## ARE YOU RUPTURED?

THEN TRY THE **LINDMAN TRUSS**

For safety, comfort and durability it is unequalled, and is warranted to hold any reducible hernia. This Truss, on account of the pivot point, adapts itself to any motion or position of the body, so that when a proper fit is secured its presence is never known. There is not a Truss in the market giving anything like the satisfaction of this Truss. *See testimonial below, and call or write for many others from leading physicians and wearers of the Truss.*

W. J. C. Allen, of McDonald & Allen, Kingston, Ont., writes under date Sept. 16th, 1896, as follows:—"I have been badly ruptured for the past nine years, and during that time have been fitted with many different kinds of trusses, manufactured not only in Canada but in the United States, without obtaining relief. On April 19, 1896, I purchased from you a Truss, being advised by a physician to do so, and I feel confident that I am now perfectly cured. I can assure you that I feel thankful for the results, and if you wish you can refer to me for reference."

### 1900 NOT LEAP YEAR.

It is a generally accepted idea that every fourth year has an extra day added to the month of February, thus giving that month twenty-nine days, and the year 366—but there are exceptions, and 1900 is one of them. It is explained thus:—The solar year is about 11 min. 10 sec. less than 365½ days: hence intercalation of one day in four years was too much. In course of centuries the error amounted to several days. To remedy

this, Pope Gregory XIII, in 1582, omitted 11 days, and provided that the year ending each century should have 365 instead of 366 days, save when the number of the century is divisible by 4; so that 1700, 1800, and 1900 are not leap years, but the year 2000 is. This was called the Gregorian calendar; but it was not adopted in Great Britain till 1752, when 11 days were struck out of the month of September.

GOVERNOR-GENERAL OF CANADA.

## Explanation of the Articles in the Calendar.

Standard times\* are given in all columns headed Toronto, Quebec and Winnipeg. For Latitude and Longitude of Observatory, see page 16.

The times\* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times\* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time\* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 12.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The seven last columns are calculated for Lat. 45°, Long. 4h. 46m. W., but will serve with sufficient accuracy for the whole of Canada.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 42°, with the corresponding corrections, which are additive, for latitudes up to 65°. (See pages 33 and 34.)

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table. These constants are calculated for declination 88° 46' 44". The maximum error in the use of this table will not exceed 3 secs. in the higher latitudes, and proportionately less for the lower latitudes.

MOON'S PHASES.—This Table gives the times (standard 75th meridian)\* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

\* In the present Almanac, the hours are numbered from 0 (midnight) to 23.

† Although these times are calculated for Toronto, Quebec and Winnipeg only, the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes, by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of the star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. Those stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Eclipses.

In the year 1900 there will be three eclipses, two of the sun and one of the moon :

I.—A total eclipse of the sun, 1900, May 28th, visible in Canada as a partial eclipse.

At WINNIPEG the eclipse begins May 28th, 7h. 1m. 36s. a.m. Greatest obscuration 7h. 58m. 12s. Eclipse ends 8h. 57m. 4s., 90th meridian time—position, angle; direct image for beginning, N. 230° E., or the angle from vertex of sun's limb, 274°. Magnitude of eclipse, 0.515 (sun's diameter=1.0).

TORONTO, the eclipse begins May 28th, 7h. 51m. 40s. a.m. Greatest obscuration 9h. 0m. 37s. Eclipse ends 10h. 17m. 1s., 75th meridian time—position, angle; direct image for beginning, N. 246° E., or from vertex of sun's limb, 297°. Magnitude of eclipse, 0.810 (sun's diameter=1.0).

HALIFAX, the eclipse begins May 28th, 8h. 49m. 5s. a.m. Greatest obscuration 10h. 7m. 28s. Eclipse ends, 11h. 32m. 42s. Halifax local mean time—position, angle; direct image for beginning, N. 254° E., or from vertex of sun's limb, 303°. Magnitude of eclipse, 0.937 (sun's diameter=1.0).

II.—A partial eclipse of the moon, 1900, June 12th; moon enters shadow 22h. 24m.; middle of eclipse 22h. 28m.; moon leaves shadow 22h. 32m. Eastern standard time. Magnitude of eclipse=0.001; moon's diameter=1.0.

III.—An annular eclipse of the sun, 1900, November 21st, invisible in Canada.

The path of the total eclipse of the sun on May 28th traverses Mexico, a portion of the northern part of the Gulf of Mexico—diagonally across the Southern States, across the Atlantic Ocean between the 40th and 50th parallel of latitude, thence nearly central through Spain, and skirting the southern shore of the Mediterranean Sea to a point west of the Red Sea.

Tables of Measurement.

Square, Surface, or Land Measure.

The square foot contains 144 square inches.  
 Yard = 9 feet = 1,296 inches.  
 Rod, pole or perch = 30½ yards = 272½ feet.  
 Chain = 16 rods = 184 yards = 4,356 feet.  
 Rood = 49 rods = 1,210 yards = 10,890 feet.  
 Acre = 4 roods = 160 rods = 4,840 yards.  
 Yard of land = 30 acres = 120 roods.  
 Hide = 100 acres = 400 roods.  
 Mile = 640 acres = 2,560 roods = 6,400 chains = 102,400 rods,  
 poles or perches, or 3,097,600 square yards.

An acre roughly stated has four equal sides of 60½ yards; accurate measurement gives each side 208.71 feet.  
 The sides of a square half-acre would be 147.581 feet, and of a square quarter acre 104.355 feet.

Angular Measure.

60 Seconds'' = 1 Minute.  
 60 Minutes' = 1 Degree.  
 30 Degrees° = 1 Sign.  
 90 Degrees = 1 Quadrant.  
 4 Quadrants, or 360°... = 1 Circumference or Circle.

## PRINCIPAL PHYSICAL FEATURES OF CANADA.

The principal physical features of Canada are the Rocky Mountains and the Laurentian range, the plains of the North-West Territories, the great lakes and Hudson Bay and the Bay of Fundy, and the Mackenzie River and St. Lawrence River basins.

The great inland lakes, five in number, form, with their connecting rivers, a complete system of navigation from the head of Lake Superior to the Atlantic Ocean, a distance of 2,384 miles. They cover an area of about 100,000 square miles.

Other lakes of large size are Great Bear, 11,200 square miles; Great Slave, 10,100 square miles; Winnipeg, 9,400 square miles, and Athabaska, 4,400 square miles.

The principal mountains are the Rocky Mountains in the west, extending from the Arctic Ocean to the United States; they contain the highest points in the Dominion, among the chief being Mount Hooker, 16,760 feet; Mount Brown, 16,000 feet, and Mount Murchison, 15,700 feet.

The principal rivers are the St. Lawrence (with its tributaries, the Ottawa, the St. Maurice, the Richelieu and the Saguenay), the St. John, the Restigouche and the Miramichi rivers, flowing into the Atlantic Ocean; the Mackenzie, Coppermine and Great Fish rivers emptying into the Arctic Ocean; the Saskatchewan and Red, the Nelson, Churchill and Albany rivers flowing into the Hudson's Bay; the Fraser and Columbia emptying into the Pacific Ocean.

Hudson Bay is a large inland sea, having an area of 350,000 square miles. Including its two arms it has an extreme length north and south of 1,300 miles and a width across the bay proper of about 600 miles.

The Bay of Fundy, 170 miles long, and from 30 to 50 miles wide, nearly separates Nova Scotia from New Brunswick, the connecting Isthmus of Chignecto being about 15 miles wide.

The principal islands in Canada are Baffin Land, Prince Albert Land (which are the principal islands in the new district of Franklin), Vancouver and Queen Charlotte Islands in British Columbia; Prince Edward Island, Cape Breton Island and Anticosti in the Gulf of St. Lawrence.

The climate varies greatly. The average mean temperature is—in Prince Edward Island, summer, 61·9 degrees F., and 19·5 in winter; New Brunswick, summer 60 degrees and winter 19·0; Nova Scotia, summer 65·2 and winter 25·0; Quebec, 58·3 summer and 15· winter; Ontario, 63·0 summer and 19·8 winter; Manitoba, 60·1 summer and 0·8 winter; British Columbia, summer 61· and winter 32·4.

It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States, and on the east by the Atlantic Ocean.

# TIDE TABLES FOR HALIFAX, QUEBEC, AND ST. JOHN, N.B., 1900.

These Tide Tables, with Tidal Differences for other places, are issued by the Tidal Survey Branch of the Department of Marine and Fisheries of the Dominion of Canada. They are based upon direct observations of the tides, obtained by means of self-registering tide-gauges, which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the tables is made in the Nautical Almanac Office, London.

The Tide Tables for Halifax are based upon the analysis of a record which was obtained during the years 1851, 1852, 1860 and 1861, with which there has been incorporated the record for one full year from the present tide gauge, namely, October, 1895, to November, 1896. The Quebec Tables are based upon the record for two complete years, from November, 1893, to January, 1896. The St. John Tables are based upon the record for two complete years also, from April, 1894, to May, 1896.

The TIDAL DIFFERENCES, when applied to the Tide Tables, give the time of high and low water at other places in Standard Time as indicated. The differences applicable to the Halifax Tables are derived from the Establishments given in the Admiralty list. They will therefore be correct at full and change of the moon, and approximate only at other times of the month. The differences for places above Quebec are derived from simultaneous observations at seven points during two complete months, obtained by the Department of Public Works. These differences are correct while the water in the River St. Lawrence is at its ordinary level; but the times of the tide which they give may be slightly early or late respectively, at the seasons when the water is unusually high or low. The differences below Quebec are based upon simultaneous observations from the tide-gauges at Quebec, Father Point, and Anticosti, taken throughout the two years 1895 and 1896, and compared with the differences of Establishment for intermediate points as given in the Admiralty list. These observations show that the time of the tide as given by these differences will be correct throughout the course of the month.

Tide Tables are also computed by the Tidal Survey, and issued for the season of Navigation, from April to November, for the following ports:—Charlottetown, Pictou, and St. Paul Island in Cabot Strait; with tidal differences for Northumberland Strait, and other points on the south-western side of the Gulf of St. Lawrence. Also for Father Point, the Pilot Station on the St. Lawrence, and Ste. Croix Bar above Quebec.

The permanent and tidal sets of currents in various parts of the Gulf are also being investigated by Mr. Dawson, Engineer in charge of the Survey. The results hitherto obtained have been published, and copies of these publications may be had, on application, from the Department of Marine and Fisheries, Ottawa.

The TIME used is Standard Time, for the 60th meridian; which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from a plane of reference at one foot below the level of Low Water at ordinary Spring Tides; which is the datum of the Admiralty Charts. Hence to obtain the height above the Admiralty Datum, deduct 1.0 foot from the height above given.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide, add 22.4 feet to the height of High Water as above given.

The TIME used is Standard Time, for the 60th meridian; which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from a plane of reference at one foot below the level of Low Water at ordinary Spring Tides; which is the datum of the Admiralty Charts. Hence to obtain the height above the Admiralty Datum, deduct 1.0 foot from the height above given.

The DRY DOCK.—To find the depth of water on the sill of this dock at any tide, add 22.4 feet to the height of High Water as above given.

The correction for an increase of altitude of one inch in the barometer or for a decrease of one degree in the thermometer, is to be added to the tabular refraction, but when the barometer is lower than 30 inches, or the thermometer higher than 47°, the corrections become subtractive. When great accuracy is required, 0.003 inch should be deducted from the observed height of the barometer for each degree that the thermometer near it is above 50°, and the same quantity added for an equal decrease.

## STATISTICS FOR 1899.

We are enabled this year to publish important tables of Canadian Finance and Trade for the year ending 30th June, 1899. Although these statistics are "unrevised," they will be found practically correct. The enormous growth of Canadian trade is reflected in these tables. The revenue of the country has increased \$6,000,000 over 1898, and the imports have grown from \$129,000,000 to \$152,000,000. The exports show a decrease of \$4,000,000. This is accounted for by the lower price of wheat, the item of Agricultural Products shrinking from \$43,727,172 to \$37,465,838.

\* Approximate only.

The figures given in the above table are based mainly on returns prepared by the Director of the United States Mint, and published in his annual reports. Under "British Empire" are included Australasia, Great Britain, Canada, British Guiana, British India, and Africa. The mines of the South African Republic, however, from 1887 to 1895, produced upwards of 6 $\frac{1}{2}$  per cent. of the total gold output of the world, and the increase under "British Empire" in recent years is mainly attributable to those mines.

Gold has been valued in the table at the legal rate of £3 17s. 10 $\frac{1}{2}$ d. per troy ounce standard, and silver at its *coining* value in this country, namely 5s. 6d. per troy ounce standard.—*Whitaker's Almanac.*

## PAR OF EXCHANGE.

In 1707 it was enacted that certain French and Spanish coins should pass as dollars at four to the pound currency, and as four shillings and sixpence sterling, so eighteen shillings sterling became equal to a pound (or twenty shillings) currency, and twenty shillings sterling

became equal to \$4.44 $\frac{2}{3}$  currency, and \$4.44 was known as "par." In 1871 the Federal Parliament made the British sovereign current at \$4.86 $\frac{2}{3}$ , being 9 $\frac{1}{2}$  per cent. premium on the old par.

## COINAGE IN CANADA.

In the early days all sorts of coin were used in British North America.

The first step taken in Canada for a revision of currency was in 1795, when, to remedy the evils resulting from the coined money in circulation being reduced in weight, debased in value and composed of every variety of pieces peculiar to all countries trading with this continent, an Act was passed which fixed a standard of value founded upon the average intrinsic worth of the gold and silver coins of Great Britain, Portugal, Spain, France and the United States.

Subsequently various Acts of the Legislatures established a valuation for these pieces, at which they were accepted in market overt.

Finally, in 1858, the Province of Canada adopted dollars and cents, pounds, shillings and pence as the

only moneys of account. In 1871 the Federal Parliament passed the Act (Chap. 4, Acts of 1871) respecting the currency, which gave to the provinces of the Dominion a uniform currency, the single gold standard adopted being that of the British sovereign of the weight and fineness prescribed by the laws of the United Kingdom, to pass current at \$4.86 $\frac{2}{3}$ . Provision was also made that, until otherwise ordered by Her Majesty's proclamation, the gold eagle of the United States, of the fixed weight of 10 pennyweights and 18 grains troy, and of a settled standard of fineness, should be legal tender in Canada. The same Act provided for a gold coinage for Canada, but special Canadian gold coinage has not been minted.

Silver coins were made legal tender to \$10, and minor coin to 25 cents.

The silver coins in use are 50, 25, 20, 10 and 5 cents.

## FORMS OF GOVERNMENT THROUGHOUT THE WORLD.\*

BY SIR J. G. BOURINOT, K.C.M.G., LL.D., F.R.S.C., AUTHOR OF "HOW CANADA IS GOVERNED," "THE STORY OF CANADA" (NATION'S SERIES), AND OTHER WORKS ON THE HISTORY AND GOVERNMENT OF CANADA.

### I.—INTRODUCTION.

In this necessarily very brief survey of the forms of government throughout the world, I have found it most convenient for purposes of reference to arrange the subject under the headings of "countries," "executive power," and "legislative power," with some mention of local or municipal government under the latter. I commence with the British Empire, as embracing the countries in which Canadians have naturally the deepest interest. After Great Britain and Ireland follow the colonies and dependencies of the empire, including India, in alphabetical order. Then come the other countries of the world in the same alphabetical order, commencing with the absolute monarchy of savage Abyssinia, while all colonies and dependencies follow the reference to their particular sovereign state. I have also thought it advisable, for purposes of reference, to add the area and population of every country.

A review of the methods of government in the world show a survival of the oldest forms, though in a more or less modified state. We see still in America examples of tribal communities; in Asia and Africa the organized patriarchal forms, and the nomadic hordes and camp nations. We can see illustrations of the division of organized government that was many centuries ago given by that master of political science, the Greek Aristotle. Although his analysis of the forms of government was far from exhaustive, and his descriptions are not quite adapted to modern types, his enumeration still serves as a most excellent frame on which to hang an exposition of these forms for studies and discussion. We see monarchy, or the rule of one, in Russia, China and Turkey; aristocracy, or the rule of the few, in a waning degree in Germany and Austria, where nobles still exercise large power in houses of peers and in government; democracy, or the rule of the many, in the United States, in the South American republics, and in numerous countries to which popular government has extended itself within this century. We see also the truth of his remarks that monarchy can assume the degenerate shape of tyranny; aristocracy, the degenerate shape of oligarchy; and democracy, the degenerate shape of anarchy or mob rule. Under modern conditions aristocracy, as a form of government, is fast disappearing before the growth of democracy. In England the power of the peers was effectually broken by the introduction of responsible or parliamentary government in the reign of William III. and the passage of the first Reform Bill of 1832. The peers of the realm now derive their influence chiefly through their connection with the political party in power and the ministry that owes its existence to the commons. On the continent of Europe, the houses of peers are still powerful, but their power as a house is chiefly derived not from purely aristocratic influence, but from their share in the work of legislation as a branch of the legislature, and from the presence in the majority of cases of life or elected members, representing important class, educational, and other interests that bring the bodies into touch with the more popular elements of the country. Monarchy still exists as an important form of government. The present government of Russia is abnormal in the Europe of to-day, as abnormal as that of the Turk,—“a belated example of those crude forms of politics which the rest of Europe has outgrown.” Otherwise the monarchies of Europe are limited by the resolutions of the popular parliaments. While monarchy is more or less limited and aristocracy seems on the point of disappearing, democracy, as a form of government, is in a fair way to prevail universally. Ever since the rise of popular education in the last century, and the success of parliamentary government in England, and popular government in the United States, the forces of popular thought have

\* Revised and corrected from latest available authorities.

made a steady headway throughout the world. But we have seen that democracy may mean license and anarchy, as Aristotle long ago foresaw, and none but a Cæsar or a military leader can at times bring it back to reason and order. Citizens under monarchical rule may be, and often are, more fortunately placed as far as personal liberty is concerned than the citizens of pure republics in South America. In those countries tyranny as brutal as that of Caligula or Commodus has reigned. Out of fourteen presidents of the Bolivian republic, thirteen have died assassinated or in exile, and no one can safely conjecture the final fate of any of the former colonies of Spain. Even in the United States, despite the influence of English institutions and the English governing instinct for law and order—the saving principle always in that great federal republic—democracy at times, under the sway of mob rule and party spirit, has seemed clearly dangerous to public security and good government.

But a close study of forms of government is encouraging since it shows on the whole a steady growth of representative institutions, and the extension of popular rights under hopeful conditions of law and order. The theory of national sovereignty has been now accepted in France, Italy, Spain, Portugal, Holland, Belgium, Greece, and the Scandinavian States. In Germany it has not been yet acclimatized, but while the emperor's will is still a powerful factor in government and legislation, we can see the influence of the English principles of parliamentary and popular government. In Spain we still see the influence of the military spirit, and no one would be surprised to see bayonets in the Cortes at certain political crises. In France, the results of late have been encouraging, and it is quite possible that France may still give us additional evidences of the strength of parliamentary government outside of countries of English origin.

England is the mother of free governments throughout the world, even among nations that do not speak her tongue. Her principles have more or less influenced the great communities of Europe, as I have just shown. Her self-governing dependencies have closely followed her parliamentary system of government, and year by year we see colonies emerging from a state of pupillage and assuming large rights of self-government. It is true that in Jamaica there has been a step backward, but it has been forced by abnormal conditions of depressed trade and the existence of a large and idle coloured population, not equal to the requirements of freedom and citizenship. The British empire now comprises forty-two distinct and independent governments. In addition to these there are a number of scattered dependencies under the dominion or protection of England, which do not possess regularly formed administrations and vast territories controlled by English chartered companies protected by the queen. Of the forty-two administrations, eleven have elected assemblies and responsible government; the others are (1) crown colonies in which the crown "has the sole control of legislation while the administration is carried on by public officers under the control of the home government"; or (2) colonies "possessing representative institutions but not responsible government, in which the crown has no more than a veto on legislation, but the home government retains the control of public officers."

While the old world is the home of the parliament and a responsible ministry, the new world is that of a congress, and an executive not having seats in or directly responsible to the legislature. In some countries of Europe, and in England's dependencies, the English model is directly followed, but the South American republics have taken the American system with some modifications. In Canada alone, in America, is responsible or English parliamentary government seen in complete operation. Nevertheless it is England that has given representative government to the world at large. The system of the United States is based on English institutions of a century ago, and on the legislative system of the old English colonies.

The principle of federation has been fully expanded in the United States. It has formed the model for even Switzerland and Canada, and developed the idea throughout the world. In Germany, Austria, Hungary, Norway and Sweden, the West Indies, and in a few South American republics, we see this federal idea solving important problems of political government. In Australasia\* there is now before the legislatures and people a scheme of union

\*New South Wales, Tasmania, South Australia and Victoria will form a federal union under the name of "The Commonwealth of Australia"—the other colonies of Australasia having so far refused to unite with those named.

based on that of the United States and Canada, and it is certain now that those distant English communities will enter during 1900 into the rank of federations. The federal idea in co-operation with responsible or representative government must sooner or later rule the world.

In every country possessing representative government we see a parliament or diet or congress, or some other assembly conveying the same political thought in the particular language of a nation or state. In the majority of cases, two houses prevail. Canada occupies an exceptional position among English dependencies with responsible government, since five out of the seven provinces of the dominion have abolished their legislative councils or upper branches of the legislature. Those countries in America that have followed the model of the United States possess a senate or upper chamber (Nicaragua excepted). One chambered legislatures prevail in Servia, Bulgaria, Greece, in the landtags of Austria, and in the diets of the minor German states except those of the free cities. Apart from these legislative bodies, the European communities have two chambers, varying from that of Norway (where, after a single general election, a certain number of the deputies returned are told to make an upper house,) to the ultra-aristocratic house of magnates, established from the earliest time under the ancient Hungarian constitution. Hereditary peers, generally mixed with life peers and elective peers, are still common in the second chambers of the continent of Europe; they are found in Cisleithan Austria, in Prussia, in Bavaria, in some of the smaller German states, and in Spain and Portugal. Life peers also occur by themselves but the crown is generally directed by the constitution to select them from certain classes of distinguished men. The best example of an upper house formed by this method is the Italian senate. In many states the mode of electing senators or peers is indirect, either the electorate is different, or provinces, or states or communes elect, while the deputies of the popular branch are taken from the nation at large. Even the senate of the United States is founded on inequality of representation. This distinction between the elections of the two houses shows a fundamental doubt as to the safety of the democratic theory.

The second or popular chamber, however, is the most powerful. All elected or second assemblies have the initiation of money votes, and taxation. The senate of the United States is probably the sole instance of a legislative body which is not inferior in legislative importance to the lower house, and possesses special functions—the approval or rejection of important appointments and the confirmation of treaties—not enjoyed by any similar body in the world. In the Spanish cortes, however, either house may take the initiative in all cases of legislation. In the Netherlands, the upper house cannot amend the bills of the lower branch, but must accept or reject them in their entirety. The British house of lords cannot initiate or amend a money bill; neither can the Canadian senate nor the upper houses of any of the British dependencies. The senate of the United States, however, may amend while it cannot originate a revenue or money bill. The upper house of the Prussian landtag cannot amend the budget. In Austria-Hungary, Baden, Saxony, Hesse, Portugal, Norway, Sweden and Wurtemberg, there is the system of a union of two houses or their committees to pass money or other bills on which there is a deadlock. This is a useful precedent under certain conditions, and recalls the system of electing senators for the congress of the United States. In the proposed constitution for the federation of Australia, when there is a deadlock between the two elective houses of the parliament of the Commonwealth—as the united colonies are to be called—a dissolution may take place to obtain the opinion of the people, and then a joint sitting may be ordered on the disputed measure, which will be decided by a majority of the members voting jointly thereon. In some German states a permanent committee represents the house or houses then not sitting—a *quasi* responsible government in practice.

Universal suffrage prevails generally in North and South America, including the provinces of British Columbia, Manitoba, Ontario, New Brunswick and Prince Edward Island. In a few South American states, and in Massachusetts some educational tests are necessary. Costa Rica limits the franchise to those who can live respectably, and Mexico to “all respectable male adults.” Hayti requires her negro citizens to have “some vocation”—a mere

euphemism certainly. In the states of Colorado, Utah and Wyoming, women can vote at state, as well as at municipal elections, and the same is true of New Zealand and South Australia. In Europe, property, income, and the payment of taxes govern. The German reichstag and French chamber of deputies are chosen by general suffrage. But in no part of Europe except Austria can women vote even on a property qualification. In some countries a premium is placed on learning or education, viz.: Victoria, Tasmania, Ecuador, Bolivia, Chili, Cape of Good Hope, Malta, Hawaii, Hungary, Bremen, and other states. In Montenegro, men capable of bearing arms are the electors. In a few countries the age of electors is limited to 25, but the ordinary age of manhood, 21, may be considered the rule.

Qualifications for members of the houses are required generally on the lines of age, but except in a few of the older states of Europe property qualification is now not necessary for the popular chamber. The age of the elected or appointed members of the upper houses is generally greater than that of the lower, 30 being the average. The number of members in upper houses—chiefly those elected or appointed—is, as a rule, lower than that of the popular chamber. The English house of lords, however, is not very much less than that of the commons, but, it must be remembered that only a small proportion of peers ever take their seats or vote. The Hungarian house of magnates actually counts a few more than the popular branch, while the new Japanese parliament preserves a parity. In the great majority of cases—not in Great Britain, however—members of legislative bodies are paid a sum, varying in amount, for expenses of the session and travelling. In France, Italy, Belgium and nearly all the Australasian colonies members receive passes over public railways.

The relations to the executive show great divergence. Countries of the English type, as I have already intimated, display the ministerial responsibility well developed. On the continent generally the connection is somewhat slighter. In Sweden and Norway it is undefined. To be sure the German constitution does not create a ministry responsible to the legislature. But the system of government “seems to be in a transition stage between the one-man rule of *quasi* absolutism under constitutional forms, and the liberal *regime* of modern times.” There is no ministerial responsibility in Switzerland. Between the anglo-continental system and the congressional plan, there is a very wide divergence.

The sovereign of a monarchy and the president of a republic has, with a few exceptions, some share, often considerable, in legislation. The German emperor has vast powers;—the other European constitutional sovereigns far less. The American president has far greater power in legislation than the queen of England, since he can stop any congressional legislation when there is not a two-thirds majority in both houses to over-ride his veto. The king of Sweden has an absolute veto in Sweden, and promulgates various laws, though in his office as king of Norway he has a suspensive veto only, and possesses some temporary powers when the storting is not sitting.

The French national assembly has the important duty of electing the president of the republic, while the Swiss federal republic—the home of the “initiative” and the “referendum”—chooses the entire executive or federal council. Members of this council can sit and speak but not vote in the chambers. The federal assembly elect the president and vice-president from among the members of this council. Here are more illustrations of distrust of democracy.

It may be said that the principles of representative and popular government have, indeed, made remarkable strides within the latter half of this century. The latest acquisition is Japan, which has already made a claim for a high place among civilized nations and proved its capacity to understand the principles of parliamentary government as well as the rules and conditions of modern warfare. Another half-century must witness an extraordinary development in the same direction of popular government. The great English poet wrote a political truth when he told us years ago:—

“For through all the ages an increasing purpose runs,  
And the thoughts of men are widened with the process of the suns.”

## II.—GOVERNMENT OF THE BRITISH EMPIRE.

### EXECUTIVE POWER.

A sovereign, at present a queen, exercising all powers of executive government through a cabinet composed of certain sworn privy councillors, who act as advisers of the crown, and conduct the public administration in accordance with law and constitutional usage. The crown is hereditary, but subject to such limitations as may be imposed by parliament—*i.e.*, by the crown, lords and commons. The head of the administration is the premier, or first minister, who is the choice of the crown; he selects the members of the cabinet and ministry, with the approval of the sovereign. The cabinet consists, at present, of 16 ministers, of whom the first lord of the treasury is generally premier. In addition to the inner or advisory council, called the cabinet, there are other ministers holding subordinate positions in the government, but who also retire with the cabinet in case of resignation or defeat. The whole number of persons comprising the government of England, including the chief officials for Scotland and Ireland, is 56. The government hold office as long as they retain the confidence of the house of commons. The common law is the basis of justice in Great Britain and Ireland, and in all colonies and dependencies of the crown. Wherever, in the latter, the civil or other law is in force, it will be stated below in the case of the particular colony.

### LEGISLATIVE POWER AND LOCAL GOVERNMENT.

The parliament of Great Britain is composed of the crown, lords and commons. The lords consists at present of 576—archbishops (2), bishops (24) and peers, the latter divided into 22 dukes, 22 marquesses, 119 earls, 26 viscounts, and 308 barons. Six princes of the royal blood have also seats in the house. Scotland is represented by 16 peers, elected for each parliament, and Ireland by 28 representative peers elected for life. The speaker is the lord high chancellor of England, who is a member of the cabinet, and retires with a change of government. The house of lords has co-ordinate powers of legislation with the house of commons, except as respects taxation or money bills. It cannot initiate or amend such bills, but it may under exceptional conditions reject them as a whole. The house of commons is the body where the chief political power rests. It consists of 670 members, elected by the legal electors of Great Britain and Ireland, as follows: England 465, Wales 30, Scotland 72, Ireland 103. All elections are now by ballot. Since the reform bill of 1832 the franchise has been widely extended to all classes who have a stake in the country. The suffrage is now divided among freeholders, copyholders, leaseholders, occupants of lands and tenements, and lodgers of a specified value. The house of commons lasts for seven years, unless sooner dissolved by the crown with the advice of the cabinet. Parliament is summoned, prorogued and dissolved by the sovereign. The speaker and deputy speaker of the commons are elected by the house for the duration of the parliament. Members do not require a property qualification, but they must be English citizens of the age of 21 years, not bankrupts, or idiots or criminals. Members are not paid. The system of local government has been much simplified quite recently. England and Wales are now divided into 62 administrative counties, including the city of London. In every county there is a council composed of aldermen and councillors. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The counties are again divided into "urban districts" and "rural districts," in which councils are elected. The parish continues to be a unit of local government, and the duties formerly performed by "vestries" are now discharged by

"parish meetings" and "parish councils." In cities and towns the affairs are administered by municipal corporations, consisting of mayor, aldermen and burgesses; the mayor and aldermen are elected by the council, and the burgesses by ratpayers. Women can be elected only to district councils and parish councils, including the London vestries. Married as well as single women can vote at parochial elections. In Scotland there are parish councils, and municipal bodies in towns and cities. The councils of the latter consist of a provost and bailies. In Ireland there is no system of representative local government, but in counties the authority is the grand jury. In some towns and boroughs there are corporations consisting of mayor, aldermen and councillors. In the majority of towns local government is entrusted to commissioners, appointed by the Irish government.

Though it cannot initiate or amend such bills, it may reject them under extraordinary circumstances. Members are paid \$1,000 for a session of over 30 days, and a sum for travelling expenses at the rate of 10 cents a mile going and returning. The house of commons consists of 213 members, elected from 1885 until 1898 on a dominion franchise, which was, in the latter year, repealed. Dominion elections will hereafter be run on the provincial systems, with some unimportant limitations. Members require no property qualification, but they must be of the age of 21, and British subjects, not disqualified by law. The speaker is chosen by the commons. Parliament has a legal existence of five years unless sooner dissolved by the governor-general, and meets once every year. Members are paid the same as senators. As Canada possesses a system of federal government, her legislative powers are limited to certain subjects of dominion or national import, set forth in the written constitution, or British North America Act, of 1867, with the residue of power not expressly given to the provinces in the federal government. All the provinces of Canada, except Prince Edward Island, possess a very complete system of municipal government, which entrusts certain *quasi* legislative powers to councils in municipal divisions known as cities, counties, townships, towns, villages and parishes, and elected by ratepayers. The rules and usages of procedure of the Canadian parliament and of the legislatures are based on those of the imperial parliament. The closure does not exist in Canada.

The speaker of the legislative council is appointed by the crown. In the five other provinces there is only one house, an elected assembly, viz., Ontario, 94 members; New Brunswick, 41; P. E. Island, 30; Manitoba, 40; British Columbia, 32. In all these provinces there is manhood suffrage, limited by residence and citizenship, but in P. E. Island 15 are elected on a special real estate qualification.\* In all of these provinces the duration of the assembly is four years, unless sooner dissolved. Sessions are annual. In all of the provinces the speakers of the assemblies are elected by the members. In both houses members are paid. Members require no property qualification. The legislative powers of the legislatures are defined by the British North America Act of 1867. Legislative assemblies and executive councils exist, and in a few cantons there are landsgemeinden or assemblies of the male citizens for the purpose of making laws and appointing their administrators. Under the constitution the electors meet in each state on a particular day and invariably cast their votes in accordance with the result of the election. There is also a vice-president elected by the same political method. The president is head of the executive, and has a veto over the legislation of congress, but it can be over-ridden by a two-thirds majority in each house. He is aided by a cabinet of eight secretaries of state and heads of departments, appointed by himself with the approval of the senate, but having no seats in or responsibility to congress. In case of death, resignation or disability of the president, the vice-president succeeds, and after the latter, the secretary of state or other members of cabinet in order of seniority until a new president is appointed or the disability is removed. The governor is the head of the executive and has no responsible ministers in the English or Canadian sense, but the executive or administrative officers are generally elected.

*Legislative Power and Local Government.*—In all the forty-five states there is a legislature of two houses; an upper house, generally called senate, and a house of representatives, both elected by the people of the state. In the following states the senate is elected for four years, the house of representatives for two years, and sessions are biennial, with the exception of the states mentioned: Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi (annual), Missouri, Montana, Nevada, North Dakota, Oregon, Pennsylvania, South Carolina (annual), Texas, Utah, Virginia, Washington, West Virginia and Wyoming. In the following states the term is for the senate two, for the house, two, and sessions biennial: Idaho, Michigan, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, Tennessee, Vermont. In the following states the term is one for both senate and house, and sessions annual: Connecticut, Maine, Massachusetts, Rhode Island. In Minnesota the term of the senate is two years, of the house one, and sessions annual. In New York the senate two, the house one, and the sessions annual. In New Jersey the senate three, the house one, and the sessions annual. Universal suffrage is the rule, though Delaware has a tax qualification in state senate elections. In some states the payment of a poll tax, illiteracy and residence enter into qualifications. In Colorado, Utah and Wyoming women can vote. Members of the legislature are paid. All public officials, state and municipal, are elected as a rule, but the tendency in the older states is to have a permanent public service apart from political heads. In 31 states the judges are elected by the people; in five, by the legislature; in eight, appointed by the governor, subject to conformation by the legislature or council. The Australian or Canadian ballot is now in force in 40 states; nine have passed stringent laws against corrupt practices at elections, but they are practically effective in only two or three states.

Throughout the union there is a very complete system of township, county, and city government. Township local government prevails in the New England states, the county is generally the unit in the south; in the middle and north-western states there is a mixed system. In several of the western states women can vote and be elected for municipal and school bodies. In all cases councils are elective. In the large cities there have been cases of gross corruption and mismanagement, and the best methods of improving municipal government are now attracting much serious attention.

#### United States Territories:

ALASKA; pop., 32,052; area, 531,000 sq. m.  
 ARIZONA; pop., 207,495; area, 112,920 sq. m.  
 NEW MEXICO; pop., 153,593; area, 122,460.  
 OKLAHOMA; pop., 61,834; area, 38,830.  
 INDIAN TERRITORY; pop., 180,182; area, 31,000.

*Executive Power.*—In the territories the governors and other officials, including judges, are appointed for four years by the president of the United States. The legislatures (council and house of representatives) of the organized territories of Arizona, New Mexico, Oklahoma, are elected for two years, but their powers of legislation are large, though subject to federal restrictions. In the other territories there are only governors and officials appointed by the president.

### United States Dependencies:

**HAWAIIAN OR SANDWICH ISLANDS;** population, 109,020 (23,000 whites); area, 6,640 square miles. The Islands now form a territory of the United States, and for military purposes are under the jurisdiction of California.

**CUBA;** population, 1,632,000; area, 45,872 square miles. The United States went to war with Spain for the independence of this island, where internecine strife prevailed for years, to the disgrace of Christendom. Spain was soon driven from her ancient dependency, but its independence has not yet been conceded by the United States, despite its professions at the outset, and a strong wave of American sentiment will likely ere long force its annexation.

**GUAM (Ladrones).** Ceded by Spain to the United States in 1898. A coaling station for the U.S. navy.

**PHILIPPINE ISLANDS.** These islands were ceded by Spain to the United States on December 11, 1898. They are about 2,000 in number. Total area, 115,300 square miles; population, estimated, 8,000,000. No definite form of government has yet been established, as the natives steadily resist all the forces which the United States send against them for their subjection.

**PORTO RICO.** Ceded by Spain to the United States on December 11, 1898. Area, 3,600 square miles; population, 798,560. At present under military control.

**Uruguay,** republic; estimated population in 1895, 850,000; area, 72,110 square miles.

**EXECUTIVE POWER.**—President, elected for four years, and aided by a council of five ministers.

**LEGISLATIVE POWER AND LOCAL GOVERNMENT.**—Congress of two houses; a senate of 19 chosen by an electoral college for six years, one-third retiring every two years; a house of 69 representatives elected every three years by all male adults who can read and write.

**Venezuela,** republic; population, about 2,324,000; area, 593,943 sq. miles, but England claims about 50,000 sq. miles as forming part of British Guiana—a question in dispute for years, and now under arbitration.

**EXECUTIVE POWER.**—President, chosen for two years, without veto power, and aided by a responsible ministry of six members, and a federal council of 19 members. Congress appoints the council every two years, and the latter choose the president.

**LEGISLATIVE POWER AND LOCAL GOVERNMENT.**—Congress of two houses; a senate of 24 members or two elected for each state legislature for four years; a house of 52 representatives, elected by direct vote for four years.

**Wadai (Central Soudan),** and subject states of Kanem and Bagirmi, absolute monarchy; estimated population, 2,750,000; area, 302,000 square miles.

**EXECUTIVE POWER.**—Sultan, aided by a council (*fāshir*). The country is divided into provinces, governed by viceroys.

**LEGISLATIVE POWER AND LOCAL GOVERNMENT.**—The koran or law is interpreted by a council of ulemas or fakirs, as in all Mohammedan countries.

In the foregoing list the asterisk denotes members of the English House of Lords entitled to the designation of "Right Honourable." Barons Aylmer and de Blaquière are of the peerage of Ireland and not members of the House of Lords. Sir Wilfrid Laurier is also Right Honourable by right of special appointment to the English Privy Council. The title of Baron de Longueuil is a creation of Louis XIV., King of France, so far back as 1700, and has been duly recognized by the Queen.

Members of the Canadian Privy Council are designated above by a † and have also the title of Honourable. Judges are distinguished by a ‡ and are also by courtesy or custom Honourable. The English practice is to give the title of Knight Bachelor to members of the Judicial bench. Sir Samuel Strong, Chief Justice of the Supreme Court of Canada, is the Canadian representative on the Judicial Committee of the Privy Council, and consequently Right Honourable.

## COMPANIONAGE.

We give below a list of Canadians who are at present Companions of the orders of Knighthood—Bath and St. Michael and St. George—of which the Knights, as shown above, take precedence of the Knights Bachelors.

 C.M.G. White, Lt.-Col. W., C.M.G.

The Order of Baronets, the lowest hereditary rank, was instituted in 1611; a Baronet is designated "Sir John Smith, Baronet"—usually written Bart. Taking precedence of Baronets are members of The Most Honourable Privy Council, who are addressed "Right Honourable."

The Order of the Bath, instituted in 1399, and revived in 1725, is divided into three classes—Knights Grand Cross, G.C.B.; Knights Commanders, K.C.B.; and Companions, C.B.

The Order of St. Michael and St. George, instituted in 1818, has also three classes—G.C.M.G., K.C.M.G., and C.M.G.

In all Orders of Knighthood the Knights Grand Cross and the Knights Commanders have the prefix "Sir"

with the initials of their class following the name. Companions bear no title, but have the letters C.B. or C.M.G., as the case may be, attached to their names.

Knights Bachelors are gentlemen who have received the honour of Knighthood, and are entitled to the prefix "Sir."

The Speaker of the British House of Commons takes precedence of every person who is not a Peer.

It follows that members of any order of Knighthood may be entitled to several prefixes and affixes, as: Field Marshal The Rt. Hon. Lord Roberts of Kandahar, K.P., G.C.B., G.C.S.I., G.C.I.E., V.C.; The Rt. Hon. Sir Wilfrid Laurier, G.C.M.G.; The Hon. Sir C. Tupper, Bart, G.C.M.G., C.B.

## ROYAL UNITED SERVICE INSTITUTION.

NAVAL PRIZE ESSAY, 1897.—SILVER MEDAL.—Capt. Chs. F. Winter, Governor-General's Foot Guards. "*The Protection of Commerce During War.*"

## MILITIA AND DEFENCE OF CANADA

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, but is practically embodied in the present Militia Act, 49 Vic., chap. 41 (Revised Statutes, 1886). By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The number of men to be trained and drilled annually is limited to forty thousand, except as specially authorized, and the period of drill is to be sixteen days and not less than eight days each year.

The Militia is divided into Active and Reserve land and marine force. The Active land and marine force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service is three years.

The following is an analysis of the Units which compose the Permanent and Active Militia of Canada, by arms of the service:—

# POSTAL INFORMATION.

*For List of Officials of Post Office Department, see page 122.*

## Letter Rates, &c.

*Canada.*—Letters posted in Canada, addressed to any place within the Dominion, 2 cents per oz. If unpaid, such letters cannot be forwarded, but will be sent to the Dead Letter Office. If partially prepaid, the letter will be forwarded to its destination and double the deficiency charged on delivery. Letters mailed at any office for delivery at or from the same office, provided that the office is not one at which free delivery by letter carriers is established, are charged 1 cent per oz., and must be at least partially prepaid; otherwise they are sent to the Dead Letter Office. Letters of this nature mailed at and for delivery from an office at which there is a free delivery by letter carriers are liable to 2 cents per ounce. All postage must be prepaid by postage stamps.

*Post Cards.*—From any place in Canada to any place in Canada or to the United States, 1 cent each. British and Foreign, 2 cents each.

*Private Post Cards.*—Upon cards intended for use as Private Post Cards the words "Post Card" must be printed or written. The face of the card may be used for advertisements, illustrations, etc., provided that a clear space of at least  $\frac{1}{4}$  inch is left along each of the four sides of the postage stamp, and a clear space  $3\frac{1}{4}$  inches long and  $1\frac{1}{2}$  inches wide reserved for the address at the lower right hand corner of the card. Private Post Cards must not exceed a size of 6 inches in length by  $3\frac{3}{8}$  inches in width. Cards exceeding these limits are treated as insufficiently paid letters.

*United Kingdom, and the following British Possessions and Protectorates:* Aden, Ascension, Bahama Islands, Barbados, Bermuda, British Central Africa, British East Africa, British Guiana, British Honduras, British India (except offices on the Persian Gulf), British North Borneo Company's Territory, including Labuan, Cape Colony, Ceylon, Cyprus, Falkland Islands, Fiji, Gambia, Gibraltar, Gold Coast Colony, Hong Kong, Jamaica, Johore, Lagos, Leeward Islands, Malay States, Malta, Mauritius, Natal, Newfoundland, Niger Coast Protectorate, Niger Company's Territory, Sarawak, Seychelles, Sierra Leone, Straits Settlements, St. Helena, Tobago, Trinidad, Turks Islands, Uganda, Windward Islands, Zanzibar.—Postage on Letters, 2 cts. per half oz.

*Foreign Countries, except United States.*—Postage on Letters, 5 cents per half oz. If sent unpaid, double postage will be charged.

*United States.*—The rate on letters to the United States is the same as in Canada, and at least one rate must be prepaid.

It is very important to bear in mind that the postage upon letters for the United Kingdom and all Foreign Countries is calculated by the *half ounce* and *double* postage is charged on all unpaid letters.

## Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration in addition to the Postage is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

## Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 7 lbs. is allowed); for foreign post, 4 lbs. Limit of size, two feet in length, or one foot in width or depth.

Book packets must be open at *both ends or both sides*, and must not contain any letter or sealed inclosure.

Books for the use of the blind are free of Canada postage.

The rate on Book Packets between any two places in Canada is 1 cent per 4 ozs., which must be prepaid by stamps.

The rate to Great Britain, the United States and all Postal Union Countries, is 1 cent per 2 ozs.

## Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations of the British Post Office do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom by Book Post:—

1. On all pamphlets, occasional publications, printed circulars, catalogues (in which may be included printed order lists), prices current, hand-bills, and other matter wholly in print, and on packages of seeds, cuttings, but *not cut flowers*, bulbs, roots, bedding plants, scions or grafts, the rate is 1 cent for each 4 ozs. or fraction thereof.

2. On maps, prints, drawings, engravings, lithographs, photographs when not on glass or in cases containing glass, circulars produced by a multiplying process easy to recognize, botanical, natural history and entomological specimens when properly put up so as to prevent injury to the contents of the mails, visiting cards, whether printed, engraved or written, sheet music, whether printed or written, stitched or bound, book or newspaper manu-

script whether type-written or hand-written, printer's proof-sheets whether corrected or not and accompanying manuscript copy, such partly printed and partly written documents as deeds of land, wills, mortgages made under seal (including chattel mortgages), insurance policies, renewal receipts when attached to the policies, insurance receipts sent in bulk from head offices to agents, militia and school returns, customs manifests, bank pass books, voters' lists when written or partly in writing, school or college examination papers, municipal assessment rolls, partly printed and partly written Dominion and Provincial Government documents, statute labour returns, municipal returns in general, exhibitors' entry tickets for provincial and other agricultural and industrial exhibitions, blank books, photograph albums with or without photographs, printed forms entirely without writing, and official or private post cards either wholly blank or printed as circulars or as forms to be filled up, but without any writing whatsoever, the rate of postage is 1c. for each 2 ozs. or fraction of 2 ozs.; and the postage rate must in every case be prepaid by postage stamps or stamped post bands or wrappers. No letter or other communication intended to serve the purpose of a letter must be sent or inclosed in any such package or thing mentioned, and the same must be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision; (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 30 inches in length or 12 inches in width or depth, nor may the combined length and girth of any packet exceed 6 feet.

Legal and commercial papers generally are liable to *letter rate* of postage; the exceptions are restricted to the above documents specified, such as Deeds and Insurance Policies.

Printed or written *requests for return* recognized on 3rd and 4th class matter, addressed to places within the Dominion, and same will be *returned direct to the sender*, subject to the payment by the sender, on delivery to him through the Post Office, of the full amount of postage to which the article was in the first place liable, together with any charges rated thereon on account of any deficiency in the original prepayment.

### Newspapers and Periodicals.

The general postage rate on newspapers and periodicals *published in Canada* not less frequently than once a month, and addressed to regular subscribers in Canada, the United States and Newfoundland, and to newsdealers in Canada, is fixed by law at  $\frac{1}{2}$  cent per pound. The following exception, however, is to be noted: Newspapers and periodicals published not *more* frequently than once a week and not less frequently than once a month, are entitled to pass free to regular subscribers and newsdealers in Canada within a circular area of 40 miles in diameter, having as centre either the place of publication or any established Post Office not more than 20 miles distant therefrom, the choice of a centre within

these limits resting with the publisher; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, other than those addressed to regular subscribers or news agents, from office of publication, the rate is *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals weighing not more than 1 oz. each may be posted singly, if prepaid by Postage Stamp  $\frac{1}{2}$  cent each.

The postage on specimen newspapers, and on papers, and periodicals published less frequently than once a month is 1 cent per lb.

British and foreign publications received by mail may be re-posted in Canada to subscribers in Canada at the rate of 1 cent per lb. They cannot however be posted at that rate for local delivery at places where there is a free letter carrier service.

### Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canadian newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers in Canada.* When addressed to any place within the Dominion, or the United States, they must be prepaid the following rates by Postage Stamp:—

If posted singly and weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

The newspaper rate to England, whether for transient newspapers or for those sent to regular subscribers, is 1c. per 2 oz. by whatever route they may be forwarded.

### Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not exceeding 24 oz. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent per 4 oz., under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided the deficiency does not exceed 5 cents.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

Liquids, oils, etc., may be sent by mail in the Dominion if put up carefully in strict accordance with the directions given in the Postal Guide and ascertainable at any post office.

### United Kingdom, United States and Foreign Countries.

Patterns and samples of Merchandise, when addressed to places in the United Kingdom must not exceed 5 lbs. in weight; to the United States and other foreign countries, 12 oz.; and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Samples of liquids, oils, glass, etc., are admitted as samples provided they are put up in strict accordance with the directions given in the Postal Guide.

### Useful Hints.

Register all valuable letters. Transmit money by Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of mis-sent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

### Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following Regulations:—

1. The dimensions of a Parcel must not exceed 2 feet in length by 1 foot in width or depth.

2. A Parcel must not contain any explosive, combustible, or dangerous articles.

3. All Parcels must be securely and substantially packed and closed.

4. Oils, liquids, etc., can only be forwarded if put up with the same security required in connection with their transmission as samples in the ordinary mails. Fragile articles should be packed with special care.

5. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the parcel is intended.

6. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel, also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined

for the purpose by an Officer of the Customs in the presence of the persons addressed.

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Prepayment by postage stamp is required in all cases. Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

### Fourth Class Matter.

Postage rate one cent per ounce or fraction of an ounce, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, nor entitled to pass as 3rd class matter, may pass as 4th class when addressed to any destination within the Dominion or the United States. Fourth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 lbs. in weight. The limit of size is 30 inches in length by 1 foot in width or depth, but the combined length and girth of any packet must in no case exceed 6 feet. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 4th class matter is 5 cents in addition to postage.

A packet of 4th class matter may contain invoices and accounts, provided they relate exclusively to the contents of such packet; it is also permitted to enclose a card or slip of paper giving in a brief manner necessary directions for the identification or treatment of the article or articles contained in the packet. Care must be taken not to abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and the addressee, into what might properly be called correspondence. A packet of 4th class matter containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage, and the sender will incur the penalty provided by law.

When several separate articles are enclosed in a packet of 4th class matter, there is no objection to each bearing a distinguishing number, so as to enable the sender to give directions by letter (sent of course separately and duly prepaid) respecting the several articles which the packet contains.

### Prohibited Articles.

All explosive, dangerous or destructive substances, glass bottles or glass in any form liable to break, and all matter subject to speedy decay, all obscene or immoral books, publications, pictures, etc., libellous post cards and letters the covers of which bear words of an offensive character, and letters and circulars relating to illegal lotteries or other fraudulent schemes.

### Foreign Post—Commercial Papers.

“Commercial Papers” are understood to comprise all papers or documents written or drawn wholly or partly by hand (except letters or communications of the nature of letters or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, deeds drawn up by public functionaries, copies of or extracts from deeds under private seal and (whether written or printed on stamped or unstamped paper) way bills, bills of lading, invoices and other documents of a mercantile character, documents of insurance and other public companies, all kinds of manuscript music, the manuscript of books and other literary works. The rate is 1 cent per 2 ozs., but each packet must have a minimum prepayment of 5 cents; this prepayment will cover a weight of 10 ozs. No packet must exceed 2 feet in length or 1 foot in width or depth, unless in the form of a roll when a length of 30 inches is allowed, provided the diameter does not exceed 4 inches. The weight must not exceed 4 lbs.

There are seventeen denominations of Postal Notes; the different amounts and the commission payable thereon are as follows:

THE LAKE ST. JOHN TERRITORY.

The territory in question extends from the head of navigation of the river Saguenay, at Chicoutimi, to the northern boundary of the Province of Quebec, a distance of 220 miles, and from the sources of the waters flowing into Lake St. John, from the East, to the river St. Maurice, and embracing the valley of the river Batiscan, a distance of 200 miles, the whole forming an area of 44,000 square miles or about 28,000,000 acres. Comparatively little is known of this great country, with the exception of the valley of Lake St. John, which, within the last few years, has been colonized with great rapidity, and now contains a population of some 40,000.

The Saguenay and St. Maurice regions are already the field of large lumbering operations, estimated at 60,000,000 feet, B.M., per annum, or equivalent to nearly one-fourth of the whole export of sawn lumber from the port of Quebec. The country is thus described by a gentleman who visited it recently:

**The Soil** "Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointe-aux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure; and the grain I saw this year was as fine as any to be found in this district. Truly one is struck with wonder at the richness of the soil, for I believe there is none richer in Canada."

**The climate of the Lake St. John region** is said to be that of Montreal; there is no doubt of its being superior to that of Quebec. The snowfall is certainly less. In fact, farmers complain that they do not get good sleigh roads till late in the winter. On the 25th September this year I remarked that the leaves of the trees were very little tinted, and potato stems were still green. Wheat and all grains ripen and produce abundantly, as may be seen from the following extracts taken from the census returns:

	1861.	1871.	1881.		1861.	1871.	1881.
Wheat, bushels .....	10,912	136,099	154,589	Hay, tons .....	3,648	5,966	16,347
Oats, " .....	39,316	117,249	211,216	Butter, pounds .....	61,777	148,106	393,127
Barley, " .....	30,922	71,210	47,025	Head of live stock .....	18,746	44,772	59,797
Other Grains .....			108,183	Tobacco, pounds .....			67,437
Potatoes, bushels .....	101,332	156,996	237,238	Population .....	10,478	17,493	32,409

Potatoes, carrots and other vegetables yield abundantly and are of immense size. Wheat is of course the great test of the soil and climate of any agricultural country. Let us then compare its production at Lake St. John with the best districts of the Province, viz: The Eastern Townships, and we find that the census returns show in 1881:—

	Population.	Bush. Wheat.	Bush. per 1000 of pop.
Chicoutimi .....	32,409	154,589	4,800
Compton .....	19,581	34,181	1,800
Stanstead .....	15,556	37,727	2,400
Huntingdon .....	15,495	24,378	1,600

Comparison between the temperature, and snow-fall at Roberval and at other places in Canada, each winter season (from January to March inclusively) and each summer season (from July to September inclusively). The observations for Roberval extend from April 1888 to May 1890, inclusively; those for Moose Factory, James Bay, from the year 1877 to the year 1882. All these observations are taken exclusively from the official reports of the Meteorological Department at Toronto.

## STATISTICS OF CHURCHES.

From the census returns it is learned that there were 10,480 churches in Canada in April, 1891. This is an increase over 1881 of 1,828.

Divided among the denominations, the increase is distributed as follows: Baptists, 324; Roman Catholics, 301; Church of England, 415; Methodists, 322; Presbyterians, 411. All other denominations, 55.

Of the total number of churches, the Methodists have nearly 32 per cent., the Presbyterians and Roman Catholics 17 per cent. each, the Church of England 16 per cent., the Baptists 12 per cent., leaving 6 per cent. for "all others."

During the decade 1881-91, the Church of England appears to have been the most active in providing places of worship for the people, the Presbyterians coming next, the Baptists third, the Methodists fourth, and the Roman Catholics fifth.

Territorially considered, the Church of England has provided 337 additional churches in the provinces east of Manitoba, and 78 in Manitoba and the other western provinces. Methodists have provided 227 in the eastern and 95 in the western provinces; Presbyterians, 302 and 109 respectively; Roman Catholics, 257 and 44, and the Baptists 305 and 19 respectively.

### THE GOVERNMENT DEPARTMENTS.

#### THE TREASURY.

*Chancellor of the Exchequer*—Sir Michael Hicks-Beach.  
*First Lord of the Treasury*—Right Hon. A. J. Balfour.  
*Financial Secretary to the Treasury*—Right Hon. R. W. Hanbury.  
*Patronage Secretary to the Treasury*—Rt. Hon. Sir William Walrond.

*Junior Lords of the Treasury*—H. T. Anstruther, W. Hayes Fisher, and Lord Stanley.

The Treasury, of which the Chancellor of the Exchequer is the political head, provides the means for meeting the charges for the military, naval, and civil services. The Parliamentary heads of each of the spending and administrative departments of the Government are responsible for the estimates for their respective departments; but it is the duty of the Chancellor of the Exchequer, with the permanent Secretary to the Treasury, to check all these estimates before they are submitted to the House of Commons in Committee of Supply. The Cabinet becomes responsible for estimates which have been submitted to Parliament, and the

rejection or reduction of an estimate by the House of Commons is tantamount to a defeat of the Government. The duties which bring the Chancellor of the Exchequer most prominently before the country, are those in connection with the Budget. The first Lord of the Treasury is one of its Parliamentary heads; but the duties of the first Lord are little more than nominal, and the office is usually held by the Leader of the House of Commons. The Patronage Secretary to the Treasury is the official title of the Government whip in the House of Commons. The Junior Lords are his assistants. The Financial Secretary represents the Treasury in the House of Commons.

#### THE FOREIGN OFFICE.

*Secretary of State for Foreign Affairs*—Marquis of Salisbury.

*Under Secretary for Foreign Affairs*—Rt. Hon. W. St. John Brodrick.

All diplomatic intercourse is conducted by the Secretary of State for Foreign Affairs, who is invariably of the House of Lords. The office is next in rank and importance to that of Premier, and is sometimes held in conjunction with that office. Ambassadors and consuls receive their instructions from the Foreign Office. Foreign ambassadors in London have their audiences with the Chief Secretary, and he also conducts the negotiations for international treaties. The Under Secretary represents the Department in the House of Commons.

#### THE COLONIAL OFFICE.

*Secretary for the Colonies*—Right Hon. J. Chamberlain.  
*Under Secretary for the Colonies*—Earl of Selborne.

The Colonial Office dates back to 1660, when a Committee of the Privy Council was appointed for the Plantations, as the Colonies were then called. This Council was continued until 1768, when colonial affairs were placed under the control of a Secretary of State. When the United States secured their independence in 1783, the office of Colonial Secretary was abolished, and colonial affairs were managed from the Home Office. In 1794 the colonies were placed under the care of the Secretary of State for War. This arrangement was continued until 1854, when the War Department was reconstructed, and separate Secretaryships of State were established for War and for the Colonies. The colonies are divided into three classes. In the first are the Crown colonies, in which the Crown has entire control of legislation, and which are administered from the Colonial office. Hong Kong and Cyprus are examples of Crown Colonies. In the second class are the colonies with representative institutions, but not responsible government. In these the Crown has a veto on legislation and retains control of the public offices. Such colonies are Ceylon and Newfoundland. The third class includes the colonies having responsible government, such as Canada and the Australasian colonies.

#### THE INDIA OFFICE.

*Secretary for India*—Lord George Hamilton.

*Under Secretary for India*—Earl of Onslow.

The India Office in its present form dates from 1858, when an Act of Parliament was passed which directed that all the powers and duties hitherto exercised by the old East India Company, or the old Board of Control, should in future be exercised and performed by one of Her Majesty's Principal Secretaries of State. At the same time there was established a council to assist the Secretary for India. It consists of not less than ten members nominated by the Secretary. The majority of these members must be men who have served or resided ten years in India, and have not left India more than ten years previous to the date of their appointment. Members hold office for ten years, and under the direction of the Secretary for India, conduct all the business transacted in London in relation to the government of India.

#### THE HOME OFFICE.

*Home Secretary*—Rt. Hon. Sir Matthew White Ridley.

*Under Secretary*—Rt. Hon. Jesse Collings.

The Home Department has the control of the London police force, and also the oversight of the police forces in the counties and municipal boroughs; and generally speaking the Department is responsible for the internal peace of the country. Prisons, convict establishments,

criminal lunatic asylums, executions, and all matters connected with the post-judicial execution of the criminal law, come within the purview of the Home Office. It is also responsible for the administration of the factory code, and the laws relating to mining. The Home Secretary is always a lawyer, and is always of the House of Commons.

#### THE WAR OFFICE.

*Secretary for War*—Marquis of Lansdowne.  
*Under Secretary for War*—Mr. George Wyndham.  
*Financial Secretary for the War Office*—Powell Williams.

The Secretary for War has control of the army at home and abroad, and is responsible for its efficiency to the Sovereign and to Parliament. He directs all movements of troops, and all appointments made by the Commander-in-Chief are subject to his approval.

#### THE ADMIRALTY.

*First Lord of the Admiralty*—Rt. Hon. J. G. Goschen.  
*Secretary to the Admiralty*—W. E. G. Macartney.  
*Civil Lord of the Admiralty*—Austin Chamberlain.

The Admiralty, which has charge of the Royal Navy, is administered by Lords Commissioners. The head of the Department, who is always of the Cabinet, is known as the First Lord of the Admiralty. The other Lords Commissioners or Junior Lords are Admirals without seats in Parliament, and are respectively at the heads of the departments into which the Admiralty is divided. The foreign movements of ships are at the instance of the Cabinet, the Foreign Office, and the Colonial Office, and it is from these authorities that the Lords of the Admiralty receive their orders. In time of war the orders go from the Cabinet. At other times the movements of vessels are at the instance of the Foreign Office and the Colonial Office.

#### THE COUNCIL.

*Lord President of the Council*—Duke of Devonshire.  
*Vice-President of the Council*—Sir John E. Gorst.

The principal duties of this department are now connected with education. The Committee of Council for Education or the Education Department, as it is popularly called, exercises supervision over the various departments of state aided education, and distributes the grants for education annually made by Parliament. These grants date from 1833; and in 1839 the Committee of Council for Education was established. The Vice-President is always of the House of Commons, and he is practically the Minister of Education. From the 1st of April, 1900, the Committee of Council for Education will come to an end, and the powers it has exercised since 1839, enormously increased, however, since 1870, will be transferred to a new State Department which is to be known as the Board of Education. The new Board is to be created under an Act of Parliament passed in the ordinary session of 1899. It will consist of a President and the Lord President of the Council, unless he is appointed President of the Board; the Principal Secretaries of State (these are the Secretaries for Foreign Affairs, for Colonial Affairs, for the Home Department, for War, and for India), the First Commissioner of the Treasury, and the Chancellor of the Exchequer. The present occupant of the office of Vice-President of the Committee of Council will also be of the new Board; but on the next vacancy the office of Vice-President is to be abolished. When the new Board is created there will for the first time be a direct and general connection between the Government and secondary schools in England. Heretofore the Committee of Council has been concerned chiefly with elementary education, except as regards the Science and Art Department. In the future, inspectors representing the Board of Education may visit the secondary schools, and a connection is established between these schools and the municipal councils. With the new Board of Education there will also be created a Consultative Committee, which is to keep a register of teachers, and advise the Board on any matters referred to it. Universities and other bodies concerned in education are to be represented on the Consultative Committee.

#### THE LOCAL GOVERNMENT BOARD.

*President of the Local Government Board*—Rt. Hon. Henry Chaplin.

*Parliamentary Secretary to the Local Government Board*—T. W. Russell.

This Department dates from the reform of the Poor Law in 1834. From 1834 to 1847 its chief was not of the Ministry nor in Parliament. Up to 1871 it was occupied exclusively with the administration of the Poor Law. In 1871 it took over from the Home Department numerous duties in connection with municipal government and public health, and its title was changed to the Local Government Board.

#### THE BOARD OF TRADE.

*President of the Board of Trade*—Rt. Hon. C. T. Ritchie.  
*Parliamentary Secretary to the Board of Trade*—Earl of Dudley.

The Board of Trade is in charge of the administration of the laws relating to limited liability companies, to bankruptcy; and it also has the oversight of all matters connected with the mercantile marine, harbours, canals, railways, and street car lines. The Labour Bureau is a department of the Board of Trade. Its work is confined to the collection and compilation of information of all kinds relating to labour. The Board of Trade also collects information relating to trade and commerce abroad.

#### THE POST OFFICE.

*Postmaster-General*—Duke of Norfolk.

The Post Office in England controls the telegraphs, as well as the home and foreign mail departments. The telegraphs have been a Government undertaking since 1869. The Post Office savings banks, of which there are over 12,000, receive sums up to a maximum of £50 in one year, or £200 in all. They also do a life insurance, and an annuity business on lines intended to meet the needs and convenience of the working classes.

#### THE BOARD OF AGRICULTURE.

*Pres. of the Board of Agriculture*—Rt. Hon. W. H. Long.  
The principal duties of this Department are the administration of the laws for preventing and stamping out cattle disease. It supervises the landing of live cattle imported from abroad.

#### OFFICE OF PUBLIC WORKS AND BUILDINGS.

*First Commissioner of Works*—Rt. Hon. A. Akers-Douglas.

This Department has the custody and supervision of all Royal Palaces and parks, and also of buildings such as the Houses of Parliament, the Law Courts, and the public offices at Whitehall.

#### DEPARTMENT OF THE LORD CHAMBERLAIN.

*Lord Chamberlain*—Lord Hopetown.  
*Vice-Chamberlain of the Household*—Hon. Alwyn Fellew.

*Comptroller of the Household*—Viscount Valentia.

The Lord Chamberlain's Department has the general supervision of the Royal Household "above stairs," and also various duties towards the Sovereign and the Court. It is through the Lord Chamberlain that presentations at Court are arranged. In cities where there are royal palaces, he acts as the licenser of theatres. The Examiner of Plays is in the Department of the Lord Chamberlain. His sanction is necessary for the production of a play in any theatre in England at which a charge for admission is made.

#### IRISH AND SCOTCH DEPARTMENTS.

*Chief Secretary for Ireland*—Rt. Hon. G. Balfour.  
*Secretary for Scotland*—Lord Balfour of Burleigh.

These Departments for Ireland and Scotland respectively exercise functions very similar to those of the Home Department in England.

#### MINISTERIAL SALARIES.

The salaries received by the members of the Cabinet range from £2,000 to £6,000. The Lord Chancellor has also £4,000 as Speaker of the House of Lords. The political secretaryships and the under secretaryships of departments have attached to them salaries of £1,500 to £2,000 a year. Pensions are granted to such of the holders of Ministerial offices as after their retirement become too straightened in means to maintain themselves in a social position in keeping with the official rank they have held. These pensions are granted irrespective of length of official service. They range in amount from £1,000 to £1,200. At the present time no pensions of this kind are being paid.

In an official memorandum which accompanied the Army Estimates, it was pointed out that during 1898-9 there had been an increase of nearly 10,000 men, and that this increase seemed to point to the rapid and easy completion of the augmentation begun in the official year 1897-8, and to be completed in the year 1900-1. Mr. George Wyndham, the Under Secretary for War, supplemented the statements in the memorandum when the House of Commons was about to go into Committee of Supply on the Army Estimates on the 2nd of March, and in particular dealt with the activity in recruiting for the army in 1898-9. "The total number of British recruits last year," he said, "was 38,416, as against 27,809 in 1896, and the net gain to the army last year, including reservists and deserters rejoining, was 9,980 men. There was no sign of the flood abating. January had been a bumper month. If they excluded 1870, when, probably owing to the Franco-German war, recruits flocked into the army on the chance of operations on a large scale, last January was the highest month of recruiting of which they had any record at all. In that month 4,854 recruits joined, or, including deserters rejoining and reservists, 5,243, a gain for one month of 1,284. The number of recruits who were accepted did not, however, give by any means the full measure of the country's response to their demand. He was sorry to say that of all the recruits who presented themselves 35 per cent. were rejected on medical grounds. He thought that was rather an alarming figure, and might

give them cause for apprehension in respect of the welfare of the army and of the people. A great many recruits were rejected on account of bad teeth, and a larger number because they lacked general development."

"Our army," Mr. Wyndham continued, "was numerically stronger than it had been at any time since 1860. The life of the soldier was brighter, and the opportunities for training our units in the formation and under the conditions which would prevail in a great war were larger. Thanks to the really splendid devotion of all ranks in our regular, auxiliary and colonial forces, he dared to believe that our small voluntary army was ready to solve the double and difficult problem of defending our shores and of keeping the Queen's peace throughout her wide dominions."

The figures given in the table above for the year 1898-9 represent the strength expected by the War Office at the end of the military year—that is, on the 31st of March, 1899, and they do not include the army reserve and the militia. On the 1st of January, 1899, the total strength of all the British forces was 408,924, as compared with 408,900 in 1898, and at that time the Regular Army was 9,018 stronger than on the 1st of January, 1898. The Army vote for 1899-1900 was £20,617,200, as compared with £19,220,500 for the year 1898-99. During 1898-99 and 1899-1900 native regiments were being raised in West Africa, British Central Africa and in China. These forces are to be used in garrisoning some of the foreign stations, and when they have all been raised the net increase to the British army, including the additions to the forces recruited in Great Britain, will be nearly 30,000.

During the parliamentary session of 1898 an Act was passed under which special reserve pay, at the rate of one shilling a day, was provided for reserve men who during the first year of their services with the reserves would hold themselves liable to be called back to the colours in the event of minor wars. Up to the 1st of February, 1899, 1,700 men had accepted reserve pay under these new conditions, and when the Army Estimates Memorandum was issued on the 21st of February, the War Office was sanguine that it would soon have 5,000 men—the full strength of this special reserve force—enrolled in it. "It will at any moment," reads the paragraph in the Memorandum dealing with this new departure, "be possible to recall these men to the colours for the purpose of completing a small expeditionary force, and without having resort to the inconvenient procedure which must, under the existing law, be followed, when the ordinary reserve is called out in time of great emergency."

When Mr. Wyndham moved the House of Commons into Committee on the Army Votes, he reminded the House that "the British Army was raised under certain limitations, these being that the army must be a voluntary one, and must not be extravagantly dear." "The purposes," he continued, "were fourfold. We

were bound to provide a British army for India, which, since India paid, must be kept up to the standard of efficiency contracted for. In the second place we were bound to provide garrisons for some of our colonies and some foreign stations we happened to occupy, and for our coaling stations and naval bases. Thirdly, we must have a small force at command for small wars. And, lastly, we must be ready against the contingency of a great war, involving risk of invasion."

At the beginning of 1899 the army reserve numbered 82,804 men, as compared with 78,798 on the 1st of January, 1898. These are soldiers who have served with the colours for seven years, and who for five years after leaving their regiments hold themselves in readiness to rejoin in event of war. In future years, in accordance with a change made by Act of Parliament in 1898, there will be of the reserve force men who have served three years with the colours and who for nine years afterwards will be liable to be recalled to their regiments. As regards the militia and the volunteers, there were enrolled at the beginning of 1899 103,647 militiamen, a slightly smaller number than in 1898; while the number of volunteers when the year opened was 263,963, an increase of 870 on the strength of the volunteer establishment as compared with 1898.

The British forces now compose what is described as a short service army. This term distinguishes it from the army of a generation ago. In the army, as it existed prior to 1873, men enlisted for 21 years, and at the end of that time were discharged with a pension. In 1873 this long service system came to an end, and in its place there was established what is now known as the short service plan. Under this men enlist for 12 years. Most of them spend seven years with their regiments, and are then passed into the army reserve for the remaining five years of their term. This passing of men from the colours to the reserve makes it necessary to recruit about 35,000 new men every year. The short service system is often the subject of much criticism; but it has always to be remembered, as Lord Wolseley, the Commander-in-Chief, told a meeting at York in 1897, that the short service system was adopted in 1873 simply because men would no longer enlist for twenty-one years.

About the time the short service system was established, what is known as the territorial system also came into being. Formerly infantry regiments were known by numbers, and generally in addition by titles which belonged characteristically to the regiments, or which commemorated some event or incident of outstanding importance in regimental history. Nowadays and since the early seventies, infantry regiments are known by the names of counties. When the re-arrangement took place regiments were assigned by name to this or that county, and their depots were then established in the neighbourhoods from which the regiments then took their names.

There are now 69 of these depots, and English, Welsh, Scotch and Irish county names are borne by the various regiments. The idea at the bottom of the territorial plan was to give regiments territorial connections, to make them locally popular, and as far as was practicable to mass soldiers hailing from

the same part of the country into regiments officially connected with the counties from which the men came. To this end, since the seventies, it has been the practice to recruit regiments from the parts of the country in which their depots are situated. No matter where the main body of the regiment may be stationed, at Aldershot, at the Curragh, in India, or in Malta, its depot remains in the neighbourhood to which the regiment is titularly attached. A staff of commissioned and non-commissioned officers of the regiment is stationed at the depot. There the recruits are received; they are put through a long and hard course of preliminary training, and at the end of this course are drafted from the depot to the colours.

Recruiting officers are permanently stationed in most of the large English towns and cities, and frequently these officers go on special duty into the country villages. London is, however, the great recruiting ground of the army.

A man who offers for the army may enlist for 12 years, the whole of which period is spent with the colours, or he may enlist for part of the term with the colours and the remainder of it with the reserve. The 12 year enlistment plan applies to the regiment of household cavalry, to the corps of ordnance artificers, to the band of the Royal Military College, the corps of army schoolmasters, the corps of armourers, bandsmen in the foot guards, royal engineers who enlist for appointment as military machinists, and men enlisted for appointment as sergeant master tailors. Less than 2,000 men on an annual average enlist under this 12 year plan. All boys between 14 and 16, who are accepted to be trained as musicians, trumpeters, drummers, buglers, or tailors, must join for 12 years. The shorter service system, on the other hand, applies to cavalry of the line, royal artillery, infantry of the line, ordnance store corps, who serve seven years in the army and five in the reserve; the army service corps, who serve three years in the army and nine in the reserve; the foot guards and the medical staff corps, who serve seven years in the army and five in the reserve; royal engineers who serve seven years in the army and five in the reserve; and the post office corps and royal engineers of the telegraph and railway reserve, who serve three years in the army and three in the reserve.

The age and physical conditions governing acceptance for the various services in the army are as follows:

CHEST MEASUREMENT AND WEIGHT.

The minimum chest measurement is fixed at 33 in., and the minimum weight at 115 lbs.; but the chest measurement and the weight of each recruit depend upon his height and the arm of the service he wishes to join, and are left to the discretion of the approving medical officers.

It is still possible under the short service plan for soldiers to re-enlist and to serve for 21 years. After this length of service has been put in, soldiers become entitled to pensions. For privates and gunners, the pension is from 8d to 1s 6d per day; for non-commissioned officers, 1s 3d to 3s 6d per day; for warrant officers, 3s to 5s per day. Soldiers discharged on account of wounds or injuries received in action, or for sickness incurred in the performance of their military duty, are entitled to a pension varying with the extent of the disability and with the length of service.

The daily rates of pay of the several ranks in the different arms of the service are as follows:

A soldier who has been in the army for not more than three months may claim his discharge on payment of £10. After three months the sum is £13, and in this case the permission of the commanding officer is necessary. Discharges by purchase, however, are allowed to the fullest extent consistent with the requirements of the service, and at ordinary times a soldier finds no difficulty in purchasing his discharge.

Until 1871, commissions in the army were bought and sold. Commissioned officers nowadays are drawn from the military academies at Woolwich and Sandhurst;

and admission to these schools is obtained only after stiff examinations have been passed. In the army, promotion is by seniority. The pay of a lieutenant is 5s 4d a day; of a captain, 11s 7d a day; of a major, 16s a day; and of a lieutenant-colonel, 21s a day. There are some other allowances; but the pay and allowances of officers are not sufficient to maintain them in the style which, according to the social traditions of most regiments, officers are expected to keep up. Comparatively few of them are dependent entirely on their army pay.

What are described in England as the auxiliary forces comprise the militia, the volunteers, and the yeomanry cavalry. The militia is the oldest of these services. It is older than the standing army, and until the second or third decade of the nineteenth century all men not suffering from bodily infirmities due to age or other causes, and not specially exempted, were liable to be drawn by ballot for the militia. They could serve either personally or by substitute. Ballots were taken in counties until the twenties to make up the quota of militia each county was compelled by the law of 1760 to equip and maintain. These old militia laws have never been repealed. Their operation is suspended every year by Act of Parliament, and if necessary they could at any time be put in operation again. There is, however, no great lack of volunteers for the militia, and the force to-day numbers about 104,000 officers and men. In 1898, the last year for which official figures are available, 38,246 recruits were accepted for the militia.

The militia is a local force, each regiment being raised in the division of the county in which the regiment has its head-quarters. It is called out each year for a period of training which cannot exceed 56 days. The men enlist for six years, and when under training their pay, their discipline, and the general conditions of their services are very similar to the conditions in the regular army. Until as late as 1871 the militia regiments in each county were nominally under the command of the lord lieutenant of the county; and nowadays, although there are examinations for officers' commissions in the militia, in issuing these commissions the War Department gives preference to local landed gentlemen who are recommended or nominated by the lords lieutenants, the Queen's representatives in the counties. In connection with the militia there is a reserve consisting of men who have accepted extra bounties to hold themselves in readiness to serve abroad

if need be in the regular army. The number of these men is about 30,000.

The yeomanry cavalry is a volunteer force existing in England and Scotland, composed chiefly of tenant farmers. Usually a troop of yeomanry is organized by some large landowner, who also commands the troop. Many landlords, even those who themselves are not of the yeomanry, make it a condition in their farm leases that their tenants shall be of the yeomanry. There are now 38 of these yeomanry regiments of a total strength of about 10,000. In Scotland the yeomanry force numbers less than one thousand. In Ireland there is no yeomanry force, nor has Ireland any volunteers.

The volunteer force in 1899 numbered in round figures 263,900 men.

Members of volunteer corps are enrolled for three years, and are compelled to put in sufficient time at the drill hall, on the parade ground, and at the rifle ranges, to make themselves efficient, and to pass the annual inspection before an officer from the War Department. Non-efficient volunteers can be sued in the courts for any loss falling upon their regiment in consequence of their failure to earn the Government grant. Each man who makes himself efficient earns for his corps a Government grant of about £3 8s. This forms the Government contribution to the cost of the corps. It is not large enough to meet all expenses. It usually defrays the cost of clothing, accoutrements, ammunition, and establishment charges. The balance is made up by the officers and from local non-military friends of the corps. The officers are drawn from the ranks of the professional and commercial classes. There is no pay to the holder of a volunteer officer's commission. On the contrary, he incurs considerable expense in connection with his office, a fact which accounts for vacancies in many of the volunteer corps.

H.M.S. "CENTURION."

## THE BRITISH NAVY IN 1899-1900.

The great event in connection with the British Navy in 1899 was the laying down of the keels for seven battleships and eight first-class cruisers, vessels which were authorized by Parliament in 1898 under what was known as the original programme and the supplementary programme. The original programme for extensions to the Navy was submitted to the House of Commons on March 10, 1898. The supplementary programme was adopted in July, 1898, after Russia had decided to spend nearly £9,000,000 on new vessels, two of which, a battleship and a cruiser, were in building at Cramp's yard at Philadelphia during 1899. "The Government held," said Mr. Goschen, the First Lord of the Admiralty, when he submitted the Naval estimates for 1899-1900 to the House of Commons on March 9th, 1899, "and the country supported them in their view, that an effort like that must be met by some corresponding effort on our part, and, consequently, regretting as much as any one could the increased burden thus put on our country, we were nevertheless compelled at that date to lay down four battleships and four cruisers."

"The new battleships," continued Mr. Goschen, in describing the vessels which were thus authorized in 1898 and begun in 1899, "do not differ greatly from the ships which have already been designed. We propose to name the four classes the Duncan, the Exmouth, the Cornwallis, and the Russell, four great historical naval names. The following are the measurements of these ships: Length 405 feet, breadth 75 feet, mean draught 26 feet, displacement 14,000 tons, indicated horse-power

18,000. Their chief armament will be four 12-in. breech loading guns in barbettes, twelve 6-in. quick-firing guns, and twelve 12-pounders. The barbettes of the 12-in. guns will have 11-in. armour. The speed will be 19 knots, which exceeds that of the present battleships of the Royal Navy. With reference to the cruisers, of the four on the original programme two were of the Cressy class and two were of what we call the armoured-power class. These we propose to name the Drake class. The length of this type is 500 feet, breadth 71 feet, mean draught 26 feet, displacement 14,000 tons, indicated horse-power 30,000. The armament is two 9.2-in. guns, with armoured shields; six 6-in. quick-firing guns, with casemates; and fourteen 12-pounder quick-firing guns. The guns will be of the most powerful and latest types, and the bows of the new ships will be more strongly defended."

"These ships," added Mr. Goschen, "will be the most powerful ships afloat in any navy in the world. I do not wish to make any special comparison with foreign ships. We have been driven to construct these ships after careful review of the new designs of the various Powers, and we hope that we shall have four vessels stronger than any now building by any country."

In addition to these seven battleships and eight cruisers—cruisers which are to have a speed of 23 knots—work was begun in 1899 on two cruisers of a smaller class—so that the year just ended witnessed the commencement of shipyard work on seventeen new vessels for the Royal Navy.

H.M.S. "MARS."

"In design," said Mr. Goschen in describing these smaller cruisers to the House of Commons, "Sir William White, the chief constructor, has endeavoured to solve the problem of armoured cruisers of a very high rate of speed and of moderate dimensions. The designs have also been made out with careful consideration for the type of vessel the new ships may have to meet. Their length is 400 feet, breadth 66 feet, mean draught  $24\frac{1}{2}$  feet, displacement 9,800 tons, speed in natural draught 23 knots, and indicated horse-power 22,000. They are to have 14 6-inch quick-firing guns, 4 in turrets and 10 in casemates, and 10 12-pounder quick-firing guns. The 6-inch guns will be of the latest type. In laying down these ships we have been simply following the plan I have indicated throughout of not exceeding the standard which we consider we ought to maintain at all events of meeting what has been done by other Powers."

Seven new ships were authorized by the House of Commons in 1899. Two of these are to be battleships, two armoured cruisers of 9,800 tons displacement, and three cruisers of a smaller class; so that, including the seventeen new ships now in hand and the seven additional ones sanctioned by the House of Commons, work will be proceeding on twenty-four new British war vessels—all sanctioned by the House of Commons in 1898 and 1899—before next year's CANADIAN ALMANAC is published.

The House of Commons in 1899 also voted money for an increase of 4,250 men and boys—an increase which in the year 1899-1900 will bring the strength of the navy up to 110,640, including 6,500 boys under training. The total vote for the naval services for the year was £26,594,000, an increase of £2,816,100 on the vote for 1898-99.

The accompanying table shows in detail how this sum of £26,594,000 is to be expended, and on which departments of the naval services the additional £2,816,190 is to be disbursed.

In justifying these increases, and particularly those under the heading of contract work, which has reference to the ships in building in private shipyards, Mr. Goschen cited the shipbuilding now going on in other countries, including the United States—a country which he named as now one of the six great naval powers. In these countries he had ascertained that 685,000 tons of war tonnage was in building in 1899, and that 225,000 additional tons were projected. "Looking at the shipbuilding all over the world, and looking at our position, is it," he asked, "fair to say that the increase in the estimates

which we are compelled to make is the result of the aggressive policy of any particular country? Are these estimates framed in any aggressive spirit? Does the House not see that they are forced on us by the action of other countries? We have not taken the lead in any excessive shipbuilding, we have not endeavoured to raise the standard of the number of ships of other Powers; we have gone steadily forward, keeping that standard in view."

The extraordinary development of the British Navy during the last quarter of a century, was well told in a reminiscence to which Mr. Goschen treated the House of Commons on March 10th, 1898, when as First Lord of the Admiralty in the Salisbury Government, he introduced the Navy Estimates for 1898-99. In the Gladstone Government of 1868-74, Mr. Goschen held the same office that he now holds in the existing Unionist Government. "To show the enormous advance which has been made," he said in introducing the Estimates for 1898-99, "let me give one glimpse into the rather distant past. In 1872 I stood at this table as First Lord of the Admiralty, and I proposed Estimates of which the total was £9,500,000. To-day I ask for £23,000,000. Then I asked for 61,000 men and boys. To-day I ask for 106,000 men and boys. Then I asked for money to commission 124 fighting ships. To-day I ask for money to commission 258 fighting ships. Let me say," continued Mr. Goschen, "how matters stood only 10 years ago. Then we had 139 fighting ships in commission, and 24,800 men. To-day we have 238 fighting ships in commission, and 50,000 men—that is to say, we have in commission ships holding twice the number of crews which they held only ten years ago."

The policy on which the Government is proceeding in making these vast additions of the last four years—the policy to which Mr. Goschen briefly adverted in his speech of March 9th, 1899, from which some extracts have been given, was explained in greater detail when Mr. Goschen submitted the supplementary programme of 1898 to the House of Commons in July of that year. "It seems," he then said, "to be considered that we act on no system in regard to the numbers of ships of different classes we construct, and that we have

no strategic plans to put in force if war should break out. I do not know on what fact these views are founded except the fact that we do not talk about our schemes or about the system we adopt. Standing here as a Minister, I can assure the House that the distribution of our cruisers, for instance, has been carefully considered as regards every trade route and every route by which our food supplies arrive. There is no haphazard in regard to the number of cruisers or the class of cruisers we build. We must modify our plans occasionally as we see fresh elements enter into the situation, but there is a system, and we act on that system. Every day new features enter into strategic considerations. The balance of power varies and new fleets are created. The fleet of Japan has become a new factor in the strategic considerations of the world generally, as has the development now being witnessed in Germany. All

and in Australia the stations are on King George's Sound and on Thursday Island. Nearly all the stations are on islands, and are well defended. Gibraltar and Malta are regarded by naval experts as the only coaling stations liable to serious attack, and they are so open to attack because both of them are within easy distance of European ports. Both of them, however, have exceptionally powerful defences.

There have been large increases in recent years in the forces for manning the British ships of war. The increase for 1897-98 was 6,300; for 1898-99 it was 6,340; and for 1899-1900, 4,250. The last increase brought the total number of officers and men up to 110,640. In 1897, when asking for the increase of 6,300 men, Mr. Goschen assured the House of Commons that it was not the intention of the Admiralty to carry the maximum strength of the active naval force beyond 110,000 men.

H.M.S. "GRAFTON."

such things must necessarily occasionally modify our action, but at the same time we do not wish merely to say that we must ask for a few more ships in order to satisfy the public demand without knowing precisely why we ask for them or what we have in view in making our demands."

In respect to coaling stations, as in respect to the size of the fleet, Great Britain is admittedly without a rival. On the trade route from England to the East, by way of the Suez Canal, Great Britain has coaling stations at Gibraltar, Malta, Aden, Ceylon, Singapore, Wei-hai-wei and Hong Kong. On the older route to the East, by way of the Cape, there are British coaling stations at Sierra Leone, St. Helena, Capetown, Mauritius. In the West Indies the coaling stations are at Port Castries on the Island of St. Lucia, and at Port Royal, Jamaica. Bermuda and Halifax are the coaling stations in the North Atlantic. Esquimalt is the station for the North Pacific ;

Ships which come into service after the maximum stated by Mr. Goschen has been reached, are, according to present intentions, to take the place of reserves, or replace older vessels which may have become obsolete.

Like the English Army, the Navy is manned by volunteers, and there is no compulsory service in connection with it. A large proportion of the seamen enter the service as boys. They are accepted for training ships up to the age of eighteen, and when a boy reaches the age of eighteen his term of actual service in the Navy begins, and must last for at least twelve years. To be accepted for a training ship, a boy between the age of fifteen and fifteen and a half must be five feet and half an inch in height, with a chest measurement of thirty and a half inches. The height measurement is made without shoes. If accepted when between fifteen and a half and sixteen, a boy must be five feet and one and a half inches in height, and thirty-one inches round the

TORPEDO BOAT DESTROYER.

chest. Between sixteen and sixteen and a half, a boy must be five feet two and a half inches in height, and thirty-one and a half inches round the chest.

The pay of seamen ranges from one shilling and three pence a day for ordinary seamen, to nine shillings a day for chief gunners and boatswains. Men who have put in nine years service in the Navy can pass into the Coast Guard Service. Those who stay in the Navy for a period of twenty-two years become entitled to pensions. The amount of pension is from eighteen pounds a year, upwards, according to the rating on retiring from the service. The average pension for men of all ranks is thirty-one pounds a year.

There are now about 27,500 men in the Naval Reserve. The seamen of this force receive about twelve pounds a year from the Government, and put in thirty days a year of training. The days can be put in, one or two or three at a time, at the convenience of the seamen; and usually they are put in between voyages or trips, as there is a Naval Reserve ship at every important port in Great Britain. Within the last year or so the Admiralty has sought to make the Naval Reserve more attractive, and, in particular, it is now offering special inducements to men

between 19 and 30 years of age engaged in the coasting or fishing trade, or employed on yachts. These men on first joining the reserve undergo a preliminary training which lasts for six months. Naval pensioners draw their pay subject to rejoining the service in case of need; and at the Admiralty these pensioners, to quote Mr. Goschen's appreciation of them, are regarded as of "incalculable value in stiffening a newly-drilled crew." As with many seamen in the Royal Navy, service for pension begins at 18 years of age, there is always a large proportion of pensioners who are in middle life.

For the work of the British Navy the world is divided out into nine stations. "Except for the small squadron France keeps off Newfoundland, and for the fleets of the States of the American Continents, we alone," said Mr. Goschen, in describing the naval stations in his speech of March 10th, 1898, "have squadrons where other nations have isolated ships. When we have to reinforce our foreign squadrons we send out fully-manned and fully-commissioned men-of-war, so that at all times, besides our squadrons, we have traversing the seas a certain number of ships in commission, ready for war, if war should occur, at any moment."

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to Her Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the five regular sittings being the first Tuesday in March and September, and the second Tuesday in January, May and November; due notice of the time of holding of further sittings being given. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

### High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the Queen's Revenue (including the condemnation of contraband or smuggled goods) as may be done by Her Majesty's Superior Courts of Law in England, and also the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the

Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held on the first Monday of each month (except vacation) to dispose of such matters as may properly be brought before a Divisional Court.

**LAW CIRCUITS.—Sittings for Hearing of Actions.**—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of Her Majesty's Counsel learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

**WEEKLY SITTINGS.**—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Mondays and Fridays. Court business on Tuesdays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

**CHAMBERS.**—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

**LONG VACATION** extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

**HEIR AND DEVISEE COURT.**—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to land in Ontario, for which no patent has issued from the Crown in favor of the proper claimants, whether as heirs, devisees, or assignees. Sittings at Toronto, first Monday in January and July in each year. *Judges*—The Judges of the Superior Court (*ex-officio*), others appointed by commission.

**COURTS FOR THE TRIAL OF CONTROVERTED ELECTIONS.**—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Supreme Court of Judicature meet annually on or before the third day of Michaelmas sittings and severally elect, by a majority of votes, a Judge from their respective Courts or Division to be placed on the rota for the trial of election petitions during the ensuing year. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed \$200; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to \$600; and to all bail bonds and recognizances of bail given in the County Court, to any amount; in actions of contract to any amount if parties agree to try same in County Court, for recovery of or trespass to land where land does not exceed \$200 in value, partnership actions where capital was not over \$1,000, for legacies not exceeding \$200, where estate is \$1,000 or under, to enforce mortgages or liens, or for redemption, or for equitable relief where claim does not exceed \$200, to establish claim on insolvent estate where claim does not exceed \$400; but not to cases involving the title to lands of greater value than \$200, validity of devises or bequests exceeding \$200, nor where estate exceeds \$1,000, or actions for libel, slander, crim. con., or seduction. An appeal lies to a Divisional Court.

**COUNTY COURT SITTINGS AND COURT OF GENERAL SESSIONS.**—The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county, for the trial of issues of fact, semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held four times, commencing on the first Tuesday in Decem-

ber and March, and the second Tuesday in May and September, the latter Courts for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction, and (except in the County of York) a sitting for the trial of issues without a jury shall be held in each county on the first Tuesday in April and October in each year. The Judge may also, in his discretion, hold additional sittings at such times as may be deemed expedient to expedite business, but only for the trial of issues of fact without a jury.

**COUNTY JUDGE'S CRIMINAL COURT.**—Persons committed to jail for trial, on charge of being guilty of any offence for which they may be tried at a Court of General Sessions may, with their own consent, and subject to the provisions of the Act in that behalf, be forthwith tried by the Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by said Judge; and the Judge sitting on any such trial for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

**COUNTY COURT TERMS.**—The several County Courts in Ontario hold four sittings in each year, commencing respectively on the second Monday in the month of January, and the first Monday in the months of April, July, and October, except the County of York, which commences on the first Monday in April, and the second Monday in January, June and October, and ending on the Saturday of the same week, unless extended by order of the Judge.

**SURROGATE COURTS.**—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting and revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effect in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Chancery Division. The County Judges are also Judges of the Surrogate Courts.

**DIVISION COURTS** are held for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over \$100 and under \$200 and the original amount was ascertained by the signature of the defendant, and to \$100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed \$400; injuries or torts to personal chattels amounting to \$60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. # THE LAW OF INTESTATES ESTATES.

## DESCENT AND DISTRIBUTION OF PROPERTY.

As to all persons who died before the first day of January, 1852, the rules of descent are substantially the same as in England at that date.

Real estate of persons who died intestate (*i.e.*, who have left no will) after that date and prior to the first day of July, 1886, descends first to lineal descendants and those claiming by or under them *per stirpes*, second to father, third to mother, and fourth to collateral relatives, subject to certain rules and regulations prescribed in the statute.

The surplus personal estate of intestates who died prior to the first day of July, 1886, is, after the expiration of one full year from the death of the intestate, to be distributed in the following manner: One-third shall go to the widow of the intestate, and the residue in equal proportions to his children, or if dead, to their lineal descendants; if there are no children or legal representatives subsisting, then where the net value of the real and personal estate does not exceed \$1,000, same belongs absolutely to the widow, and as to any excess over and above said amount after payments of debts, etc., the widow takes a moiety, and the other moiety goes to the next of kindred, in equal degree, and their representatives; if no widow, all to children; if neither widow nor children, all to next of kin, in equal degree, and their representatives. But no representation is admitted among collaterals further than children of intestate's brothers and sisters.

All real and personal property of persons dying on or after the 1st day of July, 1886, devolves upon and becomes vested in the legal personal representatives for the period of a year (which may be extended in a prescribed manner) subject to the payment of debts and to the effectual dispositions of deceased. The real and personal property of a married woman, in respect of which she has died intestate, shall be distributed as follows: One-third to her husband, if she leaves issue, and one-half if she leaves none, and subject thereto, shall go as if her husband had predeceased her. The realty and personalty comprised in a residuary devise or bequest is (unless the will otherwise directs) applicable ratably according to their respective value to the payment of the debts.

TABLE SHOWING THE DISTRIBUTION OF PERSONAL PROPERTY OF INTESTATES IN ONTARIO SINCE JULY 1ST, 1886.

<p><i>If the Intestate die leaving:</i></p> <p>Wife and child or children.....</p> <p>Wife only .....</p> <p>No wife or child .....</p> <p>Child, children or their representatives .....</p> <p>Children by two wives. If no child, children or representatives .....</p> <p>Child or grandchild by deceased child.....</p>	<p><i>His representatives take in the following proportions:</i></p> <p>One-third to wife, rest to child or children; if children dead, then to their representatives (that is, their lineal descendants), except such child or children (not heirs-at-law) who had estate by settlement of intestate or were advanced by him in his lifetime equal to the other shares.</p> <p>Net value of estate not exceeding \$1,000 to wife absolutely. Excess over \$1,000, half to wife; and half to next of kin, in equal degree to intestate, or their legal representatives, or if no next of kin, to the Crown.</p> <p>All to the next of kin, and to their legal representatives.</p> <p>All to him, her or them.</p> <p>Equally to all.</p> <p>All to next of kin, in equal degree to intestate.</p> <p>Half to child, half to grandchild, who takes by representation.</p>

THE ONTARIO SUCCESSION DUTY ACT.

The Succession Duty Act, Revised Statutes of Ontario, 1897, Chapter 24, applies to the estates of persons dying on or after 1st July, 1892, and applies to real and personal property of every description except:

(1) Where the value of the estate after payment of all debts and expenses of administration does not exceed \$10,000.

(2) To property given for religious, charitable or educational purposes.

(3) Property passing to or for the use of father, mother, husband, wife, child, grandchild, daughter-in-law or son-in-law of the deceased where the aggregate value of the property of the deceased does not exceed \$100,000.

The Act applies:

(a) To all property passing either by Will or intestacy within Ontario, whether the deceased was domiciled in Ontario at the time of his death or elsewhere.

(b) To all said property which shall be voluntarily transferred by deed, sale or gift made in contemplation of the death of the grantor or intended to take effect after such death to any person in trust or otherwise.

(c) To any property taken as a *donatio mortis causa* made by any person dying on or after 7th April, 1896, or taken under the disposition made by any person so dying purporting to operate as an immediate gift whether by way of transfer, delivery, declaration of trust or otherwise which shall not have been *bona fide* made twelve months before the death of the deceased.

(d) To any property which the person dying on or after 7th April, 1896, having been absolutely entitled thereto has caused to be transferred or vested in himself and any other person jointly so that the beneficial interest therein, or in some part thereof, passes or accrues by survivorship on his death to such other person.

(e) To property passing under settlement, as to which see the Act.

(f) To the beneficial interest arising by survivorship or otherwise (if any) from Annuities.

Where the aggregate value of the property of deceased exceeds \$100,000 and passes in whole or in part to or for the benefit of the father, mother, husband, wife, child, grandchild or other lineal descendant or daughter-in-law or son-in-law of the deceased, the same shall be subject to a duty of \$2 50 for every \$100 of the value.

Where the aggregate value of said property exceeds \$200,000 the whole shall be subject to a duty of \$5 for every \$100.

Where the value of the property of the deceased exceeds \$10,000, so much thereof as passes to or for the benefit of the grandfather or grandmother, or any other lineal ancestor of the deceased except the father and mother, or to any brother or sister of the deceased, or to any descendants of such brother or sister, or to a brother or sister of the father or mother of the deceased, or of any descendant of such last mentioned brother or sister, shall be subject to a duty of \$5 for every \$100.

Where the value of said property exceeds \$10,000 and any part thereof passes to or for the benefit of any person in any other degree of collateral consanguinity to the deceased than is above described, or to or for the benefit of any stranger in blood to the deceased save as hereinbefore provided for, same shall be subject to a duty of \$10 for every \$100 of the value.

Provided that where the whole value of any said property does not exceed \$200 the same shall be exempt from duty.

Any property brought into Ontario for administration or distribution shall be liable to the duty.

Executors or administrators are directed to make and file with the Surrogate Registrar a statement under oath showing (a) itemized inventory of all the property of the deceased and the market value thereof, and (b) the several persons to whom the same will pass under the Will or intestacy and their degree of relationship (if any); and the executor shall before the issue of Letters Probate or of Administration deliver to the Surrogate Registrar a bond with two sureties in a penal sum equal to ten per cent. of the sworn value of the property of the deceased liable to succession duty.

Should the Treasurer of the Province be not satisfied with the value so sworn to or with the correctness of the inventory, provision is made for a valuation and appraisement of the said property by the Sheriff of the County in which same is situate, with the right of appeal by either party from such appraisement to the Surrogate Judge of the County.

## Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Councils, except where there is only one school in the County. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of \$400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 37 Collegiate Institutes and 93 High Schools, with 23,301 pupils, in Ontario in 1898.

## Public Schools.

Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality. There were 5,932 Public (including 345 separate) Schools, with 478,394 pupils, in Ontario in 1898.

## Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. Here also is the largest collection of archaeological material in the Dominion, chiefly illustrative of Ontario, and of North America. David Boyle, Archaeologist. The Museum is freely open to the public from 9 a.m. to 5 p.m.

## Total Number of Educational Institutions

Of all kinds reported by the Education Department as in operation in the Province of Ontario during 1898, was 6,142, attended by 503,187 pupils, and expending \$5,375,081 in their support.

## PARDONS IN CANADA.

In the matter of pardons of convicts in the penitentiaries, prisons, jails and reformatories, the application for clemency should be prepared in the form of a petition addressed to His Excellency the Governor-General, stating the age and name of the convict or prisoner, name of the judge or magistrate who tried and sentenced him, crime committed and date of sentence, term of imprisonment, where incarcerated and reasons for seeking the exercise of the clemency of the Crown. This petition should be addressed to the Secretary of State at Ottawa, and signed by one or more persons, with any documentary evidence or letters, regarding the previous character of the prisoner, etc., etc. The matter is then submitted to the Department of Justice, where full enquiries are made into the case and the papers are subsequently laid, with the advice of the Minister of Justice, before His Excellency the Governor-General, whose pleasure is communicated by the Secretary of State to the parties interested and to the warden of the penitentiary or keeper of the jail, as the case may be.

In capital cases, the judge after sentencing the prisoner forwards, under the authority of Section 937 of "The Criminal Code, 1892," a copy of the evidence and his report to the Secretary of State. Any application for the commutation of the death sentence should be addressed to His Excellency the Governor-General in Council through the Secretary of State in the form of a petition setting forth reasons for such application in various paragraphs, etc., 1, 2, 3. The application or applications are referred to the Minister of Justice and are there carefully considered, and submitted by him with his recommendation to the Governor-General in Council, whose pleasure is communicated to the interested parties by the Secretary of State.

### REMISSION OF FINES.

Where a remission of a fine is sought, action is only taken upon the report of the department concerned—for instance, the Department of Inland Revenue, Customs Department, etc.

### The Law Society of Ontario.

The Law Society was first established in 1797 by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act.

Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head-quarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

# LIFE INSURANCE.

The Dominion Government requires all life insurance companies doing business in Canada to make up, under oath, and deposit with the Superintendent of Insurance within two months after the close of the year, in the form prescribed by law, a statement of their affairs. These statements are subsequently verified by the Superintendent of Insurance, by personal examination at the company's chief offices, and embodied in an annual report to Parliament. The business of life insurance may be said to be wholly transacted by companies authorized by the Dominion Government, there being but one or two institutions incorporated by provincial legislation.

In 1898 there were 33 companies operating in Canada, as follows:

Canadian companies.....	15
British ".....	8
American ".....	10
	-33

The new business transacted in 1898 was \$54,764,673, distributed as follows:—

Canadian Companies, \$35,043,182, or 64% of the whole.
British " 3,323,107, " 6% " "
American " 16,398,384, " 30% " "

The amount taken by native companies exceeded that taken by the British and American together by \$15,321,691.

The total amount of insurance in force December 31st, 1898, was \$368,523,985 (or over four times what it was at the close of 1880), allocated as follows:—

Canadian Companies, \$226,209,636, or 61% of the whole.
British " 36,606,195, " 10% " "
American " 105,708,154, " 29% " "

Formerly the American companies held the foremost place, but for many years they have been obliged to give way to the energetic enterprise of the home companies, whose total business now exceeds that of the American companies twice over.

In 1898 the combined Life Companies received \$11,994,164 in premiums, distributed thus:

Canadian Companies, \$7,107,073, or 59% of the whole.
British " 1,210,601, " 10% " "
American " 3,676,490, " 31% " "

while the total amount paid to policy-holders was \$6,782,006.

The figures in the following table are taken from the latest Government returns, being for the year ending December 31st, 1898:

It is not pretended that these figures alone should be a guide in the selection of a company to insure in, inas-

much as they do not represent the *summun bonum* of any company, but are given simply to enable the reader to obtain an idea of the business transacted by some of the principal companies operating in Canada. In selecting a company to insure in, the main points to be observed are:

- (1) Its financial strength, to be tested by a comparison of the assets with the liabilities;
- (2) An examination of the profit-earning power of the company;
- (3) Of its expense ratio;
- (4) Of its premium rates;
- (5) Of the conditions and privileges of its policy contract, etc.

The death-rate of the active companies for the last eight years, is as follows:—

Year.	Death-rate per 1000.	Year.	Death-rate per 1000.
1898	10.549	1894	10.327
1897	10.907	1893	10.176
1896	10.095	1892	10.676
1895	11.166	1891	10.178

## PLANS OF INSURANCE.

Policies are divided into two main classes, ordinary life and endowment. The life policy is payable at death only, the endowment at the end of a specified period (usually 10, 15, 20 or 25 years), or at death, if that should occur sooner. The life policy is usually secured for protection for the family, while the endowment policy fulfills a double object, viz.: provision for the family in case of death within the endowment term, and a competency to the insured should he survive the period. The life policy may be secured with premiums payable each year that the life enters upon, or, which is more preferable and popular at the present time, by a limited number of payments; for example, a twenty-payment life, after running for twenty years is paid up, but the insurance is not payable until death. Similarly, fifteen and ten-payment life policies are paid up after fifteen and ten annual payments respectively, but are not payable until death.

The endowment policy is generally secured by annual premiums payable for the same number of years as the endowment term, but this policy is sometimes written with premiums payable only through a portion of the term. For example, a twenty-year endowment by ten payments is a policy payable twenty years hence, or at prior death, with payment of premiums limited to the first ten years of the policy. The premium rates of most of the representative Canadian life insurance companies are uniform at all ages for the principal plans of insurance. The rates of the American companies are invariably higher than those of Canadian companies.

## AMENDMENT TO INSURANCE ACT.

The amendment to the Insurance Act, which was made at the 1899 session of the Dominion Parliament, among other matters, provides for these important changes:—

- (1) For the extension and uniformity of the powers of investing the funds of Canadian life insurance companies, and
- (2) That the interest basis of Reserves shall be as follows: for all new business transacted after January 1st, 1900, 3½ per cent.; for business existing as at January 1st, 1900, 4½ per cent., until January 1st, 1910, after which date the rate is to be 4 per cent. until January 1st, 1915, and thereafter 3½ per cent. As a result of the more stringent 3½ per cent. valuation, the Canadian life insurance companies have been obliged to increase their rates, to take effect January 1st, 1900.

## SURRENDER VALUES AND DIVIDENDS.

Cash values, or paid-up values, are usually allowed upon surrender of life policies, after three or more annual premiums have been paid. It has now become very general to endorse upon the policy the amount of these values. On policies taken out on the with-profit system, dividends are apportioned either annually, quinquennially, or accumulated for a period of ten, fifteen or twenty years, known as the Tontine, Reserve Dividend or Accumulative Period. The profits to those who survive the period are increased by the dividends of those who die within the term.

No. 76 KING STREET EAST, - TORONTO

Lord Rosebery, the former premier and Liberal leader, declares that while in his opinion "there is much in the last three years of our relations with the Government of the Transvaal to criticize, if not to condemn, President Kruger's ultimatum makes war a necessity."

An armored train set from Buluwayo, Rhodesia, towards Mafeking, finds railway damaged near Lobatsi and encounters Boers near Crocodile Pools. The British drive the Boers back.

12—The United States Consul in Pretoria takes charge of British interests in the Transvaal.

The Dutch Consul-General in London takes charge of the interests of the Transvaal in Great Britain.

The President of the United States, replying to petitions from American citizens, declares that he will not intervene in the war between Britain and the Transvaal.

The Boers invade Natal at dawn in three columns through Botha's Pass, Laing's Nek, and from Walkerstrom, the objective point of the invasion being Newcastle.

The British field force in Natal, under Sir George White and Major-General Sir W. P. Symons, remains on the defensive.

The British troops in Cape Colony remain on the defensive, with the exception of a force which moves from Mafeking in Bechuanaland, about 200 miles north of Kimberley, towards the Transvaal border, ten miles distant. This force consists chiefly of "Rough Riders" and crack marksmen, commanded by Col. Baden-Powell.

The Boers intercept an armored train running between Vryburg and Mafeking, wreck and capture it. Fifteen British are killed, and almost the whole crew are captured. Col. Baden-Powell, commander at Mafeking, is thus isolated in his position.

The French Cabinet votes to place all French colonies under civil authority, and to abolish all military administration.

Sudden death of Baron Farrer, the distinguished British authority on trade and finance.

13—A proclamation is issued by the Government of Cape Colony, warning all British subjects in Africa not to give military aid to the two Dutch republics or to trade with or supply goods to them.

The Canadian Government offers Great Britain 1,000 troops for service in South Africa.

14—The Boers invest Mafeking. Col. Baden-Powell orders out an armored train against them. After a fierce fight the Boers withdraw.

General Sir Redvers Buller, who is to have chief command in South Africa, leaves England for the Cape.

The Canadian Government issues a militia order calling for 1,000 volunteers to serve in the Transvaal war for Great Britain.

Death of Vice-Admiral Philip Howard Colomb, of England.

15—The Boers invest Kimberley, the famous diamond town.

The Boers suffer a reverse at Spruitfontein, 10 miles south of Kimberley. An armored train is attacked by them unsuccessfully.

16—The Imperial Government accepts Canada's offer of 1,000 troops.

General Cronje opens fire upon Mafeking.

Vryburg, a Cape Colony town, on the main Government railway, and lying between Mafeking and Kimberley, surrenders to the Boers.

17—The British Parliament opens in extraordinary session to consider the South African situation. Sir Henry Campbell-Bannerman, Liberal leader in the House of Commons, announces that he will support the Government. Lord Kimberley, Liberal leader in the Lords, makes a similar announcement.

Commandant-General Joubert arrives at Newcastle, Natal, finding only about 100 men there.

18—British cavalry patrols from General White's force at Ladysmith have sharp skirmishes with parties of Free State Boers at Acton Homes and Bester's Station.

The Free State Boers, on the falling back of the British patrols, occupy Acton Homes.

In the British House of Commons, Mr. Philip James Stanhope, Liberal member for Burnley, moves an amendment to the address in reply to the speech from

the throne, strongly disapproving of the conduct of the negotiations with the Transvaal. Sir Wm. Vernon Harcourt, while supporting the Government in sustaining the integrity of the Queen's dominions, criticizes the Government's negotiations with the Transvaal, and asserts that there was no need to reject the Transvaal's offer of August 5th. He also asserts that the suzerainty was dropped in 1884.

Mr. John Dillon, Nationalist member for East Mayo, moves an amendment to the address, asserting that the British Government have acted in violation of the Convention of 1884, and recommending arbitration as a substitute for an "unjust and cowardly war." Mr. Henry Labouchere, Liberal member for Northampton, seconds the amendment. The amendment is defeated by 322 to 54.

The Rt. Hon. Arthur J. Balfour, Government leader in the House of Commons, presents a message to the House that the Government is about to order the embodiment of the militia and to call out the militia reserve force, or such part thereof as may be necessary.

A British supplementary army estimate is issued, asking the House of Commons to vote an additional 35,000 men and £10,000,000 in consequence of the situation in South Africa.

It is officially announced that Hon. Arthur S. Hardy, Premier and Attorney-General of Ontario, has resigned his office and retired from political life. Hon. Geo. W. Ross succeeds Mr. Hardy as Premier.

19—In the British House of Commons, Rt. Hon. Jos. Chamberlain makes a defence of the Government's South African Policy. Sir Edward Clarke, Conservative member for Plymouth, declares against the war and the claim of suzerainty. Mr. John Morley speaks in a similar strain. The debate is ended by Mr. Balfour moving the closure. Mr. Stanhope's amendment is rejected by a vote of 362 to 135.

20—The British Parliament votes £10,000,000 for the war in South Africa. The Radical, Mr. Labouchere, and the Irish members protest. One of the latter, Mr. Wm. Redmond, for using unparliamentary language, and refusing to withdraw it, is ejected.

A stubborn battle fought at Glencoe camp, near Dundee,—the first pitched battle in the war with the Transvaal—results in a British victory, the British General, Sir W. P. Symons, however, being mortally wounded. The British losses number about 250 killed and wounded, the Boers probably about 800. The King's Royal Rifles and the Dublin Fusiliers take a prominent part in the battle. Official name of battle, "Talani Hill."

Great Britain and the United States agree upon a temporary adjustment of the Alaska boundary line. The divisional line on the west pass is placed 22½ miles above Pyramid Harbor.

21—Another pitched battle is fought between British and Boer forces in Natal. Lieut.-Gen. French, commanding the British, defeats the Boers at Elands Laagte, about 15 miles northeast of Ladysmith. General Jan H. M. Kock, second in command of the Transvaal army, is mortally wounded and captured.

The new Ontario Cabinet are sworn in. The members are: Premier and Provincial Treasurer, Hon. G. W. Ross; Attorney-General, Hon. J. M. Gibson; Minister of Education, Hon. Richard Harcourt; Commissioner of Crown Lands, Hon. E. J. Davis; Provincial Secretary, Hon. J. R. Stratton; Minister of Public Works, Hon. F. R. Latchford. Ministers without portfolio, Hon. J. T. Garrow and Hon. Wm. Harty.

23—General Yule, successor of Sir W. P. Symons in command at Dundee, abandons this place and falls back to effect a junction with Sir George Stewart White.

Boers bombard Mafeking for four hours. They send an envoy to ask the town to surrender. Col. Baden-Powell refuses.

24—Another battle between British and Boers in Natal. Scene, Rietfontein, near Ladysmith. General White moves out to attack the Boers and succeeds in driving them back.

The beleaguered British force at Kimberley makes a sortie with the object of breaking up the cordon surrounding the place. Armored trains assist. Commandant Botha and many Boers are killed.

Captain Blackburn, of the Rhodesian force, encounters the Boers at Rhodes' Drift. A skirmish ensues, in which Captain Blackburn is fatally wounded.

which ensues the Boers stampede, carrying away the whole of the gun equipment and most of the regimental small ammunition. When the last cartridge is gone the British surrender. In the six hours fight 6 officers and 54 men are killed, and 9 officers and 231 non-commissioned officers and men are wounded. The official roll call shows that 843 are missing as a result of the engagement. Between 70 and 100 escape and return to Ladysmith, whither 150 wounded are brought.

## THE ROYAL MILITARY COLLEGE

**T**HERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instruction in all branches of military science to cadets and officers of Canadian Militia. In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete, and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Five commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of  $9\frac{1}{2}$  months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from \$750 to \$800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, about the middle of June in each year.

For full particulars of this examination, or for any other information, application should be made as soon as possible to the Deputy-Adjutant General of Militia, Ottawa, Ont.

## OPINIONS OF THE CANADIAN PRESS

### The Toronto Globe—

"The narrative is that of one carried on by the fascination of his theme. Yet the detail is kept well in hand, and is admirably arranged, while the entire structure of the work gives the impression of coherence, of strength, and even a sort of nobility."

"Mr. Willson shows that he has considerable taste for the romance of history he feigns to eschew."

### The Mail and Empire—

"Mr. Willson has organized his matter well, laying out his stock of fact with so much skill, and putting so much animation into his style as to make his history read like a novel. He has a right appreciation of the dramatic element in history. He has given us such a hook as we should expect from him and his subject—a hook of absorbing interest."

### The Montreal Herald—

"Mr. Beckles Willson, in his substantial volume, 'The Great Company,' presents an entertaining and instructive history of the Honourable Company of Merchants-Adventurers who for many generations dominated the North-West."

### The Canadian Magazine—

"Here is a work which is truly great. The romance of the Hudson's Bay Company is unequalled in the annals of modern history, and contains much for the citizen of the Canada of to-day. Beckles Willson has chosen the greatest theme offering itself for literary exploitation, and has written a volume which must give him a permanent place among Canadian authors."

### The Christian Guardian—

"We do not see how a single page could have been omitted without a serious loss. No earnest student of Canadian history should be without it. It is written in a most admirable style. . . . We urge thoughtful, loyal Canadians to purchase it and keep it where frequent reference can be made to it, for it is more than a volume for a mere passing hour."

### Montreal Gazette—

"The first thing that strikes us is that it is thoroughly Canadian. The author, the distinguished nobleman who writes the introduction, the able artist who enlivens its pages, are all (like the publishers) countrymen and lovers of this Canada of ours. . . . This handsome volume does them credit."

### Montreal Life—

"We are greatly mistaken if Mr. Willson's book does not have considerable vogue among general readers; and certainly it will find a place among standard work in every library with any pretension to completeness."

### Winnipeg Free Press—

"From these records Mr. Beckles Willson has written the present important volume, which will undoubtedly take a recognized place as a standard authority, side by side with Parkman's volumes."

### Ottawa Journal—

"Of too many hooks it is the easy fashion to say 'This should be in every library.' It does apply in Canada to Mr. Willson's story of 'The Great Company.'"

### The Montreal Star—

"His history of the early days of the great North-West is authoritative and will therefore be permanent. We sincerely hope that it will be widely studied by the Canadian public."

### The Hamilton Times—

"'The Great Company' is without doubt the most important Canadian historical work that has appeared for years, and it is particularly gratifying to those who are inclined to deplore the fiction loving tendency of the age to find Mr. Willson has so handled his subject that, without omitting anything of historic value, the very interest of the narrative would satisfy the most dissipated taste."

In one volume, large Svo., about 600 pages, handsomely bound in cloth, with specially designed cover.

## A Political History

By GOLDWIN SMITH, D.C.L., author of "The United States: A Political History," etc. Two volumes. Crown 8vo. Price, \$4.00.

The purpose of Professor Goldwin Smith's new work is clearly suggested by its sub-title. It is a political history of the United Kingdom from the earliest times to the Reform Bill of 1832. It is a companion work to his former work on "The United States: A Political History," and, read with it, it represents the political growth of the English race. Professor Smith has treated his second work with the same succinctness and with the same epigrammatic force and weight as he did his work on the United States, which *The Nation* characterized as "a literary masterpiece, as readable as a novel, remarkable for its compression without dryness, and its brilliancy without any rhetorical effort or display."

## ...Bismarck...

Some Secret Pages of his History; being a diary kept by DR. MORITZ BUSCH during twenty-five years official and private intercourse with the Great Chancellor. In two volumes, with portraits. Cloth, large 8vo. Price, \$7.50.

A work that every one who is interested in the political history of Europe during the latter half of the nineteenth century will be likely to read is Dr. Moritz Busch's "Bismarck." Indeed it is impossible to understand that history without a knowledge of the part which the Great Chancellor played; and we know of nothing which is accessible to the public that sheds so clear a light upon it during the period of his greatest activity, where his influence was at its zenith, as this diary. In its pages we see "The Man of Iron and of Blood" actually at work; from it we learn something of his method of working, and of his marvellous versatility and resource.—*Mail and Empire*.

Nothing comparable to this has ever been published. It is undoubtedly the most important secret political memoir of the century.

A GREAT NOVEL 

## Janice Meredith

A Novel of the American Revolution. By PAUL LEICESTER FORD,  
author of "The Honorable Peter Sterling." Cloth, Gilt Top, \$1.50.

A handsome holiday edition, containing 58 illustrations by  
Howard Pyle and his pupils, 14 fac-similes and reproduc-  
tions from old prints, and 2 miniatures in color. Gilt tops.  
Two volumes, boxed. Price, \$5.00.

*A unique feature of the cover design is a colored lithograph of  
exquisite tone and delicacy of a miniature of Janice.  
This miniature portrait is Mr. Ford's conception  
of his heroine, and will serve to indicate  
what Mr. Ford's delightful maiden  
of many moods was like.*

It has been said more than once that if any man were qualified to write the great American historical novel it is Mr. Ford, for he combines with an intimate knowledge of the subject the power to write a strong, absorbing and successful novel.

It is an attempt to do in the North what Thackeray did in the South with "The Virginians," during the same period. That is to say, it is not a novel whose characters are made of generals, colonels and soldiers, and whose scenes consist of battlefields, skirmishes and sanguinary adventures. It is a picture of the social life of the people at that time. Just as in "The Virginians," Mr. Ford opens his story with a series of chapters which show us the way in which the people thought and acted in 1776 in the State of New Jersey; we are introduced to squires and their wives and daughters; but through it we hear the hum of the oncoming strife, and by and by the story gathers force and impetus as General Washington comes on the scene, and we are introduced to the struggles on Manhattan Island, and on the Jersey shore, crossing the Delaware, camping out at Morristown, and so on through the war. The interest in the story is strong from the start. The first chapter opens brightly and winningly, and already in the second we are brought upon a mystery—and there is nothing that your reader loves so much as a mystery. With the introduction of the mystery there also begins to appear an incipient love story, but both are so dextrously handled that not until the end does the reader know what the end is to be. Washington comes repeatedly into the story, and the character of its hero is based on that of Alexander Hamilton.

## The Great K. & A. Train Robbery

By PAUL LEICESTER FORD, author of "The Honorable Peter Sterling."  
Price, Paper, 50 cts. Cloth, \$1.25.

"The Great K. & A. Train Robbery" is as capital a piece of foolery as the summer seems likely to bring in its train. . . . The whole drama is enacted within a few hours, the scene is properly limited, and the chief actors are but a half dozen or so. Yet as his Fates, Mr. Ford lassoes two Departments of Government, a State Judiciary, and a whole ranch's tale of cowboys. Under all the fun lurks a serious question or two concerning certain dangerous tendencies in American life.—*The Book Buyer.*

## The Scarlet Woman

A Powerful Modern Romance. By JOSEPH HOCKING. With full page Illustrations by Sidney Cowell. Paper, 75 cts. Cloth, \$1.25.

The interpretation of the woman mentioned in the seventeenth chapter of the Book of Revelation as representing the Church of Rome, while not having been universally accepted, has nevertheless been the common opinion amongst a great many Protestants. Mr. Hocking has made the mystery which naturally surrounds Roman Catholic institutions, and the idea of secret and ever watchful power which is always associated in the Protestant mind with the name Jesuit, the groundwork of an immensely powerful modern romance. It is the story of a young Englishman who undertakes to bring together two young people who, although still devotedly attached to each other, are, on account of some mutual misunderstanding, preparing to take holy orders, the one as a priest and the other as a nun. From the very outset his purpose is suspected and his designs opposed by a certain

Father Ritzoom, a Jesuit priest of unusual shrewdness and great force of character. In the determined struggle which follows, every move increases the intensity of the interest. Lancaster's original motive, the desire for the reconciliation of his friends, is superseded by an ardent determination to secure the liberty of a young nun with whom he has fallen passionately in love, and the Jesuit's zeal for his Order makes him an indefatigable opponent, whom the author does not hesitate to represent as justifying the means by the end. The author throughout exhibits a clear appreciation both of the strength and the weakness of the Romanist system. Ritualism, strange to say, is scarcely mentioned, save in the following very significant dialogue between Ritzoom and an Abbess:

"Then we must trust to reason and the grace of God in converting England?"

"Yes, and to the Ritualists," replied Ritzoom.

"The Ritualists?"

"Yes, we owe nine-tenths of the conversions to Rome to the Ritualists. They are the John the Baptists of our cause. Without them we could do nothing."—*Hamilton Spectator*.

*Mr. Parker is at this moment probably second only to Mr. Rudyard Kipling in the estimation of the reading public. The St. James Gazette says: "He has the instinct of the thing: his narration has distinction, his characters and incidents have the picturesque quality, and he has the sense of the scale of character-drawing demanded by romance, hitting the happy mean between lay figures and over-analyzed 'souls.'"*

---

## THE BATTLE OF THE STRONG

*A Romance of Two Kingdoms*

(50,000 copies sold within three months of publication)

It is a more complicated and elaborate work than "The Seats of the Mighty." It is also more purely imaginative, and the creative work is more ambitious. . . . It shows at least equal success on a grander scale. . . . It is splendidly dramatic. Mr. Parker has in this book finally proved himself a master of imaginative fiction. He has given us of his best, and his best deserves very high praise. . . . Modern fiction has few finer examples of the perfect woman.—*Scotsman*.

Guida is a fine character, finely and convincingly presented. Wars, panics and massacres, brave actions and dark deeds, touched in with force and vividness, are the background from which is detached the figure of this girl and the tragedy and romance of her life—the main motive of the story. The book is full of varied emotion. . . . The story gathers in force and dramatic intention to its close.—*Daily News*.

No one who takes a pleasure in literature but will read Mr. Gilbert Parker's romance with keen enjoyment. The mere writing is so good as to be a delight in itself, apart altogether from the interest of the tale.—*Pall Mall Gazette*.

Every personage in the story seems to live. A fine piece of work.—*Speaker*.

His newest story is strongly written, glows with color, is full of action, and is at once romantic and intensely dramatic.—*Vanity Fair*.

## S. R. CROCKETT'S NOVELS

**IONE MARCH: A Woman of Fortune**

Price, Cloth, \$1.50. Paper, 75 cts.

Mr. Crockett's versatility is certainly marvellous. Last year he surprised those who thought that his art was confined to the kailyard by writing that capital romance of mediæval Europe, "The Red Axe," and now he comes out with a bright, crisp, up-to-date story of the modern American girl, which is simply charming. Ione March is a strong character. The daughter of a famous American Governor, she has been educated in a European convent, and so combines the energy, independence and adaptability of the American with a dignified refinement which is very pleasing, while her sweet womanliness is only brought out more strongly by her struggles with the world in the effort to earn a living for herself. The plot is well constructed and well carried out. There are also some splendid specimens of English manhood, and a "mean American," who, though playing an important part, does not appear often. But the life of the story is Idalia Judd, the typical American girl, who talks like a streak in the most delightfully expressive "American." She was a very "engaging" young lady, and her frank account of her experiences is most instructive. A trip "across the pond" gave her ample time to bring matters to a climax, and she had even been known to become engaged on a train, "and do you know it's rather nice, though hurried in parts, and you have to cut a good deal of the best dialogue. Yes, siree; you have to make them go the pace. It was with a man named Kenneth Early that I tried it first, when father and I were going straight across lots to San Francisco without stopping. All through the Prairie States he told me how he loved me, and you just believe it passed the time; you can't think. But, alas! love's sleepers are no smoother than elsewhere on the Chicago, Milwaukee & St. Paul's; we quarrelled on the platform at Salt Lake all because he would go mousing after a pretty little Mormoness, pretending all the while he was only posting a letter. Now, unfaithfulness is the one thing I can't stand, and I told him so. 'I didn't ask you to love me long, Kenneth,' I said to him, 'only to attend strictly to business while you were about it.' However, he was so heart-broken that I forgave him just before we got to Digger City, and at Sacramento I said I'd be his new-found sister, but he said he wasn't annexing\* any more sisters, and so we parted forever."—*Mail and Empire*.

**The Red Axe**

A Tale of the German Robber Barons. With 26 illustrations by Frank Richards  
Cloth, \$1.50; Paper, 75 cts.

The Red Axe is the symbol of the state executioner or headsman, whose office in the middle ages was hereditary, and endowed with certain privileges. The tale opens with the interposition of the little son of the executioner to save the life of a baby girl who is about to be thrown to bloodhounds, which he effects by threatening to take his own life if this be done. From this the author weaves a beautiful life romance in the midst of gruesome surroundings, and traces the growing love of the little playmate Helen and the son of the headsman, Hugo Gottfried, up to the climax in which Helen is tried for witchcraft before a rejected suitor, and iniquitously condemned to death in spite of the indignation of the people, while Hugo, who has succeeded his father as hereditary executioner, is ordered to carry out the sentence under the threat of a still worse fate for Helen if he refuses. He is compelled to consent, and Helen is brought forward for execution. "Then my love kissed me once as though she had been saying good-night in the Red Tower, simply and sweetly like a child, and laid her head down on the block as on the white pillow of her bed." What happened after that we recommend our readers to find out for themselves.—*Quebec Telegraph*.

## Gilian the Dreamer

His Fancy, His Love and Adventure. By NEIL MUNRO, author of "John Splendid," etc. Paper, 75 cts. Cloth, \$1.25.

Among recent English writers there is no one of whom such great things have been expected as of Neil Munro. His first book, a volume of short stories, entitled "The Lost Pibroch," arrested the attention of the critics and commanded their earnest admiration. In "John Splendid" this promise was in a measure fulfilled. It is a story of distinction and great literary charm, though deemed by some to be lacking in plot and to contain an amount of Highland dialect which makes its reading difficult to a certain number of his admirers. In "Gilian the Dreamer" he has realized a still further advance. The story gives evidence of the same delicate imagination and charm of style which distinguished his earlier work, while there is little dialect, and the plot is absorbing. Great success must be predicted for this novel.

It would be impossible to enumerate all the dainty touches, the details of mastery, with which Mr. Munro has made his story complete. Complete it is in every sense, standing clear and wonderfully illuminated. Such careful and masterly work deserves much praise, and Mr. Munro is to be congratulated on a successful and delightful book.

## John Splendid

A Tale of the Highlands and the Wars of Montrose. By NEIL MUNRO, author of "The Lost Pibroch," etc. Paper, 75 cts. Cloth, \$1.25.

The interest never flags, the mind never wearies.—*Daily Telegraph.*

Worthy of the best artists in fiction. . . . The atmosphere of hill and salt loch, the scent of gale and heather are what you may breathe.—*Mr. Andrew Lang, in "The Bookman."*

A large number of people had their appetites whetted by Mr. Munro's book of stories, and now are vastly pleased with "John Splendid." The author has made his own and a distinct contribution to the reading of Argyle's character. He understands the subtle Celtic nature as neither Sir Walter nor Stevenson could—and his description of land and water are exact, affluent, and distinguished; indeed nothing better of this kind has been done in recent years. Mr. Munro writes of Celtic character from the inside.—*Ian Maclaren, in "The British Weekly."*

The Most Important Canadian Historical Romance of the Year

## THE SPAN O' LIFE

A Tale of Louisburg and Quebec. By WILLIAM McLENNAN, of Montreal, and MISS J. N. McILWRAITH, of Hamilton. With 29 excellent full page illustrations by F. de Myrbach. Price, Paper, 75 cts. Cloth, \$1.50.

This is a book deserving of great success, not only on account of its well-written and interesting contents, but also because it is a Canadian story by Canadian writers. No better piece of writing on this subject has appeared since Gilbert Parker's "Seats of the Mighty." The authors have been fortunate in their choice of old Louisburg and Quebec as the scene of their story, for these historic towns abound with romance and folk-lore awaiting only the ready pen of the author. In "The Span o' Life" the reader is taken through the troublous times following the defeat at Culloden, and is introduced to a young Highlander, Hugh Maxwell, escaped to London, and in hiding. While there he falls in love with a young lady, Margaret Nairn, who favors the Jacobite cause, and is the ward of his godmother. Fearing discovery, the refugee is forced to seek other lodgings, and is directed to apply to a sempstress, in whom he discovers the

wife of his youth long since thought to be dead. On his wife's refusal to resume their old relations, he resolves to banish himself to Canada with the French army, in order that he and Margaret may the more easily forget each other. She, however, attributes to his poverty his failure to meet her advances, and some years later, upon coming heir to an estate, she follows him to the new world, taking with her Maxwell's wife as a maid, without either having any idea of the other's identity. The complications which follow are various and exciting, especially when the presence of a young and beautiful lady alone in a French military colony must of necessity appear strange, and not the less so because she is an Englishwoman. Indeed, it is doubtful if even Margaret's courage could have sustained her but for the memory of an old love song of Maxwell's which was constantly in her ears:

"The Span o' Life's nae lang eneugh,  
Nor deep eneugh the sea,  
Nor braid eneugh this weary warld  
To part my love frae me."

—*Mail and Empire.*

"The Span o' Life" is a valuable addition to our literature and deserves to be classed with the best Canadian historical romances.—*St. John Globe.*

It is a romance that will thrill anyone who loves a good tale of love and adventure, and it has an added interest from an historical point of view.—*Montreal Herald.*

# ONTARIO'S

# MINING LANDS

EXTENSIVE GOLD-FIELDS, ABUNDANT SUPPLIES OF IRON,  
LARGE DEPOSITS OF COPPER, NICKEL, SILVER,  
MICA, GRAPHITE, CORUNDUM, ETC.

**I**N the Province of Ontario there is great mineral wealth, comprising the precious and useful metals and many important non-metallic minerals. In fact, almost every variety of valuable or useful material found in the earth's crust is known to occur in Ontario in greater or less abundance.

The gold fields of the northwestern part of the Province, the iron ores of Michipicoton and the Rainy River District, the nickel-copper ores of the Sudbury region, and the corundum and mica of the Eastern Counties, though only in the early stages of development, show how great and widely spread are these natural resources.

The rock formations in which the known deposits of gold, silver, copper, nickel, iron, corundum, etc., occur extend over large areas, much of which has been very little explored. Along the greatest axis of the mineral-bearing belt—from the St. Lawrence River to the boundary of Manitoba, a distance of about 1,200 miles—runs the Canadian Pacific Railway, and the numberless lakes and water-routes which extend in all directions enable the prospector to take his canoe almost anywhere.

Crown Lands are sold at \$2.00 up to \$3.50 per acre, or leased at \$1.00 per acre for the first year, and 15 to 30 cents for subsequent years.
