city and country speech. Literary influence is conservative and refining, while popular usage tends to quick change. In late Republican and early Imperial times educated speech became highly artificial, drawing away from the everyday language; on the other hand, the common idiom, throughout the Republic and the Empire, was constantly developing away from the archaic standard of elegant parlance. What we call Vulgar Latin is the speech of the middle classes, as it grew out of early Classic Latin. It is not an independent offshoot of Old Latin: it continues the Classic, not the primitive, vowel system.<sup>1</sup> Neither is it the dialect of the slums or of the fields: grammarians tell us of not a few urban and rustic vulgarisms that are not perpetuated in the Romance tongues. It is distinct from the consciously polite utterance of cultivated society, from the brogue of the country, and from the slang of the lowest quarters of the city, though affected by all of these.<sup>2</sup> Vulgar Latin naturally developed differently in

<sup>1</sup>Cf. *Lat. Spr.* 463-464.

<sup>2</sup>Cf. Cooper XV-XXX.

various localities, as far as the levelling influence of school and army permitted; the universal inclination of language to diverge was reinforced by the original habits of the diverse speakers and by such peculiarities of native accent as had survived.<sup>1</sup> The differentiation progressed, being accelerated when schools decayed and the military organization was broken, until the dialects of distant localities became mutually unintelligible. At this point we may say that Vulgar Latin stops and the Romance languages begin. Although any definite date must be arbitrary, we may put it, roughly speaking, in the sixth or seventh century of our era. The Vulgar Latin period lasts, then, from about 200 B. C. to about 600 A. D.; it is most sharply differentiated from Classic Latin in the last few centuries of this epoch.<sup>2</sup>

4. If we compare Classic and Vulgar Latin, we shall see that the latter was always tending to become more flexible and more explicit. We note an enormous development of modifying and determining words, such as articles and prepositions, and an abundant use of prefixes and suffixes. We find also a great simplification of inflections, due partly to phonetic but mainly to syntactic causes. Furthermore, we observe certain changes in pronunciation, some of which can be ascribed to an inclination to discard those parts of words that are not necessary for their identification (as when *viridis*, *vetulus* become *viridis*, *veclus*), some to a tendency to assimilate unlike adjacent sounds (so *ipse* is spoken *isse*, and the diphthong *ai* is reduced to *e*), some to a desire for differentiation (which lowers *i* to *e* to make it more remote from *i*), some to unknown reasons. Why, for instance, *ai* almost

<sup>1</sup>Cf. Sittl and Hammer; Pirson and Carnoy; also, for African Latin, B. Kübler in *Archiv* VIII, 161.

<sup>2</sup>For a history of the Latin language, see *Lat. Spr.* 492-497.

universally became e, while au did not in Latin generally become o, is a problem as yet unsolved.

5. Our sources of information<sup>1</sup> concerning the current spoken Latin are: the statements of grammarians<sup>2</sup>; the non-Classic forms occurring in inscriptions and early manuscripts<sup>3</sup>; the occasional lapses in cultivated authors, early and late; a few texts written by persons of scanty education; some glossaries and lists of incorrect forms; and, most important of all, the subsequent developments of the Romance languages.<sup>4</sup> All of these are to be used with caution. Of especial value are the *Peregrinatio ad loca sancta*, a considerable fragment of a description of travel in the East, by an uneducated woman (probably a Spanish nun) of the latter part of the fourth century<sup>5</sup>; the *Appendix Probi*, a list of good and bad spellings, possibly as early as the third century<sup>6</sup>; the so-called *Glossary of Reichenau*, made in France in the eighth century.<sup>7</sup> There is an interesting collection of spells by A. Audollent, — *Defixionum Tabellæ*, 1904.

<sup>1</sup> Cf. Meyer-Lübke, *Lat. Spr.* 455-461; G. Gröber, *Sprachquellen und Wortquellen des lateinischen Wörterbuchs* in *Archiv* I, 35.

<sup>2</sup> Utilized by E. Seelmann, *Aussprache des Latein*, 1885. For a brief account of the Latin grammarians, see Stolz, 55-67.

<sup>3</sup> Used by H. Schuchardt, *Vokalismus des Vulgärlateins*, 1866-68.

<sup>4</sup> For the chronology of developments, the distinction of learned and popular words, and the establishment of unattested Vulgar Latin words, see G. Gröber, in *Archiv* I, 204 ff., and VII, 25 ff.

# I. VOCABULARY.<sup>1</sup>

## A. WORDS AND THEIR MEANINGS.

6. It is natural that the speech of the literary and fashionable classes should differ from that of the common people; so it is in all civilized communities. Literature inclines to extend the senses of words, popular use tends to restrict them. The polite language, too, has many poetic figures and many abstract terms unknown to the crowd. On the other hand, the vulgar idiom has homely metaphors of its own and numerous specific, technical words not found in literature.

### 1. WORDS USED ALIKE IN CLASSIC AND VULGAR LATIN.

7. This class includes a great mass of words, forming, so to speak, the nucleus of the language. Examples are: *canis, filius, mater, panis, pater, puteus, vacca; altus, bonus, longus, viridis; amare, audire, dicere, vendere; bene, male; quando, si; in.*

---

<sup>1</sup> See Densusianu, 185-203; W. Heræus, *Die römische Soldatensprache in Archiv XII*, 255, *Die Sprache der römischen Kinderstube in Archiv XIII*, 149. For an approximately complete vocabulary, reconstructed out of Romance words, see G. Körting, *Lateinisch-romanisches Wörterbuch*, 1901. For a thorough discussion of reconstructed forms, see G. Gröber, *Vulgärlateinische Substrate romanischer Wörter in Archiv*: I, 233 ff. (*abbreviare*—*buttis*), 539 ff. (*caccubus*—*curbus*); II, 100 ff. (*damnum*—*dui*), 276 ff. (*eber*—*fiticum*), 424 ff. (*flagrare*—*gutta*); III, 138 ff. (*hædus*—*ilicem*), 264 ff. (*ille*—*lamna*), 507 ff. (*lacusta*—*mille*); IV, 116 ff. (*minacie*—*nutrire*), 422 ff. (*obedire*—*putidus*); V, 125 ff. (*quadraginta*—*rasculare*), 234 ff. (*reburrus*—*runcare*), 453 ff. (*sabanum*—*suus*); VI, 117 ff. (*tabanus*—*zirulare*), 377 ff. (supplement.)

## 2. WORDS USED DIFFERENTLY IN CLASSIC AND IN VULGAR LATIN.

8. Very many Classic words are used in Vulgar Latin with a different sense: *comparare* = 'buy', *focus* = 'fire', *paganus* = 'pagan', *viaticum* = 'journey'. *Capit* assumed the meaning of *feri potest*: R. 351-352, *non capit prophetam perire*, etc.; Hoppe 48, *hæc æstimare non capit, non capit utique videri Deus*.

Most of the examples can be classified under the heads of restriction or extension of meaning.

### a. SENSE RESTRICTED.

9. This happens frequently, a word assuming a more definite or concrete signification: (*cognatus*) = 'brother-in-law'; *collocare* = 'put to bed' (*se collocare* = 'go to bed', Bon. 286); *dominicus* = *divinus*; *ingenium* = 'trick', Bon. 283; *lectio* = 'text'; *machinari* = 'grind'; *mulier* = 'wife'; *necare* = 'drown', Bon. 286, Dubois 220; *orbis* = 'blind'; *tractatus* = 'treatise'.

Many words kept their literal but lost their metaphorical sense: *captio* = 'act of taking', G. 243, not 'sophism' nor 'deceit'; *robur* = 'oak', not 'strength', 'authority', nor 'best part'.

### b. SENSE EXTENDED.<sup>1</sup>

10. The general use of a word in an extended sense is not common, but there are some examples: *fortis* = 'strong' in all senses, Bayard 105; *infans* = 'child', Pirson 257-258; *parentes* = 'relatives', Pirson 260-262; *se plicare* = 'go', *Per.* 46, 11, etc.; *villa* = 'town', G. 272.

Many words, however, assume a new meaning in addition to the old one: *ambulare* = 'march', *Archiv* XII, 269-270, Bechtel 137, etc., and also 'continue', Regnier 24, perhaps

<sup>1</sup> Cf. Bayard 63-202, Bon. 235-328, Dubois 185-225, Quillacq 54-79.

'go'; *debere* indicates moral obligation, G. 418; *facere* = 'pass (time)', Regnier 27 (*quadraginta dies fecit*), *Per.* 66, 11, etc.; *fascia* means a measure of land, Pirson 255; *habet* is used like the French *il y a*, G. 422 (*in arca Noe . . . habuit serpentes*), Regnier 29 (*in carne paucas habet virgines sanctimoniales*), Bechtel 127 (*habebat de eo loco forsitan quattuor milia*, etc.), *Per.* 37, 13, etc.; *homo* has the sense of French *on*, Regnier 20, Dubois 218; *ille* = 'the' and 'he', Bechtel 144, Bon. 258 ff.; *populus minutus* = 'common people', Waters Ch. 44; *replicare* = 'reply', Dubois, 204; *res* is used of persons, Waters Ch. 58 (*bella res*); *satis* = 'much', Bayard 83, *Per.* 38, 25, etc.; *unus* = 'a', Bechtel 144; *virtutes* = 'miracles' (in imitation of the Greek), Bayard 94.

So various prepositions and conjunctions (as *ad*, *apud*, *cum*, *de*, *per*, and *quasi*, *quia*, *quod*, *quomodo*) assumed new functions. *Unde* came to mean 'and so', Bon. 328.

### 3. WORDS USED IN CLASSIC BUT NOT IN VULGAR LATIN.

II. Numerous Classic Latin words either were not employed at all in the vulgar speech or went out of use before the earliest monuments of the Romance languages: so *funus*, *jubere*, *proles*. Very many adverbs and conjunctions disappeared: *an*, *at*, *autem*, *diu*, *donec*, *enim*, *ergo*, *etiam*, *haud*, *igitur*, *ita*, *nam*, *postquam*, *quidem*, *quin*, *quippe*, *quoad*, *quoque*, *saltem*, *sed*, *sive*, *ut*, *utrum*, *vel*, etc.; *tamen* must have been moribund, although it is common in the *Peregrinatio*. Poetic terms and some abstract nouns were not needed: *aurora*, *frondifer*, *horrescere*, *fletus*. Ecclesiastical Latin, to be sure, is very rich in abstract nouns (G. 391-397, Dubois 301-308), but most of them are new formations. When lost terms were needed for literary or other purposes, they were either bor-

rowed from Classic or clerical Latin (as *nobilis*) or replaced by new constructions (as \**carrica* for *onus*).

#### a. SYNONYMS.

12. When Latin had two words nearly synonymous, one often crowded out the other: *atrium* gave way to *cors*; *cur* to *quare*; *equus* to *caballus*, R. 472; *ferre* to *portare*, Dubois 220; *ludus* to *jocus*; *magnus* to *grandis*; *os* to *bucca*, R. 472; *parentes* to *genitores*, Olcott XXV; *senex* to *vetulus*.

Sometimes the survivor was far from a synonym in Classic Latin: *discere* was displaced by *apprendere*; *domus* by *casa*, *mansio*, *hospitale*<sup>1</sup>; *emere* by *comparare*; *humerus* by *spatula*, R. 324; *ignis* by *focus*, R. 313; *nunc* by *hora*; *omnes* by *toti*, R. 338; *quot, tot* by *quanti, tanti*, R. 336, 337; *urbs* by *civitas*, Dubois 209, and by *villa*, G. 272.

#### b. SUBSTITUTES.

13. Sometimes a term was replaced by a word not found in Classic Latin at all: *anser* was driven out by \**auca* (< \**avica*, diminutive of *avis*); *noverca* by \**matraster*; *privignus* by \**filiaster*; *vitricus* by *patraster*. Occasionally the substitute was apparently a slang word: *aliquis* yielded in part to *res nata*, R. 345; *caput* to *testa*<sup>2</sup>; *crus* gave way to *gamba*; *edere* in the main to *manducare*, Bechtel 140; *gena* to *gabata*.

Some words were replaced by diminutives, some nouns by derivative adjectives: *avis* by *aucellus*; *avus* by \**aviolus*; *sol*

<sup>1</sup> According to Olcott XVIII, *casa* occurs only in Italian inscriptions, *mansio* (= 'dwelling') only in Roman. For *mansio*, cf. R. 472, Dubois 212. Among the Romance languages, Rumanian, Rætian, Italian, Spanish, Portuguese prefer *casa*, French and Provençal *mansio* and *hospitale*. Cf. Zauner 41-42.

<sup>2</sup> *Caput* (or rather \**capum*) is preserved by Rumanian, Rætian, Italian, Provençal, French; *testa* by Italian, Provençal, French; \**capitia* (< *caput*) by Spanish and Portuguese. Cf. Zauner 41-42.

in part by *\*soliculus*; *vetus* for most part by *vetulus*; *dies* largely by *diurnus*, *Gl. Reich.*; *hiems* by *hibernum*, R. 472; *mane* by *matutinum*. Diminutives were extremely common in late Latin: G. 121-130 (*cereolus*, *cuculla*, *schedula*, etc.), Olcott 250-263 (*gemelli*, *mammula* = 'grandmother', *naucella*, *neptilla*, etc.), Dubois 147 (*novellus*). Adjectives used as nouns were frequent also: R. 100-107 (*arida*, *infernus*, etc.), G. 108-121 (*brevis*, *credens*, *infernus*, etc.).

Occasionally, too, words were replaced by phrases: *diu* by *longum tempus* (Bon. 201, *paucum tempus* for *haud diu*); *ver* by *vernum tempus*, Bon. 203, and other phrases.

### c. PARTICLES.

14. Many prepositions, conjunctions, and adverbs were lost by substitution.

*Ab* was made unnecessary by *de* and *per*; *apud* was partially supplanted by *ad*; *cum*, in Gaul, yielded to *apud*; *ex* gave way to *de*, R. 395-396; *ob* to *pro* and *per*. *Pro*, doubtless under the influence of *per*, became *\*por*, which replaced *per* and *pro* in Spain and to a considerable extent in northern Gaul; southern Gaul, Italy, and Dacia preferred *per*. *Cis*, *erga*, *præ*, *propter* were displaced by other words.

The functions of *an*, *ne*, *utrum* were assumed by *si*; the place of *cum* was taken by *quando* and other conjunctions; *quando*, *quod*, *quoniam* were often replaced by *quomodo*, R. 403. *Autem*, *ergo*, *etiam*, *etsi*, *igitur*, *sed*, *tamen*, *ut* were ousted by various substitutes. Cf. Densusianu, 184-185.

### 4. WORDS USED IN VULGAR BUT NOT IN CLASSIC LATIN.

15. Vulgar Latin evidently had many words that do not appear in Classic texts. Some of these were probably old

native terms that do not happen to occur in the works preserved, some were late creations, some were borrowed from other languages.

#### a. NATIVE WORDS.

16. Some native words are rarely attested, although they were doubtless in common use: *amma*, *Archiv* XIII, 154; *atta*, *Archiv* XIII, 154; *baro* = 'athlete', *Waters* Ch. 53, Ch. 63; *battalia*, *Archiv* XII, 270-271; *branca*, *Densusianu* 196; *circare* = 'hunt', *Archiv* VIII, 186; *cloppus*, *Densusianu* 196; *drappus*, *Substrate* II, 106, Körting (found in the 7th century); *ficatum*, *Densusianu* 190; *gavia* (used by Pliny); *mamma*, *Archiv* XIII, 151-152; *nonna*, *nonnus*, *Archiv* XIII, 156-157; *pa(p)pa*, *Archiv* XIII, 158, Bayard 179 (applied by St. Cyprian to the bishop of Carthage); *pappus* = 'grandfather', *Pirson* 243; *serutinus*, *Audollent* 199; *tata*, *tatus*, *Pirson* 244, *Archiv* XIII, 151-153; *trepalium*, *Rom.* XVII, 421.

17. A few that must have existed are not attested at all: *\*refusare*, *Substrate* V, 234; *\*retina* = 'rein', *Substrate* V, 237; so not improbably the original of the Romance words meaning 'touch', and perhaps those of the words meaning 'find', 'gape', and 'go' (cf. § 405). Likewise words made by onomatopœa, as *\*miaulare*; cf. M. Grammont, *Onomatopées et mots expressifs* in *Revue des langues romanes* XLIV, 97.

Some of the unattested words were obviously late developments: *\*finis*, adj. (Fr., Pr. *fin*; It. *fine fino*), from the noun *fīnis* in such phrases as *honorum finis*, *pudoris finis*, etc. (so, e. g., *finis honoris* > *fins onors*, etc.), E. Herzog in *Bausteine* 484; *\*gentis*, adj. (Fr., Pr. *gent*, It. *gente*), apparently a cross between *genitus* and *gentilis*; *prode*, then m. and f. *\*prodis*, adj., detached from *prodest* (cf. *potis est* = *potest*, *Neue* II, 176-177), R. 468-469 (*quid enim prode est homini, sed non fuit prode illis, hoc enim prode fit vobis*, etc.).

18. Late Latin was rich in derivatives, some of popular creation, some made by Christian writers. According to Olcott XIX, African Latin was freest in word formation. This subject will be discussed at length in the following chapter, but a few examples may be given here: post-verbal *dolus* < *dolere*, Regnier VIII; \**abbellire*; \**ausare*; *carricare*, *Gl. Reich.*; *confessor* = 'martyr'; \**coraticum*; *dulcor*, \**dulcor* = 'sweetness'; *follia*; \**man(u)aria*; *modernus*, Dubois 144; \**nivicare*; \**soliculus*; *vict(u)alia*; \**vir(i)dura*.

#### b. FOREIGN WORDS.

19. A few Celtic terms were adopted, such as *alauda*, *vertragus*. More Germanic words (cf. *Gram.*, Introduction) found their way into Latin: *bannus*, Bon. 226; *hapja*; *haribergum*, *Gl. Reich.* (cf. *alberca*, Pirson 236); *haunjan*; *watan*; *wërra*.

We find a large number of Greek words, a few of them apparently borrowed by popular speech: *amygdalum*; *cata*, a distributive preposition, verging on the sense of 'every', R. 247 (*cata mane mane*), Bechtel 95 (*cata mansiones*, *cata pascha*), cf. § 71; *colaphus*; *dactylus*, Bon. 211; *sagma*. More came in through the Christian vocabulary: *angelus*; *baptizare*; *blasphemare*; etc. Some were introduced by fashionable society, which affected familiarity with Greek; there are many Greek words in Petronius: *hepatia*, Waters Ch. 66; *schema*, Waters Ch. 44.

Very many Greek terms used by ecclesiastical writers never became popular. Cf. G. 205–226: *anathema*, *prophetare*, *zelare*; numerous verbs in *-izare*, as *allegorizare*, *anathematizare*, *catechizare*, *colaphizare*, *evangelizare*, *eunuchizare*, *Judaizare*, *prophetizare*, *sabbatizare*, *scandalizare*, *thesaurizare*; and not a few new derivatives, as *baptizatio*, *diaconissa*, G. 225, 224.

## B. DERIVATION.

20. Vulgar Latin is very rich in derivatives and compounds; it has many affectionate diminutives, some of them made with new suffixes (as *-icca*, *-itta*).<sup>1</sup> Petronius shows a fondness for long derivatives, such as *gaudimonium* (Waters Ch. 61). Late writings almost all abound in abstract nouns (Cooper 1-2). In strictly Classic texts there appear to be no really living suffixes<sup>2</sup>; but the facility of word formation, which the literary language lost, popular speech preserved and increased.<sup>3</sup> This freedom of formation was abused by African authors, who were especially addicted to prepositional compounds with *con-*, *in-*, *sub-*, etc.<sup>4</sup> We shall consider first post-verbal nouns (i. e., substantives taken from the roots of verbs), then prefixes, next suffixes, and finally composite words.

### 1. POST-VERBAL NOUNS.

21. After the model of *cantus*—*cantare*, *saltus*—*saltare*, etc. (pairs in which the noun seems to come from the derivative verb, whereas in reality both come from a primitive verb, as *canere*, *salire*), a fictitious primitive noun was derived from a number of verbs in Vulgar Latin and in the Romance languages: so *dolus* from *dolere*, *Vok.* I, 35, 98, *Bon.* 367, *Regnier VII* (blamed by St. Augustine).

### 2. PREFIXES.<sup>5</sup>

#### a. PREFIXES USED WITH NOUNS, ADJECTIVES, AND PRONOUNS.

22. *Bis-* or *bi-* was used with some adjectives and apparently with a few nouns: *bimaritus*, G. 130; *bisacutus*, G. 170; *bisaccium*, Petronius.

<sup>1</sup> See *Gram.* II, 430-693; Densusiānu 156-173.

<sup>2</sup> Cooper XXXIV.

<sup>3</sup> Cooper XXX ff.

<sup>4</sup> Cooper XXXVI, XLVI, 246-247.

<sup>5</sup> Cooper 246-297.

23. *Ad-*, *con-*, *de-*, *dis-*, *ex-*, *in-*, *re-* and some others were occasionally used to form adjectives: \**adaptus*; *commixtius*, G. 160; *defamatus*; \**disfactus*; *exsūcus*; *inanimatus*; \**replēnus*. Cf. G. 160 ff.

24. *Ac-*, *atque-*, *ecce-*, *eccu-*, *met-* were used as demonstrative prefixes to pronominal adjectives and to adverbs. *Eccu-* is *eccum*, i.e., *ecce eum*; its origin being forgotten, it was used in late Vulgar Latin as a synonym of *ecce*. *Met-*, primarily a suffix, came to be used as a prefix through such combinations as *semet ipsum*, understood as *se metipsum*. In archaic writings such reinforced demonstratives as *eccum*, *eccam*, *eccos*, *eccas*, *ecca*, *eccillum*, *eccillam*, *éccillud*, *eccistam* are not uncommon; in Classic texts they are rare. Vulgar Latin examples are: *ac sic*; *atque ille*; *ecce hic*; \**eccu iste*; \**eccu sic*, *Substrate* VI, 385; *met ipse*. Cf. A. Köhler, *Die Partikel ecce* in *Archiv* V, 16. See §§ 65, 66.

#### b. PREFIXES USED WITH VERBS.

25. *Ad-*, *con-*, *de-*, *dis-*, *ex-*, *in-*, *re-* were freely used, *dis-* being mainly a Vulgar Latin prefix: *abbreviare*, G. 179; \**adcap(i)tare*; *adgeniculari*, R. 181; *adpretiare*, R. 181, G. 180; *adpropriare*, R. 181, G. 180; *adunare*, R. 182; *confortare*, R. 185, G. 181; \**cominitiare*; *complacere*, R. 184; *deaurare*, G. 182; \**disjejunare*; *exaltare*, G. 183; *excoriare*, G. 182; *impinguare*, G. 183; \**infurcare*; *recapitulare*, G. 185; \**requærere*. *Ad-*, *con-*, *de-* lost their special significance; *ad-* was particularly favored in Spain, *con-* in Italy. Cf. *Lat. Spr.* 487. Occasionally there was a change of prefix: *aspectare* was used with the sense of *expectare*, \**convitare* sometimes took the place of *invitare*; *dis-* was often substituted for *ex-*.

26. *Ab-*, *contra-*, *per-*, *sub-*, *super supra-*, *tra trans-* were

used occasionally: \**aboculare*; \**contrafacere*; \**perdonare*; *sub-audire*, G. 185; \**subcludere*; *subsannare*, R. 199, G. 187; *superabundare*, G. 187; \**super*-\**suprafacere*; \**trabucare*; \**transannare*; *transplantare*, G. 188.

27. *Extra*- was sometimes used in Italy and Dacia, *infra*- and *intra*- in Italy: \**extrabuccare*; \**infraponere*; \**intratenerere*.

28. *Abs*-, *e*-, *ob*-, *præ*-, *pre*-, *pro*-, *retro*- were apparently not used to form new verbs in the popular spoken language, although some of them are occasionally so employed by late writers: *opprobare*, G. 184; *prædestinare*, G. 184 (cf. Livy); *prolongare*, G. 184. *Ob*- is sometimes replaced by *ad*-: *obdormire* > *addormire*.

29. *Foris* and *minus* came to be used as prefixes in some regions: \**forisfacere*; \**minuscredere*. *Foris* was confounded in Gaul with the Frankish *fir*- (= *ver*-): *verstahen* = Old Fr. *forbatre*. See G. Baist, *Fränkisches fir- im ältesten Französischen in Romanische Forschungen XII*, 650; cf. *Rom. XXX*, 633. For this use of *minus*, compare the phrase *minus est = deest*, Regnier 109: *caritas in quantum adest . . . in quantum autem minus est*. Cf. § 245. †

30. Some verbs take a double prefix: *adimplere*; *coexcitare*, R. 207 (cf. Quintilian, *coexercitatus*); *deexacerbare*, R. 207; \**deexcitare*; \**exeligere*.

31. Recomposition, i.e., the restoration of the full form of the primitive verb, was a regular process in Vulgar Latin (cf. § 139): *aspargo* for *aspergo* is blamed by Velius Longus, Édon 127, and is used by St. Cyprian, Bayard 3; *commando* is, according to Velius Longus, the usual form, rather than *commendo*, S. 60, Édon 131; *consacrati* etc. occur in inscriptions, S. 60; *crededit*, Bon. 490; *reddedit*, Bon. 490; *retenere*, Bon. 489;

*tradedit*, Bon. 490. Cf. S. 58–64, Bon. 486–493. *Cómpūto*, *cólligo*, *cóllōco*, *cónsto*, *cónsūo*, *érigo*, *éxēo*, *ínflo*, *præsto* seem to have been regarded as simple verbs: S. 64.

32. Late writers were in the habit of restoring the full, primitive form of prefixes; but this was doubtless merely a matter of spelling, and did not indicate the common pronunciation. In Tertullian, Cyprian, and some others there is generally no assimilation of the prefix; other writers, such as Gregory of Tours, apparently used both assimilated and unassimilated forms. Bayard 12–15: *adpeterē*, *conpendium*, *inprobū*, *obfero*, *subplanto*. Bon. 178–188: *adtonitus*, *committēre*, *inlatus*, *obprimere*, *subcumbere*.

### 3. SUFFIXES.

#### a. SUFFIXES FOR VERBS.<sup>1</sup>

33. Verbs from nouns<sup>2</sup> generally end in *-are*; occasionally in *-iare* or *-ire*; sometimes in *-icare*, which was eventually supplanted in Italy and in Gaul by *-izare* (for pronunciation see § 339). This last ending came from Greek *-ίζω* through borrowed words, such as *baptizare*. For a list of Greek verbs in *-ίζω* adopted by Christian writers, see R. 248–249 (cf. § 19 above); some new formations were used, as *catechizare*. In early Latin this same ending appears as *-issare* (*atticisso*, *rhetorisso*): see A. Funck, *Die Verba auf issare und izare* in *Archiv* III, 398.

Examples: *oculare*; *pectinare*; *plantare*; *potionare*; \**trepaliare*; — *plagiare*; — *ignire*; — *carricare*; *follicare*; \**nivicare*; — \**dom'nizare*; \**werrizare*.

<sup>1</sup>Cf. Cooper 205–245, Dubois 151–162, Quillaçq 41–46, Bonnet 471–474.

<sup>2</sup>Cf. R. 154–162.

34. Verbs from adjectives and perfect participles end in *-are*, *-iare*, *-ire*; also in *-icare* (cf. *albicare*), *-itare* (cf. *debilitare*, *visitare*), *-escere* and *-iscere* (cf. *canescere*, *mollescere*); possibly in *-izare*: *angustare*; \**ausare*; *captivare*; *confortare*; *falsare*; *gravare*; *levare*; \**oblitare*; *rūtare*; *ūsare*; — *alleviare*; \**altiare*; \**captiare*; *humiliare*; — \**abbellire*; *unire*; — *amari-care*; — \**vanitare*; — *fortescere*; *lætiscere*; *vilesce-re*; — \**blan-kizare*?

Many verbs from perfect participles (frequentatives, etc.) replace the original verbs: *adjuvare* > *adjutare*; *audere* > *ausare*; *canere* > *cantare*; *uti* > *usare*. The endings *-(i)tare*, *-escere* lost their frequentative or inchoative sense: *adparescere*, Dubois 157; *ostentare*, Dubois 156.

35. Verbs from other verbs end in *-icare* (cf. *fodicare* < *fodere*), *-itare* (cf. *clamitare* < *clamare*); also in *-escere*, *-iscere* (cf. *florescere*, *dormiscere*), which lost its inchoative force: \**bullicare* < *bullere*; — *crocitare*; — *apparescere*; \**fniscere*; *stupescere*. Vulgar Latin has many old frequentive verbs: G. 178–179, Cooper 205. There are some late diminutives in *-aculare*, *-iculare*, *-ūculare*, through diminutive nouns or adjectives (cf. *periculari* < *periculum*): \**salticulare*. We find also some miscellaneous imitative formations: \**expaventare* (and some others) apparently after the analogy of *præsentare*; \**misculare* perhaps after *maculare*.

36. Greek verbs in *-âv*, *-ειν*, etc., when taken into Latin, regularly end in *-are*: *κυβερνᾶν* > *gubernare*; *βλασφημεῖν* > *blasphemare*. Cf. Claussen 795. But *ψάλλειν* > *psallere*, perhaps through the analogy of *fallere*: Claussen 796.

Germanic verbs in *-an* or *-on* regularly passed into the first conjugation in Latin: *wîtan* > It. *guidare*; *roubôn* > It. *rubare*. Those in *-jan* went into the fourth: *hatjan* > *hatire*, Gl. *Reich.*; *warnjan* > It. *guarnire*.

b. SUFFIXES FOR NOUNS.<sup>1</sup>

37. Some 90 endings, apparently, were used in Vulgar Latin. The Christian writers are especially rich in derivatives. Petronius, too, was very fond of diminutives: *adulescentulus*, Waters Ch. 59, Ch. 64; *porcellus*, Ch. 40; *taurellus*, Ch. 39.

The commonest endings are the following: —

—*a*, used to form feminines: *nepta*, Pirson 123, Bon. 366, Haag 41; *socera*, Bon. 355.

—*āgo*, —*īgo*, —*ūgo* were characteristic of rustic speech: Cooper 111.

—*al*, —*āle*, used to form adjectives and also nouns, especially names of parts of apparel (as *bracchiale*), was extended: *coxale*, G. 95. Cf. Olcott 238–239.

—*alia*, a neuter plural, as *victualia* (cf. the collective plural —*ilia*, as *mirabilia*, *volatilia*, G. 110–111), was used, in a collective sense, as a feminine singular with an augmentative and pejorative signification, in Italy and Gaul: \**canalia* < *canis*.

—*anda*, —*enda*, neuter plural of the gerundive, came to be used as a feminine singular: \**facienda*.

—*ans*, —*ens*: see Adjectives.

—*antia*, —*entia*, made from present participles + —*ia* (as *benevolentia*, *essentia*, *significantia*), were used to form abstract nouns from verbs: \**credentia*; *fragrantia*; *placencia*; \**sperantia*. Cf. R. 49–52, G. 79–102, Olcott 73–78.

—*ānus*: see Adjectives.

—*ar*, —*āre*, for nouns and adjectives: *liminare*, G. 95; \**pollicare*. Cf. Olcott 187–189.

—*aria*: see —*ia*.

—*arium*, used to designate a place (as *gallinarium*), was extended: *breviarium*; \**calamarium*. Cf. R. 31–37, Olcott 176–182.

—*arius*: see Adjectives.

—*ata*: see —*ta*, etc.

—*aticum* (as *viaticum*) was extended, to form nouns from nouns: \**coraticum*.

—*ātus*, as *senatus* (common in Petronius, e. g., *bonatus*, Waters Ch. 74), was extended: *clericatus*; \**ducatus*. Cf. —*ta*, etc.

<sup>1</sup> Cf. Cooper 1–91, Dubois 99–136, Quillacq 15–31, Bon. 453–463.

-*cellus*, diminutive, was used beside -*culus*: *avicula*, *avicella*; *navicula*, *navicella*. So \**domnicellus*, etc.

-*ceus*, -*cius*: see Adjectives.

-*culum*, -*crum* (as *miraculum*, *lavacrum*) were occasionally used: \**genuculum*. Cf. G. 91-92, Olcott 131-134.

-*ellus*, diminutive (as *castellum*), was often used beside -*illus*, which lost its diminutive force: *anulus*, *anellus*; *porculus*, *porcellus*; *vitulus*, *vitellus*. So *calamellus*, etc.

-*enda*: see -*anda*.

-*ens*: see Adjectives, -*ans*.

-*ensis*: see Adjectives.

-*entia*: see -*antia*.

-*erium*, as *desiderium*, was probably somewhat extended: Old Fr., Pr. *consirier*, etc. Cf. R. 31-37. See A. Thomas, *Les substantifs en -ier et le suffixe -arius*, *Rom.* XXXI, 481; and *Nouveaux essais de philologie française* 110.

-*eum*: see -*ium*.

-*eus*: see Adjectives.

-*ia*, unaccented, used to form abstract nouns (as *victoria*), was extended: \**fortia* (cf. *fortia* n. pl. = 'mighty deeds of God', Koffmane 76).

-*ia*, unaccented, used to form feminines (as *avus*, *avia*): *neptia*, Pirson 123.

-*ia*, from Greek -*la* through Christian writers and speakers: *monarchia*; *philosophia*; etc. It was often attached to words in -*arius*; hence an ending -*aria*: \**libraria*. Cf. Olcott 173-176.

-*ica*: see *Archiv für das Studium der neueren Sprachen und Literaturen* CXIV, 457.

-*icca* (as *Bodicca*, *Bonica*, *Karica*) first appears in Africa in feminine proper names; it was then extended to Spain, Sardinia, and Dacia, and came to be used as a diminutive suffix in Spanish, Portuguese, and Rumanian: Sp. *animalico*; Rum. *manică*. It may have arisen in the first place from a childish pronunciation of -*iclus*, -*icla*, being used in pet names. Cf. *Einf.* § 173. For -*accus*, -*iccus*, -*occus*, -*uc(c)us*, see A. Horning in *Zs.* XIX, 170, XX, 335; cf. *Gram.* II, 591.

-*iceus*, -*icius*: see Adjectives, -*ceus*.

-*incus* or -*inquus* (as *propinquus*), perhaps also \*-*ingus* and locally -*ancus*, possibly of Ligurian origin (*Rom.* XXXV, 1-21, 283ff., 333ff.), was used for many new words: Pr. *Arbonenca*, *ramenc*; It. *solingo*, *Valinca*;

Sp. *Cusanca*. It was probably confounded, in some regions, with the following.

-*ing*, a German patronymic ending, was used for some nouns and perhaps for adjectives (see -*incus* above): Pr. *lausenga*; It. *camerlingo*.

-*inus* (as *caninus*, *Montaninus*) originally denoted appurtenance, then resemblance, then smallness; it was freely used, especially to form diminutive nouns, but sometimes to form new adjectives: *domnina* = 'young lady', Olcott 134-136; *Florentinus*; *serpentinus*. Cf. Olcott 200-204.

-*io*: see -*tio*.

-*issa*, from the Greek -*ισσα* (as *βασιλισσα*, so *pythonissa*), was used for some new formations: \**dukissa*; *Germanissa*, Pirson 228; *prophetissa*, R. 251. Cf. Cooper 251.

-*itas*: see -*tas*.

-*itia*, -*ities*, used to form nouns from adjectives (as *munditia* -*ies*), were much extended, -*ities* especially in the south; both are rare in Rumanian (Cooper XLV): \**altitia*; \**granditia*. Cf. Olcott 78-80.

-*ittus* first appears during the Empire in inscriptions in Italy and Dacia, sometimes in Spain and Gaul, as a suffix for proper names: feminine *Attitta*, *Bonitta*, *Caritta*, *Julitta*, *Livitta*, *Suavitta*, etc.; masculine *Muritta*, *Nebitta*, *Sagitta*, etc. Cf. Pirson 226: *Julianeta*, *Nonnita*, *Nonnitus*. Its origin is unknown; it may have arisen from a childish pronunciation of -*īclus* -*a*: cf. -*icca*. Meyer-Lübke, *Einf.* § 172, conjectures that it may have come from the Germanic ending that now appears as *z* in such names as *Heinz*. A. Zimmermann, *Zs.* XXVIII, 343, regards -*ättus*, -*ittus*, -*öttus* as alternative forms of -*ātus*, -*ītus*, -*ōtus*, like *littera* beside *lītera*, etc. It came to be very widely used as a diminutive suffix for nouns, and also for adjectives, the *i* being short in Gaul, Rætia, and central and northern Italy, generally long in the Spanish peninsula and in Sardinia: nouns, Fr. *amourette*, It. *fioretto*, Sp. *bacito*; adjectives, Fr. *doucet*, It. *grassetto*, Sp. *bonito*.

-*itūdo*: see -*tūdo*.

-*ium*, -*eum* (as *capitium*, *calcaneum*): see G. 56-59.

-*ivum*, -*īva*: see Olcott 224-226.

-*men*, -*mentum*, used to form nouns from verbs (as *certāmen*, *vestimentum*), were extended, especially -*mentum*: \**gubernamentum*. Cf. Olcott 123-131, R. 22-25.

-*mōnium*, -*mōnia*: see Olcott 81-82.

-*o* (-*ōnem*), originally used to indicate a characteristic (as *bībo*), was

commonly employed as an augmentative or pejorative, in Gaul often as a diminutive: *gūlo*; It. *boccone*; Fr. *aiglon*. See *Archiv* V, 56, 223, XIII, 222, 415, 475. Cf. Olcott 83-87, G. 44-45.

-*or* (-*ōrem*), used to form abstract nouns (as *candor*, *sapor*), was employed for many new formations of the same kind, especially in Gaul: *dulcor*; \**flator*; \**flavor*; \**lūcor*; \**sentor*; *viror*. In Gaul these nouns came to be feminine: Bon. 503-504 (*dolor*, *tīmor*, etc.).

-*or* (-*ōrem*), used to designate the agent: see -*tor*.

-*ōrium*; see -*tōrium*.

-*ōttus*, of unknown origin (cf. -*ūtus*), was apparently used first of young animals, then as a general moderate diminutive: It. *aquilotto*, *casotta*.

-*sa*: see -*ta*, etc.

-*sio*: see -*tio*.

-*sor*: see -*tor*.

-*sōrium*: see -*tōrium*.

-*sūra*: see -*ūra*.

-*sus*: see -*ta*, etc.

-*ta*, -*tus*, -*sa*, -*sus*, later -*āta*, -*ātus*, -*ūta*, perfect participles used as nouns, started perhaps with such forms as *defensa*, *remissa*, i. e., feminine perfect participles with a feminine noun understood, and were reinforced by fourth declension nouns in -*tus*, as *collectus*, *narratus*: cf. C. Collin in *Archiv* XIII, 453. They were considerably used to make abstract nouns from verbs (and -*ata* was sometimes attached to nouns, as \**annata*); -*tus* and -*sus* were preferred in Dacia (Cooper XLV): *collecta*, G. 111; \**debīta*; *extensa*, R. 83; \**movīta*, *Substrate* IV, 122; \**perdīta*; *recubītus*; \**reddīta*; \**vendīta*; It. *andata*, *fossato*, *venuta*. Cf. Olcott 33-51, R. 82-83, G. 85-88, Bayard 24-25.

-*tas* (-*tātem*), used to make abstract nouns from adjectives, was freely employed: *falsītas*; *nativītas*; *purītas*; *trinītas*. So *deītas* from *deus*. Cf. Olcott 58-69, G. 102-106, Bayard 19-22 (very common in St. Cyprian).

-*tio*, -*sio* (-*tiōnem*, -*siōnem*), used to form abstract nouns from verbs (as *lectio*, *mansio*, *potio*), are very common in St. Jerome, St. Cyprian, and other late writers: *abbreviatio*; *aggravatio*, G. 63; \**nutritio*; *ostensio*; *prensio*; *revolutio*. Cf. Olcott 2-23, R. 69-82, Bayard 19-22.

-*tor*, -*trix*, -*sor* (-*tōrem*, -*trīcem*, -*sōrem*), used to denote the agent (as *amātor*, *ensor*), were very freely employed (but show few traces in Rumanian: Cooper XLV): *necātor*; *ostensor*; Pr. *beveire*, *trobair*. Cf. Olcott 88-122, R. 55-63, G. 45-56.

-*tōrium*, -*sōrium*, used to form from verbs nouns denoting place, some-

times instrument (as *dormitorium*, *natatorium*, *cursorium*), were much extended, often taking the place of *-culum* (*cubiculum* > *accubitorium*): \**cæsorium*; \**ensorium*; \**missorium*; \**oratorium*; \**pressorium*; \**repositorium*. Cf. Olcott 194-196, R. 31-37, G. 96-97.

*-tūdo* (*-tūdīnem*), used to make abstract nouns from adjectives (as *fortitudo*), was extended: \**certitudo*; \**servitudo*. Cf. Olcott 69-73.

*-tūra*: see *-ūra*.

*-tus*: see *-ta*, etc.

*-ūlus*, *-ūla*, diminutive (as *vitulus*), was used for a few new formations: \**alaudula*; \**ossulum*, Bon. 197.

*-ūra* and *-t-ūra*, *-s-ūra*, used to form abstract nouns from perfect participles (as *censura*, *strictura*), later from adjectives also, were extended, in late Latin often replacing *-or* (*fervor* > \**fervura*): \**frig'dura*; \**mes-sura*; \**nutritura*; \**ornatura*; \**planura*; \**pressura*; \**tensura*; \**vir'dura*. See *Einf.* § 171. Cf. Olcott 51-58, R. 40-45, G. 88-90.

*-ūta*: see *-ta*, etc.

38. When Greek nouns were borrowed by Latin, the endings were adapted as follows: —

*-os*, *-η*, *-ov* regularly became respectively *-us*, *-a*, *-um*: Claussen 796. There are a few exceptions for special reasons (Claussen 795): *ἐλαιον*, influenced by *olere*, gave *oleum*; *μηλόφυλλον*, by popular etymology, gave *millefolium*.

*-as* in popular words generally became *-a* (Claussen 798-799): *λαμπάς* > *lampha*.

*-ης*, *-της* became *-a*, *-ta* or *-us*, *-tus* (Claussen 798): *τρώκτης* > *tructa*; *βολίτης* > *boletus*.

*-ι* in popular words either fell or became *-a*, *-e*, *-is*, or *-i* (Claussen 799): *πέπερι* > *piper*; *σίναπι* > *sinapis*, *sinape*; *κῆμμα* > *gumma*, *gummi-s*.

*-is* often became *-a*, instead of *-is* (Claussen 798): *παυσις* > *pausa*.

*-μα* in popular words gave a feminine *-ma* (Claussen 796-797): *κῦμα* > *cima*.

*-πος* preceded by a consonant became *-er* (Claussen 797): *Ἀλέξανδρος* > *Alexander*.

*-ων* in popular words became *-o* (Claussen 797): *λέων* > *leo*.

Sometimes the genitive or the accusative was taken as a basis, instead of the nominative (Claussen 800-802): *ἐλέφαντος* > *elephantus*; *μαγίδα* > *magida*.

The unaccented vowel of the penult was often changed in conformity with Latin habits (Claussen 802-806): *διάβολος* > *diabolus diabolus*; *κέρασος* > *cerāsus* \**cerēsus*; *κίθαρα* > *cithāra cithēra*; *σκοπέλος* > *scopulus*; *σπατάλη* > *spatula*.

### c. SUFFIXES FOR ADJECTIVES.<sup>1</sup>

39. The commonest endings are the following:—

—*abilis*: see *-bilis*.

—*-āceus -ācius, -īceus -īcius*, used to make from nouns adjectives denoting material (as *arenaceus, pelliceus*), were extended (especially in rustic speech: Cooper 111), *-aceus* being employed later as an augmentative and pejorative suffix for adjectives and finally for nouns: *chartaceus; formaceus; mixticius*, G. 143; \**setaceus*; It. *tempaccio*, etc. Cf. Olcott 215-220. See E. Wölfflin, *Die Adjectiva auf -icius* in *Archiv* V, 415.

—*-ālis, -īlis*, used to make from nouns adjectives of appurtenance (as *regalis, gentilis*), were extended: \**cortilis; \*ducalis; episcopalis*. Cf. Olcott 226-238, G. 144.

—*-āneus -ānius, -ōneus -ōnius* (as *extraneus, erroneus*) were slightly extended: \**caroneus; spontaneus*.

—*-ans, -ens (-antem, -entem)*, present participles (as *amans, potens*), were used freely to make adjectives and nouns from verbs: *credens; \*currens; \*passans*.

—*-ānus*, denoting appurtenance (as *paganus, Romanus*), was used to form adjectives of place (occasionally time) and nouns of office: *biduanus*, Bechtel 83; *medianus*, Bechtel 83; \**Sicilianus; Tuscanus*;—\**capitanus; decanus*.

—*-arīcius*, a combination of *-arius* and *-īcius* (as *sigillaricius*), became popular in Gaul: see A. Thomas, *Nouveaux essais de philologie française* 62 (*Hacherece*, etc.).

—*-āris* (as *singularis*) was extended: *particularis*. Cf. Olcott 182-187.

—*-arius*, attached to nouns and adjectives, to denote connection, and used also in the masculine to form nouns of occupation (as *aquarius, argentarius, pomarius*), was much extended, especially in the latter function: *imaginarius; \*leviarius*;—*apothecarius; \*marinarius; \*werrarius*. Cf. Olcott 137-173. The phonetic development of this suffix was apparently peculiar in Gaul and some other regions: the earliest examples are *glan-*

<sup>1</sup>Cf. Cooper 92-163 (diminutives, 164-195), Quillacq 32-40, Dubois 136-151, Bon. 464-467.

*deria* < *glandarius* + *-ia* (6th century) and *sorcerus* < \**sortiarius* (8th century); the earliest forms in French and Provençal are *-ers*, *-er*, then *-iers*, *-ier*. On the other hand, Spanish *-ero* and Italian *-aio* are perfectly regular, Italian *-aro* is easily explained by the analogy of the plural *-ari*, and Italian *-iere*, *-iero* are probably borrowed. E. R. Zimmermann, *Die Geschichte des lateinischen Suffixes -arius in den romanischen Sprachen*, and E. Staaff, *Le suffixe -arius dans les langues romanes*, try to derive all the forms from *-arius*. P. Marchot, *Zs. XXI*, 296 (cf. *Phon. I*, 34-36), postulates *-ar(i)us* and *-er(i)us*, showing that while the French forms may perhaps be derived from *-arius* and *-iarius*, the Provençal cannot. Cf. *Gram. I*, 222, § 227. Zimmermann, *Zs. XXVI*, 591, points out that many words have *c*, *e*, or *i* before the *u*, that *-iarius* was a real suffix (cf. *antiarius*, Olcott 142), that *-iarius* and *-carius* may have established *-iers* in French. A. Thomas, *Rom. XXXI*, 481 (cf. *Nouveaux essais de philologie française* 119, and *Bausteine* 641), suggests that the Germans in Gaul associated *-arius* with their proper names in *-areis* or *-ari*, and when *umlaut* affected the *a* of these, pronounced *-arius*, too, as *-erius* or *-erus*, and that this pronunciation spread to the neo-Latin speakers. Cf. *Chairibertus* repeatedly used for *Charibertus* by Fredegarus: Haag 7.

*-ātus*, a perfect participle ending (as *sceleratus*), was much used to make adjectives in the popular language: *exauguratus*; \**fatatus*; *timoratus*. Cf. Olcott 244-250, G. 159-160.

*-bilis*, or *-ābilis*, *-ībilis*, an objective suffix used to make adjectives from verbs (as *amabilis*, *terribilis*), is very common in Christian writers and was much employed in late Latin, especially in learned words; it is rare, however, in Rumanian (Cooper XLV): *acceptabilis*; *capabilis*; \**caritabilis*; *diligibilis*; *indicibilis*, G. 137. Cf. Olcott 209-213, R. 109-116, G. 135-140.

*-ceus* *-cius*: see *-āceus*.

*-ens*: see *-ans*.

*-ensis*, used to make from nouns adjectives of appurtenance (as *forensis*), was greatly extended, especially in popular speech, the derivatives being sometimes employed as nouns: \**cortensis*; \**Frankensis*; *turrensis*, G. 155; *vallensis*, G. 155;—\**markensis*; \**pagensis*.

*-eus* *-ius*, denoting material (as *aureus*), was slightly extended (but is rare in Rumanian: Cooper XLV); the derivative was sometimes used as a noun: *panneus*; *papyrius*;—*fageus*; *querceus*. Cf. Olcott 339-344.

*-ībilis*: see *-bilis*.

*-īceus* *-īcius*: see *āceus*.

-*ycus* (as *medicus*) was used especially in words from the Greek: *clericus*. Cf. Olcott 220-223.

-*ldus* (as *rapidus*) was slightly extended: *exsūcidus*, G. 155 (Tertullian); \**rīpidus*; *sapidus*.

-*ilis*: see -*ālis*.

-*īnus*: see Nouns.

-*lnus* (as *fraxinus*) was used for a few adjectives: *quercinus*.

-*scus*, probably a fusion of Greek -*σκος* (*Syriscus*) and Germanic -*isk* (*Thindiscus*), was used for -*ycus* in some late words: \**Angliscus*; \**Frankiscus*.

-*ittus*: see Nouns.

-*ius*: see -*eus*.

-*ivus* (as *nativus*) occurs in a few new formations: \**restivus*. Cf. Olcott 224-226.

-*ōneus*: see -*āneus*.

-*ōrius*: see -*tōrius*.

-*sōrius*: see -*tōrius*.

-*tōrius*, -*sōrius*, made up of -*t-or*, -*s-or* + -*ius* (as *notare notor notorius, censere censor censorius*), were used for some new formations: *defensorius*; *mansorius*. In Provençal and Rumanian -*tōrius* was extended, with the sense of -*billis* or of the gerundive: Pr. *punidor*; Rum. *jurătōrŭ*, Tiktin 597.

-*llus*, diminutive (as *albulus*), was a favorite with Christian writers; *promptulus*, G. 158. Cf. G. 157-158.

-*ñdus* (as *jocundus*) was used in Spanish and Provençal for a few words: Pr. *volon*.

-*ūtus* (as *canutus*) was somewhat extended: \**carnutus*.

#### d. SUFFIXES FOR ADVERBS.<sup>1</sup>

40. The usual endings are as follows: —

-*ce -c* (as *ne nec, num nunc, tum tunc*) was apparently used to form *dunc* (C. I. L. IX, 4810, etc.) = *dum* + *ce* (cf. Franz. *ø* I, 10); Pirson 252 cites eight examples of *dunc*, one of them from Gaul. Cf. *dōnique* in *Substrate* II, 103-106. Possibly \**anc* is derived from *an* in the same way: cf. *Archiv* I, 241; *Gram.* III, 552.

-*e* is very common in St. Jerome: G. 193-197 (*angelice*, etc.). It was

<sup>1</sup>Cf. Cooper 196-204, Dubois 163-171, Bon. 467-470.

preserved in popular speech in *bene, longe, male, pure, tarde*, and occurs also in *Romanice*, whence such formations as *Brittanice, Normannice*, etc.

*-liter*: see *-ter*.

*-o* and *-um* generally coincided in pronunciation (*multum* = *multo*, etc.). They are rare in St. Jerome, but common in other late writers: *clanculo, multum, rato*, etc. Many such adverbs were preserved in common speech, as It. *alto, basso, caldo, chiaro, piano, poco*; hence other adjectives came to be used as adverbs (as It. *forte, soave*), and in Rumanian nearly all adjectives may be so used (as *greü, noiü*).

*-ter* (as *breviter*) was not preserved in common speech, though much used in ecclesiastical Latin (G. 197-201: *infantiliter*, etc.), being especially common in St. Cyprian (Bayard 32-34).

*-tim* was favored by St. Cyprian (Bayard 34-35) and some other writers, but was not kept alive in popular Latin.

Some adverbial phrases on the model *ad . . . -ōnes* (in Italy also without the preposition) came into use: It. *a ginocchioni, bocconi*; Fr. *à recu-lons*. Cf. *Gram.* II, 689; *Rom.* XXXIII, 230; *Zs.* XXIX, 245, XXX, 337, 339.

Repetition was used, as sometimes in Classic Latin, for emphatic effect. Many examples are to be found in Petronius: *modo modo* = 'only yesterday,' Waters Ch. 37, Ch. 42, Ch. 46; *modo sic modo sic* = 'now so, now so,' Ch. 45; cf. *nec sursum nec deorsum non cresco*, Ch. 58. Cf. § 55.

41. Adverbs of manner came to be made with the ablative *mente*. This noun was first used with an adjective to denote a state of mind, as *forti mente, obstinata mente, jocunda mente, firma mente*. Then it was employed in a more general sense: *pari mente*, G. 428; *\*bona mente*; *\*ipsa mente*; *\*mala mente*. Later, perhaps after the Vulgar Latin period, *mente* was used with any adjective that could make an adverb of manner; *\*longa mente; sola mente, Gl. Reich*. This formation is not common, however, in Rumanian: *Lat. Spr.* 487. In the Romance languages *mente* was sometimes added to adverbs: Fr. *comment*; It. *insiememente*.

## e. CHANGE OF SUFFIX.

42. The popular language sometimes substitutes one suffix for another, as *manuplus* for *manipulus*. The principal types are: —

(1) Substitution of a new or common suffix for an old or rare one: —

-*cillus* > -*cëllus*: see -*illus*.

-*cillus* > *cëllus*: see -*ulus*.

-*elus* > -*ëllus* (common in late Latin): *camëlus* > *camëllus*, Cohn 213-216, R. 460; *loquëla* > *loquëlla*, Corssen I, 227, R. 460; *querëla* > *querëlla*, S. 131, R. 321, 460; *suadëla* > *suadëlla*, R. 460. Cf. Caper (Keil VII, 96): "*querela, loquela per unum l.*"

-*ënus* > -*ënus*: "*Byzacenus non Byzacinus,*" *App. Pr.*; *venënum* > \**venënum*. Cf. Cohn 219-226.

-*ex(-ëcem)* > -*ix(-icem)*: *vervëcem* > *berbëcem*. Cf. Cohn 41-42.

-*illus* > -*ëllus*: *axilla* > *ascëlla*, etc. Cf. Cohn 42-52.

-*or(-örem)* > -*üra*: *calor* > \**calüra*; *pavor* > \**pävura*; *rancor* > \**ran-cüra*, etc. Cf. Cohn 172-180.

-*ulus* > -*ëllus*: *anulus* > *anëllus*; *avicula* > *avicëlla*, etc. Cf. Cohn 17-28.

-*usus* > -*itus*: *vacuus* > \**vöcëtus* (cf. § 195).

(2) Indiscriminate use of two suffixes: —

-*anus* = -*äneus*: *extraneus* \**extranus*; *subterraneus* \**subterränus*. Cf. Cohn 160-172.

-*atus* = -*itus* = -*ütus*: *barbatus* \**barbutus*; *carnatus* \**carnutus*; *caudatus* *cauditus*, Cohn 184; *lanatus* *lanutus*, Cohn 184. Cf. Cohn 180-205.

-*icëus* -*icëus* = -*iceus* -*icëus*: *erëcius* \**erëcius*. Cohn 30-31.

-*iculus* = -*iculus*: *capitulus* \**capitulus*; *cornicula* \**cornicula*; *lentacula* \**lentacula*. Cf. Cohn 151-154.

-*iculus* = -*iculus*: *ossiculum* *ossiculum*, Waters Ch. 65; *pediculus* *pediculus*.

-*ilius* = -*ilius*: *consilium* \**consilium*; *familia* \**familia*. Cf. Cohn 154-160.

-*ix(-icem)* = -*ix(-icem)*: *sörice* \**sörice*. Cf. Cohn 147-151.

(3) Alteration of a suffix: —

-*arius*: see Suffixes for Adjectives, -*arius*. Cf. Cohn 274-291.

-ēnus > -īnus through late pronunciation of Greek η as ī: σαγήνη > *sagina* (*Vok.* III, 121: 7th century) > Old Fr. *saine*, etc.

-ŷcūlus? > ŷcūlus: \**genūcūlum*; \**ranūcūla*, etc. Cf. Cohn 226-264.

-ūdo (-ūdīnem) > -ūmen (-ūmīnem): *consuetudo* \**costumen*, *Substrate* I, 553-554; *incus incūdo* \**incūmīnem*, etc. Cf. Cohn 264-274.

#### 4. COMPOUNDS.

##### a. NOUNS.

43. *Acer arbor* (> Fr. *érable*); *alba spīna*; *avis strūthius*; *bene placitum*, G. 131; *bis cōctum*; *in ōdio*; *mēdio die*; *mēdio lōco*.

##### b. ADJECTIVES.

44. These compounds generally belonged to the literary style. G. 130-134, 160-170: *magnisonans*; *omnimodus*; *unicornis*; *unigenitus*; etc. But *male habitus*, etc., were popular.

##### c. PRONOUNS.

45. See §§ 24, 65.

##### d. VERBS.

46. *Calce pistare*; *crucifigere*, G. 191; *fōris mittere*; *genuflectere*, G. 191; *īnde fūgere* (> Fr. *enfuir*); *ītra videre*; *manu tenere*; *mente habere* (> Pr. *mentaver*); *mīnus pretiare*. So *antemittere*, etc., in *Gl. Reich*. In church writers there are many verbs in -*ficare*, as *mortificare*: G. 190.

##### e. ADVERBS.

47. There were many compounds made up of a preposition and an adverb: *ab ante*, R. 234; *ab intus*, R. 231, Bon. 483; *ab olim*, Bechtel 101; *a contra*, Bechtel 101; *a foras*, Bechtel 101; *a foris*, R. 231, Bon. 483; *a longe*, G. 203, Bon. 483; *a modo*, R. 232, Bon. 483; *a semel*, Bechtel 101; — *ad horam* = 'presently', 'just now', G. 426; *ad mane*, Bechtel 101; *ad semel*, Bon. 194, 484; *ad sero*, Bechtel 101; *ad subito*, Bechtel 101;

*ad tunc*, Bechtel 101; — *de contra*, Bechtel 101; *de deorsum*, R. 232; *de foris*, R. 232, G. 203; *de intro*, Bechtel 102; *de intus*, R. 232, G. 203; *de magis*, *Lat. Spr.* 487; *de retro*, R. 232; *de semel*, Bechtel 101; *de sursum*, R. 233, G. 203, Bon. 484; — *e contra*, G. 203; *ex tunc*, R. 433; — *in ante*, Bon. 484, *Lat. Spr.* 487; *in contra*, R. 235; *in hodie*, Bechtel 102; *in mane*, Bechtel 102; \**in semel*, *Substrate* III, 268.

Petronius (Waters Ch. 38) says: *Ubi semel res inclinata amici de medio*.

The following compounds are of a still different nature: *ac sic*, *Per.* 40, 8, etc.; *et sic*, *Per.* 39, 17, etc.; *usque hodie*, G. 426, *Per.* 68, 13.

#### f. PREPOSITIONS.

48. Some of these adverbial compounds, and some others similar to them, were used as prepositions: *ab ante*, *Lexique* 40; — *de ante*, Bechtel 102; *de inter*, Bechtel 102, Haag 75; *de intus*; *de retro*; *in ante*; *in contra*. Cf. E. Wölfflin, *Abante*, in *Archiv* I, 437. Slightly different is *intus in*, Bechtel 102.

A compound made up of preposition + noun is found in: *in giro* (followed by the ablative or the accusative), Bechtel 102; *in medio*, Bechtel 102; *per girum* and *per giro* = *circa*, Bechtel 102.

Some compounds consist of two prepositions: \**de ad* (> *It. da*)<sup>1</sup>; *de post*, R. 235; *de sub*, R. 235; *de super*, Bon. 484.

#### g. CONJUNCTIONS.

49. *At ubi* and *ad ubi*, Bon. 484–486 (cf. *Per.* 74, 28, 85, 15, etc.); *et at ubi*, *Per.* 72, 19, 75, 3.

<sup>1</sup> Romance *da*, *dad* may be the result of a fusion rather than a combination of *de* and *ad*. In any case it is probably a late product. Some have thought it came from *de+ab*. Mohl, *Lexique* 38–47, says *da* is found from the 7th century on; he would derive *It.* and *Old Sp.* *da*, Sardinian *dave*, *dae*, Rætian *dad* from the Oscan *da*, *dat* and from a southern Latin \**dabī*, \**dabe*.

## II. SYNTAX.<sup>1</sup>

### A. ORDER OF WORDS.<sup>2</sup>

50. The Romance order is simpler and more rational than that of Classic Latin. It does not permit the arbitrary separation of members that belong together, such as the preposition and the word it governs, or the adjective and the noun it modifies, as in Ovid's "In nova fert animus mutatas dicere formas/corpora." Neither does it allow the collocation of words of the same part of speech that belong logically in different places, as in the "In multis hoc rebus dicere habemus" of Lucretius. The most irrational features of the Classic Latin construction were surely artificial, and were not characteristic of daily speech. Nevertheless there is really a fundamental difference between the old order and the new: Romance has, so to speak, a *crescendo*, Latin to a certain extent a *diminuendo* movement (*Lat. Spr.* 491); Romance puts the emphasis at the end of the sentence, Latin in the middle. The principle, however, is not primarily rhythmic, but psychic, the difference being due to a diverse conception of the structure of language: Latin places the modifier before, Romance after the word modified. The modern order is the more logical, proceeding from the known to the unknown. The old arrangement is exemplified by this sentence: "Fabius

<sup>1</sup> See Meyer-Lübke, *Gram.* III, for a comprehensive account of Romance syntax.

<sup>2</sup> See Elise Richter, *Zur Entwicklung der romanischen Wortstellung aus der lateinischen*, 1903, from which work most of the matter of this chapter was taken.

æquatus imperio Hannibalem et virtute et fortuna superiorem vidit." The following examples illustrate the later structure: "Mors perfecit tua ut essent omnia brevia," "Hæc loca sunt montuosa et natura impedita ad rem militarem." The change constitutes a progress in language; all cultivated peoples have made it. It is indigenous in Latin, not imitated from the Greek, which independently effected the same transformation.

51. The modern order was not abruptly substituted for the old. On the contrary, it is to be found in Latin, with generally increasing frequency, in inscriptions and popular writers, from the earliest texts down; it occurs sporadically also in literary authors, especially in Cicero. Petronius has notably short periods and an approach to the new structure. But until the fourth century the majority of Latin sentences have the old arrangement. Classic Latin may be said to represent an intermediate stage, while the revolution was in progress; there was a long struggle, and for centuries the ancient and the modern type were used side by side. By the fourth century the new order prevailed. Here is a characteristic passage from the *Peregrinatio*: "Hæc est autem vallis ingens et planissima, in qua filii Israhel commorati sunt his diebus, quod sanctus Moyses ascendit in montem Domini, et fuit ibi quadraginta diebus et quadraginta noctibus" (*Per.* 37, 21-24). The following is a good sample of the style of the Vulgate: "Cui respondit Dominus: Qui peccaverit mihi, delebo eum de libro meo; tu autem vade, et duc populum istum quo locutus sum tibi; angelus meus præcedet te. Ego autem in die ultionis visitabo et hoc peccatum eorum" (*Exodus* XXXII, 33, 34).

52. There was always a tendency to put a stressed word first, followed by an unaccented one, such as a connective or an atonic pronoun (*Lat. Spr.* 490). According to Meyer-

Lübke, *Zs.* XXI, 313, personal pronouns, when unstressed, were always enclitic in Latin, and were attached preferably to the first word in the sentence; and so it was in the early stages of the Romance languages: cf. It. *vedolo* but *non lo vedo*, *aiutatemi* but *or m'aiutate*; Fr. *voit le* but *qui le voit*. The definite article, however, precedes its noun in all the Romance languages except Rumanian and Albanian (Zauner 40).

53. In dependent clauses, which were naturally of less importance, the old order survived longer than in independent. In a few other respects the old arrangement lingered and under certain conditions is still preserved: negative and intensive adverbs precede their verb; under some circumstances the object may come before the verb, and sometimes the whole predicate precedes; in certain constructions the dependent infinitive may stand before the finite verb (as Pr. *morir volgra*).

## B. USE OF WORDS.

54. There were great changes in the functions of pronouns, prepositions, conjunctions, and adverbs. Many uses of prepositions are connected with the loss of inflections: these will be discussed under the Use of Inflections. A definite and an indefinite article developed out of *ille* and *unus*.

### 1. NOUNS AND ADJECTIVES.

55. For the simplification of inflections, see the Use of Inflections.

Repetition for intensive effect is not uncommon in late writers: Comodian, *malum malum*, Wölfflin 4; *bene bene*, *bonis bonis*, *fortis fortis*, *malus malus*, etc., R. 280. Cf. § 40.

## a. COMPARISON.

56. Little by little the old comparative and superlative lost their precise sense from being employed frequently with merely an intensive force (Wölfflin 83). The comparative came to be used for a superlative, as *omnium levior* (Wölfflin 68-71), and also for a positive, as Ovid's *inertior ætas* (Wölfflin 63-68); and the superlative was often really a positive in meaning, as in St. Augustine's *sancta atque dulcissima* (Wölfflin 57-63), and in *hic est filius meus carissimus*, etc. (R. 415-417). From early times certain periphrases were used to emphasize the comparative idea, as Plautus, *melius sanus* (Wölfflin 16); Anthimus, *plus congruus* and *maxime congruus* (Wölfflin 16; cf. *maxime pessima*, etc., R. 280); Vitruvius, *magis melior*, etc. (Wölfflin 46); Comodian, *plus levior*, etc. (Wölfflin 47). To avoid ambiguity, the *plus* and *magis* constructions were employed more and more to express a distinct comparison: *plus miser* in Tertullian, *plus formosus* in Nemasianus, *plus dulce*, *plus felix*, etc., in Sidonius Apollinaris (Wölfflin 29). Finally, toward the end of the Vulgar Latin period, this formation came to be popularly regarded as the regular one: *magis mirabilem*, Sepulcri 232; *plus popularis*, *magis . . . præclarum*, Bon. 451. Many old comparative forms remained, however, in common use. Cf. Adverbs. In the Romance languages a substitute for the superlative was made by prefixing the definite article to the comparative; it is likely that this device existed in late Vulgar Latin, but no example of it has been found. See *Archiv* VIII, 166-170.

b. NUMERALS.<sup>1</sup>

57. *Unus* was used as an indefinite article, occasionally in Classic Latin, frequently in late and popular writers: *lepida*

<sup>1</sup> For the forms of numerals, see Morphology.

... *una* ... *mulier*, Plautus, *Pseud.* 948; *unus servus*, Petronius, Waters Ch. 26; *accessit ad eum una sorella*, R. 425; cf. *Per.* 48, 25, etc.

58. Ordinal numerals, except a few of the smallest, were apparently not much used in popular speech after the fifth century.

## 2. PRONOUNS.

59. Pronouns were much more used than in Classic Latin: G. 408-409.

### a. PERSONAL AND POSSESSIVE PRONOUNS.

60. The personal pronouns came into more and more frequent use. *Ego* and *tu* are very common in Petronius. The demonstratives, especially *ille*, were employed as personal pronouns of the third person. The adverb *inde* came to be used occasionally as a genitive neuter pronoun: *nemo inde dubitat*, Regnier 10; *exinde* = Fr. *en*, Bon. 580.

Many pronouns developed double forms, according as they were accented or unaccented (as *suus* and *sus*): see Morphology. Cf. § 158.

There was great irregularity in the use of reflexives, especially the possessives, *suus* being generally substituted for *ejus*. See *Lat. Spr.* 489, G. 403-404, Hoppe 102-103, Dubois 333-336.

### b. DEMONSTRATIVES.

61. *Idem* went out of popular use, being replaced by *ille* and *ipse*. For the encroachment of *ipse* on *idem*, see Hoppe 104, Bayard 133.

62. *Is*, too, was often replaced by *ille* and *ipse* (Bechtel 145), and eventually was preserved in vulgar speech only in the combination *eccum* (= *ecce eum*), where it was not recog-

nized,<sup>1</sup> and in the extremely common phrase *id ipsum* (> *It. desso*), where likewise the *id* lost its significance. This last compound was used as a neuter pronoun, meaning 'it' or 'that,' as *id ipsum sapite*, R. 424 (cf. R. 424-425, G. 407, Quillacq 126), and also as a demonstrative adjective, generally invariable, as *id ipsum velam*, R. 424, *in id ipsum monasteriu*, *Franz. 2* II, 2, *in id ipsam rem*, *Franz. 2* II, 2.

63. *Hic*, *ille*, and *iste* came to be used indiscriminately (G. 405-406, Hoppe 104, Bayard 130-132); there are examples of *iste* for *hic* in Cæsar's time (Densusianu 178). *Hic* and *is*, too, were confused by late writers (Bayard 132). Toward the end of the Vulgar Latin period *hic* was apparently going out of common use, with the exception of the neuter *hoc*.

64. A combination of two demonstratives was common in Christian writers: *is ipse*, *iste ipse*, *ipse ille*, *ille ipse*, *iste ille*, *iste hic*, *hic ipse*. The last three have left no trace.

65. *Ecce* and *eccum* (pronounced *eccu*) were used as demonstrative prefixes (cf. § 24): we find early *ecce ego*, *ecce tu*, *ecce hic*, *ecce nunc*; also *ecce iste*, *ecce ille*, such combinations being common in Plautus. The final stage, probably not reached until the end of the Vulgar Latin period, is the fusion of the two parts into one word.

*Atque*, too, was perhaps used as a prefix (*Gram.* II, 646): Plautus, *atque ipse illic est* (*Epidicus* 91), *atque is est* (*Stichus* 582). G. Ascoli, however, *Intorno ai continuatori neolatini del lat. "ipsu-"* in *Archivio glottologico italiano* XV, 303 (discussing Sp. *aquese*, Pg. *aguesse*, Catalan *aqueix*, etc.), maintains that *eccu*' was the basis in all the Empire. At any rate, *eccu*' was influenced in some regions, especially in Spain and southern Gaul, by *atque* or *ac* (as in *ac sic*).

<sup>1</sup> Cf. Plautus, *Mil. Glor.* I, 25: "Ubi tu's? — Eccum."

When *iste* and *ille* lost their distinctive force, people said for 'this' *ecc'iste* or *eccu'iste*, for 'that' *ecc'ille* or *eccu'ille*. These compounds developed into \**ecceste*, \**acceste*, \**ceste*, \**eccueste*, \**accueste*, \**cueste* and \**eccelle*, \**accelle*, \**celle*, \**eccuelle*, \**accuelle*, \**cuelle*.

66. The suffix *-met* was used also as an intensive prefix, *ipse* becoming *metipse* through such combinations as *temet ipsum* (*Ecclus.* XXX, 22), *semet ipsum* (*Philip.* II, 8). Cf. §24. *Ego met ipse* is blamed by Donatus (*Lat. Spr.* 484).

Beside *ipse*, there was an emphatic form *ipsimus* (used by Petronius: *Waters* Ch. 69, etc.). This, with the prefix *met-*, became \**metipsimus*.

67. *Ille*, *hic*, *ipse*, *is*, especially *ille*, were used as personal pronouns of the third person. Cf. §60.

68. *Ille*, *hic*, *ipse*, *is* were used also as definite articles. *Ille* in this function is very common: R. 419-420 (*cito proferte mihi stolam illam primam*). Examples of the others are by no means infrequent: *hic*, R. 427 (*virum hunc cujus est zona hæc*); *ipse*, R. 423 (*in ipsa multitudine*); *is*, R. 423-425. This use of *is* was probably more literary than popular.

### c. INTERROGATIVES AND RELATIVES.

69. The forms were greatly confused by late writers. In Bon. 391-396 we find *qui* used as n. sg. and pl.; *quæ* as m., as n., as acc. f. sg., as acc. m. pl.; *quod* as m., as f. pl., as n. pl.; *quem* as n.; *qua* very often as n. pl. (395-396).

In popular speech *qui* was apparently used regularly for *quis*: Audollent 549, Quillacq 126-127, Bon. 391-392; it is common in inscriptions. Furthermore, the masculine *qui* took the place of the feminine *quæ*; it occurs in Christian inscriptions from the fifth century on: cf. R. 276 (*qui, quem* for *quæ*,

*quam*), Haag 51, Bon. 390–391, 394 (*qui* f. sg. and f. pl., *quem* f.), *Archiv* I, 53 (*qui* for *quæ* in 528 A. D.). *Quid*, moreover, gradually encroached on *quod*: Bon. 393.

70. *Qualis* was kept, and was used as an interrogative and as a relative. The adverb *unde* came to have occasionally the meaning of French *dont* (Bon. 580; *Zs. Beiheft* 7, 178), and eventually \**de unde*, \**d'unde*, was employed as a relative pronoun. Cf. § 84.

#### d. INDEFINITE PRONOUNS.

71. Some Classic Latin pronouns fell into disuse, and some new compounds were made. The principal indefinite pronouns and adjectives used in late popular speech are as follows:—

*aliquanti* took the place of *aliqui* and *aliquot*: *aliquanta oppida cepit*, G. 415.

*aliquis* flourished especially in the west: Sp. *alguien*, Pg. *alguem*. The neuter *aliquid* was more extended: Pr. *alques*.

*aliqui unus* > \**aliqu'unus* \**alicunus*.

*alius* and *alter* were confused in common speech: G. 415–417; Plautus, *alius filius*, G. 417. This confusion is more frequent in late Latin: St. Jerome, *nemo iudicat alterum*, G. 416. There may have been a neuter \**alid*, after the model of *id*, *quid*: *Archiv* I, 237.

*cata* was probably introduced, along the Mediterranean, by Greek merchants, in such phrases as *cata unum* = κατ' ἓνα, *cata tres* = κατὰ τρεῖς. Hence \**cata unus*, \**cat' unus*, etc. Cf. § 19.

*homo* was used sometimes like French *on*: *Per.* 55, 25.

*inde* came to mean, in certain constructions, 'some' or 'any.'

*magis*: see *plus*.

*miltus*.

\**nec ente* or \**ne ente* was apparently used as an equivalent for *nihil*. Meyer-Lübke, *Gram.* II, 650, conjectures \**ne inde*.

\**ne ipse unus*, \**ne'ps'unus*.

*nec unus*.

*nemo* was kept in Italy, Sardinia, and Dacia: *Lat. Spr.* 485.

*nūllus*.

*omnis*: see *tōtus*. *Omnis* and *omnia* were kept in Italy.

*paucus.*

*persona.*

*plus* and *magis* were confused: G. 427, Regnier 108-109 (*quanto plus tenetur tanto plus timetur*, 109).

*qualis.*

*quantus*, *tantus* replaced *quot*, *tot*. There are examples as early as Propertius: *Densusianu* 179. Cf. Dräger 104, § 53, R. 336-337, G. 413-415 (St. Jerome, *quanti iusti esuriunt*, 414; Claudian, *tantis lacrimis*, 415).

*quī.*

*quīque.*

*quīs.*

*quīsque*, *quīsqvis*. *Quisque* was much extended (G. 409-411), being used for *quisquis* and *quicumque* (Bayard 135).

*res* and *res nata* = 'anyone', 'anything': R. 345.

*talis.*

*tantus*: see *quantus*.

*tōtus*, pronounced also *tottus* (S. 121) and perhaps \**tūttus*, was sometimes used for *omnis*: Plautus, *totis horis*, *Mil. Glor.* 212. This use was common in late Latin: *Densusianu* 178, Bechtel 143, R. 338, G. 402-403 (*tota tormenta diaboli in me veniant*, 403). Cf. §§ 163, 204, (2).

*ūnus.*

### 3. VERBS.

72. Frequent in late Latin is a pleonastic use of *debeo*, Bon. 691-693: *commonens ut . . . custodire debeant*, 692. Cf. § 117. Compare the old Italian use of *dovere*.

There is also a common pleonastic use of *cæpi* with the infinitive, instead of the perfect: see § 124.

*Videri*, too, is often used pleonastically: Bayard 99-100.

### 4. ADVERBS.

73. The words referring to the "place in which" and the "place into which" were confused, *ubi* being used for *quo*, *ibi* for *eo*: *Lat. Spr.* 488. *Unde* was employed in the sense of

'where' (*Zs. Beiheft 7, 157*); also 'therefore' and 'wherefore': *Dic amice unde tristis es*, Regnier 110; cf. § 84.

74. *Plus* was often substituted for *magis*, and *magis* for *potius*: Bayard 110. *Plus* and *magis* were used more and more for comparison, and the old comparative and superlative forms became rarer: see § 56. Repetition was used for intensive effect: Seneca, *semper semper*, Wölfflin 5. *Bene, multum, satis* were employed as intensives more than in Classic Latin. *Totum* occurs often as an adverb: *Per. 37, 14*, and many other places; Dubois 332.

75. Double negation is frequent: R. 446-447 (*nec facio nihil*, etc.). *Non* for *ne* with the subjunctive is common: G. 435, Regnier 110. The absolute use of *non*, meaning 'no', occurs occasionally: *Dicit unus ex uno angulo: Ecce hic est. Alius ex alio angulo: Non, sed ecce hic est*, Regnier 111.

## 5. PREPOSITIONS.

76. The functions of prepositions were very much extended (Bayard 137-158): see Use of Inflections, Cases.

77. *Ab*, according to Mohl, *Lexique* 43, is not found in any of the Italic dialects except Latin. It apparently has no successors in the Romance languages, having been replaced by *de*, which also, from the third century on, usurped the place of *ex* (*Lat. Spr. 487*, R. 395-396, Hoppe 38): *de palatio exit*, Bechtel 105; *egredere de ecclesia*, Bechtel 105; *de utero matris nati sunt sic*, R. 395; *egressus de arca*, G. 339; *muri de lapide jaspide*, G. 342; *vivo de decimis*, G. 341; *de adversario . . . aliquid postulare*, Hoppe 38; *nec de cubiculo . . . procedit*, Hoppe 38.

78. *Ad* for *apud* occurs in Plautus, Terence, and others

(Oliver 5-6), and is common in late writers (R. 390-392, Urbat 10): *ad ipsum fontem facta est oratio*, Bechtel 103; *ad nos*, Bechtel 104; cf. *Per.* 42, 27. For the most part *apud* was replaced by *ad*, except in Gaul, where it was kept with the sense of *cum*: Haag 74, Urbat 27 (*tractans apud me metipsum*; also *ab una manu pallas altaris tenerem*, etc., where *ab* seems to be used for *apud*). *Apud* is used for *cum* by Sulpicius Severus, and more frequently by later authors: *Lat. Spr.* 489. According to F. G. Mohl, *La préposition cum et ses successeurs en gallo-roman* in *Bausteine* 61, *apud* is repeatedly found for *cum* in the Latin writers of Gaul, and *cum* for *apud* in Gregory of Tours; *cum* probably disappeared from actual use in Gaul by the fourth century; *apud*, being, as he says, a new word, had a great vogue in authors of the second and third centuries, a critical period for Gaul, and so came to supplant *cum* in that country.<sup>1</sup>

79. *Pro* often had the sense of 'for,' and replaced *ob* and *propter*: *fides pro una muliere perfida*, G. 343; *volo pro legentis facilitate abuti sermone vulgato*, G. 343; *attendimus locum illum pro memoria illius*, Bechtel 106. *Pro* itself was partially replaced by *per* (cf. § 14), but was substituted for *per* in other regions (Urbat 34-35).

80. *Circa*, in the Empire, frequently meant 'concerning': *frustrati circa veritatem*, Hoppe 37. *Juxta* often signified 'according to': *juxta consuetudinem*, Bechtel 105; *juxta drachmæ exemplum*, Hoppe 37. *Super* sometimes replaced *de*: *fallere vos super hanc rem*, Bechtel 106; *super anima commendatus*, Hoppe 41.

<sup>1</sup> Mohl would derive the Old It. *appo*, not from *apud*, but from \**ad post* (p. 71); Fr. *avec*, not from *apud* + *hoc*, but from *ad hoc* (pp. 75-76). Pr. *ab* he takes from *apud*, but Pr. *am* from Italic *amb*, *am*.

81. *Retro, subtus, de foris, foris, foras* were freely used as prepositions (R. 398–400, G. 334): *vade retro me*, R. 399; *subtus terram*, R. 399.

## 6. CONJUNCTIONS.

82. *Quod, quia, quoniam* (and after *jubere, ut*: R. 427–428) are used very often by late writers instead of the accusative and infinitive construction: R. 402, Regnier 112–113. *Ut* with the infinitive is not infrequent: R. 445–446. *Quod* for *ut* is very common: Audollent 549. *Eo quod* came to be much used in the sense of ‘that’: *Per.* 48, 27, etc. Eventually *ut* was generally discarded.

*Cur, quare* sometimes replaced *quod* and *quia*: G. 431–432. *Quia*, which in late Latin was often reduced to *qui* or *qua* (see § 168) frequently took the place of *quod*: Regnier 111–112. *Quomodo* became a great favorite, often supplanting *quando, quod, and quoniam*: R. 403. *Quando* displaced *cum* in the temporal sense. *Qua*, ‘when’, encroaches on *quando* in the *Peregrinatio*: 46, 22, etc.; cf. Bechtel 119–120.

83. *Si* took the place of *an* and *utrum* (R. 403–405, Regnier 111), and was often used for *ne* and *num* (G. 430): *videte si potest dici*, Regnier 111. *Ac si* frequently did service for *quasi*: *Per.* 39, 13, and many other places; Bon. 323.

84. *Aut . . . aut* is sometimes equivalent to *et . . . et*: *Per.* 49, 24; cf. Bayard 161. *Ac sic* recurs continually in the *Peregrinatio*, meaning ‘and so’ or ‘so’: 40, 8, etc. *Tamen* in the same text (37, 4, etc.) seems to be used, in most cases, merely to indicate a subordinate clause. *Magis* is much employed for ‘but’ by late writers. *Unde* sometimes means ‘therefore’ and ‘wherefore’: G. 424 (*unde inquit Dominus*); cf. §§ 70, 73.

## C. USE OF INFLECTIONS.

1. CASES.<sup>1</sup>

85. In popular speech prepositions were more used, from the beginning, than in the literary language; prepositional constructions, as time went on, increasingly took the place of pure case distinctions, and the use of cases became more and more restricted. Hence arises in late writers a great irregularity in the employment of cases<sup>2</sup>: G. 302-326, Quillacq 96-103; for African Latin, *Archiv* VIII, 174-176; for confusion after verbs and adjectives, R. 412-415.

## a. LOCATIVE.

86. The locative, rare in Classic Latin, remained eventually only in names of places. There are, however, several examples in the *Peregrinatio*: Bechtel 110, *et sic fit missa Anastasi, ut fit missa ecclesiæ*, etc. We find remnants of the locative genitive in *Agrigentū* > *Girgenti*, *Ariminī* > *Rimini*, *Clusii* > *Chiusi*, *Florentiæ* > *Firenze*, *Palestinæ* (G. 322), etc.; of the locative ablative singular in *Tiburī* > *Tivoli*; of the locative ablative plural in *Andecāvīs* > *Angers*, *Aquīs* > *Acqui Aix*, *Astīs* > *Asti*, *Finibus* > *Fimes*, *Parisiīs* > *Parigi Paris*, etc. Cf. B. Bianchi in *Archivio glottologico italiano* IX, 378. With other words, and very often with place names also, the locative was replaced by *in* with the ablative (Hoppe 32: *in Alexandria*) or by *ad* with the accusative (Urbat 10); the *domi* or *domo* of Cicero becomes *in domo* in Seneca. When the locative of names of localities was kept, it generally came to be regarded as an in-

<sup>1</sup> Cf. Pirson 169-202.

<sup>2</sup> There is confusion even in Petronius, who occasionally uses the accusative for the dative and the ablative.

variable form; we find such locatives used as nominatives from the third century on: *Lat. Spr.* 481.

#### b. VOCATIVE.

87. The vocative is like the nominative in most words in Classic Latin, and such words as had a separate vocative form tended to discard it: vocatives in *-us*, instead of *-e*, occur in Plautus, Horace, and Livy; *meus* for *mi* is very common (Regnier 34). In Vulgar Latin the vocative form probably disappeared entirely, except perhaps in a few set phrases, such as *mī dōmīne*.

#### c. GENITIVE.

88. The genitive, little by little, was supplanted by other constructions, generally by the ablative with *de* (which occurs as early as Plautus), sometimes by the dative. Examples abound: *expers partis . . . de nostris bonis*, Terence *Heaut.* IV, 1, 39; *partem de istius impudentia*, Cicero, *Verr.* II, 1, 12; *clerici de ipsa ecclesia*, Bechtel 104; *de aceto plenum*, R. 396; *de Deo munus*, R. 396; *curator de sacra via*, R. 426; *de colentibus gentilibusque multitudo magna* (also *quidam ex eis*), *Acts* XVII, 4; *possessor de propria terra*, Urbat 20; *de sorore nepus*, Pirson 194; *terminus de nostra donatione*, 528 A. D., *Archiv* I, 53; cf. Bon. 610ff. For the partitive genitive we find: *nil gustabit de meo*, Plautus, cited by Draeger I, 628; *aliquid de lumine*, Hoppe 38; *neminem de præsentibus*, Hoppe 38; *de pomis* = 'some apples,' *Per.* 40, 10; *de spiritu Moysi*, Bechtel 104; *de animalibus*, *de oleo*, etc., R. 396; *aliquid habet de verecundia discipuli*, R. 342; *numquid Zacchæus de bono habebat*, Regnier 54; *quid de scientia*, Sepulcri 217; *de studentibus*, Pirson 197. Cf. Oliver 14.

89. According to Meyer-Lübke, *Lat. Spr.* 487, the genitive probably ceased to be really popular, save in set combinations,

by the beginning of the third century. In late Latin a wrong form was often used: *a deo honorem* in an inscription in Gaul, *Zs. fr. Spr.* XXV, ii, 135; *matre meæ, alta nocte silentia*, etc., Bon. 341-342; *in fundo illa villa*, etc., D'Arbois 13; *in honore alme Maria*, etc., D'Arbois 91-93.

The genitive was retained, however, in some pronouns, in a good many set phrases, in certain words that belonged especially to clerical Latin, and probably in some proper names: *cūjus, illūjus, illōrum*, etc.; *lūnæ diēs, est ministērīi, de noctis tempore* > It. *di notte tempore* (later *di notte tempo*), etc.; *angelōrum, paganōrum*, etc.; It. *Paoli, Pieri*, etc.

#### d. DATIVE.

90. The dative was more stable than the genitive: *Lat. Spr.* 487. We find, however, as early as Plautus, a tendency to replace it by the accusative with *ad*: *ad carnuficem dabo*, Plautus, *Capt.* 1019; *ad me magna nuntiavit*, Plautus, *Truc.* IV, 1, 4; *si pecunia ad id templum data erit*, inscription of 57 B. C., *C. I. L.* IX, 3513; *apparet ad agricolas*, Varro, *De Re Rustica* I, 40; *ad propinquos restituit*, Livy II, 13. Inasmuch as the dative, in the singular of most nouns and in the plural of all, was identical in form either with the ablative or with the genitive (e. g., *causæ causis, muro muris, mari maribus*), the fear of ambiguity naturally fostered this practice and the substitution became very general in most of the Empire: *ait ad me*, *Per.* 64, 8; *dicens ad eum*, etc., Bechtel 102-103; *cum hæc ad vestram affectionem darem*, Bechtel 103; *fui ad episcopum* = 'I went to the bishop', Bechtel 104; *loquitur ad Jeremiam*, G. 329; *ad quem promissio facta*, G. 329; *ad omnem injuriam impatiens*, G. 330; *ad quem dixit*, Sepulcri 218; *Dominus ad Moysen dicit*, Urbat 12; *ad me restituit omne regnum*, Urbat 12; *ad Dei officio paratus*, Pirson 194. Cf. *Lat. Spr.* 488, Oliver

3-4. Sometimes *super*, not *ad*, was used: *imposuerat manus super eum*, Bechtel 105; *super me misericordiam præstare*, Bechtel 105.

91. The dative remained in Dacia, and lingered rather late in Gaul (*Lat. Spr.* 481); elsewhere it probably disappeared from really popular speech by the end of the Empire, except in pronouns (*cūi, illūi illī, etc., mī, tibi, etc.*).

Rumanian has kept the dative, in its original function and also as a genitive, in the first declension (as *case*), and so in feminine adjectives (as *romīne*).

#### e. ABLATIVE.

92. The analytical tendency of speech, reinforced by the analogy of prepositional substitutes for the genitive and dative, favored the use of prepositions with the ablative, to distinguish its various functions. For *de* = 'than,' see *Zs.* XXX, 641.

*Ab* is common: *ab omni specie idololatriæ intactum*, Hoppe, 36; *ab sceleribus parce*, G. 335; *a carne superatur*, G. 337; *ab scriptura sancta commemoratos*, Regnier 51; *a præmio minorem esse*, St. Cyprian, cited by Wölfflin 52; *ab Ariulfi astutia deceptus*, Sepulcri 218.

*De* is the most frequent: *erubescens de infamia sua*, Hoppe 14; *de singularitate famosum*, Hoppe 33; *nobilior de obsoletiore matrice*, Hoppe 33; *digni de cælo Castores*, Hoppe 34; *gaudet de contumelia sua*, Hoppe 34; *de victus necessitate causatur*, Hoppe 35; *de vestra rideat æmulatione*, Hoppe 36; *de manibus suis*, Bechtel 104; *de oculis*, Bechtel 104 (cf. *de se*, Bechtel 105); *occidam de lancea*, R. 393; *patrem de regno privavit*, R. 426; *de virgine natus est*, Regnier 54; *de te beati sunt*, Regnier 56. Cf. R. 392-395, G. 339-342, Regnier 54-56.

*Ex* occurs also: *ex causa humanæ salutis*, Hoppe 33; *ex infirmitate fatigata*, Sepulcri 218.

*In* is often found: *in illo die*, Hoppe 31; *quo in tempore*, Hoppe 31; *in maxilla asinae delevi mille viros*, R. 397; *in camo et freno maxillas eorum constringe*, Ps. XXXI, 9; *in amore Dei ferventes*, G. 347; *in bonis operibus abundetis*, Regnier 60. Cf. R. 396-397, G. 344-347, Regnier 58 ff.

93. Sometimes *ad* or *per* with the accusative is substituted for the ablative: *per hoc*, Hoppe 33; *ad diem*, Bechtel 103; *ad horam sextam aguntur*, etc., Bechtel 103-104; *per nomen vocavit*, Sepulcri 218; *pugnare ad ursos, ad unum gladii ictum caput desecare*, *Lat. Spr.* 488.

94. The use of prepositions became really necessary in the late spoken language, because, after the fall of final *m* and the loss of quantitative distinctions in unaccented syllables, the ablative differed little or not at all from the accusative in the singular of most words: *causam causā, donum donō, patrem patrē, fructum fructū, diem diē*. It is likely that before the end of the Empire the ablative plural form was generally discarded, the accusative being used in its stead, and that the ablative and accusative singular were pronounced alike, in all words, in most of the Latin territory. The fusion of the two cases was doubtless helped by the fact that certain prepositions might be combined with either accusative or ablative.

95. There is evidence of the confusion of accusative and ablative as early as the first century, but it was probably not very common before the third. *Cum* with the accusative is very frequent: *cum suos discentes, cum sodales*, in inscriptions, *Lat. Spr.* 488; *cum epistolam*, Bechtel 95; *cum res nostras*, D'Arbois 27. Cf. E. K. Rand in *Modern Philology* II, 263, footnote 5.

The accusative form is substituted for the ablative after

other prepositions: *a monazontes*, Bechtel 94;—*de eo torrentem*, Bechtel 96; *de actus*, Bechtel 96; *de hoc ipsud*, Bechtel 96; *de martyrium*, Bechtel 96; *de carnem*, etc., R. 406-412; *de ipsas villas*, D'Arbois 27; *de rigna nostra*, D'Arbois 70-71;—*ex fines tuos*, etc., R. 406-412;—*videbo te in publicum*, Waters Ch. 58; *in finem Deus fecit cælum et terram*, etc., Hoppe 40-41; 12 examples of *in* + acc. for abl. in *Per.*, Bechtel 97-98; *erat in medium maris*, R. 410;—*pro hoc ipsud*, Bechtel 101; *pro nos*, D'Arbois 152;—*sine fructum*, etc., R. 406-412.

96. Conversely, the ablative form is very often written for the accusative: *ad ecclesia majore*, Bechtel 94;—*ante sole*, *ante cruce*, Bechtel 95; *ante sole*, etc., R. 406-412;—*circa puteo*, Bechtel 95;—*contra ipso loco*, Bechtel 95;—*foras ecclesia*, Bechtel 96;—*in carne conversa*, etc., Hoppe 40-41; in the *Per.*, *in* + abl. for acc. is three times as common as the correct use of *in* + acc., Bechtel 94-101; *venit in civitate sua*, etc., R. 406-412;—*intra civitate sua*, Bechtel 99; *intro spelunca*, Bechtel 99;—*juxta aqua ipsa*, Bechtel 99;—*per valle illa*, and 21 other cases of *per* + abl., Bechtel 100;—*post lectione*, Bechtel 100; *post morte*, etc., R. 406-412;—*prope luce*, Bechtel 101;—*propter populo*, Bechtel 101;—*super civitate hac*, Bechtel 101.

97. The ablative was kept only in some fixed expressions, such as *hōrā*, *ist' annō*, *quōmōdo*, *parī mente*, etc.; perhaps in such phrases as It. *vendere cento soldi*, etc.; probably in some proper names with *de*, as *Della Casa*. It is likely, too, that the ablative absolute survived in a few common expressions, like It. *ciò fatto*; generally, however, in popular speech, the nominative absolute took its place: Bechtel 109-110, *et benedicens nos episcopus profecti sumus, visa loca sancta omnia* (*Per.* 45, 8), etc.

## f. ACCUSATIVE.

98. After verbs of motion *ad* was often used, sometimes *in*, instead of the simple accusative: *eamus in forum*, Waters Ch. 58; *fui ad ecclesiam*, Bechtel 103; *ad Babyloniam duxit*, G. 327; *consules ad Africam profecti sunt*, G. 328; *ad istam regionem venit*, Regnier 52. Cf. Regnier 51-52.

99. Duration of time was expressed by *per* with the accusative, also by the ablative: Bechtel 108-9, *per totos octo dies is ornatus est, tota autem nocte vicibus dicuntur psalmi*, etc.

## g. FALL OF DECLENSION.

100. By the end of the Vulgar Latin period there probably remained in really popular use (aside from pronouns and a number of set formulas) in Dacia only three cases, in the rest of the Empire only two — a nominative and an accusative-ablative. Clerics, however, naturally tried to write in accordance with their idea of correct Latin.

## 2. VERB-FORMS.

101. Many parts of the verb went out of popular use, and were replaced by other locutions; these obsolete parts were employed by writers with more or less inaccuracy. In the parts that remained many new tendencies manifested themselves.

## a. IMPERSONAL PARTS.

102. Only the present active infinitive and the present and perfect participles were left intact.

## (1) SUPINE.

103. The supine disappeared from general use, being replaced, from the first century on, by the infinitive: as *cum*

*veneris ad bibere*, St. Augustine, *Sermones* 225, Cap. 4. Cf. *Lat. Spr.* 490, Dubois 275. In Rumanian, however, the supine was preserved: Tiktin 596.

### (2) GERUND.

104. With the exception of the ablative form, the gerund came to be replaced by the infinitive, sometimes with a preposition: *dat manducare*, *Lat. Spr.* 490; *quomodo potest hic nobis carnem dare ad manducare*, R. 430; *potestatem curare, necessitas tacere*, etc., G. 363.

The ablative form of the gerund became more and more a substitute for the present participle: *ita miserrimus fui fugitando*, Terence, *Eun.* V, 2, 8; Draeger II, 847-849, cites Livy, *conciendo ad se multitudinem*, and Tacitus, *assurgens et populando*; *hanc Marcion captavit sic legendo*, Hoppe 57; *multa vidi errando*, Densusianu 179; *qui pertransivit benefaciendo et sanando*, R. 432. Cf. R. 432-433. The ablative gerund was sometimes used for a conditional clause: *cavendo salvi erimus*, Hoppe 57.

### (3) GERUNDIVE.

105. The gerundive was used as a future passive participle, with *esse*, from the third century on, in place of the future: *filius hominis tradendus est*, R. 433. Cf. R. 433-434, G. 386-388. Eventually, however, the gerundive was discarded, except in some standing phrases.

### (4) FUTURE ACTIVE PARTICIPLE.

106. The future active participle was probably rare in late Vulgar Latin, except when it was used with *esse* as a substitute for the future (as *facturus sum*). Sometimes, in a literary style, it took the place of a relative clause: *faveant mihi pro ejus nomine pugnaturus*, G. 389. Cf. G. 388-389.

## (5) PRESENT PARTICIPLE.

107. The present participle was kept, and was used as an adjective and as a noun: see Derivation, Suffixes for Adjectives, —ans. Sometimes it was employed periphrastically with *esse*: *si ipse est ascendens in cælos*, G. 389. Writers occasionally substituted it for a relative clause: *nemo mentiens plorat*, G. 388. Often, however, it was replaced by the ablative gerund: see Gerund above.

## (6) PERFECT PARTICIPLE.

108. The perfect participle was kept, and, as will presently be seen, its use was greatly extended through new methods of forming the passive and the perfect tenses. Verbs that had no perfect participle were obliged to make one.

## (7) INFINITIVE.

109. The perfect and passive infinitive forms eventually disappeared: see Voice and Tense below. In late writers, however, the perfect instead of the present infinitive is very common: R. 431–432 (*malunt credidisse*, etc.).

110. The infinitive + accusative construction was more and more avoided from the third century on: G. 371–375. It was replaced sometimes by the passive, but often by a clause introduced by *quia*, *quod*, *quoniam*, *ut*, etc.: *Eva vidisse describitur*, G. 371; *legitur dixisse Deus*, Regnier 63;—Bechtel 112–115, *dicent eo quod filii Israhel eas posuerint, sciens quod libenter haberetis hæc cognoscere, credidit ei quia esset vere filius Dei*, etc.; *perspicue exposuit quod ager mundus sit*, G. 377; *nesciebat quia Jesus erat*, G. 383; *de corpore loquor, ut spiritu valeat non ignoramus*, G. 385. Cf. G. 375–385, Bon. 659–671.

Late writers, wishing to avoid vulgarisms, often misused the infinitive + accusative: G. 371–373.

III. On the other hand, the infinitive assumed many new functions: see Supine and Gerund above. Cf. Hoppe 42-52: *Ninus regnare primus, amant ignorare, aliter exprimere non est, bonus et dicere et facere*, etc.

It was often used as a noun: *totum vivere animæ carnis est*, Hoppe 42; *ipsum vivere accedere est*, Regnier 106; *per malum velle perdidit bonum posse*, Regnier 106.

It replaced the subjunctive with *ut* and similar constructions: *vadent orare*, Bechtel 117; *revertitur omnis populus resumere se*, Bechtel 117; *valeamus assumi*, G. 363; *quæ legi digna sunt*, G. 366; *timuisti... facere*, G. 368; *non venit justos vocare*, G. 370; *venit aliquis audire*, Regnier 73; *male fecisti dare Spiritum sanctum*, Regnier 74; *mihi præcepit hæc loqui*, Bon. 673. Cf. G. 363-370, Regnier 73, Bon. 647, 671-675; P. Thielmann, *Facere mit dem Infinitiv* in *Archiv* III, 177.

It took the place of a relative or indirectly interrogative clause after certain verbs: *nesciendo quæ petere*, Venantius Fortunatus, cited in *Lat. Spr.* 490; *non habent unde reddere tibi*, R. 430.

#### b. VOICE.

112. Under the influence of *carus est*, etc., *amatus est* came to mean 'he is loved', etc. Hence *amatus fuit* signified 'he was loved': see Draeger I, 276ff. Then a whole passive inflection was made up of the perfect participle + *esse* (in northern Italy *fieri*). The old passive forms—except the perfect participle and, to some extent, the gerundive—gradually disappeared from ordinary speech. Although authors kept up the classic practice as far as they were able, some examples of the popular formation may be culled from late writings: *denuo factus filius fui*, Hoppe 60; *mors salva erit cum fuerit devorata*, Hoppe 60; *conjectus in carcerem fuerat*, Hoppe 61; *permissa est accedere*, Regnier 63.

113. As the passive inflection disappeared, deponent verbs became active. Even in Classic Latin there is often hesitation, as in the case of *frustrare frustrari, irascere irasci*, etc. Many deponent verbs are used as active verbs by Petronius. In late vulgar speech *mori, sequi*, etc., followed the same course. Cf. Bonnet 402-413.

114. In the intermediate period the passive was frequently replaced by reflexive and active constructions. When *littera scribitur* seemed archaic, and *littera scripta est* vulgar, people said *littera se scribit* and *litteram scribunt* or *litteram scribit homo*: cf. *facit se hora quinta*, Bechtel 126; *se sanare = sanari* in the 4th century, *Rom.* XXXII, 455; for the use of *homo* with the force of French *on*, see *Per.* 55, 25.

#### c. MOOD.

##### (1) IMPERATIVE.

115. The imperative came to be restricted to the second person singular and plural of the present, the subjunctive being used for the third person, and also for the first. Dubois 275 notes that the forms in *-o* are very rare in Ennodius, who lived in southern Gaul in the fifth century.

116. In negative commands the imperative was often replaced by the subjunctive, by the indicative (found in Pirminius), and in Italy, Gaul, and Dacia by the infinitive: *Lat. Spr.* 490.

##### (2) SUBJUNCTIVE.

117. The subjunctive was limited to fewer functions, being replaced by the indicative in many constructions: *cum hi omnes tam excelsi sunt*, Bechtel 115; *si scire vultis quid facitis*, Regnier 69; etc. At the end of the Vulgar Latin period it was probably used, in popular speech, very much as it is used

in the Romance languages. Late writers, while trying to follow the traditional practice, were less logical and evidently less spontaneous than Classic authors in their employment of the subjunctive.

Sometimes the subjunctive was replaced by *debeo* with the infinitive: *debeant accipi* = *accipiantur*, G. 418. Cf. § 72.

Sometimes, after *facio*, its place was taken by the infinitive: Regnier 27-28, *ecce Pater fecit Filium nasci de vergine*, etc. Cf. § 111.

In conditions not contrary to fact, in indirect discourse and indirect questions, in dependent clauses that are not adversative nor dubitative, the indicative was often substituted for the subjunctive: R. 428-430, G. 355-357, Regnier 68-71.

On the other hand, late writers often put the subjunctive where Classic authors would have put the indicative: G. 357-362.

118. The imperfect subjunctive gradually gave way to the pluperfect: this use is common in the *Bellum Africanum* (*Lat. Spr.* 489); cf. Sittl 133-134. It apparently began with *debuisset*, *potuisset*, *voluisset*, used freely for the imperfect by Gregory the Great (*Sepulcri* 226) and others, and with perfect infinitives like *tacuisse* for *tacere* (*Lat. Spr.* 489: examples from the 4th century).

The imperfect subjunctive ultimately went out of use, except in Sardinia. Writers of the third and fourth centuries show uncertainty in the use of it; R. 431 cites many examples, as *timui ne inter nos bella fuissent orta*.

In Rumanian the pluperfect subjunctive has assumed the function of a pluperfect indicative: *căntăse*, etc.

119. The perfect subjunctive was apparently confused with the future perfect indicative. It was thus preserved in Spain

and in Italian and Rumanian dialects: cf. C. De Lollis in *Bausteine* 1, and V. Crescini in *Zs.* XXIX, 619; Tiktin 596. Cf. § 124.

#### d. TENSE.

120. The present and imperfect indicative and the present subjunctive remained, in general, with their old functions; see, however, § 117. For the imperfect and pluperfect subjunctive, see § 118; for the perfect subjunctive, § 119. In the perfect, pluperfect, future, and future perfect indicative great changes took place, which led also to the formation of a new perfect and pluperfect subjunctive.

#### (1) THE PERFECT TENSES.

121. In Classic Latin *habeo* with the perfect participle was used to express a lasting condition: *Hannibal quia fessum militem praeliis operibusque habebat*, *Part. perf.* 376. It was used in the same way with adjectives: *miserum habere*, etc., *Part. perf.* 372 ff. Even in Classic Latin, however, the meaning of this locution began to shift to the perfect, or something akin to it: Cato the elder, *quid Athenis exquisitum habeam*, *Part. perf.* 516; Plautus, *illa omnia missa habeo, omnis res relictas habeo*, *Part. perf.* 535; in legal phraseology, *factum habeo*, *Part. perf.* 537-538; Sallust, *compertum ego habeo*, Draeger I, 295. The construction is very common in Cicero in a sense that closely approaches the perfect: *satis habeo deliberatum*, *Part. perf.* 415; *scriptum habeo*, *Part. perf.* 422; *rationes cognitatas habeo*, Densusianu 181; *pecunias magnas collocatas habent*, Draeger I, 294; cf. *Part. perf.* 405, 414-415, 423, 518-521, Draeger I, 294-295.

122. In late Latin this compound often had simply a perfect meaning: *metuo enim ne ibi vos habeam fatigatos*, Regnier 28; *episcopum invitatum habes*, Bon. 690. Cf. Bon. 689-691.

In popular speech it supplanted more and more the original perfect form, which was increasingly confined to its aorist function: *Lat. Spr.* 489. In the Spanish peninsula, however, and to some extent in Italy, the old perfect meaning was not entirely lost.

123. On the model of this new perfect, a compound pluperfect was constructed: Cicero, *quas in ærario conditas habebant*, Draeger I, 294; *si Dominum iratum haberes*, Regnier 28; *quam semper cognitam habui*, Sepulcri 227. In the same way a future perfect was made: *de Cæsare satis dictum habebo*, *Part. perf.* 537. Eventually an entire perfect inflection was built up with *habere* or, in the case of neuter verbs, with *esse*; its vogue began in Gaul in the fifth century, elsewhere in the sixth: *Part. perf.* 543, 541.

124. The old perfect form remained in popular use, generally with the aorist sense. Some late writers were fond of substituting for it *cæpi* with an infinitive: Waters Ch. 70, etc. Cf. § 72.

The old pluperfect indicative became rarer, but still lingered, sometimes with its original sense, sometimes as a preterit, sometimes as a conditional. The preterit use occurs in *dixerat*, *ortaret*, *transalaret* in the *Gl. Reich.*; *auret*, *furet*, *pouret*, etc., in the Old French *Sainte Eulalie*; *boltier'* in the Old Italian *Ritmo Cassinese* (*Zs.* XXIX, 620); etc. The conditional function, which came down from the Classic Latin use in conditional sentences, was preserved in Spanish, in Provençal, in some southern Italian dialects (notably in the *Rosa fresca aulentissima*), and in the Italian *fora* < *fuera*.

The old future perfect was apparently confused with the perfect subjunctive, and continued to be used, with the force of a future indicative or subjunctive, in the Spanish peninsula,

in some dialects of Italy, and in Dacia: Sp. *cantâre*, Old Sp. *cantâro*. Cf. § 119.

The old pluperfect subjunctive was used as an imperfect: see § 118.

## (2) FUTURE AND CONDITIONAL.

125. The Latin future was not uniform in the four conjugations; the formation in *-bo*, which was used in three of them and prevailed in two, was native, according to Mohl, *Pr. Pers. Pl.* 141-142, only in Rome and the immediate vicinity. Furthermore, the future in the first two conjugations was suggestive of the imperfect, and in the other two, in late pronunciation, was liable to confusion with the present subjunctive and indicative. These causes or others made the future unpopular. As the tense became rare in speech, mistakes were made in writing: *Vok.* I, 98; Regnier viii. The old *audibo*, *dormibo* forms were kept late (*Futurum* 161), and we find such errors as *respondeam* for *respondebo* (*Futurum* 158).

126. Classic Latin had some circumlocutions, such as *facturus sum*, *delenda est*, *habeo dicere*, which approached the meaning of the future. During the Empire there was a strong tendency to substitute these or other constructions for the future forms (such periphrases are particularly frequent in African church Latin):—

(1) The present indicative for the future is common in Cicero in conditional sentences: Lebreton 188-190. The substitution became frequent in all sorts of constructions: *nam si vis ecce modo pedibus duco vos ibi*, Bechtel 112; *cum volueris ire imus tecum et ostendimus tibi*, Bechtel 112; *pervidet*, Bechtel 90-91; *quando corrigis, quando mutaris? cras, inquis*, Regnier 64; *jam crastina non eximus*, Sepulcri 225. Cf. Draeger I, 286 ff.; Sepulcri 225-226.

(2) The future participle + *esse* was a favorite with late writers: *sic et nos futuri sumus resurgere*, Regnier 29. Cf. Bayard 256. See §§ 105, 106.

(3) *Velle* and *posse* + infinitive were frequent: G. 423. *Velle* in this sense was preserved in Dacia; the oldest Rumanian future is *voïŭ jurá* or *jurá voïŭ*: Tiktin 599.

(4) *Debere* + infinitive was another substitute. It was kept in Sardinian.

(5) *Vadere*, *ire*, *venire* + infinitive were used also.

127. The form that prevailed, however, was *habeo* with the infinitive: In Classic Latin *habeo dicere* = *habeo quod dicam*, being so used by Cicero and many others; later, as in Suetonius, it means *debeo dicere*: *Futurum* 48ff. Cf. Varro, *De Re Rustica* I, 1, *ut id mihi habeam curare*; Cicero, *Ad Famil.* I, 5, *tantum habeo tibi polliceri*; Lucretius VI, 711, *in multis hoc rebus dicere habemus*; Ovid, *Trist.* I, 1, 123, *mandare . . . habebam*. In these senses it was very common in late writers: *habes spectare*, Hoppe 43; *filius Dei mori habuit*, Hoppe 44; *probare non habent*, Hoppe 44; *non habent retribuere*, R. 447; *multa habeo dicere*, R. 447; *unde mihi dare habes aquam vivam*, R. 448; *exire habebat*, R. 449; *nec verba nobis ista dici habent*, Regnier 28. Cf. R. 447-449.

128. This *habeo* construction finally took the sense of a simple future: Tertullian, *aliter prædicantur quam evenire habent, cui dare habet Deus corpus*, etc., Hoppe 44-45;—Servius, *velle habet, Futurum* 180;—St. Jerome, *qui nasci habent*, G. 370;—St. Augustine, *tollere habet, Densusianu* 181; *et sic nihil habes invenire in manibus tuis, videre habetis, venire habet*, etc., Regnier 28. It had become common in Italy by the sixth century.

129. In the early stages of the Romance languages, or

possibly in the latest stage of Vulgar Latin, the infinitive came to stand regularly, though not immutably, just before the *habeo*. Finally the two words were fused into one, but this union was not completed until after the beginnings of the Romance literatures, and in Portuguese it is not completed yet: Old Sp. *cantaré* or *he cantar*; separation is common in Old Provençal, and occurs in Old Italian; Pg. *fazel-o-he*. The earliest examples of the Romance future are found in Fredegarius: *Justinianus dicebat 'daras'*, Haag 54; *addarabo*, Haag 55. See Morphology.

130. On the model of this new form, an imperfect of the future, or *conditional*, was constructed. The phrase existed, ready for use, in Classic Latin, where it was employed with an implication of obligation or necessity. So it seems to be used by Tertullian, although sometimes with him the meaning borders on a real conditional: *non traditus autem traduci habebas, ista civitas esterminari haberet quod esset venturus et pati haberet*, etc., Hoppe 43-45.

In Classic Latin, in place of *amassem* in the conclusion of a conditional sentence, *amaturus eram* or *fui* was often used; and when *amaturus sum* was replaced by *amare habeo*, it was natural that *amaturus eram* should give way to *amare habebam*. Furthermore, to match such a sentence as *dicit quod venire habet*, there was needed a past construction like *dixit quod venire habebat* or *habuit*; and corresponding to *si possum venire habeo*, something like *si potuissem venire habebam* or *habui* was called for.

St. Cyprian and St. Hilary seem to show a simple conditional use of the compound: *quod lex nova dari haberet*, Bayard 256; *manifestari habebat*, Bayard 257;—*Herodes principes sacerdotum ubi nasci habebat Christus interrogat*, Quillacq 116. There are sure examples from the fifth century on: *Lat. Spr.* 489.

The development of this form in the Romance languages was, in general, parallel to that of the future: see Morphology.

The origin of the Rumanian conditional, *cîntareași*, is not obvious; for a full discussion of the question, see H. Tiktin, *Die Bildung des rumänischen Konditionalis* in *Zs.* XXVIII, 691.

### III. PHONOLOGY.

---

#### A. SYLLABICATION.

131. The principles of syllabic division are rather difficult to establish. The Latin grammarians seem to have given no heed to actual speech, but to have followed the usage of Greek spelling, supporting it with purely theoretical considerations. Cf. S. 132-151. According to these writers, the syllable always ended in a vowel, or in a liquid or nasal followed by another consonant in the next syllable, or in half of a double consonant: *a-ni-ma, no-ctem, pro-pter, a-mnis; al-ter, in-fans; sic-cus, mit-to*. The division of *s* + consonant they regard as uncertain (*a-s-trum*); doubtless in reality the *s* was nearly syllabic, as in Italian. They add that etymological considerations often disturb the operation of the rule, as in *ob-liviscor*, etc.

132. In point of fact, however, all consonant groups, except a mute + a liquid, made position and attracted the accent: *perféc-tus*, and not *pérfe-ctus*. It is altogether likely, then, that a consonant group, in the spoken language, was usually divided after the first consonant: *no-ctem, prop-ter*. A single consonant between vowels certainly went with the second: *po-si-tus*.

The group mute + liquid makes position in the older dramatists: Nævius accents *intégram*, *Lat. Spr.* 466. In the Classic poets it may or may not make position. Quintilian I, 5 recommends *ténebræ, vólucres, pháretra*, etc. In Vulgar Latin this combination almost invariably attracts the accent: *cathédra*. It is likely that in Old Latin the division came before the

liquid, but subsequently, after the accent had become fixed on the preceding vowel, both consonants were carried over: *cólub-ra*, *co-lúb-ra*, *co-lú-bra*.

**133.** We have reason to believe that in closely connected speech a final consonant was carried over to the next word, if that word began with a vowel: *cor exsultat* = *co r-exsultat*.

## B. ACCENT.

**134.** The Latin accent was probably from the beginning a stress accent. In the earliest stage of the language it apparently fell regularly on the first syllable: Corssen II, 892-906; S. 30-34; *Franz.* I, 13. The Classic Latin system—according to which the accent falls on the penult if that syllable is long, otherwise on the antepenult—developed as early as literature began, and remained, both in the literary and in the spoken language, through the Classic period; even after the distinctions of quantity were lost, the place of the accent was unchanged: *bonitátem*, *cómpŭto*, *delécto*.

The penult vowel before mute + liquid (cf. § 132) normally has the stress in Vulgar Latin: *cathédra*, *colúbra*, *intégram*. There seem to be a few exceptions to the rule: Old Fr. *palpres* < *pálpebras*, Old Fr. *poltre* < \**púllitra*, and perhaps some others.

### I. PRIMARY STRESS.

**135.** We have seen that Vulgar Latin regularly accents according to the Classic quantitative accentuation. There are, however, some cases in which the Classic principle fails to operate or the Classic stress has been shifted:—

#### a. VOWELS IN HIATUS.

**136.** Accented *e* and *i*, when immediately followed by the vowel of the penult, became *y*, the accent falling on the

following vowel: *mulĭeris* > *muljĕris*, S. 51, *Lat. Spr.* 468; *putĕōlis* > *putjōlis*, *C. I. L. X*, 1889 (PVTEÓLIS); so *parĭētes* > *parjĕtes* > *parĕtes*,<sup>1</sup> *C. I. L. VI*, 3714 (PARETES). This change seems to be due to a tendency to shift the stress to the more sonorous of two contiguous vowels: cf. O. Jespersen, *Lehrbuch der Phonetik*, p. 192. It was favored also by the analogy of *múlier*, *púteus*, *páries*, etc., in which the vowel in hiatus is atonic.

137. Accented *u*, when immediately followed by the vowel of the penult, became *w*, the accent falling on the preceding syllable: *bat(t)úĕre* > \**báttuere* > *báttere*; *consúĕre* > \**cónsuere* > *cónsere*; *habúĕrunt* > \**hábuĕrunt*; *tenuĕram* > \**ténuĕram*. Here the shift was apparently due in each case to analogy, *battuere* being influenced by *báttuo*, *consuere* by *cónsuo*, *habuerunt* by *hábuĭt*, *tenueram* by *ténui*, etc.

138. Aside from these cases, hiatus seems to have had no effect on the accent in Latin. It is possible, however, that *dúos*, *súos*, *túos* were sometimes pronounced *duós*, *suós*, *tuós*.

#### b. COMPOUND VERBS.

139. Verbs compounded with prefixes were generally reconstructed with the accent and the vowel of the simple verb, provided the composite nature of the formation was understood and the parts were recognized (cf. § 31): *dĕfĭcĭt* > \**disfácĭt*, *dĭsplĭcĭt* > \**displácĕt*, *ĭmplĭcĭt* > \**implĭcĭt*, *rĕddĭdĭ* > *reddĕdĭ*, *rĕquĭrĭt* > \**requĕrĭt*, *rĕtĭnĕt* > \**retĕnĕt*, etc. Cf. *Gram.* II, 668-670. So *calefacĭs*, S. 56; *condedit*, *perdedĭt*, *reddedit*, *tradedit*, S. 54; *addĕdĭ*, *adstĕtĭ*, *conteneo*, *credĕdĭ*, *inclausus*, *prestĕtĭ*, etc., *Sepulcri* 213-215. On the same plan new verbs were formed: \**de-mĭnat*, *re-nĕgat*, etc.

<sup>1</sup>*ĭ* regularly became *ĕ*; but if the preceding consonant was *l*, it was palatalized: hence *parĕtes*, but \**mul'ĕres*. Cf. § 225.

*Récipit* became \**recipit*, the composite character of the word being felt, although the compound was no longer associated with *capere*.

In *colligo* and some others not even the composite nature was perceived, the simple verbs having become rare or having taken a different sense: *legere*, for instance, came to be used only in the sense of 'read.'

### c. ILLAC, ILLIC.

140. The adverbs *illāc*, *illīc* accented their last syllable through the analogy of *hāc*, *hīc*. Priscian says "*illīc* pro *illice*": S. 42.

### d. FICATUM.

141. There existed in Greek a word *συκωτόν* (Pirson 40), 'figlike', which was applied by cooks to a liver. It is found in late Latin in the form *sycotum*, which should properly have been pronounced *sycōtum*; for some unknown reason, perhaps under the influence of a vulgar \**hēpāte* for *hēpar*, 'liver', it probably became \**sēcotum*.

Through this word there came into use the culinary terms *fīcātum*, \**fīcatum*, \**fēcatum*, \**fēcotum*, \**fēcitum*, all meaning 'liver.' *Fīcātum*, a simple translation of *συκωτόν*, prevailed in Dacia, Rætia, and northern Italy. *Fēcatum* or *fēcotum*, a fusion of *fīcātum* and \**sēcotum*, was preferred in central and southern Italy. *Fīcatum*, a cross between *fēcatum* and *fīcātum*, was kept in Sicily and in the Spanish peninsula. Sardinia preserved both *fīcātum* and *fīcatum*. Gaul had *fīcatum* and *fēcatum*; later, by a change of suffix, *fēcitum*. See G. Paris in *Miscellanea linguistica in onore di Graziadio Ascoli* 41; H. Schuchardt in *Zs.* XXV, 515 and XXVIII, 435; L. Clédat in *Revue de philologie française et de littérature* XV, 235.

## e. NUMERALS.

142. The numbers *vīgīntī*, *trīgīnta*, *quadrāgīnta*, *quīnquāgīnta*, etc., were sometimes accented on the antepenult: Consentius mentions a faulty pronunciation *trīgīnta*, Keil V, 392, lines 4-5; *quarranta* occurs in a late inscription, *Vok.* II, 461, Pirson 97. See M. Ihm in *Archiv* VII, 69-70; G. Rydberg in *Mélanges Wahlund*, 337. The shift was probably due to a natural tendency to differentiate the numerals from one another: compare the floating accent in English *thirteen*, *fourteen*, etc.

## d. GREEK WORDS.

143. The accentuation of Greek words was varied. Sometimes the Greek stress was preserved, sometimes the word was made to conform to the Latin principle.

## (1) GREEK OXYTONES.

144. Greek oxytones, when borrowed by Latin, were stressed according to the Latin system: *δραχμή* > *drách(ũ)ma*, *ἐπιστολή* > *epístŭla -ōla*, *λαμπάς* > *lámpa(s)*, *μηχανή* > *mác(h)-ina*, *παραβολή* > *parábŭla*, *πειρατής* > *piráta*, *σπασμός* > *spásmus*, *ταπεινός* > \**tapínus*. Cf. S. 42 ff., Claussen 809.

*Συκωτόν*, however, apparently stressed the first syllable: see § 141.

## (2) GREEK PAROXYTONES.

145. Greek paroxytones were mostly accented according to the quantity of the penult: *γραφίον* > *gráphŭm*, *καμάρα* > *cámĕra*, *μαγίδα* > *mágĭda*, *παλάμη* > *pálma*, *πολύπους* > *pólŭpus*,<sup>1</sup> *πορφύρα* > *púrŭra*, *φαρέτρα* > *phárĕtra* or *pharĕtra* (cf. § 134).

*Πτισάνη* (> *ptísāna*) > It. *tisána*, *φιάλη* (> *phĭála*) > It. *fiála*, *χολέρα* (> *chólĕra*) > It. *colĕra*, etc., may represent popular terms borrowed by ear from the Greek, with the Greek stress,

<sup>1</sup> Occasionally the accent was kept by doubling the consonant, as *polĭppus*.

but it is more likely that the Italian forms are book-words with a shifted accent.

Cf. S. 42 ff., Claussen 810-811.

146. The ending *-ía* was at first generally assimilated to the Latin *-ia*: βιβλία > *bíblia*, βλασφημία > *blasphémia*, ἐκκλησία > *ec(c)lésia*, ἱστορία > *história*, σηπία > *séπia*, συμφωνία > *symphónia*. Later a fashionable pronunciation *-ía*, doubtless favored by Christian influence, penetrated popular speech (σοφία > *sophía*, etc.) and produced a new Latin ending *-ía*, which was used to form new words: see Derivation, Suffixes for Nouns. Cf. Claussen 812. The pronunciations *melodía*, etc., and *sophíia*, etc., are attested: S. 55-56.

The endings *-eía*, *-eíon* sometimes became *-eá -eía*, *-eum -eum*, sometimes *-eā*, *-eum*: βαλανεῖον > *bálnēum*, κωνωπέιον > *conopēum* *-eum -eum*, πλατεῖα > *platēa platēa*. Cf. Claussen 813-814.

### (3) GREEK PROPAROXYTONES.

147. The treatment of proparoxytones is complicated. Cf. S. 42-49, Claussen 814-821, *Gram.* I, 35, § 17, A. Thomas in *Rom.* XXXI, 2-3. Late Latin grammarians mention a pronunciation of Greek words with the Greek accent (S. 42), but their statements are too vague to be of use.

A few early borrowed words perhaps show the Old Latin accentuation: κυπάρισσος > \**cúparissos* > *cupressus*. Cf. Claussen 809.

148. When the penult was short, the accent remained unchanged: γένεσις > *géné̄sis*, κάλαμος > *cálāmus*, κόλαφος > *cólāphus*, πρεσβύτερον > *presbýtērūm* (with a new nominative *présbyter*).

149. When the penult vowel was in position, it took the accent: ἄβυσσος > *abýssus*, βάπτισμα > *bartísma*, τάλαντον > *taléntum*.

\*Ἐγκαυστον, however, became both *encāustum* and *ēncaustum*.

Occasionally the consonant group was simplified and the accent remained: καρρόφυλλον > \**garófulum*.

150. When the penult vowel was long and not in position, it apparently took the accent in book-words but not in words learned by ear (S. 48-49): κάμηλος > *camēlus* -*ēllus*, κάμινος > *camīnus*, κροκόδειλος > *crocodīlus*, φάλλαίνα > *ballēna*; ἄγκυρα > *āncōra*, βλάσφημος > *blásphēmus* (Prudentius), βουτύρον > *bútȳrum* (Æmilius Macer), Ἰάκωβος > *Jácobus*, σέλινον > \**sélinum*.

Some words have both pronunciations: εἶδωλον > *īdōlum* (both in Prudentius: *Lat. Spr.* 466), ἔρημος > *erēmus* *erēmus* (Prudentius), σῖνάπι > *sīnapi* *sināpi*.

#### e. OTHER FOREIGN WORDS.

151. Some words borrowed from other languages kept their original accent, contrary to Latin rules (S. 49): Umbrian *Pisaurum* > It. *Pésaro*, etc.; Celtic *Baiócasses* > Fr. *Bayeux*, *Durócasses* > Fr. *Dreux*, *Tricasses* > Fr. *Troyes*, etc., Dottin 103.

152. Germanic words were apparently made to conform to Latin types: *Húgo Húgun* > *Húgo Hugónem* > Fr. *Húes Huón*; Kluge 500.

#### 2. SECONDARY STRESS.

153. As far as we can determine the rhythm of Vulgar Latin, judging from phonetic changes and from semi-popular late Latin verse, it consisted in a tolerably regular alternation of accented and unaccented syllables. Thus Sedulius, at the beginning of the fifth century, writes:

Beátus áuctor sǽculi  
 Servíle córpus ínđuít,  
 Ut cárne cárnem líberáns  
 Ne pérderét quos cóndídít.

The secondary stress, then, fell on the second syllable from the tonic: *cupīdītōsus*, *felicītātem*; *dōlōrōsa*, *lācrīmōsa*; *Cēsārēm*, *Gāllīās*. In some derivatives, however, the root syllable may have received an irregular stress through the analogy of the primitive: \**ārboricēllus*.

In late formations *e* or *i* in hiatus did not count as a syllable: \**comīnitiāre*.

154. When the secondary stress preceded the tonic, it was strong, and the vowel bearing it was apparently treated as an accented vowel: \**amicītātem* > Pr. *amistāt*; so, in Italian, *Buólognīno* beside *Bolōgna*, *Fiórentīno* beside *Firenze*, *vétto-vágliā* beside *vittória*.

When it followed the tonic, it was weak, but probably the vowel bearing it had more force than a wholly unaccented final vowel: *sócērt* > Pr. *sózer*, *plácitūm* > Pr. *plach*; but *clérī-cūm* > Pr. *clérque* while *clér-cum* > Pr. *clerc*, *cólāphūm* > Pr. *cólbe* while *cól-pum* > Pr. *colp*.

155. In many cases the intervening vowel fell out or lost its syllabic value. Then the primary and the secondary accent were brought together, and the secondary was shifted or lost: \**parābulāre* > \**parāulāre* > \**pāraulāre*, *cálidūs* > *cáldus*, *filiūs* > *filius*.

#### UNSTRESSED WORDS.

156. Short, unemphatic words, in Latin as in other languages, had no accent, and were attached as additional syllables to the beginning or end of other words (S. 38-39): *non-ámat*, *áma-me*, *te-videt*, *dó-tibi*, *cave-fácias*, *circum-lítora* (Quintilian I, 5). Many words, especially prepositions and conjunctions, as well as some adverbs and pronouns, were used only as enclitics or proclitics.

157. If such particles had more than one syllable, they tended to become monosyllabic: unstressed *magis*, perhaps influenced by *plus*, became \**mais* and \**mas*. A dissyllabic proclitic beginning with a vowel seems to have regularly lost that vowel: *illum videt* > 'lu' *videt*; *ecce hic* > 'c'ic (but *écce hic* > *ecc'ic*); *ecum istum* > 'cu' *istum* (but *écum istum* > *eccu'istum*). For elision, see *Franz.* 2 II, 73-79, 379-390.

158. Words sometimes stressed and sometimes unstressed tended to develop double forms: *illās* > *illas* and \**las*, *sūa* > *sua* and *sa*. Cf. S. 56-57.

### C. QUANTITY.

159. We must distinguish between the quantity of vowels and the quantity of syllables. Every Latin vowel was by nature either long or short; how great the difference was we do not know, but we may surmise that in common speech it was more marked in stressed than in unstressed vowels. A syllable was long if it contained (1) a long vowel or a diphthong or (2) any vowel + a following consonant. If, however, the consonant was final and the next word began with a vowel, the consonant, in connected speech, was doubtless carried over to the next syllable and did not make position: see § 133. For the syllabication of mute + liquid, see §§ 132, 134.

#### 1. POSITION.

160. In some of the Romance languages position checked the development of the preceding vowel, and it is probable that the beginnings of this differentiation go back to Vulgar Latin times: *pa-rem* > Old Fr. *per*, *par-tem* > Fr. *part*. Mute + liquid did not prevent the development: *pa-trem* > Fr. *pere*. Neither, apparently, did a final consonant (cf. § 133): *sa-l* > Fr. *sel*.

Compare Italian *fiero* < *fě-rus*, *ferro* < *fěr-rum*.; *petto* < *pěc-tus*, *pietra* < *pě-tra*, *fiel(e)* < *fě-l*; — *fuore* < *fō-ris*, *collo* < *cōl-lum*; *corpo* < *cōr-pus*, *cuopre* < \**cō-p'rit*, *cuor(e)* < *cō-r*.

161. Early in the Empire *ss* after diphthongs and long vowels was apparently reduced to *s* (S. 112–120): *cāssus* > *cāsus*, *caussa* > *causa*, *formōssus* > *formōsus*, *glōssa* > *glōsa*, *mīssit* (S. 118: *mīssit*) > *mīsit*. This did not occur, however, in the contracted endings *-āsse -āssem* etc., *-ēsse -ēssem* etc., *-īsse -īssem* etc.

Similarly one *l* was lost in *māllo*, *mīllia* (but not in *mīlle*: Pompeius, S. 127), *nōllo*, *paullum*.

162. In Latin texts there is much confusion of single and double consonants, especially before the accent: *bal(l)æna*, *buc(c)īna*, *cot(t)idie*,<sup>1</sup> *ec(c)lesia*,<sup>2</sup> *glut(t)ire*, *mut(t)ire*, *tap(p)ēte*, *ves(s)īca*, etc. Cf. S. 111–132, Stolz 223–224. In some words this may result merely from bad spelling; but often it must represent an actual difference in pronunciation, as seems to be the case with the doublet *cīto* > Sp. *cedo*, *cīto* (*C. I. L.* VIII, 11594) > It. *petto*. Cf. § 163.

163. Many words certainly had two forms, doubtless belonging to different Latin dialects, — one with a long vowel + a single consonant, the other with a short vowel + a double consonant: *brāchium brācchium*; *būca būcca*; *camēlus camēllus*, where we have perhaps only a change of suffix, cf. § 42; *cīpus cīppus*; *cūpa, cūppa*, giving Sp. *cuba*, Fr. *cuve*, It. *cupola* and Sp. *copa*, Fr. *coupe*, It. *coppa*; *glūto glūtto*; *hōc erat hōcc erat*, S. 125–126 (Velius Longus and Pompeius); *Jūpiter Jūppiter*; perhaps *lītera līttera*; *mūcus mūccus*; *pūpa pūppa*; *stūpa stūppa*; *sūcus sūccus*. Cf. Stolz 222–225.

<sup>1</sup> The antiquity of double *l* is attested by an old inscription: *Lexique* 101.

<sup>2</sup> The single *c*, which prevailed in Romance, is common in Greek and Latin manuscripts: S. 129.

To these may perhaps be added: *bāca bacca*; *bāsium* \**bāssium* (> It. *bascio*); *brāca bracca*; \**būtis* (< βούτις) \**büttis* (> It. *botte*); *cāseus* \**cāsseus* (> It. *cascio*); *chāne* (< χάνη) *channe*; *conseruāmus conseruammus*, *Vok.* I, 261; *jubēmus jubemmus*, *Vok.* I, 261 (*iubimmus iobemmus*); *lītus littus*; *mīsi* \**mīssi* (> It. *messi*).

Beside the two forms indicated, there was occasionally a third, seemingly a cross between the other two, having both the long vowel and the double consonant: *anguīla* (> Sp. *anguila*) + *anguilla* = \**anguilla* (> It. *anguilla*); \**stēla* (> Old Fr. *esteile*: cf. *Lexique* 95-98) + *stēlla* (> It. dialect *stella*) = \**stēlla* (> It. *stella*; cf. *Vok.* I, 339, *stilla*); *strēna* (> Old Fr. *estreine*) + *strēnna* = \**strēnna* (> It. *strenna*, Sic. *strinna*); *tōta* (> Sp. *toda*) + *tōtta* (Keil V, 392<sup>1</sup>) = \**tōtta* (> Pr. *tota*, Fr. *toute*).<sup>2</sup> So perhaps Diomedes' *littera*: *Archiv* XIV, 403.

164. In late Latin inscriptions and manuscripts a consonant was sometimes doubled before *r* or *u*: *acqua*, *bellua*, *frattrē*, *latrones*, *matrona*, *strennuor*, *suppra*, *suppremis*, *tennis*. Cf. S. 122, Stolz 223. This doubling indicates in most cases a local pronunciation, prevalent in Africa or in Italy. According to F. G. Mohl, *Zs.* XXVI, 612, a consonant was doubled before *i* and *u* in the old Italic dialects: compare the Italian doubling in *fabbro*, *tenne*, *volle*, etc. In *aqua* the double consonant, attested by inscriptions and by Christian poets, was very widespread and prevailed in Italy, Rætia, and a large part of Gaul. See Clara Hürlimann, *Die Entwicklung des lateinischen aqua in den romanischen Sprachen*, reviewed by Meyer-Lübke in *Ltblt.* XXIV, 334.

<sup>1</sup> Consentius: "per adjectionem litteræ tottum pro toto." Cf. *Gram.* I, 488, § 547; *Lexique* 98-104. According to *Lat. Spr.* 485, *tottus* was used by Pirminius.

<sup>2</sup> For \**tüttus* see § 204(2).

## 2. VOWEL QUANTITY.

165. Originally, perhaps, long and short vowels were distinguished only by duration, the vowels having, for instance, the same sound in *lātus* and *lātus*, in *dēbet* and *rēdit*, in *vīnum* and *mīnus*, in *nōmen* and *nōvus*, in *ūllus* and *mūltus*. However this may have been, long and short *e*, *i*, *o*, and *u* were eventually differentiated, the short vowels being open while the long were close: *vendo sentio*, *pīnus pīper*, *solus solet*, *mūlus gula*. That is, for the vowels of brief duration the tongue was not lifted quite so high as for those held longer. Later, in most of the Empire, *i* and *u* were allowed to drop still lower, and became *e* and *o*: see §§ 201, 208. In the case of *a*, which is made with the tongue lying flat in the bottom of the mouth, there was no such differentiation.

According to Meyer-Lübke, *Lat. Spr.* 467, the distinction was clear by the first century of our era. In *Vok.* I, 461, II, 146, III, 151, 212, is given the testimony of grammarians, all of later date; in *Vok.* II, 1 ff., the evidence of inscriptions. Marius Victorinus, about 350 A. D., distinguishes two *e*-sounds (S. 174, 182); Pompeius, about 480, cites Tertullian for an *e* similar to *i*, and several fifth century grammarians plainly distinguish *e* from *e* (S. 176, 182); from the second century on *æ* was often used for *e* in inscriptions (S. 183-184). Terentianus Maurus, by 250, distinguishes *o* from *o* (S. 175, 211), and so do other grammarians (S. 211). Writers do not clearly distinguish *i* and *i*, until Consentius, in the fifth century (S. 193); *e*, however, is often used for *i* in inscriptions, as *menus*, etc., and *i* for *e*, as *minses*, etc. (S. 195, 200-201). None of the grammarians apparently distinguished *u* and *u*, but *o* is used for *u* in inscriptions, as *ocsor*, *secondus*, etc. (S. 216-217).

166. In open syllables, if the word is used in verse, the quantity of the vowel is in general easily ascertained. In

closed syllables and in words not used by poets the quantity is in many cases doubtful; but it is sometimes given by grammarians, sometimes marked in inscriptions, sometimes conjectured from the etymology, and often shown by subsequent developments in the Romance languages. Occasionally the testimony conflicts: some inscriptions have CARISSIMO, etc., others KARESSIMO, etc. (S. 98, 99); Aulus Gellius prescribes *dīctum*, but an inscription has DICTATORI (S. 105); Classic Latin offers *frīgīdus* (cf. FRIGIDA, S. 105), but the Romance languages, except Spanish, require a short *i*; some Romance forms support Classic *nūtrīre*, others demand *ŭ*; *ūndĕcim*, *lūrīdus*, *ūltra* were apparently pronounced also with short *u* (S. 81-82); Fr. *loir* calls for \**glĭrem* beside *glĭrem*.

#### a. VOWELS IN HIATUS.

167. Vowels in hiatus with the last syllable offer difficulties. The Classic rule that a vowel before another vowel is short is not absolute even for verse, and the practice of poets was not always in accordance with spoken usage. *Dĭes*, *pĭus* kept their originally long vowel, attested by inscriptions (DĪES PĪVS PĪVS, S. 93; cf. *Substrate* II, 101-102); so *cūi*, proved by old inscriptions; and, at least in part, *fūi*, found in inscriptions, in Plautus, and in Ennius (S. 93): these preserved their close vowel in the Romance languages.

Naturally long vowels, then, probably kept their original quantity in hiatus. Naturally short vowels doubtless had their regular development also: *dĕus* = *dĕus*, although we do find the spellings *dĭus* and *mĭus* (S. 187); *dŭo* > *dŭi* = *dŭi*; *vĭa* = *vĭa*. At a later stage, after *ŭ* had become *o* (see §§ 165, 208), any *o* before *u* was apparently differentiated into *o*: *ōvum* > *oŭm* (cf. § 324) > *oŭm* (and also *oŭum*, with a restoration of the *v* through the plural *ova*); *sŭus* > *sous* > *sous* (S.

216, Pirson 16). There may have been other special variations in different countries. Cf. § 217.

For a different theory, see *Gram.* I, 246-248. For another still, see A. Horning in *Zs.* XXV, 341.

168. *Quia*, used for *quod* in late Latin, had a peculiar development from the sixth century on: before a vowel it was pronounced *qui'* and was confused with *quid*, which had begun to assume the functions of *quod* (see §§ 69, 82; cf. *Franz.* 2 II, 352-355); before a consonant, under the influence of *qua* and *qua(m)*, it became *qua*. Cf. *Franz.* 2 II, 357-390; J. Jeanjaquet, *Recherches sur l'origine de la conjonction 'que' et des formes romanes équivalentes*, 1894.

169. *Plüere* was supplanted in popular usage by *plövere* (*Lat. Spr.* 468). *Plüvia*, on the other hand, gave way to \**plöja*. Cf. § 208, (4).

#### b. LENGTHENING BEFORE CONSONANTS.

170. According to some grammarians, vowels were lengthened before *j*, as in *ējus*, *mājor*. The Romance languages, however, point to open vowels in *pejor*, *Troja*. The apparent contradiction disappears if we accept the statement of Terentianus Maurus, 250 A. D., who says (S. 104) that the vowels in these words were short, but the *j* was doubled — that is, there was a glide from the vowel to the *j*, which prolonged the first syllable: not *pējor*, *Trōja*, but *pēijor*, *Trōija*. We find in inscriptions such spellings as *Aiiax*, *coiux*, *cuiius*, *eiius*, *maiioem*, etc.: S. 236, Pirson 74. Quintilian states that Cicero preferred *aiio*, *Maiiam*, with double *i* (S. 236). Velius Longus adds that as Cicero approved of *Aiiaem*, *Maiiam*, we should write *Troiia* also (S. 236). Priscian analyzes *pejus*, etc., into *pei-ius*, *ei-ius*, *mai-ius* (Édon 207).

171. When *n* was followed by a fricative (*f*, *j*, *s*, or *v*), it regularly fell early in Latin, and the preceding vowel was lengthened by compensation: *cēsor*, *cōjugi*, *cōventio*, *īferi*. But inasmuch as *n* occurs before *f*, *j*, and *v* only at the end of prefixes, it was usually restored by the analogy of the full forms *con-*, *in-*: so *infantem* through *indignus*, etc.; *conjungere* through *conducere*, etc.; *convenire* through *continere*, etc. Before *s*, however, *n* occurred in the middle of many words, and the fall was permanent, the *n* being restored only in compounds before initial *s*: *cōsul*, *īsula*, *mēsis*, *spōsus*; but *insignare*. Cf. § 311.

It is altogether likely that the *n* fell through nasalization of the vowel: *consul* *cōnsul* *cōsul* *cōsul*. If so, all trace of the nasality disappeared, but the length and the close quality of the vowel remained. Cf. *Archiv* XIV, 400.

Romance and late Vulgar Latin words with *ns* (except in compounds as above) are either learned terms or new formations: so *pensare*, beside the old popular \**pēsare*.

See S. 77-78; for the usage of Cicero and others, S. 86; for inscriptions, S. 89.

172. (1) Vowels were apparently lengthened before *ŋk*: *quīnque*, *sānctus*, etc. Cf. S. 78; for inscriptions, S. 90.

(2) Before *gn* vowels were lengthened according to Priscian (S. 91), and inscriptions mark length in *dīgnus*, *rēgnum*, *sīgnum* (cf. *sigillum*), S. 91. The Romance languages, however, call for *dignus*, *lignum*, *pignus*, *pugnus*, *signum*. Priscian, who wrote in the sixth century, is a very late authority, and some philologists regard the passage in question as an interpolation of still later date; still the evidence of the inscriptions remains. According to Meyer-Lübke (*Gram.* I, 54, *Lat. Spr.* 467), the vowel was lengthened, but only after *ī*, *ū* had become *i*, *u*, so that the result was *ī*, *ū*, not *ī*, *ū*; cf. *BENEGNVS*

in *C. I. L.* XII, 2153, which is doubtless equivalent to the BENIGNUS of *C. I. L.* XII, 722. This seems a very plausible explanation. C. D. Buck, however, in the *Classical Review* XV, 311, prefers to regard such forms as *dignus*, in so far as they existed at all, as due to a vulgar or local pronunciation.

### c. DISAPPEARANCE OF THE OLD QUANTITY.

173. The difference in quantity was probably greater and more constant in accented than in unaccented vowels. The distinctions in quality, resulting from the original quantity, remained, in stressed syllables, through the Latin period and developed further in the Romance languages; in unaccented syllables the distinctions were doubtless weaker, and were often obliterated.

174. The old quantity itself was lost, for the most part during the Empire. It seems to have disappeared from *unstressed syllables* by the third or fourth century; but confusion set in as early as the second. The nominative singular *-is* and the plural *-ēs* were confounded by 150 A. D. (S. 75), and *æ* was often used for *ē* in inscriptions (S. 183-184: *benæ*, etc.). Terentianus Maurus, about 250, tells us that *au* is short in unaccented syllables, as in *aut* (S. 66). Other grammarians warn against quantitative mistakes: so Servius, in the fourth century, "*miseræ* dativus est non adverbium," etc. (S. 226). The poetry of Commodian, in the third or fourth century, seems to observe quantity in stressed and to neglect it in unstressed syllables, and we find numerous metrical errors in other late poets: cf. J. Cornu, *Versbau des Commodian* in *Bausteine* 576.

On the other hand, Latin words borrowed by the Britons, mostly in the third and fourth centuries, show, through a shift of accent, the preservation of quantity in post-tonic

syllables: Loth 72, 65. Moreover, Latin words borrowed by Old High German indicate a retention of long *i* and *u* before the accent: Franz.

It is possible that the quantity of unstressed vowels was better kept in the provinces than in Italy.

175. In *accented syllables* there are sporadic examples of confusion by the second century, as *æques* for *ēques* in 197 (S. 225); but probably the disappearance of the old distinction was not general before the fourth and fifth centuries, and not complete before the end of the sixth. Servius, in the fourth century, criticizes *Rōma* (S. 106). St. Augustine declares that "Afræ aures de correptione vocalium vel production non iudicant" (*Lat. Spr.* 467). Pompeius and other grammarians blame the confusion of *æquus* and *ēquus* (S. 107, 178). Much late poetry disregards quantity altogether.

On the other hand, Latin words borrowed by the Britons from the second to the fifth century, but mostly in the third and fourth, show the preservation of the quantity of stressed vowels: Loth 64. Latin words in Anglo-Saxon, taken over in the fifth and sixth centuries, retain the quantity of vowels that bear the accent: Pogatscher. The Latin words in Old High German, too, distinguish by quantity *ī* and *ī*, *ē* and *ĕ*, *ō* and *ō*, *ū* and *ū*; *ē*, *ō* are distinguished by quality also, for *ē* > *ē* while *ĕ* > *e* or *i*, *ō* > *ū* or *ō* while *ō* > *o*: Franz.

#### d. DEVELOPMENT OF A NEW QUANTITY.

176. At the end of the Latin period a new system of quantity grew up, entirely diverse from the old, and based on the situation of the vowel. In most of the Empire accented vowels not in position were pronounced long, all other vowels short: *sānctō vālēs, vēndō vēnīs, dīxī plīcās, fōrmās fōrī, frūctūs*

*gūlē; cā-thē-drā tē-nē-brās; cō-r mē-l nō-s rē-m trē-s.* In Spain and in some parts of Gaul, all stressed vowels were apparently long: *tēmpūs, pōrta.*

This new pronunciation doubtless sprang up with the disappearance of the old, which it displaced. Meyer-Lübke in *Gram.* I, 561-562, says that the development was different and independent in the several Romance languages; in *Einf.* 103-104, he describes it as common to all, but as posterior to the fifth century; in *Lat. Sp̄r.* 467, he puts it in the fourth and fifth centuries.

177. It is likely that these new long vowels were pronounced in most regions with a circumflex intonation, which in the transition from Latin to the Romance languages resulted in diphthongization in a large part of the Empire, particularly in northern Gaul: *vēnis* > It. *veni*, *gūla* > Old Fr. *goule*, *cōr* > It. *cuor*, *nōs* > Fr. *nous*, *trēs* > Old Fr. *treis*. Portugal, southern Gaul, Lombardy, and Sicily apparently did not participate in this early breaking; and the conditions of diphthongization were very diverse in different localities. The vowels most affected were *ē* and *ō*.

An isolated example, perhaps only a blunder, occurs in an inscription made a little before 120 A. D.: NIÉPOS, beside NEPOTIS (A. Zimmermann in *Zs.* XXV, 735). In 419 A. D. we find VOBIT for *obiit* (S. 213).

#### D. VOWELS.

178. Latin had the vowels *ā, ē, ĭ, ō, ū*, and in unaccented syllables before a labial (as in *proximus*) a short *ü*; furthermore, the groups *æ, au, eu, ce*, also *ui*. We have seen (§ 165) that *ē, ĭ, ō, ū* were pronounced close, and *ě, ě, ŏ, ŷ* open, while *ā* was not affected by quantity. We shall see presently

(§§ 209, 210) that  $\alpha > \epsilon$  and  $ce > \epsilon$ , while  $au$ ,  $eu$  generally remained  $\acute{a}u$ ,  $\acute{e}u$  (*cáutus*, *céu*), and  $ui$  (as in *cui*) was  $\acute{u}i$ .

179. The foreign vowels of borrowed words were assimilated in some fashion to the Latin system. In the few Celtic words that were taken over there are no important peculiarities. In the Germanic vocabulary there is not much to be noted:  $ai$  in words adopted early apparently became  $a$ , as  $*waidanjan > *wadaniare$ ;  $eu$  (or  $iu$ ) appears in *treuwa* (or *triuwa*), which became  $*trewa$ ;  $iu$  is found in *skiuhan*  $> *skivare$ .

The history of Greek vowels is very complicated:—

#### GREEK VOWELS.

180. According to Quintilian (Édon 64–65), the Greek letters were sounded as in Greek. This pronunciation was doubtless the ideal of people of fashion, but popular speech substituted for unfamiliar vowels the sounds of the vernacular. The inconsistencies in this substitution arise partly from the different dates at which words were borrowed, partly from the channel (written or oral) through which they came, and partly from the various pronunciations of the vowels in the several Greek dialects.

181.  $A$ , long or short, was pronounced  $\bar{a}$ :  $\Phi\acute{\alpha}\sigma\iota\varsigma > Ph\acute{\alpha}\sigma\iota\varsigma$ ,  $\phi\acute{\alpha}\lambda\alpha\gamma\acute{\epsilon}\varsigma > ph\acute{a}lanx$ .

182.  $H$  was in Greek originally a long  $\epsilon$ , but early in our era it became  $\bar{i}$ . In book-words it was assimilated to Latin  $\bar{e}$ :  $\acute{\alpha}\rho\theta\eta\acute{\kappa}\eta > apoth\acute{e}ca > It. bottega$ ; so in some late words, as  $\beta\lambda\alpha\sigma\phi\eta\mu\acute{\iota}\alpha > blasphem\acute{i}a > It. bestemmia$ . In words of more popular origin it often had the Greek open sound:  $\acute{\epsilon}\kappa\kappa\lambda\eta\sigma\acute{\iota}\alpha > ecl\acute{e}sia$ ;  $\sigma\eta\pi\acute{\iota}\alpha > s\acute{e}p\acute{i}\alpha$ , but also  $s\bar{e}p\acute{i}\alpha > It. seppia$ ;  $\sigma\kappa\eta\eta\acute{\gamma}\eta > sc\acute{e}na sc\bar{e}na$ . Late words often show  $i$ :  $\acute{\alpha}\sigma\kappa\eta\tau\acute{\eta}\varsigma > ascitis$ , *Per.*

40, ι, etc.; ἐκκλησία > *ecclisia*, Neumann 9; μοναστήριον > *monastirium*, μυστήριον > *mistirium*, etc., Claussen 854-855; ταπήτιον > Fr. *tapis*, Pr. *tapit*.

183. *E* was close in some Greek dialects, open in others. In book-words it was assimilated to Latin *ĕ*: γένεσις > *gēnēsis*. In popular words it was sometimes close, sometimes open: ἔρημος > *er'mus er'mus* > It. *ermo*, Sp. *yermo*; κέδρος > *cedrus* > It. *cedro*; πέπερι > *pīper*; Στέφανος > *Stephanus Stephanus*. Cf. Claussen 853-854.

184. *I*, at least in the principal dialects, seems to have had a very open sound, even when long. In book-words it was assimilated to Latin *ī*: φῖμός > *phīmus*; φίλος > *phīlus*. In popular words *ī* apparently became *ī̄*, later *e* or *ē*; *ī̄* apparently became *ĕ*, later often *e*: ἀρθριτικός > *arthriticus* > It. *artetico*; ἀρτεμισία > *artemisia* > Old Fr. *armeise*; βωλίτης > *boletus*; ὀρέγανος > It. *regamo*; χρίσμα > *chrīisma* > It. *cresima*, Old Fr. *cresme*; Χριστός > *Christus Chrestus*, cf. *Christianus Christianus*; etc.;—ἀντίφωνος > \**antefona* > Old Fr. *antiefne*; βλίτον > *blītum* > It. *bieta*; μίνθη > *menta* > It. *menta*, Sp. *mienta*; σίναπι > *sīnapi* > It. *senape*; etc. Cf. Claussen 855-857.

185. *Ω* was probably *ō̄*, but perhaps dialectically *ō̄* (cf. ὥρα > *hōra*). In book-words it was assimilated to Latin *ō*: φώκη > *phōca*. In popular words it apparently became *o*, occasionally *u*: γλώσσα > It. *chiōsa*; πτωχός > It. *pitocco*; τρώκτης > *trūcta*. Cf. Claussen 869-870.

186. *O* in most dialects was *ō̄*. In book-words it was assimilated to Latin *ō*: κόφινος > *cōphīnus*; ὄρφανός > *ōrphānus*. In popular words it was generally close, but sometimes open, and occasionally the same word had both pronunciations: ἀμόργη > *amūrca*; δοχή > *dōga* > It. *dogo*, etc.; κόμμη > *gūmmi*; ὄσμη >? It. *orma*; πορφύρα > *pūrūrā*; τόρνος > *tōrnus* > It.

*torno*, etc.; — κόγχη > *cōncha*; στρόφος > *strōppus*; χορδή > *chōrda*; — κόλαφος > *cōlaphus cōlaphus*. Cf. Claussen 857–860.

187. *Y* was originally pronounced *u*; later in Attic and Ionic it became *ü*, which subsequently, in the 9th or 10th century, was unrounded into *i*.

In the older borrowed words, perhaps taken mostly from Doric (Claussen 865), *v* regularly was assimilated to Latin *u* (S. 219–221): βύρσα > *būrsa*; κρύπτη > *crūpta*; κύμβη > *cūmba*; μύλλος > *mūllus*; μύρτος > *mūrta*, *App. Pr.*; πύξος > *būxus*. *It. busta* seems to represent a peculiar local development: cf. *buxida* (= *pyxis*) in Theodorus Priscianus and in glosses, *Lat. Spr.* 468. Cf. *Zefurus*, Audollent 536; “*tymum non tumum*,” *App. Pr.*; *Olumpus*, etc., Pirson 39. In *τρῦτάνη* > *trūttina* the *v* was shortened. In *ἀγκῦρα* > *ancōra*, *στύραξ* > *stōrax*, and a few other words the *v* for some reason became *ō*; these probably have nothing to do with *καλύπτρα* > *It. calotta*, *κρύπτη* > *It. grotta*, *μῦδος* > *It. motto*, in which the *o* is a later local development. For some words we find an occasional spelling *æ*, which may represent a Greek dialect pronunciation between *u* and *ü*: γῦρος > *gyrus gærus*; Μυσία > *Mysia Mæsia*; etc.

Towards the end of the Republic, cultivated people adopted for Greek words the Ionic-Attic pronunciation, which is generally represented, in the case of *v*, by the spelling *y*. Cicero says: “*Burrum semper Ennius, nunquam Pyrrhum*” (S. 221). According to Cassiodorus, *u* is the spelling in some words, *y* in others (S. 221). In the *App. Pr.* we find: “*Marsyas non Marsuas*,” “*myrta non murta*,” “*porphyreticum marmor non purpureticum marmor*,” “*tymum non tumum*.” Among the common people the unfamiliar *ü* was assimilated to *i*. The spelling *i* occurs sometimes before Augustus: ἀγκύλια > *ancilia*; Ὀδυσσεΐα > *Odissia*, Livius Andronicus; Ὀλυσσεύς > *Ulixes*. In inscriptions we find *misteriis*, etc., S. 221. The *App. Pr.*

has "*gyrus non girus*." Cf. *giro*, *misterii*, etc., Bechtel 76-77; *giret*, Audollent 535; *Frigia*, etc., Pirson 39. This *i*, if long, was usually pronounced *î*; if short, *ï*, which became *ε*: γῦρος > It. *giro*; κῦμα > It. *cima*; σῦριγγα > It. *scilinga*; — κύκνος > It. *cecino*; etc. For σῦκωτόν, see § 141; γύψος > It. *gesso* is probably a local development. *Kv* frequently became *qui*: κολοκύνθη > *coloquinta*, etc.; cf. § 223.

The modern Greek pronunciation is represented by some Romance words: ἄμυλον > It. *amido*; βυζαντίς > It. *bisante*; τύμπανον > Fr. *timbre*; etc.

Cf. Claussen 860-869.

188. *AI* originally became *ai*, as in Αἴας > *Aiax*, Μαῖα > *Maia*; later *æ* (as in αἰγίς > *ægis*), which came to be pronounced *ε*, as in Αἰθιοπία > *Æthiopia Ethiopia*. Cf. Claussen 871-872.

189. *AY* > *au*: θησαυρός > *thesaurus*. Cf. Claussen 872-873.

190. *EI* was doubtless originally pronounced *ei* in Greek, then, from the sixth to the fourth century B. C., *ē*; finally, about the third century, *î*, except before vowels. In Latin, *ei* became *ī* before consonants, *ē* or *ī* before vowels; εἰδωλον > *īdolum*; παράδεισος > *paradīsus*; πειρατής > *pīrāta*; — Κλειώ > *Clīo*; Μήδεια > *Medēa*. In *-eios -eia -eion*, the penult was often shortened: πλατεῖα > *platēa*. Cf. Claussen 873-875.

191. *EY* generally became *eu*: Εὐρος > *Eurus*. Such forms as "*ermèneumata non erminomata*" (*App. Pr.*), *toreomatum* from *τόρευμα*, may be merely misspellings: cf. *Cleopatra* for *Cleopatra*. Some Romance forms show *u*: κέλευσμα > ? It. *ciurma*. Cf. Claussen 875-877.

192. *OI* originally became *oi*, as in ποιή > *poīna*; later *æ* (as in *pæna*), which came to be pronounced *ε*, as in Φοῖβος > *Phæbus Phebus* (S. 277). Sometimes, however, it became *o*,

as in ποιητής > *poëta*. *Cimiterium cymiterium*, for *cœmeterium* < κοιμητήριον, perhaps indicates an ignorant confusion of *ü* and *ö*. Cf. Claussen 877–878.

Like *oi*, *ω* became *æ*: κωμῳδία > *comœdia*.

**193.** *OY* was doubtless originally pronounced *ou* in Greek, then *ō*, then *ū*. In Latin it usually became *ū*: βροῦχος > *brūchus*; οὐρανός > *Ūrānus*. Cf. Claussen 878–879.

## I. ACCENTED VOWELS.

### a. SINGLE VOWELS.

N.B.—For vowels in hiatus, see § 167. For nasal vowels, see § 171.

#### a

**194.** *A* regularly remained unchanged in the greater part of the Empire: *caput, dare, factum, latus, manus, patrem, tantus*. But in Gaul, especially in the north, it probably had a forward pronunciation tending somewhat toward *ɛ*: cf. *crepere, senetus, volumptæte* in *Gl. Reich.*; and *agnetus* (for *agnātus*?) in *Fredegarius, Haag 6*.

**195.** Some words had a peculiar development:—

(1) Beside *alācrem* the Romance languages seem to postulate *alēcrem* and *alɛcrem*. It is possible that *dlācer* (whence *alācrem*) > \**dlēcer* (whence *alēcrem*), then \**alīcer* (whence *alīcrem alɛcrem*).

(2) For the suffix *-arius*, see § 39, *-arius*.

(3) Beside *cērāsus* (< κέρασος) there must have been a Latin \**cērēsus*. So beside \**cērāsēus*, which was used in southern Italy, Rome, and Sardinia, there was a *cērēsēus*, which was used elsewhere: *Lat. Spr.* 468; cf. *Substrate I*, 544.

(4) Beside *grāvis* there was a *grēvis*, under the influence of *lēvis*: GREVE, *Lat. Spr.* 468; cf. *Substrate II*, 441.

(5) Beside *mālum* (< Doric μάλον) there was a *mēlum* (< μήλον), used by *Petronius* and others: *Lat. Spr.* 468.

(6) Beside *vacuus* there was a *vōcuus*: *vocuam*, *C. I. L.* VI, 1527 d 33; cf. *vocatio*, *C. I. L.* I, 198, etc. Cf. S. 171, *Olcott* 33. The *o* was probably

original; old *vacāre*, *vocivus* regularly became *vacāre*, *vactvus* (> *vacuus*), whence by analogy *vácat* for *vócat*: *Lat. Spr.* 466. By a change of suffix *vócuus* became \**vócttus*.

## ē

**196.** Long *e*, which was pronounced *ē* (§ 165), probably remained unchanged in Vulgar Latin, at least in most regions: *debēre*, *dēbet*, *habētis*, *mercēdem*, *vēndere*, *vērus*.

In Sicily, Calabria, and southern Apulia *ē* has become *i*. In old Oscan, which was spoken in nearly the same region, *ē* became *i* in late Republican times, as in *cinsum*, *dibeto*, etc. (*Lexique* 106). There is, however, no proof of historical connection between the phenomena: cf. *Lat. Spr.* 468.

**197.** *I* is very often used for *ē* in inscriptions and late writings: Gregory the Great has *crudilitas*, *dulcido*, *fcit*, *flix*, *minsam*, *vindo*, etc., *-ido* for *-edo*, *-isco* for *-esco*, *-isimus* for *-esimus*; and conversely *ver* for *vir*, etc.: Sepulcri 193-194. Cf. S. 189-190; Carnoy 15 ff. (*ficet* in the 3d century, etc.). Also *Vok.*: for the confusion of *-ēre* and *-īre*, I, 260ff., II, 69 ff.; for *-ēscō* and *-īscō*, I, 359-364; for *-ēlis* and *-īlis*, *-ēlius* and *-īlius*, I, 287-289; for *vindimia* instead of *vindēmia*, I, 328, III, 127 (*Lexique* 115). These spellings are due in the main to the identity of *ē* and *ī* in late pronunciation: see § 165.

A. Sepulcri, in *Studi Medievali* I, 614-615, conjectures that *s* + consonant may have tended to raise *ē* to *i*, *o* to *u*. This would account for *bistia* (= *bēstia*) found in late Latin, *Studi Medievali* I, 613; for *crisco* and other verbs in *-isco* for *-ēscō*; for *adimplisti*, etc.; for *fistus*, etc.;—also for *colustra*; for *cognusco* and other verbs in *-usco* for *-ōscō*. Some of the *-ēscō* > *-īscō* cases are surely due to a shift of conjugation: see §§ 414-415.

**198.** In Gaul this substitution of *i* for *ē* was so very common that it must signify something. It probably indicates an

extremely close pronunciation of the *e* (cf. *o*); later, in northern Gaul, this very high *e* > *ei* (*vērūm* > Old Fr. *veir*): *Lat. Spr.* 468. It is interesting to note that Celtic *ē* also became *i*: Dottin 99.

*Lexique* 104-105: *criscit, riges, tris, vexit*, etc. Pirson 2-5: *ficerent, ficit, requiiscit, rictu, rigna*, etc. Neumann 10-11: *adoliscens, minses, quiiscit, rigna*. Bon. 106-113: *minse, quinquaginsima*, etc. Haag 8-9: *adoliscens, criscens, ingraviscente, seniscit, tepiscit; delitus, fedilis, habitur, minsis, sidibus, stilla*, etc. Cf. *Vok.* I, 311 ff.

## e

199. Short *e*, which was pronounced *ē* (see § 165), remained unchanged: *bēne, ěxit, fĕrrum, fĕrus, fĕsta, tĕneo, vĕnit*.

For the development of diphthongs, see § 177.

(1) According to *Lat. Spr.* 466, *voster*, which supplanted *vester*, is to be regarded as a new formation on the model of *noster* rather than as the old form.

## i

200. Long *i*, pronounced *i̇* (§ 165), remained unchanged: *audĭre, dĭco, mĭlle, quĭnque* (*Substrate* I, 546), *vĭlla, vĭnum*.

(1) *Frĭgĭdus*, except in Spain, must have become \**frĭgĭdus* (> *frĭgdus*), perhaps through association with *rĭgĭdus*. Cf. § 166.

(2) Beside *ĭlex* there was an *ĕlex*, found in Gregory of Tours: *Archiv für das Studium der neueren Sprachen* CXV, 397. Cf. *Lexique* 114.

(3) Beside *sĭcula* there was a *sĕcula* (*Lexique* 119) > It. *segolo*. Varro (*Lexique* 119) mentions a rustic *speca* for *spĭca*. It. *stegola* seems to postulate something like \**stĕva* for *sĭva*.

(4) For *sĭ*, see § 229, (4).

## i

201. Short *i*, pronounced *i̇* (§ 165), became, doubtless by the third century and sporadically earlier, *ē* in nearly all the Empire: *bĭbo, cĭrculus, ĭlle, mĭnus, pĭscem, sĭtis, vĭtium*. The spelling *e* for *ĭ* is common from the third century on: *freicare*,

*legare, menus*, etc., S. 200–201; *elud* (= *illud*), Audollent 535; *minester*, etc., Pirson 8–10; *karessemo*, etc., Carnoy 15 ff.; *minester, sebe, semul, sene, vea*, Neumann 23–25; *corregia*, etc., R. 463; *accepere, trea*, etc., Bon. 117–123; *æteneris, trebus*, etc., Haag 11. Conversely *i* is often used for *ē* (cf. §§ 197, 198): *minses*, etc., S. 195; *benivolus*, etc., R. 463. Quintilian and Varro mention (S. 166) a rustic *e* for *ī*, attested also by inscriptions (S. 202).

In Sardinia and a part of Corsica this change did not take place, and both *ī* and *ī* > *i*. These two islands were taken from Rome by the Vandals in 458 and added to the African kingdom; after that they were perhaps isolated: *Einf.* 106.

In southern Italy *e* from *ī*, like *e* from *ē*, became *i*: cf. § 196.

(1) Beside *canīsia* there was a *canīsia*: *Substrate* I, 541.

(2) Beside *simul* there was a \**sēmūl*, perhaps through the analogy of *sēmēl*: *Lat. Spr.* 468.

(3) *Sinīster* was replaced by *sinēxter*, under the influence of *dēxter*: *Lat. Spr.* 469.

## ō

202. Long *o*, pronounced *o* (§ 165), remained unchanged in Vulgar Latin, at least in most regions: *colōrem, fōrma, hōra, nōmen, sōlus, spōnsus*. In Sicily, Calabria, and southern Apulia *o* has become *u*, as it did in old Oscan: cf. the change of *e* to *i*, § 196.

For *agnusco, cognusco*, etc., used by Gregory the Great and others, see the end of § 197. The popular *ūstium* for *ōstium* (*Lat. Spr.* 468; *Studi Medievali* I, 613) is perhaps to be explained in this way.

For *ou* > *ou*, see § 167.

203. The spelling *u* for *ō* is very common in Gaul (*Lat. Spr.* 468): *furma*, etc., S. 214; *amure*, etc., Pirson 13; *victuriās*,

etc., Bon. 126-130; *cognusco, gluria, nun, puni*, etc., Haag 13. It probably represents a very close sound, which later, in northern Gaul, became *ou* or *u*: *cōrtem* > Old. Fr. *court*. Cf. § 198.

204. There are a few peculiar cases:—

(1) Fr. and Sp. *meuble, mueble* postulate *o* in *mōbilis*, presumably through the analogy of *mōveo*. Cf. § 217.

(2) Beside *tōtus* and *tottus* (§ 163), some of the Romance forms point to \**tūtus* or \**tūctus*, or at least to a nom. pl. \**tūtti* or \**tūcti*: It. sg. *tutto*, pl. *tutti*; Neapolitan sg. *totto*, pl. *tuttò*; old Fr., Pr. sg. *tot*, pl. *tuit*. The Italian *tutto* may have come through the plural. Such a form seems to be attested by the *Gl. Cassel*: “aiatutti. uuela alle,” where *tutti* is defined as *alle*. No satisfactory explanation has been proposed; the most plausible, perhaps, is that of Mohl, *Lexique* 102-104, namely, the influence of *cūncti* on *tōti*.

### ö

205. Short *o*, pronounced *o* (§ 165), remained unchanged: *bōnus, fōlia, fōris, fōrum, lōcus, mōrtem, sōlet, sōrtem*. The rustic Latin *funtes, frundes* (for *fōntes, frōndes*) are perhaps connected with Italian *fonte* and other words containing *o* for *o* before *n* + dental.

*U* is occasionally used for *ö* in inscriptions: *lucus*, etc., S. 211-212. Cf. *App. Pr.*, “*formica non furmica*.”

For the development of diphthongs, see § 177.

### ū

206. Long *u*, pronounced *u* (§ 165), remained unchanged in most of the Empire: *cūra, dūrus, nūllus, ūna*. Grammarians mention the protrusion of the lips: S. 216.

But in Gaul, a large part of northern Italy, and western Rætia it was probably formed a little forward of its normal position. It was certainly not *ü*, cf. K. Nyrop, *Grammaire historique de langue française* I, § 187; but it doubtless slightly approached it. This pronunciation may have been due to the

linguistic habits of the Celts: cf. Windisch 396–397. Celtic  $\bar{u} > \bar{i}$  in Great Britain by the second century; in Latin words borrowed by the Celts  $\bar{u}$  is generally treated like Celtic  $\bar{o}$  ( $m\bar{u}rus > mur$ ), but in a few, presumably taken very early,  $\bar{u} > \bar{i}$  ( $c\bar{u}pa > cib$ ,  $cr\bar{u}dus > criz$ ): Loth 67–68.

207. The following special cases are to be noted:—

(1) Beside  $l\bar{u}rdus$  there probably was a  $*l\ddot{u}rdus$ : *Substrate* III, 517.

(2)  $N\ddot{u}ptia$ , through the analogy of  $*n\ddot{u}vius$  (“bridegroom,” from  $n\ddot{u}vus$ ) and  $n\ddot{u}ra$ , became  $n\ddot{o}ptia$ : *Lat. Spr.* 469. Cf. *Substrate* IV, 134.

(3) Beside  $p\ddot{u}mex$  there was a  $p\ddot{o}mex$ : Bon. 136, *pomice*. Cf. F. G. Mohl in *Zs.* XXVI, 617–618.

### ü

208. Short  $u$ , pronounced  $u$  (§ 165), became, probably by the fourth century or earlier,  $\bar{o}$  in most of the Empire:  $b\ddot{u}cca$ ,  $c\ddot{u}lpa$ ,  $g\ddot{u}la$ ,  $r\ddot{u}ptus$ ,  $\ddot{u}nda$ . The spelling  $o$  is common in late documents: “*columna non colomna*,” “*turma non torma*” (cf. “*coluber non colober*,” “*formosus non formunsus*,” “*puella non poella*”), *App. Pr.*; *tomolus*, etc., Pirson 15–17; *tonica*, etc., Bon. 132–135; *corso*, *covetum* (=  $c\ddot{u}bitum$ ), *toneca*, Haag 14. The old spelling  $o$  for  $u$  after  $v$  ( $v\ddot{o}ltus$ ,  $servos$ , etc.), which lasted down into the Empire, is perhaps only orthographic: *Lat. Spr.* 464.

In Sardinia, a part of Corsica, Albania, and Dacia this change did not take place, and both  $\bar{u}$  and  $\ddot{u} > u$ : *Lat. Spr.* 467.

For  $ou > ou$ , see § 167.

(1) Beside  $ang\ddot{u}stia$  there must have been  $*ang\ddot{o}stia$ .

(2) Fr. *couleuvre*, *fleuve*, *jeune* call for local  $\bar{o}$  in  $col\ddot{u}bra$ ,  $fl\ddot{u}vium$ ,  $j\ddot{u}v\ddot{e}nis$ . There are other local irregularities. Cf. § 217.

(3) In place of  $n\ddot{u}rus$  we find  $n\ddot{u}rus$  (R. 465) and  $n\ddot{u}ra$  (S. 216), due to the analogy of  $s\ddot{u}ror$  and  $*n\ddot{u}via$  (“bride,” from  $n\ddot{u}vus$ ).

(4) Instead of  $pl\ddot{u}ere$  and  $pl\ddot{u}via$  people said  $pl\ddot{u}vere$  (used by Petronius and others) and  $*pl\ddot{u}ja$ : *Lat. Spr.* 468. Cf. §§ 169, 217.

## b. DIPHTHONGS.

## æ

209. *Æ* was originally written and pronounced *ai*, but through the mutual attraction of its two parts it became *æ*, later *ɛ*: *cæcus*, *cælum*, *quæro*.

In certain words a vulgar and dialect pronunciation *ē*, common to Volscian and Faliscan (Hammer 7, 8), came into general use: *fēnum*, *prēda*, *sēpes*, *sēptum*, *sēta*. Cf. S. 166–168, 188; Carnoy 79–80. For *fēnum fænum*, *prēda præda*, *sēpes sæpes* both forms were preserved. Hence, by analogy, such spellings as *fæcit*, etc., S. 190. Cf. Neumann 13 (and *Fortsetzung* 21–23): *fæmina*, *quiæti*, etc.

210. The regular change of *æ* to *ɛ* took place largely in Republican times in unaccented syllables; in stressed syllables in the first century of our era and later. *E* for *æ* in dative endings occurs early: Corssen I, 687 ff. About the middle of the first century B. C., when Varro cited *edus* for *hædus* as a rural form, stressed *æ* was probably still a diphthong in the city but had become *ɛ* in rustic Latium; some hundred years later *ɛ* came into the city and pervaded the provinces: *Lat. Spr.* 465. Terentius Scaurus, in the first century, says that *æ* represents the sound better than *ai*: S. 224. *E* is found early in Campania, especially in Pompeii (*presta*, etc.): S. 225. In Spanish inscriptions *e* occurs from the first century on (Carnoy 78): *questus* (2d century), etc., Carnoy 69–84. It was probably general everywhere by the second century: *Einf.* § 78. Pompeius blames the confusion of *æquus* and *ēquus*: S. 178. The spelling *e* for *æ* was usual in unaccented syllables (as *sancte*) before the third century, in stressed syllables (as *questor*) from the fourth century on; it may be called regular by the fifth century: S. 178, 225. Cf. Bechtel

75-76: *cedat, grece*, etc. Conversely *æ* was often erroneously used for *ě* (S. 183-184) and for Greek *η* (as *scænam, Lexique* 104).

#### au

211. *Au*, pronounced *áu*, generally remained in Vulgar Latin: *aura, gaudium, taurus*. In Rumanian and Provençal it was preserved as *au*, in Portuguese as *ou*; its existence in the earliest stage of French is proved by the treatment of *c* in *causa* > *chose*; in Italian and Spanish it did not become *o* until original *o* had broken into *uo* or *ue*.

(1) The spellings *Cladius, Glacus, Scarus*, etc., with *a* for *au* when there is an *u* in the next syllable, are pretty common in various countries: S. 223; Carnoy 86-95. Perhaps they represent a provincial pronunciation, or possibly they are only orthographic.

(2) *Clūdo* for *claudo* is common, coming through derivatives, such as *occlūdo*: *Vok.* II, 304; Carnoy 100 (*cludo* in two Sp. inscriptions of the 1st and 2d centuries); Bayard 6. Cf. Carnoy 85-86 (*clusa*, etc.).

212. Umbrian and Faliscan had *o* in place of Latin *au*: Hammer 4-5, 8. So, in general, the dialects of northern and central Italy: *Chronologie* 158-164. There are some examples in Pompeii, in Oscan territory, where *au* was normally preserved; this pronunciation was used also in the country around Rome, and in the first and second centuries B.C. crept into the city, where it was used by the lower classes: *Lat. Spr.* 465-466. In Umbrian inscriptions we find *toru*, etc.: Hammer 4. In Latin, *Clodius* and *Plotus* are common in first century inscriptions: Carnoy 85, Pirson 27. *Closa*, etc., occur in the second century: Carnoy 85.

The grammarians—Probus, Diomedes, Festus, and others—speak of a rustic or archaic *o* for *au*: Corssen I, 655-663; *Vok.* II, 301 ff.; S. 162-164; Hammer 15-19. Festus cites *orum*; Priscian, *cotes, ostrum, plostrum*: Carnoy 95. Cf. *App. Pr.*, “*auris non oricla*”; R. 464, *coda, orata, orum*.

Conversely, *au* was occasionally used for *ō* (*Chronologie* 160): Festus, *ausculum*; Marius Victorinus, "*sorex vel saurex*." Cf. \**aucīdere* for *occīdere*, postulated by some Romance forms.

213. This rustic and vulgar *ō*, — which was pronounced *o*, while the Romance *o* from *au* was *o*, — was generally adopted in Vulgar Latin in a few words: *cōda*; *fōces*; \**ōt* (cf. Umbrian *ote*, Hammer 4) = *aut*; *plōdere*. Cf. Classic *fauces*, *suffōco*; *plaudo*, *explōdo*; *si audes*, *sōdes*. Cicero used *loreola*, *orīcla*, *plodo*, *pollulum*: Carnoy 95. *Ōla*, *cōdex*, *cōles* = *caulis*, *lōtus*, *plōtus* occur also.

## eu

214. *Eu*, pronounced *éu* (as in *ceu*, *eu*, *Europa*, *eurus*, *eheu*, *heu*, *neu*, *neuter*, *seu*), was not preserved in any popular words. Cf. S. 228.

## œ

215. *Œ* was originally written and pronounced *oi*, but through the mutual attraction of its two parts it became presumably *ō*, later *e*: *cœpi*, *pœna*, *pœnitet*. It may be that the intermediate stage is reflected by the spelling *PHYEBÆ* for *Phœbe*, S. 227.

*E* is attested by inscriptions in the first century of our era: *ceperint*, Carnoy 84; *Phebus*, *C. I. L.* IV, 1890; etc. Cf. S. 227, *Lat. Spr.* 464. In the *Per.* we find *amenuis*, *cepi*, etc., Bechtel 76. The confusion of *œ* and *e* is mentioned by late grammarians: S. 227. In late Latin a bad spelling, *œ* for *æ* and *e*, became popular: *cæcus*, *cælum*, *cæmenta*, *fæmina*, *fænum*, *mærore*, *mæstus*, *pænates*. Cf. S. 228; *Vok.* II, 293 ff.

## ui

216. *Ui*, pronounced *úi*, was preserved: *cúi*, *hūic*, *illūi*. For the development of *fui*, see § 431.

## c. INFLUENCE OF LABIALS.

217. According to some philologists, a following labial tends to open a vowel: *colūbra* > \**colōbra*, *flūvium* > \**flōvium*, ✓  
*jūvenis* > \**jōvenis*, *mōbilis* > \**mōbilis*, *ōvum* > \**ovum*, *plūēre* >  
*plōvēre*, etc. A general influence of this kind can hardly be regarded as proved for any combination except *ou*, which became *ou*: see § 167.

S. Pieri, *La vocal tonica alterata dal contatto d'una consonante labiale* in *Archivio glottologico italiano* XV, 457, maintains that *i*, *e*, *o*, *u* were lowered one stage—to *e*, *e*, *o*, *o*—by a preceding or following labial, even if it was separated from the vowel by a liquid. Although many examples are cited, the evidence is not convincing. For a criticism of the theory, see G. Ascoli, *Osservazioni al precedente lavoro*, *ibid.*, p. 476. The discussion is continued by Pieri, *La vocal tonica alterata da una consonante labiale* in *Zs.* XXVII, 579.

## d. CLERICAL LATIN.

218. In clerical Latin the vowels were probably pronounced for the most part as in vulgar speech, until the reforms of Charlemagne. After that, in general, *ā* = *a*, *ē* = *e*, *ī* = *i*, *ō* = *o*, *ū* = *u* (or *ü*), *æ* and *œ* = *e*, *au* = *o* or *au*.

## 2. UNACCENTED VOWELS.

N. B. — For secondary stress, see §§ 153–155.

219. Among unstressed vowels, those of the first syllable had most resistance, possibly through a lingering influence of the Old Latin accent: cf. § 134.

The vowels of the final syllable lost much of their distinctness, but did not fall, except sporadically, until long after the Vulgar Latin period, and then only in a part of the Empire.

Grammarians testify to the confusion of *o* and *u*: S. 212. *Quase, sibe* are found in place of *quasi, sibi*: S. 199–200. According to Quintilian I, iv, 7, “in *here* neque *e* plane nequi *i* auditur.”

Weakest were medial vowels immediately following the secondary or the primary stress. In early Latin there was an inclination to syncope: *ar(i)dōrem, av(i)dēre, bāl(i)nēum, cal(e)facēre, jūr(i)go*, etc. This tendency continued, in moderation, in Classic and Vulgar Latin: *cal(i)dus, ōc(u)lus, frig(i)daria, vīr(i)dis*, etc. In inscriptions we find such forms as *infri, vetranus*: S. 251.

For the confusion of unaccented *e* and *i*, see Pirson, 30–36, 47–48; for *o* and *u*, see Pirson 41–47. Fredegarius is very uncertain in his use of unstressed vowels: Haag 15–24.

220. *Ū* was employed only before labials, in unaccented syllables: cf. S. 196–198, 203–208; Lindsay 25–26, 35; *Franz. 2* I, 21–24. During the Classic period it generally became *ī*: *decumus* > *decimus*, *maxumus* > *maximus*, *pontufex* > *pontifex*, *quodlubet* > *quodlibet*, etc.; cf. *Lat. Spr.* 466. In Spanish inscriptions we find *maximus*, etc., spelled both with *u* and with *i*: Carnoy 65–69.

*Sūmus*, being sometimes accented, developed two forms, *sūmus* and *simus*. The former was the one generally adopted in Classic Latin, but *simus* was favored by Augustus and by some purists of his time (Lindsay 29). According to Marius Victorinus (Keil VI, 9), “Messala, Brutus, Agrippa pro *sumus simus* scripserunt.” In the vulgar speech *simus* seems to have prevailed in Italy and southern Gaul. Cf. § 419, (1).

221. In general Latin quantity did not sensibly affect the quality of unstressed vowels, except in initial syllables, and even there the difference must have been small. In final syllables, however, *ī* was certainly distinct from *ī*: *sentīs*,

*sentit* > It. *sentì, sente*; *fēcī, fēcīt* > Pr. *fis, fes*. In *sibi, tibi* the final vowel was sometimes long, sometimes short.

#### a. UNACCENTED VOWELS IN HIATUS.

222. *I* and *u* followed by a vowel and beginning a syllable were apparently pronounced as consonants from the earliest times. Quintilian says that *u* and *i* in *uos* and *iam* are not vowels: S. 232. Quintilian and Velius Longus cite the spellings *Aiiax, aiiio, Maiiam* as approved by Cicero: S. 236. Bonnet notes that *a*, not *ab*, is used before *Joseph, Judæis*, etc. These, then, will be treated as consonants, and will be left out of consideration in the present chapter.

223. After gutturals, *u* followed by a vowel was originally a vowel itself, but lost its syllabic value in early Classic times: *acua* > *aqua*, *distinguere* > *distinguere*. So it was in *qualis, quæro, quem, qui*. In Greek transliterations  $\kappa\upsilon$  for *qui* (as in  $\acute{\alpha}\kappa\upsilon\lambda\alpha\varsigma$ ) is very common: Eckinger 123-125; cf. § 187.

In perfects, however, such as *nocuit, placuit*, the *u* was apparently not reduced to a semivowel until the end of the Classic period.

In some other words the syllabic value of *u* was kept, at least in theory, rather late: Velius Longus distinguishes *aquam* from *acuam*, S. 234; *App. Pr.*, "*vacua non vaqua*," "*vacui non vaqui*."

224. Otherwise, *e, i, and u* in hiatus with following vowels lost their syllabic value probably by the first century of our era, and sporadically earlier. Occasional examples (such as *dormio, facias, fluviorum*) are found in Ennius, Plautus, Lucilius, Lucretius, Horace, Virgil, Ovid, Juvenal, and Seneca: e.g., *deorsum* in Lucretius; *vindemiator* in Horace; *abiete, abietibus* in Virgil. *Italia* counts as three syllables in poets of the

early Empire. Cf. S. 232. Valerius Probus has *parietibus*: Édon 208. Consentius declares that trisyllabic *solvit* and four-syllable *induruit* are barbarisms; Cæsellius is undecided whether *tenuis* has three syllables or two: S. 234. *Suavis*, however, was used as a trisyllable by Sedulius in the fifth century; it was probably a semi-learned word, as it became *soef* in French, *soave* in Italian.

The pronunciation *e*, *i*, *u* was probably regular in popular speech by the first century or before; by the third century, with a narrowing of the mouth-passage, the semivowels presumably developed into the fricative consonants *y* and *w*: S. 231-232. So *alea* > *alea* > *alja*, *filius* > *fīlius* > *filjus*, *sapui* > *sapui* > *sapwi*. In the same way *filiolus* > *filjólus* (§ 136), *tenúeram* > *ténweram* (§ 137); likewise *eccu'hic* > \**eccwic*, *eccu'ista* > \**ecwista* (§ 65), etc. We have, then, in late Latin, a new *y* and a new *w*.

Hence arises, in late Latin spelling, a great confusion of *e* and *i* in hiatus: CAPRIOLVS (cf. § 136), S. 187; Caper, "non iamus sed eamus," "sobrius per *i* non per *e* scribendum," Keil VII, 106, 103; *aleum*, *calcius*, *cavia*, *coelia*, *fasiolus*, *lancia*, *lintium*, *noxeus*, *solia*, *vinia*, *App. Pr.*; *abias*, *abiat*, *exiat*, *Lauriatus*, *valiat*, Audollent 535; *palleum*, etc., R. 463; *calciare*, *liniamenta*, Bayard 4; *eacit* (= *jacet*), *eam* (= *jam*), *Vok. II*, \*43; cf. Carnoy 33-35.

225. But the combinations *eé*, *ié*, *oó*, *uó* developed differently, *eé* and *ié* apparently being contracted into *ē*, *oó* and *uó* into *ō*, at an early date: *ariētem* (§ 136) > *arētem* (Varro, "ares veteres pro aries dixisse": Carnoy 43); \**dē-ēxcīto* > \**dēxcīto* > It. *desto*; *faciēbam* > \**facēbam*; *mulĭērem* (§ 136) > *mulērem*, the *i* remaining long enough to palatalize the *l* (the Romance *e* was doubtless a later analogical development); *parĭētes* (§ 136) > *parētes*, *C. I. L. VI*, 3714 (Rome); *prĕhĕndĕre* >

*prēndere*, then \**prēndere* through the analogy of *rēddere* and perhaps also of *ascēndere*, *defēndere*, *pēndere*, *tēndere*; *quīētus* > *quētus*, common in late inscriptions, Pirson 57 (cf. *requebit*, Carnoy 43); — *cōhōrtem* > *cōrtem*; *cōp̄r̄ire* > *cōp̄r̄ire*, then \**cōp̄r̄ire* \**cōp̄'r̄ire* through the analogy of *cō-* and perhaps also of *ōp̄era*, *ōpus*; *dūōdēcim* > *dōdēcim* (Pirson 58: *dodece*).

226. Furthermore, *u* after all consonants fell before unaccented *u* probably by the middle of the first century, before unaccented *o* by the second century: *antīquus* > *antīcus*; *carduus* > *cardus*; *cōquus* > *cōcus* (*App. Pr.*, “*coqui non coci*,” “*coqus non cocus*”; cf. S. 351); *distīnguunt* > *distīngunt* (according to Velius Longus, some writers use no *u* in *distinguere*, Édon 130); *ēquus* > *ēcus* (*App. Pr.*, “*equus non ecus*”; cf. Velius Longus, S. 217); *innōcuus* > *innōcus*, Koffmane 111; *mōrtuus* > *mōrtus*; *suus* > *sus*, *tuum* > *tum*, Carnoy 117; — *battuo* > *batto* (cf. *abattas*, *Gl. Reich.*); *cōquo* > *cōco* (*App. Pr.*, “*coquens non cocens*”; hence \**cocīna*); *quat(t)uor* > *quattor* (S. 218) *quator* (Pirson 58) *quatro* (7th century, Carnoy 221); *quot(t)īdie* > *cottīdie*, S. 352; *stīnguo* > *stīngo*; *tīnguo* > *tīngo* (Caper, “*tinguere . . . non tingere*,” Keil VII, 106); *tōrqueo* > \**torquo* > \**tōrco*; *ūnguo* > *ūngo* (*ungo*, *unguntur*, *ungi*, Bayard 7; Caper, “*ungue non unge*,” Keil VII, 105; *uncis* = *unguis*, Audollent 536). So apparently *aruum* > \**arum*, *ēruum* > *ērum* (*Lat. Spr.* 472: *ero*). *Vīduus*, however, doubtless under the influence of the commoner *vīdua*, kept its *u*: Old Fr. *vef*.

After gutturals, *u* fell before stressed *u* and *o*: *quum* > *cum*; *quōmōdo* > *cōmōdo*, Audollent 536. See § 354.

*U* often fell irregularly in *contin(u)ari*, *Febr(u)arius*, *Jan(u)arius*: *Vok.* II, 468–469; S. 217–218.

227. Similarly, *i* after a consonant fell before unaccented *i*: *audīi* > *audi*, *consīlīi* > *consīlī*, *ministērīi* > *ministērī*. Velius

Longus found it necessary to say that *Claudii, Cornelii, Julii*, etc., should be spelled with double *i*: Keil VII, 57.

Some late words, however, kept *-īi* and *-īis*: *Dionysii* > It. *Dionigi*, *Parisiis* > It. *Parigi*.

#### b. INITIAL SYLLABLE.

228. As far as one can judge from spellings and subsequent developments, *ǣ* was pronounced *a*; *æ*, *ē*, *ī*, *æ* all came to be sounded *e*; *ī* remained *i*; *ō* and *ū* were finally all pronounced *o* or *u*; *ō* remained *o*; *au* became *a* if there was an accented *u* in the next syllable, but otherwise remained unchanged (cf. *Lat. Spr.* 470): *rādīcem, vālēre; ætātem, dēbēre, tēnēre, vīdēre, fædāre; rīdēmus, cīvītātem, hibernus; plōrāre, frūmentum, sūbīnde; cōlōrem, dōlēre, mōvētis; A(u)gūstus, A(u)runci, a(u)scūlto, audēre, gaudēre, naufragium*. For the confusion of *e* and *i*, see Audollent 535, Carnoy 17-33, Bon. 135-138. Cf. *ecclesia*, Bechtel 76; "*senatus non sinatus*," *App. Pr.*, *golosus gylosus* (for *gulōsus*), Koffmane 110; *moniti* (for *mūniti*), Bon. 136. *Agustus* is frequent from the second century on, S. 223 (cf. *agustas*, Pirson 26); *Arunci* occurs in manuscripts of Virgil; Caper says "*ausculata non asculata*," S. 223; \**agūrium* must have existed also.

229. In a few words the vowel of the initial syllable was lost before an *r*: \**corrōtūlare* > \**c'rōt'lare*; *dīrēctus* generally > *d'rēctus* (*Vok.* II, 422: *driectus*); *quīrītare* > \**c'rītare*. *Jejūnus* after prefixes lost its first syllable: \**dis-junare*.

Some minor peculiarities are to be noted: —

(1) *A* after *j* apparently tended to become *e*: Old Latin *jajūnus* > Classic *jejūnus* (the original *u* seems to be preserved in some Italian dialect forms); Classic *Januarius* > *Jenuarius* (common in inscriptions, S. 171-172, *Lat. Spr.* 470); Classic *janua* > \**jenua* > Sardinian *genna*.

(2) *E*, long or short, is very often replaced by *i* in Gallic inscriptions (*Lat. Spr.* 470): *divota, mimoriæ*, etc.; *dūlevit*, Bon. 109; cf. *Vok.* I,

422-424. This perhaps indicates a close pronunciation: cf. § 198. *Di-* for *de-*, possibly through confusion with *dis-*, is common in Gregory the Great: *dirivare*, etc. According to Mohl, *Lexique* 105-108, *e* became *i* in southern Italy from the fourth to the sixth century: *RIVOCAVERIT*, etc. A form *ni* for *ne* is found from early times: *Pirson* 3.

(3) *ĭ* was occasionally assimilated to a following accented *a*: *gĭgāntem* > \**jagante* > Old Fr. *jaiant*, Pr. *jaian*, Old Genoese *zagante*; *sĭlvāticus* > *salvaticus* (*Gl. Reich.*, cf. *Lat. Spr.* 470) > Old Fr. *salvage*, It. *salvatico*, Rum. *sălbatec*. Cf. *Einf.* § 111.

(4) *Ī* tended to become *e*, by dissimilation, if there was an accented *ī* in the next syllable:<sup>1</sup> *dīvīdēre* > \**devīdēre*; *dīvīnus* > *devīnus*, in fourth century inscriptions, *Lexique* 122; *fīnīre* > *fenīre*, in manuscripts and inscriptions, *Lexique* 123; *vīcīnus* > *vecīnus*, attested by Servius, *Lexique* 104 ff. *Sī*, in late Latin, sometimes became *se*, attested from the sixth century on (*Vok.* II, 87; *Lexique* 120; *Franz.* 2 II, 224 ff.; *Bon.* 126; *Haag* 11; cf. *nise*, *C. I. L.* I, 205); in very late texts there is frequent confusion of *si* and *sed* (*Franz.* 2 II, 225, 234-235); the *e* is perhaps due to the analogy of \**que* < *quid* = *quod* (cf. §§ 69, 82), cf. Italian *sed* on the model of *ched*: *si* is preserved in French, Provençal, and Spanish, *se* in Portuguese, Old French, Italian, and Old Rumanian. In *mīrabīlia* the *ī* apparently became *e* and *a*.

(5) *Ū* was kept by analogy in many words: *dūrare*, *mūrare*, *mūtare*, *nūtrire* (beside \**notrīre*). *Jūnĭpĕrus* > *jeniperus* (*Lat. Spr.* 470) and *jini-perus* (*App. Pr.*).

(6) *O* appears as *u* in *furmica* (*App. Pr.*, cf. *Rom.* XXXV, 164), *putator* (*Bon.* 127), *turrente* (*Bon.* 131). *O* is changed to *e* in *retundus* (*Vok.* II, 213; cf. *Vitruvius*, *retundatio*, *Lat. Spr.* 470), through the influence of the prefix *re-*; also sometimes in *serore* (*Lat. Spr.* 470; cf. *serori*, *seroribus*, *Carnoy* 107).

(7) *Au* in vulgar speech was often replaced by *o* (cf. §§ 212, 213): *orīcla*, *App. Pr.*, *Pirson* 27; so \**ot* (for *aut*: cf. Umbrian *ote*, *Lindsay* 40), which prevailed in Vulgar Latin.

230. *S* before a consonant was doubtless long and sharp, as in modern Italian, so that at the beginning of a word it had a syllabic effect — *s-chola*. This led to the prefixing of a front vowel (until the seventh century nearly always an *i*, later

<sup>1</sup> Mohl's view, *Lexique* 122-126, is that original Latin *ei*, if *i* followed, became *e* instead of *ī*.

often *e*) to the *s* when no vowel preceded — in *i-schola*. This *i* or *e* came to be regarded as a regular part of the word. The prosthetic vowel occurs first in Greek inscriptions. The earliest Latin example is probably *iscolasticus*, written in Barcelona in the second century; it is found repeatedly, though not frequently, in the third century (Carnoy 114-116); in the fourth and fifth it is very common: *espiritum*, *ischola*, *iscripta*, *isperabi*, *ispose*, *istatuam*, *istudio*, S. 317; *ismaragdus*, Pirson 60; *estatio*, *Estephanus*, *iscola*, *istare*, R. 467. Grammarians took no note of it until St. Isidore, in the seventh century. But in late Latin texts *ab* rather than *a* was used before words beginning with *sc*, *sp*, *st*: *ab scandalo*, Dubois 171; *ab sceleribus*, Bon. 445; cf. Dubois 171-172, Bon. 445-446.

The *es-*, *is-* thus produced was confounded with *ex-*, *exs-* (pronounced *es-*) and *ins-*, *his-* (pronounced *is-*): *explendido*, *splorator*, *instruo* for *struo*, *Spania*, etc., S. 317; *hispatii* for *spatii*, Bechtel 78; *spiratio* for *inspiratio*, Koffmane 109; *scalciare* for *excalceare*, *scoriare* for *excoriare*, *spandere* for *expandere*, *Spania*, *Spanus*, *stantia* for *instantia*, *strumentum*, etc., R. 469-470; *spectante* for *expectante*, etc., Bon. 148. Cf. *Vok.* II, 365 ff.; S. 316-319; Pirson 59-60.

### c. INTERTONIC SYLLABLE.

N. B.—By this term is meant the syllable following the secondary and preceding the primary stress.

231. Vowels so situated probably became more and more indistinct towards the end of the Empire, and occasionally disappeared. In some regions they began to fall regularly before the close of the Vulgar Latin period, but *a* was generally kept: *bón(i)tátem*, *cáp(i)tális*, *cárr(i)cáre*, *cércbéllum*, *ctv(i)tátem*, *cóll(o)cáre*, *cómparáre cómpedáre*, *dél(i)cátus*, *dúb(i)táre*, *éleméntum éliméntum*, *frigidária frigidária*, *mtrabilia*,

*sacramentum, separare séperare, verecúndia.* *Frigdaria* occurs in the second century B. C.: *Franz.* 2 I, 12. Cf. *dedcavit*, Pirson 52; *vetranus*, Pirson 51; *cornare* for *coronare*, Koffmane 111; *stablarius*, R. 467. The fall of the vowel of course disturbed the Vulgar Latin rhythm: see § 153. Cf. F. Neumann in *Zs.* XIV, 559.

*Mínistĕrium* apparently became *mĭnstĕrium* early enough for the *n* to fall before the *s*: see § 171. Cf. *Substrate* IV, 116.

#### d. PENULT.

232. The Vulgar Latin rhythmic principle tended to obliterate one of the two post-tonic syllables of proparoxytones. The penult, being next to the accent, was weaker and more exposed to syncope. We find in late Latin much confusion of *e* and *i*: *anemis, meretis*, etc., Neumann 22; *dixemus*, etc., Bon. 118. Likewise *o* and *u*: *ambolare*, etc., R. 464; *insola*, etc., Bon. 131-135; cf. *Sepulcri* 201-202.

The treatment of this vowel, however, was apparently very inconsistent in Vulgar Latin, and the conditions differed widely in different regions. There was probably a conflict between cultivated and popular pronunciation, both types often being preserved in the Romance languages: thus while the literary and official world said (*h*)*ŏmĭnes* (> It. *uomini*), the uneducated pronounced 'ŏm'nes (> Pr. *omne*); similarly beside *sŏcĕrum* there was *sŏcrum*.

As far as the general phenomena can be classified, we may say that in popular words in common speech the vowel of the penult tended to fall under the following conditions:—

#### (1) BETWEEN ANY CONSONANT AND A LIQUID.

233. A vowel preceded by a consonant and followed by a liquid weakened and fell in the earlier part of the Vulgar

Latin period: *altra*; *anglus*; *aspra*; *dedro* for *déderunt*, *Lexique* 63; *fecrunt fecru*, *Lexique* 64; *ins(u)la*; *juglus*; *maníplus*; *socro*, *Pirson* 51. In some words we find *a* weakened to *e*: *cítera*, *App. Pr.*; *hilerus*, *Carnoy* 12; *Cæseris*, *compera*, *seperat* (about 500 A. D.), *Vok.* I, 195-196; *Eseram* for *Isaram*, *Bon.* 96. For a vowel between a *labial* and a liquid, see (2) below.

But if the first consonant was a palatal, the vowel seems to have been kept, at any rate in some regions: *bájulus*, *frágilis*, *gráçilis*, *virginem*. In *vigilat* > \**víglat* the vowel fell before the *g* began to be palatalized (so apparently in *dígítum* > *dic-tum*, *Franz.* 2 I, 15-16; *frígidus* > *frígdus*, *App. Pr.*). Cf. § 259.

234. Latin originally had the two diminutive endings *-clus* (<*-tlo*), as in *sæclum*, and *-cŭlus* (<*-co-lo*), as in *aurícŭla*. These were kept distinct by Plautus. Later they were confused, both becoming *-cŭlus* in Classic Latin, both *-clus* in vulgar speech: *artíc(u)lus*, *bác(u)lus*, *másc(u)lus*, *óc(u)lus*, *spéc(u)lum*, *vernác(u)lus*, *víc(u)lus*. *Oclus* and some others occur in Petronius: see W. Heræus, *Die Sprache des Petronius und die Glossen*, 1899; cf. *peduclum*, *Waters* Ch. 57. Many examples are found in inscriptions: *oclos*, *scaplas*, *Audollent* 538; *aunclus*, *felicla*, *masclus*, *Pirson* 49-50. Cf. *Franz.* 2 I, 16-18.

To *-clus* was assimilated in popular Latin the ending *-tŭlus*: *capítulus* > \**capícclus*; *fístula* > \**físccla*; *vétulus* > *veclus*, *App. Pr.* (cf. *vitlus*, *Pirson* 51). But a few words, which must have been slow in entering the common vocabulary, escaped this absorption: *crústulum* > *crustlum* (found in 18 A. D.); *spatula* > \**spatla*. Cf. § 284.

## (2) BETWEEN A LABIAL AND ANY CONSONANT.

235. A vowel preceded by a labial and followed by a consonant was inclined to fall early: *bublus*; *cóm(i)tem*; *comp'tus*;

*déb(i)tum; dóm(i)nus; fib(u)la; póp(u)lus; sablum; trib(u)la; vápulo baplo.* In *dóm(i)nus* the *mn* form may be the older: *domni*, Pirson 50; *domnus* in St. Augustine, Koffmane 109; *domnicus*, R. 467; *domnulus*, Koffmane 111. *Lamna* occurs in Horace and Vitruvius, *Franz.* 2 I, 13. Petronius has *bublum*, Waters Ch. 44, *offla*, Waters Ch. 56. Cf. *fibla, pópulus, sablum*, etc., in R. 467.

In some words, however, the vowel was kept, either everywhere or in a large region: *árb(o)rem; hámula; hóm(i)nes; júv(e)nis; nébula; trémulat.*

236. When *ab* or *av* was brought next to a consonant by the fall of a following vowel, it generally became *au*, but often there were double forms; the process began very early: *\*ávica > auca*, found in glosses; *ávidus > audus*, Plautus (cf. *avunculus > aunculus*, Plautus); *\*clávido > claudio* (cf. *\*navifragus > naufragus*); *fábula > \*faula \*fabla*; *gábata > \*gauta \*gabta*; *\*návitat > \*nautat*; *parábula > \*paraula \*parabla*; *tábula > \*taula \*tabla*. Cf. *Franz.* 2 I, 12.

### (3) BETWEEN A LIQUID AND ANY CONSONANT.

237. A vowel preceded by a liquid and followed by a consonant was subject to syncope at all periods: *ardus*, Plautus; *caldus*, Plautus, Cato, Varro, Petronius; *cól(a)phus* (cf. *percolopabat*, Waters Ch. 44; *colpus*, *Gl. Reich.*); *fúlica fulca*, *Franz.* 2 I, 13; *lardum*, Ovid, Martial, Juvenal, Pliny; *merto*, Pirson 51, *Franz.* 2 I, 15; *soldus*, Cæsar, Horace, Varro; *valde*; *viridis*, *App. Pr.* (cf. *viridiaria*, Vegetius, 4th century). Cf. *Franz.* 2 I, 12 ff.

### (4) MISCELLANEOUS.

238. In some words the vowel fell under different conditions: *digitum > dictum*, *Franz.* 2 I, 15-16 (cf. § 233); *frígidus*

> *frigidus* (cf. § 233), *App. Pr. (fricda)*, Pompeii (FRIDAM); *máxima* > *masma*, 2d century, Suchier 732; *nítidus* > \**nittus*, *pútidus* > \**puttus*, probably late; *postus*, Lucretius, Pirson 50, Franz. 2 I, 13-14 (cf. *posturus*, Cato).

239. In the transition from Vulgar Latin to the Romance languages the vowels in classes (1), (2), (3), — in so far as they had not fallen already, — were syncopated with some regularity; and a number of vowels otherwise placed fell under different conditions in various regions: *pónere* > \**ponre*, *tóllere* > \**tolre*; *fémína* > \**femna*, *hábitus* > \**abtus*, *rápídus* > \**rapdus*; *cárrico* > \**carco*, *cléricus* > \**clercus*, *collocat* > \**colcat*; *déc(i)mus*, *fráx(i)nus*, *pérs(i)ca*, *séd(e)cim*. Cf. *Gl. Reich.*: *carcatu*s, *culicet culcet* = *collöcat*.

In a part of Gaul *ámita* > \**anta*, *débita* > \**depta*, *domínica* > \**dominca*, *mánica* > \**manca*, *sémita* > \**sentá*. Some of these shortened forms were used in other regions.

A vowel preceded by *d* or *t* and followed by *c* seems to have remained longer than most other vowels that fell at all: *júdicó*, *médicus*, *viáticum*, *víndico*, etc.

#### e. FINAL SYLLABLE.

240. The vowels regularly remained through the Vulgar Latin period. Later, about the eighth century, they generally fell, except *a* and *i*, in Celtic, Aquitanian, and Ligurian territory.

241. In the *App. Pr.* we find “*avus non aus*,” “*flavus non flaus*,” “*rius non rius*.” *Aus* and *flaus* have left no representatives, but *rius* is evidently the ancestor of Italian and Spanish *rio*. All three forms are probably examples of a phonetic reduction that affected certain regions.

Through a large part of the Empire *-āvit* > *-aut*: *triumphaut* is found in Pompeii. See Morphology.

242. Final vowels, as in modern Italian, must have been often elided or syncopated in the interior of a phrase, especially *e* after liquids: Caper, “*bibere non biber*”; *haber* in an inscription; *conder*, *præber*, *prædiscer*, *tanger* in manuscripts. See *Franz.* 1, 41. So, perhaps, *autumnal(e)*, *tribunal(e)*, etc.

The *App. Pr.* has “*barbarus non barbar*,” “*figulus non figel*,” “*masculus non mascel*.” These curious forms are probably not the result of a phonetic development, but are rather due to a local change of inflection, which left no trace in the Romance languages. Cf. Old Latin *facul* = *facilis*, *famul* = *famulus*.

243. *A*, long or short, was naturally pronounced *a*; *æ*, *ě*, *ǐ*, according to the testimony of numerous inscriptions (*Lat. Spr.* 469), were all probably sounded *e*, which in Sicily became eventually *i*; *ī* remained *i*; *ō* was *o*, which became *u* in Sicily; *ū* was *u*. In some localities this *o* and this *u* were kept distinct, but generally they were confounded (*Lat. Spr.* 469). Examples: *āmās*, *āmāt*; *sanctæ*, *trīstēs*, *trīstēm*, *trīstīs*; *fēcī*, *bōnī*, *sēntīs*; *bōnōs*, *mōriōr*; *cōrpūs*, *frūctū*. About the eighth century *a* probably became *ɶ* in northern Gaul.

244. The changes in pronunciation led to great confusion in spelling. It is likely that final vowels were especially obscure in Gaul in the sixth and seventh centuries.

Neumann 7-8 cites ten cases of *e* for *a*: *Italice*, etc.

*E* and *æ*, in late Latin, were not usually distinguished (cf. § 210): *apte* = *aptæ*, *cotidiæ*, etc., Bechtel 75-76.

*E* and *i* came to be used almost indiscriminately. Quintilian I, vii, says that Livy wrote *sibe* and *quase*; in I, iv and I, vii, he describes the final vowel of *here* as neither quite *e* nor quite *i*. Cf. *mihe*, *tibe*, etc., *Lexique* 118. *E* for *i* is frequent in the dative and ablative, Carnoy 45: *luce*, dative; *uxore*, ablative.

*Es* and *is* are continually interchanged: *Vok.* I, 244 ff., III, 116; *mares* = *maris*, etc., Audolent 535; *Joannis*, etc., Neumann 11-13; *jacis, omnes* = *omnis* (3d century), etc., Carnoy 13-15; *regis* = *reges*, etc. Bon. 111; *omnes* = *omnis*, etc., Bon. 121. So *et* and *it*: Bechtel 88-89, very common in *Per.*; *tenit*, etc., Neumann 11-13; *posuet*, etc., Carnoy 13; *movit*, etc., Bon. 115; *Sepulcri* 229-230.

With *o* and *u* it was the same. In *Vok.* II, 91 ff., there are 61 examples of *u* for ablative *o* between 126 and 563 A. D., as well as frequent instances of ablative in *um*, of *om* for *um*, *os* for *us*, and *us* for *os*. The confusion of *o* and *um* is very common in *Per.*; also in Gregory the Great, *Sepulcri* 203-204; cf. Carnoy 48, *monumento* = *monumentum*. Bon. 131 has *spoliatur* for *spoliator*. *Os* and *us* were interchanged from the third century on: *annus* = *annos*, Carnoy 48; *bonus* = *bonos*, etc., *Sepulcri* 201. The accusative plural in *us* was particularly common in Gaul: *filius* = *filios*, etc., Bon. 128; cf. Haag 42.

245. In words often used as proclitics final *-er*, *-or* became *-re*, *-ro*: *inter* > \**intre*; *quat(u)or* > *quatro*, Carnoy 221; *semper* > \**sempre*; *super* > \**supre*. Cf. *Lat. Spr.* 474.

*Minus*, used as a prefix (cf. § 29) as in *minus-pretiare*, became in Gaul *mis-*, perhaps at the end of the Vulgar Latin period, under the influence of *dis-*. Cf. *Phon.* 43-44.

## E. CONSONANTS.

246. The Latin consonant letters were B, C, D, F, G, H, I, K, L, M, N, P, Q, R, S, T, V, X, Z. *I* and *V* were used both for the vowels *i* and *u* and for the consonants *j* and *v*. *K*, an old letter equivalent to *C*, was kept in some formulas; it need

not be separately considered. *Q* was generally used only in the combination *QV* = *kw* (cf. § 223). *X* stands for *ks*. *Z* in Old Latin apparently meant *s* or *ss* (S. 319–320); later it represented a different Latin version of Greek ζ, which will be treated below (§§ 338–339).

In addition to the above, Vulgar Latin had a new *w* and *y* coming from originally syllabic *u*, *e*, or *i* in hiatus: see § 224. In words borrowed from Greek and German there were several foreign consonants, which will be discussed after the native ones.

**247.** Double consonants regularly kept their long pronunciation: *annus*, *nullus*, *passus*, *terra*, *vacca*. For *ss* > *s* and *ll* > *l* after long vowels, see § 161. For double forms like *cīpus cīppus*, see §§ 162, 163.

In late spelling there is some confusion of single and double consonants: *anos*, Pirson 88; *fillio*, Pirson 85; *serra*, Bon. 158; cf. Pirson 83–91. For Fredegarius see Haag 39–40. Double consonants are often written single in early inscriptions.

**248.** The principal developments that affected Latin consonants may be summed up as follows: *b* between vowels was opened into the bilabial fricative β, and thus became identical with *v*, which also changed to β; *c* and *g* before front vowels were palatalized and were then subject to further alterations; *h* was silent; *m* and *n* became silent at the end of a word, and *n* ceased to be sounded before *s*. The voicing of intervocalic surds began during the Vulgar Latin period.

The consonants will now be considered in detail, first the native Latin, next the Greek, lastly the Germanic; the Celtic need not be separately studied. The Latin consonants will be taken up in the following order: aspirate, gutturals, palatals, dentals, liquids, nasals, sibilants, labials.

## 1. LATIN CONSONANTS.

## a. ASPIRATE.

249. *H* was weak and uncertain at all times in Latin, being doubtless little or nothing more than a breathed on-glide: S. 255–256. Grammarians say that *h* is not a letter but a mark of aspiration: S. 262–263. There is no trace of Latin *h* in the Romance languages. Cf. G. Paris in *Rom.* XI, 399.

250. It probably disappeared first when medial: S. 266. Quintilian commends the spelling *deprendere*: S. 266. Gellius says *ahenum*, *vehemens*, *incohare* are archaic; Terentius Scaurus calls *reprehensus* and *vehemens* incorrect, and both he and Velius Longus declare there is no *h* in *prendo*: S. 266. Probus states that *traho* is pronounced *trao*: Lindsay 57. Cf. *App. Pr.*, “*adhuc non aduc.*” In inscriptions we find such forms as *aduc*, *comprendit*, *cortis*, *mi*, *nil*, *vemens*: S. 267–268.

251. Initial *h* was surely very feeble and often silent during the Republic. In Cicero's time and in the early Empire there was an attempt to revive it in polite society, which led to frequent misuse by the ignorant, very much as happens in Cockney English to-day: for the would-be elegant *chommoda*, *hinsidias*, etc., of “Arrius,” see S. 264.

Quintilian says the ancients used *h* but little, and cites “*ados ircosque*”: S. 263. Gellius quotes P. Nigidius Figulus to the effect that “*rusticus fit sermo si aspiret perperam*”; but speaks of bygone generations—i.e., Cicero's contemporaries—as using *h* very much, in such words as *sepulchrum*, *honera*: S. 263–264. Pompeius notes that *h* sometimes makes position, as in *terga fatigamus hasta*, sometimes does not, as in *quisquis honos tumuli*: Keil V, 117. Grammarians felt obliged to discuss in detail the spelling of words with<sup>1</sup> or without *h*: S. 264–265.

*H* is dropped in a few inscriptions towards the end of the Republic: *arrespex* (for *haruspex*), etc., S. 264. In Rome are found: E[REDES], *C. I. L. I*, 1034; ORATIA, *C. I. L. I*, 924; OSTIA, *C. I. L. I*, 819. In Pompeii *h* is freely omitted; and after the third century it is everywhere more or less indiscriminately used: *abeo*, *abifat*, *anc*, *eres*, *ic*, *oc*, *omo*, *ora*, etc., *haram*, *hegit*, *hossa*, etc., S. 265-266. Cf. *ospitium*, *ymnus*, etc., *heremum*, *hiens*, *hostium*, etc., Bechtel 77-78; *ortus*, etc., *hodio*, etc., R. 462-463.

252. After *h* had become silent, there grew up a school pronunciation of medial *h* as *k*, which has persisted in the Italian pronunciation of Latin and has affected some words in other languages: *michi*, *nichil*, Bechtel 78, R. 455. Cf. E. S. Sheldon in *Harvard Studies and Notes in Philology and Literature* I (1892), 82-87.

#### b. GUTTURALS.

253. *C* and *K* did not differ in value except that *C* sometimes did service for *G*: *App. Pr.*, "*digitus non dicitus*"; *dicitos* = *digitos*, Audollent 536; cf. S. 341-344. There was some confusion, too, of *Q* and *C*: S. 345.

254. *QV* was pronounced *kw*: S. 340-341, 345-346, 350-351. Before *u* and *o*, however, the *kw* was reduced to *k* by the first or second century, probably earlier in local or vulgar dialects: Quintilian VI, iii, records a pun of Cicero on *coque* and *quoque*; *condam*, *cot*, *cottidie*, S. 351-352; *in quo ante* = *inchoante*, *quooperta* = *coperta*, *secuntur*, Bechtel 78-79. Cf. § 226.

Before other vowels the *kw* was regularly kept in most of the Empire, unless analogy led to a substitution of *k*, as in *coci* for *coqui* through *cocus*: see § 226. But in Dacia, south-eastern Italy, and Sicily subsequent developments point to a Vulgar Latin reduction of *que* to *ke*, *qui* to *ki*: *Lat. Spr.* 473.

In *quinque* the first *w* was lost by dissimilation: CINQVE, Carnoy 221, found in Spain (so CINQV, *Lexique* 93); CINCTIVS, CINQVAGINTA, S. 351. *Laqueus* seems, for some reason, to have become \**laceus*: *Substrate* III, 274.

255. *X* stood for *ks*: S. 341, 346, 352. After a consonant *ks* early tended to become *s*: Piautus uses *mers* for *merx*; Caper, "*cals* dicendum, ubi materia est, per *s*," Keil VII, 98.

By the second or third century *ks* before a consonant was reduced to *s*: *sestus* is common in inscriptions, cf. Carnoy 170, Eckinger 126 (Σέστος); *destera*, Carnoy 171; *dester*, S. 353; *mextum* for *mæstum*, Audollent 537. So *ex-* > *es-* in *excutere*, *exponere*, etc.: cf. *extimare* for *æstimare*, Bechtel 139. Hence sometimes, by analogy, *es-* for *ex-* before vowels, as in \**essagium*, but not in *exire*.

At about the same time final *ks* became *s*, except in monosyllables: *cojus*, *conjus*, *milex*, *pregnax* = *prægnans*, *subornatrix*, etc., in inscriptions, S. 353 (cf. *xanto*, etc.); *felis*, fifth century, Carnoy 159; *App. Pr.*, "*aries non ariex*," "*locuples non lucuplex*," "*miles non milex*," "*poples non poplex*."

In parts of Italy *ks* between vowels was assimilated into *ss* by the first century, but this was only local: ALESAN[DER], S. 353; BISSIT BISIT VISIT = *vixit*, S. 353. For *ks* > *χs*, see § 266.

There are some examples, in late Latin, of a metathesis of *ks* into *sk*: *axilla* > *ascella*, Lindsay 102; *buxus* > \**buscus*; *vixit* > VIXCIT (i. e., *viscit*), Carnoy 157. Cf. *Vok.* I, 145. On the other hand, *Priscilla* > PRIXSILLA, Carnoy 158. In northern Gaul apparently *sk* regularly became *ks*, as in *cresco*, *nasco*, etc.: see *Mélanges Wahlund* 145.

256. The voicing of intervocalic surds doubtless began as early as the fifth century; it is shown by Anglo-Saxon borrowings and by such Latin forms as *frigare*, *migat* in inscriptions

and manuscripts; there are many examples from the sixth century: *Lat. Spr.* 474. A. Zimmermann, *Zs.* XXV, 731, finds in inscriptions some slight evidence of a change of *t* to *d* during the Empire, in some places perhaps as early as the first century. According to Loth 21–26, intervocalic *c*, *p*, *t* were voiced in Gaul in the second half of the sixth century. Rydberg, *Franz.* 2 I, 32, maintains, on the evidence of inscriptions and manuscripts, that *t* > *d* in the fifth century and the beginning of the sixth, while *c* > *g* at least two centuries earlier. Cf. *Vok.* I, 125 ff.; *immudavit*, 2d century, Carnoy 121; *eglesia*, *lebra*, *pontivicatus*, 7th century, Carnoy 123; *negat*, *pagandum*, etc., *sigricius* = *secretius*, etc., Haag 27; *cubidus*, *occubavit*, etc., *stubri*, etc., Haag 27–28; *cataveris* = *cadaveris*, etc., Haag 28–29. Some of the above examples show that consonants followed by *r* shared in the voicing, at least as early as the seventh century.

Voicing was not general, however, in central and southern Italy, Dalmatia, and Dacia.

257. Initial *c* and *cr*, in a few words, became *g* and *gr*: \**gaveola*; \**gratis*; *crassus* + *grossus* > *grassus*, found in the 4th century. Cf. *Densusianu* III–III2.

#### (1) C AND G BEFORE FRONT VOWELS.

258. Before the front vowels *e* and *i* the velar stops *k* and *g* were drawn forward, early in the Empire or before, into a mediopalatal position—*k'*, *g'*. *G* seems to have been attracted sooner than *k*: in Sardinian we find *k* before *e* or *i* preserved as a stop while *g* is not—*kelu*, *kena*, *kera*, *kima*, *kircare*, *deghe* < *decem*, *noghe* < *nucem*, but *reina*, etc.

In Central Sardinia, Dalmatia, and Illyria *k'* went no further, and in Sicily, southern Italy, and Dacia the *k'* stage was apparently kept longer than in most regions: *Lat. Spr.* 472.

259. *G'* by the fourth century had become *præpalatal* and had opened into *y*, both in popular and in clerical Latin: *Gerapolis* for *Hierapolis*, *Per.* 61, 3; "*calcostegis non calcosteis*," *App. Pr.*; *CON.GI.GI = conjugi*, *S.* 349; *geiuna = jejuna*, *Stolz* 275, *Neumann* 5, *Lat. Spr.* 473; *GENVARIUS*, *S.* 239; *GENARIUS*, *Pirson* 75; *agebat = aiebat*, *Ienubam = Genavam*, *ingens = iniens*, *Bon.* 173; *agebat = aiebat*, *agere = aiere*, *Sepulcri* 205; *Gepte*, *Tragani*, *Troge*, *Haag* 33; *iesta*, *D'Arbois* 10. Before this happened, *frigidus* in most of the Empire had become *frigdus* (*App. Pr.*, "*frigida non fricda*"), *vigilat* had become \**viglat*, and *digitus* in some places had become *dīctus* (*Franz.* 2 I, 15-16): cf. § 233.

This *y*, when it was intervocalic, fused, in nearly all the Empire, with the following *e* or *i* if this vowel was stressed: *magister* > \**mayister* > *maester*; so \**pa(g)é(n)sis*, *re(g)īna*, *vi(g)inti*, etc.; similarly perhaps the proclitic *ma(g)is*. Cf. *Agrientum*, *βειεντι = viginti*, *μαειστρο*, etc., *Vok.* II, 461 (cf. *maestati*, *Vok.* II, 460); *trienta*, *S.* 349, *Pirson* 97; *quarranta = quadraginta*, *Pirson* 97; *æliens*, *colliens*, *diriens*, *negliencia*, *Haag* 34; *recolliendo*, etc., *F. Diez*, *Grammaire des langues romanes* I, 250. After the accent, and after a consonant, the *y* regularly remained, except when analogy forced its disappearance (as in *colliens* through \**colliente*, etc.): *légit*, *léges*, *plángit*, *argéntum*. But sometimes it fused with a following *i* in proparoxytones: *roitus* (= *rógitus = rogátus*), *Vok.* II, 461.

Spain, a part of southwestern Gaul, and portions of Sardinia, Sicily, and southwestern Italy remained at the *y* stage; elsewhere the *y* developed further in the Romance languages. Cf. *Lat. Spr.* 473.<sup>1</sup>

<sup>1</sup> Some light is thrown on the later clerical pronunciation by a statement in a fragment of a tenth century treatise on Latin pronunciation, *Thurot* 77, to the effect *g* has "its own sound" (i. e., that of English *g* in *gem*) before *e* and *i*, but is "weak" before other vowels.

260. *K'* as early as the third century must have had nearly everywhere a front, or præpalatal, articulation: *k'entu*, *duk'ere*. The next step was the development of an audible glide, a short *y*, between the *k'* and the following vowel: *k'yentu*, *duk'yere*. By the fifth century the *k'* had passed a little further forward and the *k'y* had become *t'y*: *t'yentu*, *du't'yere*. Through a modification of this glide the group then, in the sixth or seventh century, developed into *t's'* or *ts*: *t's'entu* or *tsentu*.

Speakers were apparently unaware of the phenomenon until the assibilation was complete. There is no mention of it by the earlier grammarians: S. 340. In the first half of the third century some writers distinguish *ce*, *ka*, and *qu*, apparently as præpalatal, mediopalatal, and postpalatal; in the fifth century we find BINTCENTE, INTCITAMENTO: P. E. Guarnerio in *Supplementi all' Archivio glottologico italiano* IV (1897), 21-51 (cf. *Rom.* XXX, 617). S. 348 cites FES[IT], PAZE (6th or 7th century). Cf. *Vok.* I, 163. Frankish *tins* (German *zins*) is from *census*, borrowed probably in the fifth century: F. G. Mohl, *Zs.* XXVI, 595.<sup>1</sup>

*Sc* was palatalized also: *crēscēre*, *co(g)nōscēre*, *fascem*, *nascēre*, *pīscem*, etc. Cf. CONSIENSIA, SEPTRVM, S. 348.

261. For a discussion of the subject, see H. Schuchardt, *Vok.* I, 151, and *Ltblt.* XIV, 360; G. Paris in *Journal des savants*, 1900, 359, in the *Annuaire de l'École pratique des Hautes-Études*, 1893, 7, in the *Comptes rendus des séances de l'Académie des Inscriptions*, 1893, 81, and in *Rom.* XXXIII, 322; P. Marchot, *Petite phonétique du français pré-littéraire*, 1901, 51-53; W. Meyer-Lübke in *Einf.* 123-126, in *Lat.*

<sup>1</sup> In the school pronunciation of the seventh and eighth centuries *c* before *e* and *i* was probably *ts*. In the treatise cited in the preceding note, Thurot 77, it is stated that *c* has "its own sound" before *e* and *i*, and is almost like *q* before other vowels.

*Spr.* 472, in *Bausteine zur romanischen Philologie* 313 ff.; Carnoy 155–160 (who puts the assibilation in the sixth century and earlier). For a possible indication, through alliteration, of a local assibilation of *c* as early as the second century, see *Archiv* XV, 146.

262. For *ce*, *ci*, see Palatals below.

### (2) *C* AND *G* BEFORE BACK VOWELS.

263. *K* and *g* before vowels not formed in the front of the mouth usually remained unchanged: *canis*, *gustus*, *pacare*, *negare*. See, however, § 256. Inasmuch as *a* had in Gaul a front pronunciation (§ 194), *ka*, *ga* in most of that country became *k'a*, *g'a*, probably by the end of the seventh century, and then developed further: *carum* > Fr. *cher*, *gamba* > Fr. *jambe*.

Intervocalic *g* before the accent fell in many words in all or a part of the Empire, and apparently remained—perhaps under learned or under analogical influence—in others: *AVSTVS* from the second century on, Carnoy 127 (cf. *AVSTE*, S. 349); *FRVALITAS*, S. 349; so \**leālis*, \**liāmen*, \**reālis* (for *realis* in *Gl. Reich.*, see *Zs.* XXX, 50); so, too, the proclitic *eo* for *ego*, found about the sixth century, *Vok.* I, 129 (other examples in manuscripts, *Franz.* 2 II, 242–243). But *ligāre*, *nēgāre*, *pagānus*.

### (3) *C* AND *G* FINAL AND BEFORE CONSONANTS.

264. At the end of a word the guttural seems to have been regularly preserved in Vulgar Latin: *dīc*, *dūc*, *ecce hīc*, *eccu'hāc*, *fac*, *hōc*, *sīc*; cf. Italian *dimmi* (< *dīc mī*), *fammi* (< *fac mī*), *siffatto* (< *sīc factum*).

Occasionally, however, the *c* must have been lost,—mainly,

no doubt, through assimilation to a following initial consonant: *FA* for *fac*, *Zs. XXV*, 735. In late texts *nec* is often written *ne* before a consonant, and there is a confusion of *si* and *sic*: *Franz. 2 II*, 215-224, 236-240.

265. Before another consonant *k* and *g* were for the most part kept through the Vulgar Latin period: *actus, oclus; frigidus, \*viglat* (§ 233).

For *kw = qu*, see § 254. For *ks = x*, see § 255.

266. *Kt* in some parts of Italy was assimilated into *tt* by the beginning of the fourth century, in the south even in the first century: *FATA, OTOGENTOS*, in Pompeii, *Lat. Spr.* 476; *AVTOR, LATTVCAE* (301 A. D.), *OTOBRI* (380 A. D.), *PRÆFETTO*, etc., S. 348; *App. Pr.*, "*auctor non autor*"; Festus, "*dumecta antiqui quasi dumecita appellabant quæ nos dumeta*," S. 348.

The Celts perhaps pronounced the Latin *ct* as  $\chi t$  from the beginning, inasmuch as their own *ct* had become  $\chi t$  (e. g., Old Irish *ocht-n* corresponding to Latin *octo*, Windisch 394, 398-399); and likewise substituted  $\chi s$  for *ks*: *\*faxtum > Fr. fait, \*exsire > Pr. eissir*. Cf. *Einf.* § 186, *Gram. I*, § 650. The resultant phenomena can, however, be explained otherwise: Suchier 735.

267. *Nkt* became *yt*, which seems to have been assimilated into *nt* in parts of the Empire, probably by the first century: *defuntus, regnancte, sante, Lat. Spr.* 472; *santo*, S. 278; *cuntis, santus*, Carnoy 172.

There is reason to believe, however, that the *y* was retained very generally in Gaul and perhaps some other regions, and subsequently drawn forward to the præpalatal position—*n'*: *sanctum > Fr., Pr. saint, sanh*, etc.

268. *Gm* became *um*: *fraumenta, fleuma, Lat. Spr.* 472; *App. Pr.* "*pegma non peuma*" (i. e.,  $\pi\eta\gamma\mu\alpha$ ); St. Isidore, "*sagma*

quæ corrupte vulgo *sauma* [or *salma*] dicitur" (i. e., σάγμα), S. 327. Cf. Italian *soma*; and also *salma*, which comes from *sauma* as *calma* from καῦμα. *Soma* occurs in *Gl. Reich*.

269. *Gn* was variously treated in different regions, being preserved in some, assimilated into *n'* or *n* in others, and subjected to still further modifications: *rænante*, *renum*, Haag 34. Cf. *Lat. Spr.* 476.

In *cognōsco* the *g* generally disappeared, the word being decomposed—after the fall of initial *g* in *gnosco*—into *co-* and *nōsco*; similarly the *g* was sometimes lost in *cognatus*: *Vok.* I, 115–116, *connato*, *cunnuscit*, etc.

270. *Gr*, between vowels, in popular words apparently became *r* in parts of the Empire: *fra(g)rare*, *intē(g)rum*, *nī(g)rum*, *pere(g)rinum*, *pī(g)ritia*.

### c. PALATALS.

271. Latin *j* was pronounced *y*, being identical in sound with the consonant that developed out of *ġ* and *ĵ* (§ 224): *jam*, *conjux*, *cūjus*; *eāmus*, *habeam*, *tēneat*, *filia*, *vēnio*. Instead of *i* (= *j*) the spelling *ii* was often used: *coiugi*, *eiius*, Neumann, *Fortsetzung* 7.

When *y* followed a consonant, that consonant was often more or less assimilated, sometimes entirely absorbed by the *y*. Palatalization was commonest in Gaul, rarest in Dacia.

272. *Dy* and *gy*, in the latter part of the Empire, probably were reduced to *y* in vulgar speech: *deōrsum*, *dīurnus*; *adjutare*, *audiam*, *gaudium*, *hōdie*, *ōdium*, *pōdium*, *vīdeam*; *exagium*, *fageus*. Compare *oze* = *hodie* (S. 323) and *Ζουλεία* = *Julia* (Eckinger 80); *ZACONVS* = *diaconus*, etc. (S. 324) and *ZESV* = *Jesu*, *ZVNIOB* = *junior* (S. 239). Cf. *ajutit* = *adjutet*, Pirson 76; *madias* = *maias*, 364 A. D., Stolz 275, Pirson 75, Carnoy

162; *madio* = *maio*, Haag 34; *magias* = *maias*, Carnoy 162, S. 349; *juria* = *jurgia*, Σεργιος = *Sergius*, Carnoy 161; *aios* = ἄγιος, *Vok.* II, 461; *Congianus* = *Condianus*, Carnoy 162; *corridiæ* = *corrigiæ*, *Remidium* = *Remigium*, Haag 34; *anoget* = \**inodiat*, *Gl. Reich.*

*De, di*, however, towards the end of the Empire, had another—doubtless more elegant—pronunciation, which was probably *dz*: *pōdium* > It. *poggio*, but *mēdium* > It. *mezzo*. Servius in *Virg. Georg.* II, 216, says, “*Media, di sine sibilo proferenda est, græcum enim nomen est*,” S. 320. St. Isidore writes, “solent Itali dicere *ozie* pro *hodie*,” S. 321. The letter *Z* is often used in inscriptions, but we generally cannot tell whether it means *dy*, *y*, or *dz* (cf. § 339): *ZES* = *dies*, S. 323; ζιε = *die*, Audollent 537; ΖΟΓΕΝΕΣ, S. 324; cf. *sacritus* = διάκριτος, Waters Ch. 63.

In most words the vulgar *y* prevailed, in others—especially in Italy—the cultivated *dz*; from *radius* Italian has both *raggio* and *razzo*. The *dz* pronunciation was especially favored after a consonant: *hōrdeum* > It. *orzo*, *prandium* > It. *pranzo*.

273. It appears that the labials were not regularly assimilated in Vulgar Latin: *sapiam* > It. *sappia*, Pr. *sapcha*, etc. But through the analogy of *audio* > \**auyo*, *video* > \**veyo*, etc., and perhaps through slurring due to constant and careless use, *habeo*, *dēbeo* often became \**ayo*, \**deyo*: cf. It. *aggio*, *deggio*, beside *abbio*, *debbio*. The reduced forms generally prevailed, but not everywhere. For *plūvia* a form \**plōja* was substituted in most of the Empire: cf. §§ 169, 208, (4).

274. *Ly, ny*, between vowels, probably became *l', n'* before the end of the Empire: *fīlius*, *fōlia*, *mēlius*, *palea*, *īlia*; *Hispania*, *tēneat*, *vēniam*. This palatal pronunciation may be represented by the spellings *Aureia*, *Corneius*, *fīios*, etc., S. 327.

*lly, ll'g', l'g'* were probably reduced to *l'* somewhat later: *allium, malleus; cölligit; ex-ēligit*.

*Oleum*, from ἔλαιον, is an exception: cf. It., Sp. *olio*, Pg. *oleo*, Pr. *oli*, Fr. *huile*; the foreign words borrowed from Latin *oleum* indicate the same irregularity.

For *ry*, see § 296.

275. *Sy*, between vowels, doubtless became during the Vulgar Latin period *s'*, a sound similar to English *sh* in *ship*: *basium, caseus, mansiōnem*, etc.

*Ssy, scy, sty* were generally assimilated later: *\*bassiare, fascia, pōstea*. Cf. *consiensia*, Pirson 72.

For the confusion of *sy* and *ty*, see § 277.

276. *Cy* and *ty*, in the second and third centuries, were very similar in sound, being respectively *k'y* and *t'y* (cf. Fr. *Riquier* and *pitié* in popular speech), and hence were often confused: Ἀροντιανός = *Aruntianus*, 131 A. D., Eckinger 99; TERMINACIONES (2d century), *concupiscencia* (an acrostic in *Comodian*), *justicia* (in an edict of *Diocletian*), many examples in Gaul in the 5th century, *Lat. Spr.* 475; *defeniciones* (222–235 A. D.), *ocio* (389 A. D.), *staacio* (601 A. D.), *tercius*, S. 323; *oracionem* (601 A. D.), *tercia*, Pirson 71; *mendatium, servicium*, etc. Bon. 171; especially common in Gallic inscriptions of the seventh century, *Stolz* 51. Cf. *Vok.* I, 150ff.; *Densusianu* 111.

In later school pronunciation *cy* and *ty* were sounded alike. According to *Albinus* (S. 321) "*benedictio et oratio et talia t debent habere in pænultima syllaba, non c.*" In the treatise published by *Thurot* (see footnote to § 259), p. 78, we are told that *t̄i*, unless preceded by *s*, is pronounced like *c*, as in *etiam, prophetia, quatio, silentium*; *t̄i*, furthermore, is confused with *c̄i*, the spelling *c* being prescribed in *amicicia, avaricia, duricia, justicia, leticia, malicia, pudicia*, etc., also in *nuncius, ocium*,

*spacium, tercius*. Cf. *Gl. Reich.*: *audatia, speties, sotium; ambicio, inicio, spacio, tristicia*, etc.

This similarity or identity of sound led, in some cases, either locally or in the whole Empire, to the substitution of suffixes and to other permanent transfers of words from one class to the other: cf. Carnoy 151-154. Hence arose numerous double forms: *condicio conditio, solacium solatium*; later *avaritia -cia, \*cominitiare -ciare, servitium -cium*, etc.; so many proper names, *Anitius -cius*, etc., S. 324. Cf. A. Horning in *Zs. XXIV*, 545. This explains such seemingly anomalous developments as *\*exquartiare* > It. *squarciare*, *\*gutteare* > It. *gocciare*, etc. A number of words evidently had a popular pronunciation with *t'* and a school pronunciation with *k'*, or *vice versa*: cf. It. *comenzare cominciare*, etc.<sup>1</sup>

277. *T'y* developed sporadically in the second century, regularly by the fourth, into *ts* (cf. § 260): CRESCENTSIAN[VS], 140 A. D., S. 323; MARSIANESES = *Martianenses*, 3d century, Carnoy 154; ZODORYS = *Theodorus*, etc., S. 324, *Vok. I*, 68; *ampitlatru, Vincentzuz*, Audollent 537. Servius in *Don.* (S. 320) says, "Iotacismi sunt quotiens post *ti-* vel *di-* syllabam sequitur vocalis, et plerumque supradictæ syllabæ in sibilum transeunt." Papius, cited by Cassiodorus (S. 320): "*Justitia* cum scribitur, tertia syllaba sic sonat quasi constet ex tribus litteris, *t, z, et i*"; he goes on to state that it is always so when *ti* is followed by a vowel other than *i* (as in *Tatius, otia*, but not in *otii, justitii*), except in foreign proper names or after *s* (as in *justius, castius*). Pompeius says the same thing at considerable length, adding (S. 320), "si dicas *Titius*, pinguius sonat et perdit sonum suum et accipit sibilum." Consentius

<sup>1</sup>For a different explanation of the Italian and Rumanian developments, see S. Puşcariu, *Latinesches ti und ki im Rumänischen, Italienischen und Sardischen*, 1904; reviewed in *Ltbl. XXVII*, 64.

mentions the assibilation in *etiam*, St. Isidore in *justitia*: S. 320-321. Welsh words borrowed from Latin before the fourth century show no assibilation; but names in *-tiacum*, carried into Brittany in the second half of the fifth century, are assibilated (e.g., *Metiacus* > *Messac*).

At an intermediate stage between *ty* and *ts* — say *t's'y* — the group, if the *t'* was rather weak, was easily confused with *sy*. Examples are very numerous: *OBSERVASIONE*, 5th century, S. 323, Pirson 71; *diposisio* = *depositio*, *hocsiēs*, *sepsies*, 6th century, S. 323; *tersio*, Pirson 71; cf. *Vok.* I, 153. Clerical usage for a while doubtless favored *sy* for *ty*, and many words have preserved it in various regions, especially in suffixes: *palatium -sium*, *pretium -sium*, *ratio -sio*, *statio -sio*, *servitium -sium*, etc.; hence Italian *palagio* beside *palazzo*, etc., and *-igia* beside *-ezza* from *-itia*. Cf. *Ltblt.* XXVII, 65; *Rom.* XXXV, 480.

278. *K'y* was assibilated sporadically in the third century, but not regularly until the fifth or sixth, after the assibilation of *t'y* was completed: *Μαρσιανός* = *Marcianus*, 225 A. D., Eckerling 103; *judigsium*, 6th century, Carnoy 154; so *facio*, *glacies*, *placeam*, etc. The resulting sibilant was different from that which came from *t'y*: *faciam* > It. *faccia*, *vitium* > It. *vezzo*. But the intermediate stages were similar enough to lead to some confusion, and the ultimate products have become identical in many regions.

279. For *k', g'*, not followed by *y*, see Gutturals.

#### d. DENTALS.

280. The dentals were pronounced with the middle of the tongue arched up and the tip touching the gums or teeth, as in modern French, and not as in English: S. 301-302, 307.

281. *D* regularly remained unchanged: *dare*, *perdo*, *modus*, *quid*.

Oscan and Umbrian had *nn* corresponding to Latin *nd*: Sittl 37. There is some indication that this pronunciation was locally adopted in Latin: AGENNÆ, VERECVNNVS, etc., S. 311-312; "*grundio non grunnio*," *App. Pr.* If this was the case, the central and southern Italian *nn* for *nd* (as *quannu* for *quando*) may go back to ancient times: *Lat. Spr.* 476.\*

(1) Occasionally *d > l*: old *dacruma > lacrima*; *App. Pr.*, "*adipes non alipes*." Cf. Liquids. Cf. § 289, (3).

(2) In a few words *d > r*: *medidies* by dissimilation  $\text{>}$  *meridies*; ARVORSVM = *adversum*, S. 311; Consentius blames "*peres pro pedes*," S. 311. The cases seem to be sporadic and due to different special causes.

282. At the end of a word there was hesitation between *d* and *t*; *d* may have been devocalized before a voiceless initial consonant, and possibly at the end of a phrase: APVD APVT, S. 365; *capud* in Gregory the Great; FECIT FECED, etc., S. 365; INQVID, SET, etc., S. 366-367; *aput, quot, set*, Carnoy 180. Some of the confusion was doubtless due to the fall of both *d* and *t*: see § 285.

In proclitics assimilation naturally went further, as we may infer from the treatment of the prefix *ad-*: people probably said not only *at te* (cf. *attendere*) but sometimes *\*ar Romam* (cf. *arripere*). So the final consonant eventually often disappeared. Cf. S. 358-359. Grammarians warn against the confusion of *ad* and *at*, etc., S. 365-366. Cf. *ad eos* and *at ea*, etc., Carnoy 179-180; *id it, quid quit*, Carnoy 180; *a, quo* and *co*, Haag 29.

*Illud*, through the analogy of other neuters, became *illum*: Haag 29, *illum corpus*, etc.

283. Intervocalic *d*, perhaps at the end of the Vulgar Latin period, became *ð* in Spain, Gaul, Rætia, northern Italy, and a part of Sardinia: *viðere > \*vedere*. Similarly intervocalic *dr*,

either at the same time or later, became *ðr* in Spain and Gaul: *quadro* > \**quaðro*.

In *quadraginta*, *dr* > *rr*: *quarranta*, Pirson 97.

284. *T* usually remained unchanged: *tēneo*, *sītis*, *partem*, *facit*.

*Tl*, however, seems to have regularly become *cl*: *astūla* > Pr. *ascla*; *stloppus* > \**scloppus* > It. *schioppo*; *ustulare* > Pr. *usclar*. Cf. SCLIT. and SCLITIB. (from *stlis stlitis*), S. 312-313; Caper, "*Martulus . . . non Marculus*," "*stlataris sine c littera dicendum*," Keil VII, 105, 107; *App. Pr.*, "*capitulum non capiclum*," "*vetulus non veclus*," "*vitulus non viclus*." For *-tulus* > *-clus*, cf. § 234.

Between *s* and *l* a *t* developed: Caper, "*pessulum non pestulum*" (hence Italian *pestio*, etc.), S. 315. So probably *insūla* > \**isla* > \**istla* > \**iscla* > It. *Ischia*.

285. Final *t* fell in Volscian (*fasia* = *faciat*), often in Umbrian (*habe*), occasionally in Faliscan: Hammer 5, 7, 8. In early dialects we find such forms as *CVPA*, *DEDE*: S. 367. In Latin, final *t* disappeared early in the Empire in southern Italy, and during the Empire in most of Italy and Dacia; Rumanian, Italian (except Sardinian), and also Spanish and Portuguese show no trace of final *t* except in monosyllables. Cf. Hammer 28-32. The first sure examples of the fall in Latin are found in Pompeii; others appear later in the inscriptions in Christian Rome and northern Italy, as *ama*, *peria*, *relinque*, *valia*, *vixi*, etc.: S. 367-368, *Lat. Spr.* 472. Gaul, Rætia, and Sardinia kept the *t* late; but forms without the consonant (as *audivi*, *posui*) — possibly due to Italian stonecutters — occur in Gallic inscriptions. Fredegarius wrote *e* for *et*: Haag 29.

Final *nt* perhaps lost its *t* before consonants: *Lat. Spr.*

473-474. The Romance languages show forms with *nt*, with *n*, and without either consonant. *Nt*, in general, is preserved in the same regions as *t*. In inscriptions we find: *dedro* and *dedrot*, in Pisaurum, S. 365; *posuerun*, *restituerun*, *Lat. Spr.* 473-474. Cf. Lindsay 124.

Final *st*, likewise, may have lost its *t* before consonants — as *post illum* but *pos' me*, *est amatus* but *es' portatus*: *Lat. Spr.* 473. *Pos* is very common in inscriptions, and *es* is found: S. 368. Cf. *pos*, *posquam* in R. 470. According to Velius Longus, Cicero favored *posmeridianus*; Marius Victorinus preferred *posquam*: S. 368. Both *st* and *s* are represented in the Romance languages.

For the confusion of final *d* and *t*, see § 282: *capud*, *feced*; *inquit* are found. When *t* did not fall, it was doubtless often voiced, inside a phrase, before a vowel or a voiced consonant.

*Caput* became *capus* (Pirson 238) or \**capum*. Fredegarius uses *capo*: Haag 29.

286. Intervocalic *t* was voiced to *d* in Spain, Gaul, Rætia, and northern Italy probably in the fifth or sixth century: cf. § 256. Inscriptions show a few such forms as *amadus*, S. 309. Such a spelling as *retere* for *reddere* (S. 309) may indicate uncertainty in the use of *d* and *t*.

Later this *d* > *ð* in northern Gaul and Spain. In Gaul and Spain, moreover, *tr* > *dr* > *ðr*. Cf. § 283.

#### e. LIQUIDS.

##### (1) *L*.

287. *L* had a convex formation, like *d* and *t* (cf. § 280): S. 306-307, 309.

288. Priscian I, 38 (S. 324) writes: "*L* triplicem, ut Plinio videtur, sonum habet: exilem, quando geminatur secundo loco

posita, ut *il-le*, *Metel-lus*; plenum, quando finit nomina vel syllabas et quando aliquam habet ante se in eadem syllaba consonantem, ut *sol*, *silva*, *flavus*, *clarus*; medium in aliis, ut *lectus*, *lectum*." Consentius distinguishes the "sonus exilis," which he ascribes to initial and double *l* (as in *lana*, *ille*), from the "pinguis," heard *before* a consonant (as in *albo*, *alga*, etc.): S. 326. Other grammarians blame, in obscure terms, a faulty pronunciation of *l* particularly prevalent in Africa or Greece: S. 325-326. See also *Zs.* XXX, 648.

It is likely that *l* before or after another consonant had a thick sound caused by lifting the back of the tongue. *Before* consonants, this formation led in some regions, sporadically by the fourth century but regularly not until the eighth and ninth and later (*Lat. Spr.* 476), to the vocalization of *l* into *u*: *καυκουλατφ* in an edict of Diocletian, 301 A.D., Eckinger 12; *cauculus* in manuscripts, *Vok.* II, 494. *After* consonants, this elevation, shifted forwards, brought about the palatalization of *l* in Spanish and Italian: *clavem* > *kl'ave* > Sp. *llave*, It. *chiave*.

According to H. Osthoff, *Dunkles und helles l im Lateinischen* in the *Transactions of the American Philological Association* XXIV, 50, intervocalic *l*, except before *i*, also had the thick sound — as in *famulus* (but not in *similis*): thus is explained the different fate of *a* in *calēre* > Old Fr. *chaloir* and *gallīna* > Old Fr. *geline*, etc.

289. During the Latin period *l* regularly remained unchanged: *lūna*, *altus*, *mille*, *sōl*. It seems to have fallen in *tribūnal*.

For *ll* > *l*, see § 161. For *ly*, see § 274. For *sl* > *stl*, *skl*, see § 284.

(1) Metathesis occurs occasionally: Consentius (S. 327) blames "*coacla pro cloaca*," "*displicina pro disciplina*"; cf. *fabūla* > \**flaba* > It. *fiaba*, etc.

(2) There are sporadic examples of the dissimilation of two *l*'s:

*App. Pr.*, “*flagellum non fragellum*,” “*cultellum non cuntellum*”; cf. MVNTV for *multum*, *C. I. L.* IV, 1593. Cf. S. 327.

(3) Marius Victorinus (Keil VI, 8) says: “Gn. Pompejus Magnus et scribebat et dicebat *kadamitatem pro calamitate*.” Cf. § 281, (1).

(2) *R*.

290. *R* in Classic and Vulgar Latin was probably a gingival or præpalatal trill: S. 307, 309, 328. It generally resisted change: *rīdet, carrus, cūrsus, pater*.

291. In many words, however, *rs* > *ss*. The principle seems to have been that original *rs* remained, while old *rss*, coming from *rtt*, was early reduced to *ss*: *Lat. Spr.* 471. Velius Longus says (S. 330): “*Dossum* per duo *s* quam per *r* quidam ut lenius enuntiaverunt, ac tota *r* littera sublata est in eo quod est *rusum* et *retrosum*.” *Russum rusum, susum* occur in early writers; *dextrosus, introsus, rūsus, suso, susum*, etc., in inscriptions: S. 330. *App. Pr.* has *persica*; *Gl. Reich.* has *iusū = deorsum*. The assimilation was not consistently carried out everywhere, being probably somewhat hindered by school influence. It took place in the whole territory in *deōrsum* and *sūrsum*; in most of the Empire in *dōrsum*; in about half the Empire in *pērsica*; locally in *aliōrsum, retrōrsum, revērsus, vērsus*.

After long vowels the *ss* > *s* (see § 161); so *sūssum* > *sūsum*, while *dōssum* remained unchanged: *susum*, Waters Ch. 77; *suso susu susum*, Bechtel 83; *susum* very common, R. 460–461; *diosum*, R. 460. Cf. Corssen I, 243.

292. Moreover, there was a strong tendency to dissimilate two *r*'s, although it was only sporadically carried out: in Old Latin, *-aris* after *r* > *-alis*, as in *floralis*; *App. Pr.*, “*terebra non telebra*”; in inscriptions we find repeatedly *pelegrinus*

(Sittl 74), also *ministorum*, *perpenna* = *Perperna*, *propietas*, *propio*, S. 329; *albor*, *coliandrum*, *criblare*, *flagrare*, *meletrix*, *plurigo* are attested likewise, *Lat. Spr.* 477. Pompeius (S. 329) says: "Barbarismus, quando dico *mamor* pro eo quod est *marmor*." Cf. Italian *propio*, *dietro drieto*.

293. Velius Longus (S. 329) tells us that in elegant speech *per* before *l* was pronounced *pel*, as in *pellabor*, *pellicere*. Cf. PELLIGE, etc., S. 329. So Italian *per lo* > *pello*, *averlo* > (in Old It.) *avello*. This assimilation was probably not widespread in Latin; it has left very few traces in the Romance languages. Cf. Italian *Carlo*, *merlo*, *orlo*, *perla*, etc.

294. Metathesis is not uncommon: S. 330-331. Consentius mentions "*perlum* pro *prælum*," S. 330. *Crocodilus* appears as *corcodilus*, *cocodrillus*, *corcodrillus*, S. 331; cf. Italian *cocodrillo*. S. 330 notes PRANCATI. For *quatro*, *\*sempre*, etc., see § 245.

An intrusive *r* is found in *culcitra*, Waters Ch. 38.

295. Final *r*, except in monosyllables, fell, probably before the end of the Vulgar Latin period, in most of Italy and Dacia: *söror* > It. *suora*, Rum. *soaru*. Sittl 11 mentions an early fall of final *r* among the Falisci and the Marsi, as in *mate*, *uxo*; cf. FRATE, MATE.

296. *Ry* was probably preserved through the Vulgar Latin period, although it may have been reduced to *y* in parts of Italy: *cörrium* > *\*coryu* and possibly *\*coyu* (cf. It. *cuöio*).

#### f. SIBILANTS.

297. *S* seems to have been dental, with the upper surface of the tongue convex (cf. § 280): S. 302, 304, 307-308.

The old voiced *s* having become *r* (S. 314-315), Classic Latin *s* was probably always voiceless and remained so in

Vulgar Latin (S. 302-304): this is indicated by the fact that intervocalic *s* is still generally surd in Spanish (*casa*, etc.) and in most popular words in Tuscan (*naso*, etc.); corroborative evidence, as far as it goes, is furnished by such spellings as *nupsi*, *pleps*, *urps*, also *maximus*, *rexi*, etc., and the development of a *p* in such words as *hiemps*, *sumpsi*. At the very end of the Vulgar Latin period, however, intervocalic *s* may have become voiced in some regions (cf. § 256): *causa*, *mīsi*, etc.<sup>1</sup>

Classic Latin *s* was generally preserved: *sĕx*, *ōssum*, *cŭrsus*, *īste*.

298. Final *s* often fell in Umbrian (*kumate*), and occasionally in Faliscan: Hammer 5, 8. Cf. Sittl 27, who cites Umbrian PISAVRESE. In early Latin final *s* was very weak after *ŭ* and *ī*, and often was not written. Cicero (*Lat. Spr.* 471) says the loss of *-s* is "subrusticum, olim autem politius." Quintilian also (S. 361) notes the omission of *-s* by the ancients. Ennius and his followers down to Catullus did not count *-s* before a consonant in verse: S. 355-356. Cf. Pompeius (Keil V, 108): "*S* littera hanc habet potestatem, ut ubi opus fuerit excludatur de metro." In the older inscriptions *-s* is freely omitted, but later it is in the main correctly used until the second century of our era: *Lat. Spr.* 471. The omission is commonest in nominative *-ōs* or *-ūs*, but occurs also in *-īs* and *-ās*, rarely in *-ās*: *bonu*, *Cornelio*, *nepoti*, *pieta*, *Terentio*, *unu*, etc., and *matrona* for *matronas*, S. 361-362. According to *Chronologie* 175-186, the nominative singular without *s* (as *Cornelio*, *filio*) predominated in central Italy until the time of Cæsar, when *-s* was partially restored; but by 150 to 200 A. D. the forms without *s* became common

<sup>1</sup>In the previously cited Latin treatise (see footnote to § 259), Thurot 77, *s* between vowels is described as "weak," except in compounds, such as *resoluit*. This evidently indicates a voicing in late school pronunciation.

again, and prevailed in central Italy in the third century (*eio* for *ejus*, *liberio*, etc.). Cf. *morbu* = *morbus*, etc., Audolent 539, 540; *filio* = *filios*, *C. I. L.* IX, 1938. In most of Italy, and probably in Dacia, final *s* disappeared for good from the common pronunciation in the second and third centuries, except in monosyllables (*Lat. Spr.* 471): *amātis* > It. *amate*, *sētīs* > It. *sentī*, *tēmpus* > It. *tempo*; but *das* > It. *dai*, *tres* > Old It. *trei* (later *tre*). Cf. Hammer 19–28, Densusianu 122–123.

In Gaul, Spain, and some other regions, *-s*, probably owing to the previous linguistic habits of the natives, was strongly pronounced and therefore preserved. Carnoy 185–206 records the omission of *-s* in many inscriptions, but notes that as this nearly always happens at the end of a line it is doubtless only a conventional abbreviation.

299. According to Velius Longus (S. 316), *trans-* became *tra-* before *d*, *j*, and sometimes before *m* and *p*: *traduxit*, *trajecit*; *tra(ns)misit*, *tra(ns)posuit*; *transtulit*. We sometimes find, however, *transduco* and *transjicio*. Both forms occur before *l* and *v*: *tra(ns)luceo*, *tra(ns)veho*.

Italy generally favored *tra-* (but *trasporre*), Gaul and Spain usually preferred *tras-* (but *traduire*, *traducir*).

300. In *presbȳter*, a new nominative constructed from *πρεσβύτερος*, the *s* fell in Italy and elsewhere through the substitution of the prefix *præ-* (as in *præbitor*) for the unusual initial *pres-*: hence It. *prete*, Pr. *preveire* (< \**præbȳtĕrum*).

301. For prosthetic *i* or *e* before *s* + consonant, see § 230. In Old French *pasmer* (from *spasmus*) the *s* was lost probably through confusion with *es-* coming from the prefix *ex-*.

302. For *ss* > *s*, see § 161. For *sy*, see § 275. For assibilation, see Gutturals and Palatals. For *z*, see § 246 and Greek Consonants.

## g. NASALS.

303. *N*, like *d* and *t* (§ 280), was dental or gingival, with an arched tongue: S. 269–270.

*M* and *n*, initial and intervocalic, regularly remained unchanged: *mēus*, *nōster*, *amat*, *vēnit*. For the reduction of *mīnus*– to *mis*–, see § 245. There was a dissimilation of two *n*'s in *Bononia* > It. *Bologna*.

304. *M* and *n*, final or followed by a consonant, were obscure and weak in Classic Latin; the preceding vowel must have been partly nasalized, and the mouth closure incomplete. According to Priscian (S. 275), “*m* obscurum in extremitate dictionum sonat, ut *templum*, apertum in principio, ut *magnus*, mediocre in mediis, ut *umbra*.” Terentianus Maurus (S. 275) says that for *n* the air comes through both nose and mouth. So Marius Victorinus (S. 275): “*N* vero sub convexo palati lingua inhærente gemino naris et oris spiritu explicabitur.” The same author describes (S. 275) a sound between *m* and *n*: “Omnes fere aiunt inter *m* et *n* litteras mediam vocem quæ non abhorreat ab utraque littera sed neutram proprie exprimat.” Cf. S. 276.

305. In Classic Latin the nasal naturally took before labials the form of *m*; before dentals, *n*; before *f* and *v*, probably first *m*, then *n*, as the pronunciation of these fricatives changed from bilabial to dentilabial (cf. § 320); before gutturals, *ŋ*: *combura*, *immitto*, *imperio*; *conduco*, *contineo*, *innocens*; *comfluo confluo*, *comvenio convenio*; *anguis*, *inquit*, *uncus* (cf. IVNCXI, NVNCQVAM, S. 278). Cf. S. 270, 279–280. The *ŋ*—or “*n* adulterinum?”—is described by Nigidius (in Gellius), and also by Priscian, as between *n* and *g* (S. 275); cf. S. 269–270, 272. Before liquids the nasal was assimilated (*colligo*; *corrigo*, etc.), before *s* it was silent (*cosul*, etc.: cf. §§ 171, 311).

Final nasals seem to have been adapted, like medial nasals, to a following consonant: *nom paret, cun dūce, nom or non fēcit, iy carne; nol lēgo, cur rēgibus, i senātu.* Cicero advocated *cun nobis*; Servius, *cun navibus*: *Lat. Spr.* 476. In inscriptions we find *cun, locun sanctum, nomem, quan floridos, quen*, S. 364; cf. *forsitam mille*, Bechtel 81 (*forsitam*, Carnoy 220).

306. In the vulgar speech of the Empire the sound before labials seems to have been indistinct, and even before dentals not always clear (S. 271-272); before *f* and *v* there was great uncertainty (cf. §§ 171, 311), and there was apparently some doubt before *gu* and *qu* (S. 272): this is indicated by such spellings as *senper, quamta, nynfis, nunquam*, S. 276-277; *conplere, decemter*, Carnoy 176; *tan mulieribus*, Carnoy 220. Cf. Carnoy 176-177. In both old and late inscriptions the nasal is often omitted altogether before a consonant: *Decebris, exemplu, occubas*, etc., *innoceti, laterna, secudo*, etc., *iferos*, etc., *defuctæ, pricipis, reliquat*, etc., S. 273, 281-285. For the change of *ŋkt* to *ŋt*, then to *nt*, see § 267: *santa*, etc., Pirson 92; *santo*, etc., frequent, S. 278.

The hesitation and inconsistency in spelling are certainly due in part to imperfect articulation, largely to mere carelessness in cutting, but in great measure also to the mistaken efforts of later writers to restore a real or hypothetical earlier orthography: compare the treatment of prefixes, § 32.

In late Vulgar Latin *m*, *n*, *ŋ* must have been reinforced, as there is little trace of confusion in the Romance languages.

307. *Mn* seems at one time to have been pronounced *m*: Quintilian (S. 286) says: "*Columnam et consules exempta n littera legimus.*" Cf. Priscian (S. 275): "*N quoque plenior in primis sonat et in ultimis partibus syllabarum, ut nomen,*

*stamen*; *exilior in mediis, ut amnis, damnum.*" Carnoy 166 has *Interamico*, for *-amn-*, from the first century.

Late inscriptions, on the other hand, show a fondness for such spellings as *calumpnia*, *dampnum* (cf. Bon. 189, *calumpnia*, *dampnare*, etc.); and *mpn* is common in the early Romance languages. It is likely that this orthography indicates a conscious and painful effort to articulate clearly. Toward the end of the Empire fashion evidently prescribed a distinct pronunciation of *mn*, counteracting a previous tendency to slur the group.

The Romance languages point to the preservation of *mn*, although it was probably assimilated into *nn* in central and southern Italy before the Empire was over (*Lat. Spr.* 476): *Interanniensis*, Carnoy 166.

308. Between *m* and *s* or *t* a *p* generally developed in Latin—that is to say, the latter part of the *m* was unvoiced and denasalized before the surd that followed; this *p* was not always written: *sum(p)si*, *sum(p)tus*, etc. Cf. S. 298.

309. Final *m* often fell in Umbrian (as in *puplu*), occasionally in Faliscan: Hammer 5, 8. In Old Latin it was weak: S. 356. It is often omitted in inscriptions down to 130 B. C., and again in late plebeian inscriptions; in the last century of the Republic and the first two centuries of the Empire the traditional spelling is carefully observed: early and late such forms as *dece*, *eoru*, *mecu*, *mense*, *septe*, *unu* are very common, and conversely forms with a superfluous *m*, S. 363–364; cf. Audollent 539–540, abundant examples; *App. Pr.*, *ide*, *numqua*, *oli*, *passi*, *pride*. The omission of *-m* and the wrong use of it are very frequent in the *Per.*: *que ad modum*, *terra*, Bechtel 79; *jacente*, etc., *accedere*, etc., Bechtel 80; *dormito* for *dormitum*, Bechtel 91; cf. Bechtel 107. So R. 462,

*ardente lucernam*, etc. According to Quintilian (S. 362), Cato said *dice hanc*; he adds that there is scarcely any *m* audible in *tantum ille, quantum erat*.

Final *m* before vowels seems to have been, from early times, only a weak nasal glide: in *circueo* it disappears (S. 274), in poetry it may be disregarded (cf. *audiendu'st*, etc., S. 361). Before consonants it was assimilated (cf. TAN DVRVM, etc., S. 361): see § 305. Cf. S. 356–358, 360. Carnoy 206–221, who notes the omission of *-m* in many inscriptions under all possible conditions, reaches the conclusion that it became silent at the end of polysyllables by the first century, having disappeared very early before vowels, next before spirants and at the end of a phrase, then (by assimilation) before other consonants.

In the opinion of Schuchardt, *Vok.* I, 110–112, the preceding vowel was nasalized. The contrary view is maintained by Seelmann, 288–292. As the fall of *m* seems to have been due primarily to a failure to close the lips completely between two vowels, it is likely that the nasalization was slight.

The Romance languages point to a loss of *-m* in all words but monosyllables: *damnu(m)*, *pössu(m)*, *tēnea(m)*; *cūm*, *jam*, *quēm* (*quen*, Audollent 537). Cf. Hammer 32–41.

**310.** Final *n* must have been indistinct (S. 358), but it seems to have been reinforced in Classic speech (S. 286). The prefix *con-* became *co-* before vowels, as in *coactum*, *cohaerere*, *cohors*, *coicere*: S. 274, 282. Before *gn*, too, the final *n* of prefixes fell very early, as in *cognatus*, *cognosco*, *ignotus*: S. 274. Otherwise there is no sure proof of the fall of *-n* in Latin (S. 364–365), but there is abundant evidence of its assimilation to a following labial (IM BELLO, etc., S. 361): see § 305; cf. *Lat. Spr.* 473. For further assimilation, cf. Caper (Keil VII, 106), "*in Siciliam dicendum, non is Siciliam*": see § 311.

The Romance languages indicate the disappearance of *-n*, except in monosyllables: *nōme(n)*, *sēme(n)*; *in*, *nōn*. It probably fell late, after the Vulgar Latin period: *Lat. Spr.* 473.

For final *nt*, see § 285.

**311.** Before fricatives or spirants *n* regularly fell, probably through nasalization of the preceding vowel: see § 171. This phenomenon was only partially recognized by Classic authority: *-ensimus* > *-ēsimus*, *-iens* > *-iēs*, *-onsus* > *-ōsus*, as in *vicesimus*, *toties*, *formosus* (S. 273); *ns*, however, was kept in participles, as *videns*, *mansus*; both forms were used in *-ē(n)sis* (according to Velius Longus, Cicero preferred *foresia*, *hortesia*, S. 287). Charisius (S. 286) records that "*mensam sine n littera dictam Varro ait.*" Cf. Quintilian (S. 286), "*consules exempta n littera legimus.*"

In popular speech the fall was probably constant from early times: *cesor*, *cojux*, *cosol*, *coventionid*, *iferos*, *infas*, *libes*, etc., S. 274, 281-285; Stolz 243ff. Plautus repeatedly uses *mostrare*, Stolz 243. Terence seems to intend a rhyme in "*neque pes neque mens,*" *Eunuchus* 728. Such forms are frequent in inscriptions: *cofecisse*, *cojectis*, *cojugi* (very common), *covenimus*, *ifer* (Capua, 387 A. D.), *iferi*, *ifimo*, *ifra*, *iventa*, *resurges* (on a coin of Vespasian's reign), S. 274, 281-285. So in Greek-letter inscriptions: *κλήμης*, *κόζους*, etc., Eckinger 80, 113-115. Cf. Audollent 538, *iferi*; Carnoy 177, *cojugi*, etc., *mesis*, etc.; Pirson 94, *infas*, *remasit*; *App. Pr.*, "*ansa non asa*"; R. 461-462, *prægnas* repeatedly, *mesor messor = mensor*. Conversely, with a superfluous *n*: *fidens = fides*, *quiensces*, etc., S. 274, 285; *thensaurus*, Stolz 243; "*Hercules non Herculeus,*" "*occasio non occansio,*" *App. Pr.*; *locuplens*, *occansio*, *thensaurus*, etc., R. 459.

Before *f*, *j*, *v*, the *n* was generally restored by analogy (see § 171); such words as *conjux*, *convenio* are really new formations: S. 274. The only sure Romance traces of the loss of *n*

before these consonants in Latin are Italian *fante* and French *couvent*, although at a later date *nf* became *f* in Rætia and much of southern France.

Before *s*, the fall of *n* was permanent, and the only Romance words containing *ns* are learned terms or new formations: *mesa*, *mesis*, *p̄esat*, *sposus*, *tosus*; but *pensare*.

## h. LABIALS.

### (1) P.

312. *P* regularly remained unchanged: *pater*, *opus*, *corpus*.

(1) There was some sporadic confusion of *p* and *b*: *BVLICÆ*, *SCRIPTI*, S. 299; *App. Pr.*, "*plasta non blasta*," "*ziziber non ziziper*"; *cannabis* and It. *canapa*.

313. In Italy and perhaps elsewhere there was a tendency to drop *p* between a consonant and an *s* or *t*: *redempti*, etc., Pirson 93; *scultor*, etc., S. 299.

In a part of Italy *ps* became *ss* as early as the first century: *isse* for *ipse* is found in Pompeii, and is attested by Martial and possibly by the *icse* for *ipse* mentioned by Suetonius, *Lat. Spr.* 476.

In central and southern Italy *pt* became *tt* probably early in the Empire: *scritus*, etc., S. 299; *settembre*, 7th century, Carnoy 165. In a part of Gaul *captivus* seems to have been pronounced *\*caχtīvus*: it may be that in Gallic speech the *pt* of this word became *χt*, as was the case with Celtic *pt* (Dottin 100; cf. Old Irish *secht-n = septem*, Windisch 394); or perhaps *captivus* became first *\*cactīvus*, under the influence of Celtic *\*cactus* (Welsh *caeth*) = Latin *captus* (Loth 35).

314. Intervocalic *p* probably became *b* in the fifth and sixth centuries in Spain, Gaul, Rætia, and northern Italy: see § 256. Cf. Pirson 60–61: *labidem*, etc. *Pr* likewise became *br*: *Abrilis*, Pirson 61; *lebræ*, Bon. 160; *stubrum*, Haag 862.

In northern Gaul intervocalic *p* and *pr*, even in clerical Latin, developed through *b* and *br* into  $\beta$  and  $\beta r$  by the seventh century: *rivaticus*, 629 A. D., *Vok.* I, 128; *cavanna*, *Gl. Reich.*

For *pe*, *pi*, see § 273.

(2) *B.*

**315.** When *b* was not intervocalic, it usually remained unchanged: *bēne*, *blitum*, *oblītus*.

*Mb*, as in Oscan and Umbrian, became *mm* in Sicily and southern and central Italy, the *mm* being found in inscriptions as far north as Rome: *Lat. Spr.* 476. Cf. *nd.*, § 281.

Before *s* or *t* it is likely that *b* regularly became *p* in Latin, although it was often written *b*: *absens apsens*, *ab-apsolvere*, *plebs pleps*, *scribsi scripsi*, *scribtum scriptum*, *trabs traps*, *urbs urps*; *App. Pr.*, “*celebs non celeps*,” “*labsus non lapsus*.”

Final *b* must have been often assimilated to a following consonant: *sud die*, 601 A. D., Carnoy 165.

**316.** In the Empire, especially in the second century, initial *b* and *v* were much confused in inscriptions (cf. *V*): *biginti*, *bixit*, *botu*, *vene*, etc., S. 240; *Baleria*, *Balerius*, *Beneria*, *Beneti*, *Betrubius*, *Bictor*, *bos*, *valneas*, Audollent 536; African *birtus*, *bita*, *boluntas*, *Vok.* I, 98; *bivere*, very common, Carnoy 140; *baluis*, Bechtel 78; *vibit*, etc., R. 456; *bobis* in *Consentius*, *Vok.* III, 68.

In the Romance languages there are few, if any, traces of such an early interchange. Probably the confusion was mainly or wholly graphic, being due to the identity in sound of *b* and *v* between vowels (§ 318): *Lat. Spr.* 473; cf. *Einf.*, § 120. The Spanish levelling of initial *b* and *v* does not go back to Vulgar Latin (Carnoy 139-141); the confusion is far commoner in Italian inscriptions than in Spanish or Gallic (Carnoy 142-146). We find also a change of initial *v* to *b* in north Portuguese, Gascon, south Italian, and Old Rumanian.

317. After liquids, too, there was a confusion of *b* and *v* in inscriptions, *b* being substituted for *v* much oftener than *v* for *b*: *Nerba*, *salbum*, *serbus*, *solbit*, etc., S. 240; *berbex*, Waters Ch. 57; *solbere*, repeatedly, Carnoy 140; *solbere*, etc., R. 455; *App. Pr.*, "*alveus non albeus.*"

In all probability *v* really changed to *b* after liquids: see *V. B* remained unchanged.

318. Intervocalic *b* opened into  $\beta$ ; the development apparently began in the first century, was well along in the second, and was completed, at least in Italy, in the third: *Oῦονία* = *Vibia*, Rome, Eckinger 95; *DEVERE*, *DEVITVM*, *PROVATA*, etc., S. 240. As *v* also was pronounced  $\beta$ , a confusion in spelling resulted, *b* and *v* being used indiscriminately: *CVRABIT*, *IVBENTVTIS*, *NOBE*, etc., S. 240; *IVVENTE* = *jubente*, 2d century, *Einf.* 127, § 120; *cabia* = *cavea*, *Danuvium*, *Dibona*, *iubenis*, *vovis*, etc., Audollent 536-537; *devitum* (6th century), *lebis*, *redivit*, *vibi*, Carnoy 134-135; *annotavimus*, *lebat*, Bechtel 78; *devetis*, *habe* = *ave*, *rogavo*, *suabitati*, etc., R. 455-456; cf. Stolz 51, Pirson 61-62, Carnoy 134-136. Cf. *V.*

When this  $\beta$  became contiguous to a following consonant, it was vocalized into *u*: *\*faula*, *\*paraula*, *\*taula*, etc. Cf. *V.*

Intervocalic *br*, perhaps not until the end of our period, became  $\beta r$  in northern Gaul, Rætia, part of northern Italy, and Dacia.

(1) In the early stages of clerical Latin intervocalic *b* was pronounced  $\beta$ , as in popular speech: *\*fabula*, *\*taβula*, etc. Later, perhaps by the seventh century, it was sounded *b*.

(2) In *App. Pr.* we find "*sibilus non sifilus*," and Priscian (S. 300) mentions "*sifilum pro sibilum*"; cf. French *siffler*. Perhaps the form with *f* comes from some non-Latin Italic dialect: cf. *bubulcus* = It. *bifolco*, and a few other words.

(3) For *habēbam* > *\*aβea*, see § 421.

319. *Be*, *bi* probably remained unchanged, at least in most

of the Empire: *rabies*, *rūbeus*, etc. For the analogical change of *habeo* to \**ayo*, *dēbeo* to \**deyo*, see § 273.

(3) *F*.

320. *F* was originally bilabial (S. 294–295), but became dentilabial by the middle of the Empire (S. 295): cf. § 305. It is the old *f*, apparently, that is described by Quintilian (S. 296–297); a plain description of the dentilabial *f* is given by Terentianus Maurus and Marius Victorinus (S. 296).

(1) Grammarians speak of an alternation of *h* and *f*: *fædus* > *hædus*, *fasena* > *harena*, *fircum* > *hircum*, *habam* > *fabam*, etc., S. 300. The *f* and the *h* doubtless belonged to different dialects in early Latin; according to Varro, *Ling. Lat.* 5, § 97, the *f* for *h* was Sabine. This phenomenon can have no connection with the change of initial *f* to *h* in Spanish and Gascon.

321. It is probable that intervocalic *f* became *v* at the end of the Vulgar Latin period (cf. § 256): *alevanti* = *elephanti*, *paceveci* = *pacifici*, *pontevecem* = *pontificem*, Haag 32–33.

(4) *V*.

322. The letter *v* was doubtless originally pronounced *w*; but, losing its velar element, the sound was reduced, probably early in the Empire, to the bilabial fricative  $\beta$ . During the Empire Greek-letter inscriptions have *ov* or  $\beta$  for *v* (*Νερoυα* or *Νερβα*): *Ουιουία* = *Vibia*, Rome, Eckinger 95;  $\beta$  for *v* is common from the first century on, Eckinger 85–91. Velius Longus, in the middle of the second century, says that the *u* in *ualente* is pronounced “cum aliqua aspiratione”: S. 232.

Hence arises a complete confusion of intervocalic *b* and *v* (cf. *B*): *CVRABIT*, *IVBENTVTIS*, etc., S. 240; *jubari* for *juvari* in Gregory the Great. This leads to a graphic confusion of initial *b* and *v* in inscriptions: *BIGINTI*, *BIXIT*, *BOTV*, etc. (so *INBICTO*), S. 240.

Later the bilabial  $\beta$  became dentilabial  $v$  in most of the Empire: cf. § 305.

For the substitution of  $w$  for  $\beta$  or  $v$  in a few words, see Germanic Consonants.

323. After liquids  $\beta$  seems to have closed regularly into  $b$ ; this state was preserved in Rumanian (Densusianu 97, 103–105), but elsewhere the  $\beta$  or  $v$  was partially restored by school influence: CERBVS, CORBI, CVRBATI, FERBEO, NERBA (about 100 A. D.), SERBAT, SOLBIT, E. G. Parodi in *Rom.* XXVII, 177, cf. § 317. So *vervex* became *\*verbex*, then *berbex*: Waters Ch. 57; BERBECES, 2d century, *Einf.* 127, § 120 (also in *Gl. Reich.*).

Hence came hesitation in spelling (*ferveo*, *ferbui*, etc.) and inconsistent results in the Romance languages: *cōrvus* > It. *corbo corvo*, Fr. *corbeau*; *cūrvus* > Old Fr., Pr. *corp*, Sp. *corvo*; *nērvus* > It. *nerbo*, Fr. *nerf*; *servare*, *servire* > It. *serbare*, *servire*.

324. Intervocalic  $w$  or  $\beta$  had a tendency in older Latin, as in Umbrian, to disappear between two like vowels: *divīnus* > *dīnus* (cf. Umbrian *deivina* > *deina*, Sittl 26), *obliviscor* > *oblīscor*, *si vis* > *sīs*. Cf. Lindsay 52. Also, at all times, before or after  $o$ : *bōvis* > *bōs*; *devorsum* > *deōrsūm*; *faor*, Pirson 63; *moere*, Audollent 539; *Νοεμβριος*, *Vok.* II, 479; *NOEM[BRIS]*, S. 241; “*pavor non paor*,” *App. Pr.*; cf. late *noembris*, *noicius*, Lindsay 52. “*Favilla non failla*” in *App. Pr.* seems to be isolated.

In the above cases the fall apparently was only sporadic. But before an accented  $o$  or  $u$ , the  $w$  or  $\beta$  fell regularly in most of the Empire: *aunculus*, *Vok.* II, 471 (cf. *aunculi*, Pirson 63); *FLAONIVS*, S. 241; *\*paōnem*; *\*paōrem*.

Furthermore, intervocalic  $w$  or  $\beta$  regularly disappeared in popular speech before any  $u$ , probably towards the end of the Republic (when *-vos* > *-vus*): *FLAVS*, *VIVS*, S. 241 (cf. *flaus* in

*App. Pr.*, *vius* in Pirson 63); *oum*, *Vok.* II, 472 (cf. *oum* in Probus, Keil IV, 113); *nous*, Audolent 539 (cf. *noum*, Pirson 63); *gnæus*, Lindsay 52; *datus*, Carnoy 128; *primitius*, Pirson 63; *aus*, *rius*, *App. Pr.* Often, however, the *v* was restored, after the analogy of a feminine or a plural form: *ovum* (beside *oum*) through *ova*, *rivus* (beside *rius*) through *rivi*, etc. Cf. § 167.

(1) In inscriptions *-vs* is common in place of *-vvs*; in most cases this is probably only graphic; Carnoy 128-131. The *ÆVM* of *C. I. L.* I, 1220, cited by Schuchardt (*Vok.* II, 471) and others as *æum*, is evidently intended for *æuum*.

325. When intervocalic *w* or  $\beta$  became contiguous to a following consonant, it was vocalized into *u* (cf. *B*): Classic *claudo*, *naufragus*, etc.; Vulgar *aucella*, *triumphaut*, etc.

### (5) *U*.

326. *U* in hiatus which had not already become *w* (§§ 223-224) probably took that sound by the end of the Vulgar Latin period: *eccu' hīc* > \**eccwīc*, *eccu' īsta* > \**eccwīsta*, *nōcui* > *nōcwi*, *placuit* > *placwit*. Before this, the original Latin *w* (spelled *v*) had become  $\beta$ : § 322.

## 2. GREEK CONSONANTS.

327. In Greek the surd and the sonant stops must have been less sharply differentiated than in Latin; the sonants were perhaps not fully voiced, and the surds doubtless had a weak, voiced explosion: so they were not always distinguished by the Latin ear. The Greek liquids, nasals, and sibilants usually remained unchanged in transmission.

328. Single consonants sometimes became double in Latin, and Greek double consonants sometimes became single: *νόμος* > *nummus*; *ἐκκλησία* > *ec(c)lesia*. Cf. Claussen 847-851.

## (1) B, Γ, Δ.

— 329. B, γ, δ regularly remained *b*, *g*, *d*: βλαισός > *blasus*; γάρων > *garum*; δέλτα > *delta*. Sometimes, however, they were unvoiced into *p*, *c*, *t*: Ἰάκωβος > \**Jácorpus* (also \**Jácomus*); γόγγρος > *conger gonger*, σπήλυγγα > *spelunca*; κέδρος > *citrus*. Cf. Claussen 833–838.

Γμ > *um* (cf. § 268): σάγμα > *sagma sauma*.

## (2) K, Π, T.

330. K, π, τ generally remained *c*, *p*, *t*: κόλαφος > *colaphus*; πορφύρα > *purpura*; τάλαντον > *talentum*.

K, however, often became *g*; π sometimes became *b*; of a change of τ to *d* there is no example, although κάνδιτος for *andidus* (Eckinger 98) seems to point in that direction: Ἀκράγας > *Acragas Agragas*, κάμμαρος > *cammarus gammarus*, κόμμι > *gummi*, κυβερνᾶν > *gubernare*, κωβιός > *gobius*; cf. EGLOGE, PROGNE, S. 346; *App. Pr.*, “*calatus non galatus*” (= κάλαθος); the confusion is mentioned by Terentius Scaurus and others, S. 347; — πύξος > *buxus*, πυρρός > *burrus*, cf. *bustiola* in *Gl. Reich*.

Kν > *cin* in κύκνος > *cicinus* > Old. It. *cecino*.

331. After nasals, κ, π, τ regularly came to be pronounced *g*, *b*, *d* in Greek: ἀνάγκη > *anàngi*, λαμπρός > *lambrós*, ἄντρον > *ándron*. This late Greek pronunciation perhaps accounts for such cases as καμπή > Lat. *gamba*, τύμπανον > Fr. *timbre*, σάνταλον > Fr. *sandal*. Cf. Claussen 838–841.

## (3) Θ, Φ, X.

332. The explosives θ, φ, χ became in Old Latin *t*, *p*, *c* (S. 252–253): πορφύρα > *purpura*; old inscriptions, *Pilipus*, etc., S. 259; later inscriptions, *Teodor*, *nimpha*, *Cristo*, etc., S. 259–260. From the middle of the second century B. C. we find the spellings TH, PH, CH: Claussen 823–833. People of fashion

undoubtedly tried to imitate the aspirates (Lindsay 54), but popular speech kept the old *t*, *p*, *c*, for new words as well as for old: *σπαθή* > *spatha* = *spata*; *κόλαφος* > *colaphus* = *colapus*, *συμφωνία* > It. *zampogna*, *φάλαγξ* > It., Sp. *palanca*, *φαντασία* > Pr. *pantaisar*; *χορδή* > *chorda* = *corda*.

Quintilian (S. 256) says there were no aspirate consonants in older Latin. Cicero (S. 256) speaks of using the old, un-aspirated pronunciation (as *pulcros*, *triumpos*) in order to be better understood. The proper spelling is discussed by grammarians: S. 257-258.

The letter *h* is occasionally misused, as in *PHOSIT*, *PACHE*, etc.: S. 260. It is transposed in *Phitonis*, *phitonissæ*, Bonnet 141, 218; cf. *Fitonis*, *Fitones* in *Gl. Reich*.

333. In *φάλλανα* > *ballæna*, and some other early adoptions, *φ* > *b*; perhaps the reason is to be sought in a Greek dialect pronunciation: Claussen 829-831. In *δοχή* > *doga*, etc., *χ* > *g*: Claussen 831. In *θεῖος* > It. *zio* we have a late development of *θ*; cf. *App. Pr.*, "*Theophilus non izofilus*": Claussen 833.

(1) Evidence of a late school pronunciation of *θ* as *ts* is to be found in Thurot 78, 79 (cf. footnote to § 259): "*T* quoque, si aspietur, ut *c* enuntiatur, ut *æther*, *nothus*, *Parthi*, *cathedra*, *catholicus*, *etheus*, *Matheus*". . . "In principio inquam dictionis nulla prescripta causa variari compellitur, ut *thiara*, *Thiestes*, *Thestius*, *Thescelus*, *Theos*."

334. By the first century A. D., *φ* had developed into *f* in some places (S. 261): *DAFNE* occurs in Pompeii, Claussen 828; *f* is common later in southern Italy, S. 261. Certainly as early as the fourth century (Lindsay 58) *f* came to be the standard pronunciation: *App. Pr.*, "*amfora non ampōra*," "*strofa non stropa*"; Bechtel 79, *neofiti*; so *ὀφήκιον* for *officium*, etc., Eckinger 97. In late words *φ* regularly appears as *f*: *φάσηλος* > *phaselus faselus*; *κέφαλος* > It. *cefalo*; etc.

## (4) LIQUIDS, NASALS, AND SIBILANTS.

335. The liquids regularly remained unchanged: *λαμπάς* > *lampas*; *ῥήτωρ* > *rhetor*. *Rh* in common speech was doubtless pronounced like *r*.

In *σέλινον* > It. *sedano*, and a few other words, we probably have to do with a late Greek change of *λ* to *δ*.

336. The nasals, too, regularly remained unchanged: *μαῦρος* > *maurus*; *νομή* > *nome*. There are, however, some indications that they were weak before consonants: *βόμβος* > Pr. *bobansa*, etc. Cf. Claussen 845.

337. Of the sibilants, *σ* and *ξ* were regularly unchanged: *σίναπι* > *sinapis*; *ἐξόδος* > *exodus*. In *ὄσμή?* > It. *orma*, *σ* has probably become *r*. For *πρεσβύτερος* > *prebiter*, see § 300.

The unfamiliar combination *ψ* lent itself readily to metathesis: *ψάλλειν* > *psallere spallere*.

For *ζ*, see below.

## (5) Z.

338. *Z* doubtless had several pronunciations in Greek. In early Latin it was represented by *ss* or *s*: *μάζα* > *massa*, *ζώνη* > *sona* (Plautus). From Sulla's time on it was written *z* in Latin: Claussen 841-843. The grammarians throw no light on the Latin pronunciation. Quintilian refers only to the Greek letter and the lack of a corresponding Latin one; Velius Longus discusses *z* at length, as a simple sound, but seems to be referring only to Greek speech: S. 308. Priscian (Keil II, 36) says that *ζ* is sounded *sd*, but was often replaced, among the ancients, by *s*, *ss*, or *d*—as in *Saguntum*, *massa*, *Medentius*.

339. Judging from inscriptions, it was pronounced in Vulgar Latin *dy*, later *y* (cf. § 272), and subsequent developments confirm this view: *baptizare* was equivalent to *bapti(d)yare*,

*zelosus* to (*d*)*yelosus*. The ending *-i(d)yare* became very common: see § 33.

The spelling *di* for *z* occurs repeatedly: *baptidiare* is found several times in *Per.* (90, 22, etc.; cf. Bechtel 79), and is common in inscriptions (cf. *baptidiatus*, Carnoy 163); *oridium* for *ὄριζα*, *Lat. Spr.* 473. Conversely, *z* is often used for *di*: *ZABVLLVS*, *Vok.* I, 68; *zabulus*, *zacones*, Koffmane 38; *Lazis* = *Ladiis*, *zabulus*, *zaconus*, *zebus*, *zeta* = *diæta*, *zosum* = *deorsum*, *R.* 457-458.

In late inscriptions *z* for *j* is common: *zerax* = *Ἰεραξ* (202 A. D.), *zanuari*, *Vok.* I, 69; *ZESV*, *ZVNIOR*, *S.* 239; *Zouλεία* = *Julia*, *κόζους* = *conjux*, Eckinger 80. Cf. *septuazinta*, Carnoy 163.

### 3. GERMANIC CONSONANTS.

340. Most of the consonants offer no peculiarities, being treated as in Latin. A few, however, had no Latin equivalents: *ð*, *þ*, *h*, and *w*. Furthermore, *b* and *k* came in after the corresponding Latin sounds had undergone some modification.

341. *B* between vowels, occurring apparently only in words adopted after Latin intervocalic *b* had become  $\beta$  (§ 318), remained a stop: *roubôn* > *It. rubare*, *\*strîban* > *Pr. estribar*.

*G*, although it can scarcely have come in time to share in the early palatalization of Latin *g* before front vowels (§§ 258 ff.), seems to have followed a similar course, and to have participated also in the later Gallic palatalization of *g* before *a* (§ 263): *gilda* > *It. geldra*, *\*gîga* > *Pr., It. giga*, *geisla* > *Pr. gisclé*; *garba* > *Fr. gerbe*, *garto* > *Old Fr. jart*.

*K* resisted front vowels: *skëna* > *Sp. esquena*, *skërnôn* > *It. schernire*; so *\*rîk-îtia* > *Pr. riqueza*, etc. *Franko* seems to have been an early acquisition, and its derivatives palatalized their *k* before *e* and *i*: *frank-îscus* > *It. Francesco*, etc. In the

regions where Latin *c* was palatalized, in the seventh century and later, before *a* (§ 263), Germanic *k* was modified in the same way before all front vowels (including *a*): cf. Old Fr. *eschine*, *eschernir*, *richesse*; so *blank-a* > Fr. *blanche* (but It. *bianca*).

342. The spirants *ð* and *þ* were replaced in Latin by the corresponding stops, *d* and *t*: *wiðarlon* > It. *guiderdone*; *hauþa* > Fr. *honte*, *þahso* > It. *tasso*, *þarrjan* > Fr. *tarir*, *þrëscan* > Pr. *trescar*. Cf. Kluge 500.

343. Germanic *h* appeared when Latin *h* had long been silent in popular speech.

At the beginning of a word it kept its sound in northern Gaul, but apparently was neglected in the rest of the Empire: *hanca* > Fr. *hanche*, Sp. *anca*; *hapja* > Fr. *hache*, Pr. *apcha*; *hardjan* > Fr. *hardir*, It. *ardire*; *hëlm* > Old Fr. *helme*, It. *elmo*. Bon. 445 notes that *ab*, rather than *a*, is used before initial *ch*: *ab Chilperico*, etc.

Intervocalic *h* disappeared in most words, but in a few—perhaps borrowed at a different date—it seems to have been sounded *kk* in the greater part of the Empire: *fëhu* > Fr., Pr. *feu*, It. *fiò*; *skiuhan* > Fr. *esquiver*, It. *schivare*; *spëhôn* > Old Fr. *espier*, Pr. *espiar*; — *jëhan* > Old Fr. *jehir*, Pr. *gequir*, It. *gecchire*, Old Sp. *jaquir*.

*Hs*, *ht* were generally treated like Latin *ss*, *tt*: *þahso* > It. *tasso*; — *slahta* > Old Fr. *esclate*, Pr. *esclata*, It. *schiatto*; *slëht* > Pr. *esclèt*, It. *schietto*. But *wahta*, doubtless adopted at a different time, became Old Fr. *gaitte*, Pr. *gaita*; cf. It. *guatare*.

344. Germanic *w* was a strong velar and labial fricative, at a time when original Latin *w* (spelled *v*) had become the purely labial fricative  $\beta$  (§ 322). It was nearer in sound to Latin  $\mu$ : see § 326. In the *Gl. Reich*. we find it

represented by *uu*, in *uuadius*, *reuardent*, etc. Bon. 167 records *Euua*, *wa* (the interjection), *Waddo*, *walde*, *Wandali*, etc. It is generally written *w* in Fredegarius, but *Wintrio* is spelled *Quintrio*: Haag 38.

In extreme northern and eastern Gaul, in northwestern Italy, and in Rætia this *w* apparently remained unchanged in the Vulgar Latin period; elsewhere, through a reinforcement of its velar element, it became *gw*: *warjan* > \**warire* *guarire*, *wërra* > *werra* *guerra*, *wîsa* > \**wisa* *guisa*.

Through association with Germanic words, the  $\beta$  of some Latin words was changed to *w*: *vadum* + *watan* > \**wadum*, *vastare* + *wost-* > \**wastare*, etc.

See E. Mackel, *Die germanischen Elemente in der französischen und provenzalischen Sprache*, 1884; W. Waltemath, *Die fränkischen Elemente in der französischen Sprache*, 1885; W. Bruckner, *Charakteristik der germanischen Elemente im Italienischen*, 1899.

## IV. MORPHOLOGY.

### A. NOUNS AND ADJECTIVES.

#### 1. GENDER.

345. The three genders of Latin were not, in the main, dependent on sex or lack of sex. They were grammatical distinctions, whose observance was a matter of outward form. If words lost their differentiating terminations, confusion of gender ensued.

#### a. MASCULINE AND FEMININE.

346. Between masculine and feminine there was not much confusion, but there were some important shifts:—

(1) Feminines of the second declension nearly all became masculine: *fraxīnus*, etc.; cf. *castaneus* for *castanea*, Bon. 194. Feminines of the fourth declension varied (*Gram.* II, 461): *dōmus*, *fīcus*, *manus*.

(2) In Gaul, abstract nouns in *-or*, through the analogy of the great majority of abstract terms, became feminine (Bon. 503–504): *color*, *honor*, *Lat. Spr.* 483; *dolor*, *timor*, Bon. 504.

(3) Nouns that had a proparoxytonic accusative in *-erem*, *-icem*, *-inem*, *-orem*, or *-urem* were of uncertain gender (*Gram.* II, 464–467): *carcērem*, *pulīcem*, *marginem*, *lepōrem*, *turtūrem*.

(4) There were some sporadic changes: *duos arbores*, Pirson 157; *cucullus* and *cuculla*, G. 293; *fons* feminine in late Latin, *Lat. Spr.* 483; *grex* became feminine.

(5) See also § 351.

## b. MASCULINE AND NEUTER.

347. In Classic Latin a number of neuters became masculine: *balteum -us, caseum -us, cornu -um -us, frenum -i, nasum -us, tergum -us, vadum -us*; cf. *collus -um, lectus -um*.

In popular and late Latin this tendency was strong: ante-Classic, m. *papaver*; Plautus, m. *guttur, dorsus* (*Mil. Glor.* II, 4, 44), *lactem* (*Bacch.* V, 2, 16); Varro, m. *murmur*; Petronius, *balneus, cælus, fatus, lactem, vasus -um, vinus*, etc., Waters Ch. 39, 41, 42, 57, Densusianu 129, 132; *collus, me[nt]us*, etc., Audolent 545; MARIS, MAREM, Densusianu 132; *castellus, fœnus, lignus, signus, templus, verbus, vinus*, etc., R. 266; *sulphurem*, G. 293; *frigorem, maris* nom. sg., *marmorem, pectorem, roborem*, Bon. 348; *incipit iudicius*, etc., D'Arbois 135. Beside *lūmen, nōmen, pīper* there must have been \**lūminem, \*nōminem, \*pīperem*.

Conversely we find *cīnus*, n., for *cīnis, cīner*, m.; there must have been a \**pūlvus*, n., beside *pūlvis*, m. and f. (*Lat. Spr.* 483); Petronius has *thesaurum*, Waters Ch. 46. Cf. *gladium, laqueum, puteum, thesaurum*, etc., R. 270-272.

Cf. Bon. 345-349, 507-509. For the confusion of masculine and neuter in Africa, see *Archiv* VIII, 173.

348. The transition from masculine to neuter was facilitated by the fall of final *m* (§ 309), and also by the fall of final *s* in the regions where that phenomenon occurred (§ 298). These changes reduced considerably the distinguishing marks of the two genders:—

<i>filiu(s)</i>	<i>foliu</i>	<i>come(s)</i>	<i>corpu(s)</i>
<i>fili</i>	<i>folii</i>	<i>comiti(s)</i>	<i>corpori(s)</i>
<i>filio</i>	<i>folio</i>	<i>comiti</i>	<i>corpori</i>
<i>filiu</i>	<i>foliu</i>	<i>comite</i>	<i>corpu(s)</i>
<i>filio</i>	<i>folio</i>	<i>comite</i>	<i>corpore</i>
<i>fili</i>	<i>folia</i>	<i>comite(s)</i>	<i>corpora</i>
<i>filioru</i>	<i>folioru</i>	<i>comitu</i>	<i>corporu</i>
<i>fili(s)</i>	<i>folii(s)</i>	<i>comitibu(s)</i>	<i>corporibu(s)</i>
<i>filio(s)</i>	<i>folia</i>	<i>comite(s)</i>	<i>corpora</i>
<i>fili(s)</i>	<i>folii(s)</i>	<i>comitibu(s)</i>	<i>corporibu(s)</i>

In the second declension the only difference is in the nominative singular and the nominative and accusative plural; and in Italy and Dacia the distinction disappears even in the nominative singular. In the third declension the genders are distinguished only in the accusative singular and the nominative and accusative plural.

349. Thus the masculine and neuter inflections came to be fused, the characteristic neuter plural *-a* being regarded as an alternative masculine plural ending: Petronius writes *nervia* for *nervi*, Waters Ch. 45; cf. *rivus rivoza*, *Zs.* XXX, 635. So *lōcus*, *mūrus*, for instance, give in Italian: sg. *luogo*, *muro*; pl. *luoghi* *luogora*, *muri mura*. Cf. § 351.

Nearly all neuters became masculine: *os locutus est*, R. 266; *donum caelestem*, etc., R. 277; *hunc saeculum*, *hunc stagnum*, *hunc verbum*, *hunc vulnere*, Bon. 386, 348. *Mare*, however, perhaps influenced by *terra*, generally became feminine: *maris*, m. and f., Densusianu 132; *mare*, f., Haag 48. Greek neuters in *-ma*, if popular, generally became feminine: *cyma*, *sagma*.

The loss of the neuter gender for nouns was probably not complete until early Romance times. Cf. *Archiv* III, 161.

350. Among pronouns, the neuter forms were kept to express an indefinite idea: *hōc*, *id ipsum*, *illud* or *illum*, *quid*, *quod*.

Neuter adjective forms were used for a similar purpose: in the early stages of the Romance languages we find phrases pointing to such Vulgar Latin constructions as *\*mihi est grave quod ille non veniat*, etc.

### c. FEMININE AND NEUTER.

351. Classic Latin often used not only the singular for the plural in a collective sense (as *eques*, *miles*, etc., in Livy: cf. Draeger I, 4), but also the collective plural for the singular

(as *frigora, marmora, rura*: cf. Draeger I, 5-9; *Archiv* XIV, 63). So the neuter plural forms in *-a* were preserved in their collective use after the neuter singular forms had disappeared.

This formation in *-a* was extended to many masculine (cf. § 349) and even to some feminine nouns: *digita, fructa, fusa, grada* occur in late Latin, *Lat. Spr.* 482. Cf. Old Fr. *crigne* <? \**crīnea* = *crīnes*; It. *dita, frutta*, etc.; Sardinian, Apulian, Rumanian *frunza* <? \**frondia* = *frondes*.

352. In late Latin and early Romance this collective plural in *-a* came to be taken for a feminine singular: *tribula* sg., R. 269; *gaudia* sg., Bon. 351; *ligna . . . ardet* (cf. *rama*), *Gl. Reich.*; *hic est iesta*, D'Arbois 10; cf. *ne forte et mihi hæc eveniat*, etc., R. 435. The feminine character of such words was doubtless reinforced by the use, for instance, of an \**illæ pectora* to match *quæ pectora*: *Chronologie* 199. Conversely, *palpebrum* for *palpebra* occurs, R. 270.

Hence arose such feminine singular forms as \**brachia, \*folia, gaudia, gesta, ligna*, etc., for which a new plural was created: *brachias*, Audollent 548; *armentas, membras*, *Gl. Cassel*; *ingenias, simulachras*, *Gl. Reich.*

In most of the Romance territory the *-a* forms were kept only as feminine singulars, but many were preserved as plurals in central and southern Italy and Rumania.

353. Aside from these, few neuter nouns became feminine: *marmor*, f., occurs in late Latin, *Lat. Spr.* 483. For *mare* and Greek neuters in *-ma*, see § 349. For *cinus* = *cinis*, \**pulvus* = *pulvis*, see § 347.

## 2. DECLENSION OF NOUNS.

354. For the use of cases, see §§ 85-100. By the end of the Vulgar Latin period the cases were generally reduced,

except in Dacia, to two,—a nominative and an accusative-ablative,—the plural following the analogy of the singular. In Dacia the dative singular was to some extent preserved also: § 91. Cf. K. Sittl in *Archiv* II, 550.

✓ 355. The number of declensions was reduced to three, the fourth and fifth being absorbed by the others.

(1) The transfer from the fourth to the second began in Classic Latin and continued in vulgar and late speech: *dōmus*, *fīcus*, so *frūcti*, *senāti*; *gustus* in Petronius; *manos*, Audollent 544; *jusso*, *passos*, Bechtel 86; *cornum*, *fructo fructos*, *gelus*, *genum*, *gradus*, *senatus*, *spiritus*, etc., R. 260–262, 270; *lacus*, *mercatus*, G. 282–283; *jusso*, *lucto*, etc., Bon. 135. All the fourth declension eventually went over. One result of the intermediate confusion was an accusative plural spelling *-us* for *-os*, which was very common in Gaul: Bon. 337–338.

(2) The transfer of nouns in *-ies* from the fifth to the first declension began also in Classic Latin: *effigies -ia*, *luxuries -ia*, *materies -ia*. *Acia*, *facia*, *glacia*, *scabia* are attested later: Denusianu 133, *Lat. Spr.* 482. All passed over in the greater part of the Empire; but *-ies* was kept in the Spanish peninsula, in southern Italy and Sardinia, and occasionally in southern Gaul, being assimilated to the third declension: cf. Sp. *haz*, Pr. *glatz*, etc. *Dies* maintained itself, as a third declension noun, beside *dia*.

Fifth declension nouns not in *-ies* went into the third: *res rem*, *spes spem*, etc. There was also an inflection *spes spene(m)*, whence Italian *spene* (cf. SPENI): W. Heræus in *Archiv* XIII, 152.

356. The other declensions generally held their own, but there were a few shifts:—

(1) For an inflection *mama mamāne(m)*, etc., see § 359.

(2) For an inflection *Bellus Bellōne(m)*, etc., see § 362. Beside *ervum ervi*, there was an *ervus ervoris*: *Lat. Spr.* 483. *Fimus fimi*, under the influence of *stercus*, apparently became *fēmus* (*Gl. Reich.*) \**fēmōris*: cf. Old Fr. *fiens*, Pr. *femps*. *Fündus fündi* perhaps became *fündus* \**fündōris*: Old Fr. *fonz*, Pr. *fons*, Fr. *effondrer*. Beside *terminus -i*, there was a *termen terminis*.

(3) On the other hand, *ös* > *össum* (R. 259-260), *vas* > *vasum vasus* (Waters Ch. 57); so apparently *ros* > \**rōsum* (cf. Fr. *arroser*, It. *rugiada*, etc.); beside *coclear* there was *coclearium*. *Caput* became *capus* (Pirson 238) and \**capum -i*: cf. *Ltblt.* XXVII, 367. *Corpo* for *corpore* occurs in the *Per.*: Bechtel 86.

Greek nouns of the third declension sometimes passed into the first: *absis* > *absida*, G. 280; *lampas* > *lampada*, R. 258-259, G. 280, Dubois 258; *pyxis* > \**buxida*; *siren* > *sirena*, G. 280. So a few Latin nouns: *juventus* or *-tas* > *juventa*, likewise *tempesta* (*Gl. Reich.*) and probably \**potesta*; but the old forms were retained also. *Puulva* for *pūlvīs* is recorded by Audolent 416.

#### a. FIRST DECLENSION.

✓ 357. In countries which did not lose final *s* (§ 298), the accusative plural form came to be used as a nominative plural. This use was due in the main to the analogy of the singular, where there was only one form, and of feminine nouns of the third declension, which had only one form in the plural: *filia filia(m)*, *matres matres*, hence *filiās filias*. So *linguas*, Audolent 546. It probably was not common until late Vulgar Latin or early Romance times.

In Italy and Dacia, where the fall of *-s* made the accusative plural identical with the singular, the nominative plural was kept instead.

(1) According to Mohl, *Chronologie* 205-209, the nominative plural in *-as* was probably old in some parts of Italy: SCALAS, nom., 57 B. C.; LIBERTI LIBERTASQVE, Dalmatia; HIC QVESCUNT DVŚ MĀRES DVAS FILIAS, Africa. M. Bréal, *Journal des savants* 1900, Feb., p. 70, affirms that there was a feminine in *-a* with a plural in *-as* in Oscan, and also in Latin down to the second century B. C.; Celtic, too, had a similar plural. D'Arbois 21-24 assumes Celtic influence: *hic sunt cartas*, etc. No foreign or dialect influences are needed to explain the practice, but they may have helped its diffusion.

358. An ablative in *-abus* is occasionally found: *Cassiabus*, *feminabus*, *filiabus*, *pupillabus*, *Archiv* VIII, 171; *deabus*, *filiabus*, etc., Pirson 115-116; *animabus*, *famulabus*, *filiabus*, *villabus*, Bon. 331. This form left no traces in the Romance languages.

359. Feminine proper names and words denoting persons often developed, rather late, an inflection in *-ánis*, etc., or *-énis*, etc., probably under the influence of the consonantal declension of Greek names that was in vogue in schools. Pupils were taught to inflect *Glaucé Glaucénis*, *Nicé Nicénis*, etc. (R. 264); cf. Dante's *Semelé*, etc.: hence arose *Anna Annánis* or *-énis*, *mamma mammánis*, *amita \*amitánis* (so *Juliana Julianenis* in Pirson 143), cf. W. Heræus in *Zs. fr. Spr.* XXV, ii, 136. Some masculine person-names in *-a* had the same declension (*Einf.* 150, § 153): *barba barbani*, *sacrista \*sacristanis* (cf. It. *sacristano*), *scriba \*scribanis* (cf. It. *scrivano*). Both *mamani* and *tatani* are found in the third century: W. Heræus in *Archiv* XIII, 152-153. See G. Paris, *Les accusatifs en -ain*, *Rom.* XXIII, 321; E. Philipon, *Les accusatifs en -on et en -ain*, *Rom.* XXXI, 201; W. Meyer-Lübke in *Ltblt.* XXV, 206; G. Salvioni in *Rom.* XXXV, 198. In *Lat. Spr.* 483, Meyer-Lübke expresses doubt whether the feminine *-a -anis* is connected with masculine *tatani*, etc.

This feminine inflection left some traces in Gaul, Rætia, and

Italy: Fr. *nonnain*, *putain*, etc.; Lombard *madrane*, etc., *Rom.* XXXV, 207.

(1) G. Salvioni, *La declinazione imparisillaba in -a -áne, -o -óne, -e éne -íne, -i íne -éne*, *Rom.* XXXV, 198, shows that these forms of declension were very common in the mediæval Latin documents of all parts of Italy, from 750 on: *amitane*, 218; *Andreani*, 216; *barbane*, 214-215; *domnani*, 219; *Joanneni*, 250; etc. *Attane*, *barbane* still exist at both ends of Italy. According to Salvioni, the starting-point of all this inflection was *bárba barbánis*, from which it was extended to other nouns of relationship and to proper names; *bárba barbánis* itself he would ascribe to the influence of the synonymous \**bárbo* \**barbónis*.

(2) A. Zimmermann, *Zs.* XXVIII, 343, shows that there was also an inflection in *-átis*, *-étis*, and *-ótis*: *Aureliati*, *Agneti*, etc. Cf. *Eugeneti* from *Eugenes*, *R.* 264, Dubois 250; *Andreate*, *Rom.* XXXV, 216; also *Joannentis*, *Rom.* XXXV, 250.

360. In general, at the beginning of the Romance period, the first declension was reduced to this pattern:—

<i>luna</i>	<i>facia</i>	* <i>folia</i>
<i>luna</i>	<i>facia</i>	<i>folia</i>
<i>lune lunas</i>	<i>facie facias</i>	<i>folie folias</i>
<i>luna(s)</i>	<i>facia(s)</i>	<i>folia(s)</i>

In Dacia the dative singular (*lune*, etc.) was kept also.

#### b. SECOND DECLENSION.

361. As neuter nouns became masculine; they assumed, partly in Vulgar Latin but mostly in Romance, the masculine inflection in those countries where the masculine and neuter differed: *vinus*, etc. Cf. §§ 347-349.

The plural in *-a*, however, was retained to a considerable extent, especially in southern and central Italy and Dacia. Some masculines took this *-a*, by the analogy of *braccia*, etc.: \**botella*, \**botula*, *digita*, *fructa*, *rama*, etc. Cf. §§ 349, 351-352.

362. From the seventh century on,—perhaps under Germanic influence combined with the analogy of the Latin type

*gúlo gulónis*, etc.,—there developed in Gaul, Rætia, Italy, and possibly Spain, a declension *-us* (or *-o*) *-ónis* for masculine proper names: *Húgo Húgon* was Latinized into *Húgo Hugóne(m)* (cf. § 152); *avus avi* > *avo avonis*, attested in Lucca in 776 (*Rom.* XXXV, 204); hence *Pétrus* or *Pétro Petróne(m)*, *Paulus* or *Paulo Paulóne(m)*, etc. Cf. Pirson 133: *Bellus Belloni*, *Firmus Firmonis*. See E. Philipon in *Rom.* XXXI, 201; G. Salvioni in *Rom.* XXXV, 198.

Traces of this inflection are to be seen especially in French and Provençal proper names: *Foucon*, *Huon*, etc. So perhaps Italian *Donatoni*, *Giovannoni*, etc., and possibly Corsican *baboni*, *suceroni*: *Rom.* XXXV, 212–213.

363. In general, at the beginning of the Romance period, the second declension followed this pattern:—

<i>annu(s)</i>	<i>faße(r)</i>	<i>vinu(s)</i>	<i>bracciu *—us</i>	<i>fructu(s)</i>
<i>annu -o</i>	<i>fabru -o</i>	<i>vinu -o</i>	<i>bracciu -o</i>	<i>fructu -o</i>
<i>anni</i>	<i>fabri</i>	<i>vini</i>	<i>braccia -i</i>	<i>fructi -a</i>
<i>anno(s)</i>	<i>fabro(s)</i>	<i>vino(s)</i>	<i>braccia -o(s)</i>	<i>fructo(s) -a</i>

The letters enclosed in parentheses were silent in Italy and Dacia. In Gaul the accusative plural ending was often spelled *-us*: Bon. 337–338; cf. § 355, (1).

### c. THIRD DECLENSION.

364. In the ablative there was considerable confusion of *-ī* and *-ē* in Classic Latin: *marī marē*, *turrī turrē*, etc. This was carried further in common speech: cf. *Vok.* II, 85, 87. The ablative in *-ē* finally triumphed, but there are some traces of *-ī*: It. *pari*, etc.

365. In the accusative plural there was still greater confusion of *-īs* and *-ēs* (*nubēs nubīs*, etc.), both in Classic and in Vulgar Latin: cf. *Vok.* I, 247–249. Apparently *-ēs* crowded out the rarer *-īs*, which left no sure traces.

Italian *pani*, etc., Rumanian *pîni*, etc., are best explained, as by Tiktin 565-566, through the analogy of the second declension: see § 368. Cf. *folli* for *folles* in *Gl. Reich*.

366. In the nominative singular the common *-is* largely displaced the less frequent *-ēs*: *Vok.* I, 244-247, III, 116; Caper, "*fames non famis*," Keil VII, 105; *App. Pr.*, "*nubes non nubis*"; *ædis, famis, nubis*, etc., R. 263; *famis*, etc., Sepulcri 220.

As *-ēs* and *-is* came to be pronounced alike before the end of the Vulgar Latin period (cf. §§ 174, 243), it is futile to trace the Romance forms phonetically to one source rather than the other.

367. Nouns which added a syllable in the genitive, without a change of accent, tended in popular speech to use for the nominative a form in *-is*, *-es*, or *-e* fashioned on the model of the oblique cases: so *sæps* > *sæpes*, *stips* > *stipes*; *Jovis*, nom., in Ennius, Varro, Petronius (Waters Ch. 47); *lacte* in Ennius, Plautus, Petronius (Waters Ch. 38), Apuleius, Aulus Gellius; *bovis* in Varro, Petronius (Waters Ch. 62); *carnis* in Livy; *stirpis* in Livy, Prudentius; *suus* in Prudentius (F. D'Ovidio in *Raccolta di studii critici dedicata ad Alessandro D'Ancona* 627); *lentis* in Priscian; *calcis* in Venantius Fortunatus; *divite*, etc., Audollent 545-547; "*grus non gruis*," *App. Pr.*; *principens* (= *principis*), R. 263; *antestetis*, *superstitis*, *Vok.* III, 9; *urbis*, Haag 45; *pedis*, *travis* (three times), *Gl. Reich.*; cf. *Chronologie* 203, *Lat. Spr.* 481. These forms prevailed in Romance, perhaps in late popular Latin.

In Vulgar Latin this formation was extended to words with a shift of accent: *excellente* for *excellens* in Petronius, Waters Ch. 45, 66; *audace*, *castore*, *latrone*, *victore*, *voluntate*, etc., Audollent 545-547; *heredes*, R. 263; *cardonis*, *papilionis* (cf. *aculionis* for *aculeus*), *Gl. Reich.*; *heredes*, etc., D'Arbois 85-88.

These forms, too, prevailed in Romance, except for names of persons, which, being used mainly in the nominative and vocative, retained and generally preferred the old nominative form: *hōmo, sōror*, etc.; *cantātor, servītor*, etc. But names of persons in *-ans* and *-ens* usually made over the nominative: *parentis*, etc. (also *presentis*, etc.), D'Arbois 85-88; so, no doubt, *\*amantis*, etc. (also *\*clamantis*, etc.), but *infans* (also *prægnans*).

368. In most of the Romance languages (but not Spanish), masculine nouns made over their nominative plural on the model of the second declension, which was regarded as the normal masculine type: *filiī*, hence *\*patri*; *lūpi*, hence *\*cani*; *anni*, hence *\*mē(n)si*.

The process may have begun in the Vulgar Latin period, but there is virtually no evidence that it started so early: in late Latin, however, *elifanti* is common, according to Bon. 367; *parentorum* is frequent in charters; in the *Gl. Cassel*, made in Italy in the eighth or ninth century, we find *sapienti*.

369. Neuters in *-n* and *-s* regularly kept their nominative-accusative singular, as *nōme(n)*, *cōrpus cōrpu(s)*; for *\*lūmīne(m)*, *\*nōmīne(m)*, beside the old forms, see § 347. For the nominative-accusative plural, however, they constructed, probably in late Vulgar Latin or early Romance, new forms on the masculine pattern, as *\*nōmes* *\*nōme(s)*, *\*cōrpes* *\*cōrpe(s)*; but in Italy and Rumania the old ones, especially those in *-ōra*, were kept also (*Lat. Spr.* 482). In these countries *-ōra* was used as a plural ending (It. *corpo, corpi corpora*; Rum. *timp, timpuri*), and was extended in Old Italian to the second, in Rumanian to both the second and first declensions: cf. Tiktin 566.

Neuters in *-r*, which apparently became masculine or

feminine earlier than the others, often developed an accusative singular in *-e(m)* as well as a nominative-accusative plural in *-es*: *marmorem*, Bon. 348, Zauner 30; *papaverem*, Plautus, *Pæn.* I, 2, 113; *\*piperem*; *sulphurem*, G. 293; cf. § 347. But *marmor*, etc., were kept also. *Cör* apparently made its plural *\*cöres* instead of *\*cördes*: according to Mohl, *Lexique* 21-38, the word shows no trace of *d* in any of the Romance languages, except Spanish *cuerdo*, and so probably goes back to an Old Latin *\*cör \*cöris* = κῆρ κῆρος; the open *o* would possibly be explained as due to a cross between this *\*cör* and the Classic *cör*.

*Caput* became *\*capu(m)* or *capus* (Pirson 238), and passed into the second declension: cf. § 356, (3).

370. A few feminines in *-is* apparently became neuters in *-us*, but the original forms were kept also: *cinis cinus*; *pülvis \*pülvus*, whence Sp. *polvo*, Old Fr. *polz* (It. *polve* may come from *pülver*).

*Incus, incüdis* > *incüdo, incüdinis*: Lat. Spr. 483.

*Sanguis, sanguine(m)* also *sangue(m)*.

371. In general, at the beginning of the Romance period, the third declension must have gone about as follows (*-is* and *-ēs* having coincided in the pronunciation *-es*):—

(1) NO CHANGE OF ACCENT.

NO CHANGE OF STEM.

THINGS.			PERSONS.	
<i>cane(s)</i>	<i>fine(s)</i>	<i>res</i>	<i>pate(r)</i>	<i>mate(r)</i>
<i>cane</i>	<i>fine</i>	<i>rem re</i>	<i>patre</i>	<i>matre</i>
<i>cane(s)</i>	<i>fine(s)</i>	<i>res</i>	<i>patre(s)</i>	<i>matre(s)</i>
<i>cane(s)</i>	<i>fine(s)</i>	<i>res</i>	<i>patre(s)</i>	<i>matre(s)</i>

## CHANGE OF STEM.

THINGS.			PERSONS.	
<i>pede(s)</i>	* <i>arte(s)</i>	<i>corpu(s)</i>	<i>come(s)</i>	<i>vergo</i>
<i>pede</i>	<i>arte</i>	<i>corpu(s)</i>	<i>cómite</i>	<i>vérgine</i>
<i>pede(s)</i>	<i>arte(s)</i>	* <i>corpe(s)</i> <i>córpóra</i>	<i>cómite(s)</i>	<i>vérgine(s)</i>
<i>pede(s)</i>	<i>arte(s)</i>	<i>corpe(s)</i> <i>córpóra</i>	<i>cómite(s)</i>	<i>vérgine(s)</i>

## (2) CHANGE OF ACCENT.

THINGS.		PERSONS.		
* <i>sermóne(s)</i>	* <i>ratione(s)</i>	<i>amátó(r)</i>	<i>soro(r)</i>	<i>parente(s)</i>
<i>sermóne</i>	<i>ratione</i>	<i>amatóre</i>	<i>soróre</i>	<i>parente</i>
<i>sermóne(s)</i>	<i>ratione(s)</i>	<i>amatóre(s)</i>	<i>soróre(s)</i>	<i>parente(s)</i>
<i>sermóne(s)</i>	<i>ratione(s)</i>	<i>amatóre(s)</i>	<i>soróre(s)</i>	<i>parente(s)</i>

Letters enclosed in parentheses were silent in Italy and Dacia.

## d. LOSS OF DECLENSION.

372. In Italy and Dacia, through the dropping of final *r* and *s*, declension nearly disappeared before the end of the Vulgar Latin period: cf. Audollent 545-547, nom. *alumni*, *Glaucu*, *Romanu*, etc. It was probably lost altogether soon after, although a few double forms still remain: e. g., It. *ladro*, *ladrone*.

It disappeared early in Spain also. In most of Gaul it lasted through the twelfth century and later.

373. In Gaul and Spain the forms preserved were the accusative singular and the accusative plural. In Italy and Rumania, for phonetic reasons, the surviving cases are the accusative singular and the nominative plural.

There are, however, not a few examples of the nominative singular of names of persons.

## 3. DECLENSION OF ADJECTIVES.

374. Adjectives were declined after the same model as nouns. As neuter nouns assumed masculine endings (§ 347), the neuter adjective forms were less and less used; the neuter singular, however, was kept to represent a whole idea (cf. § 350), and the neuter plural (as *omnia*) was doubtless employed from time to time as an indefinite collective.

375. The principal types are:—

## (1) THREE GENDERS.

	-us -a -um	
<i>bonu(s)</i>	<i>bona</i>	<i>bonu</i>
<i>bonu -o</i>	<i>bona</i>	<i>bonu -o</i>
<i>boni</i>	<i>bone -as</i>	<i>bona</i>
<i>bono(s)</i>	<i>bona(s)</i>	<i>bona</i>

So superlatives, as *optimus*, -a, -um.

	-er -a -um	
<i>libe(r)</i>	<i>libra</i>	<i>libru</i>
<i>libru -o</i>	<i>libra</i>	<i>libru -o</i>
<i>libri</i>	<i>libre libras</i>	<i>libra</i>
<i>libro(s)</i>	<i>libra(s)</i>	<i>libra</i>

So *ager*, *agra*, *agrum*.

	-er -is -e	
<i>ace(r)</i>	<i>acre(s)</i>	<i>acre</i>
<i>acre</i>	<i>acre</i>	<i>acre</i>
<i>acre(s)</i>	<i>acre(s)</i>	<i>acri<sup>a</sup></i>
<i>acre(s)</i>	<i>acre(s)</i>	<i>acri<sup>a</sup></i>

## (2) TWO GENDERS.

<i>triste(s)</i>	<i>triste</i>
<i>triste</i>	<i>triste</i>
<i>triste(s)</i>	<i>tristi<sup>a</sup></i>
<i>triste(s)</i>	<i>tristi<sup>a</sup></i>

## (3) Originally ONE GENDER in the Nominative Singular.

<i>*felice(s)</i>	<i>fēlis</i>	<i>*prudente(s)</i>	<i>prude(s)</i>
<i>felice</i>	<i>fēlis</i>	<i>prudente</i>	<i>prude(s)</i>
<i>felice(s)</i>	<i>felicia</i>	<i>prudente(s)</i>	<i>prudentia</i>
<i>felice(s)</i>	<i>felicia</i>	<i>prudente(s)</i>	<i>prudentia</i>

## (4) COMPARATIVES apparently did not reconstruct the Nominative Singular:—

<i>melio(r)</i>	<i>meliu(s)</i>
<i>meliore</i>	<i>meliu(s)</i>
<i>meliore(s)</i>	<i>meliora</i>
<i>meliore(s)</i>	<i>meliora</i>

376. There was a good deal of confusion of types in Latin times: beside *alacer*, m. and f., there was *alacris*, m. and f., and there was probably also a feminine *\*alacra* and *\*alecra*. *Pauper* early developed a feminine *paupera* and later a neuter *pauperum*: *paupera*, *pauperum*, *pauperorum*, R. 275 (cf. *pauperorum*, Waters Ch. 46). *Macer*, *miser*, *sacer* passed into the *-us -a -um* class, Densusianu 142; so *tæter* > *tetrus*, *App. Pr. Declivis*, *effrēnis*, *imbecillis* also assumed the *-us -a -um* inflection in the Latin period; so *tristis* > *tristus*, *App. Pr.* Cf. *celerus*, *gracilus*, *præstus*, *sublimus*, etc., and conversely *benignis*, *infirmis*, etc., R. 274. *Præcox* developed a feminine *præcoca*: Neue II, 162.

In the Romance languages more adjectives went over to the *-us -a -um* type: Pr. *comuna*, *doussa*, etc.

## 4. COMPARISON.

377. For the new method of comparison, see § 56. The Romance type, not completely evolved in Vulgar Latin, was:—

<i>carus</i>	{ <i>plus</i> }	<i>carus</i>	<i>ille</i>	{ <i>plus</i> }	<i>carus</i>
	{ <i>magis</i> }			{ <i>magis</i> }	

However, the Classic Latin comparatives of many common adjectives remained in use: *altior*, *gravior* *grevior*, *grossior* (G. 285), *levior*, *longior*, *major*, *melior*, *minor*, *pejor*. So the adverbs: *longius*, *magis*, *melius*, *minus*, *pejus*, *sordidius*, *vivacius*, etc. The old superlatives remained to a considerable extent, in the clerical language, as intensives: *altissimus*, *carissimus*, *pessimus*, *proximus*, *sanctissimus*.

### 5. NUMERALS.<sup>1</sup>

**378.** *Unus* was probably declined like *bonus*. It was used also as an indefinite article (§ 57) and an indefinite pronoun (cf. § 71).

*Dūo* came to be replaced by *dūi*, attested in the third century: *Archiv* IX, 558 (cf. II, 107). Its inflection at the end of the Vulgar Latin period was probably:—

<i>dui doi (duo?)</i>	<i>due doe duas doas</i>	<i>dua doa</i>
<i>duo(s)</i>	<i>dua(s) doa(s)</i>	<i>dua doa</i>

In early Romance there was doubtless much confusion of the forms.

**379.** The numbers between two and twenty were as follows:—

*Trēs* probably developed a nominative *\*trei*, on the model of *dui*.

*Quattuor* became *quattor* (*Archiv* VII, 65), also *quatro* (Carnoy 221), *\*quattro*.

*Quīnque*, by dissimilation, became *cīnque* (*Archiv* VII, 66); so *cinquaginta* (*Archiv* VII, 70). Cf. § 254.

*Sēx*, *sēpte* (and *\*sētte*), *ōcto* ( and *\*ōtto*), *nōve*, *dēce* offer no peculiarities. Cf. *Archiv* VII, 68.

Beside *ūndēce* there seems to have been *\*ūndēce*.

For *dōdēce*, see § 225.

*Trēdēce* is regular.

<sup>1</sup> See M. Ihm, *Vulgärformen lateinischer Zahlwörter auf Inschriften* in *Archiv* VII, 65.

*Quattuordécim* regularly became \**quattördēce* (cf. § 225), but also \**quattördāce*.

*Quīndēce* is regular.

Beside *sēdēce* there was \**dēce et* (or *ac*) *sēx*.

*Septendécim*, etc., went out of use; also *unus de viginti*, etc.: G. 400. Priscian (Keil III, 412) mentions *decem et septem*. Beside this *dēce et sēpte* there was \**dēce ac sēpte*; so \**dēce et* (or *ac*) *ōcto*, \**dēce et* (or *ac*) *nōve*.

380. The tens, beginning with 20, are irregular: cf. § 142.

*Vīgīntī*, *trīgīnta* regularly became *viīnti*, *triīnta* (§ 259): *βειεντι* occurs in a sixth century document of Ravenna, *Vok.* II, 461; *trienta*, *Archiv* VII, 69. These forms easily contracted into *vīnti*, *trīnta* (*vinti*, *trinta*: *Archiv* VII, 69), which account in general for the Italian, Provençal, and French words; Rumanian has new formations. But beside these we must assume for Spanish something like \**vīnti*, \**trīnta*, with an opening of the first *i* and an early shift of accent, probably anterior to the fall of the *g*; *trīgīnta* is, in fact, mentioned as a faulty pronunciation by Consentius, Keil V, 392. Cf. G. Rydberg in *Mélanges Wahlund* 337.

This change of accent apparently occurred everywhere for the subsequent tens: \**quadrāinta*, \**cinquāinta*, \**sexāinta*, \**septāinta* \**settāinta*, \**octāinta* \**ottāinta*, \**nonāinta* \**novāinta*; the *septua*- and the *octo*- of 70 and 80 were made to conform to the type of the others. Outside of the Spanish peninsula -*āinta* apparently became -*ānta*. Furthermore the *dr* of \**quadrāinta* became *rr*: *quarranta* is found in an inscription, perhaps of the fifth century (Pirson 97; *Zs. fr. Spr.* XXV, ii, 136; *Archiv* VII, 69).

381. *Cēntu* was regular. For *ducēnti*, *trecēnti*, etc., there were probably new formations, such as \**dūi cēntu*, etc.

*Mille* was regular. For its plural it had \**dūi mille* or \**dūi mīl(l)ia*, etc.

382. The ordinal numerals, after 5th, were probably not very commonly used: the Romance languages show many new formations; in northern Italian, Provençal, and Catalan the distributive ending *-ēnus* was employed (*septēnus* for *sēptīmus*, etc.).

*Primus*, *secūndus*, *tērtius*, *quartus*, *quīntus* were generally kept, inflected like *bōnus*; but some languages have new formations even for these.

The ordinals were best preserved in Italy.

## B. PRONOUNS AND PRONOMINAL ADJECTIVES.

383. The nominative and accusative remained; and the dative was preserved in personal, demonstrative, relative, and interrogative pronouns. The ablative gave way to the dative and accusative. The genitive was usually lost; but *cūjus* was kept, and so was the genitive singular and plural of *ille*, *ipse*, and *iste*.

### I. PERSONAL PRONOUNS.

N. B. — For the *use* of personal pronouns, see § 60.

384. As the pronouns came to be expressed more and more, *ille* and also *hic*, *ipse*, and *is* were used to supply the lacking pronoun of the third person: cf. §§ 60, 67. Examples occur as early as the second century: *Franz.* 2 II, 262. *Hōc* served as an indefinite neuter. *Inde* assumed the function of an indefinite genitive: *nemo inde dubitat*, Regnier 110.

385. *Ego* lost its *g* in all the territory, but probably not until the end of the Vulgar Latin period. According to Meyer-Lübke, *Lat. Spr.* 484, *eo* occurs in manuscripts of the sixth century.<sup>1</sup> See § 263.

<sup>1</sup> But his reference to *Vok.* I, 242 is incorrect.

In the last syllable of *tībī*, *sībī* the short *i* prevailed, and was carried into *nōbīs*, *vōbīs*. On the pattern of *mī* < *mīhi*, there were formed *tī*, *sī* beside *tībī*, *sībī*; these are found, according to *Lat. Spr.* 484, from the sixth century on; cf. *Franz.* 2 II, 243-244.

386. The inflection was probably reduced to:—

<i>eo</i>	<i>nos</i>	<i>tu</i>	<i>vos</i>		
<i>mi</i>	<i>noŕe(s)</i>	<i>tī teŕe</i>	<i>voŕe(s)</i>	<i>sī seŕe</i>	<i>sī seŕe</i>
<i>me</i>	<i>nos</i>	<i>te</i>	<i>vos</i>	<i>se</i>	<i>se</i>

## 2. POSSESSIVES.

387. *Mēus*, *tūus*, *sūus* were declined like *bōnus*; *nōster*, *vōster*, like *līber*. But *mī* was used, beside *mēus*, *mēa*, as a masculine and feminine vocative (G. 281-282); *mi domina* is common, G. 282, Dubois 261-262. For the plural of the third person, *illōru* came, in the Romance languages except Spanish, to replace *sūus*, etc.

By the analogy of *mēus*, there was a *seus*: *C. I. L.* XII, 5692, 9; cf. *siæ*, IX, 3472.

*Sous* is found in Gaul, *Zs. fr. Spr.* XXV, ii, 135: perhaps it is only a phonetic spelling of *sous* < *suus*, but it may represent a pronunciation *sous* with an *o* opened by dissimilation (cf. § 167). There doubtless was a *\*tous* also.

*Vester* disappeared. Vulgar Latin *vōster* may be a survival of the Old Latin *vōster*, or a reconstruction on the model of *nōster*: cf. § 199, (1).

388. In archaic and popular Latin there was a short *sus* *sa sum*, probably used originally in the unaccented position: *sas*, *sīs* occur in Ennius, *sam* in Festus; *so* is found in *C. I. L.* V, 2007. There must have been similar short forms for the first and second persons singular: *mīs*, indeed, is used by Ennius.

The full inflection is found in the sixth century: *Franz. 2* II, 244.

These forms survived in Romance: Old It. *fratello, madrema*, etc.

### 3. DEMONSTRATIVES.

N. B.—For the *use* of demonstratives, see §§ 61–68. For their function as definite articles and personal pronouns, see §§ 60, 67–68, also § 392.

389. When *ille* and *iste* had a really demonstrative force, they came to be compounded usually with the prefix *ecc'* or *eccu'*: see § 65. Cf. *Franz. 2* II, 283–304.

390. The inflection of *ille* developed considerably in popular speech. *Ipse* and *iste* followed a similar course; we find, however, the special forms *ipsus* for *ipse* and *ipsud* for *ipsum*, R. 276; *Franz. 2* II, 274.

*Ille*, nom. sg. m., was partially replaced, probably in the second half of the sixth century, by *illī*, framed on the model of *quī*: Bon. 114, *illi* = *ille*, *ipsi* = *ipse*; cf. *Franz. 2* II, 246–260.

Through the analogy of *cūjus*, *cūi*, the m. *illius* gave way to *illūjus*, and the dat. sg. m. *illī* was replaced in part by *illūi*. The former, however, subsequently went out of use, and the latter is not found in Calabria, Sicily, Sardinia, and the Spanish peninsula. *Illius* (*ipsius*, *istius*), having become archaic in popular speech, sometimes occurred as a dative: *Franz. 2* II, 277–279. There was another dative form, *illo*, used by Apuleius and others (Neue II, 427; R. 275; Quillacq 83); but it disappeared from late Latin, being confused with the ablative and the accusative. The Old Latin genitive *illi* (*ipsi*, *isti*), was abandoned: cf. *Franz. 2* II, 273, 275.

In the dat. sg. f., beside *illī*, there was *illæ* (or *ille*), used by Cato and others (Neue II, 427; R. 275; Audollent 302); and from that, on the model of *illūi* (and perhaps of *quei*), was

made *illæi* (*illei*), which was used beside *illī* and *illæ*. In the genitive, on the same pattern (influenced perhaps by *quejus*), was constructed *illæjus* (*illejus*), which crowded out *illius*.

*Illujus*, *illui*, *illejus*, *illei* are found from the sixth century on: *Zs.* XXVI, 600, 619. Cf. *Lat. Spr.* 484: *illujus*, *illui*, *illejus*, *illæ*, *ille*; *ipsujus*, *ipseus*.

*Illorum* displaced the f. *illārum*. It came, furthermore, to be used, in Romance, for the dat. m. and f. *illīs*, which, however, did not entirely disappear. In parts of northern Spain and southwestern France *illorum* seems to have become \**illūrum*, through the analogy of *illūjus*, *illūi*.

The neuter *illud* was replaced by *illum*: *Neue* II, 426; *R.* 276.

391. The popular inflection, at the end of the Vulgar Latin period, was something like this (brackets indicating forms not kept in Romance):—

<i>elle</i> <i>elli</i>	<i>ella</i>	<i>ellu</i>
[ <i>ellujus</i> ]	<i>ellejus</i>	
<i>elli</i> [ <i>ello</i> ] <i>ellui</i>	<i>elli</i> <i>elle</i> <i>ellei</i>	<i>elli</i>
<i>ellu</i> <i>ello</i>	<i>ella</i>	<i>ellu</i> <i>ello</i>
<i>elli</i>	<i>elle</i>	<i>ella</i>
<i>ello</i> ru <i>elluru</i> ?	[ <i>ellaru</i> ] <i>ello</i> ru <i>elluru</i> ?	
<i>elli</i> (s) <i>ello</i> ru	<i>elli</i> (s)	
<i>ello</i> (s)	<i>ella</i> (s)	<i>ella</i>

392. When unaccented, these words tended to lose their first syllable (see § 157): *tū illam vidēs* > \**tu 'la' vede*(s); *vidēs tū ipsam clavem* > \**vede*(s) *tu 'sa' clave*? *Lui* and *lei* are found after the seventh century: *Franz.* 2 II, 281–283.

*Ille* and *ipse* were used freely as definite articles from the fourth century on: *Densusianu* 177. *Ille* prevailed, except in Sardinia, Majorca, a part of Catalonia and Gascony, and some dialects on the south shore of France. Cf. *Franz.* 2 II, 271–272.

## 4. INTERROGATIVE AND RELATIVE PRONOUNS.

N. B. — For the *use* of these pronouns, and the substitution of *qui* for feminine *quæ*, see §§ 69–70.

393. In Christian inscriptions from the fifth century on, *quī* takes the place of *quīs*, and also of the feminine *quæ*. Beside *cūjus*, *cūi* is found a corresponding feminine *quejus*, *quei*: see Mohl in *Zs.* XXVI, 619.

The combined inflection of *quī* and *quīs*, by the end of the Vulgar Latin period, was probably reduced, in common speech, to something like this:—

<i>quī</i>	<i>que</i>	<i>quī</i>	<i>cōd quēd</i>
<i>cūju(s)</i>	<i>queju(s)</i>	<i>cūju(s)</i>	<i>cūju(s)</i>
<i>cūi</i>	<i>quei</i>	<i>cūi</i>	<i>cūi</i>
<i>que</i>	<i>qua</i>	<i>que</i>	<i>cōd quēd</i>
<i>cō?</i>	<i>qua</i>	<i>cō?</i>	<i>cō?</i>
<i>quī</i>	<i>que</i>	<i>quī</i>	<i>que</i>
<i>cōs?</i>	<i>quas?</i>	<i>cōs?</i>	<i>que</i>

The genitive was probably not used everywhere; perhaps it was kept only in Spain. *Unde* and *d'ūnde*, 'whence,' took the meaning 'of which': Bon. 580.

394. *Qualis*, inflected like *trīstis*, was used as an interrogative pronoun and adjective. In the Romance languages (*il*)*le* + *qualis* came to be employed as a relative pronoun.

## 5. INDEFINITE PRONOUNS AND ADJECTIVES.

395. For these, see § 71. *Alter*, *nūllus*, *sōlus*, *tōtus*, *ūnus* doubtless developed an inflection like *bōnus*: gen. *nulli*, etc., R. 276; dat. *solo*, *toto*, *uno*, etc., R. 276–277. *Alter*, however, assumed a dative \**altrūi*, on the model of *illūi*, etc.

## C. VERBS.

## 1. THE FOUR CONJUGATIONS.

396. There was some confusion of conjugations; the first and fourth were least affected. In the *Peregrinatio* the second decidedly preponderates over the third (Bechtel 87); in other texts the third gains at the expense of the second.

The second gained most in Spain, the third in Italy, the fourth in Gaul. Eventually Spanish and Portuguese discarded the third, Sicilian and Sardinian the second.

New formations went into the first and fourth.

## a. FIRST CONJUGATION.

397. The first conjugation generally held its own, defections being few and partial.

Beside *do*, *dant* and *sto*, *stant* there came into use \**dao*, \**daunt* and \**stao*, \**staunt*: Rum. *daŭ*, *staŭ*; Old It. *dao*; Pr. *dau*, *daun*, *estau*, *estaun*; Pg. *dou*, *estou*. Mohl, *Lexique* 47, would connect these forms with Umbrian *stahu*, but it seems more likely that they were late Latin formations due to an effort to keep the root vowel distinct from the ending. Cf. Probus, "*adno non adnao*," *Lexique* 47.

In northern Gaul there may have developed with \**stao* a \**stais* and a \**stait*, on the analogy of (\**vao*), \**vais*, \**vait* (see § 405): cf. *Lexique* 47-54.

The Italian present subjunctive *dia* from *dare* is associated by Mohl, *Lexique* 47 and *Pr. Pers. Pl.* 30, with Umbrian *dīa*. It is entirely possible, however, that the form is a later, Italian development due to the analogy of *sia*: see § 419, (2).

398. For new formations, — such as *abbreviare*, *follicare*, *werrizare*, etc., — see §§ 33-35. Germanic verbs in *-on* and in

—*an* (but not —*jan*) regularly went in the first conjugation: *roubôn* > It. *rubare*, *wítan* > It. *guidare*. Cf. § 36.

#### b. SECOND CONJUGATION.

399. Even in Classic Latin there was some confusion between the second conjugation and the third: *fervĕre*, *tergĕre*. In Vulgar Latin the second lost some verbs to the third in most of the territory: \**ardĕre*, \**lucĕre*, *lugĕre* (R. 283), *miscĕre* (R. 284), \**mordĕre*, \**nocĕre*, \**ridĕre*, *respondĕre* (Bechtel 88: *responduntur*), *tondĕre*, \**torcĕre* (for *torquĕre*). Other verbs passed over locally or occasionally: *seditur*, Bechtel 88.

400. Some verbs went into the fourth, probably through the pronunciation of —*eo* as —*io* (see § 224): \**complĕre*, *florĕre* (R. 284), \**implĕre*, \**lucĭre*, *lugĭre* (R. 284), \**putrĕre*. The inchoative —*ĕscĕre* then became —*iscĕre*: \**florĭsco*, *lucĭsco*, \**putrĭsco*.

*Habĕre*, at least in Italy, sometimes became *habĭre*: *Vok.* I, 266 ff.; *havite*, *C. I. L.* V, 1636; *habibat*, *Itala*, Luke VI, 8; *avire* in many Italian dialects in which *e* does not phonetically become *i*, and even in early Tuscan (cf. E. Monaci, *Crestomazia italiana dei primi secoli* I, p. 20, l. 10, etc). According to Mohl, *Lexique* 108–109, this is a peculiarity of ancient Umbrian.

401. While retaining *habeo*, *habes*, *habet*, *habent*, the verb *habĕre*, under the influence of *dare* and *stare*, adopted the forms \**ho* or \**hao*, \**has*, \**hat*, \**hant* or \**haunt*.

#### c. THIRD CONJUGATION.

402. The third conjugation gave a few verbs to the second, perhaps beginning with those that had a perfect in —*ui*, such as *cadere* \**cadui*, *capere* \**capui*, *sapere* *sapui*: *sapere* was influenced, especially in Italy, by *habĕre*; *capere* may easily have imitated *sapere*, and *cadere* may have followed *capere*.

In Spain all the third conjugation verbs eventually passed into the second. This transition was probably helped by a partial fusion of *esse* and *sedere*.

403. The anomalous *pōsse pōtui*, *vēlle vōlui* naturally went over to the second conjugation, assumed the infinitive forms *potēre*, *\*volēre*, and conformed their inflection more or less to the regular type. *Vēlle*, however, was discarded in Spain and Sardinia.

(1) *Potere*, *potebam* occur repeatedly in the sixth century (*Pr. Pers. Pl. 24*), *potebo* is found in the *Gl. Reich.*, *potebas* in Fredegarius (Haag 60). *Posso* for *pōssum* is used by Gregory and Fredegarius (*Pr. Pers. Pl. 24*), *poteo* is attested in 745 A.D. (*Pr. Pers. Pl. 25*). The present indicative must have been inflected something like this:—

<i>pōssu pōsso pōtzo *pōssgo</i>	<i>*potēmu(s)</i>
<i>potē(s)</i>	<i>potēste(s) *potēte(s)</i>
<i>*potē(t)</i>	<i>pōssun(t) *poten(t)</i>

The present subjunctive must have had corresponding forms.

(2) *Volimus* is found in the sixth century (*Lat. Spr. 478*), *volemus* in the seventh (*Pr. Pers. Pl. 21*); *voles* is found in the *Gl. Reich.* *Volestis*, framed on the pattern of *potestis*, is twice used by Fredegarius (*Pr. Pers. Pl. 21*). The present indicative forms must have been something like this:—

<i>*volgo</i>	<i>vōlimu(s) vōlemu(s)</i>
<i>vōle(s)</i>	<i>vōlestē(s) *vōletē(s)</i>
<i>*vōle(t)</i>	<i>*vōlen(t)</i>

The present subjunctive must have been similarly inflected.

404. Beside *facere* there doubtless existed *\*fare* (*Facere 48*), strongly influenced by *dare* and *stare*. *Dare* and *facere* were associated in old formulas: *Lexique 53*. Furthermore, a suggestion of shortening existed in the monosyllabic imperative

*fac* (also *fa*: Zs. XXV, 735), which must have led to \**fate* beside *facite*. The present indicative certainly had several sets of forms, one series being on the pattern of the first conjugation, but the present subjunctive retained its old inflection (see *Facere* 72, 121; Zs. XVIII, 434):—

<i>facio</i>	* <i>fao</i>	* <i>fo</i>	<i>facimu(s)</i>	* <i>fáimus</i>	* <i>famu(s)</i>
<i>face(s)</i>	* <i>fais</i>	* <i>fas</i>	<i>facite(s)</i>	* <i>fáitis</i>	* <i>fate(s)</i>
<i>face(t)</i>	* <i>fait</i>	* <i>fat</i>	<i>faciun(t)</i>	* <i>faunt</i>	* <i>fant</i>

There was also a rare infinitive *facire*, which occurs several times in the sixth and seventh centuries: *Facere* 13.

405. *Vadere* supplied its missing past tenses from *ire* and other verbs. These other substitutes, whose origin constitutes one of the most discussed problems in Romance philology, resulted—to cite only the principal types—in the verbs \**allare* or *alare* (used in northern Gaul), \**annare* (used in southern Gaul), \**andare* (used in Spain and Italy). It is now generally thought that \**allare* and \**annare* developed in some peculiar way (perhaps through distortion in military commands) from *ambulare*, which is very common in late Latin in the sense of ‘march’ or ‘walk.’ \**Andare* is commonly traced to \**ambitare*, coming either from *ambitus* or, more probably, from *ambulare* with a change of suffix. C. C. Rice, in the *Publications of the Modern Language Association of America* XIX, 217, argues that the three verbs sprang from Latin *annare* (= *adnare*) and its derivatives \**annulare*, \**annitare*. For a bibliography of the subject, see Körting. Cf. also A. Horning in Zs. XXIX, 542; H. Schuchardt in Zs. XXX, 83; *Lexique* 56–78. Both *ambulare* and *alare* occur in the *Gl. Reich*. *Amnavit* is found on a sixth century African vase: see F. Novati in *Studi Medievali* I, 616–617.

*Ire* and the other substitutes were introduced also into the

present. The present indicative, moreover, was influenced by *facere fare*: —

<i>vado</i>	* <i>vao</i>	* <i>vo</i>	<i>vādīmu(s)</i>	<i>īmu(s)</i>	etc.
<i>vade(s)</i>	* <i>vais</i>	* <i>vas</i>	<i>vādīte(s)</i>	<i>īte(s)</i>	etc.
<i>vade(t)</i>	* <i>vait</i>	* <i>vat</i>	<i>vādun(t)</i>	* <i>vaunt</i>	* <i>vant</i>

406. Verbs in *-io* tended to pass into the fourth conjugation (see, however, § 416): \**capīre*, beside \**capēre*; *cupīre*, Lucretius (*Lat. Spr.* 477), Densuianu 148, Bon. 426; *fodīri*, Cato; *fugīre*, St. Augustine (*Lat. Spr.* 477), common in the Vulgate (R. 285), Sepulcri 229, Bon. 427, Haag 60, *Gl. Reich.*; *morīri*, Plautus, and \**morīre*.

Some others went over, at least locally: \**fallīre*; *gemire*, Pirson 148; *occurire*, Pirson 148; \**offerīre*, \**sofferīre*, by the analogy of *aperīre* (*sufferit*, R. 286; cf. *deferet*, *offeret*, Bechtel 90; *offeret*, first half of the 7th century, Carnoy 112); \**sequīre*, beside \**sēquēre*.

*Dīcēre*, probably in the Vulgar Latin period (cf. *Lexique* 62), developed a form \**dīre*, doubtless suggested by *dīc* (cf. *fac* and \**fare*, § 404) and helped by the analogy of *audīre*.

#### a. FOURTH CONJUGATION.

407. The fourth conjugation usually held its own, and gained some verbs from the others.

For new formations, — such as \**abbellīre*, *ignīre*, — see § 34. Germanic verbs in *-jan* regularly went into the fourth conjugation in Latin (Kluge 500): *furbjan* > It. *forbire*; *marrjan* > Fr. *marrir*; *þarrjan* > Fr. *tarir*; *warnjan* > It. *guarnire*. Cf. § 36.

For the intrusion of the inchoative *-sc-* into this conjugation, see § 415.

#### 2. FUNDAMENTAL CHANGES IN INFLECTION.

408. Of the personal forms of the verb there remained in general use in Romance only the following tenses of the active voice, the entire passive inflection having been discarded: the

indicative present, imperfect, perfect, pluperfect, and in some regions the future perfect; the subjunctive present, pluperfect, and in some regions the perfect; the imperative present. For instance: *amo, amabam, amavi, amaram, (amaro); amem, amassem, (amarim); ama.* See Syntax.

Of the impersonal forms of the verb there remained: the present active infinitive, the present participle, the perfect participle, the gerund (especially the ablative case), and probably in some standing phrases the gerundive. For instance: *amare, amans, amatus, amando, (amandus?)*. The supine fell into disuse from the first century on. See Syntax.

409. The entire passive inflection came to be replaced, towards the end of the Vulgar Latin period, partly by active and reflexive constructions but mainly by a compound of the perfect participle with *esse* (in northern Italy *fieri*): *littera scribitur > littera scripta est (or fit)*.

Deponent verbs became active: *mentire, operare*, etc., R. 298; cf. R. 297-302, 388-389. Conversely, some writers substituted the deponent for the active inflection of a few verbs: Petronius, *rideri*, etc., R. 304; cf. R. 302-304.

Cf. §§ 112-114.

410. The Latin perfect was kept in its preterit sense. In its perfect sense it was replaced, in the Vulgar Latin period, by a compound of *habere* and the perfect participle—in the case of neuter verbs, *esse* and the perfect participle: *feci > habeo factum; reverti > reversus sum*, R. 289. Similar compounds replaced the pluperfect and the future perfect. See §§ 121-124.

The old pluperfect indicative (*amāram, audīram*) was kept, as a preterit or a conditional, in various regions: see § 124. In the subjunctive the pluperfect was used instead of the

imperfect, which disappeared everywhere but in Sardinia (*facheret*, etc.): *amārem* > *amāssem*, *audīrem* > *audīssem*; cf. § 118.

The old future perfect — *amā(vě)ro* — fused with the perfect subjunctive — *amā(vě)rim* — and apparently remained more or less in use, as a future indicative or subjunctive, in all regions except Gaul and Rætia. It is best preserved in Spanish and Portuguese, but is found also in Old Rumanian and Macedonian. There are traces of it in Old Italian, sometimes confused with the pluperfect indicative and later sometimes with the infinitive (*ápriro*, *póteri*, *crédere*, etc.): see C. De Lollis in *Bausteine* I; V. Crescini in *Zs.* XXIX, 619.

411. The old future, with the exception of *ěro*, was crowded out by the present and by new formations, especially by the infinitive combined with the present indicative of *habēre* (*amābo* > *amar' habeo*): see §§ 125–129. In this compound all the various forms of the present indicative of *habēre* were used (see §§ 273, 401): \**amar' -ábeo*, *-áyo*, *-áo*, *-ó*; \**amar' -ábe(s)*, *-ás*; \**amar' -ábe(t)*, *-át*; \**amar' áben(t)*, *-áunt*, *-ánt*. In the first and second persons plural, *habēmus* and *habētis* eventually, as they came to be regarded as mere endings, were reduced to *-emu(s)*, *-ete(s)*, to correspond to the dissyllabic or monosyllabic *-áyo*, *-ábe(s)*, *-ábe(t)*, *-áben(t)* and *-ó*, *-ás*, *-át*, *-ánt*: \**amar' -ému(s)*, \**amar' -éte(s)*.

On the model of this new future, an imperfect of the future, or conditional, came to be made, in late Vulgar Latin and Romance, from the infinitive combined with the imperfect or the perfect of *habēre* (see § 130): \**amar' -ábe(b)a(m)* or \**amar' -abui*. In these formations the unaccented (*h*)*ab*-disappeared, as in the first and second persons plural of the future: \**amar' -é(b)a*, \**amar' -ísti*, etc.; but \**amar' ábui*, etc. In Italian we find, beside *-ta* from *habēbam* and *-ábbi -ébbi* from *habūi*, a form in *-éi (ameréi)*, which has prevailed in the

modern language, while in Old Italian the *ei* was sometimes detached and used as a preterit, of *avere*: it is probably due to the analogy of the first person singular of the weak preterit (*credēi*, hence *crederēi*), cf. § 426.

412. The imperative disappeared, except the present, second person singular and plural: *āmā*, *amāte*; *tēnē*, *tenēte*; *credē*, *credēte*; *audī*, *audīte*. The first and third persons were supplied from the present subjunctive. In some verbs the present subjunctive was used instead of all imperative forms. See § 115.

Instead of the plural form, the second person plural of the present indicative came to be used: *adferte* > *adferitis*, R. 294. For the monosyllabic *dic*, *duc*, *fac*, writers sometimes employed *dice*, *duce*, *face*: R. 294.

### 3. INCHOATIVE VERBS.

413. The Latin inchoative ending *-sco* was preceded by *ā-*, *ē-*, *ī-*, or *ō-*. The types *-āsco* and *-ōsco* were sparingly represented and were not extended in late and popular Latin; they have bequeathed but few verbs — such as Pr. *irāisser* < *irāscere*, *conōisser* < *co(g)nōscere* — to the Romance languages. The types *-ēsco* and *-īsco* — as *parēsco*, *dormīsco* — were extended in the third century and later, and lost their inchoative sense.

414. There is some evidence of a confusion of *-ēsco* and *-īsco* in Latin. Virgilius Grammaticus (Sepulcri 194) mentions double forms of inchoative verbs, such as *calesco calisco*, etc. *Clarisco*, *erubisco*, etc., are common in Gregory the Great: Sepulcri 193. Cf. *criscere*, etc., in *Vok.* I, 359 ff.

In Veglia, the Abruzzi, Sardinia, and a part of Lorraine neither of these two endings left any trace. Only *-ēsco* survived in the Tyrol, the Grisons, French Switzerland, Savoy, Dauphiné, Lyons, the Landes, Béarn, and Spain — Sp. *parecer*,

*florece*; *-esco* was preferred also in Rumanian. Elsewhere, although there are traces of *-esco*, *-isco* prevailed — Fr. *il fleurit*, It. *florisce*. For Pr. *despereissir*, etc., see E. Herzog in *Bausteine* 481.

415. The ending *-isco* eventually entered into the formation of the present stem of fourth conjugation verbs. There is no direct evidence of this in Latin, nor are there any traces of it in Spanish, Portuguese, Sardinian, or southern Italian; but in the earliest texts of France, northern and central Italy, Rætia, and Rumania we find a type

* <i>finisco</i>	<i>finimu(s)</i>
* <i>finisce(s)</i>	<i>finite(s)</i>
* <i>finisce(t)</i>	* <i>finiscun(t)</i>

The *-sc-* then generally disappeared from the infinitive — It. *fiorire*. Later, in some regions, the *-sc-* was carried throughout the present indicative (Fr. *finissons*, *finissez*); it also penetrated the present subjunctive (Fr. *finisse*), and in some districts eventually the present participle and the imperfect indicative (Fr. *finissant*, *finissais*).

See *Archiv* I, 465; *Zs.* XXIV, 81; *Rom.* XXX, 291–294; *Lat. Spr.* 478.

#### 4. PRESENT STEMS.

416. Many verbs in *-io* dropped the *i* whenever it was followed by another vowel. In the present participle this was a regular phonetic development (see § 225): *audientem* > \**audente*, *facientem* > \**facente*, *partientem* > \**partente*, *sentientem* > \**sentente*. Hence forms without the *i* were introduced more or less into the indicative and subjunctive: *audio* \**audio*, \**dormo*, *partiunt* \**partunt*, *sentiam* \**sentam*, etc.

By the analogy of these, the *ē* was occasionally lost in the second conjugation: *video* \**vido*. On the other hand, by the

analogy of *capunt, faciunt*, etc., the second conjugation admitted such forms as *\*habeunt, \*videunt*, etc., beside the regular *habent, vident*, etc.

**417.** The verbs *struere, trahere, vehere* developed infinitive forms *\*strugere, trágere, végere* (*tragere* and *vegere* are used by Fredegarius, Haag 34) and a whole present and imperfect inflection with *-g-*, as *\*trago, \*tragam, \*tragēbam*. The guttural was derived from the perfect indicative and the perfect participle — *struxi structus, traxi tractus, vexi vectus* — on the analogy of *ago actus, figo fixi, lego lectus, rego rexi rectus, tego tectus*, and also *fungo finxi fictus, tango tactus*, and probably *cingo cinxi cinctus, jungo junxi junctus, pango panxi panctus, plango planxi planctus, ungo unxi unctus*, etc.

There may have been also *\*strúcere, \*trácere, \*vécere*, based on the analogy of *dico dixi dictus, duco duxi ductus*.

Cf. *Substrate VI*, 131.

**418.** The verbs *dare, debere, dicere, facere, habere, posse, stare, vadere, velle* underwent considerable changes in the present: see §§ 273, 397, 401, 403-406, 412, 416.

**419.** *Esse* was made into *\*ěssere*, to bring it into conformity with the usual third conjugation type. Considerable alterations were made in the present indicative and subjunctive. For the use of *fieri* for *esse*, see § 409. The Spanish use of *sedere* for *esse* is probably later than our period.

(1) The present indicative shows some signs of a tendency to normalize its erratic inflection by making all the forms begin with *s*. The old *esum* cited by Varro (*Pr. Pers. Pl.* 128) went out of use. Italian *sei* and Rætian *šěš* point to a *\*šěs* beside *ěs*; Italian *siete* and Rætian *siede*, etc., indicate a *\*šětis* for *ětis*, while there is some evidence of an alternative *\*sūtis* on the model of *sūmus*; Old Italian *se* for *è*, Provençal *ses* for

*es*, usually understood as reflexive forms, may go back to \**sēt* and \**sēt* for *ēst*. In the first person plural *sūmus* became *sūmus* and *sīmus* (see § 220); *sūmus*, the usual Classic form, was preferred in Spain, Portugal, northern Gaul, and the Tyrol (Sp. *somos*, Old Fr. *sons*, etc.); *sīmus*, which was used, according to Suetonius, by Augustus, and by various purists of the Augustan age (Stolz 58), prevailed in southern Gaul, Italy, Dalmatia, and Dacia (Pr. *sem*, Old It. *semo*, etc.): cf. *Lat. Spr.* 479; *Pr. Pers. Pl.* 130; *Rom.* XXI, 347. Provençal *esmes* < \**ēs**mus* seems to be a new formation on the analogy of *ēstis*; Mohl, *Pr. Pers. Pl.* 135, would derive it from old *esīmus*, which existed with *esum*. The present indicative inflection was doubtless something like this:—

<i>som</i>	<i>somu(s)</i>	<i>semu(s)</i>	* <i>esmu(s)</i>
<i>ēs</i>	* <i>sēs</i>	<i>ēste(s)</i>	* <i>sete(s)</i>
<i>ēst</i>	* <i>set?</i>	* <i>sote(s)?</i>	
		<i>sont</i>	

(2) In the present subjunctive the analogy of other third conjugation verbs tended to introduce the characteristic vowel *a*. It is likely, too, that from early times there was a reciprocal influence of *fiam*, etc., and the Old Latin optative *siem*, etc. (cf. *Lexique* 51): *fiet* is common for *fit*, Pirson 150; *fiam* replaces *sīm* in northern Italy and Dacia. Hence comes an alternative inflection \**sīam*, etc., which ultimately prevailed:—

<i>sem</i>	* <i>sēa</i>	<i>sīmu(s)</i>	<i>siāmu(s)</i>
<i>sīs</i>	* <i>sēa(s)</i>	<i>sīte(s)</i>	* <i>siāte(s)</i>
<i>set</i>	<i>sēa(t)</i>	<i>sent</i>	* <i>sēan(t)</i>

For *sīat*, see *sead* in *Vok.* II, 42. *Sīamus*, according to *Lat. Spr.* 478, occurs in Italian documents of the eighth century.

## 5. IMPERFECT.

N. B.—For the loss of the imperfect subjunctive, see § 118.

420. The endings were *-ābam*, *-ēbam*, *-ībam*, *-ībam*. In the third conjugation *-ībam* regularly developed into *-ēbam*,

just as *-ientem* > *-entem* (see §§ 225, 416): *faciēbam* > \**facēbam*. In the fourth conjugation *-iēbam* and *-ībam* existed side by side from early times (Neue II, 445), *-ībam* — as in *munībam* — being common in early Latin and recurring at later periods (Lindsay 491); *-ībam*, which stressed the characteristic vowel of the fourth conjugation, prevailed in popular speech, and *-iēbam* disappeared: *vestibat*, etc., Dubois 277–278.

421. *Habēbam*, pronounced *aβeβa* (cf. § 318), developed another form, \**aβea*, probably through dissimilation. Hence came an alternative ending *-ea* for *-eβa*, which in Romance was widely extended, affecting all the conjugations but the first: It. *vedēa*, *credēa*, *sentīa*. It is common to nearly all the Romance territory except Rumania: *Lat. Spr.* 479.

## 6. PERFECT.

422. We must distinguish two types, the weak and the strong: the weak comprises the *v*-perfects in which the *v* is added to a verb-stem (*-āvi*, *-ēvi*, *-īvi*), the strong includes all others. Verbs of the first and fourth conjugations generally had weak perfects, those of the second and third had mostly strong. Only six verbs — all of the second conjugation and most of them rare — regularly had a perfect in *-ēvi*: *deleo*, *fleo*, *neo*, *-oleo*, *-pleo*, *vieo*; *silevit* for *siluit* occurs also, R. 287.

All first and fourth conjugation verbs with strong perfects probably developed a weak one in Vulgar Latin: *præstitti* > *præstavi*, R. 289; *salui* > *salivi*. For further encroachment of the weak type on the strong, see § 426.

### a. WEAK PERFECTS.

423. A tendency to keep the stress on the characteristic vowel, and also a general inclination to omit *v* between two *i*'s (see § 324), led early, in the fourth conjugation, to a reduction

of *-īvistī* to *-īstī* and *-īvistis* to *-īstis*, which brought about, still early, the further reduction of *-īvī* to *-īī* and \**-īī*, *-īvit* to *-īīt* and \**-īīt*, *-īvērunt* to *-ierunt*, and, later, the reduction of *-īvīmus* to *-īmus* and probably \**-īmmus* (the lengthening of the *m* being due to compensation and also, perhaps, to a desire to distinguish the perfect from the present). For *-īīt*, as in *lenīīt*, see Servius *ad Aen.* I, 451; for *-ierunt*, see Neue III, 452-454; for *-īmus*, as in *repetīmus*, etc., see Neue III, 449.

Then a contraction of the two vowels gave, in the first and third persons singular and the third person plural, *-ī*, *-īt*, \**-īrunt*: *audī*, Neue III, 434 (cf. S. 241: 65-121 A. D.); *petīit*, etc., Neue III, 446-448; "*cupīt pro cupivīt*," Priscian XII, 17 (Keil II, 587); *perīt*, *petīt*, *redīt*, Bayard 60; *perīt*, etc., Bon. 440.

A contraction without the fall of *v*, in the third person singular, gave rise, locally, to an alternative form, \**-īut*: It. *servīo*, etc.

424. The loss of *v*, carried into the first conjugation, gave rise early to a reduction of *-āvīstī*, *-āvīstis*, *-āvērunt* to *-āstī*, *-āstis*, *-ārunt*. Much later *-āvī* > *-āī*, *-āvīt* > *āīt* and *-āt*, *-āvīmus* > *-āmus* and probably \**-āmmus*: *calcai* (Probus), *edificai*, *probai* (Probus), *Vok.* II, 476; *σενναί*, Densusianu I, 152; — *laborait*, *C. I. L.* X, 216; *speclarait*, *Vok.* II, 476; *dedicait*, *Lexique* 46; "*fumāt pro fumavit*," Priscian XII, 17 (Keil II, 587); *denuerat*, *judicat*, Fredegarius (Haag 55); — *cēlebramus*, *memoramus*, *vocitamus*, Gregory of Tours (Bon. 440); *speramus*, Fredegarius (Haag 55). The third person singular in *-ait* is found in Old Sardinian: *Lat. Spr.* 479.

A contraction without the fall of *v* gave rise, in the third person singular, to *-aut*; and, in the first person plural, probably to \**-aumus*: *triumphaut* in Pompeii, Densusianu I, 152. This *-aut* prevailed in Romance: It. *amò* and *amáo*, etc. The

\*-*aumus* is preserved in some Old French dialects near Douai: *Rom.* XXX, 607.

425. The forms in the first and fourth conjugations, therefore, were:—

- <i>āvī</i>	- <i>āī</i>			- <i>āvī</i>	*- <i>āī</i>	- <i>āī</i>	- <i>ī</i>
- <i>āstī</i>				- <i>āstī</i>			
- <i>āve(t)</i>	- <i>āut</i>	- <i>āit</i>	- <i>āt</i>	- <i>āve(t)</i>	*- <i>āut</i>	*- <i>āit</i>	- <i>āit</i> - <i>āit</i> - <i>īt</i>
- <i>āvīmu(s)</i>	- <i>āmu(s)</i>	*- <i>āmmu(s)</i>	*- <i>āumus</i>	- <i>āvīmu(s)</i>	- <i>āmu(s)</i>	*- <i>āmmu(s)</i>	
- <i>āste(s)</i>				- <i>āste(s)</i>			
- <i>ārun(t)</i>				*- <i>ārun(t)</i>			

With the exception of -*ivī* in Old Italian, the forms with *v* were not preserved in Romance.

Verbs in -*ēvī* doubtless had a similar inflection: \**delēī*, *delēstī*, etc. Some other second conjugation verbs apparently adopted this perfect: *silevit*, R. 287.

426. Compounds of *dare* had a perfect in -*dīdī* (*crēdīdī*, *perdīdī*, *vēndīdī*, etc.), which in Vulgar Latin became -*dēdī* (see § 139): *perdedit*, etc., Audollent 544. This -*dēdī* was extended to many other verbs in -*d-*: *prandīdī*, Keil IV, 184; *descendīdī*, *respondīdī*, *Lat. Spr.* 479, 480; *ascendiderat*, *descendīdīt*, *incendederit*, *odedere*, *pandiderunt*, *prendiderunt*, *videderunt* (cf. *edediderit* with an extra -*de-*), R. 288.

Through the analogy of -*āī*, \*-*ēī*, \*-*īī*, helped by dissimilation, this -*dēdī* became \*-*dēī*. Hence arose eventually an inflection \*-*dēī*, \*-*dēstī*, \*-*dēt*, \*-*dēm(m)u(s)*, \*-*dēste(s)*, -*dērun(t)*, from which there came a set of endings \*-*ēī*, \*-*ēstī*, etc., corresponding to the -*āī* -*astī*, etc., and the -*īī*, -*istī*, etc., of the first and fourth conjugations: so *caderunt*, *Gl. Reich*. In some of the Romance languages these endings were carried into other verbs of the third and even the second conjugation (It. *battēī*, Pr. *cazēt*); in Provençal they invaded the first also (*amēī*). In Dacia, on the other hand, they apparently did

not develop at all. In Italy, under the influence of *stetti* < \**stētui*, *dare* had (beside *diēdi* < *dēdi*) a perfect *detti*, whence arose an inflection *-detti*, etc., and a set of endings *-etti*, etc., side *-dei* and *-ei*.

Through these endings the weak type encroached somewhat on the strong. In Italy all strong verbs except *esse* introduced weak endings in the second person singular and the first and second persons plural: It. *presi*, *prendesti*, etc.; cf. *plaudisti* for *plausisti*, R. 286, also *vincisti*, *Gl. Reich*. In Rumania, where there was no *-dei*, the *-ui* and *-si* types were extended.

A few weak verbs adopted strong inflections: *quasivi* > \**quasi*, *sapivi* > *sapui*.

#### b. STRONG PERFECTS.

427. There are three types — those that add *u* to the root, those that add *s*, and those that have nothing between the root and the personal endings: *plac-u-i*, *dic-s-i* = *dixi*, *bib-i*. In the first class the *u* lost its syllabic value and became *w* (cf. § 326): *placwi*, etc.

428. The *-ui* type, according to Meyer-Lübke, *Gram.* II, 357, included from the start not only perfects of the *placui* sort, but also all perfects in *-vi* not made from the verb-stem (cf. § 422), — such as *cognōvi*, *crēvi*, *mōvi*, *pāvvi*, — this ending being pronounced *wui*, but written *vi* to avoid the doubling of the *v*. At any rate, the development of the *vi* indicates that it was sounded *wui*, *wwi*, or *βwi* in Vulgar Latin: cf. It. *conōbbi*, *crēbbi*, etc.; Pr. *moc*, etc.

This perfect disappeared from the first and fourth conjugations: *crepui* > \**crepavi*, *necui* > *necavi*, etc.; *aperui* > \**aperii* \**apersi*, *salui* > *salivi salii* \**salsi*, etc. In the second and third conjugations it maintained itself very well: *cognovi*, *crevi*,

*gemui(?)*, *messui(?)*, *molui*, *movi*, *pavi*, *tenui*, *texui*. It lost *posui* (>*posi*), *silui* (>*silevi*), and possibly a few others. On the other hand it received many additions: *bibi* > \**bibui*; *cēcīdi* > \**cadui* \**cadedi*; *cēpi* > *capui*, Haag 56, *Lat. Spr.* 479 (so \**recipui*); *expavi* > *expabui*, *Lat. Spr.* 479; *lēgi* > \**lēgui* \**lēxi*; *natus sum* > \**nacui*; *peperci* > *parcui*, R. 288; *sapivi* > *sapui*; *sēdi* > \**sēdui*; *stēti* > also \**stētui*; *sustūli* > \**tolui* \**tolsi*; *texi* > *texui*, *Lat. Spr.* 479; *vēni* > also \**vēnui*; *vīci* > also \**vīncui* \**vīnsi*; *vīdi* > also \**vīdui* \**vīdui*; *vīxi* > also \**vīscui*; etc. Cf. A. Zimmermann in *Archiv* XIII, 130; *Zs.* XXVIII, 97.

429. Of the *-si* class, — which comprised perfects in *-si*, *-ssi*, and *-xi*, — some thirty-five were preserved: *arsī*, *cinxi*, *clausi*, *coxi*, *divisi*, *dixi*, *duxi*, *excussi*, *finxi*, *fixi*, *frixi*, *junxi*, *luxi*, *mansi*, *mīsi* (also \**mīssi*, perhaps on the model of *mīssus*, cf. § 163), *mulsi*, *pinxi*, *planxi*, *pressi*, *rasi*, *rexi*, *risi*, *rosi*, *scripsi*, *sparsi*, *-stinxi*, *strinxi*, *struxi*, *tersi*, *tinxi*, *torsi*, *traxi*, *unxi*, *vixi*. *Sensi*, however, became \**sentii*.

In Vulgar Latin there were perhaps some thirty or more new formations: *abscō(n)si*, Keil VII, 94; \**accē(n)si*; \**apērsi*; \**attīnxi*; \**copērsi*; \**cūrsi*; \**defe(n)si*; \**ērsi* from *ērigo*; \**franxi*; \**fūsi*; \**impīnxi*; \**lēxi*; \**mōrsi*; \**occīsi*; \**offērsi*; \**pē(n)si*; *pērsi*, *Lat. Spr.* 480; *pōsi*, R. 288; \**prē(n)si*; \**pūnxi*; \**quāsi*; \**redēmpsi*; \**respō(n)si*; \**rōsi*; \**salsi*; \**sōlsi*; \**sūrsi*; \**taxi*; \**tanxi*; \**tē(n)si*; \**tōlsi*; \**vīnsi*; \**vōlsi*. Some of these — \**defensi*, \**fusi*, \**morsi*, \**occisi*, \**pensi*, \**prensi*, \**responsi*, \**rosi*, \**tensi* — assumed the *s-* perfect through having an *s* in the perfect participle.

Cf. *Einf.* § 165.

430. Among the *-i* perfects, the reduplicative formations were discarded in Vulgar Latin, with the exception of *dēdi* and *stēti* (also \**stētui*), whose reduplicative character was no longer

apparent; compounds of *dare* usually formed their perfect like the simple verb (cf. § 426; but *circumdavit* in *Gl. Reich.*), while compounds of *stare* tended to follow the regular first conjugation model (*præstiti* > *præstavi*, R. 289). *Cæcidi* became \**cadui* or \**cadedi*; *fefelli* > \**falii*; *peperci* > *parcui*, R. 288. The other reduplicative perfects either disappeared or passed into the *-si* class: *cucurri* > \**cürsi*; *momordi* > \**mörsi*; *pependi* > \**pē(n)si*; *pupūgi* > \**pünxi*; *tetendi* > \**tē(n)si*; *tetēgi* > \**taxi* \**tanxi*.

The other *-i* perfects were greatly reduced in number in Vulgar Latin. Some simply disappeared, some became weak, some went over to the *-ui* or the *-si* type: *ēgi*, *vērti*; *fūgi* > \**fugii*; *bībi* > \**bībui*, *cēpi* > *capui*, *lēgi* > \**lēgui*, *sēdi* > \**sēdui*; *accendi* > \**accē(n)si*, *defendi* > \**defē(n)si*, *frēgi* > \**franxi*, *fūdi* > \**fūsi*, *lēgi* > \**lēxi*, *prendi* > \**prē(n)si*, *solvi* > \**sōlsi*, *vīci* > \**vīnsi*, *volvi* > \**vōlsi*. There were no additions. Two of the old perfects maintained themselves intact, and two more were kept beside new formations: *fēci*, *fui*; *vēni* \**vēnui*, *vīdi* \**vīdui*.

431. In *fui* the *u* was originally long, but it was shortened in Classic Latin; Vulgar Latin seems to show both *ū* and *ŭ*. In an effort to keep the accent on the same syllable throughout (cf. §§ 423-424), *fuīsti* > \**fusti*, *fuīstis* > \**fustis*; then *fuīmus* generally became \**fum(m)us*, *fuit* was often shortened to \**fut*, and *fuērunt* became \**furunt*. There may have been also, through dissimilation, a form \**förunt*.

The prevailing inflection, with some variations, was probably something like this:—

<i>fuī</i>	<i>foī</i>	* <i>fom(m)u(s)</i>
* <i>foī</i>		* <i>foste(s)</i>
<i>foe(t)</i>	<i>fue(t)</i>	* <i>foet</i> * <i>fut</i>
		* <i>forun(t)</i> * <i>furun(t)</i> * <i>forun(t)?</i> <i>foerun(t)?</i>

## 7. PLUPERFECT AND FUTURE PERFECT.

432. When preserved at all, these tenses followed the old types: *plácuëram* (cf. § 137), *placuissem*, *plácuëro*; *dixëram*, *dixissem*, *dixëro*; *fécëram*, *fecissem*, *fécëro*. In formations from weak perfects only the contracted forms were used: *amāram*, *amāssem*, *amāro*; *delëram*, *delēssem*, *delëro*; *audī(e)ram*, *audissem*, *audī(e)ro*; cf. *alaret*, *ortaret* in *Gl. Reich*. Bayard 60-61 notes that St. Cyprien employed only the shortened forms — *petisset*, etc. — before *ss*.

433. In some regions a tendency to keep the accent on the same syllable throughout the pluperfect subjunctive led to a change of *-assēmus*, *-assētis*, etc., to *\*-ássimus*, *\*-ássitis*, etc.: It. *amássimo amáste*, Sp. *hablásemos habláseis*; but Pr. *amessém amessétz*, Fr. *aimassions aimassiez*.

## 8. PERFECT PARTICIPLE.

434. Verbs which had no perfect participle were obliged to form one in order to make their passive and their perfect tenses: *fërio*, *\*feritus*.

435. In the first conjugation *-ātus* was preserved and was extended to all verbs: *frietus* > *fricatus*; *nectus* > *necatus*; *secus* > *secatus*; so the new *alatus*, *Gl. Reich*. The ending *-itus*, in the first conjugation, generally fell into disuse: *crepitus* > *\*crepatus*; *domitus* > *domatus*, R. 295; *plicitus* > *plicatus*; *sonitus* > *\*sonatus*; *tonitus* > *\*tonatus*; *vetitus* > *vetatus*, R. 296. Nevertheless there were some new formations in *-itus*: *\*lëvitus*, *prövitus*, *rögitus*, *vöcitus*; cf. *Lat. Spr.* 480.

In the third conjugation *-ātus* disappeared: *oblatus* > *offertus* (*Gl. Reich.*), *sublatus* > *\*suffertus*, by the analogy of *apertus*, *copertus*; *sublatus* (from *tollo*) > *töllitus* (*Gl. Reich.*).

436. In the fourth conjugation *-ītus* was preserved and was extended to nearly all verbs: *saltus* > \**salītus*; *sensus* > \**sentītus*; *sepultus* > *sepelītus*, old and found in all periods, Pirson 152, *Gl. Reich*. *Apertus* and *copertus*, however, were kept; and *ventus* generally became \**venūtus*.

In the third conjugation *quāsītus* > \**quāstus*.

437. In the second conjugation the rare *-ētus* disappeared as a participial ending: *complētus*, etc., were kept only as adjectives.

438. The ending *-ūtus*, belonging to verbs in *-uere* and *-vere* (*argutus*, *consutus*, *minutus*, *secutus*, *solutus*, *statutus*, *tributus*, *volutus*), offered a convenient accented form, corresponding to *-ātus* and *-ītus*. It was extended to nearly all the verbs that had an *-ui* perfect: \**bibutus*, \**habutus*, \**parutus*, \**tenutus*, \**venutus*, \**vidutus*, etc.; but *status*. It did not always, however, entirely displace the old perfect participle: *natus* was kept beside \**nascūtus*.

Eventually *-ūtus* was carried further, — as \**credutus*, \**perdutus*, \**vendutus*, — and in Sicily encroached largely on *-ītus*.

On the other hand, \**mōvītus* and \**mōssus* were formed beside \**movutus*, \**sōlvītus* (or \**sōltus*) beside *solutus*, \**vōlvītus* (or \**vōltus*) beside *volutus*.

439. The ending *-ītus* tended to disappear (cf. § 435): *absconditus* > *absco(n)sus*; *bibitus* > \**bibutus*; *creditus* > \**credutus*; *fugitus* > \**fugītus*; *molitus* > \**molutus*; *paritus* > \**parutus* \**parsus*; *perditus* > \**perdutus* \**persus*; *submonitus* > \**submo(n)sus*; *venditus* > \**vendutus*. A few of these participles, however, remained, and there were some new formations in *-ītus*: *gēmitus*?, *pōs(i)tus*, *sōlitus*; \**lēvītus*, \**mōvītus*, *prōvītus*, *rōgītus*, \**sōlvītus* (or \**sōltus*), *tōllītus*, *vōcītus*, \**vōlvītus* (or \**vōltus*).

**440.** The ending *-tus* was kept for some twenty verbs, occasionally with a change of stem: *cinctus*; *dictus*; *ductus*; *extinctus*; *factus*; *fictus finctus*, R. 295; *fractus \*franctus*; *frictus*; *lectus*; *mistus*; *pictus \*pinctus*; *punctus*; *rectus*; *scriptus*; *strictus \*strinctus*; *structus*; *\*surtus* for *surrectus*; *tactus? \*lanctus?*; *tinctus*; *tortus*; *tractus*. There were a few new formations in *-tus*: *offertus*, *\*quæstus*, *\*suffertus*, *\*vîstus*; and perhaps *\*söltus*, *\*völtus* (cf. § 439).

About fifteen verbs probably replaced *-tus* by *-ätus*, *-îtus*, or *-ütus*: *captus \*capîtus*; *cognôtus > \*conovütus?*; *crêtus > \*crevütus?*; *fartus > \*farcîtus* and *farsus*, *Lat. Spr.* 480; *frictus > fricâtus*; *môtus > \*movütus?* and *\*mössus*; *nectus > necâtus*; *pastus > \*pavütus?*; *saltus > \*salîtus* and *\*salsus*; *sectus > secâtus*; *sepultus > sepelîtus*; *tentus > \*tenütus*; *texus > \*texûtus*; *ventus > \*venütus* and *venîtus*, Bechtel 91; *vîctus > \*vincûtus* and *\*vinctus*; *vîctus > \*vixütus*.

**441.** The ending *-sus* was generally kept: *acce(n)sus*; *âr-sus*; *clausus*; *defe(n)sus*; *divîsus*; *excussus*; *fixus*; *fusus*; *ma(n)sus*; *mîssus*, also perhaps *\*mîsus* by the analogy of *mîsi*; *morsus*; *pe(n)sus*; *pre(n)sus*; *pressus*; *risus*; *rosus*; *sparsus*; *te(n)sus*; *tersus*; *to(n)sus*; *visus*, also probably *\*vis-tus*. Several of these developed also a participle in *-ütus*: *\*pendutus*, *\*vidutus*, etc. *Salsus*, 'salted,' maintained itself beside *salîtus*.

A few verbs replaced the old form by one in *-îtus* or *-ütus*: *expansus > \*expandutus*; *falsus > \*fallîtus*; *fusus > fundutus*, *Gl. Reich.*; *gavîsus > \*gaudutus*; *messus > metîtus*, Dubois 282; *sensus > \*sentîtus*; *sessus > \*sedutus*.

On the other hand, there were some new formations in *-sus*: *absco(n)sus*, Keil VII, 94, *Lat. Spr.* 480, R. 295 (very common); *farsus*, *Lat. Spr.* 480; *\*mossus*; *\*parsus*; *\*persus*; *\*salsus*; *\*submo(n)sus*.

## 9. PERSONAL ENDINGS.

442. For the reduction of *-io* to *-o*, see §416.

443. Meyer-Lübke, *Grundriss* I<sup>2</sup>, 670, assumes that in Italy *-ās* and *-ēs* became *-i*. The evidence, historically considered, does not support this view. Italian *lodi* and Rumanian *lauzi*, from *laudas*, are correctly explained by Tiktin 565-566 as analogical formations.

444. As unaccented *ē*, *ĕ*, and *ĭ* came to be pronounced alike (§243), great confusion ensued between *-ēs* and *-īs*, *-ēt* and *-īt*. This confusion is very frequent in the *Peregrinatio*: Bechtel 88-89, *colliget*, etc.

445. In southern and to some extent in northern Gaul the first person plural lost its final *s*, perhaps in the Vulgar Latin period: *vidēmus* > Pr. *vezém*. This is not a phonetic phenomenon, as *-s* did not fall in this region. It may be that *-s* was dropped because it was regarded as a characteristic of the second person, as *t* was of the third (cf. *Pr. Pers. Pl.* 73-80):—

<i>āmo</i>	<i>*amāmu</i>
<i>āmas</i>	<i>amātes</i>
<i>āmat</i>	<i>āmant</i>

446. According to Mohl, *Pr. Pers. Pl.*, forms like *\*cānomus*, due to Celtic influence, were used in northern Gaul instead of *canimus*, etc.; then the accent was shifted to the penult—*\*canómus*, whence came the French *-ons*. This theory has not found acceptance.

447. In strong perfects the first person plural, *-imus*,—through the analogy of *-lētis* and *-lētī*, and doubtless of weak perfects as well,—tended, perhaps after our period, to stress its penult: *fēcīmus* > Pr. *fezém*. There are traces of this in inscriptions and elsewhere: S. 47, 53. The shift, however,

was not universal, as there are in Italian and French remains of the original accentuation.

448. In the present indicative and imperative, *-imus*, *-itis*, *-ite* generally became, in the sixth or seventh century, *-ēmu(s)*, *-ēte(s)*, *-ēte*, — the penult assuming the accent, to match *-āmu(s)*, *-āte(s)*, *-āte* and *-ēmu(s)*, *-ēte(s)*, *-ēte* and *-īmu(s)*, *īte(s)*, *īte* in the other conjugations. The shift was perhaps helped by the analogy of the future — *mittimus*, for instance, being attracted by *mittēmus*: *Pr. Pers. Pl.* 30, 64. Rumanian, however, kept the old accent (Tiktin 596): *úngem, úngeti; vîndem, vîndeti*; etc. There are some traces of its preservation in southeastern French dialects also. Furthermore, *facimus*, *facitis* and *dicimus*, *dicitis* kept their old forms in many regions.

449. For the reduction of *-iunt* to *-unt*, see § 416. Beside *-ent*, in the second conjugation, there was an ending *\*-eunt* (*\*habeunt*, etc.), — due to the analogy of *-iunt*, — which was particularly common in Italy: cf. § 416.

The endings *-ent* and *-unt* came to be very much confused (*\*crēdent*, *\*vidunt*, etc.); their interchange is frequent in the *Peregrinatio*: Bechtel 88–90, *absolvent*, *accipient*, *exient*, *responduntur*, etc. According to Mohl, *Pr. Pers. Pl.* 112, the confusion goes back to early Italic. The Classic distinction was best kept in Gaul and northern Italy; in Spain and Portugal, Sardinia, and a part of southern Italy, *-ent* prevailed; in central and the rest of southern Italy, Rætia, Dalmatia, and Dacia, *-unt* was preferred.

450. In the perfect, the third person plural ending *-ere* was discarded. The ending *-erunt*, in Classic Latin, sometimes had a short *e* (*ĕ* is common in the comic poets, Virgil wrote *tulĕrunt*, etc.); in Vulgar Latin this vowel was apparently always short: *dēbuerunt*, *dixerunt*, *viderunt*. Cf. § 137.

B. erunt 7 regular *ĕrunt* under infl. 7. *erant*, *erint*

# INDEX.
