Public Library, Astor, Lenox and Tilden Foundations.*

THE LIBRARY JOURNAL

VOL. 39

JANUARY, 1914

NO. 1

THE Kaaterskill Conference was the leading library event of 1913, ranking next to that at Magnolia in attendance, and in its total of 892 exceeding that at Narragansett Pier by one person, presumably Miss Pansy Patterson. The interstate gathering at Atlantic City and Library Week at Lake George also attracted their full quota, while some of the state associations in the West also held interstate conferences. Telegraphic word as the LIBRARY JOURNAL goes to press announces that Washington will be the meeting place for 1914, while in 1915 San Francisco seems the predestined goal of all national associations. In England, the Bournemouth conference of the national association passed off successfully, and there is to be a strong endeavor in 1914 to obtain such a delegation from the United States as will give the Oxford conference international importance. The exposition of the book at Leipzig, which was planned to be of international scope, may prove somewhat disappointing in this respect; but American participation is now practically assured, either through a Congressional appropriation and a government building, or in a separate library exhibit, planned by the special committee of the A. L. A., which has already obtained assurances of financial support and library cooperation. Though there will be no international library conference there, Americans will be made welcome at the meeting of German librarians which is to occur at Leipzig in May. Internationalism in library affairs is encouraged by visits of librarians from one country to another, and Americans this year have had the pleasure of welcoming M. Paul Otlet from Belgium and Mr. Kudalkar from India. Within this country two new state commissions have been organized, in Arkansas and South Dakota, leaving only eleven states without commissions or their equivalent.

THE hand of death, which last year spared the library profession, has made for it heavy loss in 1913 in the passing of three members distinguished also as scholars, who had been honored by the presidency of the American Library Association. John Shaw Billings, Josephus Nelson Larned and Reuben Gold Thwaites, had filled their measure of years with notable achievement, both in librarianship and in literature, and their passing has left a great gap in the ranks of the leaders. The death of Charles C. Soule, long a leader in the profession, though never a professional librarian, is not less notable a loss. The appointment of W. Dawson Johnston to the new library work at St. Paul is a serious loss to New York and to the special field of university librarianship in which he was making his mark as a leader, and it is a pity that Columbia University had not emphasized the importance of retaining him in that service. It is to be hoped that the onerous duties of organizing a great reference library may not indefinitely delay the completion of the work on university libraries which will round out his career as a university librarian, and doubtless his unwearying industry will enable him to face the two tasks with success. Edwin H. Anderson has been doubly honored within the year, by his formal appointment in succession to Dr. Billings as the head of the New York Public Library and by his election to the presidency of the American Library Association; and the work of the great metropolitan system will be pressed forward under his administration.

WHILE the past year has not been notable architecturally for the opening of great library buildings, the new buildings of moderate size at Portland, Ore., and Somerville, Mass., present many interesting features, and new buildings have also been finished

at Harrisburg, Pa., Bangor, Me., and elsewhere, while the number of branch libraries has notably increased, especially at Denver. Harvard's new library building is progressing toward completion. At Brooklyn the work on the central library building is unfortunately stopped pending further appropriations by the city, and Philadelphia is still held up from beginning its fine new building on the excellent site it has obtained, because of conditions in the original appropriation which have to be modified by the municipal authorities before work can proceed. Foundations are ready for the great library at St. Paul, the gift of J. J. Hill, and plans for the new Detroit building, for the Johns Hopkins University Library at Baltimore, and for the John Crerar Library at Chicago, all promise notable buildings; three of these emphasize private benevolence in respect to libraries outside the Carnegie foundation. The transfer of Mr. Carnegie's benevolence to a corporation has not interfered with wide giving for libraries, but the record for Carnegie gifts for the year 1913 is not yet at hand.

A proposition has been put forward in Congress to capture the Library of Congress for the spoils system by taking the appointment of the staff out of the hands of the librarian, by whom it is practically exercised, and placing it directly in the control of the joint committee on the Library. It is scarcely possible that this can be more than a last attack from the dwindling opponents of the merit system, hungry for office, upon an institution which above all others should be free from such an attack. It must be admitted by foes as well as friends of the Democratic party and the new administration that they have done exceptionally well in resisting the enormous pressure for a return to the spoils system, and after this successful resistance it is unlikely that a surrender will be made where that would be at once most flagrant and most unjustifiable, since Dr. Putnam's ad-

ministration of the national library has made it a world-wide model of effectiveness and usefulness, absolutely non-partisan in character and nation-wide in value.

WITH this initial number of the LIBRARY JOURNAL in its thirty-ninth year, a number of changes in typography and arrangement have been made which we trust will commend it more thoroughly to the profession. Particularly, also, there will be endeavor to make it more comprehensive in plan and scope, to give it a broader character internationally, and to use illustrations more freely, especially with reference to architectural development. At the same time the review of library activity in its many present ramifications under the general caption "Library Work" will serve not only as an index to library periodical literature of international scope, but will bring out, from the subject side, items of interest which, in the rapidly increasing flood of library material, might otherwise be lost. This division will, in fact, occupy most of the field of the library periodical of that title, formerly published by the H. W. Wilson Co. Under the caption "The Library World" will be brought together material of geographic rather than of subject relationship, inclusive of library reports, gifts and bequests, and the miscellaneous material of notes and news. Segregation of the LIBRARY JOURNAL'S miscellaneous material along these two lines—geographical and subject—will, we hope, serve toward more efficient usefulness. During the past year there has been too much reason for apology to our contributors and to our readers, resulting from frequent changes at the office desk, arising from quite independent causes, as far removed as illness and matrimony; but it is hoped that new arrangements now in process will remedy defects for which we have had reason to apologize, and will make permanent provision for the continuance and growth of the LIBRARY JOURNAL as the leading exponent of the library profession.

LIBRARY LEGISLATION IN 1913

By W. R. EASTMAN

DURING the year 1913 the legislatures of forty-four states have been in session. The statements which follow are based upon an examination of the published laws of most of the states aided by direct correspondence with the state library commissions, wherever such exist, and with some leading librarian in each of the thirteen states where there was no such commission a year ago. The action of the national Congress, affecting directly the District of Columbia and indirectly the whole country, has also been considered. Returns from thirty-one states, in which the legislatures acted on library matters, and from the District of Columbia have been noted.

Items of special interest this year are the following:

Library commissions were created in two states.

The functions and titles of some existing commissions were changed, marking a clear tendency toward giving them a larger share of responsibility for the state library and its work.

There was also a gratifying increase of commission funds in ten states.

In several states the library laws are being adjusted and improved by careful revision.

The limit for library taxation, where any such limit exists, is being questioned and restated.

Rural library extension is receiving more nearly the attention it deserves. County systems are being brought into operation and the power to contract for library facilities is extended.

In three states the state library is being reorganized for more active service to the public, and the subject of legislative reference is being pushed to the front in four states.

A new retirement pension scheme for librarians appears in one state.

LIBRARY COMMISSIONS

South Dakota has created a free li-

brary commission of five. It includes the governor, the superintendent of public instruction, the state librarian, and two others appointed by the governor for terms of three years, one of them chosen from a list of three named by the library association of the state and the other from a list of three proposed by the state federation of women's clubs. The state library is placed in custody of the commission, and is made the headquarters for library work.

In Arkansas, at the request of the library association of the state, but in the absence of any direct legislation, the governor has appointed an honorary commission of three to encourage the establishment of public libraries and to promote their interests.

In Idaho the continued existence of the library commission was seriously threatened by legislative movements for economy, but better counsels prevailed and the usual appropriation of \$8000 was secured.

In Tennessee the state board of education was made to supersede the free library commission, assuming all of their powers and duties except their system of traveling libraries, which was placed under direction of the state library. Public as well as school libraries are now under the general supervision of the state board of education through their division of library extension. The state free library commission still exists in the law, but has no appropriation for active work.

In Washington, where the present library commission consists of the governor, the attorney general and eight judges of the supreme court, a bill was introduced, but failed to pass, to create a new commission upon a different basis in order to emphasize the popular, rather than the legal, side of the state library and to promote public, normal and traveling library work throughout the state. The friends of the movement expect that more will be heard of this at a future session.

In Oregon, the library commission has taken a new name, and has received a large

addition to its store of books. The law books in the state library have been placed in a separate collection to be henceforth known as the "Supreme Court Library." The remaining books, some 45,000 in number, have been added to the books already in the hands of the state commission, and together they will constitute in future the "Oregon State Library," under control of the library commission, who will be henceforth known as "Trustees of the State Library," the librarian to be secretary to the commission. Some added duties in the line of collecting and indexing public documents and of legislative reference have been laid on the commission. In view of added work an increased appropriation of \$7500 a year is given to the commission.

In Vermont, the name of the "Board of Library Commissioners" was, at their own request, changed to "Free Public Library Commission."

In ten states the annual appropriations for commission work were increased:

In Connecticut, from \$3250 to \$4000 a year.

In Delaware, doubled, to provide book wagons.

In Illinois, from \$1800 to \$5270, to provide an organizer, other assistants and traveling expenses, and \$1700 for books.

In Indiana, from \$10,000 to \$12,500.

In Iowa, the usual appropriation of \$11,000 is continued unchanged, but the amount to be used for salaries is raised from \$6000 to \$7600.

In Massachusetts, \$2000 was voted for a secretary to direct educational work through the libraries for the benefit of foreign-speaking people, with an increase from \$2000 to \$4000 for state aid to libraries in the smaller towns.

In Michigan, from \$4000 to \$5500.

In North Carolina, from \$1500 to \$3000.

In North Dakota, from \$7800 to \$8000.

In Vermont, from \$1000 to \$1500 for traveling libraries, and from \$2500 to \$3000 for the general work, besides \$100 for office expenses.

On the other hand, Kansas shows a decrease from \$2000 to \$1000 for books for traveling libraries and \$50 less for expenses.

New York shows a decrease from \$35,000 to \$25,000 for state allotments to free libraries, and from \$6000 to \$1000 for books for traveling libraries, besides the cutting out of two salaries from the Extension Division which were intended for the library organizers. It is claimed that the last-named action was due to a misunderstanding. The liberal policy of the state for the past twenty-one years in aid of its growing and thriving free libraries, accompanied, as it has been, by careful and friendly official supervision, has been abundantly justified by results, and the present decrease can only be regarded as due to lack of full information attended by an indiscriminate zeal for appearing to cut down some expenses.

There are now 38 library commissions in 37 states, Colorado having two commissions, one for traveling libraries and the other for the general work. In Kansas the commission is for traveling libraries only. These bodies, while doing the same kind of work in their several states, vary both in name and organization. In the names of 28 the word "Commission" or "Commissioners" appears. In California and in Virginia the State Library does the work. In Oregon, the legal name now is "Trustees of the State Library." In New Hampshire the State Library trustees act as a commission. In Connecticut, the name "Committee" is used. In Alabama, the work is committed to the "Department of Archives and History"; in Texas, to the "Library and Historical Commission"; in Rhode Island and in Utah, to the "State Department," or "Board," "of Education," acting by a "Library Committee" or a "Library Secretary"; and in New York to the "Education Department" by its "Division of Educational Extension." In Tennessee, by this year's legislation, the library work is given, as noted above, partly to the "State Department of Education" and partly to the "State Library," while the "Free Library Commission" remains on the statute book, without the means or opportunity to serve. In Arkansas, the library commission of three appointed by the governor is an honorary commission.

The eleven states in which there is, as

yet, no public assignment of work for the libraries are Arizona, Florida, Louisiana, Mississippi, Montana, Nevada, New Mexico, Oklahoma, South Carolina, West Virginia and Wyoming.

FOUNDING, GOVERNMENT AND SUPPORT

In South Dakota the law provides that on petition of five per cent. of the voters in any place, a vote shall be taken on the question of providing library facilities. If the result is affirmative, the mayor or other chief officer shall appoint three library trustees subject to confirmation by the council, commission, trustees or supervisors. Within a tax limit of two mills on the dollar the library trustees are the sole judges of the sum required for the support of the library for the year, and the city council or corresponding body has no choice but to include that amount in the tax levy. The same act appropriates \$3000 for traveling libraries.

In three states steps were taken to secure a general revision and amendment of the library laws. In Iowa these efforts were preceded by a thorough discussion at the meeting of the state association and were successful. A provision applying to all towns and cities, without regard to population, fixed the maximum library tax rate at five mills on the dollar for maintenance and at five mills also for a building and land. This was a decided increase, as the former limit had been three mills for either purpose, and in cities of over 6000 population two mills. There had been some confusion as to the control of libraries in cities under a commission form of government. Libraries in those cities will hereafter operate under the general library law, except that they will have five trustees instead of nine. A tax for library purposes may be laid on unplotted lands within city limits. On the completion of a public library building, any money left in the hands of trustees may be transferred to the maintenance fund.

In Colorado a bill was introduced to abolish the system of self-perpetuating library boards, but failed of enactment. A general revision of library law is scheduled for the next session.

In Pennsylvania an attempt was made, in the interest of public libraries, to obtain a general library law to supersede all previous legislation on the subject. By the proposed system the libraries would have been more completely independent of the school boards than at present. The school authorities were hardly ready to accept the proposition and it failed of approval.

In Indiana, a bill providing for a codification of laws relating to public libraries, in which most of the library trustees and librarians of the state were interested, was passed by one house of the legislature and met no opposition in the other, but was lost sight of in the haste of the last days of the session.

In Kansas, the law for city libraries was changed. On petition of 25 [formerly 50] voters a popular vote on the question of library facilities must be taken. The library directors are to be nine instead of thirteen. The mayor, himself a director, with the consent of the council, appoints the others, two each year for terms of four years. The directors fix the amount of the library tax, but are limited to four-tenths of a mill on the dollar, and, in cities of 40,000 population, it may not exceed one-quarter of a mill. This is a much lower limit than before, having been previously set at two mills for cities of the first class and at three mills for smaller cities. Another act, adopted later in the session, increased the limit for second class cities, having 2000 to 3500 population, to allow a tax of one mill.

The raising of money was the subject of legislative interest in still other states. In Minnesota, a three [formerly two] mill tax is to be allowed except in first class cities. The power of library contract is given to the governing bodies of the city, town, village, or county, and a library fund may be established by a tax of one mill on property not already taxed for library support. This description of "property not already taxed" is important in the arrangements for rural library extension.

In Michigan, city boards of education may raise money for land, buildings, equipment and maintenance of free public libraries by issuing bonds, if such issuance is

approved by the electors and the bonds are to run not more than ten years.

In Wisconsin, the obligation of a city, town or village to raise a certain sum by tax on receiving a conditional library gift can be assumed in future only by a two-thirds vote of the governing body, and will then be subject to a referendum. Here also, bills on account of public library expenditures are hereafter to be paid, not on the order of the library trustees, but only on the order of the city clerk, to whom the library board are to send approved vouchers. By a further amendment annual library reports must reach the state commission by Aug. 1 in each year, instead of Oct. 1, and a detailed report of all fiscal conditions must be made annually to the city, town or village.

In Indiana, in cities of from 4000 to 4500 population, libraries may be transferred from independent boards to school boards with the consent of both boards. Another act of the same state gives to library boards the power, after new library property has been acquired, to sell any real estate formerly used for library purposes.

In Delaware, while the former law required a library to raise a certain amount from taxation as a condition of state aid, an amendment provides that this local contribution may come from any source furnishing a guarantee satisfactory to the state commission.

In New Jersey, school houses may in future be used for public libraries.

In New York, several special acts may be noted. The village of Mohawk received from the late Frederick U. Weller and his wife a large bequest for public library purposes. By an amendment to the village charter a commission was created to hold the property and carry on the library.

The village of White Plains, already raising \$5000 a year by tax for the public library, was authorized to increase the amount to \$8000.

The Grosvenor Library in Buffalo, having the right to hold for library purposes real estate to the value of \$200,000 and securities worth \$200,000, was allowed to increase each of these amounts within the limit of \$300,000.

The trustees of the Queens Borough Public Library, who have held since 1907 the charter right to elect their own successors, were legislated out of office, and future trustees of that library are to be appointed by the mayor of the city of New York.

An amendment to the charter of the city of Rochester was proposed by which the library board, which is a city department, might be placed on the same independent footing in regard to expenditures and contracts as the department of parks and the department of public instruction. The bill also gave to the library board the powers of appointment, control and fixing of compensation of their subordinates and employes. The bill passed both houses, but was recalled from the governor when it was learned that he did not regard it favorably.

In California, \$65,000 was given to the University of California for a class room and library building at the University Farm and Agricultural School at Davis.

In Texas, a certain lot of land in the city of Austin, originally set apart in 1839 for church purposes, was made available for public free library purposes, and the city was authorized to establish and maintain a free public library thereon.

In the District of Columbia, in addition to the usual appropriations for libraries, an appropriation of \$5000 "for one year only" was voted by Congress for the Library for the Blind, located on H street, northwest.

RURAL EXTENSION

Four states have given careful attention to rural library extension. Iowa has adopted a comprehensive scheme permitting a contract for five years between any public library and a neighboring township, county, city or school corporation for the free use of the library books, either by lending books to individuals, or by depositories, or by transportation of books to their homes by wagons or by branch libraries. The county supervisors may make a contract for the benefit of residents outside of cities and towns, laying a tax on outside property. The consent of the library having been given, a majority of resident taxpayers in

any place may, by petition, require the authorities to enter into such a library contract and to levy the requisite tax of not more than one mill on the dollar to meet the obligation assumed. Thus all the adjacent territory may become tributary to the city or town library.

In Minnesota, a school board may agree with any approved public library to become a branch of such library, and pay to that library the sum to be expended by the district for books, the books bought with that money being selected from the list approved for school libraries.

In Washington, the county commissioners, on petition of 100 voters, may establish and maintain a county library or arrange with a city or village library for service. This may be done without a vote of the people. Where the township organization exists, which is not at all common in that state, the people may establish libraries by vote.

In Delaware, as already noted, the state appropriation for the library commission was doubled to enable them to provide book wagons in three different counties.

In Texas, provision is made for a farmers' county library at each county seat. On petition of 100 voters in a county, the proposition for such a library is submitted to the voters at the next regular election. If the vote is affirmative, the commissioners' court of each county shall provide room in the county court house and make an appropriation sufficient to establish and support such a library. They shall have entire control of the library, and employ a librarian to gather information pertaining to agriculture, horticulture and kindred subjects and compile and catalog the same for ready reference and use under the commissioners' rules.

In Montana, an unsuccessful attempt was made to obtain a law for county libraries.

The adoption of a parcel post system by the United States government has for many years been favored and urged by librarians as likely to contribute materially to rural library extension. The successful inauguration of the system during the past year has brought with it a serious disappointment arising from the fact that

books could not be included. This, however, is a detail which is left by the law to be determined by the rules of the Postoffice Department, and the Postmaster-General has just announced a new rule, approved, Dec. 6, 1913, by the Interstate Commerce Commission, that, on and after March 16, 1914, book packages weighing more than one-half of a pound may be sent at parcel post rates.

SCHOOL LIBRARIES

In Montana, a new education law contains a chapter on school libraries, which is a reënactment in somewhat different words of provisions of law previously in force.

In New Jersey, the state commissioner of education was made a member of the public library commission, and, by another act, the supervision of school libraries was transferred to that commission, but, as no money was provided for administration, the governor vetoed the latter bill with the consent of all interested.

In South Carolina, school districts which include towns or cities of over 3000 population may use three per cent. of the annual levy for schools for the purchase and maintenance of libraries.

In Tennessee, school libraries may receive from the state an amount equal to that which is locally raised for the same purpose, not to exceed \$40 in any one year.

In Minnesota, certain provisions in the school laws which required the state school board to advertise for prices of furnishing books to the libraries and to assign contracts therefor to the lowest bidder were thought no longer necessary, and were repealed.

BOOK LISTS

In South Dakota, the library commission is expected to prepare annually lists of books for school libraries.

In Michigan, lists of books suitable for township and district libraries shall be prepared every two years by the superintendent of public instruction, with the aid of the state librarian, and copies furnished to school officers, except in city and high schools, to control the selection of books for their libraries.

In Nevada, the state board of educa-

tion has power to adopt lists of books for district libraries. By an amendment to the law this power is qualified by a provision which, as a negative statement of the basis for the judgment of books, is worthy of record. Books on these lists "shall not contain or include stories in prose or poetry whose tendency would be to influence the minds of the children in the formation of ideals not in harmony with truth and morality."

In Delaware, money allotted by the state to public libraries must be spent for books approved by the state library commission.

THE STATE LIBRARY

In California, for the first time, an item for the maintenance of the state library was included in the general appropriation act. Previously this had been dependent on fees collected by the secretary of state. The sum named for 1914 and 1915 was \$204,400, a material increase over that for any preceding two years.

A state civil service law was enacted, covering the staff of the state library, but with the following exceptions: "the state librarian, the chief deputy or assistant state librarian, and also one person having a confidential relation to the state librarian and appointees under provisions for court, law, teachers, school and county libraries."

The state librarian was formerly obliged to appoint deputies whose salaries were fixed by law. The section fixing these salaries was repealed, and provision was made that the librarian may now appoint his own assistant and pay him a suitable salary.

The following were added to the duties of the state librarian. To index statutes and journals of the legislature. To revise and bring to date an index to the laws of California whenever provision for the same is made. To compile laws or other matter when required by any state department.

An act was adopted enabling a city to give land to the state for state buildings. Sacramento may, under this act, give two blocks for an office building and for a state library and courts building. A proposition for the issue of bonds to the amount of \$3,000,000 to construct these buildings will

be submitted to the people at the election in November, 1914.

In Indiana, the state library was reorganized by departments, and a "Department of Indiana History and Archives" has been added, to have charge of historical material and to coöperate with any educational institution in the state under approval of the state librarian with the consent of the library board.

A bill providing for the erection of a state educational building, as proposed two years ago, did not pass as originally drawn, but, by an amendment to the specific appropriation bill, the voters of the state are to decide at the general election in 1914 whether \$2,000,000 shall be spent for a permanent centennial memorial building.

The state library's appropriations were increased by \$4280 for each year.

In Oregon, as already noted, the state library was completely reorganized and its books divided between two libraries, the Supreme Court Library and the library in charge of the library commission, henceforth to be known as the Oregon State Library. Additional appropriations were made to both, the state library enjoying an increase of \$7500 a year.

The Illinois state library will receive \$10,700 a year in place of \$8400, and the State Historical Society in Illinois will receive \$26,100 a year instead of \$16,600.

In Texas, the salary of the state librarian was advanced from \$1500 to \$2000.

LEGISLATIVE REFERENCE

Four states have taken steps this year to place the work of legislative reference on a systematic and permanent basis.

In Illinois, an independent bureau is created, to consist of the governor and the chairmen in both the Senate and the House of the two committees on appropriations and of those on the judiciary. The bureau has a secretary at a salary of \$5000, who will give his entire time to the work with other officers and employes appointed by the bureau. The state library is required to coöperate. Among other duties this bureau shall prepare, print and distribute to members of the General Assembly a de-

tailed budget of appropriations required by the several state departments for the coming two years, each item being compared with the corresponding item as appropriated at the session next preceding. The bureau has an appropriation of \$25,000 a year.

In Indiana, also, a "Bureau of Legislative and Administrative Information" was created to take the place of the former legislative reference department of the state library. It is to be under the supervision of a board including the governor, the presidents of Indiana and Purdue Universities, the state librarian, and one other person appointed by the governor. The new bureau will receive \$13,500 annually in place of the former provision for the same purpose of \$4500 the first year and \$5500 the second year.

In Ohio, a legislative reference department is created, independent of the state library as such, but under the direction and supervision of the same board. The new department has its own director, who is appointed and his compensation fixed by the state board of commissioners, subject to approval by the governor. He appoints all necessary assistants with the approval of the board. He will arrange with the Ohio State University, the Ohio State Archaeological and Historical Society, the Supreme Court Law Library and the State Library for the use of books and references in their custody, and these institutions are authorized to lend the same. An initial appropriation of \$10,000 is made for the department.

In New Hampshire, a legislative reference bureau is established in the state library at an expense not to exceed \$500 a year.

STATE DOCUMENTS

In California, by an amendment to the code, the number of reports given to the state library for distribution is increased from 50 to 250.

In Texas, 150 copies of each state report are given to the Library and Historical Commission for free distribution to libraries. Copies of Texas archives in the hands

of the commission which are not needed for supplying one copy each to the governor, the members of the legislature and the public libraries may be sold at not more than 25 per cent. above cost, and any such excess be paid into the state treasury.

In Michigan, each library is to receive a copy of the annual publication of the newly created Historical Commission.

In New Jersey, it was provided that one copy of every bill, report, pamphlet or other publication of the state shall be sent to each public library, including historical societies. But inasmuch as no public officer is charged with the duty of sending out the above documents, the law is probably ineffective.

In Massachusetts, whenever any library shall vote not to receive any of the books and reports offered by the state, the sending of them will be discontinued, and any such material already in hand may be returned or otherwise disposed of with the sanction of the library commission.

MISCELLANEOUS

In Texas, wilful detention of books or other material from a public library for thirty days after written notice to return the same may be punished by a fine of from one to twenty-five dollars.

In Missouri, boards of education in cities may establish and maintain separate libraries, public parks and playgrounds for the use of white and colored people.

In Nebraska, a retirement fund for librarians was authorized. It applies to public libraries in cities of the metropolitan class. It calls for the assessment of 1½ per cent. of every salary and the setting aside of 1½ times as much from other funds, gifts, bequests, etc. It is to be under control of the city council, and the salary assessment may be suspended if other funds are sufficient. After thirty-five years of service an employe may be retired; after forty years, *must* be retired and thereafter receive \$420 a year. After twenty years one may be retired for disability and receive not \$420, but such a percentage of \$420 as the term of service shall bear to thirty-five.

THE LIBRARY AS A UNIVERSITY FACTOR*

BY W. DAWSON JOHNSTON, *Librarian of Columbia University*

IN our efforts to define the ideals of education there has been a tendency to neglect the study of the means. This has been especially true, it seems to me, of our study of higher education, and is well illustrated by our failure to study the university library problem.

This failure is due, perhaps, to a feeling that these practical problems are special in character, and should be left to the specialist to solve. It is due also, I believe, to the rather common conception of a library as a building or collection of books rather than as a form of service.

In the time allowed me for the discussion of the library as a university factor I wish to point out that our most perplexing and, perhaps, most important library problems are problems of university organization rather than of library administration, and so problems for the university administrator rather than the librarian. I wish also to make it clear that the administrative problems of the library staff are problems of instruction primarily rather than problems of clerical attendance and mechanical dexterity.

To what extent is consolidation and centralization of libraries of a university desirable?

Among all university library questions the most important and most puzzling is that of the relation between the several libraries of the university. There are still some who would solve this question, or profess that they would solve it, by consolidation of all libraries in one building. All who have given the question serious thought, however, realize that considerations of space and time alone make consolidation of libraries undesirable.

The importance of the department library in professional schools of law and medicine, and in departments devoted to natural

and applied science, has long been recognized. The libraries of these schools and departments are ordinarily separate and distinct collections of books. Their separation from the general library is justified by the nature of their use either as independent bodies of literature or in connection with laboratory work. For these reasons also they are rarely duplicated in the general library.

Within the last decade the establishment of department reading rooms within the domain of the humane sciences also has become common. These are intended especially for the use of students in history and the social sciences, for students in literature, and for undergraduate students. They comprise the more important part of the books designated as required reading and consist largely, if not altogether, of duplicates of books in the general library. They are located near the lecture rooms simply to facilitate the reading of students between lecture periods, and are justified, it seems to me, only by the extent of their use.

How far the development of department libraries should be allowed to go, especially in the humane sciences, is difficult to determine. Undoubtedly as many reading rooms should be maintained as can be successfully maintained, but even experience does not always indicate where the maximum of efficiency may be secured with a minimum of expenditure, at any rate it does not indicate it with the same clearness to the librarian and to the ambitious department head.

The main reason for this difference of opinion lies in the fact that the librarian cannot with the funds at his disposal do all that is asked of him, nor even all that needs to be done, while the department head is in duty bound to ask for all that his department needs immediately or may need in the future regardless of the needs of other departments. In transforming our department libraries into university libraries, therefore, there is an unfortunate di-

* Address delivered Nov. 7, 1913, at the meeting of the Association of American Universities, held at the University of Illinois, Urbana, Ill.

vision of interest which we must do away with. In other words, just as we have recognized that the books must be placed where they will be most useful to those for whom they were primarily purchased, so we must recognize that the increase of these collections and the conditions of their use are questions for the department first of all, and only secondarily questions for the librarian. It is the department which should consider not only the desirability but the practicability of establishing and maintaining a department library. This will involve study not only of the department's needs but also of its resources. It will mean unification of the department budget.

Each school or department should, I believe, have a separate library budget. This should be considered primarily as a part of the budget of the school, and if a school is not increasing its book collections with sufficient rapidity, or if it is not receiving the grade of library service which it needs, it should in making budget recommendations determine whether the need for more books or better library service is more pressing than that for additions to its staff of instructors or to its equipment in other directions. The history of the library appropriation is too much like that of our federal rivers and harbors bill; it is high time that more care should be taken in the preparation of estimates of expenditures and less solicitude shown as to the allotment of expenditures; and it is particularly important that estimates of expenditures for the library should be considered side by side with other estimates of the department, and first of all by the school or the department. In other words, it is more important that the budget of the school or department should be considered as a unit than that the budget of the library should be so considered.

No less necessary to a department library than a properly adjusted income is a department librarian; indeed, the statutes of the university should recognize that there can be no library without a librarian. Department librarians in most universities are only librarians in name. As a rule, they are either needy students or benevolent but

overworked professors. In an institution with few books or few readers this matters little, perhaps, but in an institution with hundreds of thousands of volumes, and thousands of students, there can be no question as to the importance of the office of department librarian, and no question as to the desirability of securing the best men in the profession to fill these offices.

The general library staff must in the nature of things serve classes of students rather than individuals. The department librarian may discover the needs of the individual and do much to satisfy them. In this respect, indeed, he has opportunities that the instructor himself does not have, particularly opportunities to direct research and answer questions regarding research methods and materials.

The establishment of department libraries with separate budgets and separate library staffs should not, however, be followed by their separation from the general library. There is danger that department libraries may simply reproduce on a smaller scale the organization of the general library, and that department librarians may wish to become mere administrative officers, each with his small retinue of clerical assistants. We must, therefore, lay strong emphasis upon the fact that these new library officials are not primarily administrators but scholars, and not primarily specialists in library economy, but in other branches of science. Their time must be devoted to the study of the literature of their respective subjects and the needs of the readers in their several departments; the ordering of books, the cataloging of them, the binding of them, questions of equipment and supplies, etc., must be left to the general library staff. In short, it is only by centralization that we can secure any considerable amount of specialization either in the collections of the department library or in its service.

Control of university libraries; library committees, their membership and powers.

In the organization of university libraries the question of the relations between the general library and the department li-

braries is closely related to the question of government. In both college and university the president and trustees are, of course, ultimately responsible for library policies and the allotment of funds with which to carry them out, and ordinarily a library committee of the board of trustees is charged with the duty of advising the board with regard to these matters.

In the college these duties are shared by a library committee of the faculty. This committee is a survival from the days when the librarian was some bookish member of the teaching staff with a pardonable partiality toward his own department; its continuance is only justified by the fact that the librarian is often, too often, a mere clerk. In the larger colleges and universities, however, its duties are being transferred to the librarian and his assistants on the one hand, and on the other hand to the library committees of the several schools of the university.

A library council composed of representatives of the administrative departments of the university library and the department libraries has not, so far as I know, been established in any university. But important steps in that direction have been taken in the inauguration of library staff meetings and in the appointment of special committees of the staff to consider special questions; and the time is, I believe, not far distant when a body of this kind with well defined powers will be created in each of our larger and more progressive institutions. Nothing, I am certain, would do more to preserve the unity of the library service than this and at the same time give the staff that freedom in its activities, and that power of initiative and control which is essential to library efficiency and economy.

Of fundamental importance are the library committees of the several schools of the university. The librarian and his colleagues must in the nature of things determine how the work of the library shall be carried on, but the several faculties of the university and officers of instruction must indicate what work they wish done, and decide what proportion of their ex-

penditures they wish to devote to getting it done. The consideration of these questions in their general aspect must be referred to a committee of each faculty.

In an institution which is growing rapidly either in income or in enrollment, in one in which changes in the library staff are frequent, or in one which can afford only clerical library assistance, such a standing committee is of great importance. Without it the department library is, to use a parliamentary figure of speech, at the mercy either of the committee of the whole, or of even less responsible and sometimes self-appointed special committees. Without it the needs of the school as a whole, the needs of the departments, and the needs of classes may often receive less consideration than the wishes of an aggressive or noisy individual.

If, however, these department committees are to be most effective it is important that their limitations be recognized as well as their use. In this place it is sufficient to point out that they cannot advantageously assume the duties of either the department librarian or of the individual department or officer of instruction. They should not be called upon to select books or determine methods of administration. Their chief, if not only duty, as I have already indicated, is to define the needs of the department library and indicate their importance as compared with other needs of the school.

What should be the professional qualification and academic status of members of the library staff?

The organization of the library and its form of government must affect the standing of members of the library staff. In former years the college depended upon a professor to perform the administrative duties of the library; it still depends upon professors to perform its bibliographical duties, and will, perhaps, continue to do so.

But in the university the bibliographical work as well as the administrative work of the library must, I believe, be transferred more and more from the teaching staff to the library staff. There are many reasons for this—the increased mass of

books and periodicals, the increasing number of readers, and greater devotion to research among university teachers alone make such a differentiation of duties inevitable.

It may be pointed out, moreover, that this change is not only inevitable but desirable. The transfer of bibliographical duties of a higher type is accompanied by a transfer of duties of a clerical and mechanical type which is wholly in the interest of university efficiency and economy. Not only do professors and students receive a higher grade of bibliographical service from bibliographical experts, but the time which is under ordinary conditions wasted in unprofitable bibliographical research is saved for the more advanced work involved in serious investigation.

The importance of the bibliographical service of a bibliographical expert to the university in the development of its book collections, and in the service of readers has been recognized by such educators as President Gilman and President Harper. Indeed, the former said: "Every person in charge of the university collections must be a student capable of teaching. His specialty must be bibliography, or, if the staff is large, some branch of bibliography, literary, historical, philosophical, or scientific, and he must know not only what his collection includes but what it needs." This view will, I am certain, become common, and the bibliographical work of universities be transferred more and more from the teaching staff to the library staff.

This change must be accompanied by further differentiation between the bibliographical and clerical duties of the library staff, the establishment of higher standards for admission to the bibliographical service than for admission to the clerical service, and the extension to bibliographers of privileges and emoluments similar to those enjoyed by other scientists.

Under normal conditions all library officers having academic rank are appointed in the same manner as officers of instruction. Clerical and other assistants are appointed by heads of library departments. Heads of departments are given professorial rank,

and other bibliographers rank as instructors. The university librarian may have a seat and a vote in the university council, and each department librarian a seat and vote in the faculty of the school which he serves as librarian.

The question of academic status is, however, of less importance than that of requirements for admission to the service and that of opportunities for scientific research for the members of the library staff. Standards of appointment to the several grades in the staff of the library must be made the same as those in the corresponding grades of the staff of instruction. In other words, every member of the general staff of a university library of the bibliographical grade should have had in addition to undergraduate work at least one year's work in a library school, to acquaint him with the technical problems of the library, and every department librarian should have had at least one year's additional work in the subjects represented in the curriculum of the school of which he is librarian to make him more familiar with the literature of these subjects.

Of even greater importance is opportunity for continued study. The time may come when it will seem unwise to expect the same number of hours of office work from bibliographers that we exact from clerks. However that may be, it seems to me eminently desirable that junior bibliographers should be allowed time each year to pursue one course of study, and that those above the grade of junior bibliographers who wish to attend a summer school or engage in research in library economy in other libraries should be granted the necessary leave of absence, perhaps, with half pay.

The necessity of a scientific attitude toward library problems.

But whatever the requirements for admission to the university library service may be, and whatever the opportunities for bibliographical research in its service, the essential thing is a scientific attitude toward the problems of the library.

It is, I believe, the peculiar duty of the

university to encourage a scientific attitude toward library questions as toward other questions, particularly in the library staff. Indeed, among members of the library staff it may not only encourage scientific bibliographical research, it may even require it just as it requires research in other departments of the university, and advancement in the staff may depend as much upon scientific attainments as shown in contributions to professional journals and professional meetings, as upon the output of routine work of immediately practical value.

I wish to lay some emphasis upon the importance of this, because there seems to me to be a tendency in library work to ignore the fact that the practical problem is only the problem of the one while the scientific problem is the problem of the many, and an inclination to devote our time and thought to routine detail. This is unfortunate not only for the individual, but also for the institution, and not only for the individual institution but for libraries as a class and for universities as a class. Indeed the individual librarian suffers less from his isolation than does the institution of which he is librarian; less, too, than does learning at large.

For this reason we must approve the efforts which have been made in the last few years to standardize the library service of colleges and professional schools. The National Association of State Universities' Committee on Standards in 1908 advised that there should be adequate general and department libraries with a sufficient number of duplicate books for purposes of undergraduate instruction, and, when graduate work is offered, books and other material for purposes of research. The Association of Collegiate Alumnae requires that the number of books in the library of a college seeking admission to the association and the number of periodicals currently added shall not be less than the average number in institutions of the same type already admitted to membership. The conference of the chief state, school officers of the north central and west central states held in Salt Lake City in 1910 passed a resolution providing that colleges having

an income of \$10,000 and seven departments of instruction should have a library of at least 5000 volumes, selected with reference to college subjects and exclusive of public documents.

The standardization of the library service of professional schools has also received consideration. At the meeting of the Association of American Law Schools in 1912 an amendment to its constitution was adopted providing that each school should own a library of not less than 5000 volumes. And the American Medical Association council on medical education describes the essentials of a medical college library as follows: "The college should have a working medical library to include the more modern text and reference books and thirty or more leading periodicals and the 'Index medicus'; the library room is to be easily accessible to students during all or the greater part of the day; to have suitable tables and chairs, to be properly heated and lighted, and to have an attendant in charge."

The work which these associations have inaugurated should be correlated and carried on from a university point of view, and not merely with the object of determining a minimum of efficiency for the individual institution, but also with the object of securing the maximum of efficiency for our institutions of learning as a whole. Our smaller institutions should without doubt have larger resources, but there is even less doubt that our larger institutions should make better use of the resources which they now have.

For this reason nothing seems to me more important at this time than the nationalization of our larger university libraries. I do not mean by this federal appropriations such as are made to the colleges of agriculture and mechanic arts, or federal supervision which should properly attend such appropriations, but rather the adoption of the idea of national service instead of that of local service.

This involves in the first place the abandonment of antiquated and provincial restrictions regarding the lending of books and manuscripts, and secondly much greater

publicity regarding the contents of our libraries. American scholars are, I believe, suffering less to-day from the poverty of our book collections than they are from restrictions attending their use and lack of information as to what they contain. The German university libraries, with their *Gesamt Katalog* and their liberal system of inter-library loans, are much better organized in this respect. The German scholar has behind him the resources of the nation.

It will not, however, be enough to adopt the most liberal policy with regard to the use of our present resources. It will be necessary to plan also for the largest possible increase in these resources. With this in view nothing is more important than a division of labor between the libraries of the larger institutions. Works of reference, the classics in literature and science, and many current publications, both book and periodical, must be had by every large institution, but the books which are needed by the individual only and by him only once

in a lifetime, perhaps, need not and should not be duplicated in our several libraries. This is obviously true of antiquarian books, and it is hardly less true, I believe, of the current issues of the press.

It would be out of the question to consider seriously any such division of labor without careful investigation of existing conditions. Such an investigation must comprehend some of the fundamental questions of university library organization, government and administration, such as I have here outlined, but it must comprehend also the questions of minimum standards which have been considered by the several associations of colleges and professional schools, and, finally, the national question of maximum efficiency.

I hope that the idea of such an investigation may commend itself to the members of this association, and that with your approval some such agency as the Carnegie Foundation for the Advancement of Teaching may be able to undertake it, and undertake it immediately.

THE LIBRARIES OF HAWAII

BY ERNEST J. REECE, *Instructor, University of Illinois Library School*

WITH the opening of 1913 American library influence definitely established itself in a new outpost. The Library of Hawaii was formally dedicated in February, and it is now possible to say that no state or territory of the Union is without some public library facilities. The new institution represents well the factors which have contributed most largely to the library movement on the mainland. It stands on the fringe of a civic center, a stone's throw from the capitol and judiciary building in Honolulu. It has sprung as a result of public initiative, will depend chiefly on public support, and plans to serve not only a city but a territory. It has shared Mr. Carnegie's generosity, and occupies a home worthy of Hawaii's high community standards. Because of its frontier position therefore it signalizes new triumph

for our national library interests and educational ideals.

A slight sketch of the culture elements which have affected the mid-Pacific group will help to an understanding of the library situation. Extremely diverse streams of racial influence have contributed to evolve the Hawaii of to-day. Originally the islands were peopled by a lovable, dark-skinned race, brothers of the Maoris, and probably ultimately Malay in derivation. The white invasion began with Captain Cook's arrival in 1778, and the civilization represented by the first-comers has been supplemented from time to time by whalers, beachcombers, Botany Bay refugees, and commercial exploiters from the United States and northern Europe. A very different alien type appeared when the New England Congregational missionaries

sought the islands in 1820. This, too, has been augmented, first by the emissaries of the Anglican, Catholic and Mormon churches, and in later years by a considerable group of American professional men. Presently Quantung Chinese came in quest of sandal wood, many to remain in the temperate isles. Finally began the importation of plantation labor—Japanese, Portuguese, Spanish, Filipino, Russian, Korean. All these peoples have settled in large enough numbers to produce an effect upon the territory.

The influence that stands out above all others, however, is that of the American missionary with his ideals of morality and education. Its work was the sprinkling of the group not only with churches, but with schools. The larger islands all are provided with elementary institutions of learning, established in most cases under sectarian auspices and designed to provide academic and industrial instruction. Honolulu teems with such agencies, chief among them being the Kamehameha Schools, for Hawaiians, and Mid-Pacific Institute, an elementary boarding school for Orientals. The most advanced private school in the islands is Oahu College, founded for the benefit of the early mission children, and provided with an equipment which many a small mainland college might envy. Supplementing these and various unmentioned places of learning is the public school system. This is territorial in organization, extends to the isolated sections of the islands, and includes as an accessory a splendid normal school. The scheme is completed by the College of Hawaii, which is built largely on the model of the western land grant colleges.

Naturally such cultural precedents and such a series of enlightening agencies as Hawaii possesses have given rise to some noteworthy book collections. Some of these collections have had private origin; to-day the principal ones are institutional. And because of Hawaii's alertness in appropriating each new feature of American life as it appears her libraries have built themselves up about various agencies, so that the territorial capital has an efficient

and symmetrical though somewhat scattered coöperative collection. A mention of the contributing factors will show how the field is covered.

Schools. Small but well-chosen libraries are located in the more important educational institutions of public and semi-public nature. These include McKinley High School, the Honolulu Normal School, and the Kamehameha Schools. In each case the endeavor has been to afford such books as will answer curriculum needs and at the same time cultivate a taste for knowledge and literature on the part of the students. The Kamehameha Schools in this, as in other connections, present a peculiar problem. The primary and industrial training they offer gathers from a semi-primitive race minds of varying degrees of maturity, hence book selection is less simple than it would be for a graded school of white children.

Scientific institutions. Stimulated by strong local interests and industrial needs, the Hawaiian group has established some substantial agencies of record and research. Some decades ago Charles R. Bishop, of San Francisco, married Princess Pauahi, of the royal line. Both were wealthy and of philanthropic bent, and their beneficence was a boon to several institutions on the islands. From the standpoint of science their great gift was the Bernice Pauahi Bishop Museum of Polynesian Ethnology and Anthropology, the creation of which has brought together what is by far the most complete collection of South Sea antiquities in existence. This is housed in a splendid concrete and lava rock building of extensive proportions. Its priceless store of garments, utensils, and related material illustrative of early Pacific life is augmented in value by a library of the subject which is unsurpassed anywhere. Peculiar importance attaches to this museum and library because the civilization they restore is not entirely dead, for Hawaiians, Samoans and Maoris still live and perpetuate in some measure the culture, manners and lore of a once numerous race.

Hawaii's leaders saw that if she was to share the progress of her sister states and

COOKE LIBRARY, OAHU COLLEGE, HONOLULU, T. H.

LIBRARY OF HAWAII AS SEEN FROM THE CAPITOL GROUNDS.

territories there must be intensive investigation of the problems concerned in her community and industrial welfare. Among other things this has led to the establishment of a territorial bureau of forestry, a federal experiment station, and an independent experiment station maintained by the Hawaiian Sugar Planters' Association and devoted to research connected with the cultivation of cane and pineapples. Each of these institutions has built up an efficient working library of its subject. This means that the fields of horticulture, forestry, entomology, agronomy, plant physiology, soil fertility and chemistry are well covered. As the collections are located reasonably near each other coöperative use of them by the several bureaus is possible.

Colleges. A half dozen years ago there was opened at Honolulu the College of Hawaii. With the mainland state schools as patterns this was planned to meet the peculiar needs of the islands for academic and practical instruction. Since a large proportion of Hawaii's high school graduates can and do attend college on the Pacific coast or in New England there is no crying need for an arts course. And since engineering or industrial work is likely to be the choice of those who do not leave the islands for an education emphasis has properly fallen upon agriculture and applied science. A library suited to this form of work has naturally grown up in the College of Hawaii. It means to some extent a duplication of books already on the shelves at the experiment stations, but for the most part it is new material, supplemented of course by collateral and reference literature having to do with such culture courses as the college offers.

By courtesy Oahu College may be classed among the institutions of higher learning, although it has not the standards of mainland schools. It is the oldest college west of the Rocky Mountains, having been founded in 1841. In its inception it was not unlike a host of institutions in the middle west which trace their beginnings to the early decades of the nineteenth century. While it has not reached the college grade attained by many of its sister schools, it

has kept its aim on this, and through the latter half of its existence has usually offered in addition to its regular high school curriculum certain freshman and sophomore courses. As regards credit Oahu College is a first grade high school accorded the certificate privilege by the leading universities. In ideals, methods, equipment and endowment it must be classed rather with the semi-denominational colleges. Its home is a forty-acre campus with fifteen buildings and two large athletic fields. The arrangement and care of the property have made it an example of sub-tropical landscape gardening.

The special library interest of Oahu College began seven years ago, although since early in its history there had been accumulating the elements of a school collection. In 1906 Mr. C. M. Cooke, a wealthy alumnus, made promise of a building and a library. First came a book gift of \$5000, then the erection of a \$45,000 structure, then further book funds which have brought the total for this purpose to about \$25,000. Since Mr. Cooke's death, in 1909, a large addition to the library building has been made in the nature of a memorial art gallery. These several increases of library resources have made it possible to organize in accord with modern methods. The functions of this library are peculiar to itself. The school it serves numbers six hundred students, ranging in grade from college freshman down to primary pupils. It is necessary to provide an efficient reference equipment, a generous supply of collateral reading, a moderate representation of standard fiction, and a liberal children's collection. Along these lines the library has been built up, its shelves holding now about twenty thousand volumes, with space eventually for more than double that number. Two persons of library school training are in charge. The institution is one of the few in which funds for wise and adequate growth have not been stinted. The interest of the donors has made it a real tool, and the splendid airy lava-rock building has enticed many to books even against the allurements of mountains and sea and sport. In no small measure Oahu College

Library serves the purpose of a public institution. Its privileges are extended not only to students, but to parents, graduates, and all persons of good standing in the community. This means that practically all the English-speaking population of Honolulu is included in its possible clientele.

Library of Hawaii. This is a merger of two previously existing agencies in a new institution proposed and supported by the territorial government. Until it was perfected the only popular library in Hawaii with the exception of that at Oahu College was a small subscription collection of eighteen thousand volumes. This was housed in a rented building, together with the exceedingly valuable Hawaiiana gathered and preserved by the Hawaiian Historical Society. Local officials suggested that with this material as a nucleus a building gift might be asked of Mr. Carnegie. It was necessary to persuade the existing board of trustees to devote its endorsement to the new organization, and to work out a plan whereby the additional support conditioning a Carnegie offer might be pledged. The scheme as consummated involves management by seven trustees—three elected by the Honolulu Reading Room and Library Association under its own rules, one designated by the Hawaiian Historical Association, and three appointed by the governor of the territory. Since the legislature is the one taxing body in the territory, an annual appropriation could be looked for only from it, and as the members from island districts could not be expected to set aside funds for the benefit of Honolulu alone it was necessary to promise a traveling library system which should reach out across the channels and make the institution group-wide in its usefulness. With the procedure thus far arranged Mr. Carnegie gave \$100,000. The legislature added \$25,000 to the building fund, and a modern structure with a capacity of about one hundred thousand volumes was planned by Mr. Whitfield.

The new building is situated on King street in Honolulu, opposite the grounds of the old palace, which now serves as the territorial capitol. Effort was made in its

designing to adapt the canons of library construction to the requirements of comfortable living and working conditions in a sub-tropical climate. The concrete walls have a slight green tint and green tile is used upon the roof, this color being selected for harmony with the palms in the immediate vicinity and the wooded Koolau mountains which form the background. The front of the building is rendered imposing by a colonnade, a lanai or porch, and a series of copper doors. The general environment adds to the pleasing effect, for Honolulu is ever green with algaroba, monkey-pod, banana plants and palms, and often gorgeous with bougainvillea, poinciana, poinsettia, hibiscus, Japanese trumpet vine and night blooming cereus.

Climatic conditions in the group make the observation of certain building principles imperative. Hawaii is only half tropical and is tempered by kindly trade winds, nevertheless its sunlight is sufficiently intense to require soft wall and roof tints. Similarly neutral shades are essential to restful interiors. The Library of Hawaii has used gray and white for this, with furniture of oak in a finish of colonial gray. Desiderata of equal moment are airiness and ventilation. Comfort demands these, and they serve in addition as the one practical protection against the numerous insect foes which infest frostless lands. Roaches, silver-fish and termites are much feared by book collectors and librarians in Hawaii, but lightness and airiness of buildings and particularly of stacks (in this case furnished by the Snead Company) are a sure preventative of their ravages. A striking feature of the library building in this connection is a lanai or porch reading room. This is located on the second floor level, and in such a position as to catch the trade winds from the mountains. Adjoining this outside reading room is a series of small rooms used regularly for study classes.

Expansion from a subscription library to a public territorial institution has meant for the Library of Hawaii not only growth, but an increase in the forms of its work. A juvenile collection was begun under the old order, but it is only recently that the

department has developed. A children's librarian will probably soon be added to the staff. This will bring the force up to six, exclusive of pages and janitors. Two of those on the staff have library school training. The other important departure is the inauguration of a territorial traveling library system. Ten stations have already been designated about the group, and several more are to be selected. Because of transportation difficulties this enterprise is less simple than is the case on the mainland. Carriage charges are high, and freight must be entrusted to stormy channels, treacherous landings, and perilous mountain trails. Successful distribution is in operation, however, and a territorial library project which at first suggestion

seemed questionable has proved workable.

With the establishment of her library Hawaii strengthens her claim to recognition as a factor in American life. She caught the spirit of New England education early in the last century. She possessed the first college and operated the first printing press beyond the Rocky mountains. For a period she fed the western slopes of the Sierras with potatoes and wheat. For two decades she has been actually at work solving many problems of race intercourse which the mainland as a whole is but beginning to feel. Her library stands as proof of her refined ideals and of the efficient machinery she has erected for the social and educational advance of her cosmopolitan population.

THE WORK OF THE AMERICAN FEDERATION OF ARTS IN RELATION TO PUBLIC LIBRARIES

BY LEILA MECHLIN, *Secretary of the Federation*

THE American Federation of Arts was formed at a convention held in Washington in May, 1909, with the purpose of stimulating appreciation for art all over the United States among all classes of citizens. The basis of organization was "team work," and its development has been entirely in accordance with a program of coöperation.

The American Federation of Arts has an individual membership, but more important is its chapter membership—the affiliation of organizations throughout the country. This chapter membership now numbers 187, and extends from Maine to California and from Michigan to Texas. It includes associations of professional artists, such as the National Academy of Design and the National Sculpture Society; non-professional organizations such as the Washington Society of the Fine Arts and the Municipal Art Society of Chicago; civic bodies, as for example the Art Commission of the City and County of Denver; educational institutions, among which is the University of Pennsylvania; art museums almost without exception, handicraft societies, and public libraries—

of the last not a few. These aggregate a very large and a very representative membership, and by being bound together through a central organization constitute a strong, vital force.

By serving as a bond of union between these organizations and as a "clearing house" for all, the American Federation of Arts is enabled to prevent a great deal of duplication of effort as well as to make more effectual each movement promulgated for the advancement of art.

The work of the American Federation of Arts has been to a great extent educational. The means it employs are these: It sends out exhibitions of paintings and other works of art of high standard; it circulates typewritten lectures on the fine and applied arts accompanied by illustrative stereopticon slides; it publishes a magazine, *Art and Progress*, which is specially purposed for the general reader; and it maintains at its main office in Washington a bureau of information.

Last year the American Federation of Arts sent out twenty-two exhibitions which

were shown in fifty-seven cities in the north, south, east and middle west. They comprised oil paintings, water colors, original works by American illustrators, representative art school work and work done in elementary schools, large photographs of mural paintings, of American sculpture and American paintings, etchings, wood block prints, mezzotints, bronzes and other works in sculpture. These exhibitions ranged in value from \$50 to \$50,000 and cost the organizations to which they were sent from \$15 to \$200. To organizations which are chapters of the American Federation of Arts no fee is charged for expert and clerical services, but each place pays its proportionate share of actual cost incident to collection, transportation and insurance.

The first exhibition that the American Federation of Arts sent out was shown in a public library—the Carnegie Library of Fort Worth, Texas. It comprised forty oil paintings, and led not only to the formation of an art association in Fort Worth, but to the establishment of a permanent art collection and a Texas exhibition circuit, including San Antonio, Austin and Houston. Other exhibitions sent out by the American Federation of Arts have been shown in public libraries, which are to-day found to be one of the strongest factors in the up-building of appreciation of art. Notable among those to which the Federation's more important exhibitions have gone are the St. Louis Public Library, the Public Library in Denver, the Public Libraries in Omaha, Louisville, Muskegon, Newark, Syracuse, and Nashville. From the exhibition galleries in both the Newark and the Muskegon Public Libraries permanent museums of art have been the outgrowth. Very often the public library has been the sponsor for an art association through the instrumentality of which in time exhibitions have been secured.

In many instances public libraries have not the means to meet the expense of exhibitions of oil paintings, nor possibly the facilities for display, in which instances they have been able to avail themselves of the American Federation of Arts' minor exhibitions composed of mounted but un-

framed exhibits or exhibits lightly framed, such as collections of large photographs, engravings, colored prints, etc. These are obtainable at very moderate cost.

The American Federation of Arts has been fortunate in having the coöperation of the Library of Congress in the matter of loan exhibitions. Through the operation of the copyright law the Library of Congress comes into the possession of much material of very genuine value. Material so acquired forms what are known as "duplicate collections," and from these the Federation has been permitted to draw for exhibition purposes. The collection of mezzotints, comprising ninety exhibits of superior engravings of old English portraits, is thus secured, as are the collections of colored etchings, wood block prints and lithographs which have been shown with great success in several library galleries as well as in art museums and colleges.

Of the exhibition of photographs and original sketches of American mural paintings sent out by the American Federation of Arts the librarian of the public library in St. Louis reported recently as follows:

"The library has become a member of the American Federation of Arts, and has displayed five of its exhibitions during the year. That of American mural paintings has attracted the most attention, having been seen by three thousand persons or more—many of them architects, decorators, stained-glass designers and students. . . . As a result of this and other exhibitions, many people are using the library who never used it before, and the number of books used in the room has decidedly increased."

The illustrated lectures circulated by the American Federation of Arts have been in no less demand. At present these number seven and are on the following subjects: American painting, American sculpture, Civic art, American mural paintings, Whistler's etchings, Tapestries, and Furniture. Each has been written by an authority and is illustrated by about fifty slides. The lectures are adapted to accompany the illustrations so they can be delivered by any good reader. These are sent out to places

where authoritative lecturers cannot be readily secured, without fee to chapters but upon the payment of \$3 by others, the cost of transportation and a guarantee against loss by breakage. Other lectures and collections of slides illustrating significant subjects will be added later.

The American Federation of Arts' official publication, *Art and Progress*, is a monthly illustrated magazine. Its object is to give publicity to all progressive movements in the field of art and to definitely relate art to everyday life. It is a general readers' magazine, but is upheld to a professional standard, and through its articles, editorials and news notes the reader is kept in touch with current activity in all the branches of art. It is now in its fifth year of publication, and has a circulation which is fairly well distributed throughout the United States. Its news notes and illustrations are made special features. The subscription price is \$2 a year, but special rates are offered public libraries that subscribe directly from the publishers.

The Federation's bureau of information is made possible and of utmost value by the maintenance of standing committees composed of men of distinction in the several professions and branches of art. The chairman of the committee on museums is Dr. Edward Robinson, director of the Metropolitan Museum; of landscape architecture, Mr. Frederick Law Olmsted; of craftsmanship, Mr. C. Howard Walker. Questions of an important nature presented to the American Federation of Arts are referred to these committees and given serious consideration and response.

The annual dues for chapter membership in the American Federation of Arts are \$10, which entitles to the privileges already named and also representation at the annual conventions.

The present officers of the American Federation of Arts are: Robert W. de Forest, president; Leila Mechlin, secretary; N. H. Carpenter, treasurer; Charles L. Hutchinson, first vice-president; W. K. Bixby, E. H. Blashfield, Mitchell Carroll, Cass Gilbert, Archer M. Huntington, Hennen Jennings, Gardiner M. Lane, John F.

Lewis, E. D. Libbey, Mrs. E. W. Pattison, Mrs. Charles Scheuber, and C. D. Walcott, vice-presidents; Ralph Clarkson, Mrs. Gustave Radeke, Phillips B. Robinson, G. D. Seymour, Lloyd Warren, Charles L. Hutchinson, H. W. Kent, Bryan Lathrop, Miss Florence N. Levy, Lee McClung, Thomas Nelson Page, Marvin F. Scaife, John W. Alexander, Charles W. Ames, David Knickerbacker Boyd, Glenn Brown, N. H. Carpenter, Francis C. Jones, and C. Howard Walker, directors.

All communications should be addressed to the secretary, 1741 New York avenue, Washington, D. C.

WHAT OUR CHILDREN READ AND WHY *

So much has been said and written on what books children should or ought to read that certain facts have been drilled into us almost as axioms.

We have it down pat, for instance, that a child in his development reproduces the various stages of race development. We are prepared to classify a child as being in the wonder age, the credulous age, the barbaric age, the transitional or the adolescent. We know that each of these periods has its definite mental needs, and we attempt to supply these needs by deciding which mental food is best suited. This implies, among other things, the selection of certain kinds of books for certain periods; the myth, the folklore, the animal story, the standard classic, each has its allotted period. The boy or girl who reaches the High School is supposed to have had them just as he is supposed to have had the measles and chicken pox and whooping cough. We give the children literary food in just about the way old Mammy Susan down in Kentucky insisted upon giving the children of the household their regular dose of sulphur and molasses every spring because it had always been done so in that household 'way back yonder, when "Ole Mistic" was a baby, and besides, it was good for them. We are careful to give them portions of myths and folk tales of

* A paper read before the Library Section of the New York State Teachers' Association, Syracuse, N. Y., Nov. 25, 1913.

history and biography in very harmless, diluted or sugar coated doses.

The educational publishing houses vie with each other in producing attractive, predigested, ready-to-assimilate, supplementary readers warranted to be strictly harmless. Ask the average teacher what her pupils read and she will probably tell you some of the following titles: "Fifty famous stories," "Old Greek heroes," "Heidi," "Great Americans for little Americans," "Tom Brown's schooldays," "Norse stories," and "Lads and lassies of other lands," for these are some of the staples of the literary diet usually provided by a more or less generous Board of Education. It is not a bad diet as diets go, but the question intrudes itself: How much of this do the children really assimilate?

Suppose you ask the average mother what her children read. She will look a little bewildered until, with a relieved sense of having remembered, she'll probably tell you: "Oh, yes, that big red book that their Uncle Ed gave them for Christmas, and those cunning little books bound in white with the forget-me-nots on them that Cousin Mary sent them; and, of course, there's the set of books that I bought from that agent who used to wear out my front steps. I guess the children are reading them. I've been too busy getting the monthly payments ready for the agent really to bother." As for father, he will frankly tell you he doesn't know, but he guesses there are plenty of books around the house. There ought to be, for isn't he always buying another new one that teacher says Johnny or Mary *must* have?

Next to the home and school, the church and Sunday school are recognized as wielding the largest influence in the development of the character of children. Ask the average Sunday school teacher what her pupils are reading and she will tell you something like this: "Why, I don't know. The children mark the numbers on their book card from a catalog. I guess the books are all right. I used to read the Dotty Dimple books and the Pansy books and Rosa Carey's, and we girls wore out a set of the Elsie books. They've replaced

them now by the Little Colonel books and the Motor Girls, and the girls seem crazy about them." Should you ask the children's librarian of a public library, she would take out her sheet of circulation statistics and tell you exactly what per cent. of fiction or non-fiction was read, also how many titles of folklore, science, useful arts, literature, history, travel and biography are circulated each day. But would *that* give you exact information? No, for we must take *all* the various agencies from which reading material is supplied to children, and we must not forget the "underground library," by which we mean the books that travel from boy to boy and girl to girl without the knowledge of the parent, teacher or librarian.

If we would know what children read we must get it directly from them.

During the last five weeks I have visited forty-one representative classes of the sixth, seventh and eighth grades in the public schools of Rochester with a view of taking an inventory of the pupils' reading and of teaching them to tell about the essentials of a book in a brief book note written on a slip of paper the size of a post card. The pupils were asked to think of the one book which they know best. To give the author if possible, to tell in one word each the *kind* of a book, and *when* and *where* the story took place. Only big divisions of time and place were asked for. Then they were told to tell in two or three sentences what they thought of the book, and finally, how they came to read it.

The results were read in class and an opportunity was taken to talk briefly on what stamps a book as good or bad or mediocre. As these tests in book selection were "sprung upon" the pupils by a person whom most of them had never before seen, the replies reflected unhampered original thought. The children really did choose in practically all cases the book which they liked best, and not the one which they might suppose teacher or parent would want them to choose.

Nearly a thousand of these replies were tabulated. The results were most interesting and often surprising. There were prac-

tically none of the really bad books of the Nick Carter or Jesse James variety, but there were a great many of the perhaps more pernicious books that might be classed as mediocre, the kind that give a false ideal of life, such as the Alger, Oliver Optic, Rover Boy series, L. T. Meade books, the Elsie Dinsmore books and their ilk. These were invariably loaned to each other, though often they were the gift of father, mother, or Sunday school teacher. In many instances they were bought by the children in the five and ten cent stores.

The mania for collecting things includes books, for boys boasted of having a library of Alger and Oliver Optic and Henty books, or all of the Motor Boy series. The cheapness of the books is no doubt responsible for the great number of them that are read.

Louisa Alcott's books, particularly "Little women," were chosen by many girls and the latter was declared the best book ever read, because it was "so sensible to read," and "because the girls weren't all angels, either," or because "My mother's mother read it and she wanted me to read it, too."

Henty was represented in goodly number because "it tells of bloody battles, and I love them kind of stories." For the same reason, and because "it's so exciting and adventuresome," history was chosen. However, very few other books of non-fiction were included. Now and then a book of useful arts, of the Jack-of-all-trades variety was found. With the exception of the "Life of William McKinley," not a single book of biography appeared in the list. Books usually classed as standard literature had their devotees. Evangeline was chosen because "we were forced to read it, but afterwards I liked it very much." Of the "Lady of the Lake" one boy said: "I liked it because it took so much thought to find the meaning."

And this is the way "Romeo and Juliet" appealed to a seventh grade girl: "This book was about two families that had a quarrel, and one family had a party and one of the boys of this other family came and he fell in love with this girl. I think this book is very interesting. I saw this book at the library at the school, and I al-

ways like a book that is very thin; and it had big print, so that is how I came to read it."

Myths were classed as fairy tales because they were "awful interesting, but not real." Invariably there was a note of apology in a book on fairy tales, expressed usually: "I liked it very much, although it *was* a fairy tale." However, nearly always they wrote of having read the book many times.

The rereading of books generally was very noticeable. One girl spoke of having read the twelve books in the Little Colonel series each three times, and "it was mostly about the same little girl."

It was interesting to notice the extent to which the phraseology of the kind of book the children habitually read affected even the wording of the short booknotes. The readers of Optic or Alger spoke of their heroes as "poor, but bright young lads, who climbed the ladder of success." The readers of the Meade books characterized their heroines as "noblehearted, but sadly misunderstood girls."

Time and place even to a seventh or eighth grade pupil are more hazy and confused than we adults realize. The scene of action of "Rebecca of Sunnybrook farm" was laid in London, England. "Oliver Twist" was said to have taken place "in the Middle Ages." "The time of knighthood" was a simple and convenient time period often used. "The spring of the year" seemed to suffice for one girl. Another girl in telling of "The madcap," by L. T. Meade, said: "It took place in the middle aged years."

In answer to the question how they came to read the book, the tabulation showed that the recommendation of other boys and girls far outnumbered recommendation of either teacher, parent, or librarian. This can doubtless be traced to the inherent distrust of their elders in the matter of book selection, for they are always so keen about advising books one *ought* to read. The motion pictures induced many to read "Ivanhoe," "The talisman," and "Rob Roy."

The author's name attracted some, the title others. One boy said he read "Robin Hood" "because it said 'Robin Hood, the

outlaw,' on the cover, and I always did like to read about outlaws." Illustrations, especially pictures, on the cover of the book lured some. Several girls said they chose their book because "it looked good, it had lots of talking in it and empty places," by which they meant wide margins.

It was surprising to see how many children read a book "because I was lonesome" and "never had nothing to do."

The argument often advanced that the reading of books does not really influence the lives of children was clearly disproven again and again. Here are some examples:

One girl, in speaking of "Elsie Dinsmore," said: "It is a book which I would like my schoolmates to read because of the cleanness, the goodness, thoughtfulness and kindness of the little girl." Another girl writes of the same book: "It showed how to lead a Christian life, and how we should love our parents."

A seventh grade boy says, discussing "The young outlaw," by Alger: "This book is about a boy who was very bad and became good and held a good position. I like this book because it tells you how you can get along in life."

This is the ideal of college life one boy received from reading Barbour's "The half-back": "This is a story of football, where a boy goes to college. It makes me feel that I would like to go to college, too, and join the football squad."

A girl in reporting on one of the Pansy books expresses the wish that every girl might read the book, for "It is very interesting and it might even convert a soul."

There is no doubt that books do have power to affect the soul of a child. It is most important, then, that we to whom is given so large a share in the building of character of the boys and girls entrusted to us shall know *well* these silent companions within the covers of books.

Only when we *know* children's books can we guide the pupils' choice understandingly, sympathetically and lovingly. But knowing books is only half of the problem and will avail us little unless there goes with it a sympathetic understanding of the needs of a child's growing mind.

Froebel's call, "Come, let us live with our children," is more than a mere invitation to share pleasant companionship. It is an opportunity to avail oneself of the mental stimulus to be derived from a fresh viewpoint as it is revealed to us in a child's awakening consciousness to the joy and beauty, the unworded pathos and mystery of the little world in which he finds himself. It is a rare privilege to really know books, it is a greater privilege to know children, their wants and aspirations, but greater than these is the privilege of being a mediator between the book and the child, of being instrumental in opening new visions of beauty to an inquiring mind. Of a teacher, as of a mother, it often can be said: "And they shall rise up and call her blessed," for it is through them that the way has been made clear to see and know "whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are lovely, whatsoever things are of good report."

ADELINE B. ZACHERT.

THE QUESTION OF BOOK STORAGE

At the meeting of the American Library Institute on Dec. 1 Harry Lyman Koopman, librarian of Brown University Library, read a paper on "The question of book storage," which was based on an article he contributed to the September number of *The Printing Art*. In it he makes a plea for the use of thinner paper and the elimination of unnecessary margins, and the adoption of a more uniform size and style of format in general, that the present waste of space in libraries, both public and private, may be lessened. The complete article is reprinted below:

It is a curious illustration of the impermanence of most products of the press that the question of their form with reference to economy of storage has hardly been raised. Most of them are true ephemera, creatures of a day, we might even say of the moment consumed in reading them. Yet, if printing is an art preservative as well as communicative, then its permanent records call for storage, and storage, even

on the scale of a private library, involves one of the costliest of all the elements of the modern man's life—space. It is obvious, therefore, that he who can make two books stand where one stood before is, if he has not sacrificed quality, a public benefactor, and deserves all the praise accorded by Dean Swift to the grower of the additional blade of grass, while, on the contrary, he who makes one book occupy the room of two has wrought an injury to the world, unless he can justify his theft of space by a corresponding gain in quality. Commercially, purely from the point of view of money-making, there is a reason for each tendency toward compactness and toward bulk. The smaller the book the more cheaply it can be sold, and the wider the sale; the larger the book the more can be asked for it with an appearance of justice, and the more profit there is on each sale.

As business has always been business, we find the two tendencies at the very beginning of the printed book. The black letter, which displaced the Roman type in the North-European countries, did so, not because it was more beautiful or more legible, for it was neither, but because it was more condensed, and by its use more reading matter could be got on a page. Aldus in Venice faced the same problem of getting away from the extended character of the noble Roman, and solved it by copying Petrarch's slender handwriting, thus producing the type known from the country of its birth as *Italic*. But, along with the handy and compact *twelvemos* and *sixteenmos*, appeared the stately *folios* and portly *quartos*, not designed for wide circulation, and therefore printed with larger type on heavier paper, works that form the proudest masterpieces of printing and amply justify the space they have taken up in our libraries for more than four hundred years. Later a notable achievement in compactness was made by the *Elzevirs* in condensing and reducing the Roman type and making tiny books, of pocket and even vest-pocket size, books that were favorites in their time and remain favorites with the

collector who is a booklover and not a mere speculator.

So long as books were arranged on the shelves of public and private libraries more by sizes than by subjects, their proportions did not so much affect compactness of storage, if only the paper was not too thick or ample or the type too large. There were almost as many shelf-heights as shelves, and the books filled their shelf spaces, at least up and down, though usually not from front to back. But, for thirty or forty years, American libraries, and most modern libraries everywhere, have been arranged by subjects, and according to rather fine divisions. Under these divisions the books are arranged alphabetically or chronologically, and the value of such a system depends largely upon having as many as possible of the books actually so arranged in one visible series. Obviously the very largest books must be arranged in a series of their own, but the smallest books need not be so arranged; there is nothing to prevent their being mixed in with the medium-sized books, and in library practice they are now regularly so mixed. Thus all differences of height in books are ignored except the regular and over-sized. The gain to the student is enormous; he finds before him in one row—with dummies here and there referring him to special shelves—all the books in the library on the subject he is investigating. Since libraries are arranged for the benefit of their users and not merely for storage purposes, there is no likelihood of a return to the old system. But this means, under any system of book-design that has ever yet prevailed, a deplorable waste of space. Our libraries are actually filled more with wind than with print—even without reference to their intellectual contents.

Now, the cost of shelving a book is a matter of calculation. In the library in which these lines are written the cost of shelving its books, if the cost of the stack alone is considered, is about thirty cents a volume; if the cost of the whole building is considered, the cost of shelving each book rises to a dollar. But, taking the nar-

rower cost of thirty cents a volume, which would represent the cost for new volumes if the stack were to be extended, it is easy to see that, if this is regarded as the normal, it makes a great difference to a library whether its books in the future are to average half as bulky or twice as bulky. In the one case the cost of shelving will sink to fifteen cents a volume, and any given stack will last twice as long before it has to be extended; in the other case the cost per volume will rise to sixty cents, and the stack will have to be extended at the end of half the expected time. Moreover, with books twice the normal thickness, twice the normal distance must be covered in getting them. That either of these conditions is possible, and that one is likely if certain present tendencies continue, can easily be shown.

The modern reader will not consent to go back to the fine type used by the Elzevirs or even to that in vogue in the middle nineteenth century. He insists upon a type readable with reference to the use intended, whether continuous reading or consultation; but he is willing that the other elements of book-design shall favor compactness. He is glad to have in his private library an India-paper Dickens, at eight hundred leaves to the inch in thickness, and in public libraries encyclopedias and dictionaries printed on paper of only twice that thickness, or four hundred leaves to the inch; in the one case shelving four books where one was shelved before, in the other case two. He sees no reason on the side of the buyer why novels should not be printed on paper as thin as that of the American Encyclopedia or the Century Dictionary. He would, moreover, have no objection to a book form that should better utilize the space on the shelves than is done by the current twelvemos—for instance, a form like the favorite two-column octavos of forty years ago, the form in which many veterans read Miss Mulock's novels.

If not sufficiently ancient for this, the modern reader may still recall with pleasure another book form which combined compactness with legibility and lightness more successfully than any other book of

modern times, and in which many of us made our first acquaintance with standard English novels. Here, for instance, is a copy of "Henry Esmond," published in this form July 4, 1879. It contains forty-four quarto leaves, eleven inches high and eight inches wide; its thickness is about a sixth of an inch. A yard of these books, therefore, would just fill a regulation shelf, taking up all its available space, in height and depth as well as length, and there would be *more than two hundred of them*. "Henry Esmond" in the original Smith Elder edition occupied nearly two running inches on the shelf; the set of twenty-one volumes, placed as closely as they should be on a library shelf, occupy thirty-eight inches, or an inch and six-sevenths to a volume. In 1881 the Harpers issued Hardy's "Laodicean" in the Franklin Square Library. The book contains thirty-six leaves, being therefore a fifth thinner than the "Esmond" in this edition. In the new collective edition of Hardy's works issued by the same publishers this novel occupies five hundred twelvemo pages, and is bound in two volumes, which take up rather more than three inches of shelf room. It is only fair to add that the publishers offer also a thin-paper edition. Is it any wonder that a printer, on being asked by a young writer how large a book a certain manuscript would make, replied: "Any size you like."

It was said that the Harpers did not find the Franklin Square Library profitable at fifteen cents a volume for uncopyrighted books. With modern methods of production these books would probably be very profitable at that price. But during the last thirty years the public has been educated to demand bound books, even at twenty-five cents or less; and the Franklin Square Library was issued in paper. Books of this format could be issued in tough cover papers, to occupy not more than a quarter of an inch on the shelf; or since libraries like to have the back of a book wide enough to receive lettering and a label, these quartos might be put into stiff covers and still run three to the inch, or over a hundred to the yard. As a book to hold in the hand, one of these volumes in a durable

paper cover, and stitched through the middle of its single signature, thus opening freely to the inner limit of the page, leaves little to be asked. When its compactness for storage is considered we can but marvel that so promising a book-design should have been discarded instead of being perfected. No doubt the public has been to blame; it has wanted its books to make a show; and this the thin quarto did not do. But this format may be not discarded, but only in abeyance. One of our popular magazines has recently adopted a size both higher and wider, twelve inches by eight and a half, as against the much more convenient size of the Franklin Square Library. If other magazines follow suit, it would be well if they would adopt a height not too large for ordinary shelving, say, ten and three-fourths inches.

Above all, let our magazines and books be printed on paper of reasonable thinness. Let them not emulate certain of the British reviews which come to us on a paper that seems a cross between blotting paper and cardboard. Here is the volume of the *Westminster Review* for the last half of 1911, occupying three inches, not reckoning the covers, with its 358 leaves. Its volume for the first half of 1898 has one more leaf and occupies an inch and a half, even so being on paper as thick as anyone could wish. But the new paper is so much lighter!—yes, by the inch, but not by the page; for the two volumes just contrasted weigh respectively fifty-six and fifty-eight ounces, with the advantage on the side of the thinner volume. If this fashion should prevail widely, it would become necessary for librarians to demand not merely, as they have done, binding adapted for wear but also paper adapted for storage. But let us hope that the “blown book,” to use Franklin’s apt phrase, blown in type, in leading, in paragraphing, in margins, and now last in paper, may prove so contrary to the spirit of the twentieth century that, if ever produced, it will remain in its publisher’s warehouse a windy monument to his own mistaken judgment and treachery to his professional ideals.

VOCATIONAL WORK THROUGH THE LIBRARY

IN view of the discussion of vocational guidance at the recent meeting of the Massachusetts Library Club, the work of one of Boston’s special libraries in this direction may be of interest.

The public reference library conducted by the Women’s Educational and Industrial Union is devoted to women’s work, and a considerable part of the material relates to vocational education and guidance and institutions offering special training for non-teaching professions. Current reports and catalogs of schools and colleges throughout the country giving vocational courses are kept in the library, and may be consulted by anyone. A person interested in social service, for instance, will find there the circulars of the different schools for social service in the United States, and also books and periodical articles describing the opportunities for women in this field.

So many requests for information of this sort have been received that suggestive reading lists (ten to twenty titles) have been prepared on a number of occupations for women, as agriculture, chemistry, interior decorating and institutional management. These are sent to deans of women’s colleges, vocational counsellors and librarians who are interested in the subject.

Most of the references relate to college and business women; some of them, however, are intended for the high school and grammar school graduate, and part of the vocational material in the library is of interest to the younger girl.

The Union’s vocational guidance work is conducted chiefly through the appointment bureau. The library supplements the work of the bureau by collecting material for its use and preparing references on vocational subjects. Some direct vocational advising is, however, performed by the library. Many requests are received either in person or by letter for information about the requirements for some special line of work, the preparation needed and schools that offer such training. “What are the

necessary qualifications for a children's librarian?" "Where can I learn landscape gardening?" "How can I prepare myself for settlement work?" are illustrations of requests received.

Another phase of the work is represented in the "Notes on women's vocations," which is one of the features of the Union house organ. These include references to new lines of work for women, openings in the Government service, civil service examinations, and notices of current books and periodical articles on vocational subjects.

In addition to the reference lists above mentioned, several special studies on vocational work with women have been prepared. A survey of the opportunities in eastern Massachusetts for professional training for women was made for the Association of Collegiate Alumnae, and is embodied in the recently published directory of that organization on "Vocational training." A study of vocational guidance for college women has just been completed. This includes organizations engaged in the work, collegiate appointment bureaus, work of the Association of Collegiate Alumnae and its branches, and college publications dealing with the subject.

ETHEL M. JOHNSON.

ADMINISTRATION OF LIBRARY BINDING

THE most successful administration of a library's binding department requires recognition of two very important and fundamental business principles that are often overlooked, and more waste may be traced to the failure of observing these almost obvious economic features than to the patronage of any number of unsatisfactory binders. These two elements of success are: first, a thorough standardization of materials and methods, and second, a proper classification of the material to be bound, such a classification to be based upon the use, location, and value of the volumes to be treated. In consideration of this theory we may almost overlook those causes of general complaint, such as the poor quality

of paper and publisher's bindings, or even the unwarranted trimming and wholesale treatment that is characteristic of many so-called "library" binders, for the first we are unable to control, and the second may be regulated by the scheme outlined herewith to such a degree that the element of dissatisfaction may be greatly minimized, if not entirely obviated. Scientific direction makes it possible to use to advantage many of the methods that at present we are almost inclined to label as "butchery" and "shoemaking." Laced, or French joint cases, tight backs or loose backs, sewing on sunken cord, sewing on tapes, straight sewing, and over-sewing are all meritorious processes, but the exclusive adaptation of either alternative is a disastrous rut for any library to follow. Yet that is pretty much the situation to-day as revealed by the bindings on the shelves of a dozen of our leading libraries.

STANDARDIZING MATERIALS AND METHODS

The number of colors for bindings should be few but strong in character, so that dark blue, for example, indicates definitely one exact shade, whether referring to a cloth or to a leather. Fancies or æsthetic delights deserve scant attention, if such selections suggest a multiplicity of rainbow effects, for thus the whole scheme of standardization is disrupted, since the term standardization includes the idea of perpetuity, and we cannot be sure that every shade can be produced or even matched indefinitely. The necessary idea of stability and the certainty that cloth has this lasting quality to a greater degree than any leather determines that the color scheme must have its basis in some one line of book cloths, such as the library buckram produced by the Holliston Mills.

For leathers a library should consider only two or three, namely: Turkey morocco, Niger morocco, and Scotch pigskin. Since the colors of pigskin are not dependable except in the naturals and the browns, this leather should be adopted only as supplementary. Contrary to what many leather dealers or bookbinders may say, perhaps because they do not handle the leather, it is

quite safe to trust to the qualities of Niger morocco. Turkey morocco has been the only leather to give uniform satisfaction for a long term of years, while other leathers have been only relatively satisfactory because of rapid disintegration after a short period of disuse of the books thus bound. The more recently introduced Niger morocco gives every evidence, however, of equalling the fine qualities of Turkey morocco, and costs several cents less per foot. Since the nature of this article will not permit any adequate discussion of the relative values of materials, for the purposes of this discussion, please accept the standardized selections herewith, made as a result of the suggested research and comparison:

<i>Leather</i>		<i>Cloth</i>
Niger morocco	matching Holliston	Library buckram.
Dark red		No. 26
Light red		399
Dark blue		91
Dark green		92
Dark brown		405
Light brown		13
Olive		15
Black (green-black)		75

With these colors of leather and cloth it is possible to match with reasonable satisfaction almost any number of old colors used, except for the old sheep binding. For this purpose natural pigskin serves best, and may be matched by Holliston Library buckram 396.

The style of type is another important feature to be considered. Too often have the binders been permitted to use their own taste, with the result that legibility is often interfered with. The old school binder practiced this little trick to insure the retention of the binding of future volumes of sets belonging to a library or to an individual patron; he would include in one title three or four styles as well as sizes of type. Frequently this result was a violation to artistic display as well as to the desirability of simplicity. Good type costs a lot of money (about eight cents per type letter), so that the judicious sprinkling of a dozen styles of letters over as many sets of volumes would be difficult for a better binder, perhaps, to match without a further equipment of type than would have been necessary otherwise.

materials must be determined by each library and binder interested, although designed end-papers are recommended, since the figures hide the ugliness of the "turn-in," the tapes, and the lining cloth. While not attempting to discuss the relative merits of case binding with the laced binding, it might be well to state that any volume bound in full cloth should never be of the "laced in" style.

CLASSIFICATION OF BINDING

An ordinary classification of binding is simply the division of new binding from rebinding, and while new binding, because it usually includes more difficult collation, averages a slightly higher rate of cost, this division is not important except as a matter of library record. A classification based upon the use, location, and value of individual titles, calling for four grades or qualities of work, is decidedly important. The principle of economy lies simply in the proper distribution of the total bulk of binding over those four qualities of work. Obviously, if the character of a large portion of the total binding of a library can be cared for satisfactorily at a cheaper rate than is absolutely demanded for a few volumes, it is a waste to select the superior grade simply for the sake of having uniformly fine bindings. The four degrees of quality that are usually determined at a glance, together with the probable per cent. that each class forms of the library's total binding, may best be represented by the following outline:

<i>Class</i>	<i>Designation</i>	<i>% of total</i>	<i>Binding</i>
1	Reference books Valuable books	10-15%	½ leather best character of binding
2	Serials and continuations, literary or indexed in serial bibliographies Reputable works not in constant demand	20-40%	full buckram, good work careful collation careful trimming sew straight
3 (a)	Serials, obviously of less worth than above, trade in character, and use principally current	30-65%	(a) full buckram
(b)	Works of ordinary value		(b) full buckram
(c)	Popular books		(c) ⅓ leather, cheaper work, may be over-sewed, and trimmed, durability chief requisite

The interior treatment and selection of

Many public libraries might determine that a considerable portion of class 2 could be dropped into class 3, because the general nature of the collection and the demands upon it would not require careful preservation of some bibliographic features that constitute items of distinct value in a university library. It is by no means uncommon, nor is it evidence of thoughtlessness or bad policy to find in certain library stacks valuable sets and works that have been bound very plainly, but in adopting this policy care must be taken that a cheaper binding for such material is not the sort that injures the books to the extent of robbing them of various bibliographic values. It has been determined by bibliophiles more or less definitely just how much worth may be attached to original bindings, uncut leaves, or any other items that may be characteristic of any particular edition. While this value is chiefly sentimental, the recognition of it has a slight economic bearing, in that any treatment which reduces that theoretical value also reduces the value of the collection. One authority states that trimming more than $1/64$ of an inch from the top of a book takes off 50 per cent. of its edition value. If this assertion is true, there are many thousands of volumes that have been bound for various libraries within the last few years that are now about as valuable as a scuttled ship or a tumbled-down house. The universal practice of oversewing and its attendant processes by many binders is responsible for a great deal of this.

OVERSEWED VERSUS STRAIGHT SEWED BOOKS

Libraries owe a great deal to those binders who have developed methods of oversewing, because this process without doubt offers the most durable results, but this desired durability should be restricted to that class of books which demands it. In producing this binding the binders have made good, but the librarian has listened too long to their advice and has done too little investigation of the results if he permits the universal practice of this style of binding for his library. The process of oversewing usually requires the cutting off the back

of the books, taking away an eighth of an inch of the inner margin. The smooth back is then coated lightly with glue, and when dry, the book is separated into arbitrary signatures, which are perforated along a line an eighth of an inch further into this inner margin. After the volume has been sewed and has reached the forwarding process each of the other margins is trimmed smooth. The page has now been trimmed on all four edges, and because of a usual slight unevenness in the perforation and the nature of the sewing involved the edges of the sections are not aligned as evenly as is common with straight sewed books. For that reason the trimming of the outer edges is nearly double the amount that would be necessary to give the straight sewed book the proper finished appearance. The straight sewed books require the preservation of the original signatures, the number of pages of which are supposedly consistent with the weight and quality of the paper, while the oversewing process permits, at the point of the arbitrary division into sections, a regular variation from that number. A twelve-page signature book may thus be redivided into sixteen or eighteen page sections, although theoretically this never happens without intention. Whatever discussion may arise about this point, libraries may be sure that the usual result is a gain in the strength of binding, but that added strength is not always needed, nor is it desired, if the volume is a valuable one. The oversewing process is characteristic of cheaper bindings because it is labor saving; the actual time for sewing takes longer, as the binder will state, but the difference is more than made up by the time that is saved in the mending and reinforcements required on the back of the signatures, if treated in the orthodox way. That is why so many binders prefer to oversew every book they bind. The conclusion or recommendation set forth, however, should appease both this type of binder and the fastidious librarian. It is as follows: Give to those firms that have the best methods of oversewing all of the library's binding that would fall in the class numbered 3 in the

classification given herewith. The more valuable material is probably worthy of a more careful treatment, and seldom demands any elements of durability not consistent with the most orthodox binding.

THOMAS P. AYER.

A. L. A. BINDING RECOMMENDATIONS

SINCE there has recently appeared a statement from a library binder that leather was the proper material with which to bind all books, no matter how they were to be used, it seems only fair that librarians should know exactly the recommendations of the binding committee on this important point. The recommendations advocated by the committee can be summed up in three brief rules:

1. Always use leather on books which are to receive hard usage.
2. Never use leather on books which will be seldom used.
3. In case of doubt give preference to cloth.

It follows from these rules that fiction and juvenile books should be bound in leather, except in localities where experience has demonstrated that cloth is better. In view of the experience of many libraries during the last ten years, there is no doubt in the minds of the committee but that leather is best for such books, and that a good grade of cowhide is good enough for this purpose.

Reference books, especially those which are heavy, such as dictionaries, encyclopedias, etc., should, of course, be bound in leather.

It follows, furthermore, from these rules that practically all periodicals should be bound in cloth. There are very few libraries in which the use of bound periodicals for reference purposes justifies binding them in leather. There may be a large use of periodicals as a whole, but the use that any one volume will have year in and year out is very slight. Since the cloth which meets the specifications of the Bureau of Standards has been on the market librarians have had at their disposal a material

which, in view of the tests made before the specifications were drawn up, can almost be guaranteed to last as long as posterity will wish it to. We know that cloth which is very inferior in quality has been on the backs of books for over seventy years and is still in excellent condition. It is reasonable, therefore, to suppose that cloth made according to these specifications will last practically forever in the temperate zone.

While we know this about cloth we cannot be equally sure that leather will last nearly as long. We know positively that leather which is not free-from-acid is sure to deteriorate under conditions which will be found in all libraries. We know that leathers free-from-acid will last much longer, but how much longer is a matter of conjecture. Furthermore, it has been discovered that in many cases leathers which have been advertised to be free-from-acid have been found on analysis to contain as high as 1 per cent. of free sulphuric acid.

There is no question but that a leather-bound book has a much better appearance than one bound in cloth, but in view of the facts the Committee on Binding believes that the use of leather, except on books much used, is to be strongly condemned.

ANNUAL REPORT OF THE LIBRARIAN OF CONGRESS SHOWS STEADY GROWTH.

THE report of Dr. Herbert Putnam, head of the Library of Congress, was submitted to Congress on Dec. 1, for the year ending June 30, 1913. It includes the report of the superintendent of the library building and grounds, and also that of the register of copyrights, making in all a volume of 269 pages.

It appears from the report that accessions to the library the past year have been most noteworthy from their volume and diversity. "This volume," says Dr. Putnam, "in major part the result of copyright, gift, and exchange, has become so momentous as to constitute a problem far beyond that of any other library. In an ordinary library—for instance, a municipal library—much of such material would be wholly avoided; in the

national library, with the duty to acquire and preserve not merely the most comprehensive exhibit of the American press practicable, but the miscellaneous material in every other field which the ordinary libraries can not undertake, and precisely because such other libraries can not undertake it—in the national library a limitation upon the acquisitions in concern merely for the difficulties of administration would be foolhardy. Better to receive it and treat it broadly than to reject it wholly." There is, however, the problem of actual shelving. Within six or seven years it will be necessary to arrange additional accommodation in the northeast court-yard as has already been done in the southeast court. A stack constructed there would provide space for 800,000 volumes at a cost of not over \$325,000.

During the past year two of the veteran employes of the catalog division, Louis C. Solyom and Steingrimur Stefánsson, have passed away. Mr. Solyom, who was a Hungarian by birth, had been connected with the Library of Congress since 1867 and was a linguist of exceptional ability. Mr. Stefánsson, who had been with the library since 1899, was its highest expert in bibliography. A third death during the year was that of James Quay Howard, since 1897 in charge of the "Congressional Reference Library," with his headquarters in the Representatives' reading room. Several divisions, notably those of classification, catalog, and reading room, have suffered seriously through the frequent withdrawal of assistants to library positions elsewhere, where better salaries are offered.

The appropriations for the library proper and the copyright office, including those for the care of buildings and grounds, were \$592,585.94. This does not include an allotment of \$202,000 for printing and binding. Appropriations for salaries were \$384,389.72, and for purchase of books \$98,000, which was exclusive of \$2000 to be expended by the marshal of the Supreme Court for new books for that body. The increase of salary from \$6,500 to \$7,500 for the librarian was refused, as were increases

for the chiefs of the periodical and prints divisions, and a special appropriation recommended for the purchase of additional books and other material for the division for the blind, was not granted.

The net accessions of printed books and pamphlets for the year were 115,862; maps and charts (pieces) 6100; music (volumes and pieces), 39,167; prints (pieces), 10,749. A numerical statement of the number of manuscripts is not feasible. The total number of books now in the library is 2,128,255; maps and charts, 135,223; music, 630,799; prints, 360,494. While no large groups of printed books were presented this year, the aggregate of 11,256 pieces received by private gift testifies to the continued interest and generosity of thousands of individuals and unofficial bodies. In a widely different category, but in its actual significance truly literary, since it embodies a memorial of distinguished literary service, was the gift from Dr. Lawrence Heyworth Mills, now a professor at Oxford University, of a beautifully illuminated address on vellum enclosed in a casket of silver, presented to him by Parsi friends and admirers in Great Britain as a mark of their appreciation of his services to Zend Avestic research. With the manuscript records of the American Colonization Society, came also the society's special collection of printed books, numbering 745 volumes, 730 pamphlets, and 486 periodical numbers. These included not only files of the publications of the society and of its state auxiliaries—reports, periodicals, and occasional issues—but also numerous miscellaneous works relating to slavery, to the progress of the negro race, and to the Liberian Republic. Some 500 photographs, chiefly of Liberian subjects, and 77 maps were also part of the collection. The classes of literature that have received the most concentrated attention and the most important, if not the most numerous, accessions during the year have been art and architecture. Source material relating to the early periods of discovery and exploration of the western hemisphere was largely augmented by the acquisition of the manuscripts of Dr. Rudolph R. Schuller, the well

known specialist in American philology. The collection embraces such results of Dr. Schuller's own researches as are still unpublished; a considerable body of transcripts and of photographic reproductions of rare originals preserved in widely separated archives—in the Archivo General de Indias in Seville, in the National Library in Rio de Janeiro, in the British Museum, the Royal Library in Berlin, the Brinton collection, in remote monasteries in Peru, and in other almost inaccessible repositories; and an elaborate manuscript bibliography. Special efforts have been directed to the acquisition of source material relating to European history, using as a guide the Check list issued by the American Historical Association. Of the 2197 sets there listed, the library now possesses 1102, or slightly more than one-half the entire list. The completion of the collection of this material is being made the object of special effort.

In the manuscripts division several accessions have been made which round out important groups already in the library. Among these are the diary of John Fell, an addition to the Papers of the Continental Congress; the logs and journal of Admiral Sir George Cockburn, supplementing the large collection of his papers acquired four years ago; the papers of Nicholas Biddle, which, taken in conjunction with those of Andrew Jackson acquired several years ago, complete the story of the contest between Jackson and the second Bank of the United States; the records of the American Colonization Society bring to a period the history of the attempts at negro colonization; and, finally, the important project of building up a library of transcripts of documents in the archives of foreign countries which pertain to America in its colonial period, now measurably completed so far as the English records are concerned, has received impetus from the arrangements entered into for transcribing the documents in the French and Mexican archives. Three volumes of the Journals of the Continental Congress for the year 1781 were issued in the course of the year. The copy for the year 1782 is in press, and that

for 1783 is well on in course of editorial preparation.

In the division of documents 24,583 volumes and 18,559 pamphlets were accessioned, and also 770 maps and charts. International exchange relations were established with four additional governments, viz., the Presidency of Bombay, the Presidency of Madras, the Government of Finland, and the free city of Lubeck. This raises the total number of foreign repositories of United States documents to 92. Official publication of the various states of the Union received numbered 9485. During the preceding year a special collection of American official publications on industrial accidents and their compensation was made; in response to requests for further information, the division this year made a special collection of German documents on this subject, consisting of 714 volumes and pamphlets. A second special collection consists of the documents published by foreign legislatures for the use of their members, covering rules of procedure, methods of drafting bills, etc., and numbered 409 volumes and pamphlets. A third collection consists of the publications issued in connection with the arbitration of the 1912-13 wage controversy on eastern railroads.

In the law library the accessions were 6173, making the total number of volumes 158,117. Since 1894 briefs in the cases filed in and decided by the Supreme Court have remained unbound. The binding of these has now been arranged, and briefs and records will be bound in accordance with the order in which the cases are printed in the official reports of the Supreme Court. During the year there was published a 93-page bibliography of bibliographies of international and continental law under the title "The bibliography of international law and continental law." A fellowship in the library has been established by Harvard University, by which Mr. Thomas W. Palmer, Jr., has been designated by the president and fellows of Harvard University to study in the library the law of Spain, and then by a brief subsequent study of Spain to assist in the publication of a Guide to the law of Spain.

It is hoped to publish the volume during 1914.

During the past year the experiment has been tried of opening the map division on Sundays and holidays. Inquiries made on these days were, on the average, more numerous and quite as important as those made on week days. The "Descriptive list of maps of Spanish possessions within the present limits of the United States, 1502-1820, by Woodbury Lowery, edited by P. L. Phillips" was published, and the printing of the third volume of the "List of geographical atlases" is under way.

In the music division no gifts of moment were received. The transcribing of the scores of old operas unprocurable in the original or in print has continued, forty-four being added during the year. The catalog of "Early books on music" appeared in August, and the "Catalogue of early librettos" will probably be finished early in 1914.

The periodical division receives 6679 current periodicals (separate titles). As the division uses the second copies of the copyrighted periodicals received (now 1020 in number), the total number of current periodicals received is 7699. Of this number, 1268 are received through the Smithsonian Institution. In these statistics year books, almanacs, and other serials of an annual nature, board of trade, and official serial publications are not included. The whole number of periodical acquisitions amounted during the year to 135,358 items. The number of newspapers received is 894, of which 788 are American and 106 are foreign. Of the American newspapers, 582 are daily papers and 206 are weekly. During the year 1912 volumes of newspapers were bound, and 5189 volumes of periodicals. One publication, "A check list of American eighteenth century newspapers in the Library of Congress," was issued, and the chief of the division collaborated with the chief bibliographer in preparation of the "Select list of references on the monetary question."

Among the accessions to the prints division of special interest are several series of lithographs and etchings by Joseph Pen-

nell, principally views of the Panama Canal. The division has supplied during the year to educational institutions and art classes 16,627 photographs of paintings, sculpture and architecture, without the loss (or damage) of a photograph.

In the binding division 8552 volumes were bound in half morocco, the half morocco being in part the new "acid free" goatskin, of domestic tannage and finish, which is expected to outlast by many years the expensive French and German moroccos. In all 13,649 volumes received leather bindings and 21,378 were done in various book cloths, besides a considerable amount of repair work.

The total number of volumes cataloged during the year was 107,544, of which 73,949 were new accessions and 33,595 arrears recataloged; 704,387 cards were prepared and filed in the several catalogs of the library. Following the reclassification closely several of the sub-classes in language and literature, including some of the larger and more important, have been completed and others started well under way. These constitute the bulk of the material recataloged.

American and English law at the Capitol and Library of Congress has been divided for purposes of convenience in handling into three general groups.

I. Statutes, reports, digests.

II. Treatises, textbooks.

III. Reference: Encyclopedias, general collected cases, law dictionaries, language dictionaries, periodicals, etc.

In all of these a large part of the material was found uncataloged, especially among the books received before 1900, which were at that time shelved without cataloging. Until February, 1912, entries were made and printed without indication of subject headings.

The number of volumes classified during the fiscal year 1912-13 was 105,618; reclassified, 23,970, including 1817 transfers; new accessions, 81,648; shelf listed, 98,442, of which 76,289 were new accessions.

During the year the number of subscribers to the printed cards has increased from

1774 to 1852. The cash sale of cards, including subscriptions to proof sheets, amounted to \$47,765.26. Cards for about 45,000 different titles were added to the stock during the year, including about 6000 cards printed for libraries in the District of Columbia and about 1800 printed for other coöperating libraries. The whole number of different titles now represented in the stock is approximately 584,000, including about 34,000 "unrevised" cards not represented in the depository sets. A proof sheet depository set has been supplied to the Philippines Library. Except for this change, the list of depositories is the same as given in the report for 1911.

The division of bibliography has enlarged its general work and has prepared a large number of typewritten lists during the year, and has also coöperated freely with other agencies in the work of selection and compilation of titles.

The main work of the Smithsonian division has comprised the filing in of the sets of society publications; the preparation of unbound volumes for binding; the circulation of books in the classes of academic societies, and those relating to pure science, and the examination of books and pamphlets transferred from other libraries.

The reading room for the blind, transferred from the Public Library, has had a successful year.

The number of blind readers has steadily increased, until the list of active readers now covers practically all the known blind of the District of Columbia, about 100 in number. The acquisition during the year of several hundred new books, music scores, and magazines published in embossed print has brought joy to the hearts of the book-hungry blind. By a provision of Congress there are sent to this library copies of all books made for touch readers at the American printing house, Louisville, Ky., so far as these are printed from the Government allotment. In addition to the new matter from this source there have been additions by gift and purchase.

Discussion of the project for a legislative reference bureau has continued and several bills have been introduced. In Appendix

iv are quoted in full the three bills which are of most practical interest, together with quotations of the reports accompanying them.

In addition to these bills in Appendix iv are other reports and appendices, including the report of the superintendent of the library building and grounds, statistical tables of appropriations, and expenditures, appropriation acts, 1913-14, report of the register of copyrights, and a list of accessions of manuscripts and broadsides during 1912-13.

OPENING OF THE SOMERVILLE, MASS., PUBLIC LIBRARY

THE new building of the Somerville Public Library, for which ground was broken fifteen months ago, was dedicated Dec. 17, with brief informal exercises. Three minute addresses were made by the mayor, the building commissioner, and the president of the board of trustees. The librarian, Drew B. Hall, spoke briefly on "The aims of the library of to-day." He said:

"The progress of a city depends upon the development of the bodies, of the minds and of the spirits of its citizens. The greatest force in the world is the inspiration men receive from a book, the Book of Books.

"So long has this power of books been recognized and so widely is it spread that to-day all things under the heavens, or in the sea, or on the earth are dealt with in printed pages. To succeed every man must read. Yet unaided he knows not which of the volumes before him is best for his purpose; neither is he able to own privately all those he sometimes must read. To meet this need for thousands of books on hundreds of subjects, and for guidance in their choice and use there have been created coöperative libraries of the public.

"Great as is the service offered, still greater is the economy effected. For the cost of its maintenance, the public library system of this city yearly renders service which, if purchased individually, would cost its citizens half a million dollars. The library alone deals with what may be con-

sumed and consumed again, and may be read and re-read, and be still able to give each new reader whatever part of itself he can understand and take unto himself.

"To give this good service of books there are required three things—buildings, books and actuating force.

"Buildings suitable for economical and efficient work, and since libraries house the minds and the spirits of the great, and offer them continually to citizens both young and old, buildings beautiful to uplift the living and honor the dead!

"Books; of the making of them there is no end; books great and little, books useful and useless, books never dying and books never alive! Inaccurate books and out-of-date editions are worse than none; duplication of matter already owned in one volume is confusing and wasteful. So the choosing of the best books and their skillful use have become a profession, and their classification and cataloging an exact science.

"If the building be the body, and the books be the mind, there must be the third part, the heart and the spirit. This is the library staff of sympathetic, forceful and well-educated persons breathing warmth into the body of cold brick, and life into the mind of quiescent books; ready at all times to serve the city, 'regarding, not chiefly its passing cravings, but those things which alone can finally satisfy it.'"

Following Mr. Hall was a brief address by the superintendent of schools on "The public library as a public educator," after which Dr. Charles L. Noyes, of the board of trustees, delivered the chief address of the evening, on "The influence of the public library."

"To understand what it means that a city should build, equip, man and maintain a library like this," he said, "is to explain the meaning of our civic life to-day. A modern library is a mirror held up to modern life in its latest phase. Approve it you cannot unless you believe in the movement of humanity in which we are a part. Condemn it and you indict civilization, you stand against the stream of our life as a people to-day. 'The best is not too

good for the common people,' is our creed and our inspiration. The symbol of that civic zeal and ideal is before us in this noble library, standing in the present and pointing to the future.

"A modern city library is, I think, the finest and clearest interpretation of the spirit of the times. It is, indeed, but one organ in the complex and complete municipal ministry. All kindred institutions—hospitals, schools, parks, play and pleasure grounds—are but the people acting collectively for the benefit and betterment of all. But I hope it will seem no partiality in me to say that the library serves in things which are the most indispensable, and of the highest rank.

"A public library shows humanity educating itself for human life—improving its efficiency, perfecting its nature, enriching its capacities and resources. But the supreme task for the democracy of the future is to educate itself for its work as a democracy. Popular government must be intelligent. A democracy cannot survive, still less prosper, without libraries or their equivalent. A monarchy might, but the problems of life and government under popular rule are many and multiplying, and we, the people, must solve them. Mere zeal and good will have not enabled us to dispose of such comparatively simple issues as temperance, charity, slavery. What shall we do when we deal with the more debated and difficult subjects, such as commission government, referendums, public ownership, trust control, eugenics, and all the reforms which are thrust upon us to adopt offhand?

"But the spirit of the library turns on us sad eyes of rebuke when we dwell too long on her function as educator of workers and voters. She first and last offers to us, at their best, the things for which we work and live. She gives us books gathered from all lands and ages, selected, adapted to mood and taste and capacity. Of all the ministries of a city to its citizens is there any to surpass, to equal this? It invites all the people into the aristocracy of intelligence and character. The best that life has to give man, at his best and highest, it

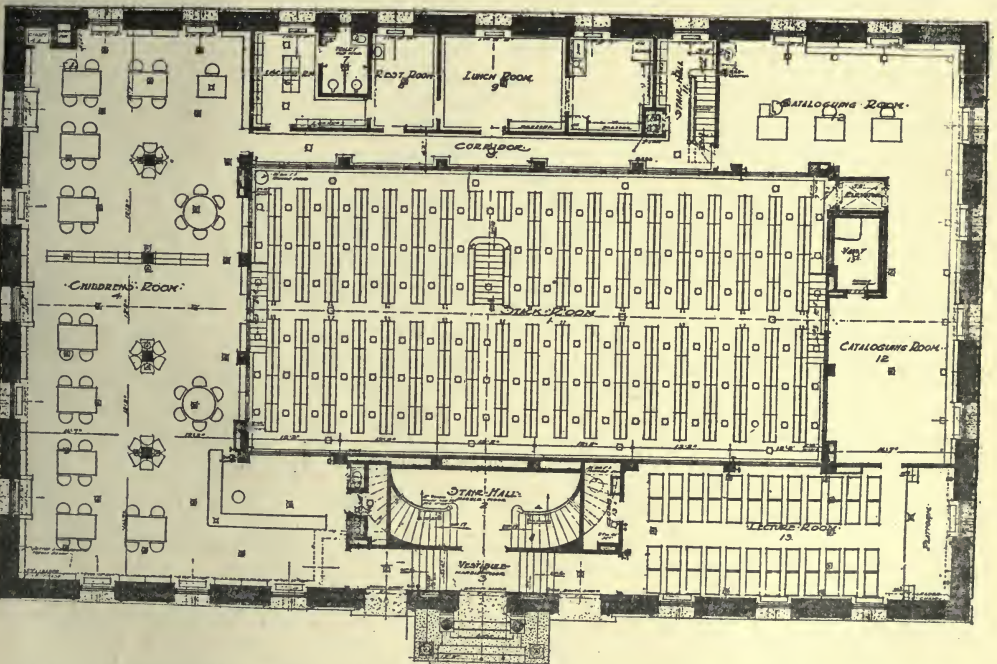

EXTERIOR OF THE NEW PUBLIC LIBRARY, SOMERVILLE, MASS.

SOMERVILLE PUBLIC LIBRARY—MAIN FLOOR PLAN BOOK ROOM FOR ADULTS 150 SEATS—WOODEN BOOK CASES FOR 45,000 VOLUMES

SOMERVILLE PUBLIC LIBRARY—GROUND FLOOR PLAN—STACK ROOM 120,000 VOLUMES CAPACITY—CHILDREN'S ROOM 66 SEATS LECTURE ROOM 96 SEATS

makes the universal prerogative of the whole body of citizenship."

Following the addresses the building was thrown open to inspection. Its style is Italian Renaissance, and was inspired by the Palazzo Albergati of Bologna. It is 123x73 feet, two stories high, with a half-floor cellar in the rear. It is built of Persian gray brick with terra cotta trimmings and green tile roof. The Snead storage stack of two levels, containing 140,000 volumes, has been placed in the center, below the main floor of the building, and is thus entirely dependent upon artificial light, and persons are placed between the stack and the light next the windows. This reverses the type of plan of which the Library of Congress is an example, with the reading room in the center and the books outside.

The largest group of users, the adults, are given the main floor extending over the storage stack, which contains wooden cases upon the alcove plan for 45,000 volumes and seats for 140 readers, and has light on all four sides and overhead. The second group, the children, occupy one end of the ground floor, with direct access to the storage stack; has shelving for 7000 volumes and seats for 75.

The third group, the staff, have a cataloging room at the other end of the storage stack on the ground floor. In the rear is a suite of four rooms for staff convenience, and at the right of the entrance a small lecture hall seating 100. Artificial light is by electricity from overhead; indirect on the ground floor, direct in the book room for adults, whose height, some 23 to 30 feet, raises the lamps largely above the line of vision. Tables and book cases are all movable, allowing the rearrangement of space as desired. The cellar has boiler, janitor's rooms and two work rooms. An electric elevator with five stops reaches all floors, and there is a very complete equipment of telephone and other appliances for comfortable, rapid work.

The attempt has been to erect a central building complete for the moderate sum of \$125,000 which should be beautiful in simple dignity, economical in construction and efficient in operation. These purposes would

seem to be accomplished, the unit cost per seat and per volume stored being very low and the beauty and lightness generally acknowledged.

D. B. H.

AMERICAN LIBRARY INSTITUTE

IN place of the usual meeting at Chicago in January, a meeting of the American Library Institute was held at the Park Avenue Hotel in New York on Monday, Dec. 1, under the presidency of Dr. Frank P. Hill, and with Miss M. E. Ahern at the secretary's desk. There were in all twenty-six members of the Institute present, but as an invitation had been extended to other library people in New York and vicinity, the afternoon meeting was attended by forty or fifty library folk, including M. Otlet of Brussels, and the evening meeting by over a hundred.

The first paper at the afternoon session was that of Mr. H. L. Koopman, librarian of Brown University, on "Book storage," in which he lamented the considerable waste of shelf space, as by books of featherweight paper and like irregularities, as well as by the requisite air-space, and instanced the large saving of space resulting from the use of such a page as the old Franklin Square Library. He referred incidentally to Mr. Edison's suggestion of thin nickel plates for book use. There was some brief discussion of the use of India paper books, which were in general considered unfit for library use.

Prof. W. Dawson Johnston of Columbia University then presented a paper on "Recruiting college men and women for the ranks of librarians." He quoted statistics from returns made by college classes at Princeton and elsewhere to show the standard of payment of professional men and the increasing remuneration of men who had adopted a business career, which last was in striking contrast with the pay of librarians. He suggested that there should be a definite campaign to obtain the interest of college men and women in library work, by lectures on the subject in the important colleges from eminent librarians. His paper offered opportunity for com-

ment from several points of view, part being taken in the discussion that followed by Miss Ahern, Mr. Hill, Mr. Dana, Mr. Dewey and others. Mr. Dewey pointed out that though he was the first to limit membership in the New York Library School to those having a college degree, he emphasized much more the natural adaptability for library work on the part of those seeking to enter the profession. There was considerable discussion and diversity of opinion on the subject from the several speakers, and after a further summing up by Mr. Johnston it was decided that a committee should be appointed to take any advisable steps.

The subject of "appraising the value of book collection" was treated rather informally by Mr. C. H. Gould, librarian of McGill University, Montreal. He outlined the three methods of appraising a library, at its cost, at what it would bring at auction, and at its probable replacement cost, rather indicating the latter as a desirable basis, but admitting the difficulty of making any valuation that would be wholly satisfactory.

A special dinner was provided for members of the Institute, who were privileged to include guests, so that about thirty-five enjoyed the dinner hour together.

At the evening session, the invitation to library people outside the Institute board brought, as above stated, considerable response in a larger attendance. Melvil Dewey made the leading address of the meeting on the subject of "The general tendency of the library profession," emphasizing his well-known views with his usual vigor. His inspirational address was cordially applauded.

Dr. George J. Fisher, secretary of the International Y. M. C. A., spoke on "Physical efficiency," summarizing his addresses to the Brooklyn Library staff.

The Institute meeting was held at this time and place to separate it from the council meeting in Chicago, and coming immediately after the meeting of the eastern college librarians, had the advantage of attracting several college librarians who might not otherwise have been able to be present.

NEW YORK STATE TEACHERS' ASSOCIATION—LIBRARY SECTION

THE meeting of the library section of the New York State Teachers' Association was held at Syracuse on Tuesday, Nov. 25, 1913. The meeting was called to order by the president, Dr. Sherman Williams of Albany, with about forty members in attendance; later in the morning this number approximated one hundred. It was noted that teachers and librarians were present in about equal numbers.

It is recorded that Miss C. M. Underhill, regularly elected president at the last meeting, found it impossible to serve and tendered her resignation in February, 1913. It was accepted with regret and filed. Dr. Brubacher, president of the Association, appointed Dr. Sherman Williams to the office.

At the opening of the meeting the chair explained the plan and purpose of the School Library exhibit, and extended an invitation to all to see it at the close of the session.

The first paper presented was prepared by Miss Frances Jenkins Olcott, on "Story-telling as a means of teaching literature." Owing to the absence of Miss Olcott this paper was read by Dr. Williams. The following questions were given by Miss Olcott as some which confront educators: "How can I tell stories without special gift and training?" "What is the educational value of stories?" "How shall the story be prepared and presented?" "How may it be used to develop literary taste and lead to better reading?" "What stories shall I tell?" Three points of this excellent paper were that no teacher who loves children need be afraid to tell them stories; that the school alone can undertake *formal* and *carefully correlated* work for laying the foundations of literary taste; and that story-telling for the purpose of leading to better reading should be part of every school curriculum. It should be regarded seriously as a necessary course in elementary literature.

The chair said he wished to emphasize the opinion that story-telling should fill a

larger place in teaching literature than is recognized. In the primary grades it should have a place in the daily program. Continuing, he said that children leave school before their interests are established. The interests awakened through the stories told in school tend to direct their reading and establish their interests. Further, in secondary schools topics of history may well have their historical setting given in story form as introductory to other methods of teaching this subject.

Miss Mary S. Crandall, of the Richards Library at Warrensburg, N. Y., read a paper entitled "What can be done by a small library in a small town," which was both practical and suggestive.

The next speaker was Miss Martha M. Cox of Elmira, district superintendent of schools, who spoke on the "Possibilities of the pupils' reading courses." Miss Cox names the teacher, the pupil, the parent, and the district superintendent as the agents upon whom depends the success of the reading course. Of these she names the teacher as the most vital factor, and says: "Casual acquaintance with titles of books in the school library will not suffice; she must be a constant, interested and an enthusiastic reader of the books she is encouraging her pupils to read." "Book day," an occasion to create interest in the school library, is being observed in some schools of this district. Parents are invited, and the leading feature of the program is the relating by the pupils of impressions gained of library books they read. Miss Cox believes money is more generously appropriated for the library since the people have this opportunity to see that it is being used to advantage. There are five organized teachers' reading clubs in this supervisory district, which are studying, in addition to the prescribed teachers' course, practical questions of library economy and efficiency.

The last speaker on the program was Miss Adeline B. Zachert, of Rochester, who gave an inspiring paper on "Books our children read, and why."

In the discussion which followed various questions came up: "The right book at the right time," "Does this right time not

vary?" "What is the best book?" "When is the best time?" "How is the child to learn what is the best book?"

Miss Viele, Miss Thorne, Miss Zachert, Miss Pattison and Dr. Williams took part, and points were made that revealed opinion generally to be that it is not safe to depend upon age, but rather upon individual tendencies, temperament and environment of the particular child in deciding what is the best book for him.

Miss Zachert thinks that teachers should suggest several books, naming items of interest in each, and then let the child make his own final selection. This favors the personal element on both sides. To do this the teacher must know the book herself.

The report of the nominating committee was given as follows: For president, Miss Adeline B. Zachert; for secretary, Miss Addie E. Hatfield. No other candidates were named and these were unanimously elected.

Miss Zachert, the new president, expressed the wish that the keynote for the next meeting be spoken at this time. Miss Elizabeth C. Thorne, of the Syracuse University Library School, offered as a suggestion: "Some difficulties of school librarians." Miss Thorne mentioned the book-seller's choice for school libraries, which shows lack of discrimination and judgment. Frequently the books are cheap, inferior and of no literary merit, and she asked: "Is there anything this library section can do to meet this condition? Does this emphasize the teacher's responsibilities?"

Dr. Williams thinks it does emphasize the teacher's responsibility, but to meet it she should have training adequate to meet the demands of the position. He stated that but one normal school in this state offers library training to teachers, and that the training classes do nothing in this line of work. He believes something should be done to teach teachers how to select and what to select. His experiences as chief of the School Libraries Division of the State Education Department furnish evidences of the need of such training. He further stated that school librarians, particularly those in high schools, should

MULTNOMAH COUNTY PUBLIC LIBRARY, PORTLAND, OREGON.

receive compensation equal to that of teachers.

The idea to make this problem the subject for consideration and discussion at the next meeting met with general approval.

Announcement is made that the State Library School Education Department, Albany, N. Y., offers a course of training to teacher-librarians, free of tuition, at the summer session.

Appreciation of the arrangement and completeness of the exhibit of school library aids was expressed by the chair, and endorsed by all who saw it. The committee, of which Mr. F. K. Walter of the State Library School at Albany was chairman, merited the commendation they received for the efficient work done. Other members of the committee were Miss Thorne and Miss Munday, both of Syracuse.

A radical departure was made in the plan of the exhibit this year. Instead of having it confined to one room, three rooms were devoted to it in the Central High School of Syracuse, one room each being devoted to primary, grammar, and high school libraries. A large number of teachers visited the exhibit, and a considerable number of bibliographies and other library aids were distributed free.

Particular credit is due to Miss Elizabeth C. Thorne, of the Syracuse University Library School, who arranged the schedule of attendants throughout the time the exhibit was in place; to Miss Mundy, of the Syracuse Public Library, who arranged the primary room, and to students of the Syracuse University Library School, who gave much valuable voluntary service in installing and repacking the exhibit; to the Syracuse Public Library for appointing staff assistants for service; and to the Central High School of Syracuse for similar service.

Valuable exhibits were received from the New York Public Library and its Library School; from the State Education Department; the Brooklyn Girls' High School, the Geneseo Normal School, and the public libraries of Buffalo, Binghamton, Syracuse, Newark, N. J., and the District of Columbia. The Baker & Taylor Co., Funk &

Wagnalls, and G. and C. Merriam Co. lent a large number of attractive books suitable for use in school libraries.

A motion was made by Miss Cox that a rising vote of thanks be extended to Dr. Williams in appreciation of the excellent program prepared for this meeting. It was seconded by all the members present and carried. At 11:40 a.m. the meeting adjourned.

ADDIE E. HATFIELD,

Secretary School Libraries Section.

MULTNOMAH COUNTY PUBLIC LIBRARY, PORTLAND, OREGON

IN preparing the plans for the new Multnomah County Public Library building there were two points constantly in view, the one to secure the greatest possible amount of space, the other to provide for the utmost economy of administration. That these two objects were accomplished and yet subordinated to the beauty of the building is an achievement of which the architects, Doyle & Patterson, of Portland, may be justly proud.

The building is of the style of the Georgian period, three stories in height, with basement and also a mezzanine floor over a portion of the area. The basement and first story, and also the trimming, are of Bedford Indiana limestone, the remainder of the building is of brick, rich red in color and with slightly roughened surface, which gives delightful texture. Broad granite steps lead to the main entrance and the buttresses on each side are adorned and lighted by bronze candelabra. In the frieze of the cornice over the main entrance is the following inscription, "Public Library Built by Multnomah County, A.D. MCMXII." The frieze upon the remaining three sides of the building bears the words Literature, Philosophy, History, Poetry, Religion, Philology, Economics, Fine Arts, Science, Architecture, Sculpture, Painting, Music, Engineering, Education, Travel, Biography, Mathematics, Astronomy, Chemistry. In each of the panels under the second story windows on three sides of the building appear fifteen names of notable characters in

the following groupings: historians, philosophers, poets, novelists, painters, dramatists, bookbinders, educators, religious leaders, military heroes, naval commanders, explorers, statesmen, painters, etchers, sculptors, architects, musicians, scientists and inventors.

In the backs of the seats of the balustrade surrounding the building are carved the names of the best known and most loved novelists. There are seventy-five pedestals in this balustrade; on the panels of the larger ones are carved the seal of the United States, the early Oregon territorial seal, the state of Oregon seal, the county seal, and the seal of the Library Association of Portland. The smaller pedestals are ornamented with reproductions of the early printers' marks and water marks. On the tympanum over the central doorway is carved an allegorical subject—the Alpha and Omega in an open book. On the tympanums of the other doorways the seals are repeated.

A bronze bubbling fountain is set in a stone niche in the north balustrade, which bears the legend, "Tongues in trees, books in the running brooks, sermons in stones, and good in everything." Above the fountain between the windows is carved the "invitation," "Come, go with us; we'll guide thee to our house and shew thee the rich treasures we have got, which, with ourselves, are all at thy dispose."

Passing through the main doorway, the visitor finds himself in a large vestibule decorated in quiet tones. The directory of the library is here, also the directory of lectures and meetings, changed daily. To the left is the free check room and a small lecture room, which is equipped with a stereopticon and also with a gas plate. This room is especially adapted to the use of clubs. Beyond the vestibule is a square lobby with stairs, elevator, telephones, etc. At one side of this hall is the entrance to the newspaper and periodical department, and on the other may be found the children's department, branch department, story hour room, woman's rest room, dark room for photographs, and the indoor entrance to Library Hall. This auditorium, which

has an outside entrance, also is equipped with stage, moving picture machine and fixed seats which will accommodate 550 people.

The second floor lobby, which is lighted from an open well, has been utilized for the public catalog and information desk. Back of the desk is placed in a niche the Lemnian Athena, the genius of the library. Opening from this hall on one side is the reference department, at the far end of which are the map and art rooms, on the other the circulation department, and at the end of this room is the school department. On the third side is the technical room and the administration offices, which include the directors' room and private offices for the librarian and assistant librarian.

The unique feature of the building is the arrangement of the stack, which is in the center of the building, artificially ventilated and artificially lighted. The obvious advantage of this plan is that every department of the library, with the exception of the children's and the branch, has immediate access to the shelves; the disadvantages after three months' experience are yet to be discovered.

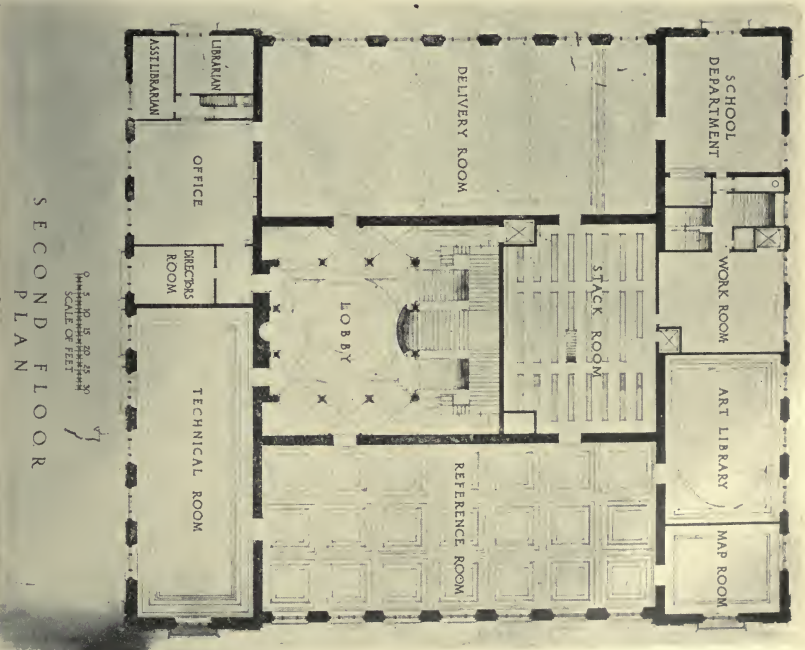

The staff quarters, janitor's rooms and work-rooms are segregated in the rear of the building, which eliminates the necessity of corridors, as a glance at the plans will show.

On the first floor are the packing and shipping rooms and a space for a bindery; on the second floor the school department packing room; on the mezzanine the catalog and order departments, and on the third floor the janitor's apartments and pages' room and the staff locker room, rest room, dining room, kitchen, bath and toilets.

The basement provides for the heating and ventilating plant, storerooms and a large public comfort station for men, which has a separate outside entrance and is maintained by the city.

The main portion of the third floor is not yet used for library purposes. There are five small study rooms, two good sized lecture rooms, and two very large rooms or galleries available for exhibitions.

The building is of reinforced concrete

FLOOR PLANS, MOUNTNOMAH COUNTY PUBLIC LIBRARY, PORTLAND, OREGON.

construction, fire-proof throughout. The floors of all the important public rooms are covered with cork tiling; the floors of all other rooms with cork carpet. The wood finish throughout, including all furniture, is of quartered white oak "fumed," and finished with wax. Particular attention was given to the lighting problem, and success has been attained by using indirect lighting fixtures in all the reading rooms. In the lobbies and lecture rooms semi-indirect lighting fixtures have been used with modeled alabaster glasseate in the fixtures. The building has a combination heating system, both the direct and indirect systems being used. The cost of the building, including the Snead stacks and all furnishings, was approximately \$465,000, or 18 cents a cubic foot.

M. F. I.

COLORADO BOARD OF LIBRARY COMMISSIONERS

At the first meeting of the newly reorganized State Board of Library Commissioners of Colorado, coöperation was effected between this Commission and the members of the Colorado Civil Service Board. Examinations for vacancies in Colorado institutions were held in December, and the library commissioners were asked by the Civil Service Board to prepare the examination questions to be used in the state examinations. There were three sets of questions—one for a vacancy in the library of the State School of Mines, one for applicants for positions paying \$100 a month or over, and a third set for applicants for positions paying less than \$100 a month.

It was decided by the library commissioners to conduct an investigation in Colorado regarding the work done by libraries for schools. It was decided to use a modified form of the questionnaire issued by the Ohio State Survey Commission on library coöperation with schools, which questionnaire was prepared by the New York Bureau of Municipal Research.

While no money is available for the Library Commission's activities, the Commission decided to use the Colorado *Library Leaflet* as a means of securing all the an-

nual reports of Colorado libraries, which reports will be filed by the Commission for future use.

Individual members of the Commission also agreed that in lieu of a paid field worker, the members would visit Colorado libraries as opportunity came, to encourage the library work and to increase the efficiency in this work.

The officers elected were: president, Mr. Chalmers Hadley, Denver Public Library; secretary, Miss Charlotte A. Baker, State Agricultural College Library.

DR. JOHNSTON TO GO TO ST. PAUL

DR. W. DAWSON JOHNSTON, the librarian of Columbia University, New York City, has resigned his post to become the head of the St. Paul Public Library. Dr. Johnston has been librarian at Columbia since July 1, 1909. He was appointed to succeed the late Dr. James H. Canfield. Dr. Johnston is a graduate of Brown University in 1893, and took his Master of Arts degree at Harvard in 1898. He was an assistant in the Library of Congress from 1900 to 1907, and librarian of the Bureau of Education at Washington from 1907 to 1909. In 1911 he received the honorary degree of Doctor of Letters from Rutgers College. He published the first volume of the "History of the Library of Congress" in 1904, and has been a frequent contributor to the LIBRARY JOURNAL and other periodicals.

CONFERENCE OF EASTERN COLLEGE LIBRARIANS

THE conference of Eastern College Librarians was held in room 305, Schermerhorn Hall, Columbia University, Saturday, Nov. 29, 1913, with representatives of twenty-four institutions in attendance.

The morning session was opened by an address by Professor W. H. Carpenter, provost of Columbia University. The subject of "The library budget" was discussed by Dr. J. C. Schwab, librarian of Yale University, and the subject of "New library buildings" by Mr. W. C. Lane, librarian of Harvard College, and Dr. M. L. Raney, librarian of Johns Hopkins University. Lan-

tern slides descriptive of the new Harvard and Johns Hopkins library buildings were used to illustrate the latter subject.

At the afternoon session Dr. L. N. Wilson, librarian of Clark University, presided. The subject of "The relation between student government and reading room administration" was discussed by Mr. J. Russell Hayes, librarian of Swarthmore College, and Miss Amy L. Reed, librarian of Vassar College. "Vacation reading" was discussed by Professor Lucy M. Salmon, and "The cataloging of academic dissertations" by Mr. T. Franklin Currier, Harvard University Library.

Upon motion of the librarian of Columbia University, Dr. Johnston, a committee, consisting of the librarians of Harvard, Yale, Columbia, and Johns Hopkins Universities, was appointed to consider the question of the cataloging of academic dissertations. Upon the motion of Mr. Sherman, of Amherst College, the librarians of Columbia University and Harvard were appointed a committee to make arrangements for the next annual meeting.

Library Organizations

LONG ISLAND LIBRARY CLUB

The Long Island Library Club held its first meeting of the season at the Bedford branch of the Brooklyn Public Library, Nov. 13, at 3 p.m.

The president, Miss Harriot Hassler, introduced the speaker of the afternoon, Miss Caroline M. Hewins, librarian of the Hartford Public Library, who had consented to repeat the address given at the Lake George meeting of the New York Library Association in September on "What I've done in starting and developing work with children in the small country, town or city library."

Miss Hewins' talk was full of suggestion and inspiration, showing how it is possible to accomplish results even when handicapped with lack of tools, accommodations, and a free invitation to all to come to the library, for until 1892 the library was a subscription one. She traced the growth of the work from small beginnings in a subscription library with little equipment to the busy place that the library is to-day. Lists were compiled on all subjects of interest to children, books for supplementary

reading were sent to the schools, and club work was developed. Then followed talks given during the summer vacations for an hour each week on subjects covering a wide range. The Christmas book exhibit and the collection of dolls representing all nationalities have become regular features of the work.

Miss Hewins laid particular stress on a few points which experience had taught her it was well to heed:

That in club work the members of each club have an interest in common outside of school work;

That in a Christmas book exhibit inexpensive books be included as well as the expensive illustrated ones;

That during the school year each child be allowed but one story book a week;

That all children's applications be signed by the parent or guardian, thus placing responsibility where it belongs;

That all fines be strictly enforced.

The work in Hartford was carried on without any children's room until 1904 when provision was made for one. Gifts and donations, for furnishing, poured in from friends, other children's rooms and library schools, thus attesting the high esteem in which the children's work of the Hartford Public Library as carried on by Miss Hewins is held by the public and the library profession.

Miss Hewins also touched upon the extension work being done in the state by traveling libraries, and read a letter from a country school teacher telling of the great help the books sent had been to pupils, teachers and parents.

Those who were privileged to hear Miss Hewins realize that a large part of her success is due to the personal touch, the personal interest she takes in each child coming to the library, and her desire to enlarge the horizon of each one.

ELEANOR ROPER, *Secretary.*

DISTRICT OF COLUMBIA LIBRARY ASSOCIATION

At the meeting of the District of Columbia Library Association, held Oct. 31, the principal speaker was Mr. George B. Utley, secretary of the American Library Association. Mr. Utley spoke concerning various important phases of the work of the A. L. A., and especially of the work done through the secretary's office and the various committees.

The annual meeting of the association was held on Dec. 10. The question of affiliation with the American Library Association was

discussed, but a vote on the plan was postponed until the January meeting. The annual election of officers was held, and the following were elected: president, Mr. H. H. B. Meyer, of the Library of Congress; first vice-president, Mr. Willard O. Waters, Library of Congress; second vice-president, Miss Kathryn Sellers; secretary, Mr. C. S. Thompson, Public Library; treasurer, Miss Emily A. Spilman, Department of Justice Library; executive committee, the officers just named and Dr. George F. Bowerman, librarian of the Public Library, Mr. Ernest Bruncken, Library of Congress, and Miss Eunice R. Oberly, Plant Industry Bureau Library.

After the election of officers Mr. Paul Brockett delivered the retiring president's address, in accordance with the custom of the association, choosing as his topic "Some library opportunities." Mr. Brockett's paper was chiefly devoted to a discussion of the opportunities and the need of greater coöperation, national and international, in bibliographic enterprises.

C. SEYMOUR THOMPSON, *Secretary*.

NORTH CAROLINA LIBRARY ASSOCIATION

The eighth annual meeting of the North Carolina Library Association was held Nov. 5 and 6 at Washington, N. C. The association was the guest of the Washington Public Library Association, and the members attending were entertained in private homes. All of the sessions were held in the auditorium of the public school.

The train bringing most of the librarians was delayed and did not reach Washington until nine o'clock, with the result that only a part of the program for the first session could be given that evening. Mayor Frank C. Kugler gave a warm welcome to the association, and stated his firm belief in the high mission of public libraries. Mr. J. P. Breedlove responded in behalf of the association and gave the president's address, "Every town and village of North Carolina can have a public library." He showed how this can be done even though the library be very small and its growth slow. He spoke of the village library of Pomfret, Vt., and that of Nelson, Canada, as examples of what can be accomplished in small libraries. The second session was held Thursday morning at ten o'clock. The session was conducted in two sections, for college librarians and public librarians. The round-table discussion of the problems of the college library was led by Mr. J. P. Breedlove. "Where

and how should reserve books be kept?" was discussed by Miss Annie F. Petty, librarian of the State Normal and Industrial College. She was followed by Miss Eva E. Malone, formerly in the St. Louis Public Library, now librarian of the Meredith College Library, who gave an interesting account of "Periodicals in the St. Louis Public Library." Prof. Ernest Cruikshank, of St. Mary's School, was prevented from attending, but sent his paper on "How may the librarian attract the student to the library?" Each paper was followed by open discussion of the subjects, and of other problems which the college library has to face daily.

The public library section, held at the same time, was led by Mrs. A. F. Griggs, librarian of the Durham Public Library. Miss Bettie D. Caldwell, of the Greensboro Carnegie Library, sent her paper on "Library publicity," which was read by Miss Mary B. Palmer. Miss Caldwell wrote of the value of all forms of advertising to the library, and sent samples of the pamphlets, lists, posters, cards, book-marks, etc., which she had used in making known the resources of her library. Miss Petty contributed to the exhibit several most attractive picture bulletins made in the library of the State Normal and Industrial College. In the open discussion of the subject the librarians of Raleigh, Wilmington, Winston-Salem, Durham, Washington, and Charlotte, gave accounts of their publicity work. Miss Mary B. Palmer, Charlotte, told of her experience in establishing a collection of books for business men, and later discussed the best methods of re-registration. Mrs. Griggs then discussed "Rent collections," and told of the rent collection in the Durham Public Library.

The two sections then reassembled, and three minute reports from every librarian present were made on "The best thing done in my library during the past year."

The third session was held Thursday afternoon at three o'clock. Miss Leatherman asked for the appointment of a committee on closer coöperation between the Association and the commission. Miss Palmer was made chairman of that committee.

The nominating committee made its report, and the following officers were elected for the next year: president, Miss Annie F. Petty, State Normal and Industrial College; first vice-president, Mr. J. Frank Wilkes, Charlotte; second vice-president, Miss Bettie D. Caldwell, Greensboro Carnegie Library; treasurer, Mrs. A. F. Griggs, Durham Public Library; secretary, Miss Mary B. Palmer, Charlotte.

Miss Leatherman presented an invitation to the association to hold its next meeting in Raleigh. The invitation came from the commission, the Olivia Raney Library, Miss Rosenthal, and the Meredith College Library. The question was referred to the executive committee.

The last session was held Thursday evening at eight o'clock. Miss Minnie W. Leatherman spoke on "The dissemination of books," emphasizing the peculiar rural problem of the North Carolina library movement. The last legislature made a small appropriation for traveling libraries, thus enabling the commission to begin the work of sending out traveling libraries in addition to the debate libraries it has been lending for the past two years. Mr. George B. Utley, secretary of the American Library Association, spoke on "What should a public library mean to a community?" He told of his pleasure in returning to the South, where he had lived for ten years. He said that a public library should be an institution for both young and old, and spoke of the work with foreigners, workingmen, business men and legislators. A library should be an institution free to all. There are many people in every community who are never reached by the public library. Librarians should observe the methods of business men and adapt them for library use. The library should be a storehouse of local history. Much material which will be valuable to the historian should be preserved in libraries. The library should be a place of wholesome recreation, acting as a counter attraction to vicious shows and other harmful amusements. Finally, the library should strive to disseminate a taste for good books in the community, and should inspire the people to have libraries of their own. Dr. Louis R. Wilson, librarian of the State University, spoke on "The library in community building," telling of the ideas current in North Carolina to-day, of the men who are working out these ideas, and of the relation of the library to them.

Following his paper, the resolutions committee made its report, and a vote of appreciation was passed, thanking Mr. Utley and the Washington Public Library Association. The meeting adjourned, and the evening ended with a delightful reception held at the home of Mrs. C. L. Baugham. The courtesy and hospitality of Washington people were much appreciated by the members of the association, and added much to the success of the meeting.

MARY B. PALMER, *Secretary.*

INDIANA LIBRARY TRUSTEES' ASSOCIATION

The Indiana Library Trustees' Association held its fifth annual meeting at the Hotel Severin, Indianapolis, Nov. 20-21, 1913. The keynote of this meeting was better service for the library and better library service for the public. The first session, which opened at two o'clock Thursday afternoon, was devoted to a discussion of library legislation. The president, Judge Ora L. Wildemuth, in his opening address stated that the most important work of the association was the improvement of library legislation in the state of Indiana. He said that if our libraries are going to keep pace with all those things that make for social, civic and moral betterment it is absolutely essential for the future welfare of our libraries that we have a uniform footing so that all may work together.

The report of the legislative committee was given by Mrs. A. D. Moffett, of Elwood, former president of the association, and under whose administration the uniform library bill was prepared. She gave an account of the efforts to get the bill passed at the last legislature, and said the failure was largely due to the indifference of the Senate. Mrs. Moffett recommended that a legislative committee be appointed to redraft and perfect the codification bill, and conduct a publicity campaign among the library trustees of the state to enlist their active cooperation in the effort to secure the passage of the bill by the next legislature. This discussion was continued by Carl H. Milam, J. P. Dunn, Mord Carter and Mrs. C. F. Lammers, a representative of a school board library.

At the evening session, Mr. Merle Sidener, publicity man for the Indianapolis Chamber of Commerce, gave a most inspiring and profitable talk on "Library advertising." The discussion on this subject was led by Miss Lois Compton, of New Castle, who gave an account of her efforts to secure better library facilities for her city. Mrs. Howe, of Delphi, continued the discussion, and a very interesting communication was read on this subject from Miss Mary Ahern, of Chicago. Miss Ahern's message was that the best library advertising is efficient service and a satisfied public. An interesting paper, "The library of fifty years ago," written by John Ade, of Kentland, was read by the secretary.

Following the close of the program, a very delightful informal reception was held in the parlor of the hotel.

The Friday morning session was taken up with a discussion of "Municipal reference

work," by John A. Lappe, superintendent of the Legislative Reference Bureau, who thought that every public library ought to establish a municipal reference department, which would supply all desired information on subjects of municipal importance and interest. He said his bureau would gladly coöperate with city libraries by supplying material asked for, and that the librarians could obtain expert information and advice on any subject from members of the faculties of Indiana University and Purdue University. All the librarian has to do is to ask these men for the information. His address was further discussed by Eliza G. Browning, librarian of the Indianapolis Public Library.

"Taking the library to the people" was ably handled by Miss Ethel F. McCulloch, librarian of the Evansville Public Library. A very lively discussion followed this address, and a wider use of the library assembly rooms was urged.

L. J. Bailey, librarian of the Gary Public Library, talked on the library's duty to the schools. He outlined the work of his own library, showing what a valuable adjunct it is to the Gary public schools, which have a national reputation. L. E. Kelley continued this discussion, and spoke of the work of the small library in its relation to rural schools.

At the afternoon session W. E. Jenkins, of Indiana University, talked on "The public library and university extension." He urged the coöperation of libraries in this work of broader education. At this session also, the report of the committee on salaries, vacations, and hours was given by the chairman, Henry B. Heller, of Decatur. This report was based on the replies of 92 libraries in answer to a questionnaire which the committee sent to 175 libraries of the state. It showed that a very elastic schedule was in use in the state in regard to salaries, vacations and hours. The committee recommended that from 40% to 50% of the total library income be spent on salaries of librarians and assistants. It was agreed that too many libraries were closed during the noon hour and during the supper hour. The library should be opened at these hours, that the working men going to and returning from work may patronize the library without loss of time or too great inconvenience. In regard to vacations, it was recommended that librarians be granted annual vacations of at least fourteen days with full pay.

A motion was made and carried that this committee on salaries, vacations, and hours

confer with a similar committee from the Indiana Library Association, and report with further recommendations at the next annual meeting.

The report of the nominating committee was accepted, and the following officers were elected: president, E. L. Craig, Evansville; vice-president, Mrs. Newbury J. Howe, Delphi; secretary, Miss Adah Elizabeth Bush, Kentland; treasurer, Mrs. F. L. Swinehart, Clinton.

It was decided to hold a joint meeting with the Indiana Library Association next year. The registration showed an attendance of fifty members, which was most gratifying. These annual meetings are of much value to library trustees, and aside from the benefits accruing to them from the interesting programs, the inspiration derived from the mingling and acquaintance with library trustees from all parts of our state is most helpful.

ADAH ELIZABETH BUSH, *Secretary*.

CHICAGO LIBRARY CLUB

At the December meeting of the Chicago Library Club, Dr. John L. Lowes, of Washington University, St. Louis, gave his brilliant address on "Shakespeare's response to what the public wants." In his discussion he considered four elements as being of vital interest: firstly, the author; second, the audience; third, the demand, and fourth, the response. In this case, Shakespeare the author was an actor first, who knew his people and was determined to write successful plays. His audience was composed of average Englishmen, butchers, apprentices and the like, who pressed close to the stage from the pit. Then, demand can be noted in four ways, for blood and action plays, with murders, lust and insanity; for euphuistic plays, or plays of the wits; for chronicle history, and for romance. To each of these demands Shakespeare responded, and Prof. Lowes gave examples showing how Shakespeare improved on himself in each. But in one respect Shakespeare did not respond, and that was to the demand for salacious or suggestive plays. In conclusion, Prof. Lowes suggests that the demands of the present day are, on the whole, the same as in Elizabethan days, that the great dramatist of to-day will have to accept these human demands in his productions, but he will have to rise above the degrading features and create a higher atmosphere to which the public itself in turn is ready to respond.

AGNES J. PETERSEN, *Secretary*.

LAKE SUPERIOR LIBRARY ASSOCIATION

The Lake Superior Library Association was organized by Miss Lutie E. Stearns at Superior Sept. 18. Officers were elected as follows: president, Mr. C. H. Sutherland, Superior; vice-president, Miss Frances Earhart, Duluth; secretary, Miss C. Fennelly, Ashland; treasurer, Miss M. M. Greenwood, Washburn. The next meeting will be held in Ashland in September, 1914.

SOUTH DAKOTA LIBRARY ASSOCIATION

The seventh annual meeting of the South Dakota Library Association was held at Sioux Falls, Nov. 24-26, 1913. The session was called to order in the high school library Tuesday morning by the president, Miss Edla Laurson. Doane Robinson, secretary of the new state library commission, reported the successful passage of the library bill through the legislature, and gave a most encouraging account of the work accomplished in the few months since the library law has been in force. The state department of education turned over to the commission 2200 volumes, the Federation of Women's Clubs gave 300 more, and enough additional books were purchased to equip fifty traveling libraries, which were sent out the first of September. Another fifty will be made ready early in 1914, and for twenty-five of these applications are already on file. Mr. Robinson paid high tribute to the enthusiasm and efficiency of Miss Lilly M. E. Borreson, the field librarian, whom the commission secured through the recommendation of Wisconsin and Minnesota library workers.

Mrs. Schmidt, of Watertown, then gave "Items of general interest pertaining to libraries and librarians," a series of clippings gathered through the year. The plans for a librarians' reading circle, first suggested by Mr. Powers at a previous meeting, were discussed, and a committee appointed to report later. Mr. Powers, of Brookings College, gave a report of the A. L. A. meeting of last summer, which he attended as the representative of the South Dakota Library Commission. Miss Borreson gave an informal account of the work so far accomplished by the library commission, and of her own work in visiting libraries and arranging for traveling library stations in various parts of the state. The matter of South Dakota's being represented on the A. L. A. Council was taken up, and it was decided that we should have such representation.

The librarians were the guests of the trustees of the Sioux Falls Public Library at

luncheon at the Hotel Carpenter. The menu cards were little booklets, classified under 642, and containing the guest's name and number in the book pocket.

At the afternoon session the president's address was first on the program. It was based upon two statements of the Apostle Paul—"This one thing I do" and "I magnify my office." Miss Laurson thought Paul would have made a good librarian, and gave her reasons. Miss Borreson then took charge of the "Round table for small libraries," during which the following topics were discussed: Accessioning, by Miss McRoberts of Hot Springs; Shelf list and inventory, by Miss McIntire of Huron College; Charging systems; Necessary records and how to keep them.

At the Wednesday morning session plans for a librarians' reading circle were reported by Mr. Powers, as follows:

"1. Members shall be arranged as far as possible in groups of four.

"2. Each group shall read four books during the year, one member in each group being responsible for obtaining one book.

"3. Each member is to prepare a letter on each book read, though the letter is not to be confined to the book, but may express any ideas on library matters, or comment on local affairs; this letter is to be sent at the time the book is sent, to the next person on the circuit.

"4. The dates of exchange are Jan. 1, Feb. 15, April 1, and May 15, 1914.

"5. Each circuit is to read Kenneth Grahame's 'The golden age,' and Bostwick's 'American public libraries,' and will select the two remaining books for its use.

"From time to time the *Bulletin* will publish studies and outlines of the books."

The report was adopted, and four circuits formed at once.

Miss Borreson then discussed the topic "Trustees, their relations to the librarian; duties; organization," and Miss Thatcher read a paper on "The library budget."

There was some discussion about the change in form and policy of several magazines, and the secretary was instructed to write to certain publishers, stating the objections of the association to having reading matter and advertising upon the same page, and to having the size of a magazine changed in the middle of a volume.

The new officers of the association are: president, Miss Nettie L. Current, Sioux Falls; vice-president, Miss Katherine D.

Steele, Lead; secretary-treasurer, Miss Helen E. Miner, of Yankton College. Miss Borreson, Pierre, was elected alternate member of the A. L. A. Council, and the legislative committee is Doane Robinson, Pierre; W. H. Powers, Brookings; Miss Borreson and Mrs. Carter, Pierre.

MAUD RUSSELL CARTER, *Secretary*.

CALIFORNIA LIBRARY ASSOCIATION—
FOURTH DISTRICT BRANCH

The annual meeting of the fourth district branch of the California Library Association was held in Merced Nov. 22. M. D. Wood, president of the Merced library trustees, delivered the address of welcome.

The first part of the afternoon session was devoted principally to the various phases of children's work. There were attractive illustrations and posters to assist in the discussions. The second part of the afternoon session was devoted to the subject of supplying books to foreigners. In this connection a letter from State Librarian J. L. Gillis, which was read by Miss Eddy, state library organizer, was of particular interest. In it Mr. Gillis stated that the state is buying books for use of foreigners and supplying them, on the loan basis, to district libraries. He said that the state would gladly supply such books in the fourth district, and asked that the librarians of the San Joaquin valley send in lists of the books desired, these lists to be based on the recommendations of English speaking foreigners, if possible, as to what books their countrymen would best like. Mr. Gillis also suggested that old-fashioned love stories, and books by authors known in the old countries, would prove especially attractive. Books will be supplied in eight foreign languages, namely, French, German, Portuguese, Spanish, Mexican, Italian, Russian and Swedish. In the fourth district the Portuguese are the most numerous of foreigners, and the librarians present at the meeting agreed that their efforts along the lines of supplying literature for foreign readers should be principally in the interest of the Portuguese speaking people. A discussion followed on the subject of supplying periodicals and newspapers in foreign languages.

Library Schools

NEW YORK STATE LIBRARY SCHOOL

A joint staff meeting of the State Library staff and the Library School was held in the school's lecture rooms Thursday, Dec. 18.

Brief addresses were made by Mr. Wyer, Mr. Janardan A. Kudalkar, director of State Libraries, Baroda, India, who described briefly the recent library development in his state, and President John H. Finley, of the University of the State of New York. After the meeting the staff, school, and guests were given an informal tea by the faculty of the Library School.

Recent visiting lecturers have been as follows:

Nov. 21. Dr. Herbert Putnam on "The Library of Congress and its work" and "Library constitutions," the latter lecture dealing with some fundamental relations between trustees, librarian and staff.

Dec. 10. Miss Mary E. Ahern, editor of *Public Libraries*, on "Library conditions in the middle west."

Dec. 16. Mr. Andrew Keogh, of Yale University Library, on "College library administration" (2 lectures).

The students had the pleasure of meeting Dr. Putnam and Miss Ahern at teas given at the conclusion of their respective lectures. Dr. Pliny T. Sexton, vice-chancellor of the University of the State of New York, was also the guest of the school at the tea given Nov. 21.

PUBLICATIONS BY ALUMNI

Although the former students of the school are still engaged in doing library work rather than writing about it, their publications for 1913 are numerous. In a group of representative library periodicals, the *LIBRARY JOURNAL*, *Public Libraries*, *New York Libraries*, *Bulletin of the Wisconsin Library Commission*, *Special Libraries*, and the *Proceedings of the A. L. A. Conference*, 57 leading articles by former students are included as compared with less than 40 in the same group of periodicals for 1912. *For Folke-og Barneboksamlinger*, the Norwegian library periodical, contains two articles by Mr. Arne Kildal, '07.

The list in general literature is larger than usual, and includes Miss Mary W. Plummer's ('88) poem, "Prayers for the living," in the *July Century*, and "popular editions" of her "Roy and Ray in Canada" and "Roy and Ray in Mexico" (Holt); "Story-telling poems" and an edition of the "Arabian nights," by Frances J. Olcott ('96); "Uncle David's boys" (Lothrop), by Edna Adelaide Brown ('98); "Children's book of Christmas stories" (Doubleday), with Asa Don Dickinson ('04) as joint compiler; "Voy-

age of the Hoppergrass" (Macmillan), by Edmund L. Pearson ('04); "Myths and legends of the great plains" (McClurg), by Katharine Berry Judson ('06); and an article on "The Comprachicos" (a study in Victor Hugo's "L'homme qui rit"), by John Boynton Kaiser ('10), in the *Journal of the American Institute of Criminal Law and Criminology* for July.

Articles in other than library periodicals but dealing with library work include articles by Arne Kildal ('07) on "Scandinavian books" in the *Nation* of April 13, and by Henry N. Sanborn ('13) on "The scholar and the libraries," in the *Nation* of Sept. 11, an article on the new normal course at Pratt Institute for school librarians by Julia A. Hopkins ('07) in the *Proceedings of N. E. A.* for 1912.

In bibliography are a "Reading list on Granville Barker," by Mary L. Davis ('92), in the *Bulletin of Bibliography*; "Selected articles on compulsory insurance" and "Selected articles on trade unions," two new volumes in the *Debater's Handbook Series* by Edna Dean Bullock ('94); "Bibliography of bibliographies" (2d ed.) and "Efficiency and bibliographical research," by Aksel G. S. Josephson, in the *Papers of the Bibliographical Society of America*; a revision and extension of classes E-F (America) of the Library of Congress classification, by Charles A. Flagg ('07); a new edition (revised by Caroline Webster) of Zaidee Brown's ('03) "Buying list of books for small libraries"; "Periodicals for the small library," by Frank K. Walter ('06); "Reading lists on John Galsworthy, John Millington Synge and William Butler Yeats," by Alice T. McGirr ('08) in the *Bulletin of Bibliography*; "National bibliographies of the South American republics" (reprinted from the *Bulletin of Bibliography*), by John Boynton Kaiser ('10); "List of works relating to electric welding" and "List of works relating to the development and manufacture of typewriting machines" (both reprinted from the *Bulletin of the New York Public Library*), by William B. Gamble ('12), and a bibliography of eugenics prepared by Edith N. Grout ('13), under the direction of Dr. Gertrude E. Hall, of the New York State Board of Charities and published by that board.

Under general library economy should be noted the eighth edition of the "Decimal classification," prepared under the general editorship of May Seymour ('88); "Indexing: principles, rules and examples" (2d ed.)

(Library School Bulletin 33), by Martha Thorne Wheeler ('91); "Yearbook of the League of Library Commissions, 1912," compiled by Zaidee Brown ('03); a Norwegian list of subject headings by Victor A. G. Smith ('13); and four new chapters (issued as "preprints") of the *A. L. A. Manual of Library Economy*: "Training for librarianship," by Mary W. Plummer ('88); "Library work with children," by Frances J. Olcott ('06); "Commissions, state aid, and state agencies," by Asa Wynkoop ('05); and "Library printing," by Frank K. Walter ('06).

ALUMNI NOTES

Ruby Charlton, '11-'12, has gone to the Iowa State Teachers' College, Cedar Falls, as assistant librarian.

J. Howard Dice, B.L.S., '13, has been appointed assistant reference librarian in the Ohio State University Library.

Mary P. Parsons, B.L.S. '13, has resigned her position in the reference section of the New York State Library to become assistant in the public catalog room of the New York Public Library.

Mary E. Robbins, '92, spent December assisting in the preparation of the American library exhibit for the Graphic Arts Exposition to be held at Leipzig during the summer of 1914. In January Miss Robbins went to California to take charge of the courses in classification and cataloging in connection with the short library course held at the Riverside Public Library.

Maja Schaanning, '12-'13, has resigned her position as acting librarian of the Folkebibliothek of Trondhjem, Norway, to accept the librarianship of the Kristiansand Folkebibliothek.

F. K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

The charts visually presenting library work that were prepared for the Institute exhibition last year have been itinerating this fall in response to requests. They were loaned to the Syracuse and Western Reserve Library Schools, and at present they are assisting at the opening of the Somerville Public Library.

Miss Ahern lectured before the school on December 22 on "The library situation in the middle west." In breadth of treatment, first-hand knowledge of her subject, and originality of presentation the lecture was one of the most valuable that we have had. The apprentices and staff of the Brooklyn Public Library were invited to the lecture. The

students had an opportunity of meeting Miss Ahern at tea afterwards.

The last lecturer of the term was Miss Mary L. Titcomb, librarian of the Washington County Free Library, Hagerstown, Md., who spoke to the students on the work of that library. The story of Miss Titcomb's book-wagon as told by herself has an immediate human appeal, to which each class responds and from which they never fail to gain both pleasure and inspiration.

One of the advantages accruing to the school from its connection with Pratt Institute is attendance upon the general lectures of the Institute. Several of the class are taking a course in the History of art given by the director of the School of Fine Arts. Recently the class heard Edith Wynne Matthison, who read "Sister Beatrice" before the Institute students.

The class had the pleasure of attending a lecture by Alfred Noyes on Dec. 11 on "The sea in Tennyson's poetry" before a joint meeting of the New York, New Jersey, and Long Island Library Clubs.

Three unusually happy coincidences occurred during the past month. Dr. Putnam happened to be in New York, and talked to the class a day or two after the Congressional Library had been reported on in the "Survey of the field"; Mr. Kudalkar, of Baroda, India, visited the classroom just as the classification of a group of books bearing on India was under discussion, and spoke on the relations of the Vedas, the Vedanta philosophy and Brahmanism; and lastly Mr. F. W. Faxon happened in just after a lesson on the cataloging of periodicals and talked to the class about the periodical department of the Boston Book Company.

The students were invited to attend a staff meeting of the Brooklyn Public Library, at which the evening in the Orient that was enjoyed at the New York state meeting was repeated, Mr. and Mrs. Borden and Mr. Kudalkar taking part.

ALUMNI NOTES

In preliminary announcement just received of the proposed establishment of a library school by the State Library of California, we note that Miss Sarah S. Oddie, class of 1894, head of the catalog department at the State Library, is to be in charge of the school.

Miss Nathalie A. Maurice, class of 1906, has been made an assistant in the East Orange (N. J.) Public Library.

Miss Louise M. Fernald, class of 1907, who

had been temporarily in charge of the library at Great Falls, Mont., during the past year, has recently been made librarian.

Miss Louisa O. Bleecker, class of 1911, who has been since graduation first assistant at the Public Library of Madison, N. J., has been made head cataloger of the Elizabeth (N. J.) Public Library.

Miss Sybil Barney, class of 1911, has taken a position in the Milwaukee Public Library, the functions of which include supervision of the apprentice class, selection of books on history, sociology, biography and travel, and the making of annotated lists.

JOSEPHINE ADAMS RATHBONE, *Vice-director.*

LIBRARY SCHOOL OF SYRACUSE UNIVERSITY

The practice work of the students, which in the past has been confined to the University Library, has been extended this year to the Syracuse Public Library.

Miss Adeline Zachert lectured before the school on "Children's work" during November.

During the meeting of the New York State Teachers' Association, held in Syracuse on Nov. 24-26, the students from the Library School had charge of the exhibit of books and library aids displayed by the State Education Department.

E. E. SPERRY, *Director.*

DREXEL INSTITUTE LIBRARY SCHOOL

The following lectures have been given by outside librarians since Nov. 17: "Book mending," by Miss Sara L. Young; "The Library of Congress," Dr. Herbert Putnam; "The fifth kingdom and its keeper," Miss M. E. Ahern; "The work of a county library," Miss Mary L. Titcomb; "The Pennsylvania Public Library," Miss Anna A. Macdonald.

Examinations were held in accession and order work, Dec. 17; loan work, Dec. 22; classification, Dec. 23.

The Christmas vacation began Dec. 24 and ended Jan. 4.

Jan. 5-8, inclusive, were spent by the students in practice work at the Free Public Library of Philadelphia and five of its branches.

Dr. Hollis Godfrey entered upon his duties as president of Drexel Institute on Dec. 1.

Dr. James MacAlister, who resigned from the presidency in June, 1913, died at sea, Dec. 11, on his way to Bermuda.

ALUMNAE NOTES

Miss Louise W. Rodgers, 1913, has resigned her position in the Free Library of

Philadelphia to take the clerkship of the Genealogical Society of Pennsylvania.

CORINNE BACON, *Director*.

DREXEL LIBRARY SCHOOL ASSOCIATION

The Drexel Library School Association held its annual meeting in the picture gallery, Drexel Institute, on the evening of Nov. 24. The usual business was transacted, and after a brief discussion it was decided to submit to the vote of the association at the spring meeting the question of extending the terms of the officers to two years, the consensus of opinion being that it took nearly a year for the officers to get their work well in hand.

The following officers were elected for the ensuing year: president, Miss R. Louise Keller; vice-president, Miss Edith Fulton; treasurer, Miss Caroline B. Perkins; secretary, Miss Katherine B. Trimble.

After the business meeting an informal reception was held for the class of 1914. Miss Bacon, Miss Doane and Miss Dougherty contributed to its gayety by readings from different authors unknown, for the most part, even in this gathering of librarians.

R. LOUISE KELLER, *President*.

CARNEGIE LIBRARY OF PITTSBURGH—TRAINING SCHOOL FOR CHILDREN'S LIBRARIANS

During the last month the following special lectures have been given:

Nov. 22. Two lectures, "The librarian as an educator" and "Some applications," by Miss Louise Connolly, educational expert of the Free Public Library, Newark, N. J.;

Nov. 29. "Changing aspects of education," by Miss Ella Hanlon, principal of the Shakespeare School, Pittsburgh;

Dec. 5. Two lectures upon "High school library work," by Miss Mary E. Hall, of the Girls' High School, Brooklyn, N. Y. One of these lectures was open to invited guests and a number of the high school principals and teachers attended it.

Mrs. Gudrun Thorne-Thomsen, of Riverside, Ill., spent the week of Dec. 8 at the Training School, and gave ten lectures of the course she gives every year upon "Story-telling." On the evening of Dec. 12 she conducted a most delightful Christmas story hour for grown people in the auditorium of the Homewood Branch Library.

Miss Agnes Cuffe, class of 1915, has left the Training School because of ill health, and is at her home in Watertown, N. Y.

ALUMNAE NOTES

Helen M. Middleton, class of 1908, is now

Mrs. Frederick Truman Chittenden. Her address is 430 Woodside avenue, Ripon, Wis.

Margaret Louise Bateman, class of 1910, has resigned because of ill health from her position in the Public Library in Oak Park, Ill.

Irene Moore, class of 1910, is temporarily upon the staff of the Public Library in Oak Park, Ill.

Clara May Mooney, class of 1912, has resigned from her position in the children's department of the Carnegie Library of Pittsburgh to become librarian of a branch of the Public Library in Detroit, Mich.

Edith R. Morse, class of 1914, has resigned from her position as librarian in the Young Women's Christian Association to become children's librarian in the Ballard branch of the Seattle Public Library.

Eva Cloud, class of 1914, has resigned from her position as children's librarian in the Public Library of Council Bluffs, Iowa, to become librarian of the Public Library in Kewanee, Ill.

WESTERN RESERVE LIBRARY SCHOOL

On Nov. 14 the class was invited to hear Mrs. Thorne-Thomsen give one of her lectures on fairy tales before the training class of the Cleveland Public Library. Miss Ella Smith, state organizer for Ohio, visited the school on Nov. 21 and spoke informally to the students. The second of the out-of-town library trips was taken Dec. 5. The class spent the day in Youngstown, and were royally entertained by Miss Morse and her staff. The students visited the main library in the morning and the South High School in the afternoon.

The news of the death of Mr. Richard A. Lavell, '06, came as a great shock to his many friends not only in the school, of which he was an honored alumnus, but to his circle of library friends in Cleveland.

ALICE S. TYLER, *Director*.

Reviews

NEW TYPES of small library buildings. Wisconsin Free Library Commission, Madison, Wis. 88 p. O.

The Wisconsin Commission, in issuing this pamphlet, has rendered an important service to the small libraries. The title marks it as a timely protest against the too common classic style of architecture for little buildings, and such a purpose is clearly avowed in the introduction. There are sixteen exterior views of

library buildings, all built within the past ten years and all but one in Wisconsin. It is a creditable showing. There are several specimens of old English styles, one of a Swiss chalet, one of a Spanish house and others of a bungalow type. All of them are striking, but not one of them is classic. They are generally pleasing as "good, useful looking buildings," and no doubt they are "in harmony with their surroundings." The collection demonstrates that a change from the classic type is not only possible, but much to be desired.

A note prefixed gives the name and address of the architect of each set of plans, the source of funds, the cost of building and, in several instances, the detailed expenses of equipment, an account of construction, material, etc., dimensions, capacity and procedure. There are no notes of criticism. The buildings are generally of brick or concrete, with foundations of concrete or stone.

The largest, the library at Madison, cost \$75,000. The smallest, a plain wooden bungalow in a summer camp, cost \$700. The cost of others ranges from \$6000 to \$17,500. Eight out of sixteen cost \$10,000 or less. Interior views are given of eight libraries. The floor plans of thirteen are shown, every one with a basement plan added including a lecture or class room.

A peculiarly valuable feature of the book is found in the seven introductory pages, which deal in a clear and informing way with practical matters. These are: "Reasons for having a library building," "How to get a library building," "The library building and plan," "The selection of an architect," "Essential principles of library architecture," "Book capacity," "Cost," "Heating and ventilating," "Natural light," "Artificial light," "Furniture," "Important books and articles on library buildings," and "A suggestion for the future." Under the last head attention is called to the need of making the building convenient and attractive in order to call in a somewhat indifferent public, and the suggestion is made that the ideas of a shrewd business man setting up a bookstore should apply to the location, surroundings and plan of a public library so as to put it right among the busy people, with low broad windows and not more than a step from the sidewalk. There is no question that very many locations and plans of libraries might be vastly improved in these respects. The multiplied steps, in particular, which must so often be climbed to reach delivery desks, are a crying evil. The partition walls which inclose these interior stairways are an obstacle and a blemish in the small library building.

In the thirteen plans in the book, not one shows less than eight steps up from the sidewalk. Two plans have eight, two have ten, three have eleven, two have twelve, two have thirteen, one has fifteen and one has nineteen. The editor could hardly fail to utter a protest. The reason for so many stairs is in the assembly room beneath. The high ceiling in the basement makes a high floor above. The trustees think that they get more for their money, the architect gets more height for his façade, and the people pay the price by climbing the stairs. These things are worth thinking of.

And yet a library is not a bookstore. The commercial spirit is not there. Its working material cannot be hustled about in the crowd. It must have some retirement, some atmosphere of quietness, and such surroundings as will permit the individual building to make its true appeal to the town.

At the end of the book are many useful additions. There are working drawings for making a book bin, a loan desk, a bulletin board, a bookcase, a magazine case and rack, a sloping case, double faced shelving, a newspaper rack and a dictionary stand.

The pages that follow give the text of Wisconsin laws affecting gifts, buildings and sites; forms of ordinances for accepting a conditional gift and some up-to-date statements on indirect lighting.

On the last pages is a list of all the public library buildings in the state, with the donor of each, the amount of each gift and date of occupancy. Some facts here shown are of interest. For 158 public libraries in the state there are 75 buildings. The earliest was built at La Crosse in 1888. Only seven were built prior to 1900. Every one of the 75, except that at Milwaukee, has the name of a donor attached to it. In one instance, "the village and citizens" are named. In another, "Andrew Carnegie and citizens." The name of Andrew Carnegie is appended in this column to 52 buildings. Of libraries costing \$10,000 or less there are 29.

This is eminently a practical book. It is perhaps unfortunate that, out of sixteen exteriors, no less than ten should come from one architect, and that, out of thirteen sets of plans, nine should come from one office. But the information and good advice given in plain terms and the visible illustrations of building theories for this class of libraries cannot fail to be of great service to library boards wrestling with a strange problem both within and beyond the limits of Wisconsin.

WHEELER, Martha Thorne. Indexing: principles, rules and examples. 2d ed., revised. (N. Y. State Library: Library School 33.) Albany, University of the State, 1913. 76 p. O.

If of the making of books it can be said there is no end, we may go a step further and say that of the making of indexes, good, useful, practical indexes, we have advanced but a little way from the beginning. Many old books of the 16th and 17th centuries have well-made indexes of such fullness and value as put to shame the farcical substitutes issued by many modern publishers when they give any at all. Books with good indexes bear about the same proportion, as to number, to all indexed books, as the latter do to the books of value and authority over whose un-indexed pages students and scholars have lost years of time in fruitless search for much wanted bits of information.

What the seeker demands is a complete index, and it is essential that this should not only refer to the letter, but should also embody the spirit of the work indexed. To this end the indexer must possess intelligence, quickness of perception, the power of analysis and condensation, and the ability to put himself *en rapport* with the author and his work, and with the reader and his needs as well, and he must also have a very considerable knowledge or understanding of the subject matter of the book indexed.

To this end it will be seen that the good indexer, like the librarian and the poet, *nasctur non fit*. Every librarian should know something about indexing, and though he be "to the manner born" even experience may wait upon good counsel and find the future pathway made more smooth. Such counsel may be found in the manual for indexing before us. The compiler has made herself familiar with what had been previously written upon the subject, has well digested it, and has produced an admirable manual on the subject. Laying down the principles of indexing and defining the terms used, she proceeds to take up the method the indexer should follow to acquaint himself with the contents of the book, and formulate his plan for his index; how to mark the keywords and phrases, so that a copyist may do the actual work of writing out the entries. The rules given throughout are practical and sensible. Details of alphabetizing and arranging are fully given. Samples of various forms of indexes are presented, some showing how not to do it if a neat appearance and good form are desired.

A pretty complete bibliography of indexing is given, showing where further discussion of the matter may be found.

This little manual does for the indexer what Cutter's Rules for cataloging has long done for the cataloger. By precept and example the author has made a *vade mecum* which every one attempting to make an index will do well to first study and then follow.

C. ALEX. NELSON.

UNION CLASS-LIST of the libraries of the Library and Library Assistants' Associations. Caxton Hall, Westminster, S. W.: The Library Association, 1913. 38 p. Q.

"This catalog is a class-list of the periodicals, books and pamphlets in the libraries of the Library and Library Assistants' Associations."

The collection, while by no means complete, includes familiar American names, as well as foreign titles, and is sufficiently full along the lines of library science to be of interest to all library workers. Only a few publications of libraries are entered, however, since the extensive collection of library reports, bulletins, catalogs, etc., belonging to the London School of Economics, was not included in this catalog. In the classes devoted to the history of printing the collection is much less full than in library matters.

The classification used is a special one adapted from Class Z of the Library of Congress scheme, with use of local numbers from the Dewey Decimal classification. It seems to fit the needs of such a collection admirably, as it brings into close connection everything pertaining to books: printing, publishing, bookbinding, bibliography and library science.

In each class the books are arranged chronologically, the dates being printed in black-faced type before the authors' names. One defect is the lack of an author index. According to the preface, "this class-list should be regarded as a companion handbook to Mr. H. G. T. Cannon's 'Bibliography of library economy.'" C. S. T.

AN INDEX to the scientific contents of the *Journal and Proceedings* of the Academy of Natural Sciences of Philadelphia, 1812-1912; published in commemoration of the centenary of the Academy, March 21, 1912. Philadelphia, Academy of Natural Sciences, 1913. 1419 p.

The casual reader would view with wonder not unmixed with alarm the volume of 1419 pages which is here presented as the index to the list of contributors to the *Journal and Proceedings* of the Academy of Natural Sci-

ences and an index to the genera, species, etc., described and referred to therein. It certainly could not be forced into a list of best sellers, even by political influence, and the modest introduction of Dr. Nolan, the editor, is devoted to a few main facts.

The first series of the *Journal*, in octavo, was begun in 1817, five years after the foundation of the Academy. The series was continued at irregular intervals for a period of twenty-five years, the eighth and concluding volume having been published in 1842. To secure prompter issue of communications at the weekly meetings the publication of the *Proceedings* was begun in March, 1841. The sixty-second volume, with which this series terminates, was completed in 1911.

The second series of the *Journal*, in quarto, is designed for the publication of papers requiring more elaborate illustration than can be supplied in the octavo form. The first volume was issued in December, 1847, and the thirteenth, included in the index, was distributed in December, 1908, as one of the incidents commemorative of the centenary of the Academy. It was thought appropriate to facilitate access to the scientific contents of these eighty-three volumes by the preparation of an index to the entire series. The index does not include the serials published under the auspices of sections of the Institute, such as is *The American Journal of Conchology*, *The Manual of Conchology*, *The Transactions of the American Entomological Society*, and the *Entomological News and Proceedings* of the Entomological Section of the Academy.

The index is a well printed octavo volume and opens with an adaptation from Oliver Wendell Holmes, "Who wants a lock without a key, a ship without a rudder, a binnacle without a compass, a check without a signature, a book without an index?"

Dr. Nolan explains in the introduction that because of frequent changes in generic names it has been considered as essential to the usefulness of the index to provide alphabetical references to the specific designations. In this compilation questions of synonymy have not been considered. There is a short article upon the dates of publication by William J. Fox, assistant librarian, and then without further ado we are brought to a list of contributors with the titles of their contributions.

Having noted the foregoing and the list of five "errata" on page 1419, the average librarian will have the book accessioned, cataloged and possibly bound. There will be others, however, to whom the list of contributors will

awaken the pleasantest of memories, and, in some cases, the sense of a personal loss sustained.

Under the name of Joseph Leidy there is a list of contributions extending over nearly seventeen pages, enumerating five hundred and fifty-three titles. This display becomes all the more marvelous when Leidy's contributions to medical journals, to the *Proceedings* of the American Philosophical Society, and to the publications of the United States Government are considered. An illustration of the alertness of his observation in different fields is found on page 102, where his contributions in their order of presentation are:

- On oolitic phosphate of lime and alumina.
- On Indian relics from Tennessee.
- On cancer of the liver in a turkey.
- On the phalanx of an extinct reptile.
- On human relics from Petite Anse.
- On fossil remains from Bangor.
- On a specimen of Coccus.

There is little need of dilating upon Leidy's versatility, for it is illustrated in every page of this work.

There are two hundred and fifty-six botanical contributions from Thomas Meehan, who deserves a kindly thought from all librarians on account of his petitions to the Philadelphia Councils for the first appropriation for the Free Library System. During the rest of his life he was a warm friend of the library and an earnest worker for its appropriations.

Timothy Abbott Conrad and his contributions to conchology take up four pages.

Eight pages are devoted to the titles of the contributions of Edward Drinker Cope, and this, too, must be considered as a marvelous presentation when his contributions to the publications of the American Philosophical Society and those of the United States Government are taken into consideration.

Some of the best zoological work of John A. Rider is here noted, and over five pages are needed for the enumeration of Henry A. Pilsbry's conchological contributions.

There are two pages of titles concerning the ant and the spider by Henry C. McCook and a similar number of Henry Carvel Lewis', who died young in the midst of his useful labors.

John LeConte has over a hundred contributions, mostly entomological, and Isaac Lee about two hundred papers on conchological themes.

Theodore Gill has cared for the fishes by over one hundred papers, and John Cassin more than one hundred upon birds.

The writer has been unable to think of one important man in the field of natural history who is not included in this extraordinary list.

The index to genera, species, etc., takes up some twelve hundred pages. It is not worth while to go into a detailed description of this marvelous work, which is an analysis of genera and species that will be found invaluable to the investigator. Under the heading "simplex" there are about ninety entries. The arrangement is clear; a small "j" and small numerals indicate the references to the first series of the *Journal*; a large "J" and large numerals to the second series of the *Journal*; a capital "P" with abbreviated date the references to the *Proceedings*; and all new species or genera are referred to in heavy faced type. The Academy and the editor are to be congratulated upon the accomplishment of this great undertaking and its excellent result.

Librarians

BEAL, Marjorie, a graduate of the Pittsburgh Training School, has been appointed librarian in the children's room in the public library at Madison, Wis.

BELDING, Mrs. Arthur, has been appointed librarian of the Saunders Public Library at Galesburg, Ill.

COMPTON, Miss Lois, who was responsible for the Carnegie Library at Newcastle, Ind., to a large extent, has been appointed librarian.

CURRIER, T. Franklin, has been appointed assistant librarian of the Harvard College Library at Cambridge.

GREER, Agnes F. P., Pratt 1908, has been appointed librarian of the Ballard branch of the Seattle Public Library to succeed Stella R. Hoyt, who resigned Sept. 1 to be married. Miss Greer comes to Seattle from Pittsburgh, where she has been on the staff of the Carnegie Library for about six years.

HICKS, James B., founder and for a number of years superintendent of the Englewood (Ill.) Public Reading Room and Library, died Dec. 8. He had been ill for a number of months. Since 1900 Mr. Hicks devoted his entire time to the Englewood reading room and other philanthropic work in that territory. Mr. Hicks was born in Bristol, England, in 1842.

HILL, Frank P., director of the Brooklyn (N. Y.) Public Library, was made a fellow of the Brooklyn Institute at its November meeting.

HOLMES, Frances Louise, is to be the librarian of the Queen Anne branch of the Seattle Public Library, which opened early in December. Miss Holmes is a graduate of Knox College, and received her training in library work from the Wisconsin Library Commission. She had two and a half years of experience in Oregon libraries before coming to Seattle.

HOWARD, Mrs. Frank, a former assistant librarian at the Boston Public Library, is seriously ill at the Homoeopathic Hospital in Boston.

HUNTER, Mary B., succeeds Annie E. Hall as children's librarian of the University branch of the Seattle Public Library, Miss Hall having been transferred to the Columbia branch as librarian. Miss Hunter is a graduate of the Pittsburgh Training School for Children's Librarians and of Mt. Holyoke College.

IDESON, Miss Julia, who has been chief librarian in the public library at Houston, Tex., for ten years, resigned her position Dec. 1 to take a position as secretary of the American Art Students' Club in Paris. Miss Ideson took charge of the Houston Library in October, 1903, when the library contained about 18,000 volumes. At present it contains about 40,000 volumes. Circulation during the first year of her administration was 49,000, while for the past year it was 115,000. While the books and the circulation almost tripled, the appropriation for maintaining the library has been cut from \$13,500 to \$7800. The reduction has meant a similar reduction in the assistants, and four women are now doing what seven women did a year ago. Despite this reduction in appropriation Miss Ideson was devising means to enlarge the usefulness of the library by the establishment of branches in schools. Miss Ideson's position will not be filled for six months, as the trustees are anxious to have her return if the new work proves uncongenial. In the meantime Miss Martha Schnitzer, first assistant, will be in charge of the library.

JONES, Mrs. Alice, is the new librarian in charge of the Sellwood Branch Library of Portland, Ore. Mrs. Jones formerly was connected with the Central Library, but more recently was with the library at Cottage Grove. Miss Ruth Crocker, who had been librarian, has taken charge of the new South Portland Branch Library.

KAISER, John B., at present librarian of the department of economics and sociology in the University of Illinois Library, has been appointed librarian of the Tacoma Public Library

to succeed Franklin F. Hopper, who resigned to take a position in the New York Public Library.

KLUMB, Anna K., head of the children's department of the Racine (Wis.) public library, has resigned to take the special children's course of the Cleveland Public Library. She will be succeeded by Miss Ruth Knowlton of Waterloo.

LAVELL, Richard A., assistant city librarian at Minneapolis, died Nov. 28 at St. Barnabas Hospital, in that city. For three years he had been assistant librarian, and previous to that time he had been in charge of the Pillsbury Library. All the branch libraries in the city were under his direction. Mr. Lavell was born in Kingston, Ontario, thirty-three years ago. His parents removed to Fargo, N. D., when he was five years of age. His early education and high school training was in the Fargo schools. Later he attended the University of Minnesota and graduated from the College of Science, Literature and the Arts in 1904. The next year he took graduate work in the Library School of Western Reserve University at Cleveland, and then entered the Public Library of Minneapolis. A wife and two small daughters survive him. The body was cremated and the ashes strewn on the cemetery grounds.

MABIE, Henry L., of Paterson, Putnam county, for many years librarian of the Assembly, was found dead at his residence in Albany Dec. 11. Death was caused by heart disease. Mr. Mabie had been connected with the Assembly Library for about twenty years. He was 60 years of age.

MITCHELL, Miss Gertrude, assistant librarian in the public library at Bayonne, N. J., has resigned, the resignation to take effect Jan. 1. Miss Mitchell joins her sister in New York in the conduct of an educational institution.

PERKINS, Miss Anna, librarian of the Iliion (N.Y.) Public Library, has resigned on account of ill health. Miss Perkins, following a splendid record as teacher in the Iliion schools, was appointed librarian in 1893, and has been in that position since the opening of the Iliion Public Library. No appointment has been made by the library board, and the work will be in charge of Miss Nellie Cheney, who has been associated with Miss Perkins for several years.

RICHARDSON, Mary A., for the past seven years on the staff of Wesleyan University Library, Middletown, Conn., died on Dec. 8. Miss Richardson was a member of the second class of the New York State Library School, and

had been actively engaged in library work for the greater part of the time since leaving the school in 1889. She was librarian of Atlanta University from 1889 to 1891, and librarian of the New London (Conn.) Public Library from 1891 to 1901. During the interval between 1902 and 1906, when she went to Wesleyan University, Miss Richardson served various libraries as cataloger, classifier and indexer.

SACHS, Inez F., B.L.S. (Illinois), former reference librarian at the University of Indiana, has accepted a similar position at the State College of Washington Library at Pullman.

SISOM, Miss Alice, assistant librarian at the Burlington Free Library, Philadelphia, has resigned to become a trained nurse, and Miss Mary McFadgen has been appointed to the vacancy.

STEARNS, Lutie E., chairman of the reference bureau of the Wisconsin Library Commission, has announced in a circular letter sent to the women's clubs of the state that hereafter the reference work for club women will be carried on by Miss Elva Bascom. Miss Stearns will continue to address clubs on civic and library topics, to aid in the establishment and maintenance of public libraries, and to promote state and county systems of traveling libraries.

UHLER, Philip R., who was connected with the Peabody Institute of Baltimore for nearly fifty years, died on Oct. 21. Born in Baltimore in 1835, he early developed a fondness for the study of insect life. In 1862 he entered the service of the Peabody Institute, where he attracted the attention of Louis Agassiz. He spent the next few years as assistant librarian in the great naturalist's museum of comparative zoology in Cambridge, also making some explorations in Hayti. In 1870 he was made head librarian of the Peabody Institute, and in 1890 was also made provost of the Institute. He introduced into the library a modern system of cataloging and classification, and spent much time in the search for books to build up the collections under his care. He retired from active service two years before his death, and was succeeded in the librarianship by Mr. John Parker, for many years assistant librarian.

WATSON, Helen S., has been chosen as children's librarian of the new Queen Anne branch of the Seattle Public Library. Miss Watson had a year of training in the Pittsburgh Training School for Children's Librarians and is a graduate of the College for Women, Cleveland.

THE LIBRARY WORLD

New England

MAINE

Bangor. The fine collection of scientific books, pamphlets and papers of the late Ora W. Knight, of Portland, who formerly lived in this city, will go to the Bangor Public Library.

Castine. By the will of the late Eben Blake Page, of Winchester, Mass., the public library receives \$500.

Waterville. The new Booth and Dimock Memorial Library building was dedicated at South Coventry Friday evening, Oct. 24.

NEW HAMPSHIRE

Exeter. By the will of the late Dr. Harlan P. Amen, principal of Phillips Exeter Academy, the sum of \$3000 is given to the trustees of the academy, to be known as the Mary Rawson Amen fund, in memory of Mrs. Amen. One-half of the income is to be added to the principal until it accumulates to \$25,000. The other half of the income is to be expended for books of permanent value, to be kept in the Davis Library in a room or alcove, to be known as the Mary Rawson Amen room or alcove. When the principal accumulates to \$10,000 the trustees may at their discretion expend a portion of the income upon pictures, furniture or works of art for the adornment of the room or alcove. When the principal accumulates to \$25,000, a codicil directs one-half the income shall be expended for books. Another codicil gives to the trustees of the academy, with one reservation, the testator's library of 10,000 volumes as a basis for the Mary Rawson Amen collection. Dr. Amen recently announced his intention to give to the academy 5000 volumes and about half that number are already placed in special cases in the Davis Library. The reservation is that each of the four children in the order of age may select a book and repeat the process until each one has chosen 100 books.

VERMONT

Fair Haven F. L. Ellen F. Dewey, lbn. (Rpt.—yr. 1912-13.) Total volumes in library 7828. Income \$800. Expended for books \$200.

Lyndonville. By the will of Luther B. Harris, former cashier of the Lyndonville Na-

tional Bank, his library, Indian curios and collection of old china are left to the Cobleigh Public Library here, provided a suitable addition is built to store them properly. If the town fails to do this and if none of his descendants care for this library and the other collections, the whole can be offered intact to any institution that wishes to purchase them and will agree to house them properly.

Plainfield. The Plainfield Library was opened Nov. 11. Miss Rebecca Wright, of the Library Commission, was present and helped arrange and catalog the books. One hundred and nineteen books were sent from the state through the Library Commission. The library had at the time of the opening five hundred books which were in the Ladies Circulating Library. This library united with the public one just formed. Miss Ethel Bemis is librarian.

MASSACHUSETTS

"Free public library buildings of Massachusetts—a roll of honor" is the title of a pamphlet which the Free Public Library Commission of the state has reprinted, with additions, from its twenty-third report. It contains the list of givers of free public library buildings, followed by the names of free libraries in separate buildings owned by the towns, and the names of those towns whose funds are now accumulating for library buildings. Another pamphlet issued by the commission is entitled "General library legislation of Massachusetts—1798-1913." It is a collection of such general legislation as relates to the formation and management of social, law, school district and free public libraries, arranged in chronological order, and intended to show the evolution of libraries in Massachusetts.

Boston. The handsome new branch public library at the corner of Monument square and Monument avenue, Charlestown, was opened to the public Nov. 14. The total cost of the new branch is about \$85,000. The old library was located in city hall building, which is soon to be demolished. Among the features of the new branch are open alcoves and shelves on each floor, permitting the reader easy access to the books and enabling him to make selections at will. A lecture room with a seating capacity of 240 will be used for the "story hour" for children, class work and oc-

casional lectures. It will be equipped with a stereopticon.

Cambridge. Work on the new Widener Memorial Library is making good progress, and it is hoped to have the building completed by commencement. The exterior work is nearly done, and interior work has been begun. Sir Charles Allom, who will direct the decorations for the library, has arrived in this country from England.

Cambridge P. L. Clarence W. Ayer, lbn. [died April 11, 1913]. (55th annual rpt.—yr. ending Mar. 31, 1913.) Accessions 6579; total number volumes in library 99,676. Circulation 298,049. City appropriations \$31,297.58. Expended \$31,296.21.

Figures for circulation show a loss of 5364, which is ascribed to an insufficient appropriation for the purchase of new and popular books. A trial was begun, June 15, 1912, of granting a larger privilege to all adult borrowers in the use of their non-fiction card. By this privilege any number of books of non-fiction desired may be taken out on the non-fiction card, except those recently published or otherwise restricted, as in the case of reference books. The experience of the year has abundantly justified this trial, and readers of the more serious books are given advantages which in a way offset the lack of the newer books. Early in November was started a new registration of card holders, after a lapse of six years, and now designed to continue in force for the regular college period of four years. At the same time a new and simpler form of card was introduced, and the use of the two-card system was discontinued. The borrower's privilege was further extended to two books of fiction on this card, instead of one book, as heretofore, of which only one could be new. A special "Selected list of Catholic books" was published in September. This was also issued in a separate edition of 2000 copies, which were distributed to each of the parochial schools, the Catholic Union, and the St. Mary's Catholic Association. It is expected that this list will be a forerunner of a larger and more comprehensive list of books by Catholic authors, the expense of publication to be borne proportionately by the institutions and organizations especially interested. From Oct. 15 to Nov. 15 the pupils of the upper grades of the grammar schools made visits to the library. They were shown all parts of the library building and were instructed in the use of cards, the card catalog, and the reference books.

Everett. Parlin Memorial L. Ellen L. Johnson, lbn. (33d annual rpt.—yr. ending Dec. 31, 1912.) Accessions 640; total volumes in library 25,280. Circulation 83,008. Books repaired in adult department 8834. Circulation in children's room 27,563. Books repaired in children's room 9146. Receipts \$5914.13; expenditures \$5914.13.

Haverhill P. L. John G. Moulton, lbn. (Rpt.—1912.) Net accessions of books 2391; total in library 99,000; of pictures 1000, total 20,000. Circulation 38,085 pictures, 184,652 books; per capita 4.1, fiction 72%. Population 45,000; new registration 1780; total since 1907 19,324. Receipts \$21,633.24. Expenditures \$21,161.80. Books and periodicals \$3718.23; pictures \$467.49; salaries \$9809.56; rent \$1026; binding \$813.45; insurance \$509.96; printing \$417.64; fuel \$836.52; light, \$560.22; building and grounds \$1404.45; furniture \$359.72.

The working schedule has been changed from 43 hours in summer and 43¼ in winter to 41 hours all the year round. Each assistant now works one evening a week, has a free morning on the day when there is evening work, and a free afternoon each week. Sunday work, with extra pay, is voluntary and in addition to the regular weekly schedule. The dinner period of 1½ hours, vacation of four weeks, and sick leave of two weeks remain as formerly. Some advances in salary were made. It is recommended that the general standard of salaries be raised to correspond with that of the schools. Books especially used by business men, such as general law and technical books, directories and foreign dictionaries, Spanish in particular, were added to the Washington Square branch, and it is planned to make this especially the business man's branch. Window advertising has been tried at the Washington Square branch, pictures and books being displayed. Many of the books were taken out by people who noticed them in passing, and they often expressed surprise to find books on such practical subjects in the library. Books on the useful arts were the most used. The windows were brilliantly lighted by concealed lamps. Colored lithographs on historical subjects attracted the most attention. This window advertising lured some into the library, and called the attention of many who did not come in to the fact that there was a library ready to serve the people in many ways. It was considered a success, and will be continued. The Massachusetts Library Club and Free Public Library Commission held a two days'

meeting in Haverhill in October. In November the Free Public Library Commission held at the library a two days' demonstration of book mending for small libraries. With Miss Marguerite Reid, of Providence, the librarian prepared the list on "Aids to library work with foreigners" for the March number of the Massachusetts Library Club *Bulletin*. This was reprinted later by the American Library Association. In addition to several talks about the library before clubs in Haverhill, the librarian gave talks at the Massachusetts Library Club meeting in Haverhill and the Old Colony Library Club meeting in November. The reference librarian, Miss Florence T. Blunt, conducted courses in reference work at the summer library school at Simmons College.

Newton. Two bronze tablets, six feet high, presented by Sarah Hull Chapter, Daughters of the Revolution, were dedicated in the Newton Public Library with fitting ceremonies on Dec. 4. The tablets were erected in honor of the Newton soldiers of the Revolution, and bear the names of the 432 men.

Southbridge. Work has been started on the \$50,000 Edwards Memorial Library in the center of Southbridge. The library is a gift to the town of Southbridge from Misses Hannah and Grace Edwards and Robert J. Edwards, all of Boston, in memory of their father, Jacob Edwards. Specifications have been made by Little & Brown, Boston, architects, and the work will be done by Norcross Bros. Co., of Worcester. The foundation of the library, which is to be 50 by 80 feet, will be of Troy white granite up to the ground floor. The walls will be built of Harvard brick with limestone trimmings. All of the finish work about the entrances and windows will be of bronze. The newspaper room and museum will be on the basement floor, and the library proper on the main floor. The second floor will be used for storage purposes.

RHODE ISLAND

Central Falls. By the will of Mrs. Susan S. Flagg, widow of Gen. Lysander Flagg, the income of the bulk of her estate is to be equally divided between her sister, Amy A. Whipple, and Mrs. Winnie Lewis Monroe. At their death the income is to be given to the Central Falls Public Library.

East Greenwich is to have a new public library, the gift of Mr. and Mrs. Daniel A. Pierce.

Providence. Athenæum. Grace F. Leonard, lbn. (78th annual rpt.—yr. ending Sept. 1, 1913.) Accessions 2474; total number volumes 79,257. Circulation 62,250. Receipts \$12,524.44. Disbursements \$10,504.71. Balance on hand \$2019.73.

An addition costing about \$12,000 is being made at the rear of the present building, which will permit the restoring of the present alcoves to their original size by removing partitions, and will allow room on the shelves for many valuable books now stored in boxes or in rooms inaccessible to the public.

Westerly. A special children's room was opened in the public library Dec. 6.

CONNECTICUT

Ansonia P. L. Ruby E. Steele, lbn. (Rpt.—yr. 1912-13.) Accessions 1280; total volumes in library 19,257. Circulation 57,360.

Columbia. The public library has received a bequest of \$500 from the late Eben Blake Page, of Winchester, Mass.

New Haven. The demand for a new building for the Yale University Library, to house the books which are already seriously crowding Linsley Hall and the old library buildings, is now heard. One of the sites mentioned is in the new Pierson-Sage square. The last report of Librarian Schwab shows that unless extra space is provided shortly it will be necessary to utilize attics and cellars and other convenient places in nearby buildings for the storage of the ever-increasing number of books. If this plan has to be carried out, danger from fire and other causes will be great. Proper classification and care will be difficult, and their inaccessibility will render many books of little use.

South Windsor. After being closed for three months the South Windsor Public Library opened Dec. 8 in the new town hall. The library began its career in the church parlors of the Baptist Church, and stayed there a few years until the Union District School was completed, when it was moved to the school house. There it was shifted from room to room, until finally transferred to its present quarters.

Middle Atlantic

NEW YORK

Brooklyn. Work has been begun on the enlargement of the library of the Children's Museum of the Brooklyn Institute in Bedford Park. It is to be confined to the reference

room, which will be increased approximately 500 square feet by taking in the roof space over the conservatory. The enlargement will house the most used of the reference books for the present, or until the new Children's Museum is built. Now many of the books have to be kept in the basement and in whatever closet space is available elsewhere in the old building, causing great inconvenience to the librarians and to those wishing to consult the books. The work is to be finished early in January.

Brooklyn. Pratt Institute F. L. Edward F. Stevens, lbn. (Rpt.—yr. ending June 30, 1913.) Accessions by purchase, gift and binding periodicals 5875. Circulation for home use: adult 202,598; children 46,239. New registration: adult 3255; children 1161; total registration 9894. Since the autumn of 1912 a systematic effort has been made to instruct institute students in library use, beginning in the Applied Science Department. Each man in the entering classes was assigned to five hours in the Applied Science room in the library, for instruction in the classification system, the card catalog, the important indexes, etc., and then prepared a bibliography on a designated subject. The bibliographies become library property. Every afternoon from October to June, from 3.45 to 5, tea with biscuits is served in the staff room by a competent person who comes in for the purpose, and the experiment has proved of distinct value. Beginning with January, 1913, the library has purchased in monthly consignments the special edition of the *Brooklyn Daily Eagle*, which is printed on rag paper for purposes of preservation in libraries. Extensive changes have been made in the children's department, and the open area south of the library and adjoining the children's entrance has been equipped with swings and see-saws and other playground apparatus.

Goshen. The library has received \$12,000 by the will of Charles J. Everett, of Goshen, N. Y.

Groton. A library, to be known as the Goodyear Memorial Library, and sufficient funds to maintain it, have been left to the town by the will of the late Dr. Miles D. Goodyear, a member of the noted rubber and forest owning family of that name. The will leaves a three-story brick building in the village of Groton valued at about \$45,000 and at present occupied by the post-office, and living apartments and other property valued at about \$55,000, for this purpose.

Hudson Falls F. L. (Rpt.—yr. ending June 30, 1913.) Accessions 546; total number volumes 2416. Circulation, adult 16,625; juvenile 7633. New registrations 358; total number of borrowers registered since October, 1910, 2201. Receipts \$1499.56. Expenditures \$1321.35. Balance on hand \$178.21.

Kingston P. L. (Rpt.—yr. ending June, 1913.) Circulation 44,467, including 10,798 to children. Reading room used by 26,700 readers. Branch in Kingston Academy, open one hour twice a week, circulated 3032 books. A similar branch is much needed in the lower part of the city.

New York City. The New York Public Library trustees have selected Carrère & Hastings, who designed the big central building, to prepare plans for a branch which is to be built on the south side of Manhattan street, running through to 126th street, adjoining the Eleventh Municipal Court building. This branch when completed will be the new quarters of the George Bruce Memorial branch, which has been located in rented quarters on West 42d street. With the opening of the new main building of the Public Library at Fifth avenue and 42d street and a circulation branch therein, it was felt to be advisable to transfer the George Bruce branch to a section of the city where library facilities are few.

New York City. Dr. George F. Kunz, chairman of the special committee on local celebration in the city of New York, announced at a recent meeting of the sub-executive committee for the celebration of the centenary of peace among English speaking peoples in 1915, the incorporation of an association for the establishment and maintenance for the people in the city of New York of museums of the peaceful arts as a memorial of the peace centenary. The object is to establish about twenty buildings on a site not yet chosen, for permanent exhibits, a library and a large popular auditorium. It is estimated by Dr. Kunz that the whole institution, which would be one of the finest in the world, would cost about twenty or thirty million dollars and several millions a year to run. It is aimed in particular to facilitate industrial education.

New York City—Queens Borough. The board of trustees of the Queens Borough Public Library has voted to send a request to the Board of Estimate for sufficient means to open three branch libraries in place of three large stations, each action being estimated to cost \$4500 for each branch, or a total of \$13,-

500, and that prompt and favorable attention by the Board of Estimate be urged. The three places in need of the branches, it was said, are Evergreen, Glendale and Luona Park. Appropriations amounting to \$88,381 were recommended. The discussion about the location of the library branch at Queens was reopened, but the board finally decided to hold over the matter till the next meeting, when it is expected that plans will be submitted for a building that certain residents of Queens hope to erect by popular subscription.

New York City. Dr. John A. Mandel, of Bellevue Hospital Medical College, of the New York University, has presented to the New York Public Library more than two hundred books relating to the history of Emperor William II. of Germany, whose twenty-fifth anniversary was recently celebrated. The collection is believed to be the largest in existence on the subject, and Dr. Mandel expects to make further additions to it from time to time.

New York City. The Edwin Hadley Smith collection of amateur journalism, consisting of 30,000 pieces, comprising extensive bound files of American and foreign amateur journalistic literature, mounted clippings, portraits and so on, has been cared for by the library of Pratt Institute since 1908. In justice to Mr. Smith, and to serious journalism, these papers, regarded as rudimentary forms, are about to be transferred to Columbia University, where they will be used in connection with the University School of Journalism.

New York City. *Russell Sage Foundation L.* Frederick W. Jenkins, libn. (Rpt.—yr. ending Sept. 30, 1913.) Accessions 2037; total volumes in library 10,000. Circulation 29,034; a gain of 6264 over last year. Total registration 878. The Russell Sage Foundation Library is the result of the union during the past year of the valuable collections on charity and allied subjects formerly belonging to the New York Charity Organization Society, the Association for Improving the Condition of the Poor, the New York School of Philanthropy, the Russell Sage Foundation and the New York State Charities Aid Association. The new building of the Sage Foundation just completed at Lexington avenue and 22d street, New York City, has provided delightful quarters for this new library on the two upper floors of the building, which will give excellent light and air and quiet. The library has been entirely reclassified and recatalogued during the past year and will be open to the pub-

lic after Jan. 1, 1914. A decided increase in the use of the library has made the circulation for the past year the largest in the history of the library. "The collection is the largest in America devoted exclusively to social problems. With ample room for readers, and the books required for their information, the much discussed problem of bringing the book and the reader together, ought to be comparatively easy. If progress is measured in terms of opportunity, an extension of future usefulness for the Russell Sage Foundation Library is assured."

New York City. *Columbia Univ. L.* W. Dawson Johnston, libn. (Rpt.—yr. ending June 30, 1913.) Accessions (exclusive of serials) 56,416. Registered borrowers at central loan desk 4676. Circulation for home use 196,922. Readers in reading rooms 502,016. Volumes used in reading rooms 792,592. 848 volumes were borrowed from 17 other institutions and 500 volumes were lent to 63 other institutions. The year has been marked by large additions to the library room and equipment, by important additions to book collections, by reorganization consequent upon the establishment of several new department librarianships, and by continued investigation of the catalogs and cataloging of the several libraries. The cataloging department will supervise the cataloging of all books for department libraries as well as for the main library, but the department librarians will prepare all volumes for binding. The binding department of the university handles about 45 per cent. of all the binding done. The union catalog and official catalog have been combined. This record now consists of all printed cards published by the Library of Congress, the John Crerar Library, Harvard University and the University of Chicago, together with dissertation cards published by the Königlische Bibliothek, Berlin, and miscellaneous entries, exclusive of serials. It is supplemented by the serial catalog and, for official use, a list of subject headings. Three types of bibliographical instruction are carried on under library auspices. (1) Introductory lectures of a general character, intended especially for the information of new members of the university. (2) A series of lectures on legal bibliography and the use of law books. (3) A course in pharmaceutical bibliography. It is the belief of the librarian that an optional course should be established, that it should be required of all students taking certain advanced courses, and that distinctly bibliographical work should be a condition of the

granting of any degree. The faculties of Columbia College, of Barnard College, and of the School of Philosophy have already allowed credit for such work as is involved in attending a course of bibliographical lectures and also for such work as is involved in bibliographical research.

Newark P. L. Miss Saltsman, lbn. (Rpt.—yr. ending Oct. 31, 1913.) Accessions 353; total number of volumes 10,938. Receipts \$3632.37; expenditures \$2536.80; balance on hand \$1095.57.

Oaks Corners. A suitable and attractive building has been provided for the free library in a most inexpensive way, through the thoughtfulness and generosity of Mr. A. B. Burtis, a landowner in the village. When the new railroad station was to displace the old one, he secured the right to move the latter to a vacant site on his own grounds, and then by making some desirable changes and improvements, transformed it into an inviting book and reading room, and gave a lease for its perpetual use to the free library association, so long as it is used for library purposes.

Old Forge. A number of residents of Old Forge met Nov. 29 and organized a Free Public Library Association. The charter members are Rev. Benjamin B. Knapp, Maurice Callahan, Walter D. Marks, jr., Prof. A. T. Cloffee, William J. Thistlethwaite, Gilbert Hoffman, Rev. J. Fitzgerald, Mrs. R. S. Lindsay, and Mrs. Fred Woodruff. It is expected that a library and reading room will be opened in the near future.

Ossining. The board of library trustees has voted to allow the use of a portion of the library property for playground and garden purposes. By means of a close hedge or wall the playground, a plot about eighty by one hundred and forty feet, will be set off from the library grounds, and it will be under proper supervision.

Rochester. Mrs. M. G. Kellogg, of Chicago, has given \$25,000 as a memorial to her late husband, to the endowment fund of the library of the University of Rochester. The fund now amounts to \$60,000.

Rochester. On Nov. 22 a large meeting in the interest of the Rochester Public Library was held at the Seneca Hotel. Dr. Arthur E. Bostwick, librarian of the St. Louis Public Library, delivered a very forceful address on the function of reading in the development of boys and girls and the part per-

formed by the library in furnishing reading matter. The meeting was the fourth in the series of follow-up conferences arranged by the Rochester Child welfare committee, conferences at which special features of the Child Welfare Exhibit are treated by experts and afterward discussed freely by members of the audience. The discussion at this fourth conference focussed on the need of a central library for Rochester, and a resolution was adopted urging the city to take steps to provide a central library. At present only a beginning has been made on a branch library system and numerous minor distributing centers for books of a popular character.

Rochester. Four new deposit stations were opened in November, making twenty-one stations established since the first of January. City Librarian William F. Yust frankly said at a recent meeting that until the city has a central library plant costing at the lowest estimate half a million dollars, exclusive of its site, and a stock of at least a million books, besides ten branches costing \$40,000 each and from one to two hundred deposit stations, it cannot hope adequately to supply the demand for library facilities that is rapidly becoming more insistent. So far as he knew, he said, no movement was on foot, either among the city authorities or among the people, to secure such an equipment.

Sag Harbor. A deed of trust has been executed by Mrs. Russell Sage, in which the John Jermain Memorial Library building, costing about \$100,000, its entire equipment and an endowment providing sufficient income perpetually to maintain it on a liberal scale, are given to a board of trustees, to administer the library *in perpetuo* for the free use of the village. No figures are given to the public as to the exact amount of the endowment, but from the amount needed for annual expenses as now operated, it is estimated that this must be equal to if not greater than the original cost of the building.

Sea Cliff. Work on the library building to be erected by Mrs. Samuel Stevenson as a memorial to her husband will be started soon.

Sherman. *Minerva* F. L. Florence E. Hawley, lbn. (Rpt.—yr. ending Nov. 1, 1913.) Accessions 387; total number of volumes in library 4486. Circulation 13,230. Receipts \$1309.06. Expenditures \$864.19. Balance on hand \$444.87.

Troy. Miss Jessie Wheeler, of the Public Library, has received a cash prize from a

western establishment for the best and most original device for electrically wiring houses. Miss Wheeler has long been a student of electrical devices and is also a practical telegraph operator.

NEW JERSEY

Bayonne. The closing of the First National Bank of Bayonne has tied up the funds of the public library. The trustees hope to negotiate a loan to provide money for the salaries of the librarians.

Beverly. Prominent citizens of Beverly have taken the lead in a campaign to establish a fine new library building. John H. Sinex, a Philadelphia business man and president of the Beverly Bank, is chairman of a committee to advance the project. It is proposed to erect a building costing not less than \$5000.

Cranford. (Rpt.—yr. ending Nov. 1, 1913.) Accessions 723. Circulation 29,349. New registrations 198; total number of borrowers 1626.

Hoboken. Deciding that the publication of the minutes of the meetings of the Board of Trustees of the Free Public Library was an unnecessary expense, the board at its last meeting voted to abolish the publication of the minutes, and hereafter to have a typewritten copy hung in a conspicuous place in the building where anybody interested could read it.

Keypoint. (Rpt.—1913.) Accessions 187; total volumes in library 1926. Circulation 8179. Total number of borrowers 699.

Nutley. The cornerstone of the new Nutley Free Public Library was laid Nov. 29. The movement to establish in Nutley a free public library began in 1875, when the Park School Library was thrown open to the people by the Board of Education. It was distributed about in the various rooms of the building and was little used. In 1901 Mrs. J. Stuart Brown, now of Montclair, aroused sufficient interest among the people of the town to induce the Board of Education to devote a special room in the school to the library, and its circulation jumped at once to 1000 a month. The Park School Library grew to about 3000 volumes, and in the meantime the "Nutley Library," a subscription affair, came into existence and acquired about the same number. Both of these are now merged and donated to the new institution. About four years ago the people voted to tax themselves under the state law for library maintenance. Andrew Carnegie donated \$20,000 for the new struc-

ture and the Board of Education gave the land. The structure will be of brick with limestone trimmings and is built in the style of the Jefferson mansion, on the James river, which is typical of the colonial style of architecture.

Passaic P. L. Miss H. Elizabeth White, lbn. (Rpt.—yr. ending June 30, 1913.) Circulation 243,227. Visitors to the reading rooms numbered over 200,000.

Besides the main library there are four branches. Of these the North branch was opened on July 15, 1912. The cost of running this new branch was \$2000 for the eleven and one-half months ending June 30 last. This amount includes new books, furniture, supplies, rent and additional service required. The membership of the library is 1304; the circulation 32,887; reading room attendance 35,673. A total of 1304 new books were purchased for this library and 1372 were transferred from other library buildings in the city. The growth of club work has been the main feature of the work at the Reid Memorial Library. When the three club rooms and the auditorium were all full, the librarian's office was used for club work. Every section of Passaic is now provided with convenient library facilities. Hence the policy of the library during the next few years will be one of development, especially in supplying the branches with more books and providing larger and better reading rooms.

Red Bank. In her will, recently probated, Mrs. Anna M. Conover left \$1000 to the Red Bank Public Library.

PENNSYLVANIA

A SURVEY of the subscription library movement which gradually spread over Pennsylvania in the latter part of the eighteenth century, and its development in the nineteenth, is given in Thomas L. Montgomery's article, "A survey of Pennsylvania libraries," in the October number of *Pennsylvania Library Notes*. The origin and growth of many town libraries is sketched, starting on a subscription basis, on the principle that "What was worth getting was worth paying for." Up to 1887 not a single free public library, supported by taxation, existed in Pennsylvania, although many subscription libraries opened their reading rooms to the public. Scranton had the first tax-supported public library. "The record of 139 free libraries established within twenty-five years will stand, no matter what may be the success of the future."

Canton. The Green Free Library was opened recently with formal exercises. The library had its inception in 1899, and was so well supported and used that it attracted the approving attention of the late Charles F. Green, of Roaring Branch, who, at the time of his death, left the sum of \$40,000 to be used in its endowment, and for the purpose of erecting a suitable building to house the books.

Chester. Mary Helen Jones, of Haddonfield, N. J., has been elected librarian of the West End Library.

Conshohocken. Mrs. Alan Wood, widow of the Conshohocken ironmaster, has given a \$5000 endowment to the Conshohocken Free Library.

Darby. "A sketch of the Darby Library Company" is the title of an article by Kate W. Serrill in *Pennsylvania Library Notes* for October. The library was organized March 1, 1743, when twenty-nine citizens formed a company for establishing a library. In 1761 there were 230 volumes. In 1826 it was voted that anyone paying \$3 per annum might use books on the same terms as members. In 1868 the library company was incorporated, and in 1872 subscriptions were solicited and a lot and building worth about \$10,000 were provided for the library. In 1893 the 150th anniversary was celebrated, and in 1898 the library was made free to the public.

Edinboro. A brief description of the library of the Edinboro State Normal School is printed in *Pennsylvania Library Notes* for October. The town has no public library, but the public is welcomed in the school library, which contains about 8500 volumes.

Germantown. After an existence of forty-four years, the Germantown Library Association and Historical Society will go out of existence on Jan. 11 next. The association was formed in 1869 through the instrumentality of Miss Hannah Ann Zell, who was the president until her death, in 1911. When founded it served a useful purpose, there being few public libraries in the city at that time. With the growth of the free library system, the library lost patronage. In 1912 the association disposed of its collection of relics, many of them being turned over to the Site and Relic Society. At the same time the works of history, science and travels in the library were sold, and it was decided to make up-to-date fiction the feature of the library, with the hope of attracting patronage, but the change was not a success.

Jenkintown. The history of the Abington Library is briefly summed up in an article by Florence M. Ridpath in *Pennsylvania Library Notes* for October. There were thirty-three members of the first library, established in 1803. The first purchase was Goldsmith's "Animated nature," in four volumes, at \$6.50. At the close of the year the library owned 150 volumes. Membership fees fluctuated from \$6.50 up to \$10 and then down to \$1 per year, the rate adopted in 1902. In 1903, on its hundredth anniversary, the library was made free to all residents within an area of twenty-five square miles. In 1909 ground was broken for a new \$10,000 building, and in July, 1910, it was opened to the public. During the last ten years an endowment fund of \$25,000 has been secured; property worth \$10,000 has been purchased; a colonial library costing \$20,000 has been built, and the book collection increased from 1700 to 15,000 volumes.

Pennsburg. The new library at Perkiomen Seminary, made possible through the generosity of Andrew Carnegie, who donated \$20,000 for its erection, was dedicated Nov. 20. President John G. Hibben, of Princeton University, and ex-Governor Samuel W. Pennypacker, of Schwenksville, Pa., were the principal orators for the occasion. President Hibben spoke on "The library," while Mr. Pennypacker chose "The archives" as his subject. Ten years ago Dr. Oscar S. Kriebel conceived the idea of interesting Mr. Carnegie, and after three years of investigation and correspondence Mr. Carnegie finally offered to give \$20,000 for the library, provided that the school raise a similar amount for the endowment of the library, and clear up all debts of the seminary, which amounted to nearly \$40,000. After seven years of hard work, during which time he overcame almost insurmountable obstacles, Dr. Kriebel finally succeeded in raising the amount in June, 1912, and thus increased the material resources of the school \$80,000, it being the largest material increase the school ever received at one time. Work was begun on the building about a year ago. The building is two stories high, with a basement. The foundation wall is built of native brownstone, while the building proper is of dark red brick to conform with other buildings of the seminary. The roof is of red tile, and has a large skylight. The basement will be used for class room purposes, the first floor for the library proper, and the second story as an historical museum. The building also contains a large

fireproof vault, which is to be used for the preservation of valuable historical documents concerning the founders of the Schwenkfelder faith, under which religious denomination the school is conducted.

Philadelphia. To provide a site for a free library building and a public recreation ground, the city has purchased from the Odd Fellows' Cemetery Company of Philadelphia a lot at the northwest corner of Twenty-fifth and Diamond streets, for \$50,000. It includes about two and one-half acres. The city several months ago purchased from J. S. Serrill and from Annie McCaerney two adjoining lots between the Pennsylvania Railroad and Diamond street. With these the city now has for the library site a triangular lot 500 feet on the west side of Twenty-fifth street, 550 feet on the north side of Diamond street, and 750 feet along the Pennsylvania Railroad. Glenwood avenue cuts through the lot, but that part of the avenue will probably be taken off the city plan.

Philadelphia. The library of botanical works collected by the late Dr. Charles H. Shaw, assistant professor in the department of botany at the University of Pennsylvania, has now been incorporated with the departmental library, and each work has been suitably inscribed as a memorial gift by friends of Dr. Shaw to the university. These will serve to keep alive the memory of the professor, who, while carrying on botanical explorations in the Canadian Rockies, was drowned three years ago in a lake of that region.

Philadelphia. A rare set of law books printed by Benjamin Franklin was purchased here last month by the New York State Library for \$415. The documents, which consisted of seventeen folios executed between 1759 and 1764, were part of the collection of Robert F. Skutch, of Baltimore. They are considered among the best specimens of Franklin papers in existence.

Philadelphia. Two hundred additional volumes were recently deposited in "The Memorial Library of the Publications of the University of Pennsylvania," a distinctive institution of the university and not duplicated in any other seat of learning. The "Memorial Library" has a home in six special alcoves in the tower of the library, in a set of book-cases donated by Joseph G. Rosengarten, one of the university trustees. There are now more than 6000 books and pamphlets in these

memorial cases, all written or edited by men who have been connected with the university as students, teachers or officers. Some of the works are by authors of colonial days. There are several volumes published just before or after the Civil War. Copies of every textbook put out by university men are included, among them several which have been in almost universal use and the names of which awaken associations of school or college days in the minds of many thousands. The collection also contains the files of the undergraduates and graduate publications, monographs and theses. Different languages are represented in books in Chinese, Japanese, Spanish, German and French. The special book-plate for the memorial collection was designed by George E. Nitzsche, the University recorder, and drawn by Andre Koronski.

Philadelphia. Falls of Schuylkill branch of the Philadelphia Free Library, at Warden's drive and Midvale avenue, Falls of Schuylkill, was formally opened Nov. 18, in the presence of a large assemblage of guests. The keys of the building were handed over to Dr. John Thomson, librarian of the Free Library of Philadelphia, by the architects, Rankin, Kellogg & Crane. Addresses were made by George Dorwart, Charles L. Dykes, Clinton Rogers Woodruff, and John W. Flanagan, president of Falls of Schuylkill Business Men's Association. The library was opened the following day for the distribution of books by Miss Susan R. Clendenin, librarian, and her assistants, Misses Ella W. Boyd, Caroline Fiss and Eleanor Smith. The library building is of local stone, with Indiana limestone trimmings, and has a frontage on Midvale avenue of 42 feet and on Warden's drive of 100 feet. It is one story and a basement in height, surmounted with a steeped pitched roof of green and purple slates, with a small cupola in the center. The library proper is on the first floor and is reached by a flight of two broad steps from Warden's drive. In the basement are the heating plant, a large lecture room, and a kitchen and dining room for the employes. The building was erected from funds furnished by Andrew Carnegie on ground donated by the late William M. Merrick and the Warden estate. Two other branches, one at Broad and Porter streets and the other at Twentieth and Shunk streets, will be opened some time this winter.

Pittsburg. "Some of Pittsburgh's early libraries" is the title of an article by A. L. Hardy, which fills six pages of the December

Bulletin of the Carnegie Library of Pittsburgh. The article first appeared in the *Pittsburgh Gazette Times*, and traces the development of the library movement from its inception in 1787 to the time of the Civil war.

Reading. The library trustees have decided to establish branch libraries in the northeast, northwest, and southeast sections of the city. The branches will probably be started in school buildings.

Wallingford. Wallingford is to have a memorial library on a plot of ground just north of the Wallingford bridge, which has been deeded to the Helen Kate Furness Free Library by William Henry Furness, 3d. The lot has a frontage of eighty-eight feet on Providence road and a depth of three hundred and sixty-five feet. Frank Miles Day is preparing plans and specifications for the library building, which is expected to be finished by next spring. The library was incorporated in 1902 under the name of the Horace Howard Furness Free Library. Before Dr. Furness died he left the sum of \$5000 to the library upon the condition that the name be changed to its present title.

Wellsboro. After making several other bequests, Miss Mary Barbara Robinson has bequeathed the bulk of her estate, estimated at \$100,000, to her nephew, C. R. Converse, of Elmira, N. Y., for life, and then to the endowment of the Green Free Library, Wellsboro, to be known as the Chester and Mary Robinson endowment fund, in memory of her father and mother. Earlier in the year, by the will of Charles S. Green, of Roaring Branch, Wellsboro received \$50,000 for a free library, of which \$10,000 was for the building, \$8000 for books and \$32,000 for endowment. This sum, to which the endowment fund of Miss Robinson eventually will be added, will place the Green Free Library of Wellsboro on a substantial foundation.

DELAWARE

Wilmington. A movement is on foot to start a campaign for \$300,000 for the Wilmington Institute Free Library, which is admitted to be one of the best in any city the size of Wilmington. The city council has been asked to appropriate \$50 annually for every \$1000 bequeathed or donated to the fund, such appropriation not to be paid on an amount exceeding \$200,000. At the present time the city's appropriation amounts to \$13,000 annually, and under the agreement it would donate \$27,000 annually.

MARYLAND

Snow Hill. *Friendly L. Rozelle* and Virginia Handy, lbn. (5th rpt.—yr. 1912-13.) Total no. vols. in library 1600. Total registration 368.

DISTRICT OF COLUMBIA

Washington P. L. George F. Bowerman, lbn. (Rpt.—1913.) Accessions 11,787; total number of volumes 156,263. Registration 46,278. Circulation 686,278 volumes and 72,450 pictures.

In the distribution of books 161 agencies were utilized, including those administered by the library and those to which deposits of books were sent for circulation. The school division has made a new high record, and one that is believed to be rarely equaled in home circulation per volume. From a total stock of but 6000 volumes in the school duplicate collection, a home circulation of 76,339 volumes was achieved—that is, twelve and two-thirds circulations per volume. These books were circulated from 287 classrooms in eighty-six school buildings. In the face of such a record the library ought at once to be able to increase its school duplicate collection to not less than 20,000 volumes and to enlarge the staff in charge of this work. Twenty-three different organizations held sixty-eight meetings in the lecture hall, with a total recorded attendance of 7158. In the study room there were held 140 meetings of eighteen organizations, some of which also held meetings in the lecture hall. During the year seventeen resignations have been handed in out of a total regular staff of sixty-nine, including the building force. This is due to the fact that the salaries paid are inadequate. "The original library appropriations were slowly and inadequately made. The salaries were fixed by Congress on a starvation basis, and no effort hitherto has been successful in getting them from this basis except in spots. Charwomen are still paid \$180 per year, as against a minimum of \$240 per year elsewhere; many regular assistants (not pages, but professional librarians) are paid \$480 and \$540 per year when the minimum pay for merely clerical work elsewhere in the government service is \$720; the librarian originally received \$2500, and now receives \$3500 per year for labors which are compensated in other American libraries of approximately the size and usefulness of that of Washington by an annual salary of \$5000 or more. As a consequence of these conditions of overwork and underpay the library force has suffered a constant shifting in personnel, losing by resignations

53 per cent. of its entire force in the fiscal year 1907, 25 per cent. in 1908, 23 per cent. in 1909, 26 per cent. in 1910, 33 $\frac{1}{2}$ per cent. in 1911, 20 per cent. in 1912, and 25 per cent. in 1913. In the nine years from 1904, the first full year the present central building was occupied, the congressional appropriations for the library have increased 71 per cent. and the total library expenditures 59 per cent. But in the corresponding period the book stock has increased in volumes 142 per cent. and the home circulation has increased in volumes 147 per cent. The library has grown in these nine years from 64,473 volumes to 156,263 volumes, and in volumes circulated, the measure of the library's activity and usefulness, from 278,178 volumes to 686,278 volumes. The work done has increased twice as fast as the means provided for doing it, and in very recent years there has been almost no increase of maintenance and development provision at all. Under any test that can be applied Washington's library maintenance is inadequate compared with that of other libraries of its class. The comparison is unfavorable to Washington: (1) In the aggregate amount of library appropriation; (2) in per capita library expenditures, and (3) in percentage of total municipal expenditure applied to library purposes."

The South

VIRGINIA

Richmond. By a resolution adopted at the annual meeting by the board of directors of the Virginia State Library, books will be loaned hereafter, under certain regulations to be prescribed, to any responsible person in the state eighteen years old or over. The change in the method of borrowing books, which has heretofore been extremely limited, it is believed, will tend greatly to increase the usefulness of the library to the people of Virginia.

SOUTH CAROLINA

Latta. The contract for the construction of the Latta Public Library building has been awarded to S. E. Alford, of Rowland, N. C. The Carnegie Corporation of New York made a donation of \$5000 for a library building, and the contract calls for the completion of the building ready for occupancy by March 15, 1914.

FLORIDA

Bartow. Plans for the new Carnegie Library are ready.

KENTUCKY

Eminence. A library association has been formed as the result of a visit by Miss Fannie Rawson, secretary of the State Library Association.

Louisville F. P. L. George T. Settle, lbn. (9th rpt.—yr. ending Aug. 31, 1913.) Accessions 19,061; total number volumes 163,214. New registrations 9387; total number of borrowers 40,824. Circulation 776,654 volumes for home use. Receipts \$150,065.03; expenditures \$146,352.62. From Mr. Carnegie \$35,000 have been drawn for three branch libraries. The chief event of the year was the transfer, on May 13, of the Polytechnic Society property to the Library Board. This included the store building on Fourth avenue, valued at \$630,000, together with all books, statuary, museum collection, paintings, etc. The rents from this building, which is occupied by a large department store, will enable the library to do much additional work. The opening of the Jefferson Branch library, the completion of the new Portland Branch building, and the drawing of plans and the erection of the Eastern Colored Branch building are added items of interest. The library system consists of the main library, seven branches (with the eighth under construction), 213 class room collections in schools and 37 deposit stations, a total of 258 centers for the circulation of books for home use.

TENNESSEE

Greeneville. A donation of \$10,000, it is announced, has been secured from Andrew Carnegie for the purpose of building a library in Greeneville, the home of Andrew Johnson. It is expected that work on the building will be commenced in the early spring. A lot for the library was purchased some time ago near the federal court building.

Knoxville. The school improvement and library organizations of Knox county have, up to the present time, raised \$1000 for the purpose of establishing libraries in various schools in Knox county. This means that the schools of Knox county have \$2000 available for library purposes. For every \$1 raised by the Knox county schools the state will donate \$1, thus doubling the sum raised by the students and patrons of the schools. Libraries are being established in fifty or sixty school houses in Knox county.

ALABAMA

Birmingham. The library board of this city has determined on a special campaign

for the purpose of raising a fund of approximately \$50,000. The money is to be used for the purchase of books needed to bring the library system of the city up to proper standard. With the great industrial growth of Birmingham in recent years has come a need for special training among the residents that the library has been unable to satisfy up to the present time.

Central West

OHIO

Akron. Through the generosity of a few citizens a children's room has been equipped and opened in the public library, with suitable furniture and 2000 new books.

Cleveland. A new branch was opened on the second floor of the old main library building Nov. 15, in charge of Mrs. Minnie B. Paoli. It will contain a newspaper reading room, the department for the blind, formerly at Goodrich house, and an adult circulating collection of about 7000 volumes (fiction and the best books in all classes). Here, too, will be found a collection of general reference books for "ready reference" work and the current numbers of about thirty-three periodicals, including most of the popular and a few technical magazines. There will be a smaller library for children and a club room for story-hour and general use. The municipal reference library, consisting of books on municipal government and affairs, will be continued on the second floor of the city hall, and in connection with this a business men's reference library has been organized, bringing together all the books which most readily answer the questions asked by business men. This includes hotel and trade directories, directories of other cities, telegraph codes, encyclopedias and year books. There are now sixteen smaller branches in the public library system.

Fostoria. The public library made possible by the bequest of \$19,000 from the late Louisa McClean is now in course of erection and will soon be roofed over.

Hamilton. Work on restoring the Lane Library has progressed so satisfactorily that the trustees now believe that the institution will be ready for the public by the first part of February. There will be a dearth of books, but the trustees have the nucleus of another library and hope to be able to restock the building rapidly.

Oberlin. Vandals wrecked the interior of the new Carnegie Library here, which is used jointly by Oberlin College and the town, Dec. 17. Books and magazines were thrown about, and all card index files destroyed. Restoration will cost several hundred dollars and require protracted labor. Meanwhile the building will be closed and college reference work handicapped.

Youngstown. When the municipal courts are established the first of January it will mean that about \$5000 a year will be cut from the revenue of the law library, for none of the municipal court receipts will go for the purpose of supporting that institution as at present. Since the law has been in effect giving the state fines and costs collected in police court to the law library the clerk of the court has turned over thousands of dollars to Theodore Johnson, treasurer of the law library. Under the municipal court law all fines and costs collected in those courts are placed in a common fund to meet the expenses of the courts and not a cent goes to the law library.

Youngstown. Insufficient funds with which the Reuben McMillan Free Library has to meet the expenses of the library during the year 1914 will force the library trustees to close the libraries under their administration during three months of the coming year. The trustees voted at their November meeting to close the main library, South Side branch, Brier Hill branch, Haselton branch and all departments of the library from June 15 to Sept. 15. The appropriation granted by the city of \$16,000 is declared inadequate to give good service to the public during the entire year.

INDIANA

Newcastle. A Carnegie library for Newcastle will soon be an assured fact. The subscription list which has been circulated in the town shows that \$1700 has been subscribed, \$300 in excess of the amount Carnegie demands to show good faith. The success of the work is largely due to the efforts of Miss Louise Compton.

MICHIGAN

Detroit. As a feature of the university extension work in this city Theodore W. Koch, librarian of the University of Michigan, has been giving a series of illustrated lectures in the Museum of Art. Those already given are "College and university libraries," "The arts of illustration," and "Features of a printed book."

Detroit. "As few obstacles as possible between the people and the books," is the underlying principle of changes which City Librarian Adam Strohm is making in the reference department of the central library. The library "jail equipment," which Librarian Strohm has put out of commission during the past few weeks on the second floor includes 544 glass doors and 544 keys to the same, besides much other useless lumber and junk, which formerly acted as barriers between the people and the books. As a result the second floor reference book department has taken on an air of utility it never wore before. Table rests for the books attached to the wall between the "stacks," which can be folded up when not in use, are another improvement installed in the reference room which is greatly appreciated by its frequenters.

Detroit. Cass Gilbert, of New York city, the architect who drew the plans for the Woolworth building in that city, is preparing the plans for the new central library to be built here this year. The plans call for an expenditure of \$850,000, but it is expected the building will cost over a million before it is completed.

Houghton. The Houghton Public Library owns original illustrations by Mary Hamilton Frye for Selma Lagerlöf's delightful children's story, "The wonderful adventures of Nils." These illustrations and original lantern slides were drawn especially for the Houghton Public Library, a Houghton friend of the library who has remained anonymous, having commissioned the artist to do the work as a gift to the library. Doubleday, Page & Co. secured from the library permission to put out a special edition with these illustrations, and with each copy of the new edition is published an insert describing the source of the illustrations. The insert states that should any school, library or other organization desire to make use of an abridged form of the story with lantern slide illustrations they must secure permission and the slides from the Houghton Public Library.

ILLINOIS

Chicago. Valuable books and records of the John Crerar Library in the Marshall Field building were threatened with destruction Nov. 14, when an explosion in the binding supply room on the sixth floor caused a fire that destroyed the contents of the room and entailed a loss of \$5000. Quick action by the firemen prevented the spread of the flames to

any other room and the fire was extinguished before water had dripped down to the floor below.

Wyoming. Mrs. E. P. Reeder, secretary of the Library Association, has received word from the Carnegie Corporation of New York that it will give \$5600 to erect a free library building for Wyoming, providing certain conditions are met and plans for same be previously submitted to said association.

Yates City. By the will of the late Nettie J. Corbin the town receives \$5000 to found a library.

WISCONSIN

Bay View is to have a new \$20,000 library.

Kewaskum. The new public library, established by the local woman's club with the aid of the village, was opened Oct. 2 with an address by Miss Lutie E. Stearns, of the Wisconsin Library Commission.

Manitowoc P. L. Martha E. Pond, lbn. (Rpt.—yr. ending Je. 30, 1913.) Accessions 688; total volumes in library 10,896. Circulation 40,642. Total registration 4940. Receipts \$4100; expenditures \$3900.

Milwaukee. A permit has been issued for the erection of the Bay View Library, to cost \$55,000.

Milwaukee. A three-story addition to the public library is to be made at a cost of \$50,000.

Mineral Point. Work has been begun on the new \$50,000 municipal building, which will also contain the public library.

Plymouth. The Woman's Club of Plymouth has voted to buy the L. W. Tillotson property for a Carnegie library site.

Oconomowoc. Mabel Weber has been appointed librarian of the school library.

Sheboygan P. L. (Rpt.—yr. 1912-13.) Circulation 30,244 for adults; 30,393 for children. Total registration 7000; adults 2976, children 4024. Receipts \$8230.17. Balance on hand \$3209.75.

Waupaca. Plans have been accepted and the contract let for the \$10,000 Carnegie building.

The North West

MINNESOTA

Minneapolis. The city council has authorized the issuance of \$40,000 for library sites.

Mountain Iron. The village council has unanimously decided to accept Andrew Carnegie's offer of \$8000 for the erection of a public library in Mountain Iron. The village agrees to provide a suitable site, and to raise annually at least 10 per cent. of the amount donated by him for the support of the library.

St. Paul. At its meeting Dec. 26 the public library board, in the face of considerable opposition from the mayor and citizens, leased the Public Library building for a term of thirty years to an eastern firm. The city is to receive \$150,000 rental in all for the building. The opposition arose from the fact that the present lease does not expire for six years.

St. Paul. Work on the foundations of the new \$1,000,000 public library was practically completed Dec. 15. The work was started Aug. 18.

White Bear. Plans for the construction of the new Carnegie library are in the hands of the Carnegie commission, and work on the building will be started as soon as they are returned. The building will cost about \$5500, and the site cost \$1000. The site was purchased by subscription, and the money for the building was given by Andrew Carnegie.

IOWA

Des Moines. Miss Eliza E. Townsend, formerly librarian in the Public Library at Spokane, Wash., on Dec. 1 assumed her new duties as supervising librarian of the state institutions under the board of control. Miss Townsend plans to study the needs of individual patients in each institution, and to recommend for the inmates reading that will aid them in correcting the mental or moral deficiencies which have brought about their commitment.

Keosauqua. After five years of work the Woman's Improvement Association here has financed and opened a library building. The last payment has been made, and the building has been equipped with every convenience.

Logan. Logan's new library, to be organized under the state of Iowa library regulations, has selected for the board of trustees the following: Mary Rice, Almor Stern, Dr. M. A. Humphery, Mrs. B. J. Wood, Mrs. H. L. Allen and James Albertsen.

NEBRASKA

South Omaha P. L. Mrs. Grace Pinnell, lbn. (Rpt.—yr. ending July 31, 1913.) Acquisitions 358; total volumes in library 9234.

Circulation 37,801. New registration 837; total 2767. Receipts \$5208.82; expenditures \$4478.82.

NORTH DAKOTA

Leonard. On Nov. 26 the transfer was made of the newly erected and newly fitted building in future to be used as a public library, from the hands of Edgerton Watts, who has been postmaster in Leonard for the past thirty-one years, to the town and township. The building was erected as a memorial to Mrs. Mary E. Hewitt Watts, wife of Mr. Watts. This is the first township library in the state.

SOUTH DAKOTA

Brookings is to have a new \$10,000 Carnegie public library building.

The South West

MISSOURI

Columbia. By acquiring the Stone property for \$32,500 the University of Missouri became the owner of the block in which the new library building is to be built. The site cost \$84,500. The contract for the building, which is to cost about \$250,000, will be awarded in January.

Belleville. The Belleville City Council has selected the Heinemann property, at First and Jackson streets, as the site to be tendered the Carnegie Corporation for the proposed Carnegie Library. The price asked is \$6800. The Carnegie Corporation has signified its readiness to appropriate \$45,000 for the erection of a library building if the proper site is tendered, and the city makes an annual appropriation of \$4500 for maintenance of the institution.

OKLAHOMA

Enid. The dedication of the new \$25,000 library for Phillips University took place Nov. 25. In the morning A. E. Corey made an address, and in the afternoon M. M. Davis, of Dallas, Tex., dedicated the building. Phillips University was organized in Enid in 1906 and was known at that time as Oklahoma Christian University. Rev. E. V. Zollars was president. T. W. Phillips, sr., of Pennsylvania, was one of the most generous donors at the time of the building of the university. Before his death he liberally endowed the university and in recognition the name of the university was changed. Mrs. Phillips and Thomas W. Phillips, jr., were guests of honor at the dedication exercises.

TEXAS

Bay City. The Bay City Public Library Association, which is an institution organized for the purpose of securing a library for Bay City, has already subscribed over \$2500, and close to \$1800 of this has been collected. A lot 75x140 has been purchased for \$1500 and many books have been donated. The question now before the executive committee and the advisory committee is whether or not a temporary building will be placed on the lots and used till a more pretentious building can be built or whether it is better to go after the larger nouse at once.

Houston. Approximately \$600 was donated by the school children of Houston for the purchase of library books on library day, Nov. 26. The purpose of the collection is for the purchase of books to be added to the school libraries.

Palestine. Work has been started on the new public library building.

San Antonio. Plans for the new modern Carnegie Library have been accepted and work on this structure will start soon. The building, when completed, with all minor details, will cost \$15,000.

San Antonio P. L. Cornelia Notz, lbn. (Rpt., yr. ending May 31, 1913.) Total number of volumes in library 37,043. New registration 4754; total number of borrowers 9099. Receipts \$26,344.67. Expenditures \$11,816.26. Balance on hand \$14,528.46.

"Six deposit libraries are maintained in schools. These libraries, consisting of about 75 to 150 books each, were very carefully selected, offering books on a great variety of subjects, with a liberal sprinkling of fiction. The reading lists of the foreign children offered some surprises, for they consisted almost entirely of histories, biographies, hero stories and 'first aid' books. Besides addresses delivered before schools and organizations of various kinds, the quarterly bulletin has been an important feature of the publicity work done by the library. It was started in 1906, but as no appropriation was made for it at that time, the publication paid for itself by means of advertisements printed on it. This feature was eliminated later on when the board made a special appropriation for the bulletin. The newspapers have also given much space to library news. From its very beginning the library has each winter offered a course of lectures. During the last winter the lectures were made entirely free to the public

and proved very popular. The story hour inaugurated in 1907 was continued during the year. The plan for next year is to take up and develop some definite subject. Several requests for books have come from towns near San Antonio. Public libraries in Texas are few and far between, those nearest San Antonio being located in Houston and Dallas. Most of the towns are too small to support libraries of their own, and it is but natural that they should appeal to the nearest public library. The expense connected with the sending of books is more than our library can afford and the requests had to be refused. However, if the county authorities are appealed to for an appropriation and grant it there is no reason why our library should not extend its influence outside of San Antonio and send books to the towns that ask for them."

COLORADO

Denver. Seven circulating deposit stations of the Denver Public Library have recently been established.

NEW MEXICO

Raton P. L. Myrtle M. Cole, lbn. (Rpt.—yr. ending Sept., 1913.) Total volumes in library 2914. Circulation 11,798; 3966 of this number were from the juvenile department. Total registration 796. Receipts \$4879.04; expenditures \$3648.83.

Pacific Coast

CALIFORNIA

Bakersfield. Work on the new \$25,000 library building was started just before Thanksgiving. The building is to be of brick and concrete.

Beaumont. The trustees of the Beaumont Library district have been notified by the Carnegie Corporation, which has charge of the Carnegie library donations, that the plans for the proposed \$10,000 Carnegie Library here have been approved. The specifications are being drawn and bids for construction of the building will be asked for at an early date. The trustees have purchased three lots at the corner of California avenue and Eighth street as the new library site.

Los Angeles. On recommendation of the board of efficiency, the board of supervisors has denied an application for three additional librarians and one assistant in the county's free library. The bureau reported the appropriation for 1914 would permit the purchase of

3000 books each month, but was not sufficient to warrant additional help.

Los Angeles. The public library held a memorial exhibition in November in honor of the bi-centenary of Father Serra, for many years missionary to the Indians of California and the founder of several of the most important mission posts. Added to the unique collection of books and pictures possessed by the library, many valuable relics were lent by the San Gabriel Mission, the Church of Our Lady of the Angels, the Southwest Museum, and Miss Anna Picher, of the Boundary Stone League. Specimens of early California Indian handicraft, vestments, music scores, missals, and old pictures used at the missions were shown, with authentic information concerning their history.

Merced. By the will of the late Robert Gracey, formerly of Merced, about \$25,000 has been bequeathed to the city for public library purposes.

Oakland P. L. Charles S. Greene, lbn. (35th rpt.—1912-13.) The library has 11 branches and deposit stations in the city besides the main library. In addition there are 15 branches in Alameda county. Accessions: main building 6500; city branches 5494; county branches 3892, besides 620 bought with school money; total number of volumes in city and country 96,941. Circulation for home use, main building and city and county branches, books 533,585; magazines 81,802; grand total 615,387. New registration 7118; total 55,519. Expenditures \$100,516.67; of this sum salaries were \$60,728.47, books \$15,637.56, periodicals \$3681.42, and binding \$1914.97. The library has a staff of 104 regular assistants and 18 substitutes.

Pasadena P. L. Nellie M. Russ, lbn. (Rpt.—yr. ending Je. 30, 1913.) Total volumes in library 39,825. Circulation of main library 191,155; North Pasadena branch 33,706; East Pasadena branch 27,663; total 252,524. New registration 3329. Receipts \$34,333.32; expenditures \$27,336.59.

Pasadena. Miss L. L. Wier has been appointed on the staff of the public library in place of Miss Jessie M. Douglas, and Miss Agnes Wilcox has been appointed on the substitute roll.

Richmond. A reading room for children was opened in the public library the day before Thanksgiving.

Richmond. The new West Side branch was opened Nov. 19, at the library's new quarters in the Flatiron building. The interior has

been thoroughly renovated for library purposes.

San Francisco. M. J. Ferguson, the assistant state librarian, has a brief article on "The Sutro library" in the October number of *Newspapers of California Libraries*. The heirs of the late Adolph Sutro have given to the State Library his collection of books, the principal condition being that they shall be kept in San Francisco. Mr. Sutro gathered especially the books needed by the scholar, and at his death in 1898 had about 250,000 volumes. During the great fire in 1906 more than half the volumes, including a fine collection of Bibles and incunabula, were destroyed. The remaining 100,000, which have never been cataloged, form the present collection.

Santa Clara. The new town hall is practically completed. The public library will occupy the whole of the west side. Besides the main library room there is a small office for the librarian and a committee room for the trustees.

Santa Cruz. In response to a communication sent several weeks ago, F. W. Bliss, one of the trustees of the Santa Cruz Free Library, has received word to the effect that if Santa Cruz will furnish two sites for the location of branch libraries at Garfield Park and Seabright, the Carnegie Corporation of New York will donate \$6000 for building purposes. The library trustees already have the sites, and it is their intention to have the buildings on them remodeled and submit plans to the Carnegie Corporation for their approval.

Visalia. A formal reopening of the Visalia Public Library, which was damaged by fire last June, was held Nov. 10. A short program was given, followed by a reception, and visitors were allowed to inspect the building, which had been thoroughly remodeled. The following evening the children patrons were entertained with pictures and music.

Wilmington Park. Guided and directed by their husbands and brothers, who perform the heavier work, women of Wilmington Park are erecting in their spare time a building to be used as a public library. The structure is on school property and will be a credit to the builders, all of whom are taking great pride in their work. In addition to aiding physically in the construction, the women also have supplied the material for the structure, and when completed will furnish it. After completion the Public Library of Los Angeles will establish a branch library there.

OREGON

Grants Pass. Grants Pass soon will have a free library. Professor R. R. Turner, city superintendent of the schools and commissioner of the library board, has arranged to install books in two rooms in the city hall. A librarian will be appointed and placed upon a regular salary. The rooms will be open from 10 o'clock in the morning until 9 o'clock at night.

Hood River. The new building for the Hood River County Library, erected with an appropriation of \$17,500 from the Carnegie fund, is nearing completion. The librarian, Miss Della Northey, expects to be able to occupy the new home of the institution early this year. The first efforts toward a county library were made by the Hood River Woman's Club, who worked faithfully for a number of years and in the face of indifference on the part of the citizens. To-day the support of the library is generous on all sides. During the year that the library has been opened the number of books on the shelves has grown to 3000 volumes. From the main station in the city, according to the report of the librarian, during the past year 14,372 books were circulated. The new building here will have a room especially equipped for the children. It will have an auditorium for lectures and university extension work.

Klamath Falls. Work on the \$24,000 Carnegie Library building has been started in earnest, and a force of carpenters has commenced the building of the forms for shaping the concrete walls of the structure.

Portland. The old library building on Stark street, between Broadway and Park street, one of the greatest of Portland's landmarks, is to be replaced by a modern five-story building of reinforced concrete, in which will be the largest theater in the city. The library structure was constructed in 1890 by the Portland Library Association at a cost of \$160,000. At that time the association was maintained through fees and dues from membership and did not become a public institution until 1902. The building was of the Italian renaissance style of architecture and was considered one of the most beautiful of the older structures in Portland. It was vacated in September, when the handsome new library building, at Eleventh and Yamhill streets, was opened. The work of demolition has already begun.

Portland. The new brick building at the southeast corner of Milwaukee and Powell streets, erected by W. H. Raabe, is completed

and the Brooklyn Branch Library has its new quarters there. The lower room will be occupied by the library. It is nearly 50 x 50 feet in size and is much larger than the building now occupied. The lights have been arranged from two sides, which makes it much better than the former room. This branch was established in April, 1912, and has been well patronized, the adults being the most numerous to patronize the library. For the year ending with November there were 28,059 applications for books received at the Brooklyn Library. Many books in German, Norwegian and Italian have been called for. This branch is kept open part of Sunday. In the new quarters more books may be kept, the facilities of the library being greatly increased.

St. Johns. The new library building erected on West Charleson and Kellogg streets was thrown open to the inspection of the public Nov. 22, when a large number of people visited the building. Story hours were held in the afternoon at three for small children and at four for the larger children. At 8 o'clock a public reception was held in the library. There was a short program of addresses. The branch library is a one-story structure with basement. The main book room is finely lighted for night reading, and the branch is expected to become a social and educational center for St. Johns. It will be possible to hold lectures and other functions in the new building. Andrew Carnegie provided the money for the building and M. F. Holbrook the site. Miss Mabel Rundall is the librarian in charge.

WASHINGTON

Spokane. The public library will conduct a four-months' training class this winter, at which the librarian and department heads will give lectures, and there will be practical work in the library. Of sixteen applicants for admission only six passed the entrance examinations.

Spokane. The cornerstone of the first of Spokane's branch library buildings was laid on Nov. 15. This, the Heath branch, stands at the corner of Standard street and Mission avenue, and will cost when completed about \$35,000. The Carnegie corporation has given \$70,000 to the city of Spokane for the erection of branch libraries. The cornerstone for the East Side branch building, at First and Altamont streets, was laid Nov. 22, and a third branch in the northwest section of the city will be started next spring.

IDAHO

Boise. An addition of steel and concrete, to cost \$15,000, will be made to the Carnegie Library. The present building, which cost \$25,000, was outgrown several years ago, and negotiations have been going on with the Carnegie Corporation for two years to get the necessary funds for enlargement.

NEVADA

Reno. The public library has about 10,000 volumes, and an average daily circulation of 200. Eighty per cent. of the circulation is fiction, and Hall Caine's "The woman thou gavest me" is the most popular volume at present!

CANADA

Moose Jaw, Sask. An interesting description of the new building opened Aug. 15 is given in the November issue of *Public Libraries*. The building cost \$100,000, and its stacks will accommodate about 30,000 volumes.

Toronto, Can. The Dovercourt Branch Library was opened Nov. 23. It is said to be the finest branch library in the Dominion. The building is U-shaped, and the center of the U is occupied by a court that will form a little garden and terrace, upon which the library reading rooms open and through which the readers will pass to the garden and grounds at the west side of the building. There are two stories in the building. The lower floor, having its entrance on the east side at the level of the sidewalk, is used for the heating plant, the librarian's rest room, kitchen and lavatory, the public lavatories, and a large lecture or club room. The main floor is occupied by the entrance hall, charging counter and two large reading rooms. These three rooms, divided only by large arches and practically covering the whole area of the building, give the impression of one large open area. The walls of the reading rooms are lined with bookcases seven feet high with a capacity of about 10,000 books. There are large fireplaces at the end of each reading room to add to the comfort of the room and to assist in the ventilation. The exterior of the building is of dark red brick and a buff terra cotta, and the roof is covered with an un fading green slate. The heating is by steam, and the main floor is lighted by indirect lighting fixtures. The furniture and woodwork throughout are of oak stained a fumed oak tone, and the main floor is covered with cork matting with the exception of the entrance hall and stairs, which are of marble.

Foreign

GREAT BRITAIN

W. C. BERWICK SAYERS, of the Central Library, Croydon, England, is the author of a little book called "Over some Alpine passes," which shows one of the recreations of an English librarian, and may recall pleasant scenes to many Americans as well.

A COMMITTEE has been formed to collect funds for the erection of a memorial tablet to the late Andrew Lang in the Selkirk Free Library, which he opened in 1889. Subscriptions, which are limited to two guineas, should be sent to the secretary of the committee, Mr. J. Streathearn Steedman, Selkirk.

FRANK JAMES BURGOYNE, librarian of the Lambeth (Eng.) Public Libraries, died Oct. 20 after a long illness. He was originally trained at the Birmingham Public Libraries. About 1879 he became sub-librarian at Newcastle-upon-Tyne. Five years later he was appointed librarian at Darlington; and three years afterwards, in 1887, he became chief librarian of Lambeth, a position he held until his death. When he first went to Lambeth, the Acts had been recently adopted, and the first library was opened in temporary premises, and the whole of the great Lambeth library system grew up under his care.

THE mystery of the whereabouts of the Glenriddell manuscripts of the poet Burns, which were sold by the Athenæum Library of Liverpool last summer and for which a committee of Scots in England and Scotland has been searching, was quickly cleared when Mr. John Gribbel, vice-president of the Philadelphia *Public Ledger*, announced recently that the two volumes were in his possession. He said he had purchased them from a dealer, and added that he would restore them to Scotland forever protected by a deed of trust as a gift to the race which gave Robert Burns to the world.

J. A. CHARLTON DEAS, librarian and curator of the Sunderland (Eng.) public libraries, museums and art gallery, has been making some interesting experiments regarding the feasibility of admitting the blind to the institutions. The results are described in a pamphlet, "How we may show our museums and art galleries to the blind." On Sunday afternoons, when the rooms were closed to the general public, the adult blind were admitted. After a short introductory lecture describing the room to be visited and the objects to be

examined, each visitor, under the charge of his allotted guide, examined the specimens closely. A descriptive card was attached to each article allowing the guide to give complete information regarding it. In this way, on successive Sundays, pictures, animals, birds, geological specimens, a human skeleton, pieces of armor, etc., were examined. The same program was repeated on succeeding Monday mornings for blind children of the Council School, the galleries being closed two or three hours for the purpose. The keenest interest and appreciation was displayed by the guests at these visits, and Mr. Deas suggests that the unused duplicates which most museums possess might be made the nucleus for a special collection to which the blind could have access without the necessity of opening cases and making special preparation.

Bethnal Green. Fifteen thousand pounds has been offered by Andrew Carnegie for a public library on condition that a suitable site be provided for it.

GERMANY

Halle. The vestry of the Marien-Kirche has decided to sell its famous library in order to straighten out its financial affairs. This library consists of 26,000 volumes, and contains also the most complete collection of manuscripts in the handwriting of Martin Luther and his co-reformers. It also possesses the only original death mask of Luther. Most of the books are on theology, and a few of them are said to be worth as much as \$25,000. In spite of tempting offers from the outside, it has been decided to offer the entire library at a comparatively low price to

the city of Halle in order to keep it, if at all possible, "at home."

ARGENTINA

AN American library in Buenos Aires for the promotion and interchange of ideas and greater knowledge of each country is the plan of the Argentine Social Museum, as outlined in correspondence going on now with educational institutions in the United States. There has evidently been wanting in the South American republic some such center, where could be made available information on matters of moment as it finds expression in various publications and reports issued in the United States. To bring about a closer intellectual union between educational leaders north and south, the management of the Argentine Social Museum conceived the idea of sending no less than 10,000 letters to American institutions and editors. The newspapers are asked to contribute their current issues, and in this way it is expected that much misinformation may be corrected before its gets wider circulation.

JAPAN

Yamaguchi P. L. (10th annual rpt.—yr. ending Mar. 31, 1913.) Accessions 4894; total number volumes 39,550. Circulation 236,681, an increase of 43,188 over 1912. The library was open 332 days.

There are 88 libraries in the Prefecture, to most of which traveling libraries are sent, as well as to young men's associations, secondary schools, and other schools. In all 293 sets of traveling libraries, aggregating 17,504 volumes, were sent out to 102 different communities, the circulation numbering 46,818.

THE LIBRARIAN'S MOTHER GOOSE.

I. ORDER DEPARTMENT.

Ding, dong, bell, the order's going well.

Whom did we put in? Mrs. Anna Green.

Whom did we leave out? Alger, no doubt

What a naughty thing was that, to leave poor Alger at the bat.

—*Renté B. Stern.*

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature.

General

Education, Training, Library Schools

LIBRARY INSTRUCTION IN NORMAL SCHOOLS.

Impressions of a transplanted librarian. Mary A. True. *Penn. Lib. Notes*, O., 1913, p. 70-75.

Miss True, librarian of the Clarion State Normal School, found on assuming her duties that many teachers lacked all training on the value of the library as an aid to the school. Consequently she has given a series of weekly talks on classification, shelf arrangement, use of card catalogs, reference books, and periodical indexes. By timely lists of magazine articles, exhibits of post-cards, etc., relative to the various lectures given by teachers, the interest in the library is maintained.

Scope, Usefulness, Founding

SCOPE AND USEFULNESS.

A discussion of the public library. William H. Dixon. *Wis. Lib. Bull.*, O., 1913, p. 163-165.

Wisconsin has a fine library system developed in the form of splendid libraries, rules and regulations, a corps of well-trained librarians, a splendid cataloging system, etc. But the great mass, the majority of our people, have but little spare time and do not use the libraries to any great extent. The recommendation is that the library be taken to these people by some person or persons who understand both the people and books. He takes these books to the people who should read them; shows them how to read; is careful that the books are not lost, and when they are read, sees that they are returned.

— Comparative importance of side lines in the small library. By Flora B. Roberts. *Penn. Lib. Notes*, O., 1913, p. 27-32.

Touches on the amount of time needed, and discusses the relative importance of storytelling, picture and clipping collections, pamphlet literature and its care, picture bulletins and the making of bulletins in general, young people's clubs and exhibits.

— The problem of public leisure. Lutie E. Stearns. *Wis. Lib. Bull.*, O., 1913, p. 162-163.

Summary of paper read at meeting of Fox River Valley Library Association, Oct. 8, 1913. Discusses importance of providing proper entertainment for leisure hours, and calls at-

tention to the service provided for librarians by the educational department of the General Film Company (N. Y.) in supplying lectures, lecturers, machines, operators and films for such subjects as philosophy, religion, sociology, natural science, useful arts, fine arts, literature and history. Closes with a statement of how churches and schools are taking up the problem, and makes a plea for the cooperation of librarians in the work.

— Socialized bibliography. Adelaide R. Hasse. *N. Y. Libs.*, N., 1913, p. 11-12.

Socialization of interests is the dominant characteristic of the times. Where does the library stand in the movement? Its work is primarily with the mature. The only effective means which the stationary library has of getting over to the mature is by bibliography. For every other line of its activity the public must come to it. Socialized bibliography will reduce cataloging to a minimum and will equip every library with a card directory of all persons and organizations in the vicinity interested in a special subject. Library workers, specially trained, will go among these people finding out in advance what help they will need from the library, while their colleagues on the inside will have on file, in an index kept up to date, information compiled from most recent sources—periodicals, society proceedings, and public documents.

The Library as an Educator

LIBRARY AS AN EDUCATOR.

Public libraries: their place in education. William Procter. *The Lib. Assistant*, D., 1913, p. 230-234.

Paper read before the Yorkshire branch of the Library Assistants' Association at Sheffield, Eng., Sept. 17. The mere linking of public libraries with school and college curricula is not enough. Since the larger part of every man's education is what he gives himself, it is for this individual self-administered education that the public library furnishes the opportunity and the means. The great readers of the present generation are the artisans and mechanics. Millions of copies of the world's classics are published and sold to them. Now a drastic revision of policy is needed to make the library a logical response to the demand for self-culture. It is suggested that lending libraries [the class particularly discussed in this paper] limit the purchase of fiction, even at the expense of

circulation statistics, and give more consideration to the intelligent minority of patrons. Coöperation with various voluntary institutions of educational effort is urged, and a raising of the intellectual status of the library assistant.

Library Extension Work

AUDITORIUMS, USE OF LIBRARY.

New regulations governing the use by the public of the auditoriums, which are to be found in nine of the branch buildings of the Brooklyn Public Library, have been recently adopted by the trustees of that institution with the idea of increasing the use of these rooms. Under the new rules the auditorium may be engaged for literary, educational, civic, charitable and social purposes, but may not be used for religious services, political campaigns or business purposes. Music and the serving of refreshments are permitted in these rooms, and they may be kept open until midnight. For meetings open free to the public no charge will be made; for those open only to members of organizations and their invited guests no charge will be made for afternoon use or for evening use to 9 p.m.—the library closing hour—but the fee for evening use beyond that time will be \$2.50. The fees for use of the rooms when admission is charged or when there is a sale of goods, as at a fair, will be \$3 for an afternoon and \$5 for an evening. The study rooms at the branches may be used by study clubs without charge during library hours. A charge of \$1 will be made for such use after 9 p.m.

LECTURES.

Lectures and night classes. By Agnes F. Greer. *Penn. Lib. Notes*, O., 1913, p. 38-40.

Lectures held under library auspices are chiefly valuable for publicity, instruction, and encouraging the use of books. The essentials are a good speaker, an interesting subject, and a suitable time. A suitable room must be prepared, and the lecture well advertised.

DRAMA AND THE LIBRARY.

The large library on the drama now being gathered at Indiana University under the direction of Dr. William E. Jenkins was suggested by Dr. Jenkins as a source for university extension work at the November meeting of the board of directors of the new Indianapolis center of the Drama League of America. A resolution was adopted by the meeting, authorizing Dr. Jenkins to lay the project before the university authorities in the

hope that drama study here and throughout the state, under the direction of the league, might receive a valuable impetus.

EXHIBITS.

San Bernardino Library at the orange show. Carrie S. Waters. *Bindery Notes*, S.-O., 1913, p. 12-13.

The librarian prepared an exhibition of all the books available in the library, or procurable, on the citrus plant and its culture, and a printed booklet containing the list was distributed at the show. Two months were spent in preparation of materials, including the necessary indexing of new as well as old material, but the popularity of the booth at the fair, and the subsequent increased use of the library directly traceable to the exhibit, justify the effort in the mind of the librarian.

—Library exhibits in Los Angeles. *Bindery Notes*, S.-O., 1913, p. 11-12.

Describes two successful exhibits. First, a series of book displays in downtown store windows, adapting the selection of books to suit the special business of the different stores. Second, a display of photographs, paintings and studies of child life, borrowed from the outside, was exhibited in the children's room to attract attention to the work of the juvenile department.

Library Development and Coöperation

LIBRARY COÖPERATION—NATIONAL.

A national lending library for students. *The Library*, O., 1913. p. 353-368.

Discusses a scheme suggested in the *Contemporary Review* for the establishment of a National Loan Collection in England of books sufficient for the purposes of research in all fields of knowledge. The proposal is that the Bodleian, the University Library, Cambridge, the Advocates Library, Edinburgh, and the libraries of four Scottish universities and of Sion College, London, be called upon to lend such books as the new state authority might require, in consideration of their retention of the copyright privilege or the annual grant voted in commutation of that privilege. The writer objects to the element of compulsion here, and goes on to point out that in return for the so-called copyright "privileges" the libraries perform a very real service in their preservation of rare and valuable books. Such books, which cannot be replaced, should not be made liable to call from all parts of the country. Also such ease of access to expensive copyrighted books would result in loss of custom to publishers, and difficulty in getting serious books

published might result. On the other hand, great good might result from increased coöperation between universities and libraries in the use of special collections, as is done in France and Prussia. The National Loan Collection might also act as a depository for volumes rarely used, and might buy books of special and limited appeal that individual libraries cannot afford. The British Museum cannot do the work, as its books may not be circulated. The writer thus sums up his idea of the proper function of this National Loan Collection under three heads: (1) mutual loans, (2) coöperative purchasing, subsequently aided by special subsidies, and (3) gratuitous storage for not wanted books.

LIBRARY COÖPERATION—LOCAL.

Library coöperation in a college town. Walter C. Green. *Penn. Lib. Notes*, O., 1913, p. 66-70.

Gives details of one case of actual practical coöperation. The three libraries of Meadville, Pa., college, theological seminary and public, have exchanged files of magazines and sets of books in an effort to group in each library the publications best suited to its patrons. Lists of magazines subscribed for are printed and exchanged, and each library orders two extra Library of Congress cards for each new book purchased, the extra cards to go to the other libraries.

Founding, Developing and Maintaining Interest

FOUNDING LIBRARIES.

Mrs. Elizabeth Earl, of Connerville, Ind., a member of the Indiana Public Library Commission, is offering twenty cash prizes, aggregating \$150, for the best essays on "Why my community should establish a public library." The contest is to be open only to the school pupils of the ten counties of the state which are without libraries—Warren, Switzerland, Starke, Scott, Pike, Ohio, Jennings, Dubois, Crawford and Brown. The essays must be mailed to the secretary of the Library Commission before Feb. 1, 1914.

LIBRARY ADVERTISING.

The advertiser in the library. By William E. Martin. *Penn. Lib. Notes*, O., 1913, p. 21-26.

To bring book and reader together where the reader is hungry and thirsty for the book is not difficult. It remains to create more readers and students out of the masses of the indifferent. To all associations, educational, religious, industrial, political and social, reading lists of books of value to their special fields, should be sent. To officials and em-

ployes in city departments should be sent notices of material bearing on their problems and policies, and they should be asked to coöperate in indexing and in bibliography. Special rates in all newspapers should be arranged. Teachers in public and Sunday schools, and leaders of women's clubs, should indicate their programs for work, that lists of appropriate books for home-reading may be prepared. The telephone should be widely used, and a multigraph used to print postal card advertisements of new books from plates furnished by publishers.

—The Commercial Club of Omaha, Neb., has given some of its advertising space in the street cars to the public library, to advertise the sub-stations that are now being established by the library in various parts of the city.

COÖPERATION FROM WOMEN'S CLUBS.

What women's clubs have done for libraries. Mrs. Samuel Semple. *Penn. Lib. Notes*, O., 1913, p. 65-66.

Basic service has been to furnish a large body of readers, and having provided the readers, to assist in opening new libraries and maintaining old ones. Spirit of coöperation waiting to be shown ways of service.

Libraries and the State

MUNICIPAL RELATIONS.

The report of the committee on the relations of the public library to the municipality, presented at the Kaaterskill meeting of the American Library Association Council, has been reprinted in pamphlet form, and will be supplied free in reasonable numbers to any librarian or library board where it may be of service. Its use is particularly recommended in cities where the city charter is undergoing revision, or the form of government is changing, or where for these or any other reasons the official position of the library is uncertain or its appropriation insecure.

Library Support. Funds

LIBRARY TAXES.

Justification of a library tax. *N. Y. Libs.*, N., 1913, p. 2-4.

Editorial. Discusses the argument advanced by opponents of a library tax that those who want the library should pay for it, and taxes should only be used where they will be of equal benefit to the whole community. If tax money were to be so applied, there would be no taxation, for there is no public institution, neither schools, museums, parks, highways, public charities nor administrative departments, from which all people

get an equal benefit. But the justification of any tax is that it is levied for the benefit of society as a whole, and not for individuals. A library is entitled to a tax because (1) it helps every institution and every public enterprise of a community; (2) it increases the material value of property within range of service; (3) every good book that goes out from the library carries an influence that promotes thought and intelligence; (4) the library provides the means by which exceptional minds have often found their first awakening; (5) by providing freely healthful, attractive reading, society protects itself from the effects of demoralizing books; and (6) the library thus becomes a means of saving rather than an expense to taxpayers. The degree of benefit is measured by the degree of use, and this depends on the breadth of vision of those in charge. The librarian must consider those who do not use the library, find out why they are absent, and then try to enlarge the service so that they will be drawn in.

Library Buildings

Storage and Shelving

SHELF CAPACITY.

Shelf capacity. W. R. Eastman. *N. Y. Libs., N.*, 1913. p. 23.

An answer to query for rule for estimating shelf capacity in stacks and wall cases. Gives figures for actual number of books a shelf and section will hold, and also necessary space to allow for expansion.

Government and Service

General

ADMINISTRATION OF SMALL LIBRARIES.

Promoting efficiency in the smaller libraries. Mary L. Davis. *N. Y. Libs., N.*, 1913, p. 5-9.

Paper entitled "The incomplete librarian," read at the Lake George meeting, Sept. 25. The balancing of book purchases and library duties and interests of every sort is one of the most delicate and interesting things to be done in the smaller library. In the ideal library the user, the books, and the librarian are in close relation, and this is easier to bring about in a small library than in a large one. Books must be selected with unusual care, and the library made a distributing bureau for the surrounding district. The parcel post will aid in this. Library coöperation might be practised more than it is. The librarian must advertise the ability of the library to supply all kinds of information, tech-

nical as well as literary. He must also be prepared to furnish it to the foreign-born as well as to the American. Displays of prints and wild flowers and collections of relics of local interest help make the small library a place to linger in.

Governing Board

TRUSTEES.

Who and what is the library board? Louis P. Peeke. *Wis. Lib. Bull.*, O., 1913, p. 158-160.

A whimsical treatment of the functions of a library board by a member.

"The library board of the present is composed of certain individuals who are the successors of their predecessors. These persons are not trained librarians, nor are they experienced librarians. They are nothing but creatures concerning whom the law says that they must report to the common council.

"These creatures are money getters, money distributors and expert accountants. They are electors of the librarian, the assistant librarians and the janitor, and also the fixers of salaries. They are selectors and purchasers of books, periodicals and other materials. Exercising the functions of the police, they must take account of the theft, mutilation and injuring of books, periodicals, furniture and equipment. . . . In conclusion, they are ten devoted people who have to support and maintain and constantly improve a mansion or castle equipment on a summer cottage income."

Staff

JUNIOR ASSISTANTS.

The problem of the junior assistant. *The Lib. Assistant*, D., 1913, p. 234-237.

Two communications. In the first A. Cecil Piper considers the problem due to the stagnation in the profession, and consequent slow promotion. When the library profession is properly organized and libraries are established in every town, there will be an increase in opportunity for advancement of junior assistants. In the second letter Arthur Webb assigns the same cause to the problem, but sees no practical remedy until libraries are "nationalized," because under present conditions librarians cannot spend money necessary to improve junior positions.

Administration

Accession

CHEAP BOOKS.

Pages from a Dutch note book. I. The cheap book in Holland. Henry A. Sharp. *Lib. World*, N., 1913, p. 136-137.

The "Publishing Society for Good and Cheap Books" is issuing a "World's Library," to include the best in every school of thought. A price system is adopted that is based on a unit of fourpence, and is increased in multiples of that sum, the maximum being six units, equivalent to two shillings. Editions usually consist of 6000 copies and are often reprinted. The society has been in existence for seven years. It publishes a monthly paper, and twice a year issues a descriptive catalogue. It also arranges lectures and occasional theatrical performances, with reduced prices of admission.

COLLATION.

Irregularities in the make-up of early printed books. W. Bramley Coupland. *Lib. World*, O., 1913. p. 118-119.

The presence of blank half-pages or pages in the letterpress, lack of exact agreement in books of the same edition printed in the sixteenth century, irregularities in watermarks, use of odd title pages or their omission altogether, and omission of pagination, signatures and imprints are mentioned.

Cataloging

CATALOGING CODES.

Cataloguing codes. Maurice H. B. Mash. Part I. *The Librarian*, N., 1913, p. 135-140.

In making this comparison of the Anglo-American Code with Cutter's "Rules for a dictionary catalogue," Mr. Mash says that the primary distinctive difference between the two systems is that the code deals only with author and title entries, while Cutter is a complete code for a dictionary catalog.

The comparison proper is preceded by a brief historical summary of the origin of the two systems. In 1900 a committee was appointed to revise the A. L. A. rules, and in 1902 a similar committee was named to revise the English rules. It was at the suggestion of Mr. Dewey that the two committees united their endeavors and produced the present code, which was published in 1908.

The first edition of the Cutter rules was published in 1876. This was revised and reissued several times, the last edition appearing in 1904. Mr. Cutter explains his reason for undertaking the work in his preface to the first edition, where he states that while there are various rules for an author-catalog, "for a dictionary catalog as a whole, and for most of its parts, there is no manual whatever."

Out of the 174 rules in the code, only eight are printed in two forms, and these all refer to the question "Under what heading is the

reader most likely to look for a book he is in search of?"

Following a comparison of the two sets of rules is an extended comparison of definitions, with many examples cited. A beginning is made of a comparison of the rules dealing with author and authorship heading, taking up the first twenty-two of the Code and the first eighteen in Cutter.

— Catalog rules. *Pub. Libs.*, N., 1913, p. 397.

A statement of six points specially emphasized at the meeting of the catalog section at Kaaterskill.

CATALOGING, COÖPERATIVE.

Local coöperative cataloging. F. Helliwell. *Lib. World*, O., 1913. p. 99-102.

Coöperative cataloging is closely allied to bibliography. Literary workers would rejoice to see a great catalog or bibliography which indexed the world's output of books since the invention of printing. Coöperation in cataloging the books in the world's libraries would be the base of such a project, a coöperative catalog indexing books contained in two or more libraries. A phase of coöperative cataloging likely to receive more attention in the future is the centralization of cataloging work to prevent useless duplication of effort.

In America the Library of Congress receives and catalogs every copyrighted book published in the United States, and all libraries may buy the printed cards resulting. A few years after this was found practicable, Mr. L. Stanley Jast prepared and published a scheme for establishing a cataloging bureau for public libraries of England. It has never been adopted. However, a good "Classified catalogue of books on architecture and the allied arts in the principal libraries of Manchester and Salford," including eleven libraries, was published in 1909. The classification is according to the Dewey system, and letters after each entry indicate the library owning the book. The production of similar coöperative catalogs on the textile industries, mining, shipbuilding and other great industries is urged, by which the usefulness of public libraries will be increased. The establishment of county bureaus, to centralize cataloging, and also other branches of library work, in a given area, is also suggested.

PRINTED GUIDES.

Printed guides for library catalogs. Jean Hawkins. *N. Y. Libs.*, N., 1913, p. 23-24.

Use of Library Bureau guide cards not advocated for small library, being too complicated and also too expensive.

Classification

RECLASSIFICATION.

A problem and a solution. Fannie E. Lowes. *Penn. Lib. Notes*, O., 1913, p. 75-77.

The problem was a non-elastic classification, in which the mistake of fixed location had been made. The solution was started by employing an expert organizer to reclassify the books by the Dewey system and make the shelf-list cards only. The accessioning was done by the librarian, and the handling of the books by student assistants. The library has 23,000 books. In four months and a half 7655 books and thousands of pamphlets were finished. The main catalog, beyond changing the numbers on the cards, will not be touched till the other work is finished.

LIBRARY OF CONGRESS CLASSIFICATION.

The Library of Congress classification. Reginald Ernest Smith. *Lib. World*, N., 1913, p. 130-136.

A paper read before the South Cove Branch of the Library Assistants' Association at Hove, 1913. The paper is divided into three parts: (1) the history of the classification; (2) a description of it; (3) a critical survey of the schedules and notation.

Binding and Repair

BINDING.

Efficiency in the bindery. *Bindery Talk*, S.-O., 1913, p. 1-2.

An editorial discussing materials, methods and workmanship, with some detail. Urges that libraries by adopting some uniform standards of quality of binding materials, of size and thickness of boards for covers, etc., would make it possible for manufacturers to supply "parts prepared ready for use, thus insuring quality of materials, lessening their cost, simplifying labor of assembling, and contributing to better workmanship by the uniformity of material used."

— The A. L. A. bookbinding committee replies. *Bindery Notes*, S.-O., 1913, p. 4-5.

Under this heading is a letter from A. L. Bailey, chairman of the committee, in answer to criticism in *Bindery Notes*. In it he states the purpose of the committee to be to help librarians with definite information about individual binders, rather than to attempt to solve the "bookbinding problem."

— Binding newspapers. *Bindery Notes*, S.-O., 1913, p. 3.

Newspapers for binding should be kept away from heat, light and moisture. A convenient box with a lid is recommended. Better—and cheaper—to subscribe for a duplicate

file than to try to bind worn copies from the reading room.

PAPER.

A talk on paper was the first of a series of illustrated talks on "Bookbinding" being given to the library training class of the Los Angeles Public Library. A synopsis of it is printed in the September-October number of *Bindery Notes*. The methods of manufacture are outlined, qualities of different kinds of paper are discussed, and the basis of durability in paper is indicated.

Shelf

SHELF DEPARTMENT WORK.

A note on the preservation of order on the shelves of an open library. Maud E. Griffiths. *Lib. World*, O., 1913, p. 116.

To prevent the borrower from returning a volume to the wrong place on the shelf after examining, he is handed a marker as he passes to the shelves. The marker is a wooden slip 10 x 3½ in., on which is pasted a printed slip requesting him to insert it in the place occupied by any book taken down for examination.

Care of Building. Janitor Service

LIBRARY HOUSEKEEPING.

Library housekeeping. Bertha Marx. *Wis. Lib. Bull.*, O., 1913, p. 160-161.

Statement of practice in Sheboygan (Wis.) Library. Books are kept upright and stand at extreme edge of shelves. Mending is done once a week and rebinding as often as necessary. All books are returned to shelves every day, and shelves read once or twice a week. Plants are selected with care and kept in good condition. All furniture is washed and rubbed with furniture polish yearly. Floors are swept daily, washed every two weeks, and oiled once a year. All books are thoroughly dusted once a year.

"There is free access to every part of the library, from the reference books upstairs to the unbound magazines filed in well-labeled gray boxes in the basement. The public has little difficulty in finding what it wants because everything has a place. For the same reason the staff can find anything that is called for with ease and rapidity. Quick and efficient service is the result of systematic order.

"I am positive that our very quality of neatness endears us to the public. For instance, when on a snowy day a broom is kept in the lobby, every one seems glad to brush the snow from his shoes before entering the reading room. On a rainy day the paper we wrap

about the books, to protect them as we give them out, is much appreciated."

Libraries on Special Subjects

BUSINESS LIBRARIES.

The income of the Frank Murphy \$10,000 bequest to the public library at Omaha is to be expended for books that will be of value to the business man.

MEDICAL LIBRARIES.

About 300 of the newest and most authoritative medical books have been brought together for reference use in the public library at Newburgh. The idea of the reference library for physicians originated among the medical men of Newburgh, and each physician places on the shelves one volume annually, the works to be shelved being designated by a committee. It will be to the medical profession what the law library is to the attorneys. The room is not open to the visitor, except on application to the librarian, who will supply the key.

General Libraries

For Special Classes

BLIND, READING FOR THE.

The Chicago Public Library, in coöperation with the Conference of Jewish Women's Organizations, initiated a series of readings to the blind in all the branches of the public library early in December. The names of 200 blind persons were collected by the committee in charge and invitations to attend the meetings were sent to them.

PRISON LIBRARIES.

The selection of books for prison libraries. Florence Rising Curtis. *Pub. Libs., N., 1913, p. 367-370.*

The men and women in prisons are reading from three to five times as many books as are the people in any community where libraries are easily accessible. Along certain lines books will furnish information of special value to the prisoner. Those on business, agriculture and the trades are available in many prisons and are eagerly read. Books designed to teach English to the foreign-born, arithmetics, scientific books, geographies, and histories are also valuable. Prisoners are peculiarly dependent on books for their recreation, but the libraries in many of our prisons are so largely the result of a lack of intelligent aim and wise selection that many of the books must have a bad influence upon the prisoners. Trashy novels, modern novels of

the school represented by Robert Chambers, the endless—and worthless—series of boys' books like "The Darewell chums" and "The Rover boys," novels making criminals attractive, and hosts of detective stories, are all to be found in prison libraries, and all are harmful. There are also books of a more serious nature, written to advance a theory or teach a doctrine, which are dangerous because of their bias.

FOREIGNERS, WORK WITH.

A new library activity. *Pub. Libs., N., 1913, p. 371.*

An outline of the work just inaugurated by the Public Library Commission of Massachusetts among the foreign-born. A director has been appointed who will endeavor to place books in foreign languages and in simple English where aliens will have easy access to them, and traveling libraries in foreign languages will be started.

—Miss J. M. Campbell, director of educational work for aliens under the Massachusetts Free Public Library Commission, in an address before the literature and library extension committee of the Massachusetts State Federation of Women's Clubs, summed up the work of her department as follows: "The only way we can reach large colonies of foreigners is by placing in their hands certain facts of our history, ideals of American life and some knowledge of our standards of living in their own language. Many of them are too old to acquire a new language, and we want to reach them through our libraries. It will be necessary to make a survey of the different sections, and the clubs can help, not only by seeing to it that there are books of practical value in foreign languages, but that the foreigner, for whom they are intended, knows that they are available. It is patriotic work and an opportunity to inspire and help them to receive high ideals of American citizenship."

School Libraries

SCHOOL LIBRARIES.

District school libraries and the rural library problem. *N. Y. Libs., N., 1913, p. 12-13.*

Report presented at the Lake George meeting of the N. Y. L. A. in September by the committee on reading in rural communities. A questionnaire was sent to the 207 district superintendents, of whom 112 replied, representing 5626 schools. All but 52 have libraries, averaging from 50 to 200 volumes; 4015 libraries are free to public, but few are so used.

All districts use the list issued by the School Libraries Division. In many districts children receive certificates for reading from 3 to 10 books each year. In 564 schools help is received from the nearest library. Clubs covering two or more counties have been formed by superintendents for discussion of work. Why should not librarians attend these meetings and superintendents attend library meetings, making good books more accessible to rural communities?

Reading and Aids

Work with Children

CHILDREN, WORK WITH.

Club work with boys and girls. By Emma R. Engle. *Penn. Lib. Notes*, O., 1913, p. 36-38.

To attract and hold the boys and girls from fourteen to eighteen, who are employed during the day, the Philadelphia library founded its self-governing clubs. Committees from the clubs confer with the leaders at first as to selection of material to be used for reading, and later formation of debating clubs usually follows.

—A concerted effort is to be made by the school authorities, assisted by the teachers and the officials of the Providence Library, to increase the interest of pupils in the local elementary schools in independent reading. A committee consisting of one teacher from each of the primary and grammar grades has been chosen by the teachers to go through the children's books at the library and compile the requisite lists. As fast as these lists are completed, they will be printed and distributed among the school children. There will be general lists and special lists for the work of each grade. The books on these lists will be kept in the children's room at the library, where they may be consulted at any time, and other copies will be available for loan purposes with the use of a student's card. The school authorities are of the opinion that children, especially in the grammar and high schools, need but little encouragement to do considerable reading outside their school work. They believe also that the best way to provide this encouragement is to make up handy lists of books on different subjects, which will indicate to the children which books they will find most useful and most interesting. A list of history references, giving the author, title and library number of nearly 100 children's books on historical subjects, has already been compiled and issued in printed form, and reference lists on many

other subjects will be made up within a short time.

—Pertinent questions relating to what libraries may do for children are given in the last *A. L. A. Bulletin* as follows: Are we placing our attractive children's rooms, clean and orderly, adorned with flowers and fine pictures, where they may be readily seen from the street, where picture books placed in the windows may vie in alluring powers with the nickel-novel window displays? Is it not possible for the library to make permanent whatever good, though fleeting, impression may be made by educational pictures or pictures from great books, by cooperating with the picture shows and being ready to supply to the children copies of the stories, nature books, or histories to which the children may have been attracted by the motion pictures? The hours when working children, those engaged in gainful occupations, and those who are helping in the homes, are free for recreation, are in the evening and on Sunday. Are we placing our most skilled workers on duty at these times, and are we opening our story hours and reading clubs on Sunday afternoons, when these children are most receptive of good things, when the children are dressed in their good clothes, their self-respect is high and they are free from responsibility?

CHILDREN'S READING.

Children's books for Christmas purchase. Marion Humble. *Wis. Lib. Bull.*, O., 1913, p. 165-171.

A list of books suitable for Christmas purchase, containing chiefly books of permanent value that every child should own. The books are classified under the headings: For little children, Picture books, Song books, For older children, Books for girls, Books for boys, and Series. Author, title, publisher and price are given in each case, as well as a keyed reference to such lists as the *A. L. A. catalog and Booklist*, where descriptive annotation may be found.

STORY TELLING.

The story hour. By Helen G. Betterly. *Penn. Lib. Notes*, O., 1913, p. 32-34.

If the motive of having a story hour is to advertise the library, then let the librarian go to the schools. The ideal story hour is where the children gather round the story teller in an easy group and listen with spontaneous feeling to the tale. This, if it can be arranged without a disproportionate expenditure of time and labor, should be attempted in an effort to accomplish as much good for

the child as possible, and to accomplish it by means of books.

— A story-telling contest for children is soon to be inaugurated in the public library at Fort Worth, Tex. Books will be given to the two children who tell the best stories. They must make their own selection of tales, and be prepared to give their reasons for their choice.

PHONOGRAPH.

A new story-teller. *Wis. Lib. Bull.*, O., 1913, p. 179.

Tells how a phonograph is used in a Milwaukee library for the story hour.

AMATEUR THEATRICALS.

Folk-tales and other stories which may be dramatized and played by children. *Bull. of Carnegie Lib. of Pittsburgh*, D., 1913, p. 506-508.

A list arranged to bring first on the list those for youngest children and those most easily dramatized.

Literary Methods

General

MAGAZINES, SIZE OF.

Magazines. M. F. C. *Wis. Lib. Bull.*, O., 1913, p. 178.

Discussion of the relative merits of the large and small page, occasioned by the recent change in format of several leading weeklies. From a librarian's point of view.

Library Appliances

LIBRARY SUPPLIES.

A list of good places to buy library supplies, recommended by the older libraries of California, is printed in the October number of *News Notes of California Libraries*.

Bibliographical Notes

THE paper on "Efficiency and bibliographical research," which Mr. Aksel G. S. Josephson, of the John Crerar Library, read at the January (1913) meeting of the Bibliographical Society of America, has been reprinted in pamphlet form. During the months of January, February and March, 1914, Mr. Josephson will give a series of lectures in the John Crerar Library on bibliography and the use of reference books, as part of a course of lectures on "Books and libraries."

At the meeting of the American Library Institute in New York, on Dec. 1, M. Paul Otlet, secretary of the Union of International Associations, exhibited one of the new motion-

picture books. Dr. Otlet took the four hundred page book from his pocket, where men generally carry watches—a tiny roll two inches in length and an inch in diameter. The new invention is called a Biblophote and was perfected by Robert Goldschmidt and Dr. Otlet. The film is introduced into a small machine and the pages, magnified 500 times, are thrown on a screen.

THE University of Illinois Library has recently issued a 20-page bulletin entitled "Books of Jewish interest in the Library of the University of Illinois." This list, compiled by Dr. D. S. Blondheim, of the Romance department of the University and prepared for the press by the library staff, contains some five hundred titles alphabetically arranged, and is intended mainly to help those using the University library who may be interested in Jewish literature and history, and who may have difficulty in finding all the books on that subject now in the library. For this reason call numbers are given with each title. The nucleus of the collection is formed by the books bought during the past year from the fund given for this purpose by District Grand Lodge No. 6 of the Independent Order of B'nai B'rith; there have been added a number of books presented to the library by individual members of the same order, and a number purchased by the library, so that a very good beginning of a collection of Jewish books has been made.

Recent Bibliographies

GENERAL

FITZPATRICK, John T. Recent New York state publications of interest to libraries. *N. Y. Libs.* N., 1913, p. 15-16.

- A selected list of books [in the New York Public Library] on engineering, industrial arts and trades. New York, 1913. 81 p. Q.
- THEOLOGY.** Catalogue of books in theology and its neighbourlands: English and foreign. Part 1. A-Bible-Ha. London, Henry Sothran & Co., 1913. 64 p. O.
- Bücher-Katalog 360. Historische Theologie, enthaltend u. a. die umfangreiche Bibliothek eines sehr bekannten Leipziger Theologen. Leipzig, Otto Harrassowitz, 1913. 174 p. O.
- A catalogue of miscellaneous theological books. London, Charles Higam & Son, 1913. 40 p. O.
- TRAVEL.** [Catalogue of] voyages and travels, topography and heraldry, natural history. London, Maggs Bros., 1913. 192 p. O.
- TYPEWRITER.** Gamble, William B., *comp.* List of works in the New York Public Library relating to the development and manufacture of typewriting machines. New York, 1913. 18 p. Q.
- VEGETABLES.** Books on vegetable gardening. Library leaflet no. 4, issued by the Massachusetts Agricultural College. Amherst, Mass., 1913. O.
- VETERINARY MEDICINE.** Lauder, G. D. Veterinary toxicology. Chicago, A. Eger. 12+312 p. (3 p. bibl.) O. hf. leath., \$2.50 n.
- VOCATIONAL GUIDANCE.** Vocational guidance; a selected list for parents, and teachers and pupils of the Fitchburg High School. Fitchburg, Mass., Public Library, 1913. 3 p. Q.
- WESTERN STATES.** [Catalogue of] books and pamphlets relating to the western states. New York, Daniel H. Newhall, 1913. 30 p. O.
- WILLIAM II.** Catalogue of a collection of books relating to Emperor William II. of Germany, presented to the New York Public Library by Dr. John A. Mandel. (In *Bulletin of the New York Public Library*, November, 1913. p. 869-875. Q.)
- WISCONSIN.** Thwaites, Reuben Gold, and Nunn, Annie Amelia. Check-list of publications of the [State Historical] Society [of Wisconsin]. 56 p. O.

Dumors and Blunders

CATALOGS AS THEY ARE MADE

The following titles are taken verbatim from the typewritten catalog of the library of one of the state prisons in this country:

Allen. The middle of the pasture.

— Choir invincible.

Bennett. Dewey the audacious [George or Melvil?]

Phelps. The struggle for immorality.

Barrie. A widow in Thrums.

Field. Love affairs of a Biblemaniac.

Hugo. The hunch of the Notre Dame.

Mitchell. The pines of glory.

Ray. The dominant stain.

Kingston. Peter the wailer.

Stoddard. The sword makes the son.

— Crowded out o' Cornfield.

Thanet. Knitters in the Seine.

Vance. The destroying angle.

Zangwill. The celebrates club.

Lamb. Assays of Elia.

LIBRARY EXAMINATIONS

From time to time Edmund Lester Pearson, who conducts the "Librarian" column which appears every Wednesday in the Boston *Transcript*, lightens the tedium of routine work by preparing new items of interest relating to the Ezra Beesly Free Public Library of Baxter. Such an item appeared in a November issue, in the form of an advertisement for a library assistant, to which was appended a sample list of questions such as the applicant might be expected to answer. We reprint the advertisement and examination paper, together with the answers as published about a month later:

LIBRARY ASSISTANT WANTED. Only those with a knowledge of English fiction need apply. Examination of candidates will be held Monday, Nov. 17, at 9 a.m. For permission to take the examination address, enclosing references, the Ezra Beesly Free Public Library of Baxter.

(Note.—As this examination is held to fill a vacancy in the fiction department, the paper will contain questions on fiction alone. A specimen paper, for the guidance of candidates, is printed below by courtesy of the *Transcript*.)

FICTION EXAMINATION

(Read the paper carefully. Remember that some of the questions may have more than one correct answer. Full credit will be given for any answer which is correct.)

1. In what work of fiction does the illustrator introduce a portrait of the author (a celebrated writer) under fire?

2. Name three novels which have for their central theme the artificial production of gold.

3. Name novels in which the following personages have been supposed to be portrayed in disguise: (a) Elbert Hubbard; (b) S. S. McClure; (c) Grover Cleveland; (d) Oscar Wilde; (e) Leigh Hunt; (f) John D. Rockefeller; (g) King Edward VII.; (h) Professor Charles Townsend Copeland; (i) Whistler; (j) Benjamin Disraeli; (k) Rudyard Kipling; (l) R. L. Stevenson.

4. What novel takes its title from the name of a cake?

5. In what works of fiction do the following characters appear: Sailor Ben? Godfrey Ablewhite? Miss Pross?

6. What work of fiction so closely imitated a biography as to be classified and cataloged with the biographies in a number of libraries?

7. The titles of what two novels occur, without important change, in Cowper's poem on Alexander Selkirk? (The poem beginning "I am monarch of all I survey.")

8. Name four novels which have much to do with prize-fighters and prize-fighting.

9. The plot of what novel hinges on the difference between the Russian calendar and that used in England, i.e., between the Julian and the Gregorian calendars?

10. Of what novel, by a New York editor, was it asserted in a literary monthly that it had been "suppressed" or boycotted by some mysterious influences, because offensive to capitalism?

11. What novel contains, as padding, an interesting account of the Zulu war?

12. What novelist appears to hold the record for titles taken from Shakespeare?

13. What recent novel of New York life is said to contain many real characters, thinly disguised; to deal with actual incidents of recent occurrence; and even to report genuine conversations between the characters?

These are the answers to the fiction examination:

1. Kipling's "Stalky & Co."

2. "The golden bottle," by Ignatius Donnelly; "The golden flood," by Edwin Lefevre; "The doings of Raftles Haw," by A. Conan Doyle.

3. (a) "Tole," by Robert W. Chambers; (b) "The wrecker," by R. L. Stevenson and Lloyd Osbourne; (c) "The Honorable Peter Stirling," by P. L. Ford; (d) "The green carnation," by Robert Hichens; (e) "Bleak House"; (f) "The metropolis," by Upton Sinclair; (g) "An affair of state," by J. C. Snaith; (h) "The diary of a freshman," by C. M. Flandrau; (i) "Trilby," as published serially; (j) "Quisante," by Anthony Hope; (k) "The adventurer," by Lloyd Osbourne; (l) "The amazing marriage," by George Meredith.

4. "Lady Baltimore."

5. "The story of a bad boy"; "The moonstone"; "Tale of two cities."

6. "Life of John William Walshe," by Montgomery Carmichael.

7. "In the midst of alarms," by Robert Barr; "The wings of the dove," by Henry James.

8. "Cashel Byron's profession," by Bernard Shaw; "Rodney Stone," by A. Conan Doyle; "The virgin in judgment," by Eden Phillpotts; "The valley of the moon," by Jack London.

9. "Tristram of Blent," by Anthony Hope.

10. "The silent war," by J. A. Mitchell.

11. "The witch's head," by H. Rider Haggard.

12. W. D. Howells.

13. "Comrade Yetta," by Albert Edwards.

CAROLINE M. HEWINS,
Librarian Hartford, Ct., Public Library

THE LIBRARY JOURNAL

89.

VOL. 39

FEBRUARY, 1914

No. 2

THE decision to hold the A. L. A. conference of 1914 in Washington, May 25, will acquaint librarians with the great changes at the national capital since the previous conference, a generation ago, in 1881. Foremost among these from the professional point of view is the development of the Library of Congress into a truly national library of first importance, ranking now third in the world in number of volumes and first in administrative efficiency and national service; second is the development of departmental and special libraries in proximity to the national library and supplementing its equipment and its work. Although originally for the use of Congress and still under its ultimate control, this great library is now a thoroughly national institution of the widest scope, and possibly the meeting in Washington will be the proper occasion for emphasizing the general feeling of the library profession that it should be called the National Library. No other national library is in such a vital relationship with the libraries of its own country, for the card cataloging of the Library of Congress, which saves to the libraries of the country many thousands of dollars beyond the cost of the system, is only one of the several fields in which it is in vital touch with individual libraries throughout the country. It is therefore most fitting that the meeting at Washington should be made the occasion of thorough acquaintance by visiting librarians with the methods of the national library and of certifying to Congress and to the country its appreciation of the great function in the public service which the library is achieving.

At the Ottawa conference of 1912, librarians from this side of the border were much interested in the plan for the similar development of a national library out of

the Parliamentary Library at Ottawa. A curious alternative has now been proposed in a scheme for postal libraries, which has attracted some attention in the Dominion. This would replace a public library system of the kind which most countries are developing, with a chain of libraries in the post offices throughout the country, for which the projector proposes an initial investment of ten million dollars for books and five million for equipment. The idea is certainly philanthropic, but if such a plan were experimented with, it would probably meet the fate of the district school libraries of New York state a generation ago. To develop a library means something more than to put some books on shelves and send them out by post; and large as the postal library scheme seems, it would scarcely prove effective in real result.

THE A. L. A. committee on the Leipzig exposition is now fully assured that adequate space will be assigned for the American exhibit as a part of the comparative library exhibit, whether the United States provides a separate building or not. Mr. Hill, chairman of the committee, has been authorized by the trustees of the Brooklyn Public Library to provide through volunteers from that library for preparing the exhibit, and room has been assigned for that purpose. About \$2000 has been secured toward the \$3500 which the committee will need, and it is urgently desired that libraries as such and members of the A. L. A. personally will contribute in larger or smaller measure toward making adequate provision for the general expenses which will necessarily be incurred.

ONE of the pleasantest features of "Library week" at Lake George in 1913 was the welcome given to Miss Hewins,

that typical New England woman, whose sympathy with children and child life has made this relation of her public library work a type and model for all who have to do with children. Probably the credit of the initiative work for children within a public library should remain with Mrs. Sanders of the Pawtucket Library, who made the small folk welcome a generation ago, when, in most public libraries, they were barred out by the rules and regulations and frowned away by the librarian. Miss Hewins took up her special work some years later, independently of Mrs. Sanders' initiative, and with little more than casual knowledge of it; and to-day she is recognized as still the apostle of the children's library movement. The key to her success has been the touch of personality, which makes each child a friend, and no knowledge of formal method and of other people's experience will ever compensate for this. Miss Hewins' paper was really a delightful bit of library autobiography, and she has now happily acceded to a request from the JOURNAL to fill out the outlines into a more complete record. Her pleasant story is altogether too fruitful of suggestion to be confined to auditors from one state alone.

NEW JERSEY, in common with the library profession at large, has suffered a double loss which may sadly retard her remarkable library progress. The death of W. C. Kimball, who had been from its beginning the chairman of the New Jersey Public Library Commission, removes from us one of the few laymen who have been as important in library work and progress as professional librarians, a man who made every man and woman in the library profession his friend. His genial presence at library meetings will be sorely missed; but New Jersey will even more miss his wise and public-spirited direction of library development in his state. At this critical time comes also a

second blow to the Commission and the state in the failure of the governor to reappoint the experienced state librarian, Mr. Buchanan, who had been secretary of the Commission, and his replacement by a gentleman, Mr. Dullard, known in political rather than in library relations.

WITH the present volume of the LIBRARY JOURNAL, its editorial personnel has been rearranged in such wise as will, we trust, result in enhancing the value of the JOURNAL to its readers. Mr. Fremont Rider, of the New York Library School class of 1907, and of previous library experience, who has been for some time editorial manager of the publications of this office, will as associate editor of the LIBRARY JOURNAL now give more attention to the JOURNAL and take a larger share of its responsibilities, and to him our readers are chiefly indebted for the improvements in typography and arrangement, which have already elicited cordial commendation from many friends. Miss Florence A. Huxley, recently of the printing department of the New York Public Library, who has had the office desk of the LIBRARY JOURNAL for some weeks past, will continue in that position, and with increasing experience will be able to make the JOURNAL more adequate and accurate than during the changes of recent months. Material sent to the JOURNAL should preferably be addressed to the LIBRARY JOURNAL, Editorial Department, rather than in any personal name, except in cases where there has been personal correspondence. Our library friends are particularly requested to send news and descriptive material promptly in advance of printed publication, and in the case of library reports, etc., to send advance proofs or duplicates of typewritten copies, that the JOURNAL may in no case have to depend upon less reliable information culled from the general press.

HOW LIBRARY WORK WITH CHILDREN HAS GROWN IN HARTFORD AND CONNECTICUT

BY CAROLINE M. HEWINS

NOT long ago I went into the public library of a university town in England and established confidence by saying, "I see that Chivers does your binding," whereupon the librarian invited me inside the railing. A boy ten or twelve years old was standing in a Napoleonic attitude, with his feet very far apart, before the fiction shelves, where the books were alphabetized under authors, but with apparently nothing to show him whether a story was a problem-novel or a tale for children. My thoughts went back many years to the days when I first became the librarian of a subscription library in Hartford, where novels and children's stories were roughly arranged under the first letter of the title, and not by authors. There was a printed catalog, but without anything to indicate in what series or where in order of the series a story-book belonged, and it was impossible when a child had read one to find out what the next was except from the last page of the book itself or the advertisements in the back, and they had often been torn out for convenient reference.

My technical equipment was some volunteer work in a town library, a little experience in buying for a Sunday-school library, and about a year in the Boston Athenæum. The preparation that I had had for meeting children and young people in the library was, besides some years of teaching, a working knowledge of the books that had been read and re-read in a large family for twenty-five years, from Miss Edgeworth and Jacob Abbott, an old copy of "Aesop's fables," Andersen, Grimm, Hawthorne, "The Arabian nights," Mayne Reid's earlier innocent even if unscientific stories, down through "Tom Brown," "Alice in Wonderland," *Our Young Folks*, the *Riverside Magazine*, "Little women," to Scott, Dickens, Thackeray, George Eliot, Charlotte Brontë and Mrs. Gaskell. These books were in the Hartford Young Men's Institute, but they

were little read in comparison with the works of the "immortal four," who were then writing series at the rate of two or more volumes a year—Optic, Alger, Castlemon and Martha Finley—and still refuse to be forgotten. The older girls demanded Ouida, a new name to me, but I read some of her novels before I had been in the library many weeks, and remember writing a letter to a daily paper giving an outline of the plot of one of them as a hint to fathers and mothers of what their school-girl daughters were reading. I think that there was something about boys, too, in the letter, and a plea for "Ivanhoe" and other books of knightly adventure.

The Young Men's Institute Library in Hartford was a survival from the days of subscription libraries and lecture courses. The city had then a population of about fifty thousand, of whom some five or six hundred were subscribers to the library, paying three dollars for the use of one book at a time or five dollars for two, including admission to the periodical room. Hartford had a large number of Irish inhabitants, some Germans, a few of whom were intelligent and prosperous Jews, a few French Canadians, possibly still fewer Scandinavians. It was several years before the first persecution of the Russian and Polish Jews sent them to this country. In the year when I came, 1875, there were forty-six boys and girls in the high school graduating class, all, from their names and what I know of some of them, apparently of English descent, except one whose name is Scotch.

The class which was graduated last June had about 650 members on entering, and 250 at the end of its course. Among the names are Italian, Hebrew, Swedish, Irish, German, Danish, Spanish, Bohemian, Armenian—the largest percentage from families not of English descent being Hebrew.

It is fair to say that at least half of the boys and girls of the earlier graduating

class, or their families, had library subscriptions, but little use of the library was recommended even by the high school teachers, and none by the teachers of the graded schools. How could there be? Five dollars is a large sum in most families, and children at that time had to read what they could get at home or from the Sunday-school libraries, which were no better nor worse than others of the period.

The first effort that I remember making for a better choice of books was showing the library president some volumes by Thomes, a writer for the older boys, whose stories were full of profanity and brutal vulgarity. There was no question about discarding them and some of Mayne Reid's books like "The scalp hunters" and "Lost Lenore," which are much of the same type, very different from his earlier stories, and in a short time we did not renew books by some other authors, but let them die out, replacing them if possible by stories a little better, giving preference to those complete in themselves.

Within a short time, in 1878, we began to publish a quarterly bulletin. In the first number "Library notes" begins: "Much time and thought have been given to suggesting in this bulletin good books for boys and girls. As a rule, they read too much. Our accounts show that one boy has taken 102 story-books in six months, and one girl 112 novels in the same time. One book a week is certainly enough, with school studies. Within the last month one boy has asked us for Jack Harkaway's stories, another for bound volumes of the *Police News*, and a third for 'The murderer and the fortune teller,' 'The two sisters and the avenger' and 'The model town and the detective.' These are not in the library and will not be. The demand for girls for the *New York Weekly* novels is not small. We shall gladly cooperate with fathers and mothers in the choice of children's books."

Of what we now call nature-books there were very few written or well illustrated for children, though the library had John Burroughs, Harris's "Insects injurious to vegetation" and Samuels's "Birds of New England and the adjacent states." There was little interest in out-of-door study, and

I have never forgotten the contempt on the face of one boy when instead of Mayne Reid's "Boy hunters," which was out, he was offered "The butterfly hunters," or the scorn with which he repeated the title. All that is changed, thanks to the influence of schools and teachers, and children are no longer ignorant of common birds and insects. *St. Nicholas* helped in opening their eyes, when a librarian, Harlan H. Ballard, of Pittsfield, organized the Agassiz Association with a monthly report in the magazine. We had a chapter, Hartford B., that met for years out of doors on Saturday mornings through the spring, early summer and autumn, and even through one winter when some specimens of the red-headed woodpecker were on the edge of the city. Usually our winter meetings were in the library, and we often had readings from Burroughs, Thoreau, Frank Buckland and others of the earlier nature-lovers. The children came from families of more than usual intelligence, and some of them who now have well-grown children of their own often refer with pleasure to our walks and talks.

I had taught for three years in a school where the children and I were taken out of doors every week in spring and autumn by an ornithologist and an entomologist. At this time we were beginning to buy more books on out-of-door subjects, and I had learned enough in my teaching to be able to evaluate them in a bulletin.

The years went on, with once in a while an encouraging report about a boy who had made experiments from works on chemistry or beguiled a fortnight's illness with Wordsworth's "Greece," or Guhl and Koner's "Life of the Greeks and Romans," or had gone on from Alger and Optic to Cooper, Lossing, Help's "Life of Columbus" and Barber's "History of New England." Both boys and girls were beginning to apologize for taking poor stories.

In one of our bulletins, January, 1881, is an acknowledgment of Christmas material received from the advance sheets of *Poole's Index*, then in preparation in the Watkinson Library, on the other side of the building. Imagine life in a library without it, you who have the *Readers' Guide* and

all the debates and *Granger's Index to Poetry* and the *Portrait Index!* Nevertheless, we were not entirely without printed aids, for we had the Brooklyn catalog, the Providence bulletins, and lists of children's books prepared by the Buffalo and Quincy libraries.

In 1882, at the request of Frederick Leyboldt, editor of the *Publishers' Weekly*, I compiled a list of "Books for the young," some of which are of permanent value. In a second edition, in 1884, I reprinted from our bulletin a list of English and American history for children, between twelve and fifteen, based on my own experience with boys and girls. I can laugh at it now, after years of meeting child-readers, seventy-five per cent. of whom have no books at home, and can also find food for mirth in my belief that a list of books recommended for vacation reading in another bulletin would attract most boys and girls under sixteen.

One school, under a wise and far-seeing principal, who is now an authority on United States history and the author of several school books on the subject, had in 1884 an arrangement with us for a supply of historical stories for reading, and we printed a list of these and of other books on American history which would be interesting if read by or to the older pupils in the grammar grades.

Sets of fifty copies each of books for supplementary reading in school were bought by the library in 1894, and apportioned by the school principals at their monthly meetings. Several new sets were bought every year till 1905, when the collection numbered about three thousand, and was outgrowing the space that we could spare for it. The schools then provided a place for the school duplicates, and relieved the library of the care of them. Since 1899 the graded schools have received on request libraries of fifty books to a room, from the third grade to the ninth, to be kept until the summer vacation, when they are returned for repairs and renewal. The number circulated during the school year has grown from 6384 in 1899-1900 to 17,270 in 1912-13. The children's applications are sent to the main library, and no

child may have a card there and in a school branch at the same time.

There were rumors for several years that the library would be made free, and when it was at last announced in 1888 that \$250,000 had been given by the late J. Pierpont Morgan, his father and two families related to them, on condition that \$150,000 more should be raised by private subscription to remodel the Wadsworth Athenæum, which then housed three libraries and a picture-gallery, and to provide for its maintenance, the rumor bade fair to come true. That the money came in, is largely due to the personal efforts of Charles Hopkins Clark, editor-in-chief of the *Hartford Courant*, for many years treasurer of the Athenæum, the Watkinson Library and the Hartford Public Library, and the sum required was promised in 1890. Later the library offered the free use of its books, and also the income of about \$50,000 to the city, on condition of keeping its form of government by a self-perpetuating corporation.

The first step towards the enlarged use of the library was to separate the children's books and classify them. We had had a fixed location up to that time, and I had not yet broken loose from it, but I numbered them according to the best light I had, though in a very short time I saw that with the increased number of duplicates we had to buy, only a movable location was of the least practical use. It was several years before the Dewey classification was finally adopted for the children, although we classified our grown-up books by it before we opened to the public.

When the library became free, in 1892, the annual circulation of children's books rose at once to 50,000, 25 per cent. of the whole, and as large as the largest total in the subscription days. We immediately had to buy a large supply of new books, carefully chosen, and printed a too fully annotated list, which we found useful for some years and discarded when we were able to open the shelves. We had only a corner for children's books, almost none for children under ten, and no admission to the shelves. We struggled on as well as we could for the next few years.

A dialogue between a reader and the librarian in 1897 shows what we were trying to do at this time. It is really true, and illustrates the lack of knowledge in one of the most intelligent women in the city of the many points of contact between the library and the boys and girls of the city.

Reader: "There ought to be somebody in the library to tell people, especially children, what to read."

Librarian: "Have you ever seen the children's printed list, with notes on books connected with school work, and others written for older readers but interesting to children, hints on how and what to read, and a letter R against the best books?"

Reader: "No, I never heard of it."

Librarian: "It was ready the day after the library opened, was sold for five cents, and the first edition of a thousand copies was exhausted so soon that a second had to be printed. Have you ever heard of the lists of interesting books in connection with Greek, Roman and English history given to high school pupils, or the records kept for years by the North School children of books which they have read, and sent to the librarian to be commented on and criticised in an hour's friendly talk in the school room, or the letters written on the use of the library by pupils in the other schools?"

Reader: "No."

Librarian: "Have you ever seen the lists of good novels for boys and girls growing away from books written for children and also a list of interesting love-stories for readers who have heard of only a few authors?"

Reader: "No."

Librarian: "Have you ever noticed the printed lists of new books, with notes, hung on the bulletin board every Monday?"

Reader: "No."

Librarian: "Do you know that the library has twelve hundred volumes of the best books by the best authors, fifty of each, for use in the public schools?"

Reader: "No."

The library opened in 1895 a branch for children in the Social Settlement, and in 1897 reading rooms in connection with vacation schools, established by the Civic Club

and afterwards taken in charge by the city.

The Educational Club, an organization of parents, teachers and others interested in education, began in 1897 with very informal meetings, suggested by the school section of the Civic Club, which were held in my office for three years, until they outgrew it and needed a more formal organization. The directors of the Civic Club and managers of the Social Settlement have met there for years, and the Connecticut Public Library Committee found it a convenient meeting place until it seemed better to hold sessions in the Capitol, where its office is.

The history classes of the North School, of whose principal I have spoken, used to make a pilgrimage every year to points of interest in the city, ending with an hour in the rooms of the Historical Society in the building, where they impersonated historical characters or looked at colonial furniture and implements. After the hour was over they used to come to the office for gingerbread and lemonade, which strengthened their friendly feeling for the library. This lasted until the principal went to another city.

In 1898, in a talk to some children in one of the schools just before the summer vacation, I asked those who were not going out of town to come to the library one afternoon every week for a book-talk, with a tableful of books such as they would not be likely to find for themselves. The subjects the first year were:

Out-of-door books and stories about animals, Books about Indians, Travellers' tales and stories of adventure, Books that tell how to do things, Books about pictures and music, A great author and his friends (Sir Walter Scott), Another great author and his short stories (Washington Irving), Old-fashioned books for boys and girls. The talks have been kept up ever since.

The series in 1900 was on Books about knights and tournaments, what happened to a man who read too much about knights (Don Quixote), Books about horses, Two dream-stories, (The divine comedy and The pilgrim's progress), Some funny adventures (A traveller's true tale and others), Some new books, How a book is made,

Stories about India, Pictures and scrap-books.

The next year, 1901, the talks were about stories connected with English history, the Old-English, the Normans, the Plantagenet times, King Henry V., the Wars of the Roses, King Henry VII. and King Henry VIII., Queen Elizabeth and Mary, Queen of Scots, the Stuarts, and the English Revolution and eighteenth-century England.

The year after, 1902, the talks were on "Books that you have not read," under the titles Sea stories, Indian stories, Horse stories, Wonder stories, Hero stories, African stories, South Sea stories, School and college stories, Old stories. A table of books was in the room, and I took them up one by one and told a little about the story, sometimes reading aloud and stopping at a very interesting point.

In 1903, the subjects were Stories about dragons, Stories about soldiers, Stories about shipwrecks, Stories about out-of-doors, Stories of real people told by themselves, Stories about adventures, Stories about pictures, Stories about the West, the object being to give the children of the upper grammar grades a glimpse into interesting books of which they might otherwise never hear. In that year we printed a list of novels for young readers that is now ten years old and needs revision, but still has its uses.

The use of the reference-room by children steadily increased, until the need of a room for them became evident, both on week-days and Sundays. The *Bulletin* for March 1, 1900, says: "On Sunday, Feb. 25, there were eighty-one children in the small room, filling not only chairs too high for their short legs, but benches extending into the circulation room. They were all quiet and orderly, and some of them read seriously and absorbedly for several hours on 'The twentieth century,' 'The boundaries of the United States,' and 'The comparative greatness of Napoleon and Alexander.' The younger children read story-books in the same quiet manner. A children's room would relieve the pressure on all three departments of the library." The "last straw" that led to the grant of rooms was a news-

paper article illustrated by a photograph of the reference-room on a Sunday afternoon with one man, one woman and fifty-one children in it.

In 1904, the library came into possession of two large, bright sunny rooms and a smaller one adjoining in an old-fashioned house next door, which belonged to the Athenæum and had been released by the removal of the Hartford Club to a large new house across the street. We opened rooms in November, just before Thanksgiving, and from then till New Year's Day we received gifts from many friends: a pair of andirons for the open fireplace, several pictures, a check "for unnecessary things" from one of the women's clubs, another for wall-decoration from teachers, students and graduates of the Albany Library School, fifty Japanese color-prints of chrysanthemums from the Pratt Institute children's room, a cuckoo clock that is still going, though it demands a vacation about once a year, and a Boston fern that is now in flourishing condition. A large Braun photograph of the Madonna del Granduca came later from the Pittsburgh School for Children's Librarians.

The furniture is of the simplest kind. We used some tables that we had, and bought one new one, some bentwood chairs for the older children and others such as are used in kindergartens for the younger. Pratt Institute lent us that first winter the very attractive illustrations by the Misses Whitney for Louisa Alcott's "Candy country." Some friends who were breaking up housekeeping gave the room a case of native and foreign stuffed birds with the hope that they might be as great a source of pleasure to the children as they had been to them in their childhood. Another friend sent us two trunks of curiosities from Europe, Asia, Africa and North America, which are shown a few at a time.

The next summer, 1905, the book-talks were about the pictures in the room, most of which had been bought with our friends' gifts. Windsor Castle, Kenilworth, Heidelberg Castle, The Alhambra, St. George, King Arthur, Sir Walter Scott, the Canterbury Pilgrims, some Shakespeare stories. On the Alhambra afternoon, a girl who

had spent her first year out of college in Spain described the palace and showed curiosities from Granada. One day a Civil War nurse who happened in was persuaded to tell the boys and girls in the room about the three weeks she spent in the White House, taking care of Tad Lincoln through a fever. Some years later we were fortunate enough to hear her again in the room above, on Abraham Lincoln's hundredth birthday, when she held the attention of a large number of boys and girls for more than an hour.

The next summer "What you can get out of a Henty book" was used as an excuse for showing books and pictures about the Crusades, Venice, the knights of Malta, the Rebellion of the Forty-five, the East India Company, the siege of Gibraltar, the Peninsula war, and modern Italy.

That summer we had a puzzle-club to show younger children how to work the puzzles in *St. Nicholas* and other magazines and newspapers. We held our first Christmas exhibition that year, 1906, in the room itself, for one day only, before the hour of opening.

After an exhibition of lace in the Athenæum the next spring, the specialist who arranged it held the attention of her audience of girls between ten and fourteen, giving a practical illustration of the making of pillow-lace, showing specimens of different kinds, pointing out the use of lace in old-fashioned costumes for children, and exhibiting a piece of Valenciennes which had been stolen by a catbird and recovered before it was woven into a nest. This talk was given at my request, because we could find almost nothing on lace in books for children, and the exhibit was then attracting much notice.

That year our first children's librarian, who had given only a part of her working hours to the room, the rest to the loan-desk, left us to be married. The school work had grown so fast that it had become necessary for us to find a successor who was equal to it, and whose sole time could be given to that and the care of the room, which is open only from 3.30 to 6 on school-days, except on Wednesdays, Saturdays and in vacations, when we have all-

day hours. The children in vacation-time may change story-books every day if they like—practically none of them do it—but in school time they are allowed only one a week. This is not a hardship, for they may use their non-fiction cards, which give them anything else, including bound magazines.

Our children's librarian makes up for lack of library technique by her acquaintance with teachers, and experience in day, evening and vacation schools, that have brought her into contact with children of all sorts and conditions.

The summer before her coming I had charge of the room for a part of every day, and observing that children under fourteen were beginning to think that they had read everything in the room and were asking to be transferred, I made a collection of books, principally novels, from the main library, marked them and the book-cards with a red star, and placed them on side shelves, where the younger children soon learned that they would find nothing to interest them. This keeps the older boys and girls in the room until they are ready for the main library, and when they are transferred they are sent to me in my office, where they are told that some one is always ready to give them help if they ask for it. The list of books for the first year after coming into the library is handed to them, and they are also referred to the high school shelves, to be mentioned later.

We insist on a father or mother coming with a child and leaving a signature or mark on the back of the application-card. This is placing responsibility where it belongs, and as we always have at least one of the staff who can speak Yiddish, and others who speak Italian, the parents are usually willing to come.

We are very strict in exacting fines as a means of teaching children to be responsible and careful of public property.

One summer the children acted simple impromptu plays, *Cinderella*, *Blue Beard*, *Beauty and the beast*, on the lawn outside the long windows. The lawn has been in bad condition for nearly two years, on account of the building of the Morgan memorial, but has now been planted again. One May-day we had an old English festival

around a Maypole on the green, with Robin Hood, Maid Marian, Friar Tuck, Will Scarlett, the hobby-horse, the dragon and all the rest, including Jack in the Green and an elephant. This was such a success that we were asked to repeat it across the river on the East Hartford Library green, where it was highly complimented on account of being so full of the spirit of play.

Our Christmas exhibits have been held every year, at first, as I have said, for one day only, then for two or three in the rooms above, and for the last two years in a large room used by the Hartford Art Society as a studio until it moved to a whole house across the street. This room has space for our school libraries, and the room which they had outgrown was fitted up at no expense except for chairs and a change in the lighting, as a study-room for the older boys and girls, who also have the privilege of reading any stories they find on the shelves, which are on one side only. The other shelves, placed across the room, were moved to the studio, which is so large that it has space for story-telling, or oftener story-reading. The winter of the Dickens centennial, through the month of February, the beginnings of "David Copperfield," "Nicholas Nickleby," "Dombey and son" and "Great expectations" were read.

In 1911, a gift of twenty-five dollars from a friend was spent for the boys' and girls' room, and has bought specimens of illustration, Grimm's "Fairy tales," illustrated by Arthur Rackham; Kate Greenaway's "Under the window," "Marigold garden," "Little Ann" and "Pied piper"; Laura Starr's "Doll book," and a fine copy of Knight's "Old England," full of engravings, including a morris dance such as has been performed here, and Hare's "Portrait book of our kings and queens." The rest of the money bought a globe for the older boys' and girls' reading-table, and sent from Venice a reproduction of a complete "armatura," or suit of Italian armor, eighteen inches high.

In 1912 the boys and girls of grades 7 to 9 in the district and parochial schools were invited to listen to stories from Eng-

lish history in the librarian's office of the Hartford Public Library on Tuesday afternoons in July and August. Some of the subjects were The Roman wall, The Danish invasion, King Alfred and the white horses said to have been cut to commemorate his victories, The Crusades, and The captivity of James I. of Scotland. The Longman series of colored wall-prints was used as a starting point for the stories. Children in grades 4 to 6 listened at a later hour to stories from Hawthorne's "Wonder-book" and "Tanglewood tales."

The Hartford Public Library had an exhibit at the state fair, September 2-7, 1912, in the Child-welfare building. In a space 11 by 6 were chairs, tables covered with picture-books, a bookcase with libraries for school grades, probation office, and a settlement, and another with inexpensive books worth buying for children. Pictures of countries and national costumes were hung on the green burlap screens which enclosed the sides of the miniature room. At about the same time we printed a list of pleasant books for boys and girls to read after they have been transferred to the main library. They are not all classics, but are interesting. The head of the high school department of English and some of the other teachers asked the library's help in making a list of books for suggested reading during the four years' course. This list has been printed and distributed. Copies are hung near two cases with the school pennant above them, and one of the staff sees that these cases are always filled with books mentioned in it. The high school has a trained librarian, who borrows books from the Public Library and tries in every way to encourage its use.

From Dec. 3 to 24, 1912 and 1913, the exhibit of Christmas books for children and young people was kept open by the library in the large room in the annex. The exhibit included three or four hundred volumes, picture books by the best American, English, French, German, Italian, Danish, and Russian illustrators, inexpensive copies and also new and beautiful editions of old favorites, finely illustrated books attractive to growing-up young people, and the best of the season's output. It had many vis-

itors, some of them coming several times. We sent a special invitation to the students in the Hartford Art Society, some of whom are hoping to be illustrators, and appreciate the picture-books highly.

The boys' and girls' room received last winter a fine photographic copy of Leighton's "Return of Persephone," in time for Hawthorne's version of the story, which is usually read when pomegranates are in the market and again six months later, when Persephone comes up to earth and the grass and flowers begin to spring.

One day John Burroughs made an unexpected visit to the room, and it happened that when the children reading at the tables were told who he was, and asked who of them had read "Squirrels and fur-bearers," the boy nearest him held up his hand with the book in it. That boy will probably never forget his first sight of a real live author!

Last winter we received a gift of a handsome bookcase with glass doors, which we keep in the main library, filled with finely illustrated books for children to be taken out on grown-up cards only. This is to insure good care.

For several years we have been collecting a family of foreign dolls, who are now forty-five in number, of all sorts and sizes, counting seventeen marionettes such as the poor children in Venice play with, half a dozen Chinese actors, and nine brightly colored Russian peasants in wood. The others are Tairo, a very old Japanese doll in the costume of the feudal warriors, Thora from Iceland, Marit the Norwegian bride, Erik and Brita from Sweden, Giuseppe and Marietta from Rome, Heidi and Peter from the Alps, Gisela from Thuringia, Cecilia from Hungary, Annetje from Holland, Lewie Gordon from Edinburgh, Christie Johnstone the Newhaven fishwife, Sambo and Dinah the cotton-pickers, Mammy Chloe from Florida, an Indian brave and squaw from British America, Laila from Jerusalem, Lady Geraldine of 1830 and Victoria of 1840. Every New Year's Day, in answer to a picture bulletin which announces a doll-story and says "Bring your doll," the little girls come with fresh, clean, Christmas dolls, and

every one who has a name is formally presented to the foreign guests, who sit in chairs on a table. Lack of imagination is shown in being willing to own a doll without a name, and this year the subject of names was mentioned in time for the little girls to have them ready. Mrs. Mary Hazelton Wade, author of many of the "Little cousins," lives in Hartford, and lately gave us a copy of her "Dolls of many countries." I told her about the party and invited her, and she told the fifty children who were listening about the Feast of Dolls in Japan. The doll-story was E. V. Lucas's "Doll doctor," and it was followed by William Brightly Rands's "Doll poems."

In 1893, the year after the library became free, the Connecticut Public Library Committee was organized. For about ten years it had no paid visitor and inspector, and I, as secretary of the committee, had to go about the state in the little time I could spare from regular duties, trying to arouse library interest in country towns. Now most of the field work is done by the visitor, but I have spoken many times at teachers' meetings and library meetings. We began by sending out pamphlets—"What a free library can do for a country town"—emphasizing what its possibilities are of interesting children, and "What a library and school can do for each other." Every year the libraries receive a grant of books from the state, and send in lists subject to approval. We often found the novels and children's books asked for unworthy of being bought with state money by a committee appointed by the Board of Education, and began to print yearly lists of recommended titles of new books, from which all requested must be chosen. The standard is gradually growing higher. The Colonial Dames have for years paid for traveling libraries, largely on subjects connected with colonial history, to be sent to country schools from the office of the committee, and have also given traveling portfolios of pictures illustrating history, chosen and mounted by one of their number. The Audubon Society sends books, largely on out-of-door subjects, and bird-charts, to schools and libraries all over the

state. Traveling libraries, miscellaneous or on special subjects, are sent out on request.

A Library Institute has been held every summer for five years under the direction of the visitor and inspector. It lasts for two weeks, and several lectures are always given by specialists in work with children.

The choice of books, sources of stories for children, and what to recommend to them are frequently discussed in meetings for teachers and librarians.

A book-wagon has for the last two or three years gone through a few towns where there is no public library, circulating several thousand books a year for adults and children, and exciting an interest which may later develop into the establishment of public libraries. The committee has now 105 which receive the state grant. Wherever a new library is opened, a special effort is made through the schools to make it attractive to children.

At this time of year the mothers' clubs in the city and adjoining towns often ask for talks on what to buy, and boxes of books are taken to them, not only expensive and finely illustrated copies, but the best editions that can be bought for a very little money. These exhibitions have been also given at country meetings held by the Connecticut Public Library Committee.

A library column in a Hartford Sunday paper is useful in showing the public what libraries in other states and cities are doing, and in attracting attention to work with children. Letters to the children themselves at the beginning of vacation, printed in a daily paper and sent to the schools, invite them to book-talks. Other printed letters about visits to places connected with books and authors, sent home from England and Scotland with post-

cards, have excited an interest in books not always read by children. This year the Hartford children's librarian has read the letters and shown the books referred to, post-cards and pictures, to a club of girls from the older grammar grades, who were invited through the letters just spoken of to leave their names with her.

A club of children's librarians from towns within fifteen miles around Hartford meets weekly from October to May. Meetings all over the state under the Public Library Committee have stimulated interest in work with children, and Library Day is celebrated every year in the schools.

The visitor and inspector reports visits to eight towns in December, and says: "Somewhat more than a year ago, at the request of the supervisor, I made out a list of books for the X— school libraries. These were purchased, and this year the chairman of the school board requested my assistance in arranging the collection in groups to be sent in traveling library cases until each school shall have had each library. I spent two days at the town hall working with the chairman of the school board, the supervisor, a typist and two school teachers.

"A new children's room has been opened in the Y— library since my visit there. It is double the size of the room formerly in use, and much lighter and more cheerful. The first grant from the state was expended entirely for children's books, the selection being made in this office.

"In Z— I gave an Audubon stereopticon lecture, prefacing it with an account of the work of the Audubon Society, and an enumeration of the loans to schools. The audience in a country schoolhouse, half a mile from Z— village, numbered 102."

THE LIBRARIAN'S MOTHER GOOSE.

*Pussy cat, pussy cat, where have you been?
Shuffled the cards to the taste of the queen.
Pussy cat, pussy cat, what did you there?
Caught a cross-reference under the chair.*

—Renée B. Stern.

SOME REFERENCE BOOKS OF 1913

BY ISADORE GILBERT MUDGE, *Reference Librarian, Columbia University*

THE list of reference books described below is not a complete record of all such publications issued in 1913, although the compiler hopes that it is fairly representative of the more important or interesting American and English books issued during that period. Some publications of the previous year which were issued too near the end of the year to be included in the 1912 summary are noted here, especially some foreign publications which did not generally reach American libraries until some time in 1913.

PERIODICALS AND NEWSPAPERS

The year 1913 has been noteworthy from the reference librarian's point of view because of the important new indexes of periodical and journal literature started during the year. First among these is the "Readers' guide supplement," announced more than a year ago, when the discontinuance of the "Annual library index" was decided upon, but not actually issued until 1913 (White Plains: Wilson). The "Readers' guide" and "Readers' guide supplement" now cover between them much the same field as that formerly covered by the "Readers' guide" and the "Annual library index," and the "Supplement" practically takes the place of the latter, although it does not index exactly the same list of titles. An analysis of periodicals indexed shows that the "Readers' guide" now indexes 90 periodicals and the "Supplement" 54, making a total of 144 as against the total of 148 formerly indexed by the "Guide" and the "Annual library index." There has, however, been a redistribution of titles. Of the 116 periodicals indexed in the A. L. I. for 1910, 52 are now indexed in the "Readers' guide," 23 in the "Supplement," 9 in the "Annual magazine subject index," 3 in the "Book review digest," 2 in the "Industrial arts index," while 27 have been dropped altogether, and their places taken by other titles which seemed to promise greater usefulness. The "Readers' guide supplement" follows the

same plan of full author, title and subject indexing used in the "Readers' guide," but is issued at quarterly instead of monthly intervals and cumulates throughout the year. Another new index compiled and published by the same firm is the "Industrial arts index," issued in bi-monthly numbers (with the omission of one summer number) and cumulating throughout the year. The list of periodicals indexed in the "Industrial arts index" is much the same as that included in the "Engineering index," but its arrangement of material is different, being alphabetical as against the classed arrangement in the "Engineering index." A preliminary comparison based on a part year's use only would seem to indicate that the "Industrial arts index" is more useful in the general or public library, while the "Engineering index" is better liked by the student, or worker in the highly specialized technical library. Quite as important in its somewhat different field is the excellent new "New York Times index," which is published quarterly, each volume indexing three months of the *New York Times*, but not cumulating. (N. Y., *The Times*, \$2 a vol.) So far, three volumes, indexing the newspaper from January to September, 1913, have appeared. The indexing is careful and detailed, the entries are by small subjects, the references are exact, that is, to date, page and column, and the information given is sufficiently full to answer some questions without the necessity of following up the given reference. This new newspaper index is comparable to the even more detailed index of the *London Times*, although the latter has the advantage of a monthly index and, since 1910, an annual index as well. The reference librarian who uses newspapers constantly is now fairly well equipped with indexes for recent years at least, with the *New York Times* and the *London Times* indexes, the "Index to dates" and for certain foreign papers the "Halbmonatliches Verzeichnis," published since 1909 in connection with the "Biblio-

graphie der deutschen Zeitschriften Literatur" (Gautzsch, Dietrich), which indexes 48 German and Austrian papers.

DEBATES

"Inter-collegiate debates," edited by Egbert Ray Nichols, seems now definitely established as a regular yearbook of information on many of the questions connected with college and high school debating. Volume three, published in 1913, contains reports of debates and bibliographies on Commission form of government, Direct primary, Minimum wage, Open *vs.* closed shop, Parliamentary *vs.* presidential form of government, Three-quarter decision in jury trials, and the Central Bank. The appendices give the usual record of schools, questions, decisions, etc., for the debating year 1911-12, and a special feature is the cumulated index to volumes 1-3. (N. Y., Hinds, \$1.50.) New volumes and new editions in the "Debaters handbook series" are: "Capital punishment," by C. E. Fanning, 2d ed. revised; "Conservation of natural resources," by C. E. Fanning; "Recall, including the recall of judges and judicial decisions," by E. M. Phelps; "Reciprocity," by E. C. Robbins; and "Trade unions," by E. D. Bullock. (White Plains, N. Y., Wilson, 5 vols., \$1 ea.) A similar series of smaller handbooks in pamphlet form, called the "Abridged debaters' handbook series" is now being issued by the same publishers. The titles published during 1913 were: "Independence for the Philippines," by E. L. Teich; "Panama canal tolls," by E. M. Phelps; "Minimum wage," by M. K. Reely; "Six years presidential terms," by E. E. Painter. (White Plains, N. Y., Wilson, 4 vols., 25 c. ea.)

ENCYCLOPEDIAS

The only English encyclopedia to be included in this year's list is "The Everyman encyclopedia," edited by Andrew Boyle (London, Dent, 1s. per vol.; New York, Dutton, 12 v., 35 c. ea.), an admirably compact and concise work intended primarily for the private library, but not without usefulness in the public library, especially the smaller public library, which has difficulty in affording the larger ency-

clopedias in their latest editions. The selection of topics is good and inclusive and the articles generally adequate and accurate. As might be expected in so compact a work, the weakest point is in the bibliographies, though these are not entirely lacking. So far the work has been issued only in the cloth binding suitable for private libraries, but an edition in the special library binding is to appear in 1914. A good new handbook of information is "A handy book of curious information," by William S. Walsh (Phila., Lippincott, \$3.50), which forms a companion volume to his "Handy book of literary curiosities" and "Handy book of popular customs."

A public library with an Italian clientele, or a college library which serves pupils beginning the study of Italian, often has need for a small inexpensive Italian encyclopedia. A good work of this sort is the "Piccolo enciclopedia, 2. ed., completamente rinnovata," by Gottardo Garollo. (Milan, Hoepli.) Only volume 1, A-D, has been issued so far. The large new Spanish encyclopedia in process of publication, "Enciclopedia universal ilustrado" (Barcelona, Espasa y Hijos, 27 ptas. a vol.) has now advanced as far as volume 18. While few libraries have enough call for Spanish material to justify the purchase of so expensive a work, the encyclopedia is proving very useful in libraries which do have such a call, especially for the very full information on the history, geography, biography, literature, commerce, industries, etc., of Spain and Spanish America.

DICTIONARIES

The most important new dictionary of the year is the new edition of the "Standard dictionary" (N. Y., Funk, \$12), the first complete revision and resetting of the dictionary since its original publication in 1893. The "New Standard" is much larger than the original work, through the addition of some 100,000 new words and the total vocabulary is stated as 450,000. Aside from the thorough revision given to the selection and definition of words, the most noteworthy change is the elimination of the many annoying supplementary lists and the inclusion of all types of words, except the

foreign words and phrases, in a single alphabet. The inclusion of antonyms, a special feature of the original Standard, is continued and another special feature of the new edition is giving first present-day usage and definition of each word and following that by the historical and etymological information, on the theory that the questions about which a one-volume dictionary is most frequently consulted are the present-day spelling, pronunciation, usage, and definition of a word. In spite of the single alphabet, there are some appended lists, namely the Foreign words and phrases, Population statistics of towns, and a Standard history of the world day by day—that is, historical events listed according to the day of the month on which they occurred. Every reference librarian who has suffered from the question "What happened one hundred years ago to-day?" will welcome this list.

Several new or revised handbooks of synonyms should be noted. A new edition of Roget's "Thesaurus," revised by Andrew Boyle, has been included in "Everyman's library." This new edition omits some obsolete words, corrects some errors and adds terms of modern science, foreign phrases, etc. (London, Dent; New York, Dutton, 2 v., library binding, 50 c. per vol.) A new and excellent list of words only, without definitions of differences, is "Synonyms, antonyms and associated words," by L. A. Flemming (N. Y., Putnam, \$1.25). An important addition to the group of dictionaries of "local" English is "Afrikannderisms, a glossary of South African colloquial words and phrases, and of place and other names," by C. Pettman (London and New York, Longmans, \$3.50). Its definitions are clear and sufficient, and the illustrative quotations are given with date and exact page reference for purpose of verification.

PHILOSOPHY

While the number of new reference books in this subject is small as compared with 1912 the quality is high. A third title has been added to the series of scholarly dictionaries of philosophical subjects, by Dr. Rudolf Eisler. This is his

"Handwörterbuch der Philosophie" (Berlin, Mittler, 801 p. 17.50m.), which gives definitions of terms and articles on concepts, the latter largely condensed or popularized from his "Wörterbuch der philosophischen Begriffe," the third edition of which was issued in 1910. The three annual surveys of philosophical literature, "Philosophie der Gegenwart," "Bibliographie de la philosophie française" (in no. 8 of *Bulletin de la Société française de philosophie*), and "Bibliografia filosofica italiana," and all have been continued by new volumes which carry the records through the years 1910 and 1911. The first and second of these titles are especially useful, and the three together index practically the whole book and periodical literature of the subject.

SOCIAL SCIENCES

Year books

The "Britannica year book 1913," prepared under the same editorial direction as the eleventh edition of the Encyclopædia Britannica is easily the most important of the new year books. In reality it is a cross between an annual encyclopedia, such as the "New international year book" and an annual survey of progress such as the "American year book." This first issue records events and progress in the different fields of knowledge and activity from 1910 to 1912, inclusive, and treats such records in comprehensive articles written by authorities and furnished with good bibliographies. The articles, which are not alphabetically arranged, are on rather large subjects, but a detailed index supplies the references for smaller topics. (London and New York, Encyc. Brit. Co., 10s., \$2.25.) The "Annuaire de la vie internationale, 1910-11" (Brussels, Office centr. des assoc. internat. 1913, 2652 p.), which is an annual only in name, as there is a gap of three years between the publication dates of the two volumes so far issued, is a veritable encyclopedia of every aspect of internationalism, associations, conferences, institutions, commissions, expositions, publications, etc. To the cataloger and bibliographer it is especially useful for its information about publications of the various organizations. The "Suffrage annual and

women's who's who," though devoted principally to biography, furnishes history and statistics of the suffrage movement, names of organizations, lists of officers, etc. (London, Stanley Paul, 6s.) The "China year book" is not new, but as the 1913 issue is the first one based on material collected since the recent revolution, it is so changed as to be almost new. A new feature is the "Who's who in China" included as one section of the "Year book." (London, Routledge, 10s.) "Nelson's encyclopedia year book 1912-13" (Edinburgh, Nelson, 1s.) is a small, inexpensive survey of the events of the year 1912 in the United Kingdom, with briefer lists of happenings elsewhere.

Statistics

For American libraries the most important new work in statistics is the set of "Reports of the thirteenth census of the United States," of which all volumes except volume 4, Occupations, were issued during 1913. (Washington, Gov. Pr. Off., v. 1-3, 5-11.) In the selection of subjects included, these reports differ from the reports of the twelfth census by the omission of the volumes on Vital statistics and the inclusion of a volume on Mines and quarries and the volume on Occupations, still to be issued. The abstract of the census appears as a separate volume, as heretofore, but is much larger than the abstract of the twelfth census, and differs from that abstract also in that it is issued in a different edition for each state, each state edition containing a supplement of special statistics for that state. The special state supplements are also issued separately in pamphlet form.

The reports of the English census of 1911 have also been published. They were included in the Parliamentary Papers of 1912 and 1913, and may be purchased separately by libraries which do not subscribe to the set of Parliamentary Papers.

Business, Law, Customs

"Pitman's dictionary of book-keeping, a book of reference on all matters concerning book-keeping and accountancy for students, teachers and practitioners," by R. J. Porters (London, Pitman, 5s.), and "Pit-

man's dictionary of secretarial law and practice," by Philip Tovey (London, Pitman, 25s.), are two new titles in the series of business reference books published by Pitman. As both deal exclusively with the English law and practice on the two subjects, their use in American libraries is proportionately limited. Nelson's "Encyclopædia of industrialism" (London, Nelson, 1s.) is a really good little handbook of the English side of its subject. A different aspect of the "social" sciences is covered exhaustively and authoritatively in the "Cyclopædia of social usage, manners and customs of the 20th century," by Helen L. Roberts (N. Y., Putnam, \$3.50), the best manual of etiquette so far published and a convenient reference book, although not alphabetically arranged. An excellent reference aid for the library assistant or research worker who needs to use law books is the "Guide to the study and use of law books, a selected list, classified and annotated, of publications relating to law literature, law study, and legal ethics," by Frederick C. Hicks (N. Y., Baker, Voorhis, \$1). This guide gives, under such heads as Legal bibliographies, Legal terminology, Textbooks, Case law, etc., a selection of the material which will be most useful to the law student or the student of politics or history who may need to use either old or new legal material. New editions of Philips' "Mercantile marine atlas" and Philips' "Chamber of commerce atlas," each showing some changes and embodying some new information have been issued.

EDUCATION

Monroe's "Cyclopedia of education" has been completed by the publication of volumes 4-5, and the result is a most useful authoritative work in a subject which has heretofore lacked any good encyclopedic work in English. The scope of the work is wide, the entries and cross references usually adequate, the balance, in spite of some omissions and an occasional preponderance of American topics, generally good, and the general excellence of both articles, illustrations and bibliographies very high (N. Y., Macmillan, \$5 a vol.).

A new annual bibliography and index which promises to be of value is "L'année pédagogique, 1912" (Paris, Alcan, 7.50 fr.). This work, now in its second year, is a classified list with alphabetical index, and includes the books of the year on educational topics, and also indexes the educational articles in some 138 English, German and French periodicals.

SCIENCE AND TECHNOLOGY

An unusual new reference book which is, in its special field, extremely valuable is "Color standards and color nomenclature," by Dr. Robert Ridgway, the well-known ornithologist, curator of the Division of birds in the U. S. National Museum. (Washington, The Author, 1912, \$8.) This work, which is a very detailed dictionary of colors and color terms, is a revision and enlargement of the author's "Nomenclature of color," 1886. The dictionary list includes some 1115 named colors with references to the numbered samples on the colored plates. There are 53 colored plates, each containing 27 mounted samples, so that altogether some 1431 different shades are illustrated. The color work is very fine, the list of terms accurate and comprehensive, and the book, though prepared especially for ornithologists, should be useful to all who require a standard color scheme, whether botanists, florists, merchants, chemists, dyers, artists, etc.

The new edition of Thorpe's "Dictionary of applied chemistry," which was begun in 1912, has been completed by the publication of volumes 4-5. (London and New York, Longmans, 45s. a vol., \$13.50 a vol.) The high promise of the first volumes has been carried out and the completed work is a thoroughly revised and accurate encyclopedia of every branch of its subject. A "1914" edition (published in 1913) of the "Scientific American reference book," by A. A. Hopkins, while printed from the same plates as the thoroughly revised edition of 1913, shows some changes and, especially in the record of discoveries and events, some new material. (N. Y., Munn, \$1.50.) There are several new scientific atlases. The "Forest atlas of the United

States," prepared by the Forest Service of the Department of Agriculture, has been started by the publication of part one, "Pines." (Washington, Geological Survey.) The important report on "Coal resources of the world," prepared for the International Geological Congress, includes in a separate volume an excellent atlas of coal distribution, edited for the congress by William McInnes. This atlas, which should be of use to both the scientist and the economist, contains 48 plates of colored and outline maps and diagrams illustrating coal deposits and coal fields in all parts of the world. (Toronto, Morang, 49½cm.; whole work, incl. atlas and 3 vols. of text, \$25.) A serviceable small popular dictionary of agriculture, principally as practised in England, is "Encyclopædia of agriculture" (London, Nelson, 3 v., 1s. ea.). It is intended for the practical worker rather than for the student, and there are few bibliographic references. Two new dictionaries of scientific or technical terms should be mentioned. These are "Dictionary of automobile terms," by A. L. Clough (N. Y., Horseless Age, \$2), a useful handbook with brief definitions of terms, and the excellent new edition of "Lang's German-English dictionary of terms used in medicine and the allied sciences," edited and revised by M. K. Meyers (Phila., Blakiston, \$5). This latter is an accurate and comprehensive work which should be useful to medical students, translators, and catalogers of medical books. Two important new reference books on the history and practice of the printing and publishing trades are noted below under the heading Bibliography.

FINE ARTS

The great dictionary of artists of all times, "Allgemeines Lexikon der bildenden Künstler, von der Antiken bis zur Gegenwart," by Ulrich Thieme (Leipzig, Seeman), has been advanced somewhat on its slow progress through the alphabet by the publication of volumes 8-9, which carry the work through the word "Dubois." The smaller French work by Bénézit, "Dictionnaire des peintres," has been extended through the letter K by the completion of

volume 2 (Paris, Chernoviz, 30fr.). Though inferior in both quantity and quality of material to Thieme's *Lexikon*, Bénézit's work has a special usefulness in its fullness of treatment or rather inclusion of minor French names. A new biographical dictionary of artists is "A dictionary of Irish artists," by Walter I. Strickland (Dublin, Maunsel, 2 vols., 30s.). The series of dictionaries of French sculptors by Stanislas Lami, has been extended by the issue of his "Dictionnaire des sculpteurs de l'école française au 19^e siècle" (Paris, Champion).

MUSIC

Recent publications on music include some useful small reference books. The "Music lovers' cyclopedia," by Rupert Hughes (Garden City, N. Y., Doubleday, \$1.50), is a revised and cheaper edition of the more expensive work first issued in 1903. The new edition contains, besides some special articles and lists, a dictionary of terms, outlines the plots of sixty operas, and a dictionary of musicians, the latter list constituting the main part of the book. Much of the new matter is inserted in supplementary lists so that, for the biographical material especially, more than one alphabet must be used. Operas alone were treated in the new revised edition of Upton's "Standard operas," issued in 1912 (Chicago, McClurg, \$1.75), which though including fewer operas than the first or second edition of Melitz's "Guide" is more satisfactory than Melitz, where comments on the music, *motifs*, etc., are wanted. The new "Who's who in music" (London, Pitman) should be noted in this connection, although it is described more in detail in the section on Biography.

LITERATURE

Among new reference books in the field of literature, those which deal with the subject of fiction are distinctly in the majority. The most generally useful of such books is E. A. Baker's "Guide to the best fiction in English" (London, Routledge, 21s.; N. Y., Macmillan, \$6), which is a revision of his work of the same title published in 1902, but so enlarged and re-

written as to be practically a new book. The arrangement of the new work follows in general that of the first edition, except that the historical appendix of the 1902 edition is omitted because it is to be superseded when the author's "Guide to historical fiction," now in press, is issued; but the scope of the present work has been enlarged and its field of usefulness proportionately extended by the devotion of more space to classical and mediæval romances, Celtic fiction, Icelandic sagas and the fiction of the various foreign nations, etc. The very full index includes authors, titles, some subjects, historical and place names, allusions, etc. Of equal importance in its more limited and scholarly field is the "List of English tales and prose romances printed before 1740," compiled by Arundell Esdaile (London, Bibliog. Soc., 1912, 329 p. 10s. 6d.), a well-made bibliography which includes both English romances and English translations of foreign romances, with full bibliographic but no critical notes and indications of the English libraries in which copies of the books may be found. A brief list of English historical fiction intended primarily as an aid to teachers in primary and secondary schools is a "Guide to British historical fiction," by J. A. Buckley and W. T. Williams (London, Harrop, 1912, 182 p. 2s. 6d.). The titles included are arranged chronologically by the historical period or event illustrated. Both compilers are teachers in the county school, Beckenham. There is a new edition of Oscar Wegelin's "Early American fiction, 1774-1830," which differs from the first edition of 1902 by the correction of some errors, the addition of seventy or eighty titles, the extension of the bibliographical notes and the omission of the biographical notes included in the earlier edition. (N. Y., Wegelin, 37 p. \$3.) A useful dictionary of early fiction is the "Dictionary of mediæval romance and romance writers," by Lewis Spence (London, Routledge, 8s. 6d.; N. Y., Dutton, \$3.) This lists in one alphabet the characters and titles of the principal British, Celtic, Teutonic, Scandinavian, French, Spanish and Italian romances of the period from the 11th to the 14th century, giving under

the name of each character a brief description of the character and the title of the romance in which it occurs, and under each title a fairly detailed synopsis of the plot of the story. This new dictionary is uniform with the series of author dictionaries published by Routledge and imported by Dutton. Finally, a special part of the field of poetical fiction is dealt with in the "Book of the epic, the world's great epics told in story," by H. A. Guerber (Phila., Lippincott, \$2), which supplies synopses of the plots of the principal epics of the Greek, Latin, French, German, Scandinavian, Russian and other literatures, principally of course the earlier material, but including also such modern epics as "Paradise lost" and "Hiawatha."

New reference books for topics of foreign literature are principally bibliographies or bio-bibliographies. A handbook of names of twentieth century German authors is "Führer durch die deutsche Literatur des 20. Jahrhunderts," by Max Geissler (Weimar, Duncker, 9m.), which furnishes only the briefest of biographical data for each writer included, but supplies a useful characterization of his work and position and a list of his writings. Of wider scope and somewhat fuller information on the biographical side, is Brümmer's "Lexikon der deutschen Dichter und Prosaisten vom Beginn des 19. Jahrhunderts bis zur Gegenwart," of which a new thoroughly revised edition, the sixth, has been issued. (Leipzig, Reclam, 8 v., 12m.) An excellent dictionary of modern Icelandic writers is "Icelandic authors of to-day," by Hállor Hermannsson (Islandica, v. 6, Cornell University), which gives biographies, lists of works, and bibliographical references to sources and fuller descriptions in other books. Spanish literature is represented this year by an excellent new anthology of Spanish poetry from the 13th to the 20th century, the "Oxford book of Spanish verse," chosen by James Fitzmaurice Kelly (Oxford Univ. Press, 7s.; \$2). In the field of classical literature, Klussmann's "Bibliotheca scriptorum classicorum" has been completed by the publication of vol. 2, pt. 2, Latin authors M-Z (Leipzig, Reisland, 10m.; also pub. as supplement vol.

165 of *Jahresbericht u. d. Fortsch. d. klass. Altertumswissenschaft.*) This supplements the Engelmann-Preuss "Bibliotheca scriptorum classicorum," eighth edition, and carries the record of editions, translations, critical works and dissertations through the year 1896.

BIOGRAPHY

While no large new dictionary of biography of definitely permanent value was published in 1913, there were several new comers in the "Who's who" class which are useful and promising. The group of dictionaries of regional biography was enlarged by the new "Who's who in China," published in the "China year book" for 1913, which gives good compact biographical sketches of men connected with the Chinese revolution, the new government, and the industrial, commercial and other interests of present-day China. "Who's who in science, international, 1914," published in December, 1913 (London, Churchill, 10s.; N. Y., Macmillan, \$3), has been extended to twice the size of the first issue, and differs from the first volume in other respects, notably in the inclusion of the names of psychologists in the biographical list, and in the addition, to the prefatory material, of a useful list of the learned societies of the world which gives the name of the society, names, officers and title of periodical publications. A new subject handbook is "Who's who in music, a biographical record of contemporary musicians," compiled and edited by H. Saxe Wyndham and Geoffry Lepine (London, Pitman, 6s.). In this work English names are in the majority, although the scope is apparently intended to be international, and the appended material, lists of musical institutions, schools, plans of music halls, etc., is limited to England. Another new publication is the "Suffrage annual and women's who's who" (London, Stanley Paul, 6s.), of which more than half is devoted to biography. The biographies are of very unequal value and rather extended, but furnish some material not obtainable in other reference handbooks. The list includes brief articles on about one hundred men interested in the suffrage movement.

A new edition of a standard dictionary of American biography is the new "Biographical congressional directory, with an official history of the national Congress, 1774-1911." (Washington, Govt. Pr. Off., 1913, 1136 p.) Besides the list of biographies which makes up the greater part of the book, there is a list of names of executive officers arranged by administrations, list of the members of the Continental Congresses, and members of each Congress, 1789-1911, arranged by states.

As supplementary material to the great general and national dictionaries of biography, the biographical dictionaries and directories of colleges and universities are often of importance, especially for information about comparatively obscure names. There have been several important additions to this group. Mr. F. B. Dexter's important dictionary of Yale biography, the "Biographical sketches of the graduates of Yale College" has been completed by the publication of volume 6, which carries the record through the class of 1815, making the whole period covered that of 1701-1815. This is an excellent reference tool for American biography of the 18th and early 19th centuries, the articles are good and there are excellent bibliographies. (Yale University Press, v. 6, \$5.) For English colleges there have been several new publications. That standard work, Cooper's "Athenae Cantabrigienses" has been completed by the publication of a third volume, edited by George G. Gray, which includes corrections, additional names and a new index to the whole work. (Cambridge, Bowes, 163 p. 6s.) It is interesting to note that while many of the articles in the "Athenae Cantabrigienses" have been superseded by the later articles in the "Dictionary of national biography," there are still some 700 names included in the former that do not appear in the latter work. Other dictionaries of college graduates which contain biographical information in some detail are: "Admissions to Peterhouse, or St. Peter's College in the University of Cambridge, 1615-1911" (Cambridge Univ. Press, 1912, 30s.); "Biographical register of Christ's College, 1505-1905, and of the earlier foundation, God's House,

1448-1505," by John Peile (Cambridge Univ. Press, 2 v., 1910-1913, £2), and "Matriculation albums of the University of Glasgow, 1728-1858," transcribed and annotated by W. Innes Addison (Glasgow, Maclehose, 607 p, 21s.).

GEOGRAPHY AND TOPOGRAPHY

Several new or revised atlases have appeared during the year. Of first importance is the new edition of "Johnston's Royal atlas of modern geography" (London, Johnston, £4 4s.), issued early in 1913, in which the number of maps have been extended from fifty-six to sixty and the maps themselves revised and changed to show new discoveries, explorations, railroads and cable routes, changes in boundaries by treaty, etc. An excellent feature of both this atlas and the fine German atlas by Stieler is that all the maps can be purchased separately, either to supply extra copies or to replace worn or mutilated plates. The "Forest atlas of the United States" and the atlas of "Coal resources of the world" have already been mentioned in the section on Science and technology, and the two Philips atlases in the section Business and commerce. The "Atlas of ancient history," by W. R. Shepherd, is a reprint of the 25 maps in the ancient history section of his "Historical atlas." The library which has his larger work will not need the reprint, but the latter is a convenient and inexpensive atlas for individual purchase by the high school or college student. (N. Y., Holt, 90 c.) Two new titles have been added to the series of literary and historical atlases included in "Everyman's library." These are: "A literary and historical atlas of Asia" and "A literary and historical atlas of Africa and Australasia," both by J. G. Bartholomew. (London, Dent; N. Y., Dutton; lib. binding, 1 s. 6d. ea.; 50 c. ea.) In the general character of the maps and gazetteer, and in the inclusion of a chapter on coinage the two new volumes resemble the volumes on Europe and America already noted in this series.

HISTORY

As usual the important new reference books in history are, in most cases, bib-

liographies. There are several new aids for students of French history. The great set of "Sources de l'histoire de France," compiled for the early periods by Molinier and for the 16th century by Hauser, has advanced as far as part 3, the 17th century, edited by Émile Bourgeois and Louis André. The first volume of part 3, dealing with the geography and general histories of the 17th century, was published during 1913. (Paris, Ricard, 12fr.) The important bibliography of modern French history, "Bibliographie des travaux publiés de 1866 à 1897 sur l'histoire de France depuis 1789," by Pierre Caron, which has been in process of publication since 1907, was completed by the end of 1912. (Paris, Cornély.) This is an excellent subject bibliography, including both books and articles in periodicals, society transactions, etc., grouped by large subjects, with excellent indexes of place and personal names. So much periodical material has been included that the bibliography is practically an index to the historical articles in some 300 periodicals. Quite as important as the completion of this bibliography is the revival of its annual supplement, the "Répertoire méthodique de l'histoire moderne et contemporaine de la France." This excellent annual index, under the editorship of Pierre Caron and Gaston Brière, was published duly for six years, covering the years 1897 to 1903, inclusive, and then was suspended for a while. Publication was resumed last year when the bibliography for the year 1910-11, edited by Pierre Caron and Robert Burnand, was issued in connection with the *Revue d'histoire moderne*, 1912-13. While this bibliography is not sold separately from the *Revue d'histoire* it has its own paging, title pages and indexes, and should be bound separately to be of most use. This bibliography follows the same classification as M. Caron's larger work, lists the book material of the period covered and indexes the historical articles in more than 200 periodicals. The bibliography for the year 1911-12 is now in process of publication in the *Revue* for 1913-14, and the gap left when publication was suspended after 1903 is to be bridged by the publication of a volume for 1904-

06, now in press, and one for 1907-09, announced as in preparation. With Caron's list for French history, Masslow's "Bibliographie" for German history, the "Annuario bibliografico" for Italy and Miss Griffin's "Writings on American history" for the western hemisphere, the supply of index-bibliographies of history covers the most studied countries, with the exception of England. It is much to be regretted that there is no annual index of the literature of English history.

A recent publication on German history is the fourth revised and enlarged edition of Dr. Victor Loewe's "Bücherkunde der deutschen Geschichte, kritischer Wegweiser durch die neuere deutsche historische Literatur" (Altenburg, Rade, 3.50m.). This bibliography gives a good selected list of titles, with useful critical notes. For the research worker in the field of American history there are two new guides to source material, published by the Department of Historical Research of the Carnegie Institution. These are "Guide to the material for the history of the United States in the principal archives of Mexico," by Herbert E. Bolton (Washington, Carnegie Inst., pub. 163); and "Guide to the materials for United States history in Canadian archives," by David W. Parker (Washington, Carnegie Inst., pub. 172). The new historical atlases of the past year have already been mentioned under the heading Geography.

BIBLIOGRAPHY

The reference books of the year on subjects of general bibliography have included several important continuations and new editions, although no one entirely new book of the first importance has been published during that period. Part 3 of the "Catalogue of books printed in the 15th century now in the British Museum" has appeared (London, British Museum, 25s.). This new volume covers Germany (Leipzig-Pforzheim), German-speaking Switzerland and Austria-Hungary, and completes the section of the catalog dealing with German-speaking towns. It contains, besides the descriptions of books, an introduction by A. W. Pollard, a topographical map,

indexes and facsimiles. There is a new edition, revised, of Whitaker's "Reference catalogue of current literature," which follows the general plan of the 1910 edition, that is, and has the useful index in a separate volume (London, Whitaker, 21s.; N. Y., Publishers' Weekly, \$5, 3 vols.) A bibliography of a very different sort which is of service to book buyers is the new edition of "List of economical editions," compiled by LeRoy Jeffers (Chic., A. L. A. Pub. Board, 32 p. 25c.) This book makes no attempt to guide the selection of titles, but merely indicates the most economical serviceable editions of certain given titles. A good general bibliography is the new edition of the "Catalogue of the London Library," compiled by C. T. Haggberg Wright and C. J. Purnell (London, London Library, 2 vols., 84s.) This is a revision and extension of the author and title catalog published in 1903, and while not comparable to the British Museum catalog or even to the Peabody catalog, is often very useful, for description of books, identifications of editions or occasional analytics.

Quite in a class by itself is Mr. Ronald B. McKerrow's fine contribution to the history of English printing and publishing, entitled "Printers' and publishers' devices in England and Scotland, 1485-1640" (London, Bibliog. Soc., 216 p. 65 double plates, subs.) This sumptuous work is issued as one of the Bibliographical Society's illustrated monographs, and is a complement to the three biographical dictionaries of English printers compiled respectively by R. B. McKerrow, Henry R. Plomer and E. Gordon Duff and published by the Society in its octavo series. "Printers' and publishers' devices" contains detailed descriptions and facsimiles of 428 devices, a dictionary of the names of certain printers containing information about transfers of devices, and five indexes of devices by (1) size, (2) printers, (3) mottoes, (4) initials of designers and engravers, and (5) subjects. An important new dictionary of publishing terms is the "Vocabulaire technique de l'éditeur en sept langues" (Berne, Congrès international des éditeurs; N. Y., R. R. Bowker Co., \$4).

This work, which was prepared by the executive committee of the International Congress of Publishers, in coöperation with the publishers' associations of different countries, consists of an alphabetical list of 3529 terms, in their French form, with full definitions and explanations in French, and, in parallel columns, an indication of the equivalent terms in English, German, Spanish, Italian, Dutch and Magyar. There are indexes for all the languages except French, and a variety of appended material useful in reference work, such as tables of duration of author's rights in different countries, sample pages of proof corrected according to the different national usages, tables of sizes and names of type, etc.

A new edition, the ninth, of Clegg's "International directory of book-sellers' and bibliophile's manual" brings the material included in the 1910 edition to date, continues the special features of that edition and adds as a new feature a useful selected list of national, local and subject bibliographies (N. Y., Dodd, \$2). A new reference book on bibliophiles, from the bookseller's point of view, is "Book collectors and their hobbies" (Washington, Rare Book Shop, 74 p. \$5), which lists the names of some 1900 book collectors arranged by the subjects of their collections. While incomplete and possibly less comprehensive than the list of collectors (arranged by localities) included in the "American library annual," "Book collectors" will have a certain use as supplementing the "Library annual" list because of its subject arrangement.

LIBRARIES

The 1912-13 issue of the "American library annual" continues all the special features of the 1911-12 volume, devoting most space to the useful "Index to dates" already mentioned, but revising and extending its other lists. Other recent reference books on libraries are the new issue of the "Libraries, museums and art galleries year book, 1914," compiled by A. J. Philip (London, Stanley Paul, 8s. 6d.), a revision of the 1910-11 issue, and an entirely new work, the "Index to library reports," com-

piled by Katherine T. Moody (Chicago, A. L. A. Pub. Board, \$1). The latter is a selective, not an exhaustive, index of the reports of some 171 American libraries and library commissions, more useful in the public than in the college or special library.

WILLIAM C. KIMBALL

News of the sudden death, on Jan. 17, of William C. Kimball, chairman of the New Jersey Public Library Commission, came as a shock to his fellow-members, co-workers and friends, and the following minute was prepared to give expression to the appreciation of the members of the commission of the great service he rendered to the library interests of New Jersey, and of their loss at his unexpected departure from among them.

"Mr. Kimball was born in Boxford, Essex Co., Mass., in 1847, was graduated from Putnam Academy, Newburyport, Mass., and moved to Passaic, N. J., in 1887. There he took an active interest in the welfare of the town and was the first president of the Passaic Board of Trade. Mr. Kimball was also instrumental in having the city establish a free public library in 1894, and was in consequence appointed a member of the board of trustees. From that time until his death he was zealous and untiring in the endeavor to advance the library interests of his adopted city and state. Largely through his personal efforts the New Jersey Library Association was formed in 1891. He saw that greater results could be accomplished through organized than through individual effort, and that frequent meetings of librarians would be advantageous to all. Mr. Kimball served upon the executive board of the association many times in a minor capacity, although he on four occasions refused to accept the presidency after his nomination on the plea that some one else should be honored, as he was at all times working for the association, whether in office or not. Eight years' experience with the association made him realize that the field was too large to

be covered by a voluntary organization, and that it was necessary that the state should act; and thereupon he started a movement looking toward the creation of the New Jersey Public Library Commission. It was almost entirely through his work that the act creating the commission was passed and approved in 1900.

"Recognizing his work for the libraries of New Jersey, Governor Voorhees appointed Mr. Kimball as one of the first members of the commission, and he was chosen to be its chairman on May 22, 1900. Until his death he continued to serve in both capacities, just as he had continued to serve the city of Passaic as a member of its board of trustees. Under his direction the Peter Reid Memorial Library was erected in the mill section of Passaic, and branches were established throughout the city. Mr. Kimball had served upon the Council of the American Library Association and was a member of the A. L. A. committee on library training. He was one of the three trustees of the Carnegie Endowment Fund of the A. L. A.

"By his death the state has lost a faithful, intelligent and indefatigable public servant, and the library interests of New Jersey an earnest champion and friend."

The record of Mr. Kimball's life and his work in behalf of libraries in the minute of the commission will be thoroughly appreciated by all in the library profession who have known Mr. Kimball or known of his work. Few outside the profession have taken so large a part in the deliberations of the American Library Association as well as of state and interstate meetings, and the portrait given in this issue will remind many co-workers of his genial and kindly presence.

EVERY good book, or piece of book, is full of admiration and awe; it may contain firm assertion, or stern satire, but it never sneers coldly, nor asserts haughtily, and it always leads you to reverence or love something with your whole heart.—JOHN RUSKIN.

WILLIAM C. KIMBALL,

Late Chairman of the New Jersey Library Commission

LIST OF BOOKS BY AMERICAN
TWENTIETH CENTURY POETS
FOR PUBLIC LIBRARIES

THE following list of representative books by American poets of the present decade has been made by a committee of the Poetry Society of America, and is here published in response to requests from many librarians. The selection is necessarily incomplete. Among living American poets Mr. Stevenson found 165 worthy in his opinion to be included in the "Home book of verse." A selection of half a hundred would naturally be taken from among many equally valuable. Another recommended list may well therefore follow this one in a short time. The desire has been simply to present a group, within reasonable limits as to number, that may be recommended for early purchase by libraries that desire to help their readers to keep in touch with the present marked movement in American poetry.

- Barker, Elsa. The frozen grail; The book of love. Duffield.
- Branch, Anna Hempstead. The heart of the road; The shoes that danced; The rose of the wind. Houghton Mifflin.
- Brown, Alice. The road to Castaly. Houghton Mifflin.
- Burton, Richard. Dumb in June; Lyrics of brotherhood; Message and melody. Lothrop, Lee & Shepard.
- Bynner, Witter. An ode to Harvard. Small, Maynard.
- Carman, Bliss. Complete ed. 2 vols. L. C. Page.
- Carman and Hovey. Songs from Vagabondia. Small, Maynard.
- Cawein, Madison. Selected ed. Macmillan; or, Complete ed., Bobbs-Merrill.
- Coates, Florence Earle. Poems; Lyrics of life. Houghton Mifflin.
- Cone, Helen Gray. The ride to the lady and other poems. Houghton Mifflin.
- Daly, Thomas Augustine. Carmina. Lane; Madrigali. Philadelphia, McKay.
- Dargan, Olive Tilford. Lords and lovers; Semiramis. Scribner's.
- Davis, Fannie Stearns. Myself and I. Macmillan.
- Garrison, Theodosia. The joy o' life; The earth cry. Kennerley.
- Guiney, Louise Imogen. Happy ending. Houghton Mifflin.
- Hagedorn, Hermann. Troop of the guard. Houghton Mifflin.
- Hovey, Richard. Along the trail; The marriage of Guinevere; The birth of Galahad; Taliesin. Duffield.
- Johnson, Robert Underwood. Poems. Century Co.
- Jones, Thomas S., jr. The rose jar. Mosher.
- Kilmer, Joyce. A summer of love. Doubleday, Page.
- Knowles, Frederic Lawrence. Love triumphant; On life's stairway. Dana Estes.
- Le Gallienne, Richard. New poems; The lonely dancer. Lane.
- Lodge, George Cabot. Poems and dramas. Houghton Mifflin.
- MacKaye, Percy. Jeanne d'Arc; Canterbury pilgrims; Uriel and other poems. Macmillan.
- Markham, Edwin. The man with the hoe; Lincoln and other poems. Doubleday, Page.
- Mifflin, Lloyd. Complete sonnets. Oxford University Press.
- Miller, Joaquin. Complete ed. Whitaker & Ray-Wiggin.
- Moody, William Vaughn. Complete poems and dramas. Houghton Mifflin.
- Neihardt, John G. Bundle of myrrh; The stranger at the gate. Kennerley.
- Norton, Grace Fallow. Little grey songs from St. Joseph's. Houghton Mifflin.
- O'Sheel, Shaemus. The blossomy bough. Franklin Press.
- Peabody, Josephine Preston. The piper; The singing leaves; The singing man. Houghton Mifflin.
- Pound, Ezra. Provença. Small, Maynard.
- Reese, Lizette Woodworth. A quiet road; A wayside lute. Mosher.
- Rice, Cale Young. Porzia; Many gods; A night in Avignon. Doubleday, Page.
- Riley, James Whitcomb. Complete poems. Bobbs-Merrill.
- Robinson, Edwin Arlington. Children of the night; The town down the river. Scribner's.
- Rolt-Wheeler, Francis. Nimrod. Lothrop, Lee & Shepard.

Santayana, George. Sonnets. Duffield.
 Scollard, Clinton. The hills of song; Lutes
 of morn. G. W. Browning, Clinton, N. Y.
 Schauffler, Robert Haven. Scum o' the
 earth. Houghton Mifflin.
 Sherman, Frank Dempster. Lyrics of joy.
 Houghton Mifflin.
 Sterling, George. Testimony of the suns;
 A wine of wizardry. A. M. Robertson,
 S. F.
 Stickney, Trumbull. Poems and dramas.
 Houghton Mifflin.
 Stringer, Arthur. The woman in the rain.
 Little, Brown.
 Teasdale, Sara. Helen of Troy. Putnam's.
 Thomas, Edith M. A winter swallow,
 Scribner's; Fair shadowland, The in-
 verted torch, Houghton Mifflin; The
 house of a hundred lights, Small, May-
 nard; Eldorado, Lane; Abelard and
 Heloise, Scribner's.
 Towne, Charles Hanson. A quiet singer;
 Beyond the stars. Kennerley.
 Underwood, John Curtis. The iron muse.
 Putnam's.
 Untermeyer, Louis. First love. Sherman,
 French.
 Upton, Arthur. Selected poems. Mosher.
 Van Dyke, Henry. Poems. Scribner's.
 Viereck, George Sylvester. Nineveh; The
 candle and the flame. Moffat, Yard.
 Wheelock, John Hall. The human fan-
 tasy. Sherman, French.
 Wilcox, Ella Wheeler. The love-sonnets
 of Abelard and Heloise. Conkey.
 Wilkinson, Florence. The far country.
 Doubleday, Page; The ride home, Hough-
 ton Mifflin.
 Winter, William. Poems. Moffat, Yard.
 Woodberry, Geo. Edw. Poems. Macmillan.

A LIBRARY is not a luxury, but one of the
 necessaries of life. No man has a right
 to bring up his children without surround-
 ing them with books, if he has the means to
 pay for them.—HENRY WARD BEECHER.

THE opening of a free public library is
 a most important event in any town. There
 is no way in which a community can more
 benefit itself than in the establishment of a
 library which shall be free to all people.—
 WILLIAM MCKINLEY.

OPENING OF THE HARRISBURG, PA., PUBLIC LIBRARY

HARRISBURG'S new library building was
 opened to the public on Jan. 1 with simple
 exercises, to which everyone was invited.
 Brief remarks were made by Governor
 John K. Tener, State Librarian T. L. Mont-
 gomery, Mayor John K. Royal, Harry A.
 Boyer, president of the school board, and
 Miss Alice R. Eaton, librarian, who gave
 an historical review of libraries in Harris-
 burg. Following the formal declaration of
 the opening of the library by Casper Dull,
 president of the board of trustees, the reg-
 istration books were opened to the public.

The building is of gray native stone,
 with white marble trimmings and wrought
 iron railings; the roof moss-green. The
 style of architecture is colonial, of the
 type most used in early Pennsylvania. The
 building and the site on which it stands,
 with a generous endowment for library
 purposes, are gifts by will of Mrs. Sarah
 J. Haldeman-Haly, who died some years
 ago. The corner-stone of the building was
 laid July 17, 1912.

The site was for many years an old-
 fashioned garden laid out by one of Mrs.
 Haly's ancestors, an early settler of Har-
 risburg, in paths with boxwood borders,
 sun-dial, quaint statuary, and beautiful
 flowers and shrubs. The location is near
 the business center of the city, and on one
 of the principal trolley lines, but has also
 the advantage of overlooking the Susque-
 hanna river at one of the most beautiful
 points of that picturesque stream, and is
 between the two bridges.

The main room of the interior is unique
 in its great length, being 170 feet long by
 40 feet wide. The woodwork and ceiling
 arches are white, the walls a pale buff, the
 base boards, doors and furniture mahog-
 any. The bookcases, seven feet in height,
 run around the walls of the entire room.
 By floor cases the room has been divided
 into reference and reading section, circu-
 lating department and children's section.
 The charging and registration desks, of
 mahogany in the latest Library Bureau de-
 sign, are in the center of the room directly
 opposite the main entrance. Two attractive

THE HARRISBURG PUBLIC LIBRARY—TWO VIEWS OF THE FRONT FACADE

fireplaces, one in the children's section, the other in the reference section, have andirons, and other furnishings in a style appropriate to the colonial interior. There are no railings or stiles to pass on entering, but comfortable settees invite the visitor to linger. The lower floor, at street level, contains the work rooms, trustees' room, stack room, and assembly room. As the building is heated from the city steam plant, furnace rooms could be omitted.

By provision of Mrs. Haly's will the library is to be free to the residents of Harrisburg and vicinity, a population somewhat over a hundred thousand. The Harrisburg Public Library Association was chartered in 1889, and has since that date maintained a library for the use of which a small yearly membership fee was charged. When the new building was erected the trustees decided to have the library entirely reorganized by modern library methods. The books were moved from the old library building during the past summer, cataloged and renovated, the collection being supplemented by many new purchases.

An appropriation for maintenance during the present year has been made by the Board of School Controllers, and they have also given a full set of the textbooks used in the schools for reference use in the library.

When the building opened there were approximately 10,000 volumes cataloged and ready for use, and 60 or more weekly and monthly periodicals on file in the reading room. With the provision made for the growth of the collection, there is every reason to expect the library to fill its true place in the community as the educational center for all classes.

POSTAL LIBRARIES

A NEW scheme has been brought forward by the commissioner of commerce and manufacturers in Lethbridge, Alberta, asking for a "postal library" covering the whole Dominion of Canada.

The Government, it is suggested, is to purchase and own ten million books, shelving them in the post offices, and make

house delivery of them, as they now do letters, by the "posties." The borrower's application is to be made on special post card, carrying sufficient stamps to cover the cost charges, estimated at two cents per week per book. The location of books to be one per head of population served by the local office; and the smaller outlying office—when the need arises—will borrow the desired rarer book from the nearest city office, which will have the longer shelf list.

The estimated cost is \$10,000,000 for book purchases, and say \$5,000,000 for new storage and shelving and stationery, the total being less than the cost of building a super-Dreadnought; and the two cent use-charge is expected to make the enterprise self supporting.

Mr. Joseph P. Tracy, the ingenious author of the scheme, claims among its advantages cheapness of book purchase, handling and distribution, and the easy reaching of all remote frontiers, an enormous frontage, where education is most desirable and to-day non-existent.

His suggestion does not include reading rooms, but does not exclude the higher journalism, and does compass the borrowing of lantern slides, moving picture films, and sheet music, also the hiring of a librarian for research work, at a suggested cost of fifty cents per hour to the inquirer.

The plan is not looked upon with favor by all, as the following letter, contributed to the *Stratford Herald* two days after the first proposal of the scheme, will show:

"The Lethbridge 'Postal Library' scheme seems the thought of one who loves his fellowman. But it at once calls up the query, 'Is it better than the "National" Library which the O. L. A. has at heart, and that the Stratford Library Institute unanimously voted for at its last November meeting here?"

"For those who do not know the 'National,' it may be said that it is a plan for a central depot of valuable information from which any local free library can borrow recorded knowledge, that is quite beyond its money power to purchase.

"The Government, it is expected, will be at the cost of mailing the books both ways; and, as they will—except when in transit—

always be in some library building, the risk by thief and fire loss is small.

"It is hoped that all the legislative, university, historical, and learned societies in the Dominion will take part in this wide plan, and have their special books cataloged—with their locations listed—so that such of these books as they are willing to lend will not have to be purchased for the central distributing office, thus lessening the cost of starting this far-reaching educational institution.

"When organized, so that it has a continuous legal existence, many donations of books and mss. will come to it by will or direct gift.

"The 'National' is devised to help the not-rich who are anxious to study. The 'Postal' to get rid of Mr. Carnegie's beneficence and help the northern frontiersman who is willing to pay book-rental. But, until our thin fringes of pioneers make wider use of the free traveling libraries—such as Ontario provides—than they now do, it does not encourage anyone familiar with actual library work to see in the costly 'Postal' (\$15,000,000 to start) any useful help in the education of those who are winning farms from the brush and prairie.

"Due to sleepiness, the book study of those who spend the daylight in open-air labor is limited, and if they have to pay, it will be less.

"Both plans count on full Government help. The 'National' can make an efficient start on one-tenth of the first cost of the 'Postal,' but will require an annual expenditure."

ANNUAL MEETING AT OXFORD,
1914—PRELIMINARY NOTICE

The next annual meeting of the English Library Association will be held at Oxford, by invitation of the curators of the Bodleian Library and the mayor and corporation of the city, from Monday, Aug. 31, to Friday, Sept. 4, 1914. The vice-chancellor of the university is *ex officio* chairman of the board of curators, and the mayor of the city is chairman of the city library committee.

The association has not met in Oxford since its first annual meeting in 1878.

As it is expected that there will be a large gathering of members of the American Library Association, and also of Canadian libraries, an endeavor will be made to give a kind of international tone to the meeting, and to arrange for papers and

discussions on subjects of wider and more general interest than usual.

The following are among the subjects which may be placed on the program. In each case a member and a visitor will be invited to begin the debate, which will then be open for general discussion:

The place of the library in a university.

The legitimate field of the public municipal library.

The duties of a library committeeman or trustee.

Modern influences antagonistic to the reading of books.

Principles of book selection and book rejection.

The following may be the subjects of special papers:

The development of the library associations since the first annual meeting at Oxford in 1878.

Modern methods of accelerating the supply of books to readers.

A history of the title-page (with lantern slides, and an exhibition in the Bodleian Picture Gallery).

The historical extension of the Bodleian buildings (with lantern slides).

Oxford in literature.

National libraries for the blind.

Recent developments in library planning.

The program will not be limited to the subjects and papers mentioned.

A local committee is making arrangements for the meetings to be held in the Sheldonian Theater, Divinity School, and municipal buildings; for one or two lectures on features of Oxford, and for exhibits by local publishing firms and other industries connected with library matters, especially the Clarendon (or University) Press.

The general scheme of the meeting (subject to alteration) is that papers will be read at the morning sessions, excursions to the Bodleian Library, college libraries, the City Library, the Castle (built by the first Norman governor of Oxford), the cathedral, the colleges, Blenheim Palace (the seat of the Duke of Marlborough), Iffley (with its fine Norman church), and Nuneham (the seat of the Rt. Hon. L. Harcourt, M.P.)—the last two reached by

river—and other places are contemplated for the afternoons; while a reception by the university and city authorities, a *conversazione* in the Ashmolean Museum, the Association dinner, and one or more lectures on Oxford may be arranged for the evenings.

Lists of hotels and lodging houses, with prices, will be issued in due course. It is hoped that the colleges will find themselves able to take in some at least of the guests from abroad.

Further details will be published in ample time, but the council and the local committee desire to take the earliest opportunity of extending a most cordial invitation and welcome to their brothers and colleagues across the seas. Intimation of intention to be present should be sent in as early as possible, so that full particulars may be addressed in good time to those who expect to attend the meeting.

On this occasion librarians from the United States of America, the Dominions of Canada and Australia, the Union of South Africa, India, and the continent of Europe, are invited to attend without the payment of any subscription. Residents in the United Kingdom, not already fellows or members, may become local members on payment of the subscription of one guinea.

Letters and other communications in regard to attendance, accommodation, and local arrangements and excursions should be addressed to the librarian, Bodleian Library, Oxford, or to the librarian, City Library, Town Hall, Oxford.

Letters on subjects and papers in the program should be addressed to the honorary secretary of the publications committee (Henry Bond), or to the honorary secretary (L. Stanley Jast), at the headquarters of the Association, Caxton Hall, Westminster, S. W.

EUROPEAN TOUR OF THE AMERICAN LIBRARY ASSOCIATION

THE travel committee have planned in connection with the Bureau of University Travel the following trip to Leipzig, via the Mediterranean and Italy. It is believed this trip will meet the wishes of those who

THE NEW HARRISBURG PUBLIC LIBRARY—ONE END OF THE LONG ROOM, 170 X 40 FEET, WHICH TAKES UP THE ENTIRE MAIN FLOOR

wish to go to Leipzig and see something of the continent en route. As reservations must be made, both going and returning, as soon as possible, the committee asks responses from those contemplating such a trip at the earliest possible moment. Notify F. W. Faxon, chairman travel committee, 83 Francis street, Fenway, Boston, stating if you are likely to be a member of this party. Following is the projected itinerary:

- July 11. Sail from Boston by the steamer *Canopic*, \$90 berth (or from New York by the steamer *Carpathia* July 9.)
17. The Azore Islands. A visit to the old church and the gardens.
19. Madeira. Excursion to Mount Church.
21. Gibraltar. Carriage drive about the city and across the neutral ground to Spain.
22. Algiers. A visit to this interesting Arab town.
- 24, 25. Naples. A visit to the remarkable museum and a drive to Posillippo.
26. Amalfi, Sorrento.
27. Capri. By steamer to this beautiful island and a visit to the Blue Grotto.
28. Pompeii. A leisurely view of the ruins and luncheon in the village.
- July 29 to Aug. 3. Rome. Careful study of the monuments of Republican and Imperial Rome. The Forum, the Palatine, the Colosseum, the great Baths, the Pantheon. A visit to St. Peter's Cathedral and other great churches. The Vatican, the Sistine Chapel, the museums and galleries. Drive out the Appian Way to St. Paul's Without the Walls, and to the catacombs.
- Aug. 4 to Aug. 7. Florence. The most important art center in the world. Visits to the Uffizi and Pitti Galleries and to the Academy, the Cathedral, Baptistry and famous churches. The archaeological museum, the Tomb of

the Medici, excursions to San Miniato and Fiesole.

Aug. 8 to Aug. 10. Venice. By gondolas to the churches and palaces. Visit the Cathedral of St. Mark, the Doge's Palace and the Academy. Excursion by steamer to the Lido.

Aug. 11. Innsbruck. In the heart of the Tyrol en route to the capital of Bavaria.

12-13. Munich. In some ways the most charming of German capitals. We shall visit the galleries of painting and sculpture and the Royal Palace.

14-15. Nuremberg. Most mediæval of mediæval cities and most famous amongst the ancient cities of the German Empire.

Aug. 16 to Aug. 18. Leipzig. International Exhibition of Graphic Arts.

Return by any single cabin steamer of the Leyland Line, from Liverpool to Boston, rate \$55.

Total cost of the trip from Boston, July 11, to Leipzig, Aug. 18, with transportation to London and return steamer berth at \$55, is \$370.

The organized tour ends at Leipzig, it being the thought of the committee that the thirteen days intervening before the meeting of the librarians at Oxford, Aug. 31, may better be left to the individual wishes of the traveler. However, the Bureau of University Travel, in whose care the arrangements for the entire trip have been placed, will provide transportation direct from Leipzig to London within the price quoted for the trip, or will arrange for three days in Berlin, a day in Frankfurt, a day on the Rhine, and five days in Paris, at an additional cost of \$100, for those who desire to arrange such a disposition of the days between Aug. 18 at Leipzig and Aug. 31 at Oxford.

The price quoted includes steamship accommodations as mentioned above; shore excursions at the intermediate stops as mentioned above; hotels of the type of the Royal at Naples, the d'Angleterre at Rome, the Minerva at Florence, the Victoria or Grand at Venice, the Rheinischerhof at

Munich, the Württembergerhof at Nuremberg, and the Bristol at Dresden, on the American plan, to include lodging, breakfast, luncheon, dinner, with the ordinary tips and fees; carriages where necessary for sight-seeing excursions; second class rail and first class river, lake and channel steamers; transportation of steamer trunk for the ocean voyages only, which will be transferred from Naples to Liverpool free of cost; transportation, for the land portion of the journey, of a large portmanteau or suit case with small hand bag. Return passage will be provided by such steamer and on such date as desired, providing accommodations are available, as requested at the time that registration is made.

In general it is intended to include all necessary expenses of travel with the exception of stewards' fees on transatlantic liners and such distinctly personal items as personal laundry.

A preliminary deposit of \$50 will be required to reserve a place in the party and steamship accommodations. This the Bureau of University Travel will return on demand any time prior to four weeks before the date of sailing.

Many readers judge of the power of a book by the shock it gives their feelings.—
LONGFELLOW.

American Library Association

THE 1914 CONFERENCE

The city of Washington has been unanimously chosen by the Executive Board as the next meeting place of the Association. The date has been definitely set as May 25 to 30.

Judging from the comments and opinions of various members from widely different sections of country, the decision is a popular one and will be generally welcomed. The board had been of the impression that a middle-west meeting place should be selected, or at least that a point as far east as Washington should not be chosen, in view of the 1913 meeting in that section. In order to ascertain the real feeling of the middle-west librarians a "straw vote" was taken. The secretary selected eighty representative members of the Association residing in the middle-west states and asked their preference, Washington in May or Mackinac Island the first week in July. The

"returns" show Washington, 50, Mackinac Island, 23. This seemed to indicate clearly that the middle-west librarians and library assistants looked with much favor on Washington. The national capital will undoubtedly be popular with the East and the South, and the people from the Far West will not mind another's day's ride, for they are used to it, or else they can wait until 1915, in the hope that the Association then will come to their region.

Of course it will be impossible for all the delegates to be housed under one hostelry in Washington. Headquarters will be at the New Willard, the finest hotel in the capital, but accommodations can only be had there for about 200 members. The rates of the New Willard, however, will be inconveniently high to many. Across the street the New Ebbitts offers accommodations for 400 or 500 at a rate of \$3 a day and up, American plan. A large number of other hotels in the vicinity offer a wide range of service and prices. Library assistants will find room and board if desired as low as \$2 and \$2.50 per day. A rooming bureau will be established in Washington, through which the members will be helped to secure the class of accommodations they desire. The Executive Board at its recent meeting passed a vote restricting the services of the rooming bureau in securing reduced rates at the hotels to members of the Association, of the affiliated societies, and of their families. It has been found that a number of librarians availed themselves of the reduced rates at the hotels in time of conference without joining either the Association, or affiliated societies, and as there is a heavy expense to the Association in conducting a conference it seems only just and fair that those profiting should bear their share of the expense by joining the Association and paying the very reasonable membership fee.

The conference will be opened on Monday and end on Saturday. The program committee, fully appreciating the numerous library and other educational features of Washington which should be visited, propose to have only four general sessions instead of the usual six, and the various sections and affiliated societies will be urged also to lighten their program so as to give more free time to delegates. It is hoped that a small pamphlet will be compiled and distributed to all registering, enumerating various libraries in the District, how to reach them, hours they are open, principal attractions of each, and how they may serve the librarians of the country at large.

A special effort will be made to have our Canadian members attend this Washington meeting in large numbers, as a return visit to ours to their national capital in 1912.

The program committee are already engaged on the program. Its general tone and nature will of course be influenced by the fact of its presentation at the national capital and in proximity to the national library and the various departmental libraries which perform a more or less national service. The meetings will mostly be held in the New Willard hotel. Perhaps for some of the large general sessions other arrangements will be made. A number of pleasant social features are being tentatively planned. The local arrangements will be largely in the capable hands of Dr. Bowerman, the librarian of the Public Library of the District of Columbia, and of course the advice and coöperation of Dr. Putnam will be at all times available and utilized. Post-conference plans have not yet been formulated, but something interesting, enjoyable and relaxing may be confidently expected from the resourceful and experienced chairman of the travel committee.

Washington will be such a magnet that it is unnecessary to urge librarians to plan to attend this conference. It will undoubtedly be one of the largest in the history of the Association. It is hoped that each one who goes will carry home definite and clearer knowledge how his own community and his own library may be helped by the Library of Congress, by the office of the Superintendent of Documents, by the library of the Bureau of Education, the Department of Agriculture, and the other departmental systems. That will make the 1914 Washington conference a success worthy of repetition in the future.

G. B. U.

A. L. A. PUBLISHING BOARD

Meeting of Publishing Board in Chicago, Friday, Jan. 2, 1914. Present: Henry E. Legler, chairman, C. W. Andrews, A. E. Bostwick, H. C. Wellman, and the secretary. The report of Mr. C. B. Roden, treasurer, was presented and received, and referred to the chairman of the finance committee for auditing. The report here follows:

REPORT OF TREASURER—JAN. 1-DEC. 31, 1913

Receipts

Balance, Union Trust Company, Chicago, Jan. 1, 1913.....	\$2,169.35

Travel.....	200.00
Stationery and Printing.....	175.00
Reprints.....	1,700.00
Balance (available for new publications, etc.).....	2,438.34
	\$17,863.34

The advisability of preparing and printing additional lists of foreign books was considered, and the secretary was instructed to proceed with securing the preparation and publication of such lists as seem to be in sufficient demand to warrant adequate financial support.

The secretary reported that Miss Marvin's "Small library buildings" was entirely out of print and that Miss Marvin, owing to pressure of other work, could not be secured to prepare a revised edition. Plans for securing a suitable editor were duly discussed.

The advisability of preparing a list of subject headings for children's books was taken under consideration. The secretary reported a conversation with Miss Margaret Mann, of Pittsburgh, in which she expressed the opinion that a separate list was not needed and would largely duplicate the lists already prepared for adult work, but that a pamphlet on this subject, listing certain exceptions for a children's catalog and treating how the various divisions of knowledge should be handled as regards subject headings for children's use, would entirely supply the need. It was voted that the secretary communicate further with Miss Mann, asking her to outline further her recommendations and ascertain whether she would undertake the preparation of such a pamphlet.

It was voted that a pamphlet on library publicity be prepared and that Mr. Charles E. Rush be requested to undertake the preparation. Mr. Wellman was designated as a committee of one to whom the manuscript when received should be referred for approval and suggestion.

The question of periodical cards was next brought to the attention of the board. Dr. Andrews, a committee of one on periodical cards, and the secretary explained to the board that owing to an increase in cost of printing, a new contract had been made with the Library Bureau, through which it was hoped the cost of printing the cards would be met but that nevertheless there had been a loss of about \$540 during 1913. It was voted that the chairman and Dr. Andrews constitute a committee to devise means to lessen the deficit on periodical cards.

Miss May Masee, editor of the *Booklist*, presented certain features of the editorial work of the *Booklist*, stating that very gratifying coöperation was being secured in Chicago and vicinity, at the University of Illinois and in a number of other places. A number of questions of policy were discussed. On motion of Mr. Wellman it was voted that the Publishing Board consider the advisability of changing the title of the *Booklist* and invite the members of the Association to suggest suitable names. The secretary was requested to have this vote printed in the *Bulletin* of the American Library Association, and also to send the same to the library periodicals.

The publication of an index to songs, which subject Mr. Wellman had previously brought to the attention of the members, was discussed. It was voted that the subject be referred to Mr. Wellman as a committee of one for a preliminary survey as to the cost of preparation of such an index, what should be included therein, where, how, and by whom the work should be done. The secretary was instructed to ascertain whether the larger libraries have at the present time such an index to songs and whether they would be interested in having such a list printed.

The publication of an index to kindergarten songs was next considered, this subject, having been recently brought to the attention of the board by Dr. Bostwick, who had previously informed the board that the St. Louis Public Library had compiled for its own use such an index. It was voted that the secretary secure estimates of the cost of printing this index,

Dr. Bostwick having supplied the secretary with information as to the nature and amount of material.

The secretary reported correspondence with Mr. H. M. Kent, of the Metropolitan Museum of Art, relative to his proposal that the board revise Sturgis and Krehbiel's "Bibliography of fine arts." Mr. Kent reported that Prof. W. H. Goodyear had a large collection of notes which would be serviceable for such a revised edition which could probably be secured. The secretary was instructed to secure further information.

The secretary reported that he had recently circularized libraries inviting subscriptions to a supplement to the A. L. A. "Index to general literature," cumulating for this purpose the "Annual library index, 1900-1910." He called attention to the large amount of duplication between this material and the "Readers' guide to periodical literature, 1905-1909," and it was taken by consent by the board that the board's cumulation should include only all material not in the above volume of the "Readers' guide." The secretary was requested to report on the cost of the work and a suitable person available to compile it.

The secretary was instructed to take up with Miss Hitchler the desirability of revising her "Cataloging for small libraries."

The board authorized the secretary to secure reprints of Miss Martha Wilson's library list of "Books for high schools," to be sold as a Publishing Board publication.

The secretary reported that with the advice of the chairman he had arranged for reprints to be handled by the Publishing Board of Miss Mary J. Booth's article on "Material on geography" to be reprinted from the *Journal of Geography*, January, 1914.

It was voted on motion of Dr. Bostwick that the secretary secure a suitable person to compile a list of all material available without cost which would be useful to small libraries.

EXECUTIVE BOARD

Meeting of the Executive Board at Hotel La Salle, Chicago, Wednesday evening, Dec. 31, 1913. Present: President Anderson, H. C. Wellman, Gratia A. Countryman, C. W. Andrews, W. N. C. Carlton, T. W. Koch, H. W. Craver, Herbert Putnam.

The report of the treasurer, Mr. C. B. Roden, for the year ending Dec. 31, 1913, was read in his absence by the secretary. The report was as follows:

REPORT OF THE TREASURER—JAN.-DEC., 1913

Receipts

Balance, Union Trust Company, Chicago, Jan. 1, 1913.....	\$3,395.29
Headquarters collections, membership dues, etc.....	6,737.60
Trustees Endowment Fund, interest.....	350.00
Trustees Carnegie Fund, interest.....	4,009.90
A. L. A. Pub. Board, installment on Headquarters expense.....	2,000.00
Estate of J. L. Whitney.....	125.46
Interest on bank balance, Jan.-Dec.....	74.55
	<hr/>
	\$16,692.80

Expenditures

Checks No. 40-51 (Vouchers No. 615-806, inc.).....	\$9,290.25
Distributed as follows:	
Bulletin.....	\$1,493.31
Conference.....	566.61
Committees.....	104.60
Headquarters:	
Salaries.....	5,100.00
Add. services.....	493.12
Supplies.....	356.27
Miscellaneous.....	275.00
Postage.....	200.00
Contingencies.....	95.00
Travel.....	180.88
Trustees Endowment Fund, Life memberships.....	300.00
C. B. Roden, Treas. J. L. Whitney Fund.....	125.46
A. L. A. Publishing Board, Carnegie Fund int.....	4,009.90
	<hr/>
Balance Union Trust Co....	\$3,392.65
G. B. Utley, Balance National Bank of Republic..	250.00
Due from Publishing Board on 1913 account.....	500.00
	<hr/>
	\$4,142.65

James L. Whitney Fund

First installment (Feb. 4, 1913).....	\$104.34
Interest to June 30.....	1.30
Second installment (Aug. 1, 1913).....	21.12
	<hr/>
	\$126.76

Respectfully submitted,
(Signed) CARL B. RODEN, Treasurer.

CHICAGO, Dec. 31, 1913.

On motion of Dr. Andrews it was accepted and placed on file.

The following report of the finance committee was presented by the chairman, Dr. C. W. Andrews:

REPORT OF FINANCE COMMITTEE

The finance committee, in accordance with the provisions of the constitution, has considered the probable income of the Association for 1914 and submit the following estimate, showing also the estimate for 1913 and the actual result for 1913:

	1913	1913	1914
	Estimated	Actual	Estimated
Dues.....	\$6,500.00	\$6,737.60	\$7,200.00
Inc. Carnegie Fund.....	4,500.00	4,009.90	4,200.00
Inc. Endowment Fund.....	375.00	350.00	350.00
Interest.....	40.00	74.55	60.00
Sales of publications.....	10,500.00	11,311.95	11,100.00
	<hr/>	<hr/>	<hr/>
	\$21,915.00	\$22,484.00	\$22,910.00

The committee is prepared to approve appropriations to the amount of \$11,810, and also the appropriation to the use of the Publishing Board of the total amount of sales.

The committee has designated the chairman to audit the accounts of the secretary and treasurer, and Mr. F. O. Poole to audit those of the trustees. Their reports will be made part of the formal report of the finance committee to the Association at its annual meeting.

No account is here taken of the income from the James L. Whitney fund. The committee recommends that it be allowed to accumulate until such time as the amount shall warrant permanent investment.

Respectfully,

(Signed) C. W. ANDREWS, Chairman.

DEC. 31, 1913.

On motion of Dr. Putnam it was accepted and placed on file.

The following budget was adopted for the year 1914:

BUDGET, 1914

Estimated Income

Membership Dues.....	\$7,200.00
Income Endowment Fund.....	350.00
Income Carnegie Fund.....	4,200.00
Interest.....	60.00
Appropriation from Pub. Board.....	2,500.00
	<hr/>
	\$14,310.00

Estimated Expenses

Bulletin.....	\$1,400.00
Conference (including \$100 for publicity).....	600.00
Committees:	
Public documents.....	\$10.00
N. E. A.....	20.00
Library administration.....	20.00
Library training (\$400 reappropriated from balance of 1913)	
Bookbuying.....	25.00
Bookbinding.....	25.00
Federal and state relations.....	15.00
Travel.....	150.00
Work with blind.....	5.00
Cost of cataloging.....	25.00
Code for classifiers.....	20.00
Leipzig exhibit.....	250.00
Miscellaneous.....	25.00
	<hr/>
	590.00
Salaries:	
Secretary.....	3,000.00
Asst. secretary.....	1,200.00
Stenographer.....	900.00
	<hr/>
	5,100.00
Additional services.....	
Supplies.....	600.00
Postage, transportation and telephone.....	400.00
Miscellaneous.....	325.00
Income Carnegie Fund to Publishing Board.....	275.00
	<hr/>
	4,200.00
Contingencies.....	620.00
Travel.....	200.00
	<hr/>
	\$14,310.00

On motion of Dr. Andrews it was voted that there be appropriated for the use of the Publishing Board the income of the Carnegie Fund, estimated at \$4200, and all proceeds

from sales of publications, estimated at \$11,100, excepting the amount of \$2500 agreed upon by the Publishing Board as its appropriation towards its support of the executive office of the Association.

A report of progress was received from Mr. A. G. S. Josephson, chairman of the committee on the cost and methods of cataloging. The report was ordered to be placed on file.

On motion of Dr. Andrews it was voted that the president, Mr. Carlton, and the secretary be authorized to increase the appropriation for the use of the committee on method and cost of cataloging at their discretion from contingencies.

On motion of Mr. Craver it was voted that \$400 from the 1913 balance be appropriated for the use of the committee on library training.

On motion of Dr. Andrews it was voted that the following bills be paid from the unexpended balance of 1913:

Tucker-Kenworthy Company.....	\$61.10
Joseph Halsted Company.....	250.00
Chicago Telephone Company.....	10.60

On motion of the board the chair appointed a committee of three to report at the next meeting of the board nominations for a nominating committee. The chair appointed Messrs. Andrews, Carlton and Koch.

The secretary announced receipt of a communication from the Commission Permanente des Congrès Internationaux des Archivistes et des Bibliothécaires of Brussels, requesting the American Library Association, as a participating association in the Brussels conference of 1910, to name two members of the American Library Association to serve as members of a permanent committee. On motion of the board nominations to this committee were referred to the same committee as that designated to make nominations for the nominating committee.

The secretary reported that Mr. Jast, honorary secretary of the Library Association of the United Kingdom, had, in behalf of his association, cordially invited the A. L. A. to be officially represented at the English library conference at Oxford, Aug. 31, 1914. On motion of Dr. Putnam, it was voted that in consequence of this invitation from the secretary of the L. A. U. K. that most cordial appreciation and thanks be given, and that the president be requested, particularly in view of the interesting program proposed, to endeavor to arrange for an adequate representation not only at the conference, but also upon its program.

On motion of Mr. Wellman it was voted that the travel committee be reimbursed for

their actual expenses pro rata to the extent of the appropriation to that committee.

Mr. Charles F. Hatfield, at the invitation of the board, outlined briefly plans for accommodating conventions and educational congresses at the Panama-Pacific Exposition at San Francisco in 1915 and the earnest desire of the exposition authorities for the American Library Association to hold its conference that year in San Francisco or vicinity. The board assured Mr. Hatfield that this subject would receive their careful consideration.

The board then passed to a consideration of the place of meeting for 1914. After the various invitations had been read and discussed it was unanimously voted on motion of Mr. Carlton that the Association hold its next conference in Washington, D. C., on some date prior to June 1, 1914, provided satisfactory accommodations can be secured.

Adjourned.

EXECUTIVE BOARD

Meeting of the Executive Board at Hotel La Salle, Chicago, Friday afternoon, Jan. 2, 1914. Present: President Anderson, Mr. Wellman, Miss Countryman, Messrs. Andrews, Carlton, Koch and Craver.

Dr. Frank P. Hill, chairman of the special committee on an A. L. A. exhibit for the Book and Graphic Arts Exposition at Leipzig, appeared before the board and outlined the present situation, stating that recent correspondence with the Leipzig authorities had led to some uncertainty whether adequate space would be provided for such an exhibit. The committee had been successful in securing funds for prosecuting the work, and were fully prepared to proceed with the collection and preparation of material if it seemed wise to do so. On motion of Dr. Andrews it was voted that the matter be left in the hands of the committee with the approval of the president.

Dr. Andrews, chairman of the committee to nominate a nominating committee, stated that the committee nominated the following persons: A. E. Bostwick, Margaret Mann, Agnes Van Valkenburgh, A. L. Bailey and H. L. Leupp. On motion of Mr. Carver, seconded by Miss Countryman, it was unanimously voted that these persons constitute the nominating committee.

Dr. Andrews, in behalf of the same committee, nominated as members of the permanent committee of archivists and librarians Herbert Putnam and E. C. Richardson. Upon motion of Mr. Wellman it was unanimously voted that these members be appointed.

It was unanimously voted that a committee

of three on publicity be appointed by the president.

On motion of Mr. Wellman it was voted that the printing of the report of the committee on lighting and ventilation be referred to the secretary with power.

On motion of Dr. Andrews it was voted that it is the opinion of this board that the income of the James L. Whitney fund might properly be used for bibliographical work other than that which can be undertaken with the income of the Carnegie fund, and that for the present the Whitney fund be allowed to accumulate.

On motion of Dr. Andrews it was moved that the president appoint a committee to provide suitable resolutions or minutes on the death of Dr. Reuben Gold Thwaites to be submitted to the Association at its annual meeting.

Voted on motion by Dr. Andrews that the travel committee and the rooming bureau be asked to make provisions at the annual conference only for members of the A. L. A., of the affiliated societies and of their families.

Adjourned.

COUNCIL

The Council held sessions on Thursday afternoon, Jan. 1, and Friday afternoon, Jan. 2. The following 39 members were present: E. H. Anderson, H. C. Wellman, Gratia A. Countryman, C. W. Andrews, W. N. C. Carlton, T. W. Koch, H. W. Craver, Herbert Putnam, W. H. Brett, F. P. Hill, A. E. Bostwick, Henry E. Legler, F. O. Poole, Elizabeth B. Wales, Myra Poland, C. B. Roden, Sula Wagner, Mary L. Titcomb, A. S. Root, Margaret Mann, M. E. Ahern, Alice S. Tyler, G. F. Bowerman, G. H. Locke, Clara F. Baldwin, Josephine A. Rathbone, Eliza G. Browning, M. S. Dudgeon, W. H. Kerr, Mary W. Plummer, S. H. Ranck; and the following as representatives of state library associations which have affiliated with the A. L. A.: Lois A. Spencer (Michigan), W. M. Hepburn (Indiana), Mary E. Downey (Ohio), F. K. W. Drury (Illinois), Martha Wilson (Minnesota), Florence Whittier (Missouri), Lilly M. E. Borresen (South Dakota), Mrs. M. C. Budlong (North Dakota).

FIRST SESSION

The report of the committee on the relations of the public library to the municipality presented to the Council at the Kaaterskill meeting (for text of report, see *Proceedings* 1913, p. 243-245) was unanimously adopted.

"Greater publicity for the Association" was the next subject taken up, W. H. Kerr open-

ing the discussion. His paper, recommending the adoption of more up-to-date methods of publicity both for conferences of the A. L. A. and for the work in general, with specific illustrations and suggestions, will be reprinted in full later. It was followed by a general discussion of the subject.

President Anderson said that the Executive Board the evening before had discussed publicity plans for the Washington conference. Most of the leading papers of the country have a Washington correspondent, and each librarian who attends the meeting should get in communication with his home correspondent and plan to supply his home papers with conference news.

Mr. Bowerman suggested that perhaps a series of syndicated articles on the conference and on various phases of library work could be gotten into the papers. Greater use might be made of the publicity methods of the U. S. Bureau of Education. Commissioner Claxton's interest in library work and in the American Library Association is very great, and he could perhaps be interested in sending out through his very admirable press service material about libraries and library affairs.

At this point the president announced that the secretary had received a letter from Mr. J. C. Dana addressed to the Council, which the secretary would read. The letter was as follows:

Librarians are keepers of books and guides to their use. Books are printed. It would seem that librarians, above all others, should be familiar with the use of print. In view of the greater brevity, clearness and completeness of most printed statements over those delivered *viva voce*, it would seem that librarians should much prefer suggestions made in print, which they can read at their convenience, to those made in talk or lecture.

Do I make myself plain? I am trying to say in effect that librarians ought to prefer print to talk, and ought to be more moved by printed statements than by spoken words.

It seems, however, that librarians cannot overcome their hereditary tendencies. Human beings gained knowledge and ideas through spoken words for long thousands of years before they invented the art of writing; and even the cultivated librarian, loving books, devoted to them, and great believer in the efficiency of print as a tonic to his own progress, feels compelled to insist that new ideas be presented to him, not through the eye by the printed page, but through the ear by the spoken voice.

Do I as yet make myself plain? In effect I am trying to say that librarians are better listeners than they are readers. They understand what they hear better than they understand what they read. They are hereditary listeners. The great skill in reading which makes him who has it prefer print to talk, is won only by prayer and fasting, and librarians have not won it. Am I right?

If I am not right, then why do you librarians insist upon traveling scores, and hundreds, and thousands of miles to meet and talk to one another, whenever you find need for considering important matters affecting your calling? You cannot, by way of sufficient excuse, claim that you thus spend time and energy in travel merely that you may see one another and hear one another's voices for a few moments?

No, you must feel your own reading limitations; that you are unable to get out of print what the writer of print wishes to convey; that you are all grievously ear-minded, and have never so devoted yourselves to acquiring skill in that use of print, to the promotion of which you devote your lives, that you can understand it clearly when you see it.

Speaking for myself, and my own ideas on library organization and management, let me say that if you had acquired high skill in this art of reading you would have before now, and more than once, read in print the things I shall here set down, would have been convinced that they are important, and would have given them more careful thought than you can possibly give to them in the few moments they will receive in a gathering like this. I say this, not in any bumptious spirit, but only because I have been plainly told I would here be welcome and listened to with interest if I said the things I have here written.

Once more, to you my ear-minded friends, talkers, listeners, and not readers, let me reach your ears through the glottis of your secretary and get at your intellectuals through your auditory centers and present some of the criticisms and suggestions I have often made concerning our organizations:

1. The A. L. A. *Booklist* is an admirable monthly record of the best of the new books with expert and unprejudiced reviews attached. Do not deprive the general public of the use of this excellent tool, published by our Association. No one has yet proven that it would not be widely subscribed for if it were presented in proper form and well advertised. The experiments made to discover if there are a few thousand people in the

country who would pay a dollar a year for a modest but efficient book-valuating journal, have been meager in the extreme.

It is a great mistake for a quasi-literary institution of 2500 members, like our association, supported by public money, to devote a good slice of its income to the preparation and issuance of a publication that would probably be welcomed by the reading public of this country, and then, in effect, to conceal it from that public.

And it is bad business for our association to spend \$1000 to \$2000 per year in underwriting a publication which, in its present form and under its present method of handling, seems not to be needed.

Change its name; change its form; cease to say that it is a trade journal to be confined in its use to librarians only; advertise it widely, and prove that librarians are not merely good administrators of book collections, but have book knowledge and can use it to the pleasure and profit of buyers and readers of books everywhere.

2. The A. L. I. should go out of existence. The leaders of library work in this country ought not to form an organization which pretends to represent the high water mark of achievement in that calling, and then permit that organization to exist solely for the sake of one or two quite unimportant meetings each year; meetings at which few papers are presented and those such as would not find admission even to a modest metropolitan journal; and where the discussion is nearly all impromptu in every bad sense of the word. For the credit of our calling the Institute should either demonstrate in some way the ability of its members to study, to investigate and wisely to report on topics of importance, or else it should go out of existence. It should make good or quit.

3. Our Association each year persuades certain of its members to prepare for the annual meeting papers on many aspects of our craft. These papers are supposedly as good as members of the Association can produce. How good are they?

Some of them, and particularly some of those dealing with the details of library administration, are simple, brief, direct and useful. They are, of interest to library people only. Those dealing with more general aspects of our library work, with books, literature, reading and the like, ought to be, some of them at least, so strong, so original, so well written as to make them grateful to the general public. Are they? If they are such as would be grateful to the general public, then they

ought to be so published that the general public can have access to them.

They are now hidden from the public in a vast volume of appalling size and thickness and of an exceeding dryness to the public in general.

If there is no nutritious and tasty mental pabulum in so much of our annual proceedings as library workers themselves—not imported men of letters—produce, let us see to it that some gets in. And then let us extract it from the Almighty Library Aggregation of piffle and technique which we must annually produce—and we always do it very well—and print it in some taking guise, and let our friends see it and even dare them to read it.

4. I believe it would be at once admitted by every competent man of affairs to whom the matter might be submitted, that the best interests of our association would be served by having headquarters in New York City. The theory once held by some that the middle west is in dire need of the information and stimulus that it can receive from headquarters has become a little humorous, and is perhaps not now entirely grateful to the middle west itself. Headquarters is a center for business, and the business is mostly that of answering letters of inquiry, and of compiling, printing and publishing. The center of these forms of enterprise is New York City. If it were ever demonstrated, as perhaps it can be, that the small libraries on the eastern seaboard are far more in need of aid and stimulus than are those of the middle west, then the argument of headquarters in New York City would seem quite complete even to westerners.

Ten times as many library workers, printers, authors, students, publishers, booksellers, and journals are found within say three hours ride of New York as are found within the same distance from Chicago.

The Association could move headquarters, of course, if it cared to. Probably it will continue not to care. These things are done by the leaders. This letter is being read to the leaders—isn't it? They care nothing about local pride and are moved solely by what seems the best interests of the Association.

But Chicago, you say, gives—and it is to be praised therefor—good rooms rent free, and New York offers nothing. Well, I admit that that is like Chicago and New York. I also claim that a few men in and near New York could raise funds—if they would put their hands to the work—which would far exceed all that Chicago would offer. I would be one to try. Are there any others?

5. We have met most unfortunate condi-

tions at two of our recent annual meetings on distant prairies and in mountain fastnesses. Is it not possible for our guiding spirits to realize that 1914 differs so much in manners and customs, number of members, and other respects as to make what was wise and proper as a meeting place in 1904 no longer such?

Why not try a city? Our powers of attraction cannot be notably weaker than those of other rather important and somewhat learned associations which find they can hold gatherings in great cities. We could probably meet even in New York and not have any of our members led astray permanently. The place is well lighted and the police are models for the information desks of our best libraries. Let us visit distant lakes and mountains hereafter only on post conference trips.

Regretting that certain duties here prevent my enjoying your visible and auditory presence, I sign myself,

Sincerely yours,

(Signed) J. C. DANA.

Dr. Hill said it seemed to him there were good suggestions in what Mr. Dana had written, particularly in relation to the *Booklist*. It was in line with the subject of publicity at present before the Council, and he had wondered himself why the *Booklist* could not be made an avenue of publicity for the Association because it is the best thing we do and because its distribution among the general public would show that we are doing something besides handing out books. "The only objection I have to Mr. Dana's letter is that he does not make any plans for building up the structure which he is always so ready to tear down."

Mr. Legler said that this was not the first time that those who were on the Publishing Board have heard about the *Booklist* from Mr. Dana, that often before he has wanted to have the *Booklist* changed; to have the matter changed, the form changed and the character changed, in fact everything about the *Booklist* changed except perhaps the quality of the paper. In other words, that Mr. Dana did not want an A. L. A. *Booklist* published; what he wants is a library journal for the public. The Publishing Board considers that the A. L. A. *Booklist* is performing a very important function to the smaller libraries in particular in giving to the library boards and librarians in the smaller places the matter most valuable to them, enabling them to get knowledge of the current books and to get an evaluation on these books. That this has been done and that the *Booklist* meets the

manifest need has been often expressed through various library associations, commissions and other agencies. Of course, it is entirely within the province of the American Library Association to vote that the A. L. A. *Booklist* be discontinued and something else be started in its place. We know that the suggestions and criticisms made in this letter and which have been reiterated year after year by Mr. Dana in communications to the Publishing Board have their rise in a desire to have something entirely different published from that now sent out by the Publishing Board to the smaller libraries all over the country. Coming to the matter of publicity, Mr. Legler said he had read with much interest some of the clippings passed around by Mr. Kerr on the English library conference, but doubted very much whether it would be possible to get that sort of matter into the columns of the press in this country. The serious character of the reports, the lack of prominent headlines, is very different from what we get in this country. The method of dealing with news differs so greatly in the two countries that he did not think it possible to carry out the plans which Mr. Kerr had in mind. The library profession hardly realize how much publicity is already given by the newspapers of this country to library interests, though this is perhaps not done systematically. "I know that just prior to the last conference the secretary made a very excellent campaign toward securing publicity for the remarkably good papers read at that meeting. A good deal of fugitive literature in the way of newspaper clippings came to my desk, and there must have been a great deal of mention made of the meetings throughout the country. This stray literature came to my desk from the Pacific coast, from the middle west, from Florida and from the east. Some of the New York newspapers gave considerable space to some of the discussions held at Kaaterskill."

In response to a request Secretary Utley outlined what had recently been done at headquarters in the way of publicity work, mentioning the news items sent out through the Associated Press, the direct circularization of newspapers, the attempt to get members to supply publicity to their local papers, and the special efforts made at the time of the convention to get participants in the program to submit their papers two weeks in advance, in order that these might be used as the basis for publicity. At the request of the secretary a committee on publicity to aid in this work has recently been authorized by the Execu-

tive Board, and the Executive Board have appropriated \$100 for publicity work in connection with the Washington conference.

Dr. Bostwick said that newspapers were trouble hunters, and that to most of them news meant trouble. He questioned whether what we did at the conference or anywhere else traveled very far through the newspapers unless they could put the trouble color to it.

Dr. Hill asked Mr. Legler, as chairman of the Publishing Board, if any report had ever been made to the Association in regard to the suggestions of Mr. Dana in regard to changing the name, form and nature of the *Booklist*. Mr. Legler said that the Publishing Board annually reports to the Association in print as required by the constitution, and that in some of the reports mention had been made of the suggestion that the name and form of the *Booklist* be changed and the reason given why, in the opinion of the Publishing Board at least, it would not be advisable to make the changes sought.

Miss Ahern said she had recently talked with Mr. Dana regarding his ideas as to changes in the *Booklist*. His suggestion was to make it the same size as the old *Harper's Weekly*, to give it an attractive cover, and to put it on the news stands of the country. Its contents were to be made up by people of national reputation, or at least of high standing among literary people, and the libraries should buy this *Booklist* and place copies on the desks of their libraries for free distribution until such time as it would undoubtedly make its way into the hearts of bookbuyers. The American Library Association should be more particularly concerned in giving to libraries the latest and best in the book world. We do want the American public to have the latest and best in the way of books, but the American Library Association, a voluntary organization of library workers, cannot afford to put money that it needs for libraries into something else for the benefit of the public at large. She imagined Mr. Dana would want a magazine written by people whose names would create great interest by reason of their reputations. It did not seem to her that we ought to be so seriously concerned with that part of the question. The *Booklist* ought to be for those who buy books for the libraries, whether they are small libraries or large libraries.

Miss Ahern said she wished to add to what had been said, that no one had the right to say that library work is not advertised. She had had the service of a clipping bureau at various times. Large bundles of material

concerning library methods are issued by these bureaus every day. While some of these articles have not been carefully prepared and are not exactly in accordance with the facts of the case, they do show that the newspapers as a class are interested in the methods of library work. Librarians are very much at fault in the matter of publicity. There ought to be a closer relation and more genuine interest on the part of librarians toward getting the right sort of things into the papers. As for the other matters contained in the letter, Miss Ahern said she was already on record.

On motion of Dr. Hill, seconded by Mr. Locke, it was voted that the subject of suggested change in the *Booklist* be referred to the Publishing Board for a report.

The need of uniformity in library statistics was next treated, the discussion being opened by Dr. Hill. He said that all librarians realized how important it was that we should agree among ourselves as to certain forms which might be adopted generally in the presentation of our annual reports. In looking up the matter in library periodicals very little was found relating to it. A table, a copy of which he showed, has been followed to a great extent by Mr. Foster, of Providence, and was followed for five years, 1896-1901, by the Newark Public Library. The table can be found in the reports of the Providence Public Library for those years and in *LIBRARY JOURNAL*, 1:430-431; Aug. 31, 1877. At the London conference of the same year a paper was read on the subject urging the necessity of uniformity, and in 1880 Mr. Green, of Worcester, and Mr. Foster, of Providence, wrote something in the *LIBRARY JOURNAL* on the same subject. At the present time there are no two reports prepared the same way, although they cover the same field. We do not know the number of volumes or pamphlets, or what constitutes a volume or a pamphlet. We do not know the way the different libraries report their circulation. We cannot always tell the total appropriation or total income that any library receives. It seems as if it would be advisable for us to agree upon a certain formula for statistical purposes, which would be accepted by a certain number of libraries at first and afterwards by the Association itself. Dr. Hill suggested that a special committee be appointed to consider the subject and report either to the Council or to the Association itself at the next annual meeting.

Dr. Bostwick said that the Association seemed to have forgotten the report on a uniform library report made by the committee on

library administration under the chairmanship of W. R. Eastman (see *Proceedings*, 1906, 148-153. The committee on administration that year submitted a form for an annual report which was adopted by the American Library Association.) The fact that this report was so nearly forgotten shows that it was not given the consideration due it, and perhaps it would be a good thing to take up again that report and revise it to the present time.

The secretary distributed a list of questions in regard to counting volumes and pamphlets which had been compiled at the Harvard University Library, and sent on by Mr. Lane, who expressed himself as much interested in this subject of uniformity of library statistics.

On motion of Dr. Hill it was voted that the subject of uniformity in library statistics be referred to the present committee on library administration for further discussion and report.

Dr. Hill called attention to the admirable work done by the committee on the methods and cost of cataloging of which Mr. Josephson is chairman. The committee had learned that the cost of cataloging varies from 3 cents a volume to \$1.05 a volume, and they have prepared a series of questions which have been sent out based on answers to a previous series of questions.

"Some points in the code of professional etiquette" was discussed by Miss Josephine A. Rathbone. Miss Rathbone said she had formulated for herself the following definition: Etiquette is the crystallization of public opinion as to fitting and courteous conduct under certain well recognized circumstances. She suggested the discussion of a few points which might form a code of professional etiquette:

1. The first part I should like to present for discussion is that of the one of procedure; the procedure to be observed in calling an assistant from one library to another. It is a problem that almost all librarians have to face at some time. Involved in the question is:

(a) The librarian desiring the assistant.

(b) The librarian of the library employing the assistant.

(c) The assistant under consideration.

There are, therefore, three important points to be considered. These three interests are concerned besides that which is fundamental to all—the advancement of the best interests of the profession as a whole. It is this latter consideration that removes the problem from the merely personal plane and makes of it a matter of general concern.

Now, in view of all these interests, what should the procedure be?

(a) If the librarian, the party of the first part, the aggressor, should first consult the librarian employing the assistant, asking his or her permission to take up the matter with the assistant.

(b) That he write simultaneously to the librarian and assistant that the thing be considered.

(c) That he open negotiations directly with the assistant, leaving it to her to consult her librarian before coming to a decision or not, or whatever she thinks best.

What I would be glad to have you discuss is whether the librarian should first ask permission of the librarian employing the assistant.

1. Would (a) jeopardize too much the interest of the assistant by practically leaving the decision in the hands of the employer.

2. Whether (c) on the other hand is discourteous to the employing librarian in taking up the question directly with the assistant, while is not (b), as a compromise, merely an empty matter of form?

Those are the points that I should be very glad to get a discussion upon.

When the head of one library wishes to secure the head of another library, should the president of one board approach the president of another, or make the call directly to the librarian?

When either librarian or assistant receives a call elsewhere, what form should enter into consideration besides the matter of salary and personal experience?

(a) Time element.

(b) Condition of work. Has it reached such a point that it could be taken up by another only at a loss to the library, or is there some one available who could carry it on?

(c) Relation of library school teachers to their students and libraries in the matter of getting better positions.

(d) On behalf of the library schools. Should they be consulted before graduates are appointed. Should not the school be informed of the decision when a recommendation is made?

An animated discussion followed on the various phases of the subject. Dr. Putnam voiced the feelings of all when he said:

"We as librarians cannot think of our subordinates, or of the competition between us and other libraries as though it were a question of ordinary competition, of common commodity or material. Our subordinates, as well as our other librarians, are our professional colleagues; we depend upon them profession-

ally in library work, upon their zeal and enthusiasm and professional spirit, which is far above salary, and we depend upon their high sense of professional obligation. It is inconceivable that any librarian, asked by another librarian to lift one of his associates into a higher place, should put obstacles in the way of securing for the associate a better position elsewhere."

SECOND SESSION

The second session opened with a discussion by Miss Mary W. Plummer on a "Campaign of library publicity in the general magazines." Her paper urging the need of living down the impression that libraries are intended chiefly for recreative purposes, and that the layman can not be expected to have either interest in or understanding of their workings, will be reprinted in full in a later issue.

A general discussion followed. Some agreed with Miss Plummer that there was enough literary ability among librarians to write acceptable articles; others suggested that if librarians had not yet learned that craft, the facts might be placed in the hands of professional magazine writers for elaboration and suitable embellishment; some regretted that only the picturesque seemed to appeal to editors and that serious work did not find its way into print, but this condition seemed to be refuted by the fact that a few librarians succeed in getting space for almost anything they write.

Mr. W. H. Brett opened a discussion on club rates to periodicals. He was followed by Dr. Hill, who said a matter of quite as much importance as the price of magazines was the quality of the magazine. During the past year or two a good many of our periodicals have deteriorated very considerably. It seemed to him time for the Council and the Association to take definite steps showing our desire to have in the libraries only the better periodicals. Recently the Massachusetts Library Club appointed a committee to make a white list—not a black list—of those magazines which should be in a library.

Attention was called to the fact that the Association had such a recommended list in Mr. Walter's "Periodicals for the small library," published by the A. L. A. Publishing Board, this, however, being more a selected than an approved list. Dr. Hill moved that a special committee be appointed to consider the advisability of preparing an approved list of periodicals for report to the Council. After discussion the motion was carried, the committee, three in number, to be appointed by the

A BRANCH LIBRARY OF UNUSUAL PLAN—THE SARAH PLATT DECKER BRANCH,
DENVER PUBLIC LIBRARY

THE SARAH PLATT DECKER BRANCH—INTERIOR

president. (Committee not yet appointed.)

The treatment of unsolicited gift material was considered by Mr. W. N. C. Carlton. If a library had an abundance of catalogers and shelf room this perplexing question would not arise. Every month accumulations of documents gotten out by philanthropic, religious and economic associations and periodicals, which are nothing more than trade papers or propaganda for this, that or the other, come in and deluge the library. Ought they, or ought they not to go through the routine the same as definite purchase or solicited gift. Mr. Carlton felt that they they should not go along on equal terms.

It seemed to be the generally accepted view that material should be always received with the understanding that disposition of it was entirely in the hands of the library authorities.

Dr. Andrews presented a brief statement of the difficulty of printing A. L. A. cards, satisfactorily to subscribers and at the same time on a paying basis, about \$540 having been lost in this transaction the past year. It was the hope of the committee to adjust this situation in the near future by a revision of the list and a rearrangement of the method of accepting subscriptions.

Dr. Andrews also presented a brief report for the committee on the preparation of a union list of serials, committee consisting of himself and Dr. Bostwick. He was glad to report that the Library of Congress was considering the issuance of such a list, and their agreement to do so would, of course, be agreeable news, as they could do it better than it could be done elsewhere. One question of importance which the Library of Congress wishes answered by librarians is thus: Is it desirable to delay the work by at least two years in order to include the serials which are not periodicals, or is the list of periodicals of so much greater importance that we should ask the Library of Congress to get them out first? If the latter question be answered in the affirmative the Library of Congress will probably be more likely to undertake the list. Those who expressed themselves thought best to include only the periodicals if this would expedite matters.

The following resolution, drawn by a specially appointed committee, consisting of Messrs. Root, Hepburn and Locke, was adopted, the subject having been referred to the Council by the A. L. A. college and reference section:

Resolved, That the Council of the American Library Association heartily joins with the

Association of American Universities in recommending to the various universities of the land the preparation of a catalog of the serial publications and the printing of this catalog in a form so arranged and indexed as to make it a useful work of reference.

Mr. Kerr stated that at the meeting of the National Council of Teachers of English, in Chicago, November 28, 1913, a library section was organized and the following minute adopted regarding the status and salary of school librarians:

In view of the rapid growth of the library and its function in modern education, the Library Section of the National Council of Teachers of English, in session at Chicago, November 28, 1913, presents for the consideration and approval of educational and civic and state authorities the following:

First, Good service from libraries as indispensable to the best educational work.

Second, The wise direction of a library requires scholarship, executive ability, tact, and other high grade qualifications, together with special training for the effective direction of cultural reading, choice of books, and teaching of reference principles.

Third, Because much latent power is being recognized in the library and is awaiting development, it is believed that so valuable a factor in education should be accorded a dignity worthy of the requisite qualifications; and that, in schools and educational systems, the director of the library should be recognized as a department head, who shall be able to undertake progressive work, be granted necessary assistants, and be compensated in status and salary equally with the supervisors of other departments.

Mr. Kerr requested the approval by the Council of this minute and according to the usual practice it was voted to refer the subject to a committee of three to be appointed by the President to report at the next meeting of the Council. (Committee not yet appointed.)

Mr. Ranck, chairman, read a report from the committee on ventilation and lighting. A portion of this report and recommendations and findings of the committee thus far will probably be published in a subsequent number of the *Bulletin*.

Feeling strongly that a table of contents should be printed in the daily issues of the *Congressional Record* the committee on public documents presented the following resolution which was unanimously adopted:

Whereas, Many libraries through their patrons regularly make great use of the daily editions of the *Congressional Record*, and

Whereas, The present arrangement of the contents in the *Record* make it extremely difficult to find readily matters which are of great public concern and importance, and which have been referred to in the newspapers.

Resolved, By the Council of the American Library Association that it is the sense of this organization that a brief table of contents for the daily edition of the *Congressional Record* would enable users of this daily edition to find quickly particular subjects under discussion, and other matters in which they might be interested in any particular issue,

Resolved, That it is the conviction of the American Library Association that such a brief table of contents, indicating the page on which such matters of interest were located is altogether practicable inasmuch as a number of daily newspapers issue such a table of contents, to the great convenience of their readers,

Resolved, That this Association urge the Joint Committee on Printing of Congress to authorize at once the incorporation of such a table of contents as a part of the daily issue of each number of the *Record*, and

Resolved, That the Secretary of the American Library Association be instructed to transmit a copy of the foregoing preamble and resolutions to the chairman of the Joint Committee on Printing at Washington.

Dr. Andrews moved that the Executive Board be asked to provide suitable resolutions or minutes on the death of Dr. Reuben Gold Thwaites. Voted unanimously.

Adjourned.

Library Organizations

NEW YORK LIBRARY CLUB

A joint meeting of the New York Library Club, the Long Island Library Club and the New Jersey Library Association was held in the lecture hall of the Horace Mann School, Thursday, Dec. 11. Miss Mary W. Plummer, president of the New York Library Club presided, and a brief business meeting of this club was held, electing fifty new members. Miss Plummer then introduced Mr. Alfred Noyes, who spoke on "The sea, in Tennyson's poetry." Mr. Noyes followed this with readings from his own poems.

The third meeting of the club for the year 1913-14 was held Thursday evening, Jan. 22, in the auditorium of the National Headquarters of the Y. W. C. A., the president, Miss Plummer, presiding. After the acceptance of the minutes of the December meeting and the election of nine new members, Miss Plummer announced the special subject of the meeting as "The moving picture show," and introduced the first speaker, Mr. John Collier, of the People's Institute.

Mr. Collier said, in part, that the value of moving pictures to education does not need to be argued; the only problem is, how moving pictures can be made available in education. Few people are conscious that under present conditions the production of moving pictures has gradually been monopolized by the commercial world, with the result that churches, schools and libraries are virtually forbidden to use them. The trade group holding this monopoly is made up as follows: (1) The manufacturer of moving picture films. There are to-day 55 manufacturers, or producers, including those who import, and of this number 35 supply the mass of films for 17,000 shows. (2) The middle man who rents his goods day by day, his object being to buy as little as he can and to keep his stock constantly in use. (3) The exhibitor, who is entirely dependent on the middle man, and who is said to "violate the ethics of the profession" if he complains, for instance, because he is required to pay the same for two pictures, both two weeks old, but of totally different grade. What is the result therefore when an educational institution attempts to obtain moving picture films? It goes to an exchange to select the films, but finds no catalog, and only films made in the past three or four months, and these already contracted for. There is but one trade group conducting an educational department, and here the prices are exorbitant and unless the films are engaged much in advance they cannot be obtained.

In solution of the problem Mr. Collier suggested three methods: a new business enterprise well capitalized, making the films available in the right way; an endowment established by some philanthropist for the production and distribution of films; or the establishment by the city or state of a library of moving picture films, the collection to be enlarged by their rental.

Conditions at present operate to discourage such art and to paralyze the educational value of moving pictures. If the pictures cannot be advertised or seen a second time, what encour-

agement is there to manufacture films of a high grade? The present situation represents the maximum production of low grade films. The negatives of all moving pictures can be preserved, and most of the films made still exist in the negative, but are not used. The average price of a film to-day is \$130, but if these films were made available for daily use they would be good for about three years and the price therefore reduced to \$40 or \$50. Such changes in conditions would react on the present system, allowing a diversification of moving pictures, and such a use of the films as would result in the educational benefit of the entire community.

At the conclusion of Mr. Collier's address, Miss Plummer opened the meeting for the discussion, and called on Mr. William McAndrew, principal of the Washington Irving High School, to speak. Mr. McAndrew told in a very entertaining fashion of his own experiences at moving picture shows, and emphasized the uncertainty of the productions. He spoke of the Municipal Theatre at his school, where they would be glad to use moving pictures but for the conditions as stated by Mr. Collier.

Miss Hassler, of the Queens Borough Public Library, spoke briefly of the various ways in which that library has used the moving pictures to create public interest in its collections.

The meeting adjourned and a social hour followed, refreshments being served in the cafeteria.

ETHEL H. BUDINGTON, *Secretary*.

LONG ISLAND LIBRARY CLUB

The regular meeting of the Long Island Library Club was held at Pratt Institute Free Library on the evening of Jan. 15. It was purely social in character, for which Mr. Stevens, chairman of the committee on arrangements, had prepared a most entertaining and varied program of readings.

Miss Harriot Hassler, president of the club, first introduced Mrs. Barrie, who read in her inimitable way a selection called "Sport," by Irving Cobb, all pure satire showing the joys of fishing when one never catches fish, of camping when it always rains, of sailing when one casts one's eyes longingly towards shore and of the pleasures of a motor boat which always does everything but the one thing expected of it.

This was followed by one of W. W. Jacobs' short stories, "The monkey's paw," read by Miss Rathbone. She rightly called it a ghastly tale, and laid all the responsibility for the selection upon Mr. Stevens' shoulders,

as she had given him the choice of some pretty garden verse or the ghastly tale.

Arthur Guiterman's "Quest of the ribband," read from the August *Harper's* by Mr. Stevens, brought the club from the realms of the supernatural to a department store. The feeling way in which it was rendered made one think that Mr. Stevens knew from experience whereof he spoke.

In the absence of Miss Cowles, Miss Hassler read "Dream of a child's Christmas eve," an interpretation of the spirit of the children's room in a public library on Christmas eve.

Miss Hitchler's Jewish selection, "R.S.V.P. from Abe and Mawruss," by Montague Glass, concluded the program. All enjoyed the unusually good imitation of the commercial Jew.

A rising vote of thanks was given to the chairman on arrangements for the very delightful evening and for the hospitality of Pratt Institute, when the club adjourned to the class room for refreshments.

ELEANOR ROPER, *Secretary*.

PENNSYLVANIA LIBRARY CLUB

The January meeting of the Pennsylvania Library Club was held on Monday evening, Jan. 12, 1912, in the auditorium of the Dropsie College for Hebrew and Cognate Learning. Dr. Cyrus Adler, president of the club, gave a most interesting description of the plan and scope of the college and the library, which at present contains over 9000 volumes. The 70 members who braved the elements to attend the meeting felt well repaid, as the library is unique in its collection of books and very interesting.

The February meeting will be held at the headquarters of the History Society of Pennsylvania. The address will be given by the Hon. Samuel W. Pennypacker, former governor of Pennsylvania, on "Early Pennsylvania literature."

ILLINOIS LIBRARY ASSOCIATION

The 18th annual meeting of the Illinois Library Association was held at Chicago, Tuesday and Wednesday, the 30th and 31st of December, 1913, in rooms at the Hotel La Salle.

The first address of welcome was delivered by Henry E. Legler, librarian of the Chicago Public Library, who welcomed the visiting librarians to Chicago and spoke of the work of the libraries there. The second address of welcome was delivered by Charles J. Barr, president of the Chicago Library Club, who tendered a special invitation to the reception on Thursday evening, Jan. 1. The response by Mr. Windsor, president, emphasized that

in the library world there was no division between Chicago and the rest of the state.

The legislative committee then presented its report. At the first meeting of the committee, held in November, 1912, it was decided that the general program of the committee should be as follows: First, Secure an amendment to the Juul Act exempting the library rate from reduction; or the establishment of a minimum rate. Second, Amendments to the Library Act to provide for an increased rate and other changes or possibly the enactment of an entirely new Library Law. Third, The enactment of a law creating an Illinois Library Commission.

The chairman of the committee made a personal canvass of the state with a view to ascertaining the library situation in various cities, collecting data showing the effect of the Juul Act on the revenues of the public libraries, interesting librarians and directors in the situation, and securing the interest and attention of the local members of the state legislature.

Aurora, Joliet, Batavia, Geneva, Rockford, Dixon, Freeport, Springfield, Jacksonville, Decatur, Peoria, and other places were visited, and the information desired in regard to the tax rates was secured directly from the county clerk. It was found that the operation of the scaling provision of the law was quite general, although in several instances the county clerk "took a chance" as one expressed it and said "that as long as the question was not raised by any of the local taxpayers directly interested, and since the library tax was very small anyway, he would overlook his apparent duty and not reduce the library rate as a strict interpretation of the law required." The general rate of reduction varied from 16 $\frac{2}{3}$ per cent. to 33 $\frac{1}{3}$ per cent.

"In a number of cases it was found that the libraries did not receive their full rate as allowed by law, but this was brought about by the fact that the full rate was not asked for by the tax-levying body. Take for example, a certain city entitled to 12 cents on the hundred dollars; it was found that the amount appropriated and certified to in the tax levy ordinance would be produced by a rate of 9 cents on the hundred dollars of the current year's assessed valuation. It is evident that the library in this instance might have received 33 $\frac{1}{3}$ per cent more revenue had it asked for all to which it was entitled.

"It was also found that outside of Cook County the only city rates disturbed by the scaling process were the rates for library and

park purposes, due to the fact that all other rates were either exempt from scaling or had a minimum rate equal to the full statutory rate.

"The next step was to prepare a bill amending the Juul Act by which the library rate would be outside the scale. When the draft of a bill had been completed, it was found that the city of Chicago had an amendment to the section of the law the library was interested in, and it seemed advisable to join forces with the city and have the library amendment incorporated in the city's bill. As the bill was finally passed, public libraries in the state outside of Chicago should not suffer any reduction through the operation of the Juul Act, and it is up to the directors to see that the taxes, beginning with those for 1913, are not reduced on account of this law."

The second item in the program, as laid out by the committee, was not attempted on account of the shortness of time after the efforts in behalf of the first measure and the adjournment of the General Assembly.

In the matter of a law creating a library commission, a bill was drafted and copies sent to the president of the Association, members of the Library Extension Commission, and others interested in the matter. This bill among other things provided for a State Legislative Reference Library, but instead of this feature proving an asset as was expected, it seemed to detract from the bill. The consensus of opinion seemed to be that since the powers of the new commission would not be much greater than those of the Library Extension Commission, it would be better to let existing laws stand for the present and work towards securing, if possible, a larger appropriation for the work of the Library Extension Commission.

The report of this committee was followed by discussion of the situation in Evanston where \$14,000 ought to be available but only \$9,000 is appropriated, and by suggestions of provisions which should be incorporated in a new library law.

The report of the treasurer showed receipts for the year of \$336.75 and disbursements of \$45.85, leaving a cash balance on hand of \$290.90.

The Association voted to affiliate with the American Library Association, and a resolution was adopted that a committee be appointed to consider revision of the constitution and by-laws of the Illinois Library Association, to present its report at the next annual meeting. An invitation was received inviting the

Association to hold its next meeting at Springfield under the auspices of the State Library department.

The Trustees' Association held its second annual meeting Tuesday morning preceding the regular meeting of the Library Association. A committee was appointed to ascertain what legislation can be attempted to benefit the libraries. The present officers and executive board were re-elected.

A book symposium was held Tuesday evening at which Legros' "Fabre, the poet of science," Maeterlinck's "Our eternity," White's "Lyman Trumbull," and Beard's "Economic interpretation of the constitution of the United States" were discussed. This was followed by an illustrated lecture entitled, "A library tour," by Theodore W. Koch, librarian of the University of Michigan, who took his hearers through some of the leading public and college libraries of Europe and America.

Among the papers presented was one on "What we do in addition to library work," by Lorena N. Webber, librarian of the Jacksonville Public Library, in which the library exhibits, lecture courses and reading circles were described. Another was "Work and plans of the Illinois Library Extension Commission," by Mrs. Eugenie M. Bacon of Decatur, member of the commission. She told of the establishment of the commission in 1908 and of its struggles and growth, till in 1913 the legislature appropriated \$5270 for its use.

The third main subject was "Work and program of the Illinois Legislative Bureau," and this was introduced by Hon. Finley F. Bell, the secretary. After lengthy debates the General Assembly established the bureau in the state capital in 1913 and decided that the governor should be the chairman of the Bureau, and that the membership should consist of two senators, and two members of the House, who were the chairmen of the judiciary and appropriations committees in their respective bodies.

Information is being sought from states already possessing legislative reference bureaus as to methods of administration. The acquisition of material is progressing rapidly and in three months a considerable supply of books, pamphlets, public documents, periodicals and newspapers clippings has been brought together. An index of matter in course of publication is kept, and of information of importance obtained through correspondence.

Special attention is paid to bibliographic information. Bill drafting is one of the most useful and necessary purposes for which the

bureau may be employed, and an effort will be made to have an extremely competent staff for this work.

Discussion of this address brought out the fact that two duties of the Illinois Bureau are broader than those in some other states. (1) The duty to classify, digest and index all bills, resolutions, etc., and every Monday to distribute copies to each member. (2) The duty to prepare a detailed budget of appropriations for the next biennium with a comparison of the amount voted by the previous assembly, formerly done by the committee on appropriations only 30 days before adjournment.

The next paper was on the "Municipal reference work of the Chicago Public Library," by Henry E. Legler, the Chicago librarian.

The last subject was "Commission government as affecting Illinois libraries." On this topic Jane P. Hubbell, librarian of the Rockford Public Library, read a paper on "Commission government as affecting libraries in cities outside of Illinois"; and Mary B. Lindsay, librarian of the Evanston Public Library, read one on "Commission government as affecting librarians in Illinois."

The following officers were elected for the ensuing year: president, F. K. W. Drury, Urbana; vice-president, Jane P. Hubbell, Rockford; secretary, Maud Parsons, Joliet; treasurer, Mary P. Booth, Charleston. Council (terms to expire 1916), Louise B. Krause, Chicago; Mrs. Robert Bruce Farson, St. Charles.

F. K. W. DRURY, *Secretary*.

CHICAGO LIBRARY CLUB

On the evening of Jan. 1, 1914, the Chicago Library Club and libraries of Chicago gave the annual reception in honor of the visiting librarians, in the ball room of the Hotel La Salle.

About three hundred guests were present, among them many well known in the library world. A buffet luncheon was served about ten o'clock, after which the orchestra struck a new note, passing to most bewitching dance music. A happy evening was enjoyed by all.

AGNES J. PETERSEN, *Secretary*.

INDIANA STATE TEACHERS' ASSOCIATION— LIBRARY SECTION

The meeting of the Library Section was called to order in the teachers' assembly room of Shortridge High School, Indianapolis, Monday afternoon, Dec. 22, by the president, W. D. Howe, of the English department of Indiana University, Bloomington. The president

gave a short address of welcome, introducing the subject for the afternoon's program, "High school library problems."

The first discussion was on "Book selection and buying," led by Miss Frances Benedict, of the Marion High School. Miss Clara Hadley, librarian of Manual Training High School, Indianapolis, read a paper on "Magazines for the high school library." "Our lending system" was described by Miss Josephine Dages, librarian of the high school at Muncie. A discussion on "How to teach the boys and girls to use the library" was led by Mr. E. H. K. McComb, of the English department, Manual Training High School, Indianapolis.

"Co-operation with outside agencies" was next discussed. The problem of "Co-operation from the high school library" was the subject of a paper read by Miss Ruth Stetson, librarian of Evansville High School. "Co-operation from the public library" was discussed by Miss Cerene Ohr, Indiana Public Library, Miss Helen M. Davis, librarian of Franklin Public Library, and Miss Gertrude Thiebaud, librarian of Peru Public Library. Miss Florence Venn, reference librarian, Indiana State Library, told of the "Co-operation from the state library."

"What conditions are met by the high school library that can not be met by the public library" was discussed by B. F. Moore, superintendent of schools, Muncie, and A. E. Highley, superintendent of schools, Marion.

The report of the committee on nominations was as follows: President, A. E. Highley, superintendent of schools, Marion, Ind.; vice-president, Miss Gertrude Thiebaud, librarian, Public Library, Peru, Ind.; secretary, Miss Ruth Stetson, librarian, High School, Evansville, Ind.

RUTH STETSON, *Secretary.*

MICHIGAN LIBRARIANS' ASSOCIATION

The Michigan Librarians' Association will meet in Menominee in August. Stewart Edward White, author of "The blazed trail," will address the convention.

MILWAUKEE LIBRARY CLUB

At the meeting of the Milwaukee Library Club held Tuesday evening, Dec. 16, the Rev. William Dallmann gave an interesting and scholarly talk on "Some lives of Christ: their merits and demerits." The best life of Christ, Mr. Dallmann holds, is to be found in the four gospels. For the average reader he recommended, "Days of His flesh," by David Smith, which combines scientific method of

treatment with entire readableness.

Miss Margaret Reynolds paid a brief tribute to the late R. G. Thwaites.

JOSEPHINE KULZICK, *Secretary.*

PACIFIC NORTHWEST LIBRARY ASSOCIATION.

The proceedings of the Pacific Northwest Library Association which met in Tacoma, June 12-14, have just been published in pamphlet form. Besides a complete report of the proceedings there is included a complete list of officers and members, and also a list of societies and associations which distribute free publications.

Library Schools

NEW YORK STATE LIBRARY SCHOOL.

Dr. John M. Clarke, director of the Science Division of the University of the State of New York, spoke to the school on "Popular scientific books," Jan. 20.

The student practice in outside libraries will extend from March 2 to March 28. Regular school exercises will be suspended in the meantime.

The seniors have selected the following subjects for their graduation bibliographies:

Miss Cowley: Selected bibliography of college and university libraries in the United States. (Supplementing New York State Library Bibliography Bulletin 19. 1899.)

Miss Erskine: Vegetable gardening.

Mr. Hamilton: The institutional church; a select list.

Miss Ingalls: Select bibliography of American art; painting, sculpture, architecture.

Miss Jewett: Historical material in New York State documents.

Miss Pidgeon: Vocations for self-supporting college women; a reading list.

Mr. Sawyer: Novels relating to the American Revolution; a select list.

Miss Schneider: Jewish life in American and English fiction; a reading list.

Miss Vaile: The battle of Plattsburgh.

"Library and community" studies selected as alternatives to the graduation bibliography are:

Mr. Rice: Boston.

Miss Rothrock: Memphis.

Mr. Slomann: Albany.

Miss Elizabeth Lowry ('14), who has been absent on account of illness, has returned to the school.

SUMMER SESSION

The summer session this year will extend from June 3 to July 17, and will be divided

into two short courses of three weeks each beginning respectively June 3 and June 25. The first will be devoted to reference work in its broadest sense and the latter to the more technical subjects of cataloging and classification. Contrary to a more or less general impression, a rather extended canvass of libraries of the state proved that among smaller libraries there is a genuine demand for simple, sensible training in the essential technique of library work, and that, in view of this specific need, the omission of these subjects from a summer course in order to make room for more general features is not at present justified. A special circular of the summer session is now in press.

F. K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY
SCIENCE

It has been the policy of the school to send out questionnaires to its graduates from time to time to collect information regarding their positions, the kinds of work done, the hours a week required, the vacation privileges enjoyed, and their salaries. A questionnaire of this sort was sent out in November, and while full returns have not yet come in, about 247 graduates have been heard from, and it is possible to draw certain rather interesting conclusions from their reports. By far the larger number of our graduates are in public libraries, but there are about 40 in school and college libraries, 20 or more in state library and library commission work, and 27 in special libraries—law, medical, engineering, scientific, and business libraries. While 42 hours' work a week seem to be still the norm, we find that 95 of our graduates work less than 45, while only about 30 report more than 42 hours. An increasing number report that no time specification is made, the tendency being apparently to leave people in executive positions to determine their own schedules. One month is preponderatingly the accepted period for public library vacations; 153 have so far reported one month vacations, only 20 two weeks (they being for the most part in business positions), 21 receive three weeks, and something over 30 fortunate ones report from six weeks to three months (those being for the most part in school and college library positions). A report will be made as to salaries and kinds of positions when more complete returns have been received.

The usual Christmas party took place in the north classroom on Thursday afternoon, Dec. 18. A gay little Christmas tree was the center of attraction, while the will of the class of 1913, addressed to that of 1914 and containing

the amusing results of the year's experiences, was read.

The first lecturer of the second term was Miss Theresa Hitchler, who gave two talks on the organization and work of the cataloging department of the Brooklyn Public Library. She was followed by Miss Clara W. Hunt, who gave three lectures on children's work.

The students have been asked to consider as a class exercise individual attendance upon the exhibition of the making of a book at Charles Scribner's Sons, as it is thought they will get more from the exhibition in this way than if they go in a body.

ALUMNI NOTES

Miss Lillian Burt, class of 1902, formerly cataloger at the Library of California University, is now librarian at Hilo, Hawaiian Islands.

Miss Mary Frank, class of 1908, formerly first assistant in the Bloomingdale branch of the New York Public Library, has been made librarian of the public library at Everett, Washington.

Miss Margrete Thunbo, class of 1913, has resigned her position in the cataloging department of Yale University to return to Copenhagen, her home, where she will have charge of a branch in the new public library system.

JOSEPHINE ADAMS RATHBONE, *Vice-director.*

NEW YORK PUBLIC LIBRARY—LIBRARY
SCHOOL

The Christmas vacation began on Dec. 19, and school reopened on Jan. 5. The Christmas festivities consisted of the singing of school songs and German songs around a Christmas tree, the telling of Christmas stories very delightfully by Miss Anna Tyler of the library staff, and the distribution of amusing gifts, with a general consumption of coffee and coffee cake.

During the last two weeks of the term, Miss Mary E. Robbins spent several mornings attending recitations, examining equipment, and looking over the school schedules, as a beginning of her work of inspection for the A. L. A. committee on training.

The interest of the first week of the second term, for the juniors, centered on binding, owing to a visit to the Tapley bindery with Miss Murray and Mr. Arthur Bailey, two of the A. L. A. committee on binding, and two lectures from Mr. Bailey, on "Binding materials" and "Binding procedure." A tea followed the second lecture. Miss Murray's demonstration lectures on repairing and rebinding

followed Mr. Bailey's, while the actual work of sewing and binding is to be given in the spring term.

An experiment in dividing the junior class will be tried during the coming term, in the course in appraisal of fiction. Miss Mary Ogden White, a well-known reviewer and critic, will meet some of the students each week in the seminar room to consider the same books and authors assigned to the other division of the class, handling the work, however, somewhat differently.

Seniors in administration have divided their time so far this term, between the study of the public schools and of library finances. Visits have been made to grades 1 to 8 and to the truant schools, and the class has been considering the financial reports and budgets of libraries with Mr. Lockwood as lecturer.

The other seniors are having a course in the literature of the natural sciences, by Mr. Freeman F. Burr of Columbia University, and the students in advanced cataloging are studying early printed books and having lectures on the history of printing.

Among the questions asked at the close of Mr. F. W. Jenkins' course on civic topics were the following: What can the library do to aid the survey idea? Why do some cities object to the survey, and how can you meet this objection?

What do we mean by bad housing? What are the causes? Name two results.

What can the library do to further the public health movement?

What should be the library's attitude toward furnishing recreation as contrasted with education?

As a librarian, to whom would you turn for help on questions relating to labor legislation?

State briefly your attitude toward immigration. What can the library do for the newcomers?

Give your idea of what a prison library should be. Would you administer such a library through a trained librarian or a trusty? Give reasons.

What periodicals would you advise for civic and social information?

Problem.—A new library is started in a city of 30,000; the schools are in the hands of politicians; the churches preach a comfortable doctrine to people in comfortable circumstances. There is little public spirit, and a great deal of self-satisfaction. If you were appointed librarian, what would you do?

Problem.—What do you think the library may do with the following agencies, so far as co-

operation is concerned? Church, board of education, women's clubs, men's clubs, Y. M. C. A., Charity Organization Society.

MARY W. PLUMMER, *Principal*.

ANNUAL REPORT

The annual report for the second year of the school, ending June 30, 1913, has recently been published. The year differed from the preceding chiefly from the fact that two classes were entered, junior and senior. This made necessary an extra class room and an increased number of lecturers and teachers, as well as arrangements for senior practice. Fifteen of the junior class of 1912-13 were accepted for senior work, all but four holding paid positions in the library during the year. The total enrolment of the school was 70. Some changes were made in the faculty, Miss Catherine S. Tracey, of the division of economics of the New York Public Library, being engaged as librarian and school bibliographer, and Miss Martha Buchanan, of the staff of Pratt Institute Free Library, taking charge of the mechanical preparation of the school library's collection. A study room on the second floor was equipped for senior work. The school collection of books and bound pamphlets now numbers 2473, and specimen numbers of about 300 periodicals are kept on file. A model catalog, representing the usual problems that come up in cataloging, was made by the juniors of 1913. A beginning of a school collection of the printed work of its students and graduates was made. Aside from the lectures by the faculty, 56 other lectures were given to the junior class and 68 to the seniors on professional and literary subjects and those of sociological interest. The students visited most of the libraries in and near New York City, and a visit to Washington and Philadelphia was made in the spring vacation. Very few changes of importance were made in the junior curriculum. A course of five lessons and a test in periodicals was added, and lessons in book-sewing and simple binding. The senior course was a matter of experiment this first year. Courses were given in advanced reference and cataloging, administration, and in library work for children. Fifteen seniors received appointments before the end of the school year, also sixteen juniors not expecting to complete the course at present, while nineteen juniors received appointments for part-time work during their senior year, all but one in the New York Public Library and its branches. For the year 1913-14 the school had, July 1, an advance registration of twenty-five seniors and forty-three juniors.

UNIVERSITY OF WISCONSIN—LIBRARY
SCHOOL

In the death of Dr. Reuben Gold Thwaites the school has suffered an irreparable loss. As vice-chairman of the Wisconsin Library Commission, he was, from the very inception of the school, its wise counselor and staunch supporter. All who have been connected with the school, either as faculty or students, well know how much his counsel and friendship will be missed. His memory is a blessed heritage to all whose lives he touched.

The daily work of the school has progressed on its even way, with lessons, lectures, practice work, required reading and study, and apprentice appointments; the changes made in the established schedule as announced in the last report, are working out satisfactorily. Since the last report special lectures have been given as follows:

- Oct. 22. "The Wisconsin idea," Dr. Charles McCarthy.
- Oct. 31. "Evaluation of books in American history," Dr. C. R. Fish, professor of American history.
- Nov. 12. "Source material in the Wisconsin Historical Library," Dr. Root, professor of American history.
- Nov. 14. "The problem of public library service for the rural population," Mr. S. H. Ranck, librarian of Grand Rapids (Mich.) Public Library.
- Nov. 19. "Nature and value of good binding," Mr. Cedric Chivers.
- Dec. 1. "The arts of illustration," Dr. Theodore W. Koch, librarian of the University of Michigan.
- Dec. 3 and 5. "The remodeling of a library system," Mr. Henry E. Legler, librarian of the Chicago Public Library. Two illustrated lectures on the library problem in Chicago.
- Dec. 11. "The library spirit," Miss L. E. Stearns.
- Dec. 13. Annual exhibition arranged by the students, illustrating the work and characteristics of American publishing houses.

After all these lectures, opportunity was given for informal conference with the speakers, discussing the points of the lecture in order to correlate the practice of different libraries with the daily lessons in the school, either for the emphasis of contrast or similarity in methods. Discussion of different methods is especially invited that the students may have a broad outlook upon the whole field of library

work. Some of the lectures were followed by exhibitions, notably the one by Dr. Koch on the "Arts of illustration."

Class elections were held just before the school adjourned for the holidays. Miss Callic Wieder, of West Branch, Iowa, was elected president; Miss Mary B. Kimball, of Green Bay, Wisconsin, vice-president; Miss Louise C. Grace, Detroit, secretary, and Jennie W. McMullin, Madison, treasurer.

SCHOOL NOTES

The faculty and students enjoyed a November picnic at Arbroath, the cottage of Mr. and Mrs. Frederickson at Maple Bluff. Under the guidance of Mr. C. E. Brown of the Wisconsin Historical Museum, Chippewa, Winnebago, and other Indian games were played to the delight of all. After a supper served round a great fire-place, Indian myths and other stories were told, and old-fashioned games played. This autumn picnic was substituted for the usual Hallowe'en fete of the school.

The students arranged to celebrate Thanksgiving together, since few were able to go home for one day. A Thanksgiving dinner was served at a banquet table in Lathrop Hall, followed by toasts. In the evening, there was a program of songs, Thanksgiving stories, and dancing.

On the occasion of Mr. Chivers' visit an informal tea was given at the rooms of the school, that all might have an opportunity to meet him.

On December 4, Mr. and Mrs. Dudgeon entertained the faculty and students of the school at their home in honor of Mr. Legler. A demonstration of moving pictures produced by a home kinetoscope, story telling, and music provided the entertainment of the evening.

Miss Marion Frederickson entertained all connected with the school with a Christmas party at her home on December 20. Christmas greens, Christmas carols and general good cheer, and a Christmas tree loaded with gifts accompanied by appropriate rhymes made an evening long to be remembered.

ALUMNI NOTES

Helen Gorton, '07, will organize the Plymouth (Ind.) Public Library during the ensuing year.

Mrs. Gladys Tallett Waterick, '08, and Ruth Balch, '12, visited the school during November.

Mrs. Eugenia Marshall Rainey, '09, has been appointed a trustee of the Salem (Ill.) Public Library, and is chairman of the book committee.

Grace Foland, '10, will commence work as cataloging assistant in the Helena (Mont.) Public Library in January.

Ruth P. Hughes, '10, children's librarian, Freeport, Ill., is on leave of absence for the winter, and is enjoying the months in California.

Corina L. Kittelson, '10, has accepted a position in the cataloging department of the Denoce Public Library.

Grace Woodward, '10, was married on December 20, to Dr. Walter R. Smith, of the Kansas State Normal School, Emporia.

Emma Wald, '10, resigned at cataloger in the Racine Public Library to become cataloger in the library of the Milwaukee State Normal School.

Dorothy Kantz, '11, went to the Public Library of Des Moines, Iowa, as cataloger, on November 1.

Zela Smith, '11, was married on Nov. 15 to Mr. Arthur MacArthur, Jr., of Minneapolis. She has been assistant in the Superior (Wis.) Public Library since graduation.

Dorothea C. Heins, '12, resigned her position in the Montgomery (Ala.) Public Library to become head of the circulation department in the Public Library at Superior.

SIMMONS COLLEGE LIBRARY SCHOOL

The college closed on Dec. 19 for the Christmas recess, reopening on Jan. 5. The students, with renewed energy, made the most of the rest of the term, which culminated in the mid-year examinations, Jan. 21-31.

Two members of the one-year course utilized the vacation for valuable practice work, Miss Elva Greef reorganizing the library of the Boston Y. M. C. A., and Miss Edith Phail working in the children's room and in the new Sewall avenue reading room of the Brookline Public Library.

Miss Donnelly and Miss Ridlon attended the Round Table of Library Schools in Chicago, Jan. 2.

Afternoon visits have been made to the special library of Stone and Webster, and to the Boston Book Company, and on Saturday, Jan. 10, the seniors and college graduates, with Miss Hill, spent the day in Worcester, visiting there the Public Library, the Worcester County Law Library, and the libraries of Clark University and the Antiquarian Society.

Lectures have been given by visitors as follows:

Nov. 20. "Book buying from a bookseller's

point of view," by Mr. W. B. Clarke, of Boston.

Dec. 2. "Work with the blind," by Miss Laura M. Sawyer, of the Perkins Institute for the Blind.

Dec. 4. "Auction buying," by Mr. C. K. Bolton.

Dec. 17. "The library of the W. E. I. U." by Miss Ethel Johnson, librarian of the Women's Educational and Industrial Union of Boston.

Jan. 8. "The Harvard University Library," by Mr. W. C. Lane.

The last was illustrated by stereopticon views, chiefly of Harvard's new building.

Both the lantern and the reflectoscope are available to exhibit illustrative material, the latter making it possible to utilize post-card collections and illustrations in books. Miss Hill has taken advantage of it in the course on library buildings, and it is proposed to utilize it as freely as possible for other courses.

GRADUATE NOTES

Margaret E. Becker, C. I, 1912 resigned from the Worcester County Law Library to accept a position in the University of Rochester Library.

Mary Dunbar, C. I, 1911, resigned from Mount Holyoke College Library to take up the work of assistant in the Grove City College Library, Grove City, Pa.

Mabel Eaton, C. II, 1910, has accepted position of head cataloger at Williams College.

Isabel Monro, C. I, 1907, is now on the staff of the Columbia University Library.

Lucy Osborne, special student, 1907-09, has accepted the position of general assistant at Williams College Library.

JUNE RICHARDSON DONNELLY.

WESTERN RESERVE LIBRARY SCHOOL

NEWS NOTES

The school entertained the apprentice class of the Cleveland Public Library on Dec. 19 at afternoon tea, after which the guests of the afternoon accompanied the students to the College for Women campus to hear the Christmas carols sung by the College Glee Club.

The first assignment for loan practice in the various branches of the Cleveland Public Library has been completed and a series of visits to the branches and departments of the library system has been begun under the direction of Miss Eastman in connection with her library administration course.

During the past month beside the regular faculty lectures the students have had the pleasure of hearing Professor Arbuthnot of Adelbert College discuss the books on economics in a very interesting and original manner. On Jan. 6 Miss Corinne Bacon, director of the Library School of Drexel Institute, was an honored guest at the school and spoke to the class, her subject being, "What it means to be a librarian." The following day she spoke to the staff and training class of the Cleveland Public Library, where the Library School students were again privileged to hear her.

ALUMNI NOTES

Mary Scott Wallis, '06, who has been the temporary assistant municipal reference librarian of the Cleveland Public Library, is now head of the department of public documents at the Free Library of Philadelphia.

Bertha R. Barden, '07, has resigned her position as cataloger in the St. Paul Public Library to accept the position of assistant librarian in the North Dakota Agricultural College Library at Fargo.

Mabel Delle Jones, '08, has resigned her position as librarian of the Public Library of Charleston, W. Va., to become librarian of the State Department of Archives and History.

Eva M. Morris, '12, has been appointed municipal reference librarian of the Cleveland Public Library.

Emma Hulings, '13, was married Dec. 31, to Mr. Frank Everheart Stewart of Oil City, Pa.

Alice S. Tyler, *Director*.

CARNEGIE LIBRARY OF PITTSBURGH—
TRAINING SCHOOL FOR CHILDREN'S
LIBRARIANS

After the usual Christmas recess of two weeks the Training School opened for the winter term on Monday, Jan. 5. The junior courses for the term are: Classification, Miss Mann; cataloging, Miss Randall; lending systems, Miss Welles; book numbers, Miss Mann; reference work, Miss Stewart; story telling, Miss Whiteman; book selection, Miss Ellis, Miss Smith, Miss Bullock, Miss Howard, Miss Blanchard; seminar for periodical review, Miss McCurdy.

The senior courses are: Book selection, Miss Smith; cataloging, Miss Smith; history of libraries, Miss Stewart.

Miss Effie L. Power, supervisor of children's work of the St. Louis Public Library, and a member of the staff of lecturers of the Training School, gave a series of ten lectures to the junior class the last week in January. Her

subjects were: "Book selection," "Administration of children's rooms," "Organization of a children's department" and "Work with normal schools."

During the winter term the junior students are scheduled each Monday morning for practice in adult routine work in the Central Lending Division and in the branch libraries. Seven members of the junior class held part time substitute positions on the staff of the library during the Christmas recess.

Dr. Charles A. Eastman, Indian author and lecturer, talked to the students Dec. 19th, upon "Indian life."

Miss Corinne Bacon, librarian and director of the Library School, Drexel Institute, Philadelphia, Pa., gave a lecture Jan. 9 upon "What it means to be a librarian."

ALUMNAE NOTES

Margaret Louise Bateman, 1910, has been appointed assistant in the Soho Children's Room, Carnegie Library of Pittsburgh.

Phyllis E. Murray, 1913, has been appointed children's librarian in the Public Library of Oshkosh, Wisconsin.

Emma Dunham Lee, 1911, has been appointed librarian of the Davis Library of Highway Engineering of Columbia University, New York City.

Lesley Newton, 1913, has been appointed assistant-in-charge of the Soho Children's Room, Carnegie Library of Pittsburgh.

Elizabeth Hoard Dexter, 1914, has been appointed children's librarian in the Detroit Public Library, Detroit, Mich.

CARNEGIE LIBRARY OF ATLANTA—LIBRARY
SCHOOL

The circular of information of the Library School of the Carnegie Library of Atlanta for 1913-1914 has appeared. The school has a one-year course designed to prepare students as librarians for small libraries, and as assistants in other libraries. Especial attention is given to the course in administrative work, including the study of plans for small buildings and the details of organization of new libraries, in order to meet the demand which the increased activity of the library movement of the South frequently makes on the graduates of the school. A thesis on the organization and administration of a small public library is required of each student before graduation.

It is with books as with men; a very small number play a great part; the rest are confounded with the multitude.—VOLTAIRE.

Reviews

PRAY, JAS. STURGIS, and KIMBALL, THEODORA. City-planning; a comprehensive analysis. . . for the classification of books, etc. Harvard Univ. Press, 1913. 103 p. O.

This "comprehensive analysis of the subject arranged for the classification of books, plans, photographs, notes and other collected material" is based on a "Preliminary outline" by the same authors printed in May last in order to invite suggestion and criticism. Mr. Pray is the chairman and Miss Kimball the librarian of the School of Landscape Architecture of Harvard University, and the classification has been developed primarily to meet the needs of that special library. The same scheme is to be used in the arrangement of the extensive city-planning bibliography which the School of Landscape Architecture is preparing.

"City-planning" is defined in the prefatory matter as "the organization of the physical city, town or district to fit it to its complex use." Its diverse relationships, its rapid present growth in importance leaving the whole subject in a state of flux and any form of classification consequently difficult, the inconsistencies and maladjustments inherent in any attempted classification however carefully worked out—all these are clearly pointed out also in the preface.

In form the present classification follows the L. C. scheme and fits into it as a subdivision of NAC, City-planning. It may, however be easily adapted to the D. C. as one of the subdivisions of 710 Landscape Gardening. In this connection it might be mentioned that a full classification of Landscape Architecture proper, prepared by Professor Henry V. Hubbard and Theodora Kimball, will be shortly forthcoming.

The following summarizes the classification, frequent gaps being left for future growth:

- 250 General works.
- 500 City-planning movement.
- 700 Legislation.
- 800 Professional practice.
- 900 Study and teaching.

COMPOSITION OF CITY PLANS

- 1200 General theory.
- 1300 Data. Fundamental conditions.
- 1600 Organization and subdivision of city area by dominant function. Districting.
- 1800 Organization and subdivision of city area by streets and blocks.

- 1900 Elements of city plans.
- 2000 Channels of transportation.
- 3000 Blocks and lots. Land subdivision.
- 3400 Structures.
- 4000 Open spaces, public and quasi-public, other than for traffic.
- 4800 Vegetation.
- 5000 Other elements.
- 5200 Types of city plans.
- 6800 City-planning, by countries and cities.

A "Geographical table" is appended to the classification proper, and a very full "relative index" (to numbers of topics in the classification, as in the D. C., not to pages) which add greatly to its usefulness. F. R.

BRIGHAM, JOHNSON. A library in the making. Pioneer history of the Territorial and State Library of Iowa.

This small volume forms a valuable contribution to the early history of the library movement in the middle west. Mr. Brigham is well fitted for the task, as he is a trained librarian and has a wide knowledge of his subject. He carries the history of the library back to the period when Iowa was a part of the territory of Wisconsin. The first territorial library was located in Dubuque in 1837, and one year later under an act of Congress the first Iowa State Library came into being. With minute attention to details Mr. Brigham reviews the history of the library for the succeeding years. He presents as "Supplemental" a catalog of the Territorial library in 1839, and a series of library reports from 1840 to 1868. The treatment throughout is annalistic in type which may be explained from the cause of its inception. The minutes of the Iowa Library Board of September, 1912, note that "the librarian collect and edit the territorial and early reports of the State Library and prepare them for publication." The pamphlet is attractively printed and is illustrated by pictures of the first territorial librarian, his commission signed by the governor and the title page of the first catalog issued by the library in 1839. The work of Mr. Brigham should inspire other librarians whose libraries have even a longer history than the Iowa Library to make a research through the early files of their archives and prepare a similar compilation.

H. O. B.

United States Bureau of Education. Bulletin 38, 1913. A list of books suited to a high-school library. Compiled by the University High School, Chicago, Ill. Washington, 1913. 104 p.

A list of perhaps 1500 titles classified under

the names of fifteen high school subjects of instruction. It differs from similar lists in that it is not compiled from the librarian's point of view, but from that of the departments concerned, each having contributed those titles which its experiences have proved of greatest value. Latest editions have been preferred as well as the least expensive works where there was any choice. Textbook editions have been carefully avoided and some attention has been paid to good illustrations. Single and double stars throughout differentiate the more and most useful books. Many titles are repeated in two or more sections. A full author index is added. That the list is strictly up to date is evidenced by the inclusion under the caption, "Drama" of Synge, Galsworthy, Bernard Shaw, shoulder to shoulder with Shakespeare. Many of the titles carry brief but pithy notes, although some departments have omitted this feature entirely. The minor typographical mistakes are very few considering the composite preparation of the list. One scarcely recognizes Disraeli under the mixed caption "B. D. Beaconsfield," and "G. S. Cable" is noted as an undue liberty with a very familiar name.

The list is an admirable one, however, and little fault can be found with it or valid differences of opinion save those suggested by varying personal viewpoints. J. I. W.

LIBRARY ASSOCIATION. *Book Production Committee*. Interim report. London, Lib. Assn., 1913. 32 p. O.

This preliminary report, from a committee which has been at work for several years past, is published at this time to gain for the recommendations proposed further criticism, suggestion and support. The committee was established "as an advisory body to deal with everything connected with the production of books from a bibliographical and technical point of view." It resolved itself for work into sub-committees as follows: Paper, Messrs. H. T. Coutts, W. Powell, E. W. Hulme and R. W. Sindall; printing and illustrations, Messrs. C. J. Davenport, C. T. Jacobi, C. T. Pollard and Emery Walker; sewing and publishers' binding, Messrs. D. Cockerell, C. J. Davenport, E. W. Hulme and G. A. Stephen. The other members of the main committee are H. R. Tedder, L. C. Wharton and A. J. Philip.

Already improvements in publishers' books can be noted, says the report, some at the direct suggestion of the committee. The purpose of this report is to draw up the committee's consensus of what are the best methods and materials commonly used in commercial

bookmaking. The report, practically entire, will be reprinted shortly in the *Publishers' Weekly*, which precludes the necessity of extended summary of its contents here.

Some of the bibliographical requirements of a good book seem obvious, but few books observe them all. Particularly important because often disregarded are those calling for dates of previous editions, if any, indication of "The End" of a work, and proper headlines.

Heavily coated papers are, as might have been expected, condemned; so, also, by implication, are India papers, for public library use. Good machine sewing is given preference over hand sewing. Where possible, publication of all illustrations on segregated forms in the back of the volume is advised. This last rule may rouse question.

Mechanically, as was to be expected, this report itself is, in paper and typography, an example of excellent bookmaking. F. R.

Librarians

THE following members have been added to the staff of the Gary Public Library: Miss Dorothy Letherman, formerly an assistant in the Valparaiso Public Library, general assistant; Miss Ida Mendenhall, Gary, librarian's assistant; Miss Dena Szold, Gary, temporary assistant. Miss Aidah Taylor has assumed the duties of Miss Gibson.

THE following appointments have been made recently to the staff of the Purdue University Library in Lafayette, Ind.: Miss Mary McMahon, Lafayette, graduate of Purdue University, 1913, assistant to the cataloger; Mrs. C. P. Matthews, assistant in charge of serial accessions; Miss Nina Waldron, librarian's secretary. Miss A. Eugenie Vater, Lafayette, is taking an apprentice course.

RECENT appointments to the library staff at Columbia University, New York City, are: Miss Isabel Monro, B. S., assistant in the serial department; Miss Katherine M. Christopher, A. B., reference assistant in the periodical reading room; Miss Bessie B. Scripture, A. B., reference assistant in the general reading room; Miss Florence Wilson, acting librarian of the natural science libraries; Miss Doris E. Wilbur, B. S., cataloger; Miss Florence H. Davis, A. B., cataloger; Miss Margaret C. Meagher, cataloger.

IN the New York Public Library the following changes in the personnel of the staff have been made: In the main building Miss L. K.

Keller has been appointed assistant in the Library for the Blind, Miss Marguerite DuBois in the accessions division, and Miss Olga Froelich in the filing division of the reference department. Appointments to positions in the branches are: Miss E. E. C. Lindeberg to Chatham Square, Miss F. E. Wheelock to Webster, Miss E. Duncan to 125th Street, and Miss F. M. Dean to Tremont. Miss G. A. Reed was transferred to the Central Circulation room from Webster branch, and Miss E. A. McAward from 125th Street branch to the new Melrose branch. Resignations have been accepted from Mrs. M. A. Metzner of the central registration office and Miss A. H. Wright of Bloomingdale.

BARNES, Mrs. Lillian, has been appointed librarian of the Remington (Ind.) Public Library in place of Louise Hartman, who is continuing her work at Earlham College.

BLEECKER, Louise O., who has been assistant librarian in the Madison (N. J.) Public Library for two years, has resigned to become chief of the cataloging department of the Public Library of Elizabeth, N. J. Miss Bleecker is a graduate of the Pratt Institute School of Library Science, and had five years' experience in the public library of Newark previous to her library course. While in Madison she had full charge of the cataloging.

CALDWELL, Belle, who is librarian in Charles City, Iowa, has received a leave of absence of four months which will be spent in New York City.

CARNEGIE, Miss Elza K., N. Y. State Library School, '10-'11, has been made librarian in charge of the Wylie Avenue branch of the Carnegie Library of Pittsburgh.

CLARK, Maude, for five years first assistant in the Marshalltown (Iowa) Public Library, has resigned her position and has married Charles Hollingsworth.

CROSS, Marie, has been appointed assistant librarian in the Wabash (Ind.) Public Library.

DICK, Miss Margaret S., N. Y. State Library School, '12-'13, has resigned her position in the circulation department of the Detroit Public Library to accept a position in the library of the Kansas State Normal College, Emporia.

DOWNEY, Elilia, who was at one time assistant librarian in the Muncie (Ind.) Public Library, and has recently been employed by the W. K. Stewart Co., of Indianapolis, has resigned the latter position to become librarian of the public library at Piqua, Ohio.

DU BOIS, Isabel, Drexel, 1911, has resigned her position as branch librarian at Fort Wayne Ind., to accept the position of children's librarian at Poughkeepsie, New York.

ELIOT, Miss Ruth F., B.L.S., N. Y. State Library School, '11, has been appointed assistant to the chief of the book selection and study club department of the Wisconsin Free Library Commission.

EMERSON, Prof. Samuel Franklin, of the University of Vermont, has been appointed chairman of the Vermont Free Public Library Commission to complete the unexpired term of Dr. Guy Potter Benton, resigned.

FIELDS, Maude, has been appointed librarian of the Gas City Public Library.

FISHER, Grace, librarian of the Tolleston branch of the Gary Public Library, has been granted a leave of absence on account of ill-health.

FURNAS, Marcia, has been appointed assistant cataloger in the Indiana State Library. Miss Furnas is a graduate of Earlham College and has taken some graduate courses at Bryn Mawr. She was a member of the 1911 class of the Public Library Commission Summer School for Librarians.

GIBSON, Anna, formerly an assistant in the public library at Gary, Ind., has taken a position in the children's department of the Cleveland (Ohio) Public Library.

GORTON, Helen D., formerly librarian of the public library in Oskaloosa, Iowa, has been appointed librarian of the Plymouth (Ind.) Public Library. Miss Gorton is a graduate of the University of Wisconsin Library School.

HAGERMAN, Freda, is taking the place of Lillian Kaufman, assistant librarian of the Waverly (Iowa) Public Library. Miss Kaufman has recently gone to Florida.

HAMLIN, John H., librarian of the Reno, Nev., Free Public Library since its establishment ten years ago, resigned Jan. 1 to take a position in a San Francisco publishing house. Ernest Damon, assistant librarian, will be in charge of the library until the board of directors name his successor.

HARRISON, Joseph LeRoy, formerly librarian of the Providence (R. I.) Athenæum, has had republished in pamphlet form two articles which originally appeared in the *New England Magazine*, and which give a history of the Athenæum from 1753 to 1911.

HENLEY, Lillian, formerly assistant reference librarian in the Indiana State Library, has assumed her duties as bibliographer in the bureau of legislative and administrative information, after a year abroad.

HILL, Fanny W., who has spent three months cataloging the public library in Union City, Ind., will return to the Library School of the University of Illinois for the spring semester.

HOWE, Winifred E., has been appointed editor of publications in the New York Public Library beginning Jan. 1. Up to that time she was connected with the Metropolitan Museum of Art, where she had been doing editorial work on the *Bulletin* of that institution. She is the author of a history of the Metropolitan Museum of Art which was published last year. Some time before her connection with the Metropolitan Museum, she was engaged in library work.

HUME, Jessie Fremont, of the Queens Borough (New York) Public Library, has been elected to fill the place on the New York Library Club Council made vacant by Dr. Johnston's resignation.

IMHOFF, Miss Ono M., N. Y. State Library School, '98, has gone to Washington to take a position as librarian with the International Health Commission.

JOHNSTON, Myrtle, has been appointed second assistant in the Fargo (N. D.) Public Library.

LAMPE, Lilli, a graduate of Pratt Institute Library School in 1911, has been appointed first assistant of the public library in Bergen, Norway. Miss Lampe has been employed at the library since October, 1911.

MACCUDY, Jessie C., has been appointed assistant in the Madison (N. J.) Public Library in place of Miss Louise Bleecker, resigned. Miss MacCurdy has spent two years in study in Europe, and has had library experience in Toronto.

MCDERMOTT, Mary, who has been an assistant in the children's department of the Indianapolis Public Library, was married recently to Richard Graham.

McNITT, Esther U., of Logansport, Ind., began work Dec. 1 in the department of history and archives of the Indiana State Library. Miss McNitt is a graduate of Vassar College and was formerly connected with the department of history in the University of Wisconsin.

MCCAINE, Helen J., who has just retired from the librarianship of the St. Paul Public Library, held that position for forty years. Concerning Mrs. McCaine's service the library board has issued this statement: "Mrs. Helen J. McCaine has a record of honorable public service almost unique in St. Paul. Coming here from New Hampshire in 1874, she brought with her a public library tradition which drew her into immediate relations with the St. Paul Library Association, and soon she took charge of its small collection of books, which six or seven years later became the nucleus of the St. Paul public library. Under her administration that list has grown from 5000 volumes to 150,000 volumes, and the annual circulation has increased from 20,000 to nearly 500,000. Under her administration the organization of the library staff has been constantly developed in the interests of efficiency and the service has been improved and enlarged along most approved lines. The modern finding lists, now clearly completed, will make the contents of the library available for the use of all the people. It is due chiefly to her efforts that her successor will be in a position to take full advantage of the great opportunities which will follow the establishment of the library. During her long tenure of office, Mrs. McCaine's relations with this board, with the library staff and with the public have been most pleasant."

MALONEY, Miss Mary, has been appointed assistant in the Free Public Library at Louisville, Ky., in place of Miss Sadie Doyle, resigned.

MARSHALL, Cecil, has been appointed librarian of the Converse (Ind.) Public Library in place of Miss Charline Carmock.

MILLIGAN, Flora, librarian of the public library of Tipton, Iowa, is enjoying a four months' leave of absence. Her place is being filled by Helen Schriver, a former assistant.

NASON, Sabra L., of Fairmont, Minn., has been appointed librarian of the Umatilla county library in Oregon, in place of Miss Lotta Fleek, resigned.

NICHOLS, Irene M., has resigned her position as librarian of the Seymour Public Library at Ansonia, Conn. She will be succeeded by Edith Lovering, who has taken a course of training in the Springfield (Mass.) Public Library.

O'SULLIVAN, Josie, has been appointed librarian of the Benicia (Cal.) Public Library, in place of Neil Scannell.

PARSONS, Mary P., has been appointed an assistant in the reference department of the New York Public Library beginning Dec. 17. She is a graduate of Smith College, B.A. 1908, and of the N. Y. State Library School 1913; student assistant Smith College library; librarian Mt. Hermon (Mass.) school library 1909-11; assistant Bay City Public Library, summer 1911-12; assistant N. Y. State Library October, 1912 to December 15, 1913.

PERRIN, John William, librarian of Case Library, Cleveland, Ohio, has recently published a "History of the Cleveland sinking fund of 1862," which was established as the basis of a fund for the redemption of the principal of the water works bonded indebtedness.

PHELPS, Anna R., whose work as library organizer for New York state was cut short last October by the failure of the legislature to appropriate money for her salary, has been restored to her position and will go on with the work.

PRICE, Vera, who has been assistant librarian of the Alliance branch of the Cleveland, O., Public Library, has been appointed librarian at Bucyrus, O. Miss Price graduated from the Western Reserve University Library School in 1909. Since her graduation she has been librarian at Greenville, Miss., and has been two years in the Cleveland Public Library.

RAUCH, Louise, who was assistant librarian of the Logansport (Ind.) Public Library for nine years, was married Oct. 25 to B. E. Jones of the Conservation Department of Geological Survey. She has been succeeded by Miss Edna Walters of Logansport.

RIGLING, Alfred, has been for thirty years the librarian of the Franklin Institute in Philadelphia. In the January number of the *Journal* of the Institute is reprinted the following resolution, which was adopted by the board of managers in appreciation of his service: "The board of managers takes this occasion to express its unqualified approbation of the zealous and efficient service rendered to the Institute by its librarian, Alfred Rigling, and those of its present members whose collaboration in the activities of the Institute extends back to the earlier years of Alfred Rigling's time take this occasion to add in their own behalf, and as voicing the sentiments of colleagues now passed away, a note of high appreciation of the faithful devotion to duty exemplified by Alfred Rigling in his work as librarian of the Institute throughout all this course of years."

SANBORN, Henry N., N. Y. State Library School, '13, has resigned the librarianship of the University Club of Chicago, to succeed Carl H. Milam as secretary of the Indiana Public Library Commission, Indianapolis.

SAXTON, Elsie, librarian of the DeWitt (Iowa) Public Library, is spending the winter in Florida with her parents. Miss Harriet McQuiston is serving as librarian during her absence.

SHEPPARD, Sara, the librarian at Corning, Iowa, has been given a year's leave of absence. Miss Idelle Riddile, assistant librarian, is in charge of the library.

SMITH, Robert L., of the Brooklyn Public Library, has been elected treasurer of the New York Library Club, in place of H. O. Wellman, resigned.

SPENCE, Zella, has been appointed an assistant in the children's department of the Indianapolis Public Library.

STEVENSON, William M., died Jan. 11 after a short illness with pleuro-pneumonia. Mr. Stevenson was for some years in charge of the library at Allegheny, Pa. He spent some time in Germany pursuing special studies, and on his return to this country was sociological librarian in the Brooklyn Public Library. He retired from this post a year ago, and at the time of his death was making plans to return to Germany.

SWOPE, Edna, who has been librarian of the Seymour (Ind.) Public Library has resigned, and Katherine Frazee, of Arcadia, has been appointed in her place.

TILLMAN, Mrs. Bessie King, formerly librarian at Rensselaer, Ind., was killed in a street accident in Hammond recently.

WELLMAN, Harold O., for the past four years assistant to the chief of the circulation department of the New York Public Library, resigned Jan. 10 to accept a secretarial position in the Boston Chamber of Commerce.

WHITE, Daniel G., aged 74, for more than 20 years librarian of the public library in West Springfield, Mass., died Dec. 27, of pneumonia. He was born in West Springfield, and after attending the public schools engaged in farming. In 1891 he was chosen librarian of the public library, which was then in a small room in the rear of the High School. Mr. White was instrumental in providing the public library which the town now enjoys.

THE LIBRARY WORLD

The Bulletin de l'Association des Bibliothécaires Français for November-December 1913, contains an article by Charles Sustrac entitled "Impressions d'Amerique: 'Public Libraries.'" It is a piquant lively account of a hurried visit to a dozen, chiefly public, libraries in Boston, Chicago, Pittsburgh, Washington, Philadelphia and New York. The article ministers abundantly to American complacency in its praise and comments.

New England

VERMONT

There are still 56 towns in Vermont without free public libraries. In an effort to decrease this number the Vermont State Library Commission is sending out a circular letter making suggestions regarding the insertion of proper articles in the warrants for the annual town meetings, relative to establishing libraries.

Barnard. The library has received over 200 volumes from an old resident.

Chelsea. The library has received a gift of 539 volumes from Mr. Hilas E. Roberts of Boston. This makes a total of about 9500 from Mr. Roberts, who has also given one steel stack and has offered to meet the expense of such other stacks or other changes as may be needed.

Essex Junction. The library has been moved into two rooms on the ground floor of the old hotel. The rooms have been thoroughly renovated, and are very attractive.

Johnson. In this village of about 600, the population of the entire township being about 1600, some twenty of the ladies organized a woman's club fifteen years ago. Its purpose was for literary benefit and to promote sociability, and also to work for the town library, there being one of a few hundred books, kept in a private house. To-day the books, which now number fifteen hundred or more, are housed in a good brick building, the contract for which was let at five thousand dollars, and it is paid for to within the last hundred dollars. A townsman gave the location, and a few solicited subscriptions helped out, but the club has for the most part earned the money.

South Royalton. The branch library will be open for two hours every Tuesday afternoon

for the benefit of the school children, the school paying the extra expense.

MASSACHUSETTS

Ashfield. The Belding Memorial Library, which is on the road to completion, will be a handsome structure. It is built of marble from the St. Lawrence quarries at Gouverneur, N. Y., is of classical design and of fire-proof construction. It will contain a reference room, reading room, and stack room with a capacity for 15,000 volumes. The building is 53 feet long by 41 feet deep. It is situated on a lot formerly occupied by the Gardner house toward the west end of Main street. It is probable that the building will cost about \$30,000.

Boston. The old Faneuil Congregational Chapel on Brooks street, Faneuil, is to be converted into a branch of the Boston Public Library. It will cost about \$1500 to make the changes necessary for the establishment of the branch.

Boston. The State Library trustees have recommended the following legislation: Appropriation to purchase the statute laws and legislative records of other States and counties necessary to fill the gaps in the library's collection; the repair and preservation of certain rare and valuable books, notably the early session laws of Massachusetts and Rhode Island.

Cohasset. The public library is to receive \$5000, according to the will of the late Horace W. Wadleigh, of Boston.

Dedham. By the will of Edward A. Penniman, who died in Switzerland last July, the Public Library of Dedham receives the sum of \$5000.

East Boston. The exterior of the new Public Library Building on Meridian street is practically completed, and the work on the interior is rapidly progressing. Within a few months it is expected that the building will be ready for the formal opening.

Fall River. A steel floor is to be installed in the reading room of the Public Library so as to afford an additional second-story room. The present reading room, under the change, will have a height of 21 feet, and the second-story room will have a height of 19 feet. The trustees contemplate providing at this

time only for the lower room. When the alterations are completed, necessary repairs such as plastering and painting will be made in this room and it will continue to be used as a reading room. It has not been determined to just what purpose the new room on the second floor will be put. This room will be left in an unfinished state until additional funds are available next year.

Lenox. By the will of Dr. Richard C. Greenleaf, late of Lenox, the Lenox Library Association has received a bequest of \$2,500.

Somerset. Hood P. L. Frances Rogers, lbn. (Rpt.—1913.) Accessions 138. New registration 70; total circulation for year 7274; maximum monthly circulation 797; minimum 270; average monthly circulation 606; books delivered to Pottersville exchange during year 1294; maximum monthly circulation 141; minimum 38.

Wakefield P. L. H. Gertrude Lee, lbn. (Rpt.—yr ending Dec. 31, 1913.) Accessions 781; total number volumes in library 18,678. Circulation 54,728. Income \$2809.34, of which \$531.18 was spent for books.

Waltham. Action has been taken by the City Hall Commission and the members of the city government approving the Central House lot as a site for a new library. The city will issue bonds to provide the necessary funds for the library.

West Roxbury. A petition has been sent to the mayor asking for the establishment of a branch library on Hyde Park avenue.

Worcester. The valuable medical library of the late Dr. John Green, the famous oculist, who died in St. Louis in December, has been bequeathed to the Worcester District Medical Society. Dr. Green was a native of Worcester and was a brother of Samuel S. Green, librarian emeritus of the Public Library.

CONNECTICUT

Bridgeport. The Board of Library Commissioners has filed the following requisition to cover the needs of the Bridgeport Public Library during the coming fiscal year: Books \$5500; binding \$2000; periodicals and newspapers, \$1400; fuel, \$900; light and power, \$2000; salaries \$10,500; library supplies \$1000; printing, etc. \$900; insurance on books, etc. \$500; furniture repairs and general expenses, \$3175; total, \$27,875. The directors recommended that the usual one-quarter mill tax for the "Library Fund" be laid to raise said amount, as required by law.

Bristol. At the last meeting of the board of directors of the public library Charles L. Wooding, the librarian, submitted figures to show that the circulation of books in the library during 1913 was about 90,000, which is fully 7000 more than during 1912.

Hartford. The State Library has received a valuable manuscript, containing the payroll of Lieutenant-Colonel Gray's company of the Sixth Connecticut Regiment, dated March, 1780. It is the gift of Governor Simeon E. Baldwin, and was inherited by him from his father and grandfather. The records number about 125 pages.

Hartford. The State Library has received from Senator Isaac A. Brooks of Torrington, a collection of manuscripts from the estate of Lewis M. Norton of Goshen, among which are notes of the original layouts of railroads in this state and in New York, which were built or proposed in 1836.

Hartford. *Watkinson Ref. L.* Frank B. Gay, lbn. (50th annual rpt.—1913.) Accessions 1469 volumes and 554 pamphlets. Total number volumes in library 85,408.

"One of the most insistent and persistent demands on the library is for works on local history, for the purposes of family history and genealogy. It has long been our policy to leave to the Connecticut Historical Society this subject so far as it embraces America. But the records of the fathers in 'our old home,' the Watkinson tries to supply. The histories of the English towns, shires, and parishes are legion, and usually costly. In the last few years a great number of parish registers have been published, usually in very small editions; and now the searchers are demanding these scarce books to get births, marriages, etc., and the old shire history is less called for. A new demand has also arisen in the last year or two for Irish local and family history. The early immigrants from that distressed land settled generally in lower New England, and near Boston and New York. So many of them have now the wealth and position of settled families that they are coming for information on their old home and parentage. The Watkinson had the standard histories of Ireland, but little on the towns and parishes, while O'Hart's 'Irish pedigrees' and a half dozen cognate works comprise our family history. Last spring in New York was sold the Richardson library, the largest collection of books relating to Ireland ever auctioned in this country. We took advantage of this, which with a considerable order to our

London agents has filled several shelves with this material, most of which is scarce."

Hazardville. At the annual meeting of the directors of the Enfield Public Library no appropriation was voted to pay for transporting the library books from Hazardville to Thompsonville once a week, during the coming year. E. C. Allen has transported the books for \$40 a year and will continue to do so for a time free of charge. The action of the library directors was a great surprise to the people here.

South Manchester. The South Manchester Library, which has been discontinued since October 23, the day of the school fire, was reopened Dec. 29. The Eldridge house on Main street has been leased for a library and has been remodeled to conform with the requirements of a library. About 1200 books were lost in the children's department, but they will be replaced in a few weeks.

Thompsonville. Work on the new Carnegie library building at Pearl and Franklin streets has been practically completed and it will be only a few weeks before the building will be ready for occupancy. The library has been built through an appropriation of \$20,000 donated by Andrew Carnegie with the provision that the town annually appropriate one-tenth that sum for maintenance and supplies. Despite the fact that the library is nearly completed no action has yet been taken to arrange for dedication exercises.

Windsor. The twenty-fifth anniversary of the founding of the Windsor Public Library Association was celebrated in the town hall Dec. 17. Professor William Lyon Phelps, of Yale University, made an address on "Culture and happiness," and Rev. Dr. F. W. Harriman, president of the library association, gave a short address on the history of the association.

Middle Atlantic

NEW YORK

The work of the Extension Division has been greatly hampered this winter by the reduction in the state library appropriation. Besides cutting down the allotments for the libraries of the state by \$10,000, and reducing the appropriation for books for traveling libraries from \$6000 to \$1000, the salaries of two library organizers were cut out altogether. Belated action was taken by the legislature in December in the form of a supplementary finance bill which has been signed by the present governor. It will enable the Extension

Division to go on with its work, and both of the organizers have been reinstated.

Albany. The New York State Library asks the assistance of libraries in all parts of the state in replacing and strengthening its collection of local history. Many libraries will be in a position to help by sending their duplicates or by putting the State Library in touch with owners of material which throws light on some phase, no matter how minute, of the history of the state—industrial, military, ecclesiastical, etc., or of some locality. Especially at this time the library will welcome assistance in building up its collections of directories and local newspapers, particularly those printed before 1850.

Brooklyn. It has been recommended by the Finance Committee of the Brooklyn Public Library to the Board of Trustees that application be made to the Board of Estimate and Apportionment for a sufficient appropriation for the maintenance of the two new Carnegie branch libraries, now in process of construction, which it is expected will be completed by July 1 next. One of these, the Eastern Parkway branch, at Eastern Parkway and Schenectady avenue, will have ten assistants on its staff of workers, and the other, the Brownsville Children's Library, at Stone and Dumont avenues, will have eight assistants. The Administration Committee has reported adversely on the request for the establishment of a regular station of the library at the Bush Terminal, in South Brooklyn. The circulation of library books in that locality, it was asserted, does not justify the establishment there of a regular station.

Cortland. Hiram J. Messenger, actuary of the Travellers' Insurance Co., of Hartford, Ct., has bequeathed all his books and pamphlets to the Franklin Harth Library, of this town.

Falconer. The lot at the southeast corner of North Work and James streets has been secured by the library committee, and the building which was recently purchased for library purposes will be removed to this lot some time in the near future.

Jamaica. The Board of Trustees of the Queens Borough Public Library have been informed that after May 1 next \$3300 rent instead of \$2500 will be charged for the building at 402 Fulton street, Jamaica, in which are housed the administrative offices of the Queens Borough Public Library and the Jamaica Branch Library, and where also the trustees themselves meet. Should the board

decide to withdraw from the building they are under obligation to restore it to its original condition.

New York City. One hundred librarians of New York City have formed a branch of the Women's Political Union. Miss Anna Burns, who has charge of the circulation room in the main building, has been elected chairman.

New York City. Clarence W. Bowen, president of the New York Genealogical and Biographical Society, of 226 West Fifty-eighth street, announces that \$65,000 has been contributed as a building fund, and that steps will be taken immediately to select a site and to erect a building. Several pledges, including one of \$10,000 by the late J. Pierpont Morgan, were contingent upon the raising of the full amount.

New York City. General Theological Seminary L. Edward Harmon Virgin, lbn. (Rpt.—yr. ending Apr. 30, 1913.) Accessions 1965; total number volumes in library 55,525. There were 6082 readers in the library, and 6596 loans for day or evening work. Expenditures for books, manuscripts, and binding \$4181.84. [Money paid for salaries, cataloging, and caretaking comes from the general funds of the institution and is not included in this report.]

The library has received during the year three more manuscripts of the Gospels. Of these, one is a Greek manuscript of the Gospels on vellum, written in the tenth century, and another is a Lectionary of the Gospels on paper, probably written in the fifteenth century. These manuscripts were originally procured in Canea, Crete, by the Rev. George Benton, an early missionary of the American church and a graduate of the seminary in 1836. From him they descended to his son, the Rev. A. A. Benton, G. T. S. 1860, and have come to the seminary through his son, Rev. W. L. H. Benton, G. T. S. 1894. They are to be called the Benton manuscripts. The third manuscript is a Greek cursive manuscript of the tenth century, which was acquired by purchase.

New York City. "Life," the large sculpture composition by George Grey Barnard, covering the façade of the north pediment of the Public Library, has been disclosed to the public. A reclining figure of a Crusader in armor rests upon the Book of Life, while on his shield is the figure of Christ. On the other side is a figure representing History, writing in the book. Mr. Barnard's group representing "The Arts," covering the façade of the

south pediment, will not be completed for several months. There will be two figures in it, one representing Painting and the other Sculpture.

New York City. The new Melrose branch, erected at a cost of \$100,000 to the Carnegie Fund, at Morris avenue and 162d street, The Bronx, was opened Jan. 16 for public inspection and use. The building is one of the largest branches of the library and opens with 12,000 books on its shelves. Mrs. I. L. Molnar, formerly librarian of the 96th Street branch, is in charge of the new branch.

Rochester. An appropriation of \$60,000 for the maintenance of distributing centers and the opening of three additional branches at a cost of \$8000 each is recommended for 1914 by City Librarian William F. Yust in his December report.

Rush. A library will soon be opened to the public in a large room over N. S. Sherman's general store.

NEW JERSEY

Gov. Fielder has not reappointed H. C. Buchanan as state librarian, but has replaced him with John P. Dullard. It is stated in the New Jersey press that the place was given to southern New Jersey Democrats as a "plum," and Mr. Dullard's name was presented to the governor as one who had done good party service.

The 232 libraries of the state circulated about 8,000,000 books during the past year, according to the fourteenth annual report of the Public Library Commission of New Jersey, which has just been submitted to the governor. The commission reports that there never has been so general and widespread interest in library affairs among the people as seems to prevail throughout the state at the present time. Forty-eight requests for traveling libraries have had to be refused because the supply was exhausted. There are still 825 communities in the state without library facilities.

Asbury Park. The Asbury Park Library Board has received assurance that Andrew Carnegie will contribute \$40,000 for a public library at Asbury Park, provided the city will furnish a site and maintain the library.

Bayonne P. L. (Rpt.—1913.) Accessions 5569; total number volumes in library 36,396. Circulation 214,477. Number of borrowers 12,862. Income \$19,248.31; balance on hand \$3144.06.

The library has four branches in schools, and stations in one playground, one manufacturing plant, and in every fire house. The report showed that the technical part of the library was well patronized, which was very gratifying to the trustees, as technical books in the library have been bought with the idea of catering to the men engaged in the mechanical and kindred trades in Bayonne. In 1912 the trustees returned to the city \$1337.58, which was used to take up library bonds.

Eatontown. The Free Public Library has just been reorganized, and is now open to the public.

Elizabeth P. L. Charles A. George, lbn. (Rpt.—1913.) Accessions 4563; total number volumes in libraries 37,118. Circulation 194,438, an increase of 23,190 over 1912. Total registration 10,365.

Hoboken. The West Hoboken Free Public Library Board has decided to place books in the police station and firehouses for the use of the men on duty there.

Midland Park. A free public library has been opened in an unoccupied class room of the school house.

Newark. The business branch of the Free Public Library has been moved to the new building at 15 Beaver street. The new quarters were especially constructed for the purposes of the library, and have ample means of light and ventilation. The building is two stories in height and is constructed of stone and brick. The first floor is given up to maps, directories, trade guides and, in fact, everything pertaining to business. The second floor is devoted to the distribution of books of fiction and the reading room, where will be found the latest periodicals. Owing to the increased facilities, Miss Sara B. Ball, branch librarian, announces that the work of supplying general information will be broadened.

Princeton. In response to a request from George Dobbin Brown, the reference librarian of Princeton University, President Woodrow Wilson has presented to the University Library the original copy of his inaugural address. This document, with two letters from the President, has been placed in the exhibition room of the library. Near by is the original autographed copy of the inaugural address of James Madison, the other Princeton graduate who has occupied the presidential chair. President Wilson in his letters on exhibition with the inaugural, explains that the

original draft of the document was composed in the Princeton University Library shortly before he was inaugurated. He composed his address in shorthand, at which he is adept. The notes he is unable to find among his papers. From them he personally transcribed on his own typewriter the document he has now presented to the library. President Wilson says in the other letter that at his inauguration he read from printed slips.

Totowa. Some time ago a library was started among the members of the Epworth League of the Totowa Methodist Episcopal Church, and books were contributed by a number of people in the borough. The library is now located in the church, and steps are being taken to turn it over to the borough authorities as a free public library.

Trenton. Through the generosity of John Lambert Cadwalader, of New York City, but who has large interests in Trenton, this city is to have a \$50,000 addition to its Free Public Library. The addition will be erected in the rear of the present building, and will extend a depth of 35 feet with the full 50 feet width, similar to the old building. A considerable portion of the first floor and basement in the extension will be occupied with a new book-stack, which will accommodate 100,000 volumes. The present stack has a capacity of 50,000 volumes and is overcrowded. The design is to place the children's department in the basement (westerly side), which will be opened up with numerous windows. A separate entrance from the street will be provided for the children. The present children's room will be joined with the existing magazine and periodical department, which has long been inadequate for its purpose. The present loan desk has also been long overcrowded. With the Cadwalader extension, it will run the entire depth of the building, and this will enable the trustees to devote a large space to open book shelving. Another valuable improvement will be the opening up of the roof immediately over the section of the second story now devoted to the Trentonian's collection, and the construction overhead of a well-lighted dome. At present this department is very poorly lighted. Assurance is given that the new work will be carried on so as to cause little or no interruption to the regular operation of the library business. The original library building was designed by Spencer Roberts, a Philadelphia architect, and cost about \$100,000. The building is about thirteen years old.

PENNSYLVANIA

Pennsylvania State L. Thomas Lynch Montgomery, lbn. (Rpt.—yr. ending Dec. 1, 1912.) Accessions 14,601, including 778 volumes and 50 pamphlets of Pennsylvania. Receipts \$22,270.82; expenditures \$30,427.13; balance on hand \$1843.69.

The inadequacy of the present building for the work it does is marked. While there is a great deal of waste space impossible to utilize, the museum and the legislative reference bureau fill their quarters to overflowing, and the Free Library Commission has to conduct its work in the cellar, which is uncomfortably damp during certain portions of the year. More than all this, the building is not fire-proof. The library is closed Saturday afternoons, and on all Sundays and holidays, and the librarian recommends that it should be open on these days. The Free Library Commission has distributed 18,435 books to 329 rural centres, in addition to those sent out to study clubs from the shelves of the State Library. The collection of lantern slides now numbers 13,448, 1687 having been added during 1912, and the circulation for the year was 30,846. The Index to the Sixth series of Pennsylvania archives was completed in five volumes.

Ardmore. Plans are being prepared for a one-story brick library building.

Harrisburg. *Dauphin County Law L.* David F. Young, lbn. (Rpt.—1913.) Accessions 264; total number volumes in library 6353.

Philadelphia. The Stewart Memorial Library has been formally presented to the Northwestern General Hospital by Miss Mary H. Stewart, the sister of Dr. John Stewart, who died in the hospital a year ago.

Philadelphia. Plans are now being drawn for the new Carnegie Library which, as a branch of the Free Library of Philadelphia, is to be erected on South Forty-ninth street. The credit for obtaining the library is due to the Forty-ninth Street Business Men's Association which has worked hard for the project ever since the subject of a library for that part of the city was first broached.

Philadelphia. Ground has been broken at the southeast corner of Seventieth street and Woodland avenue preparatory to laying the foundation for the \$50,000 Paschalville branch, Philadelphia Free Library. It will be a Carnegie library, as the funds are being supplied by the Carnegie Corporation. The build-

ing was designed by H. C. Richards, chief draughtsman for the Board of Public Education. The building will be 126 x 45 feet. It will be one story in height, and have a high ceiled basement. The main floor will be divided into a general reading room, a reference room and a children's room, which, by being shut off, may be converted into a lecture room, having a seating capacity of 250. This room will be equipped with a movable platform and motion picture screen. The basement will be furnished with a dining room and kitchen. Ample storeroom space is provided on the first floor.

Pittsburgh. Architect Henry D. Whitfield of New York has plans in the making for the enlargement of Northside Carnegie Library, which will cost \$150,000. The building will be two stories high on 40 x 160 feet, of stone construction.

Pittsburgh. That the University of Pittsburgh is in urgent need of a library building has been pointed out recently by university officials. It was disclosed that three valuable libraries contributed to the university in recent years still are packed in boxes, inaccessible to the 3000 students who ought to use them. Gifts have been made to the library fund, and it is believed that if a building were put up its equipment would be donated.

DISTRICT OF COLUMBIA

Washington. The Library of Congress has acquired a collection of some 1500 volumes which have been privately printed at the expense of the authors or their friends, and the assembling of them represents the labor of the past forty years. Most of them are rare, a few are valuable, but the real point of view they illustrate—apart from their value in the eyes of all collectors—is the difference that exists between the standards of those who write books for love and those who publish them for gain. The collection has been brought together by Bertram Dobell, the well-known London dealer in second-hand books.

MARYLAND

Baltimore. If the suggestions of to-day are realized in the future the block bounded on the east by Cathedral street, on the north by Franklin street, on the west by Park avenue, and on the south by Mulberry street, will be transformed into an educational center by the erection of new buildings for the Enoch Pratt Free Library, the Maryland Historical Society, and for a museum. The beginning of this

possible future development is the urgent need of a new and enlarged Central Enoch Pratt Free Library, the present building facing Mulberry street to become a connected annex. The trustees of the library building applied to the Board of Estimates for the sum of \$68,300 to supplement the Pratt annuity of \$50,000 next year. They were allowed \$42,300. Dr. Bernard C. Steiner, the librarian, says of the library's needs: "It is impossible for us to accomplish for Baltimore, what is essential as a service from the library unless we have a much greater annual appropriation. Not alone are we in need of a greater annual sum for maintenance. There yet remains in the Carnegie Fund over \$300,000 for branch buildings, which amount we are unable to expend, because suitable sites have not been procured. This is the case, although there are certain sections of the city which most urgently need such a benefit as a branch library would give them. Greatest of all is our need of a new Central Library Building. The present one was constructed a generation ago, and is crammed with books, while it does not possess certain features regarded as important in modern library buildings. For example, we have no technological room, no safeguarded open shelf room, no room for the especial use of children and young people. We own, on Cathedral street, opposite the Cathedral, three of the five dwellings, and it will be possible to buy the other two, and erect on the site of all five of them, a suitable addition to the central building of a monumental character, for the sum of \$750,000. In this way we could utilize the present structure, and provide for the city a suitable and attractive Central Library Building."

The South

VIRGINIA

Virginia State L. H. R. McIlwaine, lbn. (Rpt.—yr. ending Oct. 31, 1912.) Accessions 4865 books; total number volumes in library 91,882. Number of visitors to library 33,376. Books used in library 25,713; for outside circulation 8033.

During the year the library received two lots of manuscripts of special interest. The first, containing about 30,000 pieces, consists of the correspondence of J. K. Martin, a pension attorney of Richmond in 1850 and thereafter, in reference to claims for pensions for services in the War of 1812. The second lot contains about 25,000 letters and replies from the firm of William Allason & Co., who carried on an

extensive business at Falmouth, Va., from 1760 to 1800. The books of this firm already belong to the library.

The number of traveling library collections is now 232—138 being school libraries, 87 being general libraries, and 7 special libraries. The total number of volumes owned by the department is 11,093. A very important law passed by the General Assembly at its last session was that providing for the purchase by the state of one-half of the Ford's Hotel lot if at the end of the fiscal year of 1912 a sufficient amount of money (\$90,000) should be in the treasury, and if not, then at the end of the next fiscal year. The money was not in the treasury at the end of the fiscal year of 1912, but it was hoped that the purchase might be made the following year, and that appropriation might be made by the next General Assembly for the erection on the property of a modern fireproof building for the State Library and the Supreme Court of Appeals. Such a new building is much needed.

Richmond. A public utilities committee has made recommendation that the city purchase Jeter Memorial Hall, on the Richmond College campus, for municipal library purposes. The building and ground would cost about \$95,000. It is not recommended that a central city library should be permanently established on this site, on account of its location, but it is believed that the present building could be made to serve the purpose of the main library until a better could be secured. The building is excellently located for continued use afterward as a branch library. If the nucleus of a public library for Richmond were started by the purchase of the property in question, the various educational, civic and patriotic organizations of the city would undertake to raise \$25,000 by private subscription for the purchase of books. Richmond is the only city in the United States having a population of 100,000 that is without adequate public library facilities.

Richmond. Opened on New Year's Day, the new Arents Free Library, on South Cherry street, has already begun an important work and is being well patronized. Few knew that there was to be such a library, for Miss Grace Arents, the donor, caused the opening to be informal and notified the patrons of the old St. Andrew's Library only by notices through the mail. The building was started two years ago, and only recently was its construction finished. It is designed to meet the requirements of everything that is convenient and up-to-date in connection with a library. It is an absolutely

free, circulating library, containing now a little more than 6000 volumes, which will be increased in number from time to time, as circumstances demand. The library has a staff of five, with Miss Lucille S. Terrell as chief librarian. The Arents Library is in no sense expected to take the place of the general public library, which should be on a larger scale and built to meet a larger need. It is, however, open to the whole city, and books and magazines are loaned for periods of one and two weeks.

NORTH CAROLINA

Asheville. The annual meeting of the Pack Memorial Library Association was held Jan. 27, reports being received covering the past year's work and the following officers elected for the current year: president, Donald Gillis; vice-president, S. P. Ravenel; secretary, Mrs. A. M. Field; treasurer, D. S. Watson; members executive committee, Charles French Toms, Mrs. E. B. Glenn.

The report of the treasurer showed that the income from library property during the year was \$1,484, and from the librarian \$189.15, a total with former balance of \$77.11 of \$2,750.26. Expenditures included the following items: repairs and improvements to building, \$133; lights, \$100; coal, \$234; librarians' salaries, \$806; janitor, etc., \$438; books, \$760.55.

SOUTH CAROLINA

Charleston. The new library building is progressing rapidly. Most of the work on the outside has been completed, although the present red brick finish is to be covered with stucco. The exterior cornices, of attractive design, are all in place. The stone steps have been erected and the heavy, broad balustrades to the side are in place. The first room on entering is the general reading room and lobby. The rear of the building will be devoted to the book stacks. They are to be fire-proof, as is the entire building, and will have glass floors. Specially constructed shelves will contain the library's volumes, which will be accessible through graceful arches. Below is the semi-basement, where there are a number of rooms of varying size. To either side are rooms which will be used by the South Carolina Historical Society and the trustees of the library. An up-to-date feature to be installed is the vacuum system of cleaning, the appliances running through the length of the building.

GEORGIA

Atlanta. P. L. Katharine H. Wooten, lbn. (Rpt.—1913.) Accessions 4668; total number

of volumes in library 62,060. Circulation 331,987. New registration 8230; total number of borrowers 51,172. Of the total appropriation of \$28,469, \$15,657.98 was spent for salaries and \$7925 for books and periodicals.

The library board and the board of health are coöperating to prevent the spread of contagious disease through the circulation of books. During the year deposit stations were opened at the Wesley Settlement house of the Fulton Bag and Cotton mills, the Stewart avenue house of the Atlanta woolen mills, the Atlanta Paper Company and several schools. Demands made for reference books show that there is an eagerness among readers at the deposit stations to learn the technical branches of their occupations. The library has been given the free use of a building for the Oakland City branch, and the Uncle Remus Association has given space in the Uncle Remus Memorial Building. Plans are being made to open an Atlanta history room in the main building.

FLORIDA.

Tampa. After a struggle lasting more than a decade, Tampa is to have a public library. In January, 1902, Andrew Carnegie offered \$25,000 for a library to the people of Tampa if they would provide a site and an annual contribution from the city, 10 per cent. of the donation, for its maintenance. Because of a disagreement over the site the offer was not accepted. In March, 1911, Mr. Carnegie agreed to double his original offer of \$25,000, and the women of Tampa earnestly but quietly began to work, and succeeded in arousing popular interest in the library. In 1912 the council voted against the library, in spite of this popular interest, and a storm of protest arose. An organization with a membership of over 600 men and women was formed to work for the library, and the council, moved by their arguments, has at last reconsidered its action.

ALABAMA

Birmingham. The public library will have additional space for reference books and a larger room for children when changes voted by the city commission are effected. The space made available for library purposes is a part of the balcony of armory hall, directly opposite the circulating department of the library on the fourth floor, and contains some 750 square feet of floor space. This part of the balcony will be partitioned off from the remainder of the balcony and will be used as a stock room, in which books used only occasionally will be kept. The reference books

will be moved into the present large reading room, which will become both reading and reference room. The children's department will be moved into the old reference room.

KENTUCKY

Hopkinsville. Work on the erection of the \$15,000 Carnegie library has been begun. After the courts decided that the conditions of John C. Latham's will would not permit the location of the library on Peace Park, one of Mr. Latham's gifts to the city, the Board of Council purchased another lot at Eighth and Liberty streets, which was accepted.

TENNESSEE

Franklin. The local chapter, Daughters of the Confederacy, have begun a movement to have placed in the public school building a complete library of southern history.

Nashville. The regular appropriation by the city for library work has been cut down from \$22,000 to \$17,000. Unless the board of commissioners reconsiders its action, some important work will have to be postponed. However, the Eastern colored branch was opened Jan. 28-30, with special exercises for the children Jan. 31, and it is hoped a way may be found to purchase the additional books greatly needed at other new centers.

Memphis. The year book of the Goodwyn Institute for 1913-1914 contains an interesting description of the free public reference library which occupies the seventh floor of the Institute building. Since its opening in January, 1908, the library has gathered together a general reference collection of 10,760 volumes and 5650 pamphlets, specializing on technical, industrial and scientific literature in an endeavor to "make the library a working laboratory of practical information for the men who are making and doing things, especially for those who are making Memphis." The library has had cards in the street cars of the city, and has distributed special lists on advertising, selling, accountancy, business efficiency, etc., at meetings of various organizations of business men, with the result that the use of the library by business men has largely increased during the last year.

Central West

OHIO

Cincinnati. The Camera Club of Cincinnati is planning to give soon a series of free lan-

tern slide exhibitions in the various branch library buildings.

Cincinnati. Bids have been received for a new branch library, to be constructed at the northeast corner of Eighth street and Glenway avenue. The building is to cost about \$20,000, exclusive of the ground. The exterior will be of the English style of architecture, with a brick and terra cotta front. The dimensions of the whole will be 50.2 by 76 feet and of one story. The reading room will be 40 by 50 feet, with a capacity of about 6000 volumes. This section will not contain a column. The auditorium will be 24 by 40 feet, and in addition to these two features there will be a workroom, rest space, toilets and boiler room.

East Liverpool. During the past year 23,863 books were circulated from the public library, while 57,027 persons used the reading rooms. The library contains 9477 volumes, exclusive of periodicals.

Oberlin. It appears that the daily press accounts quoted in the January LIBRARY JOURNAL concerning acts of vandalism in the new library were greatly exaggerated. While the building was entered, the invaders contented themselves with disarranging the books and magazines in the reading room, and no damage was done to the card indexes, as at first reported.

Painesville. The Morley Library may be compelled to close its doors on March 1 for lack of funds. Through oversight in preparing the city budget the usual appropriation of \$1800 for the library was omitted. Under the terms of the agreement by which J. H. Morley turned over to the Library Association the building and grounds, failure to maintain the library properly will cause the property to revert to the grantor and his heirs. And the W. P. Storrs endowment fund, upon the failure of the Library Association to maintain the library, will be transferred to the Painesville Hospital. The city council is now trying to devise some way of furnishing the necessary funds to retain the library.

Paulding. Plans are being prepared for a \$40,000 Carnegie Library building here.

INDIANA

Akron. A very satisfactory site for the new \$12,500 public library has been secured. It is one square east of the interurban line on Main street. Work on the new building will be commenced in the spring.

Churubusco. The town board has voted a tax for the establishment of a public library, and the library board has been appointed.

Evansville. The legislative committee of the State Library Trustees' Association, which will have charge of the codification of all laws pertaining to libraries, has been named by President Edmund L. Craig. The membership follows: Ora L. Wildermuth, of Gary, chairman; John A. Lapp, of Indianapolis, secretary; Mord Carter, of Danville; H. C. Martin, of Attica; Theodore F. Rose, of Muncie; Mrs. Elizabeth C. Earl, of Connersville, and Mrs. A. D. Moffitt, of Elwood.

Huntington. The Huntington Public Library is the first in the state to have paid advertising in the newspapers. The advertisements were on exhibition at the meeting of the I. L. A. at Marion recently, as a part of the general exhibit on publicity.

Indianapolis. The movement for the erection of the new Indianapolis Public Library is under way. In a preliminary contest for selection of an architect, twenty-five local architects are entered, and their plans must be submitted in February. Three competitors will then be chosen for a final contest against three architects from outside Indianapolis. The building will not exceed two stories in height above the basement and will be of fireproof construction with stone walls on at least three sides. The stack room will have a capacity of about 300,000 volumes, and the building will be so planned that it may be enlarged to a capacity of 500,000 volumes. The building will contain public rooms with dimensions as follows: Delivery room, 1800 square feet; general reference reading room, 2200 square feet; open shelf room, 2200 square feet; children's reading room, 2000 square feet; room for art books, 800 square feet; school reference room, 800 square feet; medical library, 800 square feet; law library, 800 square feet; newspaper and periodical room, 1500 square feet; special newspaper and periodical room, 500 square feet; memorial lecture and exhibition room, 1500 square feet, and two study rooms, 250 square feet each. Rooms for the administration and staff will be included as follows: Librarian's suite, 800 square feet, including private office, ante-room and records room; accessions room, 400 square feet; catalogers' room, 1000 square feet; repair room, 300 square feet; two work rooms, 600 square feet; room for supervisor of branches, 250 square feet; stations department, 500 square

feet; supplies room, 400 square feet; staff lunch room, 500 square feet; rest room, 200 square feet, and locker and toilet rooms. The basement is to include a children's room, public toilets, covered receiving and shipping platform, stations department receiving and shipping room, packing and unpacking department, future bindery, future printing department, janitor's office, locker room and toilet for janitors, boiler room, dynamo room and ventilating apparatus. It is expected to spend about \$500,000 for the building.

Kewanna. The people of Kewanna have met the requirements of the Carnegie Corporation both in regard to tax and a site for the library, and are now hopeful over the prospect of getting a library.

Monon. The town board at Monon and the advisory board of the township have levied a tax for a public library, and a library board has been appointed.

Newcastle. One of the most spirited library campaigns that has ever been witnessed in Indiana is that now in progress at Newcastle. The object of the campaign is to reorganize the public library generally, to have the library put under an independent library board instead of the school board, to get a library building and to increase the library income. The women's clubs, and nearly all other good influences of the city seem to be back of the movement, but Miss Lois Compton, who is writing the newspaper articles, and Mr. S. P. Jennings, who has conducted the correspondence with the Carnegie Corporation, deserve the greatest credit. The school board has already voted to turn the library over to the city and the Carnegie Corporation of New York has offered \$20,000 for a building.

South Whitley. The new Carnegie Library has purchased a very desirable site for its new building.

MICHIGAN

Detroit. Clarence M. Burton, historian of Detroit has offered his magnificent collection of books and manuscripts relating to the history of the city to the library commission. The library contains 30,000 bound volumes, 100,000 pamphlets, 500,000 manuscripts and 27,000 photographs of Detroit scenes, buildings and characters. Mr. Burton included in his offer his home at 27 Brainard street and the three fireproof buildings which he has erected to house his library. It is the most important

gift of the type that has ever been made to the city. Mr. Burton has spent forty years in making the collection, and is anxious to have it kept in Detroit. The collection includes the letters and papers of all the notable men of early Detroit and among the bound volumes are many rare books, in some cases the only ones known to be in existence.

Lansing. There has been placed in the State library a card index to all English-speaking court decisions for the last twenty-five years on accident, health, and employers' liability insurance. The state librarian, Mrs. Mary G. Spencer, is now preparing an index to all decisions which have appeared on workmen's compensation. Acting under the law passed in 1913, the superintendent of public instruction and the state librarian are now preparing a list of over 1000 books which are recommended, after investigation, for purchase by district school and township libraries.

Lansing Public School L. Mrs. E. Jennie McNeal, lbn. (12th annual rpt.—yr. ending Aug. 31, 1913.) Accessions 1710 volumes; total number in library 23,285 volumes. New registration 1704; total number of borrowers 6054. Circulation from Central Library 71,181 volumes; from branches 8560 volumes; total 79,741, an increase of 8493 volumes, or 12 per cent. over last year. Receipts \$8330.01; expenditures \$7265.26; balance \$1064.75.

Newaygo. Andrew Carnegie has offered this village \$5000 for a library. The offer has been accepted. It is said that Newaygo is the smallest town in the United States to receive such donation from Mr. Carnegie's library fund.

ILLINOIS.

An editorial in *Public Libraries* for December criticises Illinois state library service. According to this editorial the libraries of the state have not been receiving adequate service for the money paid out. The Traveling Library Commission has maintained it had inadequate funds for its work, but it has not done the work which seemed reasonable to expect with its annual appropriation of \$5300. The State Library has an appropriation of \$33,400, and the Legislative Reference Library one of \$25,000. With these sums the standard of work done ought to be raised from its present status, or a strong protest made.

Another editorial in the same publication discusses the handicap of almost all Illinois libraries through insufficient funds. It appears that the amendment of the Juul law

passed by the last General Assembly does not affect library taxes, and library conditions are consequently cramped. It will be at least three years before there can be legal remedy, and in the meantime many of them find it hard to make both ends meet in the running expenses, while their extension work is almost paralyzed. In Evanston an appeal has been sent out to the city asking each reader who can to check a book on an accompanying list and be responsible for its purchase, the library to do the actual buying at the usual library discount.

Galesburg. The special election on the question of issuing bonds for the public library site at Abingdon showed the bond issue carried by sixty-four votes. The women claim credit, as most of their 190 votes, out of the 540 cast, went for the issue.

The North West

WISCONSIN

Madison. Pioneer Norwegian life of Wisconsin, and especially of Dane county, was shown in a very successful exhibit in the museum of the Wisconsin Historical Library, where the crude household furnishings and personal belongings of some of the early settlers were to be seen. Photographs of several pioneers were shown, together with old chests, pieces of lace, pewter spoons, feminine adornments and farm tools.

MINNESOTA

Minneapolis. A third Carnegie library is to be built at Central avenue and Twenty-second street as the result of the purchase of three lots early in January. The price paid was \$6000 for all. Plans were also approved for a \$15,000 addition to the North Side branch at Emerson and Twentieth avenues north. This addition will double the branch.

IOWA.

Alden. The library board has received from Mr. Carnegie the promise of \$9000 for a library building. Tax support from outside townships will assure the necessary support.

Keokuk. Owing to the crowded condition of the stacks a room on the lower floor of the library building has recently been converted into a documents department, thus making room for several thousand additional volumes in the main library. The library is to have a large electric sign with the word "Library" on the roof.

Mt. Ayr. Through the efforts of the library department of the Village Improvement Society, a library has been opened in Mt. Ayr.

Waterloo P. L. Fanny Duren, lbn. (Rpt.—1913.) Accessions 2141; total number of volumes now about 23,000. Circulation 89,875. New registrations 1211; total number of borrowers 8377.

For a long time the libraries have sought to cooperate with the public schools of the city in providing books for the children and to interest the students in reading. This cooperation has developed in a remarkable way, and so valuable has been the assistance rendered by the library that the school board of East and West Waterloo voted last summer to appropriate \$250 each for the purchase of home reading books. The library was asked to select the books, catalog them, and see to their circulation among the pupils of the fourth, fifth, sixth and seventh grades. The books were purchased and arranged in sets of twenty each, each set to be placed with a grade for a semester. The teachers have had charge of the circulation of these books. Next year the library plans to have a special supervisor of children's work.

NEBRASKA

Omaha P. L. Edith Tobitt, lbn. (Rpt.—1913.) Accessions 6327; total number of volumes in the library 97,254. Circulation 302,801. New registration 7997; total number of borrowers 20,248 [population in 1910, 124,000]. Appropriation for 1913, \$29,000.

Beginning Jan. 1, 1914, fines on books overdue will be reduced from 5 cents to 2 cents per day. Branch libraries in Train and Edward Rosewater schools have recently been installed. A substitution of the library also has been placed in a store at Fiftieth and Underwood avenue for the convenience of Dundee citizens, who pay a tax of \$315 toward the support of the Omaha library. The public library board is considering a plan to make the library a county institution that will serve not only every city and town in the county, but the rural districts as well. To serve the rural districts, "library routes" would have to be created similar to the "rural mail routes." They would be operated probably twice a week, and would touch at the school houses and other centers necessary to put the library at the service of every resident of the county.

Palmyra. The library here, which occupied one of the rooms in the opera house, was destroyed by fire Dec. 26.

The South West

MISSOURI

Bolivar. Work will soon be started on the new \$10,000 Carnegie library.

Kansas City. Rolls of music that may be taken home to put on the player piano are ready for circulation at Kansas City's public library. The 500 selections were presented by a citizen who plans to add to the collection. The pieces are mostly classical. Ragtime is barred.

St. Joseph. The public library has added a stereopticon view department. Through the courtesy of Francis B. Purdie it has received a fine start, with more than 500 slides. Most of the slides were made from photographs taken by Mr. Purdie. Scenes in St. Joseph and environs are to be obtained and there will be a series to aid in campaigns for good roads, vacant lot gardening and movements of a similar nature. The slides are available to anyone having a stereopticon machine and may be drawn out the same as books.

TEXAS

Fort Worth. The fifth annual exhibition of selected paintings by American artists was held at the Carnegie Library Jan. 8 to 29, inclusive. About fifty paintings are in the collection which has been brought together for a circuit comprising New Orleans, Fort Worth, Austin, San Antonio and Houston. The collection was assembled by the American Federation of Arts.

San Antonio P. L. Cornelia Notz, lbn. (Rpt.—1913.) Accessions 1992; total number volumes in library 320,044. Circulation 99,755. New registration 2980; total number of borrowers 11,299.

For the coming year plans have already been completed for a new magazine room, a change of the children's room, and for a teachers' department. Magazines are now kept in the general reading room. By having a room for them alone the librarian expects materially to add to the convenience of readers. The lectures in the auditorium, which have proved popular, will be continued.

KANSAS

The publicity committee of the Kansas Library Association is sending to a select list of Kansas daily and weekly newspapers, news letters containing items about the various libraries of the State in the belief that their publication will help the library cause in Kansas.

Cherryvale. The new Carnegie public library was opened recently, with Miss Winnie Williams in charge as librarian.

Coffeyville. Twelve times a year for each volume is the average circulation of the 5200 books in the Coffeyville Public Library, during 1913. The library has been open less than two years. Its use in 1913 was 25 per cent. greater than in 1912.

Columbus. The \$10,000 Carnegie Library building is nearly completed.

Herrington. A \$10,000 public library is under way.

Independence. The public library circulated last year its 6000 volumes an average of more than five times. Averaging the circulation by population, during the year each of the 10,480 citizens of Independence read three books from the public library.

Kansas City. The public library is carrying the books to the people. It has deposit collections in ten school buildings and keeps 100 volumes in the rest room of the telephone company. It circulated 136,000 books last year.

Larned. In the new city building, 75 by 50 feet in size, costing \$28,000, the main floor will be used for the public library. The money for this building was left to the town by Dr. Cummins.

Newton. The Newton free library recently prepared an exhibition of its resources for school use, and entertained the city teachers at a reception and lecture on the educational work of well organized libraries. Seventy-five people attended.

Nortonville. A joint public and school library, to be known as the Crobarger Public Library, is being opened here. The new public school building provides a large library room, with an outside public entrance. The school board provides heat, light, and the librarian. The public library committee furnishes the money for the initial stock of books and equipment, and has a considerable sum permanently invested, the interest of which will provide an annual book fund.

Peabody. A new public library is under construction. This is its second building. The first building, with 500 books, was given to the town in 1874 by Hon. F. H. Peabody. The new building is costing \$10,000, given by Andrew Carnegie.

Russell. The public library had a total of 14,143 visitors last year. It receives 47 magazines and 12 newspapers, and has 3186 bound volumes.

Topeka. Some time ago, if we may believe newspaper reports, officials of all Kansas libraries received a letter from the United States Brewing Association. This letter said that the association had printed several works on temperance which it was prepared to furnish free to all public and school libraries. With the letter was a postcard to be returned to the association if the library wanted the books. Most of the school and city libraries returned the postcards and asked for the books. The brewers paid the express charges. After being in the libraries several weeks it was discovered that every book contained an attack on prohibition, and most of them had something about Kansas and its law. Some of the books advised the continual use of liquors by every one, from a baby to an old man. Then the libraries burned the books.

Wichita. Work has begun on the new Carnegie library building. It is to be 130 by 33 feet, two stories and basement.

Pacific Coast

CALIFORNIA

Albany. This town, north of Berkeley, now has a free public library, opened in December.

Clovis. The city council has voted to apply to the Carnegie Corporation for a library donation. Several sites for a new building are being considered. Miss Elsie Braun has been appointed librarian.

Coalinga. The deed has been recorded transferring the site of the district library from those holding it in trust to the District Library Association, and it is expected that a \$20,000 library building will soon be erected thereon.

Huntington Beach. The corner-stone of the new \$10,000 Carnegie library was laid in December with impressive ceremonies in the presence of a big audience, which included all the pupils of the local and the neighboring schools. The address of the day was delivered by J. A. Armitage, of Sunset Beach. Mrs. S. L. Blodget told the history of the library up to the time it became a municipal institution in 1911. The new building will be completed in March next.

Los Angeles. A concrete municipal pier to be used exclusively for pleasure purposes, is

nearing completion at Hermosa Beach. A glass inclosure looking over the sea has been retained for the Hermosa Beach Public Library.

Los Angeles. Next May the Los Angeles Public Library will increase the floor space by nearly 50 per cent. There will be 50,000 square feet available, and it is the hope of the library management to place practically all the books on open shelves. Three new special departments will be created, a technical department, a civics department and a fine arts department. There will be a study club room which can be used by any organization without charge, provided books are to be used there in the meeting. Music lovers of the city have promised to get a piano for the study club room so that in the morning hours musical compositions can be tried in the study club room, which will be provided with sound proof walls.

Sacramento. The names of the fifteen girls who passed the examination for entrance into the new State Library School, which opened Jan. 1, are as follows: Ruth Beard, Modesto; Marion J. Colcard, Modesto; Mabel Coulter, Salinas; Myrtle Ruhl, Redwood; Helen M. Brunner, Sacramento; Bernice Goff, San Jose; Elaise Gundrum, Sacramento; Blanche Phalfant, Bishop; Helen C. Briggs, Sacramento; Vivian Gregory, Mills College; Minnie C. Green, Sacramento; Jennie Rumsey, Woodland; Cecelia Henderson, Stanford University; Lenala A. Martin, Sacramento; Annie Margrave, Santa Barbara.

Sacramento. The offer of Mr. Carnegie to donate \$175,000 for a library, to be named after him, on condition that not less than 10 per cent. of this amount be expended in upkeep yearly, has been accepted by the city. Plans drawn by Engineer Givan will be forwarded as soon as possible to the office of the Carnegie Corporation in New York for approval.

San Diego. The San Diego County Free Library has just established two new branches at Alpine and Julian, and another will soon be established at Dulzura. County branches previously in operation under San Diego administration are located at Fallbrook, San Ysidro, Poway, El Cajon, Ramona, Lakeside, Encanto, Chula Vista, Lemon Grove, Otay, Jamul, Nestor, La Mesa, East San Diego and Dehesa.

Stockton. The present library building is to receive an \$80,000 addition.

Suisun. The Civic Center Club is planning to install a public library, with state and local aid, in the new \$70,000 high school building.

Torrance. Prior to the erection of the Torrance Public Library, a temporary library was opened in December. It is in charge of Mrs. Isabel Henderson, a trained librarian of Niagara Falls, N. Y. The Torrance Public Library, plans for which have just been finished by Architect Robert Farquher, is a gift to the city by its founder, J. S. Torrance. It will cost approximately \$30,000, and will be the first of a group of fine public buildings to be erected in the civic center of the city.

Vacaville. The Carnegie Foundation trustees have offered \$10,000 for a library here. Assurance of maintenance has been given and all that is lacking is a lot for a site. An active campaign has been started to secure one.

OREGON

Astoria. After 21 years of existence the Astoria Public Library Association, the membership of which was composed of a number of the city's public-spirited women, ceased Jan. 1. At the same time the mayor appointed a commission of nine persons to take charge of the property and continue the functions of the library department.

UTAH

In Utah the local school boards are required to set aside annually from the school fund a sum equal to 15 cents for each child of school age in the district, to be expended for school library books which are recommended by the board of education.

Ogden. There are now 11,960 volumes in the public library, 2210 volumes having been added during the last year. There are 1629 books in the children's room. On one day recently between 400 and 500 children visited this room.

IDAHO

Boise. The use of two rooms in the rear of the Presbyterian church at Collister Station has been given for a library and reading room to serve the district around Wylie, Collister and Riverside. The books will be supplied by the free traveling library.

Canada

Ottawa. The pupils of the high school make regular use of the newspapers at the public library as a basis for a column which they edit each week in one of the local papers.

Toronto. The annual meeting of the Library Association of the Toronto Public Library was held in the board room at headquarters Wednesday evening, Jan. 21, the president, Miss Winifred Barnstead, in the chair. There were 58 present, representing every department of library work. The report of the secretary-treasurer for the year just closed showed a prosperous and useful year. The elections resulted as follows: Hon. president, Mr. T. W. Banton; president, Miss Frances Staton; vice-president, Miss Patricia O'Connor; secretary-treasurer, Miss Teresa G. O'Connor; program committee, Misses Eva Davis, Elizabeth Moir, Elfreda Corey; social committee, Misses Mabel Baxter, Eloise McFayden, Marion Field; auditor, Miss Jennie Corcoran. Mr. Caswell, the assistant librarian, gave a talk on the work for the coming year, offering a number of practical suggestions, and Miss Rose Ferguson, librarian in charge of the Yorkville branch, read from her recently published book of poems "Maple leaves and snowflakes." A half hour of social intercourse followed, during which refreshments were served by the social committee.

Foreign

GREAT BRITAIN

Edmund Gosse, librarian to the British House of Lords, has been appointed an officer of the French Légion d'Honneur, in recognition of his services to French literature in England.

The Rev. Thomas Kingsmill Abbott, librarian of Trinity College, Dublin, since 1854, and a noted scholar and writer on Scriptural and philosophical subjects, died Dec. 18. He was born in 1829, in Dublin.

Coventry P. L. Septimus A. Pitt, lbn. (Rpt.—1912-13.) Accessions 2032; total number volumes in library and branches 65,199. Total circulation 242,010. New registration 426; total 11,588. Income £3803 16s. 7d; expenditures £2768 15s. 5d.

During the last five years the issue of fiction has decreased by 10,902, while circulation of non-fiction increased 48,139 in the same time. Issues of volumes for reference purposes have increased slightly, and there is a growing use of the books which have been put on open shelves. Accommodation for 20,000 additional volumes has been provided in the reference department by the introduction of steel book-cases which are convertible at any time into rolling stacks. In the children's department

15,314 more issues were recorded than in the previous year. Three branch libraries, for Earlsdon, Stoke, and Foleshill, were started last summer. The first two have been completed, and that at Foleshill will be finished in the spring. There have already been purchased 10,000 volumes for the new branches. The first part of the new general catalog, comprising books on natural science, useful, fine, and recreative arts, has been published and is on sale to borrowers. A photographic survey of Coventry has recently been inaugurated by the Photographic Club, and it is intended to form and preserve at the Central Library a collection of photographs representing scenes and events associated with the city, past and present.

Coventry. Floor plans of two of the three new branch libraries for the Coventry library system are reproduced in *The Librarian and Book World* for January, 1914. The first one shown is the branch at Foleshill, said to be similar in plan to the branch at Earlsdon, except that it is somewhat more compact. The lot on which this stands is irregular in shape, one corner having an angle of about 50 degrees, and the building has been well adapted to the space it fills. The branch at Stoke occupies a corner lot. The entrance here is placed diagonally across the corner with the two wings of the building on either side at right angles to each other. In the angle thus formed at the rear the room for the lending library, with its curved outer wall, has been placed. In both branches the children's room is at the right of the rather large entrance hall, the lending library at the rear, and the news room at the left. Rooms for the staff adjoin the news rooms. Pictures of these two branches are printed in the last report of the Coventry Libraries, and show attractive one-story buildings of brick with stone trimmings, standing close to the street.

Gainsborough. The Public Library has been reopened on the open access system. Other improvements, including a reduction in fines and an extension of the hours the library is open, have been inaugurated.

Leeds P. L. Thomas W. Hand, lbn. (Rpt.—yr. ending Mar. 31, 1913.) Accessions 7956; total number volumes in libraries 313,196. Circulation 1,382,237; of this number 125,748 were consulted in the reference library, 248,486 were issued from the central lending library, and 1,008,003 from the branch libraries. There were about 2,170,000 visitors to the newspaper rooms of the central library and

branches. Total registration 32,748, a decrease of 915 from the previous year.

There are about thirty branches maintained as a part of the library system. The practice of providing "safe guarded open access" to the shelves has been introduced in a few of the branches, with an immediate gain in circulation, especially in books on the useful arts and science, fine arts, history and biography. The results are so satisfactory that the system will gradually be introduced to other branches. Juvenile reading rooms are crowded, and "half hour talks" given during the winter by a member of the staff were very successful. Evening branch libraries and newsrooms are maintained in many school-rooms.

County Borough of Salford P. L. Ben. H. Mullen, lbn. (65th rpt.—yr. ending Oct. 31, 1913.) Accessions 2517; total number volumes 60,007. Circulation for home use 360,857; volumes used in reading rooms, 242,347; number of readers in the news rooms 1,174,556. New registration 82; total number of borrowers 12,330.

There are seven libraries and two reading rooms included in this system, besides a museum and art gallery at Peel Park and a natural history museum at Buile Hill Park. The usual American card-charging system of recording the issue of books has been tried in one of the branch libraries in place of the cumbersome ledger system, and the system has been found "simple, rapid, economical and accurate."

"Compared with the returns of ten years ago, some striking advances are to be noticed in the importance of the institutions to the public, and the growing appreciation in which they are held. The number of museum visitors has risen by 63,205; the number of books taken for reading at the firesides of the people is 84,737 greater; while 26,824 more books have been used in the reading rooms. The number of readers in the news rooms has advanced by 59,134, and the recreation rooms, not in existence ten years ago, have this year been used by 498,145 persons. The total under all heads amounts to no less a figure than 732,045, representing 41.6 per cent. increase in the decade."

GERMANY

Bremen. The Leschalle (reading room) had 113,480 visitors in 1912. With a total of 29,142 volumes in the library and its branches, a circulation of 188,905 volumes was reached. A lending library was established for the cab-drivers in their own quarters.

Eilberfeld. The Stadtbücherei (city library) with its branches, in the year 1911-12 had a circulation of 286,668 volumes.

Heidelberg. The Volksbibliothek (people's library) had in 1912 a recorded use by 66,687 persons, including 29,624 readers in the reading room. This library of 9462 volumes lent during the year 36,435 books.

Neu-Kölln. During the past year the public reading room of the city was visited by 4180 persons. Of these 3300 were men and 880 were women. During 1911 an average of 13 persons visited the reading room each day. The total expenditure for library and reading room amounted to about \$1450. In addition \$750 was employed in the purchase of works of the best literature and of a popular scientific character. It is probable that the coming year will see the commencement of construction work on a separate library building. It is also intended to make large increases in the number of volumes in the library. Probably between \$3500 and \$4000 will be devoted to the purchase of new books.

Berlin. The public library and reading room at Adalbertstrasse 41, Berlin, S. O., was founded fourteen years ago for the benefit of the working people of Greater Berlin. Of the users of the library 55 per cent. are engaged in industrial pursuits, 22 per cent. are commercial clerks, while the remaining 23 per cent. belong to the liberal professions, or are officials, teachers, students or persons without occupation. During the last year 70,899 volumes were loaned in the circulating division as against 69,012 in the year preceding. Only 19 volumes were lost. Of the entire number of volumes loaned 24,936 related to literature of an instructive character. These were divided as follows among the various branches of knowledge: history and biography, 4838; geography, 3110; natural sciences, 5093; law and government, political economy, 3075; trade literature and technics, 3290; philosophy, religion, pedagogy, sports, 2815; art, music, history of literature, etc., 2715. The scientific books asked for constituted 35 per cent. of the entire number loaned. In all 85,851 volumes were loaned to be read either inside or outside the library. In the course of last year the library was visited by 67,312 persons, 64,255 of them being men and 3057 women. The number of periodical publications available to visitors of the library has been largely increased and now amounts to 619 newspapers and magazines of every kind and tendency.

The reference library, consisting of 2131 volumes and located in the reading room, was used extensively by the visitors.

HOLLAND

A description of the Royal Library of Holland, which is located at The Hague, appears in the December issue of *The Library World*. It is one of a series of articles by Henry A. Sharp, entitled "Pages from a Dutch note book."

The Royal Library was founded in 1798. Seven years later it became known as the Koninklijke Bibliotheek, and since 1815 has been the national library of Holland. It contains over 500,000 printed books, and 30,000 pamphlets illustrative of the history of Holland, as well as some 6000 manuscripts, mostly historical in character. It also possesses unique collections on chess, of Dutch incunabula, about 700 Elzevirs, and much material relating to Spinoza, who was born in Amsterdam.

Books in the library are available for home reading, free access is allowed to a considerable portion of the stock, and no formalities are to be observed beyond the signing of an ordinary visitors' book. Books are loaned to all parts of the country, and all kinds of bibliographical catalogs are being prepared to acquaint the people with the library.

Holland issues a series of printed cards similar to Library of Congress cards, and also a printed card index of articles in current Dutch periodicals. Before being printed on the actual cards, proofs on perforated paper are sent to all subscribers, who tear off those which they require and return them to the library, thus furnishing a guide to the number of cards needed.

ITALY

Florence. A society has been formed here for the purpose of providing libraries for the elementary schools of the city, the books being allowed to circulate among the families of the pupils. The society now, after five years, has 135 such libraries containing several thousand volumes. The books are repaired and rebound by the society.

Mantua. The Biblioteca Comunale at the end of 1912 reports 120,495 volumes besides manuscripts, incunabula and maps. The year's expenditures amounted to 23,811 lire (about \$4,760), of which 923 lire (about \$184) came from the state. Important loans were made to libraries in Italy and two other countries.

Padua. The University of Padua has a new library building costing about \$80,000. It is the first modern library building erected by any Italian university. The five-story stack has room for 180,000 volumes, and space is set aside for two others. The largest reading room seats about 100 persons, and there are several special reading rooms.

FRANCE

Paris. There were 169,450 readers, both students and professors, in the Sorbonne the last year, who used 510,295 volumes. These figures do not include the books to which free access is given. In addition 14,469 persons borrowed 19,352 volumes for home use. Accessions during the year numbered 13,550 volumes.

AUSTRIA-HUNGARY

A commission of fifteen, working under the direction of the Hungarian ministry of education and public worship, has completed an examination of all the juvenile literature of the country, and the ministry has now undertaken a reform of the school libraries, basing its action on the reports made by the commission.

Vienna. The "Zentral-Bibliothek" Verein, with 23 branches in the city and three outside of it, had 545,700 volumes at the end of 1912, and circulated nearly 5,000,000 volumes.

POLAND

An article in *Tygodnik Ilustrowany*, a weekly published in Warsaw, Poland, announces that the new building for the library of the counts Krasinski will be opened this year in Warsaw, "so that the treasures of the past gathered sparingly by former generations and saved from destruction [a discreet allusion to the pillaging of Polish libraries in the eighteenth century, when 300,000 volumes were taken to St. Petersburg] could be preserved." This library is a result of the labor of many generations. As far back as the sixteenth century the counts Krasinski were already known as possessors of excellent libraries. During the last 50 years the library has grown steadily, and it is now considered one of the finest and most valuable libraries in Poland. Besides the original collection of the counts Krasinski, the library includes that of Konstany Swidzinski, Count Leon Lubinski and others. The library contains 72,000 works in about 100,000 volumes, also 7000 manuscripts, a rare collection of paintings, coins, portraits, and arms and armor.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature.

General

Scope, Usefulness, Founding

SCOPE AND USEFULNESS.

What can be done by a small library in a small town. Mary S. Crandall. *Pub. Libs.*, January, 1914. p. 1-4.

A paper read before the library section of the New York State Teachers' Association in Syracuse, Nov. 25, 1913. Suggests how the local papers, churches, civic associations and business organizations may be induced to co-operate with the library. The value of library exhibits at county fairs, illustrated lantern talks, picture bulletins, special lists and exhibits for young people, mailing lists in rural districts, and small libraries sent to country schools is all touched upon. Inexpensive pictures are circulated, and are used to suggest collateral reading. Material for debates, essays, etc., is furnished, and personal supplementary aid is given wherever possible.

The Library as an Educator

FOREIGNERS, WORK WITH.

It is reported that 70 per cent. of those who patronize the Boston Public Library, its branches and reading rooms, are foreigners or their children.

Recent additions to the Indianapolis Public Library include a number of Roumanian, Slavonic, and Hungarian books. Lists of books in Greek, Bulgarian, and other languages are being prepared and will be added later.

The first Chinese library to be established in the United States and to be designated as an Official Gazette Library by the superintendent of documents, has its new quarters at No. 2210-2212 Archer avenue, Chicago. Many of the Chinese students avail themselves of its field of research. Through Mr. Wong Chung, of Nanking, the library is assured of sufficient endowment to carry on its work. It now owns over 2500 volumes.

The Free Public Library Commission of Massachusetts has been holding meetings in the libraries at Springfield, Worcester and Northampton, in connection with the extension

of library work in the foreign colonies. In every instance the attendance was much larger than was expected, the leaders of the foreign colonies combining in making suggestions to the libraries as to the most practical way to bring the libraries in closer touch with the non-English speaking people. These suggestions ranged from notices about the libraries, printed in foreign languages, to be distributed through the foreign quarters, to new branch buildings. The spirit of helpfulness was evident from all quarters and there were no dissenting opinions as to the great benefit that would result to the newcomers from a greater use of the library. As one local paper put it, every one in attendance was impressed by the desire of the Library Commission and the local library to make their institution of practical value to all the citizens of the State. The commission reports that traveling libraries in Italian have been sent to Lincoln, Marlborough, Southwick and construction camps at Drury and Charlemont; French libraries to Spencer, Northbridge, Bryantville, Montague and Palmer; and Polish to Georgetown and Ludlow. Requests have been received from ten other libraries and traveling libraries will be sent as fast as the necessary books can be secured. Twelve libraries have applied to the commission for annotated lists of books in foreign languages, which are being prepared in co-operation with the leaders of the different nationalities as fast as possible. The Dante Alighieri Society, at the suggestion of its Boston branch, has made a generous gift to the commission of 150 volumes of Italian books for the traveling libraries. The titles were selected by the society and the majority of the books shipped from Rome.

Free illustrated lectures in Italian were given at the North End branch of the Boston Public Library during January. The subject of the first lecture was "Modern and Ancient Rome." The lectures were delivered by Signorina Amy A. Bernardy. This arrangement was made possible by co-operation with the Societa Nazionale Dante Alighieri, which last year gave to the library the handsome bas relief of Dante that may be seen in the main reading room. Another innovation at this branch library is a series of vocation talks that

is being given on Wednesday evenings for the young people of the district. "Needle Trades" was the subject of one talk for girls, while the boys had their turn the following week, the subject being "Building Trades."

WORK WITH WOMEN.

The Chicago Public Library has a study for women, which is intended for the accommodation of woman patrons of the library engaged in research, seeking assistance in the preparation of special subjects, and it is especially intended for the use of women voters. A special reference room for women has been opened in the main library. There are 250 volumes on political subjects.

Library in Relation to Schools

WORK WITH SCHOOLS.

The public library and the rural school. Leslie I. Reed. *Iowa Lib. Quar.*, O.-N.-D., 1913. p. 54-57.

The modern conception of the duties of the public library is twofold: First, to find a book for every reader, and second, to find a reader for every book. Today the rural districts work in coöperation with the city and the modern library movement embraces not only the residents of the city and town, but also the inhabitants of the remotest rural district. The writer, who is superintendent of schools in Missouri Valley, Iowa, took an active part in creating a large interest in the library. Series of special meetings were held for men, for women, and for teachers, at which lectures were given with the purpose of creating an interest in the higher things of life and also to prepare them for the work of extending library use. Much interest was aroused at once. About a thousand books were brought forth from school closets, others were purchased, and the whole rearranged and classified by school grades. The teachers taught the pupils how to use the library, gave advice on the selection of books, and encouraged the pupils to discuss the books read. In the fall the librarian had a booth at the county fair, from which interest has spread to the towns around.

The conclusions reached are that rural extension work must start with the city library; that the most available agent for interesting the rural communities is the rural teacher, who should study the needs of her community and aid the librarian in selection of books; that the State Library Commission should work to interest county superintendents in the extension movement, and should see

that lecturers are available for meetings of farmers' clubs, etc.; that library courses should be required in all normal schools, and that money raised by rural taxation for libraries should go to the city library at the center of the district.

Library Extension Work

EXTENSION WORK.

University extension and the local libraries. William A. Rawles. *Lib. Occurrent*, D., 1913. p. 146-149.

In America the task of the nineteenth century was the subduing of a continent. The mission of the twentieth century must be the conservation of resources, of life and health, and a readjustment of our social relations. In the readjustment of educational institutions the university should be an important factor, and in this Wisconsin has shown the possibilities of the greater university by offering "to teach anybody anything, anywhere."

The functions of the twentieth century university are three-fold. First, the instruction and training of those students who gather in its halls; second, research work and its application to both old and new conditions and methods; third, the wide diffusion of knowledge among the people of every city, village, and rural community. In Indiana are over a million people between the ages of 16 and 40, for most of whom education beyond the common schools is impossible. That they yearn for more knowledge, the records of private correspondence schools bears witness. Does it not seem rational to ask the State University to undertake such part of this work as it can do efficiently?

Extension work is carried on by three methods: First, by series of popular lectures; second, by correspondence study; and third, by encouraging and directing debating and public discussion. In this the library can coöperate by providing lectures which will lead to further reading. Again, although the library cannot furnish highly specialized textbooks sometimes required by correspondence classes it might (and does) furnish reference books of more or less general interest. And for the encouragement of debating and public discussions the library can furnish standard works in economics, sociology, political science and history, and subscribe to magazines dealing with current events. The extension department will furnish libraries with information which is desired by their patrons, where the resources of the local library are insufficient.

DEBATES.

The library trustees of Fresno, Cal., have decided to establish a discussion center in the basement of the library building for public debate. The proposition is to hold a debate one night a week between speakers selected by the library trustees. The public will be invited to these debates, which will be on subjects of timely and popular interest. Following the formal discussion pro and con, the listeners will be invited to participate in the discussion, general debate being urged.

THEATER.

The Louisville Free Public Library in its endeavor to be of service to the public is a member of the Drama League of America. This gives the library the bulletin and all other printed matter issued by this organization. The bulletin is on file in the reference room for public use, and all printed broadsides issued by the organization recommending plays as they appear in Louisville, are placed on the public bulletin board at the library. The library has just issued an 18-page pamphlet of vest-pocket size, giving a list of the plays in the Louisville Public Library which are endorsed by the Drama League, with some additional titles of modern dramas.

CINEMATOGRAPH PICTURES.

Last October a "Library of films" was opened in Berlin (*Filmarchiv für Lehr- und Unterrichtszwecke*). This Berlin depository already possesses a very large collection of valuable films, dealing especially with scientific and allied subjects, which is probably not equaled elsewhere. In connection with the library, an Intelligence Bureau has been opened, where advice can be obtained on all matters connected with the cinematograph and its uses. "When it is remembered that the moving picture camera may be used in connection with the microscope—that it has an unlimited field in geography, the recording of social life, and in natural history—it seems difficult to account for the fact that universities have practically ignored it. The value is not so much to be sought in the classroom, for there are, of course, objections to its use there, but the founding of this new type of library would possess an interest for future generations which can scarcely be estimated. The German society is planning to spend \$7500 a year on buying films."

The *Rhein-Mainischer Verband für Volksbildung* reports an arrangement whereby motion picture films are lent to local societies, a

traveling theater is maintained, 45 traveling libraries as well as many local libraries are furnished to its local Vereine, and an excursion of 50 working people from Frankfurt to the "adult schools" of England has been arranged.

The civic lecture and the cinematograph. J. Best. *Cardiff Libs. Rev.*, N.-D., 1913. p. 82.

One of the first cities of England to give the cinematograph lecture is Cardiff, which boasts of the most complete organization of popular lectures in the British Isles. It has two series of lectures—one for children, another for adults—given in the chief libraries in and around Cardiff. The published syllabus of lectures gives a very complete bibliography of the subject.

The public library at St. Joseph, Mo., has been using the Edison home and school kinetoscope to illustrate the stories told the children at the library. It is a small moving picture machine, operated by electricity, and with no fire risk, which throws a picture on a screen 6 x 8 feet.

The *Bulletin* of the New York Library Club for January presents a summary of the laws and ordinances of various states and cities concerning motion picture films, mostly taken from the report made by Andrew Linn Bostwick, the municipal librarian of St. Louis.

Library Development and Cooperation

LIBRARY CO-OPERATION—NATIONAL.

Coöperative lists. Joseph L. Wheeler. *Pub. Libs.*, D., 1913. p. 428-429.

The Los Angeles Public Library is unable, for lack of funds, to compile and publish as many lists as it would like. Consequently, it has arranged with certain business houses to compile lists which the company publishes on condition that its name shall appear on the title page and it shall have two or three pages of advertising in the back. The first two were issued in 1909, one a list of "Practical books for practical boys," by a large hardware firm in New York, and the other a list of "Books for home builders; planning, decorating, furnishing," by the Sherwin-Williams Company. About 50,000 of each were printed, and twenty-five or thirty of the larger libraries distributed them, the copies having the imprint of the various libraries. Lists of books on housekeeping, machine shop work, and business are now proposed, each to be printed by some company of national reputa-

tion. Libraries are urged to support this plan, and all which care to help themselves and each other in this way are requested to notify Mr. Wheeler.

The public affairs information service. *Spec. Libs.*, D., 1913. p. 191-192.

To help legislative, municipal reference and other special libraries to keep in touch with the progress of affairs in their particular fields a plan of coöperation has been put into operation with headquarters at the Indiana Bureau of Legislation Information, Indianapolis, and in connection with *Special Libraries*.

Forty institutions, including nearly all the leading legislative and municipal reference libraries and some college libraries are enrolled. Each institution pays \$25 to cover cost of postage, subscriptions to clipping bureaus, etc. Between June and Dec. 1, fifteen bulletins printed on the mimeograph were issued.

The institutions enrolled are requested to supply information regarding (1) their own publications and especially all bibliographies and digests; (2) works in preparation; (3) specially significant reports of state or city; (4) reports on public affairs by local organizations; (5) investigations of political, social or economic subjects, authorized or under way; (6) special investigations under way by city or state administrative officers, etc.; (7) local court decisions of extra significance; (8) material relating to the reform of legislative procedure.

Founding, Developing and Maintaining Interest LIBRARY ADVERTISING.

With the object of familiarizing the public with the work of the library, and also with what it aims to do, the librarian of the Providence (R. I.) Public Library prepared a series of twenty articles which were printed in the local newspapers during 1913. A series of eight articles appeared in the *Providence Journal*, from April 3 to April 28, under the general heading of "Getting acquainted with the Providence Public Library." This was followed by a series of six articles in the *Evening Bulletin*, from May 15 to June 4, under the general heading of "Forming the library habit at the Providence Public Library." Six other articles were added, some of which appeared in the *Sunday Journal*, and some in the *daily Journal*. One of these emphasized the various data embodied in the comparative statistics of libraries, which the library prepared and had on display.

"You pay for it. Why don't you use it?"

was part of the contents of a placard posted at all of the polling places at Valparaiso, Ind., on election day for the purpose of calling attention to the public library. The cards were made by the manual training boys of the central high school.

The Alexandria (Ind.) Public Library had exhibits of books in the township building at a recent corn fair, and also in the window of the room where the corn was exhibited. The editor of the newspaper gave good space for publicity articles during the fair.

Library babies. Charles H. Compton. *Pub. Libs.*, January, 1914. p. 9-10.

For the last six months the Seattle Public Library has been sending out each day to parents whose names are listed in the birth notices of the papers, a postal calling their attention to two books on the care of babies. Ten to fifteen postals are sent each day. In the central library and branches are about 75 copies in all, of the two books recommended, and at the central library alone fully 45 copies are out all of the time. Of the people brought to the library by these cards, 25 to 50 per cent. have never taken out books before.

WINDOW DISPLAY LIBRARY ADVERTISING.

A store window library exhibit. *Pub. Libs.*, January, 1913. p. 4-7.

A description of an exhibit made by the Holyoke (Mass.) Public Library in one of the leading stores last summer. All the books were new, and were in roughly classified groups. Care was taken to show plainly the title of each volume, and a list of the books on exhibition, with a few others, was printed for distribution inside the store. A number of placards were displayed, setting forth the uses and benefits of the public library.

ADVERTISING BOOKMARKS.

Bookmarks on such subjects as, After school, what? Building a home, Caring for baby, Eugenics, How to beautify your yard, How to make your business pay, have been printed and widely distributed by the Lansing (Mich.) Public Library, helping in the circulation of books on these subjects.

ADVERTISING POSTALS.

The advertising feature which has been most satisfactory in the Lansing (Mich.) Public Library has been the printing of postal cards with blank space to write in the name of the author and the title of books added to the library. These have been sent each week to persons interested in the subject of the book,

especially to those not regular patrons of the library.

COÖPERATION FROM MINISTERS.

The ministerial association of Decatur, Ill., has purchased about sixty new books for the public library. The books cover a wide range of subjects of special interest to ministers, missionary societies and Bible study classes, as well as being an addition to the religious books in the reference department.

Library Support. Funds

RAISING FUNDS.

The club women of Tulsa, Okla., carried on a "penny canvass" lasting one day to raise money for the library book fund. The city was divided into forty districts, which were systematically canvassed by club members. All money raised from the schools will be kept separate and used exclusively for books for young people. About \$450 in all was received.

When the basketball team at Batesville, Ind., closed its season it had funds on hand, and with the money purchased books for the public library of the town.

Library Buildings

Design, Plans, Construction

LIBRARY SUPERVISION.

A description of the new Liberty Square branch library at Elizabeth, N. J., illustrated with two floor plans and one full-page picture, is printed in the December number of *Public Libraries*. The full-page illustration shows a new method of oversight. The children's room is in the basement, and is connected with the main floor by a stairway. Near the charging desk on the main floor is an open well protected on three sides by low book cases and a plate glass screen, which screen extends to the floor on the fourth side. Opposite to it, on the face of the wall, is a mirror to reflect that portion of the children's room not directly visible from the charging counter.

Reading Rooms

NEWSPAPER READING ROOMS.

Alterations are now in progress at the Louisville (Ky.) Free Public Library. The newspaper room, which has been situated in the basement, will be enlarged and located on the second floor of the library. Standing newspaper racks, on which will be placed all Louisville newspapers and the *Cincinnati Enquirer*, will

be provided in the room now under construction. Cupboards will be built below the racks containing current volumes unbound. Files, containing bound volumes, will be placed on a large table at one side of the room and attended by a clerk, who will see that no clippings are cut from the old papers. Three tables will also be placed in the center of the room where readers may peruse copies of all the papers from large cities of the United States, and papers from London, Paris and Berlin, at length. Readers will be allowed fifteen minutes only to look over the papers on the standing rack, if others are waiting to read the news. Otherwise no time limit will be observed. All the Louisville papers will be indexed, so that any article or advertisement may be found without loss of time. Boxes of interesting clippings will also be kept by the attendants and indexed. The new room will be called the "Newspaper, Civics and Municipal Reference Library Room."

Government and Service

Governing Board

TRUSTEES.

The library problem and the trustees' responsibility. Mrs. C. C. Loomis. *Iowa Lib. Quar.*, O.-N.-D., 1913. p. 49-52.

President's address at the meeting of the Iowa Library Association in Sioux City, Oct., 1913. The library situation has evolved itself into a trustees' problem and the trustees seem to be very far from ready to begin the solution. There are over one thousand trustees in Iowa. The one hundred and fourteen libraries represent a money investment of over \$2,600,000, and carry an annual income of approximately \$300,000 to be expended. There are two sets of persons between the libraries and their patrons—city councils and trustees. If city councils through ignorance sometimes hinder library progress, isn't it the trustees' business to see that they are educated along library lines?

When the last general assembly passed an amendment to the old law raising the maximum levy possible from two and three mills to five mills in all towns, irrespective of size, many boards of trustees heard the news without enthusiasm. Many thought they had enough under the old law and others even had money on deposit, though they couldn't keep their buildings open evenings on account of expense! In the near future the state library commissioners may be asked to create a new office, that of instructor for library trus-

tees. There is room for enlightenment so long as there are trustees who believe that income money is to be kept on deposit; so long as they have "income enough" and yet pay a librarian \$25 a month.

TRUSTEES—MEETINGS.

An innovation in library board meetings. *Wis. Lib. Bull.*, O., 1913, p. 177.

The board of trustees of Cedarburg Public Library tried the plan of holding an open meeting Oct. 14, which was widely advertised in advance. Besides the usual reports an address was given by Miss Lutie Stearns on "The place of the library in community life."

Remuneration, Salaries, Pensions

LIBRARY PENSIONS.

The city council of Omaha has approved an ordinance establishing a pension system for city library employees. The pensions are granted under authority of an act of the last legislature, which follows closely the school pension system. Library employes may be assessed not to exceed 1½ per cent. of their salary, to which the city is to add a sum at least one and one-half times this amount. The fund may also be increased by private donations or bequests. Any person who has been in library work thirty-five years, twenty of which have been in the Omaha Public Library, may be pensioned at the rate of \$420 per annum. Any person who has served forty years, twenty of which have been in Omaha, shall be retired on a pension.

Rules for Readers

Days of Opening

SUNDAY OPENING.

The library board of Davenport, Iowa, has decided to extend the Sunday hours and henceforth the library will be open from 2 to 6. The same hours were kept on Christmas day.

Administration

General Executive

PRESERVATION OF HISTORICAL MATERIAL.

The Indiana historical survey. Logan Esarey. *Lib. Occurrent*, D., 1913. p. 142-146.

While the West is taking the lead in many ways, in political development, in authorship, in social welfare, and in the production of wealth, historically it is but a footnote to New England. In a sense there is no history of the United States outside of New England; not because the men of the West have made

no history, but because it has not been preserved, or if preserved, it has not been gathered together. The task of bringing the West to a par with the East in this regard is enormous, and in this work the library is asked to coöperate. The trouble with the ordinary historical society is that it has neither home nor funds. It is within the power of the librarians of the state to supply them with both. Every library should preserve all original official reports, papers and records of local government not expressly provided for otherwise. In any case copies of all printed reports should be filed. The instance is cited of the sale by the janitor of one of the largest colleges of the state, of two wagon loads of newspapers to a furniture dealer for wrapping paper. These papers were the almost complete file (and the only one in existence) covering 30 years, of what had been the leading paper of the county. Almost at the same time, the library bought a carload of French archives, beautifully bound in red leather.

The Indiana Survey's first and most important work is the preservation of material. In addition, it plans a publication on the "Archives of the state"—the leading state papers, reports, proclamations, platforms, and statistics, and a history of the people as expressed in their daily activities. In this connection it is expected to make a record of every church ever organized in the state; of every school, academy, college, etc.; of farming, transportation, banking, mining, and all other leading forms of activity. From this material accurate histories of Indiana may be written which will replace the unreliable ones of the present time.

On planning a printed catalog of local literature. Basil Anderton. *Lib. Assn. Record*, N., 1913. p. 542-552.

In planning a printed catalog of local literature much depends on the amount of material to be dealt with, and also on the amount of money to be spent. This paper deals with towns of moderate size, whose publications are usually of local, rather than general interest. In such towns interest centers most upon the men and women who have written the books. Consequently, it is best to make the author-list most complete and curtail entries in the subject-list. The most important divisions of the subject-list are usually those dealing with local history, topography, antiquities, and dialect, and in certain localities, special industries. History and description will probably be classed together.

Treatment of views, photographs, etc., will vary considerably, depending on the amount of material and the way in which it is kept. Full treatment can seldom be given. Maps can usually be listed separately. Heraldry and genealogy need careful treatment unless a heraldry catalog already exists. For portraits a complete alphabetical list placed in the biographical section is recommended. Bookplates should be listed alphabetically under the owners' names. In the case of book-illustrators, whose work is scattered through books without other local interest, it is inadvisable to attempt a complete inventory. If not only illustrators, but also authors and subject matter are of local interest, a list of the volumes will be interesting. In most towns an alphabetical list of publishers or printers is desirable. A list of all books in the vernacular will be useful to philologists and to many general readers as well. Is an index necessary to such a catalog? To make a full one is a laborious business, and of doubtful advantage. A conspectus of the classification of the subject-list might be given, together with an alphabetical statement of all headings actually used, and a title-index to books mentioned in the author-list might be a valuable adjunct to the catalog.

PICTURES, LIBRARY USE OF.

An important feature of the work of the Boston Public Library is set forth in the announcement that to supplement the material provided by the fine arts department of the central library, there have been formed at the branches collections of inexpensive pictures likely to be of use to teachers in their work. These pictures are chiefly representations of birds or animals, or are related to geography, including political history, folk lore, or the industrial arts. They consist of plates cut from periodicals or condemned books, mounted post-cards, Perry pictures, and other inexpensive reproductions. Some of them are colored. The pictures are lent freely to the teachers in the public schools of the city and to clubs. Over 42,000 were circulated last year. Pictures may be drawn from a distant branch, as well as from the one nearest to the school or club.

Libraries and similar organizations in the New England states which desire to have frequent exhibitions of pictures for educational purposes can arrange for this by becoming members of the Library Art Club. It costs \$5 to join, and the yearly dues are \$6. In return each library or other organization belong-

ing is provided with twelve or more sets of pictures yearly, each set being allowed to remain at a place three weeks, less the time of travel. The club now owns more than 7000 pictures on art, architecture, history, biography, landscape, natural history, manufactures and other subjects, and when desired a set will be sent for a trial exhibition free of charge, except expenses of transportation. Further information may be obtained from the president, Miss Alice G. Chandler, of Lancaster, Mass.

The Thomas Hughes room for young people in the Chicago public library has a circulating collection of pictures obtained from duplicate magazines, books and other sources. These are mounted on cardboard and are used by teachers' clubs and others who wish illustrative material. The pictures are charged on any one of a reader's cards, in addition to the books he may wish to take, and are loaned for two weeks, with the privilege of renewal.

PHOTOGRAPHIC RECORD FILES—LOCAL.

The first exhibition illustrative of the new photographic survey record of Norfolk and Norwich (England) was held in the new gallery of the public library the first two weeks of December. Last January a committee consisting of members of the Norwich Public Library Committee and representatives of local scientific and photographic societies, with Mr. G. A. Stephen, the city librarian, as secretary, was formed to inaugurate this photographic survey record. In eleven months nearly 1500 photographs had been brought together at the library. Selections from them, grouped under the headings *Bygone Norfolk and Norwich, Architecture, Antiquities, Anthropology, Art, Industries, Biography, Passing events, Geology, Zoology, and Botany* formed the first exhibition. There were also exhibited about seventy-five photographs by members of the Norwich and District Photographic Society, in a competition for a silver cup offered for the best set of local record photographs.

Accession

PURCHASING BOOKS.

The librarian and the book store. John Hall Wheelock. *Pub. Libs.*, January, 1914. p. 7-9.

A description of the new store of Charles Scribner's Sons in New York City, which all library school classes in the vicinity visit as a part of their school work. On counters in the center of the store are ranged the books, each one devoted to some one broad subject, with subdivisions into special groups. In this

way books on the problems of the day, travel, art, nature, religion, juveniles, fiction, belles-lettres, and standard sets are shown.

In the galleries another arrangement is made. A representative stock of all the chief American publishers is displayed, arranged under the publisher's name alphabetically according to author. An order card is in each volume, so that upon its removal from the shelf the card may be issued and the stock kept up with the least possible waste of time.

In the rear of the store a picture gallery shows the originals of the illustrations used in the firm's publications, and here books in fine bindings, foreign as well as American, are also displayed.

FREE MATERIAL.

Material on geography which may be obtained free or at small cost. Mary J. Booth. *Journal of Geography*, Ja., 1914, p. 129-151.

Publications of this description are usually well illustrated pamphlets and come from several sources—the United States government, state governments, railroads, steamship lines, manufacturing firms and chambers of commerce of cities and towns. Instructions are given as to the proper places and persons to address to procure such material and an extended list of titles follows under a geographical arrangement. There are also short supplementary lists on industries and commercial products, and miscellaneous items.

CENSORSHIP.

The taboos of the British Museum Library. E. S. P. Haynes. *Eng. Rev.*, D., 1913. p. 123-134.

There are three classes of books which are not mentioned in any way in the general catalog, and are, therefore, inaccessible to the public. They are books "subversive of the throne, of religion, and of propriety" (the latter including many standard works on hygiene), which, although their existence in the library is admitted, are recorded if at all, only in a special catalog. An extended correspondence, quoted at some length, was carried on with the keeper of printed books in an effort to find out what the necessary procedure might be in order to gain access to these books, and on what basis their selection was conducted. The situation as disclosed in this correspondence may be summed up in the following points: (1) A private department does exist; (2) out of all possible books in these three classes, only some are condemned, the principle of selection seeming very indefinite; (3) such books so buried disappear, for, if any catalog of the "private

case" exists, all access to it is denied; (4) the books "may be had on special application" but since no information on how to apply, where to apply, or what to apply for, could be obtained, the permission is of no value.

This whole policy of restriction is distasteful to the writer. He maintains that as all readers in the British Museum Library must be adult, and must be certified by a responsible person, it may safely be assumed they are there for serious work, which should not be limited or curtailed by a narrow-minded policy of restriction.

One quaint result of the policy is noted in the case of many books on hygiene, which are tabooed in English, while the complete work is admitted in German either as an original or as a translation. The general opinion is that every book in the library should be entered in the general catalog, under author at least, and a long extract from the report of the Library of Congress procedure is made in support of the contention.

The rejected book. *Pub. Libs.* D., 1913. p. 431.

Editorial. There is no reason why the public library should purchase questionable books to please a few people, when it is so difficult to find sufficient money to buy all the material needed by serious students, public school pupils and occupational investigators. Librarians may sometimes fail as literary censors and exclude what should have been admitted, but such a mistake, when recognized, can always be rectified.

Catalog

CATALOGING CODES.

Cataloging codes. Part II. Maurice H. B. Mash. *The Librarian*, D., 1913. p. 155-158.

A continuation of the comparison of rules governing author and authorship heading as embodied in the Anglo-American code and Cutter rules. Comparison is made of the rules for architects, music, commentaries, concordances, revisions, table talk and interviews, translations, compound surnames, princes of the blood and sovereigns, and noblemen.

Cataloging codes. Part III. Maurice H. B. Mash. *The Librarian*, J., 1914. p. 195-199.

Continues further the comparison of the Anglo-American code with the Cutter rules dealing with author and authorship headings. Rules governing the treatment of pseudonyms, changes of name by married women, ancient Greek and Latin authors, corporate bodies as

authors, and anonymous authors, are compared, and a brief discussion is given of the proper mode of entry for almanacs, year books, etc., and extracts from periodicals.

Classification

DECIMAL CLASSIFICATION (DEWEY'S).

Suggested rearrangement of the Dewey classes 100 and 200. J. E. Walker. *Lib. World*, D., 1913. p. 163-165.

A rearrangement in accordance with the writer's ideas of the main divisions of philosophy and religion. Taking as a basis for the rearrangement, the process of the development of the human mind, the writer proceeds to reconstruct the class Philosophy in the following order: Philosophy (in general), ancient philosophers, modern philosophers, mind and body—anthropology, mental faculties—psychology, logic—dialectics, metaphysics, ethics. This carries one in a logical manner to the cognate class, Religion. In this class the only change suggested is the transfer of "ethnic—non-Christian" religions from the end to a place immediately after Religion (in general).

Loan Department

BOOK DELIVERY.

The public library of Wilmington, Del., proposes to deliver books by messenger to those who call for them by telephone, the cost of delivery to be met by the borrower.

The library has entered into an arrangement with the Western Union Telegraph Company to deliver all books called for at an expense of only five cents a volume.

In order that all persons may be treated alike, the following rules have been adopted:

1. Five cents will be charged for each volume delivered, except in cases where two volumes belong to the same work.
2. One volume (or work) for each volume delivered may be returned to the library when books are delivered, without extra charge.
3. Readers should give several titles when calling for books, so that they may not be disappointed in case one or more are not in the library.
4. If no books called for are in, a notice to that effect will be sent to reach the applicant in the afternoon mail, provided the request is received before noon.
5. One work of fiction will be sent when another one is already charged, provided the one already in the hands of the borrower is returned by the messenger.
6. Only one delivery a day will be made. Ap-

plications for books should be in the hands of library assistants not later than noon to allow time for looking up books.

Shelf Department

SHELF DEPARTMENT WORK.

Persons about to install new libraries, or those who find their books in bad condition, will be interested in the advice recently offered on this subject by a French authority. Glass cases should be avoided, except for a few precious volumes which are specially looked after and frequently dusted, since the confined atmosphere and lack of air circulation in such bookcases is favorable to the development of germs, insects and mold. Secondly, the simple precaution should be taken of placing on the shelves behind the books strips of cloth or flannel, moistened with benzine, phenol, tobacco juice or turpentine. These strips give excellent decay-preventing results if renewed from time to time and insure the preservation of the books and protect the librarian for all time.

Libraries on Special Subjects

BUSINESS LIBRARIES.

The library—a business man's means for developing his employes. Orpha Zoe Massey. *Spec. Libs.*, D., 1913. p. 190-191.

The Retail Credit Co. of Atlanta, Ga., is a national organization with 150 employes, making commercial reports on individuals. Mr. Massey, the librarian, outlines the company's plan of helping its employes, through its library, to increase their ability for work.

The librarian is supplied with data as to each employe's special work and needs, and he selects the books for each reader with reference to such needs, sending with each book a memorandum of special points to be noted. On the back of this memorandum card are some questions for the reader to answer regarding what he considers the most helpful ideas in the book, and what ones he is putting into practice. These comment cards are saved and give a good idea of the nature and scope of the book.

To carry out the details of the work four 3 x 5 cards are used. (1) A permanent inventory card for each book; (2) a book card for each book, used as a record showing whether the book is in circulation or not; (3) a reader's card on which is listed each book he reads and the date sent; (4) the criticism or comment card sent out with each book. No entries are made in symbols as the data must be available and intelligible to anyone.

General Libraries

For Special Classes

BLIND, WORK WITH THE.

A manuscript catalog of all books for the blind (so far as known) which exist in Braille in the United Kingdom has recently been completed and will be kept at the National Lending Library for the Blind, 125 Queen's Road, Bayswater, London, W. Work on the catalog has been wholly voluntary, and it now fills twenty-seven volumes. Location, owner, date of transcription and edition are recorded, and all those who have permanent collections to which they make additions are requested to communicate the same to the secretary of the library, which acts as a voluntary clearing-house for the Federation of Libraries for the Blind.

Reading and Aids

Work with Children

CHILDREN, WORK WITH.

Books for the young people's shelf. Sophie M. Collman. *Pub. Libs., D.*, 1913. p. 420-426.

Paper read before the Ohio Library Association, Oct. 10, 1913. Discusses a list of fifteen books forming part of a collection which has for some years been used in Cincinnati in work with the young people who have outgrown the children's room. These books are not "classics," but wholesome stories which will amuse and please without creating false and misleading views of life.

Literary Methods

Library Appliances

LIBRARY SUPPLIES.

Library supplies. Frederick Warren Jenkins. *Pub. Libs., D.*, 1913. p. 432-434.

The Russell Sage Foundation Library in New York has been reclassified and recataloged during the past year and a half. During that time many methods have been tried out, and many experiments made. The conclusions reached are described in this article, and cover the subjects of classification, labels, cards, typewriters, pens, ink and varnish.

DUPLICATING METHODS.

Duplicating processes. Part II. *The Librarian, D.*, 1913. p. 159-161.

Adapted from an article by H. S. McCormack in the *Scientific American*. Describes the development of various devices for reproducing in large or small quantities letters writ-

ten on the typewriter. Duplicating machines for reproducing plans or drawings and signatures are also mentioned, and attention is called to the need, still unprovided for, of some simple device which will enable a business house to secure from one to six copies of its statistical reports, record sheets, etc. Also for a device to reproduce quickly correspondence received, of which the original must remain in the office.

Bibliographical Notes

UNDER the heading "Current heating and ventilating literature" the *Heating and Ventilating Magazine* publishes each month an index of the important magazine articles which have appeared on the subjects of heating and ventilation.

AN 83-page pamphlet entitled "Social forces" has been issued by the Education committee of the Wisconsin Woman's Suffrage Association. The contents have been separated into three main divisions. First, a list of one-day programs on civic and social topics, designed for clubs which give only one day each month or each season to such study. Second, an outline of some seventy or eighty topics, arranged under ten general divisions, and covering modern governmental methods, industrial, educational and social problems, with bibliography of books, magazine articles, and other material under each topic. And third, suggestions for the introduction into the public schools of instruction and training in citizenship and morals.

THE paper entitled "Foreign literature in translation," by Zora L. Shields, of the department of English in the Omaha high school, which was read before the Nebraska Library Association at its meeting in Lincoln, Neb., in October, 1912, has just been reprinted in pamphlet form by the Omaha Public Library. Jessie M. Towne's paper on "Stimulation to reading for high school students," read at the October, 1913, meeting of the same association has also been issued in similar form.

THE John Crerar library of Chicago has issued a 16-page handbook as a convenient means of answering many questions in regard to the history, present condition, and future plans of the library. It is a revision and extension of a sketch first prepared by the librarian in 1902, and contains sections on the chronology of the library, its foundation, de-

velopment, scope, administration, collections, catalogs, publications, and on the question of a permanent building for the library.

A READING list for boys and girls, in which the books are correlated to the course of instruction in the graded schools, has just been issued by the Queens Borough Public Library of New York City. It is compiled by Miss Harriot E. Hassler, chief of the children's department. Similar lists proved so popular and useful at some of the branches, that the idea was taken up systematically, carefully worked out, and the lists published. There are four short lists of different titles for each grade. Each list covers the grade and is complete in itself. This arrangement has been followed for many reasons: (1) Children take to a short list more quickly. Even a slow and reluctant reader will tackle a short list. The weakest ambition can get through a few titles. (2) The demand for the books at the library is scattered over sixty titles from the beginning instead of concentrated on the first few books on one long list. (3) Almost any child can accomplish the reading of a short list of books, and goes forward with a sense of triumph instead of defeat, psychologically an event of the first importance to the child. The lists are embodied in the *Bulletin of the Library*, but the short lists for each grade have been separately printed on slips of different colors, without pledge, promise or advice of any kind. Already many letters of approval and appreciation have been received. Copies have been sent to all the schools in the borough, and the lists are being distributed to the children at the branch libraries in Queens.

In the pamphlet, "Seventy-five books of adventure for boys and girls," which was prepared by the children's department of the Cleveland Public Library, a new plan of annotation was tried. Most of the notes are in three paragraphs. The first paragraph is a brief summary of the plot or scope of the book, directed to the attention of the child; the second suggests to him additional reading along lines of similar interest; the third gives information of interest to the parent or teacher. This list of seventy-five books is an advance section of a long list with the same plan of annotation, to be published later.

A BOOKLET of 83 pages, arranged by Florence M. Hopkins, librarian of the Detroit Central High School, is published under the title "Allusions which every high school student should know." It contains about a thousand allu-

sions which intelligent people would be expected to recognize, and a number at the left of each entry—as 9, 10, 11, 12, or G [graduate]—suggests at about what grade the allusion should be recognized. Blank space has been left for notes beside each allusion, and blank pages for added allusions. The subjects covered include philosophy, religion, mythology, sociology, philology, science, useful arts, fine arts, literature, and history.

THE NEW STATE LIBRARY AND SUPREME COURT BUILDING AT HARTFORD, CONNECTICUT

OUR English brethren have fixed the date for the Oxford conference as Aug. 31, and are making special endeavors to obtain full representation from the United States as well as from Canada, and also from Australia and the British dominions and possessions generally, so that the conference of 1914, if not international in the full sense, shall be a representative pan-Anglican gathering. The Oxford program, as provisionally arranged, schedules several important subjects on which leading American members of the library profession are expected to speak, and the fact that the conference is to be held in the most historic and notable center of learning in the mother-country, adds emphasis to the invitation of kin across the sea. The A. L. A. Travel committee has presented plans for a European travel party via the Mediterranean, which will cover the exposition of the "Book" at Leipzig and reach England for the Oxford conference, returning thereafter at the pleasure of the individual voyagers. In 1877 a goodly delegation from America helped to form the original L. A. U. K.; in 1897 nearly a hundred American librarians made the memorable voyage to the London International Conference; and in 1910 some thirty participated in the third journey across sea in connection with the Brussels Congresses. The attractions of the travel plan should make possible a party for 1914 even larger than that of 1897, and it will be the hope of American librarians that such demonstration in force may be made as will convince our English colleagues of the pleasure and duty of making a return visit and crossing the continent in international harmony in 1915, even though the British Empire is not otherwise represented at the Panama-Pacific Exposition.

THE bi-state meeting at Atlantic City of New Jersey and Pennsylvania librarians and their extra-territorial colleagues, which will be held this year March 6 and 7, will have the opportunity of welcoming New Jersey's new state librarian, who will be made none the less welcome because of the dissatisfaction with the method of his appointment, which cannot and should not pass unvoiced. Though his predecessor was doubtless a political appointee, in the days when a state librarianship was a perfunctory office, Mr. Dullard's appointment from political motives and for political reasons cannot be too severely reprobated. If the New Jersey press is to be believed, Governor Fielder had declined to reappoint Mr. Buchanan, despite the long years of service in which he had grown to be a practiced and useful librarian, because he was a Republican, and had notified the South Jersey Democrats that, as it was their turn to have a political "plum," they might name the new state librarian. And this in the state of Woodrow Wilson! Ohio through Governor Harmon and New Jersey through Governor Fielder have both taken a serious step backward in relegating their state librarianship to the spoils system, and the two governors have seriously hurt their party in the eyes of the large and increasing class who judge political parties by their works rather than by their professions, and support or condemn them at the polls accordingly. We are glad to be informed that Mr. Dullard himself urged the reappointment of Mr. Buchanan, was indisposed to accept the appointment himself until the governor made clear that he would not take this course, and is a man of executive experience and of administrative ability eager to do his part in upholding New Jersey's activities in the library field. Mr. Dullard has been appointed as a member

of the State Library Commission and is expecting to attend the library conferences, where, we may again assure him, he will find cordial personal welcome, with no thought of holding him responsible for the unfortunate course of the governor of New Jersey.

FOLLOWING the death of William C. Kimball, that of Frank A. Hutchins, of Wisconsin, makes another gap in the ranks of the men, none too many, who have come to the help of the library profession from outside its ranks. What Mr. Kimball was from the start to the New Jersey commission that Mr. Hutchins was to the Wisconsin Library Commission in its beginnings, and although of late years he has been incapacitated for work, what he did to start Wisconsin on its great work of library progress outlived his days of active usefulness and will have its influence for long years to come. Prematurely estopped in these later years by bodily paralysis, as the lamented Crunden was sundered from his work by the paralysis of his mentality, Mr. Hutchins will long be remembered, as will Crunden, because in the years of activity each man had accomplished much more than most men could do in prolonged lives of unimpaired work. These were men who accomplished so much in the fewer years given to them as to build for themselves broader and more lasting memorials than it is given to most of their fellow workers to build in twice their years.

At the meeting of the American Library Institute last year, the question of library pay came to the front in connection with Professor Johnston's paper on the need of recruiting the library profession from the ranks of college graduates. More than one of the library schools now makes the college diploma the *sine qua non* of admission, but the larger proportion of recruits come with

high-school rather than college education. Professor Johnston's paper recognized that the difficulty was due partly to the small pay of librarians, and although the figures which he presented from Princeton data were questionable generalizations as to the early earnings of men who went directly from college into business life, it is largely true that library salaries in the past have not been inviting. But it is also true that the library schools have been able to assure to their graduates immediate employment as no other professional schools have been able to do; and the data presented by Miss Rathbone from the experience of Pratt Institute Library School graduates show encouraging figures. Moreover, libraries are advancing in recognized public importance, as colleges have been advancing in recent years. A generation ago, college presidents and college professors were very poorly paid, and they are by no means overpaid now. But within this generation, with the large development of colleges and universities has come recognition of the fact that the president of an educational institution must be a great executive and that he must be supported by associates fairly paid. In like manner, the trustees of large library systems, as in New York, Brooklyn, Chicago and St. Louis, have come to see that they must have executives of large ability, who must be paid accordingly, and although the inadequate salary of the nation's librarian is still ridiculously small, there is a growing tendency to pay the heads of great libraries fairly well. Moreover, their development has meant a like advance in the importance and salary of heads of departments, while throughout the country, as Miss Rathbone's figures show, there is a decided increase of pay with increase of responsibility. Let us hope that the kindred professions of teacher and librarian may be more and more recognized by adequate pay.

REFERENCE BOOKS AS PUBLIC UTILITIES

II. SOME WELL-KNOWN DICTIONARIES COMPARED

BY G. W. LEE, *Librarian, Stone & Webster, Boston*

"QUANTO diutius considero, tanto mihi res videtur obscurior."—CICERO.

Do you advise me to buy Webster's New International dictionary, or the New Standard, or the New Century, or Murray's? Which is best suited for the family? which for the business house? which for the professional man? which for the school? which for the public library?

To decide which dictionary is on the whole best for one's own purposes is not always easy. Still less so is it to decide which is the best for other people's; and after studying the matter, I am quite ready to exclaim with Simonides, who had been asked to define the nature of God: "By how much the more I consider, by so much to me the thing seems more obscure." I believe, however, that a systematic and trustworthy appraisal of these indispensable works of reference is entirely feasible. I believe that the American Library Association could engineer this through its executive office; and I believe that with the A. L. A.'s encouragement some one library, some one library school, or other institution, would gladly undertake it. It would, of course, be too much to expect, at the outset at least, to be able to tell men exactly which dictionary they would find most satisfactory for every purpose they might have in mind; but to approximate this far better than we now do by rule-of-thumb methods, seems to me easily possible, even though the purchase price or means at one's disposal, and the local availability for borrowing and consulting, would in many instances complicate the problem for the prospective buyer.

In Part I*, dealing with encyclopedias, I emphasized this point, making a plea for what might colloquially be called a *Reference book commission* (subsequently re-

ferred to simply as the "commission")—recognizing, of course, that the term more properly implies a government undertaking. In the present article I would consider chiefly a comparison of the following four much talked of dictionaries*: Murray ("The Oxford English"), the Century (dictionary and encyclopedia), the Standard, and Webster.

As a convenience for discussion, I select the following general headings: (1) Fullness, (2) Definition, (3) Pronunciation, (3a) Spelling, (4) Up-to-dateness, (5) Grammar, (6) Convenience, (7) Summary.

(1) FULLNESS

Murray, admittedly the fullest dictionary, is not completed yet, the quarterly signature for Oct. 1, 1913 (being a little further along the alphabet than that for Jan. 1, 1914), covering Tombal-Trahysh, as part of volume 10, and coming some twenty-five years later than volume 1. This dictionary, when finished, will have something like 13,000 pages, about one-third as large again as the Century, and four times the size of the Standard or Webster; costing, in half morocco, \$130, or at the rate of one cent a page. We must remember, however, that Murray has none of the tabular or statistical data that has become so much a feature of other

* Murray: "The Oxford English dictionary: new English dictionary on historical principles; founded mainly on the materials collected by the Philological Society. Edited by Sir James A. H. Murray, with the assistance of many scholars and men of science." *The Century*: "The Century Dictionary and Encyclopedic Lexicon of the English Language. . . ." *The Standard*: "Funk & Wagnalls New Standard Dictionary of the English Language, upon original plans, designed to give, in complete and accurate statement, in the light of the most recent advances in knowledge, in the readiest form for popular use, the orthography, pronunciation, meaning, and etymology of all the words, and the meaning of idiomatic phrases, in the speech and literature of the English speaking peoples, together with proper names of all kinds, the whole arranged in one alphabetical order." *Webster*: "Webster's New International Dictionary of the English Language, based on the International Dictionary of 1890 and 1900, now completely revised in all departments, including also a dictionary of geography and of biography, being the latest authentic quarto edition of the Merriam series."

* Published in the LIBRARY JOURNAL of November, 1912, p. 587-593, and reprinted and available for distribution.

dictionaries. The fullness of Murray is in *etymology* and *definition*, going back in historical order as much as seven hundred years, to what might be called the beginnings of the English language, for the purpose of showing the authorities in the development of meanings. A characteristic treatment may be seen in its entry for the word *tonnage*. More than a column, or upwards of three thousand words, are devoted to this term. Authorities are quoted for the meanings to the number of fifty-five, ranging in date from 1422, for its definition as a wine tax (when it was spelled *tonage*), to 1913, when for its definition as "a mode of reckoning the ton of cargo for freightage," there is a quotation from the regulations of the "W. I. (West Indies?) Atl. SS. Comps." As evidence of fullness on single words, Murray treats of the preposition *to* in eight pages, or in over thirty thousand words; while the Century requires but a page and a half (less than two thousand words); the Standard and Webster about equal, each less than a thousand words. Although proper names and foreign words that have not been well adopted into the English language are for the most part excluded by Murray, slang words are quite freely included. Thus we find the word *buster*, but not *Bombay* or *betula* (birch), while the other dictionaries give all three. Murray, however, gives the adjective *betulin* (pertaining to birch), while the others do not. It gives a dozen or so compounds of the Greek prefix *trachelo* (pertaining to neck), about as many as the Century or Webster, while the Standard, excelling in such derivatives, has upwards of fifty. Murray does not list *synonyms*; the others do, the Standard, noted for its abundance of synonyms, having also its unique entry of antonyms, *i.e.*, the opposite of synonyms. Thus, under *acute* it gives not only the synonyms *astute*, *cunning*, *discerning*, etc., but the antonyms *blunt*, *dull*, *heavy*, etc.

The Century, of twelve volumes (the eleventh and twelfth being the Cyclopaedia of names and the Atlas, respectively), is not far behind Murray in fullness of definition, except for the purposes of the philo-

logically-minded, while it has the added feature of being encyclopedic in the treatment of many terms. An example of such treatment may be seen in its discussion, a column long, of Electricity, apart from mere definition. It is not very strong in foreign terms.

The Standard has the well recognized feature of including a greater abundance of scientific terms than any of the others, its claim, in fact, being to have "over 450,000 living vocabulary terms, thousands more than any other dictionary"; to which the ready response comes, that it is easy enough to run in scientific compounds ad nauseam; to which the natural rejoinder comes, that what is one man's "ad nauseam" may often be another man's meat.

In the preface to Webster is the following statement: "Counting together the main words and derivatives in so far as they involve peculiarities of meaning, and the combinations or compound words and phrases, the present vocabulary has more than double the number of entries included in the next previous edition, that of 1900. According to an accurate count, the number of words printed in bold-faced type, together with the inflected forms that appear in small capitals, totals more than four hundred thousand."

(2) DEFINITION

Murray not only defines historically, but includes very much of the obsolete. Selecting the word *abandon*, for example, its first meaning, according to Murray, is *To subjugate absolutely*, and its second meaning is our ordinary one, *To give up absolutely*. Of eleven different meanings six are noted as obsolete; in the Century, of seven meanings, two are obsolete; in the Standard, of five meanings, one is obsolete, and in Webster, of five meanings two are obsolete. The Standard gives the obsolete meaning last, and it may be emphasized here that one of the special characteristics for which the Standard has many advocates is its insertion of definitions in the order of commonest usage, as contrasted with the historical order. It may be well to observe that the advantage herein is not so great as

claimed in the advertisement of the Standard because, for a vast majority of the words that we have occasion to look up, in a dictionary like Webster the commonest meaning is the first meaning. Murray and the Century are surpassingly rich in illustrative quotation, though the Standard and Webster are proportionately good.

For *synonyms* and the discussion of synonyms the Standard is superior in numbers, claiming to be the only dictionary that gives 7500 separate lists of synonyms, and discussions of more than 2300 synonymous terms. Such fullness in synonym was also a characteristic of the old edition.* The Century, with about 7000 synonyms, and Webster, with decidedly less, are, however, hardly inferior to the Standard in the quality and the discussions of synonyms. Compare, *e.g.*, the three on the following terms: Accurate, Active, and Ancient, or almost any that have synonyms.

Exactness of reference is a prominent feature of Murray and the Standard. The Century, while apt to give exact references, often lets a quotation go with merely the author's last name; while Webster, except for Biblical references, regularly gives but the last name. By way of example, compare references under the term *absolute*. The following entry is characteristic of the Standard: "Such a thing as an absolute right of property has never existed. *R. T. Ely, Intro. to Polit. Econ., pt. iv, ch. 1, p. 214 (Chaut., 1889).*" In the Century, for the quotation under the seventh definition of *Absolute*, reference is given to "Mrs. Browning, *Aurora Leigh*, iii;" while for the eighth definition it is simply "Mrs. Browning." Such an entry as the following is characteristic of Webster: "So absolute she seems and in herself complete. Milton."

Murray has no pictorial illustrations, the Century has more than the two others,

though no more in proportion to its size, while the Standard and Webster have about 7000 and 6000, respectively. For the letter Z, there is a total of 48 illustrations, of which but 5 illustrate the same object in all the three dictionaries, indicating that no one of the three includes every illustration that may be considered to the point, and that evidently there is no royal road to selecting them, except to avoid, as far as reasonable, illustrating the terms which predecessors have selected. Therefore, if illustrations in a dictionary mean much to you, buy all three, if you can afford to.

(3) PRONUNCIATION

Conceding that Murray is the work for scholarly definition of established words, I should hesitate before calling any one of the four the authority for pronunciation. Certainly Murray is not the generally accepted authority in the United States. *E.g.*, it would have us pronounce *clerk* as *clark*. The indispensable use of the big dictionary is for definition, though the most frequent use may well be for spelling or pronunciation, or other features in which faith is put because the book is at hand and we have the habit of consulting it. A smaller, comprehensive dictionary should generally suffice for most purposes other than definition.

Methods of indicating pronunciation in the three American dictionaries differ but little in essentials, except for the double entries of the Standard. The Standard and Webster have their keys to pronunciation on every page; Webster at the bottom, as heretofore, and the Standard at the top, as a new feature. Murray and the Century have their keys to pronunciation in the beginning, once for all. The Standard advocates the "*revised scientific alphabet*" for pronunciation, and as its reason no. 6 (in its circular of "fifty reasons why you should buy the New Standard") advances this as "the most exact and comprehensive system of pronunciation." Since there is a well-known controversy as to whether this system can generally be accepted, comment thereon may well be omitted here. The "Commission" might receive long treatises on the pros and cons. Note, however, that

* Because of the many features of the old edition, which from reading the "Fifty reasons" circular one might think were only in the new, we must not forget that the *old Standard* is not much inferior to the *new* except as to up-to-dateness. We find some supplementary features therein that are hardly included or traceable in the new, and likewise there is supplementary matter in Webster's *International* that has not been embodied in the *New International*. Hence let us not be too ready to dispose of our old editions.

a respelling substantially in accord with that of Webster is given after the new or scientific method, so that if you are not accustomed to the *new* you may find the *old* convenient. An interesting feature of the Standard is referred to in its reason no. 24, "The *only* dictionary that presents a *consensus of Correct Pronunciation* by the decisions of a Committee of Twenty-five Experts from the leading educational institutions of the English-speaking world." A good feature, revised from the preceding edition. There are over two thousand such entries included in this supplementary part of the Standard. Would that all of the dictionaries gave us a similar table, that we may have the satisfaction of seeing how large a proportion favor this or that pronunciation!

(3A) SPELLING

Spelling is closely related to pronunciation. Here, again, Murray is not in accord with American practice, which does not favor the British spelling of *harbour*, *honour*, *traveller*, etc., inserting the *u* and the double *l*. In the matter of simplified spelling, the Standard has gone the furthest. As reason no. 32 it offers: "The *only* Dictionary that includes in its Vocabulary the simpler spellings of English words recommended for adoption by the Simplified Spelling Board." To include them in the vocabulary is a good feature; but ought they not to be included in their alphabetical order in every instance, as well as accompanying the conventional form? For instance, "thru" is put with "through" as a secondary spelling, and "forfit" with "forfeit;" but were a foreigner or one not familiar with the English language to look for either of these reformed spellings he might not readily find them. Webster does not give "forfit," but does give "thru" in the lower section, in its alphabetical order. Let such out-of-alphabetical-sequence alternatives be entered twice. The Century has its "List of amended spelling," with rules of the Simplified Spelling Board at the end of volume 10, after the Zs, but it gives only the more commonly accepted

spelling in the general vocabulary. *E.g.*, *thru* is given in the appendix to volume 9, but *forfit* is not given in either part of volume 4 in which *forfeit* belongs.

(4) UP-TO-DATENESS

Murray's up-to-dateness is obviously of a sliding scale, and perhaps such a scale will be furnished with the last instalment. We must not expect to find *aviation* in the first volume, of more than twenty-five years ago, yet we may half expect to find in the final volume such a term as *Zeppelin*, for a type of airship. The Century's recent revision I find dated in the preface as July 1, 1911, though I note a recent copyright entry as of 1913. The revision was not so far reaching as to make it, like the Standard and Webster, "new from cover to cover;" yet it was more of a revision than the public readily believes. The prospectus shows great revision. The fact, however, that the contents of the two comparatively recent supplementary volumes are not worked into the main vocabulary (but "with revision and further additions, have been incorporated in the present edition, being distributed among the several volumes in accordance with the part of the alphabet comprised in each") makes the public skeptical as a prospective buyer; while the need for looking in possibly two places for a word (even though properly reminded to do so by an asterisk), contributes to the hesitation to purchase. Naturally, too, we ask ourselves, "If there is so much revision, have there not been words here and there crowded out so as to allow of getting the entire content into the same number of pages as heretofore?" Personally, I am of the opinion that a thorough-going search would show that comparatively little of any consequence has been omitted. As evidence that there are omissions, however, I would cite the word *aesaloid*, a term too technical for the other dictionaries, and appearing only in the Century supplement before the latest revision. It means "related to or resembling a beetle of the family Aesaloidea," obvious enough to those who are likely to

use it or refer to it, and because of its obvious meaning evidently allowed to give place to one of the many new words of the *aero* series close by in the alphabet.

The New Standard, whose Introduction is dated Aug. 1, 1913, has been much advertised for its revision. In applying test words for recency we find it has definitions of *feminist*, *hangar*, *sabotage*, *spug*, *syndicalism*, and *tango*; but not *cafeteria*, *Montessori*, *dasheen* (the potato substitute), or *multigraph*. None of these are in the Century or Webster, unless in a recent issue, having changes too slight to warrant its being called a revised edition. Murray gives *hangar*, but didn't know it was to be the regular term for the flying machine garage. Geographical and statistical lateness has its advantages, of course; but because dictionary makers can so readily incorporate it with their latest issue, those of us who care for such things should be wary of purchasing any large dictionary that we recognize as having a rival without first sounding to see if the rival has not been, or is not about to be, corrected to a later date.*

(5) GRAMMAR

Murray touches but little upon grammar; neither does the Century. They both have something to say about *shall and will*, *had better*, and doubtless other words and expressions, the Century going further into such matters than Murray; but neither refers to *would better* or throws much light on a majority of questions cited in this section from our library list. The Standard endeavors to serve as a grammar and rhetoric, claiming (no. 11) to be "the *only* Dictionary that contains rules governing grammatical and rhetorical construction." There do not appear to be rules in this dictionary covering *all* grammatical and rhetorical construction, though rules are given for

spelling and pronunciation, but not for punctuation or syntax. The *faulty diction* supplement of the old edition has been incorporated for the most part.

Another claim (no. 12): "The *only* Dictionary that makes a point of systematically correcting the common errors of speech." The old Standard has its nine pages of Examples of faulty diction, which are absorbed, with reasonable condensation and some omissions, into the new. It would be a great and useful achievement for a dictionary to answer the many questions of correct English that are stumbling-blocks for this person and that. I can see, however, that there might be some difficulty in indexing them so as to be readily found when wanted. In spite of the Standard's good attempt to cover the field, there is much that escapes it. Two examples are the use of the word "aggravate" and of the expression "these kind." It is common for people to correct one another on the use of *aggravate* for *irritate*. The New Standard, by way of discussion, in addition to the colloquial definition, says: "To *aggravate* is etymologically to increase in weight, hence in gravity, severity, or intensity. A disease or other evil may be *aggravated*, but not a person." Webster makes short work of this in its definition no. 5: "To exasperate; provoke; irritate. *Colloq.*" *Colloquial*, however, is not necessarily condemnatory for conversational purposes according to Webster's definition of the term, and one could wish it less non-committal. I cite the comparison by way of commending the discussions on pros and cons of language in which the New Standard abounds. And yet the very common expression, "These kind of things," or similar expressions wherein the plural demonstrative (these) governs the singular (kind), I do not find discussed in the New Standard; whereas in Webster we have the following observation under the noun *kind*: "From its adjectival force, *kind* of before nouns in the plural came to take incorrectly a construction with verbs, pronouns, demonstratives, etc., in the plural; as, these *kind* of knaves. *Still Colloq.*"

It has been the experience of our library

* The preface to the New International is dated July 1, 1909; but the note added to the preface in a later impression, dated Jan. 1, 1913, says: "The publication of the returns of the decennial censuses taken in 1910 and 1911 by the leading nations of the world has made available a great amount of statistical material that is now incorporated in 'The pronouncing gazetteer.' In addition to this, numerous changes and additions of a minor nature have been made throughout the book."

to make much wider use of dictionaries than consulting them merely for definition, spelling, and pronunciation. Our classified list of questions asked and answered, with record of sources of information, reveals under the group having to do with grammar a diversified number of queries on business English, several of which we have failed to find answered by any of our dictionaries. Characteristic are the following, abridged somewhat from our collection, the comments on which I supply partly from the records and partly from further search:

(None answered by Murray, unless words to that effect.)

1. Which is correct, "This *size* envelope" or "This *sized* envelope?" (Murray, the Century, the Standard and Webster give *sized*.)

2. Should we speak of "for a period *ended*" or "for a period *ending*?" (Not found in dictionaries, but various reports show a preponderance of "period *ending*.")

3. In the sentence, "Each company *began* paying dividends *since* the panic of 1907," is the word "began" compatible with the word "since"? (No satisfaction from dictionaries, but made offhand suggestion to recast sentence.)

4. Should we use "in reliance *upon*?" (All four cite "reliance *on*," which is probably better than "upon," which is also cited by Murray.)

5. Which is correct, "*ought never* to be" or "*never ought* to be?" (No help from dictionaries. Needed to consult a grammar, from which it appeared that the second form was preferable.)

6. Spelling of "*Summa cum laude*" (Standard, and lower half of page in Webster; not in Century.)

7. How to indicate the plural of the French proper noun *Louis*. (No satisfaction from the dictionaries, but learned from a "French Composition" that the article is pluralized instead, e.g., *Les Louis*.)

8. The proper way to address Lord A. of B., in a business letter. (No satisfaction from dictionaries. The Century does not give forms of address; the Standard gives a good list under "form," which is sugges-

tive, but the decision was, in accordance with the advice of one of our office members, who has had much experience in such matters, to make the address "Lord A. of B., Dear Sir," etc., according to the American practice. Webster does not give forms in the New International, but does insert them in the "Little Gem," which one is apt to mislay or forget about.)

9. Correct form of address on envelope to a *doctor and his wife*, "Dr. and Mrs. John Blank," or "Dr. John and Mrs. Blank?" (Not in the dictionaries. Consulted a book on business letter writing, which recommended "Dr. John and Mrs. Blank," but we took exception to this, and from our own judgment recommended "Dr. and Mrs. John Blank.")

10. How to address a *firm of ladies*. (Murray, Standard and Webster all give "Mesdames" as the plural for "Madam," from which one concludes that the letter reads "Dear Mesdames." The Century gives "Mesdames" only as the plural of "Madame," and not of the Anglicized form. Webster's "Little Gem" gives forms of address and answers the question directly in the subdivision under "Common forms of address." Why should a matter requiring so little space not be included in Webster's big dictionary?)

11. Which is correct, "*Smith, John Henry, Jr.*," or "Smith, Jr., John Henry?" (Should like to find an answer for this in the dictionary, but, assuming it was not there, found the style in the Cumulative book index, "Smith, John Henry, Jr.")

12. In quoting, at the end of a sentence should the final *quotation mark* come before the period or after it? (No satisfaction from the dictionaries, but found the answer in Bigelow on "Punctuation," the quotation mark coming always after the period—it being otherwise in the case of a semicolon or an exclamation point.)

13. Is it correct to speak of "*The hoi polloi*," where "Hoi," itself, in Greek means "The?" (I improvised this question myself for this occasion, as it is characteristic of what is asked of this library. The expression is given in the Standard and Webster, but not in the Century, while neither

gives any advice as to whether or not "The" should precede the expression.)

I hope that in the near future we shall have a book that settles the thousand and one interrogations as to good English in business life, and it seems to me the New Standard tends this way more than Webster. Would that all libraries, library schools and colleges might collect mooted questions on matters of English composition and refer them to the makers of our dictionaries, not only for immediate answer, but for attention in the next revision of their work!

(6) CONVENIENCE

By convenience I mean not only typography and the general ease of handling, but the satisfaction in finding brought together in a single publication a wide range of useful information that is easily located in the book. Murray, as noted before, adheres more strictly than others to the bare dictionary idea: pronunciation, spelling, derivation, and definition. The others have also synonyms and illustrations, as referred to under (2) *Definition*, also proper names (the Century having a separate volume for this and an atlas volume), while the Standard and Webster have many tables (such as comparisons of coins, measures, weights, etc.), and much else, such as we find, or used to find, in appendices. It may be convenient to know that Murray omits all this, as thus we are not disappointed in our hopes. The *type* in Murray, though small for the most part, is black and prominent for the principal vocabulary entries, the words beginning, however, with *capital letters*, which would be a decided inconvenience had proper names been freely included. (E.g., it does include *American* and *Asiatic* and a comparatively few others.) The change in the new Webster in this respect is worthy of note—no longer capitals for every entry. Obviously, it is inconvenient to have *different parts of Murray so widely differing in date*, but perhaps after the final volume appears we shall have a revised edition of the whole.

The advantage of a *single volume*, such as the Standard and Webster still offer, is

obvious, though almost necessitating a dictionary stand. The *two-volume* editions of the Standard and of Webster are particularly acceptable to those who would keep them in a bookcase. The interesting innovation of the *one alphabetical order* of the Standard is an obvious convenience, though it has its disadvantages. It has not been found possible to include population figures in the consolidated vocabulary, because, I presume, of the difficulty in revising when the statistics are out of date. Hence for population we need to look in the still needed addenda.

There are several other features of convenience claimed by the Standard, some of which have been mentioned under (2) *Definition*, e.g., *antonyms* (5000); *group illustrations*, with plate pages, including several branches of the public service (*fire, police, post office*, etc.), also *safety appliances*—all conveniences, though the thicker paper needed for the plates stands in the way of manipulating the leaves for general purposes, as these stiffer plate pages catch the fingers. The listing or tabulation of *cognate terms*, such as African tribes, battles, flowers, grasses, etc., is a good feature, though Webster tends to do this more and more, as in common with the Standard it does for elements, measures, weights, etc.

A minor feature of the Standard, but well worth imitating, is the giving the *antidote* to each poison under the poison itself, as well as repeating it under the name of the antidote. Thus, under *carbolic acid* we have the following statement: "It is a caustic poison, largely used as an antiseptic and disinfectant, especially in surgery, and its antidotes are epsom salts, alcohol, and heat." Likewise it gives the name of the *female* of an animal under the name of the male, in addition to its regular vocabulary entry: e.g., it says under *hart*, "the female is called the *roe*." (Let all the dictionaries do the same!) The placing of the key at the top of the page is another feature that usage may prove to be the proper one to follow.

The inclusion of addenda matter in the regular vocabulary may prove a doubtful expedient, as it is so unnatural. Why not,

for instance, have the list of "more important writers" in the appendix instead of under *Author*, and cross-reference it under *Author*?

Perhaps the best known feature of the Standard is its placing the *common meaning first*, as it did in its original edition, the etymology last, and its spelling Greek words with English letters. Doubtless the Greek scholar would prefer to see Greek words spelled with Greek letters, but certainly English letters could not prevent his knowing the meaning. The general aim to have the Standard serve the greatest number of people in the shortest time is apparent in many of its aspects, though it can hardly claim to be the scholar's dictionary. Personally I like the historical order, and particularly the etymology first, for which I offer the rather trite argument, apropos of what we say of Latin and Greek: If you do not study these in school you never will; so if you do not cast your eye over the etymology in the beginning, you are likely not to take the trouble to do so at the end.

A startling innovation in Webster is the *divided page*. People are apt to think that in the lower half are to be found only obsolete words, but the publishers' statement is worth noting, as follows: "The division into two sections serves a double purpose: it facilitates convenience of consultation, and it also effects a great saving of space and corresponding increase of matter. The principle of the new arrangement is this: the several vocabularies formerly given separately—Foreign phrases and proverbs, Scripture names, Names of fictitious persons, Abbreviations—have been incorporated with the general vocabulary. Every page now contains all the titles that fall alphabetically between the first and last title words. To the lower section of the page are relegated the foreign phrases, abbreviations, etc.; also words wholly obsolete, obsolete variants, uncommon dialect words, scientific terms of rare occurrence, words defined only by a cross reference, and in general that part of the vocabulary in most infrequent use." In this library we have found the divided page workable, though it took some time during the four

years we have had the New International to become used to this new style of make-up.

It is unsatisfactory to compare the Standard and Webster as to appendices, because, particularly with the former, so much in the new edition has been incorporated into the vocabulary. The "History of the world, told day by day," a new and unique appendix of the Standard, may be useful on rare occasions.

The thin paper editions of dictionaries are likely to be a feature of popular demand. I understand that the publishers do not especially fancy them. I have a thin Webster. It is easy to lift and nerve-racking to use hurriedly or steadily, as one would naturally expect.

(7) SUMMARY

To arrive at a just estimate of the value of various dictionaries, it is necessary to look at them from diverse points of view. The man of business and his stenographer generally need a dictionary for a different purpose from the clergyman, the college professor, or the householder; and in the following summary I have in mind the various ones.

Murray ("Oxford English"): Completed nearly through the letter T, after beginning with A some twenty-five years ago, so that each successive volume is more up-to-date than its predecessors. The largest of the dictionaries, and confined strictly to words of the English language, their derivation and definition, in historical order, based on quotations, for which exact references are given. Addenda and all supplementary statistics rigidly omitted, even to the exclusion of proper names. "British" in pronunciation and spelling, which differ in many instances from established American practice. A splendid source book within its field, and particularly for the scholar. It would, of course, not be satisfactory as the *only* large dictionary of any public library in America. The Concise Oxford, a one dollar publication (1911), and widely sold in the United States, is largely based upon Murray, but includes phrases from all languages.

The *Century* (dictionary and encyclopedia): Twelve volumes (I-X, vocabulary; XI, names; XII, atlas). All the volumes revised for the new edition of 1911, and enlarged over previous edition by an appendix of two volumes of 1909 (also revised to 1911), whose contents have been distributed as addenda to the other volumes, according to the respective letters of the alphabet. Full, to encyclopedic, in definition, with illustrative quotation and synonym; also abounding in pictorial illustrations. Of high reputation for pronunciation and spelling. Very little of an addenda nature, apart from proper names and atlas, though with appendix to volume X of amended spellings. Almost indispensable to any public library of city or town.

The *New Standard*: A revision to 1913 of the *Standard*; in one or two volumes, as desired. Notably full in terms of varied description, and in synonym and discussion of same, but with less of the obsolete. Good as a check list of scientific compounds, hence for the foreigner who may be studying the English language. Gives meaning first, etymology last. Full in illustrative quotation, with exact page and date references, also in pictorial illustration. Special features: cognate terms grouped and several plates showing groups or departments and features of public service. The matter generally included in addenda worked into the vocabulary, including proper names, geography, etc. Still some addenda, including consensus on pronunciation, and notably the new feature of chronological history according to day of the year. Reformed spelling included for most words, after the regular entry in the vo-

cabulary, and incidentally well up-to-date in the inclusion of recent terms. Several minor features, such as hints on correct English, inclusion of antidotes, etc. A popularly arranged and good all-around dictionary, particularly for office and journalistic use.

Webster (New International): Revision to 1909, with minor revisions in succeeding impressions. In one or two volumes, as desired. Vocabulary with double the number of words over the previous edition (1900), but not so full as the *Standard*, whose scientific compounds are a notable feature; fuller, however, in obsolete terms and etymology. Concise and generally ample in definitions. Quotations illustrative of meaning plentiful, but with reference merely to author's name. Good in synonym and discussion of synonym. Fewer illustrations than the *Standard* and fewer plates, but all well chosen. Orthodox in spelling, with recognition of variance, fair in discussion as to grammatical use and good taste. Supplemental material in the nature of gazetteer, history, names, etc., but also considerable of former supplement worked into the vocabulary, more especially into the lower half of the divided page—a new departure. Dictionary of long standing and reputation for all-round usefulness. More for the scholar than the *Standard*.

Prices of the dictionaries range from \$12 for trade editions of the *Standard* and *Webster* to \$130 or more for *Murray*.

Mention of other dictionaries, large and small, will need to be postponed for a possible further article, which may also supplement the preceding one on encyclopedias.

SALARIES OF LIBRARY SCHOOL GRADUATES

BY JOSEPHINE ADAMS RATHBONE, *Vice-Director, Pratt Institute School of Library Science*

It has been thought that the results of a questionnaire recently sent out by the Pratt Institute Library School to its graduates may not be without interest for the profession at large. There are nowhere in print, so far as I am aware, recent statistics giving details as to the conditions of employment, salaries, hours of work, vacations, etc., for so large a number of trained librarians as are here presented.

Whether these results can be taken as representative for the graduates of other library schools, I cannot say. Judging from our experience, the classes whose members have been out in the field from ten to twenty years show the highest salary averages, so that library schools established since 1900 would probably not average as well as Pratt Institute, while an older school would doubtless show higher averages for its earlier classes at least.

Questionnaires were sent out to 284 graduates now in the field, 267 of whom responded. Of these 262 are in active work; 160 of them are employed in public libraries, 39 in college and school libraries, 30 are in special libraries, 18 are in federal or state libraries (including library commissions).

The 262 represent 23 classes and earn (excluding three who are doing private cataloging or other piece work) a total salary fund of \$282,340, or an average salary of \$1081. Salary statistics were first collected by the school in 1896 when there were six classes in the field, at which time the average salary was \$607. An average for the last six classes (1908-1913), which is a fair basis of comparison, is \$901, ranging from \$773 for the graduates of 1913 to \$1138 for the class of 1908. That would indicate that the average salary paid trained workers during their first six years of service has risen from \$607 in 1896 to \$901 in 1914, or nearly 50 per cent. The average salary paid our graduates in

1910, when the last statistics were gathered, was \$939 as against \$1081 in 1913, showing a gain of \$142 in three years. There were 131 salaries over \$1000 reported in 1913 when there were only 84 in 1910.

A classification by kinds of position shows 76 librarians with an average salary of \$1176. This number includes 42 librarians of public libraries with an average salary of \$1189, the range being from two at \$600 to one at \$3600; eight high school librarians with a range of \$720 to \$1400, the average being \$1181; seven normal school librarians with an average of \$1209, and twelve librarians of special libraries with an average of \$1295. Ten librarians of private schools and small colleges whose salaries only average \$1000 help bring down the average for librarians, but in many of these cases, easy hours and long vacations compensate for a smaller wage.

Heads of departments, 43 in all, receive an average salary of \$1208, libraries large enough for a classified service paying more to department heads than many small libraries can give their librarians. Analyzing these figures we find 12 head catalogers with an average salary of \$1223, 10 heads of circulation departments with an average of \$1324, 8 reference librarians averaging \$1088, 7 heads of special reference departments averaging \$1257. Of other department heads, supervisors of children's work, heads of order departments, of departments of extension and instruction, there are too few to make the average significant.

There are 23 branch librarians among our graduates receiving an average of \$1023, with a range of from \$720 to \$1500, and six first assistants in branches who receive an average salary of \$870.

In children's work there are 14 children's librarians who average \$949; counting in with these three supervisors of children's departments raises the average to \$1271.

Nine assistants in children's rooms average \$654.

Besides the 8 head catalogers there are 34 catalogers, whose work is not administrative in nature, who receive an average salary of \$948 with a range of from \$600 to \$1500.

Nine assistants in circulation departments receive an average of \$751 with a range of from \$650 to \$1020. Five reference assistants receive an average of \$756; 10 assistants in special libraries receive \$1036 on the average, and 11 miscellaneous assistants whose duties refuse to be classified receive an average of \$753.

Grouping by the size of the employing library gives results that are interesting, though in many cases the groups are too small to be conclusive and are hence not included here. Forty libraries under 10,000 volumes pay an average salary to the librarian of \$963. But this group includes most of the high school and normal school libraries where conditions and standards differ from those of the average public library. Excluding these we find an average salary of \$903. Twenty-eight libraries of 10,000 to 50,000 volumes pay an average salary of \$1172 to their librarians. Excluding one New England library of over 20,000 that pays its librarian only \$600 would bring the average up to \$1192. Six libraries of from 50,000 to 150,000 volumes give an average of \$2400 to their librarians.

Six branch librarians in library systems of from 100,000 to 200,000 volumes get an average of \$820; in libraries of 200,000 to 500,000 volumes, five branch librarians get \$1005, while in systems of over 500,000 volumes, twelve branch librarians average \$1095.

There is less difference in the salaries of catalogers in libraries of different size. Five head catalogers in libraries of from 50,000 to 100,000 volumes get an average of \$1280; in libraries of 100,000 to 200,000 the same number receive an average of \$1295; assistant catalogers in the first instance receive \$856 while in the second \$974.

A grouping of executive positions by the number of persons over whom supervision

is exercised showed significant results. Those having but one person under their direction, of whom there were 21, get an average of \$892. Twenty-seven persons responsible for two assistants' work average \$990; 19 who are responsible for the three persons receive \$1037 on the average; a fourth subordinate raises the salary of 13 executives to \$1042. Twelve having headship over five assistants receive \$1260. Twenty having from 6 to 10 under them are paid at an average rate of \$1266; eight receiving an average of \$1454 exercise authority over from 10 to 20 persons; five chiefs over 20 to 30 subordinates average \$1560, and five having from 30 to 100 under their charge average \$2135. Beyond that the number is too small for grouping, but the salaries increase rapidly.

It would be interesting to see how far the circulation of a library entered into the problem, but unfortunately, not anticipating its desirability, the questionnaire did not include a request for circulation statistics, and to discover the latest figures for all the libraries involved would take more time than is feasible, and a further analysis showing the average salary for executive positions, in which the size of the library, amount of responsibility, and type of position are combined, is also impossible for the same reason.

A word before closing as to hours and vacations. Forty-two hours a week is still the schedule in 66 cases, but 114 persons work less than 42 hours a week, while only 36 report more than 42 hours a week, 38 work 40 hours a week and the average for all is 40½ hours; 23 reported that no specified time was required of them.

A month's vacation is preponderatingly the amount allowed in public libraries; it is almost universal except for heads of departments, some of whom report two months. Only 41 report less than a month, and these are mainly in business and special libraries, while 43 report more than four weeks, these being in educational libraries, for the most part. So many of these have 8 to 10 weeks, however, that they bring up the average vacation to six weeks.

Summing up we find that while in

1899, when a similar questionnaire was sent out, the average graduate of the school worked $42\frac{1}{2}$ hours a week with 4 weeks and 5 days vacation for \$686 a year, in 1913 the same average person works $40\frac{1}{2}$ hours a week, has 6 weeks vacation and receives \$1081 a year. May not these figures be taken as indicative of a general upward tendency in the profession at large toward better conditions of work and more adequate pay?

FOR THE LIBRARIAN'S STUDY

"The librarian who does not read, is lost."

A COUPLE of years ago Mr. Henry Adams, the historian of the period of Jefferson and Madison, printed for private distribution a volume to which he gave the somewhat indifferent title "A letter to American teachers of history." Under this title the author offers an interesting discussion of two tendencies of modern thought and the influence they have, or should have, on historical teaching. The two tendencies are expressed in the terms of the theory of evolution (or conservation of energy) and the theory of dissipation of energy. How can the latter be reconciled with the former? Can it at all? If the latter theory is more than a hypothesis, what of human progress?

The author quotes, in the first of the two chapters of the book, called "The problem," one after the other of the physicists, biologists and anthropologists of the last few decades, showing that they, one and all, have accepted, for their own sciences, the theory of the dissipation of energy. In the second chapter, "The solutions," he discusses the various solutions that have been offered, and offers, if not very distinctly, what one might suppose to be his own, namely, that while the physical universe, including man as a biological phenomenon, is subject to the law of dissipation, humanity need not be: "If the physicist cannot make mind the master, as the metaphysician would like, he can at least abstain from making it the slave." In the following paragraph we have the essence of the book, if I understand the author rightly: "Since

the year 1830, when the great development of physical energies began, all school-teaching has learned to take for granted that man's progress in mental energy is measured by his capture of physical forces, amounting to some fifty million steam horse-power from coal, and at least as much more from chemical and elementary sources; besides indefinite potentials in his stored experience, and progressive rise in the intensities of the forces he keeps in constant use. He cares little what becomes of all this new power; he is satisfied to know that he habitually develops heat at 3000° centigrade and electricity by the hundred thousand volts, from sources of indefinitely degraded energy; and that his mind has learned to control them. Man's reason once credited with this addition of volume and intensity, its victory seems assured. The teacher of history need then trouble himself no further with doubts of evolution; but the teacher of physics seems—at least to an ignorant world whose destiny hangs on the balance—very much required to defend himself." No matter what the author's solution might be, the book is stimulating in raising a real problem.

It would be an interesting bibliographical study for one of the maturer students in some library school or for a younger working member of the profession, to prepare an annotated bibliography of the books referred to or quoted in Mr. Adams' book, extending it, perhaps, beyond the date of the latter to the present year.

The two theories discussed by Mr. Henry Adams have found authoritative propounders in two works recently published by the University of Chicago Press: Professor Jacques Loeb's volume of popular biological essays entitled "The mechanistic conception of life," and a volume of lectures on "Heredity and eugenics," by several authors. The keynote of Professor Loeb's book is given in the first essay, which has given its name to the whole volume. Its object is "to discuss the question whether our present knowledge gives us any hope that ultimately life, *i.e.*, the sum of all life phenomena, can be unequivocally explained in physico-chemical terms." And

the author draws the conclusion that "if on the basis of a serious study this question can be answered in the affirmative our social and ethical life will have to be put on a scientific basis and our rules of conduct must be brought into harmony with the results of scientific biology." "Not only is the mechanistic conception of life compatible with ethics; it seems the only conception of life which can lead to an understanding of the source of ethics." These are the final words in this first essay. The others deal with such subjects as "The significance of tropism for psychology," "On the nature of the process of fertilization," "On the nature of formative stimulation (artificial parthenogenesis)," "Experimental study of the influence of environment on animals."

The lectures on "Heredity and eugenics" were held at the University of Chicago during the summer of 1911, under the auspices of the biological departments of the University, by Professors J. M. Coulter and W. L. Tower, of Chicago; W. E. Castle and E. M. East, of Harvard, and Dr. C. B. Davenport, of the Station for Experimental Evolution, Carnegie Institution of Washington. Professor Coulter opens the series with a general introduction on "Recent developments in heredity and evolution," subjects which, he says, "have to do, not only with the most fundamental conceptions of biology, but they have come to be of immense practical importance in animal and plant breeding. From every aspect, therefore," the author continues, "they appeal to all persons intelligent enough to be interested in the progress of knowledge and in human welfare." The purpose of the series is, then, to present these facts in a popular form, but authoritatively, so as, if possible, to counteract the misleading suggestions contained in many ephemeral publications. This first lecture presents the historical background necessary for an understanding of the problems discussed in the rest of the series: on "Heredity and sex," on "The application of biological principles to plant breeding," on the "Modification of the germinal constitution of organisms by experimental processes," on

"The inheritance of physical and mental traits of man and their application to eugenics"—and here we come to the final purpose of the book, to show what conclusions may be drawn from known biological facts and from biological theories pertaining to the future conscious development of the human race.

In this connection I wish to call attention to an article in the last volume (1912) of *Annalen der Naturphilosophie* (Leipzig: Akademische Verlagsgesellschaft): "Ueber die Gefährdung unserer nationalen Tüchtigkeit im modernen Staat," by A. Nordenholz. The author shows how, in modern society, we find a "counter-selection," as he calls it, an undercurrent of forces that work for the survival of the *unfittest*. The capitalistic organization of society with its grip on the industrial world causes a degeneration of the working masses, physical, intellectual and moral. The *milieu* in which the individual lives becomes unfavorably differentiated and acts as a degenerative force. It is from this great mass of individuals whom the circumstances have made unfit that the race is mainly recruited. The most intelligent, the physically and morally strongest element which rises above the *milieu* into which it was born becomes comparatively unproductive. Another element in the counter-selection is to be found in modern charity, which makes it so much easier for the degenerates not only to subsist, but to propagate. To counteract this phase of the counter-selection the author suggests a "conscious adaptation of our personal activity and our social institutions to the demand for a raising of the standard of our race," or, as he also expresses it, a "harshness of pity."

In the same volume of this journal is an article on "Das Aufsteigen geistiger Begabter in England," by a man whose name is quite well known in the library world, Dr. Ernst Schultze, of Hamburg, the founder of the *Volksbücherei* in that city. "The causes of the growth of talent and genius, the conditions under which they develop, how they rise to importance and fame—of all this we know next to nothing. Science has just begun to turn to the investigation of these im-

mensely difficult problems." The author does not intend to solve the problem, but to show how in England gifted men from the "lower" strata of society have risen to positions of eminence, and the means that in each case have accomplished such results. Another article of particular interest to librarians is called "Gedanken über praktische Litteraturwissenschaft." The author, Reinhard Buchwald, had been asked to give a series of popular lectures on literary history, and in preparing for these he decided to set forth nothing that he had not himself used as preparation for his own reading or to clear up already existing independent judgments. The article, then, is a study of what makes for literary value, and a discussion of the place of literary history in the republic of sciences; the author places it among the historical disciplines, besides church history, as a part of "kulturgeschichte."

This journal is specially called to the attention of librarians. It is one of those very general periodicals to which one might turn for a discussion of almost anything under the sun. And a browsing through its eleven volumes is particularly stimulating, because every article is written from a definite philosophical standpoint, that of energetics, or the theory of combined conservation and dissipation of energy, whose foremost modern exponent, Wilhelm Ostwald, is its editor.

AKSEL G. S. JOSEPHSON.

SUGGESTIONS FOR GREATER LIBRARY PUBLICITY

GREATER publicity for libraries and their work was a topic which received considerable attention at the meeting of the Council in Chicago. At the first session Mr. Willis H. Kerr read a report on "Possible newspaper publicity for the American Library Association, its conferences, and work in general," which provoked discussion and which is here reprinted in full:

A report has been asked on greater publicity for the American Library Association, its conferences and work in general.

It is assumed that we all grant there is

room for more of the right sort of publicity for the Association and library work in general. The sort of publicity here in mind is this: Not that we shall get at the people, but that the people shall get at us.

First, publicity for the A. L. A. conferences. Traveling through England during the early days of last September, I was impressed by the amount of space devoted by all of the best British newspapers to the Bournemouth meeting of L. A. U. K. The London *Times* ran nearly a column each day and commented editorially. One could not help being glad that the indexing of periodicals is vital to the British newspaper public, or that rural libraries and books for the holiday makers make news. And then I discovered that the London *Telegraph*, the Manchester *Daily Mail*, some of the Devonshire papers—in fact, all the best newspapers—carried the same story. The account must have been furnished to all the papers by a discerning L. A. U. K. publicity man. The Salt Lake meeting of the National Education Association was more adequately reported in the daily press, nation-wide, than any preceding meeting—better even than the rows and battles of Boston and Chicago—with this difference, that education and not politics was heralded from the Salt Lake meeting. The Associated Press representative at Salt Lake got his "stuff" from the N. E. A. publicity man. It was telegraphed daily and appeared in 870 dailies in all parts of the country. Material for special stories in Chicago and New York papers was furnished by the N. E. A. publicity man. Several days before his election to the N. E. A. presidency, the photograph and a biographical sketch of Dr. Joseph Swain were on file with several hundred newspapers, with release conditioned on telegraphic advice; the publicity man had made a shrewd guess. On the last day of the N. E. A. sessions the publicity man released to the local papers and to the Associated Press interviews with 160 "leading educators," many interviews accompanied by photographs. To interview 160 men in five busy days is a feat at which even the newspaper men wondered. Direct dispatches were sent to newspapers in local-

ities honored in the election of officers and committees. A summary of the week was furnished to the educational press and the patent-inside publishers of the country. Each day each of the four Salt Lake papers ran from eleven to thirty columns of N. E. A. material. Moreover, this N. E. A. publicity man advertised the Salt Lake meeting in advance and helped to bring in a very large attendance from adjacent states and cities. Articles about the great interests to be represented at Salt Lake and photographs of speakers were used by many papers and syndicates.

Mr. J. W. Searson, professor of English at Kansas State Agricultural College, at Manhattan, was the publicity man. I here record my gratitude to Mr. Searson for his willingness to let me inquire into his methods and results, and for his personal interest and intelligent conception of the library cause.

How did Mr. Searson accomplish these results? First, by having the news sense, Second, he had the substantial backing of the Salt Lake Commercial Club. The club was anxious that the Salt Lake meeting should be a success and that Salt Lake's name should be heralded far and wide. The club carefully obeyed Mr. Searson's instructions for advance preparation, reserved and paid for his room and publicity headquarters and his meals at the headquarters hotel, furnished three stenographers—"and if you want anything else, name it." The N. E. A. paid travel expenses, postage and telegrams, the cost being about \$240.

Advance press abstracts of all papers presented were furnished to Mr. Searson. Stories for each general session and section meeting were prepared in advance. Lists of officers and tables of statistics were ready for use. The stenographers made copies of all this material and of dictated personal notes and convention news. Mr. Searson was always on hand at headquarters and always had what the newspaper boys wanted. He was one of them, working on the inside.

I have a strong conviction that these methods may be adapted to obtain publicity for the A. L. A. conferences. An item

for practical consideration is that the A. L. A. custom of meeting in out-of-the-way places, once characterized by one of the literary journals as the "annual going into retreat," is not conducive to publicity. We lose all the advantages of local pride and influence. Another item to be remembered is that apparently library operations and interests are not regarded as vital news. I believe this is more apparent than real, however; we must make our news, as others do. At the Missouri-Kansas meeting, at St. Joseph recently, this plan was tried, without any help of previous organization, sufficiently to prove this; that the newspapers welcome the help and will use material furnished. At St. Joseph the addresses for which abstracts were not furnished were written up from program and the substance guessed at.

Thus far, publicity for the A. L. A. conferences. Now publicity for the work in general. I quote from a friend of the library cause:

"Some day I should like the A. L. A. to awaken to its larger opportunity. It should have a section in connection with every national organization, from the Congress of Governors to the national labor organizations. . . . Correlating English (teaching) and library work is but one specific phase of larger correlation with all forms of reading, investigation and organization. The librarian and the library are absolutely indispensable to any progressive worker, whether in iron, wood, finance, art, or literature."

Possibly one fair interpretation of Miss Hasse's recent address upon "Socialized bibliography" is that she pleads for a highly efficient publicity that lets the people get at the library. The discussions by the League of Library Commissions, this week, regarding duplication and coöperation in extension work by state universities and state library commissions, and threatened amalgamation of state departments of education and library commissions—both pointed to the need of persistent widespread and concentrated enlightenment of powers and professors that be. Personally, I feel that just as soon as possible the A. L. A. should employ a permanent pub-

licity officer. The publicity methods and results of individual libraries would not be interfered with, except to advise and reinforce. We are trying a plan of statewide library publicity in Kansas, which might possibly be adapted for country-wide application.

Your committee recommends that a permanent committee on publicity be appointed, whose duty it shall be in coordination with the secretary, to prepare and execute plans for publicity for the annual conferences and for the general work of the Association.

At the second session Miss Mary W. Plummer opened a discussion on "A campaign of library publicity in the general magazines," as follows:

In an attempt to gain the public's ear, to interest and hold the public's attention, and to secure the natural consequence, larger liberality on the part of municipalities toward a department hitherto ignored or treated perfunctorily and on a theoretic basis, libraries must live down two things: 1st, the impression, still influential with the majority of tax-payers, that libraries are chiefly or wholly for recreative purposes; and 2d, that the workings of a library are of a purely technical or administrative character, that there is something esoteric about their administration which only librarians (and trained ones at that) can understand, and that their results are principally statistics, the most uninteresting of reading to people in general.

The first difficulty is gradually being solved, and the solution of it depends largely on the local library, since it can best convince the local people of the value and extent of its resources and show the uses they can be put to. Where this is done by a live librarian who knows his or her business, the community is learning very gradually to respond with more substantial appropriations and a higher library tax-rate; but there are parts of the country still where the community, including often the library board, fail to recognize financially the generosity, self-sacrifice, and professional skill of some local librarian who is prevented by circumstances from seeking a better fortune in some other and

more liberal or enlightened place. Advantage is taken of this very inability, in fact. "Let her spend extra hours on a new catalog, or in getting up a Christmas exhibit, *if she wants to*; no one is making her do it. It is just what she likes to do." But if recognition of this public spirit in the form of addition to salary were suggested, you would find even some members of library boards saying: "Why, she has never asked for an increase. And she'd rather live at home, or else she'd go somewhere else and get more. It would cost her more to live away from here, probably. Anyhow, the town can't afford it, with sidewalks and waterworks and electric lighting, etc., to pay for. The *important* things must come first." Notice that word "important." In the minds of at least half the voters of a community, material improvements take precedence of what goes into the minds and spirits of the people to make better people, and hence better citizens, and every one knows that when a reform administration comes in, on the cry of economy, the first things to be cut down in cost are the public schools and the public library.

This materialistic attitude must be changed before the library can come into its own. Looked at closely, it is not so far removed from the attitude of the mob in the Reign of Terror, which destroyed museums, libraries, monuments and works of art. Our communities are perhaps a little worse, for while they do not actually destroy, they hamper and starve their most potent agencies for good *in favor of* institutions and works that spell only material progress and often feed the greed of private interests, and they do it in cold blood and not in the rage of reprisals.

How are we to convince people generally that libraries count for something in progress, that they are worth liberal support, that the good results of their work, while more or less intangible, are as undeniable as the results of building a system of sewerage, and cleaning the town streets and alleys, and extending the street car lines?

The second thing to be lived down is the odor of professionalism. We all know the innocent personal friend who admires

without understanding our work, and looks at us with puzzled and marveling eyes when we speak of cataloging and classification, of charging systems and reserves and renewals and lists, but who hasn't any desire to know more or to really understand and would much rather talk or hear something else. The case is much what our own case would be if our city accountant insisted on explaining to us the details of his system, or the school superintendent should expect us to grow enthusiastic over the system of markings adopted in the schools. Even when we are doing things in themselves interesting, the expression of them in figures is death to the interest of the outsider. One incident is worth a whole table of statistics. Can we not decide on what are the attractive, the picturesque, the dramatic, the convincing, the inspiring features of our work, and set these before the public that reads the magazines and the newspapers—particularly the magazines, since these have more than a local constituency.

Why should we not be able to gain admission to some of the general periodicals? Have they not been giving room of late to the confessions of ministers, editors, authors of best sellers, and even of brakemen? Why not the confessions of librarians of all types? And what could be more picturesque than the career of some of our traveling libraries? What more dramatic than the work of city branches among foreigners? What more inspiring and illuminating than the work being done with children, with state institutions, with rural communities? Is there not some mind-reader among us who can show convincingly the power and influence of a given book, the psychology of a given reader? Is not the censorship of books and magazines a new subject, worthy of a disquisition? While—among ourselves you will let me mention names—we have Miss Hewins and Mr. Bostwick, Miss Helen Haines, Miss Maud Campbell, and numerous other ready pens, and while such magazines as the *North American Review*, the *Atlantic Monthly*, the *Outlook* and *Independent*, *World's Work*, etc., are looking for subjects which have novelty, can we

say that we are not ready and that there is no field?

Mary Antin's recognition—about the first evidence of grateful appreciation in print that libraries have had—makes one wonder if there are not others among the crowds educating themselves at our shelves who might be willing and able to tell the part that free libraries have played in their lives. Such publicity might bring not only increase of dignity and of appropriations—it might arouse some of the other agencies working along their separate lines to seek closer and more constant coöperation. It might represent the work in a way to draw to it the very people we want from all parts of the country, who are drifting into better known professions because we are making no effort to reach them by setting forth the parts of our work that make a more general appeal than the strictly professional.

Have we not ourselves reached the point where we must relegate the technical and the administrative to their places and cease to be absorbed by them to the exclusion of that which is really the mark of our high calling—the knowledge of the book's contents and the application of these contents to the condition of the individual? Must we not provide not only the cataloger and the reference assistant, the desk worker and the clerk, but also the psychologist, the teacher, the comrade in literature? When we begin to see our calling in its essentials, to care more for the end than for the means to that end, public recognition will come and all things else shall be added.

AN EARLY TRAVELING LIBRARY SYSTEM.

Nov. 10, 1835.—We went aboard (the whale-ship) and spent an hour or two. They gave us pieces of whalebone, and the teeth and other parts of curious sea animals, and we exchanged books with them—a practice very common among ships in foreign ports, by which you get rid of the books you have read and re-read, and a supply of new ones in their stead, and Jack is not very nice as to their comparative value.—DANA, Two years before the mast.

SALARIES, HOURS, AND VACATIONS IN INDIANA LIBRARIES

A COMMITTEE of three, of which Henry B. Hiller was chairman, recently made an investigation regarding library salaries, hours, and vacations in Indiana, on behalf of the Indiana Library Trustees' Association. The result of that investigation is embodied in the following report, which was presented to the association at its November meeting:

In order that we might intelligently report on the subject, says the committee, we sent to each library board in the state, a letter asking for a report on the blank enclosed therein, on the salaries paid to, hours of services rendered by, and vacations granted to their librarians. We received 92 replies from the 145 libraries and our report is based upon those replies.

In regard to the salaries paid librarians we find that there is no regulation governing the same, but on the other hand there seems to be a very elastic schedule in use over the state, as shown by the following statement:

Fifteen libraries with incomes from \$168 to \$900 pay less than \$20 per month.

Seven libraries with incomes from \$187 to \$779 pay \$240 per year or \$20 per month.

Four libraries with incomes from \$300 to \$1597 pay \$300 per year or \$25 per month.

Six libraries with incomes from \$773 to \$1515 pay \$360 per year or \$30 per month.

Two libraries with incomes from \$1180 to \$1506 pay \$400 per year or \$33 per month.

Four libraries with incomes from \$420 to \$1498 pay \$420 per year or \$35 per month.

Fourteen libraries with incomes from \$568 to \$6200 pay \$480 per year or \$40 per month.

Four libraries with incomes from \$1756 to \$2427 pay \$540 per year or \$45 per month.

Fifteen libraries with incomes from \$1200 to \$3275 pay \$600 per year or \$50 per month.

One library with income of \$2355 pays \$660 per year or \$55 per month.

Four libraries with incomes from \$2769 to \$6893 pay \$720 per year or \$60 per month.

Two libraries with incomes from \$1526 to \$3592 pay \$780 per year or \$65 per month.

Three libraries with incomes from \$3529 to \$5054 pay \$840 per year or \$70 per month.

Four libraries with incomes from \$4905 to \$7607 pay \$900 per year or \$75 per month.

One library with income of \$10,029 pays \$960 per year or \$80 per month.

One library with income of \$7304 pays \$1000 per year or \$83 per month.

One library with income of \$7886 pays \$1080 per year or \$90 per month.

One library with income of ——— pays \$1200 per year or \$100 per month.

Two libraries with incomes of \$28,662 pay \$1500 per year or \$125 per month.

One library with income of \$14,464 pays \$2160 per year or \$180 per month.

In connection with our investigation we attempted to ascertain the salaries paid to assistant librarians, and we found the following conditions to exist: 37 libraries employ no assistant librarian; 38 employ one assistant; 11 employ two assistants; 2 employ three assistants; and four employ four or more assistants. We also found that the schedule of salaries paid the assistant librarian was even more elastic than that of the librarians. In the 38 libraries where but one assistant was employed we found that 12 libraries paid the assistant \$5 or less per month; two pay \$7.50 per month; 5 pay \$10; 1 pays \$12.50; 2 pay \$15; 6 pay \$20; 2 pay \$25; 3 pay \$30; 2 pay \$40; 2 pay \$45; and one pays \$50.

The eleven libraries that employ two assistant librarians pay as follows: \$50 and \$30; \$40 and \$30; \$35 and \$35; \$50 and \$50; \$40 and \$15; \$40 and \$40; \$60 and \$60; \$40 and \$30; \$40 and \$25; \$40 and \$30, and \$20 and \$20.

The two libraries employing three assistants pay as follows: \$60, \$55, \$50, and \$55, \$50 and \$35.

The four libraries employing four or more assistants pay as follows: one pays \$65, \$65, \$60, \$50; one pays \$80, \$65, \$60, \$55; one pays \$102.50, \$72.50, \$62.50, \$42.50, \$40, \$40, \$36. And one pays their first assistant \$65 and the remaining five assistants

are paid as follows: each assistant starts at \$45 per month; the second year he receives \$50, and each year thereafter his salary is increased \$2.50 per month until the maximum of \$60 is reached.

It is rather difficult for your committee to recommend what salaries you should pay your librarian and assistants, for the local conditions of each library will, in a great measure, control the situation, but we feel that inasmuch as the success of the library to a very great extent depends upon the librarian, and her work being that of a profession, we feel that she should be paid accordingly. And after having made this investigation, and after having consulted with Mr. Milam, of the Public Library Commission, we believe that the majority of the libraries of our state can and should pay from 40 per cent. to 50 per cent. of their total income for the salaries of their librarian and assistants. As the librarian or assistant continues to hold her position, and as the income increases, so should the salaries be increased, and we would suggest that the salaries be increased at the rate of \$2.50 per month each year until the maximum of 40 per cent. or 50 per cent. of the income is used in paying salaries of librarian and assistants.

The number of hours per week that the librarians of the state serve vary from 20 hours to 70 hours. Twenty hours per week is not sufficient time for a librarian to render satisfactory service either to the public or to her work. And, on the other hand, 70 hours per week is more than she should be required to serve. We feel that when a librarian works at her work carefully, honestly and faithfully for from six, eight or nine hours per day for six days in the week, her library board should be contented and the public satisfied.

The hour of the day when the librarian commences her work and closes her work is also unsettled. Some librarians over the state open their library as early as 7:30 and 8:00 o'clock a.m., others at 9, 10, 11, 11:30 a.m., 12 m., 12:30 and 1, and some as late as 2 p.m., and they close at any time from 5 to 9:30 p.m. The hours at which the library is opened and closed is purely a local question and should be so arranged

as to suit the convenience of the greatest number of patrons.

However, there is one point on this subject that we would like to call your attention to, and that is from the reports of the 92 libraries which we received, there are 49 libraries in the state that do not open their library until 12 o'clock noon, or after, and many of these are closed during the supper hour. The library should not be looked upon merely as a place where those patrons who have plenty of time may get the latest fiction, but it should be so conducted as to be an institution of great educational force in the community—hence, it should be opened at such hours that those inclined to do so may use the library without too great an inconvenience. If it is closed during the noon and supper hour, there will be a large number of business men and women, clerks and working men and women who will be deprived of the use of the library. We believe that the largest amount of real benefit that is accomplished by and through the library is not the service it renders to the highly educated person, but it is the service that it can and does render to those who have been deprived of an academic or collegiate education, and who desire to develop into better, higher and nobler citizens. For this reason, we believe that the library should be opened at the hours they are going to and returning from their dinner and supper, in order that they may patronize the library without loss of time or too great inconvenience. We believe that a large number of the libraries that are now closed during these hours may be kept open without additional expense by simply rearranging the hours of service of the librarian and her assistant.

In regard to the vacations granted librarians over the state, we found that in 33 libraries no vacations are granted the librarian. One library grants a vacation of 3 days; 2 grant 10 days, 34 grant 14 days, 5 grant 21 days, 9 grant 28 days, 1 allows a vacation with pay, but the librarian must furnish a substitute; 1 grants 14 days and another one 30 days without pay, and 3 have no definite arrangements. Nearly all of the commercial institutions of the state

grant a vacation, with pay, to their employes. We believe that the librarians of the state are entitled to the same consideration, and we would suggest that the librarians be granted a vacation of at least 14 days per year with full pay.

A PROTEST—"SUBORDINATES" VS. "ASSISTANTS"

QUITE recently the term "subordinates" was used by a prominent librarian in the middle West, in referring to his assistants. About the same time the term was used in a similar manner in an article in *Public Libraries*, expressing opinions on the subject of transferring assistants from one position to another.

In the latter case, the "subordinates" were acknowledged as our professional colleagues upon whose zeal, enthusiasm and professional spirit the success of our libraries depends. If that is so, why not eliminate that hateful term "subordinates" and substitute that of "assistants"?

In the former instance, the librarian is killing the zeal, enthusiasm and professional spirit among his "employes," especially among the trained workers, by the constant use of the term "subordinate."

Imagine yourself a young woman of average refinement, a college graduate who has had library school training, and three or four years of general experience as an assistant in some library. Your ideals are high, and you wish to realize them. In order to do so, it is necessary to obtain experience in some particular branch, which it is impossible for you to receive where you are. An opportunity in that line is offered unexpectedly at a slightly better salary than you are receiving; brilliant promises are made as to your future "raises" if you will accept the position. You take it and—find yourself "hired"! The term "hired" gives the first mental jolt! You are placed under a young tactless girl who has a high school education, and no library training outside of the three years' experience in that special department of that particular library, and who is receiving 40 per cent. more salary than you,

the trained worker. She is called "your adviser." Your enthusiasm rises; if she can do so well, having spent no time or money in special preparation, evidently your chances are unlimited! Wait. The promised "raises" do not appear, because you are receiving the highest salary paid to "subordinates," and there are no signs of a vacancy "higher up."

An assistant, regardless of her enthusiasm, zeal and professional spirit, if constantly referred to, and treated as a subordinate, naturally comes to the conclusion that she is a "flat failure." What incentive is there for her to put forth her best efforts in the work? Instead of the social, educational and business opportunities supposed to be open to a trained worker, the "subordinate" is made to feel that she is on a level with the lowest scrub-woman; with all her college education, she knows nothing; even the janitor, with no education, is receiving more salary than she.

Fortunately the conditions stated above, although too common in democratic America, are becoming more rare.

Eliminate the term "subordinate"; substitute that of "assistant"; treat your co-workers as equals, rather than inferiors, and the psychological effect will be apparent in an improvement in the quality and quantity of their work, as well as in their loyalty to the library; they will be able to retain, or regain, their self respect, without which success in library work, as in everything else except crime, is impossible.

MABEL SOUTH-CLIFFE.

CENTENARY OF THE IMPERIAL PUBLIC LIBRARY OF ST. PETERSBURG

LITERARY circles in Russia celebrated in January the 100th anniversary of the foundation of the Royal Library in St. Petersburg. The event was made the occasion for special exercises in the different literary clubs throughout the city. To celebrate the centenary the imperial government has appropriated a large sum of money for a publication which shall contain a description and history of the library.

1987

THE HANDLEY LIBRARY, WINCHESTER, VIRGINIA

Apropos of this anniversary there were published in *Niva*, a Russian weekly, two articles by P. V. Bykov, giving an interesting account of the history and growth of this institution, from which the following abstract has been made:

On Jan. 2, 1814 [old style=14 new style], the Imperial Public Library was opened to the public. The origin of this library goes back to the second decade of the eighteenth century, when the Zaluski Library was founded in Warsaw by the two brothers Zaluski. In 1794 Warsaw was taken by the Russians, the library confiscated, and in the next year it was shipped away to St. Petersburg and located in a house near the Anichkov palace. [The Zaluski Library had 300,000 volumes and several thousand manuscripts, of which only 250,000 reached St. Petersburg. Among these books only five volumes were in the Russian language.] In 1795 Catherine II. ordered plans for the library, which should include halls for all branches of knowledge and an observatory located on the top of the building. Her death came unexpectedly, so that her wishes were not fulfilled. In 1801, however, a new building was erected.

The plan of the librarian in charge of the collection was to distribute the books among different institutions, but happily this was prevented, and when Count A. S. Stroganov became head librarian the library began steadily to grow. The first librarians were noted men like Sopikov, Krylov, Gnyedich, Delvig, Zagoskin. In 1812, fearing invasion by Napoleon, the government sent the more valuable books to the village Ustlanka, government of Olonetz, and it was two years later, on Jan. 2, that the library was opened for the first time to the public three times a week. From that time the library grew rapidly. In 1829 a Persian collection was added, and in 1831-34 the magnificent collection of the Jesuits of Polotzk, and also books and manuscripts of the libraries of Rzewuski and Czartoryski, confiscated after the Polish insurrection. Under the skilful management of Baron Korf the "Rossica" was founded. "Rossica" consisted of books on Russia in foreign languages—now known

as "The hall of Baron Korf." Korf made several trips to foreign countries to consult men of science and antiquaries, and so acquired rare books, documents, church Slavonic manuscripts, and portraits. From 1850 the library began to issue bulletins and guidebooks. In 1849, which was the first year of Korf's administration, 900 readers used the reading room; nine years later the number of readers was over 4000. In 1860 a new reading room was built, but later this was found inadequate, and in 1898 the third reading room was opened. In the years 1902-1912, inclusive, five million books were issued from the library.

THE HANDLEY LIBRARY, WINCHESTER, VA.

THE new Handley Library of Winchester, Va. (dedicated Aug. 21, 1913), a picture of which appears elsewhere in this issue of the LIBRARY JOURNAL, was built and endowed from a fund left to the city of Winchester by Judge John Handley, of Scranton, Pa.

Judge Handley came to this country from Ireland at the age of nineteen, and during the forty-one years of his residence in the United States he was at no time a resident of Winchester, or—so far as known—of the Commonwealth of Virginia. Just why he chose Winchester to be the recipient of his bounty is not known. He often expressed admiration for the habits, the customs, and the manners of Virginia people; one of his closest friends lived a few miles from Winchester; he was a great admirer of Stonewall Jackson, who was identified with the Scotch-Irish people of Winchester and vicinity; from each or all of these reasons may have sprung his interest in the town.

During his life he was interested in several projects for the improvement of Winchester, and at his death in 1895 it was found that in his will two bequests were made to the city. By the first the sum of \$250,000 was to be held in trust until it should amount, with interest, to \$500,000, at which time it should be used for the construction and endowment of a free pub-

lic library. The second bequest provided for the erection of school houses for the poor.

The provisions of the will decreed that the bequests should be paid in instalments. As the funds in their hands enabled them to do so, the trustees bought the ground on which the library building is located, entered upon the erection of the building, and, at a quite recent date, have been able to complete its equipment with furniture and, to some extent, with books and periodicals. The building, including site and furniture, cost about \$145,000, and the remainder of the bequest will be held as an endowment fund to maintain the library.

THIRTEENTH ANNUAL MEETING OF THE ASSOCIATION OF SWISS LIBRARIANS*

THE practice of holding a joint convention of German and Swiss librarians as in May, 1912, at Munich, was not repeated in 1913. The German librarians held their meeting in Mayence and the Swiss in Lenzburg, Aargau, Switzerland.

At the joint meeting at Munich in 1912 the Prussian union catalog was shown to be practically a *fait accompli*. Now we learn from the convention at Lenzburg that the creation of a Swiss union catalog will have the moral and financial support of the Swiss Government.

On the initiative of the Association of Swiss Librarians, dating back as far as 1910, the Department of the Interior has asked the Association for an estimate of the cost of the undertaking. The Department and the Committee of the Association have agreed that practical data arrived at from the actual working out of section Daa-Daz† and of the entries of an author like

Albr. von Haller who is well represented both in German and French, shall form the basis for the financial estimate. The work on section Daa-Daz will be done at the Municipal Library of Zürich. About 60 libraries are expected to participate; e. g. all public libraries of the Confederation, of the cantons, of the large cities and communities, the larger official (government) libraries and the libraries of several learned societies.

As usual in such cases questionnaires have been sent to them and the number of answers received so far insures the undertaking of the test and gives fair promise of success for the future of the entire catalog.

The project of the Swiss union catalog brings up anew that of Swiss uniform cataloging rules. A draft of rules was submitted on which criticism was invited. The final readings and its adoption were deferred to the next convention. No details of the proposed rules are given in the present report. At the joint convention of Munich 1912, Dr. Escher has gone into a very minute discussion of the possibilities and impossibilities of Swiss uniform cataloging rules in connection with the proposed code of German uniform cataloging rules.* He now somewhat modifies his former views stating that in 1912 he had overestimated the extent of uniformity in the choice of the first word of order in the case of anonymous entries, especially for the western libraries which are more under French influence than he was previously led to believe.

It is to be regretted that owing to the participation of the Swiss libraries in the Swiss national exhibition at Bern, they will not be represented in the international exhibition of the book industry and the graphic arts at Leipsic.

The exhibition of the Swiss libraries at Bern will be more of a collective than of an individual character. General statistics covering the entire library work of the country and the time from Heitz's statis-

* Reported in *Zentralblatt für Bibliothekswesen*, Dec., 1913, p. 556-564.

† At the seventh annual meeting of the Association in 1907, the need of a Swiss union catalog was discussed, and Dr. Hans Barth reported that he had interfiled the titles of letter D of fifteen Swiss libraries into one alphabet for the purpose of getting at a sound basis for the extent of the work and its expense. Barth's collection has been placed at the disposal of the Association, and will form the nucleus into which the titles of the rest of the libraries will be interfiled. For details of Barth's work, see *Siebente Versammlung schweizerischer Bibliothekare*, *Ztbl. f. Bw.*, 1907, p. 323-327.

* *Ztbl. f. Bw.*, 1912, p. 321-332; reviewed in *L. J.*, 1912, p. 559-562.

tics for 1868* to the present; the test fragment Daa-Daz of the Swiss union catalog; collections, plans, furniture; author and subject catalogs; forms and blanks, will constitute the leading features of the exhibit.

Other interesting topics of the convention are the financial report on the new edition of the list of journals of Swiss libraries;† the report on the inventory of incunabula in Swiss libraries, to which so far about 12,800 entries have been promised and more than 11,500 have already been contributed; an address by Dr. C. Roth (Basel) "Ueber die Buecherzensur im aiten Basel," and one by Dr. C. Benziger (Bern) on "Wünsche und Richtlinien für das schweizerische Bibliothekswesen;" and, last but not least, a report on the sale of the Kully Library.

At this sale of the Kully Library a precedent was established for national library policy. A strong feature of the Kully Library was in its Helvetica. In order to prevent their drifting into foreign hands ten of the leading Swiss libraries formed a combine for their purchase. They were bought in bulk, temporarily deposited in the National Library at Bern, and later distributed to members of the combine to the entire satisfaction of all concerned. Will Europe profit from this lesson taught by the Swiss libraries? If it does, we Americans will have no reason to rejoice in the establishment of such precedent.

GERMAN LIBRARY CONVENTION AT MAYENCE

At the fourteenth convention of German librarians in Mayence, May 15 and 16, 1913, referred to in the foregoing, the following topics were discussed: The manuscript maps of Ptolemy and their development during the epoch of the renaissance; The "Deutsche Bücherei" in Leipsic; Problems and methods of the present-day Gutenberg research; Report of the

Commission on binding material; Report of the Commission on methods of administration; Preservation and cataloging of manuscripts and printed matter used as end papers on inside of book covers; and The Mayence municipal library. The meeting of the V. D. B. (the German librarians' association) closed the session the second day. From the printed report of the convention some interesting features may be noted.

The main topics of the 1912 convention (reviewed in the October and November numbers of the LIBRARY JOURNAL, 1912), were the problems of uniform cataloging rules and the Prussian union catalog. The star features of the 1913 gathering were the addresses on the "Manuscript maps of Ptolemy," by Dr. P. Dinse, and "Problems and methods of the present-day Gutenberg research," by Dr. G. Zedler.

Dr. Dinse gave an historical and comparative study of the codices and pleads for recognition of the great cartographer of the classical period. A mere review of his technical article would utterly fail to bring the author's earnest work home to the uninitiated, and it would be too vague to satisfy the earnest student of cartography, to whom nothing short of the original, or at least a translation, would and could be of real service. Of special interest is Dr. Dinse's statement that the time is ripe for an exhaustive history of cartography. Many were the writers on special maps, individual cartographers, certain periods, etc., during the last decades, but no man has been found to cover the entire field.

The reading of Dr. Zedler's article on the "Problems and methods of the present-day's Gutenberg research" confirms in me the realization that our American conceptions, not to say standards, of library work are quite different from those of others. I feel not only inclined but compelled to repeat what I said with regard to Dr. Dinse's study on Ptolemy that a mere review does not benefit the uninitiated and is useless to the man who is right at home in this branch of learning.

To which class do we American librarians belong? Are we the uninitiated, or

* Ernst Heitz: Die öffentlichen Bibliotheken der Schweiz im Jahre 1868. Nach dem von der schweizerischen statistischen Gesellschaft gesammelten Material bearbeitet. Hrg. von der schweizerischen statistischen Gesellschaft. Les bibliothèques de la Suisse en 1868. Basel, Schweighauser, 1872.

† Zeitschriften-verzeichnis der schweizerischen Bibliotheken, 1911. 2. Aufl. Zürich, Verlag der Vereinigung, 1912.

do we consider a study on Gutenberg and kindred subjects as falling within the range of our field? Do we care and find time to read a study of this character, and, if we do read it, do we find delight in doing so, and does its reading arouse in us a desire and longing to take part in such work? Or are we so wrapped up in our problems of cataloging and classifying, and in the administration and financing of our libraries that we look upon these functions as our sole and only duties?

Dr. Paalzow's address on the "Deutsche Bücherei" in Leipsic has been published in the *Börsenblatt für den deutschen Buchhandel* and consequently does not appear in the proceedings of the convention. In the debate following the address stress was laid on the fact that the "Bücherei" will collect also German literature of foreign countries. Since newspapers are to be excluded from this new German library, the suggestion was made that a limited collection of German newspapers, including those of the colonies be established in connection with the Royal Library of Berlin. A committee to report on the organization of this collection was appointed during the meeting of the members of the German librarians' association.

Reporting for the Commission on binding material Dr. Paalzow stated that it has been shown that a firm, or to be more explicit, one out of a number of firms, has been not quite conscientious in stamping its leather with its guarantee. Also several dealers in bookbinding material seem to have been somewhat "liberal" (*weitherzig*) in their interpretation of the regulations. He thinks that the Commission should be given greater power and that number 16 of the regulations should be changed so that instead of the dealer the manufacturer will be responsible for the guarantee. A manufacturer of Mayence has produced several leather dyes which are supposed to be exceptionally light proof.

The regulations for textile binding material are found to be too general. They do not cover, like those of the Bureau of Standards for our legal buckram, the thickness and weight of the material, its tensile strength, folding endurance, absorption of

moisture, etc. Great difficulty is experienced in inducing firms to manufacture marbled glazed paper (*Tunkpapier*) which will meet with the standards set by the regulations. Only one firm, the "Aktiengesellschaft für Buntpapier-fabrikation" at Aschaffenburg has made an earnest effort and furnishes an assortment of such paper, produced from solid and dyed (*durchgefärbt*) material. Another firm, Valentin of Berlin, has consented to experiment in the same line.

Strong opposition, dating back to a protest voiced at the convention at Eisenach 1908* has manifested itself against wire sewing. The publishers have been apprised of the wishes of the librarians through the *Börsenblatt* on several occasions.† A strict boycott has been suggested, and has by some libraries actually been tried in order to force reluctant publishers to abandon this cheap and, as we all have experienced, most unsatisfactory method of binding. A resolution to the effect that all German libraries be requested to boycott all wire bound material was adopted unanimously.

While the search after rarities among the manuscript and printed material used as endpapers (*Makulatur*) has been going on for several decades in many of the European libraries, the first printed word on the subject was, according to Dr. G. Kohfeldt, published in 1908 by Dr. Haebler‡, who urgently requests that such material be collected in accordance with some definite system and thus be made accessible to the learned world. Beside such finds as single leaf calendars, letters of indulgence, publishers' and sales announcements, woodcuts and ornaments, many of the old folio covers hide a multitude of fragments, in manuscript or print, of literary products or fragments of works invaluable as historical or other source material.

Dr. Kohfeldt has sent a questionnaire to the twenty-one German university li-

* *Cf. Zib. f. Bw.*, 1908, p. 383-385.

THE NEW LIBRARY BUILDING AT BANGOR, MAINE

braries, to the fifteen largest and oldest German government and municipal libraries and to the libraries of Vienna, Copenhagen and Upsala, to the British Museum, and to the Bibliothèque Nationale, in all to forty-one institutions. The two main questions were: (1) Does your library possess a list of books in the binding of which valuable manuscripts and printed matter have been used as end papers? (2) Has the presence of such material been regularly indicated on the entry for the volumes in which the material is found? Only two libraries failed to respond. The rest answered the first query with "no." About ten modified their answer somewhat by stating that occasional notes were made, or that the manuscripts were recorded, or that such a list would be soon begun. As answer to the second question, twenty-nine sent in an unrestricted "no," while two reported that usually they make notes as described in the question, and eight others state that they make notes "here and there."

The suggestion to hold an international conference of librarians in connection with the coming exhibition at Leipsic was discussed at the meeting of the V. D. B. While the decision in such matters rests with "Commission permanente" the time is believed to be too short to make the plan feasible. However, the German librarians expect to invite their foreign colleagues to the convention which is to take place in Leipsic at the end of May or beginning of June.

JOHANNES MATTERN.

THE NEW BANGOR, ME., PUBLIC LIBRARY

ON Saturday, the 20th of December, 1913, the new Bangor (Me.) Public Library was opened for use.

Though the institution had its origin in 1883, this is its first real home. For twenty-eight years it occupied rented quarters in a business block, until, in the great fire of April 30, 1911, its entire collection of 70,000 volumes and upwards of 10,000 pamphlets was swept away. Since that time the library has had a cramped

and unsatisfactory location in the Penobscot County Court House.

The new building was designed by Peabody and Stearns, of Boston, and constructed by George H. Wilbur and Son, of Old Town, Me. The corner stone was laid June 18, 1912. It stands on Harlow Street, near the business section, facing southwest and flanked by the splendid new High School building on the one side and on the other by a triangular park, extending to Centre Street, across which is the square where the new U. S. Post Office and government building will be erected the present year. In the rear a hill rises almost precipitously, while across Harlow Street a small city park, as yet unimproved, extends down to the Kenduskeag.

The materials used in the building are a light tapestry brick, with base and carved work of Fox Island granite and trimmings of artificial stone. The building is fire-proof, and the entire cost about \$160,000. Though a public library, it is notable that the city has not paid a cent for its construction; neither is it a memorial to anyone, nor a gift from any individual. A building fund has been accumulating for twenty years in the hands of the board of trustees, added to from time to time by gifts and bequests; so the structure is the gift of many citizens, past and present.

Erected so soon after the fire, naturally every precaution has been taken to safeguard the collections in their new home. The edifice really comprises two parts; the main building facing on the street, with a single story and basement connecting structure in the rear which is lighted in the center by skylights; and the stack building. The frontage on the street is 134 feet, and extreme depth from entrance to rear of stack 103 feet.

The main building consists of two stories and basement. The entrance, delivery hall, desk and space at rear occupy the center axis of the first floor, with main reading room (lighted on three sides) and reference room at the left and children's department on the right. The children's entrance is on this side. The librarian's office and cataloging room open into the space at rear of delivery desk. Practically the en-

tire equipment was furnished by the Library Bureau.

The stack building is reached only at the rear of the desk, through two entrances, each closed by two metal doors; and with walls of brick, small wire glass windows, glass floors and steel stacks, there is absolutely nothing in the structure to burn save the books, so the main building, fireproof though it is, might be consumed without endangering this.

The stack building was constructed for four floors, with a total book capacity of over 300,000; at present the main floor and half the basement only are shelved, providing shelving for about 100,000 volumes. The Snead stack has been installed.

The second story of the main building comprises a beautiful upper hall with the History and Fine Arts room on one side and a small lecture room, seating 120, on the other, each lighted from overhead.

The basement contains the board of managers' room, packing and storage rooms, public toilet rooms, study rooms, staff coat and lunch rooms, janitor's room, disinfecting room, machinery room, etc.

The natural lighting throughout is very satisfactory; in fact not a few have commented upon it as the best lighted library they ever saw. The entire structure is lighted by electricity, several different systems of direct and indirect light being used in the various departments. There are also a few emergency gas lights.

The interior woodwork is of oak, stained and treated with two coats of shellac and two of varnish, rubbed with pumice stone and oil to a dull mission finish. The walls and ceilings are of plaster on terra cotta, finished with water color in light umber tints. The floor of the entrance hall and the stairways are of white marble; other floor surfaces of composition.

Steam heat is furnished from the city heating plant across the street; under low pressure gravity system. The ventilation is very satisfactory. C. A. F.

THERE are three classes of readers: some enjoy without judgment, others judge without enjoyment, and some there are who judge while they enjoy and enjoy while they judge.—GÖTHE.

FRANK AVERY HUTCHINS

FRANK AVERY HUTCHINS, first secretary of the Wisconsin Free Library Commission and widely known as a librarian, died at his home in Madison, Wis., Jan. 26, from the effects of a paralytic stroke received several years ago. At the time of his death Mr. Hutchins was head of the extension department of debating and public discussion in the University of Wisconsin. He was a pioneer in the field of library work, his continued efforts being responsible for the Wisconsin Free Library Commission and its outgrowth, the legislative reference library. He was a trustee of the Free Library at Madison, a member of the American Library Institute and the American Library Association, and an active worker for each.

Mr. Hutchins was born in Norwalk, O., in 1850. When he was two years old his parents went to Sharon, Wis. His first public work was done as city clerk and editor of a paper in Beaver Dam, Wis. There he conceived the idea of interesting the people in the affairs of their city and the state. He finally brought about the establishment of the Williams Free Library. In 1891 he became librarian clerk in the state superintendent's office at Madison.

During this time the idea which resulted in the Wisconsin Free Library Commission was conceived. For six years he was head of the commission. His next and last work was the organization of the extension department of debating and public discussion of the University of Wisconsin, with its famous "package" library.

Outside of the men associated with him in the library and university work, Mr. Hutchins was scarcely known. He was an extraordinarily modest man, but that his worth was recognized by those who did know him was attested by the banquet given in his honor in 1912 by his colleagues, at which hundreds of letters from friends in different parts of the country, unable to be present, but who desired to express their appreciation of Mr. Hutchins and his work, were read.

RESOLUTIONS ON THE DEATH OF WILLIAM C. KIMBALL

At a meeting of the board of trustees of the Passaic, N. J., Library held Monday evening, Jan. 26, at which Mr. Robert D. Benson was elected president, the following resolutions relative to the death of William C. Kimball were passed:

"With grief the trustees of the Passaic Public Library record the death on Jan. 17, 1914, of their president, Mr. William C. Kimball, who served as a trustee of this library for twenty years, and as president of the board of trustees for the past twelve years.

"To Mr. Kimball, more than to any other man, was due the wonderful growth of library work in Passaic during recent years. Before he became trustee, he assisted in providing necessary funds and books, and from the day of his appointment to his death, the good of the library was ever uppermost in his thought. He was untiring in his work for its betterment, and his example was an incentive to all his associates. He took the keenest delight in the successful work of the library among children and the foreign-born citizens of Passaic; and well he might, for this success was largely due to his careful oversight and personal efforts.

"That his work was appreciated outside his community is shown by his appointment as a member of the New Jersey State Library Commission and his election as president of that body.

"In the death of Mr. Kimball, the city loses an able official who was a power for good in the community, the library a sympathetic and indefatigable worker, and the trustees a friend whose kind heart and good deeds will long be cherished in loving memory.

"Resolved, That this tribute be spread in the minutes of this meeting, and a copy suitably engrossed sent to Mrs. Kimball."

EXHIBIT OF LABOR SAVING DEVICES

AN exhibit and demonstration of labor-saving devices adapted to library use will be held, under the direction of the A. L. A. Committee on Library Administration, in connection with the Washington conference, May 25-30, 1914. The exhibit will include mechanical devices of all kinds, from expensive equipment which only the largest libraries would need or could afford to inexpensive devices and appliances within the reach of even the smallest libraries.

The committee wish to have as many firms and devices as possible represented in this exhibit, but on account of the limited space available a careful selection will have to be made from the large number of possible exhibitors. The undersigned will be very glad to receive from any librarians suggestions of devices and appliances which they would recommend for inclusion in the exhibit, either because they have

used them and know them to be good or because they would like an opportunity to inspect them and see them demonstrated.

The committee will also be glad to secure information concerning any time-saving methods which have been successfully adopted in any library for simplifying routine work. Just how such information can best be used has not yet been decided, but the exhibit of mechanical devices seems to offer a favorable time for making known to all librarians, in some way, the successful efforts which have been made by many to apply "scientific management" principles to library work.

C. SEYMOUR THOMPSON,
The Public Library,
Washington, D. C.

TO PROMOTE LIBRARY PUBLICITY

THE American Library Association has recently sent out to about 150 of the leading libraries of the country a circular letter asking the libraries to co-operate with the A. L. A. in an effort to secure greater publicity for library work. A selected list of newspapers accompanies the letter, and each library is asked to send copies of its annual report to the papers on the list, blue-pencilling any features which might be considered "news" outside its own locality. In addition the libraries are asked to send to the A. L. A. headquarters items of library news interest from their vicinity; to try to obtain permission from leading local papers to run a regular "Library column"; and to send the name of any paper conducting such a column to A. L. A. headquarters that additional news items may be sent it from time to time.

DR. JOHNSTON'S WORK AT COLUMBIA.

In an article in the *Columbia Alumni News*, which is accompanied by a portrait, the work of William Dawson Johnston as librarian of Columbia University Library is briefly summarized.

Though there was no increase in the general funds for the purchase of books during his term of service, noteworthy progress

was made along other lines. While the enrolment of the university has been doubling, the use of its library has quadrupled, reaching last year almost the million mark.

It was during Dr. Johnston's administration, in 1912, that department libraries were established. The schools of Law, Political Science, and Philosophy removed their collections from the library building and the libraries of the Schools of Natural Science and Applied Science were developed, and expert department librarians appointed. Closer relations were established with the New York Public Library, and relations with affiliated institutions such as the American Museum of Natural History and the Metropolitan Museum of Art were made much closer. To facilitate this plan the librarian of the Natural History Museum was made honorary curator of the natural science libraries of the university.

Reading room service has also been greatly improved, better and more economical methods of cataloging have been introduced, a union catalog has been established in the library, and a library bindery has been started.

In 1909 the library began to issue the University bibliography as a separate publication, and this record of the publications of the university and its officers is now recognized as a model of its kind. Dr. Johnston also took an active interest in building up the collection of *Columbiana*, now approaching completeness.

One of the officers of the university has summed up the changes made during the four years of Dr. Johnston's administration in the words: "Dr. Johnston found a college library and is leaving a university library."

A NATION'S literature is its power of so stating its ideals that we will not need to be shrewd for them—its power of expressing its ideals in words, of tracing out ideals on white paper, so that ideals shall enthral the people, so that ideals shall be contagious, shall breathe and be breathed into us, so that ideals shall be caught up in the voices of men and sung in the streets.—GERALD STANLEY LEE, in "Crowds."

PUBLIC DOCUMENTS AS A COMMERCIAL FACTOR

BY WILLIAM R. REINICK

THE day of estimating the work of the library by the number of books circulated, a majority of them fiction, is rapidly passing, and it is now being recognized by Librarians and Boards of Trustees, that too great a value has been placed on circulation, often neglecting the reference work of the library. A business firm or an investigator, by finding one item relating to his particular line, might be led to make a new invention, start a new line of trade, or send goods to another locality, resulting in increased business and giving additional employment. Statistics along these lines are almost impossible to obtain, but observation and a little reasoning will at once show that the latter is of far more value to mankind, than the reading of hundreds of works of fiction, especially when the librarian is able to directly assist the researcher.

The official publications of the various governments, states and cities, constantly contain articles of great value to the industrial and commercial world, but until recently these have not been appreciated, due no doubt, to the unsystematic manner of publication, and the still more important fact that no serious effort has been made to bring these publications to the notice of those who would obtain the greatest results.

It seems unnecessary to give the reasons why a collection of documents should be a very important factor in the commercial life of a city, as the collecting of reports by the special libraries gives conclusive evidence of their value.

In order to properly take up a new commercial line, or endeavor to enlarge the amount of business transacted by a firm already established, one should, in order to judge properly as to the right course to pursue, examine the ground thoroughly, note the supply of raw material close at hand, and cost of transportation, if the factory is at a distance from the source of supply, so that this will not eat up the profit, meaning a loss. The labor market,

cost of food, rent of houses, and numerous other items all have to have careful consideration, especially as the trend of all legislation to-day is to increase the amount of money paid to labor. Also, as to the articles manufactured, find where the best markets are for his wares, what opposition he is likely to encounter in entering new territories, mode of packing, length of credit to be given, customs duties, protection of patented articles in foreign countries, effect of the climate on the goods he intends to sell, and many other points.

A firm engaged in the manufacture of electric and gas lamp posts, should be able to obtain illustrations of those in use in other cities of the world, their selling price, and any criticism as to their durability, adverse or favorable. This data might also enable the firm to suggest improvements, which would give more satisfactory results.

A house selling goods, which would come under the regulations of the Pure Food and Drugs Acts, national or state, wants in the shortest possible time, access to publications containing the rules and regulations, stating the manner in which goods must be labelled to be sold in a certain locality. If they write to Washington, or the capital of the state to which they want to ship goods, and wait for the report, it often means that the sale is lost, as a purchaser, being frequently in a hurry, cancels the order and buys from a nearby house.

A company engaged in making clothing, generally has a large number of rolls of cloth on hand, and if these contain wool, they are often attacked by insect life. Writing a letter requesting a remedy, and waiting a number of days for the reply, means a loss of goods and money, which could have been avoided, if the firm, within a few hours after the discovery of the ravages, could have obtained a report giving the necessary remedies.

The documents which seem to have the least practical use (according to the jokes about them) are the weather reports. But quite a number of persons wishing to go away for their health, or invest in lands for agricultural pursuits, or to change their habitations, have come in with the folders

issued by land companies, railroads, etc., describing the location as a paradise on earth, and able to return five dollars on every dollar expended, within the year, giving testimonials (like patent medicine companies), and with beautiful illustrations of homes supposed to be located there, the temperature even all year round, rain when you want it, and the railroad station at your door, a beautiful river and superb shade trees. The intended victim by referring to these much abused documents, and also the agricultural and geological reports, gets a true idea of things. These publications give cold facts of the actual conditions of the location (so beautifully described and illustrated in the folders), and will most likely state that there is a dirty little stream in the spring, drying up in the summer, the climate is very hot in summer and cold in winter, rainfall once in a while, and then the stream overflows and carries everything to destruction. The nearest railroad station is forty miles away, and trains run once a day.

The intended investor or new inhabitant has his eyes opened to the true condition of affairs, and thus he is enabled to save his health, time and money.

A firm gives out a rosy statement of certain mines asking investors to come in, often using quotations from official reports (changed or only partly quoted, so as to read as though their scheme was the only one in the land in which to invest). The investor by using documents, will often find the true facts (about the fabulous rich mines, etc.) to be, that the mine has been practically worked out, leaving only the skimmed milk.

Documents furnished a company with scientific and statistical facts, by which the company will be able to start an entire new industry, giving employment to a large number of persons directly, and many more indirectly, besides providing a nutritious meat at a price very much below that of cattle.

A promoter, by using the reports on turpentine, organized a company to engage in the manufacture of naval stores, which is now very successful.

The geological maps of a certain district,

by showing the value of the clay beneath the top soil, increased the value of a piece of land, formerly used for farming, many fold.

An engraving company, through documents, was enabled to ascertain whenever a bond issue was being considered, and by writing at once to the city, state or government giving consideration of floating a loan, obtained a number of orders.

Representatives of foreign bodies are constantly using documents for reports to be published in their own country for the use of investors and immigrants.

The monetary value of these documents to the commercial world cannot be given in figures, because one is seldom able to follow up the use made of the data collected by the investigators, but the results of any one of the above is of far more value than the circulation of a large number of volumes of fiction.

During my twenty-one years of experience in document work, having been in contact with the investigators, I have come to know the real value of documents, but the question arises, how may we make them of greater value to the community, at the lowest possible expenditure of money consistent with efficiency, and the following solution is suggested:

First—A collection of documents to be of commercial value should be located in the business portion of the city, and the department should be open in the evenings.

Second—The assistants should, whenever possible, besides having a general knowledge of the collection, take up some special study using the documents wherever they are able, and if possible, have a working knowledge of one of the languages. A person asking for information on a subject studied by one of the assistants, would be assisted by this one, and would obtain better results.

Third—Bibliographies and finding lists, to be distributed and also noted in the newspapers.

Fourth—From time to time, workers engaged in particular lines, should be invited to come to the library to hear some expert speak upon his subject, who would emphasize the value of data in order

to obtain the best results. At the same time, the library would display in cases or upon tables the material bearing upon the subjects spoken of, and the workers hearing of the value of books, and seeing the quantity of valuable publications at their disposal, would gradually recognize the value of the volumes to them personally, and make use of them in their daily work.

Fifth—A bulletin, issued daily if possible, giving a list of all current reports, and the papers contained in them, which the library receives, arranged by subjects; also when the article is of value, a notation of the particular point mentioned in the paper. These bulletins could be made on a multi-graph or some other similar machine, and sold at cost, and between time the machine could be used to do the printing needed by the library; or, print this information on cards, and sell to the firms all cards on the subjects selected by them at so much per card, as is done by the Library of Congress. By doing this on cards, the firms subscribing to them, and also the library, could at once place them in the catalog.

There are many firms, who would gladly avail themselves of this privilege if the library would undertake to supply the index. Dod's building reports only note when bids are requested, but in many cases we could give the information as soon as they were contemplated.

Sixth—In order to obtain the greatest possible results, particular stress should be given to the efficiency of the Directors and of assistants, especially where they are to come into daily contact with this commercial world, and the report of the Joint Committee of the National Municipal League and the National Civil Service Reform League, upon "The selection and retention of experts in municipal office" is of special value as it recognizes that the Bureau Directors should be protected against removal, except for just cause.

It is hardly necessary to say that the document as a commercial factor can be made of increasing value, as anyone who has at heart the uplifting and advancement of mankind, by looking round, is able to see where hundreds, yea thousands would

be in a better position, if they had a greater knowledge of the business in which they are engaged. A glance at the history of the world will at once show that advancement only comes to those, who by their power to acquire and properly use knowledge, prove their capability, and the necessity of one's possessing this to properly exist is becoming more apparent each year, in this age of commerce.

To-day, the library which had the foresight to collect documents, when they were, as they still are by some, looked upon as junk, and were easily obtainable, can now see the difficulty which other libraries, and especially some of the special libraries are having, sometimes paying quite large sums for the volumes to complete their sets, and often failing, can look with pride upon its own collections, complete sets obtained with little money and now ready to be made of value to the commercial world, a value which will further increase with the growth of commerce with South America, when the Panama Canal is completed.

LEARNING TO READ

I WONDER why it takes so long
 To make the letters shape a song?
 And how the words can ever know—
 All down the pages—where to go?
 Sometimes alone a letter stands;
 Sometimes the words take hold of hands;
 I see them gather thick and black,
 Then turn about and travel back;
 I look just where they were before,
 And find they aren't there any more.
 But Mother says, "Most words are queer
 Until you come to know them, dear."
 It seems, no matter what they do,
 She knows where they are going to,
 And reads some books all through again.
 One song there is about the rain
 That has a comfortable sound—
 "The rain is raining all around";
 When I just read it in the book,
 How strange the marching letters look.
 But hearing her, I seem to see
 Ships and umbrellas, field and tree.

—GRACE HAZARD CONKLING,
 in *The Craftsman*.

A SELECTED LIST OF PERIODICALS FOR SMALL LIBRARIES.

A COMMITTEE appointed at the fall meeting of the Massachusetts Library Club unanimously reports the following resolution:

The members of the Massachusetts Library Club view with strong disapproval the alarming decadence in tone of many of the leading American periodicals, and emphatically protest against the tendency recently so manifest to cater to sordid sensationalism, indecent suggestion, and to perverted taste.

The committee has had several meetings, at which have been discussed the merits and demerits of certain leading periodicals, and it has prepared the appended list of fifty magazines, which are recommended for small libraries, arranged in groups of ten, to cover the demands of libraries subscribing to ten, twenty, thirty, forty, or fifty periodicals. It is not to be understood that all of the reputable journals are included. The list is limited by the number chosen, and by the plan by which the committee endeavors to put in each group of ten, magazines which should appeal to the various classes of a community. A list has also been made of twenty magazines, covering special subjects of a more or less technical nature. One or more of this special list could be inserted in the place of one in each group of ten, according to the demands of each locality.

NORTH DAKOTA SUMMER COURSE IN LIBRARY METHODS

THE University of North Dakota will offer as a department of the summer session, June 22 to July 31, a six weeks' course in library methods for the benefit of teachers or others who have the care of school libraries. The subjects usually included in a course of this kind will be covered. Instruction will be given by the following: Mrs. Minnie C. Budlong, secre-

tary and director of the North Dakota Public Library Commission; C. W. Sumner, librarian of the University of North Dakota; Miss S. Blanche Hedrick, assistant librarian of the University of North Dakota; Miss Russell Edwards, cataloger.

This is the third year that the University of North Dakota has offered a course of this kind, and it is expected that a number of teachers will avail themselves of the opportunity of taking the work. Seven teachers were enrolled in the work last year.

LIBRARY INSTRUCTION AT PRATT INSTITUTE

AN account of what has been accomplished in one effort to instruct students in the use of a library may interest some who have a like problem to solve. This instruction at Pratt Institute is given to nearly two hundred first-year day-class men in the School of Science and Technology, and the Applied Science Department of the library is the laboratory. The School of Science and Technology is one of the five schools of which the institute is composed. It embraces day courses in mechanical and electrical engineering, industrial chemistry, machine work, and in carpentry and building, and evening courses in corresponding subjects, to which are added some of the trades.

Pratt Institute Free Library occupies a separate building, across the street from the Institute. The Applied Science room of the library is a reference and reading room for the general public, and at the same time is the reference library and reading room of the School of Science and Technology, there being no departmental libraries in the school.

The courses in the school being only two years in extent, the time of the students is very fully occupied with the schedule of studies. It was, therefore, not easy to obtain time for even a short assignment for library instruction. Formerly it was the custom of the head of the department to obtain permission to address the students in their class rooms at the beginning of

each year. This led in later years to visits of sections numbering thirty or forty men, with an instructor, to the library, where they were talked to and shown around the department for half an hour. The co-operation of the school having been enlisted to this extent, the time seemed ripe last year for some systematic library training for the men. The advances of the library were cordially met and an arrangement was made by which the school was to assign each first-year man to five hours' work in the library. This is two hours' regular laboratory time and three hours usually required to prepare reports, but necessarily the whole five hours are spent in the library, as the report consists of a short bibliography.

The men come to the Applied Science room in groups of five, each man bringing a printed laboratory assignment slip on which his instructor has written the subject of his report. The following subjects are chosen at random from last year's work: low temperature measurements, unipolar motor, search lights, annealing of glass, burners for heavy oils, effect of different paints on the efficiency of radiating surfaces, light standards, design of friction clutches, efficiency of worm gear, applications of the gyroscope, block signals, Humphrey pump, lighting precaution in mill construction, tan bark as boiler fuel, use of stranded wire in winding armatures, gas engine ignition, refrigeration of public buildings, gas burners for the laboratory, thermit, construction of ozonator, method of making aluminum splices, autoclaves, and so on, through over one hundred and fifty subjects relating to work in the physics, chemistry, and electricity laboratories, and in the shops and drafting rooms.

An index card is made out for each man on which is recorded his name, the subject of his report, and the time spent on the work, the time being entered at the beginning and end of each visit to the library in connection with the assignment.

The instruction begins with a short talk on the many kinds of books which go to make up a library, and on the necessity of having some systematic method of arrang-

ing them in shelves in order that confusion may be avoided and books readily found. This leads up to the explanation of the Dewey decimal classification, the practical working of which is demonstrated by reference to the shelves, the 500 and 600 classes with their subdivisions being chosen as containing the books which the men would need to use in searching for material for their reports. After this object lesson they are taken to the catalog case, where the arrangement of cards is explained, and they are given some exercise in using it—finding books by author and subject heading, noting call-numbers on slips and thereby finding books on the shelves, or obtaining books by presenting call-numbers at the circulating department.

Technical periodicals are then inspected, the features of the leading ones being explained, which leads to methods of searching for matter in bound files of periodicals. The *Engineering Index* with its annual cumulation, the *Industrial Arts Index*, *Chemical Abstracts*, and the individual periodical indexes are examined, attention being called to their various peculiarities of arrangement. The indexes of books are explained, also the value of the literature references which may be found as foot-notes or lists in books.

The trade catalog collection and its catalog are then inspected.

A short visit is made to the circulating department, where the men are shown the full catalog and can see that the same system is employed there, and that any one of the 100,000 books in the library, no matter what its class, may be found as readily as are the 3000 technical books in the catalog which they have seen in the Applied Science room. At the same time they are told that the same system prevails in practically every public library which they are likely to use. The men are then taken through the stacks, where they see the arrangement of the various classes of books, after which they are told how to obtain borrowers' cards. This ends the direct instruction, and has used up a considerable portion of the first two hours of the time.

The remainder of the five hours time may

be made up at the convenience of the student and is devoted to the preparation of the report, which is in the form of a short bibliography on a subject which has been assigned by an instructor in the Institute. A printed and ruled card, $7\frac{1}{2} \times 11$ in., suitable for vertical filing in a case, is employed for this purpose. The entries are under four divisions: (a) books, (b) periodicals, (c) trade catalogs, (d) indexes. Form of entry and space given to each item are: (1) call-number, $1\frac{1}{4}$ in.; (2) title, $2\frac{3}{4}$ in.; (3) author, $1\frac{1}{8}$ in.; (4) short note, relating scope of reference and any other comment which will guide the person who may be selecting a reference, $3\frac{3}{4}$ in.; (5) date, $\frac{1}{2}$ in.; (6) vol. no., $\frac{1}{2}$ in.; (7) paging, $\frac{1}{2}$ in.

The finished reports are examined and the students are marked on them as on laboratory reports. The reports become library property, are filed, and form valuable reference matter on hundreds of subjects.

The object in giving this instruction to first-year men is that they may become familiar with the library early in their course, and by using it while in the Institute be more likely to continue to make use of libraries in after years.

The library assignment is popular with the men. The only man who did not do the work last year, having been prevented by illness, asked permission to be admitted this year. It is gratifying to notice the independent manner in which these men proceed to consult catalog and indexes, in marked contrast with the helplessness of former classes in this respect.

DONALD HENDRY.

LIBRARY PROGRESS IN NEW YORK STATE IN 1913

ASA WYNKOOP, head of Public Libraries Section of the New York State Education Department, has prepared a comprehensive summary of library affairs in New York state for 1913, which contains some interesting facts and figures.

Reports were received last year at the New York State Education Department from 477 free lending libraries in the state,

showing a total of 4,707,472 volumes in stock and a circulation of 21,530,294. These figures show a gain over the previous year of 13 in the number of libraries reporting, 285,571 in their stock of books, and 1,221,118 in circulation. Since 1893, when the present state system of supervision and aid for free libraries was adopted, there has been a five-fold growth in the number of volumes in free libraries, and a nine-fold growth in public use of the libraries. The per capita circulation is now more than six times greater than in 1893, and notwithstanding the great increase in stock of books, the circulation per volume in stock has almost doubled. There are five times more books, and each book receives nearly twice the amount of use.

In their financial statements for the past year the libraries of the state show a total of \$3,814,875 available for the year's expenses. Of this amount \$1,738,420 was provided from local taxation, \$687,955 from interest on endowments, \$196,447 from the state (including \$136,860 for support and rehabilitation of the State Library), \$79,023 from gifts, \$21,317 from entertainments, and \$1,091,710 from balances on hand and miscellaneous sources. Library appropriations from local taxation were greater by \$116,988 than in the preceding year. The amount expended for books, periodicals, and binding was \$1,030,804, and for library salaries \$1,661,104. Estimating salaries in terms of circulation, it appears that the libraries are paying 7½ cents in personal service for each book issued. This, however, includes libraries where circulation represents perhaps less than half the service rendered.

Of the 52 cities of the state, 46 are now provided with free public libraries, two others have subscription libraries available to all on the payment of a small fee, two provide limited library service through the public-school library, and two provide no public library facilities whatever. The latter, however, Lackawanna and Watervliet, are in a sense parts of neighboring cities, and individuals may obtain library privileges from those cities. There are 24 villages in the state having each a population of 5,000 or above. In all but

three of these free or public libraries have been provided. They have an average stock of 9,174 volumes and an average circulation of 29,651.

The total number of incorporated villages in the state is 456. In 224 of these, or just about one-half, there are regularly chartered free libraries, and in about one-half of the remainder the school libraries provide some free library privileges. Outside of incorporated cities and villages, there are 134 communities or districts which have regularly chartered free libraries, supported in part by district or town taxes, but depending mainly on voluntary contributions, membership fees, and proceeds from entertainments.

Of the total of \$1,738,420 appropriated from local taxes last year for library support, \$1,651,324, or 95 per cent., was provided by the cities. Greater New York provided \$1,232,366, or 70 per cent., of this amount. Reduced to a per capita basis, the figures mean that Greater New York is paying for each unit of population a library tax of 25 cents, Buffalo 24 cents, Syracuse 32 cents, Rochester 14 cents, Utica 34 cents, Mt. Vernon 46 cents, Albany 14 cents, Yonkers 17 cents, New Rochelle 44 cents, Poughkeepsie 43 cents, Schenectady 15 cents, Binghamton 22 cents, Niagara Falls 25 cents, Watertown 26 cents, Troy 8 cents, Auburn 15 cents. The tax per volume circulated in these cities was: Greater New York 8.6 cents, Buffalo 10 cents, Syracuse 12.5 cents, Rochester 30 cents, Utica 14 cents, Mt. Vernon 9 cents, Albany 4 cents, Yonkers 7 cents, New Rochelle 10 cents, Poughkeepsie 12 cents, Schenectady 7 cents, Binghamton 6 cents, Niagara Falls 10 cents, Watertown 9 cents, Troy 6 cents, Auburn 9 cents. It is worthy of note that several of the cities which are paying the highest per capita rate for their libraries are getting a more than corresponding circulation, so that their tax per unit of issue is among the lowest, illustrating the fact that in many cases an increased tax makes for positive economy in results.

One hundred and ten different libraries were benefited during the year by gifts or bequests, each valued at \$100 or more, the largest number of libraries ever thus ben-

edited in a single year. The total amount of gifts and bequests is estimated at \$1,123,291, the greater part of which was for buildings, grounds, or permanent endowments. The larger gifts were as follows: To Columbia University, a building to house the library of architecture and art, costing \$500,000, from S. J. Avery; to New York Public Library, by will of W. A. Spencer, one-half his residuary estate and his private library; to Glens Falls, by will of Henry Crandall, estate worth \$500,000, to be applied at discretion of trustees to public park, Boys' Saving Club, and public library; to Hamilton College Library, \$100,000 for a building from unnamed benefactor.

Of the 110 gifts reported, only three were from Mr. Carnegie, and these represent less than 3 per cent. of the total value of the year's gifts. It is worthy of note also that for every dollar given to libraries by the state, \$32 was given by private donors.

To complete this survey of the library resources and activities of the state, there must be added the statistics of library facilities and circulation provided by the State Library, with its unique department of traveling libraries, which serves as a free library for all the people of the state, particularly for those without other library facilities. Last year small libraries, averaging 41 volumes each, making a total of 45,651 volumes, were sent for local use to no less than 1114 localities or groups of readers. This was a gain over any previous year of more than 250 libraries sent out, and is double the number reported ten years ago.

In the library situation of the state as a whole, the most striking feature is, of course, the rapid development and huge totals shown by the great city libraries. Thus of the total stock of 4,707,472 volumes in all the free libraries of the state, 3,459,359 are in the cities and 2,051,743 in Greater New York alone; and of the total annual circulation, numbering 21,530,294 volumes, 18,300,454 were issued to city borrowers. But when it is considered that 76 per cent. of the population of the state is contained in cities, and that the population outside of

cities is now actually less than it was twenty years ago, the development of libraries in the villages and rural districts of the state must be regarded as even more notable than that in the cities. Thus, of the 477 free libraries shown in the year's reports, 319 are outside of cities, and these have a total stock of books numbering 1,248,113 and an annual circulation of 3,228,840—an average for each of these libraries of 3912 volumes in stock and 10,122 circulation. Of the total gain last year of 1,221,118 in circulation from free libraries, 598,077, or nearly one-half, was from libraries outside of cities, representing only one-quarter of the population.

The full strength of the showing in the smaller towns will perhaps best appear from a comparison with conditions reported in other states having state library commissions or bureaus of recognized efficiency. Thus, Wisconsin is generally recognized in the West and Middle West as a model for other states in its library system and its library propaganda. It has a population almost exactly equal to that of New York outside of cities. In the whole of that state, according to its last report, there were 165 free libraries, 90 library buildings, 987,254 volumes, and a property in library buildings amounting to \$1,764,000. The extra-city population of New York has twice the number of free libraries, twice the number of buildings, a quarter more books, and a greater valuation in library buildings than the whole state of Wisconsin.

Indiana, with a population greater than that of rural New York and a model library law and commission, reports 145 free or public libraries and 106 library buildings, more than one-half the latter being gifts from Carnegie. Both in libraries and buildings rural New York has twice the facilities reported for the whole of the Hoosier state.

California, with a population substantially larger than that of rural New York, and with a model library system, reports for the whole state 124 free libraries supported by city tax, 21 county library systems, 54 subscription libraries, and 60 association libraries, a total of 259, of which

not more than 205 are free. It has 117 library buildings, 80 of which are Carnegie gifts. The total of free libraries and buildings is at least a third less than that of the smaller population in rural New York. Even Massachusetts, which was the first state to establish a state department for library extension, and which boasts a free library for every township, has fewer free libraries in operation in proportion to population than the village and country part of New York.

THE NEW CONNECTICUT STATE LIBRARY BUILDING

ALTHOUGH the new Connecticut State Library and Supreme Court building at Hartford was finished three years ago and has been in use since that time, it was not formally turned over to the state until Feb. 10 last, when the building commission which has had the construction in hand for ten years, through its president, ex-Senator Morgan G. Bulkeley, presented the certificate of the completion of its work to Governor Simeon E. Baldwin. The exercises attendant upon the ceremony were held in the beautiful Memorial Hall of the building, where are deposited the original charter of the state, and the first constitution ever drawn, with the table upon which Abraham Lincoln signed the Emancipation Proclamation.

The ceremony itself was simple. Around the table in the hall were grouped ex-Governor Bulkeley, who, as president of the building commission made the address for it; Governor Simeon E. Baldwin, who received the building in behalf of the state, and his two associates on the state library committee, which will now supervise the building—Secretary of the State Albert Phillips and Hon. William Hamersley. The members of the building commission, ex-Senator Charles C. Cook, Comptroller Daniel P. Dunn, H. Wales Lines, Willie O. Burr and L. W. Robinson, grouped around the principal actors, while the other spectators stood in an outer circle.

Former Governor Bulkeley in his address reviewed the work of the commission

which was appointed in November, 1903. In 1907 the commission, after having been twice continued, was directed to secure land, contract for and fully complete and furnish a building suitable for the use of the state as a library, supreme court room and memorial hall. The cornerstone of this building was laid on May 25, 1909, and on November 25, 1910, the state librarian, George S. Godard, took charge of the building under the commission. During the three years and more which have since passed the new quarters of the library have been found satisfactory in every respect. The appropriation made for the building amounted to \$1,665,099.22, of which \$1,655,693.04 has been expended, leaving a balance of \$10,006.18 in the hands of the treasurer.

Governor Baldwin received the parchment document containing the formal transferral of the building from the commission to the state, and made a brief address, after which he committed the care of the building to the state librarian.

In accepting the charge Mr. Godard spoke of the interest he had felt in the Connecticut State Library since his boyhood days, and of the pleasure with which he accepted a position in it in 1898, under Dr. Charles J. Hoadley.

LEAGUE OF LIBRARY COMMISSIONS—MID-WEST SECTION MEETING

THE midwinter meeting of the Mid-West section of the League of Library Commissions was held in Chicago December 31 and January 1.

At the opening session, 25 delegates were present, representing 13 states. At the close, the attendance record showed 39 delegates from 15 states; Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, Pennsylvania, South Dakota and Wisconsin. More visitors were present than could be accommodated in the room, all interested in the animated debates. There was not a dull moment in the three sessions, nor a hackneyed discussion. Credit is due the officers, particularly the president, Miss Wales, for the way in which things were

kept moving. No topics were omitted, and no session lasted overlong.

At the first session a letter from State Librarian Winkler, of Texas, asked for a collection of cartoons or other illustrations that could be used in a city campaign for a public library.

Miss Stearns, of Wisconsin, said that this work belonged to the A. L. A., and since the league officers are transient, and the A. L. A. had collections for public library work, it could well do work of this kind.

Mr. Jennings, of Seattle, asked for collections of pamphlets and articles on practical ways for the establishment of a library commission. This was also classed as A. L. A. work.

The general topic was "Co-operation of public educational forces," and the first morning's discussion covered "Extension work and co-operation with specialized schools of the state university."

Miss Templeton, of Nebraska, opened the discussion. She said that library commissions could do little for students while in college, that the work of the commission related more to home study. Its opportunity for co-operation was with university extension work, also in correspondence courses, in developing social centers and lecture courses. Farmers' institutes, demonstration trains, and county agricultural experts gave the library commission opportunity. Where the commission is not represented, lecturers are usually willing to describe the work of the commission and distribute leaflets. These agencies advertise the commission, and leave it free to concentrate on delivery of books. The great difficulty is scarcity of material of the right kind.

Miss Stearns preferred that the commission do its own advertising, and believed that an agent of the commission should attend farmers' institutes, and distribute leaflets directly to the farmers. This is done in Wisconsin and the university and library commission share the expenses.

In Minnesota, representatives of the commission go out under university auspices, but are paid by the commission.

Miss Stearns thought the university agri-

cultural colleges should send out agricultural libraries.

Miss Baldwin preferred that all traveling libraries should be confined to the library commission. Minnesota state schools have special aid to buy books for their special courses, which in time will mean establishment of special libraries, particularly local agricultural libraries.

A paper by Mrs. Elizabeth C. Earl, of the Indiana Library Commission, advocated that the library commission go not too far in the purchase of books for special work. The commission should co-operate only when special work has not special funds. Duplication is unavoidable in the beginning of the work, but the commission should learn what the universities can furnish, and provide only what is lacking.

A thorough discussion of duplication followed.

Miss Bascom advocated that all good material, even that obtained from university libraries, and the historical commission, should be sent through the library commission.

Miss Curtis said that in Illinois the university furnished outlines and directed to the commission for books.

Mr. Kerr said in Kansas there were five places doing extension work, and there was more work than all could do.

Miss Robinson, of Iowa, thought the field should be divided into two parts, the work with special students to be undertaken by the university, and the work with general people by the library commission. University extension should be by the lecture method, library commission by the book method.

Miss MacDonald said that Pennsylvania reduced duplication to a minimum by having the president of the state university a member of the library commission.

Dr. Batt, of North Dakota, thought it would not matter whether it was one book each in two centers, or two copies of the same book in the library commission office.

A committee was appointed to take charge of national publicity for library commission work as an aid in co-operation. This committee is expected to report at the June meeting.

CONNECTICUT STATE LIBRARY, HARTFORD—MAIN READING ROOM

SECTION OF READING ROOM SHOWING SPECIAL METAL STUDY TABLES

The committee appointed by the president was as follows: Clara F. Baldwin, Lutie E. Stearns, Julia Robinson.

A friendly feeling toward aiding in the expense of the A. L. A. exhibit at Leipzig exposition was expressed.

It was voted to send the daily report blanks to members of the commission.

The topic for the afternoon was "Study clubs as a coöperative force," opened by Mrs. Earl, of Indiana. She discussed the work of the study clubs, and dwelt upon the enthusiasm they aroused for library work.

Miss Robinson told of the aid received from study clubs in advertising the commission, and mentioned the 100 traveling libraries given by the state federation of women's clubs. They had also helped pass the library laws in a number of states.

Miss Baldwin said that in Minnesota the secretary of the library commission was secretary of the library and literary committee in the state federation.

Miss Stearns thought that a representative of the state federation should be on the library commission.

A paper on "New civic league work," prepared by Miss Van Buren, of the American Civic Association, was read by Miss Baldwin. She pointed out that civic organizations have lost sight of their greatest asset, the children. The need of service in making loyal citizens was emphasized. Civic campaigns should start from the known—the home plot—and proceed to the unknown—to the state. She asked that the state library commission and librarians coöperate with civic committees to arrange for state-wide campaigns. In Wisconsin, the library commission establishes civic leagues.

The next subject was "Co-operation by the commissions; interstate relations."

Miss M. Clellan, of Indiana, read a paper prepared by John A. Lapp, on "Co-operative library service."

"Messages from new commissions," was opened by a talk by Miss Borresen, field-librarian of the South Dakota Library Commission. She explained the provisions of their law, which places the library work for the state under the state library, with

an interesting summary of the library conditions found in the field work of the state.

Secretary of State Woods, of Illinois, being state-librarian ex-officio, was present by invitation, and gave an account of the conditions in that state, and outlined what he hoped to do in upholding the hands of trained workers in Illinois.

Miss Fernald, of Great Falls, Montana, president of the state library association, told of the efforts to secure a state library in that state.

Miss Bascom reported for the publishing committee on the preparation of study club outlines. After considerable discussion, a committee was appointed to confer on study outlines and report. The president appointed on such committee, Miss Tyler, Ohio; Miss Bascom, Wisconsin; Miss Borresen, South Dakota; Miss Robinson, Iowa; Miss Baldwin, Minnesota; Mrs. Budlong, North Dakota; Mrs. Earl, Indiana; Miss MacDonald, Pennsylvania; Miss Ahern, Illinois; Miss Titcomb, Maryland.

A vote of thanks was ordered sent to Congressman H. M. Towner, of Iowa, and David Lewis, of Maryland, for their assistance in securing the admission of books to parcel post after March 16. A vote of appreciation was also sent to Postmaster Burleson.

At the third session, "Co-operation between the library departments of the departments of state, and the state board of education," was opened by Miss Stearns, who presented the library commission side of the question. Her prophecy that the state board of education would soon control library work, proved the keynote of the morning's discussion.

Dr. Batt, of North Dakota, presented the school side of the question.

Miss Baldwin discussed the result of too many commissions in state government.

Mr. Johnston, new librarian at St. Paul, advocated closer union, the terms of which must depend on individual conditions and boards of control.

Mr. Dudgeon objected to libraries in the control of the schools.

Purd B. Wright believed it to be the logical outcome of the social center move-

ment. He preferred five branches in school houses rather than one central library, but he would make a distinction between the library in the school, and the library under schools. The latter would mean a constant fight with boards of education for funds.

Mr. Locke, of Toronto, thought the most valuable thing would be a generation of school children trained to use libraries. He delighted the audience with an account of a recent library bill, in Ontario, which required that all members of the public library board should be school teachers. The library as an annex to schools is lost in Ontario at present.

Miss Scott, of Indiana, thought the library committee under a school board would receive scant attention.

In New Jersey, a law has been passed to put the school libraries under supervision of the library commission.

In Oregon, the state library supervises all library interests.

Miss Wales, of Missouri, doubted the wisdom of the library commissions arraying themselves against so widespread a movement for consolidation. The most desirable solution, she thought, would be one head for all educational departments.

Dr. Batt favored not one man as head, but three or five, one of whom should be a representative librarian.

Miss Stearns was to finish the discussion, but she said the matter had been summed up by Miss Wales, and that nothing could be added to the suggested solution.

Miss Julia E. Elliott outlined a plan for organizing school libraries by mail. She thought the total expense would be about the same as hiring a librarian at \$75 a month. She asked for suggestions for the use of standard or commercial size cards, for modification of cataloging rules, and other details of the work.

Miss Bascom reported for the committee on the preparation of study outlines, saying that after discussion, it had been found impracticable to ask commissions to contribute toward the salaries of a specialist to prepare outlines. The H. W. Wilson Company was considering the preparation of such outlines, and it seemed advisable to co-operate with the firm. The report

was referred to the publishing committee for action.

It cannot be said that any consensus of opinion followed all these animated discussions. All sides of the question were presented with enthusiasm. If there was a majority opinion, it was that duplication should be avoided, but each department was willing to leave to some other agency the honor of withdrawing from the field.

The full discussions cannot fail to result in a better understanding and continued progress in efficiency and economy of administration.

MRS. MINNIE C. BUDLONG, *Secretary.*

American Library Association

At the meeting of the publishing board of the American Library Association, in Chicago, Jan. 2, it was voted that such members of the Association as wish to do so be invited to suggest another name for the A. L. A. Booklist. Suggested names may be sent to the secretary, who will duly transmit them to the publishing board for their consideration. George B. Utley, secretary, American Library Association, Chicago.

Notice—In preparing a pamphlet on library publicity for the American Library Association the undersigned suggests that samples of printed advertising and items of publicity methods be sent to the following address: Charles E. Rush, Librarian, Public Library, St. Joseph, Mo.

Library Organizations

MASSACHUSETTS LIBRARY CLUB

On Jan. 22, 1914, the eighty-third meeting of the Massachusetts Library Club was held at Somerville.

An innovation in the order of procedure was noted. The morning session, held immediately after the inspection of the new building, was devoted to round tables. The afternoon session was opened by President Hall, who after expressing Dr. Durrell's regret at not being able as president of the board of trustees of the Somerville Library, to welcome the Club, proceeded with the business.

The round table conducted by Mrs. Coe and Miss Williams brought out many new

features in regard to both classification and reference work.

Miss Williams said that the object of the reference department of the Somerville Library is to prove that all books are reference books in the broader sense of the word; that they are different in degree, not in kind, from other books. In working out her idea she has found that "reference and information work has at least three different aspects: social, the effort to create the proper atmosphere, guidance in the choice of light reading; serious research; and suggestive and instructive work." In order to socialize the books: first, one half of the "reference books" formerly so called, have been put into the circulating department of the library (there is no reference room at Somerville); second, general reference books have been put into one section by themselves; third, reference books dealing with specific subjects have been put at the beginning of their classes with the circulating books, *e.g.* all 600 reference books go at the beginning of Useful arts.

The results of such an arrangement after two weeks' test at Somerville have been encouraging. There is, of course, a demand on the part of the public for the circulation of reference books. This has been complied with without ensuing disaster. Miss Williams recognizes the fact that the working out of such a scheme will differ according to the individual needs of each library. She made some helpful suggestions as to carrying the work on, indicating that a special loan system for charging reference books would be necessary, also that to keep a list of questions asked and a special loan record would be indispensable from the point of view of the worker. Further details in regard to the work may be had from the *Bulletin of Bibliography*, vol. 8, no. 1, p. 3.

The questions asked Miss Williams proved the interest with which her ideas were received. Were encyclopedias, year books, French and German dictionaries, the Dictionary of national biography, circulated? To which the answer was, yes, if one's resources warranted it. Were *z.* fines sufficient? Yes, but overdue notices were sent immediately. Were answers to difficult reference questions kept? Yes. Miss Forrest of Milton here pointed out that to keep such answers on colored cards and to incorporate them into the regular catalog was most helpful.

Mr. Belden presided over still another round table on "Ways and means of professional development."

Miss Hooper, librarian of the Brookline Pub-

lic Library, made clear to begin with that she believes nothing of greater help in professional development than the library itself, the rewards of work in such a place she considers tremendous, instead of giving all, librarians receive greater benefits from the people whom they serve than they can ever hope to confer. Mutual understanding and friendliness between fellow workers and between departments will also tend to bring out the best in each individual member of a library staff; "a librarian herself can do much by her own attitude toward her staff to promote this condition, especially through her own friendly relations with them, by avoiding as far as possible the exercise of authority in unessential details, and by respecting individual judgment in her assistants wherever it can be found; no person of original and independent mind and mature judgment wants to work continually in leading strings." Far from considering that high salaries will produce efficiency, Miss Hooper believes that capability in an assistant once proved, the better salary will, or ought to, follow. "As for higher technical training in library methods we value that, but above all else we value character and personal fitness for the work, and the training of school and college education in library methods."

Mr. Shaw of Worcester, Mr. Wellman of Springfield, Mr. Wadlin of Boston, Miss Donnelly of Simmons College, Mr. Fison of Malden, Mr. Tripp of New Bedford, and Mr. Hall of Somerville took part in the discussion which followed. Various opinions as to the function of the library schools and library training were expressed. The schools are the avenue for a great many who would like to enter the work. Again librarians frequently prefer to train their assistants in their own ways. Miss Donnelly in speaking of the ideals of library work, added to the undisputed qualifications of good health, character, good disposition, and intellectual gifts which are necessary in the make up of the best library assistants, accuracy, ability to work without supervision, *i. e.*, to take a suggestion and to develop it, and ability, not only willingness, to be shifted around and thus to develop into an all-round person. Other opinions varied from "it is a question of money when you get right down to business," to "the whole situation resolves itself round the books." Mr. Hall's suggestions were practical, looking as they did toward the circumstances under which the best work on the part of assistants is possible: he would have labor and hours of labor at-

tractive, and he would have some sort of retirement system for library workers, as well as for teachers and for employes of the state including those in the State Library. For such an end, in his opinion, the Library Club ought to be represented in the legislature—to make a beginning towards better library laws, better professional standing and inclusion in any general retirement scheme.

"Schools and club work and the public library" was the topic under discussion at the round table conducted by Miss Crain and Miss Lovis.

The program of this section included the names of Mr. Clarke, superintendent of schools in Somerville, Miss Lovis the high school librarian, Miss Thuman of New Bedford, Miss Guerriere, librarian of the Boston North End branch library, and Miss Lockwood of Brookline.

Mr. Clarke to make clear the situation between the schools and the library from the school standpoint asked the question "What are the schools trying to do?" His answer was, "Trying to acquaint the child with the various activities of life. For instance, if a child is to know anything of shop practice, it is most desirable that he be allowed to work in the shop as part time on his school schedule. Or if he is to study civics, it is desirable for him really to see demonstrated certain municipal activities. In the same way the library should be a sort of laboratory in which art, literature, history and other subjects are demonstrated through books."

Miss Lovis, the high school librarian, is appointed by the school board from the library staff, and her work is carried on under the library's direction. One half her salary comes from the appropriation for the schools. She spends half of her time in the high school during school hours, the rest of her time in the public library at the disposal of teachers and students. Her duties include visiting the schools to get acquainted with teachers and pupils, discussing with the teachers the kind of illustrative and supplementary material the library can supply in given courses, making suggestions to pupils on outside reading, sending books on deposit, and talking upon how to use the library.

Miss Guerriere outlined the work of her boys' and girls' clubs. However, she is of the opinion that club work is outside the province of the library, since to be well conducted, it needs more time than a library can give. Miss Lockwood agreed that libraries have no time for clubs, nevertheless they have been her best

means of subduing the gangs of boys and girls that have overrun the children's room.

At 2:15, after luncheon served at the high school cafeteria, the afternoon session of the Club was called to order by Mr. Drew B. Hall, president.

The first business to be considered was the report of Mr. Belden for the committee on coöperation. The entire state has been divided into library groups containing from three to twelve libraries in each group. This districting has been done under the direction of the secretary, Miss Hooper, and the office secretary of the Commission. Not long since, a letter was sent to the local secretaries by the Chairman of the Committee, asking for a report of progress. At that time, neither Norfolk nor Essex County had been districted and there were certain sections in the central part of the state still unprovided for. Fifty-five local secretaries are now serving in this work of coöperation and their activities cover the entire state. Thirty letters were received in reply to the letter of the chairman. They may be summarized briefly as follows:

Eight local secretaries, up to the time of receiving the letter, had done nothing. They promised immediate activity, however, and will submit reports of progress at a later date. Five local secretaries had held organization meetings in their own libraries, and seventeen local secretaries reported that they had either written or visited the libraries in their group and that the much desired personal relationship was being developed. In one group bi-monthly meetings have been arranged for the year. This same group has also effected a system of exchange of library periodicals. Another group is to hold a round-table conference once every four to six weeks; another is to hold a conference once every three months. Another says that the libraries are glad of the opportunity to submit reference questions, problems in classification, and cataloging. One of the larger libraries invites the smaller libraries to visit and inspect the books received on approval for a period of a week once each month.

Mr. Wellman of Springfield, made the report for the Committee on the State Library. In considering the possible relation of the State Library to the public libraries of the Commonwealth, the committee agreed that radical innovations involving large expenditures are at present wholly unnecessary. The committee, however, suggested that the State Library might appropriately aid the public libraries by offering to furnish information, par-

ticularly on municipal and sociological questions, which would obviate to some extent the duplication of reference work; and that it also might appropriately offer to lend books to public libraries so far as may seem feasible and expedient, supplying particularly books which the little library is unable to own, and especially expensive or comparatively little-used books. Many such books are so seldom used in the small libraries that a single copy available at the State Library would suffice. On the other hand, the same book is often used in a large library too frequently to permit of its being loaned to the small library.

After finishing his own report Mr. Wellman read a minority report in the form of a letter received from Mr. Ballard of Pittsfield.

The report of the committee was accepted, and the chair then appointed the following persons to act as this committee for the coming year:

Mr. George H. Tripp, Public Library, New Bedford, chairman; Mrs. John Lawrence, trustee, Public Library, Groton; Miss Katharine P. Loring, trustee, Public Library, Beverly; Mr. Robert K. Shaw, Free Public Library, Worcester; Mr. John G. Moulton, Public Library, Haverhill, secretary, Massachusetts Library Club.

A report on periodicals was made by Mr. Tripp of New Bedford, and following it resolutions were adopted endorsing the action of the state board of library commissioners in requesting an increase in its appropriation from \$4000 to \$10,000 for the aid of free public libraries, especially in small towns and in those having a large foreign-born population. A committee of three was appointed by the president of the club, with power to enlarge its membership, to further the enactment of the legislation recommended, by enlisting the interest of library trustees, librarians and others, by appearing at legislative hearings, and by all other legitimate means. The members of this committee are: Mr. William W. Bryant, trustee, Cobb Library, Bryantville; Miss Louisa M. Hooper, librarian, Public Library, Brookline; Mr. Robert K. Shaw, librarian, Free Public Library, Worcester.

Dr. Charles L. Noyes, of the board of trustees of the Somerville Public Library, read a parable. In it he expressed his own happy faith in the laws of continuity and of complementariness as they applied to all forms of work, more particularly in this case, as they apply to the work and the workers of the library.

Mr. Shaw, at the end of the afternoon's

program made a motion for a rising vote of thanks to the Club's hosts and hostesses for its delightful entertainment. The motion was heartily carried.

The annual dinner of the Club was held at the Exchange Club, Boston. Mrs. Christobel W. Kidder read "Dolly reforming herself" by Henry Arthur Jones.

EUGENIA M. HENRY, *Recorder*.

NEW YORK LIBRARY ASSOCIATION

At the meeting of the executive committee of the New York Library Association it was decided to accept Dr. Schurman's invitation to hold the twenty-fourth annual meeting at Cornell University, Ithaca, N. Y., the week of Sept. 6, 1914. The earlier date will accommodate many of the school librarians and it is expected that this meeting will be a large one.

The secretary was directed to prepare a circular encouraging membership in the Association. This is to be sent to non-members who are library workers in the state.

One hundred and fifty dollars was granted to the committee on institutes to further its work in conducting library institutes throughout the state.

HARRIET R. PECK, *Secretary*.

ROCHESTER DISTRICT LIBRARY CLUB

A meeting of the Rochester District Library Club was held on Tuesday, Jan. 20, at the Genesee branch of the Rochester Public Library. Twenty-one were present. The minutes of the previous meeting were read and approved. The report of the periodical committee was presented by Miss Adams. The call for the report of the committee on sets revealed the fact that there was uncertainty as to the chairman of the committee. In order to avoid future uncertainty, the committee was declared to consist of Miss Eleanor Gleason, chairman; Mr. G. B. Ewell, and Miss Collins. The report of the nominating committee was presented by Miss Gleason. The committee presented the same officers for re-election: president, Mr. Yust; vice-president, Miss Collins; secretary-treasurer, Miss Sayre. Action on this report was delayed for a short time. The report of the meeting of the executive committee containing suggestions as to future meetings was read by the secretary—Feb. 13, March 13, April 10. The date of the May meeting was left open, depending somewhat on the plans of the State Library Institute committee. The following suggestions for topics were pre-

sented: 1, Book reviews; 2, Work necessary to see book through from author to bookseller; 3, Practical talk on binding (with, if possible, illustrations of different methods of treatment); 4, Rochester history; 5, Private libraries in Rochester; 6, Debate on woman suffrage. It was moved and seconded to accept the report of the nominating committee. The question was put by Miss Zachert, and the officers of the previous year were declared re-elected. Following the business session, a paper which comprised an epitome of Emerson's twelve principles of efficiency was read by Mr. Yust. After adjournment a social time was enjoyed and refreshments were served.

On Feb. 13 the club met at the Law Library in the Court House. There were fourteen present. Minutes of the last meeting were read and approved.

A communication was read from Mr. Wynkoop, asking the club to conduct the New York State Library Institute for this district. Motion made and carried that the club conduct the Institute. Motion made and carried that details of arranging for this Institute be left to the executive committee. Discussion regarding the suitability of the club's contributing to the A. L. A. exhibit at Leipzig. It was decided that owing to the condition of the treasury it would not be possible to contribute. Mr. Irwin Taylor then gave an interesting talk on the history and work of the Law Library. An agreeable surprise was furnished at the close of the meeting by the valentines and the refreshments which Mr. Taylor generously provided.

ETHEL F. SAYRE, *Secretary*.

MAINE LIBRARY COMMISSION

The Maine Library Commission held a meeting Feb. 6 at the State Library in Augusta, all the members being present. Among other things decided upon, it was voted to send delegates to the annual meeting of the American Library Association to be held during the month of May in Washington, D. C. It was also decided that the summer school should be omitted this year, and it is probable that in its place one or two library institutes will be held in different parts of the state. The chairman of the commission was instructed to confer with the state superintendent of schools in order that coöperation may be secured between the commission and the state department of education. Prof. George T. Little of Bowdoin College read a very interesting

paper, giving a report of the last meeting of the American Library Association. The members of the commission are: Prof. W. H. Hartshorn, (chairman), Lewiston; Mrs. Kate C. Esterbrooke, Orono; Prof. George T. Little, Brunswick; J. H. Winchester, Corinna; H. C. Prince, (*sec. ex-officio*) Augusta.

PENNSYLVANIA LIBRARY CLUB

The third meeting of the Pennsylvania Library Club for the season 1913-1914 was held on Monday evening, Feb. 9, 1914, in the auditorium of the Historical Society of Pennsylvania. Dr. Edward J. Nolan presided, the president, Dr. Cyrus Adler, being unavoidably absent.

After a brief business session, Dr. Nolan introduced the Hon. Samuel W. Pennypacker, who gave a short but very interesting sketch of "Early Pennsylvania literature," showing that James Ralph, about whom very little is generally known, was one of the most distinguished figures in American literature; that "of all Americans, down to the time of the Revolution, Ralph had attained the highest distinction and had done the most work in English literature."

Franklin's place in literature was placed by the speaker in a comparatively low rank, as his claim to distinction rested upon "Poor Richard's Almanac" and his "Autobiography," Mr. Pennypacker claiming that "the witty and pithy sayings in the Almanac were not original," and that the "Autobiography was almost immoral." He said that at the time Franklin was publishing his Almanac, Christopher Sauer was publishing one in German at Germantown, which was much better than Franklin's, he being the first journalist to publish pictures.

At the close, Mr. Pennypacker gave a short history of the Historical Society of Pennsylvania, and those present availed themselves of the opportunity to inspect this very beautiful building and its interesting contents, which are claimed to be worth between two and three million dollars.

JEAN E. GRAFFEN, *Secretary*.

TENNESSEE LIBRARY ASSOCIATION

The Tennessee Library Association held its annual meeting at the Carnegie Library in Nashville, Jan. 13, with Miss Marilla Waite Freeman, librarian of the Goodwyn Institute Library, Memphis, who is the president, in the chair. The librarians were welcomed to the city by Mr. G. H. Baskette, president of the Carnegie Library Board of Nashville and for-

merly president of the Association. Following Mr. Baskette, Miss Margaret Kercheval, librarian of the Carnegie Library, read a paper on "How to simplify our routine in public libraries." Mrs. Pearl Williams Kelley spoke of the simplification of the school libraries. Mrs. Kelley, in speaking of the importance of the school libraries, said that the "three r's" no longer control the child's education; that the modern controlling forces were the "three l's," the library, the laboratory and the lecture. She also said that the child that reaches the high school with no books except his text books is poorly equipped and does not get the best out of his work. "Many high school courses would be more effective," said she, "if some of the pressure of the examinations was removed and library readings substituted."

An interesting talk was made by Miss Jennie Lauderdale of Dyersburg, formerly state librarian, on "The librarian and social movement," and Miss Margaret Dunlap, librarian of the Public Library, Chattanooga, gave a very practical talk on "The city library as a social center." Miss Dunlap spoke of some of the plans that Chattanooga Library management had for making that institution of real social service, among them being to have the literary clubs meet in the library auditorium, and also to have weekly musicales, moving pictures, and other free entertainments that tend to the uplift of the social life.

Speaking on "What the state library can do for rural centers," Miss Mary Skeffington, state librarian, said that the state library was a potent factor in aiding the public forces, and especially was it an essential factor in public education. She spoke of the state library now having circulating libraries in fifty-nine counties, and said that the extension work was yet in its infancy, as it was planned to continue the work until there should not be a community in Tennessee that was not touched by the free circulating libraries.

ARKANSAS LIBRARY ASSOCIATION

The Arkansas Library Association will hold its annual meeting in Pine Bluff early in March. In agreeing on Pine Bluff as the meeting place it was felt that an impetus could thus be given the library movement now being started in that city, and at the same time afford encouragement to several cities in the same section of the state who could not be expected to attend a meeting in Fort Smith, the other contestant for the honor.

Library Schools

NEW YORK STATE LIBRARY SCHOOL

The course in Library work with children was given during the first week of February by Miss Clara W. Hunt, of the Brooklyn Public Library. A good collection of children's books, part of them recent purchases for the school's collections and part a loan from Miss Hunt, were on exhibition to illustrate specific points raised in Miss Hunt's lectures.

Recent lectures by visitors and members of the staff of the New York State Library other than those in charge of regular courses in the school have been as follows: Jan. 19. Caroline F. Webster, library organizer. Organization of small libraries. Jan. 23. Mary C. Chamberlain, librarian for the blind, New York State Library. Work for the blind.

Jan. 27-28. Hiller C. Wellman, librarian, Springfield (Mass.) City Library Association. Library advertising. (2 lectures.)

Feb. 13-14. Dr. Arthur E. Bostwick, librarian, St. Louis Public Library. Some lost arts of librarianship; Art of re-reading. (2 lectures.)

A collection of juvenile books has been begun by the school. A gift of several hundred older American books dating from 1771 to 1878—the gift of the Wisconsin Historical Society—forms the nucleus of the collection. A few others have been given by friends of the school and a fairly representative selection of the best modern juveniles has been purchased. Further gifts of juveniles of any period or kind will be welcomed. To save unnecessary trouble and the possibility of confusion with the main collections of the library, they may be addressed to Miss Woodworth, care of the New York State Library School.

A series of popular lectures on various social and scientific subjects is being given in the auditorium of the State Education Building, which has also become a favorite meeting place for state and local associations devoted to civic and social welfare. Among recent lectures have been an illustrated description of the work of Hampton Institute, a lecture by Director Benjamin Boss of the Dudley Observatory, on "Some attempts to solve the riddle of the universe," and an illustrated lecture by Dr. J. Leon Williams on "Human evolution."

These lectures and meetings are open to all students of the school. The State Normal College has also been conducting a very interesting series of lectures and entertainments, including dramatic recitals, folk-song recitals, and illustrated travel lectures. Through the courtesy of the college, students interested have been given free admission to these entertainments. Several have also been attending a lecture course on Browning given by Dr. William Lyon Phelps, of Yale University.

F. K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

The annual luncheon of the Graduates' Association was held at the Hotel Algonquin, New York, Wednesday, Jan. 28. There were 95 in attendance, including a full delegation from the class of 1914. These were sprinkled by twos among the company so that each of them met a number of the older graduates. Mrs. Adelaide B. Maltby, the retiring president, presided. Mr. Stevens spoke about the new club house which is in course of preparation for the use of the women students of the Institute. Each school is to have a special room which is being furnished by its graduates. Mr. Franklin F. Hopper, of the class of 1901, told of some of the influences making for library progress in the Northwest. The vice-president presented a résumé of the results gathered by the questionnaire recently sent out to the graduates, a full report of which will be found elsewhere in the JOURNAL. The officers of the Association elected for the ensuing year are president, Miss Anna C. Tyler, of the New York Public Library; vice-president, Mr. Franklin F. Hopper, of the New York Public Library; secretary, Miss Fanny A. Sheldon, of the Brooklyn Public Library; and treasurer, Miss Caroline Chapin, of the Pratt Institute Free Library.

The students have been so fortunate as to hear Alfred Noyes twice this winter, at the meeting of the New York Library Club, and on Feb. 19 when he gave a reading from his own poems at Pratt Institute.

Mrs. Frances Rathbone Coe, class of 1903, of the Somerville, Mass., Public Library, talked to the students on "Advertising the work of a public library" on Jan. 30.

Miss Mary Casamajor, of the Brooklyn Public Library, gave two lectures on the work of the branch library on Feb. 3 and 10. In the first lecture she dwelt upon the relation of the branch library to its community, and in the

second lecture upon the administrative problems of the branch library.

Dr. Arthur E. Bostwick lectured in the Assembly Hall on Tuesday afternoon, Feb. 17, on "Some lost arts of librarianship." The members of the Brooklyn Public Library staff were invited to attend this lecture.

ALUMNI NOTES

Cards have been received announcing the marriage on Jan. 20 of Miss Edith E. Hunt, class of 1895, to Mr. Chester J. Randall.

Miss Annie Lyle Lee, class of 1910, head of the circulation department of the New Rochelle, N. Y., Public Library, was married on Feb. 11 to Mr. William Henry Hax of New Rochelle. Mrs. Hax expects to continue her connection with the library, working half-time.

Miss Mary F. Stebbins, class of 1912, Cleveland Training Class, 1913, formerly children's librarian of the Miles Park branch of the Cleveland Public Library, has been made school reference librarian of the Utica Public Library.

Miss Mabel E. Balston, class of 1913, is substituting in the Ethical Culture Library of New York during the absence from illness of the librarian, Miss Ina Rankin, class of 1909.

Miss Mary A. Randall, class of 1913, who entered the Training Class for children's work of the Cleveland Public Library in September, left there in January to become head of the South Side Branch of the Fort Wayne Public Library.

JOSEPHINE ADAMS RATHBONE, *Vice-Director*.

NEW YORK PUBLIC LIBRARY—LIBRARY SCHOOL

The juniors have had the following lectures from librarians and others during the past month:

"Baroda libraries," on Jan. 21, by Mr. W. A. Borden, organizer of the Baroda system of libraries, with a supplementary talk on East India life by Mrs. Borden. The lecturers answered many questions afterward at a school tea, and exhibited many of the treasures they had collected during their residence in Baroda.

"Prints," and "Book-illustration," on Jan. 14 and 21, by Mr. Weitenkampf, of the library staff. Afterward the lecturer set the class the problem of naming the reproductive processes illustrated by some twenty pictures selected for the purpose.

"Large library administration," by Mr. Anderson, and "Branch library administration," by Mr. Adams, on Jan. 28 and Feb. 4.

"Poetry and American life," on Feb. 4, by Mr. Robert Underwood Johnson, formerly editor of the *Century Magazine*.

Senior lectures have been as follows:

Advanced reference and cataloguing course: "Literature of ornithology," and "Literature of zoology," by Prof. F. F. Burr, of Columbia University, Jan. 20 and 27. "Literature of botany," by Miss Sarah H. Harlow, of the Botanical Garden Library, on Feb. 3.

School and college library course: The same as above, with the continuation of the "History of printing, and work on early printed books."

Administration course: "Publicity for libraries," by Mrs. Frances Rathbone Coe, of the Somerville (Mass.) Public Library, and Mr. F. C. Hicks, acting librarian of Columbia University, on Jan. 29 and Feb. 5. Visits to grades 6-8 of the public schools. Presentation of reports on visits to grades 1-8. Problem: Writing of imaginary library report, based on stated conditions of locality and library.

Students attended the meeting of the New York Library Club the evening of Jan. 22, at which Mr. John Collier spoke on "Moving picture shows." Mr. Collier's address aroused much interest, as he proved successfully the existence of a commercial monopoly making it hard to secure enough good films and repetition of good films by schools, churches, libraries, and other institutions desiring to make an educational use of the same.

MARY W. PLUMMER, *Principal*.

LIBRARY SCHOOL OF THE UNIVERSITY OF WISCONSIN

The School had a most interesting and profitable day on Monday, Jan. 5, when work began after the holiday recess. Mr. E. H. Anderson, president of the American Library Association, and Dr. Frank P. Hill, spent the day at the School, each giving two addresses. Mr. Anderson spoke in the afternoon on "Library administration" from the standpoint of human relations and in the evening on "The work of the New York Public Library," using many lantern slides. Dr. Hill gave two lectures in the morning on "Library service." Tea was served in the afternoon, as a pleasant introduction to the resumption of study, and especially to afford all an opportunity to meet Mr. Anderson and Dr. Hill socially. Dr. William C. Daland, president of Milton College, lectured before the School on Jan. 22, speaking on the subject of "Words and their significance." Dr. T. S. Adams of the Wisconsin

Tax Commission on Jan. 24 gave a valuable discussion of "Books in political economy," and Miss Mary A. Smith of the Madison Public Library gave a forceful presentation of the topic, "Instructing pupils in the eighth grade on the use of the library."

The first semester closed on Jan. 27, with examinations in each subject. On Jan. 29 the students started for their field appointments, which work marks the beginning of the second semester. Following are the appointments, which have been most carefully planned to afford each student the experience needed to supplement both preparatory experience and formal work in the School. Thirty-one libraries have opened their doors as laboratories for 29 students during the two months, and the work as assigned may be broadly classed as indicated in the following lists:

Special Cataloging

- Beloit College—February, Miss Congdon.
 Boscobel—March, Miss Evans and Miss Hedenbergh.
 Chippewa Falls—March, Miss Stockett.
 Cumberland—February, Miss Coon and Miss Ingram.
 Janesville—February, Miss King and Miss Jacobus; March, Miss King and Miss Hanson.
 Kilbourn—March, Miss Lutkemeyer and Miss Kjellgren.
 Mayville—February, Miss Emmons and Miss Friedel.
 Milton College—February, Miss Sharp; March, Miss Congdon.
 Oconomowoc—February, Miss Rice and Miss Hanson; March, Miss Rice and Miss Burt.
 Racine—February, Miss Love; March, Miss Cox.
 Ripon College—February, Miss Easton.
 Shawano—March, Miss Love and Miss Kimball.
 Tomahawk—February, Miss Marshall; March, Miss Sharp.
 Wisconsin Free Library Commission—Study Club Department, February, Miss Cox and Miss Stockett; March, Miss Bingham and Miss Brown.

As Acting-Librarian

- Barron—February and March, Miss Lewis.
 Darlington—February and March, Miss Grace.
 Stanley—February and March, Miss Wieder.

Assistants for Special Work

- Beloit Public—February, Miss Kjellgren; March, Miss Friedel.

New London—February and March, Miss Andrews.

Prairie du Chien—March, Miss Evans.

Prairie du Sac—February, Miss Brown.

Rice Lake—March, Miss Easton.

Waukesha—March, Miss Coon.

Whitewater—February, Miss Evans.

Wisconsin Historical Library—February and March, Miss McGovern.

Assistants in Regular Library Work

Fond du Lac—February, Miss Lutkemeyer; March, Miss Marshall.

Madison Public—February, Miss Kimball; March, Miss Clancy; February and March, joint course students, Miss Angvick, Miss Baker, Miss Clark, Miss Fieldstad, Miss Farr, Miss Muench.

Marinette—February, Miss Clancy.

Oshkosh—February, Miss Bingham; March, Miss Emmons.

Superior—February, Miss Hedenberg; March, Miss Jacobus.

Watertown—February, Miss Burt.

SCHOOL NOTES

Mr. Dudgeon, Miss Hazeltine, Miss Bascom, and Mr. Lester attended the meeting of the faculty of the library schools and the League of Library Commissions in Chicago, Dec. 31 to Jan. 2. Miss Hazeltine was the chairman of the Faculty meeting.

Miss Mary F. Carpenter entertained the faculty, students, and a few friends of the School at her home, on the evening of Jan. 27. The evening was devoted to a dramatic reading of "Disraeli," the drama written for George Arliss by Louis N. Parker. It was pronounced one of the most successful of the series of readings given during the last few years for the School. The parts were read by Mr. Ewing, Prof. Goodnight, Mr. George Bascom, Prof. and Mrs. Beatty, Mr. and Mrs. Dudgeon, Miss Bascom, Miss Humble, Mrs. Koelker, Miss Carpenter, Mr. Lester, Mr. Schatz and Mr. Turner.

ALUMNI NOTES

Miss Laura F. Angell, '07, was married on Jan. 28 to Mr. H. H. Henry. Miss Angell had been librarian of the Aram Public Library, Delavan, Wis., since its organization in 1908. Mr. and Mrs. Henry are to make their home in Lincoln, Ill.

Miss Lydia E. Kinsley, '07, accepted an appointment in the branch library system of the Detroit Public Library on Jan. 1.

Miss Lucile Cully, '08, librarian of the Pub-

lic Library, Kewanee, Ill., was married on Dec. 17, to Mr. E. G. Taylor. Their home is 403 South Chestnut street, Kewanee.

The classmates of Miss Alice S. Wyman, '10, will learn with sorrow of the death of her mother in November.

Miss Bessie H. Dexter, '11, resigned as children's assistant in the branch system of the Carnegie Library of Pittsburgh, to accept a similar position in the Public Library of Detroit.

Miss Marion E. Frederickson, '13, became acting reference assistant in the Gilbert Simmons Library, Kenosha, Wis., on Jan. 1.

Miss Margaret E. Bucknam, formerly a joint course student in the class of 1914, was married on Dec. 25, to Mr. M. C. Sjoblom.

Miss Genevieve Mayberry, Summer School 1908, was married on Nov. 29, to Mr. George B. Averill, Jr. Their home is in Milwaukee. Mrs. Averill was librarian of the Farnsworth Public Library, Oconto, Wis., at the time of her marriage. Mr. Averill was formerly librarian of the Madison, Wis., Public Library.

Miss Harriet L. Kidder, Summer School 1913, became assistant librarian in the University of Montana, Missoula, in November, 1913.

WESTERN RESERVE LIBRARY SCHOOL

NEWS NOTES

Library work with children has received emphasis in the school during the past month because of the lectures given by Miss Caroline Burnite, director of children's work of the Cleveland Public Library, on the "Administration of children's rooms," and by Miss Effie L. Power, head of the Children's Department of the St. Louis Public Library, on "Literature for children."

The director began the new course on "The public library and community welfare" with an introductory lecture, Feb. 10, on "The new spirit of social and community responsibility." There will be weekly lectures in the course by the director and visiting lecturers, some of the subjects being: Inter-relation of organizations and agencies for community betterment; National organizations, foundations and publications; The library's place in the scheme; Organization and supervision of boys' and girls' clubs; Work with study clubs, preparation of study outlines, etc.; Recreation as a community necessity; The librarian as a public speaker and civic promoter, etc. Dr. Arthur E. Bostwick, librarian of the St. Louis Public Library, was the first visiting lecturer in the

course, Feb. 11, his subject being "The social center idea." His address was received with enthusiastic appreciation, and the informal discussion which followed proved very helpful.

The class had the pleasure in January of hearing a talk by Miss Brenda Franklyn, of London, England, temporarily residing in Cleveland as a miniature artist, on the English militant suffrage movement. As Miss Franklyn is a personal friend of Mrs. Pankhurst, she gave an informing and entertaining view of the subject. Miss Clara L. Myers, associate professor of English at the College for Women, gave a lecture on "The essay" before the class in book selection, in February.

The director entertained the class and faculty at her apartment for afternoon tea on Saturday, Jan. 24.

ALUMNI NEWS

Ethel M. Knapp, '07, formerly librarian of the Mt. Vernon, Ohio, Public Library, is now cataloger at the University of Indiana Library.

Audiene Graham, '13, has been appointed librarian of the Owatanna, Minn., Public Library.

Alice S. Tyler, *Director.*

CARNEGIE LIBRARY OF PITTSBURGH—TRAINING SCHOOL FOR CHILDREN'S LIBRARIANS

Miss Effie L. Power, supervisor of children's work in the St. Louis Public Library, gave her annual course of ten lectures to the school Jan. 26-31. The subjects of the lectures were:

"The beginnings of a literature for children, with special reference to fiction" (2 lectures); "Five great children's classics" (2 lectures); "Standard fiction" (2 lectures); "Popular fiction;" "Administration of children's rooms;" "Organization of a children's department;" "Work with normal schools."

ALUMNAE NOTES

Elizabeth Dexter, class of 1914, has resigned her position on the staff of the Pittsburgh Library to accept an appointment as children's librarian in the public library of Detroit, Mich.

Edith Morley Smith, class of 1904, has been appointed temporary registrar of the Training School, in the absence of Miss Margaret MacDonell.

RIVERSIDE PUBLIC LIBRARY—LIBRARY CLASS

The students in the winter library class which ended Feb. 28, were registered from the following towns: Fenton, Mich.; Freeport, Ill.; Canyon City, Colo.; La Mesa, Cal.; Corona, Azusa, Colton and Redondo Beach, Cal.;

Wabash, Ind.; Bellingham and Olympia, Wash.; Pasadena, Beaumont, Hemet, Escondido and Tuolumne, Cal.; Hinsdale, Ill.; Santa Barbara, Cal.; Anacortes, Wash.; Canfield, Ohio; Visalia and Whittier, Cal.; Greenfield, Ia.; Pomona, Los Angeles, San Bernardino and San Diego, Cal. All students have had previous experience in library work, except one. A long list of teachers and lecturers was engaged for the winter term, two of the most widely recognized in their lines of endeavor being Miss Mary E. Robbins, head of Simmons College Library School, Boston, and Miss Ida M. Mendenhall, of New York. One day of each week was devoted to outdoor work. A study of the program schedule shows that courses and lectures were given on business methods and administration, book selection and supervision, reference service, classification, cataloging, documents, children's libraries, library handicraft, the child and the story hour, periodicals and serials, binding, library law and county system, and the library as a social center.

DREXEL INSTITUTE LIBRARY SCHOOL

Recent visiting lecturers have been as follows:

Jan. 29. "Library organizing," by Miss Helen D. Subers, Drexel '03.

Feb. 2. Two lectures on "Order work," by Mr. Arthur L. Bailey, librarian Wilmington Institute Free Library.

Feb. 10. Two lectures on "Library buildings," by Mr. William R. Eastman.

Feb. 13. Two lectures, "Administration of a large public library" and "The work of the New York Public Library," by Mr. Edwin H. Anderson, director New York Public Library.

Feb. 19. "Some lost arts of librarianship," by Mr. Arthur E. Bostwick, librarian St. Louis Public Library.

Feb. 26-27. Three lectures, "The story interests of the child at different ages," "The preparation and presentation of the story," "Principles of book selection for children," by Mrs. Edna Lyman Scott.

The director spent Dec. 31-Jan. 11 in attending the Library School Round Table at Chicago and visiting the public libraries of Chicago, Detroit, Cleveland, and the Carnegie Library of Pittsburgh. She spoke before the Western Reserve Library School, the Cleveland Training Class for Children's Librarians, the Training School for Children's Librarians at Pittsburgh, and the staff of the Detroit Public Library.

CORINNE BACON, *Director.*

SIMMONS COLLEGE LIBRARY SCHOOL

With the opening of the second term on the first of February, many of the most important technical courses began. The sophomores and college graduates are being initiated into the decimal classification by Miss Hill; the advanced classes, seniors and college graduates, are studying the history of libraries, three times a week for the semester, under Mr. Bolton, and public documents, twice a week, under Mr. Belden.

Miss Jordan has also begun her course on children's work, required of juniors and open to college graduates, which has two meetings a week through the term.

The chief innovation of the year has been in the teaching of cataloging. The time devoted to it has been increased by fifty per cent., and consecutive courses are given in the sophomore, junior and senior years. Though the work is concentrated in the second term of each year, it practically becomes a "major" in the sophomore, senior and college graduate classes. Miss Theresa Hitchler, as an "efficiency expert," is laying out the courses and giving the instruction.

The Museum of Fine Arts is so close a neighbor that it has been possible to cooperate with it successfully. In addition to the course in the history of art which has been given as a regular part of the school program for some years, by Mr. Greene, in the Museum, this year the connection has been strengthened by an arrangement between the Museum and the college, which resulted in the following series of lectures:

- Feb. 5. Mr. Foster Stearns. "The library of an art museum." Given in the Art Museum Library.
- Feb. 12. Mr. Carrington. "The care and mounting of prints." In the print room.
- Feb. 19. Miss Turner. "The photograph department." In the photograph department.

The only visit of the month has been to the Library Bureau.

Miss Maud Campbell's lecture on "Work with foreigners," was one of the most stimulating of the year, one where the fifty minute period necessitated by the college schedule was all too short. The school is greatly indebted to the Massachusetts Free Public Library Commission for its loan of Miss Campbell and Miss Brown to give to the students an idea of what the commission's work really is.

JUNE RICHARDSON DONNELLY.

Reviews

NATIONAL LIBRARY OF IRELAND. Bibliography of Irish philology and of printed Irish literature. Dublin, 1913. 307 p. O.

To the conscientious and diligent student who desires to be thoroughly informed as to his specialty, a systematically arranged bibliography is an invaluable aid and one for which he is always deeply grateful. Those interested in Irish literature, whether ancient or modern, have heretofore been at a loss for such a systematic guide. This lack has now been admirably supplied by the publication with the authority of His Majesty's Stationery Office by Messrs. Brown and Nolan of Dublin of a work under the above title. As implied, a list of manuscripts in which the libraries of Trinity College, the Royal Irish Academy, the University of Oxford, and the British Museum are so rich, is left for a future work.

The book is based on the card catalog in use by the readers in the National Library, Dublin. This, of course, is confined to a record of the publications in the library, but its usefulness was so manifest that the trustees, on proper representation, authorized the enlargement of its scope so as to serve the needs of scholars everywhere. In view of the active interest in the Celtic revival, the publication is specially timely, although writers of the present century advancing and contributing to the movement are not included. The general list, however, is carried to the end of 1912. It is hoped that the extensive literature connected with the later cultural activities in Ireland may furnish material for another volume with equally beneficial results.

The catalog is issued under the direction of T. W. Lyster, the accomplished librarian of the National Library, the entire compilation of the bibliography being in charge of his associate, Richard Irvine Best, who contributes an informing introduction explanatory of the scope and plan of the work.

The modern Irish period is not treated with the same detail as the earlier, the articles in the weekly illustrated *An Claidheamh* and other current periodicals, for example, having been reluctantly omitted. The printed books of preceding centuries are, however, recorded with gratifying richness and detail.

Tracts in Latin are only recorded when they are translations from the Irish. Early translations into Irish from other languages which have an historic and linguistic interest are given, but recent translations are omitted.

The unavoidable complexity of the literature section is simplified by the alphabetical arrangement of the elaborate general index. This section is divided into tales, poetry, ecclesiastical tracts, and history, while the philological portion includes periodicals, dictionaries, etymologies, grammars, inscriptions and glosses. Manuscripts are only given as aids to the identification of edited texts.

In view of the fact that the so-called Ossianic poetry, although in its present form linguistically late, may have come down from an earlier period, a separate division has been made for it. The beginning of modern Irish poetry is fixed at the latter part of the fifteenth century or, more specifically, at the date of Philip Bocht O'Heniginn's poem on the Day of Judgment, the first printed in Irish.

Many difficult problems in the matters of selection, typography, orthography, and arrangement have been discreetly solved, and the result is a well printed and well bound volume of 307 pages. It furnishes an admirable illustration of how a matter of routine library economy may by intelligence and zeal be made to promote the culture of the world at large.

E. J. N.

PHILIP, ALEXANDER J., *ed.* The libraries, museums and art galleries year book, 1914. London, Stanley Paul & Co.; N. Y., R. R. Bowker Co., 1914. 470 p. D.

A fourth edition, completely revised and brought up to date, of "Greenwood's British Library Year Book." The bulk of the volume is devoted to reference lists of value to students, publishers and librarians.

The opening chapters summarize the work of the Library Association and its branches, of the Scottish Library Association, and of the Library Assistants' Association and its branches. Special emphasis is laid on the educational work of the association. The Education Committee formulates the course of instruction for prospective librarians, endeavors to organize educational facilities and assumes charge of the examination of students. Previous to 1907, summer schools and lectures specially arranged for by the committee were the only available sources of library instruction, but recently, through the efforts of the Association, several important universities and colleges have established courses in librarianship. The Municipal School of Technology has been holding such classes for some time. A list of requirements for candidates for examination is given. A statement of the object of the Association is followed by the new

by-laws. A list of annual meetings from 1877 to 1913 giving the date, place and presidency is appended, with announcements for the coming year.

Similar data is given for the Scottish Library Association and Library Assistants' Association. The last named publishes the *Library Assistant* and other publications of interest, notably a report on the system of standard hours for employment and salaries in relation to income, (Library Assistants' Assn. Ser. No. 4.)

The "chronological list of adoptions of the libraries act," with entries dating from 1848, shows the geographical expansion of public libraries in Great Britain. There follows a directory of the "librarians, curators and assistants in the libraries, museums and art galleries of the country," which gives, among other information, the number of years that the official has served in his present position.

"A subject index to the special collections contained in the libraries, museums and art galleries of Great Britain" will be of great service, particularly to students, teachers, authors and professional men. The student has but to turn to the subject of his interest to learn which libraries and museums contain this class of material. The year book also tells the conditions under which reference works may be borrowed or consulted.

Two "Select addressing lists," follow, one classifying as Section A libraries which purchase books to the amount of £100 or upwards annually, and the other, Section B, the smaller libraries which buy books in appreciable numbers.

The body of the year book is a concise encyclopedia of the libraries, museums and art galleries of Great Britain. Under each entry may be found the important data relating to the history, upkeep, capacity and special characteristics of the institution. The following quotation is representative of the information given:

"Chipping Barnet, Herts. HYDE INSTITUTE AND READING ROOMS. Founded in 1889. Tot. inc.: £256. Ann. expend.: Books, £10; bind., £2; periods, £28; sal. and wages, £75. One cleaner. Vols and pamphs. in stock: 5,200. Books are allowed out of the build. Classn.: Adjustable. Cat.: Classified ms. The Lib. is open to the inhabitants of Menken Hadley and Chipping Barnet. Librarian: Mr. Edmund Arthur Maxwell. Lib. hours, open weekly, 36; newsroom, 78."

Among the encouraging signs shown by this year's returns are the great increase in branch libraries and the improvement in the hours of assistants. While most of the material of this little volume specially concerns the inhabitants

of the British Isles, much of its information will be found available for practical as well as comparative purposes in this country.

Beginning with this edition from its new publishers, the book will be issued annually. The edition previous to this was the third, published for 1911.

M. K., R. M., & D. W.

A literature is the expression on the face of a nation. A literature is the eyes of a great people looking at one. It seems to be as we look, looking out of the past and faraway into the future.—GERALD STANLEY LEE, in "Crowds."

Librarians

BETTERIDGE, Walter R., has resigned his position as librarian of the Theological Seminary in Rochester, N. Y., after twelve years of service.

BLATCHFORD, Eliphalet, president of the Newberry Library of Chicago, died in that city Jan. 25, aged 87 years. Mr. Blatchford was one of the two original trustees of the estate of Walter L. Newberry and was charged with creating the Newberry Library of which he became president. He was a trustee of the John Crerar Library, and identified with many educational and religious institutions in the city.

DULLARD, John P., recently appointed librarian of the state library of New Jersey, has been appointed member of the New Jersey Library Commission in place of the late William C. Kimball.

DUNBAR, Mary E., B.S. Simmons 1911, who has been an assistant in the Mount Holyoke College Library for two and a half years, has received an appointment in the library of Grove City College, Grove City, Penn., and began her new duties Jan. 30. Miss Emma C. Grimes, Mount Holyoke 1905, has taken up the work at Mount Holyoke.

EDMONDS, John, of Philadelphia, celebrated his ninety-fourth birthday Feb. 4. Mr. Edmonds went to the Mercantile Library in the year 1856 and until 1902 served in the capacity of librarian. Since that time he has been as active as possible and aids the financial department of the library whenever he is needed. He is now librarian emeritus.

EHRENFELD, Rev. C. L., at one time state librarian in Pennsylvania, died Feb. 1 at his home in York, aged 81.

FREDERICK, Mrs. Eva Gaudin, has been appointed librarian of the Carthage (N. Y.) Free Library, in place of Miss Lena Dickson, resigned.

GRAVES, Eva W., B.L.S., N. Y. State Library School, '13, has resigned her position as assistant to the librarian of the John Crerar Library, Chicago, to go to the Seattle Public Library as general branch assistant.

KNIGHT, Marion A., classifier and annotator in the Carnegie Library of Pittsburgh from 1901 to October, 1913, has recently joined the editorial staff of the H. W. Wilson Company of White Plains. Miss Knight is engaged in editing a cumulated volume of the "Readers' guide supplement" which is to cover the years 1907-1913 in one alphabet, and which will supplement Poole's "Index to periodical literature" of which the last cumulated volume covered the years 1902-1906.

MACALISTER, Agnes H., a graduate of the Drexel Institute Library School in the class of 1906, has been appointed cataloger in the library of the American Philosophical Society of Philadelphia.

MILLER, Emily V. D., N. Y. State Library School, '10-'11, resigned as children's librarian of the Walker branch of the Minneapolis Public Library to become reference librarian in the Public Library at Birmingham, Ala.

OSBORN, Elizabeth C. (Mrs. Lyman P.) curator and librarian of the Peabody Historical Society, Peabody, Mass., died at her residence, 55 Central street, Peabody, on Wednesday, Feb. 11, after a brief and painless illness of three weeks. She was practically the founder of the Society, and its curator and librarian since its inception in 1896. She has been a member of the A. L. A. since 1900, and of the Massachusetts Library Club for many years. She is survived by her husband, Lyman P. Osborn, librarian of the Peabody Institute Library of Peabody.

PECKHAM, Dr. George W., died in Milwaukee Jan. 10, following a stroke of apoplexy. Born in Albany in 1845, he served in the Civil War in a Wisconsin regiment. After the war he attended college and completed a medical course at the University of Michigan in 1872. He did not practice medicine, however, but became principal of the high school in Milwaukee, which position he held until 1892, when he was made superintendent of schools. From 1896 to 1910 he was librarian

of the Milwaukee Public Library. He had held office in several scientific societies and was an authority on the life and habits of spiders and wasps.

QUAYLE, Dr. Milo, who has been professor of history at Lewis Institute, Chicago, has been chosen to succeed the late Dr. Reuben Gold Thwaites as superintendent of the library of the Wisconsin Historical Society. Dr. Quayle received his degree of doctor of philosophy at the University of Chicago in 1908, and has been at Lewis Institute since. He edited the manuscript diary of President Polk, and his "History of the old North-West" is a standard work on the subject.

REEDER, Charles W., assistant librarian of Ohio State University at Columbus has begun his new duties as chief librarian for the industrial commission. Mr. Reeder will have charge of the department of research and statistics. His appointment is the result of the policy of Governor Cox to make greater use of Ohio State University and its faculty members. Mr. Reeder will divide his time between the university and the industrial commission's offices. Mr. Reeder for several years has been connected with the university and has made a special study of the use of government statistics and documents.

RICE, O. S., clerk in the state library at Madison, Wis., has compiled a "Wisconsin Memorial Day annual" for 1914, in which is included material for the celebration of Memorial Day and Flag Day, Lincoln's Birthday, Washington's Birthday, and Peace Day. The state flag, in colors, is the main part of the cover design, and a special group of Wisconsin songs, with music, is added at the end of the book.

SANBORN, Henry N., librarian of the University Club, of Chicago, has accepted the position of secretary to the Indiana Library Commission, succeeding Carl H. Milam.

SANDERS, Mary L., resigned her position as children's librarian at Marion, Ind., and was married Oct. 15 to Wilmer Wilson.

SEARS, Minnie E., head cataloger at the library of the University of Minnesota since 1909, has resigned to accept a position in the public library of New York City, where she will be first assistant in the cataloging room of the reference department.

SMITH, Helen M., head of the loan department at the University of Minnesota Library for seven years, has resigned. Miss Smith was graduated from the University in 1906.

She is a member of Delta Gamma sorority. Miss Vivian C. Colgrove, formerly Miss Smith's assistant, will have charge of the department for the remainder of the year. Miss Blanche Young, a graduate of the University in 1912, will become Miss Colgrove's assistant.

SMITH, Ruth A., of Middletown, Ct., has resigned her position as teacher in Killingworth to accept an appointment in the circulating department of the New York Public Library. Miss Smith is a graduate of the Middletown High School and Simmons College summer course for librarians.

SMITH, Theodate L., for several years lecturer and librarian of the Children's Institute at Clark University and holder of degrees from Smith and Yale, died suddenly Feb. 16 in Worcester, Mass. She had been research assistant to Dr. G. Stanley Hall since 1902.

STRONG, Marjorie, has been appointed librarian of the Studebaker Library at Detroit, Mich. Miss Strong is a graduate of the University of Wisconsin Library School in the class of 1911, and has been for some time an assistant in the Studebaker Library of South Bend, Ind.

THOMAS, Professor Allen C., librarian of Haverford College, Haverford, Pa., has announced that at the end of this year he will retire from active work. The college will, however, still retain his services as consulting librarian. His perfect knowledge of the contents of the library and the relative worth of authorities on different subjects, will make his value in this capacity to readers very great. He will have an office in the building and will give an hour a day to the cause. Professor Thomas has been of great service also by his valuable knowledge of editions and prices, which has enabled him to act most efficiently in the purchase of books. Professor Thomas came to Haverford as prefect in 1878. Since then he has filled the chairs of English and of history, and during his whole career of thirty-six years has been librarian. The library contained 9000 volumes when he took charge, and now has 62,000 volumes. A thoroughly modern stack room, to contain about 90,000 volumes, has been completed this year.

WATERS, Carrie, who has been city librarian in San Bernardino, Cal., for a number of years, has been appointed county librarian and has resigned her city librarianship.

WILLIAMS, Mrs. Helen Broughton, who has been librarian at the Atheneum in Saratoga Springs for the last five years, died Feb. 6.

THE LIBRARY WORLD

A review of the important features of library progress in the United States during 1913 is included in the section devoted to "Libraries" which James I. Wyer of the New York State Library has compiled for the *American Yearbook* for 1913. Topics treated are Buildings, Legislation, Deaths, Appointments, American Library Association, Gifts, Bibliographic enterprises, Bibliography.

New England

MAINE

Biddeford. *McArthur L. Assn.* Emma Hatch, lbn. (Rpt.—yr. ending Jan. 31, 1913.) Accessions 674. Circulation 38,702. New registration 299 (104 French-speaking residents). Salaries amounted to \$1200, new books \$409.30, binding \$207.35.

Oxford. Oxford's new public library was dedicated early in February. The idea of the town's having a public library building originated with Mrs. Kate Starbird, who brought the matter before the members of the Ladies' Guild at a meeting three years ago. Through her efforts subscriptions were started and generous donations were made by the townspeople. Work was begun last August, the plans having been drawn by Harry D. Olmsted of Hartford, Conn. A. W. Walker & Son of South Paris were the builders and the approximate cost of the structure is \$3500. The lower part is constructed with cement blocks while the upper section is half timbered. The roof is shingled and stained green. The vestibule opens into the delivery room. At the left is the reading room, and at the right of the delivery room is the stack room. The books of the Freeland Holmes Library which have been in a room in the rear of Jones' drug store for many years, will be placed in the new building. There will be about 2000 volumes.

NEW HAMPSHIRE

Derry. The Adams Memorial Building was destroyed by fire Jan. 13, causing a loss of \$40,000. It was insured for \$18,000. The fire is a mystery, but an explosion, probably of gas, was heard as the flames broke out. The building contained the Opera House, Public Library, Court room and various offices.

Rochester. Jan. 24 was the twentieth anniversary of the opening of the Rochester Public Library. Miss Lillian Parshey has been librarian since the formation of the library. When the library was first opened there were 2429 volumes, donated by the Social Library, the books being from one year to a hundred years old, and Dec. 31, 1913, the books totalled 16,896. The circulation in the first year was 21,936, and the attendance in the reading room 1788. The circulation in 1913 was 56,104 and the attendance in the reading room 12,238. The appropriation the first year was \$2000, and this year \$3500. During the existence of this library the largest gift was \$1000, given by the late Mrs. Jennie Fairington, and the largest number of volumes received, 600 well selected ones, donated by the Free Baptist Sunday School. In Oct., 1905, Andrew Carnegie donated the sum of \$20,000 for a new building, and the present one was built under the direction of the trustees.

MASSACHUSETTS

A bill has been introduced in the House providing that persons residing in a given community may borrow from the libraries in adjoining places. There is also provision in the bill that in case a town or city declines to lend books to non-residents without charge, adjoining communities that want their residents to have access to these books may raise money to pay the expense of borrowing. The bill is in no way compulsory and it is left to the proper authorities to decide whether they shall take advantage of its provisions. The bill is endorsed by the board of free public library commissioners of the state.

Boston. The widow of the late Professor John Eastman Clarke has presented her husband's library to the library of the College of Liberal Arts of Boston University. The library is representative, but it is especially strong in mathematics, natural science, and philosophy. The library will be kept intact in a special alcove, and will be known as the John Eastman Clarke Library.

Bridgewater. The will of Samuel Pearley Gates of Plymouth leaves \$3000 to the public library of this town.

Cambridge. The collection of manuscripts and letters of Robert Louis Stevenson, owned by the late Harry Elkins Widener, of Phila-

delphia, a victim of the Titanic disaster, will be presented to Harvard University on the completion of the Widener Memorial Library. Added to the collection, which is said to be the finest in existence, are fifty-seven letters written by Stevenson to Sir Sidney Colvin, and purchased after the death of Mr. Widener by his grandfather, P. A. B. Widener. Many of them range from 2000 to 7000 words in length, and, taken together, they furnish a full record of the author's doings and feelings in the last seven years of his life.

Hopedale. The Bancroft Library has been left a trust fund of \$25,000; \$20,000 more is left to the town of Hopedale, the net income to be applied by the trustees of the Bancroft Memorial Library to any purposes they see fit; \$5000 is left for the Bancroft Library, the income also to be applied by the trustees. The bequests are made by Mrs. Lura Bancroft Day of Milford, the widow of a former director of the Draper Co.

Northboro. By the will of Mary M. Adams of Worcester, the Northboro Public Library receives the sum of \$2000, the income to be used for the purchase of books on English and American history.

Somerset P. L. Frances Rogers, lbn. (Rpt.—1913.) Accessions 138. Circulation 7274. New registration 70. Receipts \$879.09; expenditures \$488.74.

South Boston. A lease has been obtained by the city for the use of the Nolen building on Dorchester street, for five years, and the room is being arranged for a branch library. A library has been needed in this section for some time, and it was through the efforts of the Andrew Square Improvement Association that the library was secured.

Williamstown. *Williams College L.* John Adams Lowe, lbn. (Rpt.—1912-13.) Accessions 2464; total number volumes in library 74,865. Appropriation \$9090; expenditures \$9094.94.

The greatest need of the library is a new central building, the books at present being scattered in various buildings. The bequest of John Savary, 1855, of \$20,000 providing a fund for the purchase of books, becomes available this year. The collections of bookplates and of *Williamsiana* grows steadily. The librarian delivered three lectures to the freshman divisions on the scientific use of the library, including the use of the card catalog,

reference books, *Poole's Index*, and suggestions on approved methods of making bibliographies. The results were exceedingly satisfactory.

Worcester. The annual reception given by the directors of the Worcester Free Public Library to its incoming members for the year and the regular staff of the library, was held in the art room of the Elm street building Feb. 11. Librarian and Mrs. Robert K. Shaw received the guests in the larger room, which was decorated with potted palms. Prof. George H. Blakeslee, Charles A. Harrington and Dr. Michael F. Fallon are the three new members of the board in whose honor the reception was given. Coffee and cakes were served.

CONNECTICUT

Greeneville. It has been the custom of the Otis Library to require readers from nearby towns, school children and others, to pay an annual fee of \$1 for the library privileges. For the convenience primarily of pupils from such suburban points, the trustees have authorized the librarian, Miss Cash, to issue six months' tickets for out of town users of books, the fee to be 50 cents.

Hartford. A complete indexed record of legislative papers at the state library relating to crimes and misdemeanors from 1663 to 1788, has been prepared at the library.

Middle Atlantic

NEW YORK

Albion P. L. Lillian A. Achilles, lbn. (14th rpt.—1913.) Accessions 454; total number of volumes 11,873. Circulation 34,257. New registration 348.

After a lapse of several years the village grant of \$600 was renewed in 1913, and the sum of \$736 was expended by the library association for permanent improvements, including exterior painting, new electric fixtures at the entrance, new bookcases and card index systems.

Binghamton. W. F. Seward, lbn. (Rpt.—1913.) Accessions 5266; total number of volumes in library, 34,498. Circulation 186,892. New registration 2019; total number of borrowers 17,364. City appropriation \$11,050; state \$100. Expenditures included \$2302.79 for books and periodicals, \$237.10 for binding, and \$6127.27 for salaries.

Five substations have been established, reporting a total circulation of 4633 for a period of about six months. There were eight spe-

cial exhibits during the year with a total attendance of about 6000, and 30 numbers in the free lecture course. The library contributes a page of library news of special interest to teachers to the school bulletin issued monthly by Superintendent of Schools Kelly. One hundred and fifty-nine traveling libraries were issued to schools, factories, fire stations and substations. In talks by members of the staff in the schools, before mothers' clubs and men's clubs, library opportunities have been called directly and indirectly to the attention of many people. Hundreds of lantern slides were borrowed from the State Department of Education for the use of the library and other organizations."

Buffalo. The Polish library, organized about 20 years ago by the Polish people in Buffalo, is the largest Polish library of its kind in America, according to the last report filed by its librarian, Frank Lukasiewicz. It consists of 15,000 books, bought by the small monthly fees of ten cents during the many years of its existence, there being now over 250 members. The library has direct connection with the Polish libraries and publishers in Warsaw, Posen, Cracow and Lemberg, and receives over 38 Polish publications of America and Europe.

Geneva. For the fourth time a bill has been introduced in the Assembly appropriating \$100,000 for the erection of an administration, library and demonstration building at the state experiment station here. Three Legislatures have passed it and each time the bill has been vetoed on the ground of economy.

Herkimer F. L. Edith M. Sheaf, lbn. (Rpt.—1913.) Accessions 370; total number of volumes in library 12,453. Circulation 30,552. New registration 399; total number of borrowers about 4200.

New York City. William H. Riggs, of Paris and New York, who recently gave his collection of arms and armor, the most valuable in existence, to the Metropolitan Museum of Art, has also given his library of books on the subject to the museum.

New York City. The Century Theatre Club, having established a reference library of dramatic literature at the Bloomingdale branch of the public library, has determined to support and enlarge it by giving a certain amount regularly every month towards buying new books.

New York City. The Woodstock branch, second of three new branches of the New

York Public Library, was formally dedicated to the use of the people on Feb. 17, at 8:30 p.m. The opening exercises consisted of addresses by Hon. Frank D. Wilsey, the designated representative of the city of New York, who presided, and Stephen H. Olin, Esq., of the board of trustees, and music by the Music School Settlement. The opening of this branch adds to the library facilities in the Bronx, located as it is on the north side of East 160th street between Forest and Tinton avenues, on a plot 50 feet by 147 feet. The building was designed by Messrs. McKim, Mead and White, and built by the E. E. Paul Co. at an estimated cost of \$118,000, exclusive of the cost of books. It is a four-story building of Indiana limestone with granite base course. The basement is designed in part for a general assembly room; the first floor, for a circulation and reading room for adults; the second floor, for the children's room; the third floor, for two study rooms for clubs and the janitor's apartment. An interesting feature of this branch will be an outdoor reading room in the yard at the rear, reached by a passageway leading from the first floor. The thirty-sixth building erected from the Carnegie Fund, to be used by the New York Public Library as a branch, was opened on Feb. 26, at 8:30 p.m., as the new home of the Washington Heights branch, formally occupying inadequate quarters at 922 St. Nicholas avenue. The new building has been erected about four blocks farther north, at the northeast corner of West 160th street and St. Nicholas avenue, on a plot 51 feet by 100 feet, at an estimated cost of \$125,000, including equipment, but excluding books. Designed by Messrs. Carrère and Hastings as architects and built by the Norcross Brothers Company, this building, a four-story structure of tapestry brick with limestone cornices and trimmings, is similar to the recently opened Melrose branch. The ground floor has been devoted to the children, the first floor set apart for the circulation department for adults, the second floor made ready for reading and reference rooms for adults, and the third floor reserved for two study rooms for clubs and the janitor's apartment.

New York City. The centenary of the birth of Samuel J. Tilden fell on Feb. 9, and was observed in various parts of the state with appropriate exercises. The ceremonies in honor of his memory, arranged by the Tilden Memorial Commission, began Feb. 8, when his grave in the cemetery at New Lebanon, N. Y.,

was decorated and formal church services were held in that town, where Mr. Tilden was born Feb. 9, 1814. In the Assembly Chamber at Albany, exercises were held at which Gov. Glynn presided, while at Carnegie Hall in this city, there was a final meeting, with speeches by Mayor Mitchel, Francis Lynde Stetson, and others. In connection with the celebration the New York Public Library opened an exhibition of books, manuscripts, portraits and views relating to the career of Mr. Tilden, which will continue for a month. Among the objects of special interest are textbooks which Mr. Tilden used at school and at Yale, an engrossed copy of his will, a large number of prints and photographs of Mr. Tilden and his home; a facsimile of a characteristic appeal to Democrats, written by him while a candidate for election to the State Legislature in 1871; several pictures and plans of the library building which was to be constructed by the Tilden Trust, and the record of the breaking of Mr. Tilden's will in the Reports of the New York Court of Appeals. Mr. Tilden planned that the greater part of his estate should be used for a free library in this city, but the courts set the will aside after years of litigation. The trustees finally received a little more than \$2,000,000 from an estate valued at from \$4,000,000 to \$6,000,000, and this money, with the 20,000 volumes in his private library, his paintings and other objects of art, went to join the Astor and Lenox endowments and books to form what is now the New York Public Library.

New York City. The *New York Times* of Feb. 12 contained a long letter over the signature of Kate Parsons, making an unfavorable comparison of the service in the periodical room of the New York Public Library with similar service in the Boston Library, where less formality is observed in the administration of the room. A second letter on the same subject appeared in the issue of the 18th signed, "A traveler from India," echoing the sentiments of the first writer, and suggesting that a shifting of the periodical division to the room now occupied by the main catalog would make the department more attractive to many readers. The library is also criticised for neglecting to subscribe, for the benefit of the staff, to the various library publications both in this country and abroad.

New York City. In Dr. Leipziger's report of the public lectures given each year by the department of education, there are included a number of extracts from the reports of libra-

rians of branches whose auditoriums have been used in the lecture courses. Reports cover all five boroughs of the city, and in every instance they testify to an immediate increase in circulation of books on the subjects discussed either in the library itself, or in the other lecture centers of the neighborhood.

Poughkeepsie. Adriance Memorial L. John C. Sickley, lbn. (Rpt.—1913.) Accessions 3509; total number of volumes in the library, 51,196. Circulation 103,082. New registration 1700. Total number of borrowers 8264.

Rochester. Theological Seminary L. Walter R. Betteridge, lbn. (12th rept.—1913.) Accessions 878 books and 528 pamphlets.

No attempt has been made to keep an exact record of the number of readers in the library, but its use has noticeably increased and more space has had to be provided for readers. An important work has been begun in circulating books among the pastors of rural churches in western and central New York. Lists of books and pamphlets in the library on the problems of the rural and village church were sent to the pastors with the offer to lend them for limited periods and to pay postage on them one way. About 100 books have been sent out in this way and it is hoped to extend the work to include books on missions, Sunday school work, work with boys, etc.

Rochester. A bill has been sent to Albany to be introduced in the Legislature, giving additional powers to the trustees of the public library. The bill amends the charter of the city so that the library trustees will have power to name their own subordinates and employes and fix their compensation, also to make purchases directly instead of through the purchasing agent. They may also receive gifts for a library fund and manage such a fund.

Utica P. L. Caroline M. Underhill, lbn. (Rpt.—1913.) Accessions 7655; total number of volumes in library, 73,275. Circulation 208,361, a gain of more than 14,000 over 1912. New registration 3965, 1129 being in the children's department. Appropriation \$29,553; expenditures \$29,245.08, of which \$5364.71 was for books, \$1113.05 for binding, and \$14,486.95 for salaries.

From November to May the library was open on Sundays for reference use. After two months' trial, on Sept. 1 a new schedule for circulation was adopted, allowing books

to be drawn for one calendar month, and increasing the number allowed at one time. Much time is thus saved both in the routine work at the library and to the reader. The new branch opened in East Utica in November is well patronized. Deposit libraries have circulated 12,803 books, being located in engine houses, mills and factories, playgrounds, schools and clubs. A student class was formed in October, 1912, and continued its course until May, 1913. All the members are now on the regular staff.

White Plains. The H. W. Wilson Co., which has recently moved here from Minneapolis, kept "open house" Jan. 23. The plant was in full operation and over a thousand guests were shown all the processes in the making of a book.

NEW JERSEY

Beverly. The town is planning to erect a free library building of stone or brick, about 40 x 40 feet. The plans have not yet been drawn.

Hoboken. At the last meeting of the board of library trustees the budget for the year was cut 50 per cent., owing to the fact that \$23,000 of the library funds are deposited in the First National Bank, which recently closed its doors.

Morristown. The Morristown Free Library, on South street, was destroyed by fire Feb. 23. Most of the 50,000 volumes on its list were burned and the others were badly damaged. The rooms of the Morris Academy, a private day school for boys in the same building, were burned out also. The fire started in the basement of the building under the library. When the firemen reached the scene the fire had spread up through the partitions and had reached the second floor, and they could do no more than prevent the flames from spreading to adjoining buildings. The library was constructed of granite, with a roof of slate. The second floor of the building was devoted to use as an auditorium. It had a seating capacity of about 750. The building was constructed in 1878 at a cost of \$65,000. The late George B. Post was the architect. The building was insured for \$50,000. The loss of the library cannot be estimated. It was considered the best in New Jersey as regards historical subjects. Many of the volumes were the only ones of their kind and were considered invaluable. Among them were files of the old Morristown records and of the first newspapers published in the town.

Newark. A Princeton University exhibit was on view the first part of February in the Newark Public Library. Everything pertaining to Princeton from "An account of the College of New Jersey," printed by James Parker, at Woodbridge, in 1764, to Jesse Lynch Williams' stories of campus life was to be found in the exhibit. Rare autographs and manuscripts were an attractive feature. The exhibit remained for three weeks, and was then shown in various centers throughout the state.

Orange. William G. Runkle, who died here Jan. 31, has left \$25,000 to the Orange Free Public Library.

Pleasantville. A Current Literature Club has been formed here under the leadership of Supervising Principal Hartman of the borough schools, and if the people of the town are sufficiently interested in literature a campaign for a public library will be started by the club.

Princeton Junction. A collection of Italian and Hungarian books, with magazines, from the Princeton Public Library, has been placed at Princeton Junction for the use of the railroad men.

Red Bank. The trustees of the Belmar Library are so sure of getting a building from Andrew Carnegie that they have asked for an appropriation of \$1000 with which to buy books.

Somerville. A new children's room has been opened in the public library. A picture collection has been started numbering already several hundred prints, special collections being American history, travel pictures, and great masters and their paintings. Related subjects are mounted on one large board, constituting a ready-made bulletin.

Trenton. A branch of the Free Public Library has been opened in the Columbus School building.

Trenton. A bill appropriating \$1000 for expenses of the state librarian in collecting material on legislation for the use of the members of the Legislature, was passed by the Senate Feb. 9.

Woodbury Heights. A library association has been started by residents, who are collecting books for a public library.

PENNSYLVANIA

Alexandria. William Henderson Woolverton, who died at Augusta, Ga., Jan. 21, has left \$25,000 to the Free Memorial Library here.

Carlisle. The annual report of the Bosler Memorial Library shows a circulation of 22,463 books in 1913, with a total number of 6486 volumes in the library at the end of the year. A new printed catalog has been issued, a duplicate rental collection has been established, and the library has become a government depository for all government documents.

Harrisburg. Exactly 3223 books were taken out of the new Harrisburg Public Library during the first week it was open to the public, and over 2500 persons registered.

Philadelphia. At the ninety-first annual meeting of the stockholders of the Mercantile Library Company, a resolution asking the directors to consider plans for the erection of a larger building on the site now occupied by the library, on Tenth street above Chestnut, was adopted. Although no action will be taken on the resolution for some time, it is expected that it will be agreed to, and a larger and more handsome building will be erected. A resolution was also passed requesting the board to purchase books at the request of fifty members. The report of the directors of the company, which was read by John Frederick Lewis, president, showed that 123,216 books were circulated during the year 1913.

Reading. The three proposed branch libraries for Reading are to be located in the school buildings at Douglass and Weiser streets, Fifteenth street and Perkiomen avenue and Spring and Moss streets. The estimated expense of the three is \$1000 annually. This amount is included in a \$12,000 appropriation asked of City Council for 1914. In 1913, for maintaining and conducting the library, the city appropriated \$7700 for maintenance and the salaries amounted to \$3380 more.

MARYLAND

Baltimore. As a subsidiary fund toward the starting of the campaign recently inaugurated by the East Baltimore Neighborhood Association to secure money to buy a lot for an Enoch Pratt Free Library branch in the congested district of the city, six prominent Jewish residents of this city have pledged \$100 apiece. The association expects to raise \$10,000. There are 130 members of the association and each member will personally solicit every person living within a designated radius of four blocks. In this section there are about 5000 Jewish children, and if every child gives five cents toward the fund and every adult 50 cents, the needed amount will be obtained within a very short time.

The South

NORTH CAROLINA

Charlotte. P. L. Mary B. Palmer, lbn. (Rpt.—1913.) Accessions 1203; total number of volumes in library, 7288. Circulation 45,648. New registration 1560; total number of borrowers 5675.

Special effort has been made to extend the use of the library throughout the county. County teachers are allowed to take out as many as 30 books to be kept not longer than eight weeks. Magazines sent in by Charlotte people have been given to county residents. The best books on agriculture have been purchased, and these are read constantly by the farmers of the county. Agricultural magazines are received, and newspapers and moving picture theaters have been used to advertise the library.

Raleigh. Practically all of the work of transferring the State Library to the new building has been completed. All of the books have been removed, and most of them have been placed in shelves in the new quarters.

SOUTH CAROLINA

Latta. The cornerstone of the Latta Public Library was laid on Feb. 4. The sum of \$5000 was donated about a year ago by the Carnegie Corporation for this building, and very soon after a levy of one mill was voted on this school district for the purpose of providing an annual guarantee fund for maintenance. The building committee awarded the contract last November, and the building is to be completed by March 15. Ample library accommodations are provided in the main story for book stands, reading room and librarian's apartments, while the basement provides for toilet and storage purposes. The building is of brick, the face brick being of a rough texture tapestry variety, and the roof will be of slate.

GEORGIA

Dawson. A contract has been signed for the erection of a Carnegie library in Dawson, the contractors being the Shields-Geise Lumber Company, of this city. The location chosen is a desirable one, being on the east side of Main street, just north of the city hall, and on land owned by the city.

Fitzgerald. Steps are being taken to procure funds and a suitable site for a public library. It is hoped to erect a \$20,000 building.

Savannah. Negotiations have been opened with the Carnegie Corporation with a

view to getting the appropriation of \$75,000 which has been made for the erection of a public library in Savannah, increased to \$100,000, that the city may have a building fully adequate to its needs. The suggestion has also been made that the Georgia Historical Society should make a permanent transfer of its book collections to the library when the new building is assured.

Thomasville. The McLean Library has proved a very valuable institution to the country teachers of Thomas county and one that they highly appreciate. At the close of his term of twenty-five years as county school superintendent, Capt. K. T. McLean presented this library to the county to be used by the teachers and pupils of the schools, he having gathered many books of value and interest. A library association was organized and named for him and at a recent meeting the officers elected to serve for this year were: J. L. Lewellyn, president; J. Gorham Garrison, vice-president; P. Wheeler, secretary; J. S. Searcy, treasurer.

ALABAMA

Birmingham. The East Lake branch of the public library system was opened to the public the middle of February. Miss Theresa Hood of Talladega, a graduate of the Atlanta Library School, will be the East Lake librarian. Miss Hood has had two years' experience in New York libraries. The new library branch is located in the old East Lake city hall, and will be opened with about 1000 books. It will make the fifth branch library in the city.

TENNESSEE

Johnson City. The library board of the Mayne Williams Library, has announced that a library building will be erected in the spring in the lot between the new high school building and the Munsey Memorial Church.

Knoxville. The city commission has received the following proposal from the trustees of the Lawson-McGhee Library: The trustees agree to erect on a lot purchased by the city from J. W. Borches, corner of Market street and Commerce avenue, a modern library building costing \$50,000, to be completed Oct. 1, 1916. They propose to sell the old Lawson-McGhee Library building on Gay street to secure funds to erect this new structure. They also propose to give the city a 99-year lease on the new building with the privilege of another 99-year lease. They propose to give to the city all books and equipment of the present

Lawson-McGhee Library. Upon the signing of the contract with the city they propose at once to turn over to the city the present Lawson-McGhee Library, that shall be made a free library until the new structure is erected. In return the trustees ask the city to do the following: To levy a tax for the maintenance of the library, amounting to at least \$5000 per year; to pay all running and operating expenses, the maintenance of the building and the purchase of new books. Also to pay rent on the present building now occupied, which will be \$60 per month, until the new building shall be occupied.

Nashville. The new steel stacks for the state law library have been installed. An effort will be made to secure an appropriation from the next Legislature to introduce the steel stacks in other departments of the state library.

MISSISSIPPI

Laurel. The Carnegie Corporation has granted the application of this city for a public library to be erected at a cost of about \$30,000. The city is to furnish grounds and appropriate \$100 monthly for maintenance.

Webb City. A small group of women organized the Women's Library and Civic Improvement Association in 1910. In April of last year the special tax necessary for the maintenance of a library was voted, and the library will be a reality within the year.

Central West

OHIO

Bellefontaine. Plans for a \$12,000 library at Zanesfield have been completed. The building will be of brick and stone. It was donated to the village by Dr. E. S. Sloan, of Boston.

Cleveland. Alta Branch of the Cleveland Public Library opened early in February in the new building at Mayfield Road and E. 125th street given to the Alta House Settlement and the library by John D. Rockefeller. This library ranks as one of the larger branches of the system and unites Alta House Branch, formerly occupying a room in the old Alta House Settlement building, and Alta Children's Room formerly at 2022 E. 125th street. The library consists of a circulating and reference department and a large children's room, with two club rooms opening off, one of which is for use during the day time as a story hour and girls' club room, while during the evening hours both are for club

use. Alta Branch is in charge of Miss Ruth K. Field as branch librarian. The book collection includes a large number of books in Italian and there will be at least one Italian-speaking assistant on the staff.

Cleveland. The new library and auditorium of the Law School of Western Reserve University, occupying a large portion of the building which recently has been added, was opened Feb. 7.

Findlay. The county commissioners have been asked to call an election for the purpose of voting on a proposition to issue bonds for the purchase of a site for the erection of a county Carnegie library. Mr. Carnegie offers to erect a building to cost from \$35,000 to \$50,000, if the site and maintenance will be furnished.

Massillon. *McClymonds P. L.* Clara Miller, lbn. (Rpt.—1913.) Accessions 1052; total number of volumes in library, 19,529. Circulation 61,184. New registration 1016; total number of borrowers 3086. Receipts \$7402.64; expenditures include \$1411.81 for books and magazines, and \$1680.17 for salaries.

Troy. By the will of the late Cyrus Telford Brown, \$1500 is bequeathed to the Troy Public Library.

MICHIGAN

Ann Arbor. The regents of the University of Michigan are going to be asked to give the university library an addition and an increase in the amount of money which the library now has annually to spend for books for the literary department. In support of the request Librarian Theodore W. Koch points out how soon the room which is now left in the old library building will be filled with the incoming books. An average of 1500 to 2000 volumes per month are added to the library. When the annual report of the library was made for the year ending June 30, 1913, there was a total of 322,040 books in the libraries of the university of which 247,761 were in stacks in the general library building. The library has more than doubled in size during the last eleven years. The new addition will, if allowed, be on the west side of the present stack wing.

Armada. A site has been purchased by the library board for the new library for which Andrew Carnegie gave the city \$8000.

Detroit. The popularity of the Delray branch library station, which was opened Jan.

22, has far exceeded expectations and it has been necessary to have two librarians to care for applicants. Miss Lillian Hodge is in charge; Miss Amelia Poray is superintendent of the library extension department. The books in German, Polish, Hungarian and Armenian have been in great demand. Thursday evening of each week will be reserved especially for the older people of the district. Two hundred books and 100 cards were given out the first week.

Detroit. The library of Clarence M. Burton has been accepted by the Detroit Library Commission, and plans are being prepared to convert the Burton residence on Brainard street, which Mr. Burton will abandon about July 1, and which was included in the gift, into a central museum.

ILLINOIS

Champaign. Announcement has been made that the library of the University of Illinois will be replaced by a new building. The present building, which was erected during the term of Gov. John P. Altgeld, probably will be converted to the use of the College of Law. A tentative site has been selected for the new building.

Chicago. At a meeting of the directors of the Chicago Public Library, plans were laid out to attack the agreement between book publishers and dealers by which no dealer is supposed to grant libraries more than ten per cent. discount on net books. Henry E. Legler pointed out the injustice of the agreement, and President A. Lagorio of the library board said the matter would be placed before the proper authorities. At the same meeting, plans were announced for an extension of the branch library system by opening the following branch rooms: Palmer Park, South Chicago, April 1; Seward Park, Orleans and Elm streets, March 1; Stanton Park, Vedder and Larrabee streets, April 1; Summer School, South Kedvale and Colorado avenues, June 1; Irving Park, Irving Park boulevard and Hamlin avenue. in course of erection; Pulaski Park, Blackhawk and Noble streets, Sept. 1; Sheridan Park, Racine street, Broadway and Lawrence avenue, March 1. The Sheridan Park branch will be one of the best equipped in the city. For its fittings \$5000 will be expended by the board of directors.

Evanston. *Garrett Biblical Inst. L. Rev.* S. G. Ayres, asst. lbn. (Rpt.—1913.) Accessions 5021 volumes, 5531 pamphlets, and 3424 unbound magazines; total number of pieces in

library, 28,099 volumes, 15,309 pamphlets, and 18,133 magazines. Circulation for home use, about 4000; for use in the building about 20,000.

The librarian came to this library in June, 1912, after nearly twenty-five years of service in the library of Drew Theological Seminary. During the year the library has been completely reorganized. Scattered books were assembled and a complete inventory taken, after which the entire library was reclassified according to the Dewey decimal system, and 101,000 cards were written and filed. Student help is used entirely. Author cards have been exchanged with Northwestern University Library. An effort is being made to strengthen the collection of works relating to Methodism and also other denominations.

Lawrenceville. A reading room for men and boys has been started in the Presbyterian church, which is open to the public Saturday afternoons. Whenever the citizens undertake in a larger way to supply the need for a public library, this collection of books will be given to the larger institution.

Rockford. A deposit station was opened in the North Rockford W. C. T. U. building on Jan. 26, in the large reading room on the north side of the building. It contains about 500 volumes from the main library which will be changed occasionally to meet the demand, and about 700 volumes of the library belonging to the W. C. T. U., which will be a permanent part of the collection. It is more like a branch than a deposit station, and will furnish some facilities for reference work for the school children of the community. It will be open Mondays and Thursdays from 3 to 5 and 7 to 9 p. m. Miss Franc Judd of the library staff will be in charge.

Streator. According to the annual report of the librarian, Mrs. A. P. Wright, the circulation of books in 1913 was 5678 less than in 1912. Every line of reading showed a marked decrease, except sociology and periodicals. In the sociological line, there was an increase in number of books from 429 in 1912 to 552 in 1913. With the periodicals, there were 1820 taken out in 1912 and 1948 in the year just closed.

Waterman. Clinton township library committee has let the contracts for the new Carnegie library and work will begin as soon as the weather will permit.

INDIANA

Hobart. Word has been received that Andrew Carnegie will donate \$16,000 for a li-

brary building if Hobart will raise \$1,000 annually for maintenance.

Richmond. Several committees have been appointed by the Commercial Club, Earlham College, and other organizations to work together for the popularization and improvement of the Morrisson-Reeves Library. A campaign of general publicity is to be conducted.

Warsaw. Warsaw club women have started a movement that is expected to result in the founding of a Carnegie library. The present library is operated in connection with the public schools.

Waterloo. The new library building donated by Andrew Carnegie to Waterloo and Grant township was formally opened and dedicated Jan. 26. The building with its present equipment cost \$9000.

The North West

WISCONSIN

Madison. The state department of public instruction has completed the compilation of a new township school library list which will be in force two years beginning with April 1. The state superintendent of public instruction, the secretary of the Free Library Commission and the attorney general constitute a commission which is to pass upon bids for supplying the books for the two-year period mentioned. There will be about 1450 titles on the new lists.

Milton. *Milton College L.* Mabel Maxson, lbn. (Rpt.—yr. ending July 9, 1913.) Accessions 367; total number of books now in library, 9390. Circulation 4449. Total registration 306. Receipts \$384; expenditures \$373.51.

Milwaukee. Mrs. Lydia Ely's celebrated autograph collection, a book that was purchased by the late Capt. Fred Pabst for \$8000, has been presented to the public library by Col. Gustave Pabst, his son. Mrs. Ely obtained signatures of many great men of America and in a number of foreign countries, each adding a line or two adapted to the occasion. The task was undertaken by Mrs. Ely for the purpose of raising money for the erection of the soldiers' monument, standing at Grand avenue and Tenth street. The \$8000 paid for the autographs completed the necessary fund.

MINNESOTA

A municipal reference bureau has been organized by the general extension division of

the University of Minnesota. It will act as a clearing-house for information and ideas concerning municipal problems, and its information will be at the disposal of all cities in the state. The faculty of the Law School, the College of Engineering, and the department of Political Science will cooperate with the bureau in supplying authoritative information.

Clouet. In the absence of a bookstore in the town, the library at Christmas time ordered a select list of books for children. From these orders were taken or the books were sold outright, those remaining unsold being added to the children's collection.

Detroit. The Carnegie library building was formally opened to the public Nov. 14.

Duluth. The West End branch of the public library, at present located in the Mohaupt building, 2022 West Superior street, will be moved March 1 to 20 North Twentieth avenue West. The change is being made on account of the poor location and in the hope that more adults as well as children will become patrons. The library will occupy the street floor. A large reading room will be provided for.

Graceville. The village council has voted to accept a gift of \$6000 from the Carnegie Corporation, and has agreed to make the necessary annual appropriation of \$600 for its maintenance.

Granite Falls. A \$5000 Carnegie library building will be erected next spring.

Minneapolis. The new Franklin branch library is nearing completion and will be ready for occupancy in April. All the Scandinavian books will be shelved at this branch as it is situated in the center of a large Scandinavian section. The Minneapolis Library has one of the largest collections of Scandinavian books in the country, about 60,000 volumes. At this branch a reading room will be set aside especially for this literature. The library now subscribes for eight Scandinavian magazines and about a dozen newspapers. This branch was built at a cost of \$40,000 and is one of the four buildings provided for by the Carnegie gift. On the upper floor will be a large general reading room, the special Scandinavian reading room and the stacks for books. On the lower floor will be the children's room and a neighborhood club room with a seating capacity of about 75. This room will be for the use of neighborhood clubs and societies

for meetings. Two porches are being built for summer reading rooms.

Minneapolis. The state law library at the capitol now contains 74,354 volumes, according to the report submitted by Elias Lien, state librarian, to Governor A. O. Eberhart. There were 2239 volumes added during the year, of which 974 were purchased. During 1913 the library spent \$5281 for books and bindings and \$6316.66 for salaries. Mr. Lien says that the library is badly crowded in its present quarters and that room is needed, especially for a reference library.

Minneapolis. A business library is to be established downtown, within the easiest reach of business workers, and organized to provide them with the information they seek at the earliest possible moment. The exact site has not yet been selected, but it will probably be in one of the downtown office buildings.

Minneapolis. A civil service examination for boys of high school age who want to work part time as pages in the public library, was held Jan. 31. The superintendent of schools is cooperating with the civil service commission.

Minneapolis. When the new form of government goes into effect next June, the public library will be grouped with the public schools under a commissioner of education, one of the six departments of the city government.

Ortonville. The Carnegie Corporation has offered \$10,000 for a library building and the council has made the required tax levy.

St. Paul. It is announced that Dr. William Dawson Johnston, who assumed the duties of chief librarian in the St. Paul Public Library Jan. 1, will receive a salary of \$4500 a year. This represents an increase of \$2700 over the salary paid the librarian in St. Paul in the past.

St. Paul. The board of directors of the public library have advertised for bids on the erection of the superstructure of the new library building.

Sauk Center. The Sauk Center Public Library which, as the Bryant Library Association, is one of the oldest in the state, is the first to consolidate with the school library under the new law passed last winter. The school library of over 1500 volumes has been turned over to the public library to be accessioned and cataloged and administered by the librarian of the public library.

Virginia. A story hour has been started which is proving so popular it is difficult to accommodate all the children. Class-room libraries have been placed in five school buildings.

IOWA

Burlington. Miss Miriam B. Wharton, the librarian of the public library, is making special efforts to gather for the library as much material as possible relating to the city. She is getting together municipal, county and school reports, and suggests, that there must be much material in the possession of residents, which would enrich a department of the public library devoted especially to Burlington.

Des Moines. A branch of the public library will be installed in the Y. W. C. A. building this year.

Des Moines. An office room has been partitioned off from a part of the east vestibule of the main library, and ten new steel book-stacks have been installed in the reference room, almost doubling its capacity. Other changes are planned for the building but have been postponed for the present, owing to the expense.

Dubuque. A branch library has been installed in the Audubon School.

NEBRASKA

Fairfield. The new Carnegie library at Fairfield was dedicated Jan. 15, with appropriate ceremonies and in the presence of a big gathering of citizens. The new building was completed at a total cost of \$7800.

The South West

MISSOURI

Columbia. The University of Missouri is to have a library building costing \$200,000, exclusive of all interior fixtures and books. The letting of the contract to J. W. Wilson & Son of St. Louis has been announced by Albert Ross Hill, president of the university, to the board of curators. At present only the central part of the building, excluding the wings on either end, will be constructed. The dimensions of the structure will be about 200 by 175 feet.

Kansas City. A class of five library apprentices, selected out of fourteen, who filed applications and took the examinations, started work at the public library on Feb. 9. The examination was based on high school work and general reading. One of the five highest

received a grading of 98, the highest mark received by any library apprentice since the administration of Purd B. Wright as public librarian. The object of the apprentice class is to train library assistants specially adapted to work in the Kansas City libraries. The members of the class are Misses Elizabeth Ware, Rachel Kincade, Mary McBeth, Mrs. J. B. Bennett and Mrs. T. J. Hearn.

Macon. An interesting expedition has been planned by school and business men of Macon and Adair counties for the early summer, to motor to the Indian mounds in Northern Missouri to collect relics for the Macon Public Library.

Mexico. The board of directors of the Mexico Free Public Library have accepted the building from L. M. Lake, the contractor. The building cost \$12,500, which came from the Carnegie Corporation. The site was donated by Mr. and Mrs. J. F. Llewellyn. The Federated Women's Clubs of Mexico have maintained a library here, and its books will be moved to the new building.

St. Joseph. For the purpose of showing stereopticon slides which have been purchased by the library board and which will fit any standard machine, a new stereopticon has been presented to the library by a St. Joseph citizen. The new machine is a small affair, which can be packed in a single case and easily carried about, but it is equal in power to the best of the standard machines. It can be used anywhere where an electric light socket is available. Both the machine and slides are to be loaned free to responsible persons. They can be used for home entertainments, but are especially valuable in giving public lectures.

St. Louis. Afternoon tea has been introduced in the Central Public Library. Each of the 100 employes in the library building gets ten minutes off, between 3:30 and 4:30 p.m. each day, to visit the staff lunchroom and enjoy a cup. The expense is met by contributions from friends of the institution. Outside guests are not invited, and while cheerful chatting over the tea cups is encouraged, the affair is not a social function, and its purpose is to freshen up the staff and heighten efficiency.

St. Louis. The annual report of the Catholic Free Library, 217 North Sixth street, shows that 20,100 books were borrowed from the library in the last year. The number of volumes now on hand is 7552. Two hundred newspapers and current periodicals are re-

ceived and files kept for the reading public. Adults borrowed 13,400 volumes in the last twelve months, and children 6700. Of these books, 4467 were of fiction. The library was open for circulation 300 days.

Savannah. L. R. Williams, an attorney of Savannah, has received a check for \$1000 from E. V. Price, living in Chicago, who was born and raised here, to be expended on the public library. Last November when he was here Mr. Williams noticed that new books were needed and the gift is the result. When the library was built a number of years ago he subscribed \$20,000 for the building. Later he made an endowment of \$15,000.

ARKANSAS

Harrison. The Library Board of the Harrison Public Library is arranging to keep the library open in the afternoon and evening as a public reading room. The structure was built by the efforts of the women of Harrison, and the library has been supported by them without assistance since 1905.

Little Rock. The Little Rock Musical Coterie has decided to give the organization's musical library to the Little Rock Public Library, to be known as the "Musical Coterie Library." The library will be added to from time to time.

Little Rock P. L. Dorothy D. Lyon, lbn. (Rpt.—1913.) Accessions 2193, exclusive of two private libraries bequeathed. Circulation 68,340. New registration 1896; total number of borrowers 7896. Expenditures \$5874.76.

The building committee reports that the cost of the library building was \$88,000, and that there remains in the fund a balance of \$100, which the board directed the committee to return to Andrew Carnegie with the thanks of the board.

LOUISIANA

New Orleans. Henry M. Gill, lbn. (Rpt.—1913.) Accessions 10,978; total number of volumes 127,199. Total circulation 447,397. The circulation of the branches was as follows: Royal, 65,785; Canal, 62,149; Napoleon, 61,052, and Algiers, 33,270. Number of visitors to reading room, 76,000. Expenditures \$44,395.

During the past few months there was kept a special rack for books dealing with subjects being presented at the local theaters, as well as with topics under discussion in the newspapers. When an attraction is advertised for one of the New Orleans theaters, the books

on the subject are placed on these shelves. Mr. Gill reports that these books have been "literally grabbed up" by the public. Five months ago a stamp club, composed of boys and young men, was organized. The members meet regularly and discuss and exchange foreign and domestic postage stamps. Any person interested in the collection of stamps is invited to attend these meetings.

TEXAS

Dallas. Miss Rosa M. Leeper, librarian of the Dallas Public Library, has received notice that plans for the Oak Cliff branch of the Dallas Public Library have been approved by the Carnegie Corporation. The contract will be let as soon as possible. The building will be located on Turner plaza in Oak Cliff, and is to cost \$25,000, including the equipment.

Sherman. The plans and specifications for the Carnegie library for Sherman have been accepted. This building will be fireproof, of reinforced concrete and brick, and will cost \$20,000. The plans were drawn by John Tulloch of this city.

Pacific Coast

CALIFORNIA

Auburn. A strip twenty-one feet long and two to three feet wide, was ripped off the roof of the Carnegie Library building by high wind Jan. 14. Fortunately the location of the damage did not affect the books. The wind also tore off the cap of the chimney.

Bakersfield. The twenty-fourth branch of the Kern County Free Library has just been opened at Caliente, with Miss E. C. Williams, the teacher at Caliente, in charge.

Chula Vista. The report of the number of volumes in the public library is as follows: Fiction, 1997; non-fiction, 258; juvenile, 632, and magazines, 944. The library is affiliated with the state and county libraries and is able to obtain any book desired by patrons. The quarters have been enlarged and the building is now fitted to hold civic meetings.

Long Beach. The new library commission has decided an enlargement of the present building in Pacific Park, a gift from Andrew Carnegie, must be made to accommodate the rapidly increasing reading public. The directors have decided on building a wing to the present building, and will ask the assistance of Mr. Carnegie in financing the scheme. While no specific amount has been named it is

expected that from \$15,000 to \$25,000 will be asked. The original gift to this city in 1908 was \$30,000.

Long Beach Free P. L. Victoria Ellis, lbn. (Rpt.—yr. ending June 30, 1913.) Total number of volumes in library 28,194. Circulation of books, main library 220,645; branches 34,548; circulation of pictures, 24,949; grand total 280,142. Total registration 19,524. Receipts \$22,611.24; expenses \$21,996.67.

Los Angeles. A survey of the work done in Los Angeles, showing how the facilities of the library are being made increasingly useful to the 500,000 people spread out over 100 square miles of territory, is described by Will H. Fischer in an illustrated article in *The California Outlook* for Jan. 17, called "The practical service of one public library."

Montebello. A free library was opened here Feb. 3. The books are furnished by the county and after being maintained by the ladies' club for one year, the institution will become a part of the free circulating library system supported by the county.

Riverbank. A branch of the Yolo County Library was installed here in January. Mrs. M. Powell is the librarian.

Santa Monica. Plans are being made for an outdoor reading room in connection with the public library.

UTAH

Richfield. Dedication of the Carnegie library took place here in January. The library was built through the donation of \$10,000 by Andrew Carnegie. The building is of brick and is situated in the center of Richfield in close proximity to the schools.

IDAHO

Caldwell. The exterior work on the library building is now complete and the board is confronted with the problem of furnishing the library and purchasing additional books. Under the terms of the contract with the Carnegie Association, the city is required to raise by taxation \$1250 annually for the maintenance of the institution. At present about half this amount is being raised. It is the policy of the board to keep expenses down as much as possible and to use the surplus for the purchase of additional volumes. It is now suggested that a portion of this maintenance fund could be diverted to advantage to the purchase of fixtures for the new building,

and the question of the legality of diverting the money for this purpose has been referred to the city attorney.

Nampa P. L. Mrs. Yant, lbn. (Rpt.—1913.) Accessions 486, making the total number of volumes about 3000. Circulation 14,757. There were 33,338 visitors to the building.

Foreign

GREAT BRITAIN

William Prideaux Courtney, an English bibliographer of note, died Nov. 14, 1913. In collaboration with Mr. G. C. Boase he published the "Bibliotheca Cornubiensis," a catalog of the writings of Cornishmen and of works relating to Cornwall. A work of great value to English librarians was the "Register of national bibliography" in two volumes, published in 1905, with a supplementary volume published in 1912. He also published "The secrets of our national literature," a work on the literature published anonymously or under pseudonyms. He had contributed many articles to the "Encyclopedia Britannica" and the "Dictionary of national biography," and at the time of his death had in preparation a bibliography of Johnson, which the Oxford University Press was to publish.

Sir William H. Bailey, who had been a member of the Library Association since 1879 and was elected its president in 1906, died suddenly in London the 21st of last November. At the time of his death he was a governor of the John Rylands Library and an honored member of many societies and institutions.

The fourth International Easter School under the auspices of the Library Assistants' Association will be held in London April 10 to April 13, with headquarters at the Thackeray Hotel, Great Russell Street, near the British Museum and in the heart of the city. There will be visits to Buckingham Palace Road Library, Fulham Central Public Library, British Museum Library, and an excursion to Oxford to visit the Bodleian and other libraries there. There will also be various excursions to points of interest in and near London, and a reception by the Library Association at Caxton Hall, Westminster.

The proceedings of the thirty-sixth annual meeting of the Library Association at Bourne-mouth, Sept. 1-5, 1913, have been printed in full in the December number of the *Library Association Record*.

The December general meeting of the Library Assistants' Association was held at the Hammersmith Central Library Dec. 17. The principal paper was by Mr. H. M. Cashmore, deputy chief librarian of the Birmingham public libraries, on "A provincial point of view," which dealt principally with the education of the assistant and incidentally with the speaker's disapproval of the L. A. examination syllabus and its effect, intentional and otherwise, on the assistant.

Birmingham. The Carnegie Library at Northfield, Worcestershire, six miles south of Birmingham, on Feb. 12 was destroyed by fire set by an "arson squad" of militant suffragettes. All the books were burned and only the shell of the building was left standing. Papers were found strewn around the place bearing the words: "To start your new library" and "Give women the vote."

Nottingham. With the approval of the Nottingham city council the public libraries committee applied to Andrew Carnegie for assistance in defraying the cost of branch libraries. In reply the Carnegie United Kingdom Trust, to whom Mr. Carnegie has transferred the funds rendered available by him for providing libraries, have intimated that they will provide the sum of £15,000 to cover the cost of the building of four complete branch libraries and reading rooms ready for occupation, on condition that the library corporation will undertake to provide sites from sources other than the library rate, and a sum of £1150 per annum for the upkeep of the libraries. The offer has been accepted and the libraries committee, after visiting all the district libraries and reading rooms, and giving careful consideration to the whole question of district libraries, have advertised for the four sites for the projected libraries as follows: (1) The Meadows District; (2) Bulwell (High-bury Vale, east side of Midland Railway); (3) Between Old Basford and New Basford; (4) Carrington and Sherwood District.

Nottingham P. L. J. Potter Briscoe, lbn. (Rpt.—yr. ending Mar. 31, 1913.) Total number of volumes in library 142,558. Circulation 602,816 volumes against 615,698 during the previous year. Total attendance for all purposes at the central and branch libraries was 2,274,424 against 2,376,551 the previous year.

Plymouth F. L. W. H. K. Wright, lbn. (36th rpt.—yr. ending Mar. 31, 1913.) Accessions 2316 volumes; total number of volumes in library 67,400. Home circulation 330,152

volumes; books used in reference library 65,241; total 395,393, as against 413,905 in the previous year. New registration 2821; total number of borrowers 99,213.

HOLLAND

Bibliothecaris, the Dutch monthly devoted to library interests, publishes the following figures relative to the use of public reading rooms in a number of cities of Holland during the month of September, 1913. Rotterdam, municipal reading room: 4508 books read, 8138 visitors; annex: 2656 books loaned, 2100 visitors. Library of "Ons Huis": 3705 books loaned. Dordrecht: public reading room, 5120 books loaned; children's department, 2178. s' Gravenhage: 2612 books called for, 6473 visitors. Leyden, public reading room: 3483 books called for, 2150 visitors.

Naarden-Bussum. This town, a suburb of Amsterdam, the home of many Amsterdam merchants, has a library association already numbering 300 members. An annual membership fee is charged, and the accumulation of funds is now sufficient for the establishment of a library, for which municipal and government aid is also promised.

Utrecht. The organization and administration of the University Library at Utrecht is described by Miss To van Rije in *The Library Association Record* for December, 1913. For reference purposes the Utrecht University Library is free to all comers, but to obtain books for home use persons not students and not personally known to the staff, must obtain an introduction. University students form only about one-sixth the total number of users. There are three main catalogs: an alphabetical catalog, a classified catalog, and a shelf catalog for use of the staff only. All additions to the library are entered in the alphabetical catalog under authors' names, according to a special code of cataloging rules. Catalog slips are printed on sheets in six columns, about 11 cm. wide. Those for cutting are printed on thin bank paper, mounted on sheets of thick paper, and bound into small catalogs containing about 200 titles, and held together in a kind of loose-leaf arrangement that makes additional insertions easy. Entries for the classified catalog are mounted on cards and filed in drawers. The shelf list is arranged in the order of the accession numbers. Requests for books are made by filling in the proper form (white for home use, yellow for the reading room, and green for the manuscript department). By filling in duplicate blanks, the

attendant leaves one on the shelf in place of the book, and files two others at the charging desk, one under the borrower's name and the second under the call number. In the old portion of the library the books are arranged in twenty-six classes, each designated by a letter of the alphabet, and a further division is made by size, folios, quartos and octavos being grouped together. In the new portion of the library the books are shelved by size without regard to class, which is only to be learned through the classified catalog. The reading and reference room is open to the public with no formality beyond the signing of a visitors' book. The tables are fitted with drawers provided with locks and keys, and anyone engaged in special work may obtain the use of one of these drawers for the storing of memoranda.

GERMANY

Breslau. Stadtbibliothek und Stadtarchiv [City Library and City Archives]. Dr. Hippe, director of Stadtbibliothek. (Rpt.—yr. ending Dec. 31, 1912.) Accessions 5785. Circulation 86,884. Receipts 572.36 Marks; expenditures 16,795.03 Marks (the deficit being covered by municipal appropriation).

Advance is reported in almost every activity of the library. The circulation has increased over 20 per cent. since 1911. This is undoubtedly due to the fact that formerly the library was only open two hours daily for the borrowing and returning of books, whereas during 1912 it was open daily from 9 until 2. During the past year much of the time of the staff of the library was taken up in assisting in the arrangement of the exposition to celebrate the centennial of the War of Liberation.

ITALY

Milan. The People's Library Association has published the results of an attempt to establish a reading room for boys. The chief purpose of this experiment was to keep from the streets boys of from eight to fifteen years. The results of the first two weeks were as follows: 9 readers were eight years old; 22 were nine; 23 ten years old; 71 were eleven years of age; 39 were twelve; 57 were thirteen; 14 were fourteen years old; 21 had reached the age of fifteen. The visitors comprised 256 boys and 20 girls. During these first two weeks 399 books were loaned; of these 177 were books of adventure, 118 novels and short stories, 16 romances, 12 historical and geographical books, 8 on natural science, 4 poetic works, 3 purely literary, 2 theatrical, and miscellaneous 57.

AUSTRIA

Vienna. k. k. Universitätsbibliothek [Library of the Royal and Imperial University]. Herr Himmelbauer, director, (Rpt.—yr. ending Sept. 30, 1912). Accessions 25,306; total 856,462. Circulation 567,505. Total number of borrowers 293,014. Receipts (calendar year 1912) 112,525 kronen, 47 heller; expenditures 111,410 kronen, 45 heller.

In spite of many difficulties the work of cataloging both old and new volumes is progressing satisfactorily. Many improvements have been made in the matter of shelving, arrangement of volumes, and interior decorations.

NORWAY

Haakon Nyhuus, librarian of the Deichmanske Bibliotek, Christiania, died on Christmas Day, 1913. Mr. Nyhuus began his library career in 1891 in the Newberry Library in Chicago. In 1893 he was made chief cataloger in the Chicago Public Library. In 1897 he returned to Norway where the agitation for public libraries was just beginning. He was appointed librarian of the Deichmanske Bibliotek, and was for years the leading spirit in the development of the whole popular library organization in Norway. He represented his country at the International Congress of Librarians in St. Louis in 1904, was an active worker in the newly organized Library Association of Norway, and was deeply interested in the periodical called *For Folke- og Barneboksamlinger*. He was forty-eight years old when he died.

RUSSIA

Upon the solicitation of the Maria Alexandrowna Institute for the Blind, the Tariff Commission of the Russian Government has removed the import duty on all books in foreign languages that are intended for the use of the blind.

St. Petersburg. On Sept. 8 (old style) took place the laying of the corner stone of the new library building of the Imperial Academy of Sciences. The building is to consist of two connected structures, each five stories high. Every technical improvement found in the most advanced libraries of the world is to be installed. This library is devoted exclusively to the sciences. Consequently there will be only a moderate sized reading room seating about 125 persons. There will be shelf room for 1,200,000 volumes. It is expected that the building will be ready for use in the summer of 1915.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature.

General

Societies, Associations, Clubs, Conferences

AMERICAN LIBRARY ASSOCIATION

Destructive growth. *Pub. Libs.*, F., 1914. p. 50-51.

An adverse opinion on the expediency of affiliation with the A. L. A., of smaller library organizations that wish to be free from the dues and regulations of the A. L. A. The writer considers the Council too large and its organization too loose to be effective, and invites suggestions for a resolution on the revision of that section of the constitution relating to the Council, the resolution for amendment to be offered at the meeting in Washington.

Polygraphy

TERMS, DEFINITIONS

Why "Non-Fiction?" *Pub. Libs.*, F., 1914. p. 45.

Communication objecting to the employment of the word, on the ground that to the general public there is "something aggressively 'librarianly' and unspeakably dry and dreary" about it, and asking suggestions for a single comprehensive, constructive term to cover this large class of books.

History of Library Economy

LIBRARY BIOGRAPHY

Biographical sketches of librarians and bibliographers: I. Justin Winsor, 1831-1897. William E. Foster. *Bull. Bibl.*, Ja., 1914. p. 2-3.

Among the eminent men who laid the foundations of the modern library movement in this country, Justin Winsor holds an exceptionally distinguished place. He was the first president of the American Library Association and was in turn the chief executive of the Boston Public Library and the Harvard University Library. He had a strong bent for history, and published many volumes on various branches of American history. Mr. Winsor became a member of the board of trustees of the Boston Public Library in 1866, and became superintendent in 1868. One of his first acts was the publication of very useful guides for readers, which made the work of the library widely known. Mr. Winsor left

the Boston Library in 1877 to go to the library at Harvard, where he remained until his death in 1897. Chosen president of the American Library Association in 1876, at its first meeting, he served with distinguished ability till 1885, leaving the impress of his strong personality and his organizing mind on all its proceedings.

Scope, Usefulness, Founding

Library in Relation to Schools

SCHOOLS, WORK WITH

How the library began to teach school in East Canaan. Catherine Finnegan. *Pub. Libs.*, Ja. 1914. p. 11-12.

With most of the children from foreign families who had no books, and the nearest library three miles away, the problem was to get the children to want to read. This was done by bringing a box of books to the school and insisting that each child should take a book home. If he could tell something of the story and didn't like it, he was allowed to exchange it for another—but he must tell something of the story first. Then came Library Day, when those children who had read stories related the gist of them, and considerable interest was aroused. This year, each book charged to a child is recorded, so that at the end of the year the teacher will have some record of his year's work outside of school. In five-minute daily readings four books were read last year: "Uncle Tom's cabin," Brooks' "Boy emigrants," "Roy and Ray in Mexico," and "The prince and the pauper."

The Troy (N. Y.) Public Library has arranged with the educational department to credit the pupils for English reading through the summer vacation. Miss Mary L. Davis, librarian, declares the system most successful, and says, "The children pass the summer reading the work required by the regents. They find it a pleasure, reading leisurely and intelligently. I believe they get more from the books than if they perused them in the hurry of class work during the school term."

A branch of the Princeton (N. J.) Public Library has been opened in the high school, the Board of Education paying \$300 a year

toward the salary of an assistant, who is in the school building each day to look after the work of this branch.

The public library and the school department of Somerville, Mass., have arrived at an agreement whereby one of the library staff is designated as high school librarian. The school department pays one-half the salary and will furnish money for the permanent reference books bought for the library room of the school; supplementary reference lists will be furnished by the library for display either in the high school or in the reference alcoves of the library, as circumstances require; and the high school librarian will spend one-half her time in either building so that she may be able to serve both teachers and pupils to the best advantage. Miss Marion Lovis, Simmons 1909, has qualified for and been appointed to the position, her name appearing upon the rolls of both the public library and the school department.

Library Extension Work

LIBRARY EXTENSION WORK

Mechanical arts and the library. *Pub. Libs.*, F., 1914. p. 48.

Editorial comment on the practice growing among libraries of lending music rolls, stereopticon and reflectoscope views, phonographic records, and to a very slight extent, motion picture rolls.

Byways of library work. Sarah Comstock. *Outlook*, Ja. 24, 1914. p. 201-205.

A pleasant account for the general reader of some of the less known phases of library work where the library goes in search of the people, too ignorant or too indifferent to seek it for themselves. The obstacles a library organizer may encounter are touched upon, and many anecdotes are told of the work of Miss Titcomb and her book wagon, of Miss True, the "Horseback Lady" of Iowa, of the automobile library routes through the rural districts of Connecticut, and of the use of city libraries as social and educational centers to interest the young and the foreign-born in the library.

LANTERN SLIDES; FILMS

The general extension division of the University of Minnesota has organized a free lantern-slide bureau. Collections of slides on subjects of interest to high school students are provided and sent out to schools without charge except for transportation and the replacement

of broken slides. Slides are sent in collections of fifty or sixty, accompanied by a typewritten lecture in some cases, but always with from one to three books of reference on the subject. A few moving pictures, mostly of scenes about the university, are available.

Library Development and Coöperation

DEPOSIT STATIONS

Besides its regular branches, the Cleveland (O.) Public Library maintains 33 deposit stations, *i. e.*, collections of books furnished to business firms, factories, public institutions and clubs for the benefit of their employes or members. Of these 33 stations, 8 are in telephone exchanges, 3 in department stores and 13 in factories. The library makes the following agreement with business firms desiring a collection of books for the use of their employes: The library guarantees to furnish a deposit of books relative in size to the number of employes; to rebind and keep the books in order and to exchange them frequently enough to keep the collection live and interesting, in fact to eliminate the "dead wood" at frequent intervals. The business firm, on the other hand, agrees to furnish shelving and a suitable place in which to keep the books; to be responsible for loss or damage and to allow the time of an employe to keep a record of circulation. The circulation of books at these deposit stations for 1913 was 99,772, an indication that these library agencies are supplying an actual need.

Founding, Developing and Maintaining Interest

LIBRARY ADVERTISING

The *Republican-Herald* of Binghamton, N. Y., gives generously of its space to the public library. In a recent issue "The Friday food page" had a write-up, three-quarters of a column long, of the new book "Living on a little." The *Herald* has recently begun the regular publication of signed reviews of books of specialized interest to be found in the library, in a department headed "Briefs on new books."

"The uses of advertisement" in library administration. Walter A. Briscoe. *Lib. Assn. Record*, D., 1913. p. 604-610.

It is the duty of those who have public libraries under their charge to see that the greatest possible use is made of them. By forethought, discretion, and originality it is often possible to secure the insertion of contributed articles in the public press, in which the public library is named as the fountain of

knowledge on all points. Where it is not possible to secure space for long or medium-length articles, "Letters to the editor" is a useful medium. A weekly column under the heading of "Library notes and literary gossip" is serviceable if the feature can be arranged. Neatly printed circulars calling attention to the existence of a branch library near at hand may be distributed occasionally from house to house, using the new residents of the district as an excuse. There has just been introduced in Nottingham a "pseudo-newspaper" entitled the *Lenton News*, illustrated, devised exclusively to advertise the branch library in this locality. It is left at every house, and the cost of printing is borne by a local firm of advertising contractors in return for the advertising space therein. Two sample pages showing the material used are appended to the article.

The *Pittsburgh Sunday Post* recently gave a full page in its magazine section to the information bureau of the Carnegie Library. Several cuts added interest to the article. The librarian says that 45,000 books, new titles and replacements, ought to be purchased this year to keep up the work in a proper manner.

ADVERTISING BOOKMARKS

Two new bookmarks from the Osterhout Free Library of Wilkes-Barré, Pa., have recently been issued. On the top of each is an interesting little view of the library. One has a list of recent additions on electricity, engineering, coal, automobiles, air-ships, industrial chemistry and metallurgy, business, home building and carpentry, farming, Panama Canal, commission government, and house-keeping, with the call number against each title. The other is a simple list of "fifty books every child should know."

COÖPERATION FROM WOMEN'S CLUBS

The attendance at a recent art exhibit in the library at San Antonio, Tex., was greatly stimulated by several of the more prominent women's clubs of the city. Members of the Art Association, Monday Book Club, D. A. R., Wednesday Club, and the Shakespeare Club were present every afternoon to pour tea.

The public library of Dover, N. J., has been interesting itself not only in distribution of books, but in the civic work of the town as well. Early last year the Woman's Club of Dover, whose main object is obtaining a library building for the town, distributed

through the library aster seeds to the school children, promising the reward of a party in the fall when the results were known. The flowers when in bloom were placed on exhibition in the public library for a week and drew many people there. This not only interested a greater number of people in the library, but established a closer bond between it and the children. The party, which was in part a story hour, was a great success, as the children not only took much pleasure in the occasion but showed renewed interest in the books from which the stories were taken.

Libraries and the State

LIBRARY LEGISLATION

The public library movement from the rate payers' point of view. R. T. L. Parr. *Lib. Ass't.*, Ja., 1914. p. 4-13.

Paper read before the Library Assistants' Association at the Islington Central Library, Holloway Road, Nov. 12, 1913. Basing his argument on the statement that "the English are not, and never have been, a bookish nation," the writer maintains that in order to secure the desired extension of library work a new method of procedure must be adopted. He suggests that public library authorities, as such should disappear; that the attempt to secure a new Library Act, with higher tax rate, be abandoned; and that the whole library movement be made a branch of the general work of the education committee. "A complete and efficient system of public libraries is a necessary corollary to and satisfactory solution of the problem of public education . . . and I firmly believe that on the total abolition of the separate Library Fund, the separate Library accounts, and the Library Committee, except as a sub-committee of the Education Committee, you have the brightest prospect of reconciling your ambitions with the goodwill of those who provide the money."

LIBRARY UNDER COMMISSION GOVERNMENT

The library in commission-governed cities. *Pub. Libs.*, F., 1914. p. 82.

Possible solution of the place of the public library in commission-governed cities is suggested in the section and accompanying note quoted from "A model charter for Texas cities" by Prof. Herman G. James of the University of Texas. Under this it would probably be grouped with schools in the department of public education.

Library Support. Funds

RAISING FUNDS

Surrounding a placard reading, "What we

need," the Hartford Public Library has posted the beautiful series of exterior and interior views of the Denver branch libraries, recently sent out by the librarian. Here is an idea worth copying where branches are wanted.—*Bull. Bibl.*

A silver tea was given in the library by the Current Events Club of Northfield, Minn., to raise money for new books. In Olivia, in the same state, a similar idea has been successful, the women of the library board having started a chain of library teas. In St. Peter, also a Minnesota town, the members of the Woman's Literary Club and Sorosis plan to have each member entertain ten friends at a book social, the admission to be 25 cents, and the proceeds to be given to the library for new books.

GIFTS

A tactful effort. *Pub. Libs.*, Ja., 1914. p. 14-15.

Editorial. Realizing that it is not advisable to spend library money for denominational literature, Miss Stevens, librarian of the Logansport, Ind., Public Library, has sent a letter to all church societies in the city asking them to subscribe in the name of the library for one or more denominational periodicals, and to give to the library any used textbooks, lives of missionaries or similar books. A label in the front of each book will state the name of the donor.

BEQUESTS

The bequest of Miss Charlotte C. Cole to the reading room of the public library, Newburyport, Mass., of the sum of \$2000, the income to be added to the salary of the superintendent of the reading room, is puzzling the directors as there is no official of that name now. The librarian has the general supervision of the rooms, with different attendants there at different times during the day. Formerly the place was filled by Miss Martha P. Lunt, a friend of Miss Cole's, and it is probable that she had this woman in mind when the will was made. Whether the trustees can accept the money under these conditions is a question.

BULLETIN BOARDS

A suggestion for a bulletin board for periodicals. Mary J. Booth. *Pub. Libs.*, Ja., 1914. p. 11.

As each of the fifteen or twenty most popular magazines are received, a printed sign for

it is posted on the bulletin board under the heading "New magazines" and the name of the month. The signs are posted in the order of receipt. On a certain day each month, as for instance the fifteenth, all signs for the month are removed and a new list started.

Government and Service

Staff

STAFF

Past and present professional training: its results and prospects. W. C. Berwick Sayers. *Lib. Assn. Record*, D., 1913. p. 585-596.

Paper read at the annual meeting of the British Library Association at Bournemouth, Sept. 4, 1913. A discussion of a few of the problems confronting the librarian as an individual professional man.

For some twelve years the Library Association has directed its efforts to the training of librarians, and the general efficiency of the scheme of instruction and methods of examination have increased each year. But of the 500 librarians in Great Britain less than 200 receive salaries of more than £200 a year. This means that a large number of persons are receiving a highly technical training of doubtful value in any other walk in life, and that there are incredibly few positions to which they may aspire. In other words, while a great deal of attention is being paid, and wisely being paid, to increasing the intellectual side of the profession, insufficient attention has been paid to its economic side.

The first factor of the library is the book; the second, the librarian; the third, the building. Too many library authorities seem to consider the third factor as the most important and burden the library with heavy maintenance expenses where the money might be better spent on salaries and books. Likewise the extension of library activity by the opening of more branches than can be adequately served, is deplored. There are scores of assistant librarians in English libraries without any special qualifications for the work, who have no opportunity for advancement and hence no incentive to study, who are in the work simply because they were not told in time that they were not adapted to the profession. Their salaries are inadequate and they have no social position. Many librarians suffer from a similar narrowness of outlook and a similar lack of financial and social standing.

The question is raised why the library does not help its assistants with proper textbooks, as it does apprentices in the trades. Also

why the library usually puts its least mature workers into closest contact with the public. Unfavorable criticism is sure to be aroused, the position is brought into disrepute, and the result is increasing difficulty in obtaining desirable boys to train as junior assistants. In consequence, many women are now being employed, a condition the writer considers not an ideal solution of the difficulty. The real questions to be faced are the relation of library education to the library future; a consideration of the question whether the assistant's prospects may not be materially improved; and whether the Library Association is morally bound to have not only an educational, but also a professional and social standard for its members.

Remuneration, Salaries, Pensions

PENSIONS

To devote the fines collected on overdue books to retiring on a pension employes worn out in the service of the library is a proposition made by the Boston Public Library trustees in their last annual report. The fines at present amount to about \$6000 a year, it is said, and would answer the purpose proposed very well. The report says: "It is manifestly impossible for persons receiving such compensation as they do—the average salary being about \$600 a year—to provide for old age."

Rules for Readers

Days of Opening

SUNDAY OPENING

The Woman's Club of Millbury, Mass., pays all expenses for keeping the public library open every Sunday afternoon during the months from December through March.

Home Use. Loans

FINES

The Hartford (Ct.) Public Library no longer charges fines for Sundays and the four holidays when the circulating department is not open, namely Good Friday, Fourth of July, Thanksgiving and Christmas.

Administration

General. Executive

EXPENDITURES

An unusual item in the list of library expenditures for 1913 in the public library at Santa Monica, Cal., is one of \$45 to rid the institution of bats, which are said to be even more destructive than mice.

REPORTS AND STATISTICS

The fetish of circulation. *Pub. Libs.*, Ja., 1914. p. 10.

The writer deplores the impression received that a big circulation is getting to be the chief end and aim of many librarians, or at least a big *record* of circulation. "Juggling with figures is juggling with figures, be the figures of money or circulation. If appropriations come as a reward of circulation and circulations are padded, this is surely getting money under false pretenses. . . There are many who never stoop to this dishonesty or tolerate it in those whom they control, but the thing is done too often to be winked at. . . One of the duties, and not an easy one, of a librarian is to make a board understand the aim of libraries is to educate and uplift a people, not to compile circulation statistics."

Treatment of Special Material

PICTURE EXHIBITS

Picture exhibits have been held in several Minnesota libraries. In Coleraine the pictures were for sale, making it possible for the library to secure some pictures for its own walls. In Litchfield the exhibit was arranged by the public school and a small admission charged. Nearly \$100 was received, which will be used to buy pictures for the school. In Mankato a loan exhibition of Japanese prints was shown.

EXHIBITS OF PHOTOGRAPHS.

In the Hartford Public Library, strips of picture moulding placed horizontally from one to two feet apart, at convenient height, are used for supporting exhibits of mounted pictures and photographs. The mounts are held in place by the little tin clips, which hang onto the moulding, and are thus given a rigid support, much better than cords give, no matter how tightly stretched.—*Bull. Bibl.*

PRESERVATION OF HISTORICAL MATERIAL

The preservation of historical records in Holland. Henry A. Sharp. *Lib. World*, Ja. 1914. p. 195-196.

Each of the eleven states of Holland has a provincial depot for the preservation and documentation of local records, that at The Hague being at once the central repository for the whole country, as well as the depot for a specific province. Each depot is in charge of an archivist whose duty it is to collect and index all records in his district, and to make an annual report to the chief archivist. Registers of births, baptisms, betrothals, marriages, deaths, removals, and property are kept.

The Amsterdam repository is also collecting material of all kinds relating to the city and the citizens—magazine articles, photographs of buildings, playbills, and portraits.

Accession

BOOK SELECTION

Generally speaking, all fiction is ordered by Pratt Institute Free Library on approval, the method followed being described in "Helpful hints" in the *Bulletin of Bibliography* for January. Each book upon receipt is assigned to a member of the Library staff for review. This novel reading is wholly voluntary, and is done outside of library time. When a book is approved for acceptance, a note is made by the reviewer according to the following plan: Scene and time; subject; treatment; recommend to? These notes are typewritten, inserted in a loose-leaf note-book and kept in the circulating department for ready reference on the part of the staff. Borrowers may not have direct access to the "Novel notes," but the members of the circulating department employ them constantly to assist borrowers in their choice of reading.

"PROCESSIONS" OF NEW BOOKS

In the Yale University Library, new books received are dated and shelved by themselves, arranged under some 26 separate subjects—a shelf being allowed for each. After one month's exhibition, during which the professors and others interested have examined and gotten acquainted with them, the books take their regular places in the stack. In each division these books, while on view, are shelved in order of receipt, so that the right end volumes are the newest, and the left end volumes are constantly being removed to stack as the thirty-day period expires.—*Bull. Bibl.*

Reference

REFERENCE WORK

Reference work in the Somerville Public Library. M. W. *Bull. Bibl.*, Ja., 1914. p. 3-4.

When the Somerville Public Library moved into its new building the reference work was reorganized. At least half of the old reference collection was made circulating, and the remaining books reserved for reference were divided into two classes. One collection, called "Reference," is shelved in one alcove near the information desk; the books in the other group, called "Alcove reference," are shelved with the books for circulation in the alcoves at the beginning of their various subjects, and at the discretion of the librarian in

charge may be circulated, a special form being used.

Loan Department

RESERVE FICTION

In order that a borrower may not be obliged to leave a post card to secure a work of recent fiction, half of the number of copies of such a work in the Cambridge Public Library are placed on the open shelves for general circulation. The other half, which may be reserved, bear the letter R in red ink on the seven-day label and book pocket.—*Bull. Bibl.*

Binding

BINDING PERIODICALS

The Wilmington Institute Free Library says: In binding periodicals never use leather unless the volumes are to be constantly used; all books should have French joints; it is never wise to stitch sections lengthwise by machine and then sew by hand. Modern methods of overcasting are much preferable.—*Bull. Bibl.*

The Free Public Library of Newark, N. J., describes briefly in the *Bulletin of Bibliography* an inexpensive method of keeping large weeklies. All back numbers of technical periodicals indexed in the *Engineering Index* are kept. Some are bound, others, principally the large weeklies, are cared for as follows: Advertising pages are removed, and the numbers for one month are sewed through three holes stabbed along the back. A piece of bond paper two inches wide is folded to make a hinge and pasted on edge of front and back page over sewing. To these hinges are pasted covers from one of the numbers. A strip of book cloth is then pasted on the back, extending about half an inch over the sides and on this is printed title and date. The same method is used for monthly periodicals, three months making a volume.

Shelf Department

BOOK SUPPORTS

The New Bedford Public Library uses bricks for book supports, but instead of covering them as so many have done in the past, paste-board boxes of grey color are used. These little boxes, the covers of which are just as deep as the boxes themselves, are just the size of a brick. They cost \$8.75 for 500, and the cheapest sort of bricks costing \$11.50 a thousand are used.—*Bull. Bibl.*

"BANNERS" INSTEAD OF "DUMMIES"

In Pratt Institute Free Library, Brooklyn, through the first floor of the circulating de-

partment (the open shelves), banners are used instead of dummies for representing all circulating class books shelved elsewhere. Duplicates of circulating books which may be found in the reference departments are also noted in this way. The "banners" are hung at the end of the stacks containing books with the corresponding class numbers. These banners are 27 inches long by 7 inches wide. They are made of binder's board covered with binder's cloth, and, on the principle of the postal card album, each banner allows for the insertion of seven cards. The cards used are L. B. 33 size cards; light weight; commercial ruling; buff; without punch. The class numbers, each noted but once, are entered in large figures to the left of the cards. The book numbers, with location letter written above, are placed well apart to allow room for inserting new numbers when necessary.—*Bull. Bibl.*

FILING CURRENT PERIODICALS

The New Haven Public Library keeps current numbers of periodicals in the reading room by treating them like books on shelves with the backs only showing. This involves placing the periodicals in temporary binders of some kind, with name on the back. It has also been found advisable to divide the shelves into sections perhaps a foot wide by partitions. The saving in space over the common method of displaying periodicals broadside is very great, as well as saving of expense of a periodical case oftentimes. The periodicals may be arranged in three series according to height, with distances between shelves of about 12, 15 and 20 or more inches for the three heights.—*Bull. Bibl.*

General Libraries

State and Government

STATE LIBRARIES

State-wide influence of the state library. Demarchus C. Brown. *Bull. of New Hampshire Pub. Libs.*, D., 1913. p. 215-218.

The influences that will make the state library useful to every part of the state may be grouped in the following summary:

The personality, fitness and scholarship of the state librarian; the bibliographical center may well be the state library; the legislative reference for the Assembly and officials; the gathering and preserving of the history and archives of the state along with the encouragement among the people to preserve local historical material; the collecting of newspapers representing the entire commonwealth; the creation of a periodical center in the state

library; close connection with schools, colleges and all kinds of organizations, social, literary, commercial, etc.; assistance for all the state institutions, educational, charitable and correctional; close relation with the woman's clubs; assistance to the farmer and the foreigner in isolated localities; the center for general culture and love of knowledge where every citizen may continue to go to school.

For Special Classes

REFORMATORIES, LIBRARY WORK IN

Reading to get results at the State Training School. Gertrude E. Loehl. *Minn. Pub. Lib. Comm. Lib. Notes and News*, D., 1913. p. 68-70.

To the State Training School at Red Wing, Minn., are sent boys ranging in age from eight to twenty-one years, none of them first offenders, with the instructions to those in charge to better their morals, correct undesirable tendencies, and to create a healthier environment for body and mind. One of the first things for a new boy to do is to order a book, which, owing to the situation of the library, has to be done from a printed slip. The librarian tries to get personally acquainted with every boy, and after winning their confidence, to lead them gradually to better and better books. A system of certificate-giving for the reading of non-fiction books has been inaugurated. A small certificate bearing the name of the reader and the title of the book is given for each non-fiction book read, and when out of fifteen books seven non-fiction ones have been duly noted, a larger certificate, signed by the librarian and assistant superintendent, is presented with a little ceremony that enhances its value in the eyes of the boys. The boys at the printing office make the certificates and also make sets of bookmarks, each bookmark having a list of fifteen titles, seven of which are non-fiction sure to interest any boy.

Reading and Aids

Work with Children

CHILDREN, WORK WITH

The city of Griffin, Ga., should be heartily congratulated over the fact that it is one of the first cities in the United States to have a public library for children only, as a result of the donation of \$7000 made by A. K. Hawkes, of Atlanta, for that purpose. The only obligation fixed upon the city is that a suitable building shall be provided and maintained on a centrally located lot. The building is to

contain, in addition to library facilities, a hall for lyceum courses and suitable motion picture exhibitions for children. The plan is that the motion pictures, library and lyceum shall all be free forever to the children of Griffin. Only such motion pictures shall be shown as are historical, educational and moral in their character.

A library party in Hartford, Conn. *Pub. Libs., F.*, 1914. p. 45.

Description of the annual "doll party" held New Year's afternoon in the children's room of the Hartford Public Library.

A plan for establishing character-building libraries in a number of the public schools of Philadelphia is being worked out. The matter is in charge of the Committee on Elementary Schools of the Board of Public Education, and they propose to begin operations by installing such libraries in three of the downtown schools. If these prove successful they will be gradually extended until all of the schools are supplied. These miniature libraries will contain only books that will aid in developing manly and womanly traits in the boys and girls and that will have a tendency to elevate their moral natures. The books will be approved by a committee of the Board of Education and of prominent citizens interested in education. It is the belief of those who are urging the innovation that once the libraries are started there will be many donations of suitable books from friends of the children.

Bibliographical Notes

"Law, legislative and municipal reference libraries" is the title of an exhaustive manual by J. B. Kaiser, which the Boston Book Co. now has in press. It will make a work of over 400 pages, and is the first book to cover this field.

The attention of librarians is called to two useful lists. The first is a systematic list of German novels and stories arranged according to their main subjects, very closely cataloged under the headings of occupations, of geography, and of history by period, which fills pages 1207-1246 of *Hand-Katalog der neueren deutschen Literatur*, 1911-12. The second is a list of German dramatic literature in *Theater-Katalog von Reclams Universal-Bibliothek*, which gives the plays in alphabetical order of titles with number of characters. This is

often necessary in the selection of plays for the use of colleges and schools.

MR. JAMES WARRINGTON, of Philadelphia, owns what is perhaps the most valuable library of early American and English music, in private hands. He has spent fifty years in collecting material for a "History of the music of the common people of Great Britain and America." This subject has been overlooked or treated in a very inadequate manner by historians. Mr. Warrington has collected books and material for this purpose; books have been indexed, manuscript copies made of such as could not be bought, bibliographies compiled, and as a result the library with its apparatus now contains the most complete account of early American music and is fuller than any other collection with regard to Great Britain. As Mr. Warrington is advancing in years he would like to see the collection in some safe repository, where he could continue and complete his investigations (already far advanced). The collection has been pronounced by competent persons of inestimable value; for there is no doubt, that if dispersed, no such collection can again be formed. It has been formed with the definite intention of having in one place in the United States all the material necessary to the student, and will give to the library securing it precedence in that particular field.

An index to reference lists published in library bulletins during 1913, compiled by Marion F. Bonner, of the Providence Public Library, is published in the *Bulletin of Bibliography* for January.

ON PRICES OF BOUND VOLUMES

Editor Library Journal:

It seems to me that libraries should be warned against the exorbitant prices charged by certain brokers of books for books and periodicals for which they believe there is a strong demand. This library has recently had experiences confirming this opinion.

The late Dr. Thwaites once said that newspapers were worth no more than a maximum of \$10.00 per year, yet this library was quoted a set of the *National Intelligencer* of Washington, 1845-55, 10 years, uncollated, at \$225.00 or \$22.50 a volume.

This price is the more absurd when we take into consideration that a set of the same journal for the years 1826-45 was being offered at the very same time for \$38.00 or less than \$2.00 a volume, and more than this, when it was found that the volumes as offered were incomplete and lacking certain numbers, the price was reduced.

A similar instance occurred this year in regard to the *Real Estate Record*, the back volumes of which were offered by the publishers at \$8.00 a year, some volumes bound and some unbound, when at the same time we were able to secure a run of 24 years, 1880-1903, in a first-class bound condition at \$1.50

a year, and these being bound 2 volumes to the year made a cost of 75 cents per volume bound instead of \$4.00.

It seems to me that libraries ought to make a stand against being held up by book dealers who are nothing but book brokers carrying no stock of books, and who think only that libraries want these things, and, therefore, ought to pay well for them.

Yours very truly,

F. K. W. DRURY, *Assistant Librarian,*
University of Illinois Library, Urbana, Ill.

ON BOOK PRICES

Editor Library Journal:

Messrs. Macmillan & Co. have placed the "Golden treasury series" on the net list. This "series" is possibly the most attractive library edition for Palgrave's "Golden treasury"; for some anthologies of French and German poems; for the "Death of Socrates," "Apology," and "Phaedo," etc., etc.

As Messrs. Macmillan now charge \$1.00 less 10 per cent.—90 cents; and as the English price is but 2/6 the saving to libraries when importing is from 25 to 33½ per cent., varying with the commission paid their importing agents.

Very truly yours,

O. R. HOWARD THOMSON,

The James V. Brown Library, Williamsport, Pa.

A QUERY

The Library Journal:

I have searched many times for an article which ought to be in the first volume of "Poole" on the Japanese art of arranging flowers. *Harper's Magazine* or *Century* (or *Scribner's Monthly*) should contain it, according to my memory. I can remember the illustrations perfectly—the various flowers sketched in outline and numbered to show the scheme. Can anyone tell where this article is to be found?

APRIL, 1914

No. 4

THE April number of the LIBRARY JOURNAL has hitherto been the annual School number, dealing with the relations of libraries and schools and with the development of libraries within the educational system. It has seemed preferable to publish this number in the early fall, at the beginning of the school work, rather than near the end of the school year, that the word from the library profession to the education profession may come more effectively. Now that the public library field has reached such large development, it is within the educational field that library work should have its next large development, and in this progress the LIBRARY JOURNAL hopes to do its part as a journalistic nexus between two kindred professions of the librarian and the teacher. It is the library profession which must do the pioneer work in this field, but the teaching profession has been and will be ready to respond. Teachers are so busy with their general work that they are less likely to give attention to special appeals until these are pressed upon them from outside. The librarian of the public library should therefore feel it his special duty to invite teachers into relation with the public library, and thus, by imbuing teachers with the library spirit, make more possible the development of the library within the schools. Mr. Dana is giving special attention in Newark to relations with the high schools, and other librarians have made their mark and done good service in this field. Librarians should emphasize the need and value of special library training for those who are to have charge of libraries within schools, and to occupy a middle position between the public librarian and the school teacher. The final outcome should be such joint organization, at least within large municipalities, as will carry the spirit and perhaps

the administration of the public library system into practical relation with the educational system throughout normal, high and grammar schools.

ANOTHER field in which library development must increase is that of the special library, as it has come to be called, largely a form of library developed by those connected with business organizations, for whom a special library is the best of working tools. The Special Libraries Association has already done great work in developing this field, and the LIBRARY JOURNAL is endeavoring to cooperate with it in recording present results and showing the way to future achievement. We print in this number a tabulated report of fifty special libraries, from data gathered in cooperation with the Special Libraries Association and tabulated by Mr. Richard H. Johnson, of the Library of the Bureau of Railway Economics at Washington. This table indicates the scope and variety of the special library, but it is only the beginning of proper records. We ask that other special libraries should report their data to us on the same lines, and that the librarians of public libraries should take especial pains to acquaint themselves with the special libraries within their respective bailiwicks, and send at least their names and addresses to the LIBRARY JOURNAL or to the Special Libraries Association. This list as extended will be made a feature of the *American Library Annual*, and should grow in importance as special libraries extend.

ONE of the oldest and best of the library schools will be given up if the Drexel Institute trustees carry through their plan of dropping the Drexel Library School from their activities. The reasons given are not without force, for the Drexel Library

School has always drawn from a field much wider than the local field, and if the Drexel Institute is to confine itself chiefly to the local service of Philadelphia, it is evident that the other departments more specifically answer this test. On the other hand, with the development of its own library system, Philadelphia will have more and more need of trained library assistants which the Drexel school is well qualified to supply. It seems not unlikely that if this school is given up the Philadelphia Free Library system will develop a school of its own, as the New York Public Library system has found reason to do. It is not lack of demand for library training in Philadelphia that will cause the closure of the Drexel school, but the fact that its other and larger activities absorb its funds. The library graduates of Drexel will be sorry indeed that their race is not to be continued, and the library profession will sympathize with them.

AND now it is the State Library of Illinois which is the storm center. There exists in Illinois, as in New Jersey, a state civil service board so over-zealous of its prerogatives that it is doing harm to the very cause which it represents. Illinois is behind the times in having no state librarian except the Secretary of State *ex-officio*; but the present incumbent of that office is a wide-awake and public-spirited official who has seen the need of reclassifying and recataloging the State Library, and he committed that task to the assistant state librarian, Mrs. Fowler. She reported that this could not be done without obtaining better trained assistants for the staff. Secretary Woods supported her in dropping from the staff a Mrs. Baird and replacing her with an assistant of more competence and training. Whereupon Mrs. Baird appealed to the state civil service board, which reported that she was no more incompetent than she had always been, and on this strange reasoning re-

quired her reinstatement with back pay. This, of course, ties the hands of the Secretary of State and the actual state librarian from doing anything effective in the way of reorganization. The state board has also decided that it will hold an examination for all present employes of the state library and decide upon their fitness through a formal questionnaire. We have often emphasized the fact that librarians are especially upholders of the merit system of appointment, but they are equally the opponents of red-tape in the civil service which destroys, instead of promotes, a real merit system. The civil service reform was not intended to protect unsatisfactory employes from dismissal, but to protect satisfactory employes by taking away the political motive for dismissing them and foisting political appointees in their places. The library system should have its own civil service test, depending upon personality as well as scholastic training, and no formal questionnaire, without this practical testing, is adequate. It is to be hoped that the result of the present agitation in Illinois may be to give the State Library a professional state librarian in full authority supported by a sensible civil service method.

THE travel plans for Leipzig and Oxford now present so attractive an alternative that a goodly number of American librarians and their friends should be secured for the double goal. In addition to the regular A. L. A. party via the Mediterranean cities, Mr. Hanson, himself a Scandinavian, has planned a trip via the Baltic, making the wonderful tour through the fjords of Norway and bringing the northern party to Leipzig at the same time and with similar circumstances as the southern party, with "go as you please" arrangements between Leipzig and Oxford and across the Atlantic on the return voyage. There ought to be a round hundred on the two expeditions.

AIMS AND METHODS OF LIBRARY PUBLICITY

BY EVERETT R. PERRY, *Librarian of the Los Angeles Public Library*

THE motto of the American Library Association is one whose wisdom and inspiration will ever point the way to new fields and methods of activity. "The best books, for the most people, at the least cost," are the three ideals which have been set before us, and it is the second of them which at the present time is foremost in the efforts of practically every public library in the country. In the selection of books, libraries have attained such standards that in general the careful mother may send her children to the library knowing that their reading will be safe. The approval of the *A. L. A. Booklist* is eagerly sought by every publisher in the country.

The third and last clause of the motto has not yet come in for its share of attention. All that we have for standards of comparison of economy in library administration are a few statistics as to the budgets and cost of circulation in a score of libraries. While the business people have been studying costs and units of performance in stores and factories, it is only within a year or two that library workers have begun to consider this phase of their work with the seriousness which it deserves.

On the other hand, figures of circulation are what count just now. To determine the rank of a library it is now the style to ask, "What is its circulation?" If we read an article on the American public library, in a popular magazine, scarcely anything receives attention but the extent to which the library is reaching the people, the number of books it is placing in homes, shops, schools, and the methods it uses to accomplish these ends. Everywhere the emphasis is on the wider reach of the library and the books.

When the enormous possibilities of a public library and its books in any typical town or city are compared with what has actually been accomplished in that town in the way of making the library a vital part in the life of every inhabitant, it is plain that the necessity for library publicity is an

overwhelming one. If we believe, and we all do believe, that the library should play this vital part in the life of everyone, then we are committed to a never-ending campaign of publicity. In other words, publicity is a necessary and legitimate part of the work of every public library.

If we make a rough analysis of the population in any typical city, we will be impressed by three things especially. First, that less than a fifth of the people have library cards; second, that there is a large percentage of people whom the library can never hope to reach directly in the way of permanent service; third, that the percentage of people whom the library can and ought to serve is much larger than the percentage of people who already use it.

Basing the estimates on rather meager statistics published by various libraries and by the American Library Association, and also on certain census figures, the diagram which is shown on the following page has been prepared. It is only a rough attempt, and is open to criticism. However, it represents the conditions in any typical city with sufficient accuracy to show what we wish to know, namely, the relation between the library and one hundred per cent. of the community. We are accustomed to read, from month to month, articles describing the relations between the library and the people who use it. May we not with equal pleasure and profit find out about the other eighty per cent. whom we do not reach, who they are, where they are, and why they are?

From the total population we must subtract five per cent. to represent those too young to read, and another five per cent. for the class of people who are either illiterate or do not read the languages represented in the library. Then we come to larger classes of people. The first comprises those who are seldom able to leave their homes for various reasons, such as sickness, children, poverty, and the like. Another large class is that of the people

who do little reading of any sort and who care nothing for good books or magazines. Their reading is confined to the daily papers and to cheap story and sporting magazines.

The third large class whom the library can scarcely reach is the people who are too busy. If we should count all the people who say in an apologetic tone, "Well, I like to read, but I can't get time for it," when asked if they use the library, the number would be surprisingly large. In the ten per cent. estimated in this diagram we do not take the word of all those people. There are many of them who really have the time if they only think so. Something else appears more necessary or attractive to them.

On the contrary, we must consider the man of big business, who snatches a half hour once in a while to do some reading. He is very likely to have his own books. He may know that the library has beautiful editions of the world's great books or the latest book on financing a corporation, but he has not the time to go to the library. If he sends to the library once or twice a year for a particular book, we still do not count him one of the library patrons. We must also think of the many persons who work long hours, a regular day's work besides several hours of schooling, for instance. Night school students are an illustration of this. Other persons have several interests which occupy every moment of their time when they are not sleeping and eating. It is a safe statement that one person out of ten throughout the various ranks of society is actually deprived of the time to make proper and convenient use of the public library.

But when we have subtracted these classes of people whom the library cannot reach and the people who are already registered borrowers, we will find that there are still forty per cent. of the population of such a character that the library can under certain circumstances reach them. They are people who read to some extent, and they can find an opportunity to read. The problem is either to attract them to books as a pleasure or to arouse their ambition

for greater knowledge, or to convince them that books have something of a practical money value. This is the first aim of library publicity—to make the library useful to all classes of people who can use it, to make the books connect with people who

are interested in every subject under the sun, to secure the largest number of cardholders possible, the largest circulation of books and the largest amount of study and reading of books either inside or outside of the library. Reference work deserves as much publicity effort as does the mere circulation of books. We need also to be reminded of the fact that the library will be most useful when its shelves are empty, when every book is out being read.

One of the objections to publicity on the part of the public libraries in the past was the matter of library dignity. A good deal was said ten or twenty years ago to the effect that the library should wait for people to come to it, and not make conspicuous attempts to induce people to read. Although the sentiment in regard to the extension of library service has greatly changed during this period, it still remains true that public libraries have a certain standard of dignity which needs to be kept in mind in all publicity work. Library printing should be carefully planned to conform to the best printing standards. Methods which will too greatly depart from precedent must be avoided. There ought to be some distinction between the publicity methods of a public library and those of a department store, for instance.

The size and character of the community have an important bearing on the type of publicity which will appeal to the public. In a small village, where the librarian knows everyone by name, it is commendable to raise book money by a quilting party, and permissible to send out library notices in parcels from the butcher's shop. But in a large city anything of so familiar a nature would create unfavorable comment. In several large cities window displays and moving picture slide publicity have been used with very great success, for beside increasing circulation they have acquainted great numbers of people with the fact that the library is endeavoring to make itself more useful and valuable. Instead, therefore, of detracting from civic pride in the library, they have increased it. The whole spirit of present library work is to bring the library into close contact with business people, professional men, with municipal departments, with working classes, and in fact with everyone. We must necessarily depart from the old exclusiveness and let ourselves become intimate with every person in the community. If the library is doing its work in an effective manner, in a helpful spirit, and in a straightforward, honest effort to be of service, it can scarcely lose any appreciable amount of dignity by

making itself known in whatever ways will benefit the people.

Another aim of library publicity is to benefit the library itself. One of the departments of city government with whose aims and methods the city officials as well as the general population are least acquainted is the public library. Public opinion is vital to the support of a library. If the people are kept posted on the management of the library, with the new features which are being introduced to give greater satisfaction to readers, with the new books that are being added, with the economical administration which we think we are maintaining, the result is sure to be that they will take pride in the library and support it in whatever it wishes to undertake. On the contrary, if publicity gets into the newspapers concerning petty disturbances within the library, and nothing of a sort that inspires the public with confidence, the result is inevitable. Through the aid of this publicity concerning library administration most of the community may be kept very closely informed of what is going on. When the time comes for appropriation bills to be passed the people are well aware of the needs of the library and are sympathetic with its purpose.

An aim of library publicity which needs to be remembered is consistency. Whatever statements are published in the way of advertising new books or new service must be backed up by the service itself. To secure the sort of publicity which will bring a hundred people to the library for a particular book, and then to have only one or two copies of the book, is not only unfortunate but is most harmful in its results, as it is a justifiable ground for complaint. This regulation of supply and demand needs to be very closely followed, even as far back through the processes as the selection and ordering of extra copies. In issuing an extended title list of books on certain subjects it is not always necessary that all the books should be on the shelves when a reader calls for them. It is doubtful if there will be, within a two-week period, more than half a dozen calls for a partic-

ular book from a title list of two or three hundred items, and in most libraries the readers have the privilege of reserving the book if they are not in. In the case of fiction it is difficult to do any advertising consistently, for few libraries are fortunate enough to supply the fiction which is always demanded.

Last of all, publicity in any library should be managed so as to be economical. There are still many people who think that a library is an unnecessary luxury. They certainly cannot understand why the library should advertise its books to get a larger circulation, to cause a greater demand which will require a still greater expenditure and thus a larger burden on the taxpayers. They are the people who do not make a city progress, but must be kept in mind when spending public money. Publicity should be so planned that it will not expend more time than necessary. In some libraries a number of members of the staff are constantly working up lists and sending out publicity which has little result. Lists of books on subjects in which only a few people are interested are seldom a paying proposition. It is better to send a short letter to the few people interested and let them make out their own lists at the library. One form of practical library co-operation which at the present time has scarcely come into use is the inter-library exchange of annotated lists and book notes, and the use of publishers' lists and circulars with library imprint. We find that several libraries in the country may issue a list on the same subject, or bulletins containing notes on the same books, during the course of one year. All of these are about the same in their character. Much money could be saved in printing and in time if many of these lists were published by a co-operative system, so that every library could benefit by the work of one library. Perhaps the time will come when libraries will not think it a transgression to copy the notes of other libraries, or to take notes from other sources without giving credit. We can scarcely think of any profession with higher aims than our own. To secure the greatest good to the greatest number at

the least cost, some method whereby duplication of effort may be avoided is evidently a desirable thing, and any motive which stands in the way of a free exchange of work between libraries is not in keeping with our ideals.

When it comes to practical methods of advertising the library's resources, we need to be constantly on the alert to discover the needs, to find fields which can be worked, and then to decide on the proper medium for accomplishing the result. Nothing can help so much to this end as an acquaintance with the community, the various sections of the town, the various classes of people, the business and industrial interests, the attitude of various individuals toward books. Several libraries have made community surveys, with highly profitable results. Mr. Solis-Cohen, of Brooklyn, has made the most thorough, perhaps, of these investigations, although confined to only one section of the city. These surveys need not be charted or exhaustive. A few days invested in this work or a few hours spent from each week in looking for possible ways of increasing the library's usefulness, will bring in so many various possibilities that the question immediately becomes one of selection. Time and money are limited; shall we have some posters printed to tell the men in the shops that the library is located at Fifth and Broadway and can be of service to them, or shall we take a handful of postcards to the book shelves, and send a notice of each of our mechanical books to the managers of the various factories? We can only decide by studying our book stock and the factories together.

We may discover an area of several blocks in which the residents seem never to have heard of the library. The people are mostly foreigners. Shall we advertise our foreign books, necessitating the purchase of more books, perhaps, or try to establish a deposit station of both English and foreign books in a drug store there? Time and money are the factors in the decision.

Again we should take advantage of organizations to reach large groups of people, especially societies of working men, real

estate boards, study clubs, and the like. This is a possible method of advertising which exists in every community, but which has been little cultivated. To reach the business men we may advertise in their local board of trade bulletin, noting particular books, and we may see some result. Then we may send an individual list to each member. Best of all we can talk for a few minutes before the business men's meeting and show half a dozen sample books. Nothing will convince people that books have practical value so much as to show them an actual book instead of telling about it. However much we may shrink from a talk, or an "address," there are few other methods so profitable as the personal visit, and if the listeners can be induced to ask questions about library methods or particular books, the effort is well repaid. Sometimes arrangements can be made to issue library cards and give out books at these meetings.

There are always broad, standard subjects, in which a great many people are interested, such as music, art, travel, business, housekeeping, or electricity. Lists of these are always timely and give results when properly distributed. Whether these lists shall be annotated, or simply title lists, whether they shall be long lists or only short selected lists, requires the knowledge of supply and demand, and depends on the amount available for printing. It would be rather difficult to analyze the comparative profit from these various forms, and the method of distribution is a much more important element of success than the form itself.

Current events, forthcoming lectures, plays or musical events may be made the occasion for brief newspaper notes or leaflet lists. If the public schools are introducing a course in domestic economy, let the graduate housewives know that they can pursue a course of reading at the public library, or borrow a book of chafing-dish recipes. It will not shock the grocer's customer if the delivery boy hands her a library list on housekeeping. If the circulation of the library is making notable increase, let the figures be given newspaper

publicity along with the bank clearings, as a sign that the town is keeping up in its intellect as well as in real estate.

Newspaper publicity, by almost any test, is the best form that the library can utilize, and should receive continual attention. Where the library can circulate a thousand lists at considerable expense, a six-inch newspaper story will reach many times that number of persons. After the "copy" is prepared for the editor, no further expenditure of time is called for. In nine cases out of ten the newspapers are well disposed to the library and will give it their help. The extent to which they will give up their space is exceedingly variable, however. In general, the smaller the city or town the more space can be had. Newspapers in large cities are seldom willing to publish book lists. The order of preference which they show for library notes is somewhat as follows:

1. News items concerning new policies, methods, or efforts to improve the library.
2. News items as to large increase in library collection or circulation.
3. Short title lists of new additions of recent and interesting books. Some papers will run these lists as a regular feature.
4. Short title subject lists on some topic of current interest, or on a subject in controversy, etc.

Some libraries are able to prepare "stories" which begin as news items of interesting information, and close with names of two or three library books on the subject. Whether the time consumed is repaid in results depends largely on the ingenuity of the librarian. There will be found on investigation in nearly every town a number of regular publications of societies, groups of people of one interest or language, whose existence was not realized. These magazines and bulletins make fertile ground for special lists and articles, for most of those who read them, it may be assumed, are interested in the subjects in question. The mere acquaintance with their editors is well worth while to the library.

When the library issues printed matter of its own its main care should be in methods of distribution. A subject list given

out at the library is a service to those who are already patrons, and may increase the circulation. But the effort of publicity is to introduce new persons to the opportunity which awaits them, rather than to tell present users the things they may learn from the card catalog. To place every piece of library publicity in the hands of some one who will respond is a much more difficult thing than to compile a list. When an attractive list of "business books" has been issued, for example, what will be the cheapest way to put every copy before actual business men? They can be distributed by a boy, from office to office; they can be mailed to addresses taken from the business directory or from the membership list of the board of trade. Sometimes they can be given out at a business men's meeting, or sent with other mail going out from the chamber of commerce office. In one city the various organizations cooperate with the library by allowing the use of their addressograph machines and lists. The item of postage is one which counts up very rapidly, and which should be charged against the publicity funds. The multigraph and other machines for printing inside the library are in use in many large cities. Beside saving money, they are fully as useful on account of the quickness with which lists and notices may be prepared after the need has been discovered. If, in the morning, it is found that a lecture on the North Pole is to be given in the afternoon or evening, a multigraph list can be easily ready for distribution. With these machines also a library can send out letters of information or invitation to great numbers of people, at not much over the cost of postage, whereas the expense of having these letters printed would often seem prohibitive. The work incurred can be done at "odd times," when opportunity offers.

Sending individual post-cards notifying non-users of books which should interest them is a fertile means of reaching new prospects. There is sure to be greater response to what seems like a personal message, but the librarian is under greater obligations to see that the reader receives satisfaction than in the case where printed

lists or circulars are mailed. The post-card method may also be easily overworked, becoming a heavy time-consumer. In that case it should not be used to send notices of new books which will have a naturally large demand, to friends or persons who already use the library.

There are many ways of distributing posters, such as placing them in store windows, tacking them in shops and stores, or public buildings. Posters in the street cars are in use in several cities. The regular rates for this form of advertising are prohibitive, and it is only practicable when the street car company or some advertiser is willing to give up the space to the library.

The motion picture theater has great possibilities as a medium of library extension. An increasing proportion of the films are of an educational and constructive nature, and the "movies" are patronized by young people of all classes, and by the common run of grown-up people. Therefore it is not necessary for library workers to say that the great majority of films are of a sensational, disagreeable and distinctly unelevating character, that the use of the pictures for educational purposes is almost certain to be carried to excess, resulting in a disorganized and undisciplined condition in the minds of children, and that the motion picture habit distracts from reading and study and draws children from libraries. Public opinion actively supports the moving picture; the picture theater is the greatest competitor of the public library, and the very people whom the library serves the least are the mass of men and women who patronize these theaters. Such being the case, it appears that the library has an opportunity here which should be taken up and developed. The library, under fortunate conditions, may secure the cooperation of the theater managers. The mere advanced realize that the educational value of the theater is emphasized by cooperation with the library, they are well disposed toward the public library, and if properly approached are willing to be of more or less assistance.

Some of them will run slides advertising the library between their films or at the

end of the program. These slides cost about \$1.50 to prepare. It is necessary to have a card lettered by a sign painter before the glass slide is made. The wording on the slide should be very brief, three or four lines to attract and create a desire to use the library, three or four lines to tell of the location and hours, if necessary. Every word is important. Where the library has a number of slides out, a record should be kept, so that they may be changed from theater to theater every two or three weeks. By placing the following words at the bottom of the slides we have had good success in Los Angeles: "This theater gladly aids library extension." We now have about thirty slides in use, about half of them in the neighborhood of the branch libraries. When films of an educational nature are being featured at a theater the library has another opportunity. If Scott's "Lady of the lake" is on the program, for example, special slides can be run advertising Scott's works, books about Scotland, and the like. In one city the theater and the library worked together in conducting a prize essay contest on "As you like it." While some of the essays were submitted by high school students, many were written by men and women to whom writing compositions was a decided novelty. The library was able to bring them in a pleasant and profitable manner to that which is its aim—the careful study of a great and inspiring author.

Another recent development in library publicity is the use of store windows for the display of books. This is a very effective method, and one which incurs little expense. It attracts wide attention of a constructive sort, and brings new persons to the library. To secure the interest and coöperation of the managers and employes of the store itself is alone worth while, and can generally be accomplished. The most difficult feature connected with window exhibits is to convince the owners of the large stores that they are not setting any precedent which may cause them later regrets. Most of them complain of being besieged with requests for this privilege. In Los Angeles a "Library week on Broadway"

was arranged, in which eight stores contributed parts of or complete windows. The books selected were appropriate to the store in question. The city's largest grocery store showed books on housekeeping, cooking, and the chemistry of foods. The city's largest furniture store showed books of house plans, decoration, period styles, and a group of music scores and books arranged near a piano. One of the department stores furnished figures of a man and his wife reading at the evening table, with their little girl seated on the floor in the foreground, reading "Mother Goose." Around the sides of the space were groups of books on business, mechanics and housekeeping. Appropriate cards in each window served to explain the books and the use of the library. During the week of the display the stores gave out special circulars containing condensed information about the library. Similar exhibits of farm and garden books in a seed store, children's books and other special displays have been made.

After all, the best form of library publicity is that which comes from satisfied readers. It is while making the worthy effort to improve internal methods and reach perfection in the mechanism that we forget to keep our hand on the pulse of the people outside.

The departments which work directly with the public are the means for interpreting the public's wishes, and making the mechanism respond. The information as to what the people are asking for, what they are expecting in choice of books, timeliness of books, convenience in using the library equipment, must be transmitted immediately to the proper source to secure action, if the public is to be satisfied. Word-of-mouth publicity is the most powerful of all, and constructive publicity depends on the reader's feeling that he is receiving good treatment. The public are seemingly glad to endure hard rules, or inconvenient service, if only they think the library staff is doing its best or is working under some handicap. But the favorite complaints—"Never can find it in;" "They are so slow about getting new novels;" "So much red tape to get through," spread with appalling

influence to people who receive no counter-stimulant to use the library, and these complaints can easily nullify any efforts at printed publicity. All departments of the library, therefore, ought to be aware of each other's aims and methods, so that when necessary they can and gladly will depart from routine to meet the emergencies which often arise in dealing with the public, and feel that, whatever their part in the library's work, its goal is the satisfied reader beyond the delivery or reference desk. If the members of all departments are on the watch for news items, book reviews, and other clues by which readers' requests may be anticipated, and if they can see that the information takes the form of "rush" book orders, short cuts through the catalog department, quick returns from the bindery, then the large class of people

who stay away from the library because it is not as prompt as a department store, for instance, will become enthusiastic library patrons. Good service can accomplish more than organized publicity, but the two together are irresistible.

Let us take ourselves to the top of some high office building, where we can see our city spread before us, or climb the hill overlooking our country town. This is our field of endeavor. The library building, with its merry hum of activity, is but the means to accomplish an end. We must forget the routine and see the homes, the shops, and the offices at our feet, reaching into the horizon. We must listen to the sounds of the people at work. Every home, every shop, every office is an opportunity awaiting us, calling for the message of the books.

THE CLASSIFICATION OF LITERATURES IN THE UNIVERSITY OF ILLINOIS LIBRARY*

BY PHILIP S. GOULDING, *Catalog Librarian, University of Illinois*

In the administration of any library, and of a college library in particular, the basic principle must be the convenience and benefit of the users. In no part of the administration is this more necessary than in the arrangement of the books on the shelves, *i.e.*, the classification. The professors and instructors have a right to expect their material to be conveniently arranged, and the library staff, I believe, has the unvarying duty to thus arrange it just so far as possible, even at the cost of certain departures from the schedules in general use in their library, or the cost of reclassifying certain large sections at intervals, as the numbers of the staff and their other duties will permit. Too often, I fear, classifiers and catalogers do not thoroughly appreciate this principle, nor consistently act upon it, and as a result dissatisfaction creeps into the minds of the faculty, spreads with more or

less rapidity, and may develop into open or secret hostility to the library. An effort, or several efforts, made by the University of Illinois Library to carry out this principle in the great field of literature I propose to outline in this brief sketch.

For a number of years there had been a great and serious dissatisfaction with the literature classifications, which followed quite closely the D. C. schedules. The classics faculty objected to the arrangement of the material in their section, because it was not, to them at least, logical or reasonable; it was almost impossible, one of them told me, to find anything without "chasing himself around the section of the stack containing the books a half dozen times"! To others as well it had been unsatisfactory. Classification into forms, poetry, drama, essays, etc., was not really necessary, and was hardly ever anything but confusing. "The D. C. arrangement separates the works of an author if they come under different forms of literature,

* Read in outline only at the joint meeting of the Illinois and Missouri Library Associations, St. Louis, Oct. 25, 1912, and here revised for publication.

and in the classics the study is rather of an author than of a literary form. Moreover, most students are unfortunately so unfamiliar with the classics that they would have very little idea what group to look in for the author desired." (I quote from the assistant who has been in charge of the classical department library for two years.) In addition, whenever a new or comparatively unknown author made his appearance, he had to be put into the miscellaneous class, or a great deal of time wasted in ascertaining the exact place to classify his works. As a result the miscellany had begun to show serious signs of overcrowding, with a mass of authors that really belonged elsewhere, and the classics faculty, expecting to find them with their respective subjects, were growing daily more dissatisfied with their section and with the library in general. Some slight attempts had been made to better these conditions, but without much effect, as the task of reclassification, either in making up a scheme or in altering books and records, was too large a one to be undertaken by the force available.

There had also been considerable dissatisfaction with the other literatures, especially in the separation of an author's works by the use of the form divisions as given in the D. C. In this library we had not used the period subdivisions under the various forms, but arranged all poetry, drama, etc., together, thus, for instance, mixing in one alphabet the works of Chaucer, Pope, Dryden, Tennyson and Swinburne. This had been a serious drawback to the classification, as is quite reasonable. Then the collections, history, etc., had followed the individual works instead of preceding, as is so much to be desired. Both of these drawbacks, especially the first, caused well-founded objections on the part of the professors and students alike. It is not right to expect a user of the library, no matter how well accustomed to library methods he may be, to find all of an author's works when they are in half a dozen places, and the works about him in still others. Take Victor Hugo for an example: his works appeared in 841, 842, 843, 846 and 848, while his life was put in the

biography section, and it is hard to see how it could have been put with any one of the classes just mentioned any better than with another. Schiller's poetry in 831, his drama in 832; Lessing's plays in 832, his essays in 834 or 838; Stevenson in both 823 and 824, are but a few examples of the state our shelves had been brought into, and the just causes of the complaints raised by the faculties concerned.

The lack of any period divisions was also a bad thing, although it is very doubtful whether their addition would have remedied the general state of affairs enough to make it worth while. It would have, indeed, grouped the authors to some extent by periods, but would not have done away with the separation of an author's works just mentioned.

To all the criticisms and expressions of opinion of such arrangements, we had hardly any good answer to give, save the one already mentioned—that we had not the force to handle the change, with the library beginning to increase at a much more rapid rate than heretofore, and the problems of its cataloging and classification becoming daily more complicated as well as more numerous. Finally matters were brought to a head by the purchase, in 1907, of the classical library of Prof. Wilhelm Dittenberger, containing over 5000 books and many pamphlets. It was at once seen that here was the time for installing some new plan, if ever it was to be done, and an extra assistant was authorized to take charge of the classifying and cataloging of the collection. Before his arrival, early in 1908, some discussion of the matter was had with the classics faculty, and the sentiment seemed strongly in favor of the arrangement of all works of classical authors, not including collections, in one alphabet each for Latin and Greek, though details were not settled upon at that time. It was also decided to apply the new scheme to the new collection first, thus rendering it usable to the professors and students concerned, and then alter the material already in the library.

After the coming of the new assistant, Mr. Herbert W. Denio, he spent considerable time in roughly arranging the col-

lection and developing the classification. He finally devised the scheme that we have ever since continuously used, with good satisfaction to all who have had occasion to use the classical material. Its main plans are: 870 and 880 for history and general criticisms of the two literatures, including also periodicals and society publications; 871 and 881 for the works of individual authors, 872 and 882 for collections. In the first and last of these no attempt was made to distinguish the different forms—poetry, drama, etc.—all being arranged in one alphabet. In 871 and 881 the book number scheme was, I believe, the original work of the assistant mentioned. It was made up by consulting many different authorities and therefrom obtaining a practically complete list of all classical authors whose works have survived, or about whom there have been criticisms, lives, etc., written, though none of their works have come down to us, such as Socrates. From this list (arranged alphabetically, of course) a numerical table of book numbers was made up under each letter, the numbers being treated as decimals as in the Cutter tables. For instance Cæsar is C2, Cassiodorus C3, Catullus C5, Celsus C6, Cicero C7 and so on, and between Cæsar and Cassiodorus authors such as Calpurnius, Calvus, Capella, Caper are inserted, with such numbers as C24, C26, C27, C275. Of course any authors not provided for in the original scheme may be easily inserted without disarranging the alphabetic order, or using more than three figures. The table was so exhaustively made up, however, that such insertions are seldom needed.

Under the various authors the arrangement is:

1. Complete works in the original, arranged by year.

2. Translations of complete works, arranged by language into which translated, represented by a capital letter following the book number: D for Dutch, D2 for Danish (as being less likely to occur than Dutch), E for English, F for French, etc.

3. Bibliography of complete works, marked with a capital V following book

number and followed by lower case initial of the compiler.

4. Biography of the author, marked W and distinguished as before.

5. Criticism of the author (in general) marked Y.

6. Dictionaries, concordances, etc., etc., marked Z.

7. Fragments, selections, etc., marked X and arranged by year, and translations and criticisms of these.

8. Individual works arranged by special table (12 in Latin for such as Cicero, Ovid and Plautus; and 13 in Greek, for the great dramatists, Aristotle, Plato, Plutarch and the like). If no special table is made for the author in hand, works are arranged by initial of first word of title, using as a rule the Latin title in both languages.

9. Bibliography, criticism and dictionaries of individual works arranged with the work concerned.

The arrangement of fragments, etc., under X and out of alphabetic order, one possible but not actual drawback to the system, was caused by the fact that X was assigned to this use in the classics before it was decided to use V and W for bibliography and biography, and the whole section thus marked. The cases where the present scheme works inconvenience were so few that it was not thought best to change all the X's to bring them into their proper alphabetical place.

Of late there has been some question concerning the writings of the Greek and Latin fathers of the church. Some of these were placed in 281, with other works on the early church, a few more in the main alphabet of 881. The proposition now is to shelve the works of the fathers after the classic authors, by adding a decimal to their respective numbers. Collections and individual works both are to be included here, of all authors who can be called "post-classic" or "medieval," such as the D. C. would place in 879 or 889 as well as in 281.

Some slight modification of the D. C. has been made in the case of Paleography and Epigraphy or Inscriptions, which the classics department wished to have separated,

but they are not of sufficient importance to be dealt with at length.

Some scheme for the better classification of works on economic, social, and legal topics pertaining to ancient nations would be much welcomed. Several have been proposed and one at least actually tried, but none have succeeded entirely, or even enough to warrant continuing them. It would also be an advantage, no doubt, if the language material could be classed nearer the literature, but here also no proposed plan has seemed to precisely meet the situation. Of course, the shelving of the classics collection in a comparatively small room, where all the material is close together, does away with the demand for such a classification, so desirable in a larger collection, or if the departmental library were not in existence.

Regarding the practical working out of the scheme, let me quote once more from the assistant until recently in charge of this departmental library: "In the first place it would be better not to omit the form divisions in 870 and 880 as we did, for it is inconvenient to have histories of the literature mixed up with opuscula. . . . The arrangement of authors in one alphabet proved entirely satisfactory; it never gave the least difficulty. . . . The arrangement might be improved by arranging complete works by editor instead of by date of publication, as the chronological order separates different editions by the same editor, which is particularly unfortunate in the classics, where the editor is of more importance than the date." She also notes that the Collections, now in 872 and 882, would be more useful if classed ahead of the individual authors; most users of the library would look for them there instead of at the end.

The next large section to be attacked was German. This also was occasioned by the purchase of a special library, that of Moritz Heyne, in 1909. It being desired to bring all the works of an author together and yet include some period division, a good deal of thought was given, during several months, to the classification of this subject, but without much result. At last, in the spring of 1910, when a special cat-

aloger had been secured for handling this collection, the suggestion was made by a member of our staff, formerly on the staff of the University of Minnesota Library, that the scheme in use there might be what we wanted. This scheme, which we have adopted practically entire, was installed there by the librarian now in charge, who had also installed it at the University of Missouri, and was obtained by him from the Columbia University Library, where it had been installed by Mr. G. H. Baker. So far as I can ascertain it has been a success wherever it has been used; it has certainly been with us. Owing to a certain combination of circumstances, we were compelled in this case to apply the new scheme to our older material first, leaving the Heyne collection to be done by the new assistant. In brief, the plan is as follows: Under 830 we place all general works on German literature (not including here those literatures included in '839 in the D. C., Dutch and the Scandinavian languages). This is subdivided as follows: .1 Bibliography, .2 Biography, .3 Dictionaries, .5 Periodicals, .6 Societies, .7 Study and teaching, .8 Collections, .9 History and Criticism. Under any of these, but under the last two particularly, a further subdivision is made by subject, by adding the figure for the form division from the D. C., 1 for poetry, 2 for drama, etc., so that a collection of German poetry would be classed 830.81. Legends and folklore are placed for the present in .9 under the second subdivision, folklore societies being 830.69, etc. This is not a perfectly satisfactory arrangement, and we hope to better it some day. Under .92, History of drama, we place also works on Miracle plays, History of the stage in Germany, etc. Though we do not at present use it, a further and very tempting subdivision could be made by adding a period number, of which I shall soon say something, to these two-figure decimals; for instance, Lives of early German poets would be marked 830.211; a collection of drama of the reformation period 830.822; History of modern German fiction, 830.934, etc., etc. As this is merely an extension of our present scheme and not a change, thus involving

comparatively little labor to install, we may some time take advantage of it.

The form of the class and book numbers for individual authors used in this system is, so far as I know, peculiar to the system, though the book numbers are founded upon the scheme used at the New York State Library for Goethe and Shakespeare. Its very peculiarity, however, has rendered it very easy to work with, for the classifier, the shelf assistants or the users of the library, and we have heard no criticisms of it from any source. The works of individual authors are grouped into four *period* divisions: 831, Early to 1517; 832, Reformation and medieval; 833, Classic period, 1750 to 1830; 834, Post-classic and modern, 1830 to the present. This division was finally settled upon after some discussion of the plan and a careful examination of both the D. C. and Minnesota divisions by the head of the German department and some of the professors. The *class number* consists of three figures for the period in which the author to be classified was most active, followed by his two-figure Cutter number, *all on one line*. For anonymous works, the Cutter number is taken from the first word of the title not an article, or from the word or phrase by which it is best known. When the name or the title begins with S, as so often happens in German, we use two figures of the Cutter-Sanborn table as being more compact and convenient to handle. The *book number* consists of a capital letter from the scheme below, followed in most cases by the Cutter number as before, with the same exception for S. This scheme falls naturally into two large divisions, A to H comprising works about the author, I to O his own works:

- A Bibliography
- B Biography
- C Correspondence
- D Critical works (higher criticism)
- E Concordances
- F Lexicons
- H Critical works (minor and textual)
- I Collected or complete works in the original
- J Collected or complete works in translation

K Selections, fragments, etc., including prose of a noted poet, poetry of a noted prose writer, etc., in the original

L Same, in translation

O Individual works

Under A to H, the Cutter number is used, as stated above; under I, J, K and L the arrangement is by editor or translator if given, using the lower case initial of his surname; if no editor or translator can be found, the date of publication is used and a chronological arrangement follows the alphabetical one.

Under O (Individual works) the different works are distinguished by a lower case initial of the title, and by the editor's initial or by date as in complete works. A period separates the initials of the title and of the editor, so that no confusion arises when it becomes necessary to use two or more letters for the work in hand. Translations, criticisms, concordances, etc., of individual works follow the various works treated. Bibliographies of individual works would be marked with a capital V following the indication of the title, though we have not just now many such bibliographies in the library.

An example of the way the scheme is applied to a particular author will help to make it clearer. Goethe's number, for instance, is 833G55, as his work was done during the classic period. Book numbers for various works would be as follows:

Düntzer's life of Goethe	BD92
Gervinus, Goethe und Schiller	DG32
Meisterwerke, ed. Bernhardt	KB45
Egmont, Buchheim ed.	Oe.b
Faust, Thomas ed.	Of.t
Faust, Auster tr.	Of.Ea
Faust, Baumgarten crit.	Of.Yb
Iphigenie, Buchheim ed.	Oi.b

Beyond the period divisions we have thus far used only one class number, 838 for Platt-deutsch. Thus 835 to 837 are available for dialects or for any kindred class for which a special place might be desirable. 839 we have reserved for Dutch, Scandinavian, etc. For Dutch we should probably use 839.3 as in the D. C. The Minnesota scheme subdivides Scandinavian as follows:

- 839.4 Old Norse, Icelandic, Faroese
 .5 Swedish
 .6 Danish and Norwegian to 1814
 .7 Danish after 1814
 .8 Norwegian after 1814
 .9 Gothic

Whether or not we shall ever use this part of the system seems doubtful; there seems at present little demand for it. It would probably work out as well as the German proper.

I am inclined to think that the plan might possibly be improved by bringing the various *forms* of literature which are confined to one *period* division nearer to the individual authors for the period in hand, making, for instance, a collection of early German poetry 831.081 instead of 830.81. This has the old disadvantage of making the general follow the special, but might work out well in practice. The assistant now in charge of this section tells me, however, that there has been no demand for such a change, nor any complaint concerning the separation of collections and the works of individual authors for the same period division. We have not, therefore, seriously considered the adoption of this amendment. I merely mention it as a possibility.

The same assistant informs me that the scheme has one tendency which is sometimes troublesome. In this library we have always been more or less uncertain as to whether it is better to class an author's works all together, regardless of the subject, or to scatter them through the classification as they would naturally fall. The literature teachers naturally have preferred the former plan, but it has had drawbacks in many cases, and the decision has often been difficult. The scheme just presented, the assistant says, tends to accentuate this difficulty, which she generally solves by considering whether or not the author in hand is to be considered as a "classic" or "standard" writer; if he is, she classes his works in the same place, otherwise by subject. Goethe's voluminous works, on a large variety of subjects, naturally are better kept together in almost any library, while some minor writer, little known and seldom referred to, may have his works

scattered with small inconvenience to the searcher. The added criterion as to whether an author did most of his work in the field of belles-lettres—or, as one person said to me, wrote "books on no subject at all"—or whether he is equally prominent in other fields, would be helpful and possibly more final. For instance, at the time of the rise of the Rosicrucian order, there was much literature pro and con, some of it by noted authors; this we have invariably classed with the subject, unless there were a special request to do otherwise, no matter how distinguished the author might be in other lines. There often arises also the question of philosophical works, bought by the Philosophy department, but of which we may have other editions or copies in the German classification because bought for German students. Here we have not attempted to follow any set rule, but have very often classed the added editions or copies with the section most useful to the department purchasing, regardless of the classification of the material already in the library. Generally speaking, however, we class belles-lettres, or pure literature, in the 830's and scatter the other material.

About a year after the reclassification of the German section, a similar plan was submitted to the faculty of the Romance language department, but they seemed, rather strangely perhaps, satisfied with the arrangement of their material, and no change was then made. During the winter of 1911-12, the purchase of a third large library, that of Gustav Gröber, whose work was mostly in their field, brought up the question once more, and it was decided at this second discussion to make up a scheme for this section also. The decision was largely influenced by the presence of several new members of the faculty, who had had occasion to use the German section, and to compare it with the Romance, both being shelved in the same large room. One of them remarked that he could always find without help what he wanted in the German section, while the Romance arrangement was "incomprehensible" to him.

The plan finally adopted for this section is practically the same as that for German, with some minor modifications. Romance

literatures as a whole are classed in 840.01 to .09; by this means the material on this subject is kept with 840, yet precedes the three large groups that compose the field. Here we may use the second decimal when desired, as in German, for period divisions, and the old D. C. form division, as a third decimal, is also possible. Thus: Bibliography of early Romance drama would be 840.0112; Biography of medieval Romance poets, 840.0221; History of modern Romance fiction, 840.0953. Of course no individual authors are classed in this section; each one stands with the specific literature with which he is identified.

Under 840, French, we have five periods: 841, Old and early French; 842, Transition and renaissance period; 843, Classical period; 844, 18th century (1715-1789) and 845, Revolution to the present time. 846 and 847 are left vacant for possible additions in the field of French dialects; 848 is used for Provençal, with .1 for early, .2 for later works. In 850, Italian, we have also five periods: 851, Early to 1375; 852, Classical learning to 1492; 853, 1492 to 1585; 854, 1585 to 1814; 855, 1814 to the present. 856 is used for works in Italian dialects; 857 for Sardinian; 858 for Rumanian, including Wallachian; 859 for Rumansh, Rhaetian, Rheto-Rumanian. In 860, Spanish, we have again five periods: 861, Early to 1400; 862, 1400 to 1553; 863, Golden age, 1553 to 1700; 864, 18th century; 865, 1800 to the present. 866 is used for Spanish dialects, 867 for Catalan, 868 for Portuguese. All the period divisions in this section were assigned after careful consideration and discussion with many members of the Romance faculty, and thus far have proved entirely satisfactory. These gentlemen also gave us valuable aid on questions of dialects, minor languages, etc. While we have not yet put it into effect, I think it might be entirely feasible to use 869 for Spanish-American literatures, if the size of the collection or the amount of its use seemed to require such a number. Decimals for Mexico, Central and South America are available, without making unduly long numbers, as for instance: 869.1 Mexico

.2 Central America and the West Indies

- .3 Brazil
- .4 Argentine Republic
- .5 Chile
- .6 Bolivia
- .7 Peru, Colombia, Ecuador
- .8 Venezuela, Guianas
- .9 Paraguay, Uruguay

Of course a second decimal could be added as the collection grew, if necessary or desirable.

The only change in the book number scheme from the German plan is that D and E are used for higher and minor criticism respectively, instead of using the latter for concordances; F and G are now used for concordances and lexicons, H left vacant; the remaining letters are used precisely as before. An example may be useful under Victor Hugo, whose class number is 844H87:

Life by Brunetière	BB83
Criticism by Gautier	DG23
Odes and ballads	K1897
Dramatic works translated by Slous and Crosland	LS56
Hernani, Matzke ed.	Oh.m
Bruner, Characters in Hernani	Oh.Yb
Les Misérables, Sumichrast ed.	Om.s
Les Misérables, Hapgood tr.	Om.Eh

The "Minnesota scheme" provides also places for English and American literatures. American is given the number 81 only, no period divisions being made; in English the periods are: 821 Anglo-Saxon to 1150; 822 Middle English, 1150-1500; 823, 1500-1700; 824, 1700-1800; 825, 1800 to the present.

I should advocate making American literature 811 instead of 81; the histories, etc., being classed in 810 with subdivisions would then be more easily shelved ahead of the individual works; 81 might easily, in the hands of careless pages or filers, be arranged ahead of 810.

In the English section, I should add a few period divisions, making them a trifle less comprehensive, leaving 829, and perhaps 828, for works in English dialects if the collection ever grew to a size that warranted a separate place for them. I should make 823 cover 1500 to 1625 only; the

Elizabethan period has so many authors that more should not be forced into it than necessary; then 824 for 1625 to 1702; 825 for 1702 to 1745, the age of Anne being again so rich in authors; 826 for 1745 to 1800, and 827 for 1800 to the present. I have not consulted with any one of the English faculty on this subject, and do not know how they would wish the divisions made. It seems likely, however, that this section must be attacked in a year or two, so that these seemingly premature suggestions may not be entirely out of place.

I am not sure that the Minnesota plan would have worked so well with the classics; I am rather inclined to believe it would not. There is no demand here for period divisions any more than for form divisions; the present plan is much more compact and serves every purpose, while the different demands upon the German and Romance sections have been met by a totally different system, which provides, we believe, a place for all that can ever come up, both as regards classification and book numbers. For the same reason I have the opinion that American literature might well be excepted from the Minnesota plan and put under the same general plan as the clas-

sics, unless there were a great demand for period divisions, as seems hardly likely just now. In the other literatures, 890, the scheme to be used will depend, of course, entirely upon the size of the collection and the requirements of the faculty and students. For the majority of libraries I should not attempt any subdivision, either by form or period, having, for instance, Russian 891.7; Hebrew 892.4, and arranging all authors in one alphabet, as in the classics. As the collection grew and the needs of the library demanded, further subdivision could be introduced. These are problems to be settled later; at present we have enough on our hands so that we do not care to try to solve future problems until they become present ones.

Of course our system might not, probably would not, be feasible in a smaller collection, especially in a public library. Even the larger public libraries, and possibly the reference libraries, might not find it any improvement over the D. C. or their own arrangements; but in a collection of any size, in a college library, I am convinced that our plans, as now used and in prospect, would be most easily handled by the library staff, and most satisfactory to teachers and students.

THE FUNCTION OF THE LEGISLATIVE REFERENCE BUREAU*

BY S. GALE LOWRIE, *Director Ohio State Legislative Reference Bureau*

THE idea of reference libraries, collected and managed for the special use of government officers, is not a novel one to librarians. There is probably no form of special libraries which has received more consideration in recent years. The examples of New York and Wisconsin in adapting the modern library to the use of those who have to deal with great public subjects and must be quickly supplied with accurate and recent data, have been followed in a number of states. The larger cities have also adopted the plan and two of our national political parties have estab-

lished reference departments for their particular uses. Yet notwithstanding the rapid growth of these departments there prevails an uncertainty as to their proper function sufficient to justify an explanation of their organization and work.

The work of a legislative or municipal reference bureau falls into three fields. The first may be termed the work of the library proper, and consists of securing and making available for ready reference such material as may be secured on topics of current interest. The second may be termed, for want of a better name, the division of expert service. Its function is to place at the disposal of the investigator

* Paper read before the Ohio Library Association, at Oberlin, Oct. 8, 1913.

not only the most recent and valuable material upon the subject which interests him, but the services of those who by special study and training are qualified to instruct or guide him in his search. The third function is quite distinct from the other two, and is that of the bill drafting department. Its duty is to aid any legislative official to express in concise legal terms the provisions which he is seeking to have formulated into law.

The reference work of such a bureau differs not widely from that of any modern library. As is the case of other special libraries, it has been necessary here and there to develop more highly certain phases of the work. An analysis of the work a library of this character is called upon to do and an attempt to adapt the institution to meet these needs has resulted in a more extensive development in certain fields and a corresponding neglect of phases of library work other institutions might conduct with profit. The chief ways in which the function of a reference library differs from that of a more general library lie in the nature of the material called for and the time which is available to supply it. It is only the subjects of comparatively recent development which interest the average patron. He is after new methods and new devices, frequently of too modern a character to appear in the more permanent literature of the subject. Not yet has this subject found a place in the encyclopedias and bound volumes to which the general librarian would at once resort. Dependence must be placed upon what may be termed "fugitive sources." Magazine articles, newspaper clippings and reports alone offer assistance. Frequently correspondence must be resorted to to secure needed information. Obviously for such a purpose the books and documents with which an ordinary library would be equipped have no place in a library designed for work of this character. Attention is given rather to securing publications more difficult of access, and recourse is had to the shelves of the general libraries with which every community is supplied, for the more permanent literature on subjects of but occasional interest. To secure material of

other sorts, newspapers, magazines and documents of every description are scanned from which to collect articles and comments of special interest.

A second feature in which the demands upon a library of this character differ in a degree from those with which the general librarian is familiar, is the promptness with which the requests for material must be met. There is little time at the disposal of the patron of such a library. Not only does he wish his queries answered promptly, but he must have material presented to him so that the facts contained therein may be mastered in a short space of time. It requires skilled librarians to meet readily the diverse requests which are showered upon them. When material is to be found in indexed books, the task is simpler—more frequently it is to be found only in recent files of papers and periodicals. The uselessness of the ordinary magazine index guide with references to bound periodicals is at once apparent to anyone who has had to resort thereto for a bibliography, and after a weary search through many magazine volumes discovered how few of the articles he has noted contribute anything to his information on the subject. The more satisfactory way is followed of separating from magazines, bound books, or reports such articles as seem useful, and binding them as separates. A quick glance through them will tell their value far more readily than a study of even the bibliography under the old system. The material which may be treated in this way (*e.g.*, newspaper clippings) is frequently not listed at all in periodical indexes.

Most important of all, this material must be located where it is readily accessible to those who wish to resort to it. For this reason the law creating the Ohio Legislative Reference Bureau requires it to be located in the Capitol, and the ordinance creating the Municipal Reference Bureau of Cincinnati provides for its location in the city hall adjacent to the council chamber. In Cincinnati the council chamber adjoins the quarters of the Charter Commission, which open into the rooms of the Reference Bureau.

The use of the reference bureau for

bringing to the aid of public officers not only literature upon the problems which they must solve, but technical and expert aid as well, has not been as fully developed, nor is it so well understood. As with the other features of the reference library idea, it has grown out of the attempt of the bureau to fulfil its function: bringing to the use of the public officers all available information. But consider the problem of a state legislative reference bureau. Who are the patrons of such a library? Principally members of the legislature: farmers, mechanics, doctors, laborers, school teachers, and lawyers. What problems are they called upon to solve? Questions of taxation, workmen's compensation, agricultural credit, state finance, and insurance confront them. What is their education and training in these subjects? The common school is frequently the only institution they have attended, some add to this a business training, and a few have graduated from college and professional schools. Some have long since forgotten how to grapple in hard study with the material with which they must familiarize themselves if they are to master these intricate problems. They are busy men. The time they may devote to these questions is comparatively limited. Flooded with material on any subject, many are as discouraged as before. To master the subject by patient study is for them impossible, at least in the time at their disposal; they need some one to explain to them, as you or I would wish some one to explain to us, many of the phases of these intricate matters. They want to ask questions apparently unanswered in the material before them. They must have help to digest in a limited time this data. This is a need the reference bureau is designed to fill. Time does not permit an adequate consideration of these problems while the legislature is actually in session. The legislative recesses must be utilized for a careful study of these problems. There are consequently, on the staff of the reference bureau, those well trained by graduate and professional study and by experience, in the economic, social and political questions with which they

must deal. Material is secured, data is briefed, and plans are presented for all the questions which can be anticipated. The official has thus for his assistance information as to the probable success or failure of the plan he proposes, knowledge of devices which might strengthen his plan, if it has been tried elsewhere, and a general critical study of his problem. Moreover, he has in his research the aid of one not only trained generally in the subject matter which interests him, but one who has become by special investigation familiar with all phases of the subject.

But assistance of this sort is not limited to that which may be received through members of the bureau's staff. Experts from every field are called upon to aid. This plan has been developed in Wisconsin perhaps more fully than elsewhere, and men of international repute are continually called upon to assist the members and committees of the legislature in their work. On questions affecting labor, Commons and Ely are consulted; on taxation, Adams; on forms of government and political questions, Reinsch and Lloyd-Jones; on public health, Ravenal; on agriculture, Dean Russell; and on conservation, Van Hise. The bureau is the clearing house through which it is made possible for those who need this aid to secure it.

The bill drafting work is perhaps the newest phase of this service. The first conception of work of this character came from England. Any one who consults British statutes is at once impressed with the clarity of their expression and the precision of their diction. This is due in no small measure to the fact that there is a department in the government manned by a permanent staff, which sets forth in legal language the ideas of the framers of the bills. For years, Sir Courtenay Ilbert has had charge of this work, and his services for his government are easily seen in the simplicity and clarity of English statute law. What has been the practice in America? We have looked upon bill drafting as the function of the individual legislator; but comparatively few members are lawyers, and scarcely any have the technical ability and knowledge of the consti-

tution and statutes requisite for the drafting of a satisfactory bill. Two serious results have followed: laws have been passed which are so complicated and of such uncertain diction as to make it impossible to know with any degree of certainty what was the legislative intent in passing the law; and secondly, those who have had the drafting of statutes have been forced to call to their aid those not disinterested in the bill. It would startle many of us to know how many laws in this country have been drafted by paid lobbyists of special interests. The crudity of the laws and the constitution of the state of Ohio is apparent to any one who has time to study them. It was an able body of men who sat in Columbus last year to frame our new constitution, but we wonder how in this age their work could be done in so slovenly a manner. So ambiguous is the language used, that little more than a guess may be hazarded at what they sought to accomplish. The attorney-general's department and the supreme court have almost a legislative function through their power to interpret our constitution.

As a natural solution for these difficulties came the legislative drafting bureau. Here are provided skilled lawyers who are familiar with our constitution and statutes. They quickly become trained by experience in the technique of their profession. To these disinterested assistants the legislators may turn for aid in the preparation of their measures. The exact function of a department of this sort has been little understood. Its work begins when that of the reference department ends. Not until the member of the legislature has reduced his requests to writing is the drafting department allowed to consider them. Its function is merely clerical, although of a highly technical nature. Possibly a clearer conception of the function of a department of this kind may be gathered from a reading of the rules which control the Wisconsin and Ohio bureaus.

"Rules for the Drafting Room

"1. No bill will be drafted, nor amendments prepared, without specific detailed written instructions from a member of the

legislature or the governor. Such instructions must bear the member's signature.

"2. The draftsmen can make no suggestions as to the contents of the bills. Their work is merely clerical and technical. They cannot furnish ideas.

"3. The Legislative Reference Bureau is not responsible for the legality or constitutionality of any measure. It is here to do merely as directed.

"4. This department cannot introduce bills or modify them after introduction, it is not responsible for the rules of the legislature."

But too much must not be expected of a drafting bureau, however well it may be manned. It cannot guarantee good laws. (a) In the first place it does not draft all the bills introduced into the legislature. Its use is optional with the members. Where it has been established, it usually drafts the great bulk of the measures, but members are not and should not be compelled to utilize it. (b) Secondly, it acts only in an advisory capacity. A bill may be thought useless, but that is no concern of the bureau, it is not asked to pass judgment. It may be unconstitutional—the bureau has done its duty when it renders an opinion to that effect to its author. (c) The author may change the bill after it has been drafted for him; or (d) it may be changed by amendment during its course through the houses. The drafting bureau is not responsible for the final legislative product. It acts in but a clerical capacity and only when called upon. It does not control the introduction of bills or legislative action upon them. Many elements may enter to make the law as enacted far different from that originally drafted. During the past months the state press has noted many "errors" in "poorly drafted bills." An "error" in the judicial bill resulted in the omission of one county and the repetition of the name of another. This was caused by the negligence of a proof reading clerk who was overburdened during the last days of the session. An "error" in the civil service law, which it was thought might allow a mayor to discharge a chief of police, was purposely inserted by a committee of one of the

houses. Another "error" making the public utilities law applicable to interurbans was inserted by those who wish this extension of power.

There is no phase of the whole reference library subject more important than that dealing with the auspices under which a bureau of this character is to be placed. In order that the information supplied by such a department may be trustworthy, implicit faith must be had in the impartiality of the bureau. The department is not to be used as a political weapon. It is a state agency and must serve its patrons irrespective of party or the use to be made of its data. It must supply accurate and reliable facts uncolored by any partisan feeling. Otherwise the bureau becomes a pernicious agency to serve partisan needs. The patron must have faith that confidences will be kept and that there will be no leak through the department. In other words, honesty in its conduct and control is imperative. For this reason it is best to organize bureaus of this character under non-political boards. In Cincinnati the Municipal Reference Bureau is organized under the University Board, and in Columbus the Legislative Reference Bureau is operating under the State Board of Library Commissioners, instead of being organized as a part of the governor's office as at first suggested.

But what of the Ohio Legislative Reference Bureau? What has been its work and what has it done to secure better legislation in Ohio? Last winter the administration went into office in this state with the most comprehensive legislative program with which a General Assembly was ever confronted. Laws required to put into force constitutional amendments recently adopted, platform pledges broad in their scope, and additional measures urged in the governor's message comprised the program. Fifty-six laws had been promised and the range of subjects covered a wide field. It was the determination of the state administration to put on the statute books laws redeeming every one of these pledges. To enable them to carry out these policies, and do it in a scientific manner, aid was sought from the institu-

tion which had rendered such valuable service in Wisconsin, and it was determined to establish a reference bureau in Ohio. There was at that time a reference department under the state library, but it had been too poorly supported and was too much hampered to attempt work of this sort. Consequently the present bureau was created, organized under the library board but independent of the state library.

Already it was the fourth week of the session when the new bureau began its work. Little had been done in preparation for this enormous program. Nor were there at hand members of a staff who were at all familiar with the work such a department should undertake or the best way to do it. Men had to be secured to aid in the drafting of bills, and few men of experience were available. The work of preparing data on these measures should have been begun months before and bills prepared for introduction when the session opened, but we were confronted with an enormous program and with few facilities for accomplishing it. Worst of all we had no quarters. We moved into a corner of the state library. My office was a curtained corner under a stairway. Not two-thirds of the work that might have been done was possible of accomplishment owing to these restricted conditions.

So far as the reference library work proper was concerned we had little material to rely upon, and what there was, was inadequately cataloged and arranged. We secured at once a librarian trained in similar work in Wisconsin, Connecticut, and Minnesota; and secured the data and references called for, when and how we might, throughout the session. We had no staff of trained men who had given the questions of the session the serious thought and consideration they so imperatively demanded. We sought the aid of the State University, and the professors there gave generously of their time to these matters. The state is greatly indebted to Prof. Lockhart for the work he did on the taxation bills, and to Profs. Page and Adams for their assistance in drafting. Prof. Gephart aided us in insurance matters and Prof. Tuttle was frequently consulted.

Without the assistance of Dr. Upson, of the Dayton Bureau of Municipal Research, and Mr. Leach, of the Cincinnati Bureau, the excellent financial program of the session could not have been enacted. Through the agency of the Legislative Reference Bureau, the technical and expert knowledge of these men was brought to the aid of the committees and members of the General Assembly.

The bill drafting work was cared for by a corps of lawyers on the staff of the bureau, and by cooperation with the attorney-general's department and members of the faculty of the law college of the State University. Although late in starting, the bureau drafted nearly two hundred bills, besides amendments to nearly all the important measures. When one considers that it was the administrative measures of a more comprehensive character that were given this bureau for drafting, an idea may be secured of the work accomplished in this field.

That the work of the Legislative Reference Bureau during the session of 1913 was crude and hurried no one will deny, but we had the satisfaction of having accomplished something where nothing was done before. Work for future sessions should be on a different basis. All matters which are to be the subject of legislation should be carefully studied and briefed before the legislature convenes. Tentative bills should be drawn embodying the ideas of the governor and the members of the General Assembly who will urge their passage. When the governor presents to the General Assembly his program of legislation, he should have drafted bills to carry his recommendations into effect, together with carefully prepared data upon them. When this is done, we may expect to some extent the success which attends the English system, where bills are submitted embodying the ideas of the government. Already we are working upon a plan of this sort. We have besides the director a staff of seven persons. There is a librarian, a cataloger, two stenographers, a general assistant, and two men who have been working since summer upon measures for the extra session. When the

General Assembly convenes in special session we hope to have measures for the consideration of the two houses embodying the governor's ideas and in line with the plans he had in mind in summoning the legislature. We are still feeling our way. We are without quarters and are badly hampered because of this fact, but we are willing to stand before the people of the state on the record of the work we are doing.

The reference library movement is a comparatively new one in Ohio and in this country, but it is a movement which is destined to spread. In this development the reference libraries of the state should receive the aid and encouragement of the state commissioners. It is not the function of this body to furnish library facilities for the city of Columbus alone. The state is its field. The idea of the traveling library and the department of library organization are admirable. This work should be greatly extended and encouraged. In addition to this, opportunity is afforded for serving the state in a similar manner through the development of a municipal reference department. It is perhaps only the larger cities which can profitably maintain municipal reference bureaus. Yet there is a great demand for work of this character. Under the new home rule provisions of our constitution, the cities of Ohio everywhere are writing municipal charters. It is imperative that these charters be formulated in the light of the most recent developments in city government. The libraries of this state have a duty to perform in connection with this work in bringing to the aid of these commissioners all possible information.

But many of our libraries have not the equipment, the funds, nor the force necessary for the work which a well managed municipal reference library would do. In this work the state bureau should help. Material should be collected by the state bureau to be loaned the city libraries. It might be prepared as the packet libraries for debates in the modern university extension work, and loaned out as they are called for. In this way a broad field of municipal subjects could be covered, and

a vast amount of material be made available to the libraries of the state.

It is also possible to provide the cities with the expert services found so valuable in connection with the state work. This feature should be connected with the State University. As we now send extension lecturers to smaller communities to bring the university advantages to the people of the state, so might similar experts be sent to communities for consultation on municipal questions.

The drafting function of a reference department can be taken care of in a similar way. Request for drafts of ordinances might be made to the state bureau, which would supply sample ordinances to carry out the purposes embodied in the request. Laws of other cities could be supplied, together with criticism upon their operation. Where it might be necessary to draft entirely new provisions, this work could be undertaken by the state bureau. This is not a new and untried plan which I am presenting. Already it has been in operation in the extension departments of the universities of Wisconsin, Washington and Kansas. A recent pamphlet from the University of California announces the establishment of a bureau of municipal reference. It reads in part as follows:

"The University Extension Division of the University of California announces the organization of a Bureau of Municipal Reference for the use of the citizens of the state, particularly the officials of the municipalities of California.

"The aim of the bureau is to place at the disposal of the cities of the state every resource of the university which may be of aid in raising their standard of government and stimulating their civic progress. . . .

"The Bureau of Municipal Reference, in addition to maintaining an extensive reference library, will also act as a channel of communication between the city officials of California and the experts in municipal administration, finance, public health, engineering and kindred subjects who are now serving on the university faculty. It will

secure their counsel and advice on all questions that may be submitted to them by any city official. Advanced students may also be called upon to perform practical work on those subjects requiring specialized research. The bureau will arrange for meetings of city officials at the University Campus at Berkeley, and will encourage the frequent use of the convention facilities offered by the various university buildings. In coöperation with Bureau of Public Lectures of the University Extension it will assist in providing speakers on municipal matters to localities making the demand.

"All services of the bureau are given free. A charge is made only when it becomes necessary for a speaker or expert to visit a municipality."

This is an entirely practical function for the state to perform, and is a logical development of the work of coöperation between the state institutions now being urged by the governor. It also carries with it immeasurable opportunities for the enlightenment and advance of the communities of the state.

Reference bureaus, whether legislative or municipal, are not agencies for reform, if by reform one means the championing of principles which make for good government; but if reform is to be secured by full information and knowledge of facts, reference bureaus are admirable agencies for this purpose. The day of the cloistered library is past. We must enter into the life of the communities of which we are a part. The function of the library is closely akin to that of other educational institutions, and it has a responsibility to bring to the citizens of its community as complete information as possible on every subject with which it is concerned. The reference library has no other function than this. It has had a special development because it has been called upon to meet special problems. In all cases, however, its function has been the same—to bring to those working on public questions every facility and opportunity to enable them to exercise their public functions in an enlightened manner.

SPECIAL LIBRARIES—A REPORT ON FIFTY REPRESENTATIVE LIBRARIES

ARRANGED BY R. H. JOHNSTON, *Librarian,
Bureau of Railway Economics Library,
Washington, D. C.*

THE Special Libraries Association was formed during the summer of 1909 by a group of members of the American Library Association. Some of them had charge of small financial, commercial, and technical libraries identified, for the most part, with business offices.

Many of their problems could not be met by an association dealing with the broader questions, of interest primarily to the larger libraries. There was some doubt whether an organization of such heterogeneous interests could be made sufficiently coherent to develop any effective organization. And when, in 1911, following action of the Council of the American Library Association, the Special Libraries Association affiliated with the general association this doubt still persisted, since the Council then urged that the young association should become a section of the general body.

In the four years of its existence, however, the Special Libraries Association has grown from fifty or sixty persons to about three hundred. Of its last annual session it was said, "There was no more vital talk at the whole Kaaterskill conference than at its meetings." The association has demonstrated that it has a definite scope. It has done much to develop coöperation between special libraries. It has encouraged membership in and attendance at the meetings of the American Library Association. The Kaaterskill conference showed that the members of the American Library Association are interested in many of the topics discussed by the Special Libraries Association. Hence the affiliation has been of mutual benefit. But until some of the important questions of methods and coöperation peculiar to special libraries have been thoroughly threshed out, or have become problems to the general librarian also, the

Special Libraries Association must maintain its separate organization.

It must not be expected, moreover, that a definition of the term "special library" will be readily formulated. The modern reference library—such, for example, as the Free Public Library of Newark—employs in many cases methods which make it as much a special library as that of the United Gas Improvement Company. On the other hand, many of the most effective special libraries have, to the eye of the general librarian, little of the appearance of a library. Their working tools are manuscript-reports, plates, photographs, or index references to material to be found in libraries in the same city, or even in far distant cities. Almost all special libraries will have some material of this sort, and will besides preserve and make much use of newspaper clippings and magazine excerpts, and will possess what might appear to be a disproportionate number of pamphlets.

While it is not easy to formulate a definition, there is no vagueness when it comes to the purpose of all special libraries, and it is in this purpose that they are united in their organization. Every special library is actively and aggressively interested in the solution of some present-day problems. In the solution of these problems it assists in presenting the material which later finds its way into print and so into the general library. It utilizes the knowledge of the individual expert, the results of special field work, and has ever in mind what is coming rather than what is done and past. But it recognizes that all good building for the future must have good foundation in the present and past, hence the special library also collects and sifts past and present printed material for the use of the active and expert worker, saving him from repeating the errors of the past and putting to his service the performance of other workers in his field. Not all special libraries can accomplish such thorough digesting of current thought and past performance as the library of the United Gas Improvement Company, but such work is the aim and object of every special library. To the general librarian the work of the typ-

ical legislative reference library in its saving of time to the legislator and needless legislation to the people may best illustrate the work and methods of the special library.

While many trained librarians have entered this field, most of the successful special libraries are in charge of men who were experts in their subjects before they became librarians, so that the question whether a special librarian should be first a specialist or first a librarian cannot be settled, and from the vast difference in conditions prevailing in the special library field may never be settled even theoretically, but there is encouragement in the present movement toward providing courses of study for special librarianship.

In January, 1910, there was begun by the association the publication of *Special Libraries*, at first a pamphlet of eight pages, but which, at the end of a strikingly useful life of four years, has reached the dignity of a monthly magazine of forty-two pages. This periodical prints in each number short bibliographies on live topics, directs to sources of up-to-date information, and has become of great value to expert workers in almost every field.

At the joint instance of the editor of the LIBRARY JOURNAL and the president of the Special Libraries Association the following questionnaire was sent out to quite a number of special libraries, and from the answers obtained the table annexed has been compiled. It was hoped in this way to make available to the library profession information concerning the special investigation being conducted and to form a nucleus for an exhaustive list of special libraries.

QUESTIONNAIRE

The LIBRARY JOURNAL submits the following questionnaire to a list of special libraries, inviting them to reply in time to publish if possible in the July issue of the JOURNAL an article dealing with various details of special library work. The data thus received is to be afterwards turned over to the Special Libraries Association. A copy of the JOURNAL or reprint of the article will gladly be sent to those who cooperate by answering the questions below:

1. Please state the name of the library,

name of librarian, date of beginning, present number of books, and number of pamphlets.

2. What is the scope and special strength of your library?
3. What were the needs that caused the starting of your library, and what is the trend of questions that come to it?
4. How far do you avail yourself of the other library resources of your community, and have you anything like cooperation in reference work?
5. What, if anything, do you publish or have you published which may be available for distribution, and what are the terms of distribution?

Your reply before June 15, 1913, to the LIBRARY JOURNAL, 141 East 25th street, New York City, would be appreciated, for which please find enclosed addressed envelope.

D. N. HANDY, President,
Special Libraries Association.
R. R. BOWKER, Editor,
LIBRARY JOURNAL.

NOTES

The notes which follow will give additional information, grouped for greater convenience of reference under three heads. The numbers used refer in each case to the numbers assigned the several libraries in the tabulation.

Descriptions of other special libraries not included in the table have appeared as listed below:

Baltimore Municipal Reference Library.

Municipal Engineering, Sept., 1908.

Public Libraries, Dec., 1907.

Public Service, Sept., 1907.

Special Libraries, Dec., 1910.

Commercial Bureau Co. Trade Library.

Engineering News, Jan. 19, 1911.

Detroit United Railways Library.

Electric Railway Journal, Nov. 21, 1908.

William Filene's Sons Co. Library [Boston].

Special Libraries, Oct., 1912.

Fisk & Robinson Library.

Special Libraries, Jan., 1910.

Franklin Manufacturing Company.

Special Libraries, Feb., 1911.

General Electric Company [Schenectady].

Special Libraries, Sept.-Oct., 1913.

Harvard University, School of Landscape Architecture.

Special Libraries, Sept.-Oct., 1913.

Minnesota Tax Commission Library.

Special Libraries, May, 1911.

National Cash Register Company Library.

Special Libraries, Feb., 1911.

National City Bank Library.

Special Libraries, Oct., 1912.

New York Municipal Reference Library.

Special Libraries, Sept.-Oct., 1913.

Prudential Insurance Company Library.

Special Libraries, Sept.-Oct., 1913.

Randall Library of Social Science.

Charities, June 6, 1903.

Wall Street Journal Library.

Special Libraries, Nov., 1911.

Wisconsin Legislative Library.

Iowa Journal of History and Politics, July, 1906.

Yale Review, Nov., 1907.

B—Arrangement of libraries by subjects

Accidents, 17; Accounting, 4, 5, 42; Architecture, 30; Business, 27; Chemistry, 29, 31, 32, 40; Civics, 6, 12, 45, 50; Commerce, 27, 36; Corporations, 20, 34, 35; Economics, 10, 45, 49, 50; Electricity, 23, 25, 32, 37, 46; Engineering, 5, 7, 11, 13, 23, 24, 25, 29, 30, 31, 34, 41, 42, 44, 47; Finance, 1, 4,

28, 42; Forestry, 48; Fuel, 29; Gas, 22, 25, 34, 37, 46; Insurance, 15, 17, 18, 19, 21; Law, 8; Mechanic arts, 14, 41; Metallurgy, 2, 29; Philanthropy, 38, 39, 45; Public service, 11, 25, 34, 37, 42, 46; Railways, 10, 26; Rubber, 16; Sanitation, 31; Sex hygiene, 45; Social service, 3, 39, 45, 49, 50; Sociology, 3, 12, 15, 38, 39, 45; Technology, 2, 29, 45; Taxation, 28, 33; Telephone, 4, 25; Textile, 29, 30; Transportation, 10, 12, 25, 26, 34, 37, 43; Valuation, 25, 30; Vocations, 49; Women, 49; Young men, 8, 9.

C—Publications by special libraries

10. Monthly bulletins; Special studies on full crew laws; Valuation; Comparative statistics; Comparison of capital values; Railways and agriculture; Railway employes; Bibliography of government ownership, gratis to libraries. Collective catalogue of books on railway economics, 1911, University of Chicago Press, \$3.

11. List of the publications of the company furnished gratis; publications sent free to libraries requesting them.

18. Issues *Bulletin* (quarterly); Lectures on fire insurance, 1911; Catalog, 1900.

21. Proceedings, addresses, briefs, statistics, etc., of its members sent by the library on application gratis.

26. Index of railroad laws (out of print); Index digest of decisions, 1888 (out of print); Index digest of decisions, 1905 (out of print); Index digest of decisions, 1912. Compilations of railroad laws (several editions, now all out of print).

36. Booklets on commercial and industrial matters; *Commercial America*, *America Commercial*, *Weekly Export Bulletin* (by Bureau of Foreign Trade).

41. Catalog of books, excepting fiction; List of foreign books in the library; Lists on special topics in club paper, *The Mixer*.

42. The library and the business man, 1907; The library and its facilities, 1911; Classification of periodical references, 1912; Reference books on public utilities, 1912; various pamphlets.

45. Publications of the library in Twentieth Century Club's monthly bulletin and Massachusetts Civic League pamphlets.

AN OLD ENGINEERING LIBRARY

IN these days of social service the profession of civil engineering ranks high among those forces working for the welfare and betterment of the human race. The civil engineer builds our water supplies, constructs our sewer systems, and looks after the sanitation of our cities. He paves our streets and builds our subways. To aid in every possible way this very useful member of society, the civil engineer, is the aim of the library of the American Society of Civil Engineers.

Occupying two floors of the house of the Society at 220 West 57th street, New York City, it now numbers about 80,000 volumes and pamphlets, embracing all phases of civil engineering as well as its allied subjects. The library was founded in 1868, when provision was made for housing 100,000 volumes. Twelve years ago the library was reorganized and reclassified, and has more than doubled in size since that time. Much of its growth has been due to the acquisition of several fine libraries of civil engineers, among others those of William Arthur and William J. McAlpine in the years 1872 and 1873, respectively. In 1901 Henry B. Hammond donated his valuable and handsomely bound collection.

Like every one else, the civil engineer has specialized, so that to-day we have the electrical engineer, the hydraulic engineer, the mechanical engineer, and so on until many different occupations are covered. Not only has this library turned its attention to railroad, waterway, mechanical, electrical, sanitary, and even military and marine engineering, but it has gathered together books on such related subjects as political economy and geology, of which latter it has a large collection, including the reports of the United States and state geological surveys.

The special classification compiled by Charles Warren Hunt, LL.D., secretary of the Society, which incidentally enumerates the various branches of the science of civil engineering, will give some idea of the scope of the library. The main headings only are given:

- A. Railroads.
- B. Street railroads.
- C. Waterways.
- D. Water supply.
- E. Sanitation.
- F. Bridges.
- G. Mechanics.
- H. Electricity.
- I. Gas.
- J. Architecture and building.
- K. Marine engineering.
- L. Military engineering.
- M. Mining engineering.
- N. Roads and pavements.
- O. Municipal reports.
- P. Landscape architecture.
- Q. Geography.
- R. Surveying and drawing.
- S. Society publications.
- T. Periodicals.
- U. Dictionaries and encyclopedias.
- V. Engineering handbooks.
- Y. General science.
- Z. Miscellaneous.

For fifteen years this classification has stood the supreme test of a good classification, of having the books fit into it. In 1897, at the time the Society moved into its present house, it was found that there were 27,000 accessions, and that these were so poorly classified and cataloged that they were not available when wanted. It was decided, therefore, to reclassify and recatalog the library, and to that end different systems of classification were examined. None seemed to be suitable for an engineering collection, so the present one was devised by Mr. Hunt. The scheme was worked out from an engineering rather than a library standpoint, the aim being to arrange the classes so that an engineer coming into the library could easily find what he wanted. One need, perhaps, felt only within the last few years, is for the creation of a division for Industrial economy to include such books as Gilbreth's "Motion study" and Taylor's "Scientific management."

Instead of Cutter numbers a 1, 2, 3, . . . system of numbering is used, thereby bringing the latest books at the end of the class, and effecting a more or less chronological

arrangement, one which is particularly to be desired for scientific works.

There are three catalogs. Instead of one dictionary catalog, an author, a class, and a subject catalog are kept up. This scheme, although it may have its disadvantages, has the great value that while the subject catalog is specific, the class catalog is inclusive, so that one supplements the other. The aim has been not to be brief, but to be thorough, and to this end all books except society publications and periodicals are thoroughly analyzed and cards made in the author, subject or class catalog, or perhaps all three, for all matter of any value or importance whatever. In this way reports made as parts of other reports and published in no other form, and subject matter sometimes found in no other places, are made available. This is one way, perhaps, in which public libraries might advantageously cooperate with the technical libraries, in that most technical libraries have the time for that minute and thorough indexing which is not possible in a public library.

The Library of the American Society of Civil Engineers has been established for nearly fifty years, and has thus been enabled to amass a collection of books many of which are not easily obtainable elsewhere. The library contains complete sets of the reports of some railroads from the day of their establishment down to the present time and the first reports of many others, which are, as far as is known, to be found in no other library, a fact which came to light through comparison with the reports listed by the Bureau of Railway Economics in fourteen other libraries. The library's collection of municipal reports is of considerable value. These include many complete sets of the reports of city and company water-works, city sewerage departments, city engineers, park commissions and boards of health.

The library is for reference only, but is open to the public as well as to members of the Society.

By the compilation of bibliographies of articles in engineering periodicals and books, it is made useful to engineers all

over the country and abroad. Over seven hundred of these bibliographies on a wide range of subjects have been compiled by the library staff. Copies of two hundred of these were sent to Japan and others to Spain. Among the more important is one on the "Valuation of public utilities," containing 1236 references, which has just been completed and published in the *Proceedings* of the Society. These bibliographies have proved themselves almost invaluable as reference tools. Many a time the library assistant feels like the young person who knew the capital of Massachusetts but couldn't find the words to express it. She knows where the material is, but doesn't know how to find it.

The Library of the American Society of Civil Engineers is a library used not for pleasure or recreation but for work, hard and serious work. Men come to it from all over the country for aid, and it hopes in time to fulfill its mission by proving itself invaluable to engineers.

ESTHER RAYMOND, *Cataloger,*
Library of the American Society of
Civil Engineers.

THE PASSING OF DREXEL INSTITUTE LIBRARY SCHOOL

IN regard to the discontinuance of the Library School at Drexel Institute, the president of the institute, Hollis Godfrey, makes the following announcement:

"It is with regret that the Drexel Institute of Art, Science, and Industry announces the discontinuance of the Library School. The reasons for this discontinuance follow:

"First—It is the belief of the authorities of the Drexel Institute that the three schools—the Engineering School, the School of Domestic Science and Arts, and the Secretarial School—in which the great body of Drexel Institute students are registered, are all that can be carried to the highest effectiveness with the funds of the Institute, and that in consequence these funds must be devoted to the purposes of these three general schools. In this connection it should be noted that of all the

activities of the Drexel Institute carried on in the last five years, the Library School cost the most per capita.

"Second—The numbers in the Library School are small, and with the Drexel Institute a school primarily for greater Philadelphia, there is no prospect for marked increase. As this school for the past five years has enrolled but about 7/10 of one per cent. of the total enrolment of the institute, night and day, and 1 7/10 per cent. of the day enrolment, it is felt that the other activities of the Institute, in which the great body of the enrolment lies, must be developed first.

"Third—The decision has been made that the Drexel Institute shall be primarily a school for greater Philadelphia. As the maximum number of Philadelphia girls in the Library School during the last five years was five, and the average enrolment of Philadelphia girls was less than four, the prospect of obtaining for the Library School an enrolment in any way comparable to the other schools seemed hopeless, without an expenditure of an amount of money which would be quite impossible to consider.

"The Drexel Institute will continue to take a very great interest in its graduates from the Library School, and will do everything in its power to obtain positions for those graduates, and to follow their careers. It will also be very glad to give any possible assistance to other library schools which it may be able to give."

The following brief sketch of the school and survey of its work was prepared by Miss Bacon, the present director:

"The Drexel Institute Library School was organized in November, 1892, with a class of ten students. There were at the time two schools already in the field, the parent school at Albany, and that at Pratt Institute. Drexel has graduated 317 students (2 men, 315 women), who have come from twenty-eight states, from the District of Columbia, Glasgow, Scotland and Kingston, Jamaica, Pennsylvania sending 142 of these. Students have also been received for special courses.

"Entrance examinations were, at the

beginning, comparatively simple, requiring not more than a high school education. There was no test in languages. For some time past examinations have been more difficult and have embraced these subjects: General literature, general history, general information and a reading knowledge of French and German. Students have been urged but not required to get some practical experience in a library before entrance. Graduates of certain colleges have for several years been admitted without examination. About one-third of the last two classes have been college graduates.

"For several years the number of students has been limited to twenty, although two or three exceptions have been made.

"The school has had three directors: Alice B. Kroeger, 1892-1909; June R. Donnelly, B.S., B.L.S., 1910-12; Corinne Bacon, B.L.S., 1912-14. For a short time between the death of Miss Kroeger and the appointment of Miss Donnelly the work was carried on by Mrs. S. C. Fairchild.

"The present staff of instructors includes: Corinne Bacon, instructor in book selection, history of libraries, classification, administration, subject headings and government documents; Mabel W. Brown, A.B., instructor in bibliography, binding, cataloging, reference work and library buildings; Stella T. Doane (Drexel, '08), instructor in order, accession, loan and shelf department work and supervisor of practice work; Carl L. Altmaier, instructor in proofreading and parliamentary law.

"A number of lectures are also given by visiting librarians.

"Certificates have been granted to students who have completed satisfactorily the full year's course. Graduates are filling positions as head librarians, catalogers, library assistants, etc., in public, school and university libraries, from Maine to Oregon, and from Canada to South Carolina. One graduate is head of the only training school for children's librarians; one is doing field work for the New York State Library, one is working for the Maryland Library Commission, and several for the Pennsylvania Library Commission.

"It is hoped that the school may be carried on elsewhere, but no definite plans have been made. An alumnae association was formed in 1899 'to promote social intercourse among its members, to advance the interests of the Drexel Institute Library School and to cooperate in the work of the American Library Association.' The alumni have raised a fund in memory of Miss Kroeger, the income of which is used for lectures for the school. The president of the association is Miss R. Louise Keller, Independence Inspection Bureau, 137 South Fifth street, Philadelphia, and the secretary, Miss Katherine M. Trimble, Drexel Institute Library."

At a meeting of the Alumnae Association of the Drexel Institute Library School and the class of 1914, held at Atlantic City, March 7, these resolutions of appreciation of Miss Bacon's work at Drexel were adopted:

Whereas, The Alumnae and the class of 1914 of Drexel Institute Library School are deeply appreciative of the great service rendered them and the Drexel Institute Library School by Miss Corinne Bacon as director of the school, and

Whereas, Miss Bacon, by her keen interest, deep sympathy and wise judgment, has endeared herself to graduates and students, therefore, be it

Resolved, That the Alumnae and Class of 1914 hereby express to Miss Bacon their gratitude, loyalty and appreciation of her successful administration, and be it

Resolved, That the hope be conveyed to Miss Bacon that the school may be continued somewhere under her direction, with the assurance that she has the hearty cooperation and earnest support of alumnae and students.

S. C. N. BOGLE,
I. McC. TURNER,
R. P. WARNER,
Committee.

THE LEIPZIG EXHIBIT

To one who has never had the experience of arranging an exhibit, there can be no realization of the mingled emotions attendant thereon.

After the preliminary proceedings, which include the widespread distribution of notices expressing faith; hope and a request for charity, comes the interval of suspense, during which the persons in charge undergo an assortment of feelings ranging from joy to despair, as the replies to the requests express enthusiasm or indifference.

Then the actual returns come in and the

real fun of the thing begins. That is the stage of the game at present in the work of the Leipzig Committee. Libraries, both large and small, have responded generously in money and material, and there is every indication that the exhibit will be an interesting and creditable one.

The exhibit has been made possible by the hearty co-operation of librarians all over the country. The large libraries have been exceedingly generous in their support and the smaller institutions in proportion to their size and income have contributed in an equally liberal manner. The number of personal contributions to the fund is an evidence of the enthusiasm and devotion of individual librarians to their profession. As an example of the cordial spirit of fellowship which exists among the librarians of this country and their willingness to cooperate in any scheme which concerns library interests, the exhibition is especially noteworthy.

Almost all of the material has been received since March 5th, and many libraries have asked for an extension of time in order that they might complete the charts, etc., in preparation. It is therefore impossible at this time to give more than a suggestion of what the completed exhibit will contain.

Many of the libraries contributing have sent their material beautifully mounted and labeled, thus saving the committee much time and work, and all have shown great care and thought in the selection made. Practically every phase of library work in this country will be represented by photographs, charts, or descriptive matter, and the committee believes that the exhibition as a whole will be instructive and interesting and will give an adequate idea of the present condition of libraries in this country. Especial emphasis will be given to those features which are most significant, and those phases of the work in which this country has been a pioneer will be fully treated.

The space granted the American Library Association Exhibit represents a cross section at the end of one of the exposition buildings, approximately 23 x 97 feet, with

three aisles traversing the section. The diagram of the space shows the arrangement decided upon by the committee.

The partitions between the American Library exhibit and those adjoining will be formed by low book cases with winged bulletin cases above. Inasmuch as the space allotted includes very little wall space, the use of some sort of a bulletin frame was made necessary, and the winged bulletin cases will enable the committee to exhibit a much larger proportion of the material received than would otherwise have been possible.

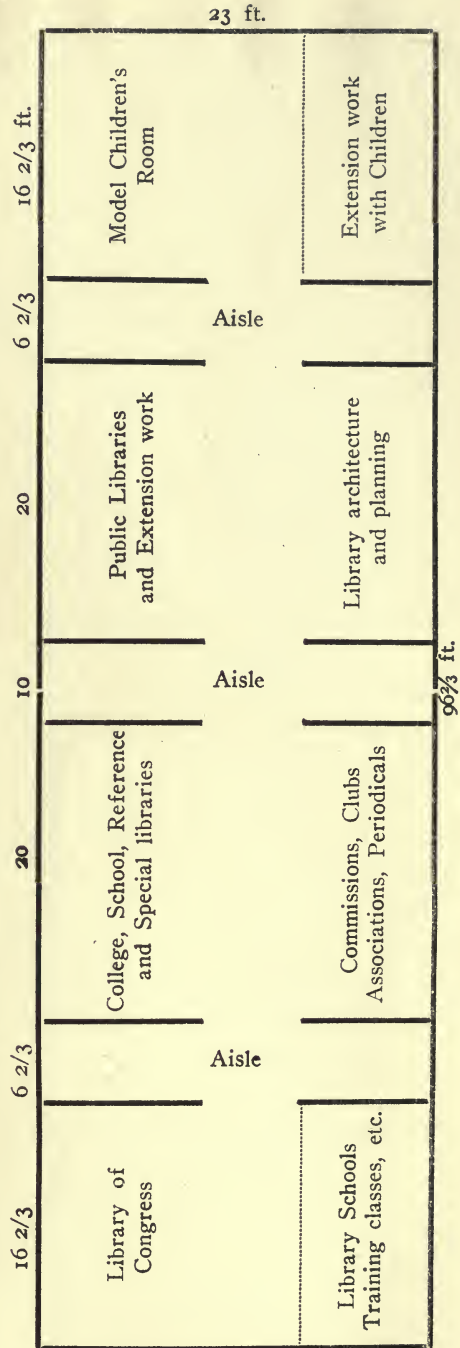

The Library of Congress has prepared a chart 5 x 10 feet showing the growth of libraries in the United States from 1876-1913, which will be an interesting and important feature of the exhibit.

In addition the Library of Congress has contributed photographs of its building and of the series of mural paintings illustrating the Evolution of the Book; an annotated collection of blanks and forms; a complete collection of its publications since 1897; a catalog of all works in the Library of Congress on Bibliography, Library Economy, Printing and Book-binding, arranged both in the form of a dictionary catalog and a systematic catalog. These catalogs are designed to show the resources of the Library of Congress on the subjects named and to illustrate the use of the printed catalog cards in dictionary and systematic catalogs. A number of pamphlets will be sent for distribution.

The library schools have furnished photographs illustrative of their equipment and work, specimens of the forms and blanks used, circulars of information, and outlines of their courses. The Pratt Institute Library School has also loaned the exhibit prepared last year by its students which is described in the December number of the LIBRARY JOURNAL.

The college and university libraries have made an interesting contribution to the exhibit.

The Johns Hopkins University has sent a carefully arranged exhibit of photographs, plans, blanks and forms with descriptions and annotations in German and English.

Columbia University has furnished charts illustrating their charging system and reference blanks and a set of publications relating to the library.

For the participation of the special libraries throughout the country in the exhibit, the committee is indebted to the president of Special Libraries Association, Mr. D. W. Handy, who took the matter up with enthusiasm and appointed Mr. George W. Lee of Stone & Webster, to bring it to the attention of members of the association. Mr. Lee sent out circulars asking for contributions of money and material and was instrumental in securing returns from a number of libraries. This division includes libraries containing general collections in special institutions as well as libraries instituted for the purpose of supplying books on a particular subject and allied subjects.

Commission work will be illustrated by a series of charts prepared by the League of Library Commissions for exhibition at the N. E. A. last year. The charts show the extension of commission work and the increase of circulation in the last ten years, and photographs show the means by which the people of rural communities are reached.

The work of public libraries will be fully portrayed and the various activities of a modern library in the community will be clearly shown.

A chart showing the municipal support of a number of representative libraries of various sizes, the total circulation, the amounts expended for salaries and books and similar statistical information will afford the visitors from this and other countries an opportunity to make some interesting comparisons.

Maps will show the distribution of branches and delivery and deposit stations in different cities, and the ways in which these distributing agencies are operated will be shown by photographs and the printed forms used in the various divisions of the work.

One end of the space will be devoted to

work with children, a corner being fitted up with shelving, typical tables and chairs, to resemble a corner of a children's room, and a representative collection of books will be shown. A series of photographs and charts will illustrate extension work with children in schools, playgrounds, recreation centers, etc.

Library architecture will be given a prominent place in the exhibit and a large collection of photographs and plans has been brought together.

A model of a typical branch or small library has been prepared to show the relative arrangement of rooms, the provision of reading and reference rooms for adults and children, stack and wall shelving, and the way in which a general supervision of the entire floor may be given from the charging desk with its position in the central portion of the floor space.

The committee has also in preparation a handbook of the exhibit in English and German, which will not only furnish a key to its arrangement, but will give a brief description of each of the activities represented and such additional information in relation to American libraries as it believes will be of interest to the foreign visitor. It will also contain a list of periodical articles on American libraries in German, French and Italian magazines.

The committee congratulates the Association upon securing the services of Dr. Theodore W. Koch of the University of Michigan, who has consented to install the exhibit in Leipzig and who will remain in charge during May; of Mr. Donald Hendry of the Pratt Institute Free Library, who will be in charge in June and July, and of Miss Adelaide Hasse of the New York Public Library, in August and September. The committee believes that their attendance will contribute greatly to the success of the exhibit.

MARY E. PLUMMER,
MARY EILEEN AHERN,
FRANK P. HILL,
Chairman,
Committee.

EUROPEAN TOURS OF THE A. L. A.

Two European summer tours for American librarians are being arranged, both to include the Book and Graphic Arts Exhibit at Leipzig and the British Library Association conference at Oxford, Aug. 31 to Sept. 4.

One party will take the southern route, landing at Naples, and visiting points in Italy, Switzerland, Germany and England. Circulars have been addressed to all members of the A. L. A., and the detailed itinerary was published in the *LIBRARY JOURNAL* for February. For additional copies or further information address F. W. Faxon, 83 Francis street, Fenway, Boston, or Bureau of University Travel, 31 Trinity Place, Boston.

Another party will take the northern route, landing at Christiania, visiting points in Norway, Sweden, Denmark, Germany and England. Additional information may be secured from J. C. M. Hanson, of the University of Chicago libraries.

The cost of either trip to end of stay in Leipzig, with transportation to London and return steamer berth is \$370.

WASHINGTON HOTELS AND LOCAL ARRANGEMENTS FOR THE A. L. A. CONFERENCE

It seems probable that there will be an attendance of at least 1000 to 1200 members of the A. L. A. from outside Washington at the coming conference, May 25-30. In order to be on the safe side, the rooming bureau will be prepared for a much larger number. All of the likely hotels have been circularized, and on receipt of rates accommodations have been inspected by representatives of the bureau, with the idea of not listing any but suitable hotels.

In the tabulated list are included the hotels considered eligible, with approximate numbers that may be accommodated, rates for different accommodations and distances from headquarters. Memorial Continental Hall (where the four general sessions will be held) is about two-fifths of a mile from the New Willard (headquarters), a de-

lightful walk in spring across the White Lot, or one-fourth of a mile from the nearest car line on Pennsylvania avenue. Hotels marked with † are nearer the Memorial Continental Hall than the New Willard, or at practically the same distance.

Some of the hotels have quoted week rates. In many cases the rate for six or seven days is the same. These rates will be furnished by the bureau on application. It is expected that some members will want to spend an additional week in Washington, either in advance of the conference or at its close. Such members will naturally be interested in week rates.

The rooming bureau is also prepared to send members to recommended boarding houses within reasonable distances from headquarters. It has on file accommodations from \$1.50 to \$2.50 per day and from \$6 to \$12 per week. Usually these prices cover in addition to room two meals, breakfast and dinner, but not luncheon. The work of the bureau will be somewhat lighter if members generally will ask to be assigned to hotels instead of to boarding houses. It is earnestly desired, however, that no member shall be kept from attending the conference for lack of accommodations at reasonable prices.

The rooming bureau will be prepared to assign members to their hotels at any time. Information concerning assignments to specific rooms cannot be furnished until nearer the date of the conference. The bureau stands ready to make reservations on request; but members who prefer to communicate directly with the management of hotels should mention the fact that reservations are made for the A. L. A. meeting. All members who make reservations direct, or who expect to stop with Washington friends, or who secure accommodations otherwise than through the rooming bureau are requested to notify the bureau of their plans, so that full advance information may be had at local headquarters of proposed attendance.

In advance of the conference a list of good restaurants of varying grades of expense will be prepared for the information of members in attendance.

The local committee of arrangements,

with the coöperation of the District of Columbia Library Association, will furnish in advance or at the time of the conference information concerning cab fares, baggage express rates, street car fares (6 tickets for 25 cents), sight-seeing automobiles, excursions to Mount Vernon, Great Falls, Annapolis, etc. In addition to a handbook of the libraries of the District to be published by the Library of Congress for the District of Columbia Library

Association, a compact map and guide will be furnished to all members in attendance.

A few members have written asking for information concerning the best guide to Washington. As such inquiries are probably typical, it seems desirable to state that the best available guide is Reynolds' Standard Guide. This regularly sells at 25 cents in paper, with 8 cents additional for postage. A special rate has been secured, so that it is possible for the rooming bureau

to mail copies to members for 25 cents, including postage. Please send cash or stamps with order.

Inquiries concerning local arrangements, including rooms, should be addressed to George F. Bowerman, chairman, or Miss Grace E. Babbitt, secretary, the Public Library, Washington, D. C.

PRELIMINARY TRAVEL ANNOUNCEMENT

No special rates have as yet been granted our Association for the Washington conference. It is hoped, however, that two cents a mile will be available. In the next bulletin final announcements will be made, but if the special rate expected is not allowed the figures given in this announcement will prevail.

First class passenger fare, all rail, to Washington from various centers will be as below (see also table of cities under Chicago and middle west party):

	One way	Round trip
Baltimore	\$1.00	\$1.75
	(Only 2 days limit.)	
Philadelphia	3.40	6.00
	(10 days limit.)	
New York	5.65	10.00
	(10 days limit.)	
Pittsburgh	8.00	
Buffalo	10.63	
Cleveland	11.00	
Boston	11.15	20.50
	(13 days limit.)	
Cincinnati	13.50	
Detroit via Buffalo	14.35	
Chicago	17.50	
Indianapolis	15.00	
Louisville	16.00	
New Orleans	27.50	
Nashville	19.25	
Birmingham	19.25	
Dallas	35.55	
Atlanta	16.30	

For those wishing to travel together the usual parties will be provided as follows:

NEW ENGLAND PARTIES

From New England a choice of two parties, the principal party leaving Boston via the Fall River line on Sunday, May 24, for New York, and proceeding thence to Washington by rail. Special train will be provided leaving New York between 9 and 10 a.m., the New England and New York parties combining for the purpose of securing enough for a special. Fare from Boston to Washington via this route, \$9.65 one way, \$18 round trip, thirteen days limit. The one way rate of \$9.65 may be reduced

to \$8.52 by those registering with the special party. Staterooms (outside) on Fall River boat will be reserved, room accommodating two persons, \$2. Parlor cars will be provided on train to Washington, if desired, seats \$1.25. Breakfast in New York (75c.) and lunch on special dining car (75c.) will be provided.

Those desiring an ocean trip can leave Boston by the Merchants & Miners Transportation Co. line, Friday, May 22, at 5 p.m., reaching Baltimore Monday morning the 25th, proceeding thence by train to Washington. For 15 or more, fare, including berth in stateroom and meals on steamer, \$12 each way, Boston to Washington.

Those desiring to go by water and return via New York and Fall River line to Boston, can get round trip by this variable route for \$26.15.

Applications for reservations in regular New England party for Fall River line staterooms, parlor car seats, meals en route, and special party transportation should be made to F. W. Faxon, 83 Francis street, Fenway, Boston, Mass., also for reservations in party for ocean trip.

PARTY FROM NEW YORK, PHILADELPHIA AND BALTIMORE

A special train consisting of parlor cars, dining car, coaches and baggage car will leave Jersey City via the Central R. R. of N. J. and the B. & O. (Royal Blue Line), at 9.45 Monday morning, May 25; connecting ferry will leave Liberty street 9.30, West 23rd street 9.20.

All from New York, Philadelphia and Baltimore who wish to reserve space on this train should send their names to C. H. Brown, 26 Brevoort place, Brooklyn, N. Y., on or before May 18. Those wishing parlor car seat, enclose \$1.25 from New York, 75c. from Philadelphia, or 25c. from Baltimore.

The special A. L. A. rates have not yet been announced; regular round-trip ticket from New York is \$10 (ten days limit, including date of sale), from Philadelphia \$6. One-way fare from New York is \$5.65; this can be reduced by those who register for the special train to \$4.52, with corre-

sponding reductions from Philadelphia and Baltimore.

Any A. L. A. rate, if granted, will not be less than the mileage book rate. If four or more persons expect to return in the same party to New York, mileage books can be supplied to them for the return trip, making the round fare \$9.04.

CHICAGO PARTY (INCLUDING MIDDLE WEST)

Following the custom of former years, arrangements are being consummated for a special train to leave Chicago for Washington, D. C., on Sunday afternoon, May 24. This train will be made up of a sufficient number of all-steel, electric-lighted, solid vestibuled coaches, compartments, drawing room, and lounging, observation and parlor cars.

Those intending to join the special train at Chicago are requested to register as soon as possible.

RAILROAD RATES

Unless special rates are later granted by the railroads at this time, those desiring to travel via special train can save money by purchasing tickets from outside points to Chicago and traveling on the identification cards which will be furnished members of the special train party at the rate of \$14.50 per capita, Chicago to Washington, D. C. The same party arrangement for ten or more may be made returning, otherwise you will be obliged to pay a full fare of \$17.

The regular one-way standard rate, Chicago to Washington, D. C., is \$17.50 and returning \$17. New York, Boston, and other eastern point rates from Chicago will be announced in the next bulletin. One-way rates from points west of Chicago to Washington, D. C., and to Chicago, Ill., are as follows:

	To Washington	To Chicago
St. Louis	\$20.25	\$5.80
Kansas City	27.25	10.75
Omaha	27.50	10.00
St. Paul	25.65	8.15
Minneapolis	25.65	8.15
Des Moines	24.50	7.00
Cedar Rapids	22.05	4.55
Siox City	27.75	10.25
Milwaukee	19.30	1.70
Madison	20.10	2.60
Peoria	20.00	3.00
Detroit	14.35	5.50

Indianapolis	15.00	3.70
Denver	40.10	22.60
Los Angeles	77.25	59.75
San Francisco	77.25	59.75
Portland	77.25	56.90
Seattle	75.65	56.90

PULLMAN RATE FROM CHICAGO

Drawing room	\$16.00
Compartment	13.00
Lower berth	4.50
Upper berth	3.60

Detailed information concerning the special train, as to the time of departure from Chicago and arrival in Washington, dining car service, etc., will be printed in the next bulletin.

For reservations for the special train accommodations address John F. Phelan, Chicago Public Library.

POST CONFERENCE

It is thought that with the conference in the beautiful city of Washington, which presents so many points of interest, a short post conference trip will be the more popular. The committee, therefore, is planning for a party, personally conducted, to leave Washington on Saturday evening, May 30, by boat to Old Point Comfort, where two days will be spent. Old Point is a beautiful spot for a good rest, after the convention, and offers the attractions of Fortress Monroe, Hampton Institute, and side trips to Norfolk as well as many water excursions. Leaving Old Point it is the intention to proceed by day steamer to Richmond, giving opportunity to stop at Jamestown Island and see the remains of the original settlement there. It is planned to spend two days in Richmond, and to return to Washington by rail. Cost of this trip will be about \$30 for six days. Party due back in Washington Friday afternoon, June 5.

PUBLICITY

The publicity committee of the A. L. A. (Messrs. F. C. Hicks, W. H. Kerr and G. F. Bowerman) are hard at work planning for wide publicity for the Washington conference and its program features. A practical newspaper publicity man has been engaged to work up articles for the press in advance of the conference and to devote his entire time to the Association work the week of the conference. Efforts will be

made to secure papers and reports in advance of the meeting from all participants in the program and chairmen of committees. These will be duplicated and sent out either in whole or in abstract to the press to be released on the date of delivery. Librarians can help this publicity work by sending either to the secretary of the Association or to George F. Bowerman, Public Library, Washington, any facts of news interest pertaining to library work.

Every librarian should personally interview the editor of his home city paper and urgently request that the paper's Washington correspondent be instructed to "cover" the A. L. A. Conference, May 25-29.

Washington will furnish exceptional opportunities for publicity. Every newspaper of consequence in the country has its representative in Washington, who is instructed to "cover" all features of general interest at the national capital, and this representative will report the A. L. A. Conference to his home paper if he is instructed to do so.

See that he is instructed.

AMERICAN ASSOCIATION OF LAW LIBRARIES

THE annual meeting of the American Association of Law Libraries will be held in Washington, D. C., May 25 to 30. Headquarters will be at the New Ebbitt House.

It is proposed to hold the sessions of the association early in the week, so that those present may have ample time to attend the meetings of the American Library Association and the National Association of State Libraries, and visit the many points of interest in the national capital.

It is impossible to detail the program at this time, but it is expected that opportunity will be given to study the workings of certain of the institutions in Washington which concern those who have to do with the practice of the law. At least three bulletins will be issued before the meeting, which will be sent to the members and to all others interested. These bulletins will contain full information, and it is requested

that all who are in any way interested in our proceedings send their names and addresses to Miss G. E. Woodard, secretary of the association, Law Library, University of Michigan, Ann Arbor, Mich., who will see that the bulletins are duly forwarded.

NATIONAL CONFERENCE OF SCHOOL LIBRARIANS

THE time and place are right for a large meeting of school librarians in connection with the A. L. A. Conference, to be held at Washington, D. C., the last week in May.

Three meetings of school librarians will be held,—a general meeting, and High School and Normal School round tables for informal discussion. It is hoped that Dr. Claxton and other educational leaders will speak at the general school library meeting. Recent progress in school library work, also coöperation of librarians with the National Council of Teachers of English and with the Department of Superintendence of the N. E. A. will be reported upon. Mr. Kerr, Miss Hall, Miss Hadley and other school library leaders will be present.

These meetings will probably be held on Friday, the general meeting on the morning and Round Tables on the evening of May 29. A dinner of school librarians will be planned for the day of the meeting. An exhibit of school library helps and methods will be made with the coöperation, it is hoped, of Dr. Claxton.

IDA M. MENDENHALL,
Chairman of Committee.

THE NEW PRUSSIAN ROYAL LIBRARY

IN the presence of the Kaiser and most of the celebrated men in German art, science and letters, the new Prussian Royal Library, a stately pile of Silesian sandstone, occupying the biggest city block in all Berlin, was dedicated March 22.

The library, which fronts the north side of Unter-den-Linden, between the Char-

lotten and University Strassen, represents a cost of \$5,000,000. It has taken nine years to build it.

Although at present it houses only 1,500,000 books, it has been designed for the centuries to come with a maximum capacity of 5,000,000 volumes.

The director is the famous theologian and friend of the Kaiser, Professor Otto Harnack. The designer is Privy Councillor Dr. Ernst E. von Ihne, the Court architect. He also is a great personal friend of the Emperor, and represented his Majesty at the inauguration of the Carnegie Institute at Pittsburgh a few years ago.

The new Royal Library, which stands on historic ground hallowed by memories of Frederick the Great—on part of the plot stood the elaborate royal mews, which Frederick established and which all his successors maintained—is a splendid specimen of Palladian Renaissance. A feature of the exterior is a series of sitting statues of the most renowned men in literature, the arts, and the sciences. Over the main entrance in Unter-den-Linden is a cluster of three heroic medallions, with the Kaiser in the middle, flanked by Frederick the Great and Emperor William I. In the middle of each front is a recess covered with rich sculpture. The recess on the Unter-den-Linden side is embellished with a beautiful tympanum representing the Triumph of Apollo.

The Royal Library is said to have the most up-to-date equipment, especially in apparatus for the rapid handling of books. Dr. von Ihne admits that he has learned much in this respect in New York and Washington. The library handles, on an average, 2,000 books a day, many of which are lent for outside use.

REPORT OF THE NEW YORK PUBLIC LIBRARY FOR 1913

DURING the year the work of the library has made steady progress. The resources of the library have naturally been increased both by gift and by purchase; through additions to and changes in the staff there has been a gradual improvement in the efficiency of the staff and a consequent gain

in the facility with which the library may be utilized by the public; and readers of New York City and elsewhere have more generally recognized their opportunity to use the library.

In the central building nearly 50,000 books and over 65,000 pamphlets were added, making a total of 1,227,309 volumes and pamphlets available for use in the building. There were also added to central building collections 75,194 prints, about 14,000 maps, 351 newspapers, American and foreign, and 7,775 different current periodicals. Nearly a million volumes have been added to the circulation department for use in the branches, making the whole number of books and pamphlets belonging to the library 2,191,498.

In the central building there were 2,102,824 visitors or readers, an average of 5,761 daily. Of these 526,682 were actual readers who consulted 1,685,715 volumes. From the forty branch libraries 8,320,144 volumes were issued for home use, an increase of 350,480 over the number issued in 1912.

The total expenditures for the calendar year were \$1,230,343.33, of which \$504,489.64 was for the reference department, and \$725,853.69 was for the circulation department. Of the reference department expenditures \$64,370.12, or 13 per cent., was for books, binding and periodicals, and \$327,973.82, or 65 per cent., for salaries. The city appropriated \$666,548.62 toward the expenses of the circulation department. In this department \$189,057.12, or 13 per cent. of the total income, was for books, binding and periodicals, and \$418,208.44, or 58 per cent., for salaries.

At the close of the year there were 1,046 persons on the staff of the library; 467 in the reference department and 579 in the circulation department.

The use of the American history division, with which are administered the rooms containing the collections of manuscripts, maps, early printed books and those of special rarity or value, increased over 50 per cent. during 1913. A marked increase in the use of the extensive collections of early American newspapers was noted.

In the art and prints division there were

25,434 readers who consulted 73,846 volumes, an increase in readers of 28 per cent. and in volumes used of 18 per cent. The general art collection has been kept up, but more special literature of painting is left to the Metropolitan Museum of Art, and that of architecture to the Avery Library at Columbia. The music division received an interesting gift from Mrs. Joachim Andersen, of the programs of 2400 orchestral concerts, conducted by the late Joachim Andersen, the Danish conductor, bound in fourteen volumes. The collection of the division is mainly of historical value, since limited appropriations have made it impossible to add many music publications of the last fifty years.

In the economics division the number of readers increased nearly 58 per cent. In the documents division reference work was only begun with the opening of the new building, in 1911. During that year 1563 readers used the department, while in 1913 the readers numbered 7596. A good deal of reference work in this division is done by telephone.

In the science division there were 18,137 readers, an increase of 78 per cent. over 1912. This increase is partly due to an extension of hours, the room now being open until 10 every evening. In the technology and patents rooms 40,803 readers were served. An increasing interest in the literature of mining and metallurgy and of moving pictures, is noted, and in contrast, an apparent lack of interest in aeronautics.

The oriental division now contains 15,572 volumes. The books dealing with ancient Egypt were most in demand for research work, while many Orientals living in New York use the collections in modern oriental tongues. Use of the Jewish and Slavonic divisions has increased largely.

During the year 125,763 readers called for periodicals in the periodical room, using 438,128 periodicals. Classified as to subject, periodicals on technology (including trade journals), were most popular, followed by literature, art, archæology, and the stage, and economics. In the news-

paper room 351 newspapers, American and foreign, are received regularly. Of these 237 are published in the United States. During the year 68,981 readers filed slips for bound volumes or papers not on the racks. As a test of the total use of the room a count was kept the last week of the year. This count recorded 7834 persons entering the room, of whom 1945 filed slips, and 5889 used papers on the racks.

The most important gift of the year was the collection of 158 books (203 volumes) from the library of William Augustus Spencer, who was lost on the "Titanic." The books are largely by modern French writers, and are remarkable chiefly for their fine illustrations and bindings. The library has made a systematic effort to complete its files of the sessions laws of the states from 1860 to date, and has purchased the latest directories of the principal cities, as well as many trade and business directories.

The catalogs of the reference department now contain 5,079,818 cards, of which 2,269,638 are in the public catalog room, 1,184,239 in the official catalog in the cataloging room, and 1,625,941 in the various special reading rooms. During the year 58,895 volumes, 47,223 pamphlets, and 43 maps were handled by the cataloging division.

Exhibitions have been held in the main exhibition room of the literature of spelling reform and shorthand, in connection with the centenary of Isaac Pitman's birth; a collection of early books and prints relating to railways; a selection from the Spencer collection; a large display of material on city planning; and illustrations of the progress of writing and book-making from the earliest times among oriental nations and in western Europe down to the sixteenth century. In the print gallery and the Stuart room interesting displays of prints, etchings and engravings have been shown.

The library printing office now does the printing for the entire library system, including publications, catalog cards and stationery forms, while the library bindery

handles a considerable portion of the binding done.

Excluding the Travelling Libraries office, which shows an increase in circulation of 98,045 over 1912, twenty-nine branches show gains amounting to 356,976, while twelve branches show losses of 104,541. New registration at the branches amounted to 135,377, of whom 72,618 were adults, and 62,759 were children.

Reading room attendance at the branches in general shows a decrease, the total for the year being 1,091,616, a loss of 34,527. In a number of branches the hour of closing is now 10 o'clock instead of 9. The best use of reading rooms is seen on the lower east side, where students have few opportunities elsewhere for study.

The Library for the Blind circulated 23,325 volumes, 8918 going to residents of Greater New York and the remainder to surrounding states. Thirty-seven states and the District of Columbia have drawn on this library. Books are issued in New York point, European Braille, American Braille, and Moon type; music in New York point and Braille. European Braille was recommended as the basis for a standard type by the Uniform Type Committee in its last report.

The Travelling Libraries have sent collections to fire and police department stations, schools public and private, business stations, community libraries, Sunday schools, Y. M. C. A. and Y. W. C. A. buildings, factories, and home libraries. With a collection of 76,421 volumes there have been issued 919,159 volumes.

The work with children grows steadily. The circulation was 3,006,603 volumes, against 2,959,044 in 1912, and this does not include circulation to children through the traveling libraries. This increased circulation has worn out the books till there is a serious shortage, and a building up of the collections is the greatest need for 1914.

The visits from public school classes to branches has been extended at the request of teachers, and story telling and club work has grown, picture-book story hours helping the "little mothers" who are obliged to bring their younger brothers with them.

Radiopticons are installed in several branches and occasional illustrated travel talks are given to the various clubs.

More educational, literary and welfare societies are using the assembly rooms in branch buildings for their meetings, and the branches are taking active part in the work of neighborhood associations in various sections of the city. The branches act as agencies for the New York State Education Department for the distribution of lantern slides on various educational subjects. A systematic effort has been made to collect and preserve negatives of photographs of branch libraries and of various activities carried on in them and in the main building, and from these negatives a collection of 449 stereopticon slides have been made. Twenty-seven lectures have been given, illustrated by selections from these slides.

The Board of Education has given 120 free lectures in branch libraries, at which the attendance totalled 21,493.

The recommendation of the medical officer submitted in the fall of 1912 for a better arrangement of hours for the circulation staff, was put into effect the first of the year, and results have proved it beneficial. Work done has been better, and there have been fewer absences.

In the Library School sixteen seniors received diplomas, and forty juniors the school certificate. The report of the Library School has already been reviewed in the LIBRARY JOURNAL.

The death of Dr. John S. Billings, the director of the library since 1896, occurred on March 11. A memorial service was held in the central building April 25, at which Dr. S. Weir Mitchell, Sir William Osler, Dr. William H. Welch, Mr. Andrew Carnegie, Mr. R. R. Bowker, and Mr. John L. Cadwalader paid tribute to the high rank in many fields of the late director. Mr. Edwin H. Anderson, who had been assistant director since June, 1908, was, on May 14, elected director to succeed Dr. Billings.

LEARNING hath gained most by those books by which the printers have lost.—J. FULLER, in "Of books."

THE BI-STATE CONFERENCE AT ATLANTIC CITY

ABOUT two hundred were present at the eighteenth annual meeting of the Pennsylvania Library Club and the New Jersey Library Association, held at the Hotel Chelsea, in Atlantic City, March 6 and 7. Following the custom inaugurated last year, the New Jersey Association held a short business meeting Friday afternoon preceding the joint session, at which Miss Sarah B. Askew, of Trenton, president of the association, presided. Reading of the secretary's and treasurer's reports was waived, inasmuch as they will be printed in the *Bulletin*. A nominating committee consisting of Miss Norma Bennett, of Madison, chairman; Miss Edna B. Pratt, of Trenton, and Thomas F. Hatfield, of Hoboken, was appointed by the chair. This committee made its report at the close of the Saturday morning session, when it brought in the following ticket, which was unanimously elected: president, Howard L. Hughes, of the Trenton Public Library; first vice-president, Miss Margaret McVety, of the Newark Public Library; second vice-president, E. W. Miller, Jersey City Public Library; secretary, Miss Lynda Phillips, Chatham Public Library; treasurer, Miss Mary G. Peters, Bayonne Public Library.

A number of librarians especially qualified to give advice on special subjects were ready at certain hours each day to answer any questions put to them on their topics. The list of these "advisers" was as follows: Cataloging, Miss Agnes Van Valkenburgh, Library School of the New York Public Library; Reference work, Miss Julia A. Hopkins, Pratt Institute Library School; Information department, Miss Anna A. MacDonald, Pennsylvania Free Library Commission; Book selection, Miss Corinne Bacon, director of the Drexel Institute Library School; Children's work, Miss Julia F. Carter, New York Public Library; School work in small towns, Miss Agnes Miller, Princeton Public Library; Re-binding and repairing of books, Miss Rose Murray, supervisor of binding, New York Public Library; Treatment of magazines,

pamphlets and ephemeral material, Miss Louise G. Hinsdale, librarian East Orange Free Public Library.

The first speaker at the Friday afternoon session was Miss Louise Connolly, of the Newark Public Library, whose topic was "Our rivals, the movies." Miss Connolly convulsed her hearers at the start by her inimitable description of a girl she knew who spent her whole life in a round of petty details. This girl had in her room five books—her Bible, in which she read one chapter each day and three on Sunday, two books kept because they were Christmas presents, and two others set apart on the mantel. Asked why these were not with the others, she said she kept them separate because she was reading those, and she wanted to be sure nobody touched the markers. Otherwise she couldn't find the place and would have to begin them again! This girl, Miss Connolly said, had "a still-born soul," and was typical of a fairly large proportion of every community, being utterly incapable of getting an idea out of a book or of following any line of thought to its conclusion. Such people were as truly illiterate as those who could not read the words of the printed page at all, and in their present condition the library could do little for them.

Then there was the class of people, few in numbers but enormously influential in the community, who owned, and used, their own libraries, and had little need of the public library. A slightly larger class, but still numerically only a small portion of the population, knew books and used the public library freely and intelligently. All the rest, or more than half the average community, needed to be taught its value and purpose.

With the present enormous vogue of the moving picture shows a large body of this last class, as well as the class typified by the girl described, is kept from the library. This the decrease in circulation clearly shows. The "movies" make their appeal through the rapidity with which the plot of the story is carried along and the exaggerated emphasis with which its different points are brought out. In short it is a "kindergarten for the initiation of these

people into the region of emotional experience."

By coöperating with the "movies" the library in time might be able to grade the work so that a short and simple love story might be heard or read with understanding. The repetition of the visual presentation of the idea possible in a motion picture would help to make its meaning clear.

Libraries having moving picture machines, as at St. Joseph, Mo., make the "movie" a help instead of a rival; after showing a story they can, with some certainty of its appreciation, offer it in book form. Moreover, the atmosphere of the library will have its unconscious influence on the people first attracted there only by the pictures.

Where it is not possible for a library to have its own picture machine, Miss Connolly would have the librarian enlist the coöperation of the proprietor of the motion picture theater to show slides advertising the library in brief but catchy sentences at the close of its regular performance; or, in the case of a reel showing the dramatization of some standard work, stating that the book may be obtained at the public library.

Following Miss Connolly, Miss Lutie E. Stearns, of the Wisconsin Library Commission, gave an address on "The library militant." The library should be made inviting to all, the practice of requiring guarantors on every card abolished, the public encouraged to take as many books at a time as could be used. The librarian should know as many people in the community as possible, for people are much more likely to come to a friend than to a stranger for information and help. The present way of living, moving pictures, the craze for dancing and cards, the trade journals provided by business firms for their employes, and the whole system of modern recreation, all distract the attention of people from the public libraries. The library, if it is to maintain its prestige, must become aggressive. When the great problem of the day is the reform of systems of government, the library should not be content to be a repository of pure literature, but should have the latest publications on methods of

government, in an endeavor to help the people solve their problem. The librarian should visit the moving picture theaters in the community and investigate the character of the films. If the cheap stories so often depicted can be replaced by such films as the "Odyssey," "Hamlet," "Evangeline" and "Lancelot and Elaine," the "movie" may become a distinct influence for good. Such films, with those showing world events and scenes in foreign lands, may make the moving picture theater, especially if used in conjunction with the public library, the poor man's university. The General Film Company, having offices at the corner of Sixth avenue and 23d street, New York City, will supply many such films. An Edison machine suitable for libraries can be bought for \$65, an aluminum screen to put around it for \$6, and films for from \$2.50 to \$5. These can be exchanged for 30 cents, or 90 cents for extra long films.

Miss Stearns freely criticised the Carnegie Corporation for the restrictions it puts on the use of the buildings it gives. Many small towns have no recreational center except the saloon, and she felt that the inclusion in the library building of bowling alleys, a gymnasium, billiard and pool tables, or even a kitchen and dining room where clubs might meet, according to the needs of the town, would be a distinct advantage to the community and no detriment to the library. She advocated public dances, properly managed, in the auditoriums, and also the organization of community choruses in the library. "Better have a hundred happy people in the auditorium than three in the reading room," is her statement of her policy. She told of a men's lounging room in the library of one town, which is largely used by railroad men. A telephone in the room summons them to their runs, and the railroad, appreciating the benefit to its employes, gives \$300 annually for the support of the room. In Toronto for years there has been a room in the basement for the use of the unemployed, where they may read or rest. This was contrasted with the practice in many large libraries of taking away the chairs from the newspaper racks, "to pre-

vent the patrons from staying too long," thus antagonizing the very people they should try to help. "The worth of a library, as of a book, lies in its use," was Miss Stearns' closing word.

Some five-minute talks followed. The first, by Miss Mabel R. Haines, librarian of the Summit (N. J.) Public Library, was on the "Possibilities of the exhibit in a small library." The power of an exhibition is swift, dynamic, direct. It forms an excellent way of reaching the community, especially if the book collection is poor. The local history exhibit recently held in Summit, already described in the December LIBRARY JOURNAL, was specially successful, resulting in an unexpected accumulation of good material, an increased interest on the part of the schools, and a considerable impetus to public spirit.

Following Miss Haines, Miss Adele Lupton, of Rahway, spoke on the "Social activities of the library," as exemplified in her own library, where the library, besides the usual talks and lists, has cooperated with the high school in editing its paper, with the health department in circulating the milk reports, with lovers of gardening by circulation of flower and seed catalogs and the holding of flower shows, and with enthusiasts for education and the stage by advertising all meetings of educational value and by circulating the bulletins of the Drama League, of which the library is a member.

Howard L. Hughes, librarian of the Free Public Library of Trenton, brought the session to a close with a few words on "Self-circulation." He said the librarian should try to circulate his books two times, but himself four times. It was advantageous to become acquainted with as many people of as many classes as possible. The librarian should help every sound movement in the community, and should try to become personally acquainted with every promoter of the public welfare, since personal acquaintance always makes for freer intercourse. In short the librarian should "try to be as human as our human limitations will permit."

At the Friday evening session Thomas L. Montgomery, state librarian of Pennsyl-

vania, presided. He spoke briefly of the regret felt by all at the recent announcement of the proposed discontinuance of the Drexel Institute Library School at the close of the present year, and said that a meeting was to be held in Philadelphia March 20 to decide the fate of the graduating class. After a five-minute talk by Albert J. Edmunds, of the Historical Society of Pennsylvania, on the value of the international alphabet invented by Paul Passy, of Paris, the speaker of the evening, J. Liberty Tadd, was introduced.

Mr. Tadd is director of the Public Industrial Arts School of Philadelphia, and in his talk on "Art in education" he showed most amazing results of the application of his ideas. Mr. Tadd believes that success in life depends more on the physical and mental energy possessed by the individual than on the amount of information that can be absorbed in a given length of time. Through repetition of certain "refined, skilful, delicate, accurate movements" a sufficient number of times the motions become automatically perfect and stimulate and energize the brain.

During the period of the child's growth, from the sixth to the fourteenth year, Mr. Tadd pleads for a few hours each week for this training. In his school every pupil is required to draw, design, model in clay, paint, and carve, for the sake of the development received, and in apparently every case with successful results. They learn to use both hands with equal ease and to make the most intricate figures balance without the use of tools. A large number of interesting slides of the children's work were shown, and the lecture was also illustrated with rapid sketches on the blackboard.

On motion of Robert P. Bliss, of the Free Library Commission of Pennsylvania, a committee of three was appointed to draw up resolutions expressing the regret of the two associations at the passing of the Drexel Institute Library School. Resolutions from the University of Pennsylvania on the same subject were read and referred to this committee.

The second session opened Saturday morning at 11 o'clock, with Miss Askew

presiding. Miss Alice S. Tyler, director of Western Reserve University Library School, gave a most stimulating talk.

In discussing "The necessary qualifications for a librarian," Miss Tyler said in substance that the long list of requisites usually given contained many that were equally sought in other professions and vocations, and that the personal qualities and attitude toward the work, termed the "library spirit," deserved a broader interpretation, as a world-spirit of social service. The general qualities which are in demand in library work and elsewhere, which go toward successful work, have much to do with the personal relations librarians must bear to the various classes of people using books. There are certain special requirements which are distinctive to library work, over and above the engaging personal qualities and general education and culture which are in such general demand, and for this reason special training was required, hence the library schools.

The functions of formal library training have been clearly set forth many times by those identified with the work, hence the most obvious one need only be mentioned, *viz.*, Training in the methods and technique of acquiring, assembling, handling, and distributing collections of books, promptly, accurately and expeditiously—in other words, classification, cataloging, administration, trade bibliography, etc. This is accepted as essential in preparation for effective library work, though opinions differ as to how much time should be given to this distinctly technical training. The second item in preparation for the work is a specialized knowledge of the contents of books. The broad acquaintance with books must be supplemented by specific knowledge. Some few people manifest a sort of intuitive book sense, but this is rare. To interpret books to those who "are entering with hesitation into paths that may lead to wider fields" requires more than simply a love of reading. The third requirement which calls for special preparation is a knowledge of social conditions, community interests and economic influences surrounding the people the library is to serve; and

specifically an acquaintance with the handicaps and obstacles that probably intervene between the individual and the printed page, which prevent many people from coming into personal touch with their library, and methods of overcoming these obstacles. To relate the library to the organized social forces of to-day is an important task, and librarians are becoming keenly alive to the opportunity. With the widening horizon of social service may we not accept a new classification of our vocation as that of social workers, the field for which is set forth in such an inspiring and comprehensive way by Dr. Edward T. Devine in the preface to his "Spirit of social work," addressed "To social workers."

This conception of library work does not leave out of account the fundamental thought of the library as an important part of our educational system, and indeed the schools themselves are responding to the social appeal. Recent educational writers are laying much stress on the fact that education is a social process, a social enterprise. Educational work of any kind cannot mean isolation, but must relate itself to the best interests and activities of the community. Enthusiasm for people—for human beings—must be an important factor in this work, as it is in all the varied activities of social service. Even though our ideal of service be a myth it is worth while, if we accept Sorel's definition of a myth as "the imaginative and intoxicating symbol which inspires men's souls and causes enthusiasm."

Following Miss Tyler's address Edmund Pearson, "the librarian" of the Boston *Transcript*, gave a talk on "Book verse and other verse," which was chiefly a reading of some selected poems. After a brief and humorous "recipe" for the making of book verse, Mr. Pearson read two poems by Austin Dobson, "To a missal of the thirteenth century" and "The bookworm"; "In a library" and two brief verses, each entitled "A book," by Emily Dickinson; "The land of story-books," by Robert Louis Stevenson; "Dibdin's ghost," by Eugene Field; a ballad recounting the history of one John Jenkins; "A society wander-

song," taken from *Life*; and "A modern martyrdom," by Sam Walter Foss, late librarian at Somerville.

In a second brief business meeting of the New Jersey Association, held at the close of Mr. Pearson's reading, the officers for the coming year were elected and a committee was appointed to draw up resolutions on the death of Mr. Kimball.

The third session was held Saturday evening, and was presided over by Dr. Hill. Before introducing the speakers Dr. Hill paid tribute to the work of Mr. Kimball, for so long time a trustee of the endowment fund of the A. L. A., a trustee of the Passaic Public Library, and a member of the state library commission. Dr. Hill said that Mr. Kimball's interest dated back to the organization of the Passaic Public Library in 1885, since which time his enthusiasm and care had never diminished.

The first speaker, Prof. Max Eastman, asked the question, "Are you poetic or practical?" He held that "we would all have more fun if we were more poetic, and that we are more poetic than we think." He said a simple test for discovering the proportion of poetic souls is to watch the crowd on a ferryboat and observe how many stay outside to enjoy the sights of the river and how many go inside to think about what they will do when they get across. Children are poetic because they haven't yet been trained to be practical, and it is only when they are made to learn poetry as a *punishment* that they begin to regard it as a mere "collection of words and phrases carefully trained to slip through the mind without enough friction to arouse any thought or imagination." To be poetic is to be childlike, to be natural. Discussing the qualities of words, Prof. Eastman said that slang is partly practical and partly poetic, mostly the latter, and defined poetry as the art of giving to any article or act a name that brings out or suggests its intrinsic quality.

Prof. Eastman was followed by Dr. Max Müller, of the University of Pennsylvania, who gave an illustrated lecture on "The writings of the ancient Egyptians," in which he traced the writings from 4000 years before Christ.

Mr. Faxon announced the travel plans of the A. L. A. so far as perfected, for the Leipsic exposition, the conference at Oxford, and the convention at Washington, with post-conference trip to Old Point Comfort and up the James river to Richmond.

The session closed with the reading of the following resolutions:

Your committee, composed of a member of the Pennsylvania Free Library Commission, an alumna of the Drexel Library School, and a principal of another library school, offers the following resolution:

Whereas, It has been announced that the Drexel Institute Library School is to be closed at the end of this school year after twenty-two years of honorable record, and

Whereas, This school during this period has not only trained satisfactorily candidates for library positions, but has by this means aided greatly in the elevation of the library profession as a whole, and

Whereas, In the present condition of library service more instead of fewer well trained persons are needed; therefore, be it

Resolved, That the discontinuance of any satisfactory library school is a distinct loss to the profession, and

Further resolved, That this association learns with regret of the disassociation of the Drexel Institute Library School from Drexel Institute, and hopes that the school may be resumed somewhere without loss of continuity and with whatever measure of identity may be possible.

(Signed) ANNA A. MACDONALD.
SARAH C. N. BOGLE.
MARY W. PLUMMER.

The trustees and staff of the Atlantic City Free Public Library entertained the delegates at a tea in the library building Saturday afternoon from four to six. The reception was held in the club room and refreshments served in the museum adjoining, both rooms being made attractive with cut flowers and palms. The Drexel delegation, some sixty in all, held a dinner Saturday night, while the party from New York occupied another table. Pratt Institute representatives gathered together Sunday at lunch, and there were many informal luncheon and dinner parties. In spite of the bad weather Friday and Saturday the boardwalk had many visitors, and by Sunday Atlantic City had redeemed its reputation for blue skies and balmy air.

F. A. H.

It is obvious that the library cannot stand still. It cannot simply mark time. Its appropriations must be increased, and its work increased, or it will surely fall behind. *There is no such thing as a stationary efficient library of any kind.*—Trustees' report, Massachusetts State Library, 1913.

GOVERNMENT DOCUMENTS TO BE SOLD THROUGH BOOKSTORES

THE attention of the committee on federal and state relations was called by the librarian of the University of Illinois to the fact that under the interpretation, by the Government Printing Office, of the statute relating to the distribution of public documents, the Superintendent of Documents states that he is not allowed to sell public documents to book stores or magazine agencies. The committee promptly addressed letters to the chairmen of the Senate and House Committees on Printing, namely, Senator Duncan U. Fletcher, of Florida, and Representative Henry A. Barnhart, of Indiana, requesting that the statute be amended in this respect. We suggest that librarians throughout the country coöperate, according to their opportunity, with the committee in endeavoring to achieve this alteration of the statute. Such sale of public documents to book stores and magazine agencies will be a convenience to libraries which procure all their publications through an agent, and will be of great educational benefit to the general public. The provisions of the law which it is desired to amend prohibit the Superintendent of Documents from selling more than one copy of any government publication to a person or firm dealing in government publications for profit.

* * *

The tariff act of Oct. 3, 1913, makes the following provision with reference to the importation of books by public libraries:

Article 427. "Books, maps, music, engravings, photographs, etchings, lithographic prints, and charts, especially imported, not more than two copies in any one invoice, in good faith, for the use and by order of any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use and by order of any college, academy, school or seminary of learning in the United States, or any state or public library, and not for sale, subject to such regulations

as the Secretary of the Treasury shall prescribe."

BERNARD C. STEINER, *Chairman.*

A REQUEST FOR SUGGESTIONS

"ONE reason why so few cities have received formal reports from delegates to educational and other conventions is that *meetings* seem to count for less than *meeting*."

So says Dr. Allen, of the New York Bureau of Municipal Research, who then proceeds in a recent issue of his "Efficient citizenship" leaflet to lay out a group of "lobby questions," applicable to school superintendents at their Richmond meeting the last week in February. A member of the A. L. A. inquires whether a similar plan could not be successfully worked at the Washington conference. We believe it could.

Here is the way Dr. Allen has worked it out as illustrated by a couple of questions taken at random:

"Systematic instruction of parents in helping schools — ask Superintendent Horn, of Houston.

"Outside coöperation with rural schools — ask State Superintendents Preston, of Washington, and Miller, of Ohio."

Have you any questions in library work that you would like to have answered?

If so, send the questions to A. L. A. headquarters.

Has your library solved some problem or undertaken some enterprise that you think would be interesting and valuable to your colleagues?

Send in a brief statement about it to headquarters, with permission for us to print it and refer inquiries to you, as in the above two illustrations from Dr. Allen's list.

We will compile the questions and hints sent in and print them in the May *Bulletin* of the A. L. A., and when you get to Washington you will doubtless find a chance to have a "lobby conference" with the one who can help you to answer your question.

GEORGE B. UTLEY.

A NEW INFORMATION BUREAU

THE Index Office, 31 W. Lake street, Chicago, has been incorporated for the purpose of indexing, compiling and abstracting literary and statistical material for the use of manufacturers, scientists and investigators.

Aksel G. S. Josephson, secretary of the office, announces that the office is prepared through experts and assistants to undertake searches in the libraries, museums, files and records of Chicago, and through connections with libraries, museums, laboratories, research institutes, etc., in other places, to undertake similar work elsewhere.

It intends to collect in its rooms information about available sources of information, collections, catalogs, directories, etc., and will undertake to furnish at reasonable rates bibliographies, indexes, abstracts and translations, as well as photographic reproductions of written and printed material.

The office will also act as an intermediary between those who have information of a specialized character to impart, and those who seek such information.

Membership is obtained by paying an annual fee of \$5, and life membership is obtained by paying once for all a sum of \$100.

Library Organizations

CONNECTICUT LIBRARY ASSOCIATION

On Friday, Feb. 27, Dr. John G. Stanton, vice-president of the trustees of the New London Public Library, welcomed the Connecticut Library Association to New London.

The morning address was made by President Frederick Henry Sykes, of the Connecticut College for Women. Dr. Sykes pointed out that the colleges of our day are still following the old type of education, while the world has gone ahead. Recognizing that library work has become in large part a woman's vocation, he plans to incorporate a broad course of systematic library training in the curriculum of his college. Miss Colt, of Stamford; Miss Sperry, of Waterbury; Miss Davis, Miss Foley, and Miss Hewins, of Hartford, and Miss Rockwell, of New Britain, took part in the discussion which followed.

The meeting then adjourned for luncheon, which was served in the Mohican Hotel.

The afternoon session opened with Mr. Gutzon Borglum's interesting paper in which he defined "Insurgency in art" as an insistence on saying in our own way things that we ourselves think. He pleaded that artists of our time should interpret our own history and experience instead of depending upon Greek and Roman subjects for inspiration.

Miss Harriet S. Wright, of the New Britain Institute, next spoke upon the use of pictures in the children's room. Miss Wright illustrated her lecture with many charming samples of illustrations which have found favor with the children of her library.

The reports of the secretary and treasurer were read and accepted, after which Mrs. Johnson outlined the work of the library summer school. Mrs. Johnson stated that, thanks to the help of our association, without which the school must have been discontinued, better work was done than ever before. Next summer the work will be resumed in connection with the Danbury Normal School.

A telegram was sent to Mr. John Pickens, librarian at Thompsonville, Conn., upon the

opening of the new library building on the evening of Feb. 27. Resolutions of sympathy were also directed to be sent to Dr. E. C. Richardson, in connection with the death of Miss Mary A. Richardson, a charter member of our association and its secretary for four years.

Officers for the following year were elected as follows: president, Mr. Charles S. Thayer, of the Hartford Theological Seminary; vice-presidents, Dr. John G. Stanton of New London, Rev. Storrs O. Seymour of Litchfield, Mrs. Godard of Wallingford, Miss Mary E. Clark of Westbrook, and Mr. B. W. Danielson of Danielson; secretary, Miss Edith McH. Steele, of Waterbury; treasurer, Miss Lillian M. Stedman, of Suffield.

After passing a resolution that the thanks of the association be extended to Dr. and Mrs. Stanton and to the librarian and others who helped to make the occasion a delightful one, the meeting adjourned.

EDITH McH. STEELE, *Secretary*.

NEW YORK STATE LIBRARY ASSOCIATION

The following committees have been appointed by the executive committee of the New York State Library Association for 1914:

Hospitality:

Miss Agnes Van Valkenburgh, chairman; Library School, Public Library, New York City.

Miss Emily S. Coit, Public Library, Buffalo.
Miss Isabella K. Rhodes, State Library, Albany.

Miss Isabella M. Cooper, Public Library, Brooklyn.

Mr. Howard L. Hughes, Public Library, Trenton, N. J.

Mr. Harry N. Parsons, Public Library, Buffalo.

Legislation:

Mr. William R. Eastman, Albany, chairman, with power to add two members.

Publicity:

Miss Harriet R. Peck, chairman, Rensselaer Polytechnic Institute, Troy.

Miss Maud D. Brooks, Public Library, Olean.

Mr. William F. Yust, Public Library, Rochester.

Mr. William S. Watson, chief of the Division of Educational Extension, Albany.

Dr. Frederick W. Kilbourne, Public Library, Brooklyn.

Rural communities:

Miss Clara W. Bragg, Davenport Library,

Bath, chairman, with power to add two members.

Miss Anna R. Phelps, State Library, Albany.

Miss N. Louise Ruckteshler, Guernsey Library, Norwich.

Library institutes:

Mr. Asa Wynkoop, chairman, inspector of libraries, Albany.

Miss Emily S. Coit, Public Library, Buffalo.

Miss N. Louise Ruckteshler, Guernsey Library, Norwich.

Miss Mary L. Davis, Public Library, Troy.

Mr. Frank K. Walter, vice-director of the State Library, Albany.

Libraries in charitable, reformatory, and penal institutions:

Miss Mary W. Plummer, chairman, principal, Library School, Public Library, New York City.

Miss Elizabeth P. Clarke, Seymour Library, Auburn.

Mr. Frederick C. Hicks, Columbia University Library, New York City.

NEW ENGLAND CLUB OF LIBRARY COMMISSION WORKERS

The New England Club of Library Commission Workers held its fifth annual meeting in Burlington, Vt., on Feb. 6. Massachusetts, Rhode Island, Connecticut, and Vermont Commissions were represented by nine workers; five other library workers in Burlington and one from Montpelier attended part of the meetings.

After interesting reports from the four states of their past year's work, the subjects discussed were: How to arouse the active interest of library trustees; Efforts to encourage systematic reading and study instead of desultory reading purely for recreation; Influences antagonistic to good reading; Branch libraries in small towns; Sunday opening; The library and the immigrant; Regulations for the use of traveling libraries.

MISS R. W. WRIGHT, *Secretary*,

Vermont Free Public Library Commission.

WESTERN MASSACHUSETTS LIBRARY CLUB

The annual midwinter meeting of the Western Massachusetts Library Club was held in the new library of the International Y. M. C. A. College at Springfield Feb. 19, 1914. Dr. F. N. Seerley, dean of the college, made the address of welcome, briefly tracing the growth and aims of the college.

The morning session was devoted mainly to a discussion of the best books of 1913. This was based upon the annual book list compiled

by the club and printed in the Springfield *Republican*, from which reprints had been made and distributed. This discussion was conducted by Miss Bertha E. Blakely, librarian of Mt. Holyoke College and president of the club.

George L. Lewis, chairman of the committee on simple outlines for school children in the use of the library, then presented his report. This is one of the most vital subjects that have come before the club, and called forth much comment. It was generally agreed that one of the greatest difficulties encountered in teaching school children to use a public library is found in the ignorance of the teachers themselves in the use of a library. This is due to the lack of instruction of prospective teachers as to the importance of children's reading and value of libraries in connection with school work. The librarians felt the need of action upon this subject, and drew up a resolution embodying the club's opinion. This was sent to the State Board of Education, in the hope that instruction in the use of the library may be incorporated into the normal school course.

The first address of the afternoon session was given by Miss Lizzie E. Fletcher, welfare secretary of the Palmer Manufacturing Company, of Three Rivers. Her topic was "Life in a foreign community in Hampden county." Miss Fletcher spoke in a general descriptive way of the life of foreigners in a village community. F. G. Willcox, of the Holyoke Public Library, told of a recent successful experiment in advertising his library.

A resolution was passed urging the appropriation of \$10,000 by the state for the Massachusetts Library Commission. A resolution was also passed in regard to the need of enlarging the scope of the State Library.

The last address of the day was given by George L. Lewis, of Westfield, upon "Periodicals in the library; some problems of the subscription list." Frank Guy Armitage, a student at the college, gave several delightful readings from Dickens.

After a vote of thanks was given to the college for its hospitality the meeting adjourned.
ALICE K. MOORE.

MILWAUKEE LIBRARY CLUB

At the February meeting of the Milwaukee Library Club Miss Winifred Merrill and Mr. J. V. Cargill were the speakers. Miss Merrill's subject was "Municipal and legislative libraries," and Mr. Cargill's was "Branch library work." Each gave a brief history of

the origin and development of these departments of library work, and pointed out where in they differ in their functions from the public library proper.

"The problems which arise in municipal and legislative work are always the very most up-to-date problems," said Miss Merrill. "The municipal and legislative library was established primarily to assist legislators in their work by collecting and tabulating for their handy use information which cannot be obtained in books."

"Only a limited proportion of the population beyond those who have easy access, frequent the central library," Mr. Cargill explained. "Branches should therefore be scattered at convenient places throughout the city, as school buildings are, to attract the rest. Experience shows that most people will do without books rather than take much trouble to get them."

JOSEPHINE KULZICK, *Secretary*.

ONTARIO LIBRARY ASSOCIATION

The fourteenth annual meeting of the Ontario Library Association will be held April 13-14 at the Public Library in Toronto. The chief topic for discussion will be "The library situation in Ontario and its possibilities." The president, W. F. Moore of Dundas, will discuss what has been done in organized effort. The question of finances will be taken up by C. A. Byam and O. A. Langley; administration, by W. H. Arison and Norman S. Gurd; general efficiency in book selection, W. J. Sykes, and in book purchase, W. O. Carson; what may be done, will be summed up by E. A. Hardy. In addition to the consideration of this general question, there will be an address on "The universality of library service," by Matthew S. Dudgeon, secretary of the Wisconsin Free Library Commission. It is expected that Dr. Frank P. Hill, chief librarian of the Public Library, Brooklyn, N. Y.; Miss Ahern, editor of *Public Libraries* of Chicago, and Mr. Cedric Chivers, the library bookbinder of England, will be present and take part in the discussions.

Library Schools

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

The need of a club house as a center of social life for the women students has been felt for some time at Pratt Institute. A mass meeting was held about a year ago, at which this need was presented before the trustees,

and the movement there started accomplished its purpose in the recent opening of a very attractive club house adjoining the library grounds. In addition to the general club rooms, which include two parlors, a dining room, kitchen, and sewing room equipped with machines, each of the departments has its own special room furnished by its alumnae. The graduates of the Library School responded very generously to the appeal which was sent out in the fall, and the committee, of which Mrs. Stevens was chairman, used so much judgment and taste in expending the sum raised that the library students all feel that their room is the most attractive in the building. Tea at two cents a cup is served every afternoon, Sunday night suppers are among the pleasant possibilities, and already the club house has begun to play quite a part in the student life.

For the first time this year a study of the kind of literature provided by the commercial purveyors of reading matter has been undertaken as part of the fiction seminar course. Groups of students have been assigned to investigate the pay-lending libraries in the department stores, on the book stands, in the railway and subway stations, and the literature dispensed by stationers, tobacconists (two men being assigned to the latter), and similar agencies.

One of the problems in book selection this term has been the compiling, on request, of a list of \$60 worth of new books for a small country library. The result was gratefully received by the library board.

Miss Annie Carroll Moore, supervisor of children's work in the New York Public Library, lectured on Feb. 24 and March 3. The first of the two lectures, illustrated by lantern slides, was on the development of children's work in Greater New York, and the second was on the selection of children's books.

We had anticipated the pleasure of two lectures from Miss L. E. Stearns, of the Wisconsin Library Commission on March 10. Miss Stearns was, however, called home suddenly from Atlantic City, but we were so fortunate as to secure Miss Alice S. Tyler, formerly secretary of the Iowa Library Commission, who gave a talk on commission work in Miss Stearns' place on that day.

Mr. J. I. Wyer, Jr., director of the New York State Library, spoke to the class on Monday afternoon, March 9, about the work of the State Library and the State Education Department.

ALUMNI NOTES

Miss Grace B. McCartney, class of 1911, who has been in the order department of Columbia University for two years, has been made assistant librarian in the order department of the Rochester (N. Y.) Public Library.

Miss Helen E. Crippen, class of 1912, of the Denver Public Library staff, has accepted a position in the library of Wells College, Aurora, N. Y.

JOSEPHINE ADAMS RATHBONE, *Vice-director*.

DREXEL INSTITUTE LIBRARY SCHOOL

Recent visiting lecturers have been as follows:

March 5. Two lectures, "Some western phases of library work" and "The library's part in a social survey," by Miss L. E. Stearns.

March 9. "Spanish novelists," by Miss Mary W. Plummer.

The students had the pleasure of meeting both Miss Stearns and Miss Plummer at afternoon tea.

A visit was paid to the Library of the Commercial Museum on March 27.

The courses in Parliamentary law, Subject headings, Cataloging, and History of libraries were completed in March and examinations held.

The director and fourteen of the present class attended the Atlantic City meeting March 6-7. Forty-five students and alumnae were present at the Drexel dinner. The guests of honor were Mr. and Mrs. T. L. Montgomery, Dr. Lucian M. Robinson, Miss Anna A. Macdonald, and Miss Julia A. Hopkins. The Library School of the New York Public Library sent a beautiful bunch of yellow tulips to the Drexel table.

At the Washington's birthday assembly President Godfrey announced the decision of the president and board of trustees to discontinue the Drexel Library School at the close of the current year.

The director wishes to make public acknowledgment of the many kind letters received from alumnae of the school, from directors of other library schools, and from librarians in the field, expressing appreciation of the work done at Drexel, and regret for the fate of the school.

A business meeting of Drexel alumnae at Atlantic City was called prior to the Drexel dinner. The director read a statement from President Godfrey, giving reasons for the discontinuance of the school, and also read se-

lections from letters of regret received. The following resolutions were adopted:

Whereas, The Board of Trustees of the Drexel Institute of Art, Science and Industry has announced its decision to discontinue the Library School of Drexel Institute, and

Whereas, For twenty-one years this school has, through its excellent training and maintenance of high standards, rendered valuable service to the entire library profession, and

Whereas, The Alumnae feel the deepest regret at the action of the board whereby the interests of the Alumnae are vitally affected; therefore, be it

Resolved, That a committee of five members be appointed, at the convenience of the president, whose duties shall be to advance the interests of the Alumnae, and to further, if possible, the continuance of the school under satisfactory conditions; and be it further

Resolved, That the president and Board of Trustees of the Drexel Institute be requested to confer with this committee regarding any contemplated transfer of the school; and be it further

Resolved, That these resolutions be spread upon the minutes of this association, and that a copy be sent to the president and to the Board of Trustees of the Drexel Institute.

THE ALUMNAE ASSOCIATION OF THE DREXEL LIBRARY SCHOOL,

KATHERINE M. TRIMBLE, *Secretary*.

The committee appointed is as follows: Miss Flora B. Roberts, Pottsville Free Public Library, Pottsville, Pa., chairman; Miss Mary P. Farr, Manchester Public Library, Manchester, Mass.; Miss Nina K. Preston, The Hall-Fowler Memorial Library, Ionia, Mich.; Miss Helen Hill, William Penn High School, Philadelphia, Pa.; Miss Rebecca P. Warner, The Public Library, Washington, D. C.

SIMMONS COLLEGE LIBRARY SCHOOL

On Feb. 26 a most interesting visit was made to the Somerville Public Library. The striking features of the new building, and the problems involved in the reorganization of the classification and cataloging systems of a well-developed library make this a peculiarly profitable visit just at this time. The class has recently been discussing in library administration provision for the health and convenience of the staff, and was thoroughly prepared to appreciate the model equipment in that line, as well as the hospitality of the staff, when the afternoon ended in a tea in the staff dining room.

The only outside lecturer for the month will be Mr. Drew B. Hill, who will speak on March 23 on some problems of administration.

The school hopes still to hear later Miss Stearns, who was to have spoken on March 16.

The Junior Library economy class found it possible to call the radioscope to their help in illustrating their biographical talks on well-known librarians, as this enables one to utilize the pictures in the LIBRARY JOURNAL without the necessity of having slides made.

PERSONAL NOTES

Miss Rosamond White, ex-'07, who was registered in the Library School during 1903-04, died at her home in Winthrop, Mass., Dec. 20, 1912. From 1904-10 Miss White was librarian in the mining department of the Massachusetts Institute of Technology.

Miss Annie L. Flavell, Simmons 1908, was married on July 31 to Mr. Leslie W. Wood, of Plymouth, Mass. Mr. and Mrs. Wood are living at 25 Mayflower street, Plymouth.

The engagement is announced of Miss Jessie L. Blanchard, Simmons 1912, and Mr. Eugene Walker, of Southbridge, Mass. Miss Blanchard has resigned her former position in one of the New York City branch libraries.

Miss Alice A. Wood, Simmons 1907, was married on Wednesday, Jan. 14, 1914, to Mr. Earl Northrup Manchester, in Chicago.

Miss Minnie Burke has recently compiled a card index of cases, drawn from hospital records, for a Boston physician.

Miss Ruth Alexander is reorganizing the special engineering library of Lockwood, Greene & Company.

JUNE RICHARDSON DONNELLY.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

The juniors have listened to the following lectures since Feb. 11:

"Technological collections in libraries," on Feb. 11, by Mr. W. B. Gamble, chief of the Technology division, New York Public Library.

"The art of re-reading," on Feb. 18, by Mr. A. E. Bostwick.

"Branch administration," on Feb. 18 and 25, by Mrs. A. B. Maltby and Miss Florence Overton, of the New York Public Library staff.

"The appeal of library work with children," on March 2, by Miss A. C. Moore, chief of the division of work with children.

"Town library administration," on March 4, by Miss L. G. Hinsdale, librarian of the East Orange Public Library.

"Copyright," on March 9, by Mr. E. F. Stevens, director of the Pratt Institute Free Library.

"Italian literature from Alfieri to d'Azeglio," on March 11, by Prof. T. E. Comba.

Senior lectures have been as follows:

Advanced reference and cataloging course

"Literature of art," on Feb. 10, by Miss S. A. Hutchinson, librarian of the Brooklyn Institute.

"Literature of music," on Feb. 17, by Mrs. S. D. Andersen, of the New York Public Library.

School and college library course

Same as above, with three evening lectures on Feb. 9, 16 and 23, on "The high school library situation," "The training of high school students in books," and "The administration of the high school library," by Miss M. E. Hall, of the Girls' High School, Brooklyn.

Students of these two courses began their work in Italian on Feb. 24, under Prof. T. E. Comba. Their text book is the "Manuale per le biblioteche popolari," of Fabietti.

Administration course

"The library in a budget exhibit," on Feb. 18, by Miss L. G. Hinsdale. This was accompanied and illustrated by charts, diagrams, etc.

"Night schools and the education of adults," and "The public school curriculum," on Feb. 19 and 26, by Mr. Albert Shiels, of the Board of Education.

"The library and the workingman," on March 4, by Miss Irene Hackett, librarian of the Englewood (N. J.) Public Library.

The juniors invited the faculty and seniors to a party the evening of Feb. 13. Valentines, stunts and Victrola music constituted the program. The decorations of the room were unusually successful on this occasion.

On Feb. 26 the faculty invited the branch librarians to a half-hour discussion of student practice, followed by a talk by Miss Mary Ogden White on "The best seller," and a social hour over the teacups. Miss White conducts a section of the junior class in the fiction seminar.

Three of the faculty, three graduates, four seniors and four juniors attended the Atlantic City meeting, dining together, with the addition of several members of the library staff, on Saturday evening. The Atlantic City dinner is becoming an established custom of the school.

Miss Tracey, of the faculty, has prepared a list of material in German, French and Italian on American libraries, to be included in the handbook of the Leipsic exhibit. The German division was printed in the New York Library Club *Bulletin* for March.

Mr. Frederick Goodell, of the seniors, has an article entitled "What the public library can do for boys" in *The Advocate*, a magazine published by the boys of Public School 22.

Changes in the faculty have been made as follows:

Miss Juliet A. Handerson, a graduate of the Western Reserve University and Library School, and a member of the Cleveland Public Library staff, has been added to the faculty as registrar and principal's assistant. Miss Rose's time will hereafter be divided equally between the school, as supervisor of practice, and the library, as supervisor of probationers. Her office will be in the school quarters.

APPOINTMENTS

Miss Nora Cordingley (jun., 1912) has been engaged as an assistant in the cataloging department of Columbia University Library.

Miss Bessie Baldwin ('13) has a permanent position with Longmans, Green & Co., publishers.

Miss Eleanor Hitt (senior) has been obliged to postpone finishing her course, having accepted the position of head cataloger in the Kern County Library, Bakersfield, Cal.

Miss Katherine Christopher (senior) has accepted a position in charge of the women's department of the Automobile Club of America, with the privilege of finishing her course.

Miss Mary E. Jameson (senior) has been appointed assistant in the division of technology of the New York Public Library, in the place of Miss Hitt.

Mr. Frank Dolezal (junior), of the St. Louis Public Library, has undertaken half-time work as stack assistant.

WESTERN RESERVE LIBRARY SCHOOL

NEWS NOTES

On the afternoon of Feb. 23 Mrs. Edna Lyman Scott was a guest at the school, and gave a very entertaining and helpful talk on "The art of story telling," concluding with several stories. Later in the afternoon tea was served, and an opportunity given to meet Mrs. Scott informally. The last lecture in the course in children's work was given on March 4 by Miss Annie Cutter, supervisor of school libraries of the Cleveland Public Library, who told of the work of that department, and under her conduct the class visited two of the school libraries after the lecture. The following day the students, through the courtesy of the Public Library, attended a lecture on "Greek mythology," which was given before the training class by Mrs. Thorne-Thomsen.

During February the students have been having practice work in the children's rooms of the Public Library. Beginning with the last week of February and continuing until

the end of the school year, the practice work will be in the various branches of the library system. The course in trade bibliography and bookbuying is completed, and the course in public documents given by Mr. H. S. Hirshberg, reference librarian of the Cleveland Public Library, has taken its place on the schedule. An honor system similar to that already in operation in the other departments of the University has been adopted by the Library School class of 1914.

The director attended the joint meeting of the Pennsylvania Library Club and the New Jersey Library Association at Atlantic City, March 6-7, and afterwards visited the New York Public and Pratt Library Schools.

ALUMNI NOTES

Juliet A. Handerson, '08, has resigned her position of supervisor of inventory in the Cleveland Public Library to become assistant to the director of the New York Public Library School.

Laura Robson, '12, formerly first assistant in the Alameda County Library at Oakland, Cal., is now assistant in the Berkeley Public Library.

Alice S. Tyler. *Director.*

CARNEGIE LIBRARY OF PITTSBURGH—TRAINING SCHOOL FOR CHILDREN'S LIBRARIANS

During the last month the following visiting lecturers have addressed the Training School:

Mr. Edwin H. Anderson, director of the New York Public Library, who gave two lectures Feb. 14. One was upon "Library administration with special reference to the human relations," the other upon the work of the New York Public Library, with stereopticon illustrations.

Dr. Arthur E. Bostwick, librarian of the St. Louis Public Library, who gave two lectures Feb. 21. His subjects were the "Work of the St. Louis Public Library," illustrated with stereopticon views, and "Some lost arts of librarianship."

Mrs. Edna Lyman Scott, story teller, who gave two lectures, Feb. 24 and 25. The first lecture, upon "The responsibility of society for what children read," was held in the evening in the East Liberty branch library, and was open to the public. The second lecture was upon "The creed of the story teller."

Miss Lutie E. Stearns, chief of the Traveling Library department, Wisconsin Free Library Commission, who gave four lectures, March

2-4. Her subjects were "The library spirit," "Some western phases of library work," "The library militant," and "The problem of public leisure."

Miss Edith Morley Smith, Training School class of 1904, has been appointed temporary registrar of the Training School.

ALUMNAE NOTES

Helen Lowther, class of 1912, was married March 7 to Mr. Ritchie Lowrie, Jr., of Pittsburgh, Pa.

Ruth Price, class of 1913, has resigned her position in the Reuben McMillan Free Library, Youngstown, Ohio, to accept the position of assistant in the children's room of the Wylie Avenue branch of the Carnegie Library of Pittsburgh.

CARNEGIE LIBRARY OF ATLANTA—LIBRARY SCHOOL

The first term of the course came to an end on Dec. 20.

During October the class perfected its organization as follows: president, May Smith, Athens, Ga.; vice-president, Rhea King, Atlanta, Ga.; secretary and treasurer, Annie Jungermann, Columbus, Ga.; editor, Mattie Lou Worsham, Forsyth, Ga.; assistant editor, Kathleen Hines, Calhoun, Ga.

The announcement of the election of officers was made at a Hallowe'en party given Oct. 31 in the class room by the Graduates' Association to the class of 1913-1914.

On Nov. 20 Mr. George Utley lectured to the class on the "History and purpose of the American Library Association."

On Dec. 19, in the class room, the students gave a Christmas party in honor of the Graduates' Association and the staff of the library.

The second term began Jan. 5, 1914. During this term Mrs. Edna Lyman Scott, instructor in children's work and story-telling, will give her annual course. Her lectures will be scheduled each morning of the week March 16 to 21. On the afternoon of March 19 Mrs. Scott will give for the school a recital of selected stories. A number of outside guests will be invited to hear her on this occasion.

On March 30 Miss Mary W. Plummer, principal of the Library School of the New York Public Library, will arrive to give a series of lectures.

ALUMNI NOTES

Mabel Jones, 1912, resigned her position as assistant in the Carnegie Library of Atlanta

Dec. 1, 1913, to become head cataloger in the Public Library of Jacksonville, Fla.

Pauline Benson, 1908, for six years librarian at Langley, S. C., resigned that position Jan. 1, 1914, to become an assistant in the Carnegie Library of Atlanta.

Laura Hall, 1912, went in January to Huntsville, Tex., where she is engaged in cataloging the library of the Sam Houston Normal Institute.

Theresa Hood, 1911, on Jan. 1, 1914, accepted a position in Birmingham, Ala.

Amelia Whitaker, 1912, resigned her position as assistant in the Carnegie Library of Atlanta March 1. Miss Whitaker will be married at her home in Raleigh, N. C., on April 14 to Mr. Charles Trenholm MacClenaghan.

DELIA FOREACRE SNEED, *Principal*.

RIVERSIDE PUBLIC LIBRARY—WINTER SCHOOL

The first winter course of library instruction, extending from Jan. 19 to Feb. 28, at the Riverside (Cal.) Public Library, was very satisfactory to its promoters. Besides this winter class the library has conducted a summer class, beginning about the middle of July and running for six weeks. This summer class will probably be repeated the coming summer, but thereafter it will be dropped and all efforts concentrated on the winter school. The course in the latter will probably cover seven weeks instead of six, and may even be extended to eight weeks. There is floor space and equipment for a much larger class than the one attending this winter, and it is hoped next year to have a considerably larger attendance.

The following students successfully completed the winter course:

Adair, Marie, Redondo Beach, Cal.
 Baker, Mignon P., Canon City, Colo.
 Bean, Angia L., Bellingham, Wash.
 Clapperton, Julia A., San Bernardino, Cal.
 Claytor, Vivian E., Roanoke, Va.
 Conrad, Nellie L., Fenton, Mich.
 Crawford, Gwendolen S., Freeport, Ill.
 Daniels, Esther, Riverside, Cal.
 Dickson, Lillian L., Riverside, Cal.
 Gillespie, Maud E., Redondo Beach, Cal.
 Goold, Eugenia, La Mesa, Cal.
 Grimm, Harriet H., Pasadena, Cal.
 Ingrim, Margaret R., Kansas City, Mo.
 La Rue, Viva G., Hemet, Cal.
 Speer, Alberta, Azusa, Cal.
 West, Eva, Greenfield, Iowa.
 Willard, Madeline D., Corona, Cal.
 Grover, Mrs. Mabelle C., Santa Cruz, Cal.

CHAUTAUQUA LIBRARY SCHOOL

The fourteenth annual session of the Chautauqua Library School will be held July 4-August 15. Dr. Melvil Dewey will be general director of the school. Mary E. Downey will be resident director. Sabra W. Vought, of Allegheny College Library, and Sabra E. Stevens, of University of Illinois Library, will be general instructors.

The course of study is general, and is designed for librarians and library assistants who cannot leave their work for the extended course offered in the regular library schools, but who can get leave of absence for six weeks of study to gain a broader conception of their work and a general understanding of modern methods and ideals. This course, especially planned to accomplish the most possible in six weeks, is as follows:

Library administration: The course in library administration includes thirty lectures on the following subjects: Evolution of the library, Library training, Noted library workers, Library commissions, Developing a library, Reorganizing a library, The library trustee, The library staff, Reading of the librarian, Values in library work, Simplifying routine work, Library building and furnishing, Care of building and grounds, The maintenance fund, Library supplies, Book selection and buying, Preparing books for the shelves, Uses of periodicals, Special collections, Work with children, How to use a library, Picture bulletins, Advertising a library, Local library extension, Township and county libraries, Library reports and statistics. Miss Downey.

Cataloging: Eighteen lectures with practice work in cataloging 100 books from selected lists, illustrating the salient points of a dictionary catalog for a popular library. The revised cards are filed by the students and furnished with guides, thus making for each a sample catalog for 100 books. Lecture and practice work are also given on the use of Library of Congress cards. Each student orders from the Library of Congress the cards for ten books. These are filled out and filed with the practice catalogs. Miss Vought.

Classification: Twelve lectures in the use of the Decimal classification, with practice work in assigning numbers to about 200 books, which present problems usually met in a popular library. The assigning of headings for a dictionary catalog is taken up in connection with the classification. Miss Vought.

Bibliography: Lectures are given on the

national, trade and special subject bibliographies in most general use. Miss Stevens.

Accession: Each student accessions a number of books, and retains the sheets after revision. The subjects relating to this department are taken up with lectures and practice in the detail work. Miss Stevens.

Shelf-list: Special lectures in shelf-listing, with practice work. Miss Stevens.

Loan systems: General principles of loan systems are taught. Students receive printed outlines of typical systems, which are discussed with special instructions in those most used. Miss Stevens.

Reference work: The course includes 18 lessons in the use of reference books. Questions are given out on which the students report answers with the sources of information, which are compared and discussed. The Patterson library is used for laboratory work. Miss Stevens.

Book binding and mending: Lectures outlining the process of binding a book. The class visits the Arts and crafts department. Samples of binding materials are shown, with explanation as to strength, durability, appearance and cost. Samples of mending materials and tools are exhibited, with practical suggestions on mending books. Miss Stevens.

The work of the staff is supplemented by special lectures from time to time, and by the regular Chautauqua program, which offers during the whole six weeks of the school a series of lectures, concerts, readings, discussions and other entertainments and facilities that have made a reputation elsewhere unequalled. Many of the great leaders of American thought speak from its platform, and not a few of the strongest men and women of other countries. The whole atmosphere of the place cannot be surpassed as a six weeks' home for the average librarian or assistant, who will profit greatly by this unique Chautauqua life.

The Chautauqua and Westfield libraries and books from the New York traveling library are used for reference and practical work. Visits are made to the Buffalo, Niagara Falls, and Jamestown libraries and to the Art Metal Construction Company.

So fine a spirit of faithfulness, enthusiasm, and good fellowship prevails that much is accomplished in six weeks. Strenuous class work is supplemented by relaxation through the unsurpassed attractions which Chautauqua affords, and by occasional social festivities.

Many visiting librarians, trustees, and others

interested in library work attend special lectures and consult in regard to library matters, making this a very helpful part of the work.

The object of the course is to raise the standard of librarianship. It is open only to those who are already engaged in library work or have definite appointment to library positions. There are no entrance examinations, but no one is accepted who has not had a high school course or its equivalent. Experience in library work usually of not less than a year is essential to the understanding of the technical instruction given. No one is admitted to the class who has not previously filled out a registration blank and received the official matriculation card. The class is limited to the number that can be given satisfactory instruction and supervision.

Early application should be made to Mary E. Downey, Box 594, Columbus, Ohio.

INDIANA LIBRARY COMMISSION—SUMMER SCHOOL

The Public Library Commission of Indiana will hold the thirteenth session of its summer school at Hanover College, Hanover, Ind., June 24 to Aug. 6. The beautiful situation of Hanover on the bluffs along the Ohio river makes it an attractive place for a summer school. Besides the regular instruction in the elementary branches of library work given by members of the staff, a week of lectures by well-known workers is being arranged. Among those expected to address the school are Miss Mary E. Ahern, Mr. George B. Utley, and other prominent librarians. This week, devoted to outside lectures, will be generally attended by librarians of the state. The library visit of the school will be to Louisville, Ky., on the invitation of Mr. George T. Settle, the librarian. The number of applications for enrollment is already large, and it is expected that the school will be larger this year than in any previous year of its history.

Reviews

REVISTA de bibliografía chilena y extranjera. Publicada mensualmente por la sección de informaciones de la Biblioteca Nacional. Año 1, núm. 1, January, 1913. Santiago, 1913. 32 p. O.

This review was founded by the National Library of Chile to provide for Chileans a monthly survey of the literary production not only of their own country but of the rest of America and Europe. Books and pamphlets are to be announced and articles of value in pe-

riodicals and newspapers to be noted. The practical limitations of such an undertaking are obvious, and, in fact, the subject-matter of the first number is confined to South America and Latin Europe. Within this field intelligent work has been done. The review is divided into the following principal sections: (1) Chilean literature; (2) American, *i. e.*, South American literature; (3) European literature; (4) Special reference lists; (5) National Library news, and (6) Correspondence. The indexing of special articles in newspapers is a feature that might usefully be imitated in our own country. The omission of North American literature seems unfortunate at a time when the free interchange of truthful information between North and South America should be promoted by all social agencies; but this may have been due to circumstance rather than plan. On the whole, as the first periodical of its kind in South America the *Revista* is a welcome addition to the bibliographical field.

W. N. S.

Librarians

Recent changes in the staff of the circulation department of the New York Public Library have been as follows:

Miss F. H. Fuller, office of the chief, resigned.

Mr. F. B. Spaulding transferred from the Yorkville branch to the office of the chief.

Miss A. F. Muzzy, appointed in charge of the Yorkville branch.

Miss F. L. Westover, transferred from the Webster branch to the Yorkville branch as first assistant.

Miss G. J. Ackley, formerly of the Chicago Public Library, appointed first assistant at the new Fort Washington branch.

Miss G. I. White, formerly of the Hartford (Conn.) Public Library, appointed to the staff of the Woodstock branch.

Miss A. F. Farren, transferred as children's librarian from the Melrose to the Woodstock branch.

The following appointments have been made to the staff of the Birmingham (Ala.) Public Library within the last few weeks:

Miss Theresa B. Hood, a graduate of the Atlanta School, and formerly assistant in the New York Public Library, has become librarian of the East Lake branch.

Miss Emily Van Dorn Miller, New York State Library School 1910-11, recently an assistant

in the Minneapolis Public Library, has been made reference librarian.

Miss Fannie Partlow, of Birmingham, has been appointed general assistant, and Miss Winnie Torgerson, of Birmingham, stenographer and general assistant.

Recent staff changes in the Columbia University Library are as follows:

Miss Grace B. McCartney has resigned to become chief of the order department in the Rochester (N. Y.) Public Library.

Miss Isabel S. Monro has accepted a position in the catalog department of the New York Public Library.

Miss Mary A. Cook, A.B., of the University of Wisconsin Library, has returned to Columbia University Library as first assistant in the order department.

The friends of Miss Lutie E. Stearns, who was one of the principal speakers at the Atlantic City conference, will be grieved to hear that she received a telegram the Sunday following the close of the conference, announcing the sudden death of her sister, after an illness of less than a day. This bereavement was followed in a very short time by the death of her aged mother, constituting a double loss, in which Miss Stearns has the sincere sympathy of all who know her.

BRAGG, Clara, for two years librarian at the Davenport Library of Bath, N. Y., has resigned because of ill health, the resignation to take effect April 1.

BROWN, Carrie R., was appointed to the staff of the Fall River (Mass.) Public Library in February.

CADWALADER, John L., president of the board of trustees of the New York Public Library, died at his home March 11. Mr. Cadwalader was a trustee of the old Astor Library from 1879, and it was he who brought about the consolidation of that library with the Lenox Library and the Tilden Trust, and who induced the city to build the Fifth Avenue building for the use of the library.

CLARK, Mazelle, has been appointed an assistant in the Public Library at Fall River, Mass.

COAN, Mrs. Flora Cutler, has begun her work as supervisor of the children's department of the Waterloo (Ia.) Public Library.

ELLIS, Victoria, for ten years librarian of the Public Library at Long Beach, Cal., has resigned, her resignation taking effect March 31.

FLEMMING, Pauline, has been appointed assistant librarian of the West Hoboken (N. J.) Public Library, to have charge of the public school libraries and the children's room.

HOLDEN, Dr. Edward Singleton, librarian at the United States Military Academy at West Point, died March 16 after an illness of some years duration. He was 68 years old. Dr. Holden was graduated at the United States Military Academy in the class of 1870. In March, 1873, he resigned from the army to be professor of mathematics and astronomy at the Naval Observatory in Washington. From 1881 till 1885 he was director of the Washburn Observatory and professor of astronomy in the University of Wisconsin. He was president of the University of California from 1885 till 1888; director of the Lick Observatory, 1888 to 1898. In July, 1902, he became librarian at the United States Military Academy. His discoveries and his writings brought him recognition from many European scientific bodies. Denmark made him a Knight of the Order of Danebrog, and Germany made him a Knight Commander of the Ernestine Order of Saxony. Among Dr. Holden's published works are "Bastion system of fortifications," "Life of Sir William Herschel," "Writings of Sir William Herschel," "Astronomy," "Briefer astronomy," "Mountain observatories," "Earth and sky," "Our country's flag," "Family of the sun," "Essays in Astronomy." "Stories of the great astronomers," "Real things in nature," and "The sciences." He was an honorary member of the Royal Astronomical Society of London, the Astronomical Society of France, and the Italian Spectroscopic Society, and belonged to the National Academy of Sciences.

ISOM, Mary Frances, librarian of the Multnomah County Public Library in Portland, Ore., has started on a seven months' European trip. During her absence Miss M. Louise Hunt, assistant librarian, will be in charge.

KENNEDY, Katherine L., has recently been added to the staff of the Fall River (Mass.) Public Library.

LANSING, Cora, librarian at the Carnegie Library in Neenah, Wis., for the past ten years, has resigned her position to accept a position in the same capacity at Wausau.

LUCHT, Julius, Pratt Institute, class of 1909, has been made librarian of the University Club Library of Chicago.

NETHERTON, Geneva, has been appointed an assistant in the Parkland branch of the Louisville Public Library.

NORTON, Frank H., who in his younger

days was librarian of the Lafayette Library in Astor Place, New York City, for twelve years, committed suicide in his apartment in New York March 10.

PALTSITS, Victor Hugo, has been appointed editor of manuscripts in the New York Public Library, beginning Sept. 1. Mr. Paltsits was on the staff of the old Lenox Library from 1888 until 1907, when he resigned to accept the position of state historian at Albany, which position he held until 1911. He edited the Pote Journal (1896), several Indian "captivities," served as bibliographical adviser for the "Jesuit relations and allied documents" (1896-1901), and is the author of several works on American history and bibliography. He is also chairman of the Public Archives Commission of the American Historical Association.

PEARSON, Edmund Lester, has been appointed editor of publications in the New York Public Library, beginning May 1. Mr. Pearson is a B.A. of Harvard University, class of 1902, and a graduate of the New York State Library School, 1904. He was reference librarian and later assistant librarian of the Public Library of the District of Columbia, assistant in the copyright division of the Library of Congress, 1906, and acting librarian of the U. S. Military Division Library, Washington, 1907; and since 1906 has conducted "The Librarian" department in the Boston *Evening Transcript*. He is also a trustee of the Public Library of his home town, Newburyport, Mass. Mr. Pearson is well known to librarians as the author of "The old librarian's almanack" (1909), "The library and the librarian" (1910), "The librarian at play" (1911), and "The believing years" (1911), as well as of numerous magazine articles.

SETTLE, George T., librarian of the Louisville (Ky.) Free Public Library, gave a talk on "Book knowledge" before the young men's efficiency class of one of the Louisville churches March 15.

WHITBECK, Mrs. Alice G., has resigned her position as librarian of the Richmond (Cal.) Public Library, to become county librarian of the Contra Costa Free Public Library. Miss Della Wilsey, of Pratt Institute School of Library Science, has been appointed her successor.

WINSHIP, George Parker, librarian of the John Carter Brown Library of Brown University, of Providence, recently gave an address on the founding and early history of the university before the Rhode Island Historical Society.

THE LIBRARY WORLD

New England

MAINE

Corinna. Cataloging of the private collection of books bequeathed by Levi M. Stewart, of Minneapolis, to the public library at his birthplace in Corinna, Me., will be completed in a month and then a catalog will be printed, according to J. H. Winchester, a nephew of Mr. Stewart, who is the librarian. The Stewart library contained many fine books, including a valuable Napoleon collection.

Friendship. William De Lancey Howe, a lawyer of Boston, has lent the town of Friendship 49 new books to start a public library. Since then 50 other books have been lent by Dr. and Mrs. F. W. Jackson, of Jefferson. Mr. Howe has recently purchased a summer home here and is interested in the town. A store has given room to house the books temporarily.

VERMONT

The Vermont Free Public Library Commission has acquired several new collections of books recently. Four new farmers' libraries have been purchased, each collection including 45 books, 20 of them on agriculture and the other 25 general literature for both adults and children. Two new general libraries have been added, and two new school libraries to be sent out to the district schools are a part of the additions.

MASSACHUSETTS

Boston. The Public Library has opened a reading room at 396 Dorchester street, South Boston, to be known as the Andrew Square reading room. A reading room in the former Brooks street chapel, Faneuil, has also been opened. Both branches have been equipped with a collection of 1500 books, and 15 periodicals will be taken regularly. Daily delivery from the central library will be made to both branches. Miss Gertrude L. Connelle, who was an assistant at the Brighton branch, has been placed in charge of the Faneuil branch.

Boston. The Public Library has received a fine set of photographs, framed, and many of them colored, of views of the mountains in the Austrian Tyrol. The photographs are a gift from Josiah H. Benton, president of the board of trustees.

Boston. State L. Charles F. D. Belden, lbn. (4th annual rpt.—yr. ending Nov. 30, 1913.) Accessions 4942 books and 5515 pamphlets; total number of books in library 172,692, pamphlets 150,862. Appropriation, exclusive of librarian's salary, \$23,510.

The State Library is eighty-seven years old, but the movement from which it resulted began over a century ago. The trustees' report in the present report gives a historical summary of the beginnings of the library and a statement of its scope. The trustees urge a special appropriation for the immediate purchase of statute laws and legislative reports of other states and countries needed to make the library complete and effective. In the librarian's report the legislative reference work of the library and the coöperative relations maintained with other libraries are described. For lack of sufficient help the clerical work has fallen behind in many lines since the opening of the legislative reference rooms in 1910, some lines of work having been abandoned completely since that time. An appendix contains additional notes and extracts from the statutes relating to state library legislation and the development of the library.

Cambridge. The Harvard University Library has acquired 420 volumes of the *Diazo-kyo*, the great collection of Chinese and Japanese Buddhist Scriptures. The volumes were brought to Harvard through the efforts of Professor Anesaki, who occupies the chair in Japanese philosophy at Cambridge and is the first scholar of his race to be so honored in America. The books, which are from the Association Concordia of Tokio, Japan, have been placed in Wadsworth House, along with numerous other works brought to Harvard by Professor Anesaki in connection with his courses.

Cambridge. After a year's investigation the Harvard commission on western history has reported that ample material for the study of the development of western transportation and other questions may be obtained, and points out the fact that the new Widener library would be an excellent depository for it. The *Alumni Bulletin* says: "The result of the year's work shows, first, that there is no lack of original material to be secured; and second, that it is very difficult to interest the average business or professional man in preserving,

as historical material, private papers and letters which to him seem to have only a family meaning and importance. The commission is interested mainly in getting together material relating to western history, and a vast deal of this material lies in the desks and attics of the down East states."

New Bedford. The income from the Howland trust fund, on which the city has been paying 6 per cent., will in the future be reduced from \$3000 to \$2000. This fund has been used for public lectures and the purchase of books, and the reduction will curtail the work of the library along these lines.

North Adams P. L. Mabel Temple, lbn. (30th annual rpt.—yr. ending Nov. 30, 1913.) Accessions 2040; total number of volumes in library 35,239. Circulation 100,484. New registration 608; total number of borrowers 7302. Expenses \$7346.08.

"The circulation of books in foreign languages was 1956, classified as follows: French, 1404; Italian, 392; Yiddish, 160. For the first time it is possible to report the circulation of Yiddish literature. Seldom has an amount of money brought in such large returns as the small sum invested in Yiddish books. They made new friends right away. They were advertised through the evening schools and by the Jewish boys and girls. The library not only circulated a large number of volumes, but it was also a 'social center.' Sometimes there were meetings of three or four different societies at the same time in the building. Among such societies were several of the women's clubs, the Bird Club, the Child Welfare and District Nurse Associations, the Hospital Board, and in the spring a teachers' meeting of the neighboring town of Clarksburg."

Somerville. The trustees of the Somerville Public Library have furnished, at their personal expense, the staff rooms of the new building with upholstered couch and belongings, rug, napery, china, silver, and glass for a dozen covers, and kitchen ware, as an expression of their appreciation of the personal interest taken by the staff in the work of the library.

Worcester. Three Carnegie branches of the Public Library were opened Feb. 23, 24, and 25. The first was the Quinsigamond branch, the second at South Worcester, and the third in Greendale. At each of them Judge F. H. Chamberlain, chairman of the library trustees, presided, and there were brief addresses by

Librarian Robert K. Shaw and other men of prominence in the community. Miss Madeline M. Bell will be in charge of the Quinsigamond branch, Miss Ella S. Sinnott at South Worcester, and Miss Katherine E. Cook at Greendale. These branches will be open every afternoon and evening till 9 o'clock, except Sunday, when the hours will be from 2.30 to 6 in the afternoon.

RHODE ISLAND

Providence. The last week of February the first shipment of freight direct from this city to Europe was made. The act suggested an opportunity for helpfulness on the part of the public library, which printed in the *Providence Journal* an admirable reading list of some of the books in the library of use to the exporter, presenting the salient features of each.

Providence. Plans are being made for the establishment of a municipal library and reference bureau. It is suggested that literature on municipal matters be placed in the Chamber of Commerce Building, while the library for research work could be located in the Providence Public Library. The Chamber of Commerce has agreed to give the space in its building for a reference bureau. In the mayor's library in the city hall there are over 500 volumes which have never been cataloged. It is proposed to ask the city council to loan these books to the library and to have them properly cataloged. A small appropriation will probably be asked from the city council to provide for the work.

CONNECTICUT

Bridgeport. A small library of about 150 volumes has been placed in the county jail.

New Haven. The Public Library has made arrangements with the Connecticut State Library so that hereafter the library will receive current legislative material weekly. The *Legislative Bulletin*, reports of committees and bills, as well as all other printed matter issued by the state, will be available for reference.

New London. At the annual banquet of the Harvard Club of Connecticut, held Feb. 13, President Frederick H. Sykes, of Connecticut College for Women, made the announcement that the librarian of Yale had offered to present the new institution copies of every duplicate book in the college library. President Sykes had of course accepted the offer, which means a gift of thousands of volumes of the most valuable character. Just

how many books will be embraced in the splendid donation cannot be determined until the Yale library has been thoroughly gone over by the librarian and Dr. Sykes, but that they will be a notable acquisition is certain.

Middle Atlantic

NEW YORK

A bill has been introduced at Albany inserting in the public health law a new section (332-a), requiring officers in charge of every public library or school library to disinfect each book circulated immediately upon its return. A \$50 fine is provided for each violation.

Brooklyn P. L. Frank P. Hill, lbn. (16th annual rpt.—1913.) Accessions 81,107, only 6177 being new titles; total number of volumes in library 742,133. Circulation 4,583,897. New registration 6565; total registration 301,100 (population 1,634,351).

Expenses for books, periodicals and binding were \$126,560, the average cost per volume for all books being \$1.17, a slight increase in cost due to the purchase of more books in special bindings.

No new branches were opened during the year and no additions made to the old ones, but plans for the last three Carnegie buildings were adopted and work was begun on two of them, at Stone and Dumont streets and at Eastern Parkway and Schenectady avenue. The absence of a central library has led residents of the different sections of the city to look upon the branch in their midst as "the library," and they will continue to do so until the central building is completed.

In 1912 the New York Public Library reduced the hours of labor from forty-two to forty and required that an hour be taken for lunch and supper. After an investigation of conditions in Brooklyn the same rules were put into effect here on March 31. At first a few branch librarians had misgivings for fear the routine work could not be carried on the shortened schedule. Nine months' trial converted the most sceptical. Not only was work done, but it was better done, while the health of members of the staff was improved to a marked degree.

In the children's department the home circulation of books was 1,661,486, while in the department of traveling libraries notable advance was made. The records show that 1374 libraries, including those renewed, were issued

during the year, an increase of 35 per cent. over 1912; excluding those renewed, the number of libraries sent out to borrowers is 1156, as compared with 840 for 1912. In the 1374 libraries issued, 67,467 volumes were contained, and the total use made of them, both in the building of the organization and at home, amounted to 180,929, an increase of 32,988 over 1912. The records show, furthermore, that 69 new organizations were registered in 1913, and that at the close of the year 334 libraries were out on loan to 245 different organizations and institutions, the highest mark yet reached by the department. A lack of trained workers prevented the establishment of any additional factory stations, though opportunity was presented. Five steamships engaged chiefly in South American trade, with Brooklyn their home port, obtain books regularly for their officers and crews.

Flushing. William Elliman, a former resident, who founded the Flushing Public Library, died in New York City Feb. 21, aged 68.

Mohawk. The old Weller home has been converted into a library, and on March 12 was opened to the public.

New York City. Russell Sage Found. L. Frederick Warren Jenkins, lbn. (Rpt.—yr. ending Sept. 30, 1913.) Accessions 2037 volumes; approximate number of volumes 10,000; pamphlets 15,000. Circulation (for 10½ months) 29,034. Registration 878.

During the past year the libraries of the New York Charity Organization Society, the Association for Improving the Condition of the Poor, the New York School of Philanthropy, and the Russell Sage Foundation have been merged in the present library and are housed in the new building at Lexington avenue and 22d street. The library is open to the public on presentation of proper credentials. Library bulletins formerly issued by the New York School of Philanthropy will be issued as regular Russell Sage Foundation publications. During the past year the entire collection has been reclassified and recataloged, the Dewey system, with some modifications, being used.

New York City. Arrangements have been made by the New York Public Library for the establishment of a traveling library deposit station in Room 108A, Columbia University Library. The station will be for the use of all members of the university, and books may be borrowed for home use.

New York City. The plans of Arnold Brunner have been accepted by the library committee of the College of the City of New York for the proposed library, which is to stand on the site bounded by 140th street, 141st street and Convent avenue east. The city has given the land and \$100,000 for the purpose of improving the field and building an esplanade roof. The Associated Alumni is collecting the other \$150,000. Already \$90,000 has been raised.

New York City. The Board of Estimate adopted March 6 a resolution of the controller authorizing the New York Public Library to assume the management of the Municipal Reference Library, and to operate it as a branch in the Municipal Building. The board also approved the following salaries for the year 1914: librarian, \$3500; first assistant librarian, \$2400; cataloger, \$1200; stenographer, \$800; and two clerks at \$300 each.

Ossining. The Public Library presented to this village by Andrew Carnegie was dedicated March 4. Addresses were made by the Rev. James A. McWilliams and the Rev. Dr. T. H. Baragwanath. A letter from Mr. Carnegie was read, and Miss Helena M. Foster gave a historical sketch of the library. A musical program was given by Miss Ethel Jackson, Miss Adelaide Wills and Miss Elizabeth Fisher. The building cost \$26,000, and is erected on a site purchased for \$17,000.

Syracuse. The tentative appropriation of \$40,000 for the Public Library has been increased to \$45,000 by the Board of Estimate and Apportionment after a committee representing the library had taken the matter up with Mayor Will. The members of the committee argued that, by law, the library was entitled to an appropriation equal to 2 per cent. of the aggregate tax levy, or a sum equal to approximately \$50,000. In the past the library has never received the full appropriation to which it is entitled by the law. The members of the board intended to cut the appropriation still lower this year.

Theresa. The trustees of the Public Library plan to bring the library to the outlying districts of the township. District librarians will be appointed in the different neighborhoods. The first library sub-station will be at West Theresa, with C. J. Rappole in charge.

NEW JERSEY

Hawthorne. Papers of incorporation of the Hawthorne Public Library, Incorporated, have been filed in the office of the county clerk.

Hoboken. An appropriation of \$5000 has been granted the Public Library to erect steel book stacks.

Jersey City. A banquet in commemoration of the twenty-fifth anniversary of the founding of the Free Public Library of Jersey City was tendered to the trustees by President Nelson J. H. Edge Feb. 17.

Paterson F. P. L. G. F. Winchester, lbn. (28th annual rpt.—yr. ending June 30, 1913.) Accessions 6340; total number of volumes in library 54,087. Circulation 238,706. New registration 8566; total registration 22,284. Receipts \$29,910.02; expenses \$29,900.46, including salaries \$12,523.96, and books \$5177.46.

A new branch was opened at Riverside with 3100 volumes, and it is desired before long to open another branch in the southern part of the city. The library board is urged to take the initiative in the formation of a historical society, one of the chief objects of which should be to secure the publication of a brief but authoritative history of Paterson. Nearly all salaries have been increased during the year. During this year the library regained its old place as third among the public libraries of New Jersey, a position lost when it was destroyed by fire in 1902.

Roselle. At the regular meeting of the Clio Club, Feb. 25, the members voted to give their library of about 1600 books to the Public Library of Roselle, which was to be organized March 13.

Trenton. One hundred and fifty friends of Henry C. Buchanan, the retired state librarian, gave him a dinner March 7. The occasion was the sixty-third birthday anniversary of Mr. Buchanan.

Washington. The Washington Public Library Association has leased the storeroom in Mrs. B. J. Morgan's building in East Washington avenue, and it is expected to have the library ready for use early in April. About \$400 has been pledged to the association, and aid will be asked of the Common Council, which has power to contribute up to \$300 without a vote of the people. Donations of tables and chairs have been asked.

PENNSYLVANIA

Germantown. Friends' F. L. Hannah M. Jones, lbn. (Rpt.—1912-13.) Accessions 705; total number of books in library 28,118. Circulation 16,305. New registration 411. Number of visitors to library 24,252. Receipts

\$6425.94; expenses \$2257.38, including \$1720.08 for salaries, \$1292.24 for books and periodicals, and \$192.10 for binding.

Hazleton. Addresses outlining the use of the Hazleton Public Library and telling of the advantages to be gained thereby have been delivered daily during the past month in the schools of the township and the city of Hazleton by Miss Alice Willigerod, the chief librarian.

Lancaster. By the will of the late James D. Landis, one of the proprietors of the *New Era*, the sum of \$2500 is left to the Smith Memorial Library, of which he was a trustee, to be payable upon the death of his wife.

Oil City. An unknown donor has given \$120 to purchase books in memory of Mr. Condrin, late president of the Oil City Library Association.

Philadelphia. The site of the new Central branch of the Free Public Library has been selected on the west side of Logan square, west of Nineteenth street, and plans for the building are in preparation.

Philadelphia. Library Company of Philadelphia. (Rpt.—yr. ending Apr. 16, 1913.) Accessions 2528; total number of books in library 240,205. Circulation 32,972. Total attendance of members and visitors 57,805. Receipts \$43,020.85 expenses \$41,769.80, including salaries \$18,692.20, books \$5241.61, and binding \$957.15.

Pittsburgh. The Municipal Reference Library, which is in charge of the city's Bureau of Publicity, has issued its first bulletin of the publications acquired. At present publications will be loaned from the library only upon receipt signed by the mayor, a department head, a bureau superintendent, a member of council, or one of the city clerks. Any city official or employe is welcome, however, to use the library in its office, room 1330, Henry W. Oliver Building.

Reading. A unanimous vote against the Sunday opening of the Reading Public Library was taken at a meeting of St. Peter's Methodist Episcopal Brotherhood in March. It was stated informally that the library trustees are seeking a test of public sentiment on the question of library opening on Sunday. All present voted against the plan suggested recently by a municipal research expert on the general grounds that the Sabbath should be reserved for religious activities, and that

secular attractions, even for educational purposes, could not be endorsed by the brotherhood.

Scranton P. L. Henry J. Carr, lbn. (23d annual rpt.—1913.) Net accessions 1130; total number of volumes in library 72,553. Circulation 130,026. Total registration 10,755. Receipts \$20,713.44; expenses \$18,945.28, including \$8144.30 for salaries, \$1763.55 for books, and \$1672.71 for binding.

Swarthmore. Plans are being drawn by Edward L. Tilton, of New York City, for the two-story library building to be erected at Swarthmore College.

Wilkes-Barré. The will of Charles E. Dana, of Philadelphia, provides that all his books and all photographs and prints not otherwise provided for, shall be given to the Osterhout Free Library.

MARYLAND

Baltimore. Peabody Institute L. John Parker, acting lbn. (46th annual rpt.—yr. ending May 31, 1913.) Total number of volumes in library 178,099, 27,793 pamphlets, and 1437 maps. Circulation 90,874. Expenses \$23,466.18, including \$12,685.49 for salaries, \$8646.36 for books, etc., and \$1352.40 for binding.

During the year the books on the shelves have been rearranged according to the decimal system in place of the fixed location formerly in use. A beginning was also made of the consolidation of the existing card catalog and two printed catalogs into one card catalog, using Library of Congress cards as far as possible.

Frederick. An active campaign is being carried on in Frederick and surrounding towns to secure funds for the establishment of a public library. The library is intended for the use of the whole county.

DISTRICT OF COLUMBIA

A bill was introduced in the Senate in February to regulate the use of public school buildings and grounds in the District of Columbia, and providing for their use, among other purposes, as free public library branches, during the school year as well as during vacation, under such regulations as the board of education may provide.

Georgetown. Georgetown University will receive \$10,000 for a library, under the terms of the will of the late Julian Reich, of Tryon, N. C.

Washington. Jacob H. Schiff, the New York banker, has made a second notable gift to the Library of Congress. It is to supplement the one made by him in 1912, consisting of a collection of Jewish books comprising 10,000 volumes. This collection, like the first, was brought together by Ephraim Deinarda, a collector in Europe and in Palestine. It contains more than 4000 volumes, touching every field of Jewish thought and learning, religious and secular, extending over many centuries. It includes Bibles with their commentaries and supercommentaries, Mishnah and Talmud, with their commentaries; Milrash, codes of law, sermons, liturgy, philosophy, philology, scientific works, history, geography and belles lettres in general. The collection includes more than 100 manuscripts, many bearing early dates, as well as several "incunabula" (fifteenth century books) of importance. There is also an excellent collection of Jewish melodies and songs with notes and a fine collection of books and periodicals printed in Palestine. Of especial note is the extensive representation of the products of modern Jewish literature.

The South

NORTH CAROLINA

Greensboro. The Public Library has received a bequest from the late. Pendleton King of 5000 volumes, besides pictures, statuary, etc. The will provides that the books shall be kept in a separate collection.

ALABAMA

Birmingham. A book fund campaign will be started April 27 to continue until May 2.

Huntsville. The city commissioners have passed a resolution to appropriate \$1500 annually for the maintenance of a Carnegie Library, which will be erected on a lot at the corner of Gates and Madison streets, to be donated by the city of Huntsville. The library building will cost \$15,000. The city has had the library proposition under consideration a long time, but never before have the commissioners seen their way clear to appropriate enough for maintaining the institution.

GEORGIA

Monroe. The suggestion has been made that the old First Baptist church be moved to some convenient lot and converted into a town library, and the suggestion is meeting with considerable favor among the people.

KENTUCKY

Louisville. Names of the 175 donors to the Portland branch library, completed about three months ago, will be placed upon a wall at that library in the near future.

TENNESSEE

Chattanooga. The board of directors of the Carnegie Library, or a committee of censors appointed by them, will hereafter pass on all moving pictures exhibited in Chattanooga and all vaudeville acts shown in moving picture houses. Later their censorship may extend to the other theaters.

Central West

OHIO

Cincinnati. The trustees of the Public Library are taking active steps to secure a new main building. They want a modern structure that will be adequate to the needs of the institution. In the past ten years branches have been built in Walnut Hills, Corryville, Cumminsville, Price Hill, Norwood, Avondale and Hyde Park. In addition libraries are being maintained in leased quarters in Madisonville, Camp Washington, Pleasant Ridge, Harrison, Lockland, Wyoming, Elmwood and other places, and a branch library is soon to be built at the foot of Price Hill. But in the main building the work has grown steadily while quarters have become more and more cramped. More than 20,000 volumes that are but seldom used are stored in a building in the rear of the Dayton street branch, with 20,000 more in the basement on Vine street, while newspaper and periodical files are in the attic.

Dayton. The new East Side Carnegie branch library was opened to the public Feb. 27. In the afternoon story hours were held for the children, and in the evening a program was arranged for adults, with music and speeches, after which the building was thrown open to inspection.

Lakewood. Formal announcement has been made of the recent gift from the Carnegie Corporation for a new public library for Lakewood.

Youngstown. Several thousand dollars paid to Mahoning County Law Library in the past few years by the criminal court should have been turned into the county general fund, according to a recent ruling from the attorney general. The municipal clerk is freed from

all responsibilities, as the attorney general mentioned several similar cases in other cities where courts, as here, distributed the funds under advisement of attorneys. The ruling is a result of investigation of a similar occurrence in Lorain, which also has a criminal court. The attorney general advised that a criminal court is not a police court or a probate court, which are required to turn the amount of fines and penalties for misdemeanors into the library fund. It is now the duty of county officials to collect the money from the law library. The last report shows the library received unrightfully from municipal court \$2731.80 from Dec. 9, 1912, to Oct. 18, 1913. This practice has been in vogue since 1910. When this practice was first taken up the library fund only received 15 per cent. of the total.

ILLINOIS

The State Library has been having considerable trouble with its assistants. Secretary of State Harry Woods, who is *ex-officio* state librarian, decided that the State Library needed reclassification and recataloging. In carrying out this work, it was found necessary to employ more trained, experienced people than were on the staff. Therefore certain assistants were dismissed and others appointed. One of these assistants, Mrs. Estelle Baird, appealed to the civil service commission, under whose authority all library positions come. The commission ordered her reinstatement, upon which Mr. Woods preferred charges of incompetency and neglect of duty. After an investigation covering several weeks, Mrs. Baird was reinstated, and back pay was allowed her for the period of suspension. In view of the fact that no standards for the judging of competency existed in the library service, an examination was held by the commission March 21, which all employes were compelled to take.

Carmi. Andrew Carnegie has expressed willingness to donate \$10,000 for a public library for this city, on condition that a lot be purchased and arrangements made by the city for the upkeep of the building. The council has voted to use \$1000 of the city's money for maintaining the library.

Chicago. The great progress made in the work of the Chicago Public Library during the last five years is thus summed up by Henry E. Legler in his report for 1913:

"Lacking funds with which to undertake extensive extension of service, the policy of

utilizing every available opportunity through coöperation with park boards, school authorities, settlements, and institutions generally has been vigorously followed. It has thus been possible to increase the home circulation nearly 90 per cent. in five years, with corresponding gain in work with schools and general reference work, as well as in other lines of library activity. Five years ago the library possessed one branch; this year ends with twenty-six in operation. Five years ago the number of public reading rooms was 15; the reading rooms now number 26, not including those in business houses, nor four in the main building. Five years ago there were no class room libraries sent into schools, and the school use was represented by 606 issues. Last year the class room libraries numbered 342, and the total issue was 112,992 volumes. Five years ago the cardholders numbered 96,708; the number now is 154,127. Five years ago the total home use of books was 1,601,645; last year it had grown to 3,037,035."

Urbana. A \$40,000 Carnegie library is assured the city of Urbana as a result of a vote authorizing a bond issue of \$10,000. Frederick E. Eubeling, long a director, left \$10,000 for a building, and William B. McKinley, of Champaign, also contributed. Urbana was assured a library from the Carnegie fund some years ago, but until the present has not been able to comply with the provision regarding income. The Carnegie Corporation has been notified that all requirements have now been met.

MICHIGAN

Owosso. The Owosso Improvement Association has practically abandoned the idea of having the new Carnegie Library ready to be turned over to the commissioners of the city when they assume office in April. Work has been delayed to such an extent that very little of the interior work is completed. The contractors have until June 1 to complete the building, and it is evident that it will not be ready much before that date.

The North West

WISCONSIN

Madison. An Irish library which will contain a collection of books relating to Ireland will be established in connection with the state historic library. A fund of \$500 has already been obtained.

Madison. The University Extension Division announces that steps are being taken to provide a library of educational films to lend to schools and social centers throughout Wisconsin.

Sherman. The trustees of the Minerva Free Library of Sherman have received an offer amounting to the equivalent of \$6000 from Oliver W. Norton, of Chicago, who was the donor of the building in which the library is housed.

MINNESOTA

Duluth. Members of the Douglas county library board have outlined plans for a circulating library to be inaugurated in this county. At the annual meeting last November \$300 was appropriated to carry on the work. The county library will work in conjunction with the city library.

Minneapolis. In the proposal to be submitted by the state education commission for a central board of education to supervise most of the state's public educational activities, the high school board, the normal school board, and the state library commission would be merged into one body, with all the powers of the three boards. The central board would consist of five members to be appointed by the governor.

St. Paul. A. B. Stickney, former head of the Chicago Great Western railroad, has given his entire office library of more than 1800 volumes to the St. Paul Public Library. The collection consists for the most part of volumes connected with railroad matters. Mr. Stickney's gift also includes a large number of reports of park commissioners in many American cities, collected during the course of his studies of the park question.

IOWA

Des Moines. Branch stations of the Des Moines Public Library will be established in East and West High Schools as soon as possible and at North High School next fall. Present plans are to place 400 or 500 books—fiction of the best class and reference works—in each high school each week, and the stations will be open Friday afternoon and evening, thus, since the high schools are open to the community Friday evenings, giving the entire neighborhood an opportunity to read the books. The branches probably will be under the supervision of Mrs. J. T. Rea, now in charge of the three grade school stations.

Fert Madison. Convicts at the state penitentiary here henceforth will be permitted to study the dictionary, read stories of travel, peruse history and biography, and enjoy carefully selected fiction. One thousand new books have been ordered for the penitentiary library.

NEBRASKA

College View. The Public Library was slightly damaged by fire March 4.

Shubert. The Women's Literary Club recently established a library here. At a recent "men's night" of the club the men in attendance made up a purse of \$100, which they presented to the club to be used for the benefit of the library.

The South West

MISSOURI

St. Louis. The city controller has been asked to include in the next appropriation for city funds \$1000 for the compilation of all ordinances pertaining to public utility corporations. The plan is to entrust the work of compiling the ordinances to Andrew L. Bostwick, the municipal reference librarian, for which he would be paid the \$1000. The expense of printing would be met by another appropriation.

St. Louis. Ben Altheimer, a member of the board of directors of the Public Library, has given the institution 210 copies of paintings by famous masters, and promised to provide about 300 additional pictures to be distributed among the central and branch libraries in the near future. Each portfolio contains a picture of the artist and a description of the paintings, written in German. The prints were made by the Art Association of Munich, Germany. The German text which explains each artist's works, prepared by eminent German writers, will be translated into English to give ampler opportunity to understand and appreciate the pictures, which will soon be placed on exhibition.

St. Louis. The St. Louis Public Library is exhibiting in its art room six of the best paintings from the city Art Museum. These paintings are changed every month or so, and include some of the museum's most interesting recent accessions, so that in the course of the year users of the library have an opportunity of seeing a considerable part of the additions to the museum collections. A series of talks to children on some of the pictures, by Direc-

tor Edmund Wuerpel, of the Washington University Art School, has been begun. The first of these, suggested by Larsen's "Swedish fairy tale," interested the children so much that the picture was temporarily hung in the children's room and was surrounded for days by interested groups, those who had attended the talk explaining the picture to their friends who had not had that privilege.

ARKANSAS

Little Rock. The Freedmen's Aid Society, whose headquarters are in Cincinnati, has appropriated \$18,000 for a library building for Little Rock College, a school for negroes.

Searcy. The Searcy Public Library has recently moved into commodious quarters in the new courthouse. The library is open each Sunday afternoon from 2.30 to 4.30 for the convenience of the men and boys of the city. Several hundred dollars have recently been secured through benefit socials, and the money has been invested in new books.

TEXAS

Ballinger. The Carnegie Library was opened to the public Feb. 24. The library will be in charge of Mrs. W. S. Fleming. Several hundred books have arrived.

Pacific Coast

CALIFORNIA

Auburn. A recent storm partially unroofed the public library building in this city, and it was with considerable difficulty and labor the volumes contained in the library were saved from damage or destruction.

Claremont. Pomona Coll. L. Victor E. Marriott, actg. lbn. (10th annual rpt.—yr. ending May 31, 1913.) Accessions 2863; total number of books in library 20,438. Expenses \$4946.35, including salaries \$1736.62, books and periodicals \$1782.29, binding \$340.80.

The Cook-Baker Biological Library, previously existing as a separate departmental library, was accessioned and made an integral part of the main library, adding about 1300 volumes.

Corning. Work on the building of the new Carnegie library in this city will be commenced early in the spring, and it is expected the building will be opened to the public next fall. The cost of the structure will be \$10,000, and the building will be of concrete.

Grass Valley. The City Library trustees have started active campaigning to secure a

Carnegie library for this city. The present city library is maintained by a 10-cent tax, the money derived from this levy being sufficient for the care and upkeep of a Carnegie building.

Los Angeles. The new Arroyo Seco branch library was formally opened to the public on Friday evening, Feb. 27. This branch is the second to be built from Mr. Andrew Carnegie's gift of \$210,000 to the city of Los Angeles for six branch libraries. The structure is an attractive one of classic design, built of artificial stone and dark brick, and is located on a triangular lot at the junction of Pasadena and Piedmont avenues, overlooking the Arroyo Seco. The site was donated by the residents of the district. The building consists of one story and basement. On the first floor are located the adult and juvenile reading rooms, librarian's office and staff room. Outside between the two reading rooms is the open air reading room. In the basement is an auditorium capable of seating two hundred. The building was erected at a cost of nearly \$35,000.

OREGON

Albany. Through the acquisition recently of several valuable old volumes regarding pioneer history the Albany Public Library now has what is said to be one of the best collections of works on Oregon in the state. Mrs. Viola Price Franklin, the librarian, has been making special effort to obtain books of this kind and has received several volumes as gifts from pioneer citizens of Albany, and also has bought a number of books with a fund recently provided by the Modern Travelers, a local club.

Woodburn. Word has been received from the Carnegie Corporation of New York that an appropriation of \$10,000 has been made for a suitable building to replace the frame structure now in use, providing the city furnishes the site and provides for upkeep and maintenance. This has been done by the city, and plans submitted to New York for approval of the Carnegie Corporation.

UTAH

Richmond. The Carnegie Library, which has been under construction for some time, is now completed, and the library committee at its last meeting declared Sept. 1, 1914, as the opening day. In the meantime the library will be equipped with shelving, furniture and books. The state library commission has been appealed to for assistance in this task.

Canada

Toronto. On March 2 the fourteenth branch of the public library was opened. This is the Beaches branch, and it is the result of a deputation which, nearly four years ago, came to the Public Library Board and asked for a Beaches branch to be established. This library will be open on Tuesday, Thursday and Saturday of each week from 2 to 6 o'clock and from 7 to 9 o'clock. Miss Nelson, of the Church Street Library, will be in charge, and already some hundreds of Beach residents have taken advantage of the day for registration.

Foreign

GREAT BRITAIN

Bolton P. L. Archibald Sparke, lbn. (60th annual rpt.—1912-13.) Accessions 4768; total number of volumes in libraries 133,525. Circulation 500,428, as compared with 508,484 the previous year. Total registration 32,439, as compared with 34,422 the previous year.

There are now in use two central library buildings; one, the Reference Library, in the original quarters in the old Exchange, and the Lending Library, in a separate building. Neither building was intended for library work, and the trustees now feel that a new central building is a necessity. Besides the two central buildings the library has six branches.

Dublin. *Nat. Library of Ireland.* T. W. Lyster, lbn. (Rpt.—yr. ending Mar. 31, 1913.) Accessions 4471; total number of volumes in library 108,000. Total number of readers 190,657, an average of 683 per day.

During the year the greater part of the European section has been cataloged on cards, the author catalog has been largely revised, and the main portion of the Dix collection of "Belfast printed books" has been cataloged. The "Bibliography of Irish philology and literature," on which work was begun in 1912, was published. Various improvements have been made in the building, giving temporary relief from the congestion existing in some departments, but it is felt that permanent relief can be obtained only by completing the building according to the original plan.

RUSSIA

The Russian library quarterly *Bibliotekar* [*Librarian*] has completed its second year. In the first six numbers are found many articles on individual libraries, reports of library congresses, and discussion of many questions of theory and practice in library work. In the

following paragraphs are given a brief outline of the contents of each number, showing the general character of the field the magazine is trying to cover.

No. 1, 1912 contains an article by N. Safronov on the Kiev Public Library, which was founded in February 1866. The progress made since its foundation is described in great detail. L. Chavkin takes the occasion of the 25th anniversary of the Charkov Public Library to give an account of its complete history. The library has grown from 1700 volumes in 1886 to 150,000 volumes at the present time. An article by P. Bogdanov outlines the plans proposed for discussion at the First Russian Library Congress, and an account is given of the discussion on library matters at an educational convention held at Moscow. In honor of the completion of his fortieth year of activity in the literary and educational world, an article describes his work in these fields. E. Heinz contributes reports of the German and Swiss conventions of librarians.

The second issue gives an account of the Odessa Public Library, founded in 1830. This library now contains 175,000 volumes, and at the present rate of increase it will soon have 300,000 volumes on its shelves. The cost of the new building was \$239,000. E. Vetchinkin discusses in detail the "inventory system" of cataloging. A. Voynich-Syanozhetsky takes up the question of the disinfection of books, mainly discussing an investigation by Drs. F. Charitonov and M. Trigubenko. P. Bogdanov reviews special library literature in the Russian. There are also articles on the libraries in the German Navy, on the International Committee of the London Library Association, the Egyptian library in Cairo, the annual report of the British Museum, and on E. A. Savage's book, "Old English libraries. The making, collection and use of books during the Middle Ages." Several pages are devoted to the activities of the various libraries throughout Russia. According to its annual report, the Russian Library Association has grown in membership from 159 in 1911 to 207 on Jan. 1, 1912. The number of subscribers to the official journal has increased during the year from 335 to 536.

The last issue for 1912 was a double number (*Bibliotekar* is a quarterly). It contained an article by A. Pokrovsky in appreciation of the work of L. P. Vachterov in building up children's libraries. Michael Kostin contributes an article on classification. Vladimir Vosinsky writes on "The form of systematic

cataloging." The number contains an interesting article by Helen Schoenberg on the "American librarian," describing the work in public libraries, the circulation of books, children's departments, school departments, school and university libraries and special libraries. A second article by Helen Schoenberg reports the 34th annual A. L. A. convention. It is illustrated by a photograph of Mrs. Elmendorf. Courses in library work have been started in the Universities of Moscow and St. Petersburg. Among the subjects taught are the history of books, history of libraries, literature at the end of the 19th century and at the beginning of the 20th century, children's literature, children's libraries in America and the methods employed therein, the cataloging of books.

No. 1, 1913, contains an article on the present status of university libraries. It compares the activities of the Russian libraries with the German and other European libraries. In emphasizing the necessity of the Russian Imperial Library's containing every important work of public interest, A. Bielov describes the scope of the Congressional Library at Washington, and the parliamentary libraries of England, Germany and Austria. An interesting article is contributed by Y. Lukashevitz, on the binding of small pamphlets into one volume. He believes that a small pamphlet, no matter how interesting it may be, is lost sight of when bound by itself.

The second issue for 1913, the last number received, contains an article urging the Russian Library Association to participate in the work of the "International Organization for the Systematizing and Simplification of Library Work." A. Plotnikov reviews in detail the work of the Charkov public libraries. Helen Schoenberg contributes a eulogy of the late Dr. John Shaw Billings, and gives a detailed account of his activities. The annual report of the membership of the Russian Library Association shows that the membership has increased by 9 during the year 1912. It now totals 216.

CHILE

In the Biblioteca Nacional de Chile, which is

located in Santiago de Chile, the number of readers in 1911 was 36,902, in 1912, 49,588; increase, 10 per cent. Number of books (works) used in 1911, 41,686; in 1912, 47,311; increase, 13½ per cent.; of these, 87 per cent. were in Spanish, 9 per cent. French, 2.7 per cent. English, .7 per cent. Italian, and .4 per cent. German. The various classes were in demand in the following order: works of general reference, literature, history and geography, social sciences, applied science, pure science, philology, fine arts, philosophy, theology. Number of books (works) circulated for home use, 10,454. The Home Reading section completed in 1912 its card catalog of the 16,000 volumes available for circulation. The above statistics are gleaned from the *Revista de Bibliografía*, published by the library and reviewed elsewhere in this issue. The same number of the *Revista* announces the passing of an act by Congress, Jan. 20, 1913, authorizing the purchase of the Monasterio de las Claras for 3,300,000 pesos (\$1,200,000) and the erection on its site for 2,000,000 pesos (\$730,000) of a new building for the Biblioteca y Archivos Nacionales. The location at the foot of the beautiful Cerro de Santa Lucia, is one of the most attractive that could be found in Santiago.

INDIA

His Highness, the Maharaja Gaekwar of Baroda has appointed Mr. Newton M. Dutt as a curator of the Central Library, Baroda, and reader to His Highness. Mr. Dutt is the son of the late Dr. Khetter Mohan Dutt, a Bengali who settled in England some years ago. He is well known in English book circles, having been with several of the leading publishing houses in London, including Cassells, George Philip & Son, and Kegan Paul, Trubner & Co. He was for thirteen years in the service of Messrs. George Newnes, Ltd., first as personal assistant to the publisher and subsequently in the editorial department. For seven years he acted as a town and country representative of this firm, which he left in 1910 to join Messrs. Harper & Brothers.

Mercy!—any more?*

—Renée B. Stern.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature.

General

Library Education. Schools

TRAINING CLASSES

Dr. Frank P. Hill, of the Brooklyn Public Library, in his report for 1913 says:

"The result of the first full year of the Training class conducted under the plan of coöperation with the Pratt Institute Free Library was very satisfactory. Miss Julia A. Hopkins, the head instructor, is a splendid teacher, and the experience of the past year proved the advantage of extending the course of theoretical instruction. It was also found desirable to modify in a similar way the practical training of the candidates for library service, and henceforth that part of the instruction will be made more formal, an entire month being given to the instruction of the apprentices, as a class, in routine work, such as the charging and discharging of books, registration of borrowers, etc., before they are sent to the branches to put into practice the instruction which has been given them.

"The rules governing the Training class have been further modified to restrict the number to be admitted to each class, and to require all candidates for admission to pass an 'adaptability' test, in addition to the formal written examination. The entrance examination will therefore be made competitive, since the number to be admitted will consist of those who pass the examinations with the highest percentage and who possess the best qualifications for the work."

APPRENTICES

A new system of student help was inaugurated last year in the library of Pomona College, Claremont, Cal. It is the purpose to make the library a practical training school in library work. All student assistants who have had no previous training are taken into the library on an apprenticeship of ordinarily seventy-five hours. At the end of this apprenticeship period, if their work has been satisfactory, they are received as regular members of the staff, with a remuneration of 15 c. an hour for the first year, 20 c. for the second year, and 25 c. for the last two years. Their advancement, however, from year to year is dependent upon the de-

gree of progress they have made. It is the plan to give to each student assistant in addition to the regular desk work some particular department for which he is responsible. He is expected to master the details of this department thoroughly, and be able to render information in regard to it at any time. As time goes on, he will perhaps be shifted to some other department, and thus will gain a knowledge of the library as a whole.

Scope, Usefulness, Founding

Library Extension Work

LIBRARY AS A SOCIAL CENTER

At the winter school of the Riverside (Cal.) Public Library the following suggestive list of questions formulated on the library as a social center was given to the students:

1. How would you make a social survey of a town or city?
2. Name three social needs felt by everybody; what agencies, good and evil, are answering these needs?
3. How can the library answer them?
4. Outline a two months' series of regular weekly "open meetings" for adults.
5. What can the library do for foreigners?
6. What are the municipal recreations offered by the city of Riverside?
7. What can the library do for mothers?
8. What is the significance of folk-crafts?
9. What games, rest rooms or other recreational features would you recommend for a library to install?
10. What is the ideal of community life?

LECTURE ROOMS, USE OF

The library a civic center. Mary Frances Isom. *Pub. Libs.*, Mr., 1914. p. 93-96.

Portland, Ore., has grown very rapidly during the last decade. With pavements, sewers, lights, school houses, it was not surprising that the building of halls and other meeting places was postponed. Here was the library's opportunity. With accommodations limited, the children's room and librarian's office at the central building and reading rooms at branches were used for occasional lectures, teachers' committee meetings, etc.

During the past three years five branch buildings have been erected, each with a small

auditorium and committee room, and each equipped with a stereopticon. These rooms are available without price for all public uses except entertainments given for profit or self-advertisement.

In the new central building opened last September provision was made for greater civic service. There is an auditorium seating 550, with moving picture machine and stereopticon; a lecture room seating 125 (movable chairs), furnished with a stereopticon with balopticon attachment, and a gas plate; two rooms on the third floor seating 100 each; and five committee rooms holding from 25 to 30. There are also two large galleries suitable for exhibits. The building is practically sound-proof, and the upper lobbies cork-tiled, so the people coming to the lectures in no way disturb the readers.

Courses of lectures are being given by the University of Oregon, Pacific University, and Reed College. In addition art classes, teachers' clubs, and all kinds of educational bodies meet regularly in the library; the County Teachers' Institute held a three days' session in October; flower shows and art exhibits have been held in the galleries; the street car company gave a course of lectures of instruction to its employes, followed by a tour of the building under the librarian's guidance; the state medical examinations were held in the library. From Sept. 8 to Dec. 31 the library halls were used 386 times. As a result of this increased familiarity with the building, in December registration increased 80 per cent., and in January circulation reached 100,000.

Library Development and Coöperation

LIBRARY COÖPERATION—NATIONAL

Plans for an American Federation for Intercommunication. Eugene F. McPike. *Pub. Libs.*, Mr., 1914. p. 113-114.

Some preliminary steps are being taken to facilitate the exchange of useful information regarding all subjects without restriction. This would aim to include various information bureaus now in existence. Some of the principal ones are enumerated, with address, name of secretary, and scope. Chicago is suggested for headquarters, and European bureaus and periodicals of similar purpose are touched upon.

LIBRARY COÖPERATION—STATE

The State University Library and state educational coöperation. Clarence W. Summer. *Pub. Libs.*, Mr., 1914. p. 99-101.

To-day we believe that every community

owes it to itself to have a library, and to have a library that is a living, vital force in that community. There is truth in the statement that the real test of the value of the library is in its use. The problem now is, how can we increase the efficiency of our libraries and extend their usefulness?

It is well known among librarians that college and university library development has not kept pace with public library development. The tendency of the university library has been to serve only the university community. Given sufficient support, the university might render state-wide service by acting as a bureau of general information on matters pertaining to education, town and city government, public health, civic improvement, and other subjects of public interest. By coöperating with the extension division of the university, the library could command the services of experts in preparing this information for public use.

The library extension work now carried on by extension departments is not to be underrated, but it is felt the library itself should take some initiative in the work. The State University Library in North Dakota is already doing much along this line. One member of the staff devotes the greater part of his time to this work, and additional help will soon be needed. From September, 1911, to May 31, 1913, 471 requests were received from 126 different towns of the state. In response to these requests the library sent out 612 books, 268 periodicals, 547 pamphlets, and compiled 45 bibliographies.

PACKAGE LIBRARIES

Plans for a package library are being matured by the Public Education Association of Philadelphia on the plan worked out in Wisconsin. The package library collects the information appearing in the press and magazines by making thousands of clippings of every live topic of importance of the day, putting them in classified form and then distributing them as needed to whoever makes application. It is the plan of the Public Education Association to collect such material as will be of use to members of its own organization, municipal employes, members of home and school leagues, and university extension workers, and then distribute it in the manner being employed by the University of Wisconsin. Miss A. Smith, one of the secretaries of the association, who has made a study of the Wisconsin system, will be in charge of the library,

which will be started as soon as sufficient funds can be obtained to launch it.

TRAVELING LIBRARIES FOR GRANGES

The grange traveling library is a feature of education work in some states that is proving very valuable. In one county in Ohio the various granges of the county have formed a library association, the officers of which are a superintendent of librarians and the librarian of each grange that owns a library. The libraries cost \$12 each, and each grange in the association has one library in its possession all the time. Each grange has control of its own library, can buy or sell books, provided the value of the library is not allowed to fall below \$12. It is the duty of the librarian to keep a record of the books, the cost of each volume and the number of times each book has been drawn from the library. On these various matters he reports to the superintendent of librarians every three months. It is the duty of the latter officer to present the subject of libraries to each grange in the county, asking those not members of the library association if they will purchase a library and become members, or, in case they are already in the association, if they will add new books to their library. Care is taken that there be no duplicates among the books. This seems to be a very feasible working plan for a grange to have the benefit of the reading of a large number of books during the year at a very slight expense, and it is to be commended to granges everywhere.

Founding, Developing and Maintaining Interest

COÖPERATION WITH WOMEN'S CLUBS

The twenty-four women's clubs of Dayton, O., have raised a fund of over \$1000 to replace children's books destroyed by the flood. They are now completing arrangements to provide each branch library with a stereopticon, and at the opening of the new East Side Carnegie branch they promised the giving of weekly concerts and illustrated lectures at the branch, and the arranging for "Community Christmas trees" on the ground of the Central library and of each of the branches of the city.

LIBRARY COÖPERATION WITH WOMEN'S MISSIONARY SOCIETIES

The Public Library of Long Beach, Cal., has found in the women's missionary societies of the different churches a very effective agency for bringing new patrons to know and use its books. Before such coöperation was

possible the first need was to inform them of what the library had which could be helpful in their mission study work. To accomplish this the ever-useful "Selected list" was largely relied upon. A very comprehensive plan of missionary reading was prepared, in which each country was taken up in order, mentioning the best books relating to each. Fiction and books of history and travel were named as introductory to works written with the purely missionary aim. Several hundred copies of this list were made on the multi-graph and distributed at the meetings of the various societies. Other and briefer lists were printed in some of the weekly church calendars.

Besides these general lists, suitable for any society, every effort has been made to meet particular needs. The library is ready to furnish lists of available material for classes pursuing definite lines of study, as well as to give every aid to individuals in preparation of papers. Suggestions are also invited as to the purchase of books particularly desired for special work.

To make the books of missionary interest more conveniently accessible to those who come to the library, they have been placed on a separate shelf labeled "Missionary books." This collection, numbering about 250, includes lives of missionaries from the biographical section and some especially selected travel and descriptive works, as well as those which belong distinctively to the class of missionary books.

In occasional cases the library has not depended upon the ladies coming to the library, but has upon request sent collections of books in charge of an attendant to a regular meeting of the society. At these times the books are always welcomed enthusiastically and nearly the whole number sent is circulated. Always there are some who in this way take home their first library book. The officers of the societies have remarked upon the benefit to their work which has come from the wider knowledge of the literature of missions.

LIBRARY TEAS.

The women in charge of the Public Library in Allendale, N. J., have found many of their borrowers come from neighboring villages and some from the surrounding country, both of which necessitate long walks through the open country. To cheer and warm these patrons, hot tea is served free of charge every Monday and Friday afternoon from 4 until 6.

Library Support. Funds

RAISING FUNDS

During recent weeks a large number of box suppers have been held in Henry county, Tennessee, the proceeds of which go to the establishment of school libraries. The benefits derived from these suppers so far will give to the school libraries about \$2000.

Library Buildings

Fixtures, Furniture, Fittings

FURNITURE.

Benches instead of chairs. *Pub. Libs., Mr., 1914.* p. 111.

George H. Locke, chief librarian of the Public Library of Toronto, has made a special study of children's rooms, and is now trying the experiment of using benches instead of chairs and tables, except for those who are seriously studying. He believes that children, being naturally restless, will find the benches less troublesome to use, besides giving greater opportunity for two or three to use the same book. The article has an accompanying picture showing the benches in place in one of the Toronto branches.

Government and Service

Staff

CIVIL SERVICE AND THE LIBRARY

Civil service in Illinois libraries. *Pub. Libs., Mr., 1914.* p. 107-108.

Under the present régime of civil service examinations for library positions, even the graduate of the Library School of the University of Illinois may not take a library position without first passing the civil service test. In the State Library, where for the first time an earnest effort is being made to systematize the collections, a number of appointments made solely for merit are being discredited as lacking the authority of the civil service. Similarly certain dismissals of attendants on the charge of incompetency have been discounted on the ground that an attendant was no more incompetent than she had ever been, and an order was issued that all employes of the State Library who had not already passed the civil service examinations should report for such an examination in March.

Remuneration, Salaries, Pensions

SALARIES

Librarian C. E. McLenagan, of the Milwaukee Public Library, has solved the over-

time salary problem for the employes of the library board. Beginning March 1 all library assistants are to be paid by the hour, their wages to be apportioned hourly upon the present weekly or monthly basis. When they work extra hours they will receive extra pay. Library workers are obliged to work overtime and the board of trustees believes they should be compensated therefor.

Holidays and Vacations

VACATIONS.

Refined cruelty. *Pub. Libs., Mr., 1914.* p. 106-107.

Editorial. Discusses the case of a Pennsylvania librarian who was granted special leave of absence for two weeks on account of ill health, after continuous service for nineteen years, during which time she had taken only four vacations of more than one day. "It may well be asked what right has any community to take advantage of the willingness of a public servant to wear herself out in any such fashion. It may well be questioned on what basis such willingness rests. . . . It might not be a mistake for the Library Commission of Pennsylvania to express itself and take whatever steps might be possible to enforce such an expression, as to the fair and equitable treatment of librarians of public libraries, who cannot, or through fear will not, speak for themselves."

Rules for Readers

Special Privileges

SPECIAL PRIVILEGES FOR READERS

Library facilities for visitors to holiday resorts. Henry D. Roberts. *Lib. Assn. Rec., Ja., 1914.* p. 11-17.

The authorities of most holiday resorts spend considerable time and money to induce visitors to come to their towns, but do little for them after their arrival. Many people base their selection of a holiday resort on the attractions offered in the form of library, museum and art gallery. The writer, who is director of the public library, museums, and art galleries of Brighton, made inquiries in twelve seaside and three inland resorts to find out what library facilities are provided for holiday visitors. In five towns they are treated on the same lines as non-ratepaying residents. In three others, residence of three months entitles them to the privileges of permanent residents. In most of the others a small charge is made. In all cases free use of the reference facilities is given.

The writer suggests that a borrower bring-

ing a card from his home library should be allowed to borrow books on it from any library. While there might be a few cases of dishonesty, the pleasure given to others would more than counter-balance the loss. Another method would be for persons, before leaving their own town, to obtain from their librarian a form introducing the borrower, the home library assuming the responsibility for any loss.

It is also suggested that special privileges be granted to those attending conferences in holiday resorts, and that notices be posted in the various hotels calling attention to the provincial papers in the library. The establishment of an inquiry department, not only for general information but also detailed information about the town itself, is urged.

The paper by Mr. Foss on "Summer vacation cards," printed in the LIBRARY JOURNAL for November, 1900, is quoted. While their use in this country is now common, they seem to be still unknown in England, and the writer prefers the suggestions he has made as furnishing a more satisfactory provision for vacation reading.

Administration

Treatment of Special Material

DOCUMENTS AND PAMPHLETS, CARE OF

In the report of Pomona College, of Claremont, Cal., for 1913, the method of caring for documents and pamphlets received by the library is briefly described as follows:

"The material which we receive from particular departments of the government are classified and placed in the regular stacks the same as any other book. This is the method which is best for us to employ until such time as we shall become a government depository. This method of handling documents of course necessitates a radically different procedure from that pursued in a depository. The first task undertaken was to check up the material which we already had in the library and to devise a method of checking the documents as they came in. One member of the staff was given this department as her special work. She was sent to the Riverside Library during the Christmas vacation to study their methods of checking. The checking is now largely done. The next task is to secure the necessary indexes to make the material available. This will mean the outlay of considerable money, and will perhaps have to be delayed until funds are provided for that purpose.

"In regard to pamphlets, the library has adopted the following method: the pamphlets are classified roughly and thrown into pamphlet boxes, which are numbered and placed on the shelves in the stacks. At the same time subject cards are made and placed in the catalog, *e.g.*, pamphlets on peace are classed as 172, placed in the box so numbered, and subject cards under 'Peace' are placed in the card catalog."

Classification

DECIMAL CLASSIFICATION (DEWEY'S)

"A plan of labeling composing-room equipment" is the title of an article by Dorr Kimball in a recent copy of *The American Printer*. The plan is an adaptation of the Dewey decimal system, under which all the material in the department is divided into ten main classes, as follows.

- 0 General
- 1 Linotype
- 2 Monotype
- 3 Cuts
- 4 Ornaments
- 5 Brass and metal rule
- 6 Blanking material
- 7 Type
- 8 Proving material
- 9 Lock-up material

Subdivisions under each of these main heads are worked out, providing a place for every article in use in the composing room, and an index to the whole is shown.

Is it desirable to introduce the decimal classification of the International Bibliographical Institute into Russian public libraries? P. Bogdanov. *Bibliotekar [Librarian]*, no. 4, 1913 (winter number), p. 293-304.

The question of the advisability of introducing the decimal classification of the International Bibliographical Institute into Russian libraries in general, and into the public libraries in particular, is a very serious one. Two years ago when the first Russian library convention took place the question was under consideration, but the members of the convention being not sufficiently informed decided to leave the question open. Since that time the decimal classification has won more adherents, and is now being used in Russian bibliographical works, bulletins, etc.

The *Bibliotekar* (the Russian library journal) printed in 1912 (nos. 3-4) an article on the decimal classification by M. Kostin, and

another in 1913 (no. 3) by A. A. Pokrovski. Both writers urge its adoption. Mr. Pokrovski was for some time strongly against it, but changed his mind after having used it. Mr. Bogdanov agrees that figures are the simplest possible *indicia* of classification, for either index purposes or still more for the systematic arranging of books on the shelves. M. Pokrovski admits that the system has its faults, but points out that now that the system is so widely accepted in western Europe he advises its use in Russia. This writer does not, however, accept these reasons for adopting it. He points out that though many European and American libraries use it, the Germans are working on a uniform catalog. Library of Congress made a different system, the Brussels Royal Library did not accept it—so the system, though international, is not universal.

The advocates of the decimal classification in turn show its flexibility, minute sub-classification, adaptability for expansion, etc. Russia has now 15,000 libraries; allowing 100 readers to a library it will make one and a half million readers who must use a catalog easy to handle. Ninety per cent. of these readers call for books of fiction. In the decimal classification Russian literature is 891.7. It is not that the national pride will suffer from making Russian literature thus remote—it is practically a nuisance.

The writer also criticises the necessity of using more than one digit for even the smallest libraries. Libraries of 500 volumes or less, he says, would find it difficult to use a class number consisting of more than a single digit—two figure numbers being too complex for them!

The writer also criticises the undue importance (from a popular library standpoint at least) given philosophy, philology or religion and the location of medicine in the classification.

Binding

BINDING

The Brooklyn Public Library publishes the following statistics of binding in its report for 1913:

"During the year 37,134 volumes (exclusive of periodicals) were bound by the Chivers Bookbinding Company, at an average cost of 59 cents, as compared with 57 cents the preceding year; 312 Yiddish books were bound by S. Rosenblum, at an average cost of 50 cents; 689 volumes of periodicals and newspapers from Montague branch were bound by Chivers, at an average cost of \$1.87; and 1000

volumes by Henry Blackwell, at an average cost of \$1.07; 838 volumes of periodicals from the other branches were bound, at an average cost of \$1.07; 107 volumes of fiction were bound by William Crawford, at an average cost of 49 cents. The increase in the average cost of binding was due to the greater proportion of books of larger size, as well as to a greater use of the better grade of binding.

"During the year statistics were kept of the average circulation of certain discarded books, with the following results:

No. of Vols. 1913	Aver. issues 1913	Aver. issues 1912
1501 adult fiction bought in "A's" binding.....	102	111
1862 adult fiction rebound by "A," average circulation after rebinding.	87	98
82 adult fiction, rebound by "B".....	86	79
38 adult fiction, rebound by "C".....	73	69
735 juveniles bought in "A's" binding.....	83	83
365 juveniles rebound by "A".....	67	75
144 juveniles bought reinforced in publishers' covers.....	34	38

"The decrease this year in the number of issues of books in Chivers' binding is probably due to the poorer grades of paper used by the publishers. Indeed as the cost of books to libraries increases, the paper, print, and binding seem to decrease in quality.

"During the last five years an attempt has been made to ascertain answers to the following questions: (1) To what an extent is the present method of library bookbinding superior to the methods used before the book-binding reformation of ten years ago? (2) Which of the bookbinders using the modern methods can give us the greatest number of issues per volume?

"Thousands of books of the same type (adult fiction) have been examined and their circulation under similar conditions compared. The books from the binders using the old methods show an average number of issues of 48. By use of improved methods the average number of issues was increased all the way from 50% for Binder "C" to 100% for Binder "A," thus doubling the life of the book in the case of the best binding. The books from the modern binders show a circulation as follows:

- Binder "A" 99 issues per volume.
- Binder "B" 82 issues per volume.
- Binder "C" 71 issues per volume.

"It seems improbable that future statistics will change this comparison very materially.

It will, therefore, probably be unnecessary to continue the careful compilation of statistics of circulation, but more attention should be given, in coöperation with the library binders, to the study of exceptional books to determine whether such books will give better service if reinforced, rebound, linen-guarded, or otherwise treated. Certain books, which in the case of juveniles seem to be the more expensive picture books, give out very quickly after purchase in spite of any treatment which the binders have hitherto been able to devise. A study of these cases may influence our purchases. A book costing \$1 and showing a circulation of 25 is four times as expensive for the library as one costing the same amount with a circulation of 100."

Shelf Department

BOOKS AS DISEASE CARRIERS

Books as a source of disease. William R. Reinick. *Amer. Jour. of Pharmacy*, Ja., 1914. p. 13-25.

An article intended to show that books are excellent hiding places for bacteria, and that the same care should be used with them as in handling other objects of like character. The evidence is slight, but seems conclusive, that books may carry disease, though many reputable physicians still deny it. Apparatus for pursuing experiments is quite expensive, a cause which deters many young physicians from conducting investigations, and the great surface covered by the pages of the books means long and tedious experiments.

In preparing data for this article, a circular letter was sent to the boards of health of each state and of forty-one cities. Only about 30% of the letters were answered, and very little information of value was obtained. A number of cases observed by physicians during practice are cited, tending to prove that books acted as carriers of a number of different diseases.

The trustees of the Chicago Public Library had some investigations made along this line, and abstracts are taken from the report made to them.

Killing germs by disinfection is considered of very little use, as the gases do not penetrate the interior of the volumes. Likewise sterilization, both steam and hot air, is considered of little value, and in both forms is injurious to the book. In general careful dusting and plenty of fresh air in a library is sufficient care for books under ordinary conditions.

Libraries on Special Subjects

BUSINESS LIBRARIES

A library for business men; how the Newark Public Library has made itself a live and useful factor in business activities. E. Leslie Gilliam. *System*, Ag., 1913, p. 188-190.

Newark is essentially a manufacturing city, and in this business branch has been collected a large amount of trade literature—maps of railway and freight routes, all kinds of time tables, city and trade directories, trade journals of both general and specialized interest, house organs, reports of scientific societies and magazines relating to all aspects of business. The library thus appeals to business men as practical users of every printed thing that can help them to improve and enlarge their business. Special effort is made to have all material so accessible that inquiries may be made by telephone and receive prompt reply.

Music

Music in public libraries, with special notes on the "John B. M. Camm Music Reference Library," and a comparison of the classifications of music. Charles Riddle. *Lib. Assn. Rec.*, Ja., 1914. p. 1-10.

While most librarians are alive to the importance of music and many are forming music sections in their libraries, little has been written on the subject. We are a music-loving people, all grades of society showing an active interest in music, and there cannot be any reasonable objection to the provision of music in libraries. This should include piano and vocal scores of the principal oratorios and other choral works; songs and ballads; choral and vocal practice (a selection of the principal schools of instruction); sacred music; works for piano, violin, and 'cello, and other instrumental music according to the needs of the district. Opera scores and the best of the musical comedies should be included. Musical literature should include essays, theory and technique, harmony and composition, history and biography. The "Guide to the formation of a music library," by James Duff Brown, is the best book of information at present. Full orchestral scores are not recommended because of the expense; but Donajowski's miniature scores, including some 200 of the best-known, are good and reasonable in price. Recommendations for re-binding these scores and separate parts at slight expense are given. Separate parts are kept in a pocket on the inside back cover.

The library formed by Mr. Camm numbers nearly 4000 pieces, and has been presented to the library at Bournemouth. Its main feature is the wealth of full scores. Certain parts of the collection may be circulated among music students at the discretion of the chief librarian. With this library as a nucleus, it is hoped in time to build up such an interest in things musical as will make Bournemouth one of the music centers of England.

In comparing the three principal systems of classification, with regard to music, it is found that Brown places Symphonies in C762, with no allowance for expansion, as Overtures are placed in C763. Dewey puts Symphonies in 785.1, with all the rest of Orchestral music in 785.2. The Library of Congress has provided for the Symphonic poem by giving it a number, 1002, following Symphony, 1001. For large collections the Library of Congress system is recommended, and for small ones Brown's system, with intercalated numbers.

State and Government

LEGISLATIVE REFERENCE BUREAUS

The legislative reference bureau as a factor in state development. Addison E. Sheldon. *Spec. Libs.*, Ja., 1914. p. 2-8.

"The legislative reference bureau is an institution which gives condensed, comprehensive, impartial, accurate information on any subject under the sun upon five minutes' notice. . . . Democracy is the key word of modern social life. Beyond democracy is coöperation. However widely democracy may spread, there must always be some delegation of power, some committee chosen from the whole assembly to act in its stead and submit its findings and its judgments to the assembly." These committees ought to be well informed. To condense the mass of material on every prominent proposition before the present day legislature, to give the principal facts, leading arguments and authorities on a single type-written sheet, for the use of these committees, is the function of the legislative reference bureau. In the Nebraska legislature last winter, in a session covering 75 days of 5 hours each, there were presented 1346 bills for consideration. Of this mass, 263 were passed and signed by the governor. To accomplish this organized and well-digested data on the bills for the use of the members was imperative, and it is this need which has called into existence the modern legislative reference bu-

reau, now found in thirty-four states. Concrete cases in which the Nebraska bureau has been invaluable to the legislator are cited, showing the relation of the bureau as a collector and organizer of information to the cause of state development. Other qualities than an ability to catalog and condense, necessary in a reference bureau, are qualities of social leadership and the possession of social ideals. It is not enough to gather and sift all the material on a subject. The results must be clearly presented in simple form and given, not only to the legislators, but to the great body of the people. This work many reference bureaus are now doing.

The Nebraska bureau is affiliated with the state university. It teaches university classes in Nebraska history and directs research work and publication in that field, and coöperates with other departments.

To prevent over-legislation, a plan is now in operation providing that important matters shall have the right of way, and that all important legislation in the state shall be prepared by an unpaid commission or legislative committee working for two years or more in coöperation with the legislative bureau. Public hearings will be held during this time, before bringing the bill up for enactment. Under this plan committees are now at work on reform of legislative procedure and the state budget, on the conservation of water power in Nebraska, on changes in the state's system of taxation, and a revision of the school code. In each case the bureau gathers and arranges the material.

Reading and Aids

Work with Children

CHILDREN, WORK WITH

In a recent Sunday issue of the Chicago *Inter-Ocean* there was a full-page article on "Favorite books read by boys of Chicago," the result of an interview with Mr. Legler. According to the latter, "the boy's romance of to-day is literal, technical, tight, efficient and matter of fact. There is less blood and more machinery in it. The author has substituted technical education for the old romance because the boy demands it. Writers who deal with the gay North road, the Spanish Main, the running of contraband goods and the burning of prairie homesteads are swept aside and their work regarded as impossible. Even Jules Verne is old-fashioned. The boy approaches his fiction looking through the eyes

of a professor of science, and in method is as critical as a highly trained engineer. An examination of the selection of the books in the same class of 1913, remembering the stories that passed for boys' fiction thirty years ago, proves more than any other comparison we could cite that the age of romance is not only dead; but almost a forgotten memory."

Literary Methods and Appliances

Library Appliances

LIBRARY BLANK BOOKS

Willis K. Stetson of the New Haven Public Library, writes to the *Bulletin of Bibliography* that he has found of great use the blank book called by teachers a roll-book, and found at stationers. It has vertical columns for the days of the month, but no printing. It is useful for entering receipt of current periodicals, also has sufficient number of columns for all the decimal classes, both adult and juvenile, hence circulation records, and any other records according to classification can easily be kept with a minimum of trouble, and the cost of the blank books is small.

SUPPLIES

Library supplies. F. W. Jenkins. *Pub. Libs.*, Mr., 1914. p. 104.

This is a letter answering queries resulting from the paper in *Public Libraries* for December, describing certain methods and supplies used by the Russell Sage Foundation Library. The letter gives reason for not using Library of Congress cards, describes more in detail the use of wood alcohol to remove shellac, tells where red-topped cards may be bought, describes the Kee Lox ribbon, gives process of varnishing books, and discusses Gaylord gummed cloth.

to make an estimate upon the books of the library and the movable property, all of which was done, and made a pleasant change in the routine work of the country librarian. But I was puzzled when I asked myself the value of the card catalog. I would like to hear from others, who have had similar questions, what should be the value placed upon the most precious and indispensable catalog?

PUZZLED LIBRARIAN.

MAGAZINES AT BARGAIN PRICES

Editor Library Journal:

A circular which should prove of more than passing interest to the librarians of small public libraries, especially those with limited appropriations—and what libraries are exempt from this class?—and possibly to others, has come to my attention.

One Nelson Doubleday, of Locust Valley, N. Y., issues this leaflet entitled "The new deferred subscription plan; the very best magazines at colossal discounts, because they are deferred subscriptions." His copies are new ones bought from those returned by newsdealers to the publishers. His plan is to send the magazines regularly, but each a month late.

There are listed a dozen magazines, the following being among those generally found in libraries:

	Regular price	Deferred plan
<i>Lippincott's</i>	\$3.00	\$0.80
<i>McClure's</i>	1.50	.75
<i>Harper's Weekly</i>	5.00	1.50
<i>Review of Reviews</i>	3.00	1.00
<i>Travel</i>	3.00	1.00
<i>House and Garden</i>	3.00	1.10
<i>World's Work</i>	3.00	1.00
<i>House Beautiful</i>	3.00	1.00
<i>Outing</i>	3.00	1.00

I am unaware that any library has tried this.

Very truly,
HAROLD T. DOUGHERTY.

Pawtucket, R. I.

VALUATION OF CARD CATALOG?

To the Readers of the Library Journal:

Recently I was informed by the secretary of the business committee of the Board of Trustees of my library that the trustees had placed a blanket insurance upon the property of the library, which meant, so he told me, that more insurance was carried at a lower rate, but with the full understanding that in case of fire full valuation would be paid out by the fire insurance company. And I was asked

Aug. 31-Sept. 4. Library Association (English). Annual meeting, Oxford.

BIBLIOTHÈQUE NATIONALE—MAIN READING ROOM

1914 should be the banner travel year. The Washington conference should be one of the most representative conferences which the A. L. A. has held, for every librarian should know the nation's capital and the Library of Congress almost as a professional duty. The Memorial Continental Hall of the D. A. R. is ample for the largest general session, and the program, summarized elsewhere, should interest and inform all corners. By all means spend a personal quarter for the Washington Standard Guide with its copious illustrations of the Library of Congress building, which should be in every library. Washington is becoming a place of pilgrimage for the nation, and librarians should be able to tell their patrons all about it.

THE alternative of southern and northern routes should entice a goodly number to Europe; the Leipzig Exposition of the Book will be the objective point of both parties, and Theodore W. Koch, of the University of Michigan Library, should be at this writing in Leipzig installing the A. L. A. exhibit. Of this exhibit one of the most interesting features will be the model of the Brooklyn type of branch library, of which an illustration is given in this issue. Both parties should see the magnificent Royal Library at Berlin, now formally opened, at which Dr. Schwenke will make welcome the American visitors. The Bibliothèque Nationale in Paris should be the next objective point, and Mr. Koch's excellent articles upon the French national library, of which the first is printed in this issue, will give adequate preliminary knowledge. Then should come the British Museum, which he has already so well described, and finally the Oxford meeting, from which several of the American delegates will depart on Saturday, Sept. 5, to

take the steamer sailing from Liverpool that afternoon. Those who begin with Washington and follow this round will have seen the four great libraries of the world, in addition to the greatest of university centers with its ancient Bodleian Library. It is certainly worth while to make every effort to utilize in this delightful way so unusual an opportunity for professional equipment.

THE destruction of the Morristown (N. J.) Public Library some weeks since should emphasize the importance of guarding against fire loss in libraries, for which insurance will but poorly compensate. Happily libraries in this country are not subject to destruction by an "arson squad" of militant suffragettes, such as destroyed the Carnegie Library in Northfield, England, though "pyromaniacs" of another sort are not altogether unknown here. A library in a block of business buildings, as at Morristown, should soon be a thing of the past, but the important collection of the old Brooklyn Library in Montague street, which was given to the Brooklyn Public Library system, is in that very danger, pending the completion of the first wing of the central library building, which is delayed by lack of city appropriation. But isolated and "fireproof" libraries are not without their dangers; and there should be fire drills, not only to provide for the safe exit of employes and public, but for the designation and saving of the most important part of the collection, in case of interior fire. Almost every library has special lines or a local collection or individual books which cannot be replaced, and which, whether insured or not, are literally beyond price. The precaution indicated may lead to a salvage of invaluable treasures which might otherwise prove an irreparable loss.

THE storm center of the library world is now at Seattle, where Mr. Jennings' endeavors to get trained assistants, graduates of library schools, have provoked the local mayor into action in defense of neglected taxpayers or their wives, their cousins and their aunts, who seek positions in the library. The majority of the board supports Mr. Jennings, but the mayor is undertaking to remove a woman member who will not do his bidding, and threatens if necessary to remove the whole board. The mayor should next provide the city hospital with unprofessional attendants, who can be hired at much lower salaries than physicians and nurses who have been at the foolish pains of graduating from medical colleges and training classes. The one seems as logical as the other.

THE American Library Association is getting on in years, and its earlier members are enjoying pleasant recognition of long service. Mr. C. A. Nelson, who has been in library service for more than half a century, celebrated his seventy-fifth birthday last month; Mr. W. T. Peoples, of the Mercantile Library, the next oldest veteran still in library service in New York, has passed his seventieth year of age and his fortieth of library experience, and is again at his post after sad months of hospital experience, with sight restored by operations for cataract. The younger generation is also passing milestones, and the library school at Albany pleasantly commemorated the twenty-five years of service which Miss Woodworth, Miss Jones and Mr. Biscoe have given there since their graduation from the school in its earliest years. Mr. Eastman, one of the very early graduates, has already been put on the retired list *cum laude*, after like service, but as is the case with Mr. Nelson, retirement has meant but another phase of library activity. Honor to whom honor is due!

APOLOGY is due Mr. Joseph L. Wheeler, assistant librarian of the Los Angeles Pub-

lic Library, as the author of the interesting paper on "Library publicity," which was printed in the last issue of the JOURNAL, with credit to Mr. Everett R. Perry, of Los Angeles, as its author. The error resulted from the changes at the office desk last year, which have caused us already to make other apologies. Readers of that paper will kindly give Mr. Wheeler the credit it should earn for him.

It is gratifying to note that our Canadian brethren are making progress in library associations, and that a new provincial organization will be represented at the Washington conference. The new development is in Saskatchewan, which has just completed the formation of the Saskatchewan Library Association, the second in the Dominion, which we hope may emulate not only the example but the success of the sister association in the Province of Ontario. The latter province compares favorably with our own banner states in library development, and Saskatchewan may well follow its example. It is of especial interest that the movement originated at Regina, which has taken phoenix-like rebirth since the devastation which occurred while the American Library Association was in session at Ottawa.

THE offices of the LIBRARY JOURNAL as well as of the other periodicals and publications of the R. R. Bowker Company have been removed to 241 West Thirty-seventh street, west of Broadway and four blocks north of the new Pennsylvania Station and of the new general postoffice. The new location is within easy walking distance of the New York Public Library. It can be reached most easily from the Times square subway station or the Thirty-eighth street station of the Sixth avenue elevated line; also by the Thirty-fourth street or Forty-second street crosstown cars as well as by the Seventh avenue and Eighth avenue surface lines. It is hoped that our library friends will find the location more accessible than the quarters occupied for the past year on the east side.

THE BIBLIOTHEQUE NATIONALE

FIRST PAPER: ORGANIZATION AND HISTORY

By THEODORE W. KOCH, *Librarian, University of Michigan*

THE Bibliothèque Nationale has been called at different times by a variety of names. It has in turn been the King's Library, the Royal Library, the Imperial Library, and the National Library. For a long period it was the private library of the kings of France, before becoming a public institution put at the service of the learned of all countries.

Pepin the Short (d. 768) was one of the early Frankish kings who had, it would seem, in his possession a collection of manuscripts. Pope Paul I speaks in a letter to the king of several works that he is sending him. Charlemagne formed at Aix-la-Chapelle a library which seems to have been quite a considerable one for that period. He had at his court a group of copyists who issued numerous volumes. Some of these were kept for the use of the school attached to the palace, or for the use of the members of the imperial family; the others were presented to different monasteries. From the Charlemagne collection came the Gospels written about 781 by Godescalc, still preserved at the Bibliothèque Nationale. Louis the Pious (778-840) also made a collection of manuscripts, but it does not seem to have had any great importance. The copy of the Gospels which he sent to the Abbey of St. Médard de Soissons is to-day at the Bibliothèque Nationale.

One must come down to the time of St. Louis (1215-1270) to find information on books possessed by the kings of France worthy of being noted. The testimony of Geoffroy de Beaulieu and of the confessor of Queen Marguerite are quite explicit. St. Louis had collected and placed in one part of the Sainte Chapelle a real library. He himself sometimes went there to work, and admission was willingly granted to the scholars or the priests who requested it. On his death he left his manuscripts to four religious communities. From this se-

ries there eventually came to the Bibliothèque Nationale a psalter which, after having belonged to Charles V and Charles VI, had passed to the convent of Poissy and from there into Russia, whence it was restored to France by Prince Galitzin.

The immediate successors to St. Louis did not show the same taste for books as he had exhibited. Different works were indeed added by them, but they do not seem to have given serious thought to building up the collection. King John always showed a good deal of taste in his books, and spent considerable time with them during his captivity. He had with him in 1356 at the battle of Poitiers a "Bible historiale," which is to-day in the British Museum, and the "Book of miracles of Notre Dame de Gautier de Coincy," which is now at the seminary of Soissons.

Charles V must be considered as the real founder of the library. He is in fact the first to have organized a library not only to satisfy his personal tastes, but also to furnish scholars with the means of work. Christine de Pisan, who had seen the library on several occasions, spoke of the wisdom of the king and of the great love which he had for study and science, shown by the fine collection of noteworthy books and the splendid library which he had of the most notable volumes by the foremost authors. Charles was not content with buying or having copies made of the books which were then the most appreciated; he also had others translated "for the use of the kingdom and Christianity." He is characterized by Delisle as one "who always loved the sciences and honored the good clerics." In 1367 or 1368 he had his books transferred from the palace in the Ile de la Cité to a tower at the Louvre, where he installed them in three rooms, which he had carefully prepared for them. The collection was celebrated as a marvel by all the king's contemporaries. Gilles Malet,

his valet de chambre, to whom he entrusted the care of the books, and "who read surpassingly well, above all others," made an inventory of them in 1373. After the death of Malet in 1411, Jean le Bègue was instructed to make a new inventory. This work was done partly if not entirely by Oudart Boschot. These inventories have been carefully edited by Delisle. They are among the most curious literary monuments of the middle ages. One can see there what were the books most highly prized at that time, and can learn what fed the literary spirit of the learned men of that day. The principal works of antiquity are found side by side with the romances of chivalry. Livy and Sallust rub shoulders with accounts of the Trojan war and the Golden Legend. Books on chiromancy, necromancy and the "moralities of chess" are scattered among editions of Aristotle, Seneca, Euclid and Boëthius. But in spite of its imperfections the library in the Louvre was at that time very useful. The miniatures in the manuscripts and the fine bindings on the books did not prevent the king from loaning them to private individuals, to churches, to colleges and to monasteries. Unfortunately this fine library did not survive its founder. It was, so to speak, pillaged by different members of the royal family who were free to take, "as in an ordinary shop," all the volumes which they might want, and they did not take the trouble to return them. Charles VI showed himself guilty of some negligence, drawing for his own use various books which he never put back. In April, 1424, three booksellers were instructed to place an estimate on what remained of this collection, which was bought by the Duke of Bedford, who took definite possession of it on June 22, 1425, but who transported it to England and later sold it piecemeal. Of the two hundred volumes which it contained, Delisle thought that hardly fifty survive to-day.

Some of the successors of Charles V were equally fond of books, but the collections which they made had nothing lasting and they were always dispersed at their death. Louis XII was the first who tried

faithfully to preserve the books gathered by his predecessor. He seems to have had the idea that they were not the personal property of himself, but that they formed a sort of public depot open to the savants of France and of other countries. With this idea the foundation of the library was laid.

Delisle has traced with scrupulous care the history of the various collections which went to make up the King's Library. It met with unexpected good fortune. The Italian wars, disastrous to France, were profitable to the library, and the French army, though defeated, was able to bring back from Milan books that had belonged to the Visconti and the Sforza families. Francis I was seized with a passion for Greek manuscripts, and he was tireless in sending out envoys to search for them. His ambassadors at Venice were kept busy collecting or copying them. The library established at Blois by Louis XII was transported to Fontainebleau by Francis I and definitely installed in Paris towards the end of the reign of Charles IX. During the troublous time of the League the good fortune of the library seemed to be in peril. The librarian, Jean Gosselin, tells naively how, not being able by himself to stop the leaguers when the riot ruled, he securely locked and bolted the door, and went to reside at Melun, which was under the protection of the king. Despite the bolt and the padlock there was much pillaging during his absence, and marauders were seen carrying away large packages under their cloaks. President Brisson, who was an ardent book lover, took the library under his protection, but he himself borrowed some volumes which he never returned, and which his widow sold for a pittance.

From the end of the fifteenth century the King's Library contained a collection of printed books. Charles VIII gathered a certain number of them which had belonged to the library of the Spanish kings of Naples. Charles VIII and his successor, Louis XII, collected several, which the bookseller Berard had decorated with ornate bindings. From the beginning of the reign of Francis I the collection made

BIBLIOTHÈQUE NATIONALE—COURT OF HONOR (RUE DE RICHELIEU)

rapid strides. However, up to the beginning of the seventeenth century the King's Library consisted principally of manuscripts, in the midst of which the books were thinly scattered. Not until the time of Louis XIII was an attempt made to establish a collection of printed books. This was done by Nicolas Rigault, about 1622, and there were associated with him Sau-maise and Hautin. At the beginning of the reign of Louis XIII the King's Library consisted of (1) an old collection of manuscripts numbering about 2069, of which the classification numerals were at that time written at the head of each volume in Roman numerals surmounted by a horizontal line; (2) a collection, comparatively new, consisting of 2643 volumes, some manuscripts and some printed books of which the classification numbers were inscribed in letters or in Roman numerals not surmounted by a line. In the new collection the books were mixed without any order in the midst of the manuscripts, as one can see from the inventory.

The reign of Louis XIV was marked by numerous acquisitions and by important gifts. The grand monarch interested himself personally in the growth of the library, visited it several times and intervened on several occasions in the administration. Colbert as superintendent of buildings rendered the king services of great value to the library. In 1666 the library was transferred from the Rue de la Harpe to one of his houses in the Rue Vivienne. The first important acquisition secured after the accession of Louis XIV was that of a part of the collection of the Dupuy brothers. This collection, begun by Claude Dupuy and continued by his brothers, Pierre and Jacques, contained more than 9000 volumes and 260 manuscripts, together with a large quantity of legal, historical and literary documents. The printed books and manuscripts were alone included in the gift which Jacques Dupuy, the last survivor, made to the king in 1652. The remainder of the collection, which formed 798 folio volumes and about 39 quarto volumes, were bequeathed to de Thou, who sold them together with his library in 1680 to President

Charron de Menars, in whose hands the collection increased by nearly 600 volumes. His heirs sold it in 1720 to the Procureur Général Joly de Fleury, who in turn passed it on to the library. Gaston d'Orléans presented to Louis XIV books, manuscripts, medals, miniatures, prints, and rarities which he had gathered in his palace at Luxembourg.

During the reign of Louis XIV the library acquired the portfolios of Gaignières, a young man attached to the house of Mlle. de Guise, who had conceived the idea of collecting curiosities of all sorts and of selecting pieces which could illustrate history in general, but especially genealogy and the chronology of the bishops and church officials. He was anxious to possess the portraits of the principal personages and the graphic portrayal of historical scenes. Assisted by his valet and an able designer, Gaignières succeeded in bringing together one of the richest collections of its kind which a private individual had ever possessed. As he grew older he shuddered at the thought that any of his precious collection might some day be scattered and fall into the hands of the ignorant rich, or of mediocre amateurs, and in order to prevent this disaster he decided to present the collection to the king. This he did in 1711, reserving for himself a modest annuity. Gaignières was subjected to the humiliation of having his friend Clairambault put in charge of the collection, and the latter spared him no humiliation. Clairambault, who was also a collector, apparently needed watching himself, as Delisle has noted more than a hundred volumes in the handwriting of Gaignières or annotated by him, which Clairambault had appropriated to himself.

The French Revolution opened an era of prosperity for the library. It brought to it a large number of precious collections, but in such rapid succession and confusion that it was impossible to gather and save all that ought regularly to have gone there. The consequences of the disorder which followed were felt for a long time afterwards. The books and manuscripts which fell into the public domain through the suppression of religious establishments or

the confiscation of the goods of the refugees were gathered into vast storage places opened in different parts of Paris. In 1794 there were at least nine of these. The administration of these "dépôts littéraires" was entrusted in turn to the various commissions and councils which succeeded one another in authority between 1792 and 1798. Thus at least a remnant of the collections which had belonged to the Augustinians, the priory of the Blancs-manteaux, the Carmelites, the Cordeliers, the Abbaye de Saint Victor, and many other religious houses, came to form a part of the Bibliothèque Nationale. The manuscripts of St. Germain-des-Prés which were taken to the library between Dec. 6, 1795, and March 14, 1796, formed a collection of more than 9000 volumes, consisting of Oriental, Greek, Latin, French, Italian and Spanish manuscripts and an enormous mass of papers and documents relating to the work of the Benedictines.

In 1791, the preservation of four or five libraries of the suppressed religious establishments entered into the general plan of a national library to be organized in Paris. Circumstances were against the realization of the plans which had been drawn up for a national redistribution of the treasures which had been gathered in the literary institutions of Paris and the "départements."

Napoleon would have had no difficulty in verifying the inconveniences of the distribution which had been made, and which in many cases was the work of chance. He believed it was possible to remedy this by applying the system of centralization. He seemed to be unwilling to withdraw before any obstacle in the way of making the collections of the Bibliothèque Nationale as complete as possible. He wanted to bring there all the books which it lacked and of which a copy existed in a public institution. In writing of this scheme under date of Feb. 6, 1805, Napoleon said that many ancient and modern works were lacking in the Bibliothèque Nationale while they were found in other libraries of Paris and of the Provinces. It would be necessary to arrange the matter and to claim these books from these establishments, to which should

be given in exchange the works which they did not have and of which the Bibliothèque Nationale had duplicates. As a result of this transfer, if well made, it ought to be possible, said Napoleon, that when one did not find a book at the Bibliothèque Nationale he would be sure that the book did not exist in France. The withdrawal of the books taken from the other libraries for the execution of this scheme, as well as that of books given in exchange, was only to take place when the library was definitely established at the Louvre.

In order to realize the laborious plans, the administration of the library calculated that it would have to take 85,500 works from the collections where the right to execute it was recognized, namely:

12,000 at the Arsenal; 6000 at the Panthéon; 4000 at the Collège des Quatre Nations; 2000 at L'École de médecine; 1500 at L'École polytechnique; 1500 at the Musée d'histoire naturelle; 2000 at the Lycée imperial; 1500 at the Lycée Charlemagne; 2000 at the Tribunal; 3000 at the Corps Législatif; 50,000 in the provincial libraries.

Napoleon's idea was taken up again, at least in part, in 1860, when it was proposed on the recommendation of a commission presided over by Mérimée that, in view of the centralization to be effected at the Bibliothèque Nationale, a beginning be made by exchanges between that library and the libraries of the Mazarine, the Arsenal, Sainte Genéviève and the Sorbonne.

It was fortunate for the library that Van Praet was in charge during the French Revolution. With his remarkable activity and devotion to the interests of the institution, he was able to organize the new service to answer to the needs of numerous readers who began to frequent the library and at the same time to classify the new accessions which had to be put at the disposition of the public. The amount of work that was done between 1792 and 1800 can be realized when one reads of the enormous accessions. During this brief period the number of books was more than dou-

bled by the influx of those which Van Praet had been empowered to choose in the provisional "dépôts" formed by the convention.

The needs of the library were ably set forth in Van Praet's communications to government agents, to whom he furnished lists of desiderata and titles of books to be found in foreign libraries but lacking in the National Library. Many of these suggested titles came into the library as the result of victories of the French army, but one can only faintly imagine the chagrin and desolation of spirit which Van Praet must have suffered when the united powers decreed that the major part of these spoils of war must be returned to their former owners. Then Van Praet showed the finesse of the true diplomat. By clever substitutions he succeeded in retaining for his cherished library a part of these bibliographical treasures.

The provisional "dépôts" established in many of the "départements" were also laid under contribution. Chardon de la Rochette was in 1801 sent to visit them and to select therefrom that which would be useful to the National Library, but he discharged his mission in a slovenly fashion and very little of value came of it. From 1801 to 1806 Maugerard, a former Benedictine monk, was commissioned to gather in the Rhenish provinces the books, manuscripts, and papers which might be useful in the national collection. He made shipments which proved most valuable, including numerous incunabula and, especially worthy of note, the Pfister Bible of 1461.

The above sketch includes the period of large accessions in the form of special collections. During the nineteenth century the library grew systematically, but there were no such large shipments of manuscripts as those referred to above. There were, however, great additions to the department of printed books, noteworthy among which were the one hundred thousand volumes on the French Revolution collected by Labédoyère, acquired in 1863. The Beuchot collection of nearly two thousand volumes on Voltaire, the large Payen collection of documentary material on Montaigne, and

the collection of material on the history of Marseilles are among the notable additions of the latter half of the nineteenth century.

THE LIBRI CASE

During the middle of the nineteenth century the libraries of Paris as well as those of the provinces were subjected to close scrutiny as the result of official investigation into the reputed wholesale plundering of the government collections. The accusations made were given a great deal of notoriety, and as the "procès Libri" occupied the attention of the administrators of the Bibliothèque Nationale for more than a generation, we venture to give here a summary of the main facts of this famous case. "On dit" is frequently the only authority one finds for certain statements in this history.

Félix Ravaisson, as inspector general of libraries, published in 1841 a report on the libraries of the western "départements," which was freely used to show to what extent depredations had been carried on. The library at Tours was reported to consist for the most part of the spoils of cathedrals, monastic and educational institutions, but that it had suffered much from dampness, that many volumes had been pilfered and sold, and that while the manuscripts had been its chief treasure, it was there unfortunately that the losses had been most regrettable. At Angers, where the library was similarly formed from the spoils of eighteen abbeys, most of which had possessed very considerable collections of books, M. Ravaisson found but a small remnant of these former riches. At Nantes the books had been either lost or stolen; at Brest a library of 25,000 volumes had been largely dispersed; at Lesneven and Saint-Pol-de-Léon there were but few traces of libraries formerly extant. A well-known collector in Paris of the middle of the last century claimed to possess a whole volume of autograph letters abstracted from the Dupuy collection. In 1847 Paulin Paris, assistant keeper of manuscripts at the Bibliothèque Nationale, estimated at 20,000 the number of volumes stolen from the library, and at that time to

be found in the book trade or in private collections.

In February, 1846, the prefect of police received and transmitted to M. Boucly, the public prosecutor, one anonymous note and one signed pseudonymously, giving information of thefts from the libraries of Montpellier, Carpentras, and other provincial towns, by which means it was claimed that Libri, the well-known mathematician and collector, had amassed a library worth from 300,000 to 400,000 francs. Libri had brought ridicule upon himself in certain quarters by his researches among old books and rare bindings. The mathematicians considered it an unpardonable weakness, and thought that he was wasting his time in reading the medieval and renaissance authors. Libri's successful career had excited envy. In the Institute he was still an Italian. There was open hostility between him and the *École des Chartes*. When he was appointed a member of the commission to edit a catalog of the manuscripts in the public libraries of France it is said that he refused to accept the appointment if a single man from the *École* were to be on the commission.

Libri was charged specifically with the theft of a valuable manuscript psalter from the library of Grenoble and of the letters of Henri IV from the library of the Arsenal. After making inquiries through his associates in the various towns indicated and obtaining no evidence against Libri, Boucly allowed the matter to drop; but eighteen months later another anonymous communication was received charging Libri with stealing books from various public libraries, but naming no books in particular. The public prosecutor made a fresh search for evidence, and he embodied the results of his labors in a special report. This report fell into the hands of the provisional government established after the Revolution of February, 1848. Arago, who was one of Libri's chief enemies, was now in power. At an evening sitting of the Academy of Sciences, held Feb. 28, a note was put into the hands of Libri advising him to save himself from an outbreak of public vengeance, and he fled to England. The

journal with which Arago was connected said that his flight made very little difference to the Academy—that there was only one Italian less! Boucly's report was copied in various journals, with comment more or less unfavorable to Libri.

Shortly afterwards the government took possession of Libri's rooms in the Sorbonne, broke open his desk, burned large quantities of papers, and removed many of his books. Some of these were so carelessly moved that five volumes were picked up on the staircase leading to the rooms or in the neighborhood of the Sorbonne. In the act of accusation it was stated on the evidence of two witnesses that one Abry had worked with Libri and two other persons for a fortnight or three weeks erasing seals and stamps on the books. Later when Abry was called to the witness stand he gave evidence favorable to Libri.

A BITTER POLEMIC

Later in the same year, 1848, Libri published in London a reply to Boucly's accusation, a lengthy document of 115 pages, filled with detail, in which he threw the burden of proof on his accusers. He gave an account of his income and the way in which he procured his library, which was the result of thirty years' collecting. He stated that he received annually 23,000 francs from his various government offices, and that this was supplemented by receipts from his mother in Italy. By living very economically he had for years been able to spend 20,000 francs annually on books. As to his reasons for leaving France, he said that he had been a writer for the *Journal des Débats* and a supporter of Guizot's policies, and for six months before the Revolution the Republican journals had pointed him out as an object for vengeance. He showed how in 1845 he urged upon the authorities of the library at the Arsenal the acceptance of books that he had met with bearing the mark of that establishment, and that the librarian repudiated their "restoration," claiming that he could not ascertain that any such books had been stolen or lost, but he was willing to receive the books as a gift. From Grenoble word came that all

BIBLIOTHÈQUE NATIONALE—BOOK STACKS

BIBLIOTHÈQUE NATIONALE—MANUSCRIPT DEPARTMENT READING ROOM

the manuscript psalters belonging to the library were still in place. As to the early edition of Theocritus which Libri was alleged to have taken from the library of Carpentras, Libri claimed that it was a regular exchange, in which he gave his own inferior copy of Theocritus with other books worth from 400 to 500 francs, and he printed a letter from the librarian substantiating all this. The Carpentras copy was described in the catalog of the Libri sale, and it was thus that he was known to have had it in his possession. Moreover, Castiglione's "Cortigiano" was missing from Carpentras, and as a copy was listed in the Libri sale catalog, the two facts were associated and inferences drawn damaging to Libri. That the Carpentras copy was an ordinary one worth 20 francs while Libri's was in a Grolier binding and sold for 519 francs seems to have escaped the attention of the public prosecutor. To the confusion of his accusers, Libri was able to publish a letter from the bookseller who had sold it to him. In answer to the prosecution's contention that Libri had the stamps removed from books in his possession, Libri replied that books thus stamped came into the market frequently, that they were duplicates honestly disposed of, and he preferred to have the stamps removed, as the books looked cleaner and neater. In some cases Libri refused to buy books unless the stamps could be washed out or erased. Libri said that a thief would not have published the discoveries which he had made among the rare manuscripts, but he himself published the story of some of his finds in the *Journal des Savants*, 1841-42.

In a letter to M. de Falloux, the Minister of Public Instruction, Libri said that it was a common thing to find books, manuscripts and autographs offered for sale and bearing the stamps of the most famous libraries of France. In order to prove this statement, Libri says that he went to some of the best known booksellers in London in search of books on their shelves bearing library stamps still legible, and also looking out for books with stamps that had been partially removed or wholly cut out.

In four shops, in four days, he claimed to have found eighty-two volumes of this kind, of which the majority came from the Bibliothèque Nationale, the Mazarine, the Library of the Arsenal, the Institute, and other well known establishments of France. Others came from certain Italian collections, such as the Palatine in Florence, and the public libraries of Ferrara and of Parma. Some had stamps effaced or cut out. Libri bought them all and printed receipted bills from the booksellers describing the volumes in question. Libri went on to say that his friends, knowing of his interest in books with library stamps to be found in the stock of booksellers, sent him many examples from the Parisian book shops and stalls. In one shop in Paris, owned by the father of a sub-librarian in the office of the Minister of the Interior, were found one hundred and nine volumes bearing marks of ownership of the most celebrated libraries of Paris and the provinces. In addition, Libri claimed to have found at auctions and in well known book stores several hundred autograph letters which had formerly belonged to French public libraries and national archives, as well as the offices of various ministers and public officials. These, like the books, were then bought by Libri, with every possible formality and safeguard. That there were many interesting manuscripts taken from the Institute library was shown by the appearance in a sale catalog of letters from Napoleon Bonaparte to the president of the Institute, letters from Haydn, Rossini, and Klopstock to officials of the Institute on the occasion of their election to membership. Haenel (*Catalogi manuseriptorum*, 1830) is cited to show that in this bibliographer's opinion several manuscripts had disappeared at this time "because the doors had been carelessly locked."

In his reply to Boucly, Libri stated further that he had proposed to present his collection to the Bibliothèque Nationale under certain conditions, but that the proposal had met with an unwillingness to comply with these conditions, as if they involved an infraction of the rules of the establishment. In the face of these difficulties Libri

had appealed to Guizot, who had spoken to one of the keepers of the library and had received the same answer. The conditions imposed were: (1) that the collection should be kept together in one room bearing the name of Libri; (2) that under no pretext should one volume be separated from another; (3) that within a certain time a catalog of the collection should be published. Libri's friends maintained that it would have been absurd for him to have made such an offer if his collection had been formed by plundering the public libraries of France, as he would thus have afforded a sure means of tracing the pilferings committed. The advocate Lamporecchi said that it was the first time in the annals of criminal jurisprudence that anyone had been accused of stealing in order to make a gift of the stolen object. In the act of accusation it was hinted that the conversation in which this offer was made was a very vague one, and it was stated that if the offer had been made seriously it would have been accepted. Guizot, however, wrote a letter to Libri under date of July 30, 1849, stating that four or five years earlier Libri had proposed to give his library to the national library, providing that it would be kept in special rooms bearing his name. Guizot legally attested this fact with its attendant circumstances.

Naudet, as head of the Bibliothèque Nationale, answered Libri's letter to de Falloux. He summed up Libri's contentions under three heads:

1. All the libraries of France, but especially the Bibliothèque Nationale, had been pillaged.

2. A great many books and manuscripts coming from these thefts had been offered for sale.

3. Private collectors could have in their collections, very legitimately, manuscripts and books taken from public libraries.

Naudet granted that the Bibliothèque Nationale had suffered very regrettable losses, but that the number of books taken was fifty thousand could not be conceded for a moment. This gross exaggeration was due to the statement of Paul Lacroix (Bibliophile Jacob), who claimed that

twenty-five thousand of the books which had been stamped and cataloged, and an equal number of those not stamped and cataloged, were missing from the department of printed books. Later Lacroix explained that by a second category he referred to the books which had never been deposited for copyright purposes, which, as Naudet pointed out, the Bibliothèque Nationale had no legal way of claiming. Libri granted that the custodians did not have the help to make an inventory to find out the losses of the library, but Naudet denied that an inventory was not being made. However, Naudet did not pretend that his colleagues could do the work with the speed with which the checking up was done at the British Museum, where Libri claimed that the assistants read the titles at a rate of from nine to eleven per minute.

A writer, who it was claimed "knew the libraries of Paris perfectly," asked in *L'Illustration* as to "what, for example, had become of all the books which made up the *Inferno* at the Bibliothèque Nationale?" Naudet explained patiently that the *Inferno* was simply a closed case in the printed book department, of which the custodians alone had the key, and in which were locked certain pernicious books and some rarities of considerable money value. He added that the custodians were ready to show the *Inferno* to any one who would present himself properly provided with the legal papers for an inquiry, or even to any one who had a serious intention of investigating, a desire to know the truth and to testify to it. As to Libri's claim that many books stolen from libraries were to be bought from booksellers, in support of which Libri had printed a good deal of testimony, Naudet pointed out that Libri had not observed the first rules of historical criticism, had not weighed the testimony, had not asked himself whether the narrator himself was present, whether he was unmoved by passion, whether he was in a position to see clearly, whether he had told all, had said nothing but the truth, had not contradicted himself or others. One bookseller who claimed to make a sort of specialty of picking up books bearing the Bibliothèque Nationale

stamp was shown to have been denied the moderate price asked for a certain book which he had tried to sell back to the library. The library officials had always refused to authorize any one to buy books back on the account of the library; they granted that they spent a small sum, not more than forty francs a year, in payment for books offered them in good faith by persons who had acquired them from dealers, but they never did anything to encourage traffic in this line.

Achille Jubinal, who had been dismissed from his professorship by the Carnot administration, published in 1850 a pamphlet on an unpublished letter of Montaigne, accompanied by some observations on the reputed large number of manuscripts which had been either abstracted from or mutilated in the Bibliothèque Nationale. He began by telling of some of his experiences in the reading room, where he was denied certain books which he asked for, and he made so many charges and insinuations that another polemic was begun. The administration of the library issued a reply to Jubinal's statement, saying that his estimate of 20,000 volumes stolen from the department of printed books was as valueless as that of Lacroix, who placed the number at 50,000. The source of these estimates was a report by Letronne to the Minister of Public Instruction in 1834, where, by an approximate calculation, it was estimated that there were at the Bibliothèque Nationale 4248 works incomplete, or made incomplete by daily use, by loans, or by mutilations, and that these works represented in the form of sets a total of 33,316 volumes, of which it was estimated it would be necessary to replace 11,530 volumes. However, at the time this report was made, many of these volumes had been claimed from borrowers, others had been found after their death, and a certain number had taken their proper places on the shelves, thanks to the work of classification. This was a long cry from the fable of 20,000 stolen volumes, on which Jubinal had dwelt.

It was further shown that Jubinal was in error when he cited the first edition of

"Cymbalum mundi," 1537, as among the books which had disappeared from the Bibliothèque Nationale. Jubinal had been misled by a statement in the memoirs of Charles Nodier, who said that Van Praet had shown him this precious work. Nodier had confused the first with the second edition, and Jubinal might easily have verified the facts for himself.

As to Jubinal's statement, based on Lacroix, that about 600 volumes had been extracted from the "Inferno" by the young employes of the library, it is stated in the official reply that this collection had never contained more than 150 volumes. Before 1789 there had been indeed a more extended "Inferno," where were put works condemned on account of religious controversies, but during later years, after the heat of these discussions had died down, the books had been put back into the main collection. Under Van Praet's administration there had been a small special reserve of 60 or 80 volumes of licentious works having no bibliographical value, from which possibly some books had disappeared, but from the real "Inferno" it was authoritatively stated that no book had ever disappeared since its inception.

Prosper Mérimée came to the aid of Libri, his fellow member of the Institute, in an article contributed to the *Revue des Deux Mondes* for April 15, 1852, for which he was condemned to fifteen days' imprisonment. The judge who sentenced him laid particular emphasis on the following passage: "I should be tempted to believe that an act of accusation is governed by the same principles as a novel or melodrama, where art, not truth, is the main thing. If it is so, I believe I have the right to criticise the act of accusation against M. Libri. I used to write novels myself, and I do not go beyond my bounds in appreciating a work of imagination." Mérimée suggested as a plausible theory by which to account for the bibliographical ignorance and the perversion of the law displayed in the document, that the bibliographical part was the work of the judges and that the legal part was done by the literary commission appointed to assist them.

The prosecution made much of the things found in Libri's rooms—tooling irons, printer's types, and volumes which had been made in imitation of old bindings. If it is a fault to restore books, why, asks Mérimée, were not the binders who worked for Libri arrested? To falsify or repair seemed to the prosecution to be one and the same thing. Mérimée claimed that Libri was so little concerned about concealing the origin of his books that he had them dusted and arranged by assistants from the Paris libraries.

Mérimée said that Libri had sold in 1847 a letter from Aretino to *Paul Manutius*; the Montpellier library had lost a letter from Aretino to *Aldus Manutius*; and the logic of the judge which associated these two events was based on a syllogism like this:

I have lost my cat.

John has sold a dog.

Therefore John has taken my cat.

The logic used in the trial was not:

Such a library has lost a book.

There is proof that this book has been stolen by Libri.

Therefore Libri is a thief.

But the judge, according to Mérimée, argued thus:

Libri is a thief.

Therefore he has stolen such a book.

For this book is lacking in such a library.

Mérimée thought the whole case was a justification for Molière's pleasantry: "The Parisians begin by hanging a man, and then they try his case."

Libri disliked the Jesuits and he believed that the *École des Chartes* was infected with them. One member of the *École*, M. Lalanne, said publicly to M. Merlin, a sub-librarian at the Ministry of the Interior, that the *École des Chartes* would not be content until it had had Libri hung. Members of the investigating commission substituted the name of Libri for that of Pierrot in the quatrain:

Aspice Libri pendu

Quod librum n'a pas rendu

Si librum reddidisset

Libri pendu non fuisset.

One of the commissioners is said to have remarked: "Every collector is a thief. That is why the *École des Chartes* is making a bitter war against all the collectors, and if we could only prove that M. Libri had stolen a little autograph worth a franc our end would be accomplished."

"Libri," remarked one journalist, speaking of the fatal influence of names and making a pun at the same time, "it is exactly that which has ruined him!" *Books* certainly proved his undoing. Had Libri been placed at the head of the *Bibliothèque Nationale* he might have made an enviable reputation as a librarian. Burton in his "Book hunter" gives the correct psychological view of such cases. "The leaders in the German wars," says he, "often found it an exceedingly sound policy to subsidize into their own service some captain of free lances, who might have been a curse to all around him. Your great game-preservers sometimes know the importance of taking the most notorious poacher in the district into pay as a keeper. So it is sometimes of the nature of the book-hunter, if he be of the genial sort, and free of some of the more vicious peculiarities of his kind, to make an invaluable librarian. Such an arrangement will sometimes be found to be like mercy twice blessed—it blesseth him that gives and him that takes. The imprisoned spirit probably finds freedom at last, and those purchases and accumulations which, to the private purse, were profuse and culpable recklessness, may become veritable duty; while the wary outlook and the vigilant observation, which before were only leading a poor victim into temptation, may come forth as commendable attention and zealous activity."

THE CASE REOPENED

Undoubtedly a great deal of international jealousy and hatred entered into the Libri affair, and political enmity embittered the prosecution. After the heat of the polemic had died down, Delisle reopened the case when there seemed to be an opportunity to regain for the French libraries some of their lost treasures, and he made his researches into the history of some of the dis-

puted manuscripts without any bias other than his firm conviction that Libri had acquired them unlawfully. If there were any doubt as to Libri's guilt, Delisle dispelled it. The occasion for the new investigation was the attempted sale of the Ashburnham collection in 1880. In an official report to the Minister of Public Instruction on the manuscripts of the Earl of Ashburnham, Delisle claimed that Libri never offered to give his manuscripts to the Bibliothèque Nationale, and that he did not even announce publicly in France his intention of doing so. From papers to which he had access in 1883 Delisle showed that Panizzi, who in 1845 was on friendly terms with Libri, had offered to negotiate the sale of the manuscripts to the British Museum. Transactions were originally opened in January, 1846, but they were conducted with such secrecy that the name of the vendor was not known to the board of trustees. In a report submitted to the board on April 25, 1846, it was announced that the owner was a professor at Paris, a member of the Institute, a native of Florence, and author of a history of the mathematical sciences in Italy—which was paramount to naming Libri. When the negotiations fell through, Libri addressed proposals to the University of Turin, but with no better success. The assistant keeper of manuscripts at the British Museum, John Holmes, who was on friendly terms with the Earl of Ashburnham, persuaded the latter to purchase the Libri collection. The earl wished to consult the bookseller Rodd before closing a deal, and the latter was sent to Paris to look at the collection. He took with him £2500, which he was to turn over to Libri for the choice of his manuscripts. Rodd brought back the illuminated Pentateuch and Lorenzo de Medici's "Book of hours." The earl was so delighted with these that he sent Rodd on a second journey to Paris, and as a result sixteen cases of manuscripts arrived from Paris at Ashburnham Place, April 23, 1847. The whole business was transacted amidst the greatest secrecy. Delisle was sure that the earl never suspected for a moment that he was treating with thieves or the receivers of

stolen goods. Later, however, the earl scented fraud, and he wrote to Delisle, June 16, 1869, saying that other manuscripts from the Libri collection contained what he had long suspected to be fraudulent attempts to conceal the true source of property that had been lost or stolen. The earl died in 1878, and his son was later convinced that the fragments of the Pentateuch purchased by his father in 1847 had been stolen from the Lyons library, and accordingly he placed them in the hands of the French ambassador at London to be restored to the city of Lyons. The theft of these fragments must have occurred after 1834 (when the manuscript was seen and described as in the Lyons library), and it may have happened before 1840, the date of Libri's appointment as inspector, but the fact that Libri sold them in 1847 looked very suspicious to Delisle.

In 1879 the young earl offered his father's entire collection to the trustees of the British Museum for £160,000, but when the trustees asked him to make a separate offer of the manuscripts, apart from the printed books, a new inventory was made, and £160,000 were asked for the manuscripts alone. This closed the negotiations for the time being, but in the latter part of 1882 the trustees learned that the entire collection could be bought for the original price, and they asked the Treasury for the money, with the permission to restore to the French government on payment of £24,000 those portions of the Libri and Barrois collections which were said to have been abstracted from French libraries. Delisle had written to the trustees warning them that the Libri and Barrois collections contained many manuscripts stolen from French libraries and falsified, and asked them to take into consideration the very natural desire of the French people to regain possession of monuments precious for their history and for their literature. Delisle showed how the fourteen most ancient manuscripts of the Libri collection were thefts committed during the year 1842 at Lyons, Tours, Troyes and Orleans. The British treasury did not grant the necessary funds for the purchase of the Ashburnham

manuscripts in a lump and so negotiations fell through, but later those manuscripts which referred more particularly to England, namely, the Stowe collection, were acquired for £45,000.

Delisle had written the young Earl of Ashburnham in 1880 that whenever he might offer his collections for sale by auction the French government would reserve the right to attach any such as might have come from a national depository the moment they entered the country. "French dealers and amateurs will be warned," wrote Delisle, "that the collections of Libri and Barrois are full of manuscripts of suspected origin to which the French government is determined to make known its right of property the day when these manuscripts enter France. This consideration will cast a chill over even the English dealers and amateurs; they will know, in fact, that neither they nor their heirs can ever dream of selling in France, even privately, manuscripts procured from thefts that no limitation can cover. Public institutions themselves will be exceedingly reserved. They will hesitate to collect monuments, excellent

in themselves, but to which the name of Libri and Barrois have given a bad reputation. The Libri and Barrois manuscripts have not, therefore, for private collectors or public institutions the value of ordinary manuscripts. Since we now know in what way the collections of Libri and Barrois have been formed, these collections have been stamped with discredit in the eyes of all impartial judges. In purchasing them one should dread to pass for an accomplice of these Barrois and Libris, and to have one's name associated with the names of thieves and forgers whom no one any longer dares to defend." On March 17, 1883, the board of trustees declared that the manuscripts in question ought never to have left France, and by refusing to purchase them they gave the French the opportunity of recovering them. The negotiations in connection with this transaction and the return to France of the most precious of the Libri and Barrois manuscripts were made the subject of a report written by Delisle to the Minister of Public Instruction under date of Feb. 23, 1888.

(Continued in the June number.)

THE WORK OF A LIBRARY INFORMATION DESK

By RACHEL RHOADES, *First Assistant, Reference Department, Library Association of Portland, Oregon*

LIBRARY JOURNAL readers who studied the floor plans of the Multnomah County Public Library in the January issue may have noticed that "the second floor lobby, which is lighted from an open well, has been utilized for the public catalog and information desk. Back of the desk is placed in a niche the Lemnian Athena, the genius of the Library. Opening from this hall on one side is the Reference department, at the far end of which are the Map and Art rooms, on the other the Circulation department, and at the end of this room is the School department." Across the front of the building are the Technical room and Administration offices. If the

catalog is the key to the books, the Information desk may be called the key to the Library. Stationing an assistant at the catalog to give unobtrusive help and instruction, as at Newark, is not uncommon. But it is thought that except for the precedent of Providence, R. I., the Portland plan of an Information desk and public catalog between Reference and Circulation departments is unique. This adds interest to the work.

At 9.30 p. m. of my first Saturday I felt as if I had been mentally jumping rope all day. Now the work, though ever varied, seems to have plan. It falls into seven parts, as follows:

1. Welcome to newcomers.
2. Distribution of applications and guidance about the library.
3. Assistance in the use of the catalog.
4. Coöperation with
 - a. Circulation department.
 - b. School department.
 - c. Reference department.
 - d. Children's department.
 - e. Clubs and University Extension classes.
5. Telephone calls.
6. City information and miscellaneous service.
7. Routine work
 - a. Newspaper indexing.
 - b. List making.

The Information desk is the first point of contact between the assistant and the ever increasing stream of people coming for books, for study, for answers to specific questions, and for entertainment and instruction through lectures, club meetings and conferences. Prompt welcome is essential. Even a library smile need not become mechanical, for no two people whom one greets are alike, and questions requiring more than a word of direction are seldom repeated.

Fifteen or twenty applications are asked for each day. Half the people are in a hurry and can be depended on to read the rules. Others, unfamiliar with a library, are glad of explanations. Many appreciate bulletins and lecture lists to take away after this first visit to the library. One day a Jewish woman asked how to write A-n-n-a in English. She could only make the Yiddish letters, and a friend had signed her application and transliterated the last name. "I had a card in Helena, Montana. Can I use it here? It's a Carnegie library, isn't it?" Strangers often volunteer words of praise for the beauty, convenience, and resources of the library. Over the telephone came the query, "Was the stone in the library made in Oregon?"

Repeatedly people ask where to return books, where to turn in applications, and where the catalog is. One needs to know the resources of all departments to guide them aright.

The card catalog is a strange tool to one in every four or five, and many who have been shown how to use it pretend ignorance. Others say, "Please help me—you'll find what I want so much quicker than I could." But the young people's independence proves the value of the School department's lessons. Many who look up authors for themselves ask at the desk what subject to look under. Then there are tricks which can be passed on, as "What Smith wrote 'Enchanted ground'?" "I don't know, but we can look under the title," etc. Comparatively few people read through a card to the date of publication. A Y. M. C. A. man asked by number for an old, unscientific book on sex hygiene. In the Reference room I handed it to him, but called his attention to the date—1891,—and when we consulted the catalog he was glad to have Hall's "From youth into manhood" and Ellis' "Task of social hygiene" substituted.

Classification, the meaning of book numbers, and the arrangement of the catalog interest many men. A man who has charge of the card index at the telephone office asked, "Do you file cards in front of the guides or behind them?" I answered behind and pointed out the waste motions which filing in front would involve. He went away with Gilbreth's "Motion study" and Emerson's "Twelve principles of efficiency."

Often a book is not in the library, and if it is something which might be a wise purchase the information desk assistant can please the questioner by explaining our request cards. A boy who reads while waiting in the automobile he drives brought in a sheet of Montgomery Ward's book catalog, checked up the fiction we had, and asked for request cards. I discouraged him about McCutcheon, but let him fill out cards for B. M. Bower and gave him Mabie's "Blue book of fiction." He is going to read "Queed," Cooper's "American story tellers," and ask the secretary of the University of Oregon Extension work about courses.

Before going into the Circulation department many people stop to look up

numbers, and ask at the desk where the books are located. The assistant answers by reference to a diagram. Often people are referred thus to a subject, as 793, entertainments, or 811, American poetry. In the lobby is a table bearing the sign, "Lists—take what interests you." When no list has been prepared, one often needs to step to the catalog and suggest two or three books out of the forty or fifty under a subject, which seem best adapted for the questioner. Four books instead of one had to be chosen for a woman whose husband was preparing for an examination for the consular service, who wanted "a book on international law, modern Europe, Latin America and the Far East."

Many people stop at the Information desk for suggestions about fiction, and this relieves the busy assistant on the floor in the Circulation department. A puzzling request was for a novel, "What a butterfly is before it comes out of its cocoon," which proved to be "The chrysalis." Baker's "Guide" is at hand, but it would not have helped the old gentleman who asked, "Do I want to read 'David Copperfield'?" It's an American story about a horse race." "David Harum" was suggested. An annotated list of novels on social service has been consulted frequently. Pathetic needs are told, as of a woman dying of cancer, who wanted her friends to read aloud Elizabeth Stuart Phelps' books, which they could not buy in town. Would the library sell its copies and buy new ones? No, but the ladies could obtain library cards, borrow the books, and have them renewed as long as their friend lived. There is hardly time for these heart stories at the busy charging desk.

The library was a refuge for lonely men on Christmas day, and one couldn't help smiling with the man who said appreciatively, "I'm glad we've got as good a place as this to come." One evening a clean cut fellow asked, "Is your memory good? I want to know who wrote 'Molly Make-Believe.'" Returning from the Circulation department he commented, "Some one else is lonely too. I get blue about once a week, and have read it four or five

times." "Have you read 'Marjorie Daw'?" He had not, and came back presently to gossip about his surprise at the end of the story. "I'm three thousand miles away from home, you see." I hope "Dawn O'Hara" made him feel less blue, for wasn't she "the girl who laughed?"

The high school reading list is kept at the Information desk and often consulted. People are sent to the School department for pictures. Pupils ask for help in rhetoric, as the lad who said, "Did you ever read a description? I've got to write one!" Daudet's "Monday tales" and Galsworthy's "Commentary" were suggested. Camp Fire girls ask for help in choosing Indian names and study up honors in flower, bird or baby books. I like to recommend Jeannette Marks' "Vacation camping," and "The What-Shall-I-Do-Girl."

As the Information desk is part of the Reference service, coöperation is perhaps a misnomer. But there is the closest connection. If a question is stated at the Information desk, the exact book to consult in the Reference room can often be named, and its location indicated on the chart, so that the student does not even need to ask further assistance. Proof that he knew how to use the library independently was given by the man who said, "You should have an alarm clock in the Reference room. I nearly missed my dinner." Then again there is the typical lady who asked, "Now, my dear, if you were going to write a paper on feminism, what would you make your main point?" The concreteness of certain questions makes them funny, as "A book on the culture of crawfish," and "How do you make punch?"

Sometimes the boys and girls stray upstairs. One engaging lad asked, "Say—who was the George Washington of South America?" I hazarded, "Bolivar." "Oh—that's the fellow." And a little girl asked, "Please tell me who Dolly Madison's letters were written by?" Another was curious to know what Mark Twain had to do with writing "Personal recollections of Joan of Arc."

Evening is the busy time. Then one feels the pulse of the community. Lec-

tures, exhibitions and club meetings in the library make one think of a three-ringed circus. Several old men come in almost every evening asking, "Well, what's on to-night?" The day after a stormy taxpayers' meeting came the laconic question, "Where's the fight going to be to-night?" Announcements of University of Oregon, Reed College and Pacific University extension lectures are distributed, and people's attention called to new courses. Coöperation like that between professors and staff in a college library is possible.

Telephone questions which cannot be answered through the catalog, a dictionary, or an almanac, are turned over to the Reference department. "What day of the week was January 3d, 1891?" "Saturday." "Oh, dear, and Saturday's child must work for a living. I don't want to do that!" came the plaintive voice. She would have enjoyed working for her living, if part of the task had been making foreigners feel at home in the library. Work with our new citizens yields many humors and puzzles and human touches, which make information desk work a delight, but all cannot be crowded into a single paper.

Every library assistant needs to keep up with the times. But she who does not would be lost at the Information desk. Theaters, concerts, location of buildings, street numbers, cars to reach the suburbs, free days at the Museum of Art, these are some of the points on which information is asked, or may be courteously volunteered to strangers who are a bit diffident. A map of Portland has been worn to pieces in three months. Some of this miscellaneous service is not strictly library work, but it makes friends for the library so it is probably not mal-employment. A school teacher asked me about library training, and introduced her niece, who took home "Vocations for the trained woman," and wants to study the high school subjects which will help her in library work by and by. A Reed College girl was sent to the Information desk to ask about Girls' clubs. She wanted experience as a leader before taking examinations for playground service, and a library Camp Fire guardian was

able to give her suggestions. An elderly German American woman asked if there was any one here who could read German *schrift*. I made out and translated for her a letter from a German pastor to whom she had written for information about her parents who had fled the country in '48 to escape religious and political persecution. Men of all religions and all political views are welcome at the library, and are even given the use of rooms in which to set forth their doctrines. Many occasional visitors thus become readers.

But the Information desk does not hold one long continued reception. There are quiet morning hours and moments of time for routine work in the afternoon and evening. The *Morning Oregonian* is read and indexed by one assistant. Others index periodical articles, check lists, etc. List-making completes the circle of work, for in meeting people one learns what lists would be helpful, and the examination of unfamiliar books is profitable to help assistants who work much with a catalog from losing the book sense. Interest in people, knowledge of books, and civic sense, mixed with equal parts of common sense, this is the ideal which must be kept in mind at the Information desk.

PAMPHLETS AND CLIPPINGS IN REFERENCE WORK

VISITORS to the coming meeting of the A. L. A. may be interested in the way the Public Library of the District of Columbia cares for pamphlets, clippings from magazines, and newspapers. As in other libraries, pamphlets had been coming to the library for years in large numbers and most of them were relegated to the waste basket, as they could not be put through the regular course of cataloging, for want of time and money. A few found their way to the reference room, where the value of this ephemeral literature was impressed on the minds of the reference staff, particularly in response to the demand for help in high school debates. Much of the material was not found to be of sufficient importance to be regularly cataloged. Be-

sides this we wanted to use it at once, and could not wait for its regular course through the accession and catalog department. The object to be attained was to make it immediately available in the reference room, and to call the attention of the public and also of the staff to the fact that we have such material on given subjects.

The clippings and pamphlets are put in tough manila envelopes, without flaps, $9\frac{1}{2}$ by $11\frac{1}{2}$ inches, and put into a vertical file in a room adjoining the reference room. When an envelope is full it is withdrawn, put into pamphlet box with drop cover, size 5 by 10 by 15 inches, and a guide card inserted in the file, "See shelves," in the same room, where about fifty of these boxes now stand. The envelopes and boxes, arranged alphabetically, are thus self-indexing.

If the subject matter is new to this file, it is considered carefully and a possible subject heading is suggested to the head cataloger, who makes a decision in accord with the subject work of the catalog. Sometimes the subject is so new that it has not yet appeared in the catalog, which has to be gone over for books on related subjects, and the new subjects are brought out in analytic or main subject entry.

When the subject is decided on, it is written on the pamphlet and typewritten in red on top of a multigraphed card which reads, "For pamphlet material and clippings on this subject consult assistant in reference room."

The entry thus made, and a copy filed in the official and also in the public catalog at the end of all other entries on the subject, may represent one item or twenty or forty or more, as in the case of woman suffrage, or other subjects much debated by school boys and girls.

In some cases the pamphlet is valuable, both on account of the subject and because the author is an authority on that subject. If the Library of Congress has cataloged the pamphlet, its cards are ordered, for both subject and author, and put in official and public catalog. These cards are stamped "Pamphlet collection—consult assistant in reference room."

About twelve hundred subjects are represented in this file, covering a wide range of interests, chiefly sociological.

Of the use of these pamphlets in the reference room no account has been kept, but they are frequently requested for reference use. During the year July, 1912-June, 1913, 885 pamphlets were circulated, to school boys and girls, for debate work chiefly; to social workers, and to women's clubs.

For the past two years efforts have been made to collect pamphlets, reports, hearings, monographs, leaflets, booklets, in fact any publications along sociological lines. These embrace things issued by the Rockefeller Foundation, the Russell Sage Foundation, the associations for and against woman suffrage, the Carnegie Foundation, the National Committee for Mental Hygiene, the National Vigilance Committee, the World Peace Foundation, New York Milk Commission, special reports of police and health departments of various cities, American Baptist Publication Society, and American Unitarian Association publications on social work in the church, etc.

Reprints from the *Congressional Record*, House and Senate documents, and a variety of government documents are not cataloged as complete files are entered directly under subjects, and made available immediately.

The *New York Times* is regularly clipped for sociological articles, and back numbers of magazines that have circulated from the library are also taken apart and pages or sections are added to these files.

In many cases nothing could be furnished really new and up-to-date but for this collection. In other cases, it has added a vital touch to the other resources of the library and it is instantly available—no getting of call numbers or calling for pages.

Multigraphed cards to indicate uncataloged material in the catalog have been used for several years for the minor bibliographies. The larger lists, bound volumes, and Library of Congress bibliographies are regularly cataloged. Our own typewritten lists, typewritten lists from the Bureau of Education, and advance lists from the Library of Congress, as well as

those clipped from library bulletins all over the country, or from separate lists issued by libraries, clipped from the *Independent*, etc., are filed alphabetically under subject. The subject is written at the top of a multigraphed card reading, "For further references on this subject consult assistant in reference room."

This file of minor bibliographies has been growing for eight years, and has justified itself many times. There are over six hundred subjects represented, of very diverse sorts, from lists on writers of the day—magazines or publishers' booklets—to lists on historical subjects, or apperception, or Zuni Indians. Lists, pamphlets and clippings on business, agricultural, and technical subjects are treated in a similar way, and are referred to industrial department instead of to the reference room.

GRACE E. BABBITT, *Reference Librarian*.

A NORTHERN EUROPEAN TOUR

A SECOND tour for American librarians to the Leipzig Book and Library Exposition and to the British Library Association meeting at Oxford, England, including the most beautiful parts of Norway, Sweden, Denmark and Northern Germany, has been arranged by Mr. James C. N. Hanson.

The party will leave New York for Christiania by the *Oscar II.* of the Scandinavian American Line, on July 14. There will be a stop in Christiania for three days to view the National Exposition held in celebration of the one hundredth anniversary of the constitution adopted by Norway in 1814; and to examine the art galleries, the National Museum, the new University Library, just opened, and the great public library system.

The trip over the inland mountains by the new railway to Bergen will follow, including one day in this quaint, mediæval city with its splendid museums and its glorious mountain scenery. Both at Christiania and at Bergen the party will meet library friends with American training, as the public libraries of these cities, as well as of Thronhjem, are conducted in part by graduates of American library schools.

The trip from Bergen northward to Thronhjem will cover several days, and take in the most beautiful of the fjords. Thronhjem has the finest cathedral of northern Europe, and is, like Bergen and Christiania, surrounded by magnificent scenery. The northern summer nights can be viewed in all their grandeur on this trip northward.

From Thronhjem to Stockholm the party will proceed by way of the famous Meraker Valley. In Stockholm the party will stop for two days. This city is known as the Venice of the North, and its Royal Library, its great museum, various art galleries, and other public institutions, including the Royal Castle, offer unusual attractions.

Upsala, with its great University Library, its castle and cathedral, churches, and other structures dating back to the middle of the twelfth century, and the university librarian, Axel Andersson, the bosom friend of so many American library folk, will next be visited. From Upsala the party returns to Stockholm and proceeds the same evening to Lund, where the ancient cathedral and new University Library offer special attractions.

From Lund it is only a few hours by way of Malmö to Copenhagen, the largest city of northern Europe. Here again the art collections, the great Royal Library, the University Library, the museums, and the magnificent open air concerts given by the royal orchestra will prove a revelation to those who for the first time visit this city.

Three days will be spent in Berlin before proceeding to Dresden and Leipzig. After three days at the Book and Library Exposition, the party goes by way of Cologne to Brussels, and thence to London and Oxford.

ITINERARY

- July 14. Sail from New York by Scandinavian American Line, S.S. *Oscar II.*
- 25. Arrive Christiania.
- 26-27. To be spent in Christiania, the capital of Norway, beautifully situated at the head of Christiania Fjord, surrounded by wooded mountains. Carriage drives to points of interest, and excursions to Bygdø and Holmenkollen.
- 28. Leave by morning train for Bergen.
- 29. In Bergen, one of the oldest and most picturesque towns in Norway. The most interesting public buildings are the Kongshall and Valkendorf's Taarn, near Bergenhus.

- The St. Mariae, or Tydske Church, was built in the twelfth century. The Cathedral of St. Olaf was erected in 1248, rebuilt in 1537, and restored in 1870. A carriage drive will be taken to points of interest in the city.
30. Sail from Bergen by Norwegian steamer *Irma*.
 31. Call at Odda, Eide and Noreimsund.
 - Aug. 1. Call Balholmen, Flaam and Gudvangen.
 2. Leave Gudvangen.
 3. Call Visnaes, and Loen.
 4. Call at Oie, Hellesylt and Merok.
 5. Call at Naes, Molde and Kristiansund.
 6. Arrive at Trondhjem. Visit the ancient Fortress of Munkholmen, situated on an island in the harbor formerly used as a state prison, where the Danish prime minister, Count Griffenfeldt, was confined for eighteen years. A carriage drive will be taken to the famous waterfall of Store and Lille Lerfos.
 7. Leave by morning train for Stockholm.
 - 8-9. In Stockholm, the capital of Sweden. The chief attractions are the National Museum, Historical Museum, Northern Museum, Konstforening, or Art Union; the Djur Garden, the Belvedere, Royal Palace, Riddarholm Church, for centuries the burial place of the monarchs and other celebrities; the Riddarhuset, or Knight's House; and the Town Hall.
 - 10-11. In Copenhagen, the capital of the kingdom of Denmark. Copenhagen is an ancient and important city, strongly fortified. The Cathedral and Thorwaldsen Museum are among the most important buildings. The Rosenborg Palace contains a wonderful collection, and the Folkemuseum shows costumes, furniture and modes of life of Danish peasants. Parks are numerous, and Tivoli, a famous pleasure resort, is worth a visit. Carriage drive will be provided.
 12. Leave by early morning for Berlin.
 - 13-14. In Berlin. Carriage drive. Visit the Royal Palace, Friedrich Museum, Cathedral, Parliament House, the Royal Palace and Mausoleum at Charlottenburg; also excursion to Potsdam to visit the Royal Palace, the Friedens-Kirche and Sans Souci.
 15. Berlin to Dresden.
 16. Dresden to Leipzig.
 - 17-19. In Leipzig.

After departure from Leipzig travel tickets will be supplied via Cologne, Ostend, London, Oxford to Liverpool, and steamship berth at rate of \$57.50 by the steamer *Teutonic*, sailing Sept. 5, is included in the fare. Hotel and other accommodations will cease with breakfast in Leipzig, Aug 19. Inclusive fare is \$370, and covers ocean steamship accommodation first class from New York to Christiania (\$82.50 berth being provided) and for the return journey a berth on steamer *Teutonic*, carrying one class of cabin passengers (\$57.50 berth being provided). Travel tickets first class on all local steamers, second class on railroads on Continent, and third class in Great Britain. Hotel accommodation at good, comfortable hotels that can be thoroughly recommended, consisting of bedrooms, lights and service, and three meals

per day, meat breakfast, lunch and table d'hote dinner. Transfers of passengers and baggage, and free conveyance of steamship companies' usual allowance of baggage on ocean steamers, and 66 pounds of checked or registered baggage in Europe whilst with the conductor. Sight-seeing in the various cities, drives and local excursions, as mentioned in the itineraries. Necessary fees for sight-seeing, hotel servants, porters, etc., and the services of a competent conductor, local guides, etc., from arrival at Christiania, July 25, to Leipzig, Aug. 19. The fares do not include stewards' fees on the ocean steamers, laundry, baths, or private bills for wines, etc., at hotels.

Application for membership should be made to:

MR. JAMES C. M. HANSON,
1661 West 100th st., Chicago;

Or

THOMAS COOK & SON,
15 E. Jackson Boulevard, Chicago.

A "MODEL" BRANCH LIBRARY

A VERY interesting model of a typical branch library has been sent to Leipzig to be included in the A. L. A. exhibit. A full-page picture of the model is shown in this issue of the LIBRARY JOURNAL. The model is a reproduction of one of the Brooklyn branches, and was provided as a part of the Brooklyn exhibit, its cost being met by a special appropriation from the director's fund.

The model is designed to show a typical arrangement of a one-room building, in which the partitions between the various rooms are formed by bookcases. In some instances these cases are seven feet high, in others they are not over three feet, with a glass screen above, an arrangement giving complete supervision of the entire room.

The model was built to the scale of a half inch to a foot, the outside walls being given a stucco finish, and the ceiling being complete over the rear portion only of the room. The work of making the model was

MODEL OF A BROOKLYN BRANCH LIBRARY, PREPARED FOR THE LEIPZIG EXPOSITION.

done by Miss Mazie A. Barnes, of Jersey City, and the tables and chairs were made by a member of the staff of the Brooklyn Public Library.

"SPECIAL LIBRARIES" MEETING

A JOINT meeting of the Engineers Club of the Special Libraries Association, eastern district, and the Efficiency Club of Boston, was held on the evening of March 6 in the rooms of the Engineers' Club. The general subject for discussion was "Applied education and the specialized library."

D. N. Handy, president of the Special Libraries Association, was chairman of the meeting. He said that the special library idea is to have a large amount of specialized information in connection with every business, which, together with the literature of the business, must be at all times accessible to the man who needs it. The Special Libraries Association is bringing about a coöperation between different associations of men and is keeping in touch with the men who are doing things as well as with the latest literature.

The speakers of the evening were Horace G. Wadlin, librarian of the Boston Public Library, who spoke on "The public library and the man who earns"; Boyd Fisher, executive manager of the Efficiency Society, Inc., whose topic was "Studying for efficiency"; James A. McKibben, secretary of the Boston Chamber of Commerce, who told of "The chamber's system in getting information for its committees at work"; Miss Melita Knowles, executive secretary of the Women's Educational and Industrial Union, who spoke on "Training women for salesmanship," and G. W. Lee, librarian of Stone & Webster, who described "The specialized library of yesterday, to-day and to-morrow."

A wall exhibit of several different libraries, in preparation for the library exhibit at the Leipzig Exposition, was shown before the papers were read.

A full report of the meeting and papers presented was printed in *Special Libraries* for April.

A TRIBUTE TO HONORED TEACHERS AND COLLEAGUES

THE New York State Library and Library School have received many notable demonstrations of loyalty and affection during the past three years from those who have shared in the benefits or had a part in the work and spirit of these allied institutions, but no event has brought out in a happier or more touching way the reality, depth and universality of this feeling than the celebration which was held at the library on April first in honor of the three senior members of the staff and faculty who on that day completed each a quarter century of continuous service, Miss Florence Woodworth, Miss Ada Alice Jones and Mr. Walter S. Biscoe. In a sense the tribute was of course a personal one, expressing individual affection and regard that had grown out of delightful personal relations; but there was that in the demonstration which marked it unmistakably as something more than a mere tribute to friendship and affection. In nearly every utterance it was made evident that the celebration was primarily in honor of an idea, a cause, an ideal of service, and that the persons to whom the tribute was rendered were thus honored because they embodied in such a happy and complete measure that idea and ideal.

In the mere matter of numbers participating, the celebration was impressive. A score of libraries of New York state were represented in person, more than 100 members of the State Library staff were present, nineteen different classes of the Library School were represented, and librarians came to bring their tribute of interest and good will from places as far distant as Utica, Hartford, New York and Jersey City, and Cambridge, Mass. Letters of congratulation were received from 283 persons, telegrams from eighteen and cablegrams from two. The assembly room was bountifully supplied with flowers sent by those who were not satisfied with merely verbal tributes; and from the Alumni Association of the Library School came gifts sufficient to provide for each

of the honored guests, a beautiful and valuable memorial of the occasion.

The exercises were opened by Mr. J. I. Wyer, Jr., director of the State Library and of the Library School, who briefly and happily expressed the spirit and thought of the occasion, paying a warm personal and professional tribute to his former teachers and present colleagues, to each of whom he acknowledged a debt of deep gratitude. Though the occasion was nominally in recognition of *length* of service, it was the quality rather than the extent of it that Mr. Wyer pronounced most worthy of honor. Special commendation was made by him of the calmness, serenity and faith with which these devoted workers had seen the work of their best years destroyed in a night and the undaunted spirit with which they had set about the work of restoration.

Mr. Frank L. Tolman, reference librarian of the State Library, speaking in behalf of his colleagues on the library staff, expressed in poetic terms his sense of the value to the library cause of the service that these three devoted workers had rendered. "This occasion," he said, "is significant, for it commemorates not only a period in your long and efficient service to the state, not only an era in the history of this historic library, but an epoch in the library development of this country. Twenty-five years ago you cast your lot with that modern crusader, Melvil Dewey, in his holy war. Through this institution he hoped to regenerate the state. . . . The dreamer of dreams, the seer of visions, what can he accomplish without a band of disciples? The stubbornness of fact yields only to the greater stubbornness of industry, patience and intelligence. The toil and sweat of the struggle was on your shoulders, and a large measure of success was your reward. After many years, years of success, Mr. Dewey retired from the field, but his idea—his and yours—lived and flourished because you remained. . . . The future now looms big with promise for this library.

"Melvil Dewey was not the only dreamer of this state. As long ago as 1784, the

'first year after the war,' a group of idealists passed the first of a series of bills through the legislature. They dreamed of a federation of learning; of future universities, colleges, schools and cultural societies fused into one body and one spirit; the mystic University of the State of New York. This university was to be in very truth, as its president has lately said, 'the remembering and aspiring soul of the state.' The dream of Melvil Dewey and the dreams of those elder statesmen and the vision of President Finley, fuse into one. . . . The future hath still need of you, Miss Jones, and you, Miss Woodworth, and you, Mr. Biscoe."

Dr. John H. Finley, representing the State Education Department, expressed his gratitude and pride in the fact that the department included such representatives of unworldliness, idealism and devotion to the things of the spirit as those who were this way being honored. He regretted that the worth of such service as they had rendered to the state was not more adequately recognized by the legislature, but material recognition and pecuniary rewards, he said, were at best but small things compared with the rewards they found in the work itself. To them was given the high privilege of living in a world they best loved, of doing the work they most wanted to do, and this was life's supreme blessing. He envied them their lot, and to prove that this was no passing mood of the moment, he quoted the following lines, entitled "To a book-worm," which he had written and published a dozen years ago:

Oh, gentle worm, most wise, though oft denounced
 a pest,
 Who didst the pages of the ancients' books infest,
 Their contents chew upon and inwardly digest,
 I envy thee when o'er thy course I look.

For 'twixt the vellum walls of some sweet classic
 tome,
 'Mid leaves ink-scented, thou didst have thy cloistered home,
 All margined round with virgin fields in which to roam
 When'er thou caredst to leave thy lettered nook.

And when thou 'dst riddled thy last line, O, Ptinidus,
 What happy destiny was thine, denied to us,
 To lay thy sapient bones in such sarcophagus,
 And be forever buried in a book.

The greetings, congratulations and good

wishes of the Alumni Association of the State Library School, together with substantial memorial gifts, were presented by the secretary, Miss Harriet R. Peck, librarian of the Rensselaer Polytechnic Institute of Troy. She was followed by Miss Isabella K. Rhodes of the State Library staff, who had served as committee of arrangements for the celebration, and who read a dozen or more of the messages that had been sent to this committee from former members of the staff and graduates of the Library School. The following are a few typical contributions to this delightful symposium of good will, gratitude, pride and affection:

(Telegram) Lake Placid Club.

Grateful for the splendid record. We are celebrating the quarter centennial here also. Mailed three letters to the star and leading ladies.

MELVIL DEWEY.

Worcester County Law Library.

"I wish on my own behalf as well as on behalf of the class of 1889, to present felicitations on the triple twenty-fifth anniversary of Mr. Biscoe, Miss Jones and Miss Woodworth as members of the staff of New York State Library and as instructors in the State Library School. As one of the second class of the school, I remember the removal of the school to Albany under Mr. Dewey in 1889. . . . Each of the three celebrants contributed in his or her individual way to the success of the school. Mr. Biscoe's erudition was only equalled by his conscientious pursuit, even unto six places, of any out-of-the-way bit of knowledge. Miss Jones as cataloger, was firm and unbending in her ideals of scholarship. Miss Woodworth's sunny nature rounded off the rough places, and made plain the paths and smooth the walks of library service.

In behalf of my class I wish the three celebrants many more years of happiness, joy, peace and rest."

G. E. WIRE,
Permanent Secretary, class of 1889.

Miami, Florida.

"I regret that I cannot be at the celebration which is to mark the completion

of twenty-five years of service at the State Library on the part of Miss Woodworth, Miss Jones and Mr. Biscoe, but I wish to send my personal tribute. Every student who has passed under their care is under great obligation to each of these honored and well-loved teachers. Their instruction, their counsel and their example have not only shown us the methods of library science, but have also interpreted to us its spirit, and have impressed upon us the value of thorough, accurate, discriminating and persistent work in the library profession, and their personal and friendly interest in each one of us has been a constant encouragement and inspiration. They have our love, our gratitude and our good wishes without reserve. May they long continue to be the veterans of the library faculty of the veteran library school."

WILLIAM R. EASTMAN.

New York Public Library. Office of the Director.

"Miss Florence Woodworth

Miss Ada Alice Jones

Mr. Walter S. Biscoe

Dear Teachers: I can think of no better way to address you, because you were all teachers of mine when I was a student in the Library School in the winter of 1890-91, and there seems no other group cognomen that fits so well. . . .

"To each of you I owe so much for your kindly guidance in library science and for your loyal and able support when fifteen years later I became director there, that I cannot let the anniversary go by without a personal expression of appreciation.

"Those who know the history of the development of the library school idea and its influence on library practice and standards, realize what an important part all three of you have borne in that development. . . . I offer my congratulations in several capacities; first, as one of your former students, later as director of the State Library and Library School, now as director of the New York Public Library and president of the American Library Association. I also add my personal congratulations and best wishes for

a continuance of your great service to librarianship."

E. H. ANDERSON.

Rochester Public Library.

"My greeting and best wishes to the honored trio, Woodworth, Jones, Biscoe—names which stand in my mind for at least two distinct things. First, for individuals whose personality was indelibly impressed upon me during my school course and who are associated with two of the most delightful and learning-full years of my life. In the second place I think of them as types: Mr. Biscoe, the omniscient; Miss Jones, the exact; Miss Woodworth, the tactful. That the school has had such an unbroken record of success is due in a large measure to the remarkable combination of many strong qualities in the staff of instructors. . . . Long live the combination."

WILLIAM F. YUST.

Division of Educational Extension, Albany. Public Libraries Section.

"There are three things that go to make up the ideal librarian: the love of books, the love of folks and the love of system.

"The New York State Library School has its preëminence mainly in the fact that from its very beginning it has embodied in a preëminent degree, these three things. They have their ideal personification in the three persons whom we delight to honor to-day.

"Mr. Biscoe, in whom modern library science and the spirit and taste of the old time librarian are so perfectly blended;

"Miss Woodworth, in whose person the world of books and the world of folks find such a happy meeting place;

"Miss Jones, who, like Kipling, finds and reveals poetry in machinery and mechanics and makes the humble apprentice in cataloging glow with the feeling, 'I too am an artist.'

"In the thought of what their example and spirit are accomplishing in the large library world which they have done so much to enrich, may they find a full reward."

ASA WYNKOOP.

Washington, D. C.

To Miss Woodworth, Miss Jones, Mr. Biscoe:

When yet the art was young whereby man found
His way through pathless tracts of printed books,
There came three pioneers, each full of hope,
To make plain paths and wide,
The wise to guide.

The first said, "Those who come this way must know
Which turn leads to the springs of Bibelot
I'll place as sign board Graesse and Brunet,
Old Watt and Roorbach grey,
Will point the way.

The second said, "'Twere well to blaze a trail,
And records leave of pitfalls and of paths
Unsafe for entry, where destruction lies:
I'll blaze one in red ink—
'Twill make them think."

The third was silent still, while bending low
She planted in the by-ways, seeds and ferns,
And then she smiled and spoke: "They'll flowers find;
They may lose heart the while—
'Twill make them smile."

We who came after know not all the toil
Of the first workers in that unknown land,
Who cleared a way that we might build thereon.

To them we would repay

Our thanks to-day,

HARRIET WHEELER PIERSON.

To Mr. Biscoe:

Numbers answer to your name,
Numbers testify your fame,
Numbers rise your name to bless,
Yet your friends are numberless.

FLORENCE WHITTIER.

The formal exercises were closed with brief and characteristic responses from the three guests of the day, each modestly disclaiming any sense of special merit in the record they had so unexpectedly heard praised and honored, and each testifying to the joy and satisfaction they had found in their twenty-five years of service, both in the work itself and in the rare and precious fellowships it had brought them.

After these exercises, the staff of the State Library tendered an informal reception and repast to all participating in the celebration, providing an opportunity for personal congratulations and the renewal of many old associations.

A CORRECTION.

In the article on "Reference books as public utilities" (II. Some well-known dictionaries compared), which was printed in the March issue of the JOURNAL, it was stated at the bottom of the first column of page 184, that the Century dictionary

INTERIOR VIEW OF THE QUEEN ANNE BRANCH, SEATTLE PUBLIC LIBRARY

does not give forms of address. This statement was an error, as they are given in the Supplement under the general entry "Form," where they were overlooked because they are included in one paragraph, two columns long, in which the first entry is headed in black letters, "Biologic form."

LABOR SAVING DEVICES

"If a man preach a better sermon, write a better book, or build a better mouse trap than his neighbor, though he hide himself in the wilderness the world will make a beaten path to his door." Twentieth century manufacturers and salesmen are not in the habit of hiding themselves in the wilderness, and fifty or more of them will be at the District of Columbia Public Library all through A. L. A. week, willing and eager to show librarians how to lighten the day's work. Incidentally, there are many well beaten paths of asphalt from the New Willard and other hotels to the Public Library.

In an interesting and instructive article published in the LIBRARY JOURNAL in December, 1910, Mr. F. K. W. Drury treated

the subject of "Labor savers in library service." This subject has received in recent years a great amount of attention. There still remain vast possibilities of still further increasing the efficiency of library administration by the intelligent use of as many time and labor savers as can be obtained. The exhibit which will be held at the Washington conference, on recommendation and under the direction of the A. L. A. Committee on Administration, is an attempt to bring together as many as possible of the most important labor savers, and to bring manufacturers and librarians together for the interchange of information and the suggestion of new ideas.

Some of the advantages which it is believed librarians can gain from a careful study (not a casual inspection) of this exhibit are the following:

(1) To examine and see demonstrated certain devices of which they perhaps know little or nothing.

(2) To learn of the newest equipment and improvements on many old machines.

(3) To compare the merits of rival machines, for so far as possible the exhibit will include more than one of each type.

(4) To get suggestions for new ways of putting various devices to good use.

(5) To criticize any weak points of which they may know in any machine or equipment exhibited. The exhibitors would prefer to hear praise, but if there is any cause for honest criticism they want to know it.

(6) To give suggestions to the exhibitors of possible ways in which their machines or equipment might be improved for library use. The exhibitors expect the librarians to be keenly watchful for new ideas. They themselves will be no less alert.

In at least one important particular this exhibit will differ from the "business show," which has become so frequent in the larger cities. The manufacturers know that the exhibit was arranged primarily for librarians. In many cases the equipment they display will be selected because of its special adaptability to library

purposes, and things of interest only to commercial houses will be subordinated or entirely omitted. The exhibitors, too, can make a more satisfactory demonstration when they know the needs of the people with whom they talk.

It is hoped that this collection of labor savers will be found by no means the least attractive of Washington's many attractions. More detailed information will be given if possible in the *May Bulletin*, and a printed catalog of the exhibit will be distributed to all who register on their arrival at headquarters.

C. SEYMOUR THOMPSON.

THE PUBLIC LIBRARY,
Washington, D. C.

AMERICAN ASSOCIATION OF LAW LIBRARIES

THE annual meeting will be held in Washington, May 26, with headquarters in the Red Parlor of the New Ebbitt House.

PROGRAM

Sessions will be held on Tuesday morning and afternoon, and addresses will be made by the following:

Hon. William L. Wemple, Asst. Attorney General of the United States, on the Functions and jurisdiction of the Court of Customs Appeals.

Mr. Arthur F. Belitz, Asst. Revisor of Wisconsin, on Some auxiliaries of statute revision.

Mr. George F. Deiser, of the Hirst Free Law Library of Philadelphia, on English law libraries.

Dr. H. J. Harris, Chief of the Division of Documents of the Library of Congress, on the Monthly list of State publications.

Mr. Henry L. Bryan, Editor of Laws, State Department, on the Promulgation of the Acts of Congress.

Mr. Middleton Beaman, in charge of legislative drafting research at Columbia University, New York, on Bill drafting.

In addition, there will be a round table on small law libraries, in charge of Miss Claribel Smith, of the Hampden County

Law Library, Springfield, Mass., and an informal presentation of the subject of the expression of pagination in cataloging by means of symbols, by Mr. T. L. Cole.

It is hoped that a dinner can be arranged, to which all those attending the conference will be welcome.

To those who are not members but who will be interested in our proceedings, a cordial invitation is extended to join and attend our meetings. Will all such persons please send their names and addresses to the Secretary, Miss G. E. Woodard, Law Library, University of Michigan, Ann Arbor, Mich., so that copies of the conference news bulletins may be forwarded to them? These bulletins will contain much information regarding the conference not to be found elsewhere.

CONFERENCE OF SCHOOL LIBRARIANS

FOR the conference of school librarians in connection with the A. L. A. meetings in Washington, May 25-29, the following tentative programs have been arranged:

Meeting of normal and high school librarians

9.30 a.m. Friday, May 29

Leader, Mary E. Hall, Girls' High School, Brooklyn

"College and normal school courses in the use of the library and in children's literature." Dr. P. P. Claxton, U. S. Commissioner of Education.

"How the library of the Bureau of Education may serve the schools." Dr. J. D. Wolcott, librarian, Bureau of Education.

"Survey of the school library situation." Willis H. Kerr, State Normal School, Emporia, Kansas.

Discussion:

"Need of appropriations for school libraries." Louis R. Wilson, University of North Carolina, Chapel Hill, N. C.

"Laws pertaining to school library work." Mrs. Pearl Williams Kel-

ley, State Board of Education, Nashville, Tenn.

"School library work in Texas." Rosa M. Leeper, Dallas Public Library.

Discussion of plans for further organization and activity.

Resolutions and recommendations.

Election of officers for 1915.

The English Teachers' Journal Club of Washington will hold its May meeting with the school librarians, and arrangements are being made to secure Prof. Charles Alphonso Smith of the University of Virginia, as one of the speakers at this meeting.

Normal school round table

Leader, Mary C. Richardson, State Normal School, Castine, Me.

"The need of state supervision for school libraries." Mrs. P. P. Claxton, Washington, D. C.

"Do teacher-librarian graduates find positions?" Willis H. Kerr, Emporia, Kan.

"Is there need of standardizing library courses in normal schools?" Lucy E. Fay, University of Tennessee, Knoxville.

"Some essentials in courses of library instruction." Julia A. Hopkins, School of Library Science, Pratt Institute.

(Each brief talk to be followed by informal discussion.)

High school round table

Leader, Anna Hadley, Gilbert School, Winsted, Conn.

Topics and speakers to be announced later.

SCHOOL LIBRARY EXHIBIT

The Bureau of Education is preparing a School Library Exhibit in connection with these meetings. The plan is to present school library work throughout the United States in an exhibit which may be permanently available, on request, for use at educational meetings.

Letters have been sent to Normal and High Schools and to Public Libraries and Library Commissions asking for the following material:

Reading lists: Debating; Vocational guidance; Holiday celebrations, etc.

Courses of study in library methods.

Pamphlets on school library administration.

Photographic views, exterior and interior, of school library buildings; of "Library Hour" with children, etc.

Graphic charts showing library work with schools.

Blanks and forms used in school work.

Laws pertaining to school libraries and the relation between public library and school library.

Encouraging replies and interesting material are coming from all parts of the United States. Mr. John Cotton Dana of the Free Public Library of Newark, N. J., an authority on the printing and mounting of exhibition material, has been consulted, and the Bureau of Education is fortunate in securing some assistance from him in the preparation of this exhibit.

American Library Association

THE WASHINGTON PROGRAM

Four general sessions instead of the usual six will be one of the noticeable features of the Washington program, the committee having taken into consideration the many libraries and other educational objects of interest which should be visited, especially by those who have not been in Washington before. As a further aid in this direction the general sessions, except the last, will be held in the evening. It is thus believed that notwithstanding the meetings of sections and affiliated societies each morning and afternoon there will be daylight time for the librarians to do a certain amount of visiting to the institutions of the District of Columbia and to see the exhibits at the Public Library and elsewhere.

At the opening session, following a greeting from the Librarian of Congress, President Anderson will deliver his presidential address, his subject being "The tax on ideas," and Mr. H. H. B. Meyer, of the Library of Congress, will give an illustrated talk on the libraries of Washington, which will be a timely hint as to what should be seen during the week. One or

two other interesting features for this session are being arranged.

Several well-known speakers have been secured to address us. Dr. J. Franklin Jameson, director of historical research of the Carnegie Institution of Washington, widely recognized as an historical expert, author and editor, will speak on "The need of a national archive building." Better care for our archives is a vital question with American scholars, and no one is better qualified by experience or by official position to speak on this need than is Dr. Jameson. The work of the American Federation of Arts is a subject about which perhaps librarians do not know as much as they should. With this thought perhaps in mind the president persuaded Mr. Robert W. DeForest, of New York, the president of the federation, and Miss Leila Mechlin, the secretary, to address the Association on this subject. Miss Mechlin's address will be illustrated by the stereopticon. Mr. DeForest is well known for his interest in art, having been for some years an officer of the Metropolitan Museum of Art in New York, and since the death of Mr. Morgan, its president.

Doubtless most librarians have purchased those little manuals so exceedingly useful to the newly arrived would-be citizen, "Guide to the United States," compiled by John Foster Carr, director of the Immigrant Education Society of New York, and it will be agreeable news that Mr. Carr will address us on "The library and the immigrant." Although the subject is closely akin to Mary Antin's of last year, we know Mr. Carr will have a point of view and a helpful thought entirely his own. Dr. P. P. Claxton, the United States Commissioner of Education, who was deeply interested in libraries and library development long before he robbed a certain southern library of its able and energetic executive, will discuss "Libraries for rural communities," a phase of the library question which is receiving increasing attention, and in which Dr. Claxton is particularly interested.

"The present trend" is the suggestive title chosen by Mr. Charles K. Bolton, librarian of the Boston Athenæum, for a paper, and Mr. W. N. C. Carlton, of the Newberry Library, has taken as the title of his promised paper "Prestige." We are sure that both these gentlemen out of their diversified experience will give us all food for thought and discussion.

Seven years ago the American Library Association met in the South, in Asheville, North Carolina. Although Washington as our national capital is neither south nor north, yet in a sense we are again meeting this year in the South, for the District of Columbia is well south of the Dixie line. At Asheville it will be remembered Miss Anne Wallace presented an historical survey of library conditions in the South, and representatives of southern states followed in a brief symposium of conditions in the respective states from which they came. So it is fitting that at this next meeting in the South a report be heard of what has transpired since the survey at Asheville, and Miss Katharine Wootten, of the Atlanta Library, a southern woman and a southern librarian, has consented to bring this message and present it to us. Also Miss Agnes Van Valkenburgh will entertain us, and bring to us certain lessons in "Readings from recent fiction," and we all know that when "Miss Van" goes out to stalk a moral she will find it and bring it in dead or alive.

So much for the general sessions. These will be held in the Continental Memorial Hall, the building of the Daughters of the American Revolution, than which there is no finer auditorium in America.

Space fails to tell in detail of the plans of the various sections and affiliated associations, whose meetings for the most part will be held in the New Willard Hotel.

Do the state liability and workmen's compensation acts apply to libraries?; the work of the Children's Bureau; new courses in library schools; the state library and its librarian; the county agent and his relation to rural library work; the functions and jurisdiction of the Court of Customs Appeals; What is the matter with present co-operative methods? These are a few pertinent topics culled from a hasty perusal of their programs, and a round table of branch librarians and a meeting of school librarians will be additional features.

The conference will open Monday evening, May 25, and close Friday afternoon, May 29.

GEORGE B. UTLEY.

TRAVEL ANNOUNCEMENT

No special rates have been granted the Association for the Washington meeting. A round-trip rate of somewhat less than two single fares is available from some New England and Atlantic states points,

but usually limited to return in ten days or two weeks, including day of sale. (Consult with local ticket agent in your home city.)

First-class passenger fare to Washington from various centers was given in the April JOURNAL. For those wishing to travel together, the usual personally conducted trips will be provided from Boston, New York and Chicago, as follows:

NEW ENGLAND

(a) Party via Fall River Line to New York, and thence to Washington via B. & O. R. R., regular fare one way \$9.65; round trip (13 days' limit) \$18.

(b) Party by Merchants & Miners Steamship Co. from Boston to Baltimore, and thence to Washington via Pennsylvania R. R. Fare one way, including stateroom berth and meals while on steamer, \$16.

For reservations in either of the above, notify Mr. F. W. Faxon, 83 Francis street, Fenway, Boston, Mass., at once, or not later than May 15.

(a) The Fall River Line party will leave Boston from the South Station Sunday, May 24, at 6 p.m., for Fall River. Special coach will be reserved if enough people register to warrant doing so. The train is due at Fall River wharf 7.20 p.m. Steamer sails 7.40 p.m., touching at Newport 9.15 p.m.; due New York City 7 a.m. (party may stay on board until 9 a.m.). Special breakfast on board 75 cents. Walk to Liberty street ferry—two blocks from Fall River Line dock. Ferry leaves at 9.30 for Jersey City, where special train (for New England and New York parties) will leave over the Central Railroad of New Jersey and the Baltimore & Ohio R. R. at 9.45; due in Washington at 2 p.m. Lunch on dining car 75 cents. If baggage is checked, transfer in New York City will cost 50 cents.

EXPENSE

Boston to Washington, one way, using special party ticket.....	\$8.52
One-half outside state room (whole room may be engaged \$2).....	1.00
Breakfast (on steamer).....	.75
Lunch (on dining car).....	.75
	<hr/>
	\$11.02
For parlor car New York to Washington, if desired, add.....	1.25
For any checked baggage, add per piece.....	.50

Send amount to F. W. Faxon before May 15.

Anyone desiring to return home by this route within 13 days should buy a round-

trip ticket (\$18, limited to 13 days, including day of sale) reading via Fall River Line and Baltimore & Ohio R. R., and send money for stateroom, meals and parlor car seat (if wanted) at once or before May 15 to Mr. Faxon. Those using round-trip tickets will check their own baggage on these tickets. Those who send Mr. Faxon money for one-way party ticket will be given cards on which they may check baggage.

(b) Boston to Washington by Merchants & Miners' Steamship Co. This party will leave Boston from Battery wharf, Commercial street, at 5 p.m., Friday, May 22. The steamer is due at Newport News (near Old Point Comfort) Sunday morning, remaining there until Sunday night. Due Baltimore Monday, May 25, 7 a.m. Leave Baltimore (Pennsylvania R. R.) 8.25 a.m. Due Washington 9.25 a.m. Breakfast may be had at the Union Station, Baltimore.

Expense: Provided fifteen or more register. If less than fifteen, \$4 more will be requested of members. Boston to Washington one way, using special party ticket, including berth in stateroom (two persons in a room) and all meals while on steamer, \$11.80. For checked baggage add 35 cents per piece for Baltimore transfer. Those desiring to go with this party should send \$11.80, plus 35 cents for baggage, to F. W. Faxon at once, or not later than May 15.

Note:—It is cheaper to buy one-way with this party and pay full fare home than to buy round-trip ticket going by steamer and returning either all rail or by Fall River Line.

PARTY FROM NEW YORK, PHILADELPHIA AND BALTIMORE

A special train will leave Jersey City via the Central R. R. of New Jersey and the B. & O. at 9.45 Monday morning, May 25; connecting ferry will leave Liberty street at 9.30, West 23d street 9.20. All from New York, Philadelphia and Baltimore who expect to take this train should send their name to C. H. Brown, 26 Brevoort place, Brooklyn, N. Y., on or before May 18.

Those who expect to return from Washington within ten days should buy a regular round-trip ticket from New York; fare \$10; or from Philadelphia, fare \$6.00. The one-way fare from New York is \$5.65; this can be reduced by those who register for the special train to \$4.52, with corresponding reductions from Philadelphia and Baltimore.

Dinner will be served on the special train for 75c.; this arrangement is good only if a sufficient number register, sending 75c. to the undersigned by May 18. The railroad requires a guarantee three days before the party leaves, otherwise the regular rates will be charged.

EXPENSES

From New York:	
One way fare.....	\$4.52
Parlor car.....	1.25
Dinner.....	.75
	<hr/>
	\$6.52
From Philadelphia:	
One way fare.....	\$2.72
Parlor fare.....	.75
Dinner.....	.75
	<hr/>
	\$4.22

The above amount should be sent to Mr. Brown by May 18. Those who buy a round-trip ticket should send money only for the parlor car seat and dinner; those who do not wish either one should deduct \$1.25 or 75c. respectively.

Those who send the amount for one-way trip tickets will be given cards upon which they may check baggage. Those using round-trip tickets will check their own baggage on these tickets. If two persons expect to return in the same party to New York or Philadelphia, mileage books can be supplied to them for the return trip. This will reduce the round trip fare from New York to \$9.04 upon notification to Mr. Brown by May 18.

CHICAGO PARTY (INCLUDING MIDDLE WEST)

Send deposit for Pullman reservation to John F. Phelan, Public Library, Chicago, before May 15.

A special electric lighted train will leave Chicago via the Pennsylvania Railroad, Union passenger station, Canal and Adams streets, on Sunday afternoon, May 24, at 4 p.m., arriving in Washington Monday at 3 p.m. This train will consist of all steel vestibuled sleepers, coaches, compartment, drawing room, lounging, observation, and parlor cars.

RAILROAD RATES

No special rates will be granted by the railroads from Chicago and the west to the Washington conference, but those desiring to travel via special train can save money by purchasing tickets from western points to Chicago, and traveling on identification cards, which will be furnished members of special train party at the rate of \$14.50 per capita, Chicago to Washington. The same party arrangement for ten or more may be

made returning, otherwise the full fare of \$17 will be required. The regular one-way, standard rate, Chicago to Washington, is \$17.50, and returning \$17.

The regular, one-way, standard rate, Chicago to New York, Pennsylvania railroad via Washington, is \$20, and the same rate returning, via Washington. The differential, one-way rate, Chicago to New York, Baltimore & Ohio, via Washington, is \$18, same rate returning, via Washington.

The regular one-way, standard rate, Chicago to Boston, Pennsylvania railroad, via Washington, is \$24.75, returning direct lines from Boston, \$22. The differential, one-way rate, Chicago to Boston, \$22.75, direct lines returning \$19.

Parties of ten or more desiring to extend journey to New York may travel on party rate, Washington to New York, fare \$4.50.

One-way rates from points west of Chicago to Washington, and to Chicago, and Pullman rates from Chicago, are as quoted in the April JOURNAL.

Those traveling from Pacific Coast points should consult their local ticket agent, as round trip rates, affording some reduction over double one-way fares, will be available on certain dates.

DINING-CAR SERVICE

Meals will be served à la carte, excepting the dinner on the evening of departure, Sunday, May 24, which will be served table d'hôte, costing \$1.

Members who intend joining special train in Chicago are urged to send in their applications early, with check to cover the cost of accommodations desired.

All correspondence concerning western party should be addressed to John F. Phelan, Public Library, Chicago.

SCHEDULE OF SESSIONS

(This schedule is only tentative and minor changes are liable to be made.)

MONDAY, MAY 25

Afternoon—Executive Board.
Evening—First General Session.

TUESDAY, MAY 26

Morning—American Association of Law Libraries; League of Library Commissions; College of Reference Section.

Afternoon—American Association of Law Libraries; Professional Training Section.
Evening—Second General Session.

WEDNESDAY, MAY 27

Morning—Catalog Section; National Association of State Libraries; Children's Librarians' Section; Agricultural Libraries Section.

Afternoon—Special Libraries Association; League of Library Commissions; College and Reference Section.

Evening—Third General Session.

THURSDAY, MAY 28

Morning—Joint session of the League of Library Commissions and Agricultural Libraries Section; Special Libraries Association; Catalog Section.

Afternoon—National Association of State Libraries; Branch Librarians; Council.

FRIDAY, MAY 29

Morning—Documents Round Table; Trustees' Section; School Librarians (Joint session).

Afternoon—Fourth General Session (Council after adjournment).

Evening—Executive Board; High School Librarians, Normal School Librarians.

A LOBBY CONFERENCE

Here are a few topics suggested for a "lobby conference." If you are interested in any of these subjects talk them over with the person indicated.

Are you interested in libraries in rural high schools?—See Miss Martha Wilson, of Minnesota.

Are you going to install a business branch?—See Mr. Dana or Miss Ball, of the Newark, N. J., business branch.

Is your library thinking of establishing a pension system?—Talk with Mr. Legler, of Chicago, or Mr. Stevens, of Pratt Institute.

Do you lend pictures, mounted and unmounted, from your library?—See the collection at the Public Library of the District of Columbia and the way they handle it.

Are you interested in instruction in legislative and municipal reference work?—See Mr. Dudgeon or Mr. Lester of the Wisconsin Free Library Commission.

Do you have library institutes in your state?—Ask Mr. Nursey of Ontario, or Mr. Wyer of the New York State Library about their respective institutes.

Did you know that Chicago has traveling libraries conducted similarly to those in rural communities?—Mr. Legler will tell you about them.

Do you know the latest in library advertising?—Mr. Rush of St. Joseph will tell you what it is.

Selection of books for small branches and delivery stations—Mr. Gardner M. Jones, of Salem, Mass., would like to discuss this problem with others who have had experience.

Did you know that the St. Louis Public Library allows people to charge their own books in small branches?—Dr. Bostwick will explain the method.

Did you know about the Public Affairs Information Service?—Ask Mr. John A. Lapp of the Special Libraries Association to tell you about it.

Did you know that the Springfield, Mass., City Library is lending non-fiction books on Sunday?—Ask Mr. Wellman if the arrangement has been popular and helpful.

Have you a weeding-out system for your collection of clippings?—See Miss McVety or Miss Colegrove of the Newark Free Public Library.

Have you investigated the vertical file system of caring for maps?—See Mr. Dana of Newark, or Mr. Windsor of the University of Illinois.

Do you want to know about the exhibit of American libraries at Leipzig?—Ask Dr. Frank P. Hill of Brooklyn.

The health and well being of library workers. Do you wish to know how to promote it?—Consult Mr. Stroh of Detroit, or Mr. Ranck of Grand Rapids.

How can libraries promote book-buying?—If interested in this question talk with Richard B. G. Gardner, manager of the Publishers' Coöperative Bureau.

Are you interested in a quick way of caring for pamphlets and ephemeral material?—See Miss McVety of the Newark Public Library.

Are you interested in methods of installing exhibits?—Ask Mr. Dana of the Newark Public Library.

Do you intend to establish a municipal branch of your public library?—Ask Mr. Anderson of New York, or Dr. Bostwick of St. Louis.

Are you interested in municipal document indexing?—See Miss Hasse of New York, or Mr. A. L. Bostwick of St. Louis.

Have you a satisfactory follow-up system in your book-order department?—Ask Mr. Windsor of the University of Illinois to explain the method they use.

POST-CONFERENCE TRIP

Saturday, May 30, to Friday, June 5. Old Point Comfort, the James river, and Richmond, \$30, including all expenses for six days.

A restful, delightful and historic six-day trip has been arranged by the Travel committee, leaving Washington Saturday evening, May 30, by steamer down the Potomac river and Chesapeake bay, spending two days at Old Point Comfort, under the very walls of Fortress Monroe, with possible easy trips to Hampton, where there is a soldiers' home and the famous Hampton Institute for the education of negroes and Indians. Norfolk and Newport News are near by, and the harbor of Hampton Roads, where the "Monitor" and "Merrimac" met in combat, is just at hand.

Then we have the famous and delightful all-day sail up the James river to Richmond, stopping a few minutes at noon-time to see the remains of Jamestown, the original English settlement.

Two days and three nights in Richmond will give opportunity to get acquainted with that interesting city of 150,000 inhabitants, rich in historic associations concerning the Civil War, the Revolution, and the first English settlers; Capitol Square, with the State Capitol, is near the hotel. "The White House of the Confederacy," home of Jefferson Davis during his life in Richmond, is now a Confederate museum, and of great interest. St. John's church, Twenty-fifth and Broad streets, is where, in 1775, the convention met in which Patrick Henry made his famous speech, saying "Give me liberty or give me death." Within a short distance from the city are many battlefields of the Civil War. Electric cars run out to Seven Pines battlefields.

Leaving Richmond Friday morning, June 5, the party goes by rail to Washington, where trip ends at noon.

Register for this trip at once with F. W. Faxon, 83 Francis street, Fenway, Boston, Mass. \$30, the cost of the trip based on two in a room without bath, may be sent to him by check or handed to him in Washington on or before May 27. Those desiring room alone for the five nights in hotels for this trip add \$3. Those wishing room with bath for the five nights, add \$3. Those desiring stateroom alone on steamer from Washington to Old Point Comfort, add \$1.

ITINERARY

Saturday, May 30. Leave Washington, by Norfolk & Washington Steamboat Co., 6.45 p.m.
 Sunday, May 31. Arrive Old Point Comfort 7 a.m.
 May 31, June 1 and until early breakfast June 2, at Old Point Comfort, Va. (Mail and telegrams care Sherwood Inn.)
 Tuesday, June 2. Leave Old Point Comfort on S. S. *Pocahontas*, Old Dominion Steamship Co., 7.15 a.m. All-day sail up the James river, stopping at old Jamestown about noon. Lunch and supper on board. Arrive Richmond 7.30 p.m.
 Wednesday, June 3, Thursday, June 4, Friday, June 5, breakfast, in Richmond.
 Friday, June 5. Leave Richmond, after breakfast, by the Washington, Southern, Richmond, Fredericksburg & Potomac R. R. Arrive Washington, noon.

Library Organizations

LONG ISLAND LIBRARY CLUB

The regular meeting of the Long Island Library Club, to which the New York Library Club was invited, was held at the Long Island Historical Society Thursday evening, March 12.

After a brief business meeting Miss Hassler announced that Miss Lutie Stearns would be unable to address the club as planned because of the death of her mother and sister. Regret at her non-appearance and sympathy with her great loss were expressed. In her place Miss Connolly of the Newark Public Library spoke on "The librarian's bootstraps." She prefaced her remarks by saying she was a teacher and not a librarian by profession, and that her function in the Newark Library was to criticize. First of all, she said, she wished to restore to librarians confidence in their fellowman, that because the public purloined, mutilated and stole books and refused to pay fines it did not mean innate and hopeless wickedness, but that an otherwise honest public was and would continue to be unscrupulous as far as books are concerned in the belief that the knowledge contained in them is free, freer than any library-made rules. She then spoke of the need for better salaries and more scholarly workers in the profession. She said the feeling was prevalent that any one working with books belonged to the elect, the cultured, the literate, and for that reason one was willing to take less money, thus keeping salaries and standards low. As a remedy she suggested that during the first three years of work assistants should become expert in technique, taking great care not to become machines; that all those without ability should be dismissed, it being a crime to allow such to continue in the work beyond three years; that any one showing ability in

any particular line of work should be rewarded by shortening the time of service two hours a week, the time so given to be devoted to study along the particular bent displayed, and as the assistant's ability and value increase, to give still more time until finally one could go to the trustees and ask for an increase of \$200 in salary and a shortening of hours of service to 35 a week, in view of the fact that the library had a scholar. She closed by saying that the library profession needed scholars with souls to make live librarians, but that to obtain them time was necessary to develop ability.

The president then announced Far Rockaway as the place of the May meeting, with Jamaica as alternative in case of bad weather.

A rising vote of thanks was extended to the Long Island Historical Society for its hospitality, and the club adjourned to the library for social intercourse and refreshments.

ELEANOR ROPER, *Secretary*.

TWIN CITY LIBRARY CLUB

The spring meeting of the Twin City Library Club was held in St. Paul, Minnesota, on the evening of March 24, 1914. Eighty-four members of the Club partook of a delicious dinner that was served in the large cafeteria of the Y. W. C. A. building. The tables were decorated with ferns and candles, and with a large bouquet of forty Killarney roses that were presented to Mrs. Helen McCaine, the president of the Club, to commemorate the forty years of her service in the St. Paul Public Library. The flowers were the gift of the Club, and they were presented by Miss Gratia A. Countryman of the Minneapolis Public Library, with a beautiful message of love and appreciation.

The chief address of the evening was given by Dr. William Dawson Johnston, who has recently succeeded Mrs. McCaine as head of the city library, and the meeting was largely in his honor.

Dr. Johnston seemed in a very happy mood, and told in humorous vein of his thoughts and feelings as he left the "underground" environs of highly civilized New York and came into the bright and open regions of the West, "to play with giants," as he expressed it.

Dr. Johnston advocated the administration of the library on the commission plan. "If the commission form of government is good for a city then it is just as good for a library," said he. "Not only would this plan be a good thing for the librarian, but for the members

of the staff. The best results can be obtained by organization.

"I believe in an eight hour day for every one except librarians. Librarians must work days for love of the labor, and they must work nights because they have to do so in order to prepare for the next day."

A very pleasant feature of the evening was the address of welcome to Dr. Johnston and his introduction to the Club by Mr. Charles W. Ames, president of the St. Paul Institute, and for the past fifteen years a member of the city Library Board.

The following resolutions in honor of the late Richard A. Lavell of Minneapolis, who died Nov. 28, 1913, were presented by Miss Clara Baldwin, secretary of the State Library Commission, and were unanimously adopted:

RESOLUTIONS

Whereas, One of our members, Richard A. Lavell, has passed away since our last meeting, at which as president of the club he presided;

Whereas, In his passing we have lost a valued member and beloved associate; be it

Resolved, That we express our deep appreciation of his unselfish devotion to the interests of the club, and his service to the library profession in the Twin Cities; that we extend to Mrs. Lavell our sincere sympathy in her bereavement; that a copy of these resolutions be forwarded to Mrs. Lavell, and they be spread upon our minutes.

RHODE ISLAND LIBRARY ASSOCIATION

The thirtieth session of the Rhode Island Library Association was held at the Deborah Cook Sayles Public Library in Pawtucket, R. I., on Friday, Mar. 31, 1914.

The meeting opened at 2:30 o'clock with an address of welcome by his honor, Mayor Giles W. Easterbrooks of Pawtucket. Mayor Easterbrooks called attention to items of historical interest concerning the Pawtucket Library, and mentioned the fact that this library was the originator of the open shelf system of keeping books, and the first to abolish the age limit of children using the library.

Mr. Dougherty, president of the association, followed Mayor Easterbrooks with a few words of welcome on behalf of the association, and invited a public inspection of the many improvements made in the library since the meeting held ten years ago. Many people remained to do this during the time between the afternoon meeting and the supper served by the trustees to about seventy-five guests, in the parlors of the First Baptist Church.

The other speakers of the afternoon were people prominent in various lines of work, mostly in Pawtucket, and they spoke on the

general topic—"The library and the community," as follows:

Rev. Edward R. Evans, representing "The minister," said the minister especially appreciated the value of the library to the people because its influence was seen directly through the people's own reading, and indirectly through the minister's opportunity to read and present to the people the results of his researches. Religion without learning is superstition, and learning without religion is barren intellectuality. Hence the infinite value of the library to the minister.

The point of view of "The lawyer" was presented by Mr. James L. Jenks. "Too many people," he said, "are absolutely ignorant on the simplest matters of law. The library should fill this need by having elementary books available for all. The lawyer must be posted on an innumerable number of subjects for his work, and where could he get his information, many times, if not at the library?"

For "The business man" William McGregor spoke of the great value of the library to foreigners in helping them to become familiar not only with American business life, but also along civic lines as well. The business man can find invaluable information on almost any subject in the library and can thereby keep up to date in his special line, besides deriving much recreation therefrom.

Dr. Byron U. Richards, speaking for "The doctor," said that while the public library should not be turned into a strictly medical library, it should have some books along medical lines added regularly, for doctors are taxpayers and wish to keep up to date, and it is not always possible individually to buy all the books a physician needs. The doctor often works under severe mental strain and looks also to the library for recreational reading to relieve the nervous tension.

Elmer S. Hosmer, representing "The teacher," emphasized the fact that the teacher's work is very closely allied with that of the library. As close coöperation as possible is recommended, and he stated that the value of the actual extension of libraries and library methods directly into the school building, as demonstrated in Pawtucket High School, has been very marked.

"The shop girl" and her opinion of the library was presented by Miss Ida M. Whitlow. She said the coöperation between the library and the factories has produced some valuable results. The girls have not only been glad to use the books sent to the fac-

ories but have been stimulated to use the library in the evening to follow up some educational or recreational lines in which they had become interested.

Miss Margaret W. Shipman, of the Boston Public Library, spoke for a few moments on the value of the story hour for the children, and gave examples of stories told to interest the children in the good things of literature.

The evening program, beginning at 7 p.m., was given over entirely to addresses by Mr. and Mrs. William Alanson Borden, who in native costume, and with many curios and other articles for illustration, told in glowing terms of the library movement in India, and graphically pictured many of the social customs of India. There was a large attendance and the session was voted a great success.

The next meeting will be held with the North Scituate Public Library the latter part of June, and will be an open air meeting.

E. W. MAGOON, *Recorder.*

THE ASSOCIATION HANDBOOK

The new handbook for 1914 of the Rhode Island Library Association has appeared. It contains the constitution of the association, a schedule of meetings since organization, a list of the libraries of Rhode Island and their librarians, and the officers and members of the association.

MICHIGAN LIBRARY ASSOCIATION

Under the joint auspices of the Michigan Library Association and the State Library Commission, aided by the Story Tellers' League of Adrian, there was a most successful Library Day held at Adrian on March 2. Most of the librarians arrived in the morning, and after a short time spent in greetings and in looking over the Adrian Library so ably presided over by Mrs. Jewell and her daughter, the work of the day was begun in a unique manner. Miss Jewell placed on the table some new books that had been ordered for the library and these were examined, discussed and criticized.

The first subject on the program was "Library efficiency," and this topic occupied the attention of the librarians until noon when the visitors, fourteen in number, were taken to the hotel for dinner, as guests of the Adrian Library.

After dinner the discussion of the topics, "Book selection," and "Supervision of children's rooms," was freely indulged in by all present. This meeting, presided over by Miss

Preston of Ionia, was adjourned in time for the story-hour by Mrs. Gudrun Thorne-Thomsen which was a most enjoyable feature of the day. The large Presbyterian church was filled with school children and teachers who listened with rapt attention to the delightful stories which Mrs. Thomsen told in her inimitable manner. In the evening Mrs. Thomsen gave a lecture in the auditorium of the library on the place and value of children's stories. Mrs. Thomsen advised against the story which is labeled and tagged with a moral. Such stories do not appeal to children. The ethical training received by the child from stories is valuable, but it is of a general sort, the kind which comes from hearing and seeing the best in literature and art. The story-hour is not for mere amusement or to pass the time away, but takes the place of fine literature for grown-ups and is a high type of real enjoyment.

The Story Tellers' League of Adrian, a very active organization, secured the services of Mrs. Gudrun Thorne-Thomsen, and through the management of Miss Agnes Jewell the meeting of the librarians of that district was appointed for the same date, thus giving to the library workers an unusually good program for a district meeting.

Librarians were present from Lansing, Ionia, Detroit, Ypsilanti and Mount Clemens, as well as from Adrian and its immediate vicinity. The teachers and students of the Blissfield Normal School were present for the afternoon story-hour.

PLANS FOR JOINT SUMMER MEETING

Arrangements have been completed for holding the joint meeting of the Michigan and Wisconsin Library Associations at Menominee, Mich., and Marinette, Wis., July 29-31, 1914. It has been felt that there is much to be gained from joint meetings of state associations, and the Michigan Library Association can bear witness to this fact from the great success attending the joint meeting with the Ohio Library Association in 1911. For years the Michigan Library Association has been promising itself the pleasure of meeting in the Upper Peninsula, and the proposed meeting at Menominee and Marinette enables us not only to do this, but also to get acquainted with our neighbors. These towns, located as they are on historic Green Bay, separated only by the Menominee river, should prove especially attractive for a mid-summer meeting.

The committee in charge of the meeting have arranged a program which combines instruction, inspiration and entertainment. Speakers of more than local reputation have been engaged, round tables have been planned, and opportunities for informal discussion will be given. Prominent among the topics on the program will be such live subjects as "The growing librarian," "Vocational guidance as a library function," "The library as a moulder of public opinion," and "The place of art in a library."

One of the chief advantages of a meeting like this will be the opportunity afforded of becoming acquainted with some of the prominent workers in the library field, of discussing with others the problems which they also have had to meet, and of drawing inspiration from coming in contact with librarians who share and impart inspiration for the cause.

Restful entertainment has been planned. There will be boat trips and motor rides, a reception, and dinners in Menominee and Marinette. The Commercial Club of Menominee and the officials of the Spies Memorial Library have been tireless in planning for the comfort of the visiting librarians.

For special information in regard to details, address Miss Annie A. Pollard, Secretary, Grand Rapids Public Library.

THEODORE W. KOCH, *President*.

ARKANSAS LIBRARY ASSOCIATION

The fourth annual meeting of the Arkansas Library Association was held at Pine Bluff, April 2 and 3, Dr. C. H. Brough presiding. In holding the meeting in Pine Bluff it was felt an impetus could be given the new movement there for a public library.

The first session was held at 3 p.m., Thursday. Rabbi Joseph Jasin, a representative from the Pine Bluff Library Association, opened the meeting with an address of welcome. The keynote of Rabbi Jasin's address was that the library is a necessity rather than a luxury. A response to the address of welcome was made by Dr. Brough, the president. Dr. Brough holds the chair of economics at the State University, and is thoroughly acquainted with economic and intellectual needs of the state. He made an eloquent appeal for libraries in the towns and cities of the state and further emphasized the immediate necessity of more libraries.

Miss Marguerite English, children's librarian in the Little Rock Public Library, gave

an illuminating paper on "Southern libraries and their work." She reviewed the work of the more aggressive libraries, showing the large possibilities for the library in awakening the intellectual spirit of the South.

Mr. A. H. Simmons, librarian at Hendricks College, discussed "The public library in its relation to the schools and colleges," giving practical ideas for better coöperation and correlation.

The Rev. Mr. Ingham, the founder and organizer of the Camden Public Library, the first public library in the state, discussed briefly the establishment of libraries in the smaller towns. He urged the people not to delay until their town should be large enough for a Carnegie building, but to set to work immediately to secure a room and a small nucleus of books, adding to this collection persistently each year, as a library so secured through the zeal and sacrifice of the citizens would be best appreciated.

Miss Eva Reichardt, state organizer of school improvement associations, gave a talk on the school improvement libraries in the rural districts. She especially urged the Pine Bluff citizens in the event of establishing a public library, to first secure an efficient librarian, as otherwise the library would become merely an architectural addition to the city.

At 6.30 the library workers were the guests of the Pine Bluff Library Association at a dinner served in the Hotel Jefferson. A delightful musical program was rendered during the course of the dinner which greatly added to the pleasure of the evening. After the dinner the guests were driven by automobile to the Chamber of Commerce where a public meeting was held. Mr. Dan Taylor, president of the Pine Bluff Library Association, opened the meeting with an earnest plea to the people of his city to ally themselves with the intellectual movements of the times, definitely organize a library campaign for an adequate building, and place themselves in the vanguard of the Arkansas library movement. This enthusiastic address was followed by a carefully prepared paper on "Arkansas and its libraries," by Miss Laura Brower of Van Buren. Miss Brower, through hundreds of letters, personal interviews and thorough investigation, carefully compiled material for this paper, the first real analysis of the library condition. Her paper was recognized by all present as a most valuable document.

Mr. George B. Utley of the American Li-

brary Association, gave the address of the evening, "The changing conception of the public library." Whether librarian or layman, each one present felt that he had touched the library movement at every point. The librarians were given a broader, deeper view of the work, the laymen a new knowledge of the scope of the work emanating from the library centers. Mr. Utley closed his address with welcome words of optimism for the library workers in Arkansas.

On Friday morning some librarians visited the public schools, where stories and short talks were given the children and teachers.

At 10.30 a business session of the library association was called at which the following officers were elected: Dr. C. H. Brough, unanimously reëlected president; Mrs. C. W. Pettigrew, Pine Bluff, vice-president; Rev. Mr. Ingham, Camden, second vice-president; Dr. Joseph Jasin, Pine Bluff, field secretary; Dorothy D. Lyon, reëlected secretary; Dan Taylor, Pine Bluff, chairman advisory board; other members to be named by the president later.

At the request of the State Federation of Women's Clubs and the State Teachers' Association, delegates were elected to represent the Arkansas Library Association and have a place on each of the programs. It was also decided to send a library exhibit to the state fair in October. It is the purpose of the library association to get the library movement before the people through as many organizations and with as much publicity as possible "without money and without price."

Resolutions of appreciation of the kindness and hospitality of the citizens of Pine Bluff were heartily endorsed.

At 11.30 a joint meeting of the Pine Bluff Chamber of Commerce and the Young Men's Progressive Business League met with Mr. Utley to discuss the immediate steps for a public library for their city.

A long automobile ride closed the pleasant library meeting ever held in the state.

DOROTHY D. LYON, *Secretary*.

TENNESSEE LIBRARY ASSOCIATION

The Tennessee Library Association held its annual meeting on Tuesday, Jan. 13, 1914, in the Carnegie Library of Nashville. In addition to a large local attendance there were present from out of town Miss Marilla Waite Freeman of the Goodwyn Institute Library, Memphis; Mr. Charles Johnston of the Cossitt Library, Memphis; Miss Margaret Dunlap, librarian of the Chattanooga Public

Library; Miss Jennie E. Lauderdale of Dyersburg, former state librarian; Miss Alice Drake, librarian of the Free Public Library, Jackson; Miss Lucy E. Fay, librarian of the University of Tennessee Library, Knoxville; Mrs. Murfree, librarian of the Middle Tennessee State Normal Library, Murfreesboro, and Mrs. Sherrill, librarian Carnegie Library, Brownsville. The morning session was opened by an address by Mr. G. H. Baskette, president of the Board of Trustees of the Carnegie Library, Nashville, and honorary president of the association. Mr. Baskette said in extending a welcome to the association in behalf of the local librarians that the greeting was more than a formality. It was an expression of genuine gladness and hearty hospitality. He said there is a peculiar feeling of fellowship among librarians which gives special zest to their meetings. This is due, he thought, not alone to professional interest, but also to the fact that the librarian has a conception of his work and vision of its opportunities and possibilities for educational, social and moral advancement, which it is difficult to get communities, and often even library boards, fully to comprehend. Library work is practical, systematic and businesslike, yet it is invested with a sentiment and permeated with a purpose of altruistic service which is not understood by those, who for lack of inclination or opportunity, do not get into the heart of the library motive and meaning. For these reasons it is natural that librarians should be drawn together in a special spirit of fellowship and coöperation, and find pleasure, profit and encouragement in meetings like this.

The general theme of the day was Simplification, Socialization, Specialization. This theme was suggested by Miss Marilla Waite Freeman, president of the association, who outlined the program, and presided at all sessions. In opening the meeting, Miss Freeman said that she would translate "the three S's of the general theme into plain Anglo-Saxon as follows: Simplification—Is there lost motion in your machinery? Socialization—Is your library a social center? Specialization—Do you reach the man on the job? These were the three questions the program of the day was intended to set us asking ourselves, perhaps to be more fully considered at future meetings.

The morning program was divided under two heads: (1) "How to simplify our routine," and (2) "How to make our libraries centers of social service." Under the first

division Miss Margaret McE. Kercheval, librarian of the Carnegie Library of Nashville, read a paper on "How to simplify routine in public libraries." At its completion Mr. Charles Johnston gave a brief talk on a loose-leaf simplified accession sheet, illustrated by the special sheet itself.

"How to simplify routine in school libraries" was then discussed by Mrs. Pearl Williams Kelley, director of library extension of the State Department of Public Instruction. Mrs. Kelley gave an interesting account of the work she is doing in the country schools of Tennessee, through the State Education Department, which has appropriated \$15,000 for library extension and school libraries. There was a short discussion on these papers by Miss Freeman, Mr. Johnston and Miss Lauderdale.

Under the second division of the morning session Miss Margaret Dunlap of the Chattanooga Public Library, discussed "The city library as a social center." This was followed by a talk on "The library and social movements," by Miss Lauderdale of Dyersburg. Miss Lauderdale explained to the association that she had misplaced a part of her paper on this subject and asked permission to substitute a paper on the "History of Tennessee libraries," prepared while at Simmons College Library School.

Miss Mary Skeffington, librarian of the State Library, Nashville, completed the morning session by a paper entitled "What the state librarian can do for rural centers." The president then appointed as a committee on nomination of officers Mr. G. H. Baskette, Miss Alice Drake and Mrs. Pearl Williams Kelley. A committee to submit amendments to the constitution was composed of Miss Fay, Mr. Johnston and Miss Kercheval. Following the morning session, out-of-town members of the association were entertained by the Nashville librarians at a luncheon at the Hotel Hermitage.

The afternoon session on Specialization was opened by a talk on the subject "How to reach special classes," by Mr. Charles D. Johnston of the Cossitt Library, Memphis. Mr. Johnston touched upon many phases of the subject, which he said resolved itself into the one word "Publicity," and in closing described most interestingly the work of the Cossitt Library with the colored population of Memphis, carried on chiefly through the colored schools.

This was followed by a paper by Miss Alice L. Drake on "Book selection for special

classes." Miss Drake's incidental definition of an immoral book as one which lowers the spiritual temperature of the reader, or rather as one which has a spiritual influence to lessen the happiness and usefulness of the reader, led to an animated discussion. The special work of college and normal school libraries was treated in a most valuable paper by Miss Lucy E. Fay, librarian of the University of Tennessee at Knoxville.

Miss Fay upon request of the president also spoke briefly in regard to a text book she is preparing for the instruction of normal school students in the use of libraries and books. Discussion of this subject was led by Miss Sanders, librarian of Vanderbilt University Library, and Miss Elizabeth Bloomstein, librarian of the George Peabody College for teachers. A general discussion followed on the relation of the librarian to the student and college professor.

Three minute reports from many librarians on recent activities in their libraries were next heard. Mrs. Murfree of the Middle Tennessee Normal School Library, Mrs. Sherrill of the Carnegie Library of Brownsville, Miss Blake and Mrs. Carmack of Nashville were among those who spoke.

Miss Freeman then gave a report of the A. L. A. Kaaterskill Conference covering in an interesting way the principal points of the meeting. The president called attention to the fact that the association may have affiliation with the American Library Association and representation in its council upon payment of annual dues of \$5.00. On motion of Mr. Johnston, the resolution was made and carried that the Tennessee Library Association affiliate itself with the A. L. A.

Some slight amendments to the constitution included the reshaping of the executive committee to be composed of the officers of the association and the president of the preceding year. The following officers were elected: President, Miss Lucy E. Fay, University of Tennessee Library, Knoxville; first vice-president, Miss Margaret Dunlap, Chattanooga; second vice-president, Mr. Charles D. Johnston, Memphis; secretary-treasurer, Miss Margaret McE. Kercheval, Nashville.

The night session was in conjunction with the Tennessee Public School Officers' Association. It was called "An evening with some Tennessee authors." Mrs. Harry Anderson of the Vanderbilt School of Expression, and Misses Winnia and Shipp of the same school, gave selected readings from "Charles Egbert Craddock," Maria Thompson Daviess, Corra

Harris, John Trotwood Moore and other Tennessee authors. Miss Mabel Williams, president of the Public School Officers' Association, introduced Miss Freeman, who gracefully placed the evening program in Mrs. Anderson's hands.

At the close of the evening Mr. Johnston offered for the visiting librarians the following resolution:

Resolved, That the visiting members of the Tennessee Library Association record their appreciation of the hospitality of the Carnegie Library of Nashville, and extend to the librarians of Nashville a vote of thanks for the many acts of thoughtful kindness extended to them during the meeting of the association.

MARGARET McE. KERCHEVAL, *Secretary*.

CALIFORNIA STATE LIBRARY ASSOCIATION

The annual meeting of the California State Library Association will be held at the Hotel del Coronado, San Diego, June 15 to 20 inclusive, with nearly 350 delegates from all over the state. James L. Gillis, Sacramento, is president of the organization, and Miss Victoria Ellis, until recently librarian at Long Beach, is secretary. The committee is already at work on the program.

SASKATCHEWAN LIBRARY ASSOCIATION

A meeting to organize a library association for the Province of Saskatchewan, northwest Canada, was held on April 13, in the public library building of the city of Moose Jaw. The meeting was attended by all the most prominent educationalists in the province, as well as a number of those engaged actively in library work.

Mr. J. R. C. Honeyman, chief librarian of Regina Public Library, who had been chiefly responsible for calling the meeting, opened the proceedings with a brief address in which he outlined the legislation at present on the statute books with regard to libraries, and pointed out the necessity of forming an association, not only for the benefit of librarians themselves, but to form a body of public opinion to secure needed legislation.

A constitution was drafted and adopted, based on the constitution of the Ontario Library Association.

The following officers were appointed: President, Mr. C. W. Cameron of the Collegiate Institute, Saskatoon; vice-president, Mr. A. H. Gibbard, librarian, Moose Jaw Public Library; secretary-treasurer, J. R. C. Honeyman; members of council: Messrs. A. Ken-

ned, Weyburn; J. G. Galloway, North Battleford, and G. A. Brown, Prince Albert.

Resolutions were unanimously adopted requesting the provincial government to place the administration of legislation affecting the library system of the province in the hands of the minister of education; also that the provincial government so amend the school acts as to provide that where a public library has been established under the "Public Libraries' Act" in any city or town municipality, upon the request of the school board of such city or town, the library board may take over the control, management and supervision of all school libraries, upon such terms as may be mutually agreed upon between the respective boards. It was also resolved that the association urge upon the government the desirability of taking immediate steps toward providing the rural communities of the province with library facilities. As a rider to this it was suggested that the rural schools might conveniently be employed for the care and distribution of such books as might be provided.

Another resolution drew attention to the necessity for the simplification of the returns now required from the larger libraries in order to enable them to qualify for the government grants. Committees were appointed to interview the minister of education at the first available opportunity, and present to him the resolutions above referred to in person.

Before concluding the meeting, resolutions were adopted thanking Mr. Honeyman for his activity in connection with the work of organization, and also thanking the library board of the city of Moose Jaw for providing accommodation for the meeting.

An executive meeting was held immediately after the close of the general meeting, and after transacting the routine business, a telegram of greeting from the newly formed association was sent to the president of the Ontario Library Association in session at Toronto.

Library Schools

NEW YORK STATE LIBRARY SCHOOL

During the annual library visit, which took place March 31-April 7, the following libraries were visited: Springfield City Library Association; Worcester Free Public Library; Clark University Library; Worcester County Law Library; American Antiquarian Society; Boston Public Library;

Massachusetts State Library; Boston Book Co.; Harvard University Library; Riverside Press; Brookline Public Library; Medford Public Library; Salem Public Library; Providence Public Library; Providence Athenæum; Brown University; Annmary Brown Memorial.

Many of the students paid brief voluntary visits to other libraries in the vicinity of Boston, and in Providence, Northampton and New Haven. The cordiality and hospitality which have so long been a feature of the visit were again in evidence. The party is under particular obligations to Mr. and Mrs. Robert K. Shaw, the Medford Public Library, the Essex Institute (Salem, Mass.), Mr. Gardner M. Jones, of the Salem Public Library, and Dr. H. L. Koopman and the staff of Brown University Library, for special features which added much to the pleasure of the visit to their libraries.

Charles E. Rush, '08, librarian of the St. Joseph (Mo.) Public Library, addressed the school April 11, his subject being "Prominent illustrators of children's books."

The month of March was devoted to practice work in nearly twenty different libraries outside of Albany. Libraries at Potsdam, Seneca Falls, Russell, Canandaigua, and Houghton Seminary were reorganized by members of the senior class. This reorganization work was under the direct supervision of the Educational Extension Division.

A considerable number of students from both classes expect to attend the A. L. A. conference in Washington. Although regular class work will not be suspended during that time, arrangements will be made so that attendance at the conference will result in the least possible loss of school work.

Miss Elizabeth Lowry, '14, who left school early in the year on account of ill health, has again discontinued school work, and has returned to her home in Oakland, Cal.

F. K. WALTER.

PRATT INSTITUTE SCHOOL OF LIBRARY SCIENCE

The spring library visiting trip this year covered a circuit of New Jersey and Pennsylvania libraries. Starting Saturday, March 28, we visited Princeton University Library, the Public Library at Trenton and the State Library, where Miss Askew told the class about the work of the New Jersey Commission. In Philadelphia visits were made to the

main library, the Library for the Blind, the Municipal Reference Library and the Spring Garden Branch of the Philadelphia Free Library, the Philadelphia Library Company and the libraries of the University of Pennsylvania, Drexel Institute and Girard College. At the latter place we were taken about by the vice-president, who was formerly of Pratt Institute. We also visited Leary's Book Store, where each of the class executed a book-buying commission for the library. On Wednesday we went up to Harrisburg where we inspected the beautiful new building of the Public Library and spent the rest of the afternoon and the evening in the State Library and the commission office. Two rather unusual features here were a demonstration of the work of the photostat and a display of the State Library's lantern slides of flowers and birds. The work of the commission as explained by Mr. Bliss and Miss MacDonald seemed very real when we were surrounded by traveling library cases and other evidences of commission work. From Harrisburg we went up to Wilkes-Barré where the Osterhout Library, the Wyoming Historical Library and the lace mills afforded a varied entertainment. On Friday a beautiful trolley trip was made from Wilkes-Barré to Hazleton where Miss Willigerod of the class of 1911, is librarian. The morning there was succeeded by an afternoon at the Scranton Public Library. The week ended by a return trip over the Pocono Mountains and through the Delaware Water Gap.

The trip yielded not only unusually good professional experience, but no class was ever received with more open-handed hospitality. We were entertained at luncheon by the staff of Princeton University Library, by the Public Library of Harrisburg and by the Library at Hazleton. Supper and a musical evening were provided by the commission at Harrisburg. The Osterhout Library at Wilkes-Barré gave us a bounteous evening party, with a concert following the repast; the Public Library at Scranton served us a most acceptable supper, and we were given afternoon tea at the State Library in Trenton, at Drexel Institute and at the home of Vice-president and Mrs. Jameson of Girard College.

So much impressed was the class by the hospitality received on the trip that on learning that the Drexel Institute Library School was to visit us on Tuesday, April 7, they asked to be allowed to give them a luncheon,

which was served in the new Women's Club House.

The last visiting lecturer of the winter term was Miss Mary E. Hall, librarian of the Girls' High School, who spoke on the opportunity of the high school librarian.

A lantern slide lecture on the Cleveland Public Library was given by Mr. Brett on Monday afternoon, April 6.

Mr. W. R. Eastman, formerly chief of the Extension Department at Albany, gave his accustomed course of six lectures on "Library buildings" during the week of April 13 to 18.

The result of the examination given by the Board of Education for high school librarians has recently been printed. It is gratifying to note that the first two names on the list are graduates of this school.

ALUMNI NOTES

Miss Mary V. Bolton, class of 1903, who has been for some years librarian and index clerk to the Board of Education of New York City, has accepted the position of county agent for the State Charities Aid Association, with headquarters at Utica.

Miss Adeline M. Cartwright, class of 1913, Cleveland Training Class, 1914, has accepted the position of children's librarian in one of the larger branches of the Toronto Public Library.

Miss Margaret Hickman, class of 1913, who assumed the librarianship of the public library in her home at Red Wing, Minnesota, on graduation, has been appointed librarian of the public library at Eveleth, Minnesota.

Miss Louise Richardson, class of 1913, has been made children's librarian of the public library at Hibbing, Minnesota.

JOSEPHINE ADAMS RATHBONE,
Vice-Director.

SIMMONS COLLEGE LIBRARY SCHOOL

The visiting lecturers for April have been Dr. Frank P. Hill, who spoke on "The organization of a large library system, as exemplified by the Brooklyn Public Library," and Mrs. Cronan, whose subject was "Story-telling."

April 23 a visit was made to the Perkins Institution for the Blind, and on April 25 a whole day was spent in the libraries of Providence, R. I., including the Public Library, the State Library, the Providence Athenæum, The John Hay Memorial Library, and the John Carter Brown and Annmary Brown Libraries.

The spring vacation lasted from March

27 to April 8. The school regretted that the vacation prevented them from receiving the New York State Library School during their Boston visit, but one of the student committees spent a short time at the college on April 2.

ALUMNI NOTES

Minnie E. Burke, 1911, has accepted a position in the Library of the Department of Agriculture.

Rachel Flint, special student, 1906-07, was recently married to Dr. Arthur F. Wheat of Manchester, N. H.

Linn Jones, special student, 1911-12, has resigned her position in the Sioux City Public Library to become children's librarian at the Oak Park, Ill., Public Library.

Marian Jones, 1908, recently resigned from the New York Public Library staff to live with her family in Denver, Colo.

Isabel S. Monro, 1907, has joined the cataloging staff of the New York Public Library.

Adrienne F. Muzzy, 1907-08, has been made branch librarian of the Yorkville branch of the New York Public Library.

JUNE RICHARDSON DONNELLY.

LIBRARY SCHOOL OF THE NEW YORK PUBLIC LIBRARY

Since the last report junior lectures have been as follows: "Italian literature from d'Azeglio to d'Annunzio," by Théophile E. Comba; "The circulation department," by Jessie Welles (Carnegie Library, Pittsburgh); "Branch library buildings," by Benjamin Adams (New York Public Library); "The best seller," by Mary Ogden White of the editorial staff of *Newark News*.

Seniors' lectures in the advanced reference and cataloging course, and the school and college library course were on "College cataloging" (two lectures), by Harriet B. Prescott (Columbia University Library); and "The work of the archivist," by Victor H. Paltsits (New York Public Library).

Lectures in the senior administration course were on "City library extension," by Jessie Welles (Carnegie Library, Pittsburgh), and "State library extension," by Sarah B. Askew (New Jersey Library Commission).

Recent and very welcome visitors to the school were: Miss Alice Tyler, and Mr. W. H. Brett of Cleveland, and Miss Ida M. Mendenhall, on her return from her lecture course at Riverside, Cal.

The juniors and several of the library staff attended the tea given after Miss Welles' lecture on March 18, at which Mr. T. E. Comba, an earlier lecturer, read scenes from

a translation of "A game of chess," by Giuseppe Giacosa.

On April 7 the Drexel Institute School, accompanied by Miss Bacon, were welcome guests in the schoolroom, meeting the New York students afterward, with some of the faculty, at the Port Arthur restaurant in Chinatown, where the party of forty-five had a Chinese dinner.

The school recently received a valuable and interesting gift of a Babylonian tablet with cuneiform writing from Mr. Andrew Keogh of the Yale University Library.

The practice of the spring term has been assigned in eighteen branches, six rooms of the reference department, the circulation offices and travelling library division, and in three local high school libraries.

Instead of taking the usual vacation the last week of March, the juniors voted to continue their work and to attend later the A. L. A. conference in Washington. They were however, excused from practice during what would have been vacation week, and as the third term practice occupies all day on Mondays and Tuesdays, they secured thus four successive days of rest and recreation.

The school headquarters at Washington will probably be the Hotel Gordon, and at least two instructors will remain with the student party. It is hoped that graduates as well as seniors may be of the party, which expects to occupy an entire car of the Baltimore & Ohio, on the outward journey. Miss M. A. Newberry, president of the alumni association, and Mr. F. B. Spaulding of the senior class, are arranging for a school reunion in the form of a luncheon. Twenty-seven juniors have joined the American Library Association.

Appointments have recently been made as follows:

Miss Maud Durlin (junior, 1913), promotion to first assistant in cataloging department, Cleveland Public Library.

Miss Gertrude Olmsted (senior, 1913), assistant, Muhlenberg branch.

Miss A. Marie Hardy (senior, 1914), librarian, East Orange High School Library.

Miss M. R. Abbott (senior, 1914), teacher's assistant, Library School, New York Public Library.

MARY W. PLUMMER, *Principal*.

CARNEGIE LIBRARY OF ATLANTA—LIBRARY SCHOOL

The second term of the school began on Jan. 5, 1914, and closed for the Easter vacation of three days, April 9.

Mrs. Edna Lyman Scott gave her course of instruction in children's work during the week of March 16 to 21 and also gave a recital of selected stories on March 19, according to the plan for her work this year.

On April 1, Mrs. Max Franklyn Howland of Boston, formerly Anne Wallace, the founder of the Library School, gave a lecture to the class on "The ideals which constitute the foundation of sound library work." After this address, which occupied an hour, Mrs. Howland talked informally to the class for an hour, giving them a valuable insight into the difficulties of pioneer library work. Both talks were inspirational in their effect on her listeners.

On April 3 at 6 o'clock in the afternoon, the faculty of the Library School entertained at a reception in honor of Mrs. Howland. This occasion served to bring together a notable group of Atlanta people, both men and women. The invitations were confined to library trustees, past and present, and their wives, and to the men and women aside from trustees who had rendered service to the library cause in the city and state. This included as many as possible of the trustees of the Young Men's Library Association Library on which foundation the Carnegie Library of Atlanta was established. Mr. Darwin Jones, who was a trustee of the Young Men's Library Association Library at the time of its organization in 1866, was present to pay his respects to Mrs. Howland. The company included men distinguished in the professions and in business who had served the library at various times during the past forty-five years. It was a source of pleasure to the guests, who numbered over a hundred, to have Mrs. Howland again in Atlanta, and each took occasion to express some appreciation of her efforts for the library that had ended in so great a success. Master Wallace Howland attracted much interest at this entertainment in honor of his mother.

DELIA FOREACRE SNEED, *Principal*.

CARNEGIE LIBRARY OF PITTSBURGH—TRAINING SCHOOL FOR CHILDREN'S LIBRARIANS

Mr. Charles E. Rush, librarian of the Public Library, St. Louis, Missouri, gave two lectures before the school on April 8. His subjects were "Prominent illustrators of children's books" and "Effective library advertising."

The school closed upon April 8 for the annual spring recess, to reopen for the spring term on April 20.

ALUMNAE NOTES

Mrs. L. L. Beeken, who was Kate Keith, class of 1912, died in Pittsburgh on March 26, after an illness of nearly six months.

WESTERN RESERVE LIBRARY SCHOOL

NEWS NOTES

The outside lecturers for the month in the Library and community welfare course have been: Dr. E. A. Peterson, director of physical education in the Cleveland Public Schools, "Recreation as community necessity"; Prof. James E. Cutler, professor of sociology at Adelbert College, "Social service and allied professions"; Miss Anna L. Morse, librarian of the Reuben McMillan Free Library of Youngstown, "The library's relation to social service training." Other lecturers were Mrs. Julia S. Harron, editor for the Cleveland Public Library, on "Translations of foreign literature," and Miss Virginia Graeff of the Cleveland Art School, on "The educational value of pictures in libraries and schools."

The course in Bookbinding is now being given by Miss Stiles, supervisor of binding in the Cleveland Public Library. It includes the study of the mechanical make-up of books, practical work in mending and binding, and visits to library and commercial binderies.

Miss Harriet E. Howe, head instructor, has been appointed director of the Iowa Summer Library School at the State University of Iowa for the session of 1914.

Wednesday noon, March 18, the faculty were the guests of the class at a most enjoyable class "spread."

The school was closed for the Easter vacation, April 8-15.

ALUMNI NOTES

Ruth M. Tiffany, '12, resigned her position of assistant in the Western Reserve Historical Society Library and was married March 11 to Mr. William Bainum.

ALICE S. TYLER, *Director*.

UNIVERSITY OF ILLINOIS LIBRARY SCHOOL

The month of field work required of seniors began February 9 and ended March 7. The public libraries of the following Illinois cities coöperated with the school this year by accepting students for practice work under the working conditions usually accorded their own assistants: Decatur, Evanston, Oak Park, Rockford, Jacksonville and Galesburg.

The annual inspection visit to libraries, bookstores, binderies, and printing shops re-

quired of both juniors and seniors, this year included the cities of St. Louis, Jacksonville and Springfield. This trip usually follows immediately the seniors' field work, but was postponed two weeks this year on account of the prevalence of scarlet fever in Urbana. A special car took the students to St. Louis over the Illinois Central Railroad Monday, March 23, and the return was made the following Saturday. The party included thirty-eight students, in charge of Miss Simpson, assistant director, and Miss Jutton, loan librarian of the University of Illinois Library. As is always the case, the librarians of the cities visited did everything any one could possibly expect of busy folks to enable the students to see and examine their libraries at work. The school is greatly indebted to them.

Lectures by visiting librarians have been given as follows: December 17 and 18, Mr. George B. Utley, secretary of the American Library Association, two lectures: "A library diagnosis," and "The work of the American Library Association." January 22 and 23, Mr. Henry E. Legler, librarian of the Chicago Public Library, three lectures: "Recent developments in legislative and municipal reference work," "Books our grandmothers read when children," and "The Chicago Public Library and the playgrounds."

Mrs. Edna Lyman Scott began her regular five weeks' instruction in library work with children April 6, meeting the seniors daily, and the juniors twice a week.

Mr. John B. Kaiser, just before leaving Urbana to assume the duties of his new position as librarian of the Tacoma Public Library, gave to the seniors the regular ten lectures on legislative and municipal reference work. These lectures, greatly amplified, will soon be published in book form by the Boston Book Company.

Dr. A. H. Lybyer, professor of history in the university, gave an illustrated lecture on "Constantinople" to the University of Illinois Library Club, at its January meeting. At the February meeting Dr. T. H. Guild of the English department, read one of his own plays. At the March meeting Miss Florence R. Curtis of the Library School faculty, read French-Canadian stories and verse.

ALUMNI NOTES

Anna May Price, B.L.S., 1900, is organizer of the Illinois Library Extension Commission, Springfield, Illinois.

Bess E. Wilson, B.L.S., 1907, has resigned her position as librarian of the Southern Ill-

inois Normal School at Carbondale, and is an assistant in the John Crerar Library, Chicago.

Rachel Agg, of the junior class, has withdrawn from the school in order to accept the position of librarian of the Public Library at Plymouth, Indiana.

Edna A. Hester, 1903-04, has returned to the school for special work.

Fanny W. Hill, 1912-13, has returned to finish the junior year's work after a year's experience in the public libraries of Champaign, Illinois, and Union City, Indiana.

Edna L. Goss, B.L.S., 1902, is head cataloger of the University of Minnesota Library, Minneapolis.

Helen Calhoun, B.L.S., 1905, was married to Mr. Gentry Cash, Feb. 14, 1914. Mr. and Mrs. Cash are living in Whiting, Indiana.

Catherine Alexander, 1912-13, is in a sanatorium at Howell, Michigan.

Sabra L. Nason, 1905-06, 1906-07, is librarian of the Umatilla County Library, at Pendleton, Oregon.

Mary E. Goff, B.L.S., 1911, is reference librarian of the University of Texas, Austin.

P. L. WINDSOR, *Director.*

ILLINOIS SUMMER LIBRARY SCHOOL

The fourth summer session of the University of Illinois Library School will begin June 22, 1914, and continue for six weeks. Mr. Ernest J. Reece, Ph.B., and Miss Ethel Bond, A.B., B.L.S., members of the library school faculty, will be the principal instructors. Illinois librarians, assistants, or teacher-librarians are not charged a tuition fee; students from other states pay the usual fee of \$12. No entrance examinations are required.

For further information write to the Library School, Urbana, Illinois.

COLUMBIA UNIVERSITY SUMMER SCHOOL

The following courses in library economy will be given at Columbia University, in the City of New York, at its summer session, from July 6 to August 14, 1914:

Bibliography—Miss Helen Rex Keller, instructor in charge, librarian, School of Journalism, Columbia University.

Administration of College and School Libraries—Mr. Andrew Keogh, reference librarian, Yale University; Mr. Frederick C. Hicks, assistant librarian, Columbia University; Miss Irene Warren, librarian, School of Education, Chicago University.

Cataloging, Classification—Miss Laura R. Gibbs, classifier and reviser, Columbia University Library.

Public documents and legislative and municipal reference work—Miss Ono Mary Imhoff, librarian of the International Health Commission, Washington, D. C.

For complete statement of courses and all particulars, write for announcement of the summer session to the secretary of the University, New York, N. Y.

UNIVERSITY OF MISSOURI SUMMER SCHOOL

The University of Missouri with the co-operation of the Missouri Library Commission and the St. Louis Public Library offers courses in library methods at its Summer Library School during the six weeks from June 15 to July 25. This is an opportunity to add six weeks of systematic instruction to library experience, but is in no sense a substitute for the one or two years' training of the library schools.

Admission to the entire course offered is restricted to librarians, library assistants and students who have appointments to library positions or teaching positions with charge of the school library. University credit will be given under the customary conditions.

Miss Wales, secretary of the Missouri Library Commission, and Miss Maud van Buren, formerly instructor in the Wisconsin Library School, will assist in giving the courses. Through the courtesy of Dr. Arthur E. Bostwick, president of the Missouri Library Commission and librarian of the St. Louis Public Library, Miss E. L. Power, supervisor of children's work, and Miss Margery Quigley, branch librarian in the St. Louis Public Library, are also to be instructors in the Summer Library School. These with Mr. H. O. Severance and Mr. H. M. Burrowes of the university will constitute the faculty.

The courses will take up cataloging and classification, library economy, book selection and reference work.

There is a registration fee of \$10.00 for all students in the summer session of the University of Missouri. This covers all fees for students selecting all the courses in library methods or for any one of them in combination with courses in other departments of the summer session, aggregating not more than six hours' credit. There are no special examinations for admission to the Summer Library School.

For further information, write to J. D. Elliff, director of the summer session, Columbia, Missouri.

MINNESOTA LIBRARY COMMISSION SUMMER SCHOOL

The Minnesota Public Library Commission will hold its fifteenth Summer School for library training at the State University, Minneapolis, June 15-July 24, 1914. The instructors will be Miss Clara F. Baldwin, director, secretary of the commission; Miss Miriam E. Carey, supervisor of institution libraries, Minnesota Board of Control; Miss Helen J. Stearns, librarian, Minnesota Public Library Commission; Miss Martha Wilson, supervisor of school libraries, Minnesota Department of Education; Miss Ruth A. Haven, organizer, Minnesota Public Library Commission.

This brief course is intended primarily to meet the needs of the small public libraries which cannot afford trained librarians. It does not offer a complete course in library science nor claim in any way to be a substitute for regular library school training. The work will be adapted as far as possible to the needs of the libraries represented, based upon study of actual conditions and resources in the library and the town.

All of the instruction is given in the form of lectures, supplemented by practice work, which is carefully revised. Students will take away from the school corrected samples of all library records. The work is planned to require the time of the student from seven to eight hours a day; two or three hours for the lectures, and the remainder for the practical work.

The course is open only to those holding library positions, or under definite appointment to such positions, and to teachers or students in charge of school libraries. The course is free to all holding positions in Minnesota libraries; for those outside the state, a registration fee of \$10.00 is required.

Application for admission should be made before June 1 to Miss Clara F. Baldwin, director, Minnesota Public Library Commission, St. Paul, Minn.

Librarians

The following appointments and changes in the staff of the circulation department of the New York Public Library have been made during the month:

Miss Vera Russell of the Melrose Branch, Miss I. Stevenson and Miss M. M. Cooper of the 125th Street Branch, Miss D. Kinney of the Yorkville Branch, Miss A. H. Farren, children's librarian at the Wood-

stock Branch, Miss F. Florence of the West 40th Street Branch, and Miss Jane Dunphy of the Aguilar Branch, transferred to the new Fort Washington Branch.

Miss M. C. Miller transferred from the Jackson Square Branch to the 135th Street Branch.

Miss M. M. Brough transferred from the Muhlenberg Branch to the Chatham Square Branch.

Miss C. A. Nearpass transferred from the cataloging department to the 96th Street Branch.

Miss D. Flower transferred as children's librarian from the Webster Branch to the Woodstock Branch.

Miss M. F. Croes transferred from the Jackson Square Branch to the Stapleton Branch.

Miss E. J. Hession transferred from the St. Gabriel's Park Branch to the Hamilton Fish Park Branch.

Miss M. LeFevre transferred from the office of the supervisor of work with children to the West 40th Street Branch.

Miss Louise Griffith transferred from the West 40th Street Branch to the Central Circulation Branch.

Miss Cora D. Robertson transferred from the Aguilar Branch to the Morrisania Branch.

Miss Gertrude Pugh, formerly of the Liverpool (England) Free Lending Library, appointed at Tompkins Square Branch.

Miss D. Thomas transferred as children's librarian from the 125th Street Branch to the Webster Branch.

At the last meeting of the board of trustees of the Paterson (N. J.) Public Library the resignations of Miss May Bird and Miss Rosalind R. Kuenemann, of the library staff, were received. Miss Mollie Chadwick, formerly at the Totowa branch, but absent for the last year, will take the place of Miss Kuenemann; Miss Margaret Priestly of the Riverside branch, will take Miss Bird's place. Miss Pollitt, evening reference librarian at the main library, will go to Riverside.

BAILY, Lillian B., of Thompsonville, Ct., is to be librarian of the new Thompsonville Public Library.

BERRY, Ethel I., New York State Library School, '11-'12, has resigned her position as assistant in the Wells College Library, Aurora, N. Y., to become assistant in the catalog department of the Minneapolis Public Library.

BLISS, Leslie E., B.L.S., New York State Library School, '13, and Alice M. Burnett of Newark, N. J., were married on February 26. Mr. Bliss is assistant in the legislative reference section of the New York State Library.

BONNETT, Marguerite W., New York State Library School, '02-'03, for several years assistant in the reference department of the Carnegie Library of Pittsburgh, died suddenly in California on February 28.

CAMPBELL, Robert A., has been appointed librarian of the Municipal Reference Branch of the New York Public Library beginning April 1. This branch was formerly the Municipal Reference Library in the Finance Department of the city. By action of the Board of Estimate and Apportionment it has been placed under the management of the New York Public Library and allotted quarters in the new Municipal Building. Mr. Campbell graduated at the University of Wisconsin, with degree of A.B., in 1906; was special agent of the Wisconsin State Tax Commission in the summer of 1906; assistant in the University of Wisconsin, 1906-08; on the staff of the National Tax Commission, summer of 1907; a Fellow of Cornell University, 1908-09; Fellow of the University of Wisconsin, 1909-10; legislative reference librarian, state of California, 1910-11; secretary, Wisconsin State Board of Public Affairs, 1911-14. Before he went to California Mr. Campbell also had considerable experience under Mr. McCarthy in the legislative reference department of the Wisconsin Free Library Commission.

CLEGHORN, Vera, for the past two years librarian of the San Luis Obispo Carnegie Library, resigned April 1, to take a position with the California State Library in Sacramento.

Foss, Sam Walter. A memorial to Sam Walter Foss, poet and for ten years and more the librarian at Somerville, Mass., will be erected on the farm on which he was born at Candia, N. H., by the Candia Club. It will take the form of a granite marker, bearing a bronze tablet on which will be the date of the poet's birth and an inscription from his works. Dana Brown, a cousin of the poet, has given a diamond-shaped plot of land to the club as a place for the memorial. It is hoped the memorial will be completed by the time the Candia Club holds its summer meeting in that town. A building on the land must be moved. It is planned to place a sign at the Candia railroad sta-

tion indicating the road which leads to the monument. At the next meeting of the executive committee of the club President George A. Hoseley will make a report on the definite plans for the memorial.

FOULDS, Maud M., of Ocean City, N. J., has been appointed librarian of the new Ocean City Public Library.

GILMORE, Evelyn L., for eight years librarian of the Lewiston Public Library, has been elected librarian of the Maine Historical Society, which has headquarters in Portland, one of the most important library positions in Maine.

HICKMAN, Margaret, of Red Wing, Minn., has been engaged to take charge of the new library recently completed at Eveleth in the same state.

JONES, Clara A., has resigned her position as librarian of the Warwick (Mass.) Free Library after thirty-three years of service. She continues as trustee and as secretary and treasurer of the board. During her librarianship the library has grown from 1700 to 5800 volumes. Warwick is one of the banner towns of the state in regard to circulation, which last year was 9.5 per head of the population. Circulation 4531, population (1910), 477. The people of Warwick showed their appreciation of her many years of faithful service by the gift of \$75 in gold from sixty contributors.

LOGASA, Hannah, head of the department of statistics and accounts in the Omaha Public Library, is planning to attend the Oxford meeting in August. She will sail for Europe soon after the A. L. A. conference in Washington, and will spend the summer in travel on the continent, returning to this country in October.

McLAUGHLIN, Mae, of the book department of the Queens Borough Public Library at Jamaica, L. I., has resigned to be married. Miss May McInerney of Elmhurst, has been appointed a grade B assistant in her place.

MORE, Annie, librarian in the Camden (N. J.) Public Library since 1897, died at her home in Camden March 26.

NEAL, Mollie, has been appointed librarian for the Venango County (Pa.) Bar Association. The 1700 volumes in the law library have been classified and rearranged in their cases. Miss Neal will have permanent quarters in the library and will do stenographic work for attorneys.

NELSON, Charles Alexander, celebrated his seventy-fifth birthday on April 14 at a

birthday reception, which was attended by many library and other friends, who took opportunity to congratulate him on his long and varied work in the library field.

SAGE, Lucile, has been appointed assistant librarian in the library at Selma, Cal.

SEARS, Miss Minnie E., who was appointed first assistant in the cataloging division of the reference department of the New York Public Library beginning February 16, is a graduate of Purdue University, B.S., and M.S.; of the Illinois Library School, B.L.S.; was assistant cataloger, University of Illinois, 1901-03; head cataloger, Bryn Mawr College, 1903-07; traveled and was engaged in bibliographical work abroad, 1907-08; head cataloger, University of Minnesota, 1909-14. She was joint author, with Miss Isadore G. Mudge, of "A Thackeray dictionary," London, 1910.

SETTLE, George T., librarian of the Louisville (Ky.) Free Public Library, was elected president of the Department of Libraries at the Conference for Education for the South held in the Louisville Public Library April 8. He will succeed Charles D. Johnston, librarian of Cossitt Library, Memphis, Tenn.

STEWART, Elizabeth, children's librarian in the Omaha Public Library, sails from Boston for Naples about the first of June, for a year's leave of absence. She will spend the summer in travel and in winter will study in Germany.

VAIL, Mrs. Edith E., of Norwalk, Ct., has been engaged as librarian of the Westport (Ct.) Public Library to succeed Miss Katherine M. Hutt. Mrs. Vail has had experience in the libraries of Connecticut and Massachusetts.

WALKLEY, Raymond L., B.L.S., New York State Library School, '13, who has been temporarily engaged in bibliographic work for the United States Bureau of Education, has accepted an appointment as assistant to the librarian of the Minneapolis Public Library.

WITT, Mrs. Edgar, who has been chief librarian at Baylor University, Waco, Texas, since 1909, has resigned her position to take effect June 1. The vacancy has not been filled. Miss Annie Melear will continue as first assistant.

WOODS, Arabella, of Des Moines, has been appointed librarian of the public library at Chariton, Ia. She will succeed Miss Katherine Terrill, who has accepted a library position in Burlington.

THE LIBRARY WORLD

New England

MAINE

Bar Harbor. *Jesup Mem. L. Inez M. Suminsbey, lbn.* (Rpt.—yr. ending Sept. 10, 1913.) Accessions 376; total number of volumes in library 10,000. Circulation 20,996. Expenses for salaries \$975; for books and periodicals \$417.47.

An attractive brochure with two double-page illustrations and several full-page pictures showing exterior and interior views of the library, and containing a short sketch of the growth of the library and description of its building was issued with the annual report.

Brewer. At the March town meeting the question of accepting the proposed gift of the Free Public Library, offered to the city by the Library Association, was voted on. Conditions of the gift were that the city should assume the entire support of the library (instead of a part of it as at present); that the library should be kept up to its present standard; that the library should be managed by a permanent board or commission, composed the first year of persons satisfactory to the association, one (or two) of whom should retire each year, a successor being appointed by the city. By a vote of 302 to 292, the gift was refused. Several reasons were given for the result. First, the population at one end of the town is largely foreign and at present lacking in library interest; second, a large number of people living away from the center of the town felt they would derive little benefit from the institution; third, the tax rate is already reported abnormally high and a burden to the farmers of the town; and at the last minute news was received that a bequest of \$5000 made to the library by a former citizen had been annulled by the breaking of the testator's will, a fact which discouraged many from voting for the acceptance of the gift. By its last report the library was shown to possess about 3500 books, 314 books having been added during the year. There were 712 cardholders who had used 13,723 books and 7336 magazines. Expenses were about \$1200. Last year the city appropriated \$500 for the library, to which the state added \$50. The rest of the money was raised by the Library Association. No help has ever been received from Mr. Carnegie, and only about \$100 in all from outside the town.

NEW HAMPSHIRE

Keene P. L. Mary Lucina Saxton, lbn. (38th annual rpt.—yr. ending Dec. 1, 1913.) Accessions 701; total number of volumes in library 19,753. Circulation 40,254. New registration 582.

Manchester. With the near approach of the time for the removal of the 70,000 and more books stored away in the Public Library Building on Franklin street to the new Carpenter Memorial Library, the question arises as to the uses to which the old library building will be put. The Manchester Federation of Women's Clubs some months ago petitioned that the old library edifice, when vacated, be turned over to the uses of the federation under proper restrictions, and intimated that the federation was in a position to expend whatever sum of money might be necessary to equip and furnish the building for social, philanthropic and educational work. Since that petition was filed the question has arisen in City Hall circles as to the occupancy of at least a part of the old library building by the overseer of the poor, the school department, and also the assessors, still leaving room for federation purposes.

MASSACHUSETTS

Amherst. The Amherst College faculty has appointed President Alexander Meiklejohn, Librarian Robert S. Fletcher, Prof. J. F. Genung, Prof. H. de Forest Smith and Treasurer Harry W. Kidder to consider plans for a new library building.

Attleboro. The sum of \$500 has been left to the Public Library by the will of the late Mary Lee Buffum of Providence.

Barre. The bequest of \$2000 and books, left to the public library by Katherine Allen of Worcester, has been accepted.

Boston. A few librarians of Boston and vicinity have been meeting for luncheon on the last Thursday of each month, for informal discussion of professional matters.

Boston. Residents of the Franklin Park section are protesting Mayor Curley's action in causing the closing of the Park Branch Library and reading room. They declare it is the first Boston reading room to be closed since the building of the Public Library, and that thousands of patrons are put to serious inconvenience.

Boston. According to the last catalog of the Massachusetts College of Pharmacy, the Sheppard Library of that institution now contains about 7500 volumes. The library is especially strong in literature of pharmacopœias and dispensatories and in its sets of American and foreign pharmaceutical journals.

Boston. The Insurance Library Association, recently made an annex of the National Board of Fire Underwriters, is now established in new quarters on the fourth floor of the Oliver Building. The book stack room has been thoroughly fireproofed by rebuilding partitions, doors and windows to conform to National Board standards, and is equipped with steel stacks. All other shelves, cases and cabinets for files are of steel, the only wooden furniture being the desks, tables and chairs of the reading room. The librarian has a private office, and two assistants are now employed for the detail work.

Cambridge. The late John L. Cadwalader of New York City, bequeathed \$20,000 to Harvard University for the purchase of books for the law school.

Danvers. *Peabody Inst. L.* Emilie D. Patch, lbn. (46th annual rpt.—yr. ending Mar. 31, 1913.) Accessions 617. Total number of volumes in library 27,743. Circulation 49,973.

Gloucester. Four oil paintings in the Sawyer Free Library were cut from the frames recently, and some Indian relics and similar articles were taken. These were given to the city from the collection of the late Samuel E. Sawyer, donor of the library. The paintings stolen were on the second floor, access to which has always been free and unsupervised. Hereafter all visitors to the second floor of the building will be required to register.

Hudson P. L. Grace M. Whittemore, lbn. (46th rpt.—1913.) Accessions 434; total number of volumes in library 10,630. Circulation 42,028. Total registration 1724. Receipts \$2096.29. About one-fourth of the population of the town are library patrons.

Malden P. L. Herbert William Fison, lbn. (36th rpt.—1913.) Accessions 3999; total number of volumes in library 63,886. Circulation 197,899. New registration 3062. Receipts \$33,616.30.

The past year has been the busiest in the history of the library. The increase of circulation over last year is 14,900; the insur-

ance has been doubled; a painting by Maes, and a smaller one by Symonds have been purchased; a branch has been established at Maplewood; a recataloging has been begun; rebinding and repairing of all fiction and juveniles has been finished; a case for exhibiting photographs has been added to the art gallery; 2000 photographs have been purchased.

Marlboro. Edward L. Bigelow, for forty-four years chairman of the Public Library Committee, has resigned.

Melrose. The Melrose Public Library has established the first branch of the library, located in the southeast section of the city in the Middlesex Associates block on Forest street. The library trustees are also planning to open a branch in Melrose Highlands provided the city government makes an appropriation for the work. The associates defray the cost of the library branch, open the library one afternoon and evening each week and provide attendants there besides carrying the books to and from the library. Reports of the library trustees show 904 books added during the year to the central library and a circulation of 63,261 for 1913.

Needham. After \$700 has been paid to relatives and friends, Mrs. Myra S. Greenwood, formerly of Needham, under the terms of her will, directs that the residue be given to the town of Needham for the purpose of erecting a public library, the work to be done within three years after her death. She further directs that if the town now has a library the money be used as a trust fund to be known as the Greenwood Memorial Fund.

Orange. Resolutions of appreciation of the gift to the town of the library on East Main street, have been presented to Mrs. Almira Wheeler Thompson by a special committee. The library was erected by Mrs. Thompson in memory of her late husband.

Rockland P. L. Angela W. Collins, lbn. (35th rpt.—1913.) Accessions 351; total number of volumes in library 13,462. Circulation 36,042.

Waverley. *McLean Hospital L.* Edith Kathleen Jones, lbn. (Rpt.—1913.) Accessions: medical library (for staff only) 192 volumes; general library (for patients and employes) 273 volumes. Total number of volumes in medical library 5494; in general library 7632. Circulation from general library

was 8487. There is an annual appropriation of \$300 for the general library, increased by from \$50 to \$200, from the "Lovering bequest."

"This library is said to be the best institution library in the world, and certainly there is no other which has so fine a collection of books in the general library, for the use of patients, or where this branch of hospital therapeutics has been so carefully worked out. Within the last four or five years the desirability of well-selected, systematically managed libraries in hospitals for mental diseases has been much discussed, and library commissions and hospitals alike are doing what they can to establish and maintain such libraries. The annotated list published by the A. L. A. Pub. Board, entitled 'A thousand books for the hospital library,' is based upon the shelf-list of McLean Hospital General Library."

Westborough Town L. Flora B. Brigham, lbn. (Rpt.—1913.) Accessions 394; total number of volumes in library 17,377. Circulation 42,919. Receipts \$2434.27.

Worcester. A library where books on every topic may be secured in the French language is being founded by members of the Jeanne Mance Society, the largest organization composed of French-speaking women in Worcester. Members are especially anxious to secure French books on literature, history and biography, as well as approved French fiction and religious topics.

RHODE ISLAND

Centredale. The library books and all other property of the Union Library Association of Centredale have been presented to the town. Approximately 5000 volumes are contained in the library building, which is located on Mineral Spring avenue, near the center of the village.

Providence. Brown Univ. L. H. L. Koopman, lbn. (20th annual rpt.—yr. ending May, 1913.) Accessions 6530. Circulation for home use 6448. Two special collections of importance were added during the year: the Chambers Dante collection, numbering fully 2000 pieces, and a collection of about the same number of broadside ballads, chiefly American, many relating to the Civil War. With the latter gift came provision for mounting and binding. An alumnus has made possible the more complete cataloging of all works on history, which represent more than half the

books in the library, and this work has been begun.

Providence. After a careful survey of the funds available, the Providence Public Library has been obliged to curtail its usefulness by cutting down appropriations in nearly every line of activity. At the Central Library, on Washington street, it has been necessary to close some of the departments for a portion of the day. Moreover, till further notice, the whole building is to be closed on some of the days on which it has heretofore been open. It has been necessary to cut off a liberal slice from the list of periodicals subscribed for, as well as from the amount available for rebinding. And in addition to all this a most unfortunate cut has been made in the amount available for new books.

CONNECTICUT

The latest printed report of the Connecticut Public Library Committee (for the year 1912-13) suggests that the public library being a public institution every town should be compelled to establish and maintain one as it now establishes and maintains free public schools. At present, under the law of 1893 and a later amendment, every town which establishes a free public library and provides for its maintenance and increase receives a grant of books not exceeding \$200 in value the first year and not more than \$100 in any succeeding year. There are now in Connecticut 175 libraries, of which number 152 are free libraries (99 of them free public libraries under the state law), and 23 are subscription libraries. These libraries contain 1,548,540 volumes, 84,126 volumes being added during the year. Circulation amounted to 3,305,545. Total expenditures were \$178,299.08, of which \$111,744.20 was used for salaries, \$56,378.00 for books, and \$10,176.88 for periodicals. A series of tables, covering 53 pages, give complete details concerning the libraries of the state. In addition to the regular public libraries there are in the state 1095 schools having libraries, which contain 293,921 books. Of these 140 draw the state grant, the total amount so drawn being \$8130.

Ansonia P. L. Ruby E. Steele, lbn. (17th rpt.—yr. ending Sept. 30, 1913.) Accessions 1280; total number of volumes in library 19,257. Circulation 57,360. New registrations 540, total 2923. Receipts \$5899.60; expenses \$4904.71, including \$1768 for salaries, and \$1080.44 for books and periodicals.

Hartford. In answer to communications from the Civic Club and others in regard to the establishment of a municipal library in the new municipal building, the Municipal Building Commission states that there is sufficient space unallotted in the new building to house the proposed library, and at the direction of the city authorities this space could be reserved for the purposes noted in the communications.

Huntington. *Plumb Mem. L.* Jessamine Ward, lbn. (21st annual rpt.—yr. ending Aug. 31, 1913.) Accessions 747; total number of volumes in library 13,201. Circulation 39,501. New registration 361; total 744. Receipts \$4117.34; expenses \$3500.76.

Meriden. Mrs. Augusta Munson Curtis, aged 81, donor to Meriden of the \$100,000 Curtis Memorial Library and widow of ex-Mayor George R. Curtis, died April 1.

Middletown. The trustees of Wesleyan University have decided to erect a new library building, as part of extensive changes and improvements to be made within the university grounds.

Norfolk. The Norfolk Library, founded and maintained by Miss Isabella Eldridge, is twenty-five years old. It is thirty-three years since Miss Eldridge took the first step toward what later was realized in the present library, when she opened, in 1881, a reading room in the house of G. W. Scoville. The library does not cost Norfolk one cent, all expenses connected therewith, even to the purchase of books, being borne by Miss Eldridge.

Norwich. The Otis Library has received from the state the "Vital records of the town of Norwich," in two volumes, published by the Society of Colonial Wars.

Winsted. After the payment of certain bequests specified in the will of Mrs. Mary P. Whiting, the residue of the estate goes to the Memorial Library here. The value of the estate is not given.

Middle Atlantic

NEW YORK

Albany. The theological library of the late William Crowell Doane, Episcopal bishop of Albany, comprising three thousand volumes, has been presented to the State Library by the grandchildren, carrying out the bishop's wish. It is to be known as The Doane Theological Library. These books were brought together

during a century by George Washington Doane, bishop of New Jersey, and his son, the late bishop of Albany.

Alden. The new building of the Ewell Free Library is completed, and the furniture is now being installed. It is built of Warsaw blue stone, trimmed with Indiana limestone, and is one of the most complete library buildings in the state. It is the gift of Colonel and Mrs. Joseph E. Ewell of Bath, former residents of Alden, as a memorial to their daughter, Florence Josephine Ewell.

Amagansett. The movement for the establishment of a public library in Amagansett is having warm support. An offer to donate 400 volumes has been made by an interested party.

Auburn. It is not generally understood by citizens that the library of Auburn Theological Seminary is open for use by the public. To meet this apparent misunderstanding the seminary authorities wish to state that their library is a free, public library, and its use is not confined to the faculty and students. The building is open on every week day during the seminary year from 8 to 12 in the morning, from 2 to 5 in the afternoon, and from 7 to 10 in the evening. An exception is made of the evening hours on Saturday. During vacations the hours are from 8 to 12 in the morning, and from 2 to 5 in the afternoon. Rev. John Quincy Adams, D.D., is the librarian in charge. It is a general as well as a theological library. In it are now 35,450 volumes and 13,200 pamphlets, and about 70 periodicals.

Brooklyn. In a letter to the Brooklyn *Eagle* of April 12, David A. Boody, president of the Brooklyn Public Library, answers the frequent question why work does not proceed in the construction of the new central building. In the first place, to quote Mr. Boody, "this building is being constructed by the City of New York and not by the Brooklyn Public Library. The work is in charge of our local borough officials. The amount which has already been appropriated for this building is \$500,000. No further work can be done until an additional sum shall be available as a portion of the original \$500,000 must be retained to pay for architect fees, etc., as work goes on in accordance with the contract. In order to make a portion of this building available as soon as possible

for the present needs of the library, it was suggested by the trustees that the Flatbush avenue wing be first constructed. By a further appropriation at the present time of \$500,000 the wing can be completed to the second story and made to house the valuable collection of books and records now in the Montague branch. This collection is estimated to be worth \$750,000, but in many respects it has a valuation which money cannot measure. The Montague building is without adequate accommodation for these books and records and is not fireproof. A watchman is on duty night and day, but such a condition allowed to remain beyond the limit of necessity does not coincide with official obligation."

Brooklyn. Children's Museum L. Miriam S. Draper, lbn. (Rpt.—yr. ending Dec. 31, 1913.) Accessions 223; total number of volumes in library 5895. Total attendance for 1913 was 47,798, and 329 books were loaned for home use.

Work on enlarging the reference room was begun during the year, and when completed will give considerable additional space for book shelves, besides providing tables for teachers and older students. Many students in the Training School for Teachers used the library in their preparation of lessons, and pupils of one biology class in the Commercial High School spent their study periods there, following the outline of a special course. Boys and girls use the library constantly in connection with their hobbies. Visits to the museum have been made by thirty different groups of librarians and by several curators of museums both in this country and abroad.

Buffalo. The councilmen have reconsidered the budget and have raised the library appropriation from \$83,174.59 to \$110,000, after Librarian Walter P. Brown and Director Thomas T. Ramsdell had presented figures showing that it would be necessary to close some of the branches unless the appropriation was increased.

Buffalo. The Buffalo Public Library is to send to Spokane, Wash., for the Inland Empire Teachers' Association demonstration, an exhibit of the library work in the schools of this city. Requests for displays illustrating this phase of library work, which originated in Buffalo, have come from all over the world. An exhibit has been sent to Leipsic and this in turn is to go to the San Francisco Exposition in 1915. Recently the superintendent

of the Oregon schools sent to all the district superintendents pamphlets describing the school library work of Buffalo and urging the adoption of the service wherever possible.

Canandaigua. Major Charles A. Richardson of Gorham street, this city, has made a gift of his valuable library to the Wood Library Association, which is to occupy quarters in the building of Ontario Historical Society, now in process of construction. Over 1700 volumes are contained in the collection, which is valued at many thousands of dollars. Major Richardson has also assured the Library Association that he has provided for an endowment of \$5000 for the institution. One-half the income from this amount is to be expended annually in the upkeep of the Richardson library and the other half is to be used to buy reference books to keep the collection up to date. It has been agreed that an alcove shall be set aside in the library portion of the Historical Building for the purpose of keeping the Richardson volumes together and that the gift is to be known as "The Major Richardson Collection."

Canton. Mrs. Eva Remington, the widow of the artist, Frederic Remington, has made a valuable addition to the College Library, to be under the direction of the Fine Arts Department of St. Lawrence University. The library is to be a memorial to Mrs. Remington's parents, Lawton and Flora Caten. The selection of books has been made by Prof. Hardie of the college, and the books cover the whole field of fine arts. For the present these books will be kept in the classified library, but when a suitable bookcase has been made they will be housed in the fine arts room. Mrs. Remington plans to make additions from time to time.

Carthage. F. W. Woolworth has given \$100 to the Carthage Free Library, and the money will probably be used for current expenses. Mr. Woolworth was a native of the town of Champion, and donations from other former residents of Champion to the amount of \$300 have been received. This with the \$400 that was appropriated at the last village election by the taxpayers of the two villages places the library in a good financial condition. The board of trustees of the library association is considering the proposition of starting an active campaign to raise by popular subscription a building fund.

Corona. A delegation of residents of the North Corona section, at the March meet-

ing of the Queens Borough Library trustees, at Jamaica, presented petitions containing several thousand names requesting that a branch library be established somewhere in the vicinity of Jackson avenue.

Geneva. As a result of an arrangement entered into between the Geneva school authorities and the trustees of the Geneva Free Library the library will receive 250 volumes for which there is no room at present in the High School Library. The books are a collection of volumes of history, fiction and biography. The Board of Education retains title to the books and can recall them at any time but they will be placed on the library shelves and used the same as any other books in the library.

Ithaca. Cornell Univ. L. Geo. Wm. Harris, lbn. (Rpt.—yr. ending June 30, 1913.) Accessions 13,870; total number of volumes 423,570, of pamphlets 64,000. Recorded use for both reference and home use (regarded as about one-third the actual use of the books of the library) 126,574. Registered borrowers 1092.

Middleport. A branch of the State Traveling Public Library has been established here and will be located in the M. E. Church. Miss Georgia Hawn will serve as librarian.

New York City. Carrère & Hastings have filed plans for a two story and basement branch with a facade of brick and marble to be erected at 78 and 80 Manhattan street, extending through to 519 and 521 West 126th street, for the New York Public Library. The cost is estimated at \$70,000.

New York City. The station of the traveling libraries department of the New York Public Library, recently opened in Room 108A of the Columbia University Library, is primarily for the circulation of books to the faculty and students of the university. The station is open every week day from 8.30 to 12 a.m., and on Monday, Tuesday, Thursday and Friday from 1 to 5.30 p.m. Three thousand books in charge of an experienced librarian form the initial collection, which will be changed or increased as occasion demands. Two books may be borrowed for a period of two weeks with the privilege of renewal for a like period. Regular deliveries by automobile twice a week will enable the station to borrow books from all the other branches of the circulation department; through this so-called interbranch loan system about 80,000 titles are available. An author catalog of the books on

the shelves will be kept at the station and printed lists issued by the Public Library will facilitate the borrowing of books from other branches.

New York City. The forty-third branch of the New York Public Library, known as the Fort Washington branch and situated at 535 West 179th street, between St. Nicholas and Audubon avenues, was formally opened April 14, at 8.30 p.m. On April 6 the building was open for the registration of borrowers, and on April 15, at 9 o'clock, it was open for the distribution of books. The building, the thirty-seventh erected from the Carnegie Fund to be used by the New York Public Library as a branch, is a four-story structure of Indiana limestone on a plot 50 x 100 feet. It was designed by Messrs. Walter Cook and Winthrop A. Welch and built by the William L. Crow Construction Company at a cost of about \$115,000. An assembly room seating two hundred and fifty people is provided in the basement; the circulation, reading and reference rooms for adults are located on the first floor; the children's room is on the second floor; club study rooms and the janitor's apartment occupy the third floor. This new branch is the Library's "farthest north" in Manhattan.

New York City. By the will of John L. Cadwalader, late president of the board of trustees of the New York Public Library, \$100,000 is given to the library. Mr. Cadwalader also gave to the library his collection of prints, in which he took great pride, and which is one of the most valuable private collections in the country, and such books from his library as might be chosen by the director of the public library. By the terms of the will \$50,000 is to be used to enlarge the prints' collection and \$50,000 to increase the salaries of the employes in the reference department. In respect to enlarging the collection of prints he expressed a preference that the expenditure should not be made for modern prints.

New York City. The accessions in the circulation department of the New York Public Library during 1913 were 165,274, making the total number of volumes in the department 964,189, a total which was inadvertently referred to in the April JOURNAL as representing the accessions alone.

New York City. The fifty-fourth annual report of Cooper Union shows that 632 books and 1478 pamphlets were added to the library

during the year. There were 487,934 men and 6494 women who used the library and reading room, making a daily average of 1550. A decrease of 91,338 in attendance for the year was shown. The Students' Loan and Reference Library was used by 389 students who drew 1554 books for home use. This library now contains 873 volumes.

New York City. To provide for the administration of the Columbia University Library, pending the selection of a successor to Dr. William D. Johnson, who resigned as librarian last December, a library council has been appointed, consisting of the president of the university, and Profs. Wheeler, Trent, Keyser, Shotwell, Simkhovitch, Abbott, Weeks and Harper.

New York City. Plans have been filed for enlarging the two-story library and office of the Hispanic Society of America on 155th street, by adding one story to the private exhibition gallery at a cost of \$35,000. Charles P. Huntington is the architect.

New York City. For the convenience of the Hungarians of the Bronx, a collection of books in Hungarian has been placed in the Woodstock branch. The same branch has on exhibition two original paintings of Indian life by E. Irving Couse, lent by the artist, and some etchings by Thomas Johnson, lent by Mrs. Johnson.

Potsdam. Vilhelm Slomann of the State Library School at Albany, spent some time at the local library in March introducing a new system for the lending of books, cataloging a portion of the library and giving it a general overhauling. The local library has about 6500 volumes. About 600 of them were uncataloged. They represented the library's purchases for the past four years.

Rochester. Governor Glynn has signed the bill presented to the Legislature this winter increasing the power of the trustees of the Rochester Public Library and describing what shall constitute the library fund. Under the new law the Public Library Commission will have powers in regard to the Public Library analogous to the powers of the Park Commission and the Board of Education. Previously all contracts for library work and the purchase of all books and the expenditure of money for any purpose was done by the Board of Estimate and Apportionment. Under the new law the Library Commission will divide its funds, create offices, appoint officers, purchase supplies and do whatever seems

wise to it with the appropriation granted for library purposes.

Schenectady. The branch library in the school building at Brandywine avenue and Becker street has been used beyond the expectation of people in the neighborhood at whose request it was opened by the Public Library. Fifteen hundred readers from all over the eastern section of the city have so far taken out cards. The success of this branch is considered the more surprising in view of the fact that the basement room it occupies is most inconvenient to the public. In spite of difficulties over 26,000 volumes were loaned during 1913 from this one room. The branch collection contains 2229 books, according to the annual report.

NEW JERSEY

Bayonne. The Building Committee of the Free Public Library has been authorized to enter into a contract with the Art Metal Construction Company for the equipment of the library with the firm's steel stacks at a cost of \$6024.00.

Elizabeth. One of the "community" libraries of the Free Public Library of this city has been established at School No. 4. The plan has proved both popular and beneficial. Children, parents and other members of the family and their friends patronize the branch liberally. The "community" library has also proved of great advantage to the students of the Normal training department.

Hopewell. A free library and reading room has been opened in the office of J. C. Harrison, with a stock of 600 volumes.

Lakewood. Over \$1000 was made at a recent presentation by amateurs of a dramatization of "The Peterkin papers." The money was given to the Lakewood Library.

Madison. The use of the Madison Public Library has been extended to the residents of Morristown, who have been without library privileges since the burning of their public library in February.

Newark. A conference has been held at the Free Public Library between representatives of the New Jersey State Library Commission, consisting of John Cotton Dana, Miss Sarah B. Askew and Miss Edna B. Pratt on behalf of the commission, and Dr. Laban Dennis, president of the Public Welfare Committee of Essex county, Miss Emily S. Hamblen, its secretary, and William A. Averill of the committee, together with Dr.

W. Allen. The conference was to discuss the subject of a library survey for the county and to agree upon a plan for carrying it into execution. The details are now being worked out by the State Commission and the Public Welfare Committee. The State Library Commission will assume the direction of the survey which will be carried out by the Public Welfare Committee.

Ocean City. The Ocean City Public Library has rented two rooms on the second floor of the Bourse Building, Eighth street and Asbury avenue, for library purposes until the completion of the new City Hall.

South Orange F. P. Circ. L. Julia Schneider, lbn. (Rpt.—yr. ending May, 1913.) Accessions of 970 volumes were offset by 865 books discarded, lost or destroyed, leaving net increase of only 105 books. Total number on shelves 10,110. Circulation 36,490. Total registration 1878. Receipts \$7811.20; expenditures included \$1120.60 for salaries, and \$550.05 for books and magazines.

Summit F. P. L. Mabel R. Haines, lbn. (Rpt.—yr. ending Dec. 31, 1913.) Added 1058 volumes, total 10,662 volumes in library. Issued for home use 33,867 volumes (1071 increase over 1912.) Receipts \$4244.28; expenses \$4048.60.

During the year the library has installed new stacks and annexed a small branch library in the North Summit Neighborhood House.

Summit. The library has received a gift of \$100 from Theodore L. Beck, which will be applied to the purchase of books.

Trenton. The contract for the erection of the \$40,000 addition to the Trenton Free Public Library, the gift of the late John Lambert Cadwalader of New York, has been awarded to W. J. & J. H. Morris of this city.

Trenton. The bills authorizing the appointment of a legislative advisor and the establishment of a legislative reference department in the State Library have been signed by Gov. Fielder. The advisor, a competent counselor-at-law, is required to maintain an office in connection with the legislative reference department, for the purpose of avoiding repetitions and unconstitutional provisions, and of insuring accuracy in the text and other proper language. The other bill makes it the duty of the state librarian to collect and keep constantly up to date, and have readily accessible to all members of the

Legislature, and all persons desiring legislative information, all matters pertaining to current or proposed legislation. He is also required to provide digests of such information and material upon request of any legislative committee or member of the Legislature. The annual expense for this department is not to exceed \$1000, and the salary provided for the advisor is fixed at \$1500.

PENNSYLVANIA

Pennsylvania Library Notes for January contains a list of all the free libraries of Pennsylvania. The list includes 142 libraries, as compared with the list of sixty-seven free libraries published by the Keystone State Library Association in 1903. Some of the names on the present list represent libraries which were formerly on a subscription basis, but most of them are new. Included in each entry is the name of the town and county in which the library is located, the population of the town, the name of the library, the date of its founding, the number of volumes and the name of the librarian.

The Free Library Commission has published its report for 1913, in which attention is again called to the need of a more efficient library law for the state, and to the great need for more field workers. Two hundred and fourteen visits were made to 160 libraries, eight new libraries were organized, and three older ones assisted in reorganization. Forty-three conferences were held with library trustees or committees, talks were given on "Library Days" before clubs, meetings were held with small groups of people interested in forming a library, rooms were planned, and lists of books were furnished. Coöperation with the State Federation of Pennsylvania Women was placed on a definite basis during the year through their library committee, and has proved mutually helpful. Nine round table meetings were held. The third summer course was held at State College in connection with the summer course for teachers. Eleven librarians took the regular course and four teachers took the work intended for those who have charge of school libraries. Through the traveling library work 17,884 books were sent to 327 points in the state. Of these 13,009 volumes went into country districts or very small towns, and 1260 to public school buildings, for general use; 1448 volumes went to study clubs in towns where there is no free library, and 1695 volumes were lent to public libraries. The summer school at Mt. Gretna received

about 400 books to serve as a library. By agreement the traveling library does not operate in Susquehanna county, where the Montrose Library has now established forty-five stations in place of the eleven formerly maintained by the Library Commission.

Allentown. The law library of 5000 volumes belonging to the late Judge Edward Harvey has been bequeathed to the Lehigh County Bar Association, and a sum of \$2000 accompanies the bequest, the income to be used in maintaining the library.

Ardmore. The fifteenth anniversary of the Ardmore Free Library was celebrated in March by the Ardmore Women's Club, its founders, at an entertainment in the Ardmore Y. M. C. A. A feature of the celebration included tableaux representing the titles of famous books. In connection with the celebration numerous donations of books were received and an anonymous donor sent a check for \$100. Beginning with a few books, donated by members of the club, the library has grown until to-day it has a circulation averaging more than 1000 books a month, and has fourteen traveling libraries connected with it.

Braddock. On April 19 the Braddock Carnegie Library, the first free library ever given by Andrew Carnegie, celebrated its twenty-fifth anniversary. An elaborate celebration was prepared, with a big parade and many speeches. Mr. Carnegie was a guest of honor.

Chester. By the will of the late Mrs. Sarah D. Mowry the sum of \$300 is left to the Chester Free Library.

Kutztown. The Kutztown State Normal School is building a \$100,000 library and museum building of North Carolina granite.

Mount Union. As a part of a movement set on foot by the ministers of the town to secure better social conditions, plans were made early in the Winter to organize a public library. A vacant room in the Methodist church has been fitted up for library purposes, and about 225 books have been donated to form the nucleus of the library.

Philadelphia. From the Starr Center Settlement Library, situated in a crowded tenement district and supported wholly by voluntary contributions, 29,690 books were circulated. There are only 3500 books in the collection, and about 1000 cardholders. Every Wednesday in the summer the library is the

distributing station of the Philadelphia Flower, Fruit and Ice Mission.

Philadelphia. Ground has been broken for a free library for George's Institute at the southeast corner of Fifty-second and Media streets. It will be of brick, 92 x 74 feet, and will cost \$10,800.

Philadelphia. Resolutions urging the Drexel Institute to restore its school for the training of librarians were adopted March 20 at a meeting of the representatives of educational and cultural institutions, held in the Free Library building. Among the institutions represented were the Free Library, the College of Physicians, Drexel Institute, the University of Pennsylvania and several of the city's learned societies. A committee was appointed to draft a formal statement for presentation to the trustees of the Drexel school. There is no library school in eastern Pennsylvania now, although there is a brief course in library management at the William Penn High School. It was stated that the low salaries paid by the city to its librarians are responsible for the small number of young men and women who enter the profession. It was suggested that the public library board assume control of the library school. This proposition was rejected, and the representatives of Drexel Institute were equally emphatic in refusing to support the school.

Phoenixville P. L. Elmira W. Pennypacker, lbn. (17th annual rpt.—yr. ending July 1, 1913.) Accessions 441; total number of volumes in library 10,063. Circulation 30,291. New registration 343; total 1974. Income \$2153.43; expenses \$2042.78, including \$1016.05 for salaries, and \$601.88 for books and periodicals.

Pittsburgh. Work has been begun on the \$150,000 addition to the Northside Carnegie Library. The new portion will be added to the Moody street side. It will be two stories high. Andrew Carnegie is bearing the cost of the addition.

Pittston. The Lithuanian Library, containing 1146 volumes, had 6552 visitors to its reading room and 1159 books were taken home. The work cost less than \$200, as J. S. Vascavage, who has charge of the work, gives his services.

Pottsville. The trustees of the Free Public Library gave a banquet at the Penn Hall Hotel on April 3 to the members of the library staff, the directors of the Pottsville school district and members of the press.

Somerset. George F. Baer, president of the Philadelphia and Reading, has given \$500 to the fund for the establishment of a free library here. Mr. Baer is a native of Somerset county.

Warren. The Warren Library will receive \$5000 under the will of the late Mrs. Eliza A. Henry.

Waterford. Library rooms have been fitted and furnished in the High School Building. The committee in charge plans to keep the rooms open several evenings each week for the accommodation of those wishing books from the library and also for meetings of the women's clubs and other gatherings of a public or semi-public nature.

MARYLAND

In its second biennial report covering the time from November, 1911, to November, 1913, the Maryland Public Library Commission summarizes work done, particular stress being laid on the work of traveling libraries, of which 263 were circulated. For about nine and one-half months of the time Miss Mary P. Farr has been employed as field secretary and library organizer. In order to acquire a permanent field secretary the commission recommends a doubling of the present appropriation of \$1500 to \$3000. With this increased appropriation it would be possible to purchase more new books for the traveling libraries, and to encourage and help both the libraries already established in the counties and new ones just being started. The commission now has its office in the Enoch Pratt Free Library of Baltimore, but need is felt of larger quarters. By careful husbanding of resources in previous years, the commission was able to spend \$1000 this year for books, which added 43 new traveling libraries and revised the old ones. There is a growing demand for libraries on special topics.

Baltimore. A branch of the Enoch Pratt Free Library at Irvington has been asked by a committee from the Women's Club of Irvington. It was asked that the city buy a lot for the library at the triangle formed by Frederick avenue, Hilton street and Caton avenue, or in that vicinity, the plan being to have the building erected out of the Carnegie library fund. The committee was told that there was no money available at this time for the purchase of the lot. The matter will be brought to the attention of Mayor Preston and the Board of Estimates may con-

sider the proposition when it makes up the tax levy budget for 1915.

Frederick. The new library was opened April 15 in a room at the Y. M. C. A. Miss S. M. Akin, of Cartersville, Ga., an experienced librarian, is in charge, and she will have one pupil assistant. The library has about 1500 books.

DISTRICT OF COLUMBIA

Washington. The Public Library has just rendered a valuable service to students of the history of the District of Columbia in preparing an analytical catalog of the Columbia Historical Society records. In preparing this card catalog of the sixteen volumes of the proceedings of the Columbia Historical Society it was found that there are 140 different papers. In some cases the separate papers are represented under two or three subjects, so that the series as a whole is represented by 321 different author and subject entries. The Library of Congress has printed the cards for this series. Sets of the printed cards can be purchased by other local libraries or by individuals.

Washington. An amendment to the army appropriation bill has been suggested by Senator Dupont of Delaware, that the library of the surgeon general's office be moved to the Library of Congress and become a part of it. Senator Dupont suggested that as the library is not used exclusively by the army medical corps, but is a library for the whole medical profession, it should be made a part of the national library, and that the army, which has annually appropriated \$10,000 for its upkeep, should be relieved of its care. Furthermore, while the building in which the library is kept is supposed to be fireproof, it is not modern in its equipment, and the opinion was expressed that to allow the library to remain there indefinitely would be dangerous. The change is opposed by members of many medical societies, who say that it will be much more difficult for physicians to get access to the books if they are put into the Library of Congress.

Washington. Dept. of Agriculture. L. Claribel R. Barnett, lbn. (Rpt.—yr. ending June 30, 1913.) Accessions 9574, total number of books, pamphlets and maps 127,819. The total number of different periodicals, exclusive of annuals, received currently during the year was 2035, of which 777 were received by purchase and 1258 by gift. There were 44,029

books charged to readers in the main library, and 22,166 to various branch libraries. Five thousand seven hundred and sixty-eight books were borrowed from other libraries in and out of Washington, most frequently from the Library of Congress and the library of the Surgeon General's office.

Washington. Geol. Survey L. The library received 15,040 additions, comprising practically all new literature on geology, paleontology and mineralogy. There were 9213 readers in the library, and 10,162 books and maps were lent for outside use. The bibliography of North American geology for 1911, with 1266 author entries, was published as Bulletin 524. The bibliography for 1912 (Bulletin 545) is under way. In addition to current cataloging, work was continued on the full cataloging of various series in the older portion of the library, including reports and maps of geological surveys of Hungary, Slavonia-Croatia, Galicia, France, Switzerland, and Tasmania (in part), the monographs of the Palaeontological Society of London, public documents, mostly of the Western states, procured for the use of the land-classification board, and maps of the New England, Middle Atlantic and some of the Southern states. Printed cards for these various series, as well as for the new geologic books and for all of those cataloged in former years, are now available to librarians. As these cards, marked "Library, U. S. Geol. Survey," are filed in the many public, institutional, and university libraries of the country the information goes abroad that the books described are in the Geological Survey Library. This fact accounts in part for the increased number of requests for loans made upon the library by librarians and specialists outside of this city, and also for the increased number of specialists who come here to use the library.

Washington. Soldiers' Home L. During the year ending July 1, 1913, 800 volumes were added to the library, making a total of 11,107 volumes. In response to many requests a collection of standard German books was begun, 95 volumes being added. During the winter months a reading club was conducted in the library once a week, with an average attendance of 34. Books from the hospital library are taken to patients unable to leave their beds, and periodicals are freely circulated. The library also contains a supply of books for the blind.

The South

VIRGINIA

Richmond. After more than a year of negotiations, the 100-year-old manuscripts stolen from the Virginia State Library during the evacuation of Richmond, in 1865, and discovered in 1912 in the Americana of the late Benson J. Lossing, are restored to the state. The General Assembly set aside an appropriation of \$790 to fulfil the contract entered into between the Lossing heirs and the legal department of the state. Of this amount \$750 went to the heirs to pay for the care of the documents and the cost of the litigation, and \$40 for the traveling expenses of the state librarian, who brought them back to Virginia. The Virginia papers include letters from Marquis de Lafayette to the Revolutionary governor of Virginia, documents bearing the signatures of Queen Anne, King William, the Georges and other British sovereigns, and formal communications in the handwriting of George Washington, Thomas Jefferson, Patrick Henry, James Madison and others.

Richmond. The Chamber of Commerce, Business Men's Club and a large representation of interested men and women are united in urging the Council Committee on Finance to approve the purchase of Jeter Memorial Hall at Richmond College for a municipal library. A resolution appropriating \$110,000 for this purpose is now pending.

SOUTH CAROLINA

Charleston. The Charleston Library Society has recently received a bequest of \$5000 from the late Mrs. Laura Wolcott Lowndes.

GEORGIA

Atlanta. The proposal to have five women each on the Board of Health, the Board of Education, the Park Board and the Library Board has been agreed to and adopted by the Charter Amendment Committee of General Council. These boards now consist of one member from each of the ten city wards and the mayor and the chairman of the corresponding council committee as ex-officio members, making a total membership of twelve. The addition of five women will make the membership seventeen. The women are to be full members, with voting power the same as the men; they are to be elected by general council in the same way that board members are now elected.

Savannah. The selection of the commission which is to have full charge of the drafting of plans and the construction of the Public Library for which the Carnegie Corporation of New York has made an appropriation of \$75,000, has been completed. It has been found that a handsome and commodious building can be put up for the amount that is available. It is possible that the city council may make an additional appropriation of \$25,000, thus making available \$100,000 for the construction and equipment of the building. No assurance has been given on this point, however. Under the terms of the gift the city must make an annual appropriation of \$7,500, or 10 per cent. of the appropriation. The city has been appropriating \$10,000 a year to the support of the present Public Library and this appropriation will merely be transferred. The most available site at present for the proposed building is the lot at the rear of Colonial Cemetery, which the city owns. Unless the plans are changed this is where the building will be erected.

KENTUCKY

Hopkinsville. The Carnegie Library Board expect the new library building on Liberty street to be ready for occupancy by July 1.

Louisville. The Carnegie Corporation will be asked to give \$50,000 for two additional branch libraries in Louisville, as a result of action taken by the Library Board. The matter was brought before the Library Board by the Building Committee, in whose report it was asserted Louisville needed two more branches to complete the system, and suggesting that they be built at Butchertown and at South Louisville. In its report the Building Committee stated that the \$200,000 provided about six years ago by Mr. Carnegie had been entirely used in the construction of the main library and eight branches, the last branch having been accepted with the contractor's guarantee in March. The Finance Committee has been authorized to take immediate steps toward making the request.

Louisville. The new newspaper and civics room of the Louisville Free Public Library was opened for public use March 30. The room is 24 x 54 feet, with shelving and furniture finished in quarter-sawed oak. The shelving extends around two sides and one end, with a reading stand for newspapers taking up the entire east end of the room. This reading stand accommodates the Louisville daily papers, English and German, and

Cincinnati *Enquirer*. In cupboards below are kept the back numbers of volumes to be completed and made ready for binding. There are three tables, which will accommodate six readers each, and six standing racks, on which are kept the ninety-seven newspapers on reading sticks for use at the tables. The attendant's desk is at the west end of the room, placed for supervision of the entire room. The Louisville papers will be indexed by the assistant in this room, and clippings from papers and separates from magazines, books and pamphlets will be indexed and placed in box files under the system of decimal classification arranged especially for the purpose.

Louisville. At the annual meeting of the board of trustees of the Free Public Library, the offer made by the Jefferson Institute of Arts and Sciences, to turn over to the library its museum collection of Japanese, Indian and other relics, was accepted. Relative to the proposed plan that the county appropriate to the Louisville Free Public Library annually \$2000 or \$2500 for the privilege of persons in the county outside the city having access to the library books, it was stated that the county's finances would not warrant an arrangement of the kind at present, but it was hoped such an agreement could be reached soon. There has been some talk of establishing branch libraries in the county outside the city when the Louisville Free Public Library would expect to receive from the county \$6000 or \$7000 annually.

TENNESSEE

Athens. The ladies of Browning Circle are planning to secure funds to erect a library building in Athens that will be not only a library, but a building in which the social activities of the city may be carried on. The plans are to provide for a gymnasium, swimming pool, reading room, rest room for country women who come to Athens to do their trading and other features of an up-to-date community house.

Chattanooga P. L. Margaret Dunlap, lbn. (9th annual rpt.—yr. ending Sept. 30, 1913.) Accessions 4627; total number of volumes in library 30,223. Circulation 103,293, an increase of 27,816, 15,673 being from the county branches and class room collections. Total registration 9669. Receipts \$14,684.53; expenses \$14,168.47.

The year's growth and development of the library are shown in the opening of a colored

branch library, the establishment of five county branches, the placing of twelve class room collections in the first, second and third primary grades in the schools of Hamilton county, and in the increased circulation of books from the main library.

Jackson. In their annual report to the board of mayor and aldermen, the trustees of the City Library ask that an appropriation of \$3600 per year be made to the institution, as it is found that it will take that amount to operate it. They cite the fact that a good many new books and periodicals have been purchased during the past year and the library is quite a supplement to the city schools as an educational facility. The work of the librarian, Miss Allie Drake, and her assistant, Miss Kathleen Hamilton, is praised.

Knoxville. The University of Tennessee Library will give its usual six weeks' course in library methods for teacher-librarians from June 23 to July 31. Instruction will be given by Miss Lucy E. Fay, librarian, and Miss A. T. Eaton, assistant librarian.

ALABAMA

University. President George H. Denny announces that Colonel J. J. Garrett of Birmingham, has donated to the University his library of law books containing 1800 volumes. The addition of this collection will greatly increase the usefulness of the already excellent library of the school of law.

Central West

MICHIGAN

Detroit. The library fund was cut \$16,900.77 by the Council Committee on claims and accounts at its meeting March 21. The biggest cut was in the estimate for books, \$10,000 being cut out of the \$50,000 request of the Board of Library Commissioners, the allowance being just \$5,000 more than the Board of Estimates permitted to go through last year. Librarian Adam Strohm's salary was left at \$4,000, the committee cutting out an estimate for a \$1,000 increase in his pay. Items of \$77,375 and \$19,870 for the pay of 117 assistant librarians were held up temporarily. The items carry increases, the library commissioners said, because the public school teachers have been raised year after year, but no provision has been made for more pay for the women who work at the libraries. Minor items for typists and clerks and running expenses were reduced somewhat.

Detroit. "Detroit Public Library branches, 1914," is an artistic 36-page octavo pamphlet, issued by the Detroit Library Commission as a presentation of the twelve branches now in operation in the public library system. Of these, ten are housed in their own buildings, six being erected from Carnegie grants, two being gifts of private citizens, and two established at the cost of the city; two are still maintained in rented quarters. Excellent cuts of the buildings are accompanied by main floor plans and brief data as to arrangement, equipment, and cost; an effective cover design shows a small relief map of the city, with the branches and main library indicated in gilt. The diversity in plans, and varying adaptation to site requirements are interesting and suggestive. The Henry M. Utley branch is a worthy memorial to the long years of service of Detroit's veteran librarian emeritus. These branches "represent an investment of approximately a half a million dollars, an annual circulation of 600,000 issues and a personnel of about 60 library attendants."

Essex. The contract for building the new public library has been awarded to Johnson & Rogers of Essex.

Grand Rapids. The Association of Commerce has recently issued a little folder in which the work of the public library is given equal prominence as an asset to the community with that of the schools, and with statistics of valuation, building, post office receipts, financial conditions and industrial activity in general. The figures given for the library in this folder include all records of attendance as well as books issued for home use and show a growth from a library of 56,402 volumes with total use amounting to 223,097 in 1900, to a collection in 1913 of 131,484 volumes used by 790,235 individuals.

Highland Park. The Highland Park village authorities have decided to appropriate \$5000 for the maintenance of the Carnegie library which is likely to be given Highland Park this year. The municipal officers are working with the school board in an effort to secure the library. An excellent site has been found on Woodward avenue, near Buena Vista avenue.

Kalamazoo. It has been decided by the Library Committee of the Board of Supervisors to secure the services of a librarian to take complete charge of the law library in the Court House.

Lansing. There has been an increase of 1620 district libraries and a decrease of 65 township libraries in the last ten years, according to B. L. Keeler, superintendent of public instruction. The number of volumes in district libraries and the amount paid for the support of the libraries has nearly doubled during the last decade.

Manistee City Public and School L. Angie Messer, lbn. (Rpt.—yr. ending Nov. 30, 1913.) Accessions 1884; total number of volumes 16,637. Circulation 58,031. New registration 657; total number of borrowers 3153 (population in 1910 was 12,381).

Traverse City P. L. Alice M. Wait, lbn. (9th annual rpt.—yr. ending Apr. 30, 1913.) Accessions 608; total number of books in library 12,928. Circulation 40,253. New registration 437; total 2061. Reading room attendance 16,103.

OHIO

Cincinnati. The *Union Bulletin* of the Hebrew Union College in a recent number contained a brief description by A. S. Oko, the librarian, of the Spinoza collection in the college library, said to be one of the most complete in the world.

Cleveland. Just one year following the disastrous flood of 1913, the trustees of the John McIntire Public Library of this city received from the Carnegie Corporation a draft for \$1500 to reimburse the local library for flood losses. The loss at the local library included all furniture and books stored in the basement, valued at about \$3000.

Columbus. The general contract for the erection of the Memorial Library to be built at Capital College has been awarded to Ernest Kroemer of Dayton. Work will be started this spring.

Columbus. The State Library trustees have leased from O. A. Miller half of the second floor of the new fireproof building erected in East Gay street between Fourth and Fifth streets. The space will be used for the work of the traveling library department. This has been housed in the State House attic, where insanitary conditions long have prevailed. Rental will be provided through an emergency appropriation.

Dayton. A musical library, which will be part of the public library, was opened April 1 as a result of the efforts of the Civic Music League. An alcove in the library has been set aside for this purpose, stocked with books

of a musical nature and also music of a standard nature. A piano also has been provided. Citizens with an overabundance of music or musical literature were asked to help in stocking the library, April 1 being set aside as "April Shower Day" for that purpose. Free concerts began March 27 in eight neighborhood circles. The concerts will continue on alternate nights throughout the season.

Sandusky L. Assn. Edna A. Holzaepfel, lbn. (17th rpt.—1913.) Accessions 1942. Circulation 59,816. New registration 1520; total registration 5041.

Toledo. Noah H. Swayne, for fourteen years trustee of the Toledo Public Library and president of the board of trustees for twelve years, has resigned. In his letter Mr. Swayne assigns no reason for his retirement other than that the work of years of planning for the improvement of the institution is practically completed. He has two years of his fourth term of four years yet to serve. Mr. Swayne's personal contributions toward the expenses of the public library during his years of service and during the period when the finances of the institution were at a low ebb, amounted to several thousand dollars. He footed a bill of \$1000 for wiring the building for electricity, bought large numbers of books and advanced the money for the expenses of several employes at library training schools.

INDIANA

Indianapolis. Arrangements of the competition for an architect for a central library building in this city were prepared by H. Van Buren Magonigle, who was selected as architectural adviser by the board of school commissioners. The general plan of the competition and requirements for the building were reported in the February number of the *LIBRARY JOURNAL*. The program states that the cost shall not exceed \$427,500. The jury of award, which met the second week in April, consisted of three members: Edwin H. Anderson, president of the American Library Association and director of the New York Public Library, as library expert; Frank Miles Day, a prominent architect from Philadelphia, and Benno Janssen, an architect from Pittsburgh. This jury selected as most desirable the plans submitted by Paul P. Cret and Borie, Zantzinger & Medary, Associated, who were accordingly selected as architects for the new building.

Marion P. L. Edith Carlile Baldwin, lbn. (Rpt.—yr. ending Dec. 31, 1913.) Accessions

2380; total number of books in library 23,967. Circulation 60,560. New registration 1014; total 8086.

Warsaw. The Knights of Pythias lodge of Warsaw has unanimously voted to offer the lot just east of the lodge building as a site for the proposed Carnegie library building. The site is within a block of the business section of the city and is one of the most desirable in the city.

ILLINOIS

Chicago. The Chinese National Party, which is headed by Dr. Sun Yet Sen, started its first library in the United States at 2210 Archer avenue, less than three months ago. It has now moved to better quarters at 265 West Twenty-second street, and is establishing branches in other parts of the country. The library to-day contains more than 1500 volumes on political science. Donations of books on all subjects are appreciated.

Chicago. A resolution suggesting that sites for branch libraries of the Chicago Public Library be purchased with fines accruing from violation of the rules of the institution, was presented at the last meeting of the library board. There is received by the library, according to Librarian Henry E. Legler, about \$16,000 each year in fines for violation of the library rules, lost books, damaged books, neglects and similar causes. This sum has always been turned back into the treasury of the library board. A resolution was adopted at the same meeting cutting down the number of committees from seven to three, namely, administration, library, and building and grounds, that all directors may take active part in the entire work of the board instead of being divided into groups.

Chicago. Ryerson L. Mary Van Horne, lbn. (Rpt.—1912-13.) Accessions: books and pamphlets 1657, photographs 939, lantern slides 945, and post cards 1946; totals: books and pamphlets 15,441, photographs 28,041, lantern slides 10,306 and post cards 2922. Circulation: books 10,134, lantern slides 20,007, photographs 5634. Recorded attendance 77,615.

During the year the Art Institute offered to stand as guarantor for its students, members and employes desiring public library privileges, and this library was made a regular branch delivery station, with very satisfactory results. The library has for rental and use in the library two projection lanterns which may be used with an ordinary electric light fixture and operated by an amateur. One is

for slides and the other for photographs, post cards, book illustrations, etc. A bequest of \$50,000 was made to the Art Institute by D. H. Burnham for a library of architecture.

Macomb. West. Ill. State Normal School L. Fanny R. Jackson, lbn. (Rpt.—yr. ending July, 1913.) Accessions 887; total number of volumes in library 13,609. In the elementary school library accessions were 161, and total 1500, not included in preceding figures. Circulation 22,684. Fifty-four students received credit in library economy.

Peoria. The old library building at the corner of Main and Jefferson streets, has been razed to make room for a ten-story office building. Erastus S. Willcox, who has been identified with the library for forty-eight years, was the man who first suggested this site for library purposes, in the spring of 1865. In a very short time over \$13,000 was raised by popular subscription, and \$10,000 was paid for the corner, with the old house on it. The house was remodeled and used for library purposes for a few years, and in 1878 the three-story brick building, just demolished, was erected at a cost of \$32,000. It was Mr. Willcox, then one of the directors of the Peoria Mercantile Library, who in 1869 concluded that a free public library law was needed. With the exception of New Hampshire, which had a brief law permissive in its nature but prescribing no working method, no such law existed in any state. Mr. Willcox took a leading part in drafting the law, which was adopted very much as it stands to-day. This was presented to the Illinois Legislature in 1871, and passed in the same year, and was at once the pioneer and the foundation for all subsequent library legislation.

Urbana. At the University of Illinois Library ground has been broken for an addition to the stack room. The addition will be of brownstone to match the building, will measure 24 x 58 feet outside, and will provide a shelf capacity for 100,000 volumes. Shelves for only 60,000 volumes will be installed this summer. The cost, including the stacks, electric lighting, etc., will be \$26,000.

The North West

WISCONSIN

Eau Claire. The Men's Club of the First Presbyterian Church recently devoted an evening to the public library. Addresses were made by Miss Olson, the librarian, on "The activities of the library," by Professor F. M.

Jack, Superintendent W. H. Schulz, and others. Rural patrons may hereafter obtain books from the public library free of charge. Previously a fee of twenty-five cents a quarter, or a dollar a year has been received.

Galesville. The men of the city recently gave a dinner for the benefit of the local library.

Madison F. L. Mary A. Smith, lbn. (38th rpt.—yr. ending Je. 30, 1913.) Accessions 3220; total number of books in library 29,521. Circulation 152,153. New registration 3273; total registration 16,324. Receipts \$19,189.36.

For lack of a trained children's librarian work in the children's department has not been specially developed this year, but library instruction was repeated in all eighth grades in the schools. Sunday lectures were continued through the winter and spring, some of them in connection with exhibits shown. The library was used as a meeting place eighty-seven times by various clubs and committees.

Milwaukee. The Elizabeth L. Greene Memorial Library of Milwaukee-Downer College has received a bequest of about 600 books from Miss Julia Lombard Chaffee, who died in December. The books include fiction, history, poetry, religion and travel, and many of them are in fine bindings and in splendid condition. A conservative estimate puts the value of the collection at \$2500.

Neillsville. Andrew Carnegie has definitely offered a \$10,000 library building to the city, and the Common Council has passed an ordinance pledging \$1000 a year for its support. Options are being secured on sites for the Carnegie building. A fund of \$147 has been given toward the purchase of a site by the local Woman's Christian Temperance Union.

Waterloo. The Women's Club has recently conducted a donation campaign for the benefit of the local library. One hundred books of general literature have been given, together with yearly subscriptions to some of the popular magazines. A set of Stoddard's lectures has been purchased. A library clock and a fine hardwood library table, together with matting and pictures, have also been donated.

Waukesha. The new children's library, conducted by Miss Winifred Winans, has been formally opened, more than 500 children visiting the building the opening afternoon. Two hundred and fifty were present

during the story telling hour. There are about 375 books in the department. The department will be open every afternoon from 4 to 6 o'clock, and on Saturdays it will be open all afternoon.

Waukesha. The Waukesha Women's Club must vacate the Carnegie Library, where it has met. In a letter from the Carnegie Corporation objection is made to the idea of a club utilizing the building.

West Allis. Work has been started on the new Carnegie Library building, and it is expected to have the building finished by the end of the summer.

MINNESOTA

Duluth. The West End branch of the Duluth Public Library has moved to 20 North Twentieth avenue west. The new quarters are in a store building on the first floor with a front window. The hours for readers have been changed and lengthened. The library will now be open from 1 to 9 p.m., daily, except Sundays, when the hours will be from 3 to 8. Sunday opening is a new departure in the West End. Miss Maud Grogan, the librarian, will be in charge.

Minneapolis. The tenth annual exhibition of the Minnesota State Art Society was held in the public library April 1-22.

Minneapolis. The library board has bought from Thomas P. Wilson the three lots at the northwest corner of Central and Twenty-second avenue NE, for \$6000, giving a library building site of 114 x 150 feet.

Minneapolis. Mayor Nye has made a tentative offer of the mayor's reception room in the city hall to house the proposed business men's library. Quarters similar in size and general convenience have been offered to the Library Board at an annual rental of \$2400. The mayor's reception room is used for other purposes, but these for the most part are the holding of meetings, and other provisions could be made in other rooms in the building. If investigation shows that the reception room is available there seems no reason why that \$2400 rental should not be saved to the taxpayers. The members of the board and Miss Countryman, the librarian, are to look into the proposition thoroughly.

Minneapolis. To compete with motion picture theaters that attract hundreds with their bright signs, the Public Library will install an electric sign that can be seen from Tenth street to the new Great Northern Station.

The turn in Hennepin avenue at Tenth street affords opportunity for placing a conspicuous sign, the library board decided. A thorough overhauling of the main library will be undertaken as soon as the new art museum is finished and works in the art gallery at the library are transferred. The museum now on the third floor of the building will be moved to the rooms occupied by the art gallery and the third floor will be devoted to enlarging the library departments. The board has conferred with a representative of the Civil Service Commission, and it is decided that all employes of the library with the exception of the librarian and assistants who have received training in library work will come under civil service rules.

Minneapolis Athenaeum. Katherine Patten, assist. lbn. (Rpt.—yr. ending Dec. 31, 1913.) Accessions 2281; total number of volumes in library 65,806; total number of photographs and prints 3000. Expended from Spencer Fund for books and periodicals \$7287.05; from general fund for photographs and prints \$196.68.

St. Paul. The contract for the new public library building has been awarded to the Thomas J. Steen Company of New York City. It will be built of Tennessee marble, the cost being approximately \$430,000.

Thief River Falls. The city council has passed a resolution providing for the purchase of a \$2000 site for the new Carnegie Library. The site is three blocks from the center of the city and within one block of the municipal auditorium and court house. The work on the library, for which \$12,500 has been contributed by the Carnegie Corporation, will start this spring.

IOWA

Davenport P. L. Grace D. Rose, lbn. (11th rpt.—1913.) Accessions 3005; total number of volumes in library 37,791. Circulation 172,674. New registration 1714; total registration 10,251. Receipts \$29,674.70; expenditures \$20,646.79.

A new deposit station has been opened in Friendly House, special efforts have been made in the line of publicity and a second tier of stacks has been erected in the book room.

Des Moines. Contracts for supplying shelving for the new medical library department in the Iowa State Library have been let by the state executive council to the Art Metal

Construction Company of Jamestown, N. Y. The contract price is \$760.

Dubuque. Carnegie-Stout F. P. L. Lillian B. Arnold, lbn. (11th rpt.—1913.) Accessions 1210; total number of books in library 31,017. Circulation 99,432. New registration 1009; total registration 11,946. Receipts \$9503.75.

Branch libraries are a necessity in a city the size of Dubuque, which covers 11.5 square miles, but with the limited income received they are out of the question, and the circulation is gradually decreasing in consequence. Through the coöperation of the principal of the Lincoln School and the Board of Education a branch station was opened in the school. The Board of Education furnishes the room with heat and light, and the other expenses, including the library assistant's salary, are borne by individuals in the community. The branch is a success, and a movement has been started for a similar station in another ward of the city.

Independence. In the will of F. Munson is a clause providing for the immediate erection of a library building to become later a part of the equipment of the projected Munson Industrial Training School.

NEBRASKA

Lincoln. State L. H. C. Lindsay, lbn. (Rpt.—biennium ending Dec. 1, 1912.) Accessions 3523; total number of volumes 65,871, not including 26,154 volumes of Nebraska Supreme Court reports. Out of the appropriation of \$3000 for general office expenses, about \$1375 was spent for binding and re-binding some 1800 volumes. All binding has been done in buckram at an average cost of 76 cents per volume. The greatest present need is a fireproof building for the library. For some time there has been talk of erecting a new capitol building, and the suggestion is made that one wing, for the library, Supreme Court, etc., should be built at once. A second suggestion is for the erection of a fireproof building of marble or granite on land just east of the capitol, belonging to the State Historical Society, which land the society will deed to the state providing an appropriation is made for the building.

South Omaha P. L. Mrs. Grace Pinnell, lbn. (9th rpt.—yr. ending Jl. 31, 1913.) Accessions 358; total number of volumes in library 9234. Circulation 37,801. New registration 837; total registration 2767. Receipts \$5208.82; expenditures \$5208.82.

COLORADO

Denver. The Library Board and the members of the Colorado Electric Club have a movement on foot to establish a business men's branch of the Public Library in the downtown district. The Electric Club has agreed to equip a room at the Chamber of Commerce Building if the Public Library will furnish the books. The nature of the library is to be chiefly reference, and all fiction will be eliminated except the monthly periodicals.

The South West

MISSOURI

Paris. Heirs of the late W. H. Dulaney of Hannibal, have made the announcement of a gift of \$30,000 to erect a memorial library at Paris. Mr. Dulaney's gift is unconditional, save as to site. He formerly lived in Paris.

St. Louis. Thirty-six women members of the graduating class of the Library School of the University of Illinois visited this city the last week in March. Every spring a tour is made either to Chicago or St. Louis for practical training. Frances Simpson, assistant director of the school, accompanied the party. The visitors inspected the Central and branch libraries, the Art Museum, the library at Washington University and the Mercantile Library and Missouri Botanical Garden.

St. Louis Mercantile L. Assn. William L. R. Gifford, lbn. (68th rpt.—1913.) Accessions 4985; total number of volumes in library 142,848. Circulation 119,195. Total registration 3299. Receipts \$64,992.14; expenditures \$61,663.67.

Trenton. With the extension of the parcel post to include magazines and books, the Trenton Public Library has broadened its field. Patrons on rural routes or getting their mail at the postoffice in Grundy county, who hold cards for library books, may order books by telephone or mail.

ARKANSAS

Eureka Springs. The new Carnegie Library was recently opened for visitors. It is one of the finest library buildings in this section of the state.

LOUISIANA

New Orleans. Following its policy of making reprints from time to time of matter relating to the state and city found in forgotten books, the Howard Memorial Library has recently had printed a hundred copies of the

account of a journey made to the Mississippi Valley in 1833. The reprint, like the original, is in German, and relates the adventures of one Friederich Arends, who started with his three children from Friesland in July, embarked for America at Bremen, and reached New Orleans the latter part of October. There is an interesting description of the passage up the river, and of the city as it appeared at that time.

KANSAS

Arkansas City P. L. Mrs. A. B. Ranney, lbn. (5th rpt.—1913.) Accessions 429; total number of volumes in library 4644. Circulation 18,275. New registration 673; total registration 2916. Receipts \$3074.54; expenditures \$2748.64.

Fort Leavenworth. Congress has appropriated \$60,000 for a school library building at the army service schools. The building will be located east of the school building, overlooking the Missouri river. Work on the building will start about July 1.

Fort Scott P. L. M. L. Barlow, lbn. (Rpt.—Dec., 1913.) Accessions 356 (231 juveniles). Circulation 22,425. Book purchases cost \$298.53, and magazines \$52.85.

Hutchinson. An architect's drawing, showing the proposed \$18,000 addition to the public library, has been sent to the Carnegie Corporation. The library is badly cramped in its present quarters, and the proposed addition would just double the room. It is planned to have the main entrance on Fifth street, if the improvement is granted.

Junction City. George Smith P. L. Garnette Heaton, lbn. (6th rpt.—1913.) Accessions 339; total number of volumes in library 9399. Circulation 29,437. New registration 559; total registration 3700. Receipts \$5314.22; expenditures \$4330.14.

Leavenworth F. P. L. Irving R. Bundy, lbn. (14th rpt.—1913.) Accessions 1559. Circulation 66,086. New registration 211; total registration 4652. Receipts \$7680.61.

Topeka. During the past year the library of the Kansas State Historical Society has been increased by the addition of 1403 books, 1240 volumes of newspapers and magazines and 6069 pamphlets, making the total number of pieces in the library 228,643. No count of manuscripts received during 1913 has been kept, the work being delayed until the society should be installed in its new quarters, when better methods for handling them will be adopted.

OKLAHOMA

Enid. As a result of a recent "penny day" \$60 was raised for the public library. A museum for curios, natural history specimens and relics of historical interest has been started in the library.

TEXAS

After an interval of three years *Texas Libraries* has been revived and will be published quarterly. The copy for the first quarter of 1914 contains the library laws of Texas as well as news notes of various Texas libraries, data from the latter in many cases including statistics for 1911, 1912 and 1913.

Houston. A petition has been filed at City Hall, asking for an annual appropriation from the city funds of \$13,500, instead of the \$7800 allowed at present for the public library. At Dallas the annual library allowance is \$16,000—they have 9500 borrowers; Fort Worth allows \$12,000 for its library, which has 12,000 borrowers; San Antonio's library costs \$14,000 a year, with its 10,000 borrowers, while Houston has a list of borrowers totaling 13,454, and can only keep its doors open on the \$7800 allowed. New books cannot be bought with this appropriation. For the past year 112,585 books were circulated by the Houston Library. The library was ten years old the first of March.

Wharton. The city council by unanimous vote has decided to maintain a Carnegie library. A mammoth petition signed by taxpayers of the city was presented by members of the New Century Club, a literary organization, holding membership in the State Federation of Women's Clubs, asking that the city authorize the setting aside of a fixed amount for the maintenance of a \$10,000 building. This building will be erected on the site of the club, which it is proposed to give to the city, with all books and equipment accumulated during the ten years' effort.

Pacific Coast

WASHINGTON

Seattle. The Seattle Public Library opened on Jan. 1, 1914, its eighth branch library, located on Queen Anne Hill. An interior view is reproduced in this month's JOURNAL. The building is a gift of Mr. Andrew Carnegie, being Seattle's fifth branch from this source, and is English scholastic Gothic in design. The material used was red burlap

brick, with terra cotta trimmings and slate roof. The main floor is partly divided by glass, each side of the delivery desk, into a children's room and an adult reference room, the open-shelf room being back of the delivery desk. Also on the main floor are the story-hour room, a small work room and the librarian's office and staff room with kitchenette. Semi-indirect lights are used throughout. In the basement is an auditorium, with outside entrance, seating 120 people.

Seattle. Mayor Gill recently attempted to remove Miss Adele M. Fielde from the library board. In a letter dated March 23 and marked confidential he asked for her resignation, to which she replied that as she had every reason to believe her work on the board was approved by the public, and as her term of office still had several years to run, she would in no case resign "on a confidential or secret demand. It is true that I openly opposed your election as mayor," the letter, published in the *Seattle Post-Intelligencer*, continues, "and if you wish to retaliate therefor let it be by an open and not a 'confidential' demand. 'A public office is a public trust.' I shall not immediately resign from the public library board." In his reply, also published in the same paper, the mayor writes: "The reasons for your removal were not political at all. I did not even know that you supported Mr. Cotterill. In my opinion there has been a consistent course of favoritism in the public library board; a large number of employes have been brought from the East to Seattle, to the exclusion of local taxpayers, and in the appointing of employes, in my opinion, local people have been discriminated against. I think the salary of certain favorite employes are essentially too high, while the salaries of minor employes are ridiculously low. From what I can learn you have consistently upheld this line of discrimination upon the part of the librarian, and these are my reasons for your removal, and I shall this day file the same with the city comptroller." In an interview on the library situation the mayor is quoted as saying: "I understand that the board stands 4 to 3 to put through Librarian Jennings' policy of paying easterners high salaries. I will not approve such work. The taxpayers of Seattle must be given preference to outsiders. If the board undertakes to recognize Miss Fielde as a member I will appoint a new board of seven members."

OREGON

Portland. In the reference department of the central library there has just been put in place a beautiful memorial tablet bearing this inscription: "In memory of John Wilson, pioneer merchant of Portland, by the gift of his own books, founder of this reference library, 1826-1900."

CALIFORNIA

Bakersfield. Three new branches to the Kern County Free Library were added during March, making the total number of branches where books may be had, twenty-eight. The new branches were established at Pond, Inyokern and Isabella. Miss Harriet Long, the librarian of the Kern County Free Library, says that within a short time over ten thousand books will be in circulation throughout the county.

Clovis. Official information has been received by the trustees that the donation of \$7000, which was asked of the Carnegie Corporation for a library, is to be given as soon as the deed for the proposed site is secured. The money will be turned over to the trustees and definite time for beginning the building will be set. Several plans have been submitted, but as yet none have been decided upon.

Long Beach. The resignation, on February 25 (recorded in the LIBRARY JOURNAL for March), of Miss Victoria Ellis, for ten years efficient and successful librarian of the Long Beach Public Library, caused widespread public regret and formal action of protest by the City Council and numerous local clubs and associations. Miss Ellis stated that her resignation had been forced by the hampering and censorious attitude of the Library Commission, which had made her position intolerable. The commission (or board of trustees) went into office on January 1, with an entirely new personnel, consequent on a changed city administration, and did not formally reappoint the librarian. On March 20 the commission issued an extended public statement on the library situation, which indicated that its dealings with the librarian had been almost wholly through correspondence, that no book purchases had been authorized, and that the requests of the librarian for supplies and for special books for special students had been refused. On Miss Ellis' retirement the commission appointed Miss Courtwright, first assistant, in temporary charge of the library.

Los Angeles. A suit is pending in the U. S. District Court here, brought by the government against the Pacific Library Binding Co. (binders to the Los Angeles and other public libraries), to collect a penalty of \$2000 for alleged violation of the contract labor law, in importing to Los Angeles in December, 1912, two expert bookbinders from Bath, England. The defence is based on the plea that the workmen are peculiarly skilled and thus come under the exemption clause of the law.

Oakland F. L., Alameda Co. Dept. Jean D. Baird, acting chief. (3d rpt.—yr. ending Je. 30, 1913.) Accessions 3892; total number of volumes 9824. Circulation 44,968. Total registration 3653. Receipts \$15,397.32.

This county library system is carried on through a contract made in 1910 between the County of Alameda and the Oakland Free Library. Sixteen stations are established. Pictures and stereographs are exchanged between branches, and a radiopticon has been purchased, with the aid of which entertainments are given.

Sacramento. A proposal has been made that instead of the customary silver service a library be given to the gunboat *Sacramento*, and the suggestion is meeting with approval on all sides.

Sacramento. City Librarian L. W. Ripley has filed a report with the city commission dealing with the matter of accepting the Carnegie Corporation's offer to provide \$100,000 for a new library building. Mr. Ripley's report gives estimated costs for a new building, with suggestions as to type of building and plans. The amount required to furnish the building and several suggestions as to the location of a new building site were also incorporated.

San Bernardino. The San Bernardino County Library began operations February 1, and over twenty branches or stations have now been arranged for. The library work is carried on from the San Bernardino Free Public Library, Miss Waters, the county librarian, being also public librarian. San Bernardino county is the largest in the state, covering 20,055 square miles, and has a population of about 57,000, with about a dozen good-sized towns and cities. In the great desert section ten county library branches are distributed among the scattered centers of population, and the number will be steadily increased as the county work develops.

San Francisco P. L. Robert Rea, lbn. (Rpt.—yr. ending June 30, 1913.) Accessions 14,980; total number of volumes in library 130,381. Circulation 852,592. New registration 21,673; total registration 41,016. Receipts \$111,169.22; expenditures \$72,631.05.

A table of comparative statistics in the librarian's report shows how successfully the library has been reorganized since the fire. While there were in 1912-13 30,076 fewer volumes in the library than in 1904-05, there were 537 more card holders, and the circulation was greater by 22,367 volumes. The establishment of a department for municipal reference is under way, to be housed in the library building. The most notable gift of the year was John C. Cebrian's library of 350 volumes of rare Spanish books. An interesting gift of Californiana was received from the superintendent of the San Francisco mint. The only addition to the branch system was the establishment of a downtown station in the Emporium. This is maintained without cost to the library and has circulated more books than any other deposit station.

Santa Barbara. The California Library Association has offered a prize of \$50 for the best design for a name plate for the new Santa Barbara library building, now being erected.

NEVADA

Reno. With several prominent speakers present, including members of the State Legislature, the new University of Nevada Library Building, authorized by the last session of the Legislature at a cost of \$100,000, was dedicated here March 4. The building is now ready for occupancy. University exercises were suspended, and the ceremony, which began at 11 o'clock, was attended by both students and public. Music was furnished by the Men's and Girls' Glee clubs. The speakers, who were introduced by Dr. J. E. Stubbs, president of the university, included Charles B. Henderson of Elko, for the board of regents; Librarian Joseph D. Layman for the faculty; J. I. Crazier, president of the

associated student body, for the students; Senator W. J. Bell of Winnemucca, Assemblyman John J. Schorr of Wells, Robert M. Price and Walter E. Pratt.

UTAH

Miss Mary E. Downey of Columbus, O., has been secured by the state board of education to make a thorough investigation of library conditions throughout the state. Miss Downey began active work early in March, and by June 1 she expects to have covered the state, inspecting all existing libraries, school or public, and reporting conditions with recommendations to the State Board of Education. She strongly advocates establishment of county libraries at county seats, where books can be loaned out among the various centers of the county. By basing the system on the county unit, much better buildings can be erected for library purposes, the same to be supported by special county tax.

Ephraim. Work on the \$10,000 Carnegie building was started early in April, and it is expected that the building will be finished about September 1.

Canada

Toronto. During the year 1913 three new branches of the public library were opened, Northern (North Toronto), Dovercourt (Bloor and Gladstone avenue), and Earls-court (Boone avenue). Books purchased numbered 24,552; books cataloged for the reference library were 7997, and for circulating libraries 25,549. Circulation of books among children was 108,495. The greatest increases in circulation were at Riverdale and Deer Park branches. The largest circulation in the city is at the College Street branch. There were 190,747 books used in reference library. The J. Ross Robertson historical collection has been greatly added to and there are now 1961 prints illustrating the historical development of Canada. Visitors from abroad as well as from the city and province to the number of 36,000 visited the collection in the historical room during the year.

THE LIBRARIAN'S MOTHER GOOSE

V. REGISTRY.

*Bye, Baby Bunting,
Father's gone a-hunting
To find a little guarantee
That will serve for you and me.*

—Renée B. Stern.

LIBRARY WORK

Notes of developments in all branches of library activity, particularly as shown in current library literature.

General

Library Bibliography

LIBRARY LITERATURE

The collection and organization of professional literature: a suggestion. William Pollitt. *Lib. World.*, F., 1914. p. 225-228.

In recent years every department of librarianship has advanced greatly, and the librarian is expected to be highly trained. Considering the width of the field of study, the library profession is decidedly poor in the number of suitable text books. There is little attempt to meet the demand for such literature, except by miscellaneous articles in professional journals.

To supplement the published works on library economy, the suggestion is made that in every large library members of the staff should make an effort to collect the publications of other libraries whenever the opportunity presents itself. In this way catalogs showing different forms of compilation, rule labels and circulars, etc., would be brought together and would form an interesting and valuable exhibit.

Following the Library Association syllabus of which Section V is "Library history, foundation and equipment," with five subdivisions, the collection could be arranged on the same scheme, and a different assistant put in charge of each section. The collector's name might be noted on the back of each contribution, thus ensuring due credit to each assistant.

The collection should be made a part of the permanent collection of the library, but managed by the assistants, who should make their own rules concerning its availability for home use. Circular letters might also be sent to librarians reading papers at library meetings, asking, if the article is not to be published, if the manuscript may not be added to the library's collection.

[The suggestions embodied in this paper have been agreed to by the senior members of the Leeds Public Library staff, of which the author is a member.]

Library Education. Schools

INSTRUCTION IN USE OF LIBRARY

"During the years 1912 and 1913," says the latest report from the Toledo, O., Public Li-

brary, "Miss Kountz gave instruction to 850 freshmen from the Central High School in the use of the catalog, location of books on the shelves and in a simple manner in some of the points of classification. This was an experiment which has been found to be highly successful in bringing about a closer relation between library and teacher and student. One of the excellent results of this training has been to give the pupils a greater freedom in the use of the library, many having been backward and even almost too timid to ask questions. These pupils came to the library a class at a time, accompanied by their teacher, for the first school period, leaving at 8.30, when the library is opened to the public."

Library as an Educator

VOCATIONAL GUIDANCE

Vocational guidance work is being undertaken by an increasing number of libraries throughout the country. In Binghamton, N. Y., the vocational guidance committee has headquarters at the library. "Its members," states the librarian, "have studied several local industries and will submit reports as to conditions and opportunities for learning a trade in this city. The committee proposed a plan for an apprenticeship system and asked the Board of Education to offer a coöperative part-time industrial course in connection with high school work. Employers and representatives of the skilled industries are coöperating with the committee. On this committee are represented the public schools, the Chamber of Commerce and the public library."

Scope, Usefulness, Founding

Library Extension Work

LIBRARY AS A SOCIAL CENTER

At a recent meeting of the Library Board at Two Harbors, Minn., a plan was developed to organize a social center for girls in the basement of the library, where all the various useful arts and handicrafts could be taught, free of charge, by competent instructors. The library board approved the plan and unanimously extended their support by permitting the free use of the rooms. Teachers have been secured to give lessons in crocheting, art needle work,

basketry and weaving, and plain sewing. Seventy-three members were secured at the first meeting, and it is expected that the total enrolment will be over 100. It is hoped that a similar movement will be started among the boys for instruction along the lines of manual training.

PHONOGRAPH CONCERTS

A phonograph has been purchased for the library at Hibbing, Minn., and a concert will be held every Sunday afternoon between 5 and 6 o'clock.

EXHIBITS

The Botanical Department of the University of Oregon has arranged for the Public Library in Portland, Ore., a wild flower calendar which is now on exhibition in the circulation room of the central building. This is composed of water color studies made from nature by Mrs. Sweetser to illustrate Prof. Sweetser's new book on Oregon flowers. Studies of the wild flowers which are in bloom will be on exhibition each week. These will be changed from week to week as other flowers appear in the woods.

A "better books exhibit," under the auspices of the Publishers' Coöperative Bureau, including a thousand of the "better books" of the year, was held in the Public Library of Fitchburg, Mass., from April 21 to May 2. Original manuscripts, together with drawings and paintings were included. In order to inform the layman just how a book is made, the successive steps, from the original manuscript of the author to the finished book, were arranged for exhibition. Underlying the exhibition of objects of literary interest was the purpose of stimulating the desire for increased reading of a better class of books, among persons of all classes and ages. It was also intended to bring about a closer relation and a better understanding between the publishers and the reading public. The same collection has been shown in Boston and Springfield, Mass.; Cleveland, O.; Brooklyn, N. Y., and Newark, N. J.

DEBATES

California State Library is advocating that libraries throughout the state when asked by high school students or clubs for subjects for debate shall give consideration to the subjects that relate to measures to be voted upon this year by the people of the state. The State Library, to help the cause along, is planning to prepare lists of refer-

ences on some of the subjects that are not already covered satisfactorily by up-to-date bibliographies. The first list has been prepared; its subject is "The eight-hour working day."

Library Development and Coöperation

LIBRARY USE OF PARCELS POST

Advantage of the new parcels post rates for books has been taken immediately by the St. Louis Public Library. Since March 20 any registered library user has been able to order books from the Central Library to be sent by parcels post. A deposit is made in advance at the library to cover postage. One cent for wrapping books is added to the regular zone rates. Orders for books are given by telephone, by mail, or in person at the library. In case the regular library card is not available, a special card is issued. Books may be returned by parcels post. No deliveries from the central library to the post office are made after 5.30 p. m. To secure quick service by telephone, the library user mentions the words "Parcels post" as soon as connected with the library. Including one cent for the wrapper, the cost of having books delivered in this way in the city and the suburbs is six cents for the first pound, and one cent more for each added pound. Books weighing less than eight ounces are sent as third class matter, at one cent for each two ounces, with one cent added for the wrapper.

Founding, Developing and Maintaining Interest

LIBRARY ADVERTISING

Here is an excellent hint from the Vermont *Library Bulletin*: "If your library is not in its own building with its name above the door, but is in a rented building or a private house or a store, is its existence and location advertised to your townspeople and to strangers by a sign of any sort?"

"Might not the sign, read by people driving in for business, remind them that they had planned to get a book for themselves or for their children? Might it not call the attention of others to the fact that their town had a library, and interest them enough to make a visit and see what books were there? Might it not advertise the existence of a library—town or other—to the stranger passing through the town, and help to show him the general interest that Vermonters take in broad education through good reading.

"A simple sign would cost very little, and would be a good investment."

BOOKLISTS

The Free Public Library of Louisville, Ky., has recently issued for free distribution a series of reading lists for children in the form of colored bookmarks, a different color being used for each school grade. Each list contains about fifty titles, and they are prepared for the grades from the third to the eighth. The library has also issued five annotated lists of fifty-volume collections from the stations and extension department, and a list of recent accessions in German. Whatever the list, it is sure to have at the bottom the reminder "When you see a book, think of the Public Library."

"BETTER BABIES" BOOK LISTS

In a recent report Samuel H. Ranck of the Grand Rapids (Mich.) Public Library, describes what he terms "our better babies slips," which, he says, are mailed regularly to the mothers whose names appear in the official register of births. The "better babies slips" are issued under the general caption of "Some books for mothers," and in the list are some of the best known books on the care of children by recognized American authorities. Another slip which is sent to mothers gives a list of magazine articles and books which teach the value of clean food for children, the necessity of fighting flies, and the value of other hygienic precautions in guarding the lives of children.

LIBRARY EXHIBITS—SAN FRANCISCO

A library exhibit for the Panama Exposition. Helen E. Haines. *Bindery Talk*, N.-D., 1913. p. 3-4.

Remarks at a meeting of the Sixth District, California Library Association, at Pomona, Dec. 6, 1913.

There can be no question of the importance, the desirability, of having a suitable library exhibit at the Panama Exposition in San Francisco in 1915. American library development has been effectively presented at most of the great expositions of the past. The Centennial at Philadelphia, in 1876, saw the birth of the modern library movement and the organization of the A. L. A. For the Chicago World's Fair, in 1893, the first A. L. A. catalog was completed and the "A. L. A. library," representing nearly 4000 volumes of the 5000 listed, was exhibited. At the French Exposition in Paris in 1900 there was an excellent American library exhibit. At the St. Louis Exposition, in 1904, a model library, housed in the Missouri Building, was established and run as a regular branch of

the St. Louis Public Library, and the first supplement to the A. L. A. catalog was prepared for, and first distributed from, the exposition.

Since exhibits in the past have presented especially *equipment* (books, appliances, methods) the one for 1915 might well emphasize *results*, and show the very varied fields of service to which the library is now extending. Of course all material prepared for the Leipzig exhibit will be available for use at San Francisco, and a good exhibit there will make a splendid nucleus for the exposition in 1915.

A library exhibit in San Francisco. Alice M. Healy. *Bindery Talk*, N.-D., 1913. p. 6-7.

The most desirable form of exhibit would be a comparative exhibit such as was made at Chicago in 1893, and at St. Louis in 1904. Since any collection of library methods should be designed to help the librarian of the small library, the various schemes of classification and all extant systems of cataloging should be shown together there. An exhibit should be made of reference books arranged in groups, according to price, scope and usefulness. Libraries should contribute the forms used by them, charging systems, accession registers, registration systems, etc.

The three questions of advertising, extension and special libraries should have space. A collection of library plans, with comments on their good and bad points, might be shown. Publishers might send collections of books, with standard authors shown in various editions for purposes of comparison, and accompanied by a collection of publishers' and trade catalogs and critical reviews. A binding exhibit would be valuable, as well as a display of office supplies and fixtures.

At the close of the exposition the State Library at Sacramento should be the custodian of all material that does not have to be returned to the consignors.

Suggestions for library exhibit at San Francisco. Joseph L. Wheeler. *Bindery Talk*, N.-D., 1913. p. 4-5.

The San Francisco Exposition is one of the greatest opportunities that have ever been offered for placing library ideals and methods before the general public. With this in mind, the following suggestions are offered:

It would be very desirable to have as a leading feature a real working library, actually circulating books to the patrons and employes of the exposition, especially as an effort is

to be made to have all exhibits emphasize typical working conditions. No doubt the publishers would supply the books for the sake of the publicity, and possibly makers of library furniture would help in the equipment. A model of the state of California, showing the county system in operation, and a model library for a small village would be of great interest.

A great opportunity for newspaper publicity is offered, and deposit collections of books placed in the exhibits of manufacturers, social workers, schools, etc., would reach the attention of many who might not otherwise be attracted to the library exhibit. A set of "A. L. A. standard sizes," if suggested to the officials, would doubtless be followed by exhibitors, thus calling the attention of business people to another function of the A. L. A. The use of moving pictures, showing patrons borrowing and returning books, the children's rooms and other features of large and small libraries would attract attention, as would other pictures showing the use of books under very varied conditions.

COÖPERATION WITH NORMAL SCHOOL STUDENTS

One way in which librarians and students who are taking teachers' training courses may coöperate is indicated in what the *Wisconsin Library Bulletin* says about a plan that is being tried in that state:

"In a number of towns the librarian has secured the coöperation of the county teachers' training class in conducting the story hour at the library. The supervisors have welcomed the work as offering additional practise of a sort difficult to secure in sufficient amount for their students. At Chipewewa Falls the students in the teachers' course at the high school take turns telling the stories, selected by the librarian. The instructor in charge has each student rehearse to her and is very glad for the class to have the work to do."

Libraries and the State

MUNICIPAL LIBRARY EXPENDITURES

The United States Census "Financial statistics of cities," just published, gives statistics of 193 cities for the year 1911. These include the following interesting data regarding municipal libraries:

Cities	Population	Average expenditures	Per cent. of total municipal expenditure	Expenditure per capita
8	500,000 and over..	352,114	1.2	.24
10	300,000 to 500,000.	40,314	1.4	.26
35	100,000 to 300,000.	33,799	1.5	.21
56	50,000 to 100,000.	12,094	1.4	.17
84	30,000 to 50,000..	6,960	1.6	.18

Library Support. Funds

CARNEGIE LIBRARY GIFTS

An editorial in *The Librarian and Book World* for February, 1914, concludes from "various signs and portents" that the heyday of the Carnegie Library in Great Britain has passed. The Dunfermline trust has a capital of £2,000,000. The trustees may use the interest of this fund for the distribution of libraries and organs, but they need not. The income for the next two years has already been promised, and the trustees give the warning to expect nothing at present with an emphasis that is considered suggestive. More, the services of an eminent professor have been secured to make an independent inquiry into the value of these library gifts to the community. The hope is expressed that the Library Association has taken the necessary steps to present a complete case for the libraries in this investigation, in order to ensure a just report on the library situation in England.

Government and Service

Staff

PROBATIONERS

A new method of selecting probationers for appointment to the lowest grade of the service (Grade D) was inaugurated by the New York Public Library during the later part of 1913, as the existing system failed to meet the needs of the circulating department. In place of the written examinations for admission to probation, conducted by the Library School, the preliminary selection of candidates under the new method is made on the basis of informal interviews with members of a so-called Committee on Examinations, with a view to determining as far as possible at the outset the personal fitness of each applicant for library work. In addition to the interviews with members of this committee, each candidate is required to submit, as part of her application, credentials of a high school education, or its equivalent.

The real test of the candidates thus selected comes during the period of probationary training, which consists of supervised practice under actual working conditions in four circulation branches, one month being spent at each branch. A limited amount of supplementary reading and study along special lines is also required, and brief tests on the various phases of the work are given at in-

tervals. The record of each probationer is carefully followed and those who fail to maintain the required standard of work during their terms are dropped. The period of probationary training may be shortened from the customary four months in the cases of candidates who show such aptitude for library work as to justify earlier appointment to the staff. There are no definite dates for admission to probation, candidates being allowed to begin at almost any time during the year, except in summer.

This plan of probationary training has been adopted experimentally and it is expected that certain modifications will be made as circumstances require.

Remuneration, Salaries, Pensions

SALARIES

A minimum wage for certificated library assistants. Ernest A. Savage. *Lib. World*, F., 1914. p. 228-232.

An admittedly controversial article advocating the adoption of a minimum wage for certificated assistants. For several years library committees have been offering these assistants with public library experience wages varying from 20s. to 30s. a week. It should be possible to tell these authorities that less than a certain salary is not to be offered to certificated men and women. The writer believes that libraries will eventually come under control of the Board of Education, and thinks this matter should be settled before the change comes.

Since the certificated assistants are the Library Association's special product, he maintains that they should be its special care. The association promises advancement to assistants taking advantage of its courses. When, to such students, wages of an unskilled laborer are offered, the association should protest, and to the fact that it does not is ascribed the dwindling attendance at the classes in London. "Everything relating to libraries, even low salaries, should be the business of the association and its committees." In the meantime, the present situation is doing injury to every librarian by lowering the calling in public estimation.

Rules for Readers

General

RESTRICTIONS ON READERS

In an article on "What our university lacks," written by a student of the University of California, for the February issue of

The Overland Monthly, there is a severe arraignment of the restrictions surrounding the various courses in the college curriculum, and the many ways in which the work of the students is hampered. Of the college library he says:

"I thought that I could study in the library, where, if anywhere, the books could be seen by the students. What was my surprise to learn that the books are kept locked; there is no access to them, except to some especial ones, mostly technical, kept in the reading room. To get out a book involves so much red tape, and takes up so much of one's time, that it is a luxury most of us can ill afford. The students rage at all this, of course. They are told that books are lost when accessible. What are our colleges for—books or people?"

Administration

Treatment of Special Material

MUSIC

The Public Library of Gary, Ind., has added to its collections some two hundred rolls of music suitable for use with player-pianos. These rolls of music will be loaned out under their proper restrictions exactly as if they were books. To encourage the study of the standard composers and to create a familiarity and a proper appreciation of their works, a series of six free lecture recitals are being given in the library auditorium. These recitals are given by William Braid White of Chicago, who is well known as the author of works on musical appreciation and history, and as the technical editor for many years of the *Music Trade Review*. The recitals cover the history of music under the following headings: Music of our great-grandfathers; Beethoven, the Titan; Chopin, the poet; Wagner, the revolutionary; The modern Europeans; MacDowell, the great American. At these recitals the music played and explained is drawn from the library collection, and is played upon the new piano fitted with player mechanism which the library has placed in its auditorium.

CLIPPINGS

In the summer of 1912 a clipping collection bearing on the work of the documents division of the New York Public Library was begun as an experiment. It soon developed into a useful tool and now has become indispensable, paying for itself many times over in the increased facility of service to readers. In the

beginning it was a clipping collection pure and simple; but as possibilities have manifested themselves, any contributory material has been included, and it now comprises booklets, circulars, pamphlets, letters, manuscript memoranda, etc. The base of supplies for the clippings is the newspaper room in the library, which contributes to the division all the papers not kept for binding. The papers so received come from all parts of the world, and are in a variety of languages. Daily papers and trade journals are scanned for notices of circulars, booklets, charts, etc. A member of the staff visits all exhibitions held in the city which are likely to yield material for the clipping collection. Managers of out-of-town exhibitions, commercial, banking, and civic organizations have responded generously to applications for literature. The material obtained is mounted on manila backs and the whole is kept in small vertical filing cases and arranged by a simple classification.

In the case of controversial legislation, such as the currency bill or the income tax measure, clippings, pamphlets, monographs, magazine articles, etc., are filed with the bill. Whatever current material the division has may thus be laid before a reader for his selection. In connection with the municipal ice plant inquiry, conducted by the borough president, photostat copies were made of some of the clippings.

Cataloging

CATALOGING CODES

Cataloging codes. Part iv (conclusion). Maurice H. B. Mash. *The Librarian*, F., 1914. p. 239-241.

End of the comparison of rules in the Anglo-American code and the Cutter code, with the general conclusion that the former is in general superior to the latter.

Classification

DECIMAL CLASSIFICATION (DEWEY'S)

The decimal classification as applied to small libraries. Part I. William Gifford Hale. *Lib. World*, Mr., 1914. p. 263-268.

A restatement of certain first principles of classification. A small library is here defined as one containing less than 10,000 books. This often means one person in sole charge, and all the books often shelved in one large room. Limitation of funds makes book selection a nice problem, and a systematic classification shows at a glance which sections most need strengthening. A broad classification, whereby all the books are divided into

eight or ten huge classes, will not give this information. On the other hand, the Dewey system, with its ten main classes, each subdivided into ten other classes, and these again subdivided into tens, seems to the writer to contain the solution of the difficulty, though he sees no reason why the system should end with these thousand subdivisions. He considers the limiting of book numbers to three figures a mistake, and advocates developing the system to take in five figures, if necessary.

Reference Work

LIBRARY INFORMATION BUREAU SERVICE

Library developments and the Information Bureau docket. G. W. Lee. Repr. from *Stone & Webster Pub. Serv. Jour.*, Ja., 1914. 8 p.

Books included in the Information Bureau's equipment include works on engineering, railways, and economics, reports and proceedings of societies, government documents (federal and state), bound periodicals, book and magazine indexes, year books, encyclopedias, dictionaries, directories, atlases and maps. About 1000 a year are added, and 400 superseded copies are auctioned off each year, making the present collection number about 6000 pieces. To vitalize this material there are about 40,000 cards, besides a file of some 1500 stock-in-trade questions. There are seven workers in the library to serve 600 people in the building, who make about 1500 requests for information a month. The general classification of the library, so far as practicable, is geographical. For non-geographical classes there are seven main divisions, with eight and nine for occasional use. For classification of periodical references a system based on the *Engineering Index* is used, with decimal numbers assigned to the primary divisions, with mnemonic subdivisions. A card index is also kept of the men in the office, with the special subjects on which they can give help. Three mimeographed sheets a week, containing special lists and book announcements, are put out, with occasional personal notes to various specialists. Many blank forms are used, and a sample of each new form is put aside on which to note desired changes. A set of duplicate indexes to many periodicals is kept, and is found to be a great convenience. Horizontal filing is preferred to vertical. The library is on friendly relations with about fifty other libraries in the vicinity, and has two inter-library workers. Various problems still re-

main to be solved, as the best method of handling transient material; how to keep track of state publications and new technical books so as to get into touch with them at once; and where to look for names of secretaries and other officers of associations of all kinds. The establishment of a clearing house of dates of local events is urged, a register of opinions of users of various commercial devices, and a reference book "commission."

Loan Department

SELF-CHARGING SYSTEM

The open shelf system, under which borrowers in public libraries are allowed to go to the shelves and select their own books, is now an established fact in most of our large libraries and in nearly all of the small ones, but the first instance where borrowers are utilized at the desk in charging and discharging their own books is a plan recently tried by the St. Louis Public Library at several of its smaller stations.

This "self-charging system," as it is called, has so far been used only in stations where a restricted class of persons have access to the book shelves. The book collections here number not more than three hundred volumes. The borrower charges the book to himself, according to directions which are conspicuously posted over the shelves. His card, after fastening to it with a rubber band the card taken from the book, is dropped through a slot; and the date on which the book will be due is stamped in it with a rubber stamp that hangs by a cord near at hand. Returned books are slid into a box through a slot, and fines are placed in an envelope and dropped into the same slot. Cards for home use may also be obtained by the same method.

An assistant visits the self-charging center to record the issue and check off the returned books, and to perform other necessary offices in connection with the system.

Obviously such a system as this can never be used except in a small station where the users are all trustworthy. So far the St. Louis Public Library has suffered no loss from the use of the plan.

ISSUE OF BOOKS

Each borrower in the Somerville (Mass.) Public Library may draw upon his card "one novel, two unbound periodicals, and any reasonable number of non-fiction." Seven-day books, including current periodicals, become due in seven days; novels not seven-day

books in fourteen days, and non-fiction in one month. These regulations embody the following extensions: 1. From one to any number of volumes of non-fiction. 2. From two weeks to a calendar month; students need no longer bother with "special" and "teachers" cards, and all borrowers enjoy the service previously rendered only to "specials." 3. Current periodicals from four to seven days.

LIBRARY PAY COLLECTIONS

How to run a book-club in connection with a public library. Part I. *The Librarian*, F., 1914. p. 251-253.

As a preliminary to the article, which considers the subject entirely, of course, from the English point of view, the statement is made that "in the majority of cases it will be found a great nuisance, and only the need of the additional books or the additional funds to buy books will justify it."

It is recommended that the members have nothing to do with framing the rules, and that it be run as a subscription department or donation circle, thus avoiding liability for the English income tax. Subscriptions should be made payable direct to the library and the books when purchased must be regarded as the absolute property of the library, the length of time for their reservation for subscribers' use being variable.

The number of members, and the fees charged, will determine the class of book purchased. A large number of subscribers would enable the library to make selections from all classes of literature, but a small list of subscribers would limit the purchase largely to novels. Of three points to be considered (1) the fees, (2) the rules, and (3) the methods of administration, only the first is touched upon in this paper.

The fees must be at least as favorable as in the most favorable subscription library in the vicinity. Subscriptions should not be taken for less than three months, and should be payable in advance, and the receipt should show that the subscription is paid direct to the library.

Binding and Repair

BINDING

Summary of talks on bookbinding before training class of Los Angeles Public Library. *Bindery Talk*, N.-D., 1913. p. 14-17.

Book sewing is first treated. It involves two problems, fastening the leaves together, and attaching a cover thereto. To fold the sheets and sew through the line of the fold,

produces the most flexible book, but durability must also be considered in library binding. The kind of sewing is determined by the service expected from the books. In general, most reference books should be sewed through the folds, and circulating books by what is called "library sewing." The general method of the latter is to trim the back edges, tablet them with glue, divide them arbitrarily into sections which are pierced along their binding edge and sewn together by hand. Different kinds of stitches characterize the different methods of library sewing. Further strength is gained by sewing on cords or tapes and the good and bad features of such methods are here discussed. The use of tapes in cloth-bound books especially is advocated. Methods of attaching the covers are described. In some cases a strip of cloth is sewed to the first and last sections of the book, to be glued to the cover or inserted in its "split boards." In books sewed through the folds, on tapes, such form of end sheets should be used as will provide a flap of cloth to pass around the adjoining section and be caught into the sewing. Sometimes a strip of cloth is placed down the center fold of a section, especially the first and last, to support the sewing threads.

"Forwarding" is defined to include trimming, sprinkling edges, glueing up, rounding, backing, putting on tubes, putting on leathers and boards, siding, stamping corners, pasting up and pressing. All materials are prepared in advance and the books are passed from one operative to another so that all parts may be finished and the book put into the press while all paste is still damp, so that it may dry in exactly the right shape. Trimming and sprinkling are intended to improve the appearance of the edges of a book. Glueing up, rounding, backing and putting on tubes are processes applied to the backs of books affecting both its looks and its durability. A fabric (either cotton flannel or canvas) is glued to the back of the book, and in one of several ways is attached to the cover. Split boards are necessary for covers of heavy books, while smaller or lighter books may be held by glueing the tapes to the inner surface of the boards.

The distance the board is set away from the groove at the back of the book determines its kind of "joint," the "French joint," with a wide groove between the back of the book and the board, being best adapted for books having hard usage.

Libraries on Special Subjects

JEWISH BOOK COLLECTIONS

The scope of the Jewish division in the light of library practice. A. S. Freidus. *Bull. of the N. Y. P. L.*, F., 1914. p. 104-107.

The establishment of the Jewish division of the New York Public Library implied a departure from usual library practice, as in most schemes of library classification the primary arrangement is by subjects. The present method is not without precedent, however, as a similar scheme has been followed at different times in the past in Dresden, Berlin and Munich. The Cutter system of classification also makes full provision for those who may wish to arrange their collections by countries, with subdivisions by subject.

At the present time there are reported to be thirty-one general libraries having departments of Hebrew books or manuscripts. In the Bibliothèque Nationale, Hebrew manuscripts are kept together and placed at the head of the Oriental collections, but the printed books are scattered throughout the different sections according to subject. Other libraries distribute according to their subjects works of Jewish interest written in modern languages (Judaica), but keep together all books printed in Hebrew type (Hebraica). It seems to the writer poor library economy to scatter the Judaica where the Hebraist cannot assist in its care and use.

In the British Museum Library the only Hebrew books not located in the Hebrew department are those belonging to special collections and polyglot Bibles. The Guildhall Library of London has a special collection of Hebraica and Judaica. In Germany the Königliche Bibliothek at Berlin and the Stadtbibliothek at Frankfurt-on-the-Main give their Jewish departments ample scope, and the Universiteits-Bibliotheek at Amsterdam and the Imperial Public Library at St. Petersburg have special Jewish departments.

The racial arrangement adopted for the Jewish division of the New York Public Library is at the same time a classification of the books according to their readers and users. To accommodate the large Jewish population of New York the division has aimed to cover all branches of the encyclopedic knowledge of Judaism and the Jews, including a wide range of subjects, both sacred and secular, and it has met with unanimous and hearty approval of students.

Reading and Aids

Work with Children

CHILDREN, WORK WITH

The child and the library. Angie E. Tracey. *Bull. Me. State Lib.*, Ja., 1914. p. 2-4.

A restatement of the first principles governing children's library work. The public library workers of the present day must supplement to a considerable extent the work of the public school teacher, and consequently every library should have a room set apart for children, with some one specially sympathetic with children in charge. The community must be studied in an effort to understand conditions surrounding the children. The library worker, unlike the teacher, has all ages at all hours, and while a certain dignity must be maintained, the children should be made to feel at home and should be allowed to browse around at will. Children coming to the library for the first time should be welcomed and helped to understand the library, and made to feel that the librarian is a friend. The use of the bulletin board is advocated, and the story hour, informal as well as formal. Quiet games to play, dissected maps to put together and simple exhibits are also recommended.

REFERENCE WORK WITH CHILDREN

The students of the Waterloo (Eng.) Boys' Evening Technical Institute, together with a troop of boy scouts, paid their third annual visit to the Waterloo Public Library in February, the object being to bring the boys into closer touch with the library. Miss Fearnside, the librarian, gave a brief account of the building and described the use of the different departments.

To enable the students to become practically acquainted with the library, a set of questions were given to each, and those who wished might compete for prizes given by the Library Committee and other friends. The answers to all the questions were to be obtained in some part of the library by consulting the books, magazines, periodicals, papers, maps, etc., that were to be found there. The questions were many and various, and were arranged to test the observation powers and intelligence of the competitor, who became at once a research student, and while looking for the answer to his particular question often discovered information that he had not previously dreamed of, and at the same time obtained a practical acquaintance with the

building. The following questions, selected from many, will serve to show the character of the competition, and the range of subjects dealt with:

The number in the card catalog for books about "Telegraphy" is 654. What books can you find in it about this subject?

Find from the card catalog who wrote "Treasure island," "Little Dorrit," "Lancashire witches," "The three musketeers."

Find from the author catalog how many works by Sir Walter Scott can be borrowed from the library.

What is the name of the mail boat for New York sailing from Liverpool February 21? Where did you find the information?

What is the difference between a "dirigible" and an "aeroplane"?

What is the meaning of the word "altruism"?

Find from the exhibits in the museum where the following birds make their nests: Kittiwake gulls, coots, larks?

Character of Reading in Libraries

BOOKS AND READING

How to get the best books read. E. T. Canon. *Pub. Libs.*, Mr., 1914. p. 96-98.

Miss Canon is librarian of Colorado College. She says: "I feel very strongly that if the reading habit is not formed in college (if it has not been formed before) that it has small chance of ever being formed. . . . I am convinced of one thing—that the very best way to get books read is to read them ourselves.

"I am going to direct my remarks to library assistants for two reasons—because head librarians do not need to be told to read, and because the assistant meets more people over the desk in the day's work than the librarian. . . . All sorts of advertising, all kinds of lists, will not in the main succeed greatly, if the personal touch is withdrawn. So I say that it is not enough that the librarian should read. He and his assistants are the only paid literary agents in the community and they should know books—old, new, good, bad and indifferent." Miss Canon then discusses some specific books that she has circulated with success, starting with biography and passing on to letters and informal essays. In closing she says: "How shall we bring these books to the attention of the readers, especially to those with whom we seldom have a word? Bulletins near the door, and the books listed shelved near by; change the collection often. Watch the people who come in and call their attention to books along the line of their in-

terests. Publish annotated lists in the newspapers, have them for distribution in the library, use them for book marks. If certain books seem to be neglected, put them in a conspicuous place.

"We cannot force people to read, but if we can kindle in them the least desire, and can pass on to them some of our treasures, we may feel sure they will discover treasures of their own."

Literary Methods

Library Appliances

BOOK SUPPORTS

The New Haven Public Library has a very satisfactory support furnished by the makers of the stack, which fits in the turned front edge of the shelf, is easily put in place, easily moved and perfectly firm in use, and without the thin edge which invites the injury of books inadvertently pushed over it by the public. It is quite likely that the manufacturers of steel stacks can furnish similar satisfactory supports if the demand is made for them.

—*Bull. Bibl.*

Bibliographical Notes

The articles on the "Columbia Law Library and its work," written by Frederick C. Hicks, assistant librarian at Columbia University, which were originally printed in the *Columbia Alumni News*, have now been reprinted in pamphlet form.

A reprint has just been made by G. E. Stechert & Co., of Roorbach's "Bibliotheca Americana," volume IV. Most copies of Roorbach that have come into the market have lacked this fourth volume, the scarcity being due to the fact that the stock of the original edition seems to have been sent by mistake to the paper mill.

The Charity Organization Society announces that it will supply without charge to libraries, copies of the "Charities directory of the City of New York," so long as the present supply lasts, for the years 1907-1913 inclusive. Each request should enclose six cents in stamps for each volume ordered to cover parcels post. Address "The Charity Organization Society, 105 East Twenty-second street, New York City."

The lectures which were first given by Arthur E. Bostwick before the training class

of the Brooklyn Public Library, and afterward in the New York and St. Louis public libraries, have now been gathered together and published in a little volume called "Ear-marks of literature," with the McClurg imprint. The things that make good books good are discussed, and the nature of literature, the characteristics of literary style, the structure, appreciation, preservation, and ownership of literature, are among the matters taken up.

A reference book of value to every librarian, in these days of universal interest in the stage and concert hall, is the new "Who's who in music and drama." The book is edited by Dixie Hines and Harry Prescott Hanaford, and is published by Mr. Hanaford, whose offices are in the Knickerbocker Theater Building, in New York City. Of its 560 pages, 317 are devoted to biographies of the notable men and women in music and drama. The rest of the volume contains the record of first-night casts of new plays and important revivals produced in New York from June 1, 1910, to August 30, 1913, numbering 503 such productions, an index to the players taking part in them, and the casts of all operas produced at the Metropolitan Opera House, and of the Chicago and Boston Grand Opera companies for 1910-1913.

The New York *Times* has started on the second volume of its Index, which furnishes "a master-key to all newspapers," while indexing every item of news appearing in its own columns. In each entry the date of issue is given, then the number of the page and the number of the column, assuming that the columns are numbered 1 to 8, from left to right. A list of the libraries and institutions in the United States and in foreign countries which have authorized the announcement that files of the *Times* are kept by them, is included in the volume, and new names are added at the first of every quarter. The Index is published quarterly in paper covers for \$6 per annum, and in cloth covers for \$8 per annum.

The November, 1913, issue of the *Library Miscellany*, the library quarterly published in Baroda, India, is a convention number. The English section contains a detailed report of "library week" at Lake George, which was attended by Mr. Kudalkar, the new head of the Baroda Library system. Several of the papers there presented are reprinted in full,

together with an interview with Dr. Melvil Dewey. There is also an appreciation of the Rabindra Nath Tagore, and a report of the English Library Association meeting at Bournemouth, with summaries of most of the papers and the president's address reprinted in full. To make the *Miscellany* appeal to a wide class of readers in its own country, sections are each month printed in Gujarati and Marathi. In the November number are portraits of the Maharaja Gaikwar of Baroda, Mr. Kudalkar, Dr. Dewey, and Miss Hitchler, and views of Lake George and the Hotel Sagamore.

SPORT

A catalogue of . . . books on horses, horse racing, fox hunting, steeple chasing, coaching, and other outdoor sports, etc. New York, E. L. Wenrick, [11 West 64th st.] 62 p. (555 items.)

STERILIZATION OF CRIMINALS

Meyer, H. H. B., comp. List of references on sterilization of criminals and defectives. (In *Spec. Libs., F.*, 1914. p. 23-32.)

TUBERCULOSIS

Jones, George E. Tuberculosis among school-children. (In *Pedagogical Seminary, Mr.*, 1914. xxi:62-94.)

A bibliography of 106 titles is given with this article.

POSTMASTER GENERAL TO ADDRESS THE A. L. A.

As we go to press word comes that unless official business prevents, it is expected that the postmaster general of the United States will address the A. L. A. conference at Washington on the subject "The Parcel Post," and particularly the further prospects with reference to book rates.

Communications

TAKE BOOKS TO READERS

Lake Placid Club, Essex Co., N. Y.

In the earliest libraries books were like some notions of the kingdom of heaven, to be taken only by violence. We have broadened our ideas like circles in the water. This is the genesis of accessibility.

(1) Books to be consulted only by a favored few.

(2) By any who paid the fee.

(3) Freely by all, but no book to leave the building.

Then came loaning.

(1) To the favored few.

(2) To those who paid the fee.

(3) And then this splendid modern conception of free as air or water to all.

Now we are in the third age of branch stations and deliveries by wagons, motor, messenger, express or mail. The new parcel post greatly stimulated the bibliothecal imagination.

There is need just now of a history in bibliography of these later efforts of getting books easily to readers. Many libraries have tried more or less experiments. Economy and efficiency demand that we utilize the experience and experiments of others.

I send this note to the LIBRARY JOURNAL to urge your readers to send in by early mail

anything in print telling what, when, where, how long, how successful, and if given up, why, with notes on what is being done or planned farther and what experience leads each to think is the best method. Please supplement what is sent in print by any needed notes in MS. All this material will be carefully digested and the results promptly made available to all, with a bibliography of what students of the question will wish to read.

Unless we stand on the shoulders of those who have tried plans before we shall waste time and money.

To save time, address all matter to Adolf Law Voge, Library of Congress, Washington, D. C., who has consented to summarize this material and prepare the bibliography. Please send your suggestions and experience by early mail, "lest you forget."

MELVIL DEWEY.

Library Calendar

May 14. Chicago Library Club, annual meeting.

May 25-29. A. L. A., annual conference, Washington, D. C.

June 15-20. California State Library Association, San Diego, Hotel del Coronado.

Aug. 31-Sept. 4. Library Association (English). Annual meeting, Oxford.

Pursuant to the provisions of the Act of Congress of August 24th, 1912:

THE LIBRARY JOURNAL,

Editor R. R. BOWKER
141 East 25th St., New York City

Managing Editor FREMONT RIDER
141 East 25th St., New York City

Business Manager. JOHN A. HOLDEN
141 East 25th St., New York City

The publisher and owner of THE LIBRARY JOURNAL is the R. R. BOWKER COMPANY, a corporation, at 141 East 25th St., New York City, with these stockholders.

R. R. BOWKER, 141 East 25th Street
A. H. LEYPOLDT, 141 East 25th Street
JOHN A. HOLDEN, 141 East 25th Street
W. A. STEWART, 141 East 25th Street
FREMONT RIDER, 141 East 25th Street

There are no bondholders, mortgages or other security holders.

Statement to the above effect subscribed and sworn to March 18th 1914, before RICHARD N. COTMAN, Notary Public, by JOHN A. HOLDEN, Business Manager.

PUBLISHER'S NOTE.—The office of THE LIBRARY JOURNAL was moved May 1 from 141 East 25th Street to 241 West 37th Street.

LÉOPOLD DELISLE, HEAD OF THE BIBLIOTHÈQUE NATIONALE FROM 1874 TO 1905

THE LIBRARY JOURNAL

VOL. 39

JUNE, 1914

No. 6

ONE of the great monuments to Dr. Billings is the library of the Surgeon-General's Office, which first under his direction and later under his policy became the foremost working medical library in the world. The proposal to transfer it to the Library of Congress has led to an outcry from certain quarters in the medical profession which is based altogether on misapprehension. The Library of Congress is now the first working library in the world, though only third in number of volumes, and the national medical library would be no less a working tool of the medical profession if it were made part of the national library than if it were kept under the jurisdiction of the war department. It would remain distinctively a medical library, as the library of the Smithsonian Institution, now a part of the national library, retains its special librarian and its distinctive character and function. Indeed, under the present administration of the national library, which has made so distinguished a record as to define future policy as well, there would seem to be more assurance of continuity for the national medical library on Dr. Billings' lines of development than if left to more haphazard conditions under successive surgeons-general as an incidental part of their office. It is in such cases as these that the misnomer of the Library of Congress instead of National Library leads to misapprehension.

THE waste in government printing has again been emphasized through an investigation by the House Committee on Printing. The report estimates that a thousand tons of printed matter, involving the destruction of a vast acreage of forest, cum-

ber costly storage space, that for the past six years a million volumes a year have been printed beyond demand, and that possibly \$850,000 a year could be saved by repressing "leave to print" and balancing supply with demand through the supervision of an effective Joint Committee on Printing. To which last the library profession will heartily say Amen. What is needed is not a broadcast scattering of printed matter to flood the waste-paper baskets of constituents, but such organized and liberal supply of public documents to well equipped depositories, chiefly existing public libraries, that demand may be intelligently and sufficiently supplied, without waste. One document available on the public library shelves is worth a thousand copies recklessly distributed or a thousand thousand stowed away in Washington. A new printing bill has been prepared and will be discussed at a round table meeting at the conference, and it is understood that the committee of Congress will be very receptive of suggestions from the A. L. A.

ONE of the most difficult tasks of the order department in a library is to obtain ephemeral publications "after the event," when it is discovered, too late, that a library lacks this or that number to complete a series, or is deficient in some pamphlet really important in the collection. The campaign books of the political parties are notable instances in point. These are important contributions to political history and offer a mine of information and current thought for future delvers. These handbooks and other issues of the political parties are to be had for the asking at the time of the publication, being issued by the

thousand or hundred thousand; but a year later it is almost impossible to find them. Another kind of publication of this sort is covered by the inclusive name of "author's books." Such books, whether printed for the author by a printer who is not a publisher or manufacturer or by a publisher who puts his imprint on them and gives them the immediate benefit of his name and selling organization, are many of them not of value for permanent preservation; but others are published in this wise simply because they lack commercial value, though their literary or historical or philosophical value may be of high rank. One of our great libraries makes it a point to send a letter to such authors the moment such a book is published, inviting the donation of the book, which such authors are for the most part gladly willing to make. In the case of local publications of an ephemeral sort, it is peculiarly the duty of a local library to gather them in and take a good deal of pains to do so. These words of wisdom are commended to the practical consideration of librarians, both in large and small libraries.

DESPITE all endeavors in coöperation and coördination, there is still immense duplication of work in the library field. A librarian, particularly in a leading library, finds himself beset with questionnaires oftentimes to the same purport as one he has answered perhaps a week before, and the result is either a seemingly discourteous attitude toward questioner no. 2 or a wasteful duplication of work in preparing the same statistics or the same answers over again, with the slightest shade of difference. A statistician will put lots of work into a set of figures which has likely enough already been worked out by some fellow member of the profession. Most of all, as we have often pointed out, there is a very great waste in the preparation of bibliographies and reading lists, especially on topics of the time, which a library does for

itself when it might make use of a very similar list already compiled or in preparation by others. A special function of an organ of the profession, like the LIBRARY JOURNAL, should be to prevent this duplication and waste; and this is possible through simple questions whether anyone has done or is doing the work which the questioner has in mind. We are always disposed to give space to the results of investigations which may be of interest to other possible investigators, in the hope of preventing such waste, and our columns are freely open to our readers to this end. We hear much of efficiency within the library, but here is a larger question of efficiency and economy which ought not to be overlooked.

MR. CARNEGIE'S deed of trust to his Dunfermline trustees, devoting \$10,000,000 as a permanent fund for the erection of library buildings and the supply of church organs and for alternative purposes in the interests of the people, of which the text for the first time is printed in full, is interesting as stating his motives for library benefactions. He quotes Carlyle's dictum that "the true university of our day is a collection of books," and in that spirit amplifies his thought of providing reading for the people. Coupling this with his brief letter to the president of the American Library Association, which was reprinted in facsimile in the LIBRARY JOURNAL for August, 1913, we have a presentation of Mr. Carnegie's library views, which are valuable human documents. It may be said by his critics that both documents are truisms, but this is another way of saying that they are statements of truth. Evidently Mr. Carnegie's chief desire is to make plain that he will not lend a hand in the pauperizing of the people, but rather looks upon it as a social duty to help people to help themselves. This is the true spirit of the modern library movement in very brief compass.

THE BIBLIOTHEQUE NATIONALE

SECOND PAPER: ADMINISTRATION

By THEODORE W. KOCH, *Librarian, University of Michigan*

WE have seen that Colbert had transferred the library in 1666 from the Rue de la Harpe to one of his houses in the Rue Vivienne, but this was soon outgrown and, moreover, it was not sufficiently substantial. The floors bent under the weight and the walls threatened to fall out. When the Hôtel de Nevers in the Rue de Richelieu became vacant in 1721, after the failure of Law's famous bank, the Abbé Bignon at once asked for it in order to install the King's Library. He was so fortunate as to obtain it by decree of council dated Sept. 13, 1721, and by Oct. 1 he had begun to transfer the manuscripts. The Hôtel de Nevers was the name given to that part of the palace of Cardinal Mazarin which had been inherited by the Marquis de Mancini, the husband of the Cardinal's niece. The present façade, which was reconstructed in 1878, is a copy of the old one.

The library to-day occupies the entire block bounded by the Rues de Richelieu, des Petits-Champs, Vivienne and Colbert. It is divided into four departments: (1) Printed books and maps; (2) Manuscripts; (3) Prints; (4) Medals and antiques.

I. *Printed books.* Two reading rooms are used by the Printed book department—one called the Salle publique de lecture, entered from the Rue Colbert, open to everybody, from 9 to 4 in winter and from 9 to 6 in summer, including Sunday; the other, called the Salle de travail, entered from the Rue de Richelieu, is open only to those furnished with a card of admission signed by the secretary. This room accommodates 344 readers, each one of whom receives on his entering the room a slip which after filling out his name, residence and seat number he must give to an assistant. Books asked for on the call slips are delivered to the seats indicated. No requests for books are received within an hour of the time for closing. On returning the books at the loan desk the reader re-

ceives back his slip, duly stamped, which he must surrender as he leaves the room. Readers are not permitted to quit either of the reading rooms with books, papers or portfolios in their hands without a "laissez-passer" from one of the librarians. The walls of the Salle de travail are lined with reference books. Exhibit cases containing the most interesting books are shown in special rooms, to which the public is admitted free of charge two days a week.

II. *Manuscripts.* The department of manuscripts, the oldest section of the library, contains at least 100,000 pieces of real significance and value. To study these manuscripts scholars come from all parts of the world, and the department gives distinction and preëminence to the library in an unusual degree. The number of volumes consulted exceeds 60,000 per year, and these are not merely the less important documents, like those in genealogy, but classical author, mediæval writers, both sacred and profane, poets and historians of every period, and a great variety of manuscripts touching on every phase of national life. Few libraries possess richer collections of Oriental manuscripts. There are seven sub-divisions: 1. Oriental; 2. Greek; 3. Latin; 4. French; 5. Modern foreign languages; 6. French provinces; 7. Miscellaneous collections.

The first catalog of the manuscripts was the one compiled by Nicolas Rigault in 1622, revised and completed in 1645 by the Dupuy brothers. The general inventory arranged by Nicolas Clément in 1682 has served as a basis of the classification of all later catalogs. It comprised all of the manuscripts in one series of numbers. Numbers 1 to 1636 were assigned to Oriental manuscripts, numbers 1801 to 3538 to Greek manuscripts, numbers 3561 to 6700 to Latin manuscripts, and numbers 6701 to 10542 to manuscripts in French and other modern European languages. While this

inventory answered for a long time, the interpolations which it was necessary to make, in the way of letters and sub-numbers, brought about great confusion. It was necessary to copy it in 1730. About 1735 a new method was begun, and as many series started as there were principal languages. The numbers from 1 to 6700 of the old inventory were cancelled, but no change made in the series of French manuscripts. The larger collections which were afterwards received by the library remained intact and formed special collections. The manuscripts which came one by one were put into a collection of new accessions. This collection of new accessions revised on a new basis at the beginning of the nineteenth century gave rise to what was called the "Ancien supplément," which, in turn, was put out of commission in 1820, and in its place was substituted a new series known under the names of Greek, Latin and French supplements and "Fonds des cartulaires."

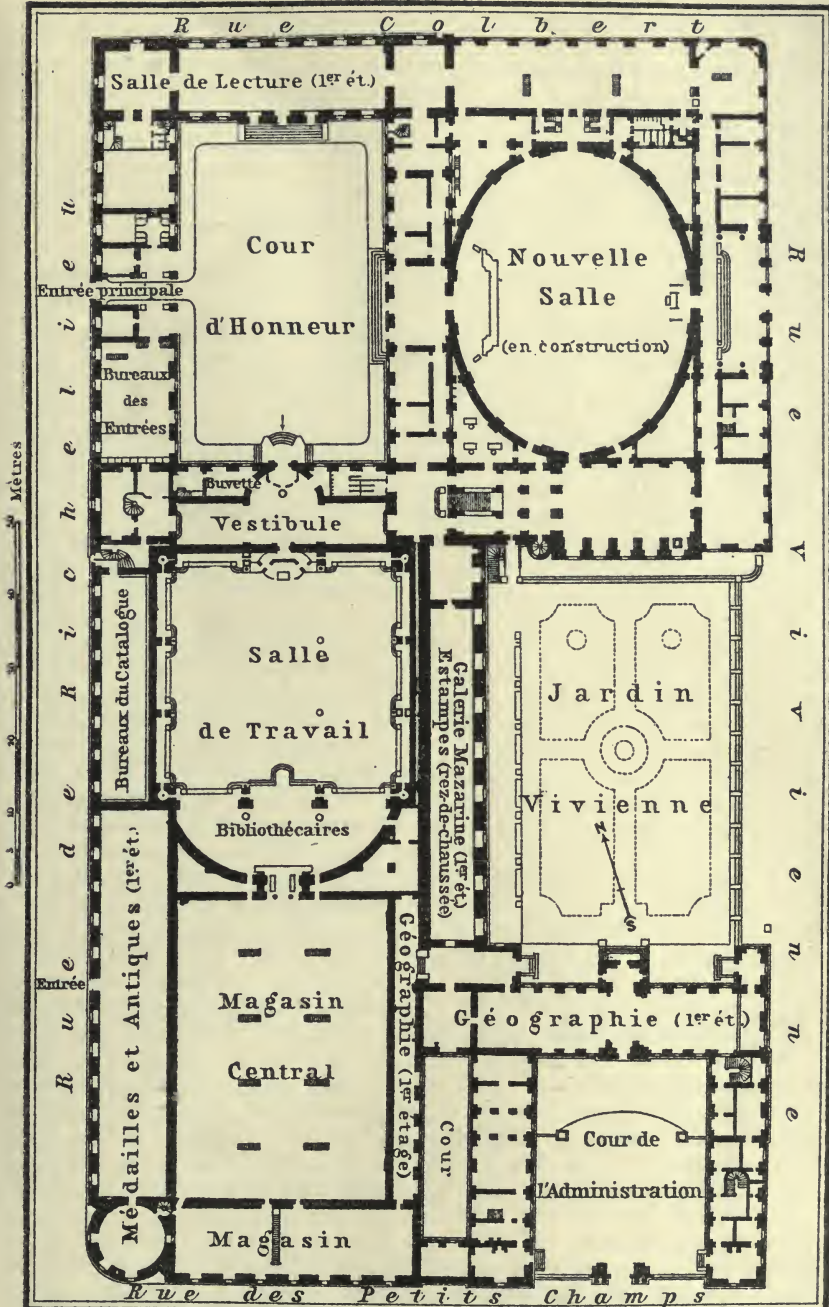

III. *Prints.* In 1667 the Abbé de Marolles, a learned collector and writer on art, offered to Louis XIV his collection of 123,000 prints, and suggested the formation of a cabinet of prints which, said he, "should not be unworthy of a royal library, where nothing ought to be disdained." The 520 folio volumes presented to the king constituted the nucleus of a unique collection. The Abbé de Marolles was practically the first keeper of prints, and to his interest in the work of the early engravers the library today owes many of its treasures.

The print department contains more than 2,500,000 plates which are either bound up into the 14,500 volumes contained in this department or arranged in portfolios, which number in the neighborhood of 4000. The accessions come through gift, purchase and copyright deposit. The department has a budget of about 27,000 francs, out of which must be purchased those rare plates which may be lacking, and bindings paid for. Gifts are the chief source of enrichment. As the late Henri Bouchot said, the department could not buy many things at the prices which coveted prints command at present. Certain indispensable works have

taken two hundred years to reach the department, but they came at last in the form of gifts. The department can afford to wait, as it is there to stay and so can bide its time. The popular taste changes with time and prices for things that have lost their vogue, but not their value, drop very perceptibly, and they can then be acquired for a fraction of their former cost. Some recent accessions to the print department have come under the semblance of purchase, but at such nominal prices as to be more in the nature of gifts. In this category is a collection of 1800 volumes of Japanese prints and the Ardail collection of proofs of modern etchings. Among outright gifts the Paul Meurice collection of portraits of Victor Hugo and the Alfred Beurdeley collection of etchings by Zorn deserve mention. About 60,000 volumes are consulted annually by readers in the department. The majority of those who consult the prints are workers in various fields of art, including skilled workmen, designers and artists. The trifling dilettantes are in a decided minority.

IV. *Medals and antiques.* Francis I was apparently the first of the French kings to conceive of the idea of a special collection of gems and medals. He employed Italian artists at great expense to engrave cameos and intaglios. Henri II and Catherine de Medicis continued the collection, and Charles IX conceived the idea of making a museum of it. He moved it from Fontainebleau to Paris, where he deposited it in the Louvre in a cabinet specially prepared for it. Unfortunately, the pieces thus collected were scattered during the disturbances at the time of the League. Henri IV re-established the collection, but died in the midst of his work along this line. Louis XIV must be regarded as the real founder of the present department. He gathered at the Louvre all the medals and antiques that could be found scattered through the various royal palaces. Colbert united the custodianship of the cabinet at the Louvre with that of the guardianship of the King's Library. In 1666 the cabinet was transferred to the new buildings of the library in the Rue Vivienne, where it remained

BIBLIOTHEQUE NATIONALE

d'après J.L.Pascal

Gravé et imprimé par Wagner & Debes, Leipzig.

until 1684, when it was transferred to Versailles. There it was placed near the apartment of the king, who took pleasure in visiting it almost every day after mass. In 1741 it was replaced at the library, where it has since remained. Numerous catalogs of the collection have been printed from 1819 down to the present day. The department possesses about 200,000 medals, and among the antiques are included gems, intaglios and cameos, small works of art, glass, vases, arms and miscellaneous curiosities.

EARLY CATALOGS OF PRINTED BOOKS

Nicolas Clément took nine years (1675-1684) to put in order the 35,000 volumes which the library had at that time. He grouped them into 23 classes, assigned the class numbers, and arranged a classed catalog which fills seven large volumes and to which was added an alphabetical list of authors. This catalog soon became inadequate. Clément took up the work and completed before long the second classed catalog in 14 volumes, supplemented by an alphabetical index of authors. This second catalog listed in all some 43,000 volumes. Of the 23 classes into which he grouped the books ten remain to this day (F-K, M, Q-S and V).

- A Bible.
- B Biblical commentators.
- C Church fathers.
- D Theology.
- E Church councils. Canon law. Liturgy.
- F Civil and political law.
- G Geography. Chronological and general history.
- H Ecclesiastical history.
- J Greek and Byzantine history. Roman history and antiquities.
- K History of Italy.
- L History of France.
- M History of Germany, Switzerland, Hungary, Poland, Russia, the Northern countries, and Belgium.
- N History of England.
- O History of Spain, Portugal, and countries situated outside of Europe. Travels.

- P Historical miscellany. Biography.
- Q Bibliography.
- R Philosophy. Physics. Moral, economic and political sciences.
- S Natural history. Agriculture.
- T Medicine. Chemistry.
- V Mathematics. Astronomy. Architecture. Military art. Mechanics. Fine arts. Mechanical arts.
- X Grammar.
- Y Poetry and fiction.
- Z Philology and polygraphy. Mythology. Emblems, etc.

The work done by Clément enabled the library to run smoothly for half a century. In 1719-20 a very minute inventory was taken of the library. Clément had undertaken to number not the works but the volumes and to sub-divide each class into three sections, each of which was devoted to books of determined size in a manner so that the volumes followed on the shelves in the same order as in the leaves of the catalog. He reserved here and there a vacant number, so as to be able to insert additional articles and under one number to group the little pamphlets of the same class, bound into one volume or kept together in a particular folio, so that the real books were not lost in the midst of brochures.

The question of printing the catalog made by Clément was agitated abroad by an exchange of opinions between him and a Danish scholar, Frederick Rostgaard. Rostgaard claimed to have invented a new method of arranging the catalog, which he explained in a letter addressed to Clément, dated Aug. 19, 1697. To illustrate his method, Rostgaard chose Thucydides as an example, because he possessed nearly all the editions of this author. Rostgaard's scheme was to divide each page into columns in such a way that by a single glance of the eye one perceived at the opening of a book on two opposite pages four columns, two on one page and two on the other, the first of these columns containing folios, the second quartos, the third octavos, and the fourth duodecimos and smaller books. In this way Rostgaard was able to arrange in four columns all the edi-

tions of Thucydides which he then had in his possession. Clément in acknowledging Rostgaard's communication was most urbane, and compared it to the polyglot Bibles where one sees at a single glance of the eye several columns of texts and the original versions—but he also saw some inconveniences in the scheme. He thought Rostgaard's classification would be admirable if the books of each size and the same matter bore a constant proportion to one another. Nothing would be finer than to see these proposed columns tally one with another, as they do in the polyglot Bibles, but Clément called attention to the different sizes of the works of the historians of Italy where the quartos exceeded the folios in number by two-thirds, while in theology the number of little books surpassed the large and even moderate sized books. This, it was argued, would affect the proposed arrangement of the titles and it would no longer be a catalog by columns. A catalog calculated to occupy six full volumes would be sure to run to twelve volumes, with half the columns empty. The columns which would be filled up would be just those where there were more titles still to insert. In theology, for example, the small sized books not only greatly outnumbered the large ones, but more of the small ones were being published daily. The arrangement of books on the shelves by size was taken for granted as a prerequisite by those interested in the matter in the early years of the Bibliothèque Nationale.

THE GENERAL CATALOG OF PRINTED BOOKS

The first volume of the new "Catalogue général" was published in 1897. Up to date fifty-two volumes have appeared, carrying the alphabet into the letter "F." The first volume contains a lengthy introduction by Léopold Delisle, who was at that time at the head of the institution, and this contains so much of the philosophy of classification and cataloging and of the history of work along these lines that we venture to summarize it at considerable length.

The catalog under discussion is one by authors. The great advantage which is usually attributed to a subject catalog, says

Delisle, is that on a given question it seems to be able to give an indication of the works which have the most interest, but this advantage is indeed more apparent than real. No matter how well it is made, how far the system of cross reference is extended, a catalog will never take the place of a bibliography and will not dispense with preliminary studies and general information. By way of illustration, Delisle took the case of one working in the reign of St. Louis. If he wished to know what references there were in the department of printed books, he would open the catalog on French history at the section Lb 18, which is entirely devoted to the reign of St. Louis, and where there are entered more than 200 different works referring to this period. If one thought, however, that in this way he could get all the important material on the field contained in the library he would, of course, be sadly mistaken. The fault is not in the catalog. In making this catalog of the Bibliothèque Nationale it was necessary, of course, for the sake of completeness, to enter a mass of publications which had no historical value, and, on the other hand, there was no mention made of many books which are entered elsewhere, but are nevertheless of the first importance for the history of the reign of St. Louis, such as the "Recueil des historiens de la France," tome 20, and the following:

Chronicles of Matthew of Paris and Salimbene.

Rymer's Foedera.

Rotuli litterarum clausurarum.

Annals of Rainaldi.

L'Histoire général de Languedoc.

Collection of the Bollandists, etc.

The aim of a bibliography is to give information on the existence and even the value of publications of every sort relating to a particular subject: special books, articles in encyclopedias, or in periodical collections, and even chapters in general works. A catalog answers altogether different needs: it ought above all to furnish the means of knowing, without a long search, whether a book or pamphlet of

known title is in the library; it ought, at the same time, to indicate the class under which this book or this pamphlet is found on the shelves. The alphabetical catalog is the only one which meets these conditions.

The system which groups anonymous publications according to the first words of the title is undoubtedly the most exact. It leaves nothing to chance. In France it was sanctioned by the use which Brunet and Barbier had made of it. It also had precedent in the *Bibliothèque Nationale*. As a general rule, Delisle thought that this system seemed to be the one which ought to be adopted without the least hesitation. But in the case of modern publications of an official or semi-official character, memorials, ordinances, statistics, etc., the rule has been to enter these under the name of the body or the office from which they emanate, with cross references, of course, from the names of the authors, compilers, or officials whose names are attached. Delisle raised the question, however, as to whether one could not, or ought not, to apply a special treatment to certain categories of older anonymous publications, such as anonymous letters which might possibly better be entered under the name of the addressee when known; occasional verse, elegies or poetical addresses when anonymous or emanating from a group of individuals might be entered under the name of the person in whose honor they were written or under the occasion on account of which they were made. Old romances of chivalry might well be entered under the name of the hero.

UNION CATALOG PROPOSED

In concluding his introduction, Delisle spoke of the possibilities of a union catalog for the great libraries of Paris, a scheme which he had cherished for years. Every investigator who has not found a book at the *Bibliothèque Nationale* has had to make two or three trips across Paris to assure himself as to whether one or the other of the large libraries did not possess the book in question. Delisle thought it worth while to raise the question as to

whether a catalog of the *Bibliothèque Nationale* might not be arranged in such a fashion as to make it at the same time an inventory of the books in the library of the Arsenal, the Mazarine, and the *Bibliothèque Sainte Geneviève*. The Commission of National and Municipal Libraries discussed these questions in 1893, and after examining a scheme for a union catalog of all the books possessed by governmental libraries in Paris, reported that while it recognized the service which such a scheme would render to research, the Commission did not feel able to recommend its adoption. Delisle was of the opinion that the question was only postponed, and that the publication of the catalog of the *Bibliothèque Nationale* would perhaps furnish a simple means of solving the problem.

In order to illustrate the relation of the Parisian libraries to one another, Delisle took the name of Aristotle and found that the *Bibliothèque Nationale* possessed in May, 1895, 741 pieces entered under this author. In the catalogs of the other libraries of Paris, he found 282 editions which were not to be found in the *Bibliothèque Nationale*. This meant that less than three-fourths of the editions of this author reported in Parisian libraries were to be found in the *Bibliothèque Nationale*. Of the Book of hours, the Parisian libraries contained 372 editions of which 260, or about seventy per cent., were at that time to be found in the *Bibliothèque Nationale*. By checking up Mlle. Pellechet's "Catalogue général des incunables des bibliothèques publiques de France," Delisle found that of 1680 books entered under the letter "A," 1140 in round numbers were represented on the shelves of the *Bibliothèque Nationale*. Of the 540 which were lacking in that library, 190 were to be found in the provincial libraries. In general it might be said that only seventy per cent. of the fifteenth century books known to exist in the public libraries of France are to be found at the *Bibliothèque Nationale*. The proportion would be raised to 80 per cent. if the desired titles from the Arsenal, the Mazarine, and

BIBLIOTHÈQUE NATIONALE—JARDIN DES VIVIENNES

BIBLIOTHÈQUE NATIONALE—MAZARINE GALLERY

Sainte Geneviève could be transferred to the Bibliothèque Nationale.

In comparing the catalog of the Bibliothèque Nationale with that of the British Museum it is seen that the former gives fuller imprint and collation, usually including the name of the publisher and the number of pages. In the case of Slavic, Oriental, Scandinavian, Dutch, and German titles the rule is to give a brief summary of the title in French as a note to the transcript of the title in the original. The Bibliothèque Nationale catalog is of a more convenient size for handling than that of the British Museum, though not so well adapted to the purposes of interlining and interleaving. The larger page and briefer entries of the British Museum catalog enable one to take in more titles at a glance.

EARLY LIBRARY OFFICIALS

The Bibliothèque Nationale has had in its service many interesting and erudite officials, of whom we can, however, mention only a few.

Nicolas Rigault was born at Paris in 1577, the son of a physician, and he early showed extraordinary talents in languages and literature. An ingenious satire, composed by him at the age of nineteen, made him acquainted with de Thou, through whose interest Rigault was appointed to a post in the library, where he succeeded Casaubon. His particular duty was to arrange the manuscripts, of which he compiled a catalog. In his will, de Thou entrusted the education of his children to Rigault, who showed himself worthy of this confidence. Rigault was quite a prolific scholar and took part in numerous heated theological discussions. To his untiring industry were due a number of Latin translations of lesser Greek authors, numerous political notes on various classical matters and several biographical treatises.

Pierre Dupuy, who was born in 1582, through his talents and character earned the friendship of de Thou and of Nicolas Rigault. In collaboration with Rigault and Jacques Dupuy he published several editions of the life of de Thou. Pierre found in his young brother Jacques a helpful col-

laborator. The latter, like himself, was an assistant in the King's Library. Jacques Dupuy will always be remembered in the annals of the library by the legacy of books which he and his brother had collected, over 5000 printed volumes and about 300 manuscripts.

Nicolas Clément was born at Toul in 1647, and was still quite young when he was engaged by Carcavi to arrange and copy the collection of memoirs which had been gathered by Colbert. In 1670 Clément was entrusted with the care of prints and engravings. In 1692 he succeeded Thevenot as sub-librarian. In 1706 Jean Aymon, the adventurer, wrote Clément announcing his desire to enter the church and Clément received him in France, and even entrusted him with the freedom of the King's Library. Eleven valuable manuscripts were stolen by this renegade priest, while others, even more valuable, like the Bible of Charles the Bald, were shamefully mutilated. Clément exercised the greatest diligence in investigating the extent of the harm done, and reclamations were made but without result. The library regained possession of but about thirty leaves which were generously restored by Lord Oxford and some pieces cut from important manuscripts which the British Museum liberally offered on exchange account. Clément was inconsolable over this mishap and the chagrin which he felt over the matter darkened the remaining years of his life.

THE BIGNON FAMILY

The Bignon family was in administrative control of the library from the time of the appointment of Jerome Bignon in 1642 to the death of Jean Frederic in 1783. So there was considerable warrant for Villars saying in his report to the National Assembly in 1795 that the library had been reserved for certain privileged families of which it seemed to be the inheritance.

Jerome Bignon, born in 1589, was, after the execution of de Thou, nominated "grand maître" of the Royal Library. He was an infant prodigy who published his

first work at the age of ten, and who had a number of works to his credit before he was twenty. By that time, according to one of his biographers, he had read everything and had remembered it all! He acquired a great reputation for learning, was known as the French Varro, but none of his books are quoted to-day. Richelieu was moved to appoint him to the post in the library, not on account of any personal predilection for the man, but because of Bignon's reputation as a lover of literature, which was so great that Richelieu felt that the public had already designated him for the place in advance. When he died in 1656 he left behind him, as Voltaire said, a great name rather than great works. His epitaph describes him as the favorite, the ornament, the exemplar and miracle of his age! Five years before his death he had resigned in favor of his eldest son, Jerome, whom Louis XIV appointed as his successor, and who held office until his own death in 1672. He was succeeded by his own son, Jerome 3d, but the latter was more or less of a figure-head, the affairs of the library during his tenure of office being largely administered by Colbert. On the death of Colbert in 1683 the Marquis de Louvois assumed control of the library and had his son Camille, then a boy of nine, appointed King's Librarian, and the latter held office until his death in 1718, when the Bignon family was again put in control. The new librarian was the erudite Abbé Jean Paul Bignon, the younger son of Jerome 2d, whose magnificent private library he had inherited. The royal patent of Sept. 15, 1719, appointing him to the office, speaks of the satisfaction felt in thus honoring the memory of his father and grandfather, in entrusting to one of their descendants the care of a library which had been so long in their hands and which they had enriched with the fruit of their care. Under the Abbé's direction there was made a complete inventory of the library, taking fifteen months for the work, and the library was reorganized into five departments: 1. Manuscripts; 2. Printed books; 3. Charters and genealogies; 4. Prints; 5.

Medals. Each department was put under a special keeper, provided with assistants. During the Abbé's administration the library increased very materially in size. The Abbé disposed of his own private library of 60,000 volumes, the Oriental books being presented to the Royal Library, so that he might give his whole attention to his public duties and the care for his private library might not interfere with his attention to the great national collection entrusted to him. During his librarianship the library was removed to its present home in the Rue de Richelieu and for the first time it was opened to the public. In 1720 men of letters could claim the right to admission. In that year the Abbé Bignon obtained a decree declaring the library open to "the learned of all nations" at such times as the librarian might appoint, and the library could be open to the general public once a week from eleven to one o'clock, but it was not until 1735 that any such liberal decree was carried out. After that the library was open from eleven to one o'clock on Wednesday and Friday, which was the rule to the end of the eighteenth century.

The reputation which the Abbé Bignon enjoyed among literary men is shown by the tenor of the letter which Voltaire wrote him about 1730: "I beg you to have the goodness to permit me to borrow from the King's Library some English books which I should not be able to find elsewhere. I shall give my receipt for them and I shall not fail to return them in a month. I make bold to ask this favor of you, Sir, the more freely because I know that you have devoted your life to helping men of letters. Your reputation is warrant for the liberty which I take. I shall call at the library in a few days and if you will grant me your permission I shall avail myself of it with the gratitude which all thinking men owe to you."

The Abbé Bignon resigned in 1741 at the age of eighty and died two years later, having preserved to the last, as his eulogist Freret said, not only his mental powers, but also the sweetness and equa-

nimity of spirit which he had always shown. He was succeeded by his nephew, Bignon de Blanzay, who died after two years in office and was succeeded by his brother, Armand Jerome Bignon. These two brothers left but little impression on the library, but by carrying out the rules and precepts laid down by their more illustrious predecessors they were able to increase the collections very materially. Upon the death of Armand Jerome in 1772 he was succeeded by his son, Jean Frederic, who remained in office almost up to the time of the French Revolution. When he died in 1783, the administration of the library passed forever out of the hands of the Bignon family. During the one hundred and forty years that had elapsed since the appointment of the first Jerome Bignon in 1642, the library had increased from 6000 volumes to 152,868.

LATER ADMINISTRATORS

The report of 1795, looking to a reorganization of the library, in alluding to the long dominion of the Bignon family said that the librarianship had become the prize of intrigue and the show of favor, that the republican régime would suffer no aristocratic charges. The librarian's post was then suppressed; the administration of the library was entrusted to a group of eight conservators, two for the department of printed books, three for manuscripts, two for coins, and one for prints. One of the two conservators of printed books was Joseph Basile Bernard Van Praet, who for nearly forty years ruled as absolute master over this department, to which he devoted his entire time and skill. His chief aim was to assure to his beloved library the possession of treasures which he was best able to discover and which the administration always enabled him to secure. He was never discouraged by the insufficiency of his staff. He had faith in his mission and his capacity for work enabled him to triumph over difficulties which others would have considered insurmountable. The service of books to the public, hitherto almost arbitrary and limited to two days per week, was made a matter of

daily routine and more liberal rules were introduced. Van Praet regarded it as a duty to aid with all his strength the liberal intentions of the government and to communicate without reserve to the scholars and to men of letters the literary treasures entrusted to his care. Whoever consulted him, said Pillon, always received a cordial welcome and found in his learning a sure guide to sources useful in whatever research was being undertaken. He found means to put into the library tens of thousands of books, to complete many sets, and to add items of great value which he had secured from literary institutions and bookshops. Being poorly supported by his colleagues, he had to leave stuck away in the corners of the library, without any semblance of classification, a multitude of books in the midst of which he loved to plunge, sure of bringing to the surface volumes intended to satisfy the curiosity of his friends; that is to say, of all true investigators and bibliophiles. With his remarkable memory, which took the place of catalogs, he was able to indicate instantly the title and location of the most out-of-way publications and with his unfailing courtesy he himself frequently went to find the desired book. His contemporaries say that it was a wonderful sight to see him start out in quest of works which he recalled having at one time or another selected from this or that collection and which he remembered to have put in a particular spot, the general appearance of which remained engraved on his memory. During more than fifty years of devotion and unexampled assiduity, he rarely left the library which had become "his country and his home," and in which he may be said to have passed his whole life.

Jean Pierre Avel Remusat was born in 1788, and met with an accident in infancy, by which his life was endangered. It was necessary for him to remain absolutely quiet for several years. He lost the use of one eye, but the sedentary life made study a necessity and a pleasure. At the age of eleven he composed a little mythological dictionary, and at the age of four-

teen he wrote a chronological, genealogical and synchronical table of the kings of Great Britain. Owing to the suppression of the colleges after the French Revolution, the lad had no Latin teacher except his father whom he lost in 1805, and yet he read and spoke this language with the greatest fluency. He early took to the study of botany and formed a herbarium, having seen a magnificent Chinese herbarium at Abbaye-aux-Bois where the Abbé de Tersan had formed a beautiful collection of antiquities and curiosities. These so interested young Remusat that he conceived an ardent desire to learn Chinese and other Oriental languages. In 1824 he was appointed to the library staff in charge of Oriental manuscripts. In 1831 he was a member of the Commission which, although it was presided over by Cuvier and numbered among its members some very distinguished men, did not reform any of the abuses of the public libraries, which was supposed to be the function of the Commission. This was a sort of triumph for Remusat, who was at that time administering the Royal Library under the venerable Van Praet.

Jules Antoine Taschereau, born at Tours in 1801, studied law at Paris, but drifted into literature and journalism. In 1852 he was appointed "administrateur adjoint" of the Imperial Library and in 1858 he succeeded Naudet in the headship. In 1855, he was given charge of editing the catalogs, of which he published on an average one volume per year for the next decade. Delisle considered him an administrator in whom kindness and strength were mixed in equal proportion. It was Taschereau who saw to it that the salutary principles of the decree of 1858 were enforced, and who originated the wisest and most liberal reforms, such as prolonging the hours of opening, the suppression of the long periods when the library was closed, the organization of the room for reserved books and of the present main reading room. He improved the condition of the assistants of all grades. He maintained discipline, encouraged the zealous, directed the work of classification and

cataloging, defended the interests of the library before the courts, looked out for the various departments when threatened by adverse interests and was instrumental in obtaining generous budgets for the purchase of material of great value to the history of France.

LÉOPOLD DELISLE

Léopold Delisle, long the dean of librarians, was born at Valognes, in 1826. While a student in his home town he became the boy companion of an old man, Charles Duhérisier de Gerville, who had lived his youth in England as an émigré. De Gerville's consuming passion was the study of the Middle Ages, especially mediæval Normandy. To the interested boy he opened up a new world of fascinating mystery that extended itself to a wonderful École des Chartes and a still greater Académie des Inscriptions. One day De Gerville took from a corner of his library an old register and gave the eager boy his first lesson in reading ancient handwritings. The boy's delighted recreation for the rest of the summer was copying the old register.

In 1845, the ardent pupil entered the École des Chartes, armed with three precious letters of introduction from M. de Gerville to his friends, Le Normant, keeper of the Royal Library, Le Prévost, member of the Académie des Inscriptions, and Jules Desnoyers, director of the Société de l'Histoire de France. By all three the young man was enthusiastically received. The following years of study, owing to political events, were badly broken up. The école was even closed for a time in 1848, but the young student used the added time to follow up his pet interest—the ancient records of Normandy.

In 1852, Benjamin Guérard became head of the manuscript department in the Bibliothèque Nationale, and his young friend Delisle was made his assistant. Many and deplorable had been the irregularities and disorders of this department, but the new head and assistant set themselves to the task of creating order out of chaos, a very delicate, though imperative proceeding. It

was decided that a thorough acquaintance with the history of the library was absolutely necessary. There must be precise knowledge of the manner in which the collections had been formed and their treatment before and after their arrival in the library. In this the writing and marks of former owners and former librarians must be recognized and recorded. Copies by ordinary scribes and copies by experts must be carefully discriminated. This Herculean task Delisle took up with zest. "I became more and more keen to know by whom and for whom manuscripts had been made," said Delisle, "from what countries they originally came, at what periods they had been copied, revised or completed; what artists had decorated them, whose hands had handled them, what dangers they had escaped, what scholars had used them, by what strange adventures different parts of certain manuscripts had been scattered to countries far apart, what alterations had been made in them and what disfigurements they had suffered at the hands of forgers, sometimes for the purpose of giving them an imaginary value and sometimes to disguise theft."

Two events mark this early period of his work in the department of manuscripts: the death of his beloved chief, Guérard, in 1854, after barely two years of splendid service, and Delisle's introduction, by Guérard's successor, Natalis de Wailly, to Mme. Eugène Bournouf, the wife of the famous orientalist. Mme. Bournouf's eldest daughter, Laure, found in Delisle not the dream of her girlhood, but its much more real equivalent. Though her girlish ideal had been to marry an orientalist such as her talented father or learned grandfather, she was nevertheless reconciled to Delisle, because as she was pleased to say, of his two merits, the one, that he had been born near the home of the Bournouf family, and the other, that he had come from the *École des Chartes*, where her father had been one of its first and most brilliant scholars. She herself was a talented woman. As a small girl she had been the pride of her grandfather's heart

in that she could write the same Latin prose as the members of the rhetoric class in the *Lycée de Charlemagne*. She was also a miniaturist of no small success, a fact which greatly aided her in her love and knowledge of the illuminations of mediæval manuscripts. Under Delisle's enthusiastic guidance she soon acquired skill in deciphering readily and correctly mediæval handwritings, even to assigning them proper dates, though she was often shocked at the style of Latin so different from that taught by her gifted grandfather. She was in all respects an inspiring companion and co-worker. To quote Delisle's own earnest tribute: "How many pieces has she transcribed for me with the utmost accuracy, in that beautiful hand which recalled the fine copies made by her father and given by her to the *Bibliothèque Nationale*! What manuscripts we have collated together! She shared all my tastes, took part in all my work, and would not remain unfamiliar with any question which I was led to investigate. Her modesty was so great that she never wished any one to suspect the share in my published works which really belonged to her. What papers she read and analyzed, pen in hand; what books she searched through; what translations she made for me; what letters she wrote; what errors—and not errors of the press only—did she save me from making by going over my proofs, which she never liked to be sent to press until she had re-read them! How delighted I was at the wicked pleasure she took in pointing out the misprints I had allowed to pass when they were staring me in the face."

Delisle's marriage with Laure Bournouf was soon followed by his election to the *Académie des Inscriptions*, the memory of his brilliant father-in-law aiding in no small degree the attainment of this distinction. Delisle refers again and again in his "*Souvenirs de jeunesse*" to the pleasure he took in his beloved manuscripts, of the delightful evenings spent with his wife in talking them over, of the delicious thrills of discovery of long lost or strayed fragments, of the happy restora-

tion of the Libri manuscripts. Behind all this lay infinite painstaking research, for never did Delisle lose track of his keen interest in the origins of the manuscripts and the vicissitudes of their wanderings. In 1868 he had traced thirty manuscripts of the 1200 brought together by Charles V and VI in the tower of the Louvre and in various royal residences. By 1908 he had completed the life history of over a hundred.

In 1871 Delisle himself became the head of the department of manuscripts, only to relinquish it in 1874 for the headship of the entire library. This post he held until 1905, when he was summarily retired, owing to "political exigencies." Needless to say, this proceeding called forth the righteous indignation of French scholarship. Whether his administration of the library had become "too inflexible" and "over-conservative" or not, his intellectual life was as vigorous as ever.

On his retirement from the Bibliothèque Nationale, he became joint keeper of the Bibliothèque et Musée Condé at Chantilly, the valuable gift of the Duc d'Aumâle to the French nation. Here he took up again after half a century, his youthful love—the history of Normandy. He not only began again with unflinching courage, but with all the fire of strenuous labor, though he now traveled the highway alone for, tragic coincidence that it was, he lost his wife and co-worker on the very day he left the Bibliothèque Nationale. In 1909, at 83, he published the first volume of his studies in Norman history, the "Acts of Henri II", a huge quarto of 600 pages, and though his eyes became dim he continued to work up to the moment of his death, which came suddenly on July 22, 1910, while he was conversing with a visitor on the subject of the second volume, even then nearly ready for the press.

At the time of his death, Léopold Delisle was undoubtedly one of the greatest authorities on the Middle Ages. He had few if any rivals in his knowledge of diplomatics, palæography and printing. His determination to make every manuscript which he took up yield its life history has given his monographs a strangely hu-

man interest. Few learned men have been so prolific as authors and editors. Few indeed have had the honor of attaching their names to so many learned publications. Not only was he a great scholar, but he was likewise a great librarian and administrator. He found the Bibliothèque Nationale "a mob of books and left it a library." He did, perhaps, more than any other man to reveal the richness of the greatest library in France, thereby giving historical science a chance to take a great step forward, since it was through him that the resources of one of the world's largest libraries were made more accessible to scholars. He was ever ready to give encouragement to foreign scholars writing on subjects concerning France. An introduction to M. Delisle meant not only access to the vast stores of the Bibliothèque Nationale, but to the treasures of all the other Paris libraries. With him scholars were to be treated always as friends and fellow-workers. He was as generous concerning their work as he was modest about his own. It was said of him that no controversy could ruffle his temper or betray him into the smallest departure from the graceful courtesy that was a part of him. As a man he is described as having "something of the strength and alertness of Victor Hugo, with the face of a vigorous man of letters who might easily have been either a poet or a man of business." But "his eminence in the world of scholars," says one of his eulogists, "was not due merely to his learning or to the use he made of it in his writings, nor was it his position at the head of the largest library in the world that caused him to be looked up to by a multitude of students. There have been famous scholars and admirable librarians who have passed away without leaving the sense of personal loss which has been felt at the death of Delisle, even by those who never met him. It was the dignity and charm of his character which showed in all his acts, which penetrated into his writings and which made him ever ready to help others, whether by word or deed."

THE GROUP INDEX; OR, CATALOG AT THE SHELVES

BY CLIFFORD B. CLAPP, *Chief of Cataloging and Classification in the Dartmouth College Library*

FOR the users of a library the books are the all-important thing, as they ought to be. The privilege of admission to the stack, a usual though somewhat restricted practice in college and university libraries, admits to their presence in a delightfully free and satisfactory manner. The classification, whether approved or not, is understood far enough to insure access to the collection, group, or topic desired. What is more natural than to obey first the call of the books, ignoring the card catalog, their master-key? What is more natural thereafter than to put aside all thought of the cards, when a retreat to them would secure valuable and desired information? We of the staff are ourselves loath to tread the tortuous distances from the stack to the delivery room when the expected book is not found or the collection proves less fruitful than we had supposed it, even although we know that the catalog is the key to information that lurks in hidden places. This state of mind is not only natural but actual. It is a trait that we know to be characteristic of professor as well as student. The resulting discounted efficiency is serious enough when thus considered merely in relation to forgetfulness and lack of foresight. But it is made very serious by the failure of the classification to place subjects where they are expected, or even to provide for them at all; by the idiosyncrasies of us, the classifiers, and of our patrons, those who expect to find books where they and they only want them, and of the makers of books, who are sometimes thought to be at the bottom of the whole trouble; and most of all it is made very serious by the complexity of the relationships between various divisions of knowledge.

Education in the use of the library is the remedy usually proposed—yet seldom seriously tried. Classification reform is put forth as a second suggestion. In com-

petition with these I would set a third proposition, supporting it with some argument and illustration. I suggest that in proximity to each of the broad groups of the classified collections of the library there be established an alphabetical author catalog of all the books of that group, whether they be actually placed there or unavoidably located elsewhere, and books in contents or purpose closely allied with it; and that there be combined with this in the same alphabetical sequence an index of the topics represented in the group, together with those others most closely related to them in general or local usage. In other words, I would serve the stack visitor, on the spot, with a directory to every book and every subject that he might reasonably expect or desire to have in the portion of the library that is his chief sphere of interest. Thus would arise what might be called the Group Index, although we could designate it by other terms, such as section, division, department, or relative index, or the catalog at the shelves. It would be a directory, nothing more. It should not be a relative index in the sense of aiming to show a system of logical relationships between books or topics; it should not be highly analytical, as the customary Department Catalog should be when at its best; nor should it be a complete catalog, including title and subject entries for each book. It would not supersede the existing catalog, nor duplicate it in number of entries or detail. It would be an accessory instrument, designed for a time-saver to the worker and a spur to the negligent.

Not infrequently one is in the stack looking for a particular book, without having either its call number or an adequate idea of its subject matter, but with an idea of its general location. If the classification is close, if a chronological division or sequence is used, if books are

frequently moved, and if the most important books are placed elsewhere in temporary reserve, a good deal of inconvenience and loss of time are to be expected in discovering the desired work. If the book be in circulation it is not possible to tell, on the spot, whether it surely belongs on these shelves or not. Perhaps one may confidently expect to find some or all books relating to a particular matter where that topic is known to be classified, but it happens that some of these books are of double subject, or of unsuspected purport, or specially limited by manner of acquisition, and so are classed with an entirely different group of books; are not these as good as lost to the overhastened, the superficial, or the easily satisfied searcher?

The intricate relationships between the different branches of knowledge and the frequent intimate bearing of a topic upon matters utterly unlike the other subjects among which it is located make it unsafe for the scholar or student to assume that one certain part of the stack contains all the material on his subject. The far-flung wings of this and that group make it impossible in a collection of 100,000 volumes to put some subjects in proximity to two or three different groups to which they are closely related and by whose experts they will constantly be wanted. Such subjects, for example, are Eugenics, Child study, Enzyme chemistry, Clay industries, Roman law, Water, City planning, Primitive art, Pageantry, Aristotle, Nietzsche. Out of sight is often out of mind, and only the keenest book users get the full benefit of the existing facilities.

Classification reform is beside the point; it cannot stay reformed. Moreover, classifying can never be an exact science. A book scientifically made to-day will not remain so day after to-morrow, nor equally so for the purposes of two separate groups of persons who find it valuable, for it is written from a standpoint of passing interest, or from a point of view within one of the groups, or is acquired by the initiative of the experts of one group. There will always remain to be considered the point of view of the hour and the

man, and especially the pioneering philosopher, scientist, or teaching institution.

Instruction has not yet caused an adequate use of the existing catalogs, where alone analyticals and cross-references appear and composite books are sufficiently treated, nor will it until the end of time lure everybody through circuitous paths or magnificent distances to satisfy any longing for the unknown.

But a conspicuous, handy, straightforward index, right where it is wanted, will be used by the most negligent person. Suppose it cannot do what the catalog does; it can do a great deal that the catalog obviously does not, and that is sufficient warrant and sufficient requirement for its existence. In what shall it consist? In any open-stack library (and I am speaking of those that have open-access to any considerable extent, whether limited or not), a guide to the classification of each group is necessary. A classed guide, prominently posted, may be a useful thing, but it can include only large divisions, and at the shelves it is of little use compared with an alphabetical index to the topics, a tool absolutely necessary when the classification is close. Let us assume the presence of such an index. The customary idea is departed from when we propose to add to this index those topics of frequent use to the users of the group which are desirable or unavoidably located elsewhere. The difference of the resulting index from an alphabetical subject catalog is that it gives topics without giving separate books under them. The next step is to include the separate books of the group, not under subjects, but by authors in one alphabet with the topics in the manner of author entries in a dictionary catalog. We ought rarely in one group to include two entries for a book. The next proposition is to add to this list those individual works properly in the group by subject but located elsewhere, such as those temporarily or permanently placed in a reference room, department or seminar library, special collection or treasure case, or on folio shelves, and those as to the classification of which there is likely to be dispute, with particular

attention to works acquired through appropriations or persons associated with the group in question, and also all works of double subject that are reasonably sure to be wanted here. We may also add important parts of a limited number of general reference books, and call attention to periodical indexes, bibliographies, and catalog cross-references.

A satisfactory illustration is difficult to give in an article of this kind, chiefly because in the absence of an actual case of the instrument as it would be when in working order it is not easy to find the requisite variety of examples possessing the appearance of actuality and arrangeable in close alphabetical sequence; but a survey of the following table will suggest, though inadequately, the appearance of a portion of the Index in its briefest form. Being limited in space, the illustration cannot show a true proportion between works, topics, and references, and with the number of topics shown here there ought to be more books listed. Taken through a succession of groups the average ratio of topics to titles would very likely vary between one to five and one to twenty. The example represents a part of the Group Index for the D. C. division 3, Social sciences:

The items marked (a) indicate books shelved in the group to which the Index applies. The slip or card carrying any one of these items can be covered or preceded by a properly labelled marker indicating temporary removal to reserved shelves, departments, or bindery, or showing that the work is missing. Items marked (b) are supposed to have been so treated. Call numbers other than those in 3 are for books or topics classed elsewhere but considered especially valuable for this division or likely to be sought for here. The characteristic marks are used for over-size books and permanent reference works. Items marked (c) and most of those under Australia are part of the topical index to the classification of the group, while (d) shows a few subjects located elsewhere supposed to be valuable to those studying here. The indented references are valuable if used sparingly, perhaps for the larger subjects and those of constant or notable current use, and for the continents and chief states. Analytical references such as those under Australia Schools and Australia Statistics should be used whenever space and time permit. The Index is of especial value in the case of two-topic books, and as none is given in the table I would mention as good examples Bowman's "Forest physiography," Shamel's "Mining, mineral and geological law," Mabel Carney's "Country life and the country school," Münsterberg's "Psychology and industrial efficiency," and those periodicals that treat of Physics and Mathematics or of Philosophy and Sociology together. Other examples were given by Mr. Merrill in the LIBRARY JOURNAL for June, 1912. The smaller the group we take the greater will be the number of

entries for books outside it. The Social sciences ought to be divided into at least two units in a large library, and the line of cleavage would probably fall through the middle of such a book as Hayes' "British social politics."

The Group Index may be kept on cards in a case set into a row of the stack or backed against the wall. If a case holding the regular form of Index were placed in a row of stack of a group of 6000 volumes, it would cause an increase of about one shelf, or less than one-half of one per cent., in the space occupied by the group. The cost of equipment for such a group should be, with a fair to medium grade of cards, say \$28 to \$44, and for a whole library of 100,000 volumes might run from about \$434 to about \$734. At 20,000 volumes a year for five years, initial equipment would cost not over \$150 annually. The upkeep of the equipment would be about \$.0033 to \$.0043 per volume. The labor cost cannot be determined until we have more statistics on the cost of cataloging, but the time spent in the non-mechanical work need be nothing like a clear addition to the time now spent in cataloging and classifying. The cost of the mechanical part of the labor must depend on the form and intensive scope of the Index and on the cataloging methods of individual libraries.

There is doubt whether the card form of Index is the best. We do not want to give much information. Why describe a book that is close at hand? For those that are in another group the fact that they are listed here is warrant for the supposition that they are worth while going to look at. The object of the Index is to locate the book. A single line, or rarely two, will be sufficient. The simpler we make it the better. The author's surname and a brief title will do. Brevity of title is usual in books, though I grant many exceptions, which need not balk us more than they have several libraries now printing catalogs using short titles. Cards waste space, they are not alluring to most people, and their only advantage for the present purpose lies in their comparative

cheapness, and especially in the possibility of cheap duplication of cards used in the main catalog.

Another form of equipment is the visible index, of which at least one make is on the market. It consists of moveable slips inserted in interchangeable leaves hinged on a bracket or a revolving stand. This is to my mind the most efficient kind of equipment for our purpose. It combines conspicuousness, attractiveness, speed, brevity, expansiveness, and space economy. Its cost is not prohibitive. The equipment suggested for a library of 100,000 volumes is somewhat as follows: Brackets on end of stacks, or within stack sections or on wall, containing interchangeable leaves filled with moveable slips; one slip, 6 by 3/16 inches, per title. To equip for 100,000 volumes, not including labor cost, \$1125 to \$1947. At 20,000 volumes a year for five years this makes \$225 to \$389 annually. For 10,000 entries for annual addition of 10,000 volumes (calling for two entries per title, which is certainly more than sufficient to cover main and extra entries for titles and all entries for topics), the cost should be \$113 to \$180. This is at the rate of \$.0113 to \$.018 per volume for equipment.

Still another kind of apparatus, but the least desirable, is the loose-leaf book. It should by no means be hung on the wall or stack, as is sometimes the case when bibliographies or stack guides in book form are placed near the books, but should stand in a shelf or pocket on the end of the row of stack. Flat against the end of the stack it will not project enough to be in the way and can be labelled as conspicuously as the usual stack guide.

The Index can be installed in a library group by group, in order to reduce the annual cost and to acquire experience in maintenance cost and service efficiency. While it can be made very useful in several ways not here mentioned, it is not a panacea. It will not settle all of one's stack troubles. It may not always work well or economically, for its success depends on the ability, care, and energy of its administrators just as much as that of

any library tool does. In principle it has occasionally been used by libraries in extremely limited respects in their stacks and their printed catalogs, and the big classification indexes have it; but as a stack pol-

icy, with definite and far-reaching purposes, it is new. It may be a difficult thing to get adopted, like many another proposition when not properly urged and supported. But is it not worth trying?

THE INFLUENCE OF THE AGRICULTURAL COLLEGE ON THE FARMER'S USE OF BOOKS*

BY WILLIAM M. HEPBURN, *Librarian Purdue University, Lafayette, Ind.*

A FEW years ago it was somewhat suddenly discovered that there was in this country a rural life problem. Everyone became interested, from presidents to politicians, from the producer through the middleman to the ultimate consumer. After much excitement a program was finally decided upon somewhat after this fashion.

In place of building a wall around the cities to keep the country-bred man *out*, it was considered better engineering to build a wall around the rural community to keep the farmer *in*, and on the job. This wall was to be three stories high. The first or foundation level was to be labeled "Better farming." This was to be followed by a second story called "Better business," and the top story was to be "Better living." Like the dykes or levees along the Mississippi, the whole structure must be completed before it became effective, and it is the top levels that finally keep out the high water at flood time.

The foundation story of this wall was found to be partially constructed. The agricultural colleges and experiment stations had laid many firm foundation stones and provided much additional raw material that only needed the cohesive force of organization among the farmers themselves to cement it together for building purposes. Much of this part of the wall was built, as it were, from the outside, but now the farmer himself is lending his assistance, and by intelligent experiments on his own part and sympathy and assistance lent to colleges and stations he is contributing

largely to this solid, basic structure of "Better farming."

He also, at the same time, has begun to build from within some parts of the second story of "Better business." In this he has the help of the colleges and stations and of many public men in the banking and commercial fields. The next ten years will no doubt see this part of the wall raised to a considerable height and much of the exodus from the farm checked.

But if this were all that were planned it would be insufficient for the purpose. Make farming conditions and business conditions such that an intelligent or a lucky man could engage in it for a term of years and make much money, and you would only have in the rural community a condition approaching that of the early gold fields. When one had "struck it rich" it was back to the town for him, to spend and to enjoy.

Above the foundation of "Better farming," and above the middle courses of "Better business," must come the ramparts of "Better living," if this defense of the rural community against the counter attraction of the city is ever to become effective.

You will note, of course, that this wall is merely an ideal one, compounded of elements that excite interest, stir ambition, give incentive to sustained effort, and offer at the end of toil a reward commensurate with the effort. Will farming as a profession and as a life ever do this? If not it is doomed, and we may yet have to return to a system of slavery to compel the tillage of the soil. But we do not so read ancient or recent history.

* Read before the Rural and Agricultural Section, National Education Association, Salt Lake City, July, 1913.

We all believe, and know, that farming is taking its place as a dignified, a scientific, and a remunerative profession.

When men began to study this rural problem it was soon found that it was indeed a condition and not a theory that confronted them. Too often we presume to treat the farmer as a homogeneous class or group having common characteristics and common ideals and needs. In fact they are no more alike than all lawyers are alike. Some lawyers make a living, others make a fortune. Some become judges, others the hangers-on of police courts. And so there are farmers and farmers. Some who work with their hands alone and others who work with their heads also; some who look toward to-morrow and some who look only at yesterday. There is the farmer with the automobile and the farmer with the ox-cart; the one who is the slave of nature and the one who is her master. Professionally and in their attitude to their work they are as various as the crops they produce. But they are all human beings. There is no special mystery about them that does not belong equally to every class and every individual in society.

What is good and necessary for the moral, intellectual and social life of men and women in cities is just as good and necessary for men and women in the country. One of the educational problems both for the city and for the country is how to make books contribute most to the enrichment of human life. This is narrowed down for the purposes of this paper to the part that the agricultural college can play in this problem.

First of all, books can assist the farmer professionally. You will tell me that the farmer does not want and will not read books on agricultural topics. As a statement of present fact that can stand. But I believe that it cannot and will not always remain true. Will the craftsman of the city read books relating to his trade? We have found that he will, and the public libraries are buying hundreds, yea thousands, of volumes on the mechanic arts and are inducing men to read them. Are they wiser than their brothers on the farm? The *new* agriculture and the *new*

farmer who will carry on the new agriculture will read books and magazines on farming. He must, therefore he will.

Just as the engineer and the scientist find it necessary to read books and periodicals on their specialties, so will the farmer who is both engineer and scientist. There is already a great mass of this literature available. The government and the stations are supplying it in large quantities, and publishers are issuing each year more and more books intended for the farmer. It is one of the problems of the agricultural college through its extension department, its library, or otherwise, to encourage a more extensive and more intelligent use of this printed material. Many tons of these books and bulletins are distributed annually to farm homes, and yet how little of it you see if you visit these farm homes. Its value is not appreciated, it is little read, it is not preserved. The supply of this free agricultural literature much exceeds the real demand, and one of the great tasks before the agricultural college is to devise ways and means to increase this demand, and to encourage the intelligent use of books and bulletins on the part of the farmer. It can do this through correspondence, and in its lectures before institutes and farmers' associations, keep hammering away at the importance of this literature. It can be emphasized at the Farmers' Short Courses, when pamphlets are distributed from farm trains, at county fairs and elsewhere.

As, however, there is such an enormous mass of this literature, the farmer as well as the rural library that serves the farmer naturally looks to the agricultural college for some guidance in their selection and use of it. This can be done, and is being done by means of direct correspondence, answering individual questions and meeting individual needs, or by means of select and annotated lists of the best books and bulletins on a given subject. Much more of this sort of work will have to be done, and it should not be left to commercial interests to do it. Instead of issuing so many bulletins of a complicated nature, colleges and stations might well consider the value of the briefer bulletin and circular which

gives a summary or résumé of the accepted practice in the raising of a particular crop or the performing of any given farming operation. The popular bulletins of the Cornell Station and the circulars of many of the extension departments are along this line.

Much more might be done in the exhibition of books for the farmer at institutes, short courses, fairs, and wherever farmers are gathered together for instruction from the college experts. Let the purchase of these books be recommended and urged. In Indiana the agents of the Extension department are authorized to receive orders for these books, taking payment at the full list price in advance. The books are then sent to the purchaser by mail direct from the publisher. The discounts received by the Extension department pay the expenses of the system. During the past two or three years books to the value of several thousand dollars have been thus distributed.

The college library should be equipped to send to individuals or to the rural libraries selections of material on any given agricultural subject. The "package libraries" of Wisconsin have shown how this can be done economically and efficiently.

As many of the graduates of the agricultural college will return to the farms and become leaders of thought and opinion in their communities, it is important that they should have the right point of view in this matter, and it is the duty of the college to see that it is presented to them during their college course. The various means of obtaining this literature when they leave college, ways of preserving it, and the importance of having the country home supplied with interesting and wholesome books and magazines should be impressed upon them frequently.

When the farmers' reading is reflected by the rural library, it should be both the duty and the privilege of the agricultural college to keep in close touch with the local library, lending it books and bulletins, and in every way showing its interest and its desire to help. The agricultural college might even enter the field of the traveling library if other agencies fail to properly meet the needs of the rural community.

Many colleges have succeeded in getting into close touch with the farmers by means of reading and study courses, either informal ones such as those of Cornell, or those of a more formal character, requiring registration of students, the purchase of certain books, a fixed line of study, and regular reports, ending perhaps in a certificate showing the work done and the standing attained.

Correspondence courses more nearly approaching the kind of work given to regular students in residence are now offered by some colleges. There is probably a large field for work of this kind. It is proper that it should be offered by the colleges rather than by purely commercial interests.

Generally speaking, it may be said that so far as the book needs of the farmer, considered only professionally, are concerned, most of the colleges are alive to their duties and opportunities along this line, and are in various ways suited to the genius of each institution meeting it. As it is the line of least resistance, the stations and colleges can be depended upon to follow the leaders, and to adopt or adapt plans that have already proved successful or to devise new ones.

But what about that broader, even more important phase of the farmer's life, his home life, his social life, his moral, ethical, and intellectual well-being? Considered in these aspects, can books contribute anything to his life and has the agricultural college any responsibility in the matter?

It is hardly necessary to argue the first proposition before an audience of teachers and librarians.

With reference to the second question, I wish to argue on the side of the affirmative. It is coming to be more and more true each day that in every phase of the farmers' life they are looking to the college for guidance and assistance. In the training of children, the care and management of the home, the problem of better roads, the improvement of the schools, the strengthening of the churches, the formation and direction of organizations for social betterment, in these and many other

problems the farmer is looking to the agricultural college for help. Shall the college through its domestic science department give instruction in the feeding and clothing of children and stop short of telling what they ought to read? Shall it tell the farmer how to improve his stock and have nothing to say as to how he may improve his mind? Are books and magazines and libraries to be unconsidered factors in the development and enrichment of rural life? True, there are other agencies that have these things in charge. But the college authorities in a peculiar way have the ear of the farmer, they have his confidence, he looks to them for leadership. Where they call loudly, he responds. Where they are silent, he is likely to be apathetic.

There need not be much hesitation in starting work of this kind by the college. Perhaps experience will show some differences between the book needs of the average rural community and those of the average urban community. But we need not assume at the beginning that human nature in the country is very different from human nature and human needs in the town. They may read less fiction in the country, but it must be of the latest variety. The range of periodical literature read in the country may be more restricted, but that may not be an unmixed evil. One country library in Virginia reports that its patrons want "new, fresh books on the topics of the day, good stories of adventure, detective stories, books for boys and girls. The average man or woman in the country, as the average man or woman in the town, reads for general information on live political and national questions, for wholesome recreation, and as an antidote to the cares and labors of the day."

Apparently, however, the farmer is not yet regarded seriously as a book purchaser. One fails to find any advertisements of books in the farm papers, even those of large circulation and good reputation. So far as one can judge from them, the farm home has no need for any reading other than that furnished by their own pages. The farmers need automobiles, pianos, and victrolas to contribute to the higher life and the higher cost of living, but not books.

Surely this condition is passing, and the time will soon come when the book shelves in the farm home will cease to contain only subscription books specially written for their consumption, and in their places there will be new and attractive books on farm life, fiction, travel, biography, children's books, and the higher grade magazines, and when the rural library, whether township or county, will supply an appreciative public with all that is new, stimulating, and attractive in books.

To this end the agricultural college can largely contribute, directly by emphasizing the value of these things, by giving direction and advice at every opportunity, by assisting in the establishment of rural libraries and study clubs, and also indirectly by lending aid and encouragement to other institutions engaged in a like work, the state libraries and the library commissions, who have already seen the importance of this line of work and are reaching out to the best of their ability to compass it. If they had the help and encouragement of the agricultural colleges in an active way, the completion of a part at least of the third story of the wall would be much hastened.

"THERE is only one solution of all social problems—*increase of intelligence and sympathy.* To this end newspapers, schools, and pulpits are useful. But these are all limited in their speech. Politics, personal considerations, undue or misplaced conservatism—these make limitations. The public library is the broadest of teachers, one may say the only free teacher. It is the most liberal of schools; it is the only real people's college. It can freely tell all known facts about any question. It begins with the youngest, and when a man is old it is still ready and able to instruct him. It answers fairly all you want to know. It leads us to want to know. Among the things which continually make for happiness, order and prosperity in the community count the public library as one."—JOHN COTTON DANA, in 1901 report of the City Library Association, Springfield, Mass.

INSTRUCTION IN THE USE OF BOOKS IN A COLLEGE LIBRARY

BIBLIOGRAPHICAL instruction in college is a subject that has aroused much interesting discussion during the past few years—notably the articles by Mr. Dana,¹ Mr. Bishop,² and Dean K. C. Babcock.³ I fully agree, and so far as I know college and university librarians generally do, with Mr. Dana that training in "book using skill" should receive greater emphasis in our colleges, and with Dean Babcock that "every new student should be required to take some course in which is given practical instruction in the handling of library tools." No doubt it seems to many that, with the need apparent and admitted, the remedy is a mere matter of detail that can easily be arranged. But in reality this is not the case; there are two great difficulties which stand in the way of a required course in bibliography in a large university. In the first place the curriculum of a modern university is already greatly overcrowded with the constantly increasing number of courses in all departments that are offered, and it is almost impossible to add to the courses that are required of freshmen. Each required course on the schedule reduces the amount of other work that can be taken, and complicates the program under the modern system of election from certain groups. The present tendency is to reduce the required subjects, and usually English or Rhetoric is the only subject that is required of all freshmen.

In the second place the very size of the freshman class in most universities makes it impossible for the library staff to offer a required course. There would be little benefit to the students in giving such a course to a large group, and the only successful method would be to take the class in small sections, as other departments do. This would often mean from 15 to 25 sections each week. The average number of classes taught each week by professors is 12 or 15. It can easily be seen that the librarian could not assume the burdens of this instruction in addition to his regular

duties. And most of us have such difficulty in securing a staff large enough for the necessary work that we could not well divide these instructional duties among the staff. These are the difficulties which I have met in planning to make provision for training students in the use of books—and I have had to content myself with a one-hour demonstration of the library to all freshmen and an elective course for those interested.

The Department of English has always been glad to allow me one hour, at the beginning of the year of each freshman required course. After experimenting with a talk to the class on the use of the library and a tour of the library reading room in charge of a member of the library staff the latter plan seemed to be more successful and is the one I finally adopted. It is not possible to accomplish great results in one hour, but the catalog can be explained, Poole and Reader's guide demonstrated and useful hints on the value of atlases, encyclopedias, Who's who, and various reference works can be given. Greater attention on the part of the students can be secured if announcement is made by the English instructor that the substance of the tour will be made the subject of a required theme. Or simple problems arranged by the librarian can be assigned by the regular instructor as "follow up" work to make certain that the general facts emphasized are understood. One of the great advantages of such a tour is that it familiarizes the student with the reading room and its arrangement, and makes him more apt to feel free to approach the library assistants for help. Such tours are conducted in a great many university libraries. This is I admit but a poor substitute for what I should like to offer freshmen, but as conditions exist in institutions with which I have been connected it is the best that I have been able to provide.

For those sufficiently interested an elective course open to all students has been offered. The drawback to this course is that it is not usually elected by those who need it most. Several helpful suggestions and outlines for a course on the use of the

¹ Bretton Woods Conference, 1909: 191.

² *Sevance Review*, July, 1912.

³ *LIBRARY JOURNAL*, 38: 133-136, March, 1913.

library have been published—for instance the manual by Gilbert O. Ward and the pamphlet in the Newark American library economy series—but emphasis has generally been placed on the needs of the normal school or high school. In working out a course for university students, my object was to provide the general instruction most necessary on the use of books and library tools, to emphasize the cultural value of owning books and to supply the most interesting information in regard to the physical side of books. My experience has shown me that there are always many students who are interested in books and who wish to start a private library, but who know very little in regard to the different publishers, editions, series, and styles of book making. In this course I have endeavored to supply the information that would be most interesting and valuable to such students, and that would help start them aright in the gathering together of a private library.

The general outline of the course I have offered is as follows. The work is not, of course, always given in the same way, as treatment of certain subjects is expanded or condensed to suit the requirements of each class. Required readings or problems are assigned for each lesson.

- I. Object of the course.
 - Not to train for librarianship.
 - To give a training in the use of books and library tools that will enable the student to make better use of the university library and of the public library.
 - To give general information in regard to books and suggestions in regard to starting a private library.
 - To bring the student in touch with the modern library movement.
 - Need for training in the use of books.
 - Books are the chief tools of education.
 - This is an age of print.
 - Extent of modern book production.
 - Growth of libraries and size of book collections.
- II. Modern libraries.
 - Growth of modern library movement.
 - Libraries of United States.
 - National. Library of Congress—Service to country.
 - State library system.
 - Library commission: extension work—traveling libraries—study clubs, etc.
 - The modern public library.
 - Value to community.
 - Place in education.
 - Special phases—work with schools—children—community extension.
 - A. L. A.
 - Coöperation—in service to the people—the watchword of modern libraries.
 - Service of libraries to learning.
 - Select and preserve most important of world's literature.

Organize books and collection for use of scholars.
Importance to everyone of a knowledge of library methods.

- III. Classification of books in a library.
 - Object.
 - Advantages.
 - Kinds of classification.
 - Dewey classification.
 - Explanation of main features.
 - Use of classification in note taking and the preservation of clippings, pamphlet material, etc.
 - Problem 1. Assigned to each student a list of call numbers and student to go to shelves and find author and title of the book.
 - Problem 2. Simple problem of assigning classification numbers.
- IV. Catalog.
 - Purpose of a library catalog.
 - Kinds of catalogs.
 - Card catalog.
 - Advantages
 - How to use a card catalog
 - Form of cards
 - Author
 - Title
 - Subject
 - Biography
 - Bibliography
 - Criticism
 - Depository catalog.
 - Library of Congress printed cards and explanation of.
 - What it is.
 - Value to university library.
 - Problem 1. On use of card catalog—questions to illustrate the various cards and also use of depository catalog.
 - Problem 2. Simple problem on making of catalog cards.
- V-VIII. Reference works.
 - Encyclopedias—dictionaries—atlases—general handbooks—works on biography—history—literature, etc.
 - Each lesson accompanied by a problem to illustrate the more important books.
- IX. Periodical indexes.
 - General indexes.
 - Poole.
 - Reader's guide.
 - Magazine subject index.
 - Technical indexes.
 - Law indexes.
 - Medical indexes.
 - Problem.
- X. Periodicals.
 - Brief study of some of the standard periodicals. Modern tendencies.
 - Value of book reviews.
 - A. L. A. Booklist.*
 - Book Review Digest.*
- XI. Government publications.
 - Government as a publisher.
 - Value and character of U. S. publications.
 - How to find out about them.
 - How to secure them.
 - Use of government publications.
 - Problem.
- XII. Bibliography. What it is. Purpose and value to students.
 - Various kinds—National, subject, complete, selected, annotated, practical.
- XIII. National and trade bibliography.
 - Subject bibliography—special study of the bibliography of a special subject, for example American history.
- XIV. Suggestions on research work in a library.
 - How to run down all available material on a subject. How to make a bibliography.
 - Problem 1. Make a bibliography or reading list of all material in the library on a certain subject.

FORT WASHINGTON BRANCH, NEW YORK CITY'S NEWEST BRANCH
LIBRARY, OPENED APRIL 14

Problem 2. Make an annotated bibliography of 15 titles selected from the complete bibliography prepared.

- XV. The private library.
For enjoyment, companionship and reading.
Quality, not size, important.
Should express personality and individuality of owner.
Relation of reading to choice of library.
Book plates.
- XVI. Makeup of a modern book.
How to use a book—parts.
Title page.
Preface.
Introduction.
Contents.
Footnotes.
Bibliography.
Index, etc.
Physical side. The making of a book.
Paper.
Printing.
Binding.
How to tell a good book from a bad one.
Illustrate a cheap, poorly put together book and a well-made, serviceable one.
- XVII. Book illustration. Brief description of the various processes of book illustration from wood engraving to the modern half-tone and color plates. An entire lecture accompanied by an exhibition of books illustrating the processes devoted to this subject.
- XVIII. Choice of books for a private library.
Publishers—English and American.
Series.
Editions.
Subscription sets—books as premiums, etc.
Purchasing books.
Summary and review.

MALCOLM G. WYER,

Librarian, University of Nebraska Library.

SOCIAL ACTIVITIES OF THE LIBRARY *

As our library, which is maintained by the Library Association and not by the town, had the undeserved reputation of a library of fiction only, we have tried these methods of bringing its practical usefulness to the minds of the citizens.

For three consecutive years the Red Cross seals have been sold in the library. This year the Civic Club did that work in the city.

We advertise meetings of educational value, not only those that are held in Rahway, but in any city or town where we think the subscribers would be likely to attend. We try to interest them in the meetings, but do not sell tickets.

We circulate copies of the laws of the various city departments, and after a lecture given before one of the women's clubs

by Mrs. Julian Heath, we advertised in the local paper that we had on the circulation desk copies of the state book on weights and measures which were free to those who cared to have them; if we had time when they came for them we gave a short talk on the subject.

Our flower shows, which began a few years ago with a rose show, started in the following way: A directress of the library had the habit of sending some of her beautiful flowers to the library. They created a great deal of admiration, and people wanted to know their names and where they could be bought, so she was asked to send as many kinds of roses as possible, each labeled. It was advertised in the papers that roses would be shown on this special day, and any one having named roses (grown out of doors) was requested to send them. These roses were arranged in glass jars, each variety being kept separate, and all roses sent by one person placed near each other and marked with the name of the exhibitor.

Now a rose bulletin is made by a friend of the library announcing that "The annual rose show will be held in the Public Library to-day. Admission free." The bulletin is displayed in the post office. A florist of the city judges the roses. There are no prizes nor entrance fees for exhibitors. Each year announcement of the show is made through the papers. All roses are accepted even if no names are known. Florists' catalogs are on the tables and pencils and pads are ready for use.

As a result lists are made of roses to be bought by those interested in growing roses. People become more friendly and strangers come to the library, which gains in popularity. The librarians know more people, and each show is more successful than the last. Each show is written up in the local and a county paper. We have aster, dahlia, and chrysanthemum shows. The dahlia shows always attract the men. We take special care that each contributor is mentioned in the paper. This year for the first time we circulated fruit, flower, and seed catalogs.

Our health officer asked to have the milk

* Paper read at the bi-state conference in Atlantic City, March 6, 1914.

report posted in the library, hoping in that way to arouse the women on the subject. It has been there since 1909, and not only are the women interested, the milkmen come in to see their report, and two have threatened harm if the report is kept there. One milkman had to quit business on account of that publicity. As the local papers will not print a report or account of the milk tests (without an outrageous charge for it), the only way the people have of finding out the result is by coming or telephoning to the library. In that way new people are brought to the library, and when there we try to interest them in using it.

We so frequently hear of subscribers buying tickets to plays they know nothing about and finding the play impossible, that we were delighted to find the Drama League of America through Mr. Eaton's article on "How to get the best plays in your town" in the October, 1912, *Delineator*. This solved the problem. A member of the staff joined the league, notices were sent to the various clubs and theater-going people, to the high school, and to a teacher who was giving lectures, that the bulletins and selected list of plays for amateurs were in the library for their use. This has been very successful both from their point of view and ours. We hope to organize a drama study club next winter.

As we have a special rate of subscription and special privileges for school teachers, in September a post card is sent to each one, giving information and a cordial invitation to use the library; this is most useful to the strangers who come to the city each year.

Hearing that the students of the high school were starting a school paper, we requested the editor and business manager to call at the library, where a copy of the *School Arts Magazine* was shown them, containing an article on the printing and make-up of a school paper. Arrangements were made to advertise in our school paper. In return they gave us unlimited space for library notes, so we used articles from the *Newarker* freely, making special lists of books on the special instruction given in the schools, cooking, manual training, art,

etc., giving the magazine as well as the books on the subjects. For four dollars spent in advertising we hope to clear ten dollars through the circulation of books.

The coöperation of the ministers was requested in buying books for the 200 class, each sending a list. A few were chosen from each. Of course some titles were duplicated, but we found it an excellent plan to awaken interest in that department. The ministers also called the attention of their parishioners to the advantages gained by using the library.

Some women in the city became interested in starting a Civic Club. The library advertised itself very well at the start by borrowing charters and laws of other clubs for their use, and secured special books, articles and magazines for special committees. There is often an opportunity to say, "Magazines and books to help this committee are in the public library, why not go there for help?" The greatest assistance was given to the club by the library through the courtesy of Miss Askew and Senator Hennessy, who sent us, at our request, copies of the bill which is now a law for the "wider use of the school plant." That law was read at meetings of the Civic Club to get the free use of the high school auditorium, which had been denied to them. After hearing that law a second request was made, which was granted without discussion. As we have two copies of that law we circulate one and keep the other for reference. The Civic Club seems to have this by-word, "Oh! just go to the library."

Informal talks have been given before a few of the clubs, not especially on the library or its own work, but rather on the city problems, helping them with the Board of Health, shade tree commission, special subjects taught in the schools, and the moving picture shows. The latter became involved through hearing the subscribers talk over the shows at the library. Vaudeville was introduced in the shows and they went from bad to worse, changing for the worse twice a week. Young children, hearing it recommended, were going each time. An appeal to the owner was of no avail, so

three women who had heard about it in the library brought it to the attention of the ministers' association. This was effective, for some of the acts were sent back to the owner as "too tough," and the vaudeville was discontinued through lack of patronage. Though we hear the vaudeville is starting again, the least trouble will bring a protest for high license and censorship. That was accomplished through the influence of the library.

Our library is taking its place among the social forces for good in the city, and we trust the sentence, which was beautifully written on our cellar floor by the colored janitor who does not like us to touch his furnace, will apply to us:

"Blessed is the hand that do no evil."

A. W. LUPTON, *Librarian,*
Public Library, Rahway, N. J.

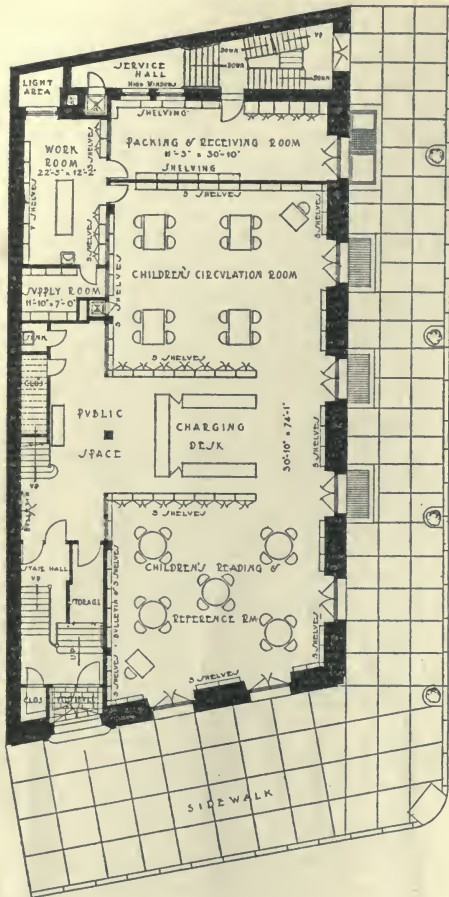

TWO OF NEW YORK'S NEW BRANCHES

SINCE last September the New York Public Library has opened five new branch buildings. Two of them replace buildings which had been outgrown, and three are new branches created to meet the demands of the rapidly growing population in the northern part of the city. Of these five buildings, two have been selected as being typical of the modern city branch library, and this number of the JOURNAL contains floor plans and views of their exteriors. The Washington Heights branch, located at 1000 St. Nicholas avenue, was chosen as showing the style of building preferred for a corner lot, and the one at Fort Washington (535 West 179th street), for its fitness for a deep and narrow city lot in the middle of a block. In the Fort Washington branch the adult circulation and reference room is on the first floor, and the children's room on the second. Club rooms and janitor's apartment occupy the top floor, and an assembly room seating 250 people is in the basement. At Washington Heights the ground floor is given over to the children, the adult circulation room has the first floor, and the reading and reference room the second

floor, while the top floor contains two large study rooms for clubs and the janitor's apartment. The study rooms can be thrown together for lecture purposes, and will seat about 250. When the Girls' Club gave its play there about a month ago one room was used for a stage and the other for an auditorium. The Washington Heights Taxpayers' Association of about 75 men holds its meetings in one of the study rooms, and two boys' clubs hold regular fortnightly meetings. Next winter it is hoped to arrange for a public forum on questions of

FIRST FLOOR PLAN,
FORT WASHINGTON BRANCH

GROUND FLOOR PLAN, WASHINGTON HEIGHTS BRANCH

the day. The Washington Heights branch was built at a cost of \$125,000, including equipment, from plans by Carrère and Hastings, while the Fort Washington branch was designed by Messrs. Walter Cook and Winthrop A. Welch, and cost about \$115,000.

Dr. Johnson says: "Dictionaries are like watches; the worst is better than none, and the best cannot be expected to go quite true."

TRUST DEED BY ANDREW CARNEGIE, ESQUIRE, CREATING THE CARNEGIE UNITED KINGDOM TRUST

DATED 3RD OCTOBER, 1913, AND REGISTERED IN THE BOOKS OF COUNCIL AND SESSION, 4TH DECEMBER, 1913

I, Andrew Carnegie, of New York City, and of Skibo, in the County of Sutherland, considering that I have for some years past distributed in Great Britain and Ireland, the revenue of nearly ten million dollars (first) for the erection of public libraries maintained from the local rates, and (second) for aiding the acquisition of organs by churches of all denominations; my reasons for selecting public libraries being my belief, as Carlyle has recorded, that "the true university of these days is a collection of books," and that thus such libraries are entitled to a first place as instruments for the elevation of the masses of the people; and in regard to organs, because of my own experience that the organ is one of the most elevating of voices, often causing me to murmur the words of Confucius as I listen to its peals, "Music, sacred tongue of God, I hear thee calling and I come"; and also because of the consolation I experience under the influence of a maxim of the same Seer—"All worship being intended for the true God, howsoever addressed, reaches and is accepted by him":

And now finding it essential to provide for the future permanent administration of this fund by residents within the United Kingdom of Great Britain and Ireland, who are familiar with prevailing conditions and are hence better qualified to judge as to the utility of the purposes above stated, as well as other purposes which may appear to them of as much or more importance, it being my impression that the demand for public libraries will grow less as cities supply themselves with these indispensable agencies for the benefit of the masses; and that the calls for organs will decrease, considering the large number already supplied, particularly if it be understood, as I desire that it may, that only such congregations shall receive grants as

are in needy circumstances and unable to provide organs for themselves:

And considering that I having been much gratified with the highly satisfactory manner in which the Carnegie Dunfermline trustees have administered the trust committed to them by a trust deed, dated eighteenth August, Nineteen hundred and three, as well as by their administration of the Carnegie Hero Fund Trust, committed to them by a trust deed, dated seventeenth October, Nineteen hundred and eight, and being desirous that this additional trust should be associated with Dunfermline, endeared to me as my native town, and hallowed with many precious associations, I expressed to these trustees my wish that they should undertake the administration of its affairs, but with power (in accordance with their own expressed desire) in consideration of the wide area of administration, to select other individuals to act as additional trustees, along with themselves, as hereinafter provided; with which wish they readily agreed to comply,

Therefore, I hereby undertake, and bind and oblige myself, my heirs, executors, and successors, forthwith validly to transfer and deliver in trust bonds of the United States Steel Corporation, of the aggregate face value of ten million dollars, bearing interest at five per cent. per annum, to and in favor of

1. David Deas Blair, solicitor, Dunfermline.
2. James Brown, dyer, Dunfermline.
3. The Right Honorable Edward James Lord Bruce.
4. John Hynd, retired miner, Dunfermline.
5. James Currie Macbeth, solicitor, Dunfermline.
6. George Mathewson, manufacturer, Dunfermline.
7. Sir William Robertson, knight, Dunfermline.
8. John Ross, doctor of laws, Dunfermline.
9. Andrew Scobie, architect, Dunfermline.
10. Andrew Reid Shearer, manufacturer, Dunfermline.

11. The Reverend Robert Stevenson, M.A., Dunfermline.
12. Alan Leonard Smith Tuke, bachelor of medicine and master of surgery, Dunfermline.

and also to and in favor of six members of the Corporation of Dunfermline, and three members of the School Board of Dunfermline, or other educational authority of the Burgh for the time being, those members of these bodies at present acting as trustees of "The Carnegie Dunfermline Trust," being hereby nominated as the first to act in the trust hereby constituted, and who will continue to act during the currency of their present appointments, and thereafter those to act being chosen by the respective bodies for such periods as they may respectively determine in all time coming; the provost of the corporation and the chairman of the school board or other educational authority for the time, being always of the said six and three members respectively, providing always that in the event of any failure by the above bodies to elect members, the other trustees shall have full power to act alone:

And likewise to and in favor of such persons as the trustees, who are hereinbefore personally named, may from time to time assume, or as may be assumed by the successors of those so named or so assumed, in the manner provided by the law of Scotland for the assumption of trustees, to act along with themselves, and with the other trustees before referred to, it being hereby provided that if the persons so assumed shall be holders of public official positions, each of them while holding such a position shall be entitled to act either by himself, or to nominate and appoint an assessor to act on his behalf, with the same powers and immunities as if such assessor were herein named as a trustee, such assessor holding office during the pleasure of the trustee by whom he may have been appointed;

And the whole body of trustees herein named or referred to, or to be assumed, and the aforesaid assessors shall be designated "The Carnegie United Kingdom Trustees," and are hereinafter named "The Trustees," of whom seven members present

at any meeting duly called shall form a quorum;

And I hereby provide that the income from the said bonds, and from such other investments as may from time to time be held by the trustees, shall be applied by them, for the improvement of the well-being of the masses of the people of Great Britain and Ireland, by such means as are embraced within the meaning of the word "charitable," according to Scotch or English law, and which the trustees may from time to time select as best fitted from age to age for securing these purposes, remembering that new needs are constantly arising as the masses advance.

And I hereby explain that as I have already provided for my native town a fund, administered under the trust deed first above referred to, yielding thirty-seven thousand five hundred pounds per annum, it is unnecessary that any part of the income of the trust hereby created be used for that town, and the Carnegie Dunfermline trustees will thus be relieved from what might be considered an equivocal position, and will take rank with the other trustees to be assumed as equally disinterested and equally desirous to benefit the masses of the United Kingdom:

And I hereby specially provide that my trustees shall apply no part of the income towards research designed to promote the development of implements or munitions of war, and I expressly prohibit any part of the trust funds from being used in any way which could lend countenance to war or to warlike preparations:

And I recommend them to consider the propriety of providing, or of aiding in the providing of public baths, the success of such baths in Dunfermline having been very remarkable and having been the means of stimulating other cities to follow that city in its character as a pioneer city:

And I provide that such changes in the objects to which the income may be applied, may be effected by a majority of two-thirds of the trustees present and voting at a meeting duly called and in respect to which notice has been given of the business proposed to be transacted:

And I hereby direct the trustees from time to time to appoint an executive committee to whom may be deputed the administration of the trust, one half of the members to be chosen from among the persons assumed to act as trustees who are not members of the Carnegie Dunfermline Trust, or the assessors appointed by them, and the other half to be chosen from among the trustees who are members of the Carnegie Dunfermline Trust:

And I further empower the trustees to appoint such officers as they may think required for the conduct of the business of the trust, at such salaries, and under such conditions as they think proper; and to provide suitable offices, by leasing, purchasing, or, after a few years, building the same, care being taken in erecting a building that it shall be fire-proof, and plain, solid and stately:

And I hereby confer on the trustees all the powers and immunities conferred upon trustees under the various trusts (Scotland) acts, and without prejudice to this generality, the following powers and immunities, namely—power to uplift and realize the said bonds, and the principal sums therein contained, and the interest thereof, to grant discharges or receipts therefor, to sell the said bonds either by public roup or private bargain, at such prices and on such terms as they may deem reasonable, to assign or transfer the same, to sue for payment of the principal sums or interest, either in or out of the United Kingdom, to invest the sums which from time to time may be received from the said bonds, on such securities, as they in their discretion may select, and to alter or vary the investments from time to time as they may think proper; all which investments may be taken in the names of the chairman and secretary of the trust and their successors in office for the time being,

With power also to form a reserve fund from the income of the trust investments, which may at any time be used for any of the trust purposes.

And I hereby expressly provide and declare that the trustees shall not to any extent, or in any way be responsible for the safety of the said bonds or securities,

or for any depreciation in the value of the said bonds or securities, or for the honesty or solvency of those to whom the same may be entrusted, relying as I do on the belief that the trustees herein appointed or to be assumed shall act honorably;

And I empower the trustees to receive and administer any other funds or property which may be donated or bequeathed to them for similar purposes to the purposes of this trust;

And I also empower them to frame standing orders for regulating the carrying on of the business of the trust and procedure at meetings, including the appointment of a chairman, who shall have a casting as well as a deliberative vote; and to make such arrangements and lay down from time to time such rules as to the signature of deeds, transfers, agreements, cheques, receipts and other writings, as they may consider desirable in order to secure the due and safe transaction of the business of the trust;

And I provide and declare that the traveling and personal expenses which the trustees or their assessors may incur in attending meetings or otherwise in carrying out the business of the trust shall be paid from the trust income;

And I appoint that the accounts of the trustees shall annually be audited by an auditor to be appointed on their application by the Sheriff of the County of Fife, and that an abstract of the accounts, as audited, shall be inserted in one or more newspapers published in each of the cities of London, Dublin and Edinburgh, and also that a report of their proceedings be printed and widely distributed; and I consent to the registration hereof in the Books of Council and Session for preservation; *in witness whereof* I have subscribed these presents . . . at Skibo Castle, on the third day of October Nineteen hundred and thirteen, before these witnesses, Louise Whitfield Carnegie, my wife, Margaret Carnegie, my daughter, and Estelle Whitfield, my sister-in-law.

THE LIBRARY WORK THAT THE NORMAL SCHOOL OUGHT TO DO *

MORE than any other type of school, the training school for teachers should inculcate the library spirit. If we can train our teachers to have more than a mechanical or passive use for books, we may then expect boys and girls in school years and men and women in after years to value books rightly. The library spirit is more than technical details, more than expertness in the use of books. It is enthusiasm for books, interest in thinking, knowledge of life, and willingness to serve. The normal school library should be an active educational force.

Teachers should use books naturally and with confidence. The library in the teachers' training school should be so equipped and conducted as to make this use and confidence not only possible but habitual. The worth of a book is in its use. The purpose of a library is not that a man shall sit with his nose in a book, but that by means of a book he shall become better informed, enlarged in spirit, strengthened in life.

The field of the normal school library is the whole world of ideas. Its materials are not books alone, but pictures, maps, charts, lantern slides, all visualizing aids. A teachers' library should as readily and willingly tell where to buy bubble fountains or the best drawing supplies as to furnish material about Pestalozzi. It should render such informational service as readily without the school as within.

All the details of advisable organization and equipment for an effective normal school library cannot here be given. I mention what I would be inclined to consider the essentials:

First, a librarian alive to the educational possibilities of his work, tactful in handling people, able to cope in general scholarship with any and all members of the faculty, informed and sensible as to modern library methods, a leader. Such a librarian is worthy of recognition as a head of a department, with corresponding salary, and he

* Read before the Department of Normal Schools, National Education Association, Salt Lake, July, 1913.

should not serve under any other conditions.

Second, enough skilled help. Library assistants in a well-conducted library perform more brain work in a day than a teacher does. The skill with which students are brought into contact with books and ideas is all-important. The worth of a library is in the way it is used.

Third, give the library and the librarian a chance to exercise initiative. Make a definite apportionment of funds to the library, and allow the librarian large latitude in formulating the policy of expenditure. The actual amount given the library is not so important as that the library shall be allowed to work out its place. However, not even a librarian can make bricks of straw.

Fourth, let the student body and the teaching staff expect from the library accurate, prompt, and sympathetic help on any kind of topic, at any time.

It will be seen that the writer would emphasize personality in the library, as in all teaching. First a forceful librarian, then sufficient trained help possessed of the teacher attitude, then some freedom of policy—and then expect results.

As rapidly as need arises and funds permit, I would favor the organization of the following departments of library service:

1. *Reference.* This department will cooperate with professors and students in all phases of bibliographic work, from simplest topics to advanced research. It will be up-to-date in equipment, an essential being vertical files for clippings, bibliographies, pictures, and ephemeral material, which is most useful while it is fresh. The sort of library here in mind will keep it fresh. The reference librarian will cooperate closely with departments of instruction in preparing and making accessible material for student use. This will be done partially by frequent visits to classrooms by the reference librarian. The library will thus take up instruction, so far as it is related to library resources, right at the point where the teacher leaves it. The reference librarian performing such service will be accorded faculty rank.

2. *Children's department.* This division of the library's teaching work will have a room of its own, easily accessible to the children of the training school, and pleasantly furnished. A trained teacher-librarian will be in charge. The department will be conducted particularly as the library laboratory for critic teachers, practice teachers, and students who feel the need of knowing children's books and school library methods—and all teachers need that. Classes from the training school will come frequently to the children's department for illustrative material or for class study of many books. The children's department will have a system of classroom libraries, changed at need, in the training school rooms. This department will have a liberal equipment of illustrative material—pictures, duplicate copies of poems, post cards, lantern slides, drawing models, Edison school kinoscope and film, post card projector. It will be a model library for a school, both a teachers' laboratory and a standing object lesson.

3. *High school department.* In any normal school having a model high school or a high school department of importance, the library should provide special high school service. The adolescent requires adaptation of library method. The high school department, for example, will take up vocational guidance work in close cooperation with the department of instruction in English. The development of high school libraries everywhere will be immeasurably stimulated by a practical working high school library in every normal school. The possibilities are boundless, almost.

4. *Extension.* Extra-mural loans are a legitimate part of the normal school library's educational service. Loan collections on special subjects, adapted to the state texts, can be used effectively as a stimulus to schools to form their own libraries. Clippings, pamphlets, debate and essay material, suggestions for special celebrations and amateur dramatics, will be useful and greatly appreciated. Even duplicate collections of post cards, pictures, lantern slides, and kinoscope films might

be loaned. As well serve teachers in the work as in the making.

5. *Teaching of library use, school library organization, and children's literature.* This is a fundamental of fundamentals in teacher-training. Every student should be taught to use his school library, should learn how to instruct boys and girls in the ready and confident use of books and libraries, should learn the essentials of school library organization and use (not necessarily technical and complex, but enough system to preserve the school library and to obtain interest in its use), and should learn to know the books which boys and girls ought to love. This instruction is of sufficient importance and amount to justify the employment of a special teacher or professor of library science. If the librarian is to give this instruction, please count the time and strength required, and remember that executive duties and teaching work sometimes interfere with each other.

When all teachers know how to use books, and all schools have libraries, all educational work will have become more effective in producing strength and individuality and unselfishness of character.

WILLIS H. KERR.

A SHORT AND EASY METHOD WITH PAMPHLETS

HAVE a card-catalog case for pamphlets as they come in. Let the cards herein be the accession list of all pamphlets, each one of which will be dated for time of accession in addition to date of imprint. Arrange them alphabetically under authors in the catalog, but chronologically in the pamphlet-boxes. Put on each box the date of imprint; in case of many pamphlets for one year, number the boxes by integers for that year. Then, as judgment, demands of readers, or time and money permit, take important ones out of these provisional boxes and either catalog them as books or keep them in boxes classified by subject.

In the ordinary library, this arrangement is only for individual pamphlets; serials must be treated separately, though if time forbade it would be advantageous to have serials under their dates. In such an

arrangement all the magazines of one month or year would come together, and could be separated and bound up at convenience. Indeed, in an historical library it would be to the student's advantage to have all the serials for one year permanently together. Such an arrangement would be of immense value to the historian.

The economy of the chronological method lies in the fact that the classification mark is already provided, *viz.*, the date.

For undated matter, any expert can approximately date most things, and arrangement by decades might do for such. Failing an expert, the librarian of a small library could easily arrange undated matter alphabetically.

In dealing with pamphlets, economy of the librarian's time is a leading consideration. The demand for the average pamphlet is not urgent enough to justify the enormous expenditure of time required by the same careful cataloging and classification bestowed on books. Then again there is the time consumed in collation. To put aside a pamphlet as a duplicate upon mere memory or even by collation of title with the card catalog is dangerous: the library's extant copy may be soiled, torn or minus a frontispiece, etc., and nothing short of collation with the pamphlet itself will do. This takes time. Indeed it is easier to re-catalog a pamphlet and file it away than to collate it. Collation is especially tedious when pamphlets are elaborately classified. Take a bundle of a dozen pamphlets to collate, and one must carefully note the classification marks for each (often necessitating more time consumed by consulting the catalog), and then take each one to the place in the library occupied by its duplicate, or, conversely, bring each one to the room where the bundle is.

It is therefore an economy to catalog duplicates rather than spend time in collation. The catalog can be periodically gone through for duplicates. When these are in different classes, leave them where they are, for the library is thereby enriched.

For example, a Valley Forge article may be appropriately duplicated under Chester Co., Pa., and Revolutionary incidents. But

when duplicates are in the same class they are easily collated and one of them thrown out. Consequently a single class for all pamphlets is a great desideratum. There are two available:

1. The alphabetical;
2. The chronological.

No. 1 is probably the more convenient for general libraries, but No. 2 for historical ones. In the library of the Historical Society of Pennsylvania we have a class of political pamphlets arranged by years, from the Revolution to the Civil War, and it would be well to extend this principle much further. Thus the pamphlets attached to states and cities should certainly be chronologically arranged.

It takes a specialist to classify pamphlets accurately by subject, whereas any child can arrange them chronologically. Consequently much valuable matter lies in our libraries unused and is often destroyed as a burden, when it could so easily be made available to students.

ALBERT J. EDMUNDS.

A MODIFICATION OF THE DEWEY CLASSIFICATION

THE changes made in the Dewey classification as used by the Somerville Library were explained by Mrs. Coe, of the Somerville Public Library staff, at the meeting of the Massachusetts Library Club, Jan. 22. The circumstances under which Mrs. Coe works are these: she need consider only the Book room collection, limited to 45,000 volumes; her aim must be to keep this an up-to-date working collection, to retire superseded books as fast as better ones or more recent editions are added, to lean on the great libraries of Boston and Cambridge for the historic background, special collections or needs of the special student; her classification, therefore, can be broad, supplemented by specified subject headings in the card catalog. This is the scheme in part:

016 omit, and place subject bibliographies at the end of the subject, using 2 in the Cutter number, *e.g.*, 821ZS means bibliography or criticism of poetry.

Do not classify magazines, but arrange in one alphabet by title.

190 omit subdivisions and alphabet by philosophers.

378.4-98 arrange college catalogs, etc., alphabetically.

400 lean towards 800 whenever possible.

621.3 let this attract all applications of electricity, leaving theory to 537.

800-809 as follows:

808 composition, rhetoric and criticism of the art of writing.

808.1 the writing of poetry.

808.2 the writing of drama.

808.3 see 823.

808.4 see 808.

808.5 debates and debating, omit 374.24.

808.6 the art of letter writing, with examples, *e.g.*, Lucas' "Gentlest art."

808.8 in reference books, quotations; in circulating books, collections of English and American poetry and prose, abandoning for this 810.8, 820.8 and 821.8, also translations in 870.8, 880.8, etc. Books of quotations in or from any language become reference 808.8.

809 History of literature in general.

809.1 History of poetry.

809.2 History of drama, etc.

809.3 omit, see 823.

810.2 Compendis.

810.3 Dictionaries.

810.9 History of American literature.

820.9 History of English literature.

821 English and American poetry in one alphabet.

821Z History and criticism of English and American poetry.

821Z Bibliographies of English and American poetry.

821.1 Early ballads, anonymous. Place modern ballads with 821 and collections of modern ballads in 808.8.

822 Drama—English and American.

822.3 Shakespeare—A, special classification.

823 History and criticism of fiction.

823Z Dictionary of fiction, authors, fiction bibliography, etc., with Z.

824 English and American prose. Let this attract all essays not better classified by subject, all books from 826 not better placed in biography, all books from 828.

825 English and American oratory.

826 Abandon for 824 or Individual biography.

827 English and American humor.

828 Abandon for 824.

829 Anglo-Saxon literature.

831 German poetry.

831Z German poetry, history and criticism.

833 German fiction.

833Z German fiction, history and criticism, etc.

870 Latin literature, omit subdivisions, and alphabet by author or written about, *i.e.*, all by Virgil and about him under 870V, etc.

880 Greek literature, ditto.

HISTORY

900-909 use—

910 and decimal points—use.

911 Historical geography and atlases.

912 General maps-atlases.

912.3 All other atlases Cutter by subject, *i.e.*, M41c Atlas of Mass. by Crain.

913-919 omit. See history numbers.

920 omit. Use instead—

9 Individual biography Cutter by person written about.

92 Reference collective biography—Biography dictionaries. But abandon 920 for all circulating Collective biography and classify each collection under its subject, as biography of inventors, 608 Invention, etc.

929 Ref. Heraldry.

929.6 Ref. Flags.

930-999 History and travel classified together in all countries where the amount of history does not justify a chronologic subdivision. In such countries as, *i.e.*, England, it is treated as follows:

942 General histories of England.

942.01 Anglo-Saxon.

942.02 Norman, etc., to

942.08 Here include history of the period and travel written during this period. This will practically give all travel in the last period of English history.

Use geographic subdivisions for all local history and travel by countries or cities, *i.e.*, 942.1 London. Let this attract all books on London.

Mrs. Coe's description of the changes she had made was followed by a good deal of general discussion. A great many questions were asked and many suggestions offered concerning the practical working out of details.

Miss Abbott, of Brookline, told in what respects the usage of that library differed from or agreed with that outlined by Mrs. Coe.

Miss Brown, organizer for the Massachusetts Library Commission, endorsed the scheme as simplifying classification. Books should fall naturally into a group, rather than be forced into a logical division of a subject.

Mr. Davis, librarian of the Waltham Library, would advocate trying the simpler system, if means were available.

A LITTLE-KNOWN FREE LIBRARY IN ST. PETERSBURG

THERE are very few free libraries in Russia, and their daily life is still almost unknown. In the third number of the 1913 issue of *Bibliotekar*, the Russian library periodical, A. Pyeshkehonova has an article entitled "From the life of a free library."

This particular library, the library of the Ligoiski People's House, in St. Petersburg, has been in existence fifteen years and is actually free to all. It gives out books for home reading to everybody without requiring either deposit or references.

The library was opened in 1898 in the time of the restricted catalogs of the Ministry of Public Instruction. Up to that time any one wishing to buy books for a library was obliged to present to the supervisor two copies of the list of books recommended for the library with dates and numbers of the approval of the scientific committee of the Ministry of Public Instruction. It was a matter of common occurrence that a book, sometimes a book for children, approved by the scientific committee, would be rejected by the supervisor of the public libraries, and then it was impossible to get the book for circulation. It can be easily understood how dif-

ficult it was to organize and conduct a library when no catalogs or indexes were in existence.

The necessity of having a free library became more pronounced when free evening and Sunday lectures were established. At first the general call was for "trashy" books, which the readers were used to and which they could not get in the library, to their great disappointment. Gradually the readers began to call for books on history, natural science, philosophy and applied science. Russian classics also became popular, with Tolstoi in first place; then Turgenev and Pushkin. In 1905 [the time of the Russian Revolution] the general call was for books on the French Revolution; in 1910 [when Tolstoi died] books by Tolstoi were widely read.

The following figures are a good illustration of the activity of this library. The library was opened with 445 volumes; up to June 1, 1913, it had 7000 volumes. In the first year it had 130 readers; in 1912-1913 it had 3000. The number of books in circulation for the first year was 3648; during 1912-1913 it grew to 40,000. Such increase of readers can be explained by the entirely free access to the library.

In order that the book may find its way to the reader more easily, the library compiles catalogs and exhibits covers of books, which can tell more to the readers than the catalog. On some special occasions portraits of writers, or of men of prominence, are exhibited with a proper list of books.

The special problem the library faces is the selection of good books. Although it has the advice of specialists on some subjects, yet their views are often one-sided; on the other hand, to follow the wishes of the readers in buying books is often dangerous. The best solution the library finds is in the issue of a "normal catalog," which will be a great benefit to the public libraries. This idea was approved by the library convention in 1911.

In 1905 a children's library, almost the first in Russia, was opened on the same basis as the library for adults. The result was very satisfactory. In the year 1912, 1400 children used the library. When the

number wishing to draw books becomes too great about the charging desk, they are seated at long tables near by and a book is given to each to help them pass the time of waiting. Sometimes groups are led to an adjoining room, where an attendant reads to them, but story hours as conducted in America are still unknown.

CONNECTICUT STATE LIBRARY AND SUPREME COURT BUILD- ING, HARTFORD

THIS building, the cornerstone of which was laid May 25, 1909, with proper ceremonies, in which the state officers, members of the General Assembly, heads of state departments, and the various Masonic bodies of the state participated, was turned over to the state by the Building Commission on Feb. 10, 1914. A brief description of the exercises, accompanied by exterior and interior views, was printed in the LIBRARY JOURNAL for March.

The building is of granite, an adaptation of the Italian renaissance style of architecture, fire-proof throughout, and is a companion building to the beautiful Capitol just across the lawn. It is T-shaped, with a frontage of 294 ft. 8 in. on Capitol avenue and a north to south depth of 137 ft. 6 in. The east and west wings of the T are each 106 ft. 8 in. long and 84 ft. 3 in. wide. The stem of the T or south wing is 60 ft. wide and 76 ft. 6 in. long. The main entrance has been placed 90 ft. back from the curb; entrances are also on ground floor at east and west ends.

The building is divided into three main floors, with a basement under the central portion which accommodates the entire heating and ventilating machinery, and from which starts the proposed subway to the Capitol. The boilers for heating are located in a separate building. The ground floor is on the level of the street curb. The main floor, upon which is located the main reading room of the State Library, Memorial Hall, and Supreme Court room, is fourteen feet above the ground floor, and is reached from Capitol avenue by granite steps. This is a large room with barrel vaulted ceiling, which is carried by mas-

sive columns and pilasters executed in marble of buff color. Located at the east end of this central hall, and opening from it is the main reading room of the State Library; on the west end is the Supreme Court room and its several departments, while adjoining on the south opposite the main entrance is the Memorial Hall. Provision has been made in this hall for portraits of the governors, Stuart's portrait of Washington, and display of the Old Charter; it occupies the stem of the T and is 51 ft. wide, 85 ft. long and 35 ft. high, amply lighted by means of an artistic skylight.

The Supreme Court room, 43 ft. wide, 46 ft. long and 35 ft. high, is conveniently located with reference to the offices of the several officers of the court and the studies of the several associate justices, all of which are provided with the most modern equipment.

The library reading room, located in the east wing, is 43 ft. wide, 90 ft. long and 35 ft. high, and lighted by six large windows facing north. Along the south side of this room is placed a two-story steel stack with open shelves for the law library and general works of reference. The balance of the floor will be occupied by the special study and reference tables and catalog cases. Located near this main reading room is the librarian's office, the main stack room, the study and dictation rooms, vaults for archives, records, valuable papers and collections, the newspaper room and rooms for cataloging, repairing, packing and storing.

The building is equipped with three automatic passenger and service elevators, a modern heating and ventilating plant, and should meet the needs of the state as the home of its Supreme Court and State Library for generations. The large number of gifts of special collections already received from individuals and societies are evidences that the facilities offered are appreciated.

The cost of the site was \$136,515.69, and the building, when completed and furnished, cost \$1,287,631.81, making the total cost \$1,424,147.50.

The members of the commission in charge of the construction of the building were: Morgan G. Bulkeley, Hartford; H. Wales Lines, Meriden; W. O. Burr, Hartford; Charles C. Cook, West Hartford; L. W. Robinson, New Haven; *ex-officio*, Thomas D. Bradstreet, Thomaston, and in 1913-14, Daniel P. Dunn. G. S. G.

OPENING OF NEW BUILDING AT NEW ROCHELLE

THE new library building at New Rochelle, N. Y., was opened to the public for inspection Saturday, May 9, both afternoon and evening, and on May 10 from 2 to 6 p.m. Circulation of books from the new building began May 11. The old building was closed two weeks before, when moving of the books began, and patrons, especially the children, were encouraged to take an added number of volumes to tide them over the interval.

There were no formal exercises in connection with the opening, but several exhibitions were on display. The Garden Club had its spring exhibition of flowers, both cultivated and wild, in the adult circulation and reference rooms. On the balustrades around the staircase several beautiful oriental rugs were shown, and in the upper hall the Huguenot Association of New Rochelle had an interesting collection of relics associated with the early history of the town.

In the exhibition room some thirty or forty local artists, many of them very well known, had their first exhibition. Heretofore there has been no suitable gallery in New Rochelle for holding such an exhibit, and the suggestion of having it in connection with the opening of the library met with cordial cooperation. Among the pictures shown was a large canvas, "The snow trail," by the late Frederic Remington, and other well-known exhibitors were E. W. Kemble, Charles M. Relyea, Orson Lowell, M. H. Lowell, J. P. Leyendecker, Frank X. Leyendecker, C. Coles Phillips, Fred Dana Marsh, A.N.A., G. Glenn Newell, A.A.A., Lucius W. Hitchcock, Alta West Salisbury, Charles H. Wright, Lydia

NEW ROCHELLE PUBLIC LIBRARY —FIRST FLOOR PLAN

NEW ROCHELLE PUBLIC LIBRARY—SECOND FLOOR PLAN

Field Emmet, and H. B. Stanton. The pictures overflowed into the children's room, and were the center of a great deal of interest.

The building, which was designed by Albert Randolph Ross, of New York City, comprises two stories and a basement. The first floor, three feet above grade, contains a delivery room directly accessible from the main entrance; a children's room at the right, provided with an independent exterior entrance, and a general reading room with connecting librarian's and cataloger's rooms. Back of the delivery room is placed the book stack with public entrance and exit and the main stairway to the second floor. A unique feature of the delivery room is the division of the delivery counter and stack entrance, books being received at the right and charged at the left counter, the stairway being on the central axis lighted from above. The stack room capacity at eight volumes per foot is 72,440 volumes.

The usual provisions for heating, staff rest room, public toilets, storage, first stack story, etc., are placed in the basement. On the second floor are a continuation of the stack room, a reception room, exhibition room and reference room.

The architectural design throughout is based upon a rather free adaptation of the Georgian period. The materials of the exterior are white marble, light colored brick and mat-glazed terra cotta, with a sparing use of color. With the exception of the doors and windows, the building is fire-proof. The book stacks are of steel, and the fixed and movable furniture are of oak stained and finished to harmonize with the general color treatment of the walls, ceilings and floors. The floors of the reading rooms are laid in cork tiles, and the delivery and reception room above in buff quarry tile.

The building is heated by steam, wired and piped for electric and gas lighting, and provision is made for master clock and vacuum cleaning systems.

The general contract was made for \$56,807; the steel stack, \$11,241; and the wood furniture, \$7466.90.

NEW YORK'S MUNICIPAL REFERENCE LIBRARY

THE Municipal Reference branch of the New York Public Library has been moved from its former quarters in the finance department offices to its permanent home in the new municipal building, where it occupies a large room on the fifth floor. Permanent stacks are not yet installed, but their arrangement is planned, and they will be so located that later a mezzanine gallery can be put in when extra shelf room is needed. The library is only a little over a year old, and in gathering material during this time particular attention has been paid to collecting the records and reports of New York City, not only recent ones, but those of earlier dates, until now a very complete file, enabling the worker to do valuable research work in local municipal history, is the result. From now on more attention will be paid to supplementing the material already on hand relating to New York state and the leading cities of this country and abroad. Mr. Campbell, the new librarian, is anxious to build up a library that will not only be of use to the men actually engaged in carrying on the work of the city departments, but to which any voter interested in municipal affairs (as every voter should be) will feel free to apply for information along the special lines of his interests.

THE BIBLIOGRAPHICAL SOCIETY OF LONDON

In a letter to the New York *Evening Post* of May 7, George William Harris, of Cornell University, writes as follows concerning the Bibliographical Society of London:

"The action taken by the Bibliographical Society of London at the annual meeting in January will be welcome news to American libraries and collectors. Following the suggestion of the Hon. Secretary, A. W. Pollard, that (to commemorate the Society's coming of age) the membership roll, which was fixed at 300 in 1894, might be reopened for a few months, it was unanimously voted that, during the year

1914, the council be empowered to elect members irrespective of the number already on the roll, and that the rule restricting the roll of English and American members of the Society to 300 be for this period suspended.

"A rare opportunity is thus given to those who have hitherto been unable to obtain the publications of the Society, which are distributed only to members.

* * *

"For the year 1914 it is proposed to issue Volume XII of the Transactions, which, in addition to the papers read in the last two sessions, will contain 'Notes on bibliographical evidence for literary students and editors,' by R. B. McKerrow; a volume containing Gordon Duff's 'Catalogue of English incunabula'; and, if funds permit, Gray and Palmer's 'Abstracts of wills of Cambridge stationers.' Since its foundation, the Society has been able to spend very nearly its whole income from subscriptions on paper and prints, its other expenses being defrayed from entrance fees, sales of publications to new members, and the interest on invested life-subscriptions; and, without any solicitation on the part of the Society, it has recently received a grant of £100 from the treasury, mainly to help the publication of Mr. Duff's book. A fuller statement of the objects of the Society, with a list of the books it has printed, can be obtained from either of the Hon. Secretaries (A. W. Pollard, 40 Murray Road, Wimbledon, London, S. W., or R. B. McKerrow, 4 Phoenix Lodge Mansions, Brook Green, London, W.), to whom also names of candidates may be sent. The Hon. Secretary for America is E. D. North, 4 East 39th street, New York."

A newspaper can set a nation's focus for a morning, adjusting it one way or the other. A President can set the focus for four years. But only a book can set the focus for a nation's next hundred years so that it can act intelligently and steadfastly on its main line from week to week and morning to morning.—GERALD STANLEY LEE, in "Crowds."

LIBRARY TRAINING COURSES IN MICHIGAN NORMAL SCHOOLS

IN the answers to a recent questionnaire sent to state and county school superintendents, the training of teachers to secure effective use of rural school libraries was mentioned oftener than any other need.

"To correct this condition is the present object of the Michigan State Library in coöperation with the board of library commissioners," said Mrs. Mary G. Spencer, the state librarian in a recent address. "With this idea in mind a representative is being sent from the state library to the county normal schools in this state, now numbering 45, for the purpose of giving a short course in library instruction to the young men and women who, in these county normals, are preparing themselves for teaching in the rural schools. These

456^a

NEW HOME OF THE WASHINGTON HEIGHTS BRANCH, NEW YORK CITY

W. H. H. H.
of the N. Y.

courses are being received with great interest and enthusiasm by the students and school officers and will surely result in a larger appreciation of the rural school library.

"The general course of instruction is the organization and administration of rural school libraries, library aids, book selection and buying, with special attention to picture and reference books; instruction in the use of catalogs and reference books. Conferences were held with high school and other teachers as to increasing the usefulness of books in the school libraries.

"A complete equipment of books and library tools is furnished for the use of the students by the state library. Besides the instruction to the normal classes, which numbered from 15 to 25, lectures were given to the junior and senior high school pupils and teachers with practical demonstrations as to the use of books.

"These library courses have already been given in several county normal schools and it is planned to carry on the work until the close of the school year.

"While the technical care of a small library is important the greatest benefit to be derived from these courses is the fact that it will awaken in the minds of the prospective rural school teachers the necessity of proper organization of even the smallest library that may come under their care. The organized activities of the present day are revolutionizing educational systems; industrial education, consolidation of rural schools and other kindred movements are changing the whole course of mental training; but underneath all these movements lies the rural school library, the most important of all factors in the mental life of the child, that life which lies at the bottom of the whole social structure.

"The courses in library training in the county normals supplement the work which has for several years been done in two normal schools, the Ferris Institute and last year at Bay View in connection with the Bay View Assembly.

The constitution of 1907 provided for the expenditure of the penal fine money

for books only and the act of 1913 provided for the purchase of books for rural school and township libraries from a preferred list to be made by the superintendent of public instruction and the state librarian; this list is now being prepared and will soon be in the hands of the school officers. With these provisions there can be no doubt of the future excellence of the rural school libraries of this state and the educational value of the training of the rural school teachers will be a most important factor in the uplift of these libraries."

"A public library is the most enduring of memorials, the trustiest monument for the preservation of an event or a name or an affection; for it, and it only, is respected by wars and revolutions, and survives them."—MARK TWAIN, in a letter to the officers of the Millicent Library, Fairhaven, Mass.

Library Organizations

COLORADO LIBRARY ASSOCIATION

The Colorado Library Association met at Greeley, Colorado, April 24-25. There were twenty-five visiting librarians present and all agreed that the meeting was one of the best ever held in the state.

The principal address was given on Friday night by Dr. Livingston Farrand, the new president of the University of Colorado. His subject was "Primitive methods of recording ideas." He illustrated it by references to the picture writing of the American Indians.

Only five strictly library subjects were discussed. They were: "The high calling of the desk assistant" (as seen on both sides of the charging desk); "Binding and repair work," by Max Shenck, a German binder; "Colorado's library law—should it be amended?" "Scientific library management;" "Essentials in cataloging."

Colorado has a membership in the Council of the A. L. A. and at least three of the members will be in attendance at Washington.

FAITH FOSTER, *Secretary*.

CALIFORNIA LIBRARY ASSOCIATION

The nineteenth annual meeting will be at Hotel del Coronado, San Diego, June 15 to 20, 1914, jointly with the fifth annual convention of the California County Librarians.

During the year the districts have held the customary meetings, beginning with the Second District meeting at Santa Cruz, Oct. 24-25, 1913. "Who should buy the books, the librarian or the trustees?" by Samuel Leask, of the Santa Cruz Public Library, provoked a very practical discussion. Other subjects were "Where and how should we buy books?" "Should we abolish the trustees?" "The county free library," the last being one of the most important questions of the meeting, exceeding all others in its direct bearing on the work in the district.

The Fourth District held a meeting at Merced on Nov. 22, at which the topics were "Work with the schools and with children in the county and city libraries of the district," and "Books for foreigners."

At the First District meeting on Dec. 6, at the Mechanics-Mercantile Library, some of the speakers were George Hamlin Fitch, literary editor of the San Francisco *Chronicle*, G. T. Clark, librarian of Leland Stanford Jr. University, who told of his recent trip to the east for the inspection of library buildings, and J. L. Gillis, who told of the State Library School.

A meeting of the Sixth District was held at Pomona on Dec. 9. The morning's program was called "Visions," the various libraries reporting on achievements and ideals. In the afternoon, E. R. Perry, of the Los Angeles Public Library, presided over a book symposium. Miss Helen Haines spoke on a library exhibit for the Panama-Pacific Exposition, and on the American Library Association exhibit at the Leipzig exhibition.

The Second District held its spring meeting at Palo Alto, Feb. 20-21, 1914, with a varied program in four sessions, beginning with the "Business man and the library" and ending with "The old missions and their history," followed by a visit to the very interesting private library of Father Gleason.

At the meeting of the Third District at Vallejo on Feb. 23, the chief topic was the county free library, among the speakers being Mrs. A. G. Whitbeck, of Contra Costa county, Miss Huntington, of Yolo county, and three county superintendents of schools, Mrs. Henshall, of Yolo county, D. H. White, of Solano county and J. B. Davidson, of Marin county.

The Fifth and Ninth Districts held a joint meeting at the University of California Farm at Davis on March 14. H. E. Van Norman, dean of the school, told of the work of the farm, Miss S. T. Smith, spoke on the loan

department of the State Library, J. L. Gillis on "Library development in California," Miss S. S. Oddie on the California State Library School, and Miss I. M. Reagan on the "New county free library in Butte county."

The First District held a meeting at the Berkeley Public Library on March 27. M. J. Ferguson spoke on the Sutro Library, which is now a part of the State Library. Edwin Wiley gave an illustrated talk on the Library of Congress. Charles S. Greene told of plans for a library exhibit at the 1915 expositions and the prospect of the American Library Association meeting in or near San Francisco in 1915.

SOUTHERN EDUCATIONAL ASSOCIATION— LIBRARIES DEPARTMENT

The annual meeting of the Libraries Department of the Southern Educational Association was held in the assembly room of the Louisville Free Public Library at Louisville, Kentucky, Wednesday, April 8, 1914. Mr. Charles D. Johnston, librarian Cossitt Library, Memphis, Tenn., presided.

Every effort had been made to secure an attendance of teachers at this meeting. The principals of local public schools had been notified and urged to attend the session. Each high school was represented, as well as the departmental and graded schools, and the teachers took part in the discussion following the papers.

The program as announced was adhered to:

1. What of the rural communities? (The county library movement.) R. M. Kennedy, librarian, University of South Carolina, Columbia, S. C.
2. How may the state aid the school library? Mrs. Pearl Williams Kelly, Department of Education, Nashville, Tennessee.
3. The relation of the public library and the public school. (a) From the librarian's viewpoint. Miss Bernice W. Bell, head of children's department, Louisville Free Public Library. (b) From the teacher's viewpoint. Miss Mary Margaret Shelley, instructor in English, Girls' High School, Louisville, Ky.
4. General discussion of library topics.

Mr. Kennedy brought out forcibly the need of library work in the isolated rural communities of the South, citing the work of the Hagerstown library book wagon as an example of what might be the best way of reaching these districts.

Mrs. Kelly, who was formerly secretary of

the Tennessee Library Commission, occupies a similar position under the Department of Education, Nashville. Great possibilities exist in Tennessee for extension work. Some ten months ago the Library Commission was combined with the State Department of Education and the work is now limited to such activities as come under the jurisdiction of that department.

Miss Bell spoke of the relation of the library and the public school, outlining the activities of the Louisville Free Public Library and tracing the development of the work with the schools from the first station, where the library was allowed to distribute books on the steps of a school house. There are at present 213 class room collections in use. Stereopticon views of colored and white class room libraries were shown.

Miss Shelley spoke entirely from the viewpoint of the high school teacher who has secured definite results from a close coöperation with the library.

The Southern teachers were not largely represented at the meeting and the question of securing greater prominence for the work of the department was discussed informally in an effort to reach a greater number of people who may profit by the work done for this department. The following resolution was passed:

Resolved, That if possible at future meetings of the Southern Educational Association the Department of Libraries shall be represented by one long paper on the general program.

Officers for the next year were elected as follows: President, George T. Settle, librarian, Louisville Free Public Library; secretary, Jennie M. Flexner of Louisville.

Resolutions of thanks to the librarian and the library were voted.

JENNIE M. FLEXNER, *Secretary*.

OKLAHOMA LIBRARY ASSOCIATION

The seventh annual session of the Oklahoma Library Association met in the Carnegie Library at El Reno, April 29-30. The address of welcome was made by City Attorney Thos. B. Reid, to which the response was made by Mrs. Cora Case Porter, librarian of the Enid Public Library and president of the association.

Judge H. L. Fogg, of El Reno, read an excellent paper on "Book influences for defectives and dependents—helping those who cannot help themselves," in which he called attention to the need for book privileges in prisons and asylums, telling what is being

done in that line in many other states. Miss Charlotte Templeton, secretary of the Nebraska Library Commission, told what is being done in her state for these classes. She stated that the Nebraska legislature grants the commission annually \$2,500 for institution libraries, and that an expert librarian is employed to select appropriate books.

Miss Edith Allen Phelps, librarian of Oklahoma City Carnegie Library, read an interesting paper on "The people's university—the public library," enumerating the educational activities of the library from the kindergarten to post graduate work extending through life.

A paper by C. S. Durbin, of Chickasha, outlined "The duties of a library trustee," naming as a primary duty the placing of an expert in charge of the library, and then refraining from interference with her efforts. He closed with the statement: "The library trustee can render the greatest service by interesting the public in their library and leading them to understand and appreciate the splendid value and marvelous possibilities of the institution which has been well named 'The people's university.'"

The afternoon session of the first day opened with a roll call, followed by reading of reports. In a paper on "Essentials of library course for teachers," Miss Ruby Canton, librarian Central Normal, Edmond, explained the need for instructing teachers in book selection for children, and how to teach the use of simple reference books and libraries. "How the library and the schools may be mutually helpful" was an excellent paper by C. M. Lieb, superintendent El Reno public schools, suggesting the value of finding out each other's aims and methods so as to cooperate intelligently. The afternoon session closed with a reception from four to six, by the Athenaeum Club at the Elks' Home, which was the Oklahoma building at the Louisiana Purchase Exposition in St. Louis.

The first address in the evening was by J. G. Masters, president of the State Teachers' Association, on "How the teacher may aid the library." This was followed by "Panama plans and library coöperation" by Mrs. Fred Sutton, member of the Oklahoma Panama Commission, who presented in an interesting manner the plans of the commission for providing funds to erect a building for Oklahoma exhibits at the Panama Exposition. She suggested the coöperation of libraries of the state in fitting a rest room as a model reading room, with Oklahoma papers on file,

and books by Oklahoma authors displayed. Her recommendations were heartily received. Details of future plans were left to the executive committee.

Miss Kate Bernard, state commissioner of charities and corrections, gave a graphic description of the conditions in the penal and charitable institutions in their utter lack of adequate book facilities, making a touching appeal to the association and the audience to correct the conditions, and promising the support of her department in the effort to secure a commission which will look after the book needs of the helpless wards of the state, and giving descriptions of the kinds of literature needed in the different institutions.

Thursday morning the paper on Dickens, left over from the previous afternoon, was given by Mr. Jesse Rader, librarian State University, Norman. Mr. Rader made discriminating analysis of Dickens' genius, paying tribute to his kindness of heart shown in his work for oppressed humanity. Mrs. Charles R. Hume, president of the State Federation of Women's Clubs, told what the clubs of the state have done for library extension, showing that all the public libraries were started and largely maintained through the efforts of women's clubs. She stated that the 6,000 club women of Oklahoma are invincible when united on a progressive measure, and all are in favor of the extension of library privileges to all the people. Then followed a round table on "Problems of the librarian," led by Miss Mary A. Radford, of Muskogee, which brought out many helpful ideas.

In the afternoon Mrs. Bertha McBride, librarian of the Carnegie Library at Guthrie, gave a historical sketch of the O. L. A., and a library symposium on "State statistics" was led by Mrs. Nelle M. Horn.

"State Historical Library—a reservoir of Oklahoma-ana," by W. P. Campbell, custodian Oklahoma Historical Society, gives foundation for the hope that Mr. Campbell's catholic judgment in selecting and filing the tons of material in his vaults will provide ample data for future writers of Oklahoma history.

"University library extension," by Dr. J. W. Scroggs, director Public Information and Welfare in the State University, told what that institution is doing for the people who have no other library privileges, summarizing the extension methods of the "university that goes to the people."

"Ways and means of securing a Library

Commission" was the subject of a helpful talk by Miss Charlotte Templeton, based on her experience in securing adequate legislation for the Nebraska Commission.

The plate publicity proposition received from the Western Newspaper Union was considered at this time and referred to the publicity committee for decision.

At the closing session, Mrs. John W. Hisel, chairman of the legislative committee, continued the theme of the afternoon session by leading in the discussion of a library commission. Mr. Fred Latham, reference librarian of the State Library, gave a forceful and pleasing address on the "Scope and functions of the State Library," giving interesting facts about the law library of 30,000 volumes. A library commission would make this wealth of legislative reference material available to any one in the state who could use it. Mrs. E. D. Cotchey, of Oklahoma City, told "How to do effective legislating," enumerating the satisfactions of trying to assist in humanitarian law-making. Mrs. De Roose Bailey, of Muskogee, chairman of the traveling library committee of the State Federation of Women's Clubs, gave a report of libraries in circulation and exhibited samples of books in the collections, showing that they should be strengthened by the addition of recent books and better editions. Her department is eager to cooperate with a commission in providing books for all the people, especially the women on the farms, whose needs have been brought before the clubs.

Mr. R. H. Wilson, state superintendent of public instruction, made an earnest and eloquent appeal for more discriminating censorship of children's books, giving striking examples of the power and influence of reading on the minds and characters of children. He pledged his personal support and that of the State Department of Education in the campaign for a library commission.

The nominating committee reported the following names as officers for ensuing year: president, Mrs. Cora Case Porter, Enid; first vice-president, Miss Anna Le Crone, Alva; second vice-president, Mr. J. L. Rader, Norman; secretary, Mrs. J. A. Thompson, Chickasha; treasurer, Miss Elizabeth Sinclair, El Reno. Representatives to A. L. A. conference in Washington, elected from the floor: Mrs. Porter, president, ex-officio member of council; Mrs. J. A. Thompson, delegate; Miss Phelps, representative on program.

MRS. J. A. THOMPSON, *Secretary*.

MILWAUKEE LIBRARY CLUB

At the annual meeting of the Milwaukee Library Club which was held Tuesday evening, April 21, the following were elected officers for the ensuing year: president, Samuel A. McKillop; vice-president, Florence M. Olcott; secretary-treasurer, Alice B. Radcliffe; members of executive committee, Sylvester J. Carter and Martha J. Hornor.

The program consisted of a book symposium.

ONTARIO LIBRARY ASSOCIATION

The fourteenth annual meeting of the O. L. A., made a new record this year in attendance and interest. Easter Monday and Tuesday, April 13 and 14, saw some 200 delegates assembled in the Public Library of Toronto and the fine papers and animated discussions filled to the full every hour of the session.

The presence of two distinguished American librarians added greatly to the success of the gathering.

The annual reports of the standing committees were full of information and interest. The committee on selected list of books reported the quarterly issue of their bulletin in due course. The committee on library institutes reported the holding of fifteen institutes during the year, Toronto having been added to the list on Oct. 24 last. During the past five years all the public libraries in the province have attended one or more of these institutes with the exception of twenty-one and these twenty-one libraries will be most carefully looked after this year. The growth of knowledge and interest in the library movement on the part of librarians and trustees is exceedingly gratifying. The legal committee reported a number of changes in the Public Libraries Act which they thought should be urged upon the minister of education and incorporated in the act. The committee on co-operation of the Ontario Educational Association of the Ontario Library Association presented an optimistic report stating that such co-operation in various forms was fairly general in the high schools of Ontario and indicating the best forms of such co-operation. The committee on technical education and public library made some suggestions as to assistance that the library might render in this matter and suggested further action after the report of the Royal Commission on Technical Education had been studied. The annual report of the secretary gave a careful review of library matters during this year, noting many forms of progress.

The treasurer's report was a satisfactory statement for the year.

The chief topic of the meeting was "The library situation in Ontario and its possibilities." This was treated in a series of eight papers as follows:

"In organized effort" (a) What has been done, W. F. Moore, Dundas. (b) What may be done, E. A. Hardy, Toronto.

"In finances" (a) Local, C. A. Byam, New Liskeard. (b) Provincial, O. A. Langley, Lakefield.

"In administration" (a) Local, W. H. Arison, Niagara Falls. (b) Provincial, Norman S. Gurd, Sarnia.

"In general efficiency" (a) Book selection, W. J. Sykes, Ottawa. (b) Book purchase, W. O. Carson, London.

These eight papers covered the situation pretty carefully, reviewing the growth of the past decade and noting the chief features of the present situation and suggesting future lines of development.

The Monday evening session was an especially successful one, Mr. Matthew S. Dudgeon, secretary of the Wisconsin Free Library Commission, being the speaker. Mr. Dudgeon's topic, the "Universality of library service," gave him great scope and the story of what Wisconsin is doing was an inspiration. The informal reception following this address was very much appreciated by all present. The beautiful library building was thrown open in all departments and the delegates were shown through the building by the members of the public library staff. The John Ross Robertson collection of Canadian historical pictures and the annual exhibition of the Ontario Society of Artists were two exceedingly attractive features and the opportunity of seeing these two exhibits was greatly appreciated by the outside delegates.

The convention was highly honored by the presence of Miss Ahern, editor of *Public Libraries*, who paid her third visit to the meeting of this association. Miss Ahern is always welcome in Ontario and her part in the discussions added materially to their value.

Thanks to the beautiful weather and the completeness of the arrangements on the part of Dr. Locke, chief librarian, and his staff, the meeting was thoroughly delightful all the way through.

Another interesting feature was the very fine display made by the publishers and library supply firms.

The officers for 1914-15 are as follows: President, W. O. Carson, London; first vice-

president, David Williams, Collingwood; second vice-president, George H. Locke, Toronto; secretary and treasurer, E. A. Hardy, Toronto; councillors, H. J. Clark, Belleville; Miss Mary J. L. Black, Fort William; D. M. Grant, Sarnia; W. J. Sykes, Ottawa; F. P. Gavin, Windsor; W. F. Moore, ex-president, Dundas.

was reopened with twenty students. The chief innovation was a course in work with children, given to the regular school but also open to students in the summer school.

LIBRARY SCHOOL OF THE NEW YORK
PUBLIC LIBRARY

The list of lectures since last reported is as follows:
