On August 26 was Published, No. VIII., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for August, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, gives the Highest, Lowest, and Latest Prices of Stocks, Snares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance Lawrence and Miscellaneous Companies. New Companies. Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to August 23.

Advertisements for the next Number, to be published on

September 30, must be sent to insure insertion on or before September 28.

OFFICE-340 Strand.

THREE PER CENT.

THE raising of the Bank rate from 2 to 3 per cent. this week was a very unexpected event. In the best informed quarters on the previous day, at least until the very close, the opinion was that though money was getting more and more in demand, yet the Bank was so strong that there would either be no rise for a week, or at most a very slight rise. On the Stock Exchange, where there has lately been a great deal of speculative buying, there was more apprehension of dearer money; but not much fear of so great a change. Still, the action of the Bank, though unexpected, is quite justified by the event, and the facts which have since become known. The demand for | Our exports have also increased largely, especially of late.

money, both at the Bank and in the open market, has continued strong at the advanced rates. Possibly this is to some extent the result of precautions on the part of the public, who may be over-providing themselves; but so far as we can learn the current requirements are very large, and quite up to the supply of money. This demand is the best justification of the step which has been taken. To have continued to supply money at 1 per cent. less than the public were willing to pay, would only have ended after a little in a still more catastrophic change than what has occurred.

The point which is most difficult to understand in connection with the advance is the state of the Bank account. Since the rate was reduced to 2 per cent. in July, the Bank has not got much weaker, and it is still very strong. The liabilities in the Banking department-

On the 12th of July were	£ 32,712,000 27,325,000
Decrease	5,387,000
On the 12th of July was	£ 16,646,000 13,711,000
Decrease	2,935,000

The absolute amount of the reserve has diminished; but relatively to the banking liabilities, the Bank is rather better than it was when the rate was lowered. The stock of bullion in both departments, 23,507,000l, though it is nearly three-and-a-half millions less than it was in July is nevertheless very large. In ordinary circumstances such a position of the Bank would have enabled it to stand a farther strain upon its resources before it raised the rate. The circumstances however are most unusual. The private securities have increased in the week over 1,300,000l and are now 17,781,000l, only a million less than they were in July, although the Bank's deposits are so much less. So large au increase in one week, with some prospect of its continuance, could not but excite alarm, coupled with the knowledge otherwise obtained that the reserve was immediately to be reduced by a drain of gold for export. There is some uncertainty as to how much gold was really booked to go away before the rate was raised; but the known German demand was so large, and was accompanied by so many minor demands, that the Bank directors might well have feared they would not be in time if they deferred advancing the rate a week. No harm is done by being a little premature.

There is naturally some anxiety after so sudden a change as to what the future of the money market will be. Of one point there can be no doubt. We shall probably not see 2 per cent. again for a good while to come. The present rise was preceded by a general advance in the German rates for money, and as the demand has been a growing one in England too for some time, we conclude that the period of 2 per cent. is for the present at an end. As we have lately remarked more than once, the Bankers' Clearing-house Returns show that we are doing a large business, and the last Board of Trade Returns, making every allowance for the change in their form, confirm this. Our imports—

Increase .....

Our chief raw materials—wool, cotton, and corn—are likewise dear, and owing to the deficient harvest, our corn imports are likely to be above the average. In addition, there is a fair amount of commitments in foreign loans during the next few months. In these circumstances, and with the usual autumn pressure before us, it is not likely that when the rate has to be raised in September it will go down again very soon.

The doubtful point is whether the Bank minimum may not be put up again soon. On this head we can only say, that the whole circumstances, as now disclosed, are such as to require some caution. We are still of opinion that the German demands must be nearly satisfied. M. Thiers stated last week in the Assembly that he had preferred making an arrangement about Alsace and Lorraine, as a means of securing the evacuation of additional provinces, to a farther payment of the indemnity for the same purpose, because the payments already made had tried the money market to the utmost, and to pay more now would produce a serious disturbance in it. It is also to be considered on the same side that the continental exchanges, since the rate was put up, have turned rather more in our favour. Still the exact use which the German Government may make of its money power cannot be definitely foreseen, and after what has occurred, it will be udicious to wait a few days for the result of the present advance.

THE PRESIDENT OF THE FRENCH REPUBLIC.

" M. LE PRESIDENT DE LA REPUBLIQUE," as M. Thiers is now officially termed, is certainly in a political position which nobody has any reason to envy. And yet we suspect that some of its chief charms for him consist in precisely those elements in the situation on which any English statesman would look with the most dismay and even disgust. M. Thiers' immediate task is to "manage" a multitude of negotiations, the parties to which are hardly even capable of appreciating sound argument and sober reasons, but are only to be swayed as a horse is swayed by bit and bridle, or Leviathan by the hook of Job's vision. Now it is quite certain that the faculty of appreciating the weight of sound arguments on any side of a question is not one of M. Thiers' fortes. He has all his life sacrificed reason to effect, and has never mastered even those simplest scientific problems which ought to be the very alphabet of statesmanship. But undoubtedly he is, on the other hand, most adroit in the task of playing off antagonistic powers against each other, so as to obtain for his own Government the maximum of influence and success; and ever since he undertook to make peace with Germany, and to hold the balance, if possible, between the various parties of France, this has been his daily and nightly task, often achieved with a neatness and brilliance which a stronger man acting on principle, and therefore limited by principle, would emulate in vain. Ever since his advent to power, M. Thiers has been pitted first against Prince Bismarck, in the effort to give as little, and get rid of the enemy as soon, as possible; next against the Royalists, backed by a Royalist Assembly, in the effort to prevent a Monarchical restoration; lastly, against the Republicans, backed by a very large and active and the only increasing party in France, with a large part of the army behind them, in the effort to prevent the dissolution of the present very Conservative Assembly, and a general election favourable to Liberal views. The very difficulty which would have embarra-sed any statesman of fixed and large views, the impossibility of laying any foundation of principle for his procedure, the absence of a public opinion to which any such foundation could appeal—has been to M. Thiers a clear gain. As to the negotiation with a conqueror, of course that is essentially an empirical sort of negotiation, a matter which depends mostly on the political views and wishes, the vanities, the fears, the calculations, of the Power which has the power in its hands to dictate terms. M. Thiers is just the man to enjoy sounding these views, and to show considerable skill in playing off those which are favourable to his own country against those which are hostile. He has had the keenness to see how much the Germans prefer him to more revolutionary statesmen, and to make great use of that perception with the timid and hesitating Assembly from whom he derives his power. He has had the tact both to make Prince Bismarck strengthen his hands against ambiguous supporters, and to make his open enemies strengthen his hands against Prince Bismarck.

perhaps his most subtle bit of negotiation in this way has been that last piece of clever political manageuvre in regard to the Alsatian treaty, in which M. Thiers had the art to turn his own crass economical ignorance to doubly good account, by using it on the one hand as a weapon for extracting very great military concessions from Prince Bismarck, who apparently shares his ignorance, and on the other hand as an instrument for enormously strengthening the confidence of the Assembly in him, and justifying his orthodoxy as one of the most benighted Protectionists of the day. The situation was this. Germany, greatly fearing the outcry of the German manufacturers against the competition of the Alsatian workshops, was anxious to delay as long as possible the evil day, and negotiate with France a treaty which would compel her to take the Alsatian manufactures, temporarily at least, free of duty, or at so low a duty that very few of them would flow into Germany. Prince Bismarck hoped to get this treaty out of the professed tenderness of France for her former provinces. Never was he more disappointed. M. Thiers expressed himself full of sympathy for Alsace, but his duty was to think of France, not of a country that was not any longer French. He would not hear of free importations from Alsace. Well, said the Germans, but might not his consent be bought? Would the immediate evacuation of six more departments be no consideration? M. Thiers was struck, and asked for how long a period of free trade or low duty on Alsatian products the treaty would be. Six years was the reply. M. Thiers put down his foot;—rather eight months longer occupation of six departments than free trade for six years; and so in fact he beat Prince Bismarck down to two years, not of free trade, but of duties rising from nil to 50 per cent. of the ordinary duties; he got almost a promise that the six departments should be evacuated; and the only remaining hitch is on the point whether he may or may not have, what he promised the Assembly, reciprocity for French goods imported into Alsace during these two years. And observe what he will have gained by his Protectionism if his treaty succeeds. He will have gained from the Germans the evacuation of six departments eight months before the appointed time—for that is the price they pay for a treaty which, if M. Thiers had had the mind of a sound economist, he would have been glad not only to make, but to make in an infinitely stronger form, without any equivalent at all. But then what he would have gained by such a concession for France, he would have lost in popularity with the Assembly, which is Protectionist to fanaticism. Now he has gained with that Assembly too. The reluctance he showed to hear of free trade; the shortness of the time for which he admitted even low duties; the fight he made for strict reciprocity; the hard-heartedness he showed towards the Alsatians when the interests of France were supposed to be on the other side; the terms he extorted for his very small concession-all redounded to his honour with an Assembly which is blindly and almost madly Protectionist, and most selfishly patriotic (since it casts loose Alsace without

Precisely the same skill which M. Thiers showed in this matter in using his own errors for the advantage of his position, he has shown throughout in balancing first Commune against Royalists, then Commune against Republicans, and last of all, the "traditions of a thousand years" against the too rapidly growing force of Republicanism, so as to keep his own seat unshaken. After so frequently declaring that the Republic was firmly established, it sounded rather oddly to hear him telling the Assembly last week that the country had to decide between "the glorious traditions of a thousand years" and "the torrent which in the present day precipitates human society towards an unknown future." But the elections for the Conseils Generaux were just coming on, and M. Thiers probably feared that they might prove too Liberal, and undermine the authority of the present very reactionary Assembly. So he threw out a hint to the fears of the electors—a hint that they should not send up men who affect "torrents "which precipitate society into an unknown future." For himself, who has hymned the first Emperor, been Minister under Louis Phillippe, opened his arms to the European Revolution, and finally succeeded to the no doubt mutilated power of the second Emperor, as "President of the French Republic," it is hard to say whether he prefers "the glorious traditions "of a thousand years," or that torrent which precipitated France into his keeping. But there is no doubt he will continue as long as may be so to play off the one against the other, that France shall remain yet a little while longer in the

we are far from thinking that M. Thiers has no sincere French patriotism. Whatever he has been he has always in his most ambitious times and in his least wise moods been thoroughly French. He was thinking no doubt more of France than of himself when he advised Louis Phillippe to go to war with England on the Eastern question, and he is doubtless thinking more of France than of himself now that he casts Alsace adrift as an alien country, labours to restore full "Protection" to French industry, and buys the Prussians out of French departments by acceding reluctantly to a modicum of free trade. But whatever his patriotism, he is only fit to govern France while administration is a work of mere tactics, of playing on the prejudices and vanity of French deputies and the fears of German diplomatists. Let once order be so far restored that France needs a statesman who can lay down just and true principles, and popularise them, and M. Thiers will no longer be anything but a burden on the country. He is not a statesman, but a very clever political manager, without a political ideal of any kind; useful to stave off a difficultyhelpless to suggest for a rudderless country any principle of guidance.

THE TERMS OF THE LONDON AND NORTH-WESTERN AND LANCASHIRE AND YORKSHIRE AMALGA-MATION.

It has been briefly announced that the terms of the amalgamation between the London and North-Western and Lancashire and Yorkshire Railways, which the boards of both companies have agreed to recommend to their respective shareholders, are substantially—the payment to the ordinary shareholders of the Lancashire and Yorkshire company 12s 6d more of annual dividend than what is to be paid to the London and North-Western ordinary shareholders. It may throw some light on the prospects of the amalgamated company, as well as on the position of railway property generally, if we inquire into the reasonableness of these terms.

At first sight it would seem that the Lancashire and Yorkshire shareholders get an advantage at the expense of the London and North-Western. The last annual dividends

	London and I North-Western.				Lancashire and Yorkshire.			
	£	8	d		£	8	d	
Half-year ending Dec., 1870	3	12	6	*****	. 3	10	0	
Half-year ending June, 1870	3	7	6	****	. 3	17	6	
Annual dividend	7	0	0		7	7	6	

The Lancashire and Yorkshire therefore, according to the last annual dividend paid, is only 7s 6d a year better than the London and North-Western, whereas in the amalgamation the shareholders are to get 12s 6d. They are thus to be better off than they were, and of course whatever they get the London and North-Western shareholders will lose. Even in this view however, provided the disadvantage were not too great, the amalgamation ought not to be pronounced a mistake for the London and North-Western shareholders. The amalgamation itself must be worth paying for, and it is natural in such an arrangement that the stronger company should pay, its absolute interest being greater, and the directors of the weaker company being likely to have most difficulty in getting their shareholders to agree to anything which looks like taking them at a disadvantage. In the present case, the disadvantage to the bigger company, though it should be as great as it seems, will not amount to very much. The Lancashire and Yorkshire shareholders are to have their position improved by 5s a year as compared with the London and North-Western shareholders, but the latter will not lose 5s from their dividend. The London and North-Western ordinary stock is 30,579,000l, while that of the Lancashire and Yorkshire is only 12,765,000l—less than one-half; so that to give 5s to the Lancashire and Yorkshire shareholders out of London and North-Western money will not cost the latter so much as 2s 6d. This would be a very trifling loss indeed, and in fact a quite imperceptible one compared with the ordinary fluctuations of increase or decrease to which railway

property is liable.

But in reality it cannot be said that the London and North-Western shareholders are called on to give away anything.

It is quite an insufficient test to look only at the last dividend The rate at which the property improves is a most material element, and tried in this way it is almost impossible to say on which side the advantage lies. But this point requires to be very closely looked at. There is yet no evidence from the dividends recorded that the Lancashire and Yorkshire is improving any faster than the London and North-Western, so that its ordinary shareholders should get some advantage when they unite. The increase last year over the previous one was the same in each case. In 1870-71, as above

The London and North-Western dividend was And in 1869-70 it was	£ 7		0
Annual increase	0	10	o
	ksh	ire	com

An pany is

Lancashire and Yorkshire dividend in 1870-71 ..... in 1869-70 ..... 6 17 6

0 10 0 set of figures :-

London and and North-Western. Yorkshire. Rate pr ct. Rate pr ct. per annum. per annum. s d Dividend for half-year ending June, 1871..... 6 15 0 ... 7 15 June, 1870..... 6 0 0 ... 7 0

Increase for half-year..... 0 15 0 Thus the last annual increase is in each case 10s, and the last half-yearly increase at the rate of 15s per cent. per annum. So far then the properties would appear to be improving at the same rate, and there would have been some reason for adjusting their future dividends so that there would be no more difference between them than what now exists. But to get at the exact truth of the matter, we must also take into account the increase in the current half-year, and it is here that we find the Lancashire and Yorkshire entitled to an advantage.

In both cases the increase in the current half-year-and this is a point of great importance in connection with railway property generally—is very much greater than what has yet been witnessed. Not only is the increase last half-year at a much greater rate than the increase of the whole year, but the increase in the current half-year will again be in excess. the improvement in the London and North-Western, though very striking, is not quite so great as the improvement in the Lancashire and Yorkshire. The gross traffic of the two companies since June has increased as follows:-

London and North-Western. Lancashire and Yorkshire. Aggregate traffic to date....... 1,678,088 ....... 663,187
Do for corresponding period, 1870 ...... 1,583,660 ...... 595,264 94,428 ...... 67,929 = 11 per cent. Increase.....

= 6 per cent. = 11 per cent.

The current rate of Lancashire and Yorkshire improvement must therefore be much greater than that of the London and North-Western, provided there are no concealed drawbacks; and we are not aware of any. If we inquire more minutely into the probable effect on the net revenue, we come to the same conclusion. Analysing the London and North-Western increase, we find that it will probably yield the following additions to net revenue :-

London and North-Western Railway—2nd Half-year, 1871.
Gross Increase Probable Addition to Sept. 16. to Net Revanue. 94,000 ...... 77,000 Proportionate addition to net revenue for whole 

—equal to 18s 6d per cent. per annum.

Of course it is quite possible that the increase in the remainder of the half-year will neither be so great in amount nor so profitable as the increase which has accrued to date, and

which is more than one-half in passengers. We do not estimate however that the weekly increase will be so great to the end of the half-year as it has been, only that it will be in proportion; and considering the steadiness of the increase we should think it not unlikely that the result will conform to the estimate. Thus the London and North-Western improvement for the current half-year will probably be at the rate of nearly 1 per cent. per annum, as against 15s the previous

half-year, and 10s the previous year.

Treating the Lancashire and Yorkshire receipts to date in

LANCASHIRE	and Yorksh	RE RAILWAY—2nd B	lalf-year, 1871.
2021030		Gross Increase	Probable Addition
		to Sept. 16.	to Net Revenue.

Passengers	£ 32,000 36,000	(3ths)	£ 32,000 21,000
	68,000		53,000
Proportionate addition to net re half-year			122,000 9,000
			113,000

—equal to 1/15s per cent. per annum.

Thus the current improvement in the Lancashire and Yorkshire is much greater than in the London and North-Western, notwithstanding the great advance which the latter shows spon the previous half-year, when both were advancing at the same rate. In either case the figures are most remarkable, those of the Lancashire and Yorkshire especially, and would still be so, even if the remainder of the half-year should turn out much less profitable in proportion to the aggregate traffic than the first eleven weeks have been. The state of matters in these two companies however, so far as we can judge, is only a specimen of what is quite general in railways, which cannot but show an unprecedented improvement in the dividends for the current half-year.

It is not difficult to see from these figures that the London and North-Western shareholders are not unjustly dealt with by the Lancashire and Yorkshire shareholders getting an apparent advantage of 5 per cent. per annum in apportioning the joint dividend. If North-Western is only improving at the rate of 18s 6d per cent. per annum and Lancashire and Yorkshire at 1l 15s, it is the latter and not the former which really suffers by the arrangement. Practically however the latter will in no wise suffer. Something must be allowed for the probability of the improvement not continuing very long at its present enhanced rate, and for the benefit which the shareholders will experience by sharing in the peculiar stability of the London and North-Western stock. As conforming approximately to the relative real position of the two stocks, the arrangement may stand—the shareholders of either company remembering that if they are put to a slight disadvantage they will be compensated by the gain from the amalgama-The arrangement moreover shows afresh that if railway companies are disposed to amalgamate, the present circumstances of railway property offer them unusual facilities When it is only a question of a greater or less for so doing. improvement it is easy to give and take. This has been shown by the rapid increase in value of the Great Western and North-Eastern stocks since their respective consolidations, which has made every cause of grievance be forgotten; and the circumstances of the present amalgamating companies are such as to promise a like result. The panic in the railway market this week offers a rare opportunity to investors to obtain the stocks at a price considerably under their present intrinsic value, allowing for the accrued increase of profit in the current half-year.

#### BUSINESS NOTES.

THE AGRICULTURAL RETURNS .- The following is the annual abstract of agricultural returns of Great Britain for 1871, issued from the Statistical Department of the Board of

From this it appears that the change in the acreage of the wheat crops, as compared with last year, is too slight to make any material difference in the calculations about the harvest, which have been based on the supposition that the acreage was substantially the same. The diminution in the number of sheep is perhaps the most noticeable fact in the returnsthe numbers in 1871 being 1,264,691 less than in 1870, in which there had been a great falling off compared with the previous year. Altogether the diminution in the number of sheep since 1869 is 2,405,243, or 8.1 per cent. A difference like this, coupled with the greatly improved demand for woollen manufactures, due to the growing prosperity of the country, goes far to account for the present enhanced values of wool, as compared with two years since.

SPANISH PROSPECTS .- According to the Madrid Gazette, the actual applications for the new Spanish loan were as

Applications at—	Nominal Capital.		Effective Money.

The amount required being 6,350,000l, the distribution has been on the average about 12l 5s for every 100l, showing that the loan was about eight times applied for. success of the Spanish Government is thus most unequivocal, and is all the more creditable because the issue was a straightforward appeal to credit, and was buttressed by none of the expedients of special assignments of revenue and other illusory securities which former Ministers of Finance in Spain have tried. Altogether there is more than ever cause for repeating the remark which we made sometime ago, that in financial matters the new dynasty in Spain really has a chance. The current deficits are not so formidable as they were on the eve of the revolution and a year or two after, a good deal having been done both in the way of retrenchment and in the way of adding new sources of revenue. The inherent difficulties of Spanish Governments, in consequence of the nature of the people, a mischievous system of land tenure, and the arrears of work to be done in improving communications, are no doubt most formidable, and will probably make it impossible for Spain to obtain the credit of a first-class State for many a day; but the new dynasty has at least some materials to work with, and is in far from a hopeless situation. We may notice in passing that Spain at the present moment appears in fact to have got into a vein of luck. First of all the recent tour of the Sovereign proves that he is really able to make himself King, and that the people have no Legitimist feelings which will interfere fatally with his success. If King Amadeo turns out as well as he promises, the Spaniards may be congratulated at last on their long search for a Sovereign. It is almost as important a piece of luck that early in his reign, the harvest in the country should have turned out abundant beyond precedent for many years in Spain. According to all accounts, this is the fortune of Spain at the present moment, the harvest being in fact good enough to make up for three or four bad years. It is easy to see how important a fact this is for Spain, especially as in the present season, with a deficiency in France and England, the Spanish farmer will get a long price for his produce. Everybody in Spain will be richer, and there will be ample means for extending sensibly those material improvements, which are essential to farther progress. The harvest may in fact do for Spain what was done for Austria by the harvest of 1867, which at once repaired the losses of the Sadowa campaign the previous year, and gave the country a start. It remains now to be seen what use Spain and her rulers will make of their new

-A well-informed correspondent at Bucharest, in a letter which has been communicated to us, supplies a few facts about Roumania which will be interesting at the present moment when so much is being said about the alleged repudiation of its obligations by that country. It appears that last month there was a local Government loan of 3,120,000l, and according to a list of subscribers published by the Roumanian Government, 2,520,000l was subscribed by the public and the remainder, 600,000*l*, was retained on account of the Department of Judicial Deposits. The correspondent, whose letter we quote, points to this financial transaction as "show-"ing the material progress of the Principalities, and proving that the habit which formerly prevailed among the inha-" bitants of hoarding up large sums of money, and keeping it "in their possession, is yielding to the advantages of receiving interest and the facilities of letters of credit." It is farther stated that there are nearly 15,000,000l of rural bonds held in the country, whilst the Stern and Oppenheim Roumanian loans are also extensively held in the Principalities, but "the "Strousberg securities never met with favour, or they probably would not have been repudiated." We should " probably would not have been repudiated." recommend the English and German holders of these securities before they repeat parrot-like their charges of repudiation to inquire under what circumstances the Roumanians, who are in the habit of investing in their own securities, have neglected this particular issue. If it should appear that from first to last the issue, as made to the public, was never authorised, and was contrary to the Roumanian law, and that in point of fact the Roumanian people have not got the railway line for the construction of which a conditional guarantee was authorised, there will be less cause for wonder at those who are on the spot being chary of touching such tainted obligations. The foreign holders, on the other hand, will have reason to blame themselves for not making proper inquiries before they invested, and so trusting people who pretended to bind the Roumanian State when in fact they had no power to do so. We have before expressed the opinion that the Roumanians are far from justified in their present course of action, as the Strousberg bonds were publicly issued on the European exchanges, and the alleged undue assumption of powers was not publicly repudiated at the time by any Roumanian authority. Still the Roumanians, according to the strict letter of the matter, have something on their side, and have acted under a great deal of excusable irritation-things which cannot be said of the repudiating acts of some of those very Powers whose intervention has been invoked by the Council of Foreign Bondholders. We should recommend Roumania for her own credit to acknowledge the disputed obligations, but we should equally recommend the unlucky bond-holders to look at the other side of the question, and be very thankful for the best terms they can get.

THE NEWCASTLE STRIKE.—We fail to see the point of public interest in a great deal of the correspondence and reports of public meetings in connection with the Newcastle strike which are being published in the daily Press. Whether particular employers or a particular group of employers have been "conciliatory" or not in negotiating for the services of certain workmen can hardly be a point of first-rate public importance. We should never dream of inquiring whether particular bankers are conciliatory or not to their depositors or borrowers. The subject is no doubt good enough for gossip, but it is essentially local and personal, on which the expression of public opinion will hardly be of any use. The recurrence of such personalities in all strikes however suggests that there must be something radically amiss in the methods practised in the negotiations between great employers and their workmen. There is usually some reciprocity among people who have business dealings with each other, which allows of bargains being concluded or broken off without any personal ill-feeling or recriminatory charges which are ventilated in all the newspapers. Fancy the Lancashire and Yorkshire manufacturers forming a union, crying out in all the papers that the Manchester warehousemen will not pay them enough for their goods, and asserting moreover that they refuse in an irritating manner. As there is often no reciprocity between great employers and workmen, there will probably be something different in the methods of business on one side or other

to produce these exceptional bickerings which we witness. That something different, we suspect, is just this, that workmen as a class are often ignorant of what business means; that they are apt to be jealous and suspicious, and that there is a real perversity, fatally injurious to themselves, in their methods and principles of doing business. The mere combination of men whose interests are frequently antagonistic is a vice of unions from the outset, and necessarily strains to the utmost the arrangements for doing business with those who employ them. Good workmen in a large combination are reduced below their fair level, and bad workmen raised above it, so that no small difficulty arises in striking an average. By forming vast combinations besides, the workmen secure for themselves an artificial power of stopping the business of entire trades, superadding to the ordinary difficulties of trade the chance of ruinous interruptions at the bidding of irresponsible cliques. The entire business arrangements between many workmen and employers are thus essentially vitiated, and the result is seen in the frequent interruptions which occur, and the expenditure of ill-temper which they occasion. One of the most curious facts connected with the strike is the indignation at the immigration of foreign workmen, and the attempts to prevent immigration by means of the "International." Surely it must strike the English engineer that his position and pay are necessarily insecure so long as foreign workmen, who can easily be brought to England, are paid less, and that he has a good deal of "cheek" in appealing to the foreigner not to undersell him. should the foreigner refuse the chance of getting the wages which are so attractive to him, merely because some Englishmen will not work unless they get more? We wonder that English engineers are not ashamed to ask so much generosity and charity from their poorer brethren, and the notion that they may ask it is itself a proof of the business ignorance which we believe is the efficient cause of most of the strikes.

#### UNIVERSITY TEACHING FOR WOMEN.

TO THE EDITOR OF THE ECONOMIST.

SIR,-It would be an occasion for great regret if the force of your advocacy of this movement should be in any degree lessened by a doubt as to its vitality. Will you allow me therefore to correct the impression referred to in your article of the 9th inst., that "there is some sort of doubt hanging " over the continued existence of the Hitchin College?" This is very far from being the case. The College will reassemble after the long vacation with an accession of numbers, and the whole of the accommodation available at Hitchin, including the temporary iron rooms which were added last year, will be occupied. The experience gained by actual trial having conclusively shown the necessity for ample accommodation and a more accessible position, arrangements are now in active progress for erecting a permanent building near Cambridge. The site selected, while within easy reach of the teachers, is in a high and healthy situation, at some distance from the town, and it has been made an essential point to secure space for recreation within the College grounds.

Removal to the neighbourhood of Cambridge has been decided upon after long and anxious deliberation, during which the considerations to which you refer were carefully The Committee have reason to believe that the course finally resolved upon is generally approved. As some practical evidence of this, I may mention that names of candidates for admission in October, 1872, by which time it is hoped that the College will be established in its own building, are already being received.

Funds are needed, but it will be seen by a reference to the subscription list that we are fairly on our way towards obtaining the comparatively small sum required for building, after which the College will at once become self supporting.

The Committee are assured that the scheme only requires to be more widely and thoroughly known to secure a much larger measure of support than has hitherto been received. Feeling strongly the importance of influential public recognition, I venture to thank you for the valuable aid you have given in bringing the matter under the notice of the readers of the Economist.—I am, Sir, yours obediently, 17 Cunningham place, N.W. EMIL.

EMILY DAVIES.

## COTTON CROP AND MOVEMENT FOR 1870-71.

THE New York Commercial and Financial Chronicle of Sept. 9

Our statement of the cotton crop of the United States for the year ending September 1, 1871, will be found below. By a free use of the telegraph we are able to present our readers this annual review earlier than ever before. The largely interested expense thus incurred by us finds, however, full

justification in the greater value an early presentation gives these figures. It will be seen that we have continued the plan adopted last year of furnishing all the details by which we arrive at the conclusions stated, so that each one for himself may test their accuracy. This we contend is the only satisfactory way of making up a crop report; and we believe there are now but few who will not admit that the overland movement prepared upon any plan other than that adopted by us is simply an allusion, no one knowing (not every the compiler) whether it is right or wrong. For a full explanation of the course of these overland shipments we would refer our readers course of these overland shipments we would refer our readers to a subsequent part of this report.

It will be seen that the total crop this year reaches 4,352,317 bales, while the exports are 3,166,742 bales, and the home consumption 1,100,196 bales, leaving a stock on hand at the close of the year of 104,814 bales. Our table showing the whole movement for the twelve months are as follows:—The first table indicates the stock at each port, September 1 of 1871 and 1870, the receipts at the ports for each of the last two years, and the export movement for the past year (1870-71) in detail, and the totals for 1869-70:—

overland from Tennessee, &c. The total receipts at New York, Baltimore, Bosto and Philadelphia, for the year ending August 31, 1871, are given in a subseque part of this report.

By the above it will be seen that the total receipts at the Atlantic and Gulf shipping ports this year have been 4,032,154 bales, against 2,911,121 bales last year. If now we add the

we have the following as the crop statement	for the	two	years:
Receipts at the shipping ports	1870-71.		1869-70. bales.
Add shipments from Tennessee, &c., direct to manufacturers	229293	******	153825
Manufactured South, not included in above	4281077 91240	******	3064946 90000

The result of these figures is a total of 4,352,317 bales as the crop of the United States for the year ending August 31, 1871.

Overland Movement.

Knowing the desire all have to test results, we continue our plan of presenting the overland movement in detail. Our readers thus have light upon a point which has always been the uncertain feature in crop reports, and also have before the best evidence of the correctness of our figures,

Of course all cotton grown in the South (except such as is manufactured there) must reach a market overland or through the Southern outports. That portion which takes the latter direction (that is, passes through Southern ports) is now and always has been easily determined on account of the admirably kept tables which the papers of the various Southern cities have always furnished. To obtain a correct statement of the quantity going overland is more difficult, and yet a moment's reflection will convince any one that no cotton can reach the North from the South except by passing up or crossing the the North from the South except by passing up or crossing the Mississippi, Ohio, or Potomac rivers. Hence we follow each of those rivers along its entire course, and counts each bale as it leaves it. Beginning at Cairo, we find that the Illinois Central Railroad takes cotton from that point, and also from the Mississippi over its branch at Carbondale. A return from that company shows that it has, this year, thus carried North (including some small lots shipped at way stations in Southern Illinois, probably the growth of that section, 76,509 bales. Other Illinois, probably the growth of that section, 76,509 bales. Other than this no cotton leaves or passes up the Mississippi (not including local consumption) except what is counted at St Louis, at which point during the year the receipts have reached 19,726 bales. Returning to the Ohio, and following up the north bank, the first railroad we meet with is at Evansville, (the Evansville and Crawfordsville Railroad), a detailed return from which to us shows that they have carried North from Evansville 32,085 bales. The next lines of roads are opposite Louisville, the first of which is the Louisville, New Albany, and Chicago. This road carried no cotton last year, but during the Chicago. This road carried no cotton last year, but during the past twelve months it has taken 7,381 bales. Next we meet the Jefferson, Madison, and Indianapolis railroad, including the Madison branch, a full return from which shows that they have carried 147,550 bales. The Ohio and Mississippi branch, which was opened a year ago last May, and reported "no cotton carried" in our last return, for the last twelve months shows 55,410 bales. From these lines of roads up to Cincinnati there are no railroads running north from the Ohio taking cotton. At Cincinnatia portion of the receipts are received by the roads above specified and shown by the detail reports sent us. Deducting all so received, we have 215,758 bales left as the arrivals at Cincinnati not we have 215,758 bales left as the arrivals at Cincinnati not otherwise counted, all of which passes over the railroads centering at that point, to the North, or goes into stock or local consumption. Above Cincinnati no railroad has taken any cotton from the Ohio river. We have returns sent us by the various roads to that effect, There is, however, a small amount of cotton coming up the river which is not taken by any of these railroads, nor does it stopat Cincinnati, but goes direct to mills either above or below Cincinnati. We have returns from some of these mills and have estimated others. direct to mills either above or below Cincinnati. We have returns from some of these mills and have estimated others, and also have made up the consumption of the mills along the Mississippi above Cairo, which take cotton from the river directly at their own wharves. Altogether the total reaches only 11,500 bales. Turning now to the East of the Alleghanies, it will be found that there is no cotton transported overland—none whatever crossing the Potomac—all coming Northward being reported at the Virginia ports. The Orange and Alexandria Railroad, the only through line connecting both with the South and Southwest, reports that not a bale of cotton has passed over their road; and the less important road from Richmond to Washington, via Aquia creek, makes a similar report; and further, the road from Washington to a similar report; and further, the road from Washington to Baltimore (the Washington branch of the Baltimore and Ohio Railroad) has carried no cotton. We thus see that the figures given above must include every bale of cotton which has come overland to the North, and hence we reach the following as the result of this movement for the year:—

				Bales.
Rec	eipts for	or the	year at St Louisver Illinois Central Railroad from Cairo, &c.	19,726 76,509
	-	-	Evansville and Crawfordsville Railroad	32,085

Brought forward  Deduct receipts overland at N. York, Boston, and Philadelphia, &c. 331,578  Deduct shipments at N. O. North by N. O. T. ER. (counted at N. O.) 5,418	
	206,906

Leaving total direct to mills (including sent overland to Canada) ... 228,923

It will be seen that we have deducted from the above total 5,418 bales sent North over the New Orleans and Texas railroad, as that cotton was once counted at New Orleans. We do not, however, really claim that it crossed the Ohio; it probably went to some Southern outport, possibly Norfolk. But as it has been once counted, it should be deducted somewhere, and this is the most convenient way to do it. With these explanations we give below the details of the crop for the two years:—

Total Sea Island crop of the United States, 1870-71	704
The crop of Sea Island during former years has been	n as
follows:	18682
1866-57	26507 21609
1	
Consumption.  The very low prices which have ruled during the past se	eason
have naturally resulted in increased takings by our spin	ners.
not alone to supply a large consumption, but also to act their stock in view of the probability that the next crop	is to
be marketed at higher rates. We are indebted to the s	tatis-
facturers for a statement of the quantity of cotton the	
now have on hand compared with September 1, 1870, and	Sep-
tember 1, 1869, and from this statement it would appear while in 1868-69 the amount taken by spinners was	bout
50,000 bales in excess of their consumption, and in 18	69-70
about 33,876 bales less than their consumption; this year have taken 80,750 bales more than they have consumed	they
ther words they now hold 80,750 bales more stock than	they
did twelve months ago. Our own summary of the move made up from the crop figures which we have given abo	ement
as follows. It will be seen that in stating the consum	ption.
we of necessity include the stocks at Providence and interior points North of the Ohio and Potomac, as our sy	other
of arriving at the overland movement brings every bale	which
has crossed those rivers into our total crop.  Total crop of the United States, as above statedbales	4352317

	3322246
Total taken by spinners in the United States year ending Sept. 1, 1871  Taken by spinners in Southern States including in above total	1100196
	91246

The foregoing statement indicates that the Northern mills have taken from this crop 1,008,956 bales. If we now apply to these figures, and also to our figures of the previous two years, the statement of increase of stock received from the statistical offices of the Cotton Manufacturers' Association, and which we have referred to above, we shall have the following as the actual consumption of the mills for the three years:—

	Bales.	Bales.	1870-71. Bales.
Taken by Northern mills	918906 80000	90000	1009956 91240
Total takings from crop		896860	1100196
Added to mill stock during year		33876	80750
Total consumption of mills	0.44906	990738	1010446

These totals show an increase in actual consumption this year of only about 100,000 bales. This however is not strictly correct, as in last year's figures some deduction should be made for a difference in Northern interior stocks, &c., as stated in our crop report of that year, which would leave this year's increase somewhat larger. The above statement furnishes a very gratifying indication of the prosperity of our cotton manufacturing interest during the season which has just closed.

#### Exports.

In the first table given in this report will be found the foreign exports of the past year from each port to Great Britain, France, and other ports, stated separately, as well as the total to all the ports. In the following we give the total foreign exports for six years for comparison:—

TOTAL EXPORTS of COTTON to FOREIGN PORTS for SIX YEARS.

The National Assembly before its adjournment, which took place at midnight on Saturday, completed the examination and vote of the remainder of the Budget. It is hardly right to say examination, seeing that the same frivolous taste was displayed as in the time of the Empire. As voted, the Budget differs both in expenses and receipts from the figures given by the Committee on the Budget, and reproduced in last Economist, both being increased, particularly the former. It will in expenses be further modified before the year's end; and more than once after that, before it reaches the "definiwill in expenses be further modified before the year's end; and more than once after that, before it reaches the "definitive" stage. In receipts also it is destined to change. To the new taxes previously voted, amounting to some 400,000,000f, there have been added others on horses, carriages, clubs, railways, billiard tables, official salaries, and sales of securities, which are in the aggregate calculated to produce 50,000,000f to 52,000,000f. And others are to come, either on incomes or raw materials, or it may be on both. The new tax on sales of securities (shares, bonds) &c., is to be 50c instead of 20c per 100f of those that are what the French call "nominatif" —that is, bearing the name of the owner inscribed on them,
—and 15c instead of 12c on those to bearer. This impost is
disapproved by the financial community, for the reason that
it will check operations. A proposition was made to extend it to Government stock, but that was rejected. The Minister of Finance took occasion of it to declare anew that the Government repudiated any idea of taxing rente, or of violating its engagements.

As stated last week the Committee on the Budget estimated the deficit for 1871 at 47,000,000f, or nearly 54,000,000f on counting the supplementary expenses that are to be foreseen. But M. Pouyer-Quertier in a speech on the subject expressed the conviction that by annulments of credits and increase of revenue it would not exist. Yet he estimated the Budget and other charges weighing on France in the present year at "the colossal figure of six milliards and some hundred millions." A far more experienced financier than he would perhaps hesitate to affirm that this sum will be fully met, as France is, so to speak, in the midst of a "great unknown." In the same speech he said too that the 325 millions obtained from Prussia for the Eastern Railway will be sufficient not only for the value of the lines taken, but to enable the company to pay part of what it owes the Government. He company to pay part of what it owes the Government. He said likewise that after sending out of the country for the German indemnity 1,500 millions, to be followed another 500 millions, it would not be prudent, however rich France was, to expedite more for the present, because the exchanges and commerce would be profoundly disturbed; that measures would be taken for paying the three milliards (120,000,000l) due by 1st May, 1874. He announced moreover that of the last loan, 1,217,000,000f have been paid up, and that portions of the rest are coming in; and he spoke with complacency of the price to which it had risen at the Bourse— 8f more than that of issue. Lastly, to show the Assembly that during the vacation it had no need to be disquieted about the financial situation, he stated that the Government has in the Bank at Paris and in the agency at London 280,000,000f, and that it has the power of obtaining 200,000,000f from the Bank if necessary.

The Government, by means of a Bill submitted to the Assembly, demanded to be allowed to settle the Alsace-Lorraine question on the basis of letting into France, free of duty to 31st December next, manufactured and other products of the provinces, at a quarter of the established duties to the 1st the provinces, at a quarter of the established duties to the 1st July, 1872, and at half to 1st July, 1873,—Germany according in return "reciprocity for admission into Alsace and Lorraine of articles necessary for local industry; also to evacuate six departments immediately, and to reduce the army of occupation in the others from 80,000 to 50,000 men. The public received the proposed arrangement with marked satisfaction, thinking that the paramount object of the moment is to get the Germans out of France as quickly as possible at any price; but it did not suit the book of the Protectionists in any way, inasmuch as it would leave them exposed for iron, cotton fabrics, and other things, to the competition of two departments—a competition which they have always found it hard to bear, and relief from which they regarded as an adequate compensation for the patriotic pain they endured at seeing their country dismembered. So they argued that the pecumiary and moral advantage of having the German occupation reduced did not justify the loss the Treaty would cause in Customs duties, and the wrong it would do to French industry; and they induced the Assembly to modify it in such a way as to make it say that the manufactured products from the two provinces should "be limited in as exact a proportion as possible to the production of each in 1869, deduction made of local consumption and of exports to other countries than France;" also that French "manufactured products" should be let into the provinces on the same conditions. So worded, the Bill did not fit in with the preliminary arrangements the Government bad come to with the Germans; but M. Thiers accepted the modification, thinking, no doubt, with characteristic vanity, that he could make them take it. But Prince Bismarck has protested against it in rather a vehement way. He never, it seems, thought in treating of any such restriction on exports from Alsace-Lorraine; it goes indeed against his object, which is to permit the provinces to get rid of their stocks in France, for which they were manufactured, so as on the one hand to benefit the holders, and on the other to prevent the German markets from being flooded; and though willing to admit into the provinces from France the articles—that is, the raw materials—necessary for local industry, he never dreamt of receiving manufactured products." His protest has greatly disturbed the serenity of French politicians, and caused not a little disquietude among the public. M. Thiers, however, who is ob

Just before the adjournment of the Assembly, a report was presented by the Committee charged to examine the contracts entered into for the purchase of arms and ammunition for the war—at first by the Empire, and afterwards by the Government of National Defence. The greater part of these contracts were to be executed in England, because it was there only that purchases could be freely made. The Committee reveals scandals that are almost incredible. The contracts were given to mere adventurers, and even to women, at excessive prices, and at a moment when it was known in Paris that they could not be executed, English makers having in store nothing like the quantities demanded. The consequence was that the English market was completely disorganised by the sudden influx of demands; that not only all the stock of good articles, but all sorts of rubbish were scraped up; that by means of bribery and corruption extensively practised in France, these latter were accepted with little examination, or without examination at all; and in definitive, that the State was swindled in a fashion that was really awful. The report is too voluminous to be examined in this letter; but one fact selected out of many will give an idea of its revelations. An agent purchased in England Sniders at 95f 85c and 89f 50c each, according to length, and cartridges for them at 100f 30c the 1,000; another obtained a contract at 120f for each musket and 120f the 1,000 cartridges—the difference between the two bargains amounting on the quantities to be delivered to 970,000f. On the whole the Committee comes to the conclusion that for the contracts executed in England, and which fell far short of those consummated, the French Government, out of a disbursement of 25,600,000f, paid 31 per cent. more than it ought to have done.

ought to have done.

The statutes of the Bank of France require the annual meeting of shareholders to be held in January. In consequence, on the 26th of that month a meeting took place, but as Paris had been cut off from all communication with the provinces since September the directors could only give an account of the operations of the first six months of 1870. Another assembly was held on 13th July, when a report on the whole year was presented. That document has just been printed, and the following is an analysis of it:—Notwithstanding the war and the siege of Paris, the total mass of operations amounted to 8,499,185,900f, the highest figure ever attained, and exceeding by 173,453,500f that of 1869. The rate of discount, which from 31st May, 1869, had stood at 2½ per cent., was on 18th July raised to 3½, on 21st of same month to 4, 30th July to 5, and 9th August to 6, at which figure it after-

wards remained. The discounts amounted to 6,892,912,000f being 210,037,500f more than in 1869, but deducting Treasury bonds, they were 2,889,055,600f. This sum was represented by 2,232,142 bills, giving an average of 1,295f; and so ready is the Bank to serve petty traders, that 3,541 were of the low sum of 10f or under, 153,563 of 11f to 50f, 214,676 of 51f to 100f, the rest exceeding 100f. The number presented for discount but rejected was 27,085, amounting to 64,426,065f, but 4,796 of 6,083,431f, were only refused for irregularities, and were afterwards admitted. Under the law permitting the payment of bills to be delayed, the amount of unpaid bills of Paris and the branches rose on 21st Dec. to 733,800,000f, which was the maximum of the year. The advances on securities of Government stock, railways, &c., were 541,996,900f, being 62,027,500f more than in 1869, and the rate of interest charged was ½ above that of discount. On the 24th Dec. they stood at 107,653,000f, of which 56, amounting to 53,799,000f, were of more than 100,000f, and 7,782 of 53,854,000f were below that figure. In the advances above 100,000f are three of large amount—to the Caisse des Depots et Consignations 40,000,000f, to the Credit Agricole 3,450,000f, to the colony of Guadaloupe 1,500,000f. The maximum of coin and bullion was on 23rd June, 1,318,500,000f; the minimum, 24th Dec., 505,300,000f. The maximum of deposits was, 23rd August (on account of the national loan of 750 millions), 625,200,000f, the minimum, 27th January, 322,100,000f. In Paristhe bills, &c., collected amounted to 5,128,239,475f, which was 379,285,974f less than in 1869, the maximum being, 30th July, 126,077,670f; the minimum, 26th December, 38,629,563f. The year began with bills left unpaid of 1,100,030f, and the amount arose to 2,674,462f, but on the last day of the Bank year it had fallen to 1,163,197f. On the 24th December the Bank held for safety 2,016,146 securities of different kinds, amounting to 900,466,321f, belonging to 19,371 persons. The number was 457,351

As the second meeting was par extraordinaire held in July, the report remarked that the directors knew that though confining themselves strictly to the operations of 1870, the shareholders were preoccupied with the results of the six months passed since then; but that they could not legally give details. And it added—"What could we say that you do not know already as well as we do? No one is ignorant that in face of the grave events that have so profoundly agitated the country, we have honestly fulfilled our duties, by aiding by all our force commerce and industry, and by contributing to the salvation of the State. Now, whilst the State, whose credit is inseparable from ours, resolves by a solemn contract to assure to the Bank complete security, commerce and industry, on their part, strive to fulfil their engagements, and to maintain our mutual confidence. We hope that by conduct both firm and benevolent, the Bank of France will successfully accomplish the liquidation of prolonged bills. In any case the board of directors is accustomed to display foresight, and it knows that reserves must be made for all eventualities." The report concludes with these words:—"There is no reason to doubt of the present, or to fear the future; and the Bank of France, having faithfully fulfilled all its obligations, will remain powerful by its credit, honoured by its services, and more solid than ever."

The Comptoir d'Escompte has published the report presented at the meeting held on 29th July. The principal points of the document have been already given, but it may be stated that it represents the total operations of 1870-71 to be 1,770,965,493f, in which discounts figured for 583,328,337f. These figures were 1,315,640,893f, and 603,977,340f less than in the year preceding. It is startling to see the discounts decline more than one-half, but the Comptoir year comprised all the troubled period of the war, the siege, and the Commune, whereas the accounts of other banks and companies closed on 31st December only deal with part thereof. The gross profits were 7,309,839f, the net 5,526,676f, and the dividend, after deduction for the reserve, was fixed at 27f 50c, being 54 per cent. on the 500f share

54 per cent. on the 500f share.

The reaction predicted on the Bourse has cofirmed, and is expected to go farther, the market being, as the French say, "overcharged." The advance in the discount at London has had an unfavourable effect. The Italian Government makes

couleur de rose statements on its financial situation, but they do not obtain complete credit. Surprise is expressed that the Financial Commission of Spain, notwithstanding the reduction of subscriptions to the last loan, raises the pretension of retaining all the deposits received, so as to apply them to future calls, instead of returning, as is customary, the portion applicable to the subscriptions not admitted. The Credit Mobilier is growing in favour; the following are the quotations:—

The demand for gold continues, and it is at a premium of 6f to 7f for the 1,000f. The want of small change is beginning to be felt, though thus far not very seriously.

M. Haussmann has been confirmed in his new capacity of president of the Credit Mobilier by the annual meeting of shareholders, which has just been held. He stated that he brought no capital to the company, but gave the shareholders to understand that he would in a short time be able to submit to them projects which in his common would revive at least to them projects which, in his opinion, would revive at least partially its former prosperity. He declared against its amalgamation with the Immobilière Company, of which it is creditor to a large amount.

The conditions of the new Paris loan of 350,000,000f are formally published, and are, what has been already stated, bonds of 400f, issued at 277f, or 270f if paid at once; redempbonds of 400f, issued at 277f, or 270f if paid at once; redemption in 75 years, with lottery prizes of 1,500,000f per annum, and quarterly drawings; 50f payable on subscription, 20f on allotment—the rest, if not paid at once, in instalments—50f in January, 75f in April, 82f in August. The subscription is to take place on the 26th and 27th. That the loan will be covered several times is not doubted, and the conditions of it are, as befits the sad state of the country, more adventageous than befits the sad state of the country, more advantageous than any previous one; but the large deposit will shut out the herd of poor people who on preceding occasions subscribed in the hope of making a few francs by an immediate sale of the scrip

The premium on the Bourse is 8f to 9f.

The bankers, joint stock banks, and agencies of Paris banks at Marseilles have published a collective declaration, to the effect that they will communicate to each other and to the Bank of France the names of the foreign houses that have refused to pay bills endorsed by them on the pretext that they were not bound by the delays for payment accorded in France; also to make public their names as widely as possible, and to refuse any bills bearing the signatures of those houses.

The Société Générale announces the payment from 1st October of 12f 50c on account of dividend of 1871. The sum re-

presents interest of 5 per cent. on the paid-up capital.

The payment of half-a-year's interest, 15f, on the Ottoman loan of 1869, and of the 6,075 obligations of the drawing of Sept. 5, is to be made by the Comptoir d'Escompte from 1st October.

The Parisian Gas Company announces that "on account of

events," the payment of the first dividend of 1871, 12f 50c, which was fixed for 6th October, is postponed to 6th Dec.

The Bank of Messrs Bechet, Dethomas, and Co. (Caisse Commerciale) is to pay from 1st October 10f on account of 1871.

The Bank des Depots will pay from 1st October the interest on bonds of the North-East railways.

A coupon of 7f 50c of interest on obligations of the

Charentes Railway will be in payment from 1st October, and one of the same amount on those of the La Vendée railways from the same date.

e following are the quotations from the markets for the

last three days per 50 kilogs, duty paid:

#### COMMERCIAL AND MISCELLANEOUS NEWS.

The Madras Trade and Navigation Returns for 1869-70 show that in the year under review the total exports and imports to and from all ports amounted to 12,531,690l; in 1868-9 they amounted to 12,876,215l; in 1867-8 they were 10,577,476l. The decrease in 1869-70 is spread over all the different heads save two.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and

fram one to one-quarter of a million; and on other miscellaneous corporations, from \$283,000 to \$70,000. This steady decline was owing to the reduction of the tax from 5 to 2½ per cent., and also in individual incomes to the increase of the exemption. The receipts from this securce next year will probably be zero, as the repeal of the income tax sums now to be regarded as a chief labour for the next Session of Congress. The tax on gas of 25 cents per 1,000 feet shews an increased yield of a quarter of a million. The sale of stamps, owing chiefly to the repeal of the stamp tax on receipts, declined \$1,200,000. The licence taxes and other similar charges, owing to extensive repeals, declined about 16 millions. Altogether the inland revenue between the two years has shrunk nearly one-third, a decline which has been to a great extent made up by the increased revenue from Customs.

It is stated that the total production of pig iron in the United States in the year 1870 was 1,800,000 tons, and that 200,000 tons were imported, almost exclusively, from the United Kingdom, giving a total of two neillion tons for consumption.

JOHN C. POCOCK, Deputy Inspector. Bankers' Clearing-house, September 21st, 1871.

The total since the 4th of January, 1871, is 3,290,056,000l, compared with 2,822,549,000l for the corresponding period

last year, showing an increase of 467,507,0001.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

a period of four years, corresponding with the present date, as well as ten years back, viz. :-

At corresponding dates with the present week.	Sept. 25, 1861.	Sept. 23, 1868.	Sept. 22, 1969.	Sept. 21, 1870.	Sept. 20, 1871.

In 1861, money was easy at  $3\frac{1}{2}$  per cent., the minimum in the open market being  $2\frac{3}{4}$ . Business was still very restricted owing to the American war, and the supply of capital was large. A rather gloomy account of Turkish finance had just been published by Sir Henry Bulwer-the first attempt which had really been made to give an adequate conception of the financial position of the Empire.

In 1868, the 2 per cent. period continued. The French Government had just reduced its allowances for the floating debt at short dates to 10s per cent. An insurrection, led by General Prim, and which promised to be successful, had just broken out in Spain.

In 1869, the demand for money was better for the week, the open market rate being quite up to the Bank minimum. A petition for winding-up the European Assurance Society had just been presented in Chancery, and met with an obstinate resistance from the directors. Lately there had been a panic in Vienna, owing to the excessive speculation for the rise.

In 1870, the position of the Bank was not so good for the week as had been expected, but there was no advance of the rate. The siege of Paris had at length formally commenced, an ineffectual stand having been made by the National Guard The demand of Germany for Alsace and

Lorraine had diminished greatly the hope of peace.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,481,451l; in 1868, an excess of 3,201,485l; in 1869, an excess of 2,540,274*l*; and in 1870, an excess of 740,692*l*. In 1871, there is an excess of 2,560,236*l*.

DISCOUNT AND MONEY MARKET .- At the Bank meeting on Thursday it was decided to raise the minimum rate from 2 per cent., at which it has stood since the 13th of July, to 3 per cent. The measure was almost wholly unexpected. Money has for some time been getting dearer, and early in the week, when the withdrawals of gold were seen to be continuous, and reports of still larger withdrawals in prospect were circulated, there was a growing expectation of an early advance, but a rise of 1 per cent. at once was not foreseen. There has consequently been a great deal of excitement in the money market, the causes of the change, so far as the Bank account can throw light on them, not being apparent, and a good deal of apprehension being felt as to the more or less unknown causes which have caused the Bank directors to act. There is a vague feeling that a very serious drain of gold-the alleged motive for the changeanticipated, and that an advance of 1 per cent. being ineffective, we may shortly have a farther rise to 4 and even 5 per cent. Prices in the open market are thus not a little irregular, almost the only certain point being that nothing is done under the Bank minimum. The demand continues very good, both at the Bank and in the open market, and dealers have no difficulty in employing all their balances at the advanced rates.

The changes in the Bank return for the week are hardly such as to account for so sudden a change. The revenue has diminished 712,000l, and the bullion in both departments 662,000*l*, but the reserve is still 13,711,000*l*, and the bullion 23,497,000*l*. The fact which appears to have weighed most with the Bank directors is the large increase in the other securities, viz., 1,347,000l, and large withdrawals of bullion were anticipated in the current week. The state of the continental and American exchanges was also such that gold seemed liable to be going away everywhere, and with our usual autumn scarcity imminent, the Bank directors were probably justified in taking precautionary measures. We should be inclined to think that the measures aiready taken will prove sufficient, as there are apparently no circumstances on the continent to cause a demand for a large supply of money there at a high rate. Much of the foreign money would probably not have left us had money been dearer in Lombard street, and some of it is likely to come back. The next fortnight however will be a critical period, as there is no distant gold to arrive till the 9th or 10th of October, when 600,000l will come in from Australia. Everything will depend for the present therefore on the effect of the rate in turning the continental exchanges in our favour, and though it appears for the moment to have done so in part, it is perhaps too early to speculate that it will really have a decisive effect.

The principal changes in the Bank of France return for the week are an increase of 520,000*l* in the Treasury balance, and of 596,000*l* in the Paris deposits. The Paris discounts have also increased 410,000*l*. Bullion is substantially without change. The result apparently is that the effect of the payment of the indemnity on the Bank of France is for the present at an end, and the whole operation is probably nearly

We subjoin our usual quotations for mercantile paper having various periods to run, but subject to this remark—that the market is so unsettled as to make the quotations all but nominal. For a day or two rapid fluctuations in the open market are to be expected.

Bank bills-	months	*******************	3	per cent.
Do 4	-	*** ***********************************	31	per cent.

THE STOCK MARKETS .- This week there has been quite a panic on the Stock Exchange. On Monday and Tuesday the upward movement in all the leading securities which has lately been so striking continued—especially in English railways, the traffic returns on the Brighton and South-Eastern lines being held of good augury for the returns of the week. On Wednesday however there were signs of weakness, owing to the apprehensions which were excited about an imminent advance of the Bank rate, the weakness in several instances leading to a very serious fall. The actual advance of the rate on Thursday, though the announcement was at first received with firmness, speedily caused a panic. Dealings for a time were all but suspended, jobbers refusing to name a seller's price, though they were willing enough to be sellers themselves. The leading stocks in consequence, especially English railway stocks, fluctuated very wildly-North-Eastern, for instance, being at one time at 167, or 71 under the best point of the week, while North-Western, Great Western, Brighton and other stocks, in which there has lately been a great advance, fell from 2 to 5 per cent., the closing prices, except in North-Eastern, being at the lowest point of the day. In the foreign and miscellaneous markets the panic was far from being so great. In foreign securities especially, the heavy bear account, to which we referred last week, had prevented so extreme a rise as had taken place in railways. There

was nevertheless a general fall of 1 or 2 per cent, though the market became rather stronger at the close. To-day the panic of Thursday was continued, there being a farther fall in the leading railway securities and in foreign securities, though not so great as on the previous day. Late in the afternoon however there was a slight reaction, and prices were firmer, large buying orders in the foreign department having been received from Belgium.

The panic has furnished the best proof that a good deal of the recent buying in the markets—especially in railways—has been by weak speculators, who were quite unable to hold in the face of a rapid advance of money. In this light the advance in the rate will be beneficial, as tending to weed out the weak speculators and allow strong buyers to come in at prices which offer a certainty of a good advance. The market will now be more healthy than it has lately been, and the natural causes for an advance are so strong that we should anticipate shortly a renewal of the recent upward movement, from the rapid increase in the real value of such securities as English railways, and the continuous process of investment which may be looked for when the holidays are over.

English Government Securities.—Consols, though they have not lately advanced, were immediately affected by the prospects of dearer money and went a point below 93 in the panic of Thursday. To-day they have again been weak, and close flat at  $92\frac{1}{16}\frac{1}{16}$ .

Subjoined is a list of the highest and lowest prices of Consols every day:—

Foreign Government Securities.—As we have stated, the panic in this department was not so great as in others, owing to the rise having been checked. Between last Friday and Wednesday there was moreover a steady decline, owing to the persistence of the bear operators, so that when the panic came there was not room for a severe and sudden fall. Thus Spanish, which last Friday closed at  $34\frac{9}{16}$   $\frac{1}{16}$ , were on Wednesday at  $33\frac{1}{4}$  34, a fall of  $\frac{1}{16}$ , whereas on Thursday the fall was only  $\frac{3}{8}$ . Turkish 5 per Cents., which were  $46\frac{3}{16}$   $\frac{5}{16}$  last Friday, were on Wednesday at  $45\frac{1}{4}$   $\frac{3}{4}$ , a fall of nearly  $\frac{3}{4}$ , while the fall on Thursday was only  $\frac{1}{4}$  more. Turkish 6 per Cents. of 1865 again were last Friday at  $63\frac{2}{3}$   $\frac{5}{8}$ , and on Wednesday at  $62\frac{1}{4}$   $\frac{3}{4}$ , a fall of  $\frac{7}{8}$ , and the fall on Thursday was only  $\frac{1}{2}$ . The fall has been quite severe enough to catch some bull operators rather heavily, but it has not taken out the whole of the recent advance, which was in reality largely due to bona fide purchases for investment. To-day there has been an additional fall, there being sellers in Spanish at one time at  $32\frac{7}{8}$ ; but in the afternoon there was a recovery in this and other foreign stocks consequent on heavy buying orders from Belgium. The turn in the exchanges had also a good effect, and gave more confidence to purchasers. The closing prices of the week show a considerable fall from last, but they are well above the worst point of to-day.

The following are the changes for the week, taking the latest unofficial prices for quotation :-

ENGLISH RAILWAY SECURITIES .- The principal effects of the advance in the Bank rate were witnessed in this department, there being hardly anything to break the shock of the sudden change in money. So far from a rapid rise in the rate being anticipated, the market on Monday and Tuesday was a very strong one, almost all descriptions, and especially the Southern lines, upon good Brighton and South-Eastern traffics, and the prospect of a similar Chatham and Dover traffic, advancing. Brighton were on Monday at 701 71, nearly the best price they have lately touched, and on Tuesday there were strong buyers of Chatham preference at 65 to  $65\frac{1}{2}$ —a rise of  $1\frac{1}{4}$  from Saturday,—and of Chatham ordinary at  $25\frac{1}{2}$   $\frac{3}{4}$ -a rise of 2 from Saturday. On Wednesday the market was weak, reports as to large exports of bullion to Germany being imminent having got about; but still the weakness was not such as to take out very much of the recent rise. The markets on Thursday when the rate was advanced were prepared for a harp fall, and after a short period of firmness, there was an immediate decline of 2 to 5 per cent. all round. North Eastern, as we have stated, went to 167, a decline of 71 from Tuesday, and of 5 for the day; North-Western to 143, a decline of 5 from Tuesday; Great Western to 103, a decline of 41; Brighton to 67 68, a decline of 3; Caledonian to 1101 11, a decline of 4; Great Eastern to 431 44, a decline of  $2\frac{1}{2}$ ; Chatham preference to  $62\frac{1}{2}$  63, a decline of  $2\frac{1}{2}$ ; and Chatham ordinary to 231 3, a decline of 2. Other railway stocks fell in proportion. As we have stated, it was in fact all but impossible in the afternoon of Thursday to do business, obbers being unwilling to buy, even at the low prices which were touched, and notwithstanding a general feeling that stocks were getting below their intrinsic value, and that a speedy rise would take place when the momentary panic was To-day the market continued in very nearly the same state, except to the very close. There was a farther fall in the leading stocks of 1 to 2 per cent., the fall for the week, as will be seen from our usual list, ranging from 93 in North-Eastern to between 1 and 2 per cent. in one or two stocks where the advance has been less speculative, as holders were more firm. Among those which have been least affected, Chatham and Dover Ordinary holds the most prominent place, the recent buying having been exceptionally strong, in consequence of the very favourable traffic returns.

The traffic returns of railways have again been very good this week, and at existing prices the stocks are probably cheaper for investors than they are likely to be again. It is barely possible that a farther advance of the Bank rate may extinguish 1 or 2 per cent. more of the recent rise, and as the market may be in suspense for a day or two, there is perhaps no need for hurrying in to buy. Still the opportunity is well worth

attending to by investors, when railway property is growing s

rapidly in intrinsic value as is now the case.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

Messrs Jay Cooke, McCulloch, and Co. are now prepared to deliver the provisional scrip receipts of the United States Funded loan in exchange for the allotment letters and deposit receipts held by the subscribers. They also notify that they will continue to receive payments in full under discount at

Bank of England rate.

JOINT STOCK BANKS.—These shares have moved steadily upwards, and to-day the market has ruled firm, there being an active inquiry for London and Westminster, which close at an advance of  $1\frac{1}{2}$  on the week. Union of London and Provincial of Ireland have risen 2; London and Provincial and Imperial,  $1\frac{1}{2}$ ; Chartered of India, Hong Kong, and Shanghae, 1; Alliance,  $\frac{3}{4}$ ; Anglo-Austrian, Chartered Mercantile of India, City, London and County, and Standard of South Africa,  $\frac{1}{2}$ ; Agra, English of Rio, and Consolidated,  $\frac{1}{4}$ . Anglo-Egyptian and Bank of Australasia have given way  $\frac{1}{2}$  on the week.

MISCELLANEOUS.—Considerable depression prevailed in this department towards the close of the week, more particularly as regards Credit and Sewage shares. General Credit and Credit Foncier show a decline of \(\frac{1}{8}\), London Financial \(\frac{1}{4}\), and International Financial \(\frac{1}{2}\) on the week. National Discount shares are 1 better. Crystal Palace stock has given way 1; Ebbw Vale shares are \(\frac{1}{2}\) lower and Madras Irrigation 1. Australian Agricultural and London and Glasgow Engineering, however, have risen 1: and Rhymney Iron \(\frac{1}{2}\).

however, have risen 1; and Rhymney Iron \( \frac{1}{3} \).

The letters of allotment and regret in Earle's Snipbuilding and Engineering Company (Limited) were posted by Messrs Chadwicks, Adamson, Collier, and Co. this evening. The

total number of shares applied for was 9,600.

Telegraph Shares opened fair with firmness, but on the closing of some large speculative accounts a reaction occurred, resulting in a general and important decline. Anglo-Mediterranean stock closed at a reduction of 5, and Anglo-American of 3 on the week. British Indian Extension and French Cables shares have given way \(\frac{3}{4}\); China Submarine and Marseilles and Gibraltar, \(\frac{1}{2}\); British Indian Submarine, \(\frac{3}{6}\); British Australian, Cuba, and Falmouth and Gibraltar, \(\frac{1}{4}\). The only change for the better are \(\frac{3}{4}\) in Great Northern Extension, and \(\frac{1}{4}\) in West India. Telegraph Construction shares have given way 1\(\frac{1}{4}\) on the week, after undergoing various fluctuations, while Hooper's Construction are \(\frac{3}{5}\) lower.

MINES.—This department has not shown any great activity, nevertheless some important movements have occurred in the quotations. A further rise of 15 has taken place in Wheal Buller, while South Wheal Frances show an advance of 5; East Bassett and Tan-yr-Allt have risen 1, Hingston Downs and South Condurrow \(\frac{1}{4}\); but there is a decline of  $2\frac{1}{4}$  in Wheal Seton; 1 in West Chiverton, and \(\frac{1}{4}\) in Caegynon. The only feature in the foreign market is a fall of 2 in Eberhardts on the week; but United Mexican have shown weakness.

EXCHANGES.—The incident of the week in the foreign exchanges is the general turn in favour of this country, which appears to have been occasioned by the rise in the Bank rate. On Wednesday the quotation received by cable from New York was 107½, at which gold would go from this country to America, but to-day it is 108½, at which the export of gold to America would not be remunerative. The continental exchanges have also all turned this afternoon, bills on Frankfort, Brussels, Amsterdam, Vienna, and Paris being all less in demand, and with difficulty finding buyers, even at the higher rates.

The tender for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were to Calcutta 355,000*l*, and to Bombay 45,000*l*.

The minimum price was fixed as before at 1s 10½d on all the Presidencies, and tenders on Calcutta and Madras at 1s 11½d, will receive in full, and on Bombay at 1s 11d, about 33 per cent. These results show a further increase in the demand for means of remittance to the East.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand for gold has been very active during the past week, and in the absence of supplies 401,000\(\ell\) in bars, sovereigns, and foreign coin has been withdrawn from the Bank. We have no arrivals to report. The John Elder, for the Brazils, took 25,000\(\ell\); the Delta, for Alexandria (sovs.), took 62,000\(\ell\); the Delta, for Galle, took 11,270\(\ell\); the Delta, for Bombay, took 600\(\ell\); the Delta, for Madras, took 4,400\(\ell\) About 44,000\(\ell\) in American eagles has been shipped to New York.

Silver has been in good demand, and sales have been effected at 6018d to 60½d per oz standard. Since the rise in the Bank rate of discount this day the market has become quieter, the first-named price being about the current quotation. The Java and the Deutschland, from New York, brought 24,000l; the Poonah, from Alexandria, brought 5,300l; the Douro, from the Brazils (sundries), brought 31,000l. The P. and O. steamer Delta took 5,000l to Bombay; with this exception the shipments have been exclusively to the continent.

Mexican Dollars.—Owing to the very limited supply of the old coinage, a considerable rise in price has been established, sales having been made at 604d per oz. The new coinage has been sold at 594d per oz. The Peninsular and Oriental steamer, Delta," took 26,000% to Hong Kong and 1,000% to Shanghai.

Exchange on India for Banks' drafts at 60 days' sight is is 11½d to is 11½d per rupee. Tenders for the India Council bills were received yesterday. Applications on Bombay at 1s 11d received 33 per cent, and in full on Calcutta and Madras at 1s 11½d. The minimum, as before, was is 10½d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9\frac{3}{4}\text{dto }77s 10\text{d per oz std}; \text{ \text{\text{\text{ditto refinable, }78s per oz std, last price; } United States gold coin, 76s 3\text{d per oz.} Silver—Bar silver, fine, 5s 0\frac{1}{3}\text{d per oz std, last price; } \text{\text{\text{ditto containing 5 grains gold, 5s }1\frac{1}{4}\text{d to 5s }1\frac{1}{3}\text{d per oz std, last price; } \text{\text{Mexican dollars, }4s }11\frac{1}{4}\text{d to 5s }0\frac{1}{4}\text{d per oz, last price.} \text{\text{}}

According to the Gazette return the imports of the precious metals during the week ended September 20 were:—Gold, 52,253l; silver, 65,694l. The exports were:—Gold, 680,872l; silver, 326,443l.

The sum of 892,000l was withdrawn from the Bank of England to-day.

FAILURES AND EMBARRASSMENTS.—The following are announced:—

Messrs Keep, Parsons, and Co., of Guildhall chambers, Basinghall street, in the Australian trade. Estimated liabilities, 120,000l.

Mr Charles William Ryder, merchant, trading at Liverpool as James Ryder and Sons, at Manchester, as J. O. Ryder and Co., and at Pernambuco, as James Ryder and Co. Estimated liabilities, 350,000%.

Coupled with the failure of Messrs Muir, Brown, and Co., at Glasgow, the above makes three considerable failures within 10 days. At a meeting of Messrs Muir, Brown, and Co.'s creditors an offer of 6s per £ was made, and a committee of investigation was appointed.

#### NOTICES AND REPORTS

#### STOCKS.

Chilian 3 per Cent. Loan.—By the 47th redemption, bonds representing 10,500l have been purchased.

India 5 per Cent. Enfaced Paper.—The India Council have given notice that the 5 per cent. loan of 1856-57, amounting to 13,500,090l, will be paid off on the 16th of January, 1872, but that holders may receive in substitution a new issue, to be called "the Transfer Loan of 1872," bearing 4½ per cent. for seven years, and 4 per cent. thereafter, such loan not to be liable to be paid off until January, 1882.

RAILWAY COMPANIES.

Caledonian,—The following is an analysis of the revenue accounts for the half-years ended July 31, 1870 and 1871:—

7.0	1870.		1871.
Gross receipts	1,002,047 484,337	**************	1,070,843 503,620

Total Tolo 93 2003			

debenture stock.

Kettering, Thrapston, and Huntingdon.—The receipts for the past half-year amounted to 11,174l, and for the corresponding half of 1870 to 8,918l, showing an increase of 2,256l. After deducting all expenses, 4,322l remained, which would admit of a dividend at the rate of 5 per cent. per annum on the Consolidated A, or preferred stock of the company, and of 2 per cent. per annum on the B, or ordinary stock, leaving a balance of 161l.

Lancashire and Varkeling L.

Lancashire and Yorkshire-London and North-Western,

terms of an amalgation have been arranged between the directors of these two companies upon the basis that the Lancashire and Yorkshire ordinary dividend shall always be ‡ per cent. per annum above that of the London and North-Western.

Western.

Midland Great Western of Ireland. — Capital expended,
3,810,134l. The traffic receipts for the past half-year amounted
to 159,477l, and for the corresponding half to 123,180l, showing an increase of 36,297l, or about 29½ per cent. To the
159,477l was added 3,853l for receipts on the Royal canal,
1,764l for rents, 61l for transfer fees, 83l for interest on
Government stock, and 2,704l for dividend on Great Northern
stock—total, 167,943l. From this was deducted 87,525l for
expenditure on the railway and canal, and 35,911l for interest expenditure on the railway and canal, and 35,911*l* for interest and Great Northern and Western rent, and loss on Athlone and Galway Railway, leaving 44,507*l*, to which was added 10,566*l*, surplus from last half-year, making 55,073*l*. Out of this the directors recommended a dividend at the rate of 5 per cent has anything on the preference stock, and 4 per cent per cent. per annum on the preference stock, and 4 per cent. per annum on the consolidated stock, amounting to 43,144l, leaving a balance of 4,430l. The company will receive 55,000l for the transfer of the telegraphs to Government.

North British.—The following is the revenue account epito-ised for the half-years ended July 31 in 1870 and 1871:—

Gross receipts		1870. £ 737,414 407,189	**************	1871. £ 764,165

Of the capital increase, 103,500l was due to the conversion of "Lien stock." During the half-year, 263,253l debenture stock has been issued. The earnings on the Coatbridge line are stated to have been satisfactory. The North British have agreed to work the Forth and Clyde Junction Railway for 30 years, at 50 per cent. gross receipts. The following extracts from the report show that the rivalry with the Caledonian still continues :

After protracted opposition on the part of the Caledonian company before both houses of Parliament, the North British, Arbroath, and Montrose Railway Bill was passed. Under an agreement, this line will be worked, managed, and maintained in perpetuity by the company as part of the North British system. On the application of the North-Eastern and Great Northern companies, facilities were granted to them for passing their English and Scotch traffic over the railway; but the clauses submitted by the Caledonian, on the ground that their local traffic required protection, but really to limit the competitive powers of the new route, were refused, and provisions adopted which remove any doubt as to the company's powers to use the Montrose line for all the purposes of through and local traffic contemplated by Parliament when, in passing the Scottish North-Eastern Amalgamation Act, it recognised the necessity of a new line to Aberdeen. The Montrose railway will, along with the Tay Bridge, secure to the company's short and most in passing the Scottish North-Eastern Amalgamation Act, it recognised the necessity of a new line to Aberdeen. The Montrose railway will, along with the Tay Bridge, secure to the company's short and most effective route between the north of Scotland on the ene hand, and Dundee, Edinburgh, Glasgow, and England on the other. Although the North British Company are precluded from contributing towards the undertaking, the directors individually will subscribe for shares, and they trust that the North British shareholders generally will identify themselves with a railway which will be under their control, and worked entirely in their interests. From the report by the engineer it appears that satisfactory progress is being made by the contractors with the Tay Bridge works.

North British, Arbroath, and Montrose Railway.—Capital, 170,580l, in 10l shares. This new line will connect Dundee,

North Bruss, Arbroats, and Montrose Rathedy.—Capital, 170,580l, in 10l shares. This new line will connect Dundee, Arbroath, and Montrose, and will be worked by the North British in perpetuity. The North British directors having subscribed for a portion of the capital, only 150,000l remains for allotment. The new line will form part of the North British through route to Abordson. British through route to Aberdeen.

Portpatrick.—The revenue for the half-year was 12,326l, and the net balance 6,818l. The sum divisible amounted to 5,418l, out of which they recommended a dividend at the rate of 2 per cent. per annum, free of income tax, being an increase of one

cent. per annum, tree of income tax, being an increase of one-half per cent. as compared with the corresponding period of last year, carrying forward 1,065l.

Tottenham and Hampstead.—The adopted report stated that the gross receipts for the half-year had been 4,198l, of which 2,904l had been placed to the credit of net revenue. After payment of the 5 per cent, dividend on the Great Eastern Railway stock, the amount standing to the credit of the net revenue account was 11,750l. No substantial progress has yet been made in the settlement of the affairs of the company.

#### [CONTINUED FROM PAGE 1156.]

that the coupons of this company's land grant first mort-gage bonds will be paid on and after Monday, the 2nd of October.

#### ASSURANCE COMPANIES.

North British and Mercantile Insurance.—A dividend of 12s 6d per share is payable for the half-year.

#### MISCELLANEOUS COMPANIES.

Baltic Corn Association.—Capital, 100,000l, in 100l shares. Messrs Johnston, Roos, and Co's. commission business will be taken over, without payment for goodwill except out of

British Chemical and Agricultural Manure, Limited.—Capital, 50,000l, in 5l shares. This new undertaking will purchase and extend the business of Messrs S. E. Crow and Co., the price for which is 12,3111, one half in shares. The business is the manufacture of sulphate of ammonia, sulphuric acid, nantha benzole, anthracene, and manures. The residual products of gas works will be employed, and gas companies will be supplied with the chemicals used in their purifiers. The property, 5½ acres of freehold land, is situated on the shore of Barking Creek.

Co-operative Coal Supply, Limited.—Capital, 50,000l, in 1l shares. The Blakelow and Greasley Side Colliery will be purchased, and coal will be delivered for cash to the shareholders residing within and near the metropolis, at a price sufficient to cover working and other expenses, including a small sum for contingencies, thus saving, it is estimated, at

least 5s per ton to the consumers.

Fal de Travers Asphalte.—It is annunced that 5,000 shares in the Birmingham Val de Travers company, and 2,000 shares in the North of England Val de Travers company, making 7,000 shares of 5l each, fully paid, or 35,000l, will be distributed to the shareholders of the Val de Travers company whose names are on the register on the 12th October next.

#### MINING COMPANIES.

#### Alamillos.—Dividend declared of 1s 3d per share.

shares; deposit 5s per share. Messrs Gunn and Co. have received applications for the unallotted portion of the share capital. The property, situated to the south of the "Van Mine" and in the same formation, is held under a lease, twenty years unexpired, at a royalty of the horse will all be taken in

#### Fortuna Lead.—Dividend declared of 3s per share.

Lanestosa Lead and Zinc Mining, Limited.—Capital, 24,000l, in 21 shares. It is proposed to purchase and work the lead and zinc mines of Lanestosa, in the Spanish province of Vizcaya, about 40 miles from Bilbao and ten from Limpias, the port of shipment. The purchase money is to be 8,000l—namely, 3,500l in cash, and the remainder in shares, with 75 per cent. paid up.

#### Linares Lead .- Dividend declared of 5s per share.

#### COMMERCIAL EPITOME.

#### FRIDAY NIGHT.

FRIDAY NIGHT.

The grain trade at Mark lane to-day was much depressed, and the tendency of the quotations was downwards. The quality of the English samples exhibited showed a general falling off, and prices receded 1s to 2s per quarter. Foreign wheat met a dull sale at Monday's reduction of 1s per quarter. Flour ruled dull at drooping currencies. New malting barley was quoted at from 35s to 40s per quarter. Maize and oats were lower to sell. Beans and peas were unchanged in value; linseed and rapeseed dull. The week's imports of foreign and colonial produces into London have amounted to 20,270 qrs of wheat; 2,590 barley; 54,360 oats; 740 beans; 12,850 maize; 1,010 sacks of flour.

1,010 sacks of flour.

At Liverpool to-day the wheat market was very inactive, while at Wakefield a decline of 1s to 2s per qr took place.

The Liverpool cotton market has been very dull throughout the past week, and the transactions have been on a rather limited scale, the total sales of the week amounting to 55,260 bales, of which the trade have taken 45,500 bales; speculators and exporters, 19,760 bales. The import of the week reaches 22,080 bales; the actual exportation, 8,518 bales; and to-day's stock is estimated at 467,710 bales. Quotations show an occasional decline of 1s 6d to 1s 8d per lb except for Bengal cotton. sional decline of 1s 6d to 1s 8d per lb, except for Bengal cotton, which remains unchanged.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended September 21, 1871:—

	Imported.

m. 4-1	00.001		11.100				

At New York on Sept. 21, middling Upland cotton was quoted at 20 cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, August 22:—We are in receipt of advices from Liverpool by wire to the 19th inst., when the quotation for fair Dhollomb, extranged with the property of the pro tion for fair Dhollerah cotton was still 6% d per lb, the tone of the market being however steadier. During the early part of the week, owing partly to the unfavourable news from home and partly to the intervention of some native holidays, business was almost at a standstill, but within the past day or two, the improvement reported in the above-mentioned telegram, slight though it is, has led to an increased inquiry among shippers, and purchases to the extent of about 2,000 candies have been reported, prices closing 3 rs to 4 rs per candy higher than for last mail. The stock of cotton in Bombay continues steadily to decrease, being now generally estimated at less than 25,000 candies, of all descriptions, a large proportion of which is very inferior in quality. Exporters have consequently been turning their attention latterly to cotton for delivery after the monsoon, and purchases of sawginned Dharwar have transpired at prices ranging from 205 rs to 209 rs per candy. A contract for Dhollerah (Joriah) has also been reported at 200 rs delivery in 3 months, but dealers as a rule are unwilling to sell forward, preferring to take their chance of the market when the cotton comes forward. We have again to report a week of almost uninterrupted fine weather, but we are glad to say that as yet no serious damage has been sustained by the crops throughout the districts. Rain is now however much wanted everywhere, and during the next few weeks the weather will be watched very anxiously. We have been favoured with the following reports from our correspondents up-country. Khamgaum—The crops are much in want of rain. From Akote the accounts are excelmuch in want of rain. From Akote the accounts are excellent. Sheagaum—The crops look well, but rain is wanted. Omrawuttee—There has been hardly any rain during the week, but the crops are still healthy. Wurdah—The rainfall has been slight, but the crops are in excellent condition. Broach—Crops are in good condition, but rather backward. The acreage under cotton is generally much the same as last year. Tinnevelly—We have had a telegram dated 19th, quoting 7d, c. and f., with few sellers.

Export of Cotton from Bombay to August 21.

The Imperial Ottoman Bank has furnished the following report, dated Alexandria, September 8:—The whole of last week passed without any change worth noting. This week the arrival of a small parcel of new cotton of H. H. the Khedive, which will be offered at the auction of the 11th, has tended to keep our market quieter than might have been expected, considering the very encouraging advices from expected, considering the very encouraging advices from Liverpool. The week's business has been only small, and holders having very little stock have been very independent, and offered sparingly. Contracts are midholders having very little stock have been very independent, and offered sparingly. Contracts are without inquiry, at 10\frac{1}{3}\text{d} to 10\frac{2}{3}\text{d} per lb for fair, November delivery; 10\frac{1}{4}\text{d} per lb for fair, December delivery; 10\frac{1}{4}\text{d} to 10\frac{2}{3}\text{d} per lb for fair, January, delivery. The following quotations are nominal — Fully fair, 9\frac{2}{3}\text{d} to 9\frac{1}{2}\text{d} per lb, f.o.b.; good fair, 9\frac{2}{3}\text{d} to 10\text{d}, ditto. Shipments from August 25 to September 7—England, 3,484 bales; France, 110; Italy, 178; Austria, 87—total, 3,859 bales. The colonial produce markets have been without important feature this week. Sugar has sold slowly, and West India qualities show a decline of 6d on the week. The estimated stock in the United Kingdom is 158,028 tons, against 215,135 ast year, and the quantities of East India afloat for the United

Kingdom and the continent (not including shipments from Java) is 30,300, against 31,000 and 34,500 tons in 1870 and 1869 respectively. Coffee has ruled very firm, good ordinary native Ceylon being worth 59s, and good ordinary native Mysore 59s 6d to 60s. The quantity of East India coffee affoat for the United Kingdom and continent (exclusive of Government exports for Java) is 13,700 tons against 18,220 tons in 1870, and 14,000 tons in 1869. Both China and Indian teas have maintained full rates. Rice has China and Indian teas have maintained full rates. Rice has been in fair demand at steady currencies. The quantity affoat to the United Kingdom and Continent to September 1 is 121,000 tons against 176,800 in 1870, and 152,200 in 1869.

Rice has met a more active inquiry.

The following report, dated August 21, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—We have to report a very dull fortnight in exports of produce. The clearances outwards with cargoes have been moderate, and as a result the aggregate of coffee shipments continues to show a large deficiency as compared with those at the same time last large deficiency as compared with those at the same time last year, as may be seen below:—

Favourable advices of coffee in the home market have led to a steady inquiry for plantation parchment, of which during the fortnight fully 100,000 bushels have been sold, a good deal of which has been high-grown, at rates ranging from 12s 6d to 12s 10½d. In clean Ouvah native the transactions have been

restricted by the smallness of supplies.

Messrs Southey, Balme, and Co., thus refer to the wool sales:—The attendance of buyers continues very numerous, sales:—The attendance of buyers continues very numerous, and the competition, notwithstanding the advance in value, shows no abatement. In all washed and scoured descriptions the improvement rules fully at 1½ to 2d per 1b, while half-bred and Leicester sorts, influenced by the great advance recently established in English wools, command an even larger proportionate advance. In grease wools, on the other hand, quotations show no change as compared with the best rates of July, which at that time ruled disproportionately high, owing principally to an active demand for America, which has now somewhat subsided. The present position of the market seems to be the result of necessities caused by a largely increased consumption in the face of a given supply of largely increased consumption in the face of a given supply of raw material of comparatively moderate extent, but though the actual position would therefore appear to be legitimately based, some check to consumption from the rapid enhance-

ment in value will probably be unavoidable.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on August 15, thus refer to the Cape wool trade:—The steamship Sweden arrived in Table Bay on the 6th inst., bringing news of the lively course of the London wool sales. This has caused much excitement in our market, and there being so small a stock to select frcm, prices of all kinds are extrava-gantly high. The arrivals from the country are even more limited than before, but as more genial weather is now setting in, the carriers will be enabled to travel more quickly, and we shall soon have liberal supplies of all kinds of produce. shall soon have liberal supplies of all kinds of produce. Uitenhage scoured is much inquired for by continental buyers, one very choice parcel having been sold at 1s 7½ d within the last day or two. The supply of this kind will be small for some time to come, as most of the washing establishments are temporarily closed for want of grease wool. Country scoured is in good demand, at about ½d advance on our last quotations. Fleecewashed is much wanted, but very little has come in. The American demand still absorbs all long-stapled grease wools. quotations. Fleecewashed is much wanted, but very little has come in. The American demand still absorbs all long-stapled grease wools. Some very choice parcels have been sold at grease wools. Some very choice parcels have been sold at 7\frac{3}{4}d. Washing descriptions are very scarce. Grease—Full-grown, superior, 7d to 7\frac{3}{4}d; fine light for scouring, 6d to 6\frac{1}{2}d; heavy and inferior, 5d to 5\frac{3}{4}d. Fleecewashed—Superior, clean, 10\frac{1}{2}d to 11d; good average, 9\frac{1}{2}d to 10\frac{1}{2}d; inferior and heavy, 8d to 9d. Snow-white—Prime Uitenhage, scoured, 18d to 19d; second quality do., 16d to 17d; superior country scoured, machine washed, 16\frac{1}{2}d to 17d; superior country scoured 16d to 16d; inferior to good country scoured 13\frac{1}{2}d scoured, 16d to 161d; inferior to good country scoured, 131d

Messrs Kilburn, Kershaw, and Co. report:—There is no change to report in the silk market since the date of our last circular (7th instant), the prices of China silk continue as nearly as possible the same and are firm, with a fair daily business doing. Canton silk is hardly so current, much of the recent arrivals of market Tsatlee having proved inferior in quality, and in consequence difficult of sale at 16s; good and fine parcels still continue to command full rates, and are readily taken. Loong Kongs are flatter, the quantity beginning to increase, and the quality decidedly falling off. Japan and Bengals are both neglected still, the latter being most difficult of sale, owing to the refusal of the mill hands to work this silk, while Chinas are so abundant. In Japans, ordinary Mybash can only be forced to sale, and then at most irregular prices. The deliveries of all silks but Bengal are very good, being from 1st to 20th instant:—China, 2,315 bales; Canton, 846; Japan, 565; Bengal, 205—total, 3,931 bales.

Annexed is Messrs W. Moran and Co.'s indigo report, dated Calcutta, Aug. 18:—The season is now so nearly closed in

Cascutta, Aug. 18:—The season is now so nearly closed in Lower Bengal that there is nothing of interest for us to say; by next mail we hope to be able to give you a detailed estimate of various districts. So far as we can judge at present, the total out-turn will be very similar to that of last season, or about 25,000 maunds. From Tirhoot the advices continue pretty favourable, although their are still a good many com-plaints of poor produce. In Chuprah some factories have suffered from too much rain; still the out-turn is expected to be a much better one than was the case last year. In Chumpagun the first cuttings are nearly all worked off, and there is at present every prospect of a very good return from the Kliconties. In the Benares and North-Western provinces there has been a continuance of heavy rain, and a good deal of plant has also been lost by a rise of the rivers; the Khoonties are yielding badly, and planters generally are far from sanguine of getting much from the Assaroo sowings, which have suffered so much from the violence of the rains, that it is have suffered so much from the violence of the rains, that it is doubtful whether fine weather now can do anything to improve them. Exports of indigo from Nov., 1870, to 17th Aug., 1871:
—To Great Britain, 16,689 chests; France, 515; Trieste, 2,790; foreign Europe, 250; America, 2,536; Gulfs and Leyant, 1,782—total, 24,562 chests.

The annexed is dated New York, Sept. 7:—The volume of traile is increasing, and the leading department, as dry goods, creating boots and shoes hardware and the raw materials.

greceries, boots and shoes, hardware, and the raw materials of manufactures, present an appearance of activity in striking contrast with the dull summer months. Fortunately there is an excellent basis for an exceptionally active season. The harvest proves to have been, on the whole, an excellent one, and the demand of our cereals to supply European deficiencies is very active. The cotton crop, in spite of the recent gloomy is very active. The cotton crop, in spite of the recent gloomy varietinations to the contrary, is turning out a fair one. The petroleum wells are yielding bountifully, and the other leading export staples are abundant. The success of Secretary Boutwell's loan, followed by the announcement of the redestingtion of the old five-twenties, has given increased strength to the whole financial situation, which cannot but be felt in every department of business. Money remains easy, but the petiod approaches when somewhat higher rates may be expected as a result of increased remittances, to the interior for pedted, as a result of increased remittances to the interior for rearketing the surplus crops of cereals and other staple products, but without some great and successful effort of stock speculators to create an artificial scarcity of currency, no such speculators to create an artificial scarcity of currency, no such severe stringency as has been experienced in past seasons is likely to be felt. The gold market is firmer, while foreign exchange is abundant and easy. As regards prices of the leading staples domestic and foreign, there is little change. The principal articles of subsistence are cheap; some of them, as hog products, exceptionally cheap, which is calculated to materially increase consumption. The tonnage supply continues unusually light, and with free shipments of the leading staples good rates prevail staples, good rates prevail.

## THE COTTON TRADE.

LIVERPOOL.—SEPTEMBER 21.

The cotton market has been quiet throughout the week, and closes with a slight decline in prices. The Bank rate has this day been raised to 3 per cent. Sea Island has been in fair day been raised to 3 per cent. Sea Island has been in fair request, particularly the lower qualities, the prices of which are rather dearer. American has been more freely offered, and has given way 1/2 d to 1/2 d per lb, the lower qualities especially being difficult of sale. New York advices to the 21st instant quote middling Upland 20 cents, costing to sell in Liverpool 10/2 d per lb, by steamer. Brazil has been in limited demand, at a partial decline of 1/2 d per lb in the middling, and 1/2 d per lb in the good and fine qualities. Egyptian has been dull of sale, and prices are quoted 1/2 d per lb lower. East Indian descriptions have been in limited demand, and with an increased supply offering, prices generally show a decline of 1/2 d per lb, with the exception of the good classes of Oomrawuttee and Broach, which, from scarceness, command full rates. scarceness, command full rates.

in cotton "to arrive" the transactions have been to a fair extent, but at rather easier prices. The latest quotations are, yesterday—American, basis of middling (from any port) not below good ordinary, delivery September, 973d, 98d; November, 92d, 978d; Nov.-Dec., 978d: not below low middling, 10th October delivery, 92d; Charlston or Savannah, new crop, not

below good ordinary, Oct.-Nov. shipment, 9½d; New Orleans, not below strict ordinary, October delivery 9½d; new crop, not below good ordinary, November shipment 9¾d; Dhollerah, fair new merchants, due 7½d; late June sailing, 7½d; fully f nir, May-June sailing, 7¾d; Oomrawuttee fair new merchants, August sailing, canal 7½d. And this day, American, basis of middling (from any port), new crop, not below good ordinary, October-November shipment 9½d, 9½d; November-December, 9½d; Mobile, not below good ordinary, August sailing, 9¾d per lb.

The sales of the week, including forwarded, amount to 65,260 bales, of which 10,940 are on speculation, and 8,820 declared for export, leaving 45,500 bales to the trade.

September 22.—The sales to-day will probably amount to 8,000 or 10,000 bales, with a quiet market.

An increase of import compared with the same date last year of	661,030
An increase of quantity takes for consumption of	472,200
An increase of actual exports of	277,940
An increase of stock of	19,000

The above figures show:-

In speculation there is an increase of 270,680 bales. The imports this week have amounted to 22,082 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to September 15) is 58,000 bales, against 25,000 bales at the corresponding period last year. The actual exports have been 45,500 bales this week.

LONDON.—SEPTEMBER 21.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

Since our last the market has continued quiet, and the business done on the spot has been at prices rather in favour of buyers. For arrival, the transactions show an irregular

of buyers. For arrival, the transactions show an irregular decline of \$\frac{1}{2}\text{d}\$ to \$\frac{1}{2}\text{d}\$ per lb.

Sales to arrive—400 bales Tinnevelly, at 7\frac{1}{2}\text{d}\$ to 7\frac{1}{2}\text{d}\$. April sailing, July to Sept. shipment, for good fair; 1,000 Western Madras, at 6\frac{1}{2}\text{d}\$ to 6\frac{1}{2}\text{d}\$, June sailing, July to Sept. shipment, for fair; 100 Coconada, at 6\frac{1}{2}\text{d}\$, July shipment, for fair red; 600 Dhollerah, 7\frac{1}{2}\text{d}\$ to 7\frac{1}{2}\text{d}\$, June to August shipment and sailing, for fair; 1,500 Bengal, 6d to 6\frac{1}{2}\text{d}\$, June sailing and

July to Sept. shipment, for fair; for forward delivery, 500 Dhollerah, 7\d, October, for fair—total, 4,100 bales.

#### NEW YORK.—SEPT. 8.

NEW YORK.—SEPT. 8.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sept. 8. From the figures thus obtained it appears that the total receipts for the seven days have reached 9,137 bales, against 7,579 bales last week, 7,844 bales the previous week, and 7,630 bales three weeks since, making the total receipts since Sept. 1, 1871, 9,137 bales, against 11,104 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 1,967 bales. The a decrease since Sept. 1, this year, of 1,967 bales. The exports for the week ending this evening reach a total of 10,193 bales, of which 10,193 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 95,390 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :-

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 6,489 bales, while the stocks to-night are 40,667 bales more than they were at this time a

year ago.

We have had a buoyant and, considering the small stock available, a fairly active market the past week. Holders have shown great confidence and have offered stock sparingly, while buyers, both for export and home consumption, have bought to a fair extent, and would have bought more largely if they could have found desirable stock. This upward turn in prices is due to the animation at Liverpool, probably growing out of reports of further injury to the crop and an anticipated short reports of further injury to the crop and an anticipated short supply from this side, with the expectation that the early receipts will be less free than last year. There is a very strong

undertone to the market, growing out of the present large consumption, which results in this extreme sensitiveness to every unfavourable rumour with regard to the crop. To-day, with less animation at Liverpool, the close here was more quiet, but steady, quotations remaining at yesterday's advance. For forward delivery there has been an active movement, and prices advanced to a point higher than prices for cotton on the spot, but at the close they were off a little. Low middling closed at 19½c for September, 19¼c for October, 19¼c for November, 19¼c for December, and 19½c for January. The total sales of this description for the week are 89,500 bales, including 1,500 free on board. For immediate delivery the total sales foot up free on board. For immediate delivery the total sales for up this week 12,877 bales, including 5,474 for export, 5,413 for consumption, 640 for speculation, and 1,350 in transit. Of the above, 607 bales were to arrive. The following are the closing quotations :

interest of the later and		nd and	Mobile.		New Orleans.		Texas.

MEW YORK, Sept. 15.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 13,000 bales; ditto, since 1st September, 24,000 bales. Shipments to England, 16,000 bales. Total sirve 1st September, 29,000 bales. Stock at all ports, 86,000 bales. Mindling Upland, 94d, cost and freight, per steamer.

NEW YORK, Sept. 19.—The receipts of cotton at all United States' ports for the last four days have been 9,000 bales. Shipments to England, 2,000 bales. Middling Upland, 91d, cost and freight, per steamer.

## MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, September 21.—The tone of our market is now very depressed, and business for some days almost at a standstill. Both buyers and sellers seem anxious to curtail their operations, as there is a feeling of distrust owing to the unremunerative state of trade generally, and the prospect of dearer money adds to the prevailing stagnation of trade. The home trade demand is confined to its immediate wants both in yarns and goods. As to the demand for shipping it is of the most retail character for the present, as buyers are holding off in the expectation that the easier state of cotton and the necessity of producers to sell will shortly lead to a lower range of prices. To-day there is hardly anything doing, though producers are willing to make a concession in order to though producers are willing to make a concession in order to seil.

Messrs Alexr. Collie and Co. have received the following talegram from Manchester :- Our market continues dull in tone with prices tending in favour of the buyer. This is more particularly the case as regards yarns, which have declined a farthing per pound since Tuesday.

BRADFORD.—There is very little business doing in the wool nearket. Extreme rates are still required by staplers, who complain that it is impossible to replace stocks at the rates current in this market. Noils and brokes are still in good request, and prices are very firm. The yarn market shows little change. The great firmness of the wool market tends

the change. The great firmness of the wool market tends to the maintenance on the part of spinners of extreme quotations. There is no appreciable change in the piece market. Business for all quarters is very limited. Prices are very firm. Dundee.—There have again been numerous arrivals of flax from the Baltic and Archangel during the past week, notwithstanding which the market remains firm. The inquiry for the better descriptions has been active, and a considerable amount of business has been done in these at prices in some instances slightly in favour of sellers. In the medium and lower descriptions there has been little passing and prices and lower descriptions there has been little passing, and prices of such are nominally unaltered. Tows continue in active demand, and prices of all kinds are well maintained. Jute continues quiet, but prices are upon the whole rather firmer for goods on the spot. Linens continue to be in good request, both for the home trade and for some of the foreign markets, and manufacturers are well supplied with orders. Jute goods are also in extensive demand. are also in extensive demand.

#### CORN.

# AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 8.

There has been a good degree of activity in the markets for flour, meal, and grain, and prices in some particulars show a decided advance. Flour has continued to arrive but modestately; the severe losses which were incurred by millers who had a carly consignments to this market of flour from new jately; the severe losses which were incurred by millers who hade early consignments to this market of flour from new winter wheat, appear to have caused a material reduction of production, and a comparative scarcity is consequently felt at the moment. The home trade had been buying freely, but their orders, as well as those from the provinces, the West Indies, and South America, were easily filled, but when English shippers wanted large lines they found it extremely difficult to procure them. To-day, a decided advance in Liverpool caused some excitement in this market, and lines of shipping extra State and Ohio were in demand at \$6 to of shipping extra State and Ohio were in demand at \$6 to

\$6.10, and in some cases held at \$6.25 and upward; low super-fine, as well as good trade and family brands, were also in brisk request, and the sales of flour to-day were hardly less brisk request, and the sales of flour to-day were hardly less than 22,000 bbls. Rye, flour, and corn meal have been in good demand, and close buoyant. Wheat has been in brisk request for export. Receipts have been but moderate and the available supply small each day, so that shippers have been buyers for early arrival; prices are consequently higher, but the steady advance in ocean freights and the depression in sterling exchange have checked the advance and given an uncertain tone to the market. Receipts have been liberal at the west, and the visible supply is materially increased, but the receipts of spring wheat have not been large. To-day, with a decided advance in Liverpool, our market opened excited, with \$1.45 paid for No. spring, and \$1.60 for amber winter, but shippers again encountered higher freights and low exchange, which caused a flat closing, with nominal quotations \$1.40 to \$1.43 for No. 2 spring to arrive and on the spot, \$1.48 to \$1.50 for red winter, and \$1.57 to \$1.58 for amber ditto. Corn has been gaining strength, and to-day advanced Corn has been gaining strength, and to-day advanced 2c on an increased export demand, with some revival of speculation. There has been so little taken for Great Britain in some time past that her markets begin to feel the prospective deficiency, and we should have explained in wheat that orders for corn, though not large, are very pressing, and crowd wheat out of the freight engaged for it. To-day the demand for mixed corn was active, and it closed firm at 70c affoat, with yellow quoted at 71c to 72c, and white at 73c to 75c.

#### LONDON MARKETS.

#### STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The harvest has now been fairly completed throughout the British Isles, with the exception of the more northerly districts, where the white corn crops are still standing. The estimates of the yield vary very much, and there is reason to believe that it is greater than was at one period anticipated. The quality of the samples now on offer at Mark lane does not equal that of the early exhibits, nor is the condition so good, and much apprehension is experienced lest dition so good, and much apprehension is experienced lest this falling off should become more confirmed as thrashing is proceeded with. Nevertheless, the grain trade has ruled dull throughout the week, and prices have had a downward tendency in consequence of the limited demand from the milling trade. Sales of foreign wheat have been pressed owing to the advance in the Bank rate and to the general prospect of the money market, which intimidates holders. English wheat has given way 1s to 2s per quarter since our last report, while all descriptions of foreign are fully 1s lower. Stocks on hand are large, and are yet on the increase, the imports having been on a liberal scale; while the number of wheat-laden vessels on passage is in excess of last year, the actual number being 390 against 340 in 1870. Flour has further given way 6d to 1s per sack, in sympathy with the wheat market.

New malting barley is quoted at 36s to 42s per quarter, but transactions have been very limited, Grinding corn has sold at late rates. Maize and oats have not maintained last week's advance, and close at a decline of 6d to 1s per quarter. Beans and peas have tended downwards in price.

The following statement shows the imports and exports of breadstuffs, &c., to and from the United Kingdom during the first three weeks of the season, compared with the corresponding periods in the three previous years:—

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 85 grain and seed-laden vessels have arrived at ports-of-call, viz.:—37 wheat, 15 maize, 6 barley, 8 rye, 7 beans, 10 linseed, 2 cotton-seed. To-day, in addition to the above, 51 are telegraphed. The floating grain trade has been quiet, and prices in general tending downwards. Wheat—At first slow sale; later an active demand ensued at 6d advance, but to-day is again quiet. Maize—At first firmly held; later the demand flagged. Barley—The few cargoes offering being more or less imperfect, sales have been difficult to effect. Rye—Several cargoes have been offering, the highest price paid has been 32s for Odessa. The reported sales are as follows:—Wheat—12 arrived cargoes: Marianopoli, 53s and 53s 6d; Ghirka, from Taganrog, 48s 6d to 50s; hard ditto, 47s; Ghenighesk, 52s 6d; Nicopol Ghirka, 52s 6d; Kerch, 52s 6d; Ghirka, from Nicolaieff, 52s and 52s 6d per 492 lbs. Shipped or to be shipped: 24,000 qrs Marianopoli, 52s 6d; red winter, from Montreal or New York, 55s; No. 1 spring, 45s 3d per 480 lbs, net, American terms. Maize—6 arrived cargoes: Moldavian, from Sulina, 31s to 35s per 492 lbs; Bulgarian, from Varna, 26s 9d; Ibrail, 31s; mixed, from New York, 33s 3d per 480 lbs; Odessa, 30s 6d per 480 lbs. Barley—on passage1cargo New Danubian, from Ibrail, 26s 6d per 400 lbs. Shipped or to be shipped—1 cargo Danubian, 25s 9d per, 400 lbs. Rye—3 arrived cargoes: Odessa, 32s; Nicolaieff 31s: Azow and Taganrog, 31s 3d per 480 lbs. Shipping, 2 cargoes: Black Sea, 33s 6d; Odessa, 33s 6d per 480 lbs. Linseed quiet: Arrived 1 cargo Azow and Taganrog, 60s per 424 lbs, A.T., and about 1,700 tons East India from Calcutta, at 61s 9d to 62s 6d per 410 lbs. Rapeseed steady. On passage: 3,000 bags Soumanee, 70s per 416 lbs, A.T., and 300 tons ordinary brown Calcutta, 67s 6d to 68s 3d per 416 lbs. Cotton-seed quiet.

# COLONIAL AND FOREIGN PRODUCE MARKETS TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT,"
MINCING LANE, FRIDAY MORNING.

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a very dull, market with limited sales, although the importers have in some cases accepted easier rates, and refined remains unsettled, partly on account of the rather important contracts made in French loaves for delivery here. The demand for West India has been inactive, sales during the three days amounting to 1,369 casks. Barbadoes by auction was chiefly taken in; a portion seld at 28s to 32s 6d, and grainy, 32s 6d to 34s. The Trinidad concrete bought in last week has been disposed of at 25s 6d. Jaggery unclayed Manila and other low brown sorts are without change, but less readily saleable than of late. At the sale of Java, held by the Netherlands Trading Company on Wednesday, prices showed slight changes. The deliveries continue rather in excess of the landings, and the stock at this port has further decreased to 72,400 tons, which compared with the previous season shows a decrease of 31,000 tons. As regards the kingdom, the falling off amount to about 56,000 tons.

Mauritius.—There have not been any public sales.

Madras.—1,800 bags Jaggery at 20s 6d.

Penang.—At auction 3,296 bags Penang sold at 23s 6d to 26s for brown, and 28s to 31s 6d for low to good yellow.

Manila.-5,000 bags Taal at 21s 3d.

Java.—4,550 bags low brown part sold at 22s 6d. 171 casks from the Cape at 22s.

Foreign Cargoes.—A small cargo of Havana, No. 11, at 27s for the United Kingdom.

Refined —Dry goods have sold at some decline. French loaves (Says) have sold largely for forward delivery at and about 33s to 33s 6d per cwt.

Molasses.—Nearly 600 puncheons have changed hands, the bulk Trinidad at 11s 6d; some Tobago at 11s per cwt.

Rum.—The market is steady, and without any change in prices to report. Leewards sold at 1s 8d to 1s 9 d; Demerara, 1s 9 d, proof. Business in Jamaica at 3s 4d to 4s 9d per gallon for common to fine quality.

COCOA.—The market has been without alteration, and is rather quiet. At the sales this week 622 bags Trinidad, about one-fourth part a ld at previous rates: grey to middling, 65s to 75s; good, 77s to 85s. 185 bags Grenada at 52s to 56s; low quality, 47s to 48s. 159 bags Surinam were bought in at 59s to 60s. Privately a few small sales have been made in Grenada and Gusyaquil, the latter at 52s to 57s per cwt.

Coffee.—At the sale of the Netherlands Trading Company held yesterday some advance upon valuations was obtained. Good ordinary Java quoted about 37 to 37½ cents. Since the previous sale this market has risen several shillings, consequently the result of the above sale did not cause any further change. 1,352 casks 308 barrels and bags plantation Ceylon by auction all sold at last week's rates: dull and grey, 66s to 76s; colory, low middling to middling, 69s to 77s; good to fine, including bold, 77s 6d to 84s. 1,485 bags native were chiefly disposed of, besides several parcels by private contract: good ordinary to real good ordinary, 58s to 59s; bold, 60s to 61s. 164 casks 113 barrels 623 cases 3,777 bags East India sold, including Coorg, at 63s 6d to 70s, and bold at 70s 6d to 77s; a few lots Mysore at 87s to 93s for good to fine; native kinds, 59s to 63s. 338 bales and half-bales Mocha were partly disposed of: mixed short and long berry, 88s to 92s 6d. 1,341 bags Manila part sold at 62s to 62s 6d for good yellow. 256 bags Singapore realised 65s to 68s for good yellow and brown Bontyne. A few lots Jamaica at 61s to 82s fer pale to middling colory. 8,509 bags Costa Rica seld steadily at 61s 6d to 66s 6d for pale, and 67s to 79s for low

midding to superior colory. 662 bags African at 54s to 56s. 619 bags foreign descriptions were partly disposed of: Guatimala, 61s 6d to 64s (2); Santos, 63s 6d; washed Rio, 60s. By private contract business has been done in native Malabar, &c., at 58s 6d to 59s 9d per cwt. The stock is nearly on a par with last year, but the quantity affoat from Colombo new much smaller. Export deliveries this season show 8,100 tons increase. tons incr

tons increase.

The market has been without further alteration this week, and is now steady. At the public sales, comprising 13,279 packages the new season's red and black leaf congou without reserve obtained full prices. Some common Foo-Choo congou sold at 11½d to 11½d; Cantin scented orange peace, 1s 1d to 1s 6½d. Moyune green sold at firm prices, from 1s 3½d to 2s 10½d per lb. Fine grades are occasionally labeled to the decree. Deliveries continue good but the supply effect is d per lb dearer. Deliveries continue good, but the supply afloat is larger than last year.

larger than last year.

RECE.—There has not been any improvement in the demand this week. A floating cargo of Rangoon has sold at 10s 3d for the continent and part of a cargo at 10s 3d, one of broken Rangoon at 8s 9d. On the spot a few parcels White Bengal at 10s 3d to 11s; Madras, 10s 1½d to 10s 4½d; Bassein and Arracan, 10s 1½d to 10s 3d; also some sales of White Bengal, ex quay, at 10s 3d to 10s 7½d; and Ballam, ex quay, at 9s 7½d. At auction 500 bags Ballam from the Cape seld at 10s 3d per cwt.

... 56000 ... 48550 ... 44750 ... 38850 ... 43930 ... 26270

S5GO.—The sound portion of 1,258 bags small grain went at 14s 6d to 15s 6d for grey to fair, with sea-damaged in proportion. 678 bags bold were partly disposed of at 16s 9d for low, and 18s 6d per cwt for

bold were partly disposed to a substitute of the property disposed of a substitute of the property disposed to a substitute of the property disposed of the property dispos and grey at \$\frac{1}{2}\$ to \$\frac{1}{2}\$. Of 1,000 bags reliain, a few lots sold at \$6\frac{1}{2}\$ to \$6\frac{2}{3}\$ for West coast, the remainder being held at \$6\frac{1}{2}\$ d. 1,798 bags Maibar brought \$6\frac{1}{2}\$ to \$6\frac{2}{3}\$ d for half heavy greyish to good brown; a few lots superior bright \$6\frac{2}{3}\$ d to 7d. 99 bags good brown Tellicherry sole at \$6\frac{2}{3}\$ d. Privately, Singapore is now selling at \$6\frac{1}{2}\$ d; Penang at \$6\frac{2}{8}\$ d per lb.

PEPPER.—Several parcels changed hands privately up to  $10\frac{3}{4}$ d and  $10\frac{7}{4}$ d and  $10\frac{7}{4}$ d for Singapore, but at yesterday's sales a further advance was demanded, and 429 bags part sold at  $10\frac{7}{4}$ d, and one lot 11d. 33 cases Tellicherry sold at  $18\frac{5}{4}$ d to  $18\frac{6}{4}$ d for fine bold white, 1s to  $18\frac{7}{4}$ d for Cosiander kind, and  $11\frac{7}{4}$ d per lb for very low ditto.

(FIMER SPICES.—Nutmegs continue in good demand, with sales by private contract at last week's advance. 35 cases Penang by auction chiefly sold: 68's, 3s 8d to 3s 9d; 88's to 70's, 3s 1d to 3s 5d; 110's, chiefly sold: 68's, 3s 8d to 3s 9d; 88's to 70's, 3s 1d to 3s 5d; 110's, 3s. 18 casses Penang mace: low and broken, 3s 10d to 3s 11d; common to fair red, 4s 3d to 4s 5d. 414 bags pimento part sold at firm prices, from 2sd to 2sd. 4 casks good Amboyna cloves realised 6sd. 51 bags low taken in for the sound portion. 176 bags fair cinnamon chies realised 4sd to 4sd. 30 bales spurious cinnamon, 1sd to 4d per lb. 415 bayrels Jamaica ginger sold steadily at 42s to 49s for low to ordinary, and 51s to 91s for good ordinary to bold, with a few lots fine at 100s to 150s. 643 cases Cochin realised last week's prices. Ordinary rough, 46s to 48s; rather bold ditto, 56s; part scraped, middling, 60s to 65s; one lot rather bold, 95s. 500 bags dark bold rough Malabar kind sold at 34s to 35s per cwt. to 35s per cwt.

Bos per cwt.

BALTPETRE.—The market is firmer; fine Bengal scarce, and worth 30s. During the week about 1,300 bags have sold at rather higher prices: refraction, 84 to 7, 28s 9d to 29s, chiefly for cash. 240 tons for arrival at 28s 9d, usual conditions, and 26s 6d per cwt without allowance.

COCHINEAL.—The sales have gone off well at full prices, and of 1,313 begs brought forward about 760 bags sold. 889 bags Teneriffe: blacks, 2, 6d to 3s 1d; good to fine, 3s 2d to 4s 6d; silvers, 2s 6d to 2s 8d. 397 bags Honduras: silver, 2s 4d to 2s 9d; black ordinary, 2s 10d to 3s.

INDIGO.—The market is firm, and declarations for the sales on the 9th inst. now amount to 10,800 chests.

9th inst. now amount to 10,800 chests.
OTHER DRYSALTERY GOODS.—There is a better demand for gambier.
Business has been done at 16s 1½d to 16s 4d½, ex ship. 975
bigs Madras turmeric sold at 18s to 20s 6d. Cutch quiet. 522 boxes by
auction part sold at 19s to 19s 6d for sea-damaged. Sound bought in.
Privately sales of good at 21s 9d. Myrabolanes sold at 14s to 15s 3d.
China galls, 50s per cwt. 81 chests lac dye were bought in. Business
has been done in safflower by private contract at full prices.
Shellac.—196 chests sold without material alteration in prices.
(sood orange, 6/17s 6d; garnet, 112s 6d to 115s per cwt.
METALS.—The chief feature has been the alterations in tin. Several
sales of Straits have been made in the market at 132/10s to 133/, including some affect. 300 tons sold by tender on Wednesday at 130/10s to
181/on the spot, and 131/15s to arrive. Much of the business has been
speculative. English is firmer. Several sales of spelter have been made
at 18/2s 6d to 18/10s, and fine at 18/15s for Silesian, and the market
shows an improving tendency. Copper in moderate demand. Sales of at 18l 2s 6d to 18l 10s, and fine at 18l 15s for Silesian, and the market shows an improving tendency. Copper in moderate lemand. Sales of Chili, &c., at 68l to 69l per ton. The Liverpool market is firm. Quickallver, 10l 15s to 11l per bottle. Scotch pig iron has been rather weaker in price, partly through the rise in the value of money. This morning's quotation is 60s 7d to 60s 9d per ton.

HEMP.—Manila is held for a further advance. 1,815 bales by auction were bought in at 50l to 58l for the sound portion. Transactions by private contract have been upon a small scale. Clean Petersburg steady at 33l per ton.

dy at 33/ per ton. urm.—The market has been quiet but firm, and the shipments con-

tinue heavy. Contracts have been made for arrival at about former prices up to 26l 5s, but the large quantity by auction on Wednesday prevented much business privately during the week. 15,282 bales about one-third part sold, at and afterwards at irregular and for common to middling at rather lower prices. Low to middling, 18l to 23l; fair to good and fine, 23l 10s to 26l 10s per ton. Trade in Dundee is without much improvement as regards into

without much improvement as regards jute.

Linseed.—A large business reported in Black Sea cargoes at 60s to 61s, but many arrivals have flattened the market, and 59s 3d accepted for seed off the ceast. Calcutta has sold freely at 61s 6d to 62s 6d to Present value on the spot, or close at hand, about 63s per

quarter.

OHS.—Prices of common fish oils are nominal. Pale southern, 32l 10s; seal, 33l; cod, 34l 10s. Small sales of sperm at 81l per tun. A large business in linseed oil; spot or very early delivery, 34l, or 33l 10s; October to December, 33l; first four months, 32l 10s to 32l 15s. Palm oil steady but quiet at 31*l* to 37*l*. Cochin cecoa-nut has opened at high prices, viz., 49*l* to 51*l*. Ceylon dull at 38*l* 10s to 39*l*. English brown rape firmer at 43*l* 10s. For delivery in the first four months of next year 44*l* paid; refined quoted 45*l* 10s to 46*l*; fine foreign, 49*l* 10s per ton. Olive firm, but not very active. Mogadore and Malaga have sold at 48*l* 10s and 50*l* per tun respectively.

Petroleum has become quiet. American refined, 1s 7d; last three months, 1s 63*d* per gallon.

Petroleum has become quiet. American schools months, 1s 63d per gallon.

Tallow.—During the week the market for foreign has been rather quiet, but is now firmer. Quotations have varied slightly since last week. Present value of Petersburg: old, 44s 3d; new, 45s; October to December, 45s; January to March, 45s 6d to 45s 9d; Manila, 46s per cwt. About 2,000 casks are declared for sale to-day, chiefly Australian.

Particulars of Tallow—Monday, Sept. 18: 1871.

HIDES.—At the sales yesterday good qualities sold at full prices. Common were less in demand, but no general change in prices occurred. Buffalo and tanned hides without change. The total quantity offered was 158,315 kips, 18,859 tanned, and 10,077 buffalo; and the quantity bought in was 38,900 hides.

POSTSCRIPT. FRIDAY EVENING.
SUGAR.—The market is flat, and closes about 6d lower for the week.
Sales of West Indian 692 casks. For the week 2,388 casks. Barbadoes
by auction to-day, part sold on former terms. Privately 9,000 bags
Manila sold at 20s 9d to 21s 3d for Taal. A floating cargo of Cuba
sold at 26s: one of Havana, No. 10½ to 11, at 26s 6d; 8½, 24s 6d per
cwt for the United Kingdom. cwt for the United Kingdom.

COFFEE.—The sales went off with spirit. 684 casks 199 barrels and bags plantation Ceylon nearly all sold, at rather higher rates; 404 bags very good ordinary native, at 59s; 50 casks 72 barrels Jamaica ordinary, 60s to 63s 6d: 365 cases East Indian sold at chiefly 64s 6d to 75s 6d

for Naidoobatum, and 57s 6d to 63s 6d for native kinds.

PEPPER.—Black firm at the advance. White Singapore, 11d per lb. SALTPETRE.-1,100 bags Bengal, refraction 6 per cent., at 29s 6d to 29s 9d per cwt

TALLOW.—1,673 casks Australian by auction sold 6d to 1s dearer. Mutton, 43s 6d to 44s 9d; beef, up to 43s 3d per cwt. 174 casks South American bought in.

#### ADDITIONAL NOTICES.

GREEN FRUIT.-The report of Messrs Keeling and Hunt states that Lisbon grapes continue to arrive per steamers, and meet with a ready sale, shipments being limited. Malaga lemons in request. Sicily cleared off the market. Brazil and cocca-nuts in moderate demand.

DRY FRUIT.—In currents a large trade has been done on a falling market throughout the week, and though a few barrels of very low were done at 23s, there is no quotation below 24s. This quality, however, is not taken freely by the trade, and fruit a shade better is preferred. Fine sorts are not in demand. Valencias are steady, but large arrivals are at hand, and may cause easiness. Fine samples are scarce. Figs.

and Sultanas do not meet with much demand.

ENGLISH WOOL.—Prices very firm.

COLONIAL WOOL.—The sales continue to progress with great firm-

ness and spirit, at fully opening rates.

FLAX.—Market firm.

HEMP.—Market very firm both for Russian and Manila, and higher prices again paid this week.

Market active, prices firm.

Silk.—Market active, prices nrm.

Tobacco.—The has been rather more activity in the North American tobacco market, and although the sales actually effected have not been large, there appears to be a revival of inquiry for parcels of substance, and especially for Western strips. Such descriptions are very scarce, and holders do not show any disposition to part with such except at full prices. In other growths there has been a good business done, at

full prices. In other growths there has been a good business top rates.

Leather.—The trade in leather during the past week has been brisk, but limited by the small stock on hand. On Tuesday there were larger arrivals of fresh goods than for some weeks; the attendance of buyers was small; no alteration to quote in prices, except fer foreign butts, which made ½d per lb advance. The goods most in demand were crop hides of all weights, stout foreign butts, English butts of middle and heavy weights, dressing and shaved hides, English and Spanish horse hides, calf skins, and prime English shoulders.

Metals.—The week has been quiet for the most part. Copper has ruled firm, whilst little has changed hands. Iron is very firm in prices, with tendency to go higher. Tin shows great firmness, at slightly advanced rates. Spelter has been a little more inquired for, and some business has been reported. Lead and tin plates are steady.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 18.—The total imports of foreign stock into London, last week amounted to 17,756 head. In the corresponding week in 1870, we received 9,932; in 1869, 13,178; in 1868, 8,890; and in 1867 15,004 head.

The cattle market to-day has been fairly supplied with beasts, owing to the liberal receipts from abroad. The trade has been steadier, and influenced by the cooler weather, prices have acquired a hardening tendency. Runts and Herefords have been in request at full currencies, in fact, choice meat generally, has met a fair sale. The best English breeds have made 5s 8d to 5s 10d, and the best foreign 5s 2d to 5s 6d per 8 lbs. Only a moderate supply of sheep has been in the pens, but the quality has been good. Sales have progressed quietly, at about late rates. The best Downs and half-breds have been disposed of at 6s 8d to 6s 10d per 8 lbs. Calves have been disposed of at the rates previously current. Pigs have been unaltered in value.

#### HOP MARKET.

Borough, Friday, Sept. 22.—Hops of the new growth are taken off freely at fully the late advance. Yearlings attract a fair amount of attention, and in some instances are dearer. Mid and East Kents, 9l to 12l 12s; Weald, 7l 10s to 9l 9s; Sussex, 7l 5s to 8l 8s. Yearlings—Mid and East Kents, 60s to 130s; Weald of Kents, 60s to 105s; Sussex, 60s to 95s; Farnham and country, 90s to 120s; olds, 20s to 30s per cwt.

#### POTATO MARKETS.

Borough and Spitalfields, Friday, Sept. 22.—Moderate supplies have been on offer. The trade has been quiet at our quotations Regents, 70s to 85s; Shaws, 60s to 70s; Kidneys, 80s to 110s; Rocks 60s to 70s per ton.

#### LIVERPOOL MARKETS.

#### WOOL.

FRIDAY, Sept. 22.—The East India wool sales, which commenced on Tuesday and were brought to a close this evening, have gone off satisfactorily, and last July rates have been fully maintained, with here and there a slight advance. The miscellaneous descriptions, comprising about 18,500 bales, will be offered here from the 26th to the 29th instant.

#### CORN.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 22.—With a fair attendance at this market to-day wheat has had a tolerably good demand at last Tuesday's rates. Indian corn was slow of sale, and 6d lower since Tuesday. Flour and all other articles remained unchanged. The market has been quiet.

WAKEFIELD, Friday, Sept. 22.—Since last Friday the weather has remained of the most favourable character for securing the northern harvest, and in the southern counties threshing is going on freely under

harvest; and in the southern counties thrashing is going on freely under these circumstances. Wheat gives way in price, and with only moderate arrivals the demand is not very active. Best samples have reached 1s to 2s, and common qualities 2s to 3s. Fine barley ready for delivery was quite as dear.

## The Gagette.

BANKRUPTS.

TUESDAY, Sept. 19.
Harold Keely, Boscastle, Cornwall, gentleman.
Frederick Charles Mudd, Uckfield, Sussex, surgeon. William Roebuck, Huddersfield, yarn spinner. SCOTCH SEQUESTRATIONS.

Edward Fairbairn Dickinson, Ashten, Gourock, late grocer. John Sutherland, Hillhead of Lybster, Caithness-shire, merchant.

HUBBUCK'S PATENT WHITE ZINC PAINT
Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron extraord to Salt Water.

exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

their best work.

Each Cask of Pure White Zine is stamp
"HUBBUCK,

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no scenes for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

(Their only Establishments.)

Where they practice their painless system of DENTISTRY.

MESSES GABRIEL'S OSTEO-ENAMEL STOPPING,

warranted to remain white and firm as the tooth itself. This beautiful preparation restores front teeth and can be easily used. Sufficient to stop Six Teeth. Price 5s.

MESES GABRIEL'S ODONTALGIQUE ELIXIR.
This celebrated Mouth Wash is most refreshing, it strengthens the gums, eradicates tartar and all injurious secretions, sweetens the breath, and for cleaning artificial teeth is invaluable. Price 5s.

injurious secretoris, sweetens the breath, and for cleansing artificial teeth is invaluable. Price 5s. sens GABRIEL'S CORALITE TOOTH PASTE, for cleansing and improving the Teeth, imparts a natural reduces to the gums, and gives brilliancy to the enamel Price 1s 6d.

A word in season on the teeth may be had upon appli-tion free of charge.

HOLLOWAY'S PILLS.—
Spasms, Flatulency, Constipation.—So many persons suffer from these diseases that a description of them is unnecessary, though a knowledge of the means of cure is invaluable. The recommendation to take Holloway's pills for the cure of disordered digestion will be repaid with gratitude by all who give them a single trial. No medicine will so safely and speedily restore a deranged stomach or torpid liver to order. No other preparation will so effectually and healthily conduct digestion so that spasms, flatulency, and other torments of dyspepsia cannot by any possibility arise, or if present will soon be cured. The power of these pills in removing ac dity of the stomach, sick headache, billousness, diarrhoza, dysentery, and debility is wonderful.
