No change of or departure from the terms of any authorization may be made, except upon written approval of the Washington Office of SFAW.

The furnishing of any false or misleading information in connection with the submission of any offer, or the shipment of coal found not to be in substantial conformity with the representations made, may result in the immediate cancellation of any unfilled portions of the authorization, the rejection of the shipment before dumping into vessels, and the withholding of any future authorizations.

PART 944—REGULATIONS APPLICABLE TO THE OPERATIONS OF THE PRIORITIES SYSTEM

[Priorities Reg. 33, Direction 6, as Amended June 26, 1946]

USE OF HH RATINGS FOR COMMON AND FACE BRICK AND COMMON AND FACE STRUCTURAL TILE IN THE VETERANS' EMERGENCY HOUSING PROGRAM

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of building materials and building supplies for defense, for private account and for export; and the following direction is deemed necessary and appropriate in the public interest and to promote the national defense:

(a) Purpose of this direction. Priorities Regulation 33 provides for the assignment to builders of HH preference ratings to secure materials listed on Schedule A of that regulation, which are required for use in the Veterans' Emergency Housing Program. Among these are common and face brick and common and face structural tile. This di-

rection explains the use of the HH rating and also what the restrictions are in connection with the shipment of brick and tile by producers and dealers.

(b) Definitions. For the purpose of this direction:

(1) "Brick" means common and face clay brick of any size or type. Refractory brick is not included.

(2) "Tile" means common and face structural tile.

(3) "Producer" means a person owning or operating facilities in which brick or tile are manufactured.

(4) "Dealer" means a person who buys brick or tile for resale as such.

(c) Extendibility of HH ratings. A person, other than a producer, who receives an HH rated order for brick or tile may extend the rating to get the brick or tile which he will deliver on that order. A producer who receives an HH rated order for brick or tile may not extend the rating.

(d) Producers to ship 60% of production against HH orders. (1) A producer must accept and fill rated orders (AAA, MM, CC and HH) for brick and tile in accordance with the provisions of Priorities Regulation 1, subject to the following rule: A producer must accept during any calendar month, in preference to all other rated orders, except AAA, all HH rated orders which he receives before the 20th day of the month calling for shipment during that month up to 60% of his scheduled production of brick and 60% of his scheduled production of tile for that month. No producer, however, is required to accept HH rated orders for more than this percentage of his production of brick or tile in any month. This Direction does not require any set-aside of brick or tile by a producer.

(2) If an HH rated order is received after the 20th day of the month in which shipment is required, or if at least 60% of that month's scheduled production has been shipped or is scheduled for shipment on HH orders, then the producer need not accept the HH order. But he must promptly notify his customer telling him approximately when he could make the shipment, based on the requirement of paragraph (d) (1) above.

(e) Producers and dealers may refuse HH orders from purchasers outside their areas. A producer or dealer may refuse to accept an order for brick or tile bearing an HH rating offered to him for use on Veterans' Emergency Housing projects in any area to which he has not delivered brick or tile in the five years preceding receipt of that order. A new producer or dealer may not apply this basis for refusal to accept HH rated orders for use in his local trading area.

(f) Dealers' handling of HH rated orders. A dealer must accept and fill rated orders (AAA, MM, CC and HH) for brick and tile in accordance with Priorities Regulation 1. However, if he receives a supply of brick or tile for which he did not extend ratings and if he places that supply in his yard inventory, he need not use more than 20% of that supply to fill HH rated orders. HH ratings on orders filled from that supply must not be extended by the dealer to get replacements.

(g) Exclusive sales arrangements. A producer who has an arrangement, made before June 26, 1946, for the sale of all, or substantially all, of his production of brick or tile to a single dealer, may sell pursuant to that arrangement and without regard to para-

graph (d) of this direction. However, in such a case, the dealer becomes subject to the producers' provisions in this direction, just as if he were a producer.

(h) Calculations of quantities. Quantities of brick should be figured in thousands. Quantities of tile should be figured in short tons.

Issued this 26th day of June 1946.

PART 944—REGULATIONS APPLICABLE TO THE OPERATIONS OF THE PRIORITIES SYSTEM

[Priorities Reg. 33, Direction 7, as Amended June 26, 1946]

USE OF HH RATINGS FOR CONCRETE BLOCKS IN THE VETERANS' EMERGENCY HOUSING PROGRAM

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of building materials and building supplies for defense, for private account and for export; and the following direction is deemed necessary and appropriate in the public interest and to promote the national defense.

(a) Purpose of this direction. Priorities Regulation 33 provides for the assignment to builders of HH preference ratings to secure materials listed on Schedule A of that regulation, which are required for use in the Veterans' Emergency Housing Program. Among these are concrete blocks. This direction explains the use of the HH rating and also what the restrictions are in connection with the shipment of concrete blocks by producers and dealers.

(b) Definitions. For the purposes of this direction:

(1) "Producer" means a person owning or operating facilities in which concrete blocks are manufactured.

(2) "Dealer" means a person who buys concrete blocks for resale as such.

NOTE: Subparagraph (3) formerly subparagraph (2) redesignated June 26, 1946.

(3) "Concrete blocks" means light weight and heavy weight aggregate concrete blocks. Light weight aggregate includes such materials as cinders, burned clay or shale, and blast furnace slag. Heavy weight aggregate includes such materials as sand, gravel, and crushed stone.

(c) Extendibility of HH ratings. A person, other than a producer, who receives an HH rated order for concrete blocks may extend the rating to get the concrete blocks which he will deliver on that order. A producer who receives an HH rated order for concrete blocks may not extend the rating.

(d) Producers to ship 60% of production against HH orders. (1) A producer must accept and fill rated orders (AAA, MM, CC and HH) for concrete blocks in accordance with the provisions of Priorities Regulation 1, subject to the following rule: A producer must accept during any calendar month, in preference to all other rated orders, except AAA, all TT rated orders which he receives before the 20th day of the month calling for shipment during that month up to 60% of his scheduled production of concrete blocks

for that month. No producer, however, is required to accept HH rated orders for more than this percentage of his production of concrete blocks in any month. This direction does not require any set-aside of concrete blocks, by a producer.

(2) If an HH rated order is received after the 20th day of the month in which shipment is required, or if at least 60% of that month's scheduled production has been shipped or is scheduled for shipment on HH orders, then the producer need not accept the HH order. But he must promptly notify his customer telling him approximately when he could make the shipment, based on the requirement of paragraph (d) (1) above.

(e) Producers and dealers may refuse HH orders from purchasers outside their areas. A producer or dealer may refuse to accept an order for concrete blocks bearing an HH rating offered to him for use on Veterans' Emergency Housing projects in any area to which he has not delivered concrete blocks in the five years preceding receipt of that order. A new producer or dealer may not apply this basis for refusal to accept HH rated orders for use in his local trading area.

(f) Dealers' handling of HH rated orders. A dealer must accept and fill rated orders (AAA, MM, CC and HH) for concrete blocks in accordance with Priorities Regulation 1. However, if he receives a supply of concrete blocks for which he did not extend ratings and if he places that supply in his yard inventory, he need not use more than 20% of that supply to fill HH rated orders. HH ratings on orders filled from that supply must not be extended by the dealer to get replacements.

(g) Exclusive sales arrangements. A producer who has an arrangement, made before June 26, 1946, for the sale of all, or substantially all, of his production of concrete blocks to a single dealer, may sell pursuant to that arrangement and without regard to paragraph (d) of this direction. However, in such a case, the dealer becomes subject to the producers' provisions in this direction, just as if he were a producer.

(h) Calculations of quantities. Quantities of concrete blocks should be figured in thousands (8 x 8 x 16 equivalent).

Issued this 26th day of June 1946.

PART 1349—ELECTRICAL GENERATION, TRANSMISSION, CONVERSION AND DISTRIBUTION APPARATUS

[MPR 82, Amdt. 12]

WIRE AND CABLE

A statement of the considerations involved in the issuance of this amendment has been filed with the Division of the Federal Register.

The example in section 16 (h) (1) is amended to read as follows:

Example: Assume that on June 3, 1946, the OPA effectuates an industry-wide increase of 3¢ per pound in the price of lead. Assume that the maximum net price of the applicable lead covered cable would be 1,000 dollars for each 1,000 feet without considering the provisions of this paragraph, and further assume the inside diameter of the lead sheath to be one inch, with the thickness of the lead sheath being one-fourth of an inch. The amount the manufacturer may add to the aforesaid net price would be obtained as follows:

177 x (1/4 ± 1) x 1/4 x 3, or \$165.93, which, when rounded out to the nearest ten cents, becomes \$165.90.

The new maximum net price therefore becomes \$1,165.90 for the thousand feet.

This amendment shall become effective July 1, 1946.

Issued this 26th day of June 1946.

PROPERTY**

1. The first three sentences of § 8305.10 (b) are amended to read as follows:

(b) *Care and handling.* When any surplus real property is assigned to a disposal agency or to an appropriate regional office of the War Assets Administration, the disposal agency or the regional office, as the case may be, shall, upon receipt of a declaration of surplus real property, immediately contact the owning agency to work out mutually satisfactory arrangements for the assumption of the care and handling of the property covered by such declaration. Where the declaration is assigned to the regional office such assignment shall be deemed to be the assignment to the disposal agency, and notice thereof, as in other assignments, shall be given to the owning agency. The assumption of care and handling of the property shall be completed within sixty (60) days after the assignment to a disposal agency or to the regional office, or within such additional time as may be granted by the Administrator, except in those cases (1) where the surplus nonindustrial real property is included in a declaration covering an airport, in which event assumption shall be in accordance with § 8316.14 (a) (1)¹; or (2) where the surplus nonindustrial real property is covered by a declaration which includes surplus industrial real property or transportation property, in which event assumption shall be in accordance with § 8310.4 (b) (1)².

2. Section 8305.11 (a) (1) is amended to read as follows:

(1) Government agencies shall be accorded first priority to acquire all classes of surplus real property for their own use. Reconstruction Finance Corporation, successor to Smaller War Plants Corporation, shall have a second priority to acquire any such surplus property for resale, as provided in section 18 (e) of the Surplus Property Act of 1944.

3. Section 8305.11 (a) (2) is amended by deleting the word "second" in the second line and substituting in its place the word "third".

6. The first sentence of § 8305.11 (d) is deleted and the following substituted in lieu thereof:

(d) *Time and method of exercise.* The time for the exercise of priorities by Government agencies shall be twenty (20) days following the mailing of notice provided for in § 8305.12 (c) (3) of this part. The time for exercise of other priorities shall be a period of ninety (90) days after the date notice of availability is first published, as required by § 8305.12 (c) (2) of this part, or such additional period as the Administrator may allow when necessary or appropriate to facilitate a sale of the property to a former owner entitled to priority; *Provided, however,* That the property may be disposed of prior to the expiration of such periods pursuant to the provisions of §§ 8305.12 (e) or 8305.12 (n) hereof.

[Reg. 20, Order 1]

**PART 8320—SURPLUS MARINE INDUSTRIAL
REAL PROPERTY**

APPROVING DELEGATION OF DISPOSAL AUTHORITY TO NAVY DEPARTMENT WITH RESPECT TO SHIPYARDS AT SEATTLE, WASH., AND AUTHORIZING EXCHANGE OF INTERESTS WITH TODD SHIPYARDS CORPORATION, IN SHIPYARDS AT TACOMA, WASH.

It is represented by the Bureau of Ships, Navy Department, that under facilities contract designated NObs-48 the Government has heretofore provided certain ship-repair facilities having a total estimated cost of \$5,887,750 as additions to a shipyard owned and operated by Todd Shipyards Corporation, at Seattle, Washington. Such facilities so provided include two floating drydocks, a parcel of land, and buildings, machinery, and equipment located partly on contractor-owned land, and partly on the Government-owned land.

It is further represented that pursuant to another facilities contract designated

¹ SPA Reg. 20 (11 F.R. 182, 561, 3302).

NObs-779, the Government has provided certain shipbuilding facilities having a total estimated cost of \$14,374,747 as additions to a shipyard owned and operated by Todd Shipyards Corporation and its wholly-owned subsidiary, Todd Pacific Shipyards, at Tacoma, Washington. The latter facilities include eight parcels of land, and building ways, piers, buildings, machinery, and equipment located partly on contractor-owned land and partly on the Government-owned land.

It is further represented by the Bureau of Ships that the Todd Shipyards Corporation, under its contract with the Government, has a valid option to acquire the Government's interest on all of the installations at the Seattle shipyard, except the drydocks, and has indicated its intention of exercising its option. The Bureau of Ships desires to acquire the interest of Todd Shipyards Corporation at Tacoma in order that the Navy Department may have the full ownership of that installation as a permanent naval establishment. The Bureau of Ships does not desire to retain the Government's interest in the Seattle property.

Negotiations heretofore carried on between the representatives of the Bureau of Ships and the Todd Shipyards Corporation indicate that an exchange of interests may be effected by negotiation, which will afford the Government full ownership of the Tacoma shipyards, and the Todd Shipyards Corporation the full ownership of the Seattle shipyards; and the Bureau of Ships has requested that authority be given to effectuate the same.

Pursuant to the authority of the Surplus Property Act of 1944 (58 Stat. 765; 50 U. S. C. App. Sup. 1611), Public Law 181, 79th Congress, 1st Session (59 Stat. 533), Executive Order 9689 (11 F.R. 1265), and Public Law 375, 79th Congress, 2d Session, *It is hereby ordered, That:*

1. Upon a declaration of surplus by the Navy Department of the Government's interest in the Seattle shipyards, subject to the option in favor of the Todd Shipyards Corporation; and upon notice by the Todd Shipyards Corporation of its election to exercise its option to acquire the Government's interest therein, approval is hereby given to War Assets Administration to delegate the disposal functions with respect to said Government's interest in said shipyards to the Navy Department.

2. Upon a delegation made by the War Assets Administration to the Navy Department of a disposal authority with respect to the Seattle shipyards, the Navy Department shall establish its estimate of the fair value of the Government's interest in the Seattle shipyards, and also its estimate of the fair value of the interest of the Todd Shipyards Corporation in the Tacoma shipyards, which estimates shall be reported to the War Assets Administration for approval.

3. The Navy Department, under its delegation from the War Assets Administration, if it determines that the Todd Shipyards Corporation has a valid option on said property, may dispose of the Government's interest in the Seattle shipyards to said corporation in pur-

suant to the terms of its option; and, pursuant to the provisions of section 15 of the Surplus Property Act of 1944, if it deems it to be in the interest of the Government, is authorized to accept in exchange for said property the interest of the Todd Shipyards Corporation in the Tacoma shipyards, with an appropriate adjustment for any difference in the fair values of said properties, so that the Government will receive the fair value of its property in the Seattle shipyards, the Todd Shipyards Corporation paying in cash any sum by which the fair value of the Government's interest in the Seattle shipyards exceeds the fair value of the Todd Shipyards Corporation's interest in the Tacoma shipyards.

4. After acquiring the interest of the Todd Shipyards Corporation in the Tacoma shipyards, the Navy Department, under the delegation of authority, may effect a transfer of said property to the Navy Department upon its payment of the fair value thereof to the War Assets Administration.

5. Any cash payment by Todd Shipyards Corporation representing the excess value as provided by paragraph 3 hereof, and funds representing the fair value of the interest acquired by the Navy Department in the Tacoma shipyards, shall be deposited in the War Assets Administration Special Fund Account in the Treasury of the United States.

6. A complete statement of the proposed disposal of the Government's interest in the Seattle shipyards to the Todd Shipyards Corporation shall be made available to the Attorney General before the transaction is completed in compliance with the provisions of section 20 of the act.

7. When the transaction is completed the Navy Department shall make a full report thereof to the War Assets Administration.

This order shall become effective June 21, 1946.

Administrator.

Exhibit A: List of production equipment in short supply.

AUTHORITY: §§ 8321.1 to 8321.13, inclusive, issued under the Surplus Property Act of 1944 (58 Stat. 765; 50 U.S.C. App. Sup. 1611), Public Law 181, 79th Cong., 1st Sess. (59 Stat. 533), Executive Order 9689 (11 F.R. 1265), and Pub. Law 375, 79th Cong., 2d Sess.

§ 8321.1 *Definitions*—(a) *Terms defined in act.* Terms not defined in paragraph (b) of this section which are defined in the Surplus Property Act of 1944 shall in this part have the meaning given to them in the act.

(b) *Other terms.* (1) "Production materials" as used in this part means those raw or semi-finished materials which are themselves generally employed in the fabrication of end products or incorporated therein. Such materials customarily move from a manufacturer to an industrial user or distributor whose function combines that of a wholesaler and retailer. "Production materials" does not include finished products which may be incorporated in end products but customarily move to the consumer through wholesalers and retailers. These latter products are governed by the pricing and distribution policy provided for in Revised Special Order 24.¹

(2) "Production equipment" means machine tools, plant equipment and attachments thereto except land and buildings, whether located in Government-owned or privately owned plants or property.

(3) "Facilities contract" means a lease, rental agreement, or other contract or contract provision, specifically governing the acquisition, use, or disposition of Government-owned machinery, tools, building installations, or other property furnished to or acquired by a war contractor for any war production purpose except incorporation in end products.

(4) "Small business" means any commercial, industrial, or manufacturing enterprise or group of enterprises, under common ownership and control, which does not on the date of acquisition of any property pursuant to this part have more than five hundred (500) employees, or any such enterprise which by reason of its relative size and position in a particular industry is determined by the War Assets Administration to be a small business.

(5) "Integrated plant" means land, buildings, and production equipment capable of operation as a complete unit.

§ 8321.2 *Scope.* This part applies to disposals of production materials and production equipment as contractor inventory, or pursuant to the provisions of other applicable regulations of the Administrator, located in the continental United States, its territories and possessions, except disposals to priority claimants as provided in Part 8302² and non-profit institutions and instrumentalities as provided in Part 8314.³

§ 8321.3 *Basic policy.* The Congressional policy announced by the Surplus

¹ 11 F.R. 3075.

² Reg. 2 (11 F.R. 5125, 6237, 6545).

³ SPA Reg. 14 (10 F.R. 14028; 11 F.R. 2714, 4096).

Property Act of 1944 is to discourage monopolistic practices, to foster wide distribution of surplus commodities to consumers at fair prices, and to strengthen and preserve the competitive position of small business concerns by utilizing normal channels of trade to the extent consistent with efficient and economical distribution of property. This part is intended to implement that policy by providing a method for the pricing and distribution of production materials and production equipment as defined herein, and in the case of production equipment in short supply, to limit effectively inequitable distribution which may occur by reason of advantages now enjoyed by war contractors in possession of such production equipment under facilities contracts containing options or other purchase rights by which such contractors may acquire title to production equipment on specified terms or on terms to be negotiated, including the right of first refusal as well as the right to acquire production equipment in short supply as contractor inventory.

§ 8321.4 *Methods of sale.* (a) Generally, fixed price sales shall be used for national programs, regional sales projects, and sales at the site in preference to all other methods. The fixed price method of sale shall be used when property is in new condition, is available in inventory in large quantities, and is either a standard commercial item or is readily marketable; and may be used whenever property, either new or used, can best be moved by this method. Production equipment which is subject to the fixed price formula provided for in Part 8313⁴ shall be disposed of pursuant to the provisions of such part.

(b) Other methods of sale may be used when it is not practicable to use the fixed price method of sale. The following additional standards shall be used as a guide in the choice of these other methods:

(1) *Sealed bid.* The sealed bid method shall be used where the property is a nonstandard commercial item, or is of unknown marketability, or is available only in mixed lots or small quantities.

(2) *Spot sale.* The spot sale method shall be used when rapid clearance of a site is necessary, or when the experience of the disposal agency has shown this to be the best method of disposing of the specific type of property involved. In conducting such sales, fixed prices, competitive bids, or public auction may be used.

(3) *Negotiated sale.* Negotiated sales shall be used:

(i) When the proposed purchaser can perform certain functions necessary to make the property salable, such as repairing, rehabilitating, sorting, grading, or testing, more economically and effectively than the disposal agency or others;

(ii) When the property is non-standard and has no apparent civilian use;

(iii) When the property is such a hazard to health and property as to require immediate disposition;

(iv) When the property will spoil or deteriorate so rapidly as to jeopardize any disposal unless immediately sold;

(v) When another method of sale has proved unsuccessful; or,

(vi) When the property is to be sold to a foreign government at the request of the State Department.

§ 8321.5 *Prices and pricing methods.* In the fixed price method of sale, prices shall be established as close to the current market price as practicable, recognizing that they must be attractive enough to move the property in volume and compensate for any unusual features of the property which may add to the difficulty of reselling. Methods of distributing both production materials and production equipment vary in accordance with the nature of the property and the established commercial practices applicable to different types of property. As a consequence, pricing methods must likewise conform to such trade practices and distribution methods.

(a) *Production materials.* (1) In general, sales of production materials are governed by fixed prices both to ultimate users and to distributors. In the case of most such commodities, the price to the distributor and the user is the same for a specified minimum quantity at which the property may be economically disposed. Consequently, such commodities will be disposed of at one price for one minimum quantity, and only one level of trade shall be applicable. (Examples: commodities which are disposed of in bulk, such as toluene, gasoline and sulfuric acid.)

(2) Certain production materials follow a trade practice whereby the manufacturer sells in a minimum quantity to both the distributor and the user, allowing a discount to the distributor. In such cases a similar discount will be allowed the distributor by the disposal agency. (Example: steel pipe.)

(3) It is recognized that packaging may be a determinant as to whether any particular material is adaptable for sale to ultimate users through the normal channels of trade including wholesalers and retailers, or for sale to industrial users and distributors. For example, turpentine in tank cars is customarily sold to industrial users and distributors while the same material in five (5) gallon containers is customarily sold through wholesalers and retailers. The disposal agency shall determine, in accordance with customary trade practice, and its packaging, whether any particular material is to be disposed of as a production material pursuant to the provisions of this part or as consumer goods under Revised Special Order 24.

(b) *Production equipment.* (1) Sales of production equipment are likewise governed by fixed prices, a substantial portion being subject to the fixed pricing formula provided for in Part 8313. Production equipment subject to such fixed pricing formula normally moves predominantly from the manufacturer to an ultimate user or distributor at a uniform price without a discount.

(2) Production equipment which is not subject to the pricing formula provided for in Part 8313 is governed by fixed prices to ultimate users or distributors as follows:

(i) Much production equipment generally moves from the manufacturer to an industrial user without the intermediate distributive function of a distributor. Such equipment shall be disposed of at a single price for one minimum quantity and without a discount. (Example: large industrial equipment such as furnaces, mills.)

(ii) Certain production equipment is sold by manufacturers in accordance with a trade practice to industrial users and distributors, allowing a discount to the distributor.

(iii) Finally, some industrial equipment is sold by manufacturers only through the regular and established channels of trade. As a consequence, discounts will be permitted to each level of trade for the distributive function performed. (Example: small industrial tools.)

§ 8321.6 *Minimum quantities.* The minimum quantity, i. e., the minimum lot size, which should be offered for sale by the disposal agency should to the extent feasible be a quantity which will enable small independent purchasers to participate. Such minimum quantities may be larger when (a) large quantities of merchandise are packaged in military cartons or in bulk containers and it would be uneconomical to repackage the property to provide for sales in smaller quantities, or (b) it is necessary to consolidate several packages in order to assure an equitable or appropriate distribution of the property to each purchaser.

§ 8321.7 *Precedence for small purchasers.* In any fixed price method of sale when the total supply of a commodity is less than the amount ordered, consideration shall be given to the needs of other purchasers before large quantities are sold to one or a few purchasers. Precedence shall be given to orders received from small purchasers and from distributors who serve small independent purchasers.

§ 8321.8 *Classes of purchasers.* The following conditions shall be observed for the classes of purchasers specified below:

(a) Sales may be made exclusively to the original producer of the surplus property only when the original producer can perform certain necessary functions, such as repairing, rehabilitating, sorting, grading, or testing, more effectively than the disposal agency or others.

(b) Commercial exporters and purchasing commissions representing foreign governments shall be permitted to participate in sales of production materials and production equipment, except that items in critically short supply in the domestic economy may be considered for export only in accordance with the objectives of the act, and made available only when determined to meet such objectives by the Administrator or such other person as he may designate.

(c) Purchasing agents (including resident buyers, commission men, brokers, and other agents) who perform the purchasing function for the principals they represent, shall be permitted to participate in disposals of surplus property. Sales made through these agents shall be made only in the name of the

⁴ SPA Rev. Reg. 13 (11 F.R. 2381, 3691).

principal they represent and in program sales and sales at the site, at the level of distribution of the principal. Such agents may be required to present a written authorization from the principal for each purchase.

(d) All purchasers who may participate in program sales shall also be eligible to acquire property offered by any other method.

(e) Ultimate consumers (persons who buy for their own personal use) are not ordinarily expected to purchase surplus property directly from the disposal agency except when such property is offered in suitable lots or units under circumstances which will not complicate the work of disposal; or where sales to ultimate consumers, for example, through rural farm auctions, would be more effective than offerings by other methods.

§ 8321.9 *Disposals of production equipment in short supply by owning agencies.* Production equipment which the Administrator has determined to be in short supply is listed in Exhibit A of this part. Such exhibit may be amended from time to time to reflect changing circumstances in the supply of production equipment. To assure equitable distribution of this type of property, disposal thereof shall be made only pursuant to the conditions prescribed herein.

(a) *Sales to contractors in possession under facilities contracts.* Owning agencies empowered to dispose of plant equipment as contractor inventory to contractors in possession pursuant to the provisions of Part 8306,⁹ shall make such disposals only in accord with the following:

(1) No item of production equipment in short supply may be disposed of to a contractor in possession unless at the time of sale, or previously thereto, such contractor has released and waived any and all options or other purchase rights to any and all production equipment, including any rights of first refusal provided for by the particular facilities contract.

(2) Subject only to the provisions of paragraph (a) (3) of this section, a contractor may acquire no more than twenty-five (25) percent in number of each item of production equipment in short supply listed in Exhibit A of this part. In computing such allowance, the base upon which such percentage shall be computed shall include all the items which at the time of sale are owned by the Government under the particular facilities contract, and which are located in the war contractor's plant.

(3) A contractor in possession who is engaged in a small business as defined herein and who desires to acquire for his own use and not for resale production equipment from an owning agency may acquire the production equipment covered by the particular facilities contract without limitations as to short supply items, *Provided*, That the total cost to the Government of the production equipment covered by that particular facilities contract does not exceed \$300,000.

(b) *Retention as contractor inventory.* In those cases where contractors, by pre-termination agreements or otherwise,

have indicated an intention to retain any production equipment pursuant to the provisions of Part 8309⁹ and listed in Exhibit A of this part, then in such event, owning agencies shall be governed by the provisions of paragraph (a) of this section notwithstanding that options or other purchase rights do not exist, when such retention is for the use of such equipment by the contractor, *Provided, however*, That retentions for resale by the contractor of any item of production equipment in short supply is not authorized hereunder, and instead such property shall be declared surplus to the appropriate disposal agency pursuant to the applicable regulations of the Administrator.

§ 8321.10 *Disposals of production equipment in short supply by disposal agencies.* (a) In those cases where a contractor seeks to acquire from the disposal agency only a portion of the production equipment acquired by the Government under a facilities contract which provides for options or other purchase rights in the contract, then in such event, and in return for a full release and waiver of any and all options or other purchase rights to any and all production equipment, including the right of first refusal as to all the production equipment covered by such facilities contract, the disposal agency may dispose of not more than twenty-five (25) percent in number of each item of production equipment in short supply as listed in Exhibit A of this part and which are owned by the Government at the time of sale under the particular facilities contract.

(b) In the case of purchasers or lessees of land and buildings being disposed of as industrial or transportation real property pursuant to the provisions of Part 8310,⁷ or as airport property pursuant to Part 8316,⁸ or as marine industrial real property pursuant to the provisions of Part 8320,⁹ and who desire to acquire only a portion of any production equipment located on the premises or used in

the operation of any plant situated on such premises, the disposal agency may dispose of production equipment in short supply as listed in Exhibit A of this part and situated on such premises only upon a written representation from the purchaser that he intends to use such equipment in connection with the productive operation of the land and buildings and that he is not purchasing the production equipment in short supply for the purpose of reselling it, directly or indirectly, at a profit.

§ 8321.11 *Disposals of integrated plants.* Whenever an integrated plant is disposed of pursuant to the provisions of Part 8310 or Part 8320, such disposal may include all items of production equipment in short supply which are a part of the integrated plant and located therein, *Provided*, That the purchaser makes a representation in writing that he intends to use such equipment in an integrated plan of operation and that he is not acquiring the production equipment for the purpose of selling it, directly or indirectly, at a profit.

§ 8321.12 *Leases and donations of production equipment in short supply.* Surplus production equipment in short supply as listed in Exhibit A of this part may not be leased by the disposal agency or donated by owning and disposal agencies under the Surplus Property Act, or any other law, for other than instructional purposes without the approval of the Administrator or such other person as he may designate.

§ 8321.13 *Interpretation of fractions.* When determining the number of items of production equipment in short supply hereunder by application of a fixed percentage, fractions shall be disregarded and not included in the amount authorized for any purchaser.

This part shall become effective June 27, 1946.

OFFICE OF PRICE ADMINISTRATION.

[Rev. SO 119, Order 267]

BOETSCH BROS.

ADJUSTMENT OF CEILING PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to sections 15 and 16 of Revised Supplementary Order No. 119, it is ordered:

(a) *Manufacturer's ceiling prices.* Boetsch Brothers, 221 East 144th Street, New York 51, N. Y., may compute its adjusted ceiling prices for portable acoustic phonographs of its manufacture by increasing by 9 percent the ceiling prices to each class of purchaser as established by Maximum Price Regulation No. 188.

As used in this paragraph "ceiling prices as established under Maximum Price Regulation No. 188", shall mean the ceiling prices established under that regulation without the inclusion in those ceiling prices either directly or indirectly of any adjustment, either individual or industry-wide.

(b) *Ceiling prices of purchasers for resale.* (1) A purchaser for resale, who had an established ceiling price prior to the effective date of this order for any article, whose manufacturer's ceiling price was adjusted in accordance with the provisions of this order, may increase that established ceiling price by 9 percent.

(2) A purchaser for resale who had no established ceiling price prior to the effective date of this order for any article whose ceiling price is subject to this order, shall determine his ceiling price by adding to his invoice cost the same percentage markup which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose the "most comparable article" is one which meets all the following tests:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage markup is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration, however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

If the resale ceiling price cannot be determined under the above method, the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts and allowances on sales to each class of purchaser in effect during March 1942, or thereafter, properly established under OPA regulations.

(d) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted ceiling prices for resales of the articles. This notice may be given in any convenient form.

(e) All requests contained in the application for price adjustment filed by Boetsch Brothers, assigned OPA Docket No. 6069-SO 119-76c, not specifically granted by this order are hereby denied.

(f) The provisions of Supplementary Order No. 153 shall have no application to any sale or delivery of any article subject to this order.

(g) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective on the 26th day of June 1946.

Issued this 25th day of June 1946.

Administrator.

(a) *Manufacturer's maximum prices.* The Duro Metal Products Co., 2649-59 N. Kildare Avenue, Chicago, Ill., may increase by 8.3 percent its current maximum prices (exclusive of any permitted increase) for sales of hand tools which it manufactures.

(b) *Maximum prices of purchasers for resale.* A reseller shall calculate his ceiling price by adding to his invoice cost the same percentage mark-up which he has on the "most comparable article" for which he has a properly established ceiling

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage mark-up is applied.

If the maximum resale price cannot be determined under the above method, the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to section 5 of Supplementary Order No. 148; *It is ordered:*

(a) This order establishes maximum prices for sales and deliveries of Model No. 850 Hand Cultivator, manufactured by The Geyer Manufacturing Company, 200 E. Third Street, Rock Falls, Ill.

(1) For all sales and deliveries of the following articles by the manufacturer to the class of purchaser specified below, the adjusted maximum prices are as follows:

(2) For sales and deliveries by the manufacturer to all other classes of purchasers the maximum prices are the adjusted maximum prices set forth in paragraph (a) (1), adjusted to reflect the manufacturer's customary differentials for sales to those other classes of purchasers.

(b) Resellers of articles which the manufacturer has sold at an adjusted ceiling price determined under this order shall determine their maximum prices as follows:

A reseller who determines his maximum resale price under the General Maximum Price Regulation shall calculate his ceiling price by adding to his invoice cost the same percentage markup which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose, the "most comparable article" is the one which meets all of the following tests:

(1) It belongs to the narrowest trade category which includes the article being priced.

(2) Both it and the article being priced were purchased from the same class of supplier.

(3) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage markup is applied.

(4) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration; however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

If the maximum resale price cannot be determined under the above method the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts and allowances on sales to each class of purchaser in effect during March 1942, or thereafter properly established under OPA regulations.

(d) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the articles. This notice may be given in any convenient form.

(e) The provisions of Supplementary Order No. 153 shall not apply to the determination of ceiling prices for resales of articles covered by this order.

(f) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective on the 26th day of June 1946.

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to section 5 of Supplementary Order No. 148, *It is ordered:*

(a) This order establishes maximum prices for sales and deliveries of certain caskets manufactured by the Continental Casket Company, 3737 So. Michigan Avenue, Chicago 15, Ill.

(1) For all sales and deliveries of the following caskets by the manufacturer to the class of purchaser indicated below, the adjusted maximum prices are as follows:

Article and Model No.:	Maximum price to funeral director (each)

Casket, 3666-D-----	32.50

(2) For sales and deliveries by the manufacturer to all other classes of purchasers, the maximum prices are the adjusted maximum prices set forth in paragraph (a) (1), adjusted to reflect the manufacturers' customary differentials for sales to those other classes of purchasers.

(b) *Resellers' ceiling prices.* Resellers of an article which the manufacturer has sold at an adjusted ceiling price determined under this order shall determine their maximum prices as follows:

(1) A reseller who had a properly established maximum price in effect before this order was issued for an article covered by this order may add to that maximum price an adjustment charge in the same dollar-and-cents amount as the adjustment charge authorized by this order for, and which he has paid to, his supplier.

(2) If the reseller did not have a properly established maximum price for the article in effect before this order was issued he shall first determine a maximum price (exclusive of adjustment charges), and to that price he may add an adjustment charge in the same dollar-and-cents amount as the adjustment authorized by this order for, and which he has paid to his supplier. To find his maximum price (exclusive of adjustment charges) for this purpose the reseller shall add to his invoice cost, less an adjustment charge stated on that invoice, the same percentage mark-up which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose the "most comparable article" is the one which meets all of the following tests:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage mark-up is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration; however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

(3) If the maximum resale price cannot be determined under the above method the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(4) The provisions of Supplementary Order No. 153 shall not apply to the determination of ceiling prices for resales of the article covered by this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts, and allowances on sales to each class of purchaser in effect during March 1942, or thereafter properly established under OPA regulations.

(d) *Change in resellers' margins.* Resellers' maximum prices adjusted in accordance with this order are subject to further adjustments which may result from any change in resellers' margins which may be effected by the Office of Price Administration to obtain absorption by resellers of any industry-wide increase in manufacturers' maximum prices.

(e) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the articles. This notice may be given in any convenient form.

The amount of the adjustment in maximum prices granted by this order must be stated separately on invoices to all classes of purchasers, except for sales at retail.

(f) This order may be revoked or amended by the Price Administrator at any time.

(g) This order shall become effective on the 26th day of June 1946.

Issued this 25th day of June 1946.

[SO 133, Order 57]

FORBERT CORP.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to Supplementary Order No. 133, it is ordered:

(a) *Manufacturer's maximum prices.* Forbert Corporation, McGaheysville, Virginia, may increase its maximum prices properly established under Maximum Price Regulation No. 188 (exclusive of any adjustment charges) for articles of wood furniture which it manufactures by 20.5 percent of each such maximum price.

(b) *Resellers' ceiling prices.* Resellers of articles which the manufacturer has sold at an adjusted ceiling price determined under this order shall determine their maximum prices as follows:

(1) A retailer who must determine his ceiling price under Maximum Price Regulation No. 580, and a wholesaler who must determine his ceiling prices under Maximum Price Regulation No. 590, shall compute their ceiling prices in the manner provided by those regulations. However, if the supplier's invoice states both an "unadjusted maximum price" and a selling price, the reseller shall compute his ceiling prices under those regulations as they have been modified by Order No. 4800 under § 1499.159b of Maximum Price Regulation No. 188.

(2) A reseller who determines his maximum resale price under the General Maximum Price Regulation, and whose supplier's invoice states both an "unadjusted maximum price" and a selling price, shall compute his ceiling price under that regulation as modified by Order No. 4800 under § 1499.159b of Maximum Price Regulation No. 188.

If his supplier's invoice does not state an "unadjusted maximum price" the reseller shall calculate his ceiling prices by adding to his invoice cost the same percentage mark-up which he had on the "most comparable article" for which he has a properly established ceiling price. For this purpose, the "most comparable article" is the one which meets all of the following tests:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of article to which, according to customary trade practices, an approximately uniform percentage mark-up is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration; however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

If the maximum resale price cannot be determined under the above method, the reseller shall apply to the Office of Price

Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section shall reflect the supplier's prices as adjusted in accordance with this order.

(3) The provisions of Supplementary Order No. 153 shall not apply to the determination of ceiling prices for resales of articles covered by this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts, and allowances on sales to each class of purchaser in effect during March 1942, or, thereafter, properly established under Office of Price Administration regulations.

(d) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the articles. This notice may be given in any convenient form.

(e) The manufacturer shall file the report described in section 5 of Supplementary Order No. 133 (which shall include a beginning and ending physical inventory) with the Office of Price Administration, Washington 25, D. C., and shall comply with the invoicing and reporting provisions of Order No. 4800 under Maximum Price Regulation No. 188.

(f) This order may be revoked or amended by the Price Administrator at any time.

(g) This order shall become effective on the 25th day of June 1946.

Issued this 25th day of June 1946.

Revised Supplementary Order No. 119, it is ordered:

(a) *Manufacturer's ceiling prices.* National Enameling and Stamping Company, Milwaukee, Wis., may compute its adjusted ceiling prices for all articles of its lithographed household utensils line which it manufactures, as follows:

(1) For an article in its line during October 1941, the adjusted ceiling price is the highest price charged during that month to each class of purchaser increased by 10.9 percent.

(2) For an article not in its line during October 1941, but which has a properly established ceiling price, the adjusted ceiling price is the article's properly established ceiling price for the particular sale (exclusive of all permitted increases or adjustment charges) increased by the percentage determined in accordance with "Note 3" in section 8 of Revised Supplementary Order No. 119.

(3) The manufacturer's adjusted ceiling price fixed in accordance with this order is his new ceiling price if it is higher than his previously established ceiling price including all increases and adjustments otherwise authorized for him individually or for his industry.

(b) *Ceiling prices of purchasers for resale.* (1) A purchaser for resale, who had an established ceiling price prior to the effective date of this order for any article, whose manufacturer's ceiling price was adjusted in accordance with the provisions of this order, may increase that established ceiling price by 10.9 percent.

(2) A purchaser for resale who had no established ceiling price prior to the effective date of this order for any article whose ceiling price is subject to this order, shall determine his ceiling price by adding to his invoice cost the same percentage markup which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose the "most comparable article" is one which meets all the following tests:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage markup is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration, however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

If the resale ceiling price cannot be determined under the above method, the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that sec-

tion will reflect the supplier's prices as adjusted in accordance with this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts and allowances on sales to each class of purchaser in effect during March 1942, or thereafter, properly established under OPA regulations.

(d) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted ceiling prices for resales of the articles. This notice may be given in any convenient form.

(e) All requests contained in the application for price adjustment filed by National Enameling and Stamping Company, assigned OPA Docket No. 6069-SO 119-61c, not specifically granted by this order are hereby denied.

(f) The provisions of Supplementary Order No. 153 shall have no application to any sale or delivery of any article subject to this order.

(g) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective on the 26th day of June 1946.

Issued this 25th day of June 1946.

Administrator.

For the reasons set forth in an opinion issued simultaneously herewith and pursuant to the provisions of General Order No. 68 this order is issued:

SECTION 1. Transactions covered by this order. This order covers all retail sales of the commodities specified in Table I, made by any seller of such commodities who makes such sale at or from a point located within the County of Montgomery in the State of Ohio but not within the limits of Metropolitan Dayton. For the purposes of this order, "Metropolitan Dayton" (excluded from coverage by this order) consists of the area within the limits of Dayton, Beaverton, Inglewood, Oakwood and Wright Field (Areas A and B) in said County of Montgomery.

SEC. 2. Definition of retail sales. For the purposes of this order, a "retail sale" means a sale to an ultimate user or to a purchaser for resale on an installed basis: *Provided, however,* That this order shall not apply to sales by manufacturers or jobbers of any asphalt, tarred, asbestos cement or other composition siding or roofing materials or of thermal insulation such as mineral wool, vermiculite, etc., to bona fide applicators of roofing and/or siding and/or insulation.

For the purposes of this order, an "applicator of roofing and/or siding and/or insulation" is a contractor engaged generally in the business of furnishing labor and/or composition roofing and/or siding and/or insulation materials for the purpose of installing such roofing, siding or insulation materials in buildings or structures.

SEC. 3. Description of items covered by this order. This order covers the list of "hard building materials" set forth in the annexed price list Table I, and made a part hereof, including, but not limited to, plaster, lath, lime, cement, fire brick, flue lining and insulation board. Other related items may be added from time to time.

SEC. 4. Relation to other regulations. The maximum prices fixed by this order supersede any maximum price or pricing method previously fixed by any other regulations or orders for the sales of the items set out in Table I of this order,

subject to the provisions of section 1 of this order. Except to the extent they are inconsistent with the provisions of this order, the provisions of the General Maximum Price Regulation (except sections 18, 19 and 19a), and of other applicable regulations and orders, shall apply to sales covered by this order.

SEC. 5. Maximum prices, discounts and delivery. (a) The maximum prices for hard building materials covered by this order are set forth in Table I which is annexed to and made a part of this order. Prices lower than the maximum prices may, of course, be charged or paid.

SEC. 7. Sales slips and records. Every seller covered by this order, regardless of previous custom, shall give the purchaser a receipt showing the date, name and address of the seller; the description of the item sold and the price received for it. If the seller customarily prepared his sales slips in more than one copy, he must keep, for at least one year after delivery, a duplicate copy of each sales slip delivered by him pursuant to this section.

(b) The price limitations set forth in this order shall not be evaded by direct or indirect methods, in connection with an offer, solicitation, agreement, sales, delivery, purchase or receipt of any of the commodities covered by this order, whether alone or in conjunction with any other commodity or by way of commissions, services, transportation or other charges, discounts, premiums, or other privileges or by tying agreement or other understanding or by making the terms and conditions of sale more onerous to buyers than they were during March 1942 (except as specifically per-

mitted by this order or applicable regulations).

SEC. 9. *Amendment.* This order may be amended or revoked at any time by the Office of Price Administration.
