Lakee PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Resorts, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S RIFLE PLACETTES.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, Valencia Station, and No. 613 Market st., Grand Hotel.

A. C. BASSSETT, H. R. JUDAH, Superintendent, Asst. Pass. & Tkt. Agt

LINES OF TRAVEL.

C. P. R. R.

TIME SCHEDULE.

WEDNESDAY, AUG. 6th, 1884.

Trains leave, and are due to arrive at, San Francisco as follows:

Table with columns: LEAVE (F.O.B.), DESTINATION, ARRIVE (FROM). Includes routes to Benicia, Byron and Martinez, Callista and Napa, Colfax, Deming, El Paso Express, Knight's Landing, Galt and via Livermore, Stockton (via Martinez), Ione, Los Angeles and South, Livermore and Pleasanton, Merced, Madera, Fresno and Tulare, Marysville and Chico, Mohave, Needles & Express, Niles and Hayward, Ogden and Express, East (Emigrant), Red Bluff (via Marysville), and Tehama via Woodland, Sacramento, Sacramento River Steamers, San Jose, Vallejo, Virginia City, Woodland.

Train leaving San Francisco at 8:00 A. M. can meet Pacific Express from Ogden at Vallejo Junction; and that leaving at 8:30 A. M. can meet Pacific Express from The Needles and El Paso at Oakland Pier.

\*Sundays excepted. †Sundays only.

‡Daily from Martinez. Sundays only from Byron.

LOCAL FERRY TRAINS, VIA OAKLAND PIER.

From San Francisco Daily.

FIVE DOLLARS A YEAR.

## THE KENNEL.

### Pointing Quality.

EDITOR BREEDER AND SPORTSMAN:—In your paper of August 9th, Mr. Leavesley maltreated us to a bit of what he apparently thought was humor. It was not very funny. But as it was some funny and was nothing else particularly, it must have been intended for a humorous imitation of the inky-cloud expelling habit of the cuttle fish when it desires to cover an ignominious retreat. I do not blame Mr. Leavesley for desiring to "ewim out." He really ought never to have made his initial dive without first ridding himself of the grossly burdensome weight imposed by an attempt to conciliate the good will and gather the stray coins of a lot of ill informed and uninformed owners of very bad dogs, while trying to conduct a frank discussion with those whose only aim is the establishment of the truth. Mr. Leavesley shows better taste than his always-to-be-deprecated coadjutor "W. Bradford," because he retires in a cloud of ink only, while the coadjutor mentioned invariably patterns after that beautiful but eccentric quadruped, *Mephitis Mephitis*, sometimes playfully called Skunk, and disappears in a cloud strongly suggestive of "death into damnation." Mr. Leavesley did not attempt to argue. If any reader of his last letter thinks he did, I insist that he does Mr. Leavesley an injustice, because the latter gentleman, if arguing, would surely not violate all canons of logic and taste, as was done in the letter referred to. There can be no determinable argument unless opponents discuss the propositions offered by each other. Mr. Leavesley virtually admits the weakness of his own position when he introduces gratuitous assumptions and combats them, instead of confining his attention to the duty properly at hand, which is to sustain his assertion that the pointing faculty is not born in pointing dogs. Mr. Leavesley misquotes me, inadvertently I presume, but yet the misquotation robs his observations of all pointand force. He insists that I garbled extracts from Hutchinson, yet the letter in which those extracts appeared is in possession of your readers, as is also the volume quoted from, and if any one is inclined to read Hutchinson and the letter together it will appear that no garbling was done. Mr. Leavesley scents Vero Shaw as an authority on the point under discussion. I presume every one knows that Mr. Shaw, personally, is interested in terriers, but his book is carefully compiled and the sections describing other breeds, give the best judgment of the best men, in the best sporting dog country on earth. Messrs. L. Clement and Doctor Rowe are flouted by Mr. Leavesley. Why? Probably because he does not know that Mr. Clement is every week showing his exhaustive knowledge not alone of non-sporting dogs, but also of setters and pointers. Clement owns a shooting maulor, shoots a great deal, has done so for many years, has always shot over dogs, has bred them in large numbers, raised and broken them and withal has for years been a generally accepted authority on all points relating to dogs. Those who see that good paper the *Shooting Times* will smile at Mr. Leavesley's notions about Clement. Doctor Rowe while prevented by his judicial position from being publicly recognized as a breeder, trainer, etc., has yet bred many dogs, raised them under his own eye, enjoyed their development and has to my personal knowledge sent out to friends what he designated as "natural pointers." And he too has had exceptional opportunities for knowing the accepted beliefs of the best men.

Mr. Leavesley discredits "Dorr's" utterances, merely because he "never heard of him as an authority upon anything," a very bad reason it appears to me. While not personally capable of fully appreciating the depth of the dog lore stored in the caput of blunt old "Dorr" I am sure that he knows considerable more about dogs than anybody within a hundred miles of San Francisco, and I am informed by good dog men of the East that our same old "Dorr" is about as good as any of them. Mr. Leavesley ventures to impute insincerity to both "Dorr" and Mr. Bassford. Why I do not know, since he cannot truthfully claim personal knowledge of either of those gentlemen. If I should say that Mr. Leavesley's opinions on this point under discussion were inspired by the fact that he had lost the confidence and patronage of every owner of a good dog who had dealt with him, and that he now desired to create a connection with men of the baser sort in the hope of inducing their support, I should be saying a rude and unjustifiable thing, yet I should be no more unjust than is Mr. Leavesley when he writes that "Dorr" and Bassford would have supported any view of the question under discussion which I might have put forth.

Mr. Leavesley would rather see the performance of our dogs than "hear about them on paper." Well, "Dorr's" dogs, and Bassford's, too, ran in the Pacific Coast Field Trials last year, and will run again this year, together with many other well-bred animals, and I am not aware that Mr. Leavesley is barred from participation in the trials. On the contrary, it is the desire of the Pacific Coast Field Trial Club that all those who are really anxious to learn something about good dogs should attend, particularly Mr. Leavesley, because that gentleman can so effectively utilize the knowledge he will gain.

But the Pacific Coast Field Trial Club cannot undertake to furnish transportation to all who would be profited by attendance on its meetings.

Mr. Leavesley closes his letter with a reiteration of his dictum "the pointing faculty is not born in pointing dogs, but is the result of tuition and hereditary transmission." Reduced to its ultimate terms this proposition is paradoxical. It then reads "the pointing faculty is not born in pointing dogs, but is born in them."

As the argument now stands, on one side are ranged generally accepted authorities, Stonehenge and Hutchinson, supported by the large experience of three thorough and conscientious lovers of field dogs, one of them the only man who has ever showed a well-broken dog on this Coast; another, Hoosier, an able and observing authority, all unequivocally favoring the belief that pointing dogs point intuitively; on the other side, Mr. Leavesley appears, hugging a delusion and chanting in classic Saxon: "Here, Lord, I give myself away; 'tis all that I can do." The printed effluvia of "W. Bradford" forbids his standing near Mr. Leavesley, but he may be seen in the dim distance wailing and gnashing his teeth.

If space permits, Mr. Editor, let me describe a recent experience which is *apropos*:

Last week I took out near my place a purely-bred English setter bitch pup, seven weeks old, lacking one day. I knew there was a bevy of young quails somewhere in a ten-acre lot, and going to the centre of the piece I put the pup down on the ground. She played about, sniffing at every clod and weed until we had walked perhaps two hundred yards, when she grew excited and began nosing up wind toward a little patch of half-dried weeds. Soon she began crawling on her belly like a cat, and when within six or seven feet of the weeds, stopped. I watched her for some minutes and then lifted her by the scruff, but she remained rigid when put down. Then I walked in ahead of her and out ran a half dozen young quails. The pup still pointed, and I think would have held the point until the cecent had dried out if time had permitted. She had never been out of her yard before, had never scented even a chicken, had no handling. That point was intuitive, was born in her, and to talk of breaking that bitch to point is like talking of teaching the deaf to hear—it is folly. As she grows she will be taught many things, one of which will be *how* to point, *i. e.*, with high head, and perfect staunchness. X.

### A Rare Pointer.

Mr. Charles L. Lundy, Chief Clerk in the United States Land-office at Tucson, Arizona, has with him a pointer bitch which he cannot use for lack of game, and which he is willing to dispose of to any sportsman, reserving the right to choose a pup for himself from one litter by a good dog. The bitch is by Odell's Champion Bow out of King's Maid. Bow, recently dead, was by Champion Bang out of Luna, and was a most excellent dog, a great fielder and a bench winner. King's Maid is by King Phil, an excellent small pointer out of Sleaford's Maid.

The breeding of Mr. Lundy's bitch is of the fashionable strain, and we learn from that gentleman that his bitch "Surf" is a not unworthy descendant of the great names in her pedigree. She is lemon and white, about fifteen months old, weighs about forty-five pounds, is very fast, has a good nose, is broken to the gun, and has high courage. She is a natural retriever, but of course her education has not been perfected on game. She won "C" at ten months old, in the last Cincinnati Bench show, when just over heat, and not recovered from distemper.

Mr. Lundy has sent to Mr. H. H. Briggs two large photographs of the bitch and anyone who wishes a thoroughly good pointer will do well to call and look at the photos, as well as correspond with Mr. Lundy. From the desperate tone of Mr. Lundy's letter we are inclined to believe the bitch can be had at a very low figure. He anticipated good hunting, but finds none, and fears his bitch will grow up rank and wild.

## TURF AND TRACK.

### How to Spoil a Trotter.

The report came here some months ago that Miss Marooney, *alias* Little Cupid, by Cupid, son of King Herod, had shown a mile in 2:25, last half in 1:11, at Prairie du Chien, and been sold for \$2,500. The next heard of her she was getting beat in slow time out in the Sioux Falls country. Just then a letter came to John Kathon from a well known citizen of Decorah, not known to have any interest in her, asking John if he would take her and drive her to the front, if she was capable of getting there. About this time Ernest Nash wrote me from Montana, asking what was wrong with Little Cupid, saying he had been solicited to return and take charge of her. Simultaneously with this the mare returned to Waukon in charge of her breeder and, probably, her real owner yet. The story now is that the parties who bought her only put up \$500, and that Lampson, who was driving her, not liking the transfer, whipped and rattled the mare until she would not trot a bit, so that the speculators missed the bonanza they counted on. There may be and probably is another side to this tale, but the whole history illustrates the folly characterizing the management of many a promising youngster. For four years this mare has been able to go on and win in such time over our slow tracks as to be no disadvantage, but which would have attracted some buyer with the money to square right up. Instead of that, she trotted "no-time" races enough to forever keep her off if any one cared to follow the matter up. If time was not suppressed or falsely announced she was pulled, and in one case run off the grounds where a change of drivers was ordered. What has been gained by this course? The mare can be outlaid by any one who so desires. She has not paid for one-half the time that has been expended on her. She has no record to make her standard, and worth \$1,000 to \$1,500 as a brood mare, for she is yet young. Perhaps her loss of speed and steadiness is permanent. Nettie V., by Star of the West, is another example. Many a time entitled to a standard record even over slow half-mile tracks, she cannot now, when given to a driver for that purpose, and then be bred to trot at all, and probably never will again. Is not "honesty the best policy" in trotting as in all else? Is it not better in the long run to always win when possible, and take the honest record obtained thereby? Sometimes it looks terribly unfair to take a record for small money. No one has kicked harder than I have about it, not on my own account, for record is what I am after, but for others. Yet with everything taken into consideration, I fail to see where any one has gained by avoiding a record year after year, while wrecks like those instanced are strewn far and near.—M. T. G., in *Breeders' Gazette*.

### How McGeorge Starts.

The following account of how Mr. McGeorge, the famous English starter, manipulates a field of horses, may be interesting as well as instructive: "Mr. McGeorge invariably starts with a second flag. He is always at the post some minutes before the time appointed for starting, and he expects all the horses to be there too, and these are quietly walking about the course behind the post. Mr. McGeorge looks at his watch, and when the time arrives he makes his signal for the horses to get into line, generally a hundred yards or so behind the flag, and so they walk towards him, and whenever the opportunity may offer, down goes the flag, no matter how far they are behind the post. This is the main secret of effecting these good starts, but he has other assistance. His nephew is behind the horses with a hunting whip, and by judiciously flicking it in the rear of any animal that does not like to face field, keeps them fairly up in line. It is not at all an unusual thing for him to start his horses 40 yards behind the post. On one occasion at Kemptonpark, when he started his field some 80 yards or more from the post, there was some dissatisfaction expressed, and the matter was reported to the stewards of the Jockey Club on the ground that the start was actually a flying one at the starting post. But the stewards decided that he had availed himself of the best opportunity, and that when the flag fell, which constituted the start, the horses were in a walk."

At Narragansett Park on the 18th inst. John Murphy started Frank Work's team, Edward and Dick Swivel, against time to beat 2:16, their previous record, for a mile of \$1,000. The effort was a success, the horses coming out the wire handily in 2:16.

Santa Rosa.

On Thursday, the third day, the attendance was very great, the number of ladies and children on the fair grounds, reminding one of the State Fair rather than of a district meeting.

The horses for the unfinished pacing race were called at 1 P. M., and the betting became lively at \$30 to \$10 on Belmont Boy against the field.

The first race was a mile and a half dash in which Bachelor was eagerly taken at \$50 against \$35 for Phillip S. and \$20 for Jon Jou.

Aug. 21st—Dash of a mile and a half; for three-year-olds; \$25 each, \$10 forfeit, with \$100 added.

The next race was a half-mile and repeat, in which Quebec and Blue Mountain Belle were held in equal favor at \$50 each, with \$10 for Estelle Clark.

Same Day—Half mile and repeat; \$25 each, \$10 forfeit, with \$150 added.

The next was a special purse for Albert W., Manon and Allen Roy, the former bringing \$60 against \$50 for the mare and \$30 for the gray.

In the first heat Albert W. was very unsteady, breaking on the first three-quarters, but thence he came away and passing Allen, swerved across the track forcing the gray to the outside position, and came in first by a length, with Manon last at a leisure gait.

Same Day—Special trotting race; \$600, of which \$360 to first; \$160 to second; and \$80 to third.

On the Thursday the purse was a selling race, a mile and an eighth, in which were Phillip S., at \$25 against \$40 and \$50 for Quebec and Cyclone together.

August 22d.—Selling race, a mile and an eighth. Free purse of \$200 of which \$50 to the second horse.

The second race was a purse for the 2:27 class in which Sister sold at \$50; B. B., \$45; Timp Winston, \$15 and \$10; the field in which were Adrian, Olivette, and Rarus, Jr.

There was great delay in starting and when at last the word was given Sister and Olivette emerged at once from the rack and a pretty contest ensued, resulting in Sister's favor by a length, in 2:26½, the others far behind with Rarus, Jr., distanced.

The second heat was between the favorite, Olivette, and B. B. and at the distance it seemed any one's race, but Sister won by half a length, in 2:24½, with Olivette a neck in front of B. B.

In the third heat it was the turn of B. B. to contest for the short interest but within a hundred yards of the wire he broke and Sister won in 2:26.

Same Day.—Purse, \$600 for the 2:27 class, \$300 to the first, \$180 to the second, and \$60 to the third horse.

Table listing race results with names of horses and drivers, and their respective positions (1, 2, 3, 4, 5).

The third was a district purse, in which Blanche was made a great favorite against the field, despite the poor form she had shown on the first day of the meeting.

In the second heat Blanche was off her feet at the first turn and breaking her check rein was far in the rear, but Tim Kennedy thought that her speed could bring her through and drove her to a hard finish, but Ned won by a length in 2:33½ from Uncle True, he having a like advantage of the mare.

Donathan assumed the reins over Blanche and steadied her somewhat, and paying all his attention to Ned who however fairly out-trotted her on the straight and won on a slight break by a neck in 2:33½. It was now almost dark and there was a diversity of opinion among the drivers as to the best of their respective interests, whether the race was postponed or not, and this led to some wild scoring, but the horses were sent off with Roh Roy on the run, and indulging in this gait he got in front of Ned on the back stretch and swerving to and fro across the track greatly interfered with Ned's movements until he ran into the fence and dropped dead, McConn the driver, escaping uninjured.

Same Day—Purse \$500, 2:45 class, for all horses owned on June 1, 1884, in the counties of Sonoma, Napa, Marin, Yolo, Solano, Lake and Mendocino; \$300 to first, \$150 to second and \$50 to the third horse.

Table listing race results for the 2:45 class, including names of horses and drivers.

On Saturday there was a stock parade and the judges then instituted some inquiries as to the last heat of the previous day, and it was thought by many that the pools on the race would be declared off; but this was not the case as when Blanche won easily the final heat, they gave her the race without further remark.

In the dash of two miles and a quarter, the talent were once again all astray as Garfield and Birdcatcher both sold almost even at the start for \$25 against \$10 for Patrol. The latter made all the running with Garfield second, until in the straight, Birdcatcher came up for the distance with a rush, that had he not been tired out, would probably have given him the race, as Appley was showing up with Patrol before reaching the wire. The time was 4:10.

Aug. 23d.—Dash of two miles and a quarter. \$30 each; \$15 forfeit with \$250 added, \$75 to the second.

In the purse for the 2:35 class there were but Guy Wilkes at \$55 against \$10 for James H., and as the latter had none of the speed he showed recently at the Bay District, Guy won in straight heats, in 2:39½, 2:32½ and 2:30.

Same Day—Special purse, \$500, for 2:35 class.

As it was yet early, a purse of \$100 was offered by Major Loucks, in which Sorrel Ben, at \$25, Ahe Ward, at \$40, and Buck Foster, \$28, tried conclusions.

This brought to a conclusion the most successful fair ever held in Santa Rosa. The racing was good, the stock exhibit fine, and the exhibition very creditable to the county.

Special purse, \$100 for named horses, given by A. H. Loucks.

This brought to a conclusion the most successful fair ever held in Santa Rosa. The racing was good, the stock exhibit fine, and the exhibition very creditable to the county.

John Murphy has booked two runners together and driven them a mile in 1:57½, and he will soon make an attempt to sound them around the track of the New York Driving Club in 1:55.

Old Bushwhacker made his re-entry on the turf at Saratoga the other day, looking fat and frisky, and with the appendage of a long, bushy tail, something like that of a fox.

Mr. P. Lorrillard will sell at the close of the present racing season all of his horses in training, except Drake Carter, Herbert, and his stako colts and fillies.

One of the fastest races of the year took place at Saratoga on the 20th inst. Ada Glenn and Gano ran a dead heat for the Owners' Handicap, one mile; time, 1:41½.

The gray mare Della Walker was injured in a race, at Lakeview, Oregon, last week, and Mr. Walters fears that the injury is permanent.

Mr. Lorrillard's horses have arrived in New York from England, and the foreign invasion has resulted in a retreat.

Mr. Robert Bonner is driving Rarus and Pickard together on the road this Summer.

Early Morgan Trotters.

As the descendants of Justin Morgan, through his grandson, Vermont Black Hawk, being appreciated more and more every year, perhaps it would be interesting to many to look back thirty years or so and see what some of the Morgane of that day did in the trotting line.

Forty-two years ago Black Hawk won a match of \$1,000 by trotting five miles in sixteen minutes. In 1843 he won a race of two-mile heats with ease, best time, 5:43.

In 1853, Vermont Boy won a three-mile race to wagon in 8:32. In 1853, when Ethan was only three years and ten months old, he won a race in 2:36. In 1853, Blue Morgan won a race, best time, 2:33½.

In 1849, Mac, by Morgan Caesar, won a race under saddle in 2:29½. In 1856, Whalebone and Lantern won a double team race in 2:42. Blackstone Belle won a race in 1856, in 2:28½.

He Had Him.

Students of human nature at racetracks have a vast field for observation, and often no little amusement at the different emotions animating the public pulse, particularly those small bettors—men and women—who, perhaps wagering a few dollars for the first time in their lives, become as excited as if their very existence depended on the issue.

"I goes to get my monies, von by dot bootiful horse, Priam, who vine in a valk." And on somebody suggesting that the race was not yet over, he responded indignantly: "Mine frient, you don't know dot bootiful horse, Priam. He vins all de viles. Und I've god him straid und blace. Ogsense me, lease," and thought loat to sight in the crowd, he was still to (risible) memory dear.—N. Y. Spirit.

Little Em.

Last week in answer to an inquiry as to the record of the pacing mare Little Em, we gave the figures as 2:44. This is her record as given in Chester's book. We are informed, however, by one who knows that she has a record of 2:24½, made this season, June 6, 1884, at Shelby, Ohio.

Mr. P. Lorrillard will sell at the close of the present racing season all of his horses in training, except Drake Carter, Herbert, and his stako colts and fillies.

One of the fastest races of the year took place at Saratoga on the 20th inst. Ada Glenn and Gano ran a dead heat for the Owners' Handicap, one mile; time, 1:41½.

At Lakeview, Oregon, a few days ago the local paper reports that a mile race was run in 1:49 7/8. From the fineness of the fractions it is plain that they clocked that race with an Aneroid barometer.

The gray mare Della Walker was injured in a race, at Lakeview, Oregon, last week, and Mr. Walters fears that the injury is permanent.

Mr. Lorrillard's horses have arrived in New York from England, and the foreign invasion has resulted in a retreat.

Bay Frank is again reported lame and laid up.

Divers Items Regarding Horses.

EDITOR BREEDER AND SPORTSMAN.—The bay stallion Westmont, by Col. West, who promised so much for his owners early in the Spring, has been out of training for nearly six weeks as a result of the loss of one eye. However he seems to be rounding to, as at Davenport, Iowa, July 16th, he won the fifth, sixth and seventh heats of the 2:25 class, trotting the sixth heat down to his record, 2:27 1/4, which performance plainly proves that he is able to go the whole route and trot as fast as at the finish as at the start. Westmont is a great young horse, and before the loss of his eye was, with the single exception of Robert McGregor, the handsomest, boldest appearing stallion on the turf. His color, a bright, clear bay, with black points, is certainly more to be admired in an entire horse than the color of McGregor, though his throat latch, which is altogether too thick, mars his general looks and gives the palm to the brilliant, though exceedingly unfortunate son of Major Edsall. However Westmont is a race horse of the most pronounced type. The cause of his losing an eye was as follows: For the past year he has been growing vicious, and it was not safe for any only those who had him in their immediate care to enter his box. About two months ago he made a savage assault on his groom, who in self defense struck the horse over the head with a stick that was kept in the stall as a weapon of protection. The blow was a hard one and striking exactly over the eye injured that organ so seriously that it became the seat of acute inflammation, and the horse had to be placed in a dark stall where he remained about a month. Were he my horse, I should have him castrated at once, knowing that to be the only radical cure, and also positively certain that the operation would make a great performer out of the now unruly animal. Westmont reminds one of Brigadier and Mazy Cobb, both sons of Happy Medium, as he is about their size, the same color, and like them possessed of a square, open gait. He is, however, a finer appearing horse when in condition for a race than either of the two above mentioned. As a stallion I think he will prove a failure, as owing to a pernicious habit common to many entire horses, he is very uncertain as a foal getter, etc. (Now Mr. Editor, do you really believe that when once contracted a stallion can be cured of this miserable complaint?) Before going further I would state that the chestnut mare, Nellie Grant, who acquired a record of 2:25 1/4, at Davenport, Iowa, July 17th, is not by Gen. Grant (2:21) as given by several editors of turf papers for the past month or six weeks, but was sired by Major Grant, he by Delmonico, the sire of Darby. Major Grant was owned at one time by the Wadsworth Bros., of Wankegan, Ill., with whom the editor was undoubtedly acquainted, and by them was sold to I. H. Norris, of La Neville, Bureau Co., Ill. Mr. Norris, it will be remembered, was the gentleman who bred and sold Cleora, 2:18 3/4, who was the fastest green horse brought out in 1882. The dam of Nellie Grant was Hoagland's Grey Messenger, and had a record of 2:31 1/2. To err is human, but to err continually and still at the same time inform the public that "our paper is the only absolutely correct chronicler of turf events," is certainly bordering on the ridiculous; yet there are many editors and writers who lay claim to the above virtue. For one, we can truthfully say that we have been mistaken a thousand times and at present are very careful to withhold our assertions on many points rather than fly in the face of an intelligent army of readers, heralding a fact that we know very little about.

The race which Richball won at Gainesville, Texas, last Fall, has in connection with it a bit of inside history that may be worth recording. It will be remembered by nearly all readers that Richball was purchased from Fayette Smith after the Summer meeting at Chicago, in 1883, by a party of cattle kings from Gainesville, Texas, they paying \$12,000 for the animal, and at the same time giving Johnny Campbell an equal interest with each of them in the earnings of the horse, Campbell to manage and drive the horse while owned by this party, said service being counted as an equal share in the purchase of Richball. Well, Campbell did manage the horse just about as he wanted to, beating his own party whenever it paid him well, and in fact, drove Richball to suit the pocket of Johnny Campbell. Fuller and Westmont were Richball's only worthy competitors at Gainesville, and it was evident to the managers and drivers of the trio that all North Texas would go broke on Richball if, by chance, that phenomenal pacer might be defeated by either Westmont or Fuller, and accordingly Richball was fed and watered as usual the night and morning previous to the race, while all the time the right honorable three graces who managed the side-wheelers, were solely intent upon taking the field end of a Richball ticket. As the horses came upon the track preparatory to jogging for the first heat, it was evident to the owners and hackers of Richball that he was in no condition to compete with such speedy horses as Westmont and Fuller were in their brushes then showing themselves to be, and accordingly a delegation approached Mr. Johnny Campbell and earnestly begged of him to win the race, adding by way of inducement and in the language of one very forcible partner, "That if he did not win that race they would kill him sure, and now — you, go on and do as you like, but remember that lead weighs heavier on a man's soul than field tickets against Richball."

Campbell had to hasten around and consult his "friends," the result being that Richball won at Gainesville, though either Fuller or Westmont could beat him to a standstill, through no fault of his, however—simply because three cold-blooded robbers had determined to line their pockets at the expense of the many. The owners of Richball are with the horse this Summer, and it is their intention to have the horse win upon every occasion, if speed can carry the day.

While it must be admitted that pool-selling adds much to the interests of the turf, still it cannot be denied that the pool box is the source of many a dirty job and the cause of many a crooked race.

Of all pools, we presume that antion pools are preferable, for we do know from experience that French mutuel pools are injurious to any meeting and especially to the poor horses, who are compelled to trot, or pace, or run, many heats that are not needed in the final winning of the race, but are wedged in to work the mutuels. Knowing such to be the case, why do managers of race meetings allow the mutuel men on the ground? Or, if they deem it best to have them in order that their royalty may help bear a large share of the expenses, make them confine their betting to the result of the race, not the result of every heat.

Book making is fast becoming a source of fraud, for every day or two we learn of some race or series of races, which are run and won in the interests of certain book makers. Take for example the Oakwood handicap run at Washington Park, July 1. The proprietors of the Louisiana Stables, who by the way are Jews, gave Wallensee as their starter, and Fosteral, their other entry, was not mentioned in the pools. Thirty minutes before the time for calling the race Fosteral was declared a starter, and when his name was run up their arose a great

wail from those who had money on the race, and the wise said, "It is all over, and our money is as good as lost already." These descendants of Abraham stand in with certain book-makers and run their horses in and out to suit their "friends." Had Fosteral been rated in the books or pools, a large amount of money would have gone on him, for he was known to be in better shape a few weeks previous to the race than his stable companion Wallensee, being able to heat that animal with the same weight up, and in the handicap he only carried 95 lbs. while Wallensee carried 116 lbs. The impressu carried by his owners was that Fosteral was out of form, and thus by deceit held back their horse until the last minute of the last day.

The Chicago Driving Park lost money on their great Summer trotting meeting, albeit Westmont and Phallex startled the world with their exhibitions of speed. The reason for this is that the Driving Park have lost the confidence of the public as well as many horsemen and can blame no one for their ill luck.

Some one has profoundly remarked that, should Com. Kittson, J. I. Case and men of their ilk quit the trotting turf, this branch of sport would rapidly lose prestige and descend to the level of prize fighting, etc., etc. All such theories are the merest bosh, for if any one suspects that either Kittson or Case are men above reproach in matters pertaining to the turf, they are certainly living "neath the shadow of a dark cloud of ignorance. Case trots horses for the money there is in it, and no one looks to the main chance any closer than he. Simply because a man is wealthy does not imply that he is the soul of honor, for an old adage has it, "that an honest man is ever poor." There are scores of men that are of far more value to the turf in its truest sense, than either the St. Paul or Racine millionaires. Yours, COLUMBUS.

The Memorable Horse Trade.

[N. Y. World, August 20th.]

Maud S. was yesterday sold by Mr. Vanderbilt to Mr. Robert Bonner. The price paid for her is \$40,000. Mr. Vanderbilt is in Saratoga, but it is said that the reason he sold his horse is the notoriety which attached to him as being the owner of such a marvellous animal. People, he said, were constantly pestering him with offers to have him race the mare against Jay-Ee-See. Mr. Vanderbilt does not want to race his horses. He likes to drive them himself and feed them with lumps of sugar. He had been offered \$100,000 for her some time ago. But the offer had come from those horrid racing men, who would put Maud S. on the track and have her run for a stake. Rather than do that he would keep the noble animal, simply letting the public know that she was not to be raced. But then he thought it would be more profitable to sell her to some gentleman who would agree not to race her. The purchase money could then be invested in United States Government bonds, yield an annual income and make up a little for the drain caused by his son's speculations during his father's trip in Europe.

The name of Mr. Robert Bonner involuntarily came into the magnate's mind. Mr. Bonner had a way of buying up fast trotters as soon as they broke the record and then quietly retreating them on his farm from public gaze. That is what he had done with Dexter and Rarus. No notoriety any longer attaches to Mr. Bonner by reason of his owning these two fine specimens of the equine race. Mr. Bonner alone should be the owner of Maud S. As soon as Mr. Vanderbilt arrived at this conclusion he sent his friend, Captain Turnbull, from Saratoga to this city to open negotiations.

Money was no object, such were the instructions given to the gallant captain—the condition was the thing—Maud S. was to abdicate her throne as queen of the turf. Capt. Turnbull saw Mr. Bonner Friday evening, and as a result of the interview Mr. David Bonner, the president of the Gentlemen's Driving Park at Morrisania, went to Saratoga on Saturday in behalf of his brother. He agreed to all of Mr. Vanderbilt's conditions, provided the latter would accept the utterly inadequate and almost insignificant sum of \$40,000 for the great trotter. The millionaire did accept, and yesterday afternoon Mr. Bonner sent him a check for the amount.

Maud S. left Saratoga in her own car by the 8.30 A. M. express. The colored groom, Grant, who has attended her ever since she was three years old, accompanied her. She arrived safely at the Grand Central Depot at 2.12 P. M., where she was received by Mr. David Bonner and a few invited friends, and taken to her present home in Mr. Bonner's stables, Nos. 11 and 13 West Fifty-fifth street, where she arrived at 3 o'clock.

The Embryo Stakes.

The following are the nominations in the Embryo Stakes, foals of 1882, that have not yet been declared out: J. B. McDonald, Marysville, g f by Brigadier, dam Lexington Belle. Races of 1884-1885.

N. S. Hamblin, Yuba City, b c California Brigadier. Races of 1884-1885.

Samuel Gamble, Danville, g g Costa, races 1884-1885; b c Constantine, races of 1884-1885; b c Cleon, race of 1884; h c Capri, races of 1884-1885; h c Clovis, races of 1884-1885; c c Conde, races of 1884-1885; b c Creay, races of 1884-1885; b c Coligny, races of 1884-1885.

S. J. Tennent, Pinole, b c Gus T., races of 1884-1885.

A. B. Tennent, Pinole, b c Onyx, races of 1884-1885.

J. B. Tennent, Pinole, ch c Bobsoe, races of 1884-1885.

Martin Walsh, Pinole, br f Jessie W., races of 1884-1885.

J. H. Tennent, Pinole, ch c Tony Pastor, races of 1884-1885.

G. Valensin, Arno Farm, b f Utana, races of 1884-1885; h f Dea, races of 1884-1885; b c Aristo, race of 1884-1885; b f Magna, races of 1884-1885; g c PUNCH, races of 1884-1885; b f Ivy, races of 1884-1885.

L. J. Rose, Sunny Slope, br or b c by Sultan, dam Atalanta by The Moor, races of 1884-1885; b c, by Sultan, dam Minnehaha, races of 1884-1885; b c, by Sultan, dam by a son of Hambletonian, races of 1884-1885; l b or s, by Sultan, dam Blonde by Tecumseh, races of —.

A. Patterson, Alvarado, ch c Boxwood, races of 1884-1885; ch c Fleetwood, races of 1884-1885.

H. G. Cox, Alvarado, b c Rover, races of 1884-1885.

John A. Goldsmith, Oakland, M. Salisbury's b c Homestake, races of 1884-1885; M. Salisbury's b f Raxana, races of 1884-1885.

Chimera, by Mortemer, one of Mr. P. Lorillard's two-year-olds that was beaten off in the Champion Stallion Stakes, won by Wanda in 1:18 1/2, captured the Moet & Chandon Stakes, at Monmouth, on the 19th, in 1:15 1/2. There seems to be a great deal of "in and out" either in the running of the filly or the condition of the track.

At Saratoga.

Aug. 14th—Purse \$400, for two year olds; entrance, \$10 each, \$— to the second; those not having won a race of the value of \$1,000 since July 15th allowed 5 lbs. non-winners since that date allowed 10 lbs.; maidens allowed 14 lbs.; 6 entries; three-quarters of a mile.

Table listing race results for August 14th, including names like E. J. Baldwin's cb c Verano, W. P. Burch's Telle Doe, and various weights and positions.

Pools: Verano, \$110; Irish Pat, \$90; Telle Doe, \$50; Joybell, \$45; the field, \$30. Betting: 6 to 5 each against Verano and Irish Pat, 3 to 1 against Joybell, 5 to 1 against Telle Doe, 15 to 1 against Coral and 20 to 1 against Eileen. Mutuels paid, \$10.20.

Won by three lengths; Telle Doe second, three lengths better than Irish Pat.

Table listing race results for August 15th, including names like R. R. Owing's b g Mammonist, E. J. Baldwin's Irish Pat, and various weights and positions.

Won by a half-length; Gleaner second, and a length better than Gano, third.

Aug. 15.—Purse \$350, of which \$50 to the second; entrance free; Jim Renwick and winners in 1884 of any race of the value of \$3,000 to carry 7 pounds extra; other horses not having won since July 1st a race of the value of \$1,000, allowed 5 pounds, or not having won a race since July 1st allowed 10 pounds; or non-winners in 1884 allowed 15 pounds; maidens allowed if four years old, 15 pounds; if five years old or upward, 25 pounds; mile and a furlong.

Table listing race results for August 15th, including names like E. Corrigan's b c W. R. Woodard, and various weights and positions.

Pools: Fellowplay, \$105; W. R. Woodard, \$70; Richard L. and Fosteral, each \$35; Marie Stuart, \$20, and field, \$30. Betting: Even against Fellowplay, 8 to 5 against W. R. Woodard, 4 to 1 against Fosteral, 5 to 1 against Richard L., 8 to 1 against Marie Stuart, 10 to 1 against Bessie, 25 to 1 each against Exotic and Williams, and 30 to 1 against Easter. Mutuels paid, \$14.80.

Bessie led off, but at the stand (seventy yards) Richard L. went to the front and showed the way to the backstretch, where he was collared by W. R. Woodard, and at the half they were on even terms, and at their heels were Fellowplay, Bessie and Fosteral parallel. Making the lower turn W. R. Woodard went forward, took the advance and carried it successfully to the finish line, winning by a length, Fosteral second and two lengths in front of Bessie, third, and the order of her following was Easter, Marie Stuart, Richard L., Fellowplay (favorite), Exotic and Williams.

August 16th—The Tennessee Stakes for two-year-olds at \$25 each, play or no, with \$100 added; the second to receive \$150, and the third \$50 out of the stakes; those not having won a sweepstakes race allowed 5 lbs.; 42 subscribers; three-quarters of a mile.

Table listing race results for August 16th, including names like W. P. Burch's cb f Telle Doe, E. Corrigan's b c Isaac Murphy, and various weights and positions.

Pools: Baldwin pair, \$200; Corrigan pair, \$165; Pegasus, \$45; Telle Doe, \$25, and the field \$25. Betting: Even against Verano, 3 to 1 against Lizzie Dwyer, 4 to 1 against Pegasus, 5 to 1 against Rapido, 6 to 1 against Isaac Murphy, 8 to 1 against Radha, 12 to 1 against Telle Doe and 15 to 1 against Bootblack. Mutuels paid, \$96.50.

After a long delay the flag fell, with Isaac Murphy first away, followed by Telle Doe and the others straggling, except Verano, who was left at the post. Telle Doe was the first to reach the furlong post midway down the chute and she held the lead to the finish, winning the "Tennessee" by half a length, Isaac Murphy second and three lengths better than Lizzie Dwyer, third, she being followed in the order named by Pegasus, Radha, Bootblack, Rapido and Verano.

Same Day.—Purse \$500, for all ages, of which \$100 to the second; the entrance money, \$15 each, to be divided between the second and third; three-year-olds to carry 98 lbs.; four-year-olds 110 lbs.; five-year-olds and upward, 114 lbs.; sex allowances; winners in 1884 of any race of the value of \$1,500 to carry 7 lbs. extra; non-winners in 1884, of a race of the value of \$700 allowed 5 lbs.; those not having won any race allowed 12 lbs.; maidens allowed if four-years-old, 18 lbs.; if five years or upward, 24 lbs.; 7 entries; mile and a furlong.

Table listing race results for August 16th, including names like E. Corrigan's b c Swinney, R. R. Owing's b g Mammonist, and various weights and positions.

Pools: Mammonist and Jim Renwick, each \$150; Swinney, \$110, and the field, \$35. Betting: 7 to 5 each against Mammonist and Jim Renwick, 5 to 2 against Swinney, 8 to 1 against Bessie, and 10 to 1 against Inspector. Mutuels paid, \$16.60.

Inspector and Bessie were first under motion to a good start. Inspector showed the way to the backstretch, where he was headed by Swinney, they being followed closely by Jim Renwick. Swinney went forward at the half post and held his advantage to the finish, winning easily by six lengths, Mammonist second and about ten lengths in front of Jim Renwick, third; then came Bessie, Inspector being last.

Aug. 19th.—The Misses' Stakes, for two-year-old fillies, at \$50 each, half forfeit, with \$700 added; the second to receive \$200, and the third \$75 out of the stakes; to carry 100 lbs.; winners of any race of the value of \$1,000 to carry 5 lbs. extra; maidens allowed 5 lbs.; closed with 27 subscribers; three-quarters of a mile.

Table listing race results for August 19th, including names like E. J. Baldwin's b f Mission Belle, W. L. Scott's ch f Radha, and various weights and positions.

Pools: Mission Belle, \$100; Telle Doe, \$34, and Radha \$15. Betting—3 to 1 on Mission Belle, 12 to 5 against Telle Doe, and 10 to 1 against Radha. Mutuels paid, \$6.90.

Radha, Telle Doe, and Mission Belle was the order of the flag dropped. Mission Belle took the lead at the furlong post and held it to the clove, winning easily by six lengths, Telle Doe second, eight lengths better than Radha.

Same day—Pocahontas Stakes for three-year-old fillies, at \$50 each, half forfeit, with \$1,000 added, the second to receive \$200 out of the stakes, the third to save her stake; winners in 1884 of any race of the value of \$1,500 to carry 3 lbs. extra; non-winners in 1884 of a race of the value of \$750 allowed 5 lbs.; maidens allowed 10 lbs.; closed with 26 subscribers; mile and five hundred yards.

E. Corrigan's ch f Modesty, by War Dance, dam Ballet, 116 lbs	(Murphy)	1
G. H. Remondan's b f Mittie B, 108 lbs.	(Stoval)	2
R. W. Walden's ch f Tolu, 116 lbs.	(Blaylock)	3
V. L. Kirkham's blk f Eology, 108 lbs.	(West)	0
C. W. Medinger's ch f Emma, 108 lbs.	(Maynard)	0
E. J. Baldwin's ch f Marie Stuart, 108 lbs.	(Holloway)	0

Time, 2:16.

Pools: Modesty, \$170, and field, \$50. Betting: 5 to 1 on Modesty, 7 to 1 against Mittie B., 10 to 1 against Tolu, 30 to 1 each against Emma and Marie Stuart, and 40 to 1 against Eology. Mutuels paid, \$6.10.

Marie Stuart led off, followed by Emma and the others. Tolu came to the front at the seven-furlong post and at the stand (500 yards) led Marie Stuart, Modesty, Emma and tbs balances hunched. Tolu continued her lead round to the half, where Modesty fell back to fifth position and to the third quarter Mittie B. showed up third. In the rush up the stretch, Modesty hounded to the front and won by a length, Mittie B. second and a couple of lengths in before Tolu.

Aug. 20—Purse, \$350, of which \$50 to the second; entrance free; for three-year-olds that had not won a race since July 18th, to carry 100 lbs.; sex allowances; those not having won a race of the value of \$1,500 in 1884 allowed 5 lbs.; non-winners in 1884 allowed 10 lbs.; maidens allowed 15 lbs.; mile and half a furlong.

Davis & Hall's ch f Vinton, by Kenney, dam May D., 92 lbs.	(Coffee)	1
Freckless Stables' b f Hidalgo, 95 lbs.	(Arnold)	2
E. J. Baldwin's ch f Marie Stuart, 95 lbs.	(Miller)	3

Time, 1:52 1/2.

Pools: Vinton, \$100, and the field, \$25. Betting: 6 to 1 on Vinton, and 5 to 1 each against Marie Stuart and Hidalgo. Mutuels paid, \$6.60.

Hidalgo led off, and the other two together. Hidalgo cut the pace round to the seven-furlong and looked like a winner, but in the home-run Vinton rushed forward and won by a good length, Hidalgo second and leading by a half length, Marie Stuart, last.

Same Day—Purse, \$400, of which \$50 to the second; entrance free; winners of 1884 of any one race of the value of \$3,500 or two or more races of the value of \$2,000 each, of three or more races other than selling races at Saratoga in 1884 to carry 5 lbs. extra; other horses beaten and not having won a race at Saratoga in 1884 allowed 5 lbs.; non-winners in 1884 allowed 12 lbs.; maidens allowed, if three years old, 17 lbs.; if four years, 21 lbs.; if five years or upward, 26 lbs.; mile and five hundred yards.

E. J. Baldwin's b c Lucky B., 4, Rutherford—Maggie Emerson	(Miller)	1
106 lbs.	(M. Ryan)	w. o.

Same day—Purse, \$300, of which \$50 to the second; entrance free; owners to handicap their own horses, and to run at the weights named: one mile.

E. Corrigan's ch m Ada Glenn, by Glenelg, dam Katina, aged, 77 lbs.	(Miller)	1
E. J. Baldwin's b b Gano, 4, 85 lbs.	(Miller)	2
R. B. Orange's g m Gano, 4, 104 lbs.	(Conking)	3
Morris & Patton's g b Fellowplay, 4, 85 lbs.	(Arnold)	0
W. L. Scott's ch f All-Hands-Around, 4, 85 lbs.	(Higgs)	0
Davis & Hall's b m Ella Warfield, aged, 80 lbs.	(Giles)	0
C. W. Medinger's ch f Emma, 3, 87 lbs.	(Anderson)	0

\*Dead heat.

Pools: Gano, \$120; Fellowplay, \$105; Ada Glenn, \$90; All-Hands-Around, \$80; Mammonist, \$75, and the field, \$40. Betting: 2 to 1 against Fellowplay, 5 to 2 against Gano, 3 to 1 each against Mammonist and Ada Glenn, 6 to 1 against All-Hands-Around, 8 to 1 against Ella Warfield, and 20 to 1 against Emma. After the dead-heat: Pools: Ada Glenn, \$50, and Gano \$49. Betting: 5 to 4 on Ada Glenn, and 10 to 3 on Gano. Mutuels paid, \$19.70 and \$10.80.

The first three away were Emma, Ada Glenn and Gano. Ada Glenn took the lead at the turn and held it almost to the close, when Gano came forward and they made a "dead heat" at the finish, two lengths in advance of Mammonist.

Deciding Heat.—Ada Glenn took the lead at the start and was not headed, winning easily by fully six lengths.

August 21.—Purse \$400, for all ages; entrance, \$15 each, \$— to the second; winners since July 15th of any race of the value of \$1,000 to carry 3 lbs. extra; of \$1,500, 5 lbs. extra; of two or more races of the latter value, 7 lbs. extra; horses beaten at Saratoga and not having won a race since July 15th allowed 7 lbs. or if non-winners in 1884 allowed 12 lbs.; maidens allowed, if four years old, 17 lbs.; if five years or upward, 24 lbs.; 8 entries; one mile.

G. R. Buchanan's ch g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 117 lbs.	(Fitzpatrick)	1
R. A. Johnson & Co's b c Loftin, 3, 100 lbs.	(Williams)	2
J. W. & R. H. Lord's ch f Lady Lou, 3, 102 lbs.	(Rivers)	3
W. L. Cassidy's ch g Saunterer, 5, 110 lbs.	(Blaylock)	0
C. F. McLoughlin's ch c Nitot, 3, 107 lbs.	(Fisher)	0
Whitten Bros.' ch g Pat Dennis, 4, 168 lbs.	(Holloway)	0

Time, 1:44.

Pools—Jim Renwick, \$40; Loftin, \$30, and the field, \$50. Betting—Even against Jim Renwick, 8 to 5 against Loftin, 3 to 1 against Saunterer, 5 to 1 against Lady Lou, and 15 to 1 each against Pat Dennis and Nitot. Mutuels paid, \$10.70.

Lady Lou, Jim Renwick and Loftin were the first away. Lady Lou led by three lengths on the western turn, by four lengths at the quarter, three lengths down the backstretch and one length at the half, but on making the lower turn Loftin ran up to her head, with Jim Renwick close up and threatening. Coming up the stretch Jim Renwick took the lead and won handsily by a length, Loftin second by three lengths and Lady Lou third.

Belle Echo shows high breeding, but is gaunt as a greyhound. She wears light toe-weights, quarter hoots, forward skin and arm boots, and hind shin and toe boots. She has been trotted since early in the season, and shows that she has had many a scrape.—N. Y. Spirit.

Drake Carter ran the best race of his life on Tuesday in the Monmouth Handicap. To those, however, who had watched the gelding closely in the Champion Stakes, won by Miss Woodford, the victory of Carter was not such an eye-opener, as on that occasion he finished strong.

Blue Grass and American Girl, (sister to Foxhall), have been entered in the Cesarewitch and the former in the Cambridgehire in the name of "Mr. Hauford." With a fair weight we expect to see Blue Grass stay well in the Cesarewitch. Schem is also entered in the long race.

It is reported that Mr. Hill will not continue the Westmont-Firebrand exhibitions, but will put Westmont in the free-for-all pacing races this season, and next year select another running mate for him.

Jay-Eye-See and Phallas failed to reduce their records at Prospect Park, Brooklyn, N. Y., on Thursday.

Maxy Cobb trotted a mile in 2:15, at Prospect Park, last Thursday.

Petaluma.

Many improvements have been effected on the grounds of the Petaluma fair that add greatly to its attractions. In the way of stalls, increased accommodations have been made, but they are yet insufficient for the number of entries, a great proof of the increasing popularity of these district associations. The trees that were planted out last year show a full and rapid growth, and the care bestowed upon the track has made it safe, fairly fast, and of good going. As is always the case, the representative of the BREEDER AND SPORTSMAN met with a most cordial reception and the regret was expressed that Mr. Simpson was not present to take cognizance of the improvements made by the District Association. At Santa Rosa your correspondent was delighted for many courtesies to Mr. W. Acton, the acting secretary, and to Mr. James O'Meara, the well known writer and journalist, both intelligent observers who are specially well informed on matters connected with Santa Rosa and its future development. In Petaluma, Mr. Cox, the secretary, and Mr. Wilfrid Pags were kind enough to introduce your correspondent to many gentlemen who were interested in the fair, and among them was Mr. J. R. Rose, who has a wide-spread repute as a breeder of good stock both as regard horses and cattle.

After the parade on Wednesday, a visit was paid to his stalls, in which were stalled some fine graded as well as first-class trotting stock. The first one to be examined was naturally Susie Rose, the dam of the now famous Nellis R., and invidious as it is to make comparisons, she rates well with the best matrons of our stud farms—bright bay in color, roomy in build, with good legs and neat, strong hind quarters. By her side is an own brother to Nellis, foaled on the 17th of July, who, from his form and spirit, may in the future, excel his sister's reputation. There is also a two-year-old of the same breeding that seems to be a marvel of growth, weighing 1,105 pounds, with an intelligent head and fine muscular development, combined with a gentle disposition.

After looking at General McClellan, Jr., a magnificent specimen of trotting horseflesh, an inspection was made of a fine young gray draft stallion named Noel. He is by Dnks, from a McClellan mare, two years of age, weighing 1,450 pounds. His muscular powers in a fine, strong-moulded frame, are well developed, and as a proof of his gait he came up from the ranch, twelve miles distant, in an hour and three-quarters. Such horses as these should attract the attention of our farmers, as they can see at once the advantage of breeding their mares to these foreign-bred draft stallions, and as a proof of the propensity of the male, it is stated that whatever the color of the mare may be, if she is bred to such horses as Duke, the foal will be gray and take after the form of his sire, nineteen times out of a score. Another fine four-months-old foal is by Duke, from a McClellan mare, and four or five others that merit attention. The horses and cattle that Mr. Rose shows are in rough, healthy condition, strictly to the mark, and that is the reason of his popularity among buyers and that his stock is so quickly disposed of. It was the intention of your correspondent to take a look at some other horses of note, but the saddling hell was heard and he strolled along the cattle sheds that were filled with a variety of very valuable stock.

The Ayreshires, the Devons and the Herefords are well represented, the latter exciting a great deal of curiosity, but the guarded opinions among classes who are perhaps prejudiced, is that the Hereford may be good for meat purposes, but that in the way of milk and meat the Devon is better adapted to this coast. P. J. Shafter shows some fine Jerseys, some of them mouse-gray. There is a hull, four cows, a yearling, a two, three and four-year-old that are worthy of attention. In the next sheds are a dozen short horns, taken right off the range of the Cotate range, of which Mr. Wilfrid Page is the superintendent. These are fine cattle and a credit to the country. From the same range are seven graded shorthorns that should also interest farmers, as here at once they can appreciate the benefit derived from the first and second crosses with a full bred hull.

Strolling trackwards a peep was taken at the sheep, principally Southdowns and Spanish merinos. The former seem to be larger than the average pure stock, and are also fattened too much for market purposes, and they reminded one of those thick juicy chops provided at the Alhion, Brighton, England, the centre, save seawards, of the Southdown region. The mounting hell is heard, and further comments have to be postponed until the next letter.

The attendance at the races was seemingly not very large and but few amateurs were present from the bay, owing perhaps, to the fact that the card presented but one event on which there was likely to be any speculation. This was the mile dash for which the following sported silk: Forest King at \$25, Philip S. at \$12, and the field, in which were Jon Jou, Stanislaus and Birdcatcher, \$8. Backing the King at even against such a field was a hold operation, and it was only Duffy's riding that saved his backers from defeat. For a mile dash the start was very straggling, with the two favorites in the lead and the others running in Indian file. Jon Jou joined the leaders in mid-stretch at a rattling gait, when Philip S. was reined back into the third position. Jon Jou took the lead to the fiddlers' rejoicing, but Forest King challenged him at the distance pole, and after a fierce tussle beat him home by half a length in 1:43 1/2. "I haven't been in so tight a squeeze for many a day," said Patsy, as he weighed in, and true enough it was, as the start and the injudicious riding on Jon Jou and Philip S. gave the King the race. By the way, the stable boys and their followers were on Philip S., who had shown a fine trial, and consequently there was much gasping of teeth among them after the event. Stanislaus ran into third position, and Birdcatcher was last. Mr. Dorsey was present, and it would be very pleasing to see his colere to the fore in a good race, for he is one of the staunchest supporters of the turf we have on the coast.

Petaluma, August 26th.—Running, free for all; dash of a mile; purse, \$300, of which \$150 to the first \$75 to the second, \$45 to the third, and \$30 to the fourth horse.

S. J. Jones' b h Forest King, by Monday—Abbie W., 4 years, 118 lbs.	(Duffy)	1
W. Kelly's ch g Jon Jou, by Monday—Plaything, 3 years, 104 lbs.	(Long)	2
Caleb Dorsey's b h Stanislaus, by Imp. Partisan—the dam of Modoc, 4 years, 116 lbs.	(Appleby)	3
P. Siebenbinder's b h Philip S., by Leicester—Lillie Stanpon, 3 years, 107 lbs.	(Easterbrook)	0
Caleb Dorsey's b h Birdcatcher, by Spectre—dam by Young Melbourne, 5 years, 120 lbs.	(Fortune)	5

Time, 1:43 1/2.

The concluding race was the 240 class which was considered such a "walk over" for Guy Wilkes that his backers laid as much as \$200 to \$10 on the chances as they stated of

his not meeting with an accident, or falling down in a fit. With Wilkes harred, the betting was \$25 on James H. against \$20 for the field, in which were Colonel Hawkins, Blanche and Kitty Almont.

James H. took the lead and maintained it to the straight, when Guy moved up and carrying him off his feet, won by four lengths in 2:26 1/2 with Blanche distanced through her unruly behavior.

The betting for second position was still even, between the field and James H., and on this occasion he showed a turn of speed that aroused much enthusiasm as he and Guy were lapped almost all the way round, and Goldsmith had to press Guy Wilkes to heat him by about half a length in 2:22, the quarter in 35 sec., and the half being made in 1:12 1/2. We have every reason to be proud of seeing such horses as these two numbered in the 240 class, as it shows clearly what a grand reserve we have in the Stats to draw upon if required.

In the third heat, the odds of \$20 to \$5 were offered on James H. against Colonel Hawkins, as Kitty Almont had also been distanced. Guy Wilkes won easily in 2:33 1/2 and as James H. made a wretched break before the turn, Hawkins was soon sixty yards ahead of him, but James rapidly reduced the gap and at the five furlongs was on even terms, but coming up too close on the outside he got his wheel locked with that of the Colonel, and when he wrenched loose, James H. galloped over into the fence throwing Baylis, breaking the shaft, and then galloping down the homestretch close to the rail, and at such a gait as to scatter the rubbers in every direction. At the backstretch he subsided to a trot, and was caught unprepared by a slight cut in the pasture, and Baylis also escaped unhurt. As some spectators were of the opinion that Williams might have swerved with his horse towards James H. as he came up, the judges with the drivers went to examine the track, and on their return to the stand the statement was made that the collision was accidental, and they gave first and second money to Guy Wilkes and Colonel Hawkins with James H. distanced. Thus the second place odds were upset and when it is remembered that the same thing occurred at the Bay District with Guy Wilkes and James H., the question arises if a man is not slightly idiotic to lay \$200 to \$10 even against such a great horse as Guy Wilkes with similar chances against him.

This decision was much commented upon as the upset arising from an accident, there was no necessity to distance James H., the more so as it was evident that he could out-speed Hawkins at any point of the track and Baylis urged that the collision occurred through his being carried out too far on the turn. Perhaps it was thought in the stand that the third and fourth monies became escheated through the decision, but this is not so, as they revert to Guy Wilkes.

Same day—Purse \$800 for the 240 class, of which \$400 to the first, \$200 to the second, \$120 to the third and \$80 to the fourth horse.

Guy Wilkes, b h by Geo. Wilkes, dam by Mambrino Patchen—	1	2	3
San Mateo Stock Farm—	1	1	1
Colonel Hawkins, br h, pedigree unknown—J. D. Young—	2	1	2
James H., b g, pedigree unknown—George W. Baylis—	3	2	dis
Kitty Almont, blk m, by Tilton Almont—	4	dis	dis
Blanche, b m, by Gray McClellan, dam by John Nelson—W. Bihler—	2:22	2:22	2:33 1/2

On Wednesday, with bright weather but a strong wind, the horses were called up promptly for the first race, a mile dash for district horses, in which there were but two runners, Garfield and Estelle Clark, Lightfoot, Oriols, Fanny Parnell and Dairy Maid paying forfeit. Garfield was in great favor, and, although the mare assumed the lead at the start, Garfield won as he liked in 1:48.

August 27th—District running, dash of a mile; \$25 each; \$10 forfeit, with \$100 added, of which \$25 to the second horse:

G. Pacheco's br g Garfield, aged, by Langford—dam by Lodi, 117 lbs.	(Duffy)	1
H. G. Carillo's b m Estelle Clark, 5, by Ironclad—dam by Orphan Boy, 115 lbs.	(Gannon)	2

Time, 1:48.

Next came the 240 district trot, in which Ned, on his form showed at Santa Rosa, sold at \$25 against \$12 for Uncle True and \$8 for the field, comprised by Sorrel Ben, Jackson Temple, Wild Bill, Len Hayden and Buck Foster, but none of these were dangerous save Sorrel Ben, who earned his third money by somewhat slow but fair trotting. Ned and Uncle True contested the two first, to the advantage of the former, in 2:33 1/2 and 2:36 1/2, but so close was the finish in each instance that no one could pick the winner to a certainty 50 yards from the wire. In the third and fourth heats Ned was quite nsteady, and Uncle True took them in 2:40 and 2:39, Ned and Sorrel Ben being a fair second for the respective heats, and in the concluding mile, with Goldsmith driving Ned and with a slight advantage of the hetting in his favor, Ned went to the fore and won the heat and race, with Sorrel Ben second and Uncle True far in the rear, through a break that almost brought him to a standstill. The time was again announced as 2:39, but outside watches made it 2:45, a slight difference of six seconds.

Same day—District purse \$400, of which \$200 to the first, \$100 to the second, \$50 to the third and \$50 to the fourth horse.

Ned, b h by Overland—J. Edge—	1	2	3	1
Uncle True, b g by Inauguration—S. Sperry—	2	1	1	3
Sorrel Ben, ch g, sire unknown—T. J. Beggs—	3	4	3	2
Jackson Temple, b h by Volunteer—George Jones—	4	3	4	5
Wild Bill, ch g, sire unknown—Dan Misner—	5	5	5	4
Len Hayden, b g by Alexander—D. L. Hayden—	5	5	5	dis
Buck Foster, b h by General Dana—Wm. Bihler—	7	dis	7	dis

Time, 2:36 1/2, 2:36 1/2, 2:40, 2:39, 2:39.

Interloped in the above race were four heats in the \$1,000 purse, reduced to \$500 and their entries by the withdrawal of Arah and Allen Roy to a match between Manon, the favorite at \$50 to \$25 for Albert W. There was a rumor afloat at an early hour that Albert was in good form, as McConnell through some hushing work was getting him into first rate fettle, and the lads around the stable chipped in heartily for "the good thing" it proved to be, and there was rejoicing in the camp that night. As the time shows, the race was trotted "from end to end" as old Harper used to observe, and the decision in the two final heats was awaited with anxious suspense by a crowd of speculators who were uncertain as to which side the fiat would go. In the first heat Manon was in an ekip shortly after being tapped off, but she lapped the horse out the half, and Albert won on a slight run at the wire by half a length in 2:22. The second heat was a great treat, the horses being lapped almost all the way round and the mare outsped Albert from the distance and won a close heat in 2:22. The chances of the stallion showed a slight improvement in the hetting, but the backers of the mare would not listen to the word "defeat," and met the feldere with a bold mieu that was somewhat changed when Albert W., with a double break in the back stretch and a skip in the straight, beat Manon out by a scant head in 2:22 1/2. She having also included in a skip and ruu. Now the trouble began, as with almost even hetting Albert W. was tapped off unintentionally when on a dead run, and McConnell, probably emarting under the injustice of the thing, let his horse galop until the first turn, and when he got him to his gait Manon was three lengths ahead, a gap that Albert W. reduced to one-third at

the half-mile, but when almost up to her he broke at the homeward turn, and yet finished so close that many who were not under the wire thought it a dead heat. Both Goldsmith and McConnell made a rush for the judges' stand to air their complaints and the decision was in favor of Manon by the shortest of heads, in 2.23. The betting now versed round again in favor of the mare and as Albert W. was off his feet at the first turn she spaded away from him and led by five lengths at the quarter; thence, however, he trotted in fine style to the second turn when he broke again and Manon also indulged in a skip at the entrance to the straight both trotting a fine race home, Albert W. coming in first in 2.26, by a few inches. Then arose a series of yells and shouts on the quarter-stretch, conduct that ought not to have been allowed, as a great deal of the noise seemed to be made to influence the opinion of the judges. The decision was finally in Albert W.'s favor, and the winning and losing breaks made in the final heats were such as to test the capacity of the best judges, so it was impossible to please both parties.

Same Day—Arranged purse of \$100 each, with \$500 added, Arab and Allen Boy being withdrawn from the 2:22 class; \$466.66 to first; \$233.33 to second.

A. Waldstein's b s Albert W., by Electioneer..... 2 1 2 1 2  
John A. Goldsmith's b m Manon by Nutwood..... 1 2 1 2 1  
Time, 2:22, 2:22, 2:22, 2:23, 2:26.

Thursday—The fair grounds were very well attended, the inside of the field on the quarter-stretch being crowded with vehicles while the grand stand was fully patronized by the ladies. There were but two events on the programme, but two other races were arranged so as to fill up the afternoon's amusement. The first race was a dash of three-quarters of a mile for two-year-olds, in which were Estill, Harry Peyton, Arthur H., and Cito, the former being the favorite, at first about even, then at \$20 to \$10 against the field. The horses were sent off on fair terms, but Estill and Peyton were quickest in their stride and raced together, lapped until the turn into the straight where Arthur H. and Cito moved up to the leaders, and a pretty race home ensued, Estill winning by two lengths, with the three others neck and neck for second position, which was accorded by a short head to Peyton. Time, 1:16 1/2.

August 28th—Three-quarters of a mile, dash for two-year-olds, \$25 each, \$10 forfeit, with \$150 added, of which \$50 to the second horse. W. W. Murray's cb b Estill, by Norfolk—Lady Jane, 110 lbs., (Duffy) 1  
C. Underhill's b b Harry Peyton, by Shannon—Miss Peyton, 110 lbs. (Easterbrook) 2  
Hill & Gries' Arthur H., by Hochhooking—Maid of the Mist (Appleby) 3  
J. C. Simpson's cb g Cito, by Joe Hooker—Too Soon, by Norfolk. (Ross) 0  
Time, 1:16 1/2.

The second was a pacing race in which Killarney sold for \$20 against \$5 for the two others, Maud and Sam Lewis. Maud led by a space of from one to two lengths, until the three-quarter pole was reached, when Killarney was sent to the fore, and bringing Maud to a skip within the distance, he won easily in 2:27 1/2.

In the second heat, as the horses were turning at the lower field entrance, McConn turned too sharply to score, and colliding with Killarney, threw his driver out and then Maud made a sudden spring that upset the sulky, and set off at a gallop trying by vigorous kicking to rid herself of the wheel that time and anon would crash on her hind quarters. She changed her gait into a trot and then with a gallop and was uninjured, as was the case with McConn, but it is evident that if this spirited driver does not be more careful he will come a crasher some day that he will remember to the last of his days. After a lapse of half an hour Maud was brought out again, but the mare was yet excited and Killarney won the two successive heats and the race, Sam Lewis being second on each occasion, the times being 2:25 1/2 and 2:41 1/2.

Same Day.—Pacing purse: \$300 for the 2:20 class, \$300 to first, \$150 to second, \$90 to third, and \$60 to fourth.  
Killarney, blk s, by Black Ralph—Peter Fitzgerald..... 1 1 1  
Sam Lewis, b b, by Echo—Charles David..... 3 2 2  
Maud, b m, by Bertrand Blackhawk—H. J. Agnew..... 2 3 3  
Time, 2:25 1/2, 2:25 1/2, 2:41 1/2.

There were then two races arranged to make out the afternoon's programme, the first being for named district horses in which there was some spirited betting, owing to the fact that the driver of Kitty Almont was confident of victory so she sold up to \$65, against \$100 for Hunter and \$25 for Gerster, whereas with all her speed but skittish conduct and bad breaks it is a question if she would have won in a month of Sundays. The race was so one-sided as to need no description, as Hunter took the race in straight heats in 2:32, 2:31 1/2 and 2:34 1/2, Gerster showing far better form than Kitty, being second in the first two heats, and thus securing second money.

Same Day—District divided purse of \$250 for named horses.  
Owner's b g Hunter..... 1 1 1  
Owner's b m Gerster..... 2 3 2  
Owner's b m Kitty Almont..... 3 2 3  
Time, 2:32, 2:31 1/2, 2:34 1/2.

The final race was a dash of five furlongs in which were Birdcatcher, selling at 20 with \$14 for Estelle Clark and \$12 for Doty Dimple. The latter won in 1:03 by half a length from Estelle, and Birdcatcher last, he having the worst of the start. The mares were both conceding him odds, as they all by agreement carried 115 pounds. If there are some races to make up during the circuit, it would not be a bad plan to open a race on similar terms. This dash brought the races to a conclusion.

Same day—Arranged free purse, \$125, \$50 to the first, \$30 to the second, and \$10 to the third horse.  
Hill & Gries' cb m Doty Dimple, by Ben Wade—dam unknown 4 years, 115 lbs. (Appleby) 1  
H. G. Carillo's b m Estelle Clark, by Ironclad, dam by Orphan Boy, 5 years, 115 lbs. (Ross) 2  
Cash Dorsey's br b Birdcatcher, by Spectre—dam by Young Melbourne, 5 years, 115 lbs. (Duffy) 3  
Time, 1:03.

### ATHLETICS.

#### Sprinting at Pittsburg—Kittleman to the Fore.

The following is the New York Spirit's report of the races at Exposition Park, Pittsburg, on the 19th:  
100-yard run, barring H. Hutchens, M. K. Kittleman, G. Smith, H. M. Johnson, and F. Rogers; best two in three heats—First heat, J. Quirk, 1; W. Boyd, 2; G. Carruthers, 3; W. Hough, 4; F. W. Stone, 5; W. E. Kennedy, 6. Second heat, Stone, 1; Quick, 2; Boyd, 3; Carruthers, 4; Hough, 5. Third heat, Stone 1; Quirk 2; Carruthers, 3; Boyd, 4; Hough, 5. This was as pretty and game a race as was ever seen. In the first heat two of the watches marked 10 s., and one 10 1-5 s. The latter was given. In the second all three had it dead 10 s., as well as scores of others. Just before the third heat I went over the course again in the presence of five to six press representatives, and it measured four inches short

on one side and dead seven on the other. I had made it right three time before. Just before starting I put Stone on the inside, back five inches. He got away well, but not ahead of the pistol, and ran as pretty and strong a race as was ever seen. He finished five feet ahead of Quirk. The three official watches marked 10 s., 9 4-5 s. Of thirteen other watches examined, three had 10 s. and all the others inside. He certainly did a shade inside, but 10 s. was given. The pistol firer held his pistol behind his back and in plain view of all timers. The day was perfectly clear, but very warm. The track was hard clay, rolled as smooth as a billiard table and has been adjudged, and is believed to be dead level.

125-yard run, barring H. Hutchens; best two in three heats.—First heat, M. K. Kittleman, 1; J. Ryan (said to be John Gibson, of England), 2; F. Rodgers, 3; H. M. Johnson, 4. Second heat, Kittleman, 1; Ryan, 2; Johnson, 3; Rodgers, 4. In this race the course was measured five times and came out right to an inch every time on both sides. The first heat was made in 12 1-5 s., 12 s.—12 1-5 was given. I went to see if they had started right, and found that the start had been made four feet short, caused by misjudging the pegs. It was a great pity, as they surely would have beaten even time. "Ryan" seemed to be laying up, but made a grand race of it. The second heat Kittleman seemed to be feeling his man for the first 90 yards, and then drew away strongly. Time, 12 2-5 s., 12 2-5 s., 12 1/2 s. Nine out of ten outside watches corroborated each heat.

#### Only a Foot Race.

The foot race between Fred Harmon and Walter Lubbock came off at San Jose last Monday. Lubbock received 6 feet start in 75 yds. and won by the same distance in the really wonderful time of 7 1/4 s. The betting was 2 to 1 on Harmon and if the race had been run on the square, which our readers know was not the case, the odds should have been ten to one. Harmon can give Lubbock twice the start and a beating. We have no sympathy with the arrant fools who invested their money. Never bet on a professional foot race if you are not on the inside. Of course the time returned is both as Lubbock can't beat 8 seconds at his best. A San Jose paper says that Harmon's time from the carriage entrance south of the judge's stand to the stable exit on the north, and thence to the hack was not taken, but the opinion was freely expressed that even Lubbock could not have caught him. The race was announced for \$100 a side.

#### Merion Club Games.

The entries for the Merion games are filling up rapidly, and at the present time of writing there is every prospect that it will be the most numerously contested meeting ever held on the Coast. On account of the absence of one of the handicappers from the city, the committee have decided to leave the entry list open till Tuesday, Sept. 2d. The medals which are on exhibition at Nicoll's are attracting a considerable amount of attention. The Bay District Track will be put in excellent condition, and a great many Coast records should suffer.

The athletic exhibition of the Nemean Club, takes place next Friday evening, at their rooms, Howard and 21st streets. A splendid programme has been arranged for the occasion, and it behooves all who are interested in the advancement of legitimate exercise to patronize the entertainment. The club purpose adding improvements to the rooms as an additional attraction for the members.

Mr. L. E. Meyera and Harry Fredericks, of the Manhattan Athletic Club, and Frank P. Murray, of the Williamsburg Athletic Club, arrived in the Servia, Aug. 17th. A. Waldron, of the Man. A. C., who went over as a member of the party, returned home a fortnight ago. The athletes look exceedingly well and give expression to only kindly things in connection with their trip.

G. Bell won the long distance amateur championship of England. The course was from Putney to Charing Cross Bridge (about five miles and a half.) Time, 1 hour 19 minutes 1 second. Iiter finished second and Moses third. Last year it will be remembered that Iiter was first and Bell second, and the time was 3 minutes 41 seconds quicker.

We are informed upon A. C. Phillips' arrival in Port Townsend, the speediest amateur sprinter in town expressed a desire to measure strides with the "little demon." Phillips, accommodating as usual, complied with the request and beat the ambitious sprinter rather handsily for a valuable trophy.

Ninety-four feet four inches.—At the games of the Rutland, Vt., Athletic Club, held on the 19th inst., C. A. J. Queckeburner, N. Y. A. C., threw the hammer 94 feet 4 inches, breaking the best previous record, 93 feet 11 inches, of W. L. Condon, of the Baltimore, Md., A. C.

The special feature of the Williamsburg meeting was the attempt of the professional runner, H. M. Johnson, to lower the 75 yard record, which he succeeded in doing, being officially timed in 7 2-5 s.

The University Field Day will take place in October and not September as stated in last week's issue. We apologize to our conferees on the daily papers.

As predicted in the BREEDER AND SPORTSMAN, Fred Cook proved the winner of the half-mile swimming race, at the Newport Baths last Sunday.

The Manhattan Club of New York held their annual games on Saturday, Aug. 16th, attendance meagre. Contests of an ordinary description.

Miss Beckwith will make an attempt to swim across the English Channel, from Dover to Calais some time this month.

It is reported that Thomas F. Delaney of the Williamsburg Athletic Club will shortly join the professional ranks.

The Whistler-Delmas wrestling match will take place Tuesday evening at Woodward's Garden.

The common practice of cruelly burning portions of a horse's mouth with a heated iron for the purpose of curing the disease called lamppis is very severely condemned by the better class of veterinarians, who claim that in this way a real trouble is produced while attempting to remove an imaginary one.

Skillful French horse-breeders give their foals a dessert spoonful of bone powder every day with their oats or bran. Farmers who rear colts on granite or slatey soils think they find this diet beneficial in building up the bony system of young horses.

### BICYCLING.

The ten mile professional race between Fred Lees and Albert Hawker for \$150 a side, came off at the Belgrave grounds, Aug. 11th. A magnificent race and secured by Lees by about 20 inches. By reference to the mile time appended it will be noticed that the winner beat the record for three and four miles, and also for six up to ten: One mile, 2 m. 50 s.; two, 5 m. 43 s.; three, 8 m. 39 s.; four, 11 m. 39 s.; five, 14 m. 35 s.; six, 17 m. 34 s.; seven, 20 m. 30 s.; eight, 23 m. 29 s.; nine, 26 m. 28 s.; ten, 29 m. 20 s.

The first congress of German velocipede riders will take place at Leipzig on Aug. 16 to 18, when it is proposed to form a union embracing all the German and Austrian societies of velocipedists. The Leipzig Bicycle Club has arranged for those days a round of festivities, including bicycle and tricycle races.

At the Crystal Palace, London, Henry J. Webb, champion of the London Bicycle Club, rode 100 miles on a tricycle in 6 h. 43 m. 32 s., beating all previous records from 25 miles upward, and surpassing the 100 miles record by no less than 40 m. 13 s.

A new bicycle club will be organized next Monday evening. The most active riders in the city are interested in the movement, so we can confidently expect to chronicle a great many runs in the near future.

#### A Trans-Atlantic Traveler.

EDITOR BREEDER AND SPORTSMAN:—When I left the noble city of San Francisco the 19th of July, for the land of my birth, I promised my many friends (you, Mr. Editor, included) that I would let them know occasionally of my whereabouts, so the best thing I can do to fulfill my promise is through the BREEDER AND SPORTSMAN, as it has a good circulation amongst them. Well, I got a start at 3 P. M., July 19th. On board the Oakland boat we had our parting glass, jolly good fellows, and should auld acquaintance be forgot—the send-off was immense—and I was soon ushered into a sleeping car. There were not many passengers, hence what there were, were more comfortable. All went well until we reached Winnemucca, then the bubble and trouble began. We had a very heavy loaded fruit car; the boxes became so heated that they had to be taken out; the implements they had to lift the car was too small—jack screws that would hardly lift the right side of that big policeman that does duty at the ferry—so they had to discharge the fruit. We were detained over three hours before we got new boxes put in, and had not gone very far before they became heated again; the weight of the car was too much, so it had to be abandoned, not before the passengers gave vent to their feelings. We arrived at Ogden five hours behind time, after being nearly smothered with alkali. On the U. P. there was not so much dust, but it was gradually getting warmer. Before we reached Omaha it was red hot and not a drop of ice water to be got and two hours behind time. Nearly all the trains had left Council Bluffs, so we had to take the Milwaukee to Chicago through the beautiful State of Iowa. Great heavens, talk about hot weather, why we were parboiled. A hail storm had just passed over, that stripped the corn and oats; it was a pitiful sight, more so as the destroyed belonged to poor families. We arrived in Chicago on time; left immediately by the Baltimora and Ohio R. R. for New York. Rain began to fall, that made the atmosphere more genial. The scenery we pass through is magnificent, resembles somewhat like the Narrow Gauge from Frisco to Santa Cruz, yet withal it was the first time I had been by the B. & O. R. R. and I swear it will be the last. There are too many junctions and crossings to make good time. First night out we had supper at 6 P. M. and breakfast at 12 next day. You may be sure there were some empty stomachs. I gave my lunch basket an overhauling, thinking I might come across a crumb of Engleberg's loaf, and my search was not in vain, there a piece about the size of my fist, lay wrapped up in the Morning Call; I soon had it hoisted out to view; another dive, came broadside on to a piece of Swiss cheese, that friend—Oh, there's a clincher! I can't spell his name, but it sounds something like Raspberry; however, it was rather too high toned so I consigned it to the B. & O. R. R. truck. Another dive into the lower hold and I dug out a small bottle of Clem Dixon's British beer. What a God-send, but it was like the fishes and loaves we read about. What was it amongst so many? I gave a lady a "wee" bit nibble and thank goodness she was a teetotaler, and I shipped the contents to the warehouse in hungry lane. We arrived at Cumberland two and a half hours behind time. After a long detention off we go, arrive at that notorious Harper's Ferry, get instructions to proceed to Washington, arrive at 4 P. M., Friday. The colored gentleman hallooed out: "This train will not leave until 10 o'clock, those that choose can remain in the car, others can take a walk through the Capitol." Of course a stampede out the depot took place, we had got but a hock and a half away, when the gentleman of color came bounding after us to bring us back, as the orders were to go on to Baltimore, there to wait for further orders. I began to feel a little uneasy, as I had taken passage by the Arizona that left New York, Saturday, 7:30 A. M. Arrived at Baltimore at 7 P. M., in the midst of a thunder storm. We did not leave until 1:30 Saturday morning. During all this delay I said and thought many wicked words, not fit for print. We arrived in New York at 9:30, just in time to be too late for the "Arizona." Worse still I lost the company of my "Lily." I had a letter of introduction to Mr. Gibson, of the Guion Line, from friend Jones, I found him in his office; he is from the mother country, a genial and obliging person. Through him I got transferred to the City of Berlin, and a fine steamer to myself. We left dock at 4 P. M., Saturday, July 26th, passed Sandy Hook at 7, with a strong breeze from E. S. E. There were 75 saloon passengers, 50 intermediate and 250 steerage; the first two days at sea the tables at meal times were deserted, but you can bet, dear BREEDER AND SPORTSMAN, your man was always on time at scratch, and without tips on at that. The only thing of an exciting nature to chronicle was an iceberg, distance ten miles, height about 150, length 250, and bitter cold. The usual Saturday nights concert was held in the saloon in aid of the Seamen Orphans' Fund which only realized \$50. We arrived at Quentown, on Monday, August 4th, at 4 P. M., left for Liverpool, at 4:35, arrived Tuesday morning, at 10 A. M., in tip top condition, after one of the finest weather passages I ever had. The City of Berlin is by no means a clipper, but I would say a good heavy weather boat. The officers from the captain down are gentlemanly in manners and are most obliging. Bon soir. WALTER.

LIVERPOOL, August 11th.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

Sporting News from Los Angeles.

EDITOR BREEDER AND SPORTSMAN: Well, I suppose that the first thing now expected of me is a well-contrived excuse for my long silence.

I might, of course, with a considerable display of facts, use the present political campaign as an excuse and plead my strenuous efforts for the election of my patron saint, the Prohibitionist.

Another unusual thing that this season has produced is the great number of ducks that have remained here to breed, the swamps having been full of them all Summer even wigons and spoonbills being seen in considerable numbers.

LOS ANGELES, Aug. 23, 1884.

At Bird's Point.

On Saturday last, the San Francisco Gun Club met at Bird's Point, for their regular monthly medal shoot.

The attendance of spectators was also good, with Mr. H. H. Briggs acting as referee. The match is remarkable in scores, there being six twelves, four elevens, two eights, one seven, which give a fraction of over 90 per cent.

It is not true the birds were an easy lot. For the first six rounds no better were ever turned out from trap, but as usual, and necessarily with the practice commonly in use with us, they deteriorated somewhat afterwards to the close.

first eight birds he shot in fine form and only missed one, but then he went to pieces and made three misses straight along.

Table with columns for months and rows for various game species (Butler, Gordon, Wilson, etc.).

THE TIES.

It was decided to shoot-off at four birds each. It is a rare sight, indeed, to see six men out of thirteen go to the trap on tie, each with a clean score to his credit.

Table with columns for First Tie, Second Tie, Third Tie, Fourth Tie and rows for various game species (Butler, Gordon, etc.).

At San Jose.

On Sunday last five members of the Garden City Club had a match, using clay pigeons. It is the first we have found for the season of a club that ought to occupy a foremost position among the sportsmen's clubs of the State.

FIRST TRIAL.

Table with columns for names and rows for First Trial results (F. Coykendall, R. Coykendall, etc.).

SECOND TRIAL.

Table with columns for names and rows for Second Trial results (A. W. Ingalsbe, F. Coykendall, etc.).

THIRD TRIAL.

Table with columns for names and rows for Third Trial results (A. W. Ingalsbe, George Anderson, etc.).

Preserve the Quail.

At the last regular meeting of the Legislature the Grangers made a decided onslaught upon the quails, some of them trying to have a clause inserted in the law that would encourage the extermination of these birds.

So speaks our friend and brother, whose head on such subjects is generally very sound. The testimony above strengthens Mr. Baldwin's testimony and of other gentlemen at Los Angeles, that up to a certain period—that when the grapes begin to soften—the vineyards have no greater benefactor than the quail.

The match between Messrs. Pearson and Fay is all settled, and the stakes deposited. The terms, as we stated last week, are \$500 a side, 100 birds each, 30 rise, both barrels.

A gun club is in process of formation at San Lnie Obiapo. The district needs such an organization, and when completed we shall be glad to have the particulars.

Testing Deuteronomy.

Few people, we imagine, will deny that Moses, when it came to making laws for the government of mankind, was about the most level-headed old gentleman that ever lived.

From a little incident, nearly the same which came to our knowledge in early life, without then knowing as much about Moses' ideas as we do now, we believe the above will be the experience all the time of every one who tries it.

Dog Poisoning.

We are glad to find the country sections taking action to stop this horrible crime. Since our article on the Oakland dog poisoning, Dr. Pinkerton, the Messrs. Pierce and others have been consulting about the best means to adopt to find out the cowardly scoundrels.

During a camping trip to Snow Mountain, Lake county, F. W. Ingham, of this city, recently killed four deer. He says the deer are very numerous in that locality.

"A rancher on the San Rafael road below Novato, Sonoma county, recently had a horse valued at over \$800 shot and killed by unknown parties, supposed to be hunters."

The wretched army of marauders who deny every right except their own to carry a gun and destroy other people's property, will come to grief this season, throughout the district mentioned above, or we are greatly misinformed.

The pinnated grouse in Iowa is said to be one of the glories of the past of that State. It is also said the same fate attends the quail if the pot-hunter is not checked.

Deer are reported in some parts of the State as depleting the mountain vineyards of their fruits. Any excuse is better than none, for killing deer in and out of season.

The accounts reaching us of late give hopes of a good quail season after all.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J Street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in briefer type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, August 30, 1884.

## Dates Claimed.

Golden Gate Fair, Oakland, September 1st to 6th.  
Chico Fair Association, Chico, Sept. 1st to 6th.  
State Fair, Sacramento, Sept. 11th to 20th.  
Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.  
San Joaquin District Fair, Stockton, September 22d to 27th.  
Santa Clara District Fair, San Jose, September 29th to October 4th.  
Monte Agricultural Association, Salinas, Oct. 7th to 11th.  
Fresno Fair Association, Fresno, October 7th to 11th.  
Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## THE FAIRS OF NEXT WEEK.

### Oakland and Chico.

Next week will be held two fairs which promise to be of great interest to the public generally, as well as those who have a fancy for fine stock. The opening day at Oakland is Monday next, that of Chico Tuesday. The most important thing at present for owners to consider is the closing of entries on the 2d, Tuesday next, to three of the Oakland purses. Through a typographical error in the bills, heats of two miles running is stated to be for a purse of \$5,000, whereas \$1,000 is the amount given, the entries to which close on the 2d. This is a liberal sum, and should receive a full response. The free-for-all trotting will also close on that day. The purse is \$1,000, the conditions being that Nellie R. has to draw a wagon and Director is barred; the pacing purse is \$500, and these should likewise be well sustained by entries. It is almost superfluous to write of the speed programme further than to refer to the entries that have been published and call attention to the many close contests that have taken place in the races which the same horses have figured in. Then there are new combinations which will compel new calculations, and the grandest of all charms in racing and trotting, which has been so aptly termed "glorious uncertainty," will not be wanting. Neither is it a requirement that much space be given to a description of the course, and the accessibility. The first is first-rate in every respect; the second there are good grounds for the assertion that it is unequalled in facilities for comfortable conveyance from any quarter. It is practically a suburb of San Francisco, reached by half-hourly boats and trains from the metropolis, the time thirty-five minutes. The local trains bring it almost to the door of residents in Oakland, Berkeley and Alameda, and the horse-cars run to the entrance gates. From the upper country trains will convey passengers to the depot at Sixteenth-street, Oakland, and the local train is only five minutes from there to Shell Mound, the station, which is only a short distance from the western entrance.

Besides the exciting events on the course, the display of live stock will be very fine. Horses will be in greater force than ever before, and there will be exhibits of cattle far beyond those of any previous fair. Shorthorns will be in full force, the most celebrated herds of the State present, with Holsteins, Jerseys, Devons, Herefords and Polled Angus to give variety to the display. This is the first year that Herefords have been shown in California, and the herds present are considered to be as good as there are in the world. Many of them are direct

importations from Australia, and the "Colonies" stand in the foremost position for this popular breed.

The Polled Angus are, doubtless, the first which have ever been seen in this portion of the Pacific Coast. They reached the fairground on Sunday last, and are the property of Paige & Johnston, of Los Angeles. Probably not five in a hundred persons who will visit the fair have ever seen a specimen of a breed which is held by many of the best judges to be superior to all others for the quality of beef. That this is a correct estimate is shown by the fact that in the London market it bears the highest price, and is sought after by the *bon vivants* of the metropolis of the world. It is a hardy race, subsisting and actually thriving where others would starve, and there is another advantage which should not be overlooked. At the present day a very large proportion of cattle are transported in cars, and the absence of horns is a great point in their favor. The "lordly Durham," the white-faced Herefords, the stately Holstein, the handsome Devon, the gazelle-eyed Jersey, petted everywhere, and the black cattle from the Scotch Highlands will make a show worthy of going a long way to see.

California has reached a point that permits of two great fairs being held within its boundaries, and when the locations are so far apart as Oakland and Chico the clashing of dates works little injury. The North will turn out in a mass to see the sights at Chico, and we have no hesitation in predicting that the fair there will be the best ever held. It is a grand country that surrounds the handsome town, and for fertility cannot be surpassed. The valley is wide, the foothills rich in productive capacity. The inhabitants are as wide-awake, as progressive in their ideas as can be found in any country. There are breeding establishments which will rank with the best. Horses, cattle, sheep, swine, in fact all kinds that have been domesticated are found of the highest type, and for cereals and fruits it cannot be surpassed.

Butte county in itself has the material for a good fair, united with those that compose the district there will be nothing lacking. While the exhibition proper is sure to be attractive, the speed department can scarcely fail to be a series of very hot races. From the entry list, which was published a couple of weeks ago in this paper, it is evident that there will be no lack of sport.

That it will be properly managed is a foregone conclusion, as those who have it in charge have the qualifications to conduct it in the right manner, and their integrity is beyond question. The two visits we have made to Chico were so enjoyable that there are poignant regrets that we cannot repeat them during fair time this year. The first visit was in May, and it is within bonds to say that a country could not look better. There was a thunder storm accompanied with a heavy shower during the first night spent in Chico, and the heavy reverberations and the patter of rain on the roof brought "back home" vividly to remembrance. The track at Chico is not far from the centre of the town, and, like other California courses, is a mile in circuit and as good as need be.

### The Coming Auction Sales.

There are to be auction sales by Killip & Co. during the weeks of the Oakland and Sacramento fairs, at which some very fine stock will be offered, and in all probability good bargains obtained. The first is a combined sale of horses and Jersey cattle, the property of P. A. Finigan, who having sold his ranch desires to dispose of the stock on that account. There are forty-two horses and colts and thirty-five cattle in the catalogue. The horses are bred from fashionable strains, the blood of Hambletonian, Geo. M. Patchen, Jr., California Belmont, Ethan Allen, John Nelson, Gen. McClellan and thoroughbreds being represented. The Hambletonian comes through such tried sources as Echo, Santa Claus, Irvington and Wissahicon. Mr. Finigan owned Geo. M. Patchen, Jr., for several years, which accounts for the prevalence of his blood. The thoroughbred strains come through Belmont, Norfolk, imp. Trustee and imported Sovereign, while the blood of John Nelson is derived from his daughter Nerea, her record being 2:23½, the fastest time ever made by one of that family. She and her filly, by Geo. M. Patchen, Jr., should prove very valuable for broodmares, especially when coupled with horses of Hambletonian blood. Both have colts at their side by Christmas, a son of Santa Claus, and are stunted to him again. The Jerseys are reported to be very fine, and as Mr. Finigan has taken great pains to add to the herd, purchased when he bought Alderney farm, there is little question that they are excellent specimens of this popular breed. The sale is to be held Wednesday, Sept. 3d, on the Oakland Cricket Grounds, which adjoin the Oakland Trotting Park, and only a short distance from Emery Station, and the horses are now on the grounds, and Mr. Finigan gives intending purchasers every facility for examination, and a chance to drive the road-

The sale at Sacramento is to include animals belonging to several owners. We have not yet learned the full particulars, which will be given in the paper of next week, though stock belonging to William Ayres, W. L. Pritchard; J. T. McIntosh, G. Valensin and Robert Beck will be offered. Those of Mr. Ayres are the well-known race-horses, Joe Howell, Fred Collier, Harry Rose, Trade Dollar and Ichi Ban. "Old Joe" is so well known in every section of the Pacific Coast that it is only necessary to mention his name to recall his many great performances. By Bonnie Scotland, from Eva Shepherd, by imported Sovereign, his breeding was a guarantee of success, and capacity to go on and on for many years. This is a characteristic of the Bonnie Scotlands. Dan K., by B. S., from Jennie June, by imported Australian, foaled in 1874, won a selling race at Monmouth Park a short time ago, and when put up at auction realized \$1,175. He has run 130 races and won 48 of them. Old Bushwhacker was another of the same stamp, and Joe Howell may have a lot of good races in him yet. His mile on the Oakland track in 1:42, and three-quarters of a mile in 1:14 show that he is a horse of wonderful speed. Fred Collier has shown in his races that he is both fast and can stay a distance, having run two and one-fourth miles in 4:00½, and three miles in 5:40. Harry Rose and Ichi Ban are very fast, capable of showing well in any company. Trade Dollar has also shown well in her races, and will grace any breeding farm when put in the stud. The Norfolk mares have already shown to be good breeders, and that without the chance they will have in the future, as coupled with sires that are now in California they will take still higher rank, and this is the opinion of others, is shown by the purchase of Hattie B. by Rancho del Paso, at Mr. Winters' sale, for \$1,650. Trade Dollar is a large, highly formed mare and in addition to the Norfolk blood has fashionable strains.

Mr. McIntosh offers the get of Singleton and Prompter. This will be the first of annual sales, as he intends to have it of yearly occurrence. Singleton is by a son of Rysdyk's Hambletonian, Willie Schipper, purchased by General Singleton, of Quincy, Illinois, at a long price. He is a very fine looking horse and his get are of great promise. Prompter is a "sure enough" getter of trotters. He is by Blue Bull and the Blue Bulls all trot. The Prompters we have seen are fine looking colts with plenty of size and substance.

Mr. Pritchard will offer thoroughbred horses and mules. Mr. Valensin has some extra good colts by Buccaneer, Crown Point, etc., and Major Beck is one of the most successful breeders of Jerseys in the State. That this sale will present one of the best opportunities for purchasers to obtain desirable stock that has been offered this season is certain. We will endeavor to obtain fuller information in time for the next issue of this paper.

### Unmitigated Snobbery.

In the *Spirit of the Times* of the 16th appears the following:

"A well-known broker and horseman telegraphed Mr. Wm. H. Vanderbilt from his home at Larchmont Manor, after Maud S. trotted his fast mile of 2:09½:

"To Wm. H. Vanderbilt, Esq.—Maud S., Empress of all horse-flesh. The public appreciate your generous exhibition of her speed, and recognize the difference between a gentleman's perfect road horse and one which is ignobly used as a gambling track machine. E."

The most biting satire is that which gives praise where there should be censure. As Maud S. has been used ignobly as a gambling track machine ever since Mr. Vanderbilt owned her, excepting in the hands of Carl Burr, when she could not trot fast, the hit is too palpable to be overlooked. But apart from that where would Maud S. stand if it had not been for trotting tracks? Had the generous exhibitions not been made what ground would she occupy now? It is doubtful that if there had been no tracks for her to show her speed upon if she would sell for \$1,000, and positively certain that without work since Mr. Vanderbilt owned her she would not bring half what she did.

The obligation is on the other side and the generosity is on the part of those who build tracks and the public who attend to give *celat* to the performances. Until her last performance at Cleveland she ranked second in the list, and it is nearly sure that when in that place Mr. Bonner would not have paid half what he did. The humbug of kindred assertions to those made by "E" is too apparent to impose on any, excepting, perhaps, that portion of the community who are in total ignorance of all pertaining to trotting sports. That the sender of the telegram is a Wall street broker is very likely, as the guild to which he belongs is great in encouraging sound morals; that he is a "horseman" may also be true in the same way that the railway king can be thus rated, and that he is a snob who would fain toady to a man of a hundred or two millions is beyond dispute. There is a good thing, however, in the noisy assumption of vir-

tue and superior purity by the leader and members of his clan, who rail and scold at men who are incomparably above them. It may bring associations and those who have control of tracks to a proper understanding of where such hippodromes as they have been encouraging will end, and before it is too late banish all such displays from their programmes. If trotting is sustained, that is the kind of trotting that will remunerate breeders for the outlay incurred, there must be a change and in place of trotting and pacing against time, legitimate contests with encouragement for large fields of starters. The recommendation that the National Trotting Association take measures to obviate the trouble, is worthy of being considered, and without trenching on the liberty of members something might be done.

There might, with propriety, be a distinction made between horses going "against time," and those which figure in an actual race. Let the latter be accredited with a record; in the former call it a trial to be measured only against similar performances.

Since the above was written the intelligence has come that Robert Bonner is likely to purchase Jay-Eye-See. We are well pleased to hear it. In that case the two great guns of the hippodrome are effectually spiked, and trotting clubs will have to forego all hopes of securing either. The running mate business will not live long and female jockeyship share the same fate. There could not be a better illustration than a comparison—odious as comparisons are said to be—between Buffalo before the era of time contests and the last meeting.

The managers fell into the craze for fast time, and in place of stubbornly-fought battles with excitement and cheers from start to finish, as the varying fortunes of favorites were bright or dark, are anxious faces waiting for the figures on the blackboard, ere they can tell whether to applaud or not.

There must be a return to the old system or the popularity of trotting sports will be a thing of the past.

#### Stanford Stake, 1884.

The conditions of the Stanford Stake for 1882-3-4 were a stake of \$300 each, \$100 of which was due when the nominations were made, the first of January after the colts were a year old, \$100 due on the first of January following the date of entry and \$100 thirty days before the time fixed for trotting. In the Stanford for foals of 1881, there were twelve nominations of which four "staid in." These were Palo Alto's bay filly Argo, by Electioneer, from American Girl, and bay colt St. Just, by Electioneer, from Fidelia, by Volunteer; L. J. Rose's bay colt Bedouin, by Sultau, his dam Gertrude, by The Moor, and Jos. Cairn Simpson's brown colt Antevolo, by Electioneer, from Columbine, by A. W. Richmond. The third payment is due on September 18th, at which time, or before, payment must be made to either the Treasurer of the Stake, N. T. Smith, 4th and Townsend streets, or the Secretary, Jos. Cairn Simpson, at this office, in order to retain the right to start. The race is to be trotted on the Bay District Course the third Saturday in October.

A change was made in the Stanford of 1885, the stake being reduced to \$175 each, and that which will close on the 1st of next January may be opened under still different conditions. It is proposed to make it a stake of \$200, nominations to be made the 1st of January following the year the colts were foaled, making the first payment \$25, the second on the 1st of the next January also \$25, the third payment of \$50, the 1st of January after the entries are two years old, and the final payment of \$100, thirty days before the date fixed for trotting. We think that these changes will be beneficial, and that the nominations will be largely increased.

#### The Embryo Stakes.

The declaration of forfeit accompanied by the \$10 fee must be made on the first of September, Monday next, or subscribers will be held for the larger forfeit of \$25. Those who desire to declare out must notify the secretary Captain Ben E. Harris, 1609 Washington St., on or before that date. The stakes are for foals of 1882, now two-year-olds, and foals of 1881, now three years old. In former years subscribers to this stake neglected availing themselves of the cheap forfeit and the consequence was a good deal of unpleasant feeling. A due regard of the conditions will obviate the trouble.

When Jay-Eye-See went to beat his record at Belmont Park, Philadelphia, on the 15th, his company was the chestnut gelding Jake, by Oliver Cromwell, a runner in harness that many Californians will remember.

#### Sonoma and Marin Fair.

Even so short a visit as that which only includes ten and a quarter hours from the time of leaving San Francisco until the return, is sufficient to prove that the fair of Sonoma and Marin is as attractive as ever. Less than four hours are occupied in the trip both ways, and the fair grounds is so near the depot that a few minutes are sufficient to reach it, if even pedestrianism is the means used to overcome the space. This was our first visit to the new grounds and though there were high praises awarded by all who had seen the track, the highest that can be given is well deserved. We are prone to state that an animal which particularly suits the fancy is the best we ever saw. Until the assertion loses its significance, and when it comes to a decided preference for a single race-course in California it is troublesome to come to a positive conclusion. As we have frequently written there is not a state in the Union that has so many that can be called first-rate, that is the track proper, that it is extremely difficult to make an award. The Petaluma course, however, is so nearly perfect that after careful examination it is troublesome to point a feature which could be improved. Looking from the stand up the home-stretch it is so true to level both longitudinally and transverse, so wide and the soil so firm and yet springing, that the first impression is that extra work has been done on that portion of it. A ride around it convinced us to the contrary. The shape is that which is the most approved, viz: parallel stretches of a quarter of a mile each, connected with semi-circles of the same length. The ground on which it is built is so nearly level that a few inches will mark the difference between the elevation and the depressions. The turns are thrown up to exactly the grade that suits our ideas, and the top coating is a kind of sediment which is the very best material for the purpose.

Water is struck a few feet from the surface and this not only adds to the elasticity but aids through capillary attraction in keeping the surface moist. All that is necessary is sprinkling the top to have it harrow up nicely, and harrowing leaves a friable coating which can be left in that shape for racing, and which can be readily packed so as to give firm footing and smooth surface the best for harness work. Another beauty of this fair ground is by the adornment of trees, shrubs and flowers. Already the trees are so well advanced in growth as to add to the appearance and in a few years will give a park-like loveliness, enhancing the beauty far more than ornate buildings. The stock display was very good. Heavy draft as well as fine horses, cattle of the various breeds and sheep and swine which will stand critical examination.

A Duroc sow with a litter of pigs a few weeks old was the centre of attraction in that department, the magnet being sufficient to draw a crowd around the pen from morning until night. She belongs to J. H. White, of Lakeville, who is very much impressed in favor of this breed. The few hours of our stay permitted only a cursory examination, and being so late in the week on Thursday, there was little time to write an account of what was seen. The attendance was quite large, and with few exceptions everything passed off satisfactorily. The exceptions will be taken up in the future, as some of them are of vital importance to this association, and indirectly have a bearing on every district fair in California.

#### A Suggestion.

Should managers of trotting tracks make up their minds to continue in the practice of encouraging the breaking up of all legitimate sports in the way of trotting and pacing, we would suggest a plan that will remove one of the objections to the one-horse hippodrome. Under the present system only those who have timing watches, split-seconds at that, and are in a position to note the fraction with accuracy, can tell how the race is progressing.

Now to obviate this difficulty, lay a miniature railway track on the outside of the course, construct a machine that will make the circuit at any desired rate of speed and surmount that faulty portion of the show in which there is no tangible competitive by a display that will show the actual phases of the race. To make it still more realistic have the machine in the shape of a sulky and in lieu of a horse, old Father Time in the shafts. The hour-glass and scythe can occupy the seat, and any other emblems that may be desired to heighten the effect added.

There will be no trouble in effecting a fair start. The head of Time can be placed directly under the wire, and when his more juvenile competitor comes to the scratch the signal to the horse can also start the machinery.

Thus if 2:10 is the figure the arrangement will be to reach the quarter pole in 32½ seconds, the half in 1:05, three-quarters in 1:37½. What an excitement there would have been at Cleveland had there been such an admirable contrivance, and when Maud S. led at the finish by a good quarter of a second, or ten feet and two hundredths of a foot, the shouting would have been terrific. The hooked nose would have been scarcely within reach of her tail, and all the *fugitive* old Tempus could do be of no avail. Some enterprising genius who will perfect this crude suggestion and patent it has a fortune at command. The course can be easily constructed so that it can be moved from track to track, and the attending expense far less than the horse portion of the partnership.

#### Free-For-All at Stockton.

It must be borne in mind that the free-for-all at Stockton for a purse of \$1,200, closes next Monday. Director is handicapped to wagon, and now that Monroe Chief is out of the way there are so many horses of nearly equal speed that it presents a good chance for them. Divided into four monies there is every prospect of playing even with a fair contingency of making a good winning. The safest plan is to mail letters to-day or Sunday, if delayed until the day of closing see that the postmark gives the date in plain figures.

At Marysville, on Wednesday, the stakes for three and four-year-old trotters were both won by Berlin colts owned by E. H. Miller, Jr. The three-year-old winner was the bay filly, Pansy, by Berlin, dam Lady Huhhard, Elite taking second money, Griselda distanced in the second heat. Time, 2:50½, 2:41½, 2:36½. The four-year-old race was won at will by Pansy's full brother Thapsin, his only competitor, Happy Jim, distanced in the second heat. The press report gives the time as 2:40, 2:35, but Mr. Miller's private telegram has it 2:40, 2:28.

#### Belle Echo.

Belle got first place at Rochester on the 15th, the race being a hard one for the speculators. The *Turf, Field and Farm* describes it:

The race for the 2:19 class was first called, and in this Harry Wilkes was a prime favorite, though both Catchly and Maud Messenger were well supported. In the first heat, Van Ness, driving Harry Wilkes, nodded for the word when far in the rear, and made no move for the heat, Catchly and Maud Messenger had a hot contest, which resulted in favor of the former, in 2:15½. The next heat Harry Wilkes kept in close company, challenged Catchly, who had the lead on the backstretch, and gradually drew away from her on the upper turn, winning by a couple of lengths from Maud Messenger, who footed up finely, in 2:17½. Wilkes also won the third heat in commanding style from Catchly, in 2:17½, and sufficiently proved his superiority over the others. But now reverses came. On the first quarter in the fourth heat the horse broke, and fell so far back in consequence that his driver did not try to close the gap, and Catchly won, giving her two heats to two for the favorite, and she at the pole and he outside. In spite of the situation, so strong was the belief in his commanding speed and stamina that he sold for 3 to 1 over the field. But his driver made two mistakes. In the first place, in his eagerness to get the pole at once he sent him too fast down to the turn, and the horse broke and ran by Catchly, after which, still on a run, he was swerved in front of her, causing her to be pulled back a bit. Van Ness directly pulled Wilkes out from the pole, as if conscious that he had done wrong. Before he got settled, Maud Messenger had the lead, and Belle Echo second, these two having profited by the foul. Wilkes was in fourth place when he struck his gait, and soon cut down all in front of him, taking the lead on the upper turn, and passing under the wire in 2:20, a couple of lengths ahead of Catchly. The judges deliberated long, and finally awarded the heat—and the race with it—to Catchly, condoning the foul, but punishing Wilkes for his run. The affair created more excitement than any other event of the meeting, but the wisdom of the decision of the judges was generally acquiesced in.

The Santa Anita Stable left Saratoga for Monmouth Park on the 20th. The horses have been engaged in the stakes of the National Jockey Club of Washington, D. C., whose Fall meeting begins the second week in October.

The Kenner Stakes, at Saratoga, on the 21st, were won by Powhatan after an easy run. Time, 3:36½. The value to the winner was \$4,575.

#### Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

R. P. Jr., Lexington, Ky.:

Ida May was by Gage's Logan, dam unknown.

G. A. Haywards:

Was Nutwood ever defeated in a race in this State, if so by whom, and upon what track?

Answer.—Nutwood was beaten seven times in this State. At Marysville, Sept. 14th, 1877, by Sweetbriar; Bay District, San Francisco, Dec. 15th, 1877, by Pat Hunt (wagon race); San Jose, Oct. 3d, 1878, by Doty; same place, Oct. 5th, 1878, by Judge Fullerton; San Francisco, Sept. 4th, 1879, by Graves; Stockton, Sept. 20th, 1879, by St. Julien; Sacramento, Sept. 25th, 1880, by Santa Clara.

S. T., Ione, Cal.:

We decided that same question in our issue of July 26th last. Emma is entitled to second money. She should not be placed "distanced" in the fourth heat but "third." See page 52, last line.

## HERD AND SWINE.

### Ensilage for the Dairy.

Opinions concerning the use of ensilage for milk production are steadily crystallizing into established facts. The unwarranted encomiums lavished upon it by over-zealous friends, and the strong condemnation of it by others, are proving equally groundless, and the opposing opinions both being quietly toned down to a more consistent basis, are demonstrating the correctness of the old adage, that "truth lies between the extremes."

The possibility of preserving green food in a condition to produce milk similar in quality to that derived from the same food fed green from the field, has been accomplished so many times by different persons as to leave no reasonable ground for denial. Not every body, however, who attempts a silo is successful. The result of general observation is, that one-half the silo builders fail in making the enterprise profitable, but this is no argument against a final success. In the introduction of a system so new and different from the customary practice, it would be very strange if failures were not numerous. Their occurrence should be no cause for discouragement. The preservation of forage crops by desiccation is a very old, simple, and well-known process, yet every year many find themselves with spoiled or injured hay, or other fodder crops, from neglecting, or not appreciating, the conditions necessary to preserve them. A more intricate process of preservation, with no previous experience, ought not to be expected to be any more exempt from imperfect results.

With the facts already established before them, parties now contemplating the use of silos may with perfect safety consider it settled that a satisfactory preservation of green food is possible, and the question for them to study is, how best to accomplish it and make it pay. As most of the ensilaging will be done during the months of August and September, this question will often come up, making it seasonable to notice some of the landmarks leading to success, and some of the obstacles to be avoided. The first great error which has burdened the system of ensilage is a heavy and needless expense in the construction of silos. It has been supposed that the silo must be under ground, or at least partly below ground, and that heavy and expensive walls of masonry were necessary to protect its contents from outside moisture, air, and frost, but it has been found that it is quite as well constructed above ground, and of wood, and that the only protection required is against air and storms. It is not even necessary to make any special protection against frost, for, in the first place, there is very little liability to freezing, on account of the elevated temperature of the ensilage, and, in the second place, because freezing does no material injury. Freezing alone makes no change in any of the food constituents of plants, it simply ruptures vegetable cells and exposes their contents to decomposition from contact with air, and to loss by the greater readiness with which the liberated matter is washed away by rains. In the silo, by being protected against air and wet, injury from these causes is obviated entirely. Vegetation frosted outside of the silo is perfectly preserved in it, if put in at once, before washed by rains or affected by weather. In the construction of silos, it is only necessary to protect against frost, so far as to obviate inconvenience in handling frozen food and the detriment to stock from eating needlessly cold rations.

Very cheap structures, either wholly or partly above ground, are now found to be quite as efficient as the more costly primitive buildings. The cheapest are those made with a balloon frame, with studs stiff enough to prevent the sides from bulging under heavy pressure, and double boarded on the inside with plain boards, with paper between them. Things with the lowest cost, however, are not always the best in the long run, and we certainly would not advise any dairyman to vitiate taste and mar pleasure by making an ill-looking structure for daily observation.

Cost is often saved and convenience served by locating a silo in some part of a barn, with its base on a level with the cow-stable floor. Wherever located, the main essentials must be kept constantly in mind—protection from the weather, keeping as nearly air-tight as possible, and convenience in getting the ensilage to the stock. Silos should be steep rather than shallow, and not wider than a convenient length of plank for covering them. Increased capacity is best made by increasing the length. The most approved covering consists of sound two-inch plank, matched and put together in sections three to four feet in width. Boulders of a convenient size for handling are generally preferred for pressing down the covering, and, when these are not at hand, bags of sand make a convenient substitute, using enough to give a pressure of 2,000 lbs. on each square yard of surface.

Any kind of fodder plants can be preserved in a silo, but what is to come out of it will depend very much on what is put into it. This much may be considered certain, that no more food can come out of a silo than is put into it. When the life of vegetation ends there is an end to the increase of food in it, and all changes thereafter occurring tend to diminish rather than to increase the sum total of food constituents it contains. Changes may occur, as by cooking or fermenting, by which some portions of food may become available that would not be available without such change, but any absolute increase of food is impossible. If poor food is put in, it will be poor food when it comes out. It should be borne in mind that the great value of a silo consists in preserving food, not in increasing it, and that whoever expects to take out of a silo more than he puts in, will be expecting an impossibility.

One of the best crops for preservation is fodder corn—the forage most commonly preserved. It is best for two reasons: First, because of the very large amount grown on a given space, and second, because if cut at the right time, it is one of the safest crops to keep. The general experience goes to show that very succulent and immature fodders cut when containing but little sugar, are most apt to ferment, develop bad odors, and mould. Fodder may be preserved cut at any stage of maturity, but it requires more skill and exactness in conditions at some stages than at others. Fodder corn, for producing milk, is best cut when near maturity. It then contains the most nutriment and the most saccharine matter, and is preserved with the least change and the least odor. This is a very essential consideration in the dairy. The great objection to ensilage for milk cows is its unfavorable effect upon the flavor of milk, and hence it is very important to observe every condition bearing upon this point. Later experience is modifying considerably the method of filling silos. Formerly it was thought necessary to fill in the shortest time possible, now slow filling is considered best. It is considered preferable to fill by degree, and to protect the work till heating in the mass is well under way, and a temperature of 120 degrees or above is reached before the cover is put on. Further change is then greatly abated.

It is often urged, and with some plausibility, that for milk production it is important to mix different foods in the silo, so that the ensilage shall make a complete and well-balanced ration for producing milk. There would be more force in such a proposition if ensilage constituted the whole food of the dairy. This it should never do, because there is always so much acid in it as to make an excess injurious, if ensilage constitutes the whole ration. It ought not, when in its best state, to constitute over half of the daily food, and it is believed to be better to balance up the imperfections of corn ensilage by way of the food used with it, than to make the ration perfect in the silo at the risk of vitiating flavor and quality in the combination.—*Live Stock Journal.*

### Premium Butter.

Daniel H. Hale, of Rowley, Mass., who received the Essex Agricultural Society's first premium for butter, makes the following statement of his methods: "The sample of butter entered for premium was made from the milk of grade Jersey cows. The milk is strained in shallow pans, in a cool room, and allowed to stand until the animal heat is gone, when it is removed to the milk-room. In thirty-six hours it is skimmed. The cream is kept until it is a little changed, then churned until it comes to the granulated state, when the buttermilk is drawn off and cold water put in. After churning briskly a few seconds this water is drawn off, and more water put in and churned as before. The butter is then taken out, thoroughly worked over and salted, about nine ounces to ten pounds of butter being used. The butter is then put compactly in earthen pans and set on a cool cellar bottom. After remaining twenty hours it is again worked over, much care being taken that all the buttermilk is extracted, weighed, halled up, and again set on the cellar bottom for twenty-four hours, when it is ready for market. I prefer this method to the use of ice, as it will arrive at market in better order than butter which has been subjected to the influence of ice. I intend to keep the temperature of both milk and cream as near 60 degrees as possible. For Winter use, pack the balls closely in nice wooden tubs, or stone jars, care being taken that they are perfectly sweet; fit a cloth closely over the top, and have a tight-fitting cover to exclude the air as much as possible. Butter so made and packed I have found will keep sweet any desirable length of time."

We clip the following from a correspondent of *The Husbandman*, as indicating an experiment very easily tried, though scarcely seeming likely to ensure the promised result:

I will give your readers my remedy for keeping mice and weevil-heeltes out of my granary: Hang up a few strips of tarred paper in the granary, and the vermin will not stay. It will also clear mice from the garret of the house. Scatter a few pieces of the paper about the garret, and one need not lie awake nights on account of the racing of mice and rats, for they will not stay where tarred paper perfumes the air. Tack it up, and hang a few strips inside the hen house, and lice will not stay long even there.

### How to Make Good Milkers.

No matter what breed you have, something further is necessary in order to reach the best success in raising good milkers. Good blood, whether Short-horn, Jersey, Devon, Ayrshire, grade or native, is not everything, but lies at the foundation; something cannot come from nothing. Treatment in raising a milker should be somewhat different from that in raising a beef animal, or an animal for labor. Begin as soon as the calf is a day old; see that it has sufficient to eat, and is kindly treated and regularly attended to. Never pamper or overfeed, but give it good, generous food, to cause a regular, early and steady growth. Accustom it to be handled, but not to such an extent as to acquire objectionable habits as a cow, but rather to be fond of the presence of the keeper. Kindness helps to create a quiet disposition, so important in a dairy cow, and this education must begin when the calf is young—any habits acquired when young are apt to cling to the cow when grown.

For a milker I would have the heifer come in at two years old. She is then old enough to become a cow. I would not, as a rule, allow her to go farrow, but milk her up to within a few weeks of calving, even if I did not obtain but little at a milking. A cow thus trained will give more milk and be more likely to hold out long in milk, if her after care is judicious and liberal, as it should be. Such treatment tends to form the habit of giving milk, and, as we know, habit is a sort of second nature. Couple the heifer with an older bull, one two or three years older than she is, is preferable to a yearling, and better stock is likely to come from such. After the heifer has come in, her feed should be regular and liberal. Good clover hay is the best of all, but we all may not have this for stall feed; then we must make up for what is lacking in some concentrated feed such as oatmeal, shorts, oilmeal or the like, but great care and good judgment must be used not to overfeed or crowd as the future cow may be ruined. Udder forcing shortens the useful life of the cow very rapidly.—*Country Gentleman.*

A number of the British nobility are engaged in dairy farming. Lord Vernon, Lord Fitzhardinge and Lord Scarsdale having taken the lead in the business. The two first named peers are about to open dairy schools in which pupils are to be instructed in milking and the mysteries of butter-making. Lord Fitzhardinge's home farm and dairy at Sudbury are said to be conducted on the most approved methods; everything is on a large scale, 2,500 gallons of milk being used daily. Halleck long ago wrote—

The Duke of Norfolk deals in malt,  
The Douglass in red herrings.

Aud now that the aristocracy run hansom cabs and dairies,  
The wouder is what they will take to next.

English agricultural societies practice the giving of premiums for dairy farms as a whole. The judges visit the farm and inspect everything connected with the dairy. A farm of one hundred acres must have at least forty cheeses on hand at the time of inspection. The first prize is usually \$60. Ten ten cheeses selected by the farmer must be sent to the fair for exhibition, when the prizes are declared.

August is the time to clear out thickets and worthless timber, by the use of the ax; as cutting off at this season of the year is almost certain death.

There is no longer the foolish prejudice against color in hogs which once prevailed among good farmers. A black hog is harder and less subject to skin diseases than one which is white. Red hogs do not even show their color after being killed and dressed, as the color does not extend below the hair.

### Weight of the Black Polls.

Messrs. Paige & Johnston, of Los Angeles, have now at the Oakland Trotting Park some Polled Argus cattle for exhibition at the Golden Gate Fair. Just before leaving the ranch the cattle were weighed, and the following is the memorandum:  
Black Commodore (1984), calved March 8, 1880; 4 years old; weight, 1,700 pounds.  
Young Favorite 4th (4323), calved Dec., 1879; 4 years old; 1,625 pounds.  
Miss Fyfe 3d (4341), calved Dec. 1, 1879; 4 years old; 1,560 pounds.  
Blossom 3d, of East Town (4986), calved Dec. 15, 1880; 3 years old; 1,350 pounds.  
Ela Angus, calved April 15, 1883; sired by Knight of Aberdeen (1816), dam Blossom 3d, of East Town (4986), 17 months old; not weighed.  
Ela Fyfe, calved Nov. 18, 1883; sired by Baron de Valeant (1969), bred by Thos. Ferguson, Keuchty, Scotland; dam Miss Fyfe 3d (4341), 9 months old; 590 pounds.  
Fred Douglas, calved Jan., 1883; sired by Earl of Daugh (2061), bred by the Earl of Fyfe; dam Miss Fyfe (4341); 19 months old; 1,140 pounds.

Mr. Childers, of El Dorado, Kansas, has been an extensive shipper of hogs, and has always lost heavily by overheating on the road, some of the hogs dying and others arriving in bad condition. To remedy this evil he filled three gunny sacks with ice, about one hundred pounds in all, and suspended them in the car over the hogs. The dripping ice-cold water kept the hogs cool, and since he has adopted this plan Mr. Childers has had no trouble in shipping live hogs to market.

## SHEEP.

### Sheep Washing in Australia.

A prominent feature in such of the work of washing as came under my observation was its thoroughness. Whether cold-water washed or scoured in hot water, with the assistance of soap, the work seemed to be done well. In this respect, as well as others heretofore alluded to, the aim of the manager seemed to be to put his clip in a condition most satisfactory to the buyer. The popularity of Australian wools with wool-buyers is by no means accidental. It is rather the sequence of combined and persistent effort on the part of wool growers to popularize their product, to the end that buyers may always be found willing to pay the best prices the market will afford. Like the successful merchant, they have endeavored to have on hand the stock that will attract customers, and up to this time they have been remarkably successful in so attracting them. I do not here undertake to discuss the wisdom of their course. Its results are urged upon the attention of wool-growers in the United States, in the belief that therein is to be found at least one of the reasons for the fact that a certain proportion of Australian wools find a market in this country at prices above those reached by any but the most exceptional among home-grown clips. This will not apply to the washed wools under consideration, as all washed and scoured wools scheduled as "first-class" are practically prohibited from importation by the double and treble duty to which they are respectively subjected by the existing law. Those bought for the American market are the long-stapled, fine, unwashed wools, that will shrink not over fifty per cent in process of cleansing. Quality alone would not warrant their importation if unaccompanied by a condition that places them quite nearly on a parallel with the brook-washed wools of this country in respect of shrinkage, while freedom from skirtings and tags, and the assured uniformity that follows careful sorting, still further adds to their popularity with the manufacturers.

In a former chapter allusion was made to the appointments for flock washing seen on the Ercildoune estate, and as these were, in some respects, the most complete coming under my observation, a brief description may not be out of place. The preparations here were for using hot water and soap; in short, shearing the wool as thoroughly as possible while on the sheep's back. Complete arrangements for cold water would differ only in omitting the vat of hot soap suds used in this instance.

Passing by the ample and conveniently arranged yards through which the washing fixtures were reached, I found myself nearing two substantially constructed iron-roofed buildings—the one to the right covering the tabular boiler for supplying steam and hot water, the other for sheltering the men while at work about the soaking and cleansing vats. By an easy gradient some two hundred sheep were driven into a pen with a floor three feet higher than the surface of the ground at the vats. The floor of this pen, and all races and alleys through which the sheep were to pass, were constructed of two-inch strips placed far enough apart to allow trash of every kind to drop below.

Extending from the large pen in the direction of the vats were three races or alley-ways about four feet wide and twenty-five feet long. At the lower end of the first of these was a gate connecting with the second, so that this could be filled from the first by countermarching. Midway in the floor of the first alley was a shallow vat filled with water, some ten inches in depth, through which all sheep were forced to pass, as it occupied the entire width of the alley and some eight feet of its length. By this arrangement the belly and legs of each sheep were thoroughly saturated. As soon as the second alley-way was filled a spray of water was thrown from a hose with perforated nozzle, and continued until the fleeces on every animal was wet thoroughly, when the gate at the upper end was opened, and the sheep passed into an adjoining pen, where they remained twenty to thirty minutes, or long enough for the grease in the wool to become softened. The next move was through the third alley-way, which led directly to the vat filled with warm soap suds. Just before this was reached another shallow vat, with about three inches of water, was passed through to cleanse the feet from each dirt and droppings as had adhered while in the pen, from which the animals were gently forced down a short inclined plane into the warm water vat. This vat, all below the ground, was four feet wide, four feet deep and twelve in length, walled with stone and cemented. It was supplied and emptied through iron pipes, and pipes for conveying steam for heating to any desired temperature were arranged around the bottom edges. The soap and such other cleansing substances as were used were first mixed in a tub and dipped into the vat as needed. With ten to fifteen sheep in the vat, men standing in narrow trenches on each side turned them about and kneaded the wool so as to remove every particle of grease and dirt. At the far end of the vat was a platform on a level with the surface of the water, upon

which the sheep was next placed, when men on either side pressed the suds from its fleece, first with their hands and then with combs—the latter removing such particles of black top as may have withstood the previous ordeal. The next stage was the cleansing process. This was done with clear cold water. An iron tank with a capacity of 300 or 400 gallons was raised above the head of the workmen. From this the water was brought down through pipes, the stream regulated at the pleasure of the workman by faucets so constructed as to deliver a light stream some six inches in width. There were three of these "spouts," and under them a table or bench on which the sheep was placed, and so turned about as to expose every portion of the fleece to the falling stream, and then turned upon the adjoining sward, clean and white, to be sheared the third day afterward, weather permitting. Tedious as the process may seem, the manager is my authority for saying that, with a full complement of hands, 3,000 sheep can be disposed of in a day.

The arrangements for fleece washing are, of course, altogether different from that above described, and, in some respects, similar to those found in woolen factories. Water is raised and heated by steam, and usually steam is further utilized in propelling the necessary machinery. The wool is soaked, treated with chemicals, cleansed, squeezed and arranged for drying by comparatively few men, who usually begin work simultaneously with the shearers. Of course the necessary sorting precedes the washing, and the several grades are treated and baled separately. This work is commonly done by contract, which also includes baling and marking.—A. M. Garland in Breeder's Gazette.

Now is a good time to stock up with sheep. The present low prices are in reality below their real commercial value, and there may be a reaction before another Spring has rolled around. So those who hold on to their sheep, and those who now hny, will be the ones to make the money out of the sheep business in the near future, and the ones who sell will be the losers.

### STABLE AND PADDOCK.

#### Fast Walking Horses.

Our Country Home well insists that the most useful gait is the walk; at that pace the labor of the world is performed and the daily bread of the children of men is assured to them. In his strong farm harness, with well stuffed, smooth and carefully fitted collar, the horse is put to the plow, the harrow, the cultivator, or the reaper. The millions of acres of our farms are walked over to produce the prodigious yields of breadstuffs and cotton to which the greater part of civilized men look for food and raiment. The heavy loads drawn from the farmer's granary to the mill, the railway station, or the warehouse of the merchant, are hauled at a walk. The faster and more elastic the step the greater the saving of time, money and patience. Though this is well known to all the world, few men in breeding, training or buying a horse, keep in mind that quick walking is the best gift of nature, or the first accomplishment of art, and insist upon it as a point adding essential value to the animal. Even our fast work on the road must be constantly relieved by walking, and nothing is more annoying to the horseman than to see the rapid trot suddenly degenerate into a motion slow as that by which a wounded snake drags himself through the dust.

Our public has been instructed that fast trotting is hereditary in certain families; temperament is surely hereditary, and a lively disposition, with elastic movement in both sire and dam, is quite certain to be transmitted to their offspring. But even if a colt is naturally sluggish in disposition he may be assisted, improved, and his rapidity of action promoted by a careful driver or trainer.

In halter-breaking, the work should be accompanied by rapid movement on the part of the handler, who, though he should not be nervous, should not be sluggish. The saying, "who drives fat oxen should himself be fat," expresses "the eternal fitness of things," and in teaching the colt, the disposition of the man has much effect upon the character of the animal. Patience is the best quality of the horse-trainer: "How poor are they that have not patience." Plenty of time must be allowed to every colt, and it must be fully understood that all improvement will be by slow gradations. When a colt is broken to harness it is a common custom to put him by the side of some quiet, old animal, whose sober example is extended to moderate his youthful exuberance. Here is where great loss may be made or great gain accrue. No colt should ever be trained by the side of a slow, dull walker. A quick, smart horse should invariably be selected as the companion in harness, of the learner, or he will fall into the bad habits of his mate. Colts are excellent in the plow or harrow. Some of the finest racehorses and hunters that have become famous in England, first developed their muscles in plowing; they take to it kindly, and this work, on light land, is the very best in which to teach that quick, springing action which is the crowning glory of the farmer's horse.

The brewers' heavy horses in London get to the stable and are littered down from 12 to 1 o'clock at night. At 4 o'clock they are harnessed and laden with beer for hours. Afterward they go out to Chatham or some place fifteen to twenty miles away, and come back with "empties," or sour ale, reaching the stable again at midnight. Their average load is not less than a ton per horse, and their average hours of work not less than twenty per day. These horses are from 17 to 17½ hands high. The London Live Stock Journal, from which we take this information, says there are no other horses in the world performing the same heavy tasks.

Some one writes to the Indiana Farmer: I see your veterinary editor says that heaves cannot be cured. Pardon me for saying I think it can, as I have cured several cases myself, using the following formula: Balsam of fir and balsam of copaiva, equal parts, with enough calcined magnesia to give consistency. Make into balls as large as a hulled walnut, and give one night and morning. Dampen the feed with sweetened water, and give the animal all the green food he will eat, for six weeks, and a cure is sure.

The Pittsburg Stockman very sensibly says this: Do not be afraid to pay well for stallion service. It is the only way to bring the best horses within your reach and encourage breeders to locate in your neighborhood. This is the point in horse-raising in which you can least afford to be niggardly in expenditure. Economy here, at the expense of quality in your colts, is sheer waste.

### Charles Coward's Stables.

This is one of the leading stables on the grounds of the Montana Agricultural, Mineral and Mechanical Association. It contains eight horses, all of which show good action. They are:

Wm. Fly's Assignee, by Administrator, half brother to Superior. Entered in the 2:50 class.

Comet, in whose veins tingles the blood of the Golddusts, a four-year-old owned by J. T. Murphy.

A three-year-old filly from Jefferson county, by Corrigan, record 2:26; and a stallion colt from the same quarter, by Live Oak, dam by Rifleman. Four from Potts & Harrison's stud, three of which are thoroughbreds. Balaklava is at the head of these, and is in better working condition than we ever saw him.

Post Trader, a two-year-old, by Balaklava, begins to show speed, and three-year-old Balaklava filly entered in the Montana Derby is a very elegant animal.

Nelson, their trotting horse, combines blood of the best trotting and running families in America; is entered in three-minute class and is liable to do good work.

Mr. Coward also has charge of Russel, a two-year-old stallion, by Milton Medium; entered in the two-year-old stakes.—Rocky Mountain Husbandman.

The best horses are those which are high-strung, and these are the ones most likely to be ruined in training. More than half the hired help to be got in these days is unfit to manage such lively teams.

### CRICKET.

#### The Philadelphia Cricketers.

We append the batting and bowling averages of the Philadelphia team of amateur cricketers who brought their English cricket tour to a conclusion on Saturday, August 2d, at Portsmouth. Of the eighteen matches played, eight have been won, five lost, and five drawn. Scott, R. S. Newhall, D. P. Stoever, W. Brockie and W. C. Lowry secure trophies.

#### BATTING AVERAGES.

Name	Innings	Runs	Not out	Times out	Average
J. A. Scott	30	851	93	2	30.11
R. S. Newhall	29	836	126	1	29.24
J. B. Thayer	30	817	93	1	28.05
D. P. Stoever	18	357	106	1	21.00
W. Brockie	22	369	113*	3	19.08
Howard MacNutt	21	279	75*	6	18.09
S. Law	26	385	55	4	17.11

W. Brockie bowled two overs for 12 runs without taking a wicket.

#### The Merions Win the Sixth Game.

An enthusiastic and critical audience, which included many ladies, assembled at the Olympic Grounds, last Saturday afternoon to witness the sixth contest for the Harrison Trophy. The Merion captain winning the toss elected to take the field. Carr and Knox were the first to appear at the creases to the bowling of Banner and Miller, and in the latter's first over Knox hit a high one to B. A. Benjamin. Sanderson, the new comer, managed to smash his egg before Banner sent him back to the dressing room, 2 wickets for 2—a bad start for the Occidents. Clark now joined Carr and the spectators were treated to a fine display of batting, both batsmen playing the excellent bowling with the greatest caution. With the score at 15 Banner sent down one to Carr which could not be denied. Carr batted wonderfully well for his contribution of nine, and right well deserved the applause which greeted him at the conclusion of the innings. Purdy was bowled first ball and Gray only stopped a few before Banner got one by his defense. Bristowe was run out with his usual bad luck and Waterman got his leg in front. Campbell joined Clark and some lively play was the result of the partnership, the latter hitting Banner to leg neatly for 4 and 2, but the irresistible bowler, Banner, lowered his wicket on the last ball of the over. Clark who can justly be termed the "Stonewaller" of the coast, played in his usual sound style and is credited with scoring one-third of the Occident score—a splendid performance. Campbell, after some lively batting, fell a victim to Banner. De Golia was bowled first ball, the innings closing for 37 runs, a small total, and which can only be ascribed to the splendid bowling of Banner, 3 wickets for 19 runs, against such a batting team, is a feat that he can well be proud of. Burnett and G. Theobald opened for the Merions to the bowling of Waterman and A. Knox. G. Theobald soon played one of Waterman's on his wicket, and Jacobs joined the Californian and a determined stand was made, both batsmen playing very well. With the score at 26, however, Burnett's wickets were disturbed by Waterman. Burnett made 11 by determined cricket. J. Theobald was bowled for zero, and Barney Benjamin, after making three of Waterman, was cleaned bowled by Clark. Ben Benjamin was not long in when he badly run Jacobs out, a rather unfortunate circumstance as Jacobs was well set and beginning to score freely. Miller just came in time to see his vis a vis make the winning hit. Benjamin, however, after making a lucky seven was caught by Knox. Miller and Spiro made 19 between them, which of course makes the authority on the game connected with the News Letter, who said they were not worth more than a run apiece, take water. We hope we have heard the last of such critics. The last wicket

fell with the score at 66 or 29 runs ahead of their opponents. The Occidents suffered in the bowling department owing to the non-appearance of Cookson, and the disabled condition of Purdy. The fielding of both sides was very fair, while the longstopping of De Golia is particularly worthy of mention. As each club has now won three games, a great amount of interest is centered on the decisive game, which will take place Saturday, Sept. 6th, at the Olympic grounds, Oakland. The score:

OCCIDENTS.		MERIONS.	
Carr, b Banner	9	Bristowe, run out	2
Knox, c B. A. Benjamin, b Miller	0	Waterman, 1 b w Banner	2
Sanderson, b Banner	1	Campbell, b Banner	7

Waterman	80 4 22 5
A. Knox	25 0 1 0
Clark	20 2 16 1
Campbell	11 0 9 2

### International Cricket.—Portland Wins Two out of Three.

The first of a series of three matches between Portland and Victoria, took place at the Oaks, East Portland, August 15th. There was a large attendance of spectators. The North Western Band, throughout the play, discoursed sweet music which considerably added to the day's amusement. All the arrangements made by the Portland Club were admirably carried out. Six years have intervened since Portland and Victoria met to test supremacy on the tented field. The Victorians, who were the first to defend the wickets, were rapidly dismissed for the small total of 35, of which Bennett made 8. Absalom and Bourne divided the bowling honors. The former gentleman will be recognized as a well-known English cricketer. Portland responded with 127. (Thompson, 10; Absalom, 29; Readman, 29; Arthurs, 9, were the heaviest scorers). There were no less than 28 extras, which speaks volumes for the bad fielding of the Victorians. The Victorians were dismissed for 52 runs in their second attempt, so the Portlanders won by an innings and 40 runs. The second match resulted in a victory for the Britishers. Victoria in their first attempt made 77, thanks to Eberts score of 31. The Portlanders made 48. (Readman 14, Absalom 14). Victoria in their second attempt scored 55. The Portlanders started in their inning with 85 runs to get for victory. The fates however were not propitious, and the last wicket fell for 46, or 33 runs behind their opponents. Eberts bowled effectively for Victoria.

The third and deciding game came off Tuesday, 19th, and resulted in a victory for the Portlanders after a well-fought game, by seventeen runs. The fine bowling of Bourne and the magnificent batting of Absalom were in a great measure instrumental in winning the match for the Portland team. A large and fashionable audience witnessed the match. Score:

#### VICTORIA.

#### The Merions off to Grass Valley.

To-morrow morning a team of Merion cricketers start for Grass Valley. They will play against the Union club on Monday, Sept. 1st at Watt Park. The Unions have been hard at work of late, and expect to make a better fight against the Merions than they did on their visit to this city. The Merion team will be selected from the following players: A. Jacobs, C. B. Hill, J. Mathieu, Fittock, Samuel, Ed Eyre, R. Gibson, F. Webster, C. Creighton, B. A. and E. S. Benjamin, C. Goewey and C. L. Meil. The team will also be accompanied with their spirited president, W. G. Harrison, Esq. The excursionists will have a splendid outing, as the Grass Valley people are famous for their hospitality.

The annual International match between Canada and the United States will be played on September 1st, 2d and 3d, on the grounds of the Germantown Cricket Club at Stenton, Philadelphia. On Tuesday night, Aug. 19th, the Portland Cricket Club banqueted the Victoria team at the St. George. Fifty gentlemen were present.—On Aug. 8th, the cricket match, Hampshire against Somersetshire, the former team compiled the extraordinary score of 643, which is the second highest score on record in a first-class match. Ten made double figures.—On Aug. 6th, the Australians were defeated by Kent. Australia 177 and 109; Kent 169 and 213.—In the third match England against Australia, at the end of the first day's play the Australians had lost two wickets for the extraordinary score of 363. Bannerman scored 4, and McDonnell 103, while Murdoch and Scott were not out at the time of drawing stumps, with the score of 145 and 101 respectively. This performance must rank among the most astounding things ever done at cricket. Ten bowlers were tried throughout the day.

FISH.

A man of more confidence than discernment asks us by letter: "Where are the Fish Commissioners, and what are they doing?"

Mr. Redding requests us to state his is a candidate for the Assembly from the 41st District. Mr. Redding is a member of our Fish Commission, and his object in seeking this position, as we understand, is to go to the Legislature this Fall to modify, correct and increase the fish laws of the State, and prevent the passage of any bills tending to militate against public interests, whether proposed by outsiders or by the Commissioners.

Mr. Hub Parker, Fish Commissioner of Nevada, and his deputy, Mr. Len Tenasunt, recently brought up 40,000 or 50,000 young New England trout from their fish hatchery in Carson last week and deposited them in the main stream and its tributaries flowing through Carson canyon. Several thousands were placed in the creek near Woodfords. The trout are different in appearance to our mountain trout being mottled with bright red spots. It is said they thrive in the streams, growing in a couple of years to a length of eight or ten inches.

Mr. Parker does not boast of what he is going to do, like some Commissioners we could name, but he is always doing something for his State.

Mr. Redding, Fish Commissioner, has furnished us with a plan of fish ladders to be used in all cases where the law requires a fish ladder to be used in this State. The Commissioners we understand, will furnish copies on application. All we need add is Section 637 of the Penal Code of California: "Every owner of a dam or other obstruction in the waters of this State, who, after being requested by the Fish Commissioner so to do, fails to construct and keep in repair sufficient fishways or ladders on such dam or obstruction, is guilty of a misdemeanor."

Mr. J. M. Adams, of this city, member of the California Sportsman's Club, with Mrs. Adams have lately enjoyed the solitudes of Yosemite, and of course, indulged in their favorite pursuit of angling. He reports good trout fishing below the falls on the Tiolumne river. He is the first gentleman who ever fished so high up with success. Mrs. Adams, who is, perhaps, the best all-round lady angler in the State, contributed her usual quota of fish to the community stock. This discovery is a credit to Mr. Adams.

Mr. Charles Kaeding has been quite successful lately with the black bass in Lake Temescal. Some were very fine. It is the intention of the California Sportsman's Club we learn, to seine Temescal for the purpose of stocking more accessible and suitable lakes. We look forward to this day with great anticipation of enjoyment. We think the result will develop some important discoveries.

It is removed the privilege of fishing for black bass in Crystal Springs' reservoir has been withdrawn. It is alleged parties have carried off more than the regulation per diem number in satchels. If this abuse of privilege be true, the company have acted very properly.

Our inveterate knight of the rod, L. M. Hoefler, has met with only moderate success lately in bay-fishing. On one occasion he caught eight pounds of fine rock and innumerable shiners. Others, besides Mr. Hoefler, complain of the abundance of shiners.

Smelt in abundance of good size and small size have lately been biting vigorously off Butebertown bridge. Generally bay fishing has been provokingly poor of late. The inevitable small boy is unhappy on both sides the bay.

A raucher on the Truckee meadows informed a Gazette reporter that at least five tons of fish, mostly trout and white fish, have perished on his place this season, having passed from the river through a large irrigating ditch. Some sort of a screen should certainly be placed at the head of all large ditches leading out of the Truckee, and so stop the wholesale destruction.—Reno Gazette.

The Walton Fishing Club, the ever congenial, take their next trip to-morrow, Aug 31st, leaving Washington St. wharf at 8 A. M. sharp. We acknowledge a kind invitation to the last trip of the season, and will be present if our B. C. and iron tippie is not marauded upon.

Messrs. Upson and Russel, of Sacramento, have lately been hunting and fishing up in Trinity county. They had good success with deer, and claim to have caught four hundred trout. Will the gentlemen give us the average size of those trout?

There has lately been excellent fishing in the surf below the Cliff House. Sand perch resembling the silver perch give excellent sport. These fish are fine eating and run from half a pound to two and a half. There are also black perch.

Sonoma creek, at Glen Ellen, has lately yielded some fine trout. Mr. Gordon within a fortnight caught about 40 trout one day the largest of which tipped the scales at two and a half pounds.

Messrs. Benn and Butler, of this city, have lately made a successful fishing trip to Lake Pillarctios. Mr. Benn caught about twenty fish averaging half a pound each.

YACHTING.

The San Francisco Y. C. Race.

The annual regatta of the San Francisco Yacht Club takes place to-day. The start will be made at one o'clock sharp, and the course will be, as previously mentioned, the new one in the channel. No words can convey the odium that should be cast on the yachtsmen who own vessels and have not entered them. Most of them claim it costs too much money to yst the yachts in racing order, but when such an event as the annual regatta of the oldest established yacht club here takes place, this consideration should have very little weight. Some yachtsmen, however, have not even such a plausible excuse for not entering, one prominent member of the club declining to enter because forsooth, "his sails are too old." Whether he does not wish to exhibit his vessel in such a gathering with dirty sails, or from a fear that he will be compelled to carry full working canvas and that something may part with the unusual strain, does not appear. If the former owners of his yacht had thought as he does, she would not have the reputation that she gallantly earned in the early days of yachting in this locality. At the present writing the entries are as follows: Class A, Lurline, Nellis and Chispa; Class B, Frolic and Rambler; Class C, Restless, Ripple, Idle Hour, Dawn, Sea Nymph, and Eva. At present there will be but three classes, as none of the larger outsiders have entered at all, and so the small fellows will go into the third class instead of into the fourth as originally intended. Considerable talk was indulged in during the past week to the effect that the race, from lack of interest and enthusiasm manifested, was to be given up, but the gentleman having the regatta in hand, positively states that it will be sailed and prizes given, no matter if only one vessel starts.

To some extent we are surprised, to wit: The Chispa, which always has fought shy of race comes in, while the Fleur de Lis, which has a reputation of wishing to race with anything and everything from a steamer to a buoy, has failed to make an entry. This is stranger from the fact that White in his class, would he sail, would have a comparative walk over.

Messrs. Shotwell, Magee and Kellogg have charge of the regatta, and from the standing of these gentlemen, everyone is sure to obtain all the credits due them.

Two weeks ago we named the Aggie as the probable winner of Class A and Rambler of Class B, but as the former does not intend to start we will pitch upon Nellie for favorite in the first class, taking into consideration the fact that Lurline, her only formidable competitor, is a keel boat, and as the start will be made at almost dead low water, the race will be contested against a flood tide, which is a big advantage to the centreboard vessels.

The Rambler will, we think yet, win in her class, and the contest for first place in the outsiders will be between Eva and Restless—both built by Stone, of this city—with the odds slightly in favor of the larger boat; that is to say, if they sail the full course, which matter was not definitely settled at the time this paper went to press.

As there will doubtless be a large number of vessels, which were not entered, but which will accompany the fleet to view the race, we trust that they will give the competing yachts plenty of sea room, and not insist on having the right of way, no matter if according to the strict letter of the law, they are entitled to it. Also that they will remember that the smallest yacht of the fleet is entitled to as much courtesy as the largest, and that it should be accorded to them. Full accounts of the finish will appear in our next week's issue.

In the N. Y. Club cruise in the early part of the present month the cutters achieved a most remarkable victory over the schooners. Basdown, Ilesn, and Wenonah, the only cutters entered against a fleet of fourteen schooners and nine sloops, which included nearly all the flyers of New York harbor, finished first, beating their larger competitors without time allowances, moreover in weather not favorable for heavy deep draught boats.

The new observatory on Telegraph Hill affords a fine opportunity to view the race to-day. The view commands every yard of the course, and those who have not proper glasses can procure them of the manager of this observatory. The cable road up the hill and the broad verandas of this building make it possible to see the race without the discomforts of dirty steamers and jostling crowds.

The yachts to-day will probably be sailed as follows: Lurline, Capt. Turner; Nellis, Frank Murphy; Chispa, J. A. Coolidge; Frolic, Mr. Hoyt; Rambler, C. M. Cole; Eva, Ed. Stone; Restless, J. Engel; Dawn, Wm. Moody; Idle Hour, J. Purvis; Rippla, T. Billings, and Sea Nymph, J. Farmer, all with two exceptions being amateurs.

In the Hall Y. C. race on the 16th inst., there were fifty-seven entries and all finished without a mishap. The yachts were divided in seven classes and the first boat of each class was as follows: Magic, Hera, Sea Bird, Transit, Posey, Banneret and Mabel.

Last Sunday, although a delightful day for yachting, was a very quiet one (speaking from an aquatic point of view). Up to noon of that day hardly a yacht could be seen moving.

Nellis and Chispa went up last Sunday to Benicia, to clean and prepare for to-day's regatta, while Lurline went on to the dry dock.

THE DRAMA.

Vienna Gardens.

During the week the Spanish Students have given us some very choice selections, rendered in a most charming and attractive manner. Of course, the houses have been good and marked as much by character as by number. Again we express our regret that in dealing with gentlemen and artists our people should be so noisy and vulgar in their excesses. Enthusiasm carried beyond a legitimate point descends to geyring, and thus destroys the taste of the audience and the pleasures of the performers. The Students deserve a warm acknowledgment for their performances, which they can accept and obey as gentlemen, but not a recognition that flavors very much of rowdiness. Miss Dubois and Geo. Zorella have been added to the attractions, and certainly their trapeze performances are wonderful, painful to nervous people sometimes, and yet always graceful.

Miss Kimball will appear on Sunday night, not being able from the fatigues of this journey to sing before. On Sunday the Original Nashville Students, the greatest jubilee singers in the world, will also appear, and these, with the present Spanish troupe, will make an entertainment unequalled in the city.

CALIFORNIA Electro-Plating Works,

657 MISSION STREET. Gold, Silver and Nickel Plating on all Metals.

SPECIAL ATTENTION PAID TO Plating Carriage Hardware and Harness Trimmings of All Kinds.

TABLEWARE AND BAR FIXTURES REPAIRED and plated at the lowest rates. Copper plates silver-plated for saving gold. All work in our line guaranteed.

KEATING & FAGAN, Proprietors.

PACIFIC ELECTRIC PAD THE GREATEST DISCOVERY OF THE AGE!

Best Retainer in Existence! Gives perfect ease and comfort in all positions. Does not interfere with work or business. We guarantee a perfect cure and treat. If you are afflicted with Rheumatism in all cases which we accept both of adults and children. Now, reader, captured, this is worthy of your investigation. We especially desire all extreme cases, those difficult to retain and those considered incurable. If other treatment has failed you, come and see us. EVIDENCE UNLIMITED. OUR TERMS: NO CURE, NO PAY. CURES & CUPTURE IN FROM 2 TO 30 DAYS. Single Truss with solution, \$10. Double Truss with solution, \$15. Consultation and Advice Free. Write for full information and circulars. Office open evenings. WE GUARANTEE TO RETAIN ANY CASE!

PACIFIC ELECTRIC CO. SOLE PROPRIETORS, No. 330 Sutter Street, San Francisco, Cal.

\$500.00 IN GOLD FREE! We offer the above amount of money and ten Gold Watches free to the first 123 persons answering the following Bible question: What King in the Bible is mentioned as having laid on an iron bedstead? Mention the Book, Chapter and Verse. The first person answering this question correctly, on or before September 15th, will receive \$75 in gold. If we receive more than one correct answer, the second will receive \$70, the third \$60, the fourth \$55, the fifth \$50, the sixth \$25, the seventh \$20, eighth \$15, ninth \$10, tenth \$8, eleventh \$4, twelfth \$4, thirteenth \$2; ten Ladies' Gold Watches to the next ten correct answers, and one dollar each to the next one hundred people answering correctly. If you are not the first, remember that you may be the second or third, so you stand a good chance for a large prize. Each competitor must, in every case, send 50 cents for One Year's Subscription to THE POULTRY KEEPER with their answer. This journal is a 16 page illustrated Poultry Paper, devoted to telling HOW TO MAKE POULTRY PAY. The regular subscription price of THE POULTRY KEEPER is 50 cents per year, so you pay nothing additional for the privilege of competing for one of the above prizes. The money will be sent to the successful ones. The names of those who obtain prizes will be given in the paper. THE POULTRY KEEPER will tell you how to make \$1,000 per year from one acre of land. Send your answer at once. Don't wait. Send money by registered letter, P. O. Order or postal note. Postage stamps taken. Sample copy 5 cts. Address THE POULTRY KEEPER 89 Randolph St., Chicago, Ill.

SALE OF Thoroughbred Horses, AT 10 A. M., AT State Fair Grounds, Sacramento, BY DIRECTION OF Messrs. DELANEY & AYRES, We will sell their stud of Thoroughbred Horses, comprising ICHI BAN, HARRY ROSE, TRADE DOLLAR, FRED COLLIER, JOE HOWELL. Catalogues giving pedigrees, etc., now ready.

KILLIP & CO., Auctioneers, 116 Montgomery St., S. F.

Wellington's Improved EGG FOOD. Now is the time that every one should feed this Egg Food to their poultry, one tablespoonful every other day to each dozen hens. It will keep them free from every disease and make them lay through the Fall and Winter, when otherwise they would stop. NOTE.—If not using the Improved Egg Food you know your hens are not laying now, so do not stand in your own light by delaying to buy it. 1 lb boxes, 40 cts. 3 lb, \$1. 10 lb, \$2.50. 25 lb, \$5.—Costing only 40 cents per week to feed 200 hens. Kept by all grocers and druggists. Any not having it should write for trade terms everywhere. B. F. WELLINGTON, Manufacturer. Agent for Perfect Hatcher Co., of New York, and Importer and Dealer in Alfalfa, Evergreen Millet, Vegetable, Grass and every variety of seeds. 125 Washington St., San Francisco.

Stanford Stake, 1884.

THE THIRD AND LAST PAYMENT ON THE Stanford Stake of 1884 for foals of 1881, and which is to be trotted on the Bay District Course the first Saturday in October, is due on the 15th of September. Payments can be made to either N. T. Smith, Treasurer's office, Southern Pacific R. R., or Jos. Cairn Simpson, BREEDER AND SPORTSMAN, N. T. SMITH, Treasurer Stanford Stake, JOS. CAIRN SIMPSON, Secretary.

PATENT RIGHTS. Inventors' Institute, 105 STOCKTON STREET, (Corner of O'Farrell.) Patents Procured for \$65, and Patents Negotiated. Send for Particulars.

**ASHLAND PARK TROTTING STU**  
NEAR LEXINGTON, KY.

**B. J. TREACY, PROPRIETOR.**

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those bred from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Hambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balzora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

**B. J. TREACY,** Lexington, Ky, 2 1/2!

Hawes' b g Patchen (formerly No Name). W. H. Vogel's s g Aleck by Patchen, dam unknown.

REMARKS AND CONDITIONS.

All trotting races are heat three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent, on purse, to accompany nominations. National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternating if necessary, to finish any day's racing, or to a special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to first, 33% to second. In all races, entries not declared out by 6 p. m. of the day preceding the race shall be required to start. Where there is more than one entry by one person, or in one interest, the particular horse they are to start must be named at 9 a. m. of the day preceding the race. No added money paid for a walkover. Rules of the State Agricultural Society to govern running races, except where conditions named are otherwise. Non-starters in running races will be held for entrance under Rule 3. Facing colors to be named in their entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries. Entrance fee, ten per cent. Entries to all the above races to close with the Secretary on Friday, Aug. 1, 1884. Do not write "Entries to Races" on outside of the envelope. J. HINMAN, Secretary. W. T. ADLE, President.

G. Howson's cb h Rondo, by Norfolk—Belmont. \$500. W. Boots' h f, by Bob Wooding—Gladiala. \$500.

Horses to be owned in District June 1, 1884.

REMARKS AND CONDITIONS. All trotting races are heat three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent, on purse, to accompany nominations. National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternating if necessary, to finish any day's racing, or to a special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to first, 33% to second. In all races, entries not declared out by 6 p. m. of the day preceding the race shall be required to start. Where there is more than one entry by one person, or in one interest, the particular horse they are to start must be named at 9 a. m. of the day preceding the race. No added money paid for a walkover. Rules of the State Agricultural Society to govern running races, except where conditions named are otherwise. Non-starters in running races will be held for entrance under Rule 3. Facing colors to be named in their entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries. Entrance fee, ten per cent. Entries to all the above races to close with the Secretary on Friday, Aug. 1, 1884. Do not write "Entries to Races" on outside of the envelope. J. HINMAN, Secretary. W. T. ADLE, President.

FIVE DOLLARS A YEAR.

## CRICKET.

### The Unions of Grass Valley Defeat the Merions.

The match between the Merions and Unions, which took place on Monday at Watt Park, Grass Valley, resulted in a victory for the Unions, after a well contested game. The Union captain won the toss and decided to defend the wickets. The last wicket fell with the score at 54 of which Veal is credited with 15. The Merions responded with 52, Webster heading the list with 16. The Unions scored 33 in their second attempt, thanks to the long stand made by Luke and Veal, who put no less than 57 runs together before a separation occurred. The Merions started in for the second innings with 86 runs to win, but they were all dismissed for 54, so the match resulted in a victory for the Unions by 31 runs. Five of the Merions were thrown out in the second inning by Crase, the Union long stop.

The Union Club are to be congratulated on their victory, and deserve every credit for their meritorious performance last Monday. Their improvement in all departments of the game was very noticeable. The score:

The cricket match between the Unions of Grass Valley and the Nevada City Cricket Club came off at Watt Park, Grass Valley, last Tuesday. The Nevada team made 43 runs in the first inning, of which J. Hampton made no less than 30. The Grass Valley team scored 85; Luke 29, Oliver 20. Veal, Wilson and Ellsworth 9 each, were the heaviest scores. J. Hampton scored all the wickets. The Nevada team made 38 in the second attempt, so the Unions won by an inning and 4 runs.

With the exception of C. A. Newhall, all the Philadelphia team which visited Europe will take part in the international match between the United States and Canada, which begins on Sept. 15th.

The I. Zingari leave for their annual tour in the States, Sept. 6, striking Boston first, then New York and afterwards Staten Island. The team this year is understood to be particularly strong.

The Nevada Cricket Club has been organized, with the following officers: President, C. J. Brand; Secretary, J. E. Carr; Treasurer, J. J. Jackson; Captain, Thomas Penrose.

The deciding game for the Harrison Trophy takes place this afternoon at the Olympic Grounds, Oakland.

A thoroughbred stallion, the son of Prince Charlie, was recently purchased in England by Isaac Harvey, of New York, for \$3,000. Prince Charles Edward, the imported horse, is a chestnut, and was bred by the Queen at Hampton Court. He was foaled in 1876. His breeding is unexceptionable, and contains some of the stoutest strains in England. He stands 16½ hands high, and on account of his rapid growth has never been trained.

## TURF AND TRACK.

### Petaluma.

The first race on Friday was a selling purse, a dash of a mile and a quarter, in which there were only two starters, Patrol bringing \$25 in the pools against \$10 for Garfield. On the drop of the flag Patrol took up the running at a fair gait and the two ran side by side up to the three-quarter pole, where Patrol gradually drew ahead, and although Garfield made a desperate effort to get up on nearing the distance post, Patrol won easily in 2:11½.

Petaluma, August 29th.—Selling purse, \$200; entrance free; \$50 to second horse; fixed valuation \$1,000; to carry entitled weight, two pounds off for each \$100 below valuation, and three pounds added for each \$100 above fixed value. One and one-fourth mile dash.  
W. Appleby's b b Patrol, aged, by Wild Idle—Nettie Brown, \$1,000, 120 pounds..... 2  
G. Pacheco's br g Garfield, aged, by Langford—by Lodi, \$300, 107 pounds..... 1  
Time, 2:11.

The second race was a trot for district yearlings between Catchup, Elise and J. G. Blaine. The latter was too rank for such a race and the result was very close between the other two, as they were on even terms at the distance, but here Elise was off her gait and Catchup won a well contested trot in 3:56.

Same Day.—Trotting; district; for yearlings; purse, \$150; mile dash.  
P. J. Safter's br f Catchup, by Rustic, dam Huntress..... 1  
Geo. Jones' f Elise, by Echo, dam Halfmoon..... 2  
Wm. Bihler's s c J. G. Blaine, by General Dana, dam by Jack Hawkins..... 3  
Time, 3:56.

The third race was a purse of \$1,000 for the 2:27 class, for which Sister was a great favorite, selling for \$60 against \$15 each for Anteo and Ollivette, and \$10 for the field, in which were Adrian, Timp Winston and B. B. The race seemed scarcely in doubt after the first heat, as Sister had evidently more speed than her competitors, but the struggle for second money was very close and it is a pity that a severe, and to many judges, an unjust ruling in placing B. B. from the second to the outside position in the first heat, detracted greatly from the interest of the contest. Sister took the lead and at the half-mile was a length ahead of Ollivette and B. B., while Anteo, who was behaving wildly, soon trotted into the fourth position and thus they came in in 2:27½. B. B. being about a neck in front of Ollivette, but placed last for running, but as he made but one slight skip in the mile, the judges must evidently have mistaken his somewhat irregular trot, when pressed, for a running gait and hence their decision, which met with a very contemptuous reception. In the second heat Sister had a still easier contest, taking the lead and winning handily in 2:25½. Ollivette second, and Anteo third, the latter showing a fine turn of speed from the half-mile post, trotting thence to the wire in 1:07½, showing what a grand horse he is if only his gait could be properly controlled. In the third heat B. B. tried to beat Sister, but he could never get nearer to her than a length, and thus they finished in 2:24½. Anteo again being third.

Same Day.—Purse, \$1,000, for the 2:27 class; \$500, \$250, \$150, and \$100.  
Sister, b m, by Admiral—John A. Goldsmith..... 1 1 1  
Ollivette, b m, by Whipple's Hambletonian—Bell—A. C. Bell..... 2 2 4  
B. B., bk g, by Bellfounder—J. W. Donathan..... 6 4 2  
Anteo, h b, by Electioneer—Columbine. T. de Turck..... 3 3 3  
Adrian, h b, by Reliance—Adriana—James M. Learned..... 4 5 6  
Timp Winston, ch g, by Primus—Lady Don—E. Downer..... 5 6 5  
Time, 2:27½, 2:25½, 2:24½.

As it was yet early in the afternoon a purse was offered for the following named horses: Oscar \$25 in pools; Sorrel Ben \$20 and the field \$40, in which were Lucy, Nighttime and Len Hayden. In the first two heats Oscar showed such superior speed that it appeared as if he would win in straight heats, in taking the two first in 2:38½ and 2:36½, but in the third mile he tired perceptibly and Sorrel Ben, who is a cant-and-come-again style of a horse, came to the rescue of the field and took the two succeeding heats in excellent style, in 2:37½ and 2:43½. As darkness came on quickly, the issue was postponed until the next day, Len Hayden having been distanced in the second heat.

On Saturday there was again a large attendance and the prize winners were grouped in the quarter stretch and were called up to receive their ribbons and awards. The fifth heat of the postponed race resulted in another surprise, as Nighttime disparted the heat with Oscar, who was still the favorite and won it in 2:41, with Lucy, now sent to the stable for not scoring a heat in five. On the final mile Ben headed Oscar to the mid hackstretch and when the former fell back on a break, Nighttime took his place and the two trotted

home in even terms until Nighttime was off his feet when within 40 yards of the wire, and Oscar won a well contested race in 2:39.

August 29th and 30th.—Purse of \$200 added to the entrance fees; \$150, \$75, \$45, and \$30 for named horses.  
Oscar, gr g, by McClellan, Jr.—J. M. Parker..... 1 1 2 3 2 1  
Sorrel Ben, ch g, sire unknown—T. Beggs..... 2 3 1 1 4 3  
Nighttime, gr g, by Rustic—P. J. Safter..... 4 2 3 2 1 2  
Lucy, b m, by Black Ralph—John Bile..... 3 4 1 4 3 ro  
Len Hayden, b g, by Alexander—D. L. Hayden..... 5 dist.  
Time, 2:38½, 2:36½, 2:37½, 2:43½, 2:41, 2:39.

The first race in the regular programme was a dash of two miles, free for all, in which Bachelor, although only a three-year-old, was in extreme demand, his backers laying \$25 to \$5, as if they thought they were merely picking up the money, although Birdcatcher and Garfield were both in the field. Patsy sent Bachelor to the front at a rattling gait, and led Garfield by two lengths, when half the journey was done with Birdcatcher four lengths in the rear. To the dismay of the talent, Dnfy was seen to draw his whip on Bachelor in the first turn, and the horse gradually came back to the others, when they became hunched on the homestretch, and then Birdcatcher drew away and won hands down in 3:37½.

August 30th.—Purse, \$600; \$300, \$150, \$90 and \$60; a dash of two miles.  
W. M. Murray's br b Birdcatcher, 5 years, by Spectre—by Young Melbourne, 120 lbs..... 1  
G. Pacheco's br g Garfield, aged, by Langford—by Lodi, 117 lbs..... 1  
Delaney & Ayres' h c Bachelor, 3 years, by Hockhocking—Maid of the Mist, 107 lbs..... 2  
Time, 3:37½.

Then came the consolidation purse in which Philip S. was sent up in the pools to \$40 against \$18 for Estelle Clark and Arthur H. The two former horses raced for five furlongs together when the mare was beaten and Arthur H. was brought up as soon as his jockey could see an opening on the inside of the track, when Phillip S. closed in on Arthur and threw him out of his stride. Phillip S. came in first by two lengths, but on a claim of foul the race was given to Arthur H., and the second money to Estelle Clarke, the time being 1:45.

Same Day.—Purse \$150; \$50 to second horse. Horses beaten once allowed 5 pounds, twice, 10 pounds, three times, 15 pounds from their entitled weight. One mile dash.  
Hill and Gries' b c Arthur H., by Hockhocking—Maid of the Mist, two years, 82½ lbs..... Young 1  
H. G. Carrillo's b m Estelle Clark, by Ironclad—by Orphan Boy, 108 lbs..... Ross 2  
P. Siebenthaler's b b Phillip S., by Leinster—Lillie Simpson, 3 years, 106 lbs..... Duffy, \*3  
\* Came in first but placed last for foul riding.  
Time, 1:45.

The races finished with a purse of \$150 for district roadsters, owners to drive to road wagons or carts weighing not less than 150 pounds, and the following started: H. P. Brainer's King; J. W. Offit's Jennie; E. Hopes' Jet; J. S. Van Doren's Ella, and W. Bihler's Dehly Mott. Jennie sold for \$25 against \$10 for King, and a like sum for the field. The race was well contested, the first heat being taken by Dehly Mott in 3:06 with Jennie second and Jet third. The second heat fell to Jennie in 3:06 with Jet second and King third. The third heat was taken by Jennie in 2:58½, Dehly Mott and Jet being second and third, and Jennie repeated in 3:03 winning the race, the other horses being in the same position as in the previous heat. This closed the sport of the day and the programme of a successful fair.

It is understood that Mr. William Emmett, theatrical manager of Chicago, has secured a two years' lease of the Chicago Driving Park, and that he will hereafter be the solo manager. His present intention is to give racing by night as well as by day, electric lights being used for illumination, and it is thought that the novelty of the affair will make it a paying investment.

### Auction Sales.

During the State Fair Killip & Co. will offer at auction sale some very valuable animals. We learn that on the opening day, among others, the racing stock of Delaney & Ayres will be put up. These were referred to last week, but it will do no harm to call attention to them again. The lot contains Joe Howell, Fred Collier, Trade Dollar, Harry Rose and Ichi Ban.

On the second day two mares belonging to H. S. Hogeboom will be submitted. Both are by Millman's Bellfounder the sire of B. B. and many other good ones. One of them has a record of 2:35, her dam of Morgan and thoroughbred blood, and is sired to Prompter, the other is from a mare by Lodi, her record being 2:30 and with ability to lower many seconds.

A Talk with Bither.—Some Interesting Incidents Connected with Jay-Eye-See and Phallas.

Edwin D. Bither, the driver of Jay-Eye-See and Phallas, was born in Charleston, Me., thirty-three years ago. At the age of eighteen he made his first professional engagement with Foster Palmer, driver of old General Knox, at Bangor, Me., and by close application to his duties young Bither soon became an expert handler. He remained three years in Bangor and, in the Fall of 1871, he packed up his traps and went West, settling down in the State of Michigan. Nine years ago he first entered the service of Jerome I. Case, of Racine, Wis., who had some seven or eight trotting horses, including Mila C., record 2:26½, by Blue Bull, and Fox, record 2:30. Subsequently he drove Edwin B. to a record of 2:27, gave Dom Pedro, by Blue Bull, a record of 2:27, and handled Charles C., by son of Ethan Allen, when he obtained a record of 2:33½. In 1879 Mr. Case purchased Phallas of Major McDowell and a year later he added the celebrated Jay-Eye-See to his stable. It was with the view of getting some idea of the manner in which these two trotting wonders were developed that *The Sporting Life* man had quite a lengthy and extremely pleasant interview with Bither.

"Was Jay-Eye-See difficult to break?" "No indeed, he was quite the reverse. He was placed in my charge when two years old and in the Fall of the same year that I got him he was hitched up not over a dozen times to a break-cart and that was all the instruction he received that year. He ran out the following Winter and in the Spring of 1881 he showed us a half-mile over the half-mile track at Racine in 1:18½ with only five weeks' work. He was then turned out into the pasture fields and staid there until September. He was taken up again, worked a little and trotted a half-mile in 1:14½. He was never given a mile of speed in his three-year-old form and was only jogged two miles and a half a day. During the Winter of 1881, I drove him on the road alongside of Edwin B. Next year I commenced to work him mile heats. He was then four years old. At Chicago he made his first public appearance in the great four-year-old race under the management of Budd Doble. The latter did not quite understand the young horse and after a desperate contest of seven heats, Jay-Eye-See won the fifth heat in 2:23½ and the sixth in 2:23½. He lost the seventh heat in 2:30. He was afterwards taken back to Racine, and kept in condition until Fall, when he won a four-year-old race at Chicago, obtaining a record of 2:19, thus snatching the laurels from Triquet, who was credited with the best four-year-old record. This was his last performance as a four-year-old, and he was sent to Col. Todhunter's farm, Kentucky, and turned out. It was not until the first of March, 1883, that he was taken up and prepared for the campaign. He was a great horse that year, getting a record of 2:10½. At Narragansett Park last month he obtained his best record—2:10, but I am positive he can go faster."

"But you had the best opportunity of your life at Narragansett."

"I don't think so. While the course at Providence was specially prepared for Jay-Eye-See, it must be remembered that a very heavy rain fell the night previous to the exhibition and I hardly think that the sod that surfaced the track was dried through sufficient to make it as fast as generally supposed. As an illustration why the track could not be as fast as represented I refer you to the third-quarter time made by both Jay-Eye-See and Phallas. Now, I can take either of these horses over several of the circuit tracks and trot the third quarter upon them faster than they showed at Narragansett."

"You consider then that Maud S. had an advantage at Cleveland when she trotted in 2:09½?"

"The Cleveland track is without doubt the finest trotting course in America. Give me the same opportunities that Bair had there and I will prove beyond question that Jay-Eye-See is the fastest trotter in the world by big odds."

"What of the performance at Belmont Park?"

"That was certainly the greatest the little horse ever exhibited. The break past the three-quarter pole cost him at least two seconds. The track was a little soft there, and the running horse coming up to his head with too sudden a rish unerved him, and that was the cause of the mishap."

As to his driving qualities Bither says he is one of the sweetest in the world. He never wore a sweat hood in his life nor a muzzle. In regard to his feeding he is given twelve quarts of oats a day and all the hay he wants. Grass is also furnished him in addition to a bran mash two or three times a week. Previous to his exhibition he is given slow miles, say twice a week; that is all.

Of Phallas Bither speaks in the highest terms of his qualifications as a trotter. "I got him," said Bither, "when two years old. He was then broken. He trotted that year in 2:48½. He was in the stud the next two years at Racine, and among the mares bred to him was Mila C. The result of the union was a fine filly, which Mr. Case has had offered \$1,000 for. Three of Phallas' weaning colts were sold last winter to Alexander Mitchell, of Milwaukee, for \$1,700. In the early portion of the year, as a five-year-old, Phallas had a rather serious attack of the pink eye, but he recovered his form sufficiently that Fall as to gain a breeder's record of 2:22½ at Chicago. He ran out the following winter. His first race last year was on the 8th of June at Cleveland. He beat Index and one or two others in a five-heat race, getting a record in the fifth heat of 2:18½. He was then beaten three races by Majolica at New York, Albany and Washington. In the first race Dan Mace held the reins over the stallion, but he could do nothing with him. In the third heat I got behind him and drove Majolica out in 2:17. At Chicago, same year, Phallas turned the tables on Majolica in a five-heat race, winning the third, fourth and fifth heats in 2:16½, 2:19 and 2:21½. At Cleveland he got a record of 2:15½. In the \$10,000 race at Hartford he was out of condition and only got fifth money. At Boston subsequently, against Director and Santa Claus, he won the first two heats and in the third heat was forty yards ahead at the three-quarter pole. The strap of his quarter-boot came down, compelling him to break, and he lost the heat and finally the race. Director beat him again at Albany. At Chicago he beat Maxey Cobb and Monroe Chief in a five-heat race. Last Fall he served about thirty mares, and during the Winter he ran out in a large paddock. About the first of February he was taken up and jogged on the road until the first of April, when he was taken to Louisville, Ky., to be prepared for the campaign. He trotted his first race at Chicago and obtained the great record of 2:13½ in a fourth heat. He then started over the half-mile track at Pittsburg, thence to Buffalo, Providence and Philadelphia."

Majolica and Rosa Wilkes will make their first appearance this season in the 2:17 class at Hartford. With Edwin Thorne, Clemmie G., Cathchy and Phyllis in the same class, the race ought to be productive of brilliant results.

The Exhibition Business.

Mr. H. D. McKinney, "Mambrino," much to our surprise, championed the racing against time business and writes to the *Breeders' Gazette* the following sophistical essay:

"M. T. G.'s" remarks in last week's issue of the *Gazette*, under the caption "Sensible Ideas," greatly surprised me. He says, "But there is another evil that I would like to see every true sportsman in the land use his influence against, and that is trotting or pacing against time." In a half-dozen papers of recent date I have noticed an account of the "wonderful performance" of an in-bred Morgan horse which, trotting against time, made a record of 2:20½; and now, before the printer's ink has fairly dried upon the prominence given to this performance, friend Grattan, who is the fortune owner of the really most excellent old horse, calls upon "every true sportsman" to use his influence against such "evil" acts, really invoking the wrath and condemnation of all true sportsmen for his "evil" and unsportsman-like act.

It is quite evident that "M. T. G." has never witnessed any one of the wonderful exhibitions of Maud S., Jay-Eye-See, or St. Julien against time. Knowing his nature so well, I am quite positive that had he been so fortunate he would now be on record as one of the most enthusiastic advocates of just such performances. It is idle to say, and in direct opposition to facts, that the people do not desire these exhibitions. When Maud S. and St. Julien trotted against the watch at Rochester, in 1880, and scored 2:11½ each, from the judges' stand I looked upon ten thousand enthusiastic people, who fairly made the grand stand tremble with their shouts. I did not have to ask myself, What is there in such a performance to become so excited over? for I came near dropping my watch from my hand in my anxiety to yell louder and longer than any one else. After the excitement had abated I did wonder if a similar performance ever could or would arouse the same frenzied feelings in such a vast crowd again. After a lapse of four years I found myself again at Rochester, watch in hand, looking out upon a multitude of anxious faces. Why anxious? Upon the track and advancing towards the judges' stand comes a small, black gelding, five years old, almost to fame unknown—Jay-Eye-See. Geo. Archer shouts "Go!" and click go the hundreds of watches, and the thousands of anxious faces watch the black phenomenon as he circles the ellipse. He is coming up the homestretch. Eyes are strained nearly from their sockets; and before the flying spectre has reached the goal such noted horsemen as "Eph," Simmons throw their hats and yell to burst their throats, "He's done it." The scene that followed dwarfed the wonderful excitement of previous years, and it is unnecessary to describe it now.

At Providence, but a few days since, eight thousand of the best people of Rhode Island went frantic with joy; old men kissing their wives, as in the heyday of the honey-moon. Why? Because the black beauty Jay-Eye-See had, by a marvellous performance, made them all happy. But yesterday we read, of what? "Jay-Eye-See, before more than ten thousand people at Belmont Park, trotted the two fastest consecutive heats ever placed on record; and Phallas three heats, all faster than Smuggler's time." And this is denounced as one of the evils of the turf. Bosh! What the American people admire is excellence, and whatever excels will find plenty of votaries to worship at its shrine.

Now friend Grattan you and I are very ambitious. You have already scored 2:26½. Now suppose—suppose, I say—you give your flyer another trial and he stops the watch at 2:14, what are you to do with your prodigy? He certainly will be harred in all open races, and the very act of barring him makes the amusement-loving people of America anxious to see him. What will you do? Why the same as any sensible commercial man would—exhibit your wares to best advantage to gain wealth and glory, for it is truly glorious to own a Maud S., Jay-Eye-See, Phallas, a Herod or a First Call. (Ahem!)

No, no. What the people want that have not seen Maud S., Jay-Eye-See and Phallas, is to see them perform; and those that have, want to see them again for the pleasure they have given them. Now "M. T. G." you are a breeder, and undoubtedly your motto is to breed up. Now you would discourage breeding meritorious animals "that can beat the world," for they have no field or class to trot in, and by showing in exhibition classes they are an abomination to the turf and cause people to lose interest in horses that should be pulling carts instead of competing for money; but so long as the people will breed to Hambletonians, Mambrino Chiefs, Pilots, Morgans and Clays, they will run the risk of the misfortune to breed an exhibition animal.

Clays and Pilots.

Among the interesting features of the circuit meeting at Rochester, Mr. R. Huntington exhibited his Clay Arabian bred stallions, sons of the two Arabian horses, Leopard and Linden, presented to Gen. Grant by the Sultan of Turkey, and their first get; also the first stallions ever known to have been so bred. Mr. Huntington also showed upon the track his two prominent sires, Clay Pilot, by Neave's Clay, and Spuk and Andy Johnson, by Henry Clay. The first, Clay Pilot, combines the blood in his dam of that of the dams of Maud S. and Jay-Eye-See; while his half-brother, Sayers, or Cummings' Henry Clay, was the sire of the dam of St. Julian, Elalau, Electoueer, and Napoleon, the sire of Jerome Eddy. Clay Pilot is also grandsire of Sultan, Del Sur, and the remarkable California colts, Orrin Hickok, who is driving Clay Pilot's granddaughter, Eva, and who drove Clay Pilot quarters in 36 and 37 seconds as a three-year-old, will no doubt be surprised to see old Clay Pilot in Rochester and on the track heging him to take a ride. Mr. Huntington also showed his Clay Spink by the side of his son, the great but unfortunate Captain Lewis. Although Spuk has been in the stud since April last, he was driven to the track on Friday, the 1st inst., where by way of exercise he trotted a five-mile heat in 14:35, doing the last four miles in 11 minutes, showing that he had lost neither his speed or power of endurance. The track had just been harrowed, and cupped very badly. It was, however, a pleasure to visitors from Spink's old stamping grounds of Yates, Seuca, Schnyler and Stenueh to see the little horse and his giant son, Captain Lewis, together.—*Rochester Democrat*.

Gossip at Mounmouth Park has it that there is no probability of Eole's seeing the post again this season, as, since the Champion Stakes, he has taken only slow canters, and Snelcker seems afraid to push him. Before the Champion there was some talk to the effect that if he won it he would be retired; but Mr. Gebhard has never intimated any desire to become a breeder, and the question naturally arises what would he do with "the big horse?"

Trotting in England.

[Pendragon in the Referee.]

After what was done with and without assistance by trotters and pacers at Chicago, it is interesting to note that in a trotting match at Manchester last Monday, for a trophy which virtually carries with it the English championship, Nellie Patchen trotted a mile and a half in 3:58, or at the rate of, say, 2:38½ per mile. This does not look as though trotting in England had as yet got well on the way towards rivalry with its kindred institution in America. The tracks here are by no means as good as they are in the States; still, I suppose the worst track here would not be sixty or seventy yards slower in a mile than the best track in America. So if we assume that at a mile only, with a flying start and on a slow English track, Nellie Patchen can trot a mile in 2:30, which I should very much doubt, we are still somewhere about a couple of hundred yards behind the best-known standard. Nellie Patchen trotted under saddle, which is, or should be, a distinct advantage. I have no desire whatever to disparage Mr. Bambridge's mare, who would be considered a flyer of the first water if we did not get such wondrous stories constantly about what is done by trotters on the other side of the water; but I really cannot understand how it is we have to take in these matters not only a back seat but a seat which is so very far behind the most backward seats of our American consins. No one would say—not even the Americans themselves will say—that they have a finer stock of horses than our own; and yet we with our very best trotting horses toil hopelessly in the rear of their commonest outsiders. Of this I am perfectly certain: That if we had started with the best trotting stock—if we had ever possessed reason to believe ourselves, as we used to believe ourselves at other sports, the best in the world—the Americans would not now be as far in the rear of us as we are in the rear of them. Given a 2:10½ trotting record here in England, the men of the States would long ere now have managed to reply to it with something far better than the 2:30 which is said—and only said—to have been accomplished in this country.

It is evident that the Belmont Park Association did not reap any benefit from the Jay-Eye-See performance. The arrangements were made between Lessee Pate and Crawford, the manager of Mr. Case's trotters, whereby the former received fifteen per cent. of the gate receipts and the latter took the balance. This laid all over the \$4,000 which the advertising agent of the show announced on the bills would be given. That the Belmont Park Association, through Frank Bower, first offered terms to Crawford is true. A telegram was sent to Providence, but no answer being received for some time, or at least, it is stated that none was received, Mr. Bower left for the seashore, and in the meantime Crawford came to the city. Not finding Mr. Bower at home, Mr. Crawford went to Belmont Park, told Pate what he came here for, and the latter at once made the percentage offer for himself, which was eagerly accepted, and the Association was thereby shut out. It is claimed that the day netted Pate about \$2,000 and Crawford between \$7,000 and \$8,000.

A disastrous fire occurred at the Abdallah Park Farm of W. H. Wilson, near Cynthiana, Ky., on August 24th, the residence and stable of Mr. Wilson being destroyed, together with the following trotting stock: W. H. Wilson's property—Triumvir, b s, five years, by General Washington, dam Lucy, value, \$2,500; Long Branch, b e, aged, by Commodore, \$1,000; Huron, br s, by Administrator, \$2,000; Chestnut Wilkes, by Red Wilkes, \$1,500; Norman Sprague, by Governor Sprague, \$500; Arnona, br f, by Smuggler, \$500; Minneapolis, br f, three years, by Indianapolis, \$1,000. Property of J. H. Allen, Darbyville, O.—Jersey Lily, two years, by Caliban, dam Abbas, \$5,000; Inkblack, two years, by Indianapolis, dam Nannie Jordan, \$2,000. Property of other parties—Tom Bagby, aged, by Vitalis, \$2,500; half sister to Tom Bagby, \$1,500; bay horse, by Almont, dam by Lexington, \$800.

At Chicago on the 23d there was an exhibition by the pacing mare, Minnie R., with the running horse, Firebrand, which accompanied pacer Westmont, when he paced over the Driving Park course in 2:01½. The exhibition was to beat 2:05. The time of the first heat was: First quarter, 0:32½; half, 1:04; three-quarters, 1:35½; mile, 2:07. In the second heat, just as the word was given, the mare broke and was pulled up and returned without going around. The third heat began with much promise. The quarter post was reached in thirty seconds, at the rate of two minutes, and the half in one minute, the same rate. The next quarter was slower, the three-quarter post being reached in 1:32½. Coming home the mare tired very perceptibly, completing the mile in 2:07½.

Trotting at Portland.

CITY VIEW PARK, Aug. 24.—Trotting; purse \$100; second horse to receive \$25.

Oscar, g g—Ruiter.....	1	1	1
Emma, d m—Misner.....	2	2	2
Time, 3:07; 3:09; 3:07.			

Same Day—Trotting and pacing; purse, \$100; second horse to receive \$25.

Sheriff, br h, by Kisher, dam by Red Buck—McManus.....	2	1	2
Chance, g g, by Romero, dam Cully mare—G. Misner.....	4	3	3
Forester, ch g—J. Misner.....	3	4	3
Time, 2:49½; 2:49½; 2:46½; 2:48½.			

The day of pacers with running mates was a brief one. When Westmont turned the Chicago track in 2:01½, the performance resulted in his sale for \$20,000, but the popular taste for the new style of racing did not last long, and it was soon found that Westmont thought as little of the arrangement as did the public, as after leaving that city it was impossible for him to show a decent mile. Peter Johnston does not make up his mind hastily, but when he once decides on a course of action it is likely to be carried out and consequently it is safe to say that Westmont will give no more exhibitions. Firebrand, the runner that accompanied him, has been turned over to Splan, who wants to try Gem at the new style of rig, and hereafter Westmont will fight for honors in the free-for-all pacing class.

It now transpires that Billy S. was "doped" in the free-for-all pacing race at Pittsburg, a veterinary surgeon having testified to that effect. From all accounts the Pittsburg meeting was the scene of a great deal of crooked work of all kinds, and it is understood that a great many owners will not take their horses there again.

Last week John Murphy drove Keen Jim, 2:19½, a mile on Mr. Robert Bonner's private track in 2:14, and on the same day Mr. Fred Bonner drove Lucy Cuyler a mile to wagon in 2:15½.

Eastern Gossip.

I met Mr. H. B. Winship on his way to the Utica Meeting. He was full of horse talk, especially as to the excellence of the Narragansett track.

"We are drawing the best horses of gentlemen roadites. You ought to have been with us last Monday. Quite a number of New Yorkers came over to see Edward and Swiveller go."

"That was a great mile. I did not think they would ever beat their record judging from their miles last season. Tell me about it."

"Well, to begin, it was a regular performance, and a record to skeleton wagon, as Mr. Work bet \$1,000 they could heat 2:16 1/2. The judges were John Shepard, our Secretary, E. G. Windsor, and your humble servant."

"How was the mile made?"

"Murphy brought them out and only jogged them two slow miles, then started them near the distance stand, and went away uncommonly slow. They seemed to be jogging the first quarter, in 34 1/2 seconds, but the second quarter they showed they were as good as ever by making it in 32 1/2 seconds, the half-mile pole being passed in 1:07 1/2. He eased them the third quarter, as they reached the three-quarter pole in 1:42 1/2, but down the homestretch they seemed to be going like Winship and running mate, and landed under the wire in good shape. Shepard and Windsor made it 2:16 1/2, my watch showed 2:16 2-5, and, of course, the official time was 2:16 1/2."

"Was Mr. Work surprised?"

"Not a bit. He says he is confident they can beat 2:15 1/2, and will let them show they can."

"What other deeds were done that day?"

"Harry McDonald gave Billy D. a mile in 2:28, and Charley Kenyon drove a strange bay horse to the half, in 1:03, and positively jogged home in 2:19 1/2. Of course, everybody wanted to know something about him, but all Kenyon told us was that 'he is from the country.'"

"What are the prospects for your Cirenit meeting?"

"A. I. Besides the regular programme we are going to have more novelties than ever presented on a track. I can't tell you all, as arrangements are not fully completed; but Murphy will come with his pair of runners, and they say it is a very thrilling sight to see a pair go better than a 2:00 gait. It looks as if they were running away. We will have a race and not an exhibition between Billy D. and running mate and Henry S., same rig. He can go in from 2:16 to 2:18. We also expect to have Gilbert show Mr. Rockefeller's great team, Independence and Cleora. He thinks it is no trick for them to put the double-team mark away down. You know they have a pole snuky record of 2:16 1/2."

I had the pleasure of a chat with Charley Green, the other day. He is just about right again from the effects of his fall, at Fleetwood, last season. His horses are still at Utica, he having stopped off there on his way from Chicago.

I hear of a friendly match between Messrs. Work and Shepard. Mr. Work bets Mr. Shepard \$1,000 that he can drive Edward a race of mile heats, to road wagon, and beat Dick Swiveller—Mr. Shepard to drive Swiveller.

After Com. Kittson's horses do the Minneapolis and another Western meeting, it is expected that they will return East and "take in" the Narragansett and Eastern Fall Circuit; Splan intends to try Gem with running mate, and is inclined to think she can make surprising time.

I met Joe Baylis, on his return from Belmont, last Friday. He says Jay-Eye-See can trot in 2:08 1/2 "dead sure," and that "the Belmont track is worn out." Joe is a good judge, and has followed the races for twenty years. He also was among the first to discover that Red Cloud could beat St. James.

Dr. M. M. Hedges has done the turf some service, and can, therefore, claim a hearing. He tells me of a public notice, which I have not seen, but he characterizes it as curricular, and says it was given him because he, in common with many other horsemen, skipped the Buffalo meeting this year; he adds: "I'm still on the turf, and have horses that can win their way to be first choice."

I nearly forgot to mention that, among other good things promised by neighbor Winship, on behalf of the Narragansett Park Meeting, at Providence. He says: "The clam-bake dinner and moonlight excursion, by steamer, goes, rain or shine. We've planted the clams and washed the punch-bowls." By the way, the original programme at the Narragansett Park has been almost completely changed. A special race for a purse of \$2,000 has been added to the first day, Sept. 9th. The 2:17 class, pacing, has been tacked on to the second day's trials; purse, \$1,000, while in addition to the 2:17 class trotters on Thursday, third day, a free for all, pacing, for \$1,500, and a special for \$1,000 will greatly increase the interest. On the closing day, instead of the free for all, purse of \$2,000, the 2:35 class will trot for \$800. The managers have, therefore, added \$2,800 to the purse, and have so arranged the races that the interest will be sustained throughout the meeting.—N. Y. Spirit.

At Saratoga the defeat of the Dwyers' \$14,000 purchase, Panique, by their \$600 cast-off Palinnurus in the Foxhall Stake on the 14th, furnished one of the most sensational incidents of the racing season. When Mr. Bryson secured the bay brother to Mintzer last June for the small price noted above, he could hardly have expected how good the gods would be to him in the near future. At Brighton Beach, however, the colt soon showed that he had been sold at a far less price than his real value, and it was then that his shrewd owner meditated the grand coup which he has since brought off so successfully at the Springs. His good second to Ratanplan, however, in the Iroquois Stake should in a measure have prepared the public mind for such a result, as he had a fair class of three-year-olds behind him on that occasion. His low quotations, therefore, in the speculation on the Foxhall Stake do not speak well for the discrimination of the betting men who are nowadays too frequently apt to be blinded for the time being by the glamour of McLanghlin mounted on a representative of the Dwyers. Panique's poor performance was very disappointing to those who had looked to see the Withers' and Belmont victor reassert his old-time vim of last Spring by a decisive victory, but the son of Alarm is evidently not at home over so long a course. That the race was a good one, the time 2:54 over the mile and five-furlong course shows, and as full weights were carried, Mr. Bryson's fine colt is likely to turn out as good or better a horse at a distance than his brother Garryowen, alias W. L. Mintzer.—Sportsman.

The shoes in which Mand S. made her record of 2:09 1/2 at Cleveland, weighed 15 ounces each, and they were retained by Mr. Vanderbilt as a memento of the days when he was able to say, "I drive the fastest piece of horseflesh in the world."

Saratoga.

August 22d.—Purse, \$350, of which \$50 to the second; entrance free; winners of any race of the value of \$3,500, or of two or more races of the value of \$2,000 each, or of three or more races (other than selling races) at Saratoga in 1884, to carry 5 lbs. extra; winners of two races (other than selling races) at Saratoga in 1884, to carry 3 lbs. extra; other horses beaten and not having won a race at Saratoga in 1884, allowed 7 lbs.; non-winners in 1884 allowed 14 lbs; maidens allowed, if four years old, 18 lbs.; if five years or upward, 25 lbs.; mile and a furlong.

V. L. Kirkman's blk f Eulogy, 3, by Enquirer, dam Euchre, 88 lbs. Higgs 1  
E. J. Baldwin's blk f Freda, 3, 102 lbs. Taylor 2  
Spoun & Pout's bg Williams, 6, 110 lbs. Jamieson 3  
Freakness Stable's h c Hidalgo, 3, 93 lbs. Williams 3  
Clay & Woodford's br c The Admiral, 100 lbs. Arnold 0  
Time, 1:58.

Pools: Freda, \$200; The Admiral, \$100, and the field, \$30. Betting: 5 to 3 on Freda, 7 to 5 against The Admiral, 8 to 1 against Hidalgo, 10 to 1 against Eulogy, and 15 to 1 against Williams. Mutuels paid, \$208.60.

Freda was first away and held the lead for almost a mile, when Eulogy rushed into the lead and held it to the close, winning splendidly by two lengths, Freda second, and three lengths better than Williams, third, Hidalgo next and The Admiral last. Time, 1:58.

August 23d.—The Morrissey Stakes, a handicap for all ages at \$50 each, half forfeit; only \$10 if declared out by July 1st, with \$1,200 added; the second to receive \$250, and the third, \$100 out of the stakes; closed with 25 subscribers, of which 10 declared out; two miles.

E. J. McElmeel's hr h Gen. Monroe, 6, by Tom Bowling, dam Minnie T. Morgan, 130 lbs. Blaylock 1  
O. Bowie's h g Compensation, 6, 108 lbs. Taylor 2  
M. Young's h m Vera, 4, 95 (carried) 96 lbs. Williams 3  
E. J. Baldwin's h c Lucky B., 4, 106 lbs. Holloway 0  
M. Young's h c Cardinal McCloskey, 4, 190 (carried) 101 lbs. Dorsey 0  
C. W. Medinger's ch f Emma, 3, 76 lbs. Anderson 0  
Time, 3:38.

Pools: Gen. Monroe, \$200; Lucky B., \$70; Emma, Compensation and Young's entries each \$30. Betting: 5 to 3 on Gen. Monroe, 7 to 2 against Lucky B., 5 to 1 against Compensation, 10 to 1 each against Emma and Vera, and 12 to 1 against Cardinal McCloskey. Mutuels paid, \$9.30.

The order at the start was Compensation, Cardinal McCloskey, Lucky B., Gen. Monroe, Vera and Emma. Compensation held a fine lead, on passing the grand stand was followed by Lucky B., Gen. Monroe and Vera, the others straggling. The same relative order was maintained until rattling through the dust on the lower turn, where Gen. Monroe ran forward to second position and threatened the leader. Compensation held his advantage to the last furlong post, where Blaylock sent Gen. Monroe to the front with a rush, and he won the Morrissey Stakes the second successive year by a length, Compensation finishing second and two lengths ahead of Vera, third, the straggling order of the balance being Lucky B., Cardinal McCloskey and Emma. The quarter was run in 23 1/2 seconds, half, 56 seconds, three-quarters, 1:25, mile, 1:52, mile and a quarter, 2:18, mile and a half, 2:44, and the two miles in 3:38.

Same Day—Purse, \$500, for all ages; at \$15 each, to go to the second; horses not having won in 1884 a race of the value of \$1,000 allowed 10 lbs., or if such horses had been beaten at Saratoga, and had not won a race since July 15th, allowed 15 lbs.; maidens allowed, if three years old, 18 lbs.; if four years, 23 lbs.; if five years or upward, 27 lbs.; six entries, mile and a furlong. Time, 1:57 1/2.  
R. R. Owing's h g Mammonist, aged, by Buckden, dam Monomania, 107 lbs. Conkling 1  
J. W. and R. H. Loid's h g Richard L., 3, 89 lbs. Lewis 2  
E. J. Baldwin's h c Shenandoah, 3, 97 lbs. Miller 3  
Davis & Hall's h m Ella Warfield, aged, 100 lbs. Coffey 0  
G. H. Kerregan's h f Mittie B., 3, 87 lbs. Higgs 0  
Time, 1:57 1/2.

Pools: Mammonist, \$200; Mittie B., \$105; Richard L., \$80; Shenandoah and Ella Warfield, each \$35. Betting: Even against Mammonist, 2 to 1 against Mittie B., 5 to 1 against Richard L.; 7 to 1 against Shenandoah, and 10 to 1 against Ella Warfield. Mutuels paid, \$11.70.

Richard L. was the first off and showed the way to the stand, when Shenandoah took the lead. On the back stretch Richard L. ran up on even terms with Shenandoah, and they disputed the advance to the half-mile. Richard L. then drew away and led until almost up to the last furlong. Coming along the homestretch Mammonist gained second and in the final run passed to the front and won by a half-length, Richard L. second and a length and a half better than Shenandoah, third; Ella Warfield next and Mittie B. last. Time, 1:57 1/2.

The midsummer running meeting, at the Chicago Driving Park closed August 23d, the twenty-eighth day of the meeting.

Aug. 25th.—Purse \$300, of which \$50 to the second, entrance free for two-year-olds that had not won a race of the value of \$1,000 since July 18; those never having won a race of the value of \$500 allowed 5 lbs.; maidens allowed 12 lbs.; three-quarters of a mile.

E. J. Baldwin's ch g Rapido, by Grinstead, dam Experiment, 102 lbs. Peppers 1  
W. L. Cassidy's Reed, 102 lbs. Arnold 2  
R. W. Walden's Lulu S., 93 lbs. Higgs 3  
Suffolk Stable's Skookum, 95 (carried 96 1/2) lbs. West 3  
L. Dunneman's Tallyman, 98 lbs. Rivers 0  
M. Young's Doubt, 105 (carried 107) lbs. Stoval 0  
Time, 1:16 1/2.

Pools: Rapido, \$100; Doubt, \$50; Reed, \$45; Skookum, \$40; Lulu S., \$30, and Tallyman, \$20. Betting: 8 to 5 against Rapido, 4 to 1 each against Doubt, Reed and Skookum, 8 to 1 against Lulu S., and 10 to 1 against Tallyman. Mutuels paid, \$12.90.

Reed was first away, then Doubt, Lulu S. and the others straggling. When the half post was reached Rapido rushed to the front and held it to the close, winning by six lengths, Reed second, and a length and a half better than Lulu S. third, and the latter was lapped by Skookum, followed by Tallyman, the rear being covered by Doubt.

Purse \$350, of which \$50 to the second; entrance free; winners in 1884 of any race of the value of \$2,000, or of two or more races of the value of \$1,000 each, or of three or more races of any value (other than selling races) at Saratoga in 1884, to carry 5 lbs. extra; other horses not having won a race at Saratoga in 1884 allowed 7 lbs.; those not having won during the year allowed 15 lbs.; maidens four-year-old and upward allowed 25 lbs.; one mile.

R. R. Owing's h g Mammonist, aged, by Buckden, dam Monomania, 117 lbs. Conkling 1  
E. J. Baldwin's h c Gano, 4, 111 lbs. Holloway 2  
O. Bowie's g f Analosta, 4, 93 lbs. Coffey 3  
Time, 1:41.

Pools: Mammonist, \$200, and the field \$100. Betting: 5 to 2 on Mammonist, 2 to 1 against Gano, and 10 to 1 against Analosta. Mutuels paid, \$8.

Analosta, Mammonist and Gano was the order at the start. Gano went to the front on running down the backstretch, Mammonist passing up to second position. Gano held the lead until passing the last furlong, when Mammonist reeled to the advance and won by two lengths, Gano second and eight lengths better than Analosta, third.

August 26th.—Purse, \$100, of which \$50 to the second; entrance, \$10 each, to be divided between the second and third; for two-year-olds which have not won a sweepstake since July 15th; maidens allowed 7 lbs.; four entries; five furlongs.

M. Young's b c Harrigan, by Lisbon, dam Ellen Goren, 110 lbs.; Stoval 1  
R. W. Walden's ch g Hart, 107 lbs. Blaylock 2  
E. J. Baldwin's ch g Rapido, 107 lbs. Peppers 3  
A. C. Franklin's br g Pegasus, 107 lbs. Conkling 4  
\*Rider unhorsed. Time, 1:06.

Pools: Rapido, \$100; Pegasus, \$80; Harrigan, \$55, and Hart, \$50. Betting: 2 to 1 each against Rapido and Pegasus, 5 to 2 against Hart, and 3 to 1 against Harrigan. Mutuels paid, \$21.50.

Pegasus led off, followed by Harrigan, Hart and Rapido. In running down the chute, Conkling, the rider of Pegasus, was unhorsed, but uninjured. Hart was the first to enter the main track at the half post, but Rapido went forward on the eastern turn and led round to the last furlong, when Hart came up on even terms. In the rush home Harrigan bounded to the front and was first over the line, Hart second, and a half length better than Rapido, third, the riderless Pegasus bringing up the rear.

Handicap sweepstakes, at \$20 each, for all ages, with \$600 added, of which \$150 to the second, the third to receive \$50 out of the stakes; 4 entries; mile and a half.

E. J. Baldwin's blk f Freda, 3, Wildside, dam Folte, 99 lbs. Peppers 1  
Freakness Stable's ch g Enclid, 4, 105 lbs. Fisher 2  
O. Bowie's ch g Nettle, 5, 105 lbs. Taylor 3  
M. Young's h m Lizzie S., 6, 104 lbs. Stoval 0  
Time, 2:42.

Pools: Lizzie S., \$100; Freda, \$100; Enclid, \$60. Betting: 6 to 5 against Lizzie S., 8 to 5 against Freda, 2 to 1 against Nettle, 4 to 1 against Enclid. Mutuels paid, \$15.40.

When the flag fell the order was Freda, Enclid, Nettle and Lizzie S. Freda continued the lead to the close and won easily by ten lengths, Enclid second and a half length better than Nettle, third, Lizzie S. coming in last.

Johnston and Richball.

At Chicago, on the 23d ult., the scenes were shifted after twenty-eight days of running races to a contest between the two greatest pacers.

The affair was a match for \$5,000 a side between Commodore Kittson's Johnston (record 2:10) and Mr. J. S. Campbell's Richball, (record 2:12) two of the very fastest "side wheelers" now in training. The weather was clear and cool, the attendance very large and by real hard work the track, which had been cut very deep for the running meeting, was put in good condition for fast time and, although Little Brown Jug's famous three heats—2:11 1/2, 2:11 1/2 and 2:12 1/2—were not beaten, Johnston did win very easily in 2:13, 2:11 1/2 and 2:13 1/2, and it must be said there was a general impression that if he had been driven out he could have made much faster time, but it would have been at the expense of distancing Richball, who his owner claims was not in condition for a real hard race, a fact that was generally known, especially to the admirers of the Commodore, for they bought all the pools they could at an average of two and a half to one.

First Heat.—Johnston had the pole, and, after the warming-up, the two came down even, and as they were going well the word was given. Johnston began to draw away on the first turn, increasing his lead to two lengths as they reached the quarter, which was made in 32 1/2. Along the backstretch he had a lead of two open lengths, the half being reached in 1:06 1/2. Around the upper turn Richball drew up to within a length, the time to the three-quarter pole being 1:39 1/2. On the homestretch Johnston again began drawing away, and as it became evident that Richball had no chance of winning the heat he was pulled up inside the distance stand and Johnston won easily in 2:13.

Second Heat.—They went away well together at the second attempt and reached the quarter post in 32 1/2 seconds, with Johnston an open length in front. Their positions were not changed to the half, which was made in 1:05 1/2. At the end of the five furlongs Johnston quickly opened a gap of half a dozen lengths, and, coming on, won by twenty lengths. Time, 2:11 1/2.

Third Heat.—They were sent away at the first attempt, with Johnston quickly taking a lead of half a length which he increased steadily, going to the quarter post in 34, to the half in 1:08 1/2, to the three-quarters in 1:41, and the mile in 2:13 1/2, nearly distancing Richball.

Chicago, Ill., August 23d.—At the Driving Park; match \$10,000 (\$5,000 each): mile heats, three in five in harness.

N. W. Kittson's h g Johnston, by Bashaw Goldust, dam by Sweeting's Ned Forrest, 1 1 1  
J. S. Campbell's hr g Richball, by King Pharoah, 2 2 2  
Time.

Second heat..... 0:32 1/2 1:05 1/2 2:11 1/2  
Third heat..... 0:34 1:08 1/2 2:13 1/2

Difference Between Half-Mile and Mile Tracks.

Brought up in a school where match-making was one of the chief requisites to success, Splan has always been noted for the excellent judgment possessed by him regarding other men's horses as well as those in his own charge. This was plainly enough shown three years ago last Winter, when he matched Charlie Ford to beat Bonsetter. At that time Bonsetter had a record of 2:19 made the previous season, and was looked upon as one of the most promising horses in the country, while Ford, whose record was 2:20, seemed, in the opinion of many capable horsemen, to have about reached his limit, so far as speed was concerned. He had just passed into Splan's hands, and although John had never pulled a line over the gray fellow he was confident of his ability to defeat Bonsetter. When asked by a friend on what ground he considered Ford to be capable of meeting Bonsetter on even terms, he said: "It is like this: When I had Rarus and he was at his best we used to give a good many exhibitive over half-mile tracks. You remember how many years Goldsmith Maid's 2:18 stood as the best over a half-mile track, and that it was never beaten until Rarus did it. From the way in which Rarus used to go I made up my mind that any horse that could trot a half-mile track in 2:20 was capable of 2:16 on a mile track, and I had this in mind when Ford and Bonsetter were matched, because Ford had trotted the half-mile track at Cincinnati in 2:20." The result of the race proved the correctness of Splan's ideas, and, as he subsequently gave Ford a record of 2:16 1/2 in the third heat of a race, it will be seen that he was not far out of the way as to the difference in point of speed between mile tracks and those of only half that distance in circumference.—Breeder's Gazette.

L. P. Quinby, of Portland, Or., has sold to Mills & Howell North Yambill, the chestnut stallion, Ophir, by MacLester, dam Miss Lightfoot, by Imp. Trustee, from Haarlem, by Shark. Price, \$1,200.

The Fair At Marysville.

EDITOR BREEDER AND SPORTSMAN: In spite of the growling of the sorahads and the dismal predictions of the weak-kneed, the fair opened up here on Tuesday, the 26th, more auspiciously than before for many years, both at the pavilion and the track. The attendance increased from day to day until during the last three days there were over two thousand people each day at the park, while it would have been difficult to compute the number in attendance at the pavilion, but it was much greater than at the park. The exhibits at the pavilion far exceeded the expectations of the most sanguine both in quality and quantity, in fact it was only limited by the space. It would take too much space to mention all of the exhibits, so will simply mention a few of the boma industries. The exhibits of goods from Marysville Woolen Mills, comprising blankets, flannels, tweeds, cassimers, flannel underwear, etc., were superior to any that can be produced from any other source. William Wearman had on exhibition a quantity of the finest silk cocoons I ever saw. Mr. Robert White showed a thoroughbred wagon, a huggy and a rockaway from his shops here, the workmanship of which cannot be excelled anywhere. The Excelsior Marble Works, of Mr. Plymire, exhibited some work, monuments, headstones, etc., which for beauty of workmanship have no superior. The exhibits of fruits, vegetables, etc., would do credit to any part of the State. As a whole there will probably be no pavilion exhibit in the State superior to it, with the exception of the State and Mechanics' Fairs.

At the track the races opened on the first day with a race for the three-minute class, for a purse of \$300. The only two to start were Chris and Baby Mine, starting in the order named. Before the start, Baby Mine in the pools sold favorite, but the knowing ones got fooled as Chris took the race in straight heats. There was considerable scoring before they got the word for the first heat as the mare was somewhat rank. However, they finally received the word to a very good send off. They went along very evenly, trotting the quarter in 40 sec. and to the half in 1:18; but here the pace proved too strong for the mare and she made several bad breaks losing considerably, and from there in the gelding had it all his own way, and came in on a jog in 2:40. This heat put an end to the pool selling as it was evident that the mare was not the better horse.

The second heat they were sent off with very little trouble and trotted along very evenly making the quarter in 40 sec., the half in 1:19, but coming down the homestretch Grant let Chris out a little when he took the mare off her feet and came in again an easy winner in 2:40.

The third heat was but a repetition of the second, the horse winning with apparent ease in 2:40.

Aug. 26th—Trotting; purse \$300; three-minute class. Chris, b g, by Henant Chief, dam by Jim Brown—Jas. Littlejohn 1 1 1 Baby Mine, blk m, by Newbush—P. W. Dudley 2 2 2 Time, 2:40; 2:40, 2:40.

The next race was for horses who could trot a mile nearest to four minutes. There were several entries; the race was won by L. Summy's h h Buckskin, in 3:59. This ended the first day's racing.

The second day's races commenced with a race for 3-year-olds for a purse of \$300; the starters were Chas. Sbarman's h s Chevalier, G. W. James' g Peyton, Wilbur Smith's h k hilly, P. H. Dudley's h k s Elite, and Chas. Schlutin's g m Griselda. In the pools Pausy sold for \$20, Elita for \$5, and the field for \$15. There was considerable trouble in getting them off, and they came up to the score nine times before they finally received the word, Elita had the pole, Pansy 2d, Chevalier 3d, Griselda 4th, and Peyton outside. At the quarter Elita was ahead with Chevalier and Pansy close up and the rest trailing. They went in this order until they came round into the homestretch, when Pansy came up and passed Chevalier and Elita, leading them down the stretch and heating them in by a couple of lengths, Griselda 4th and Peyton 5th; time, 2:50. In this heat Peyton cut himself badly in the quarters and was allowed to go to the stable.

In the second heat there were but four starters, and as the colts had got steadied down somewhat they were sent off with little trouble, and trotted a very pretty heat, going round in the order in which they started, making the quarter in 43 secs., the half in 1:24, and the mile in 2:41, Griselda distanced.

Third heat. It had now got down to three starters and they went right off at the first attempt, going all in a hunch to the quarter in 43 seconds, when Smith seemed to have made up his mind to show what his colt could do, and left the others rapidly going to the half in 1:19 and to the finish in 2:36, and Elita and Chevalier were obliged to run to save their distance.

Aug. 27th—Trotting purse, \$300; 3-year-old class. Pansy, f, by Berlin, dam Lady Hubbard—E. H. Miller, Jr. 1 1 1 Elita, b m—P. W. Dudley 2 2 2 Chevalier, br—C. Sherman 3 3 3 Griselda, g m—W. B. Todhunter 4 4 4 Peyton, h g—G. W. James 5 dr Time, 2:50; 2:41; 2:36.

The second race for to-day was for four-year-olds, for a purse of \$300. The only entries for this race were the ss Happy Jim, owned by Fred Schaffer, of Gridley, and Wilbur Smith's b g Thapsin, the latter being so largely the favorite in the pools as to make business very dull. The horses were sent off at the first attempt with Happy Jim in first position, which he lost at once by a break just after passing the wire, an experiment which he repeated after passing the first quarter and again just before coming in to the back stretch, which made it exceedingly easy for Thapsin to win the heat, which he did in the slow time of 1:25 to the half, and 2:50 to the finish.

Second heat—This heat Wilbur seemed to think the whole purse worth working for, and sent his horse to distance his other, which he accomplished in 2:23, going to the quarter in 0:35, he turned the half in 1:14, Happy Jim making the mile in 2:36, which proves that he was coming home very fast.

Same Day—Trotting; purse, \$300; four-year-old class, 13th and 3d district. Thapsin, blk g, by Berlin, dam Lady Hubbard—E. H. Miller, Jr. 1 1 Happy Jim, ch h, by Brigadier—J. W. Schaeffer 2 d Time, 2:50, 2:23.

The third day's races opened with a race, a dash for yearlings. Chas. Sberman entered c f Maud Sherman, Morris Toomey the h c Transit, C. F. Taylor the s c Trovato, Transit selling for \$20 to \$10 for both the others. Maud had the pole with Transit second and Trovato on the outside. Before reaching the first quarter Maud rendered up her first place and took third with Trovato in the lead, which place was taken by Transit at the half and held to the finish, which was reached in 3:03, Trovato second, and Maud third. Transit could have trotted much faster if called to do so. He is a beautiful and promising colt, a bright hay, a trifle over fifteen hands high, finely and powerfully formed; he was foaled on the 10th of March, 1883, was sired by Prompter, his dam Venus, by Cal. Dextar, g d, by old St. Clair.

Ang. 28—Trotting; purse, \$200; District yearlings; one mile. Transit, b c, by Prompter, dam Venus—M. Toomey 1 Trovato, ch c, by Sterling—C. F. Taylor 2 Maud Sherman, ch f, by Brigadier—Chas. Sberman 3 Time, 3:03.

The next race was a running race, sweepstakes, half mile and repeat, \$15 entrance fee, \$150 addad by the Society. The entries were, Pbenix, by J. Daniel, Wild Bill, by Fred Schaffer, Modoc, by A. Downing, White Stockings, by Geo. Simpson, and Gray Tom, by Chas. Kenyon. In the pools Wild Bill sold for \$10, to \$7 for Pbenix and \$7 for the field. With comparatively little trouble the starter got them off and they ran all in a bunch until approaching the homestretch they commenced to separate, with White Stockings in the lead, Wild Bill, second, Pbenix, third, and the others trailing, and in that order they came in in 52 secs., Grey Tom distanced. This heat reversed the pool selling, the favorite going for \$10, the field for \$20.

The next heat was started and finished in the same order White Stockings winning the heat and race in 51, Wild Bill, second, Pbenix, third, Modoc, fourth.

Same Day—Running; stake of \$50 each, \$150 added; \$300 to first; \$75 to second; \$52.50 to third; \$22.50 to fourth; each horse to carry 100 lbs.; half-mile heats. Geo. Simpson's ch g White Stockings 1 1 Fred Schaeffer's g Wild Bill 2 2 J. W. Dowell's ch g Pbenix 3 3 Alex. Downey's b g Modoc 4 4 C. Kenyon's g Grey Tom dis. Time, 0:52, 0:51.

W. H. McCoy's b m Fly-by-Night disqualified for having been entered under a false name.

The third and last race for the day was for the 2:40 class. J. B. McDonald named g g Brigade, H. S. Hogboom named c m Sweet Home, and A. L. Hinds named hr g Setting Sun. Although Sweet Home dropped a colt but four months ago and has been sick, her breast still raw from rowalling, she still sold favorite in the pools at \$20 to \$5 on the field, and her friends were not deceived in her as she took the race in three straight heats, Setting Sun being second in each heat, and Brigade third; time, 2:39, 2:36, 2:34. Sweet Home is a fine brown mare sired by Milliman's Bellfounder, a half brother to B. B. Gus and Dexter, and half sister to Nellie Enns and Belleflower. She has a record of 2:45 as a three-year-old and 2:35 as a four-year-old.

Same Day—Trotting; Purse \$300, for named horses. Sweet Home, br m—H. S. Hogboom 1 1 1 Setting Sun, g g—A. L. Hinds 2 2 2 Brigade, g g—Frank Grant 3 3 3 Time, 2:39, 2:36, 2:34.

Friday the races commenced with the 2:24 class. The starters were W. B. Todhunter's s m Huntress, Wilbur Smith's h g Adair, and E. V. Spencer's h m Belle Spencer, the race for a purse of \$600, Adair selling for \$20, Huntress \$10 and Belle for \$5. Belle acted very badly in scoring and it was a long time before they got the word to rather a poor start, and they had gone but a short distance before Belle and Adair both went up. Belle caught quickly but Adair went completely off his legs, and by the time Wilbur got him settled he was a long way behind, while Belle went like a rocket, passing Huntress at the quarter in 37, and going to the half in 1:03, but she had spent herself and the others drew up on her rapidly and at the three-quarter pole Huntress had collared her, with Adair close up and trotting fast; coming down the stretch Huntress passed Belle and Adair passed them both coming in and winning the heat in 2:25. Belle in her terrible exertion in scoring and trotting the first half had so distressed herself that it was deemed unsafe to drive her another heat and the judges allowed her to go to the stable.

The next heat was a very pretty one, although it was apparent that Adair was the speediest of the two. They trotted along very evenly, Huntress making a couple of hobbles, but being caught handsly until they came into the homestretch, where Adair forged ahead and won the heat with apparent ease in 2:27.

The third heat was a repetition of the second, until coming down the homestretch Adair, for some unaccountable reason, made two bad breaks and lost the heat, Huntress coming in ahead in 2:29.

The result of the last heat made Smith cautious, and on this, the fourth heat, considerable scoring was done, as he was determined that the mare should have no advantage. At last the word was given, with Adair slightly in the lead, but before reaching the quarter he made two bad breaks which left him considerably behind. It was now evident that his great struggle to catch Belle Spencer in the first and the two succeeding heats were telling upon him, and it looked as though Huntress would win the race, as she took this heat easily in 2:37. At this juncture it seemed a foregone conclusion that the mare would win the race, as Adair was nearly as bad off as Belle was when sent to the stable; but good times were coming, for at the conclusion of the heat the judges called on the ladies entered for the equestrienne tournament, and as that took nearly three-quarters of an hour, Adair had a chance to get his second wind, and he won his fifth heat and race handsly in 2:33.

Aug. 28th—Trotting; purse, \$600; 2:24 class. Adair, h g, by Electioneer, dam Addie Lee—E. H. Miller, Jr. 1 1 2 1 Huntress, ch m, by Admiral—W. B. Todhunter 2 2 1 1 Belle Spencer, h m, by Black Ralph—E. V. Spencer 3 dr Time, 2:37, 2:27, 2:29, 2:37, 2:33.

The next race was for two-year-olds, best two in three for a purse of \$100. S. K. Trefry nominated h g Apex, Charles Sherman's s s Geo W., and W. P. Hanky's h g Sutter Boy. This was too on-sided to be very interesting as Apex was far too speedy for either of the others, winning the first heat in 2:54, distancing Geo. W., and the next heat and race in 2:57. Apex is a fine colt and a beautiful trotter.

Same day—Trotting purse, \$50; two-year-old class. Apex, h g, by Prompter—S. K. Trefry 1 Sutter Boy, h g—W. P. Hanky 2 George W., ch c—C. Sherman dis. Time, 2:58, 2:57.

Between the beats of this race the first heat of the running race, mile and repeat, for a purse of \$130, came off, the contestants being Thos. Hazlitt's c g Jubilee, White Stockings and Modoc, Jubilee being a large favorite in the pools; he took the first heat in 1:36, and the second heat and race in 1:52.

Same Day—Running; purse \$130; mile heats. Thos. Hazlitt's ch g Jubilee 1 1 Thos. Simpson's ch g White Stockings 2 2 Jas. Dowell's b g Modoc 3 3 Time, 1:53; 1:52.

5th day—1st race for the 2:30 class and the starters were Belle Spencer (who was all right by this time), Fred Arnold and Ralph Bugbee, the latter to carry 40 lbs over weight. Belle was the favorite in the pools, nearly two to one, but she still acted very badly, and the judges had a sore trial in getting them off for the first heat, and then with the mare behind, and she bad gone but a short distance until she broke all to pieces and had to be brought nearly to a stand still before she caught her feet; and then when she started again she ran nearly the whole length of the back stretch. Finally Mr. Spencer got her settled down when she trotted very fast, overtaking and passing both the others, and com-

ing in ahead in 2:38, but she was set back to third place for running.

The second heat the mare seemed to have learned what was wanted of her and acted well, getting a send off at the second attempt. She took the pole almost immediately and was never headed, winning the heat in 2:35, Bugbee second, Arnold third.

The next two heats were but a repetition of the second, Belle winning the third in 2:40, Bugbee second, Fred Arnold third, and the fourth in 2:37; Bugbee second, Arnold fourth.

Ang 30th—Trotting; purse \$400, 2:30 class. Belle Spencer, b m by Black Ralph—E. V. Spencer 3 1 1 1 Fred Arnold, ch g—W. M. Johnson 1 2 3 2 Ralph Bugbee, h g—W. H. E. Smith 2 3 2 3 Time, 0:40, 2:35, 2:40, 2:37.

The next and last race of the fair was an exciting one, a pacing race free-for-all for a purse of \$250. W. F. Odell named b g Shaker, S. C. Tryon, br g Prince, W. B. Todhunter, b s Nevada, J. F. McIntosh, h g Ackerman, P. M. Dudley, h g Robert E. This was a difficult race to keep track of as the horses were all of a color, and there was but one of the drivers who wore colors. In the first heat Nevada had the pole, Prince 2d, Robert E. 3d, Ackerman 4th, and Shaker, (who was the favorite in the pools), last. The first heat was taken up by Ackerman, in 2:32, the second was taken by Shaker, in 2:33, the third by Shaker, in 2:30. He also took fourth heat and race in 2:30.

Same Day—Pacing; purse \$250; free for all. Shaker, g—M. F. Odell 2 1 1 1 Fred Ackerman, b g—J. T. McIntosh 1 3 2 4 Nevada, s—W. B. Todhunter 3 2 4 3 Prince, h g—S. C. Tryon 4 4 3 2 Robert E., h g—P. W. Dudley 5 5 5 5 Time, 2:32, 2:33, 2:30, 2:32.

This ended the most successful fair that this Association ever held. On Friday there was a shooting match for a society purse, and on Saturday A. M. the red and white ribbons were distributed. YUBA.

The Fair at Oakland.

The first race on the programme was a purse of \$500 for 2-year-olds, in which the starters were Mischief, Cito, Mr. Boot's Thad Stevens colt and Estill; the starting positions awarded being in the order their names are written. From the previous victories of Estill he was deservedly the favorite in the pools, the rates being \$25 on him to \$7 on all the others. There was a capital start from the three-quarter pole, and as soon as the flag fell the colts were in rapid motion. Mischief and Cito ran locked down the backstretch, the Thad Stevens colt third as the half-mile pole was passed, that quarter having been run in 24. Rounding the further turn the white face of Cito showed in front; at the head of the homestretch he had two lengths the best of the filly, the half-mile run in 50 seconds. When fairly straightened into the stretch the favorite made his run, and at the seven-furlong mark he was within a neck of Cito. From there he outran Cito, winning by two lengths in 1:17; Cito second, Mischief third.

September 1st; purse \$500 for two-year-olds; \$250 to first; \$125 to second; \$75 to third; three-quarters of a mile. W. M. Murry's ch c Estill, by Norfolk—Lady Jane, 110 lbs. Dunfy 1 J. C. Simpson's h c Cito, by Joe Hooker—Too Soon, 107 lbs. Ross 2 Jas. Meech's Mischief, by Chad Stevens—Katie Pease, 107 lbs. Long 3 Wm. Boot's blk g, by Thad Stevens—Gypsy, by Hercules, 107 lbs. Appley 0 Time, 1:17.

The second race was heats of a mile, the contestants being Forest King and Jou-Jou. At the opening of the pool sale Forest King was the favorite at the rate of \$20 to \$14 on Jou-Jou. There was little change in these odds up to the time of starting. Forest King drew the pole, and at the first attempt a good start was made for the first heat. Forest King took the lead, the pace being so slow that 53 seconds was the mark at the half-mile post. Jou-Jou trailed a length or so in the rear until the semi-circle was completed, when he moved up and a very spirited contest was the result to within two hundred yards of the score. From there Forest King had it all his own way, winning easily by half a length in 1:44.

Second heat—Forest King had the best of the start, and a much faster pace was made than in the previous heat. When the horses passed the quarter Forest King led a length, but in the journey down the back-stretch Jou-Jou moved up so that it was "nose and tail" at the half in 51 seconds. This was too fast a rate to be sustained, and though Jou-Jou essayed to pass on the straight run home, the favorite won easily by half a length in 1:47.

Same Day—Purse \$500 for all ages; \$250 to first; \$125 to second, \$75 to third, \$50 to fourth; horse, mile heats. S. J. Jones' br h Forest King, aged, by Monday—Abbie W., 113 lbs. Dunfy 1 W. Kelly's b g Jou-Jou, 3 years, by Monday—Plaything, 100 lbs. (carried 107). Ross 2 Time, 1:44; 1:47.

Then came the trotting race for the 2:22 class. The entries were Albert W., Allan Roy, Manon, Vanderlynn and Arab. Arab and Allan Roy were withdrawn. In the pools Manon was the favorite at \$210. Albert brought \$95 and Vanderlynn \$30. The placing gave Manon the inside, Vanderlynn second, Albert W. on the outside. At the seventh score they were off, Manon having a trifle the best of the send-off. Albert W. broke soon after—a bad break which left him far in the rear—Manon flew past the quarter-pole in 35 seconds, Vanderlynn ten lengths in the rear, Albert W. so far behind that his time for the quarter was 40 seconds. The heat was evidently decided at that point, as Manon was trotting fast and steadily, and, saying that Albert W. closed some of the long gap after passing the half-mile mark, there is nothing more to describe than that the mare won the heat, jogging in in 2:24, heating Vanderlynn six lengths, with as much between him and Albert W., who broke at the distance. The result of this heat sent the favorite still higher in the estimation of the speculators, and the long odds of \$110 to \$25 was wagered freely on her. The start for the second was fair, Manon having a trifle the advantage. She was trotting very fast and Albert W. pulled behind her in order to save ground going around the turn. This brought him inside of Vanderlynn, and making a break swerved to the right somewhat to the detriment of Vanderlynn, Manon in the meantime reaching the quarter-pole well in the lead in 36. Vanderlynn broke just before reaching that point, and the order at reaching that point and the order at the half-mile, was Manon ten lengths in front of Albert W., Vanderlynn a long way in the rear. Albert W., as before, closed the gap on the homestretch, but making a losing break at the distance, Manon came home leisurely in 2:24. The betting was at an end. A victory for Manon was so nearly assured that there was none to take the risk at even the largest odds, and the third heat showed that the estimate was correct. She took the lead at the start, Albert W. breaking, and at the quarter pole in 35, she was several lengths in the lead. He closed some of the gap before reaching the half, 1:12, and for a time as they sped down the

stretch it appeared as though he had some chance. An unfortunate break, however, destroyed all hopes, and Manon was hailed the winner in 2:22.

Same Day.—Trotting, 2:22 class; purse, \$800; \$400 to first, \$200 to second, \$120 to third, \$80 to fourth. Manon, b m, by Nutwood, dam Addie—E. M. Railton

There was bright sunshine at the Park on Tuesday, though as the day wore away the wind rose so when the bell rang to call the horses for the race, the air was somewhat chilly. The fog banks rested on the crest of the Contra Costa range, and though it added to the beauty of the view a pearl-colored veil, with warm tinges of light breaking through the rifts in the vapor, a blander atmosphere would have suited horses and spectators better.

A very good start was given at the third attempt. Neluska had the pole but this advantage was lost in the first fifty yards, as she made a bad break, losing so much ground that she was at least sixty yards in the rear at the quarter pole, which was passed by Thapsin slightly in the lead of Regina in 33 seconds.

The second a very good start resulted though Neluska broke soon after the word was given. The only description of the heat necessary is that Thapsin passed the quarter a length in the lead of Regina, in 39 1/2 secs., the half with rather more of a gap between him and the second, in 1:17. Neluska was 3/4 seconds in the rear at the quarter, 8 secs. at the half, Thapsin trotting well within his rete won the heat in 2:31 1/2, Regina a fair second, Neluska far inside the distance flag.

The third heat proved that it was a wise course. Regina had not speed enough, Neluska so lame that she could only hobble during the first part of the heat. Thapsin made the quarter in 0:33, the half in 1:14 1/2, the mile in 2:29, Regina a short distance behind, Neluska distanced.

Sept. 2.—Trotting; purse, \$600; for four-year-olds; \$300 to first; \$150 to second; \$80 to third; \$60 to fourth. Thapsin, blk g, by Electioneer, dam Lady Hubbard—E. H. Miller, Jr.

There was strong favoritism in the three-minute class. The starters, Joe Arthurthon, Le Grange and Blanche. Joe brought \$40 to \$8 on all the others, and even at that there were few buyers for the "short end."

The second heat brought demoralization among the supporters of Joe Arthurthon. Le Grange led from the start. He was first at the quarter, in 36 1/2 seconds, two lengths in advance of Arthurthon, Blanche having made a break some distance behind.

The third heat revived the hopes of Arthurthon's supporters and they were jubilant over his success. Le Grange led to the quarter in 36 sec., to the half in 1:12 1/2, and retained the lead until the turn was nearly completed.

They won in close order going down the backstretch and at the half in 1:15 1/2; all three were in head and head. Le Grange broke and fell back, Blanche and Joe still struggling. He outstayed her, winning the heat, which gave him the race in 2:30 1/2.

Same day.—Trotting; three-minute class; purse \$600; \$300 to first, \$150 to second, \$90 to third, \$60 to fourth. Joe Arthurthon, b g, by Arthurthon—Wm. Corbett—Goldsmith 2 3 1 1 1

The third day was fully occupied. In the morning a stock parade, and very interesting it was. The unanimous verdict was that the display of cattle was superior to any that had ever been seen in this State before—

hundred for sale at a fair price, there would have been purchasers. The show of horses was also very good and the parade more satisfactory than was anticipated.

The first race on the card was a dash of two miles for a purse of \$500. The starters were Padre, Jocko, Balboa, Birdcatcher and Garfield, the positions assigned being in the order their names are written.

Sept. 3d.—Purse, \$500; for all ages; two miles. C. Dorsey's br h Birdcatcher, by Spectre—by Young Melbourne, 5 years, 120 lbs.

The second race was heats of three-quarters, for a purse of \$500, Forest King, Stanislaus and Annt Betsey the starters. Forest King was the favorite at \$30 to \$10, and at these rates there were more backers for Forest King than the others.

Same Day.—Purse, \$500; for all ages; three-quarter mile heats. S. J. Jones' br h Forest King, by Monday—Abbie W., aged, 113 lbs.

The trotting race was for the 2:30 class, in which started Olivette, Adrien, Anteeo and Adair. The favoritism alternated between Adair and Anteeo, the rates being \$60 on each of these to \$35 on Olivette and \$11 on Adair.

The second heat. The poor showing that Anteeo made in the first heat sent him far back in the estimation of the bettors, while it increased their fancy for Adair.

Same Day.—Trotting; purse \$800; 2:30 class. Adair, b g, by Electioneer, dam Addie Lee—E. H. Miller, Jr.

The forenoon of Thursday was occupied by the various committees examining the stock on exhibition, and in many of the classes it was an arduous task to award the premiums.

would question the claim. Then Voucher, who was second in the race, stands 16 hands 1 1/2 inches, and Senator, an Eastern three-year-old, Judge Grant was somewhat surprised that the performance of Kismet did not raise more excitement, until he recalled the still greater performance of California colts of the same age.

The first race was for a purse of \$600 for three-year-olds and under, the starters Voucher, Robert Lee, and Pope Leo, 3 years old, and Kismet, a two-year-old.

The second heat was similar in details to the first, Kismet leading all the way around, passing the quarter in 40 1/2 seconds, the half in 1:19, compassing the mile in 2:38 1/2; the position of the others the same as in the preceding heat.

Sept. 4th.—Trotting; Purse, \$600; three-year-olds and under. Kismet, 3 years, br c, by Sultan, dam Sance Box—L. J. Rose,

The second race was for yearlings; purse \$250; dash of a mile. There were six entries, all of which appeared, but in scoring L. J. Rose's colt became so lame as to force his withdrawal.

Same day.—Trotting; purse \$250; yearling class. Transit, b c, by Brompter, dam Venus—M. Toomey.....Hicks 1

The third race was pacing for a purse of \$500, the entries and starters being Maud B., Johnny Weigle, Nevada and Sam Lewis.

Same day.—Pacing; purse \$500. Maud, b m, by Bertrand, Black Hawk—H. J. Agnew, Goldsmith 1 1 1

ATHLETICS.

Merion Club Games.—A Splendid Programme.

The meeting of the Merion Club, which will take place on Tuesday afternoon at the Bay District Race Track, should certainly prove the most varied and interesting one ever held on the Coast.

The first event on the programme will start at 1 p. m. sharp. The following is the entry list and it will be noticed that it includes a great many of our best athletes:

Maiden Race, 100 yards.—Geo. W. Jordan, J. F. Dickey, T. H. Palache, Cbas. Kaplan, W. Stokes, M. Cohen, Geo. Jones and A. Ahret.

Pole Vault.—C. C. Johnson, O. Giersch, Reed M. Koss, Clement J. Schuster and R. Gibson.

Running High Jump Handicap.—A. F. Ronse, C. C. Johnson, W. O. Mills, W. C. Brown, W. A. Scott and O. Giersch.

100-yards Handicap.—F. M. Day, M. M. Martin, A. B. Tennent, G. W. Jordan, Frank Dickey, W. R. Stewart, R. B. Jones, C. Creighton, John Flynn, E. Freese, E. P. Moody, C. Kaplan, Barney Benjamin, T. F. Hamill, J. H. Walker, H. W. Thompson, W. Stokes, Geo. Pettersen, M. Cohen, George Jones and A. Ahret.

Hurdle Race.—F. M. Day, W. R. Stewart, R. B. Jones, Barney Benjamin, J. W. Flynn and W. Stokes.

Half-Mile Bicycle Race.—S. F. Booth, Harry Tenney and Fred Cook.

Two-Mile Bicycle Race.—Harry Tenney, Fred R. Cook, R. H. Magill, Jr.

Two-Hundred-and-Twenty-Yard Race.—M. Martin, A. B. Tennent, F. Dickey, W. R. Stewart, C. Creighton, J. Flynn, E. Freese, Barney Benjamin and W. McConnell.

One-Mile Walk.—J. J. Theobald, Chas. B. Hill, I. H. Spiro, J. B. Benjamin, W. A. Scott, and E. A. Newlands, Jr.

Four-Hundred-and-Forty-Yard Race.—F. M. Day, M. M. Martin, Geo. W. Jordan, W. R. Stewart, C. Creighton, A. B. Tennent, W. McConnell, Barney Benjamin and George Pettersen.

Half-Mile Race.—R. M. Day, P. C. Kelly, M. M. Martin, M. W. Dejonge, W. R. Stewart, Chas. B. Hill, R. S. Adams, W. A. Scott, L. D. McDonald, J. Farrell, T. Jennings, C. Brewster, and R. Gibson.

One-Mile Race.—P. C. Kelly, C. W. Scanlin, Chas. Lynn, C. B. Hill, R. S. Adams, W. McGowan, Jas. E. McMabon, Geo. Pettersen, M. H. Falkenstein, W. A. Scott, J. U. Haley, T. Jennings and R. Gibson.

Entries for the Obstacle Race, School Race, and Bicycle Race will be received on the grounds.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

Neophyte Gun Club.—Season's Analysis.

Table titled 'MATCHES' showing names of participants and their scores in various categories (April, May, June, etc.).

Only shot once. Thus it will be seen the first medal became the property of Mr. Bennett, with the best score of 36, the second medal of Mr. Upham, with the second best score of 34.

For succinctness and comprehensiveness in giving the details of each club's work for the season, we hold, nothing like our analysis has ever been published in any English or American paper before.

At the Six-Mile House.

Saturday and Sunday last, owing to the season drawing to a close, saw little work done at the trap. In fact there are but two more matches in this section, that of the California Wing Club to-morrow at San Bruno, the last of the season for them, and that of the San Francisco Gun Club somewhere about the middle of the month, the last also for them.

Table showing scores for participants at the Six-Mile House, including T. Hedley, E. Funcke, O. Jones, J. Hedley, H. Blanken, P. Funcke, and H. Davey.

As usual, after the match the party repaired to the Six-Mile House to partake of lunch given for the occasion by Mr. Hedley, when, we are informed, many of them made clean, and all good scores.

At Marysville.

Our readers are aware that there was to be a clay pigeon tournament at the Marysville Fair. We were informed that though the entries, on closing, were not as large as expected, they nevertheless included some of the best shots in the State.

Table showing scores for participants at the Marysville tournament, including G. Watson, S. Sims, John Rice, A. A. Smith, William Bonse, O. H. Wescott, A. D. Catts, William Bedean, Henry Brittan, G. W. Sumney, and George Say.

This gave the first and second prizes to Messrs. Watson and Sims. Those who tied on eleven each shot off when John Rice took third prize, A. A. Smith fourth, Wm. Bonse fifth, and O. H. Wescott sixth.

While speaking about clay pigeons, we may again state that this amusement may be enjoyed at Adam's Point, Oakland, every Sunday, if not every Saturday.

Our Biographies.

It gives us much pleasure to find the little, unpretending sketches of our distinguished men at the target and trap, which we have commenced, are very generally read and favorably received so far as we have gone.

The last number of the BREEDER AND SPORTSMAN contained an interesting sketch of California's champion wing shot, Mr. Crittenden Robinson, now an attorney-at-law in San Francisco.

Mr. Robinson is a native, we believe, of Sacramento, and a son of the late Tod Robinson, a gentleman who was twenty years ago a prominent lawyer and politician.

We were standing not five feet from the men when Robinson went to the score, and saw every move he made, and say emphatically that he did not raise his gun above his elbow.

The bystanders were thoroughly disgusted at this exhibition of petty meanness on the part of a man who claimed to be the best wing-shot in the world, and they almost to a man assailed Mr. Robinson that he could not, in justice to himself, continue a match with a man who would resort to such unfairness, nor under judges so inefficient and biased as to decide a point upon which they afterward admitted their minds were not clear.

Thus the thing ended, and with it the inglorious career of Bogardus in California. He came here with the sole object of making money of the 'fresh California boy' and his many confident backers, but he went away shorn of his bright plumage.

The subsequent history of that match—how Mr. Robinson successfully resisted payment of the stake and then donated it to an orphan asylum, are facts well known to the sportsmen of this State.

shooting rules, we can say this, that we have seen Mr. Robinson shoot in many matches, in some of which we have acted as judge, and have never known him to insist upon anything that was really unfair to an opponent.

We have no desire to excite a controversy on this matter for that we are sure would be as distasteful to Mr. Robinson as to ourselves. It is only to sustain our truthfulness that we return to the subject at all.

California Quails Abroad.

A gentleman who recently came to this city from Hamilton county, Nebraska, informs us that a few years ago, when in this State, he procured a number of our native quails and took them back to Nebraska with him, where he turned them loose.

There is nothing extraordinary in this for if properly protected their propagation is remarkable. Somewhere about 1865, some American gentlemen took a few couples of our valley quail to British Columbia.

Here on the contrary we go to all sorts of trouble and expense to get game birds and animals, and then by the non-enforcement of the law, hold out a premium to Indians, Aliens, Chinamen and American pot hunters, the vilest of the crowd, to slaughter them indiscriminately.

In case of blood being shed who then will be to blame? The lawless vagabonds who recognize no right but their own to do wrong; the officers of the courts who do not enforce the law; the chief executive who overlooks their remissness; or the honest citizen who simply defends his property?

The Great Match.

To-morrow at San Bruno will be a great day. Besides the last meeting of the California Wing Club, the \$1,000 match between Messrs. Pearson and Fay takes place on the same ground, commencing we presume after the former have finished and determined the ownership of their medals.

Good Shooting.

The record of the season's scores of the Alameda Gun Club shows that Messrs. Adams and Bennett each killed 94 per cent. of all their birds from the trap during the series of matches that have been held during the Summer.

We don't say "an interior exchange" this time, because we have the ear-mark. But, as it costs us no little labor to prepare the analysis from which the result given above was obtained, and as no other paper in the State but the BREEDER AND SPORTSMAN, had gumption enough to prepare them, or think of them, we should like to have the credit due us for industry, if for nothing else.

Can anybody tell us what benefit is derived by "taking sight" at the trap before the pigeon is sprung? Of all the silly customs men, at times, fall into this appears to us the most silly, especially in those cases when it is carried so far as to be ridiculous.

If the Arizona quail, recently imported by Mr. Ellery, of Sacramento, and turned out at the Folsom State Prison, should escape the pot-hunter and increase, the district will make a grand place for the next State Field Trials.

During the late match of the San Francisco Gun Club, those tying on eleven each, waiting their turn to shoot, amused themselves by shooting plover venturing near enough to the trap. Four were brought down.

Inquirer: A man is not required by law to take his gun from his shoulder if a pigeon does not fly on leaving the trap. At the same time, we think, he ought to be required, for the rule, as it stands, is murder on the pigeon, and injustice to the other contestants who do not get the same chance.

The California Wing Club have their last shoot for the season at San Bruno to-morrow, their last meeting of the season.

The Parker Gun Club, clay pigeons, shoot at Colma to-morrow, the last of the season.

THE RIFLE.

At Shell Mound.

The attendance at the target, on Sunday, was again large, and the day being very good for rifle shooting some remarkable scores were made. At the present time the chief interest centers on the men practicing for places in the Inter-State team, and in accordance with the dignity and importance of their mission we gladly give them preference. From the scores below, it will be seen six out of eight got again into the nineties while the remaining two made scores that until lately ranked first-class, and, in fact, the man who can make 87 out of a possible 100, is a first-class sharpshooter. The extraordinary performances of the last two weeks proves by repetition, the best of all evidence, that the capacity to make this record, remarkable, as it may be termed, is really in the California boys, and that on the day of trial they may be safely relied upon to bring the coveted trophy once more to our State. From the late performances we think it would be the height of folly for the press to continue the discussion about the character of the rifle to be used, even if it had not been submitted for official settlement, where the question will be settled irrespective of all the press may have to say. No possible good can be obtained by further controversy, for the fact stands self-evident before us that our men, week after week, are making records with the common military rifle that cannot be beaten by any other rifle in the world. With this result we are satisfied, and seek as we ought to allay the animosities of the past, and send our gallant team to battle calm in nerve and mind, that they may return to us crowned with victory. In our opinion the records made already settle the question of the gun to be used, and that the anxieties felt at first on that account were needless. It is a poor business, at any time, for men to deny this evidence of their own senses. The score.

Table with 4 columns: Name, 200 yds., 500 yds., Total. Includes names like Robertson, Klein, Carson, Mangels, Knibbs, Barrere.

Table with 4 columns: Name, 200 yds., 500 yds., Total. Includes names like Robertson, Klein.

Among the military organizations on Sunday, Company C, Fusiliers, Second Artillery, were present for their regular monthly medal contest, using Springfield rifles only. In this contest Fred Knibbs comes again to the front and captures the champion's prize. As we have often said the "Two Freds" are hard to beat. The score, however, of Lieut. Mangels, in this case, gave Knibbs all he wanted to win. The score:

Table with 2 columns: Medal/Score, Name/Score. Includes Champion medal-Fred Knibbs, 1st class medal-Lieut. H. J. Mangels, 2d class medal-Corp. H. Frank.

The third class medal was won by John F. Siebe, with a score of 33.

Company E, First Infantry, under Captain George Teller, also held their regular monthly medal contest for the eighty and sixty per cent. classes. Three, out of four contending for the higher class, went above the regulation figure for sharpshooters, which, say what we may, is doing well. The score:

Table with 2 columns: Name/Score, Name/Score. Includes F. Prevost, L. Barrere, Lieut. Strong, H. L. Pendleton, Duffy, Drady.

On Sunday the Messrs. Hovey, father and son, had a family contest, in which the old gentleman got away with the mighty "little sergeant" in good style. The peculiarity of the match is the character of the rifles, both being only 22-calibre, and it certainly seems almost incredible that such small cartridge could be used with anything like accuracy at 200 yards. Mr. Hovey, Sr., used a 22 cal. Stevens pocket rifle, and the son his 22-Ballard. The shooting was off-hand. The scores:

Table with 2 columns: Name/Score, Name/Score. Includes Hovey, Sr., Hovey, Jr., Afterwards with his 22-Ballard, Hovey, Jr.

This scores were made with the 22-short cartridge, three grains of powder.

There is nothing we dislike so much as apologizing for things we intended to do and could not. Since Dr. Pardee's sketch we have worked very hard to get the material for a sketch of Jacoby or Joseph Hook, as the next most prominent men, and failing in their cases fell back upon our good friend Mr. Grannini, President of the Swiss Rifle Club, who for over 25 years has been a leading rifleman among us. After partly preparing a sketch of this gentleman we again found ourselves compelled to lay it aside for a future day. We think, however, we may promise punctuality in future.

The Second Regiment, under Lieut. M. N. Laufenberg, had a strong delegation present to contend for places in the regimental team, a position of honor, which, it is well for the regiment, is highly prized by the men. The shooting was all done with the Springfield rifle, and the scores generally are higher than any made for some time past. All the team except Captain Sprowl and Lieut. Laufenberg belong to the Fusiliers. The score:

Table with 3 columns: Name, 200 yds., 500 yds., Total. Includes Fred A. Knibbs, Lieut. Mangels, C. Thierbach, P. E. Robertson, Lieut. Laufenberg, H. W. Frank, Sergt. Lemcke, Capt. Ed. G. Sprowl, Capt. John Brewer, H. Brooks.

The members of the Fifth Infantry Battalion were not out as strongly as usual. Lieut. I. S. Kellogg, Jr., was alone in his punctuality, as he is alone in his all-round records, and gave another grand exhibition of his ability with the rifle. He made the regulation fifteen-shots rounds, scoring 134 out of a possible 150. Under the same conditions he has previously made 139 and 141.

Table with 2 columns: Name/Score, Name/Score. Includes Kellogg-200 yards, 500 yards.

In the hurry of business we forgot last week to explain Howard Carr's comparatively poor score while shooting with Lieut. Knibbs, Kellogg and Mangels. Carr's own rifle was at the workshop undergoing repairs, but was not finished in time to use on the occasion. Sooner than not shoot he used a strange rifle which did not suit him at all. The correction is quite in order, for his score was far below his record.

Colonel Ranlett's Challenge.

Colonel Ranlett has issued the following challenge: "A team of ten men from the field and staff of the Fifth Battalion will shoot a picked team from the field and staff of any battalion, regiment, brigade, or the Division of the National Guard of California, the status to be of September 1st.

"A team of ten men from the Fifth Battalion will shoot a team of like number from any battalion, regiment, brigade, or division of the National Guard of any locality or State in the United States, or a team from the United States army. (This challenge is in particular intended for the Nevada National Guard.) The match to be either for a moderate amount of money, a medal, or for glory. The distance to be 200 and 500 yards, any number of shots at each range. The weapons to be any military rifle recognized by the National Rifle Association."

This bold challenge of the Colonel is exciting a good deal of notice, but it is not made without warrant. The Field and Staff team of the Fifth are admitted to be phenomenally strong men, but notwithstanding he wishes us to state, he does not propose for all that to shoot the whole world, or the whole of Yankee land. Neither does he especially refer to Nevada, though he evidently hankers after a contest with that grand body of riflemen. What he means is, that his team will shoot any Field and Staff team, of which we believe there are twelve in this State; any team of like number from any battalion or regiment of the National Guard of any locality or State in the Union; or any regimental team of the United States army. This somewhat contracts the limit of the challenge as published by the dailies, but it leaves it sufficiently comprehensive. Honor and glory are preferred to money in any match, with the consideration just enough to make matters interesting. If the Nevada boys get away with the trophy by all means let the Colonel and his team go for them, and prove the difference between the rifles in dispute.

At Harbor View.

On Sunday the Swiss Rifle Club had its usual monthly prize shooting, when nine members faced the target. After the prize matches and before the pool shooting the usual club dinner was enjoyed by the members present. This is one of the monthly events which, for its true cordiality and pleasure, we always regret when not able to attend. The score:

Table with 2 columns: Name/Score, Name/Score. Includes 1st prize, Wetzel; 2d prize, Croce; 3d prize, Giannini; 4th prize, Stuber; 5th prize, Mariani; 6th prize, Bachman; 7th prize, Lieman.

The Inter-State Match.

General Forman, of Nevada, proposed 17th inst. for the match, but for the convenience of the California team the 22d will probably be decided upon. We have been furnished today, (Wednesday), with a perusal of General Cosby's decision about the rifle to be used. According to this decision the Springfield and Sharps-Barnard are the only firearms to be used. The Inspector General of rifle practice will select the ten men according to the merit of their practice under Major Klose.

A New Rifle.

Col. Sam Beaver has got a new model Hotchkiss rifle which he prizes highly. It is a new gun, new sights, and new ammunition. At 200 yards with ten shots he has already made 45 and 46 out of a possible 50. When the gun is in thorough trim, he expects to add a couple of points to the record.

It is not often that Philo Jacoby puts in appearance at Shell Mound, but he was over on Sunday with his old Hotchkiss. After a long interval he tried his hand with a military rifle and scored 47 out of a possible fifty, rolling up seven bull's-eyes out of ten shots. When bull's-eyes prevail look out for Philo.

It is said the Police team continues to practice steadily along, but the scores are kept mysteriously secret. Secrecy is always suspicious in contests where candor and honor should prevail. It may mean simply a desire to avoid the sting of defeat or it may mean something much worse. It is peoples' own fault if the worse is generally thought.

OUR NEW YORK LETTER.

Saratoga Racing-Monmouth Park Last Week-Proposed Match between the Santa Anita and Rancocas Two-year-olds-General Gossip, Etc.

The meeting at the Springs has seen fair racing by light fields during the last week. Continuous meetings, such as have been the case at so many different racing centres, are apt to be very severe on horseflesh and the wonder is that the animals stand this constant hammering as well as they do. Racehorses are not made of iron, but of flesh and blood, sinew and bone, and as such are not equal to the machiae-like labor so often expected of them. Comparatively few casualties in the way of breakdowns and the like are reported from Saratoga this season, however, and this springy, elastic track is a very popular one with owners and trainers.

The California party are still in good form with their two-year-olds. Mission Belle and Rapido, by Grinstead, have both won good races during these closing days of the meeting, and with four such youngsters as these two-Verano and Volante, also by the same sire-Sheepshead Bay is likely to see them tough nats to crack in the contests for their age. Harrigan and Troabador, by Lisboa, have also earned brackets over the T. Y. C. Powhatan, by Glenelg, Modesty, by War Dance, and Freda, by Wildidle, have been the three-year-old winners at Saratoga this week. The former colt, by his Kenner victory in good time at the weights, is evidently a good colt at a distance, and being the first of his age to win at two miles this year, must be regarded with great respect for his Fall engagements. Modesty beat him, however, since then at a mile and five furlongs, and, like her sister, Blae Grass Belle, the Corrigan filly is evidently a stayer. Freda ran her mile and a half this week in such good time at the weights that she is certainly well in the Twin City Handicap, at Long Island, at 100 pounds. Rosiere, by Dickens, and Lady Lond, by Monarchist, also enrolled themselves among the winning three-year-olds at Saratoga.

Later days at Monmouth Park have been marked by rather light fields and many upsets to public form. This last feature, however, in view of the length of time that some of the horses have been running since Spring is hardly to be wondered at as on the last day cripples were plenty. Trafalgar was so badly injured by his collision with Groffia after the race, that though he is likely to get over the accident, he is not likely to run again this year, to accompany old Monitor and the others in their preliminary gallops, or to caper with evident glee as he accompanies them back to the stable after a successful race. As regards Priam, the racehorse that is one of twins, he has been patched up before by old man Pryor's solicitous care, and it is likely to be so again, with luck.

The meeting has, however, been remarkably free from serious accidents, for the jumpers, Kate Cronin, Chipola and Compromise, were the only ones killed. Orator's death, resulting from heart disease was brought on by over-exertion. Take the meeting as a whole, it has been successful both from a racing, pecuniary, and weather point of view, less than half a dozen days being rainy. The transportation has been better than ever before, and with the exception of the starting, not a serious drawback has occurred. Mr. Pincus, however, has improved greatly in his closing efforts, and the promptness of all hands that reeled off eight races in less than four hours cannot be too highly commended. The meeting closes on Tuesday next.

The disabling of Trafalgar and sale of Glideaway loses the Westbrooke string two useful performers. Both were not only fair racers within their class and distance, but in leading youngsters in their gallops and similar work, did good service to their stable. Glideaway has lost some flesh of late at this latter business, and her new owners, with judicious management, proper rest, etc., are apt to find her a serviceable mars when thoroughly recuperated, for she is very speedy and quick in getting away. She had not been sold twenty-four hours before an offer of \$2,000 was made for her, and she is worth as a broodmare fully this price when her racing days are over. If we owned her she should have a let-up, but we believe she is to start in her new colors on Saturday, in the five-furlong race at Sheepshead Bay.

The death of Wildmoor on Wednesday, at Brighton Beach, from a collision on the track with another horse, removes a well-known racehorse, one who promised this Fall to be a better animal than he ever was. When brought here first by F. M. Lilly, in the Fall of 1881, Wildmoor excited no little derision by the persistency with which his owner flew him at high game, the best horses of that day being his antagonists. Of course he was beaten, but later on that Fall at Jerome and the Southern meetings, he beat Checkmate, Col. Sprague, Greenland, Strathspey, Fair Coat, Jack of Hearts, and other good horses. In 1882 he remained West, and for Lamasney and Corrigan won eighteen out of twenty-two races, these including the \$10,000 match with Red Boy at Salt Lake City, the Planters' Stakes at Little Rock, Ark., where with 118 lbs. up, on a deep and slow track, he beat Joe Murray and John Davis two miles and a quarter in 4:09. He also ran mile heats that year in 1:43, and at the time of his death was as fast as ever. By Longfellow out of Florence Wallace, by Vandal, Wildmoor was followed in 1876.

The proposed match, or series of matches between the two-year-olds of Santa Anita and Rancocas, representing the Grinstead youngsters of the Pacific Slope and the Mortemers of New Jersey, will excite universal attention if Messrs. Baldwin and Lorillard come to an agreement. Whether this sectional project comes to naught, however, or not, the public is likely to see some great two-year-old struggles this month and next for the various stakes in which the above youngsters, Goana and others are engaged. The last named has made such marked improvement that both the Mortemers and Grinstead will have to do better than any of them have yet shown to dispose of him successfully.

The ruling off of Nolan, the jockey, at Brighton Beach, for foul riding in the hurdle race won by Bally, is a step in the right direction, and if the powers that be could only go behind this poor tool and reach the prime movers in this kind of work, good would result. Nolan is not the least to be pitied, for his idea only about once in three months, but the Sheepshead Bay authorities should certainly see to it that he does not ride there at the coming meeting. There will be no Fall meeting at Nashville this Fall, the country attractions at St. Louis and other points being too great to overcome. PACIFIC.

NEW YORK, Aug. 21, 1884.

Harry Wilkes, 2:16 1/2, one of the great trotters of the year, is 3 years old and owned by William France, of Jersey City. He was purchased before he was two years old for \$5,000. Last season he obtained a record of 2:23 1/2. Mr. France sold him last June for \$6,000.

Fresno Fair Association, Fresno, October 7th to 11th.  
Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## California Hunting Grounds.

The near approach of the shooting season, for which we know extensive and costly preparations are being made, in many quarters for the first time induces us to take a glance at what the season promises. At the present time this may be done with much advantage to all classes, inasmuch as the extent of our hunting grounds, and the variety and value of our game, show us the importance of having just and wise game laws, which shall protect the rights of property, and the privileges of the citizens, and the necessity of their being, like other laws for the general good, promptly and sternly enforced. It is not exaggeration to say that few States in the Union, or few countries in the world, have more extensive hunting grounds or a greater variety of game still accessible, as they ought to be, to every respectable citizen, than California.

As the country, however, settles up, and the rights of property become a factor in the question, we must, as a people, prepare ourselves to adopt new ideas in connection with these individual *privileges* which were formerly open to all and shared by all without distinction, when the country from end to end was a wilderness. It is true the occupation of our public lands for agricultural purposes by one class of citizens has sensibly diminished the area of our hunting grounds, formerly open to another class of citizens, and that thereby ill-feelings have been engendered in both. But this should not, and will not be, when honesty and reason govern men's actions. The necessity for agriculture, which, of itself, calls into existence the rights of private property, is inexorable in every country as it advances to manhood and progresses in civilization; but, in every such country, the restriction put thereby on individual privileges is really only injurious or offensive as the country is large or small. At present, and for generations to come, if not forever, there will be room enough in California for one class to farm with security, and the other to hunt with impunity without the rights of the one or the privileges of the other coming into conflict, if only the inevitable and natural condition under which they have to live is accepted with common reason and common sense. If, under this condition, now to us at present, but common to all other civilized people there are some who will not accept it, then the power of the law must be invoked to make them do so. We do not speak thus because we favor the rich and oppose the poor, for we desire to do justice to all. It is not our fault if one man becomes rich and buys land and another remains poor and shoots game; but in dealing with public questions it would be our fault if we did not support the best interests of the country by supporting law and order. The hunting privileges of every

American citizen, he it remembered, whether as regards the extent of the country he can still range over, or the quantity of game he can still kill, are unequalled by the average citizen of any other country in the world. Is it necessary for us to sustain this assertion by details? Begin then at the San Diego boundary line, and follow on over the endless valleys, the Coast ranges, the Sierras, the rivers, the bays and their tributaries, and the foothills, to the boundary line of Oregon in Del Norte county, and where in any other country has the wealthy or the poor citizen, let us ask, such a glorious heritage to enjoy as pleasure or profit may dictate? In this grand domain, a world within a world, in fact, the free inheritance too of birth or adoption, he finds every description of game useful for domestic purposes known to man—hear, deer, hare, rabbit, geese, duck, snipe, plover, quail, doves, etc., etc., placed without cost by a too generous government at his disposal, and if some of the larger and more valuable species are no longer found in the list, such as elk, antelope, wild horses and cattle, it is from his own base ingratitude and senseless rapacity only that the omission comes. For all this wealth, all this freedom, all these privileges, the government in return only imposes one condition—the exercise of the common virtues of manhood—simply says to each and all, the rich and poor, he men, and while you enjoy your own privileges, respect the rights of others. In England, France, Germany, Russia, and other countries of Europe, government charges every man from the prince down \$20 a year for a license for the privilege of simply carrying a gun, but it supplies at the same time neither an acre of land to range over, nor a head of game to kill. Such is the difference between America and Europe, her laws and their laws. If, in the inevitable march of progress, as our State increases in wealth, here and there portions of the public domain are detached from the hunting area to produce flour, meat, vegetables and fruit, and produce them cheaper than elsewhere in the world, that cannot be helped and is no ground for grumbling and disobedience to law. It is rather a matter of congratulation, and should make us grateful rather than discontented. When it comes to a matter of food, as it is in a matter of rebellion, the individual must perish that the country may live. There is enough and plenty of public domain still left for all of us to hunt over. If on private estates we are too mean or too proud to ask permission to hunt, the enjoyment must be lost. To the last we will defend the privileges and enjoyments of the masses, because it is well for the country they should be defended. Not, however, will we do it at the expense of the rights of property. We are republicans, not anarchists.

In the coming season, which from late accounts promises to be very good, or at least much better than first expected, we hope all our sportsmen in their enjoyments will remember they are Americans, the children of infinite blessings, and carry themselves accordingly. A season of great pleasure is upon us, a season of mirth, health, and recreation. Let us use it like freemen. Let there be no selfishness in refusing pleasure in those who can give it, no aggression in those who seek it. Legitimate sports, properly carried on, are a source of happiness and wealth to all people. They are daily rising in California to importance and dignity. To enjoy them fully we must appreciate them properly.

## The State Fair.

Monday the pavilion portion of the California State Agricultural Association opens, and on the following Thursday the park display. There is little question that the exhibition will be superior to any that has preceded it, and it is not a rash assertion to make that from every point of view it will far exceed every State exposition in the whole country. Not one of them, in fact, can compare with California exhibitions in any of the departments, and even such grand affairs as that which is usually held in St. Louis, and those which depend on all the States in the Union, reinforced by the products of foreign countries, only surpass it in classes which are not indicative of the actual resources of the country in which they are held. Gather the productions of the soil in all the territory east of the mountains and the exhibit will fall short of what this one State can show. Such perfect specimens of cereals, vegetables and fruits are not to be found in the middle or eastern portion of the continent, and it is doubtful if with the Southern States added the display can be equalled. Now that an appropriate building has been erected to exhibit what will be shown in the pavilion properly, there is not a question that it alone will be well worth a journey across the continent to witness.

At the park there will be enough to make every hour of daylight pass away rapidly. Stock of all kinds will be there in such numbers, and of such quality as to surprise those who are not intimately acquainted with the animals of this State, and what with watching and exercising of racehorses and trotters and visits to stalls,

pens and coops, the mornings will be fully occupied. It will be a dull soul which does not heartily enjoy the afternoons. From the time when the bell rings to call the horses for the first race until evening time there will be a succession of exciting events. The best proof of the good ground on which this prophecy is based is the list of entries. For the coming week the purses and entries are as follows:

### First Day, Thursday, Sept. 11th.—Trotting.

No. 1.—Occident stake for three-year-olds. Rancho del Paso's Robert Lee. J. C. Simpson's Antevolo. W. B. Todhunter's Griselda.

No. 2.—Pacing; 2:25 class; purse, \$1,000.

M. F. O'Dell's h g Shaker. P. Fitzgerald's h h Killarney. S. C. Tryon's h g Prince. J. T. McIntosh's h g Fred Ackerman. Donathn & Roberts' ch g Belmont Boy. H. J. Agnew's h m Msude. C. Kirby's h m Patti. Chas. David's h s Ssm Lewis. John O'Rourke's h m Little Em.

No. 3.—2:25 class; purse, \$1,200.

E. M. Fry's h g Arak. Geo. W. Baylis' b g James H. L. J. Rose's h m Nelmska. J. A. Goldsmith's h m Sister. Louis Duncsn's h g Louis D. John Dexter's ch m Magdallah.

### Second Day, Friday, Sept. 12th.—Running.

No. 4.—Introduction Stake, for two-year-olds; \$25 entrance; \$10 forfeit; \$200 added; \$50 to second horse; third to save stake; three-quarter of a mile dash.

Delaney & Ayres' g g Ichi Ban. W. M. Murray's ch h Estill. G. W. Trahern's ch f Laura T. Hill & Gries' h c Arthur H. Todhunter & Allen's h c Alta. Jss. Mee's ch f Mischief. G. Pacheco's ch f Msmie D.

No. 5.—California Derby Stake, for three-year-olds; dash of one and one-half miles. Closed in 1882 with 16 nominations.

No. 6.—Del Paso Stake for all ages; \$50 entrance; \$15 forfeit; \$250 added; \$75 to the second, third to save stake; three-quarter mile heats.

Delaney & Ayres' ch m Trade Dolls. George Howson's h h Jim Donglass. M. M. Allen's h h Patsy Duffy. T. H. Williams, Jr.'s blk h Bryaut W. S. J. Jones' h h Forest King. Rancho del Paso's ch f Sussn. Wm. Kelly's h g Jon Jou. James Adams' h m Annt Betsy. E. J. Baldwin's b c Besconfield.

No. 7.—Selling purse, \$200; entrance free; second horse, \$50; fixed valuation, \$2,000; two pounds off for each \$100 below, and two pounds added for each \$100 above fixed value; dash of one mile and an eighth.

E. B. Johnston's h g Belshaw. George Howson's ch g Rondo. G. W. Trahern's ch g Certiorari. P. Sichenhalter's h h Philip S. M. M. Allen's h h Jocko. Rancho del Paso's ch f Susan. Rancho del Paso's h g Duke of Monday. A. A. Pinney's ch h Nick of the Woods. Wm. Boots' h f, by Boh Wooding—Gladiola and h m Bessie. Charles H. Thomas' ch h Balhoa.

### Third Day, Saturday, Sept. 13th.—Trotting.

No. 8.—Trotting purse, \$1,000; for four-year-olds. Closed March 10, 1884, with ten entries.

No. 9.—The annual two-year-old trotting stake. Closed January 1st, with twenty-one nominations.

No. 10.—Purse, \$1,200; 2:27 class.

A. C. Dietz's h m Olivette. P. Johnson's h g Scandianavian. James M. Leonard's h h Adrian. Armstrong & Carrington's h h Rsrus, Jr. W. F. Smith's h g Adair. E. V. Spencer's h m Belle Spencer. W. H. Voigt's h h Captsin Smith. W. B. Todhunter's ch m Huntress. J. W. Donathan's blk g B. B. I. De Turk's b s Anteeo. Pat Farrell's h h Marin. E. Downer's ch g Thmp Winston. J. A. Goldsmith's h m Sister. Thomas McAvoy's h g Frank L., formerly Orphan Boy.

The six days of the next week are fully occupied, the stakes and purses being in such numbers that it will require plenty of speed on part of the managers to carry them through on time.

A notice just received from Secretary Smith informs us that already there are applications of 300 stalls for cattle.

## The Blood of Jersey Belle.

Mr. A. J. Fish, in the *Breeders' Gazette*, to show that the memory of such cows as Bomha and Coomassie does not perish, recites a list of famous performers; Jersey Belle of Scituate, 25 lbs., 3 oz. Her daughters, Belle of Scituate, 18 lbs.; Lass of Scituate, 15 lbs., 14 oz.; granddaughter, Minnie of Scituate, 14 lbs., 4 oz.; great granddaughter, Pauline Vivienne, 15 lbs., 15 oz., and Dalton's Pet in one day, 2 lbs., 3½ oz. Thus it will be seen that the fame of these old cows, instead of growing less, increases as the years go by. Mr. Henry Pierce, owner of the Yerba Buena ranch, owns the only living son, one of the two daughters and the controlling interest of the blood descendants of Jersey Belle of Scituate, above referred to. A fine cut, a perfect portrait of the old cow will be found in our advertising columns. William of Scituate, now on exhibition at the Golden Gate Fair, at Oakland is deep in the blood of Jersey Belle. He was imported from Henry Pierce's eastern herd and sold to Wm. D. Bliss, of Petaluma, for \$1,000. He is a prize winner wherever shown and worth looking at by those interested in Jersey cattle.

Our Suggestion.

We must acknowledge that the object in suggesting a moving figure of Father Time to contend against the flyers of the trotting tracks was mainly to ridicule the prevailing practice. A friend, however, has taken it in "dead earnest" and is husily engaged in perfecting plans so as to have it in readiness for the next season. As a caveat will be entered before this is published there is no danger in giving an outline of his invention. The track for Tempus is easily constructed. It will be one line of rails with a contrivance that will prevent it from being thrown out of perpendicular, excepting when rounding the curves, when it will have the orthodox lean to the inside. His first experiments will be with a steel rail, the top of which will be of the shape of a reversed letter V, and the wheel to run upon it will be grooved and lined with a material that will effectually prevent slipping. Should there be the least tendency to slip the rail will have cogs with corresponding projections on the wheel, but there is scarcely a question that it will be sufficient to depend upon the grasp of the groove when covered with a material that will adhere firmly to the rail. He says there is not the least difficulty in constructing a machine that can be regulated to run any desired distance in exactly the required time. The mechanism will be similar to that of a chronometer on a large scale, and made with such accuracy that it will register fractions of seconds as truly as the best timing watches. He prefers the bicycle shape, not only being less cumbersome than a sulky but will be more appropriate to carry the figure. In that he agrees with the artist who pictured the allegorical representation of the match against time when George Osbaldeston gained his great victory by riding two hundred miles far within the limit necessary to win his wager. In the "Pictorial Gallery of English Racehorses," at the end of the written description there is a cut showing the finish of the race. The grand stand thronged with people, the wide course, on the inner side of which is the horse which carries the victorious "Squire," and lengths behind Father Time making frantic efforts to kick his "velocipede" along. It is a crude machine when compared to those of the present day, but our enthusiastic friend is determined to elaborate his idea into a "thing of beauty and a joy forever" to all those of æsthetic taste.

He argues so earnestly that this will be the racing of the future as almost to persuade us that there may be something good in races "against time" and assuredly it will be a decided improvement on practices now in vogue. Far better than the Buffalo idea of giving the largest share of the purse to those making the fastest time, and incomparably superior to such an intangible race as can only be determined when figures are put on the blackboard.

It will be a great boon to associations and proprietors of tracks, if the inventor is correct in his deductions. His only fear, he avers, is that there is not enough humbug in it to be intensely popular, but then he reasons that humbugs are transitory, while the merit of his machine will keep it in favor for a long time, and that in place of palling the desire every exhibition will add to the *gout* with which it will be received.

Deerhounds.

Deerhounds are among the grandest specimens of the canine genus. They were especial favorites of Sir Walter Scott, and a picture of him would be incomplete without a representation of Maida. As will be seen by an advertisement elsewhere Captain Hutchinson offers three dog pups of this celebrated breed for sale. The dam was a present to Captain H. from his father General W. W. Hutchinson, of England, which is an absolute guarantee of purity of blood and quality, as the donor is recognized as the *great* authority in all pertaining to dogs of every degree, and without a rival as a writer and educator in this branch.

Not long ago we received from General Hutchinson the latest edition of his popular work, "Dog Breaking," and even at this busy season when reading has to be restricted, we can scarcely lay the volume down when taken up for a moment's reference, as it is as interesting as instructive, and shall copy from it extensively when there is more time at command. There are valuable lessons outside of the specific purpose of the work, and many suggestions which can be applied to the education of horses as well as dogs. Then it is enlivened with so many applicable and interesting anecdotes that any one with the least fondness for sports in which dogs figure will be loathe to lay it down until it is read through and through, while those who participate in the sport will return to it again and again for instruction.

State Fair Handicap.

In the Free Handicap Stake to be run at the State Fair, on Monday, Sept. 15th, the following handicaps are announced

Patsy Duffy.....	125	Patrol.....	108
Jacko.....	116	Bachelor.....	106
Billy the Kid.....	108	Birdcatcher.....	110
Trade Dollar.....	110	Balboa.....	95
Bryant W.....	113		

Declarations are due on or before Monday, September 8th, at 8 o'clock P. M.

YACHTING.

The San Francisco Yacht Club's Annual Regatta.

This event took place last Saturday over the new channel course, of which full descriptions have appeared in the BREEDER AND SPORTSMAN.

The first signal was given at 1:30 as arranged, and the following fleet crossed the line within the prescribed ten minutes: Class A—Lurline, Chispa and Nellie. Class B—Frolic and Rsmbler. Class C—Eva, Restless and Ripple; and Class D—Fleetwing and Lively. The starters were not as many as anticipated, as some of the entries failed to show up.

Nellie, Ripple, Ramhler and Lively were anchored to the windward of Meiggs' Wharf, prior to the start, and the other vessels sailed up in ample time. The wind was steady from the westward and blew at the rate of about sixteen knots. Most of the yachts made light sail before crossing the line, and as they only had about five hundred yards between the Emerald—the Meiggs' Wharf stakeboat—and the shore, and as they all had to cross in ten minutes, they were pretty well hunched and made a most beautiful picture. The vessels crossed in the following order: Frolic, Chispa, Restless, Ripple, Eva, Lurline, Fleetwing, Nellie, Lively and Ramhler, there being only a difference of 7 minutes and 2 seconds between the first and last yacht.

The course to the Berkeley stakehouse was dead before the wind, and the schooners, with the exception of the Nellie, failed to get their staysails to draw steadily. When the yachts hauled the wind at this stakeboat, the plunger Annie, and rounded to, it was found that Lurline had passed the Chispa and that Nellie had gained 58 seconds on the latter; that Frolic had increased her lead over Ramhler by 26 seconds.

The Lurline, sailed by Capt. Turner, made a long leg on the port tack and made nearly to Angel Island before going about: Here she made a great error which ruled her out of the race. The sailing rules, of which every yacht had a copy, although not worded particularly well, demanded that the competing vessels should both ways and every time pass between Meiggs' Wharf and the Meiggs' Wharf stakeboat, and was so understood by everyone else and acted upon accordingly. Capt. Turner also read the rules but was argued out of his opinion by others on board the yacht, who for some peculiar reason, considered the Meiggs' Wharf stakeboat, the "ends" of the course. This was most unfortunate, as the judges had no option but to rule her out of the race, leaving but two yachts to compete in Class A. The gentlemen on the Lurline have made a protest from the decision of the Regatta Committee, which strikes us as a rather small piece of business, as it was evident that they had made a mistake from the mere fact that every other yacht construed the orders as intended, and although we regret exceedingly their misfortune, we think it would be in better taste to gracefully submit to the decision and be more careful in the future. The result of her time as taken would give her the second prize of Class A, and the special prize for the fastest time over the course, that is to say if the flood tide was running as strong between Angel Island and Alcatraz, as it was along the south shore. Some yachtsmen say that the course she sailed was shorter than that taken by the other yachts; an untenable position when taken into consideration the fact that no vessel could weather the Meiggs' Wharf stakeboat, on one lay from Berkeley. Taken in a *strait* line the course would be shorter, but as all the yachts had a certain amount of windward work to do, and wind and tide being equal all over the channel, it would be immaterial to the distance sailed if the vessels made long reaches from one side of the channel to the other. The action of Lurline standing so far to windward made Nellie lose some little time, as Murphy, evidently thinking Lurline his most formidable competitor, desired to stay in the same waters, and when he finally went about he could have weathered the Emerald by quite a piece and was obliged to keep off. He was again delayed through the action of the Captain of the U. S. steamer Manzanita, who steamed up just to leeward of the stakeboat as Nellie made it, and Murphy was again compelled to put his filler up and run to leeward of her, to avoid a collision. The only good ground for a protest from Lurline was, because the windward stakeboat was not anchored when she reached the position, and she in consequence went further to windward than necessary to weather it, but as she failed to sail the correct course, this in our opinion, would render her objections null and void. The Regatta Committee, in spite of once having decided against her, seem afraid to take decided action, one way or the other, and now wish to leave the matter to the decision of the club, an unreasonable idea, when they were especially appointed to adjust such matters as these.

Chispa, through the misfortunes of Nellie, rounded the Meiggs' wharf stake boat 3 minutes and 19 seconds ahead of her now only competitor and was sailed magnificently by John Eckley, and maintained her head to the second as far as the Presidio wharf.

Frolic still was forging ahead of Ramhler, which latter seemed to have difficulty in handling her light canvas, and on squaring away around the windward stakeboat was 13 minutes and 21 seconds ahead of her.

The plunger Restless was sailed admirably and held right on to Eva in spite of the difference in size, while little Lively, whose jib failed to set properly, was outweathering Fleetwing and driving faster through the water, and when their windward time was taken she was 13 minutes and 25 seconds ahead, a complete gain from the time of the start of 14 minutes and 13 seconds. This class only went over the course once and Lively finished 13 minutes and 40 seconds ahead, thereby winning the race.

Ripple, though hopelessly behind, still continued on, and after crossing the finishing line once, retired from the contest.

The time was not taken at Berkeley on the second time round, but Lurline rounded first, then Chispa, followed closely by Nellie. From here to the Presidio the most exciting part of the race took place between these two latter vessels. Nellie finally caught her in the shipping, and amid great excitement on shore, forereached her and crossed her bows.

The vessels sailed as though drawn by one rope and crossed the Meiggs' wharf line at the same moment.

From here to the Presidio Nellie gradually went to the van, and held the lead to the finish, winning the race on sailing time by 2 minutes, 56 seconds, and with the addition of time allowance by 3 minutes, 21 seconds, thereby winning the Club Flag, the first prize, and if allowed her deserts the special prize for the fastest time, while Chispa takes the second prize in Class A.

In the meantime the second and third classes were at it hammer and tongs, although it was a foregone

conclusion that Restless had Eva beaten, while the result was still very doubtful between Rember and Frolic with the odds favoring the larger boat. These odds increased when Ramhler rounded the leeward stake boat for the second time, for in endeavoring to get down her main gaff topsail, the tack got adrift and the sail was holding on by only the onthaul and halyard and blowing way out to leeward with several turns to the ropes, making a perfect hog of a back sail. Lots of valuable time was lost keeping the vessel shaking, while they endeavored to secure the sail from aloft but failing in this, the mainsail had to be lowered before it could be remedied. Frolic was not way ahead with both Eva and Restless leading her and passed Meiggs' Wharf on the way out of 191 minutes ahead of Ramhler. Here the latter took advantage of the slack water in the Coves and finished only 10 minutes and 50 seconds behind, this with the start the Frolic had only heat her 1 minute and 48 seconds and gave the Ramhler first place with time allowance by 4 minutes 15 seconds. Eva heat Restless 35 seconds only which gives Restless first place in her class by 9 minutes and 25 seconds, a remarkable showing for such a small boat. The windward boat was in charge of our ancient mariner, Capt. Moody, and in spite of his often expressed predilections for small yachts he seemingly got weary and did not wait for any but the first-class boat to cross the second time, put up anchor and off, and had it not been for the thoughtfulness of Capt. Chittenden, on the Lolita, Classes B and C would have had no stakeboat, but he kindly anchored and though considerably to leeward of the originally position allowed these classes to finish the race. The race was a success, but the schooner men cry down the course as being favorable to sloops and yawls on account of the difficulty of getting light sails to draw. This may account for the achievement of the Restless.

Herewith we publish a time table of the yachts:

Name of Vessel	Start	Berkeley	Meiggs	Presidio	Meiggs (2d time)	Presidio	Home	Sailing Time
Class A	H. M. S.	H. M. S.	H. M. S.	H. M. S.	H. M. S.	H. M. S.	H. M. S.	H. M. S.

Annual Regatta of the Pacific Yacht Club, Tuesday, Sept. 9th.

The start will be from an imaginary line from Mission Rock to Long Bridge, thence to and around stakeboats off Hunters' Point, thence to and around stakeboat off Oakland bar, thence to and around stakeboat off Fort Point Wharf, leaving stakeboats on the port hand, thence back over same course, leaving stakeboats on the starboard hand.

The starting gun will be fired at 1 o'clock P. M., from Mission Rock. Ten minutes will be allowed for crossing the line. Yachts crossing after that, their time will be taken from 1:10.

Yachts will be classified as follows: 1st class—Casco, Halcyn, Lurline, Aggie, Ariel, Fleur de Lis, Virginia, Nellie. 2d. class—Annie, Whitewing, Eva, Ramhler.

Five prizes, exclusive of the champion flag, will be awarded: 1st and 2d prize to the 1st and 2d boats in the first class, with time allowance. 1st and 2d prize to the 1st and 2d boats in the second class, with time allowance. The club champion prize flag will be awarded to the boat in either class, making the best time over the course, with time allowance. A special prize will be given to the boat making the best time over the course, independent of time allowance or class.

Regatta Committee: C. O'Connor, Goo. Fritch, J. C. Kelley, S. A. Eldridge, Philip McGovern.

Hon. James Grant.

We were much gratified to greet our old friend, James Grant, President of the National Trotting Association, at the Golden Gate Fair on Thursday last. It was the first time he has attended a California fair, and he was much pleased with California colts. Still we imagined there was a tinge of disappointment in his tone when he informed us that he supposed it was a race meeting, and notwithstanding the prominent position he has occupied for several years in the trotting world his old love for thoroughbreds is paramount.

Judge Grant is one of the remarkable men of the country, wonderful in mental and physical force. Our acquaintance with him dates from 1851, and thirty-three years have made very little change in appearance. We feel ashamed in entering a plea of being too old to carry the weights when we see him with fourteen years difference doing the work of half a dozen men. That he has made a model President of the N. T. A. is so well known and thoroughly recognized that it is superfluous to mention it to those who are familiar with what has been done since his incumbency.

## HEKD AND SWINE.

### Increasing the Live Stock Upon the Farm.

It is only after a man has carefully weighed the advantages and disadvantages of the two leading systems of husbandry, and put upon competitive trial the growing of live stock and the growing of grain for sale, that he can be competent to judge of the advantages either possesses when compared with the other. It is not stating it incorrectly to say that in live stock farmers have a kind of property that grows the year round, whereas perennial plants and all productive growths from the soil that are not cut from the ground in a few months after planting, are dead property during a considerable portion of the year. It is not an adequate answer to this to say that farm stock is profitless during the Winter. If profitless, then this is owing, not to the necessities of the case, but rather to the character of the stock, or the mode of keeping, possibly to both. If the farm is properly stocked, and the provisions for care-taking are as they should be, the feed not stinted, all young animals should grow apace, and feeding-stock should get fat. It is especially true of breeding animals that the Winter season is one during which rapid and profitable growth towards maturity of the unborn young is made, and like the interest upon a note, or the tax upon the land, the accession to growth goes on night and day alike.

It would be wisdom on the part of farmers, if, before changing over from a system of growing grain for sale to a system of crop growing for the exclusive purpose of feeding out upon the premises, they would visit one or more of the leading markets, spending, not a day merely in sight seeing, but days, devoted to a careful study of the characteristic points of such animals as sell at top prices. As a rule, they will have seen enough of such as sell at low prices to be familiar with their points. A study of the features of the better specimens of cattle, sheep, and swine can not be concentrated into a day. This is a subject that the average farmer fails to master upon the farm, from boyhood till gray hairs come upon his brow, as the live stock upon the average farm furnishes ample proof, and he can not be expected to fully take in and digest the lessons in any market in a day, he they, as they usually are, ever so pointed. An important characteristic is that which enables an animal, after proving itself to be able to take on flesh rapidly, to carry this flesh to market without undue shrinkage. A careful study of a few car-loads that have been hauled several hundred miles will bring out the evidences of drooping and shrinkage in some, while others stand erect, take their feet as though they were in their accustomed stall at home, and, by the general expression of comfort, give evidence of the possession of hardiness of constitution apparent to a practiced eye. So, if farmers would be assured that they have, in stock growing and feeding, a means of profit in advance of growing grain for sale, they must consider the pertinent points, not by a hasty mode of guessing, but by careful study carried on in the manner mentioned.

It would seem that crops which can be grown and made ready for market in 90 or 120 days, should be profitable; but here again the fact comes in, that land kept in use for tillage crops lies idle two-thirds of the year, taxes and the interest upon capital invested accumulating during the eight months of idleness as well as in the four months of productiveness. The introduction of machinery stimulates to over-production in manufactures, and it is worth considering how far the facility afforded for bringing certain tillage crops to perfection in a brief period of time influences such free production as to often cause a glut in the markets, and keep grain below a price which insures a profit in the growing. It is only in the older-settled countries, where land has been for a long time under tillage, that due stress is given to the value of manure left by live stock upon the farm; and, on the other hand, to the drain which land suffers through growing grain and hay to be fed away from the premises.

At this time, what need is there for any man to stop and consider as to whether cattle, sheep, and swine will pay better at the present rates? The fact that it is especially worthy of note is the remarkably fine prices obtained for cattle, notwithstanding the impression that the extensive movements made in the West of late, would result in glutting the market. It would be possible to create such a glut with swine, if, by general consent, breeders generally over the country should make a vigorous effort to increase the swine stock to a maximum, and no epidemic occurred to cut the increase down; but with cattle it is safe to say there is scarcely a possibility of this. There will certainly not, in the lifetime of any man now living, be a surplus of first-class beef cattle; and as consumption increases *per capita*, as the quality improves, we may continue to look for the usual scarcity of good cattle, and, consequently, for profitable prices for these. It is natural that men should doubt and waver, but if success has not attended grain growing, the product being grown for sale, to be hauled on the farm, the land being found to lose its fertility and the purse not to grow full, then it will be well not to change over to another system because neighbor A or B has done this with success, without due study, because A or B may be thoroughly conversant with the business, and no success will attend any branch of stock breeding or feeding unless there is a proper understanding of the details.—*Live Stock Journal*.

### Are the Jerseys "Delicate"?

We constantly see it stated that the Jersey cow is so delicate she requires the greatest care and protection to carry her through the Winter. The "St. Lambert" family was bred and reared at St. Lambert, near Montreal, in one of the coldest sections of a cold climate, and where the Winter is an exceedingly long one. They had the ordinary care which is bestowed on any breeding herd. Leaving out other families of Jerseys (with which I seek to draw no comparison), there is no family of cows in the world who show to-day the same hutter capacity and uniformity as the St. Lambert family. Does this look as if they had deteriorated under the treatment which any intelligent, humane man will give his cows? If so, I can only wish all the poor men had a few cows for a dairy herd who have deteriorated in the same way! In the place of injuring them it has certainly left them with greater butter capacity, it has added to their size (they average from 850 to 1,100 pounds), and it is conceded by all familiar with the family that they have wonderful constitutions.

To satisfy myself as to the endurance of the Jersey cows last Winter, I placed some of my yearling heifers and some imported cows in the barnyard late in October, when the rest of the herd was stabled; some had been dropped in Canada, others were imported. They were fed in racks, and remained in the barnyard until the Spring, having only an open shed to lie under at night.

The yearlings grew to our entire satisfaction, and are now superior in constitution and future dairy promise to those housed, which at the time were considered their equals. We found that the mature cows improved also in constitution, and though their flow of milk did not equal that of those housed, when they calved afresh it increased over that given before their wintering out. With us last Winter was an unusually long and severe one; we had continuous sleighing for months and the thermometer was constantly below zero. It settles to our satisfaction the ability of the Jersey cow to stand "roughing it." From the Spring till late in October our cows and calves, of more than four to five mouths old, remain in the pen day and night, no matter how cold or rainy it may be, save when the cows are brought in to milk. In the Winter our stock are all let out in the yard for exercise from an hour to two hours each day, unless there be a drifting heavy snow storm. The tests made this Spring at Oaklands show they have not been injured under this treatment. One night in January last the thermometer stood at twenty-one below zero. Honey-moon of St. Lambert dropped a heifer calf at one A. M. It was immediately taken from its mother, put in a sack on some hay, carried across through the open yard to the calf pens which had no artificial heat, and lives and thrives to-day to demonstrate to the croakers, (many of whom have no practical experience of what they write), the entire fallacy of many of the fancied difficulties with which the owners of the Jersey stock have contented. Such is our experience in a climate which is admitted to be a trying one to stock, and if I am not misinformed, the fortunate owners of Jersey stock in the Sunny South experience an equally satisfactory result. I say "fortunate owners." In spite of all the denunciations of the little Jersey cow, her progress is sure and steady, and will so continue as in the older States, (where she is best known from our actual experience through her "grades"), she is best appreciated, and in place of her taking money from the pockets of her owner for her support, she is placing it to her credit in his bank account, for the simple reason she will make more butter upon less food, and therefore at least cost than any other breed of cattle.—*V. E. Fuller, in Country Gentleman*.

### Premiums at Petaluma.

#### CLASS 1—THOROUGHBRED HORSES.

Pat. Carroll, best stallion, four years old or over, Ironclad.  
S. B. Wright, best stallion, two years old and under three, Harry Peyton.  
P. Carroll, best mare, four years old or over, Nellie.  
S. B. Wright, best mare, two years old and under three, Lalla Rookh.  
P. Carroll, best suckling horse colt, Sunday.

#### CLASS 2—HORSES OF ALL WORK.

Robert Crane, best stallion, four years old or over, Silver-tail Prince.  
T. Skillman, second best, Tom Cooper.  
J. Russel, best stallion, three years old and under four, Duke de Chartres, Jr.  
A. J. Mills, second best, Dandy.  
P. McAuliffe, best stallion, two years old and under three, Sonoma Boy.  
L. A. Devota, best stallion, one year old and under two, Prince William.  
Robert Crane, second best, Quimper.  
A. J. Mills, best mare, four years old and over, Juda.  
Capt. Harris, second best, Lena Sawles.  
J. R. Rose, best mare, three years old and under four, Norma.  
J. P. Rodehaver, second best, Dolly.  
T. P. Winters, best mare, two years old and under three, Florence.  
J. R. Rose, best mare, one year old and under two, Phyllis.  
Robert Crane, best suckling horse colt, Model.  
E. Fine, second best, Baby.  
B. E. Harris, best suckling, mare colt, Sly Boots.  
Petaluma Horse Breeders' Association, best stallion and six colts, Brown Prince.

#### CLASS 3—FRENCH NORMAN DRAFT HORSES.

T. Skillman, best stallion, four years old and over, Tornado.  
P. McAuliffe, best stallion, three years old and under four, Young Duke.  
W. McLaughlin, best stallion, two years old and under three, Napoleon.  
E. Fine, best stallion, one year old and under two, Young Rollin.  
A. J. Mills, best mare, four years old or over, Min.  
W. K. Rodgers, best mare, three years old and under four, Fanny.  
C. C. Champlin, best mare, two years old and under three, Nellie.  
Robert Crane, best mare, one year old and under two, Maud.  
Robert Crane, best suckling horse colt, Laurent.  
J. A. McNear, best suckling mare colt, no name.  
W. K. Rodgers, best stallion and six colts, Exchange.

#### CLASS 4—CLYDESDALE OR ENGLISH DRAFT HORSES.

Clydesdale Breeders' Association, best stallion four years old or over, Pointsman.  
W. V. Moriu, best stallion, one year old and under two, Young Pollock.  
Wm. Bibler, best mare, four years old or over, Doll.  
L. W. Walker, best mare, two years old and under three, Jane.  
Wm. Bibler, best suckling horse colt, Petaluma.

#### CLASS 5—BEST CALIFORNIA DRAFT STALLION.

W. K. Rodgers, Napa Chief.

#### CLASS 6—ROANSTERS.

P. J. Shafter, best stallion, four years old or over, Rustic.  
F. Needham, best stallion, three years old and under four, Connemara.  
Dan Brown, best stallion, two years old and under three, Judge Overton.  
S. Sperry, best mare, four years old or over, Dehonair.  
Wm. Bibler, best mare, two years old and under three, Mattie.

#### CLASS 7—STANDARD TROTTERS.

H. H. Helman, best stallion, four years old and over, Miltour R.  
A. H. Abbott, best stallion, three years old and under four, Standard.  
T. T. Uckless, best stallion, one year old and under two, A. P.  
H. H. Helman, best mare, four years old or over, Maud Medium.  
T. T. Uckless, best mare, three years old and under four, Eureka Patchen.  
Dan Brown, best mare, one year old and under two, Elise.

#### CLASS 8—CARRIAGE AND SADDLE HORSES AND JACKS.

Ben Harris, best matched carriage team, 16 hands or over, owned and used by one person as such.  
H. P. Brainerd, best single huggy horse, King.  
L. W. Walker, second best, Logan.  
Capt. Ben Harris, best saddle horse, three distinct gaits, Leo.  
J. A. Palmer, second best, Billy.  
S. Scott, best Jack, Blackbird.  
S. Scott, best Jennet, Fanny.

#### CLASS 9—THOROUGHBRED CATTLE.

S. Scott, best Durham hull, four years old or over, Mszourka's Royal Oxford.  
John Lynch, best Durham hull, one year old and under two, Marin Duke.  
John Lynch, best Durham hull calf, Sonoma Chief.  
S. Scott, best Durham cow, four years old or over, Alice Gray.  
S. Scott, best cow, three years old and under four, Gem.  
S. Scott, best Durham heifer one year old and under two, Lady Oxford.  
S. Scott, best Durham heifer calf, Oxford Belle.  
J. R. Rose, best Devon hull, four years old and over, Curly John.  
J. R. Rose, best Devon hull, two years old and under three, Long John.  
J. R. Rose, best Devon hull, one year old and under two, Short John.  
J. R. Rose, best Devon calf, Cheap John.  
J. R. Rose, best Devon cow, four years old or over, Rnhy.  
J. R. Rose, best Devon cow, three years old and under four, Lola.  
J. R. Rose, best Devon heifer, two years old and under three, Wildflower.  
J. R. Rose, best Devon heifer, one year old and under two, Roxy.  
J. R. Rose, best Devon heifer calf, Lucilla.  
J. R. Rose, best Devon herd of not less than six animals, Curly John and family.  
F. C. De Long, best Alderney hull, four years old or over, Gen. Thomas.  
Wm. D. Bliss, best Alderney hull, three years old and under four, William of Scituate.  
S. S. McCae, best Alderney hull, two years old and under three, La Hirci's Boy.  
Wm. D. Bliss, best Alderney hull calf, Nsntasket.  
F. C. De Long, best Alderney cow, four years old or over, Fashion.  
P. J. Shafter, best Alderney cow, three years old and under four, Juliette.  
P. J. Shafter, best Alderney heifer, two years old and under three, Jeannette.  
Wm. D. Bliss, best Alderney heifer, one year old and under two, Yolo.  
F. C. De Long, best Alderney heifer calf, Celia.  
F. C. De Long, best Alderney herd of six animals, Gen. Thomas and six cows.  
Geo. Bement, best Ayrshire hull, four years old or over, Archie.  
Geo. Bement, best Ayrshire hull three years old and under four, Young Melancton.  
Geo. Bement, best Ayrshire hull two years old and under three, Hector.  
Geo. Bement, best Ayrshire hull one year old and under two, San Mateo.  
Geo. Bement, best Ayrshire hull calf, Clipper.  
Geo. Bement, best Ayrshire cow four years old or over, Lady Faxon.  
Geo. Bement, best Ayrshire cow three years old and under four, Highland Mary.  
Geo. Bement, best Ayrshire heifer two years old and under three, Sybil.  
Geo. Bement, best Ayrshire heifer, one year old and under two, Marian.  
Geo. Bement, best Ayrshire heifer calf, Syhilla.  
Geo. Bement, best Ayrshire herd of 6 animals, Archie and 6 cows.  
Mrs. E. D. Knott, best Holstein hull, four years old or over, Anson.  
Mrs. E. D. Knott, best Holstein hull calf, Logan.  
Capt. Wm. Kohl, best Hereford hull, two years old and under three, Vauguard.  
Capt. Wm. Kohl, best Hereford bull calf, Duke of Normandy.  
Capt. Wm. Kohl, best Hereford cow, three years old and under four, Violet 2d.  
Capt. Wm. Kohl, best Hereford heifer, two years old and under three, Tidy 10th.  
Capt. Wm. Kohl, best Hereford heifer calf, Mary 3d.

#### CLASS 10—GRADED.

W. F. Bowman, best hull four years old or over, Eureka Jake.  
A. C. Shelton, best hull one year old and under two, Billy Sharon.  
A. C. Shelton, best bull calf, Judge Tyler.  
W. F. Bowman, best cow three years old and under four, Lady Fawnetta.  
A. C. Shelton, best heifer one year old and under two, Althea.  
A. C. Shelton, best heifer calf, Rosette.

#### CLASS 11—THOROUGHBRED SHEEP.

E. W. Woolsey, best Spanish ram; E. Mills, second best.  
E. W. Woolsey, best five Spanish ewes; E. Mills, second best.  
E. Mills, best five Spanish ram lambs; E. W. Woolsey, second best.  
E. Mills, best five Spanish ewe lambs; E. W. Woolsey, second best.  
R. H. Crane, best Shropshire ram.  
R. H. Crane, best Shropshire ewes.  
R. H. Crane, best Southdown ram; Geo. Bement, second best.  
R. H. Crane, best five Southdown ewes; Geo. Bement, second best.  
R. H. Crane, best five Southdown ram lambs.  
R. H. Crane, best Southdown ewe lambs.

#### CLASS 12—SWINE.

V. Sartori, best Berkshire boar.  
P. J. Shafter, best Berkshire sow.  
R. H. Crane, best Poland China boar.  
R. H. Crane, best Poland China sow.  
P. J. Shafter, best five pigs of any breed.

#### CLASS 13—PURE BRED POULTRY.

Mrs. Wm. Hill, best pair Buff Cochins.  
S. Shaver, best pair Plymouth Rocks.  
J. Bowles, best pair White Leghorns.  
S. Shaver, best pair Brown Leghorns.  
T. B. Carey, best pair Black-breasted Games.  
T. B. Carey, best pair Brown Red Games.

## STABLE AND PADDOCK.

## Turcoman Horses.

A small convoy of Turcoman horses, consisting of three mares and three stallions, was recently imported into France from Merv, the race from which they spring having, it is alleged, descended from the mares of Mehemet. It is stated that the prophet sent two of his mares to Mecca and two to Merv, those sent to the former places founding the Arab race and those to the latter the Turcoman. The fundamental qualities of these horses are, on the one hand, swiftness, and on the other, good disposition and endurance. Their constitution renders them fit for work under which other animals would sink, while, after proper training, they are frequently used by the Turcomans on the recurrence, the speed they attain being marvellous. They will travel from Merv to Khiva, about 270 miles, in four days, sometimes doing it in three, the weight of the rider and his baggage often reaching as much as eleven to fourteen stone, while the food consumed by the animals is very small indeed. The Turcomans and Arabs are careful in their inquiries when purchasing a horse, buying none without knowing all about its antecedents as well as its performances. Any anxious buyer putting searching questions to a seller on these points will find it the most difficult thing to secure what he wants without paying dearly for it, and especially in this case with regard to the purchase of mares. The two branches of this race of horses—the Arab and the Turcoman—are almost unknown to us, which is not to be wondered at considering the paucity of information existing with regard to them. The Arab is particularly remarkable for its stature and the harmonious elegance of its form, while everyone who is well acquainted with it admits that it possesses an immense force of concentration. The English thoroughbred horse has been said to be an Arab modified by climate, food, employment and breeding, and whose force of concentration has been substituted by a force of expansion which has given it a new form. It has preserved, observes a writer in the *Journal Pratique*, a grand moral power, but its body is so superior to the "wheels" weakened by elongation, are not capable of much resistance, and are fit only for the short runs of the turf, prolonged efforts being out of the question. The Arab will carry heavy loads for considerable distances: his brother, the Turcoman, will carry quite as heavy burdens and just as far, besides going over the ground more quickly. In his appearance the Turcoman recalls, more than the Arab, the English horse of the present day. He is light, has an elegant body, and although the limbs are long, the general structure has a solid appearance. There is a considerable distance from the neck to the tail, and no horse exhibits longer lines or a more complete indication of activity and real energy. Its ribs are large, well sprung and neat, its muscles strong, the whole form and movements of the animal testifying to the fact that it is one pre-eminently useful where great and sustained activity is required. In providing his horse with excellent lunge the breeder of the Turcoman has had the good sense to give to him, in addition, limbs, of which he makes careful and good use. He takes long strides, thus covering much ground at once, and in this way he will run as long as desired. While, however, he is a good animal for hard work, and will not stick at difficulties, it must not be forgotten that this obedience to the will of his owner is only brought about by a gradual and complete course of training. It is this type of horse which has been recently imported into France. The importers consider them to be most useful for breeding purposes, and they endeavored to have their admission entered in the Stud book, but the authorities seeing no mention of the Turcoman in a certain order of theirs made in March of last year, refused to enter it, much to the annoyance of the gentlemen referred to.

The temptation to see what a colt can do in the way of trotting, when first harnessed and work on the road, has been the ruin of many a promising young horse. After a horse has been taught to keep the road and can be urged into a trot by the driver, it is a rare one indeed who does not want to know what his prospective young steed can do, and the fact that he might be a wonderfully speedy fellow prompts the driver to try to make the discovery, and nine times out of ten the horse is more or less injured by the experiment. A colt being trotting bred is assurance enough, in these days of apparent perfection in breeding, that it can and will trot a good gait if developed; but the time to try to develop that gait is not when it is in the most awkward position of its life, with everything connected with it entirely new and strange, and it is unaccustomed to be in honore as it is by the surroundings of harness and shafts. The first thing to teach a colt to make a good driver, is to strike and keep a good square gait and not to allow it to wriggle and weave as colts are apt to do when pressed to a faster gait than they fall into. While it is desirous to develop the speed of a colt, it should be remembered that it requires time to do it, and a more fitting place than on the big road in a heavy buggy or awkward breaking cart. Don't ruin the future horse by catering to the delusive idea of knowing what he can do before he should be expected to do anything.

Some time ago an English exchange reported the burning of a stable belonging to a tramway company and the destruction of a number of horses by the attendants not being able to release them before they were destroyed. It is also suggested the idea of devising some plan whereby, in case of fire, all the horses in a stable might be set free by the turning of a handle or moving of a bar on the outside of the stable. The suggestion is a good one and one which is certainly not impracticable, and might be experimented upon by some of our horsemen or even farmers who are in the habit of keeping large numbers of horses in stables during the winter season. There are enough horses perish in fires in the United States in a year to pay for a great many such contrivances, not to say anything about the suffering it would prevent, which should not be the least part of the object of such an appliance. In building stables and barns the egress is generally overlooked, which should not be the case. Some way of getting horses from a stable should be made, and it often can be done at but little expense.

No domesticated animal is subjected to such severe usage, when old age has come to it, as the horse. It is made to take a full share of the team work, as when in best of vigor, and travel all day beside the young and supple; and further than this, if there is an ill-fitting collar or harness the old horse must wear it, for the day of taking pride in his appearance is past. This usage, with the stable neglect, which is likely to follow, the old servant is jaded out and dickered off to some inhuman master who soon pounds him out of existence.

## One Reason for Breeding Good Horses.

While in a large city—one noted for its good horses—not long since, I was sitting at a hotel idling away an hour or two waiting for a train. Sitting near two or three gentlemen I plainly overheard their conversation, and being compelled to listen to them I soon discovered that they were large horse buyers. They were evidently viewing the field over, preparatory to making trips into the different parts of the country to invest in as good horses as they could find for heavy hauling and light driving purposes. Each one seemed to understand his business thoroughly, and during their conversation it was plain to be seen that they all knew where the best of each class of horses were to be found. One asserted that he would pay \$50 more for a horse coming from a certain district than for one coming from any other point, for he knew that for the past ten or fifteen years there had been several noted stallions used on the stud in that district, and the influence of these stallions could be plainly seen on every horse in that district. The argument being produced by another that all the horses were not likely to be descendants of these horses, he admitted that fact, but contended that there was not a young horse in all that country but what was better on account of these horses doing service there. He claimed that the farmers who had not used the horses he referred to were influenced by their good work, and that they all took more pride in their horse stock in consequence of it. Another asserted that he had three points in the country which he visited annually and semi-annually, and at which places he paid out each year thousands and thousands of dollars for horses, that he supposed he never would have visited in the world if it had not been for the influence of a good stallion or two that had been in service at these different places for several years past. These remarks set me to thinking, and I have not thought of the breeding and raising of horses since without recurring to this. If our city buyers and horse buyers in general watch the matter this closely, then why not attract their attention at once by introducing good horses. If we can find a profitable market for our good horses the stock of poor horses will in time wear out, and it need not be long until we can have an improved set of horses without any exceptions. The fact that we can get good prices for our good horses is no reason why we should sell them all, but we can get more money out of them, and still retain a part for breeding purposes, than if we were to sell a larger proportion of scrubs. This is a matter of importance, and affects every one more or less who owns a horse. I hope to see the day when horse buyers will not have to study the field over so carefully and select a few points out of a district which ought to furnish enough first class horses for all the cities in the United States.—*Pittsburg Stockman.*

## Horses vs. Cattle.

Having been watching the markets for some time, and seeing that the prices for the former are increasing while the latter are steadily decreasing, I have thought that it would be a good way for farmers to keep for their own use on the farm none but good-sized draft mares. It is known by all that a mare can and will do about as much work as a horse and raise a good colt beside. In raising colts one has to be a little more careful than with calves, but when it comes to stabling one can put about as many colts of same age in a shed as calves. The cost of raising a colt will not vary far from that of a calf, except when it comes to stall-feeding cattle, when they will need and consume about twice the amount of corn to fatten them as it will require to keep the colt in good order.

Then when it comes to the disposal of the horse one can always get about twice as many dollars for a good three-year-old colt as for a steer of the same age. It is very true, though, that if you have a hip-knocked down or an eye-knocked out, the colt will not bring any more than the aforesaid steer. For a steer will make just as good beef without any eye as with one. But would it not be best for farmers not to raise too much of any one thing? And the time has about come when the over-production of wheat and cattle is not far off. Would it not be well for many farmers that are just commencing to begin with a few good brood mares, and raise some fine colts and get a nice price for them, than for all to raise a few colts and a great many calves? One of my neighbors sold two three-year-old colts last Winter for \$450, or \$225 per head. Now a good Shorthorn steer three years old past, ready for market, weight 1,700 pounds, would only have brought \$85. I think this a good showing in favor of good blooded horses.—*Pittsburg Stockman.*

An exchange contains the following practical views concerning shying horses: The practice in vogue among nine-tenths of the human family with horses that shy or scare at some unnatural object at the road-side, only makes the horse worse instead of causing him to forget the habit. When the horse pricks up his ears and begins to show signs of fright, the common practice is to rein his head directly towards the object which has caused his fright, and ride or drive him right up to it. Often the lash is used severely to enforce this, and the poor, trembling beast is made to walk right up to the object, be he fear what it will. This adds doubly to the frightful impression first formed and rivets it to the animal's memory, and instead of being broken of the habit, it becomes worse and worse every time this is repeated. The best way to get a horse to quit his tricks, is to use every possible effort to divert his attention from whatever he takes fright at. This is done by tightening the rein next the object, then drawing hard on the other, thus bringing the head round in the opposite direction and causing him to look away from the scare-crow. By practicing this method it will be seen that the animal is made to forget the object of fright. A saddle horse may be broken of the pernicious habit in this manner with ease. Driving horses are not so easily managed, yet it can be done.

Big head is usually due to ill-health, and especially consequent impaired nutrition of the bones. Feed well on boiled oats and barley, allowing little hay, and that cut and damped. Work very moderately. Rub the swelling with a mixture in equal parts of iodine and mercurial ointments, repeating this daily, and suspending it only when there is much irritation. Give daily a tonic ball or powder containing the following ingredients:

Carbonate of iron,	2 drams.
Bi-carbonate of soda,	2 drams.
Powdered gentian,	4 drams.

Horses are not injured by labor any more than men, and it is only by exposure, over exertion and neglect that they become jaded out at a time when they should be in their best condition for usefulness. When men learn to be humane for the blessings that come from it, which is always a paying incentive, in both the satisfaction it affords and the money profit, there will be less "scrub" horses in our country. A horse should not be old until he is twenty at least, and there are many instances where they have kept their vigor far beyond these years in the hands of careful masters.

It is said that a breed of trotting oxen exists in Hungary, with extra long legs, and that they can travel ten miles an hour. I would like to witness that improbable feat. The fleetest in our country are the red ort in Connecticut, supposed to be a high cross of the Devon. A pair of these is occasionally found that can trot six miles easily in a single hour. The Hungarian oxen are white or light gray, and have long straight horns, instead of curving gracefully up like those of the Devon.—*Sandila.*

## POULTRY.

## Concerning Poultry Disease.

Causes.—With some things in life the effect is so far from the cause that we are often driven to our wits' end to find the connecting link, but where poultry diseases are concerned, cause and effect are not far apart. When disease first appears among a flock of fowls the poultry keeper ought to at once ascertain and remove the cause, for it is almost useless to doctor sick fowls if the conditions which produced the disease are kept undisturbed.

Filth in some form or other is the prime cause of some of the worst ills that afflict chicken flesh, and it surely aggravates all poultry diseases. This filth may be in the air, or it may be in the food and drink, but wherever it is, or in whatever form taken in the system, it will surely cause disease.

Dampness is another direct cause of disease. It does not hurt fowls to run about in the rain, provided they have a dry house to go to when they get tired of paddling about in the wet, but it does hurt them to roost in a house that is always damp. The poultry-raiser who keeps fowls in damp houses must expect to fight roup, canker, colds, sore eyes, diphtheria, gout, rheumatism, consumption.

Roosting in draughts is also responsible for many of the ills enumerated above. Fowls that roost in the tree-tops right through the Winter never take cold; it is the current of air that comes through some crack or crevice and strikes the fowls while on the roost that causes the mischief.

Strange fowls sometimes introduce disease into a healthy flock. The careless poultry-keeper buys a breeding cock, or perhaps a few hens, and at once turns them loose among his old stock; in a short time there is an outbreak of roup or cholera, and "nobody knows where it came from."

Lack of vigor on the part of the breeding cocks, or hens, or both, is the one great cause of taking off many chicks and young fowls.

Lice often kills chicks outright, and while they may not actually kill older fowls, or even cause disease, it is quite certain that fowls whose vitality has been lowered by the loss of blood consequent upon the presence of lice in great numbers are the first victims to any poultry disease that comes along.

The "ounce of prevention."—The ground location of a poultry-house must be well drained, either naturally or artificially, and the house itself must be well lighted, well ventilated, large enough to accommodate the desired number of fowls without crowding, warm in Winter, cool in Summer, and thoroughly clean at all times. The fowls are to be of healthy stock to begin with, and only the best kept over each year for next season's breeders. Fowls that are very much over or under size, those that seem "weakly like," and those that have recovered from an attack of roup, cholera, or any serious disease should never be used as breeders. Let the food be fresh and wholesome and sufficient in quantity to keep the fowls in good condition. Under-feeding and over-feeding should alike be avoided. Shrunken grain may be used for poultry food, but musty and mouldy grain and sour meal should not be fed—especially in warm weather, and never unless it be well cooked. Keep pure water where the fowls can have access to it at all times, and the poultry house should never be without a supply of gravel, lime, and charcoal. Fowls and chicks must be kept free from lice, but to accomplish this too severe remedies must not be used, especially upon chicks. Every year the old "lard, sulphur, and coal oil" remedy for lice goes the rounds of the agricultural press, and it kills more chickens than it ever cures. When strange fowls are brought upon the premises, no matter if they come from the yards of some "noted breeder," keep them apart from the other fowls until you are sure they are all right. Do not dose your fowls with any of the preparations so extensively advertised to "keep fowls in good health." I speak from years of practical experience in caring for poultry when I say that fowls can be "kept in good health" from the time the chick leaves the shell until the grown fowl is sent to pot or to market, without administering one drop of medicine. Unless some contagious disease is present among the flock or in the immediate neighborhood, preventive medicines are worse than useless. Close attention to all the wants of the fowls, and also to the sanitary conditions of the house and yard, will do more toward preventing disease than all the poultry pills, powders, tonics, etc., in the universe.

The "pound of cure."—Loug experience as the "family doctor" for all the poultry flocks in the neighborhood, has convinced me it don't pay to fuss much with fowls that are really sick. In the *Prairie Farmer* of July 5th, T. D. B. says: "When a chicken is noticed to have anything wrong with it that we do not understand, it is immediately killed and buried very deep," and I can recommend his method as the quickest, safest, and surest way of doctoring sick fowls. As he says, you may kill chickens that would be all right in a few days, but the farmer or poultry-raiser who keeps fowls in large numbers cannot afford to run the risk. When the disease is suspected or known to be roup or cholera, let the killing of the affected ones be followed by a thorough disinfection of the premises, and a daily use of disinfectants until several days after the disappearance of the last symptoms of the disease.—*Prairie Farmer.*

If there is one season more than another in which the stables require to be kept clean and neat it is during the heated term. The heat causes the ammonia to rise more freely, the filth attracts a greater number of flies, which annoy the horses, and everything seems to combine to make a stable detestable which is not kept in good condition. White-washing the walls and stalls and scattering lime about where the manure accumulates and where the horses cannot lie down upon it will be found beneficial, and it will have the effect of driving away the flies.

FISH.

On Snuday last, the Walton Fishing Club held their last trip for the season, and we had the pleasure of partaking of their hospitality. The occasion was marked by the usual merriment among the members, and kind attention to visitors. After starting from Washington Street wharf, at the official hour, all dispatch was made to Alcatraz, where fishing commenced immediately, and was very successful for an hour or two. This time. Dr. Hughes and ourselves managed to capture the prizes for first and second fish, but it was a combined plot, and executed so deftly and successfully that we do not intend to give the thing away. Brother Barry, who is the only man in the crowd, tried his best, or worst, to keep the second fish from us, but we got away with him. In counting over the six-bits, all in ten and five cent pieces, we found the amount short five cents, and two bad coins. It remains for Brother Pitcher, the Secretary, to rise and explain, as he was custodian of the coin. The lunch, under the supervision of Commissary John Muller, was magnificent, the ducks and coffee being the best we have tasted for a long time. The remnant of the pickle supply, also very fine, was immediately confiscated by Brother Fogg. This time he did not risk detection and exposure by putting them in his overcoat pockets, but like Napoleon the Great, took them by right of conquest, or in other words because he got his hands upon them. What a liking for pickles Brother Fogg has, to be snre. After lunch we had to wait quite a time for the breeze, which we devoted to a nap, while others enjoyed an open-ocean swim. When we did catch the breeze on the edge of the channel, it came to us lovingly and gave us all we wanted. Good lord, how the Elia did jump and back coming home; but she is a grand sea-boat for all that. On reaching the line of wharves the wind died out, so the usual sail to South San Francisco to see the jolly Brother Baile home, had to be abandoned. This did not annoy us for our seamanlike stomach was quite disorganized all day, and we were well pleased to get on terra firma for good. Altogether it was a most pleasant, fraternal, jolly day, and everybody, not sea-sick like ourselves, enjoyed themselves hugely. We often wonder whether any mortal man suffers on the water as we do. Nevertheless, for the many kindly acts of the club to us personally, we bid them all a most cordial farewell until next year, when we again hope them the same happy band of brothers as ever.

Seining Lake Temescal.

Last Friday we joined the members of the California Sportsmen's Club, Messrs. Lohse, Mitchell, Adams and Deniston, to witness this operation. The catch amounted to about 600, the fish being small. If large fish are to be caught, the lake must be seined at night. Two moderate-sized fish were caught with smaller ones in their month, and the houses all smashed ready for swallowing. This shows conclusively where the small fish go to. The club seined the lake again last Thursday. The stock taken goes to Lake Merced.

A gentleman who lately returned from the upper Sacramento, states that Chinamen make a practice daily of using giant powder to kill fish in the river near where he was, more especially in the vicinity of the Sacramento bridge, above Redding, and near the Soda Springs. Great numbers of dead fish, which the Celestials fail to secure, can be seen in the river.

Of course they would not be Chinamen if they did not do this grievous rascality; neither would the law officers of the district be Americans, if they did not allow them to do so with impunity. How much do the Chinamen give to be left unmolested in their rascality?

An examination of Columbia river salmon statistics, shows that from the inception of packing in 1866 to the close of the season in 1884, nineteen years, there have been packed 6,310,658 cases, with a value of \$34,450,600. This indicates the enormous amount of fish that has been canned from the Columbia river, and salmon can now be found in every market in the civilized world.

If our sea lions were destroyed as they ought to be our coast supply of salmon would be doubled. Other fish accordingly. Our Supervisors might attend to this matter.

There seems to be an epidemic among the fish in the San Joaquin River and the alongs in the vicinity of that stream. The shore along the stream where the water has receded is found to be covered with dead fish of all kinds. The fatal disease makes its appearance in the shape of black spots found about the gills and body of the fish. Even gold fish in glass globes have died with it. So have the fish in the Sierra lakes near Truckee.

At Point Diablo on Sunday, Mr. Warters caught an immense number of large smelt, many going over a pound each.

The action of the Directors of the Spring Valley Water Works, in withdrawing the permit system is quite right, though it makes the just suffer for the meanness of the unjust. Their confidence has been shamefully abused by one or two men receiving their liberality, who previously stood very low in public estimation.

The Bay fishing has been better this week all round. From Oakland to Yellow Bluff good catches have been made. Some attribute this to the clear water in the bay. We imagine it was because the fish were in the humor.

Flounders are again biting at the Saucelito drawbridge. A party from the city last Sunday caught a nice lot, three of which weighed 9 pounds and over.

Trout fishing is beginning to wane, although the catches lately in different sections have been good.

THE DRAMA.

Vienna Gardens.

A remarkably fine performance has been given here during the week. In addition to the Spanish Students, whose music is ever agreeable and seems to lose none of its attractions for our people, the novelties have been Miss O. T. Kimball, direct from Boston, and the Nashville Students, also direct from the East. Both in their lines have made a decidedly favorable impression. Miss Kimball has a fine, clear, strong, musical soprano voice, thoroughly cultivated, which she uses with ease, grace and power. She is decidedly the best concert singer we have heard for some time, whether in operatic selections or ballad. The Nashville Students, in their line, are perfect. They modestly assert their ability to sing classical music, but their mission, they say, is to show us in actual life the children of bondage on the plantation. They do so most truthfully and efficiently—more so, indeed, than it was ever our lot to witness before. Their singing and acting are unexceptionally good. In minstrelsy, we have mostly buffoonery, in genuine negroes vulgarity. The Nashville troupe are colored people, but they act and sing with a cultivation and refinement that cannot be excelled. Their plantation mirth is so genuine and catching that one feels like giving a dollar to join them on the stage. Miss Sawyer is the soprano and Miss Walker, the comic genius of the crowd. She is wonderfully good. The horses have been large, and the encores warm and earnest. If Miss Kimball and the Nashvilles avoid repeating themselves all the time, as is too often the case, they will be quite successful. Mr. Walters deserves great credit for his enterprise.

Mr. Sawyer, who occupies the piano, is really a musical genius, an able and accomplished accompanist, always thoroughly faithful to the vocalists. He is also a brilliant executionist.

Montana Horse Ranch FOR SALE.

CONSISTING OF ABOUT 2,000 GELDINGS, Mares and Colts, 500 acres patented land controlling the water supply for many thousand acres of pasture, several thousand acres fenced and fencing material on the ground for some 15 miles more, good barns, corrals and comfortable house, Hay, Grain and supplies for one year, Farming utensils, Wagons, Harness, a few cows and everything necessary or required to carry on the business of horse or cattle raising on a large scale.

IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

The above cut represents the body-piece, the patent also covering the improvements in the hood. The following are the claims granted:

1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
2. The blanket or covering A, having the flap C, and the extensions B, to fit the fore and hind legs of the animal, front fastenings FG, and the permanent straps or bands E, substantially as and for the purpose herein described.
3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings FG, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.
4. The blanket A and hood J in combination with the elastic connecting-strip I, substantially as described and for the purpose set forth.
5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as herein described.
6. The improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands fixed to it to secure it around the body, where by the use of loose snarclines is avoided, substantially as herein described.

The right to make clothing in the United States will be sold on a royalty. Apply to the patentee,

## Scientific and Systematic Agriculture.

Address of President P. A. Finigan, of the State Board of Agriculture, delivered at the opening of the State Fair at Sacramento, Cal., September 11th, 1884.

### Directors and Members of the State Agricultural Society.

I feel constrained to pause at the outset of my remarks, to contemplate this new and splendid building, in which we now hold our 31st Annual Fair.

It is a pleasing duty for me to have the honor, as is customary, of inaugurating this building for the first time. For the purpose for which it has been erected, this building has a floor space of 124,000 square feet; comfortable standing room for the entire population of many of our larger towns.

In erecting this grand palace of industry, Sacramento has contributed \$40,000 and the State \$40,000, and the State Agricultural Society has erected a State building for \$80,000 that cannot be duplicated for \$100,000.

We had a large outlay in furnishing this building, and at the Park we have made improvements that are equal in every way to the best on the other side of the Rockies. It cost this Society \$50,000 for the permanent improvements this last year, and no honest minded citizen can say it was not needed, nor that the money was not judiciously spent. We point to the completed work with pride. The grandest results have been achieved with great economy of time and means.

This superb building, strong in all its parts, useful in all its departments, beautiful both in detail and general effect; this grand achievement suggests the subject of my annual address. As we have builded here so must we build our system of agriculture. We must and will establish in this State a comprehensive system that will embrace every variety of soil and climate, every interest; a system that will be permeated by intelligence, and conducted with skill; a system so complete in its parts that each will add strength to all the rest; a system that will give wealth and happiness to our people; a system that will continue to be progressive in development for all time to come.

But I must address myself to the matter in hand, with directness and plainness of speech, for we are here with a purpose.

How are we to accomplish the grand results already indicated? What are the difficulties to be surmounted? In answering these questions I can do little more than offer suggestions, and I beg you to understand, at the outset, that my aim is to stimulate the thoughts of those who are more competent to treat of these great subjects than I am. If I succeed in doing this I shall be more than satisfied. You will pardon me therefore if my address seems fragmentary and incomplete.

Let us begin with the soil. The soil of California is naturally rich, and it possesses remarkable recuperative powers. Heretofore we have gathered from the virgin soil great crops without the exercise of much intelligence or forethought. But already we see signs of decreasing vigor in the overtaxed soil, and that means without timely aid, the speedy decay of agriculture. Human greed may destroy, but alone, it will not lead to intelligent success. Farmers may conceal the fact of soil impoverishment, that they may sell and move to fresher lands, there to repeat their efforts at destructions, but such men cannot build up agriculture, and they are enemies of the human race.

To the patriotic man who has brains enough to scorn the present success at the cost of future ruin, and who desires prolonged prosperity for himself and others, comes the question: How can I so use the soil that I may gain substance and yet prevent its impoverishment?

Do we consider this matter? Do we understand the subject? We know in a general way that to preserve the vigor of soil, we must give it rest: comparative rest by alternation of crops and positive rest by fallowing. But do our people fully appreciate the fact that this matter of soil rest lies at the base of all permanent prosperity?

If we are to have rest by rotation of crops, what change of crops can we have that will not impoverish the owner, while impoverishment of soil is prevented?

The answer involves the further subject of markets, and to whom can we go for practical information? The General Government does something in this direction in a vague way, by showing some of the probabilities as to marketable crops, but does not help us in this matter.

The University of California has published important information relative to the preservation of soils, but the information reaches but few people. But whether we are ignorant or wise, the fact remains, that there can be no brilliant or even prosperous future to a State that does not practice soil rest systematically.

Again. It is admitted that shallow tillage leads to heavy washing and gullied fields; that the plowing prevents this ruinous evil. It is also true that much of our soil is not productive for one or two years after deep plowing.

I do not state the reason, but the fact, and call your attention to the further fact that the subject of deep plowing has not received just attention. Ought not some competent person to be charged with the duty of giving these points exhaustive consideration? Can we reasonably expect to develop a true system of agriculture while we ignore these grave matters?

Again, how are we to recuperate the millions of acres already impoverished? We cannot do it by concealing or denying the facts. We have had quite enough of concealment, and now we must face facts. Our business is to build up, and we cannot do it by a wretched subterfuge.

The impoverished soil must have rest, and if we do not give it the soil itself will take the needed rest by refusing to yield crops. As an aid to rest comes in the practice of fertilization. But what do we know about fertilization, and where can we get manures? These questions have been considered somewhat at the State University, and that body has given valuable hints. They have told us how to use the ash of spent tan bark, and the lime refuse from sugar works, but these manures are not within the reach of many. We must settle down to the conviction that millions of acres of California land must be manured. And we must see to it, that some one be found to discover the proper manures, and to tell us what manure is best adapted to the soils that need it. This is not an easy matter in a State that has so many varieties of soil. But the work must be done, else we cannot recuperate impoverished soil, and without recuperated soil we cannot establish a fully developed system of agriculture. The difficulty is of a serious nature, but it must and will be surmounted.

Again, we have large tracks of alkali lands, which are in main non-productive, a situation that cannot be tolerated by a civilized people, who aim to establish a progressive system of agriculture.

At the University, the College of Agriculture has done much to show us how to recover these soils, and the University papers on this subject should be the bands of every farmer. Considerable alkali land has been recovered by following University suggestions, but unfortunately, little effort has been made to recover the larger tracts or even the small spots that occur on almost every farm. The knowledge now available on this subject is perhaps sufficient, but who will undertake the grand work of subjugating the vast tracts of alkali lands? I answer, that thousands will engage in this work when they discover that it can be done. Unfortunately in this as in everything else, our accumulated store of knowledge is not brought home to those who need it.

Again: Aside from that which is alkaline, we have large tracts of desert, so called. And yet a few trifling experiments have been sufficiently successful to convince the thoughtful and intelligent agriculturist that every acre of that so-called desert land can be put to profitable uses. Few know anything about these experiments; the actual facts are practically inaccessible, like a million other facts that everybody needs, but the other solemn fact remains, that the State of California, to do its proper work in developing a true system of agriculture; to do its duty in planting ten millions of people within its territory; to do its duty in establishing a high state of civilization on this Coast, must recover for human uses every acre of land.

Again: To accommodate the wants of immigrants and those who are seeking investment, the State should investigate and map out the natural divisions of soil, etc., so that every one may be able to know accurately the character of all the soils of the State. Such a work would save untold misery, numberless failures, discouragement of effort.

Bearing in mind our main object, namely the establishment of a comprehensive progressive system of agriculture, we come now to the crop problems.

The State of California is phenomenal in its comprehensive peculiarities. It has every variety of soil and climate known elsewhere in the temperate zones of this continent, with those of the semi-tropical regions.

Not to enlarge upon this point and to come bluntly to the matter that we are after, we ask: Can we positively affirm that we are raising on any given acre the crop best fitted to its powers?

Can we affirm that we are raising in this State the most profitable crops? If we are raising the crops best suited to our several soils and climates, and those most in demand, we may ascribe the fact to accident as much as to intelligence. We have neither considered the power of the soil, nor the real demands of the world's markets. What farmer can truthfully say that he cannot produce on his land crops

better adapted to his soil, and more profitable than those now raised by him? Is it not barely possible to say the least, that the "quinoa plant," the pyrethrum; the New Zealand flax; the ramic plant; the angola panic; the New Zealand salt bush; that cotton, sumach, sorghum; the large varieties of foreign forage grasses, and a large number besides, now unknown to us, may be better adapted to our soils and climates, and more remunerative than some of our present crops? Is it not possible that there are varieties of oats, barley, wheat, etc., that would drive out all the varieties now produced, by reason of their adaptability to our soils and climates, and make remunerative returns? We do know that the seeds now in use have superseded other seeds, and the fact suggests a probability of further improvement.

But after all this must be a continuous work, it can have no end until the seeds of the world have been tried; each variety must be tested in the several soils and climates, and the conditions of success or failure must be positively ascertained. In the East anything that will succeed in a given place, will also succeed in any other place within, say, five hundred miles. Here a plant that may be successfully grown in one place may be unfitted to the soil and climate of another place fifty or even ten miles distant. Successful experiments have been made, but we know little, because we do not know the conditions as to soil, climate, culture and treatment.

But this much you will all admit, namely, that we cannot consider our agriculture developed to a high state until we produce the crops best suited to our soil, climate and market; that fact cannot be established without elaborate and careful experiment.

Then, I say, in the name of our common humanity, let the State and nation expend its millions in true experimental work, for in so doing they will hasten the day that will find on this Coast a comprehensive and ever-progressing system of agriculture.

But I must particularize somewhat in the matter of crops, for the purpose of impressing upon your mind the necessity of experimental work. Much attention is now given by our people to the subject of wine production, especially the production of claret grapes, and we are spending vast sums of money in the advancement of this interest. Is it not probable that our people are planting grapes on soils that will not produce what they expect? Experience as well as the investigation of the Viticultural Department of the State University, answer this question affirmatively, by facts that cannot be denied. I will not go into the details of this subject, as the Viticultural Commissioners and the State University have done a work in this direction that cannot be overrated.

This variety of soil and climate, giving to the same grape a decidedly different composition, according to the peculiarities of localities, pushes to the front the unmistakable fact that as good wine can be produced in California as elsewhere, only by blending of different varieties. What grapes can be most advantageously used in blending is the question of the hour. As yet we do not know. And few know the fact that with but two or three exceptions there is no one variety of grape that will of itself produce the best wine. Aside from these exceptions the best wines of Europe are produced by blending. Their advantage over us in this respect is found in the fact that they know by long experience what varieties to use in blending. Much is expected in this line of experimentation from the work of the College of Agriculture, now in progress upon the farm of the Hon. J. T. Doyle, in Santa Clara county. These facts are mentioned to show that the peculiarities of California more than ordinarily require special investigation, and careful consideration, and that we have the talent among us requisite for successful experiment.

The same line of thought may be taken with reference to all the fruits, etc.

Without pursuing the discussion of the crop problem further, I desire to call your attention to another matter closely related, and of grave importance.

Great losses occur because of the excess of production in certain lines. Our people are apt to run in one line, producing the same crops, thus reducing the price. And no system of agriculture can be regarded as highly advanced until this evil is remedied. The remedy can only be found in intelligent and reliable crop reports. If some competent person could be found who would give his entire time to a consideration of probable and possible production, with careful deductions therefrom, as to the best crops for a given season, he would add immensely to the prosperity of California. And we may feel quite certain that a wisely developed system of agriculture will include thorough work in this direction. The necessity of this is so obvious that an Association

Fruit Growers has already been formed for this very purpose.

Other subjects press upon us, but they can only be alluded to.

Insect pests and fungi are beginning to attack our grain, orchards and vineyards, and Messrs. Chapin, Cooke, Behr, Herkness, and others have done good service in studying these subjects. Indeed, I may safely say that in fighting insect pests California already leads the world. But I feel constrained to say that more elaborate work is needed. We must meet the wants of a progressive system employ the best talent the world can produce. We need accurate teaching, not only about the nature and habits of pests of all kinds, but also as to the best, safest, and most economical methods of applying insecticides. Without profound practical instruction in these matters we will be at the mercy of pests. If we can call on the State to defend our fields against savage tribes of men, why not expect the State to defend us against the pestiferous armies that are even more destructive?

A true, progressive, comprehensive system of agriculture must include forestry; the introduction of hardwoods; the production and preservation of timber for lumber and fuel; the growth of trees as wind breaks, and tannin bearing trees for manufacturing purposes.

The subject of forestry must be studied originally in this State. The cutting down of primitive forests does not involve the same consequences as in Eastern countries, where denudation is followed by sudden floods and prolonged drought, because our denuded mountains rapidly produce a covering that is quite as useful as the forests that they succeed. But the lumber problem is as important here as there.

In relation to the tannin bearing trees, I find in the Bulletin of the Professor of Agriculture of the State University, an important beginning of this discussion. I find there that there are many trees now successfully grown in California that are rich in tannin. I mention the fact to show you that we are already doing something in the line of that progress that will lead eventually to a comprehensive system of production that will place California at the head of progressive States.

I will not discuss the problems that are involved in the production and preservation of the highest types of domestic animals, but pass on to a very brief consideration of another matter that lies at the very root of a well developed, comprehensive system of agriculture. I refer to irrigation.

In many localities irrigation is not an absolute necessity. Nevertheless I am convinced that there is no part of the State that would not be the better for irrigation, while it is certain that there are immense tracts of arable land where irrigation is absolutely necessary. On the whole, we may safely say that the productiveness of California cannot be commanded without such a system; that it is necessary to enable us to control droughts in places where irrigation is not generally needed. Many systems will spring up, and in the future the waters of Lake Tahoe will undoubtedly be distributed through the Sacramento valley and the Bay counties. There will be local systems of reservoirs, wells and canals, and systems more general, of which I need not speak, but there will also be special problems demanding solution, as we may even now see in the valuable work heretofore done in this young State. Many wells, streams and lakes will be found to contain material in solution which will be found upon precipitation to be either very injurious or beneficial to the soil at certain times, as the case may be, and must therefore be studied. I can only suggest the problem, and re-assert the proposition that a comprehensive State system of agriculture require systematic irrigation.

I have now outlined the numerous problems, upon the solution of which depends the future prosperity of California. Each one of them presses upon us with nearly equal force, and the people of this State must see to it that they all receive the required degree of consideration. Without a solution, our system of agriculture must continue to be fragmentary, and to a large extent accidental, both in its methods and results. With a just solution will come a degree of prosperity that will place California in the van of all the States.

I started with the proposition that it is our duty as intelligent, forehanded people, to establish a system of agriculture adapted to the wants of a great people, and commensurate with the capabilities of our State; a system capable of progressive development for all time to come.

I then briefly enumerated the several difficulties that lie in the way of such an achievement, and which must be surmounted before we can accomplish much in the desired direction.

And I come now to the question of ways and means. What can be done to surmount the above named difficulties? In general, I answer, that in the natural course of things, a progressive people such as ours will surmount the difficulties named, and many more, as a matter of course—within the next thousand years.

But who among you is willing to leave the grand consummation to the influences of the general drift towards high development? Certainly not the men who, within a period of 35 years, have built a great State. For such men to discern a desired end is to act. No! delay is not for us; rapid execution is both our duty and to our taste. What then is needed to enable us to overcome our difficulties, and establish the desired system of agriculture?

First of all we need knowledge: accurate knowledge, knowledge that can be tried without distrust. It is but little use to tell us that A. B. succeeded in producing something in a given place. What were the conditions of his success? What was the nature of the soil? The climate? What were the conditions of moisture and cultivation?

In short, we need experimental work of the highest order; practical experiments by individuals and by the State. We must have experimental work in the different soils and climates. This knowledge accurately ascertained must be gathered up, sifted and preserved by the highest scientific ability. It must be examined, tested, until there can be no doubt that absolute facts have been obtained.

Of such knowledge there is but little—there must be more and from the highest authority obtainable. In most instances the experiments of individuals have been useful only to those who conducted them.

Without such knowledge about the several matters already discussed, improvement in agricultural methods must be slow and exceedingly expensive. Indeed, any kind of rational progress without such knowledge is practically impossible. If we are to make the progress desired, the State and nation must expend their money freely, though wisely.

I cannot let this occasion pass without calling your attention to the meagre, and to my thinking, parsimonious appropriation by the Legislature of this State, for the benefit of the State Agricultural Society. In view of the acknowledged great good that this Association has accomplished for the

State at large, in stimulating and fostering every vital interest and resource within our boundaries; in quickening and encouraging the inventive genius of our citizens and mechanics; in directing the minds of our agriculturist, breeders, artisans and miners to better and improved methods; in the recognition and substantial reward of progress and improvement in every direction, I must be allowed to say that the pittance of some \$7,500 per year, oftentimes grudgingly allowed by our legislators, is totally and ridiculously inadequate for the bare necessities of the case.

The Legislature of a State is legally as well as in popular estimation, supposed to be the true voice of the people, but I may be allowed to say, without intending any personal offense, that in this particular matter our Legislature is not the proper mouthpiece of the people, and misrepresents the real sentiments of the people of California. If you will forgive the seeming egotism, I have mingled with the people, representing every section, locality and interest in the State, and I know from personal knowledge wherof I speak. The strange timidity of our legislators in dealing liberally with the State and district associations is in no wise justified by a large majority of the people who send them to the Capital of the State as their representatives. I venture the assertion boldly that the Legislature might quadruple the present appropriation, and more nearly represent their constituents than they do now, from the simple fact that all classes have a positive and correct conviction, that a larger return is made to the State for the money expended in this, than in any other direction, and consequently it is a tax that they willingly and cheerfully bear.

The President and Board of Directors feel that they have a right to ask for larger annual appropriations for the benefit of the State Agricultural Societies, not only on the ground that the highest good of the State demands it, but also upon the personal ground that they are the largest individual contributors to this public fund for the advancement of public and State interests.

I do not say it for myself, but for my brother Directors that they do more work and of greater personal sacrifice for the public good than any other body of men of which I have any personal knowledge. I suggest that it is no mean tax that a members pays when he cheerfully travels from Los Angeles county or some other equally remote, at his own expense, and to the neglect of important private enterprises to attend the frequent meetings of our State Board, and yet this is the mere recital of a fact. Have the members of this Board then a right to demand that the State shall be equally liberal? Please bear in mind that we are not beggars, asking alms for "sweet charity's sake," but as administrators of a public trust confided to us, asking for the means to discharge our duties according to the expectations and requirements of the people. Grain shippers and all others seeking true information in regard to the true amount of the different crops of each year, will do well to put themselves in communication with the Secretary of this board before coming to a conclusion as to the actual amount raised each year. The Bull and Bear element that often work great hardship to many a well regulated house have no standing with this society. The Bulls we keep on exhibition at the park, and the Bears keep a respectful distance in the mountains. Therefore, I say, without fear of contradiction, this society is the place to get true information of all the crop products of this State. Pardon me if I have drifted away from experimental farming, or as the Rev. Henry Ward Beecher terms experimental farmers; the fools that make wise men rich. With your kind indulgence, I will only make a few more suggestions. The State Agricultural Society, the Viticultural Commissioners, and the Boards of Silk Culture and Horticulture have also done good work in this direction.

It is still better to publish frequent bulletins, containing a report upon, and a discussion of single points. It will also be well to prepare and publish simple and plain agricultural primers, containing the results of experimentation, thus carrying the work into families and schools. It will be desirable to educate our school teachers with a view to similar instruction. But we must go further and carry this work home to neighborhoods and individuals, by personal instruction and correspondence. Every farmer must be induced to submit his questions directly to the source of scientific knowledge.

In addition there will remain a vast amount of valuable work to be done by the State Agricultural Society; a bureau of agricultural and labor statistics; the district societies; the several State commissions; the State Grange and the press. I shall not dwell upon the work to be done by these agencies, because it is more obvious than that already considered somewhat in detail. But we must increase our efforts to unite all these agencies in active, hearty co-operation. Hitherto our efforts have been too widely scattered, and we suffer from consequent delays and obscure methods.

With this distribution of labor, and co-operative spirit, we can make stupendous progress in a very short time. A few years will see the progressive development of a comprehensive system of agriculture that will enrich our people, and add millions to our population, accomplishing in a comparatively short time what in Europe has required centuries to achieve.

Can we do it? Is success within the range of possibilities? For myself, I can holdly say, that I look forward with absolute confidence towards grand success. I know that the capabilities of our State give promise of all that can be desired. And when I study the character of our people, I feel still more confident.

Here in Sacramento we stand on ground consecrated by a degree of courage, intelligence and skill that inspires exhilarating hope. The ground upon which this beautiful city is built, was wrested from swamps; once it was destroyed by fire, once by flood. Its people have stood sentinel over threatening fires and floods for years. They have lifted the very earth upon which the city stands; they have withstood sudden depressions caused by heavy removals of population; they have successfully contended against fluctuations in values. And yet they have built a city that is the pride of California, with an assured future that gives absolute promise of universal comfort, wealth and happiness. Is there anything that such a people cannot do?

Look over the entire State and behold the grand work already done. Thirty-five years ago an army of boys came here with nothing but spades, picks and blankets. They were without money or State aid. They withstood heat and cold, drought, flood, famine, disease, and conquered in every fight. Behold, how they have made the desert to bloom as the rose. They have established towns, villages, cities, and a State. Order prevails, and prosperity blesses nearly a million of people. Can such a people fail in any enterprise that they may see to be necessary?

Behold then, boundless courage, quick intelligence, persistent energy, and pliant elasticity, side by side, with opportunity, and know that only success can come.

In the department of Fine Arts our course has always been progressive, year after year, we have placed on exhibition a representative collection of works produced in the State of

California. This year we open to you a new gallery; designed with the utmost skill of the architect, so that with an ample room and an unimpeded light, you may be able to discover more easily all the beauties of light and shade and color contained in the pictures on the walls. In all fairs throughout the State, there is no part more frequented by visitors than the Art Department. High and low; rich and poor; the educated and the uncultivated seem to derive an equal satisfaction from viewing, criticising and admiring the works of art offered for inspection.

This should be to us a source of great encouragement. First, because it is a sure indication of the natural refinement and taste of the community in which we live. Secondly, it is indicative of a state of prosperity in material affairs. The motto of all industrial communities is "business first, and pleasure afterwards," and the fact that so many workmen and business men can find time to examine and discuss works of art, argues a certain measure of success.

California has, in the comparatively short period of her existence, done a great deal for art, and I may say that she holds a high rank among her sister States for the number and ability of her artists, and for the generous patronage she has bestowed not only upon resident artists, but also on those of the Eastern States and foreign countries, but she has still a great work to accomplish in the future, if she is to take that place among the enlightened communities of the country, to which she will be fairly entitled by reason of her climate, her natural local advantages, her wealth, and general intelligence.

We have no lack of art teachers of greater or less capacity, but of school proper, but one—the California School of Design, supported by the San Francisco Art Association. This school has been established for twelve years. I have watched its progress and made myself familiar with its management since its commencement. It has undoubtedly done a good work. Pupils have attended it from all parts of the Pacific Coast, from San Diego to Victoria. The average attendance is between 70 and 80, though the roll sometimes mounts to upward of 100. About a dozen of the graduates are now studying in Europe, a number are following the profession in this State, and many are teaching the elements of art in schools and seminaries.

Without doubt the school of design has done much to create and elevate taste in this community. Hitherto the only branches taught have been crayon drawing and oil painting; want of means has prevented expansion. Means from some source should be supplied to enable the directors to supplement the present classes with others in modeling, water-colors, wood carving, etc.

A gentleman who has recently visited the Eastern cities after an interval of four years, an enthusiastic lover of art and withal an energetic, practical business man, tells me that the evidences of improvement in taste, mechanical and artistic, is everywhere so observable as to be almost phenomenal, and sees in it the color and designs of buildings, in the external architectural ornaments, even in the signs; in fact, all things external and internal.

This is real progress, and what we want to see in such palpable evidence of improvement in California. We want to carry the refining influence of art into the household of every farmer and mechanic in the State; judicious selection of color in the painting and papering of our houses, appropriateness of ornament, elegance of form and fitness of purpose, in our domestic utensils are indications of this grateful influence. It will come gradually, but I am sure it will come in time. Let us do what we can to hasten it.

Directors, members, and fellow citizens, to-day we leave the past behind us, and in this new palace of industry, we inaugurate a new era. Older countries may have had their golden age in the past, ours is in the future.

## TURF AND TRACK.

### Grinstead vs. Mortemer.

The Saratoga Commissioner of the New York *Spirit* writes:

"Regardless of how the proposed Baldwin-Lorrillard matches at Sheephead Bay may pan out, Mr. Baldwin authorizes me to make an announcement, which embodies a series of matches, to come off next year, and which is sure to attract as much attention as any of the fixed events for 1885. He (Baldwin) has four yearlings by Grinstead, and only four. These he will match against any four Mr. Lorrillard may select from his numerous lot of Mortemer yearlings. The distance of each race to be arranged by mutual agreement, and to be run over the track of the Washington Park Jockey Club, Chicago, at its June meeting. Mr. Baldwin will insist on this track as the scene of action. He claims that, as he will have to travel about 2,500 miles to get there, Mr. Lorrillard ought to be satisfied to go one-third the distance, and the Chicago course would be in the nature of neutral ground for each. That part of the proposition, it strikes me, looks reasonable enough. The amount involved in each race, as well as any matters of detail, to be arranged by mutual consent.

"In regard to the proposed matches at Sheephead Bay at the coming meeting there, Mr. Baldwin suggests this amendment, which doubtless will be accepted by Lorrillard, although it will not be insisted on: He (Baldwin) will make four matches instead of three, at a half-mile, five furlongs, three-quarters, and one mile. As he has only four two-year-olds by Grinstead, and Mr. Lorrillard has about a score of Mortemers, the latter has decidedly the advantage in such an arrangement. And then, Mr. Baldwin will not insist on arbitrarily naming any particular sum as the basis of each match, being satisfied that matter can be easily arranged by mutual agreement. He recognizes in the proposed matches a friendly sectional contest, and in that light he wishes the matches run. He seems satisfied he has the best two-year-olds and the best yearlings in the land, and he desires to test the matter in the way and manner proposed above, since the Mortemers appear to have the call just now, in being recognized as the champion."

Referring to this proposition *Vigilant* says: "As will be seen by reference to our Saratoga letter, Mr. Baldwin is thoroughly aroused by Mr. P. Lorrillard's expressed willingness to give him a match, as he is announced to us after the Stallion Stakes. We fear, however, that there is little prospect of a match this season. We broached the subject to Mr. Lorrillard during the past week, and that gentleman says that, now that the Monmouth Meeting is over, and he has turned out some of his Mortemers, he is hardly prepared to make a match, as it would interfere with the engagements he has made for those he will keep in training. Besides, he will meet Mr. Baldwin's colts in the Flatbush Stakes and Great Eastern Handicap at Sheephead Bay. As to the proposed matches in 1885, the pet of Grinstead vs. Mortemer, there is every probability they will be made."

The Oakland Fair—Closing Days.

On Friday, from early morning until the close of the day the weather was beautiful. Visitors from Los Angeles were a more contented look and thinner clothing, while Oaklandites claimed that it was only a fair specimen of the climate, and that cloudy mornings and chilly afternoons were anomalies.

The attendance in the afternoon was very good, probably double the number of people of either of the preceding days. The track was much faster than it had been before, owing to a thorough wetting the night previous and the packing of the soil by the feet of the animals in the parade.

The first race was a purse of \$800 for the 2:35 class. It was so generally admitted that Guy Wilkes would win that he was left out of the pools, and as the only other starters were Olivette and Colonel Hawkins the betting was limited.

The next race was a purse of \$400, for two-year-olds, the starters being Lohengrin and Stamboul. The pools chopped about in a wonderful manner. Stamboul was the favorite at first, then Lohengrin, but just before the start Stamboul brought \$50 to \$26 on the other.

Then came the 2:26 class, purse, \$800, divided in the usual proportions. The starters were Sister, B. B., Tump Winston and Scandinavian. Sister was an immense favorite before the start bringing \$250 to \$75 on the field, B. B., and Tump Winston and \$42 on Scandinavian, and quite a large amount of money went into the box at these odds.

On Saturday the first race called was the free-for-all, in which were Manon, Brigadier, Albert W., and Vanderlynn. Manon was a great favorite with the bettors, partly due to her capacity as shown in her race on Tuesday last, and a general feeling that she was both faster and steadier than her competitors, and also from the party which follow the fortunes of Goldsmith being willing to "back their opinions" with spirit and liberality.

On Saturday the first race called was the free-for-all, in which were Manon, Brigadier, Albert W., and Vanderlynn. Manon was a great favorite with the bettors, partly due to her capacity as shown in her race on Tuesday last, and a general feeling that she was both faster and steadier than her competitors, and also from the party which follow the fortunes of Goldsmith being willing to "back their opinions" with spirit and liberality.

On Saturday the first race called was the free-for-all, in which were Manon, Brigadier, Albert W., and Vanderlynn. Manon was a great favorite with the bettors, partly due to her capacity as shown in her race on Tuesday last, and a general feeling that she was both faster and steadier than her competitors, and also from the party which follow the fortunes of Goldsmith being willing to "back their opinions" with spirit and liberality.

front of Vanderlynn. Though it could not be said that the heat was in doubt, Vanderlynn trotted fast and was steadily drawing on Manon, and got his nose on her wheel as they passed the score in 2:22; Albert W. third, and Brigadier, who evidently did not fight for the heat last. The betting after the heat was \$100 on Manon to \$34 on all the others, and the result of the second heat established the fact that, long as the odds were, the handsome daughter of Nintwood was entitled to the rating. It is not necessary to go into an extended description of the heat. Brigadier essayed the task of heating Manon, while Vanderlynn and Albert W. were contented to watch the fight.

Sept. 6th.—Trotting, purse \$1,000, free for all. Manon, b m, by Nutwood, dam Addie—E. M. Railton, Goldsmith 1 1 1 Brigadier, b e, by Happy Medium, dam Lady Turner—J. B. McDonald 4 2 2 Vanderlynn, b g, by Geo. M. Patchen, Jr., dam by Joseph—W. W. Stov. Farrell 2 3 3 Albert W., b e, by Electioneer, dam by John Nelson—A. Walstein McConnell 3 4 4

Then came a special trot, in which were Twinkle, Cleveland, Nighttime, Sorrel Ben, Vulcan and Oscar. Twinkle was the favorite before the start, but inasmuch as the race was not finished, it is sufficient to state that Cleveland won the first heat in 2:32; Twinkle the second in 2:36; the third was a dead heat between Twinkle and Cleveland, in 2:33. Twinkle took the fourth in 2:33, when, becoming too dark to see the horses all the way around the course, the finish was postponed until Monday at 10 A. M. Oscar and Vulcan were distanced in the third heat. On Monday morning at 11 o'clock, the horses were called for the finish and Twinkle won the fifth heat and the race.

Same Day.—Purse, \$500; special for named horses. Twinkle, b m, by Echo—J. H. Tennent—Walsb 2 1 0 1 1 Cleveland, b g, by McClellan—L. E. Clawson Goldsmith 1 2 0 2 3 Nighttime, g g, by Rustic—P. J. Shafter—Shaner 3 4 4 2 Sorrel Ben, cb g, by Stockbridge Chief—T. Bergs Kennedy 4 3 3 4 Oscar, g g, by McClellan—Parker—Sperry 6 5 dis. Vulcan, cb g, by Bull Pup—J. Creely—Mooney 5 6 dis.

Fifth heat trotted Sept. 8th.

Suppressing Time.

That suppression of time is a growing evil on the trotting turf, is shown by the complaints which come to us from horsemen who have held their watches on National Association courses—circuit courses—saying that valuable seconds of time have been withheld at the request of owners. Now, this is not right. The object of giving the true time is to handicap and properly classify the horses. It may be a hard case for, say, John D. to be forced out of the 2:25 class, or Breeze Medium to be compelled to retire from the 2:27 class on the eve of the Grand Circuit; but if they were favored, it would be to the detriment of hundreds. The suppression operates unfavorably in other ways. For example, a mare that has shown her owner 2:23 on a half-mile track, is set out to engage on a circuit of mile parks. The owner does not attend the meeting, but sees by the Associated Press dispatches that his mare was beaten in 2:24. Filled with disappointment, he writes the driver for an explanation, and will scarcely believe that his mare was second in 2:23. We do not inveigh against the practice of taking the slowest of the two watches in case a horse is lowering his record, and the owner desires to be given the benefit of the doubt; but the favor should be "to this extent, no more." Something should be done in the matter. It has been suggested to us that a large timing movement should be set up in front of the judges, and its face turned toward the grand stand. When the word "go" is given, let this clock be set in motion in sight of everybody and stopped as the leading horse passes under the wire, and this time to be called on such horse if he is awarded the heat. Any subterfuge or plan such as getting a slow running watch in the stand, is to be condemned. We hope the day is not far distant when the National Association will appoint the official timers at all circuit meetings.—N. Y. Spirit.

The selling races recently at Monmouth Park have assumed a new aspect which tends to benefit the second and third horses, and in a measure partly compensate their owners for suffering defeat. Itaska was recently bought in at an advance of \$1,010 above his entered price, two-thirds of which, according to rule, goes to the second and the remainder to the third horse. On the 21st inst. Bahama, chestnut filly, (2), by imp. Mortemer, dam Notre Dame, full sister of Norfolk, by Lexington, was bought in for \$2,000, an advance of \$1,000 above the entered price. Same Day, Mr. J. E. Kelly's Clonmel, bay colt, (4), by King Alfonso, dam Britomarte, a full sister of Creedmore, by Asteroid, scored a victory and was bought in for \$605 above his entered price. Mr. Kelly and Barbee were the only two men not surprised at Clonmel's performance, and the former is said to have "milked" his fellow bookmakers for a large amount.—Turf, Field and Farm.

John Murphy lately drove Keene Jim a mile to harness on Mr. Bonner's three-fourths-mile track in 2:14; and on the same day Fred Bonner drove Lucy Cuyler a mile to wagon, in 2:15; neither performance gave the trotters' records, however. Keene Jim is a roan gelding foaled in 1873, got by Lookout, son of Bourbon Chief, he by Mambrino Chief. His dam, Laura Fair was by Rattler, he by Stockbridge Chief, son of Vermont Black Hawk. Keene Jim's record is 2:19; got at Morrisania, N. Y., Sept. 23d, 1881. Lucy Cuyler was foaled in 1874, got by Cuyler, he by Ryedyk's Hambletonian, dam by Harris' Hambletonian. The dam of Lucy Cuyler was by Alexander's Norman, sire of Lulu (2:15) and Kate Crockett (2:20), and he by the Mose Horse. Both Keene Jim and Lucy Cuyler are owned by Robert Bonner, the latter has been driven a half to wagon in 1:05 with her owner holding the ribbons.

Citadel, sire of imp. Glencel, was sold at Newmarket, England, recently, by the executors of the late M. T. Lee, for \$75. Citadel was foaled in 1859, bred by Lord Derby, sired by the emperor of stallions, Stockwell, dam Sortie, by Melbourne.

What Faith Did.

The Nashville Spirit of the Farm contains an account of the Tennessee mare Flash:

About two years ago, Major Campbell Brown found Flash in the hands of a farmer; she was dead poor, her owner having made a corn-crop with her, but having "laid by" his crop, he was glad to sell her to Major Brown for \$125. She was turned over to Mr. Bostick, Major Brown's trainer, with a lot of other "green" ones, to be broken to harness. Bostick worked her through the Summer and Fall, and she gradually began to improve in her gait, and when he stabled her for the Winter she could show him a 3:00 clip. As soon as the frost was out of the ground the following Spring he had the mare out and, to his delight, she went as though she had just taken her exercise the day before. From this time on she improved every time he drove her. Two-fifty, forty-five, forty, thirty-five, thirty were out of the mile successfully. Major Brown then decided to let her start in a race at the Lexington, Ky., fair. Here she made a record of 2:27 and the Major was offered \$2,500 for her. Not being engaged in racing, but simply in breeding and developing his trotters, he was disposed to sell, but was overpersuaded, however, by the earnest appeal of Bostick: "Just give her one more chance, Major," he urged. "She is a born trotter and I believe will be the fastest horse ever foaled in Tennessee; sell your Jersey cows if you want to sell anything, but let me drive the mare another season." The appeal was irresistible, and the Major declined the offer. She was not given another fast mile until just before going into Winter quarters. This Spring she came out in robust condition, and trotted over Maj. Brown's track early in the season in 2:23. At Bostick's solicitation Maj. Brown consented to enter the mare in the 2:27 class at Columbus, Pittsburg and Cleveland, but declined to let her go further (although Bostick had shown him 2:22 and the last quarter in :34). In her first race at Columbus the track was almost a quagmire, and she was not driven out. At Pittsburg she reduced her record from 2:27 to 2:20, trotting a dead heat with St. Albans. At Cleveland she again reduced her record, trotting the third heat in 2:19, the fastest heat of the race. She had the purse at her mercy but in the next heat one of her boots slipped over her knee, and she could not bend her leg at all, so that she had to run in to save her distance. This was her last engagement, and Bostick had orders to either come home or sell. Satisfied that his mare had not yet shown her speed, he sought an opportunity to give the public a taste of her quality. It presented itself by the owner of Clemmie G. offering to show for the entertainment of the visitors a fast mile; Clemmie to be accompanied by a runner hitched to another sulky. Bostick asked and obtained the consent of the officers of the association and owner of Clemmie G. to trot Flash at the same time. "I will not interfere with you gentlemen," he said; "I will stay behind, but if I am obliged to pass Clemmie G. and her runner on the last quarter, in order to show my mare's speed, I will swing wide on the turn and come down on the outside." Every one except Bostick thought the remark was made in a jesting spirit. Flash trailed the leaders to the half and then moved up on the runners' wheel. At the three-quarter pole Bostick swung the black daughter of Bonsetter wide out, and for the first time asked her for speed. In an instant she had passed the runner, and was forging ahead of Clemmie G., when the latter went to pieces. Bostick shook his whip over his mare, and she darted under the wire in 2:17. The rest is soon told. Mr. Rockefeller asked to have her driven to pole with Midnight; they showed him a 2:20 clip together, and he gave his check for \$8,000. "And this," said Bostick, as he showed us the draft yesterday, "will buy exactly forty Jersey cows at \$200 apiece."

Trotting at Portland.

CITY VIEW PARK, Aug. 31.—Trotting; purse \$100, provided 2:36 was beaten. Florence E., cb m, by Pathfinder, dam by Jack Miner, McManus 1 1 1 Kelly, rd g, by Hambletonian—L. J. Rose Miner 2 die

In the second heat Kelly foaled Florence E. at the first turn and lost a wheel; the mare jogged around, and no time was taken.

Roadsters Race at Vallejo.

Last Saturday a party of Vacaville road drivers repaired to the Vallejo track to settle the question of who had the best horse. The stake was \$25 each, and the result was:

Vallejo, Sept. 6th.—Trotting; purse and stake \$200. Cyclone, cb g—Newport 1 0 1 2 1 Addie H., br m—Hammers 2 0 2 1 2 Fox, cb g—Ducker 3 3 3 3 3 Maggie, cb m—Hall 4 4 dr

Mr. Pierre Lorillard heads the list of winning owners at Monmouth Park with 19 races and \$36,345 to his credit. The Dwyer Bros. come next with 12 races and \$24,590. They follow Mr. Kelso with 9 races and \$11,885, Mr. G. L. Lorillard with 11 races and \$10,985, the Clipseana Stable with 11 races and \$10,835, D. D. Withers with 5 races and \$10,735, F. Gehardt with 5 races and \$8,930 and Snedeker & Co. with 3 races and \$8,000.

E. Corrigan, of Kansas City, Mo., has offered \$2,500 for the he, foaled May 29, 1884, by Ten Broeck, dam Ballet, dam of Modesty, Blue Grass Belle, Balancer, etc., by Planot, out of Baloou, dam of True Blue, etc., by imp. Yorkshire. Mr. Geo. H. Clay, of Lexington, Ky., who owns Ballet, also has a yearling and two-year-old out of her, viz.: ch f, Thundercloud (1882), by imp. Thunderstorm, and h f, Lady Longfellow (1883), by Longfellow.

Gen. W. T. Withers, Fairlawm Stock Farm, Lexington, Ky., reports that the demand for his stock this season is considerably in excess of previous years and still increasing, which is not surprising, considering the success attained by the produce of Fairlawm representatives in all sections of the country from Maine to Oregon.

Blaylock, the crack jockey, has one of the noblest turnout at Saratoga. When he drives to the lake behind that magnificent Sheldahl it is a question who attracts the most attention—Vanderbilt or the knight of the whip and spurs.

Speaking of his relations with Mr. Vanderbilt, Billy Bair says he was used like a prince. "I received \$3,000 for two minutes' time and three-quarter seconds work at Cleveland, and a thousand-dollar note for my previous services with her this season."

Mr. Corbett's Guy Wilkes is the fifteenth stallion got by Geo. Wilkes to enter the 2:30 list. Eight of the fifteen had records below 2:24.

Fall Meeting at Coney Island.

The Fall meeting of the Coney Island Jockey Club began at Sheepshead Bay on August 30th. The following are the races run in which Pacific Coast horses participated:

August 30th.—Purse \$500; all ages; entrance 5 per cent. of purse (\$25) to second; 12 embs.; 5 1/2 furlongs. P. H. McMahon's br c Eachus, 2 years, by Reform—Nemesie, 69 lbs. (Higgs) 1 G. B. Buchanan's ch g Jim Renwick, 6 years, by Joe Hooker—Big Gun, 115 lbs. (Fitzgerald) 2 W. Jennings' b c Miller, 2 years, by Glengarry, 89 lbs. (Church) 3 E. Heffner's b c Markland, 4 years, 118 lbs. (W. Hayward) 4 W. McMahon's b g Charley Kempland, 6 years, 115 lbs. (McCarthy); F. C. Walton's ch f Woodflower, 4 years, 113 lbs. (W. Donohue); L. C. Beberman's b c Col. Morris, 3 years, 111 lbs. (Lewis); Blohm & Co.'s b c Little Minch, 4 years, 118 lbs. (J. McLaughlin); P. Lorillard's b c Exile, 2 years, 89 lbs., carried 92 lbs. (Olney); R. W. Walden's ch g Hart, 2 years, 86 lbs. (Rivers); and D. S. Baldwin's br g Ben Woolley, 4 years, 115 lbs. (F. McLaughlin), ran unplaced. Time, 1:06.

Pools: Little Minch, \$80; Exile and Jim Renwick, \$30 each; Eachus, Markland, Woodflower and Miller, \$20 each; field, \$30. Betting: 2 to 1 against Little Minch, 5 to 1 against Exile, 7 to 1 each against Markland, Woodflower and Jim Renwick, 10 to 1 against Eachus, 12 to 1 against Miller, 15 to 1 each against Hart and Charley Kempland, 20 to 1 each against Col. Morris and Ben Woolley. French mutuels paid, \$58 55.

Charley Kempland and Jim Renwick led, followed by Eachus, Exile and Markland; Hart, Ben Woolley and Little Minch being left behind. At the turn Miller took the lead. Eachus soon after passed Exile, and, following Miller, they made the race a match to the last furlong. As they began the last furlong Eachus headed Miller, but the youngster hung on well, and only in the last strides was he passed by Renwick, running on the outside. The result was that Eachus won by a neck, Jim Renwick the same in front of Miller.

Sept. 2.—Purse \$500; all ages; entrance 5 per cent. of purse (\$25) to second; winner of first race on first day (Eachus) to carry 3 lbs. extra; 8 embs.; three-quarters of a mile.

Blohm & Co.'s b c Little Minch, 4 years, by Glenelg—Goldstones, 118 lbs. (McLaughlin) 1 R. R. Owings' b g Mammonist, aged, by Buckden—Monomania, 115 lbs. (Conkling) 2 G. B. Buchanan's ch g Jim Renwick, 6 years, by Joe Hooker—Big Gun, 115 lbs. (Fitzpatrick) 3 P. Lorillard's ch h Herbert, 6 years, 118 lbs. (W. Hayward); D. D. Withers' ch g Duplex, 5 years, 115 lbs. (W. Donohue); F. T. Walton's imp. b h Suttler, aged, 118 lbs. (Evans); C. Askey's b g Ben Thompson, 4 years, 115 lbs. (Ford); and F. Fitzgibbon's ch f Sugar Plum, 3 years, 109 lbs., carried 110 lbs. (Sberidan), ran unplaced. Time, 1:16.

Pools: Jim Renwick, \$50; Duplex, \$35; Little Minch, \$15; Mammonist and Herbert, \$10 each; field, \$10. Betting: 7 to 5 against Jim Renwick, 11 to 5 against Duplex, 7 to 1 each against Little Minch and Mammonist, 8 to 1 against Herbert, 12 to 1 each against Suttler and Ben Thompson, 20 to 1 against Sugar Plum. French Mutuels paid, \$40.15.

Ben Thompson led, but soon after Little Minch showed in front and led by a full length at the end of the quarter, with Ben Thompson second, a length in front of Duplex. At the turn into the stretch Minch still led. Herbert and Duplex both came on, but they were beaten by Mammonist for the second place, Little Minch winning under the whip by a length, with Mammonist three parts of a length in front of Jim Renwick, he a head in front of Herbert.

Two City Handicap, a sweepstakes for all ages; \$100, b. f.; \$25 if declared by August 29; \$250 added; second to receive \$500 of the added money and 20 per cent. of the stakes; third 10 per cent. of stakes; winners after the announcement of weights, on August 25, of two races of any value, or one of \$1,000, to carry 4 lbs. extra; of two of \$1,000, or one of \$2,000, 7 lbs. extra; of three of \$1,000, or two of \$2,000, 10 lbs. extra; 82 embs. of which 59 declared; one mile and a quarter. P. C. Fox's b c Tom Martin, 3 years, by Longfellow—Athalric, 94 lbs. (Church) 1 G. Cook's b c Ferg Kyle, 4 years, by Rebel—Anna McKinney, 103 lbs. (Conkling) 2 D. D. Withers' b c Kinglike, 4 years, by King Eraset—Mimi, 115 lbs. (W. Donohue) 3 Apply & Co.'s b h Jack of Hearts, 4 years, 112 lbs., Hayward; Dwyer Broe' b g Checkmate, aged, 112 lbs.; McLaughlin; E. J. McElmeel's b b General Monroe, 6 years, 127 lbs.; Blaylock; W. L. Scott's ch f All-Hands-Around, 4 years, 97 lbs.; Higgs; E. J. Baldwin's gr b blk f Freda, 3 years, 109 lbs.; Arnold; Hayden & Co.'s ch g Gleaner, 6 years, 108 lbs.; Stoval; Callaban & Co.'s ch f Miles Brewster, 3 years, 94 lbs.; Billings; F. T. Walton's ch c Richmond, 3 years, 95 lbs.; Green; W. L. Scott's b g Referee, 4 years, 109 lbs.; Lewis; G. L. Lorillard's b c Thackeray, 3 years, 96 lbs.; Donohue; V. Hollar's ch g Plunger, 6 years, 97 lbs.; Camp; P. M. West's b g Levant, 4 years, 106 lbs.; Walker; P. Lorillard's ch m Pinafore, 5 years, 97 lbs.; Olney; P. Lorillard's b m Aranza, 6 years, 119 lbs.; Shauer; and Preakness Stable's ch g Euclid, 4 years, 102 lbs.; Fieber, ran unplaced. Time, 2:10.

Pools: Kinglike, \$50; P. Lorillard's pair, \$40; Jack of Hearts, \$40; Gleaner, \$40; General Monroe, \$30; Ferg Kyle, \$25; Thackeray, \$25; field, \$100. Betting: 5 to 1 against Kinglike; 6 to 1 each against Aranza and Jack of Hearts; 7 to 1 against Gleaner, 8 to 1 against General Monroe, 10 to 1 against Ferg Kyle, 12 to 1 against Pinafore, 15 to 1 each against Tom Martin and Thackeray, 20 to 1 each against Miss Brewster, All-Hands-Around and Checkmate, 30 to 1 against Freda, Referee and Euclid, 40 to 1 against Richmond, and 50 to 1 each against Plunger and Levant. French mutuels paid, \$21.40 on the field. After some skirmishing a crowd scampered off, and the jockeys were evidently under the impression that it was a start, as the judges were compelled to ring the bell in order to bring them back. When the flag finally fell, Kinglike, General Monroe, Levant and Thackeray got off badly, while Aranza was left standing. Richmond, Plunger and Jack of Hearts, Ferg Kyle and Euclid were well up at the start, and passing the stand, Richmond, Ferg Kyle, Plunger and Tom Martin were all in a bunch, with Jack of Hearts on the outside. In the extreme rear were Kinglike and Levant. On the turn past the club-house, Richmond and Ferg Kyle still led the others, as before, and, passing the turn for the backstretch, Freda ran up with the leaders. The California filly ran in the front rank for awhile, but Ferg Kyle was still leading at the five furlong post, where Gleaner's red jacket shot up to the front, amid cheers from his partisans. His ascendancy was short-lived, as, at "The Woods," Tom Martin was seen to dart in front, and led into the stretch. Whips were now flying, and the shouting and cheering was very great. Tom Martin, Ferg Kyle, Jack of Hearts, Kinglike and General Monroe were all hard at it. Kinglike ran very fast, but could never quite catch the light-weights, and although Church rode Tom Martin hard, it was not needed, as the colt had plenty left, and won by more than a length, Ferg Kyle second, a head in front of Kinglike, with Jack of Hearts, Checkmate and General Monroe next.

The match between Vincent Barnes' brown horse Little Alph, and John Adams' Beryessa mare, 600 yards, for \$1,000, was run at Sacramento last Saturday, and won by the mare by eight lengths. Time, 32 seconds. The betting favored the mare at the rate of \$15 to \$10.

Maxy Cobb trotted an exhibition mile at Hartford in 2:15, and a match with Phallas is among the probabilities.

YACHTING.

Pacific Yacht Club Annual Regatta.

The annual regatta of the Pacific Yacht Club took place last Tuesday over the Club course. There were only six entries in the following classes: 1st Class, Lurline, Nellie and Fleur de Lis, and 2d Class, Eva, Annie and Rambler. The start was fixed at 1 P. M., and at that time a light wind was blowing with a strong northerly tendency which continued through the day, although it veered somewhat more westerly but not at any time the usual direction for our Summer and Autumn winds. The starting gun was fired on time, and the first yacht to cross was the smallest of the fleet, the Rambler, which crossed the line at 1 01 12, carrying in addition to her working sails fore and main gaff topsails, staysail, jib topsail and water sails on both booms. Next came Annie, the flag ship, at 1 03 30, and after the Eva at 1 10 21. As the rules only allowed ten minutes to cross the starting line she lost 21 seconds officially. In the meantime Fleur de Lis and Nellie were jockeying for last place off Harrison street wharf, and Lurline seeing their actions kept chalking and waiting for them to catch up and as a consequence they were all behind the prescribed ten minutes, particularly so the Nellie, which gained her point of being last over by losing 3 minutes and 24 seconds actual sailing time and 1 minute and 16 seconds time on Lurline, and 11 seconds time on Fleur de Lis. Nellie carried a main gaff topsail with a small boom on the after end, thereby getting more sail area than possible with an ordinary gaff, and also had on the same addition to her main jib, that she carried in Monterey Bay, which we believe the inventor calls a "catch all."

The only change to Hunter's Point, in the order of the procession, was that Nellie passed Fleur de Lis and rounded this stakeboat, 1 minute and 14 seconds ahead of her and only 48 seconds behind Lurline. From here to Oakland Bar Nellie still gained on both her rivals, rounding this stakeboat only 15 seconds astern of the keel boat, and 2 minutes and 10 seconds ahead of Fleur de Lis, while Annie had passed Eva and Rambler and was then leading the fleet. All the kites came down at this point in quick order with the exception that Lurline still carried her staysail and Nellie her "catch all." The vessels all made a long leg on the port tack until near Goat Island where they went in stays.

As soon as Lurline could weather the island she went about again, and stood well out into the channel, as did also the Annie, a foolish move, as the flood tide was still making there, while the ebb had started to run along the city front.

On the second port tack from Oakland Bar, Fleur de Lis weathered Nellie with a big opening, and Murphy immediately got in his "catch all" and at once commenced to do better, so when the vessels came together again the positions were reversed and Nellie weathered Fleur de Lis.

Lurline made a long leg on the starboard tack and fetched into the sea-wall, where it was found that Nellie had the weather gauge on her, and the Fleur de Lis was astern and to leeward of both.

From here out to Black Point the race was very exciting, but Nellie gradually increased her lead. "Aleck," the boat-keeper of the Lurline, sailed her admirably, but there was not sufficient wind for him to hold his own with the heavy keel boat, and he rounded the windward stake-boat 1 minute and 15 seconds astern of Nellie, with Fleur de Lis following him at an interval of 35 seconds.

The Annie by this time had the other vessels of her class beaten, and the only struggle in this class was between Eva and Rambler for second place. These two vessels went tack and tack, until Rambler stood too far into the Cove between Harbor View and Black Point, while Eva stood out into the strength of the tide, which by this time was ebbing strong. Round this stakeboat as witnesses were Virginia (with a new coat of paint), Frolic, Chispa, Aggie, Restless, and any quantity of small craft.

Aggie was going over the course under her three working sails, but was not in the race, and consequently kept to leeward of the competitors during the whole race. Between Meiggs' Wharf and the Presidio she was compelled to put her tiller up four distinct times to avoid running ahead of Annie and close to her, and therefore went to leeward.

On rounding the Fort Point stakeboat the schooners filled their foresails and slapped on every bit of light canvas that could be made to draw.

To the southward of Goat Island the wind lightened up considerably, and the vessels got bunched again, with Nellie slightly in the lead.

She rounded the stakeboat first and got under working canvas, an unnecessary move when taking into consideration the fact that they were not jammed on the wind, and moreover were lee-bowing a strong ebb tide which shoved them rapidly to windward. Fleur de Lis and Lurline carried jib top sails and staysails for about two miles, when Fleur de Lis got a puff which put her decks down and then the jib topsail was promptly unfurled. Fleur de Lis had gained on Lurline coming down with the wind and rounded Oakland stakeboat nine seconds ahead of her. From here to Hunter's Point was where Lurline showed her powers, as she pointed up higher than the other two vessels and drove through the water faster. This resulted in her soon passing Fleur de Lis and shortly afterwards she went to windward of Nellie and took her wind, to the great disgust of the latter's crew.

As soon as Lurline could weather the stakeboat she went about and made a long tack with wind to port, in which she was followed by Nellie. Fleur de Lis stood well in toward the shore before going round and thus lost the benefit of the full strength of the tide, but she had a more commanding position.

Lurline made a hitch on the starboard tack when opposite the rolling mills, while Nellie still kept on falling off way to the leeward of Mission Rock. This move lost her the lead as when she came about she was too far to leeward and had to keep off to get on the right side of Mission Rock. Lurline crossed the finishing line in stays, followed by Annie and Fleur de Lis with a good full out, while Nellie came rushing up parallel with the finishing line and saved making a tack by a quick "pilot boat" luff.

Annie, Eva and Rambler came in in the order named with a wide gap between them all.

In the first class Lurline takes special prize for fastest time over the course; Nellie takes Club flag for the year and first prize and Fleur de Lis takes second prize.

In the second class Annie takes first prize and Eva second prize, leaving Rambler the only boat without a prize.

One of the most remarkable features of the regatta was the time made by Aggie, four hours and two minutes, faster than any of the competing yachts and she never had a light sail hoisted, and moreover took special care to keep out of the racers' way and in consequence sailed a much longer course. Herewith we publish the official time of the regatta.

Table with columns: Name of Vessel, Start, Hunters' Point, Oakland Bar, Fort Point, Oakland Bar, Hunters' Point, Home, Actual Time, Corrected Time. Rows include 1st Class (Lurline, Nellie, Fleur de Lis) and 2d Class (Annie, Eva, Rambler).

The Talk About Match Races.

After the race on Admission Day a party of yachtemen, while convivially engaged at a prominent saloon were talking of the relative speed of the different yachts on the bay, and as an outcome made a match between the Lurline and Aggie from an imaginary line from Fort Point and Lime Point to and around the North Farallone and return for \$2,500 a side, and a forfeit was deposited to bind the match until the owner's consent could be had. Messrs. Macdonough and Spreckels promptly gave the requisite assent and the race was considered a fixture for to-day. H. L. White backed the Aggie, and Messrs. T. Murphy and Turner backed the Lurline.

This news on Wednesday last set the whole yachting world agog, and steamers were chartered for the event. When, however, it came to the point of putting up the final deposit, a hitch occurred. The Lurline was ready with her stakes, but Mr. White desired Mr. Macdonough to put up \$1,500 of the stakes, a proposition which the latter gentleman refused to entertain, and at the present writing it appears as though the race has fallen through, more especially as Mr. Macdonough has gone out of town.

This is very much to be regretted, as the race would settle that long-mooted question of superiority between the Hall and Turner model, and such a race, between our two crack yachts, would be the greatest aquatic event that ever took place on this side of America.

Mr. Spreckels, with commendable spirit, does not wish the matter to end here, and although he had nothing to do with the making of the match, now declares that he will force a race with the Aggie, if only for a box of cigars, or compel her owners to acknowledge the inferiority of their boat to his.

This kind of talk has been going on for some years, but it never reached so near a focus as at the present time, and we hope and trust that it will come to a head if only for a "box of cigars" and glory.

The Pacific Yacht Club.

This club held their annual meeting on Wednesday, Sept. 3d, at Parlor A, in the Palace Hotel. Twenty-one members were present. After reading the minutes of the previous meeting, which were approved, the meeting proceeded to the election of officers for the ensuing year with the following result: For Directors, Messrs. Menzies, O'Connor, Caduc, Martenstein, Willey, Donahue and Coleman. For Regatta Committee, Messrs. Eldridge, O'Connor, Fritch, McGovern and Kelly, all the latter being now yacht owners. The reports of the Treasurer and Secretary were read and approved. These reports showed an excess of assets over liabilities of \$16,000. The directors were authorized to raise sufficient money to pay off the indebtedness of the club, and after some miscellaneous business the meeting adjourned.

Mr. Spreckels' protest regarding the distribution of the prizes of S. F. Y. C. was very properly not allowed by the Regatta Committee, and he immediately tendered his resignation and withdrew his vessel from the club, a very juvenile action when he was so palpably wrong. The Lively in Class D was also barred for the same reason, viz.: That she failed to go inside of the Meiggs' Wharf stakeboat, and so the second prize in Class D remains the property of the club.

The Thetis has gone to Sacramento and will remain there during the State Fair. There is considerable talk of a match between her and the plunger Restless, for \$250 a side. In case it comes to a focus we should predict a walk over for the latter.

Mr. Macdonough anticipates making a three weeks' cruise along the lower coast and round the Catalina Islands.

The Dawn is on a cruise "up river" and is expected home to-morrow.

H. C. France, the owner of Harry Wilkes, that won the \$10,000 race at Hartford last week, had about retired from the turf, but found this young horse so good a one that he could not resist the temptation to campaign him. Mr. France, by the way, claims that he is the only owner, except Alden Goldsmith, who has had three trotters gain records faster than 2:20, his trio being Hattie Woodward (2:15), Harry Wilkes (2:16) and France's Alexander (2:19).

## ATHLETICS.

## The Merion Games.

REFEREE.—B. S. Benjamin. STARTER.—W. C. Brown.  
JUDGES.—M. W. DeJonge, C. L. Ebnor, and J. H. Anderson.  
TIMERS.—R. S. Haley, Hiram B. Cook, and R. P. Chase.  
JUDGE OF WALKING.—Isaac Burnett.  
CLERK OF THE COURSE.—Frank Finlayson.

Despite the many counter attractions the athletic games of the Merion Cricket Club were well attended last Tuesday afternoon (Admission Day). The weather was simply delightful. It was fully an hour after the announced time that the first event was called, owing to unavoidable circumstances. Probably the only thing which detracted from the splendid programme of sports arranged, was the long waits between events. We have heretofore complained of the number of competitors who enter for the races and fail to come to the scratch, but we are pleased to announce that the Merion meeting was an exception to this rule. It is rather a novelty in California to see nine men start in a mile race. The handicapping in the long races was altogether too severe, and when the time made in these events are considered, it would appear doubtful if W. G. George could have conceded such handicaps and won. Of course the time made by the liberal handicap men was a long way ahead of anything they ever accomplished, and that they surprised themselves and friends, is putting it rather mildly. At any rate, such heavy handicaps are to be deprecated, and a great amount of sympathy was expressed for Jennings, who was in rare form and who had trained hard and conscientiously for a considerable time. The finishes in a great many races were of an exciting nature, particularly the mile, Maiden race, 100 yards run. A summary follows:

Maiden race, 100 yards.—First heat: T. H. Palache, first; Geo. W. Jordan, second; T. F. Hamill, 0; W. Stokes, 0. All close up, time, 12 a. Second heat: J. F. Dickey, first; Chas. Kaplan, second; A. Ahret, 0; M. Cohen, 0. Time, 11 3/4 s. Final heat: Geo. W. Jordan, first; J. F. Dickey, second; Chas. Kaplan, 0; T. H. Palache, 0. A splendid finish all locked together. Time, 11 3/4 s.

Running High Jump, Handicap.—W. C. Brown (O. A. C.), scratch, 5 ft. 1 inch; A. F. Rouss (1 inch), 5 ft. C. C. Johnson, 4 ft. 10 in.; W. O. Mills, 4 ft. 10 in.

One Half-mile Handicap Bicycle Race.—F. C. Cook (N. A. C.), scratch 1st; S. F. Booth (B. C. W.), 25 yds., second; H. Tenney (M. C. C.), 15 yds. 0. Tenney forfeited his handicap. Cook won easily, and Booth beat Tenney home for second position. Time, 1 m. 32 1/2 a.

100 Yard Run, Handicap.—First heat: A. B. Tennent (M. C. C.), 3 yds, 1st; J. W. Flynn (N. A. C.), scratch 2d; J. H. Walker, 4 yds., 0; J. F. Hamill, 6 yds., 0; Geo. Petersen, 6 1/2 yds., 0; A. Ahret (S. F. T. V.), 8 yds., 0. Time, 10 3/4 s. Second heat: Chas. Creighton (M. C. C.), 4 yds., 1st; C. Kaplan, 6 yds., 2d; W. Stokes, 4 yds., 0; Frank Dickie, 6 yds., 0; M. Martin (O. A. C.), 8 yds., 0. Very hard to separate the winners. Time, 11 s. Third heat: E. B. Freese (N. A. C.), 6 yds., 1st; R. B. Jones (M. C. C.), 1 1/2 yds., 2d; Barney Benjamin (M. C. C.), 4 yds., 0; G. W. Jordan, 6 yds., 0. Time, 10 1/4 s. Final heat: C. Creighton, 1st; J. W. Flynn, 2d; E. B. Freese, 0; C. Kaplan, 0; R. B. Jones, 0; A. B. Tennent, 0. A well fought race and won by a foot. All close up. Time, 10 1/4 s.

Half Mile Handicap—M. Martin (O. A. C.) 80 yds., 1st; F. M. Day (M. C. C.), 75 yds., 2d; J. Farrel, 60 yds., 0; T. Jennings (O. A. C.), scratch, 0; R. S. Adams, 50 yds., 0; R. Gibson (M. C. C.), 30 yds., 0. Won easily. A hard race for second medal between Day and Adams. A great many of the men proved better than the handicapper had any idea of, so the scratch man, Jennings, was handicapped clean out of the race. Martin the winner, is comparatively speaking a new man, and will make a first-class performer very soon. Time, 1 m. 59 3/4 s.

Pole Vault—Clement J. Schuster (O. A. C.), 8 ft., 3 1/2 in. 1st; Reed M. Kose, 3 ft., 1 1/2 in. 2d; C. C. Johnson, 0. Johnson soon fell out, so Schuster and Kose had to jump without much rest otherwise they would have cleared a much greater height. Giersch strained his leg and could not compete. This event was loudly applauded.

220 Yard Run Handicap—A. B. Tennent (M. C. C.), 5 yds., 1st; J. W. Flynn (N. A. C.), scratch, 2d; W. R. Stewart (O. A. C.), scratch, 0. Won rather handily. Tennent running much ahead of previous performances. Time, 24 s.

One Mile Walk Handicap—C. B. Hill (M. C. C.), 90 yds., 1st; J. J. Theohald (M. C. C.), 90 yds., 2d; J. B. Benjamin (O. A. C.), scratch, 0; W. A. Scott (O. A. C.), 100 yds., 0; C. A. Newlands (O. A. C.), 100 yds., 0. Great interest was exhibited in this event, particularly the contest between Hill and Theohald as their record for a mile is only a quarter of a second different. Hill outwalked his club mate however, and won the event with many yards to spare. A hard race for second position between Theohald and Benjamin. Scott was disqualified for unfair walking, while Theohald was twice cautioned. Time, 7 m. 31 s.

100-yards Slow Bicycle Race—H. Tenney, 1st, in 2 m. 37 1/2 s. S. F. Booth fell at the 80-yard mark, while Mohrig, the only other competitor, fell after going a few yards.

120 Hurdle Race, 8 hurdles, 3 ft. 6 in.—R. B. Jones (M. C. C.), scratch, 1st; W. Stokes, 5 yds., 2d; Barney Benjamin (M. C. C.), 0; J. W. Flynn (N. A. C.), 5 yds., 0. This race was greatly appreciated by the spectators, and was secured in fine style by the invincible hurdler, Dick Jones. A hard fight for second position, which would have certainly been won by Benjamin had Stokee attempted to jump the last hurdle. Through some oversight two hurdles were mislaid, hence there were only eight jumps. Time, 17 1/4 a.

One Mile Run Handicap—J. O. Haley (Boys' High School), 200 yds., 1st; C. B. Hill (M. C. C.) 175 yds., 2d; W. A. Scott (O. A. C.), 150 yds., 3d; T. Jennings (O. A. C.) scratch, 0; W. McGowan, 100 yds., 0; Jas. E. McMahon, 100 yds., 0; George Petterson, 150 yds., 0; Phil. C. Kelly, 175 yds., 0; M. H. Falkenstein (M. C. C.), 175 yds., 0. The grandest finish to a mile race ever seen in these parts. Coming down the stretch the result rested between Haley, Scott and Hill, and the struggle near the finish was worth going a long way to see. The spectators became so excited that they entered the track and sang out loudly for their favorite. Haley just managed to breast the tape, with Hill and Scott right on top of him. Scott was in the hard luck to be barely beaten, after such a hard fight, as well as making the quickest time in the race. Time, 4 m. 23 2/5 s.

Two Mile Bicycle Handicap—H. Tenney, (M. C. C.), 150 yds, 1st; F. R. Cook, (N. A. C.), scratch, second; R. H. Magill, Jr., (O. B. C.), 175 yards. 0. Magill drew out after completing a mile, and coming down the straight for the finish, Cook and Tenney were wheel and wheel, and when within thirty yards of the tape, Cook made a final effort, but unfortunately leaned too far forward and came

down hard, thus robbing the spectators of what promised to be a sensational finish, though we are of opinion the Nemean representative would have landed it. Time, 7 m. 22 1/2 s.

100-Yard School Championship Race—Brierly, (Sackett School), 1st; Dodsworth, (Sackett School), 2d; T. Rottanzi, (High School), 0; Chas. Gilmarten, 0; Walter Leach, 0; Dennis Crowley, 0. A good race, but a frightful bad start. Rottanzi getting at least four yards the worst of it.

440-Yard Run, Handicap—W. R. Stewart, (O. A. C.), scratch, 1st; F. M. Day, (M. C. C.), 25 yards, 2d; Chas. Creighton, (M. C. C.), scratch, 0; Geo. Jordan, 15 yds., 0. Another good race, Stewart running through lie men in fine style near the finish and winning in very good time, Day was a good second. Stewart's victory was very popular particularly among the athletes, as he is a general favorite. Time, 53 4-5 s.

The one-quarter mile races brought a splendid day's amusement to a conclusion; the obstruction race was omitted owing to the fact that a proper ditch could not be prepared.

An affair called an athletic tournament came off at Woodward's Gardens on the night of September 9th. The ten-mile bicycle race was secured by Gibson, who defeated a couple of novices in ridiculously slow time, even for such a small track. It was announced in the papers, and of course at the instigation of the getter-up of these sports, that Gibson, the ten-mile amateur champion, would compete. To those not familiar with athletic meetings of the various clubs, we would say that Gibson is champion et no distance at all, and furthermore we know a bicyclist in this city who can give him 600 yards in ten miles and a drubbing. Ross, McIntyre and a well-known wrestler named Gus Brown ran around the track leisurely till the completion of about six miles, when McIntyre left the track, leaving Ross to leisurely finish out the ten miles, who was followed by Gus Brown (a runner that a great many Grammar School boys could leave well in the rear). Gibson allowed a precocious youngster, who, by the way, rides in splendid shape, two minutes' start in a two-mile bicycle race, but our ex-amateur rider took matters easily, and only gained about 50 yards on the youngster. This brought the athletic tournament to a close, and the elite of the city then indulged in dancing. This is the way athletic sport is elevated. No wonder it is hard work getting an attendance at an athletic meeting after the exhibition of Tuesday night.

Wm. H. Meek, of the West Side Athletic Club, and winner of the long distance amateur championship at the last meeting of both the American and English Associations, has joined the professional ranks.—The *Clipper* says that L. E. Myers and Harry Fredricks fell into the clutches of a bluecoat at Fifth avenue and Twenty-third streets, this city, Aug. 31st. The two young athletes were indulging in playful hat-smashing, etc., which the "bobby" mistook for fighting, and he lugged them off to the station-house, where they were locked up for a few minutes, when G. W. Carr, Manhattan A. C., hailed them out. Next day they were required to pay \$5 apiece for their fun.—The one-mile amateur swimming championship of England, was won by G. Bell in 13 min. 42 3/4 sec. at Birmingham on August 16th.—Madame Engle, the celebrated English walker, has undertaken the extraordinary feat of walking 1,000 miles in 500 hours.

W. G. George has expressed his desire of again attempting at Stamford Bridge to beat the hypothetical record of Desr-foot. Although no date has as yet been fixed, it is probable the race will take place about the end of September. Beyond the credit of the performance in the event of his success, George wishes no prize, but desires that the record should be included in those to be engraved on the gold medal with which the committee of the L. A. C. have already decided to present him in recognition of his numerous grand achievements. After the champion's great feat on the previous occasion, his second attempt should attract a large crowd, more especially as it is not improbable that this will be the last time we shall have the pleasure of witnessing the running of an athlete who has had no equal, George having expressed a firm intention of thenceforth retiring from the cinder path.—*Pastime*.

Contrary to current rumors, Myers will run in the quarter-mile championship race even if he has to neglect others. If he succeeds (tho' who can beat him?) it will be the sixth time he has won the 440-yard championship. If so, he will be the first amateur that ever won a championship such a succession of times.

On Saturday, August 31st, the New York A. C. held the 100-yard and mile swimming championships, on the Harlem river. The former was won by H. E. Toussaint, N. Y. A. C.; time, 1 minute 21 1/2 seconds (best on record). A. F. Camacho, M. A. C., was second. Eight started.

The athletic exhibition of the Nemean Club was well attended on the evening of Sept. 5th. The club juggling by Hart was especially worthy of mention.

W. Raynor, of Manchester, has been doing some good sprinting of late, and is regarded in some quarters as the coming man.

At Gloucester on Aug. 14th, W. G. George ran a mile on a grass course in 4 min. 21 3-5 sec.

## BICYCLING.

The bicycle is one of the great benefits conferred upon this country, in that it educates young men to know the difference between a good road and a bad one. The average man does not know what a good road is, but when a man buys a bicycle and begins to ride, he begins to get interested in roads. I have seen a bicyclist stand on his head to see what was the matter with the road. I myself have been so much interested in the way roads were constructed that I have got down and tasted the dust.—*President Bates*.

The one mile professional championship race between Fred Wood and Richard Howell, for \$250 a side, took place Aug. 16th, at the Molineux Grounds, and was won by the latter in 2 min. 47 4-5 secs. These men have tried conclusions on six different occasions, Howell winning four times.

Too long and double question, a short and single answer turneth away wrath. Who will be the three fastest men at Springfield, and what would Hendee do supposing he got beaten by Dr. Beckwith? Hsande Wood Howell.

Meers, Chambers, Illson and Austin, (Amateur Bicycle champions, and all Birmingham men), left Liverpool, on the *Ataska*, Aug. 18th, for New York. They will compete at the International meeting at Springfield.

On Aug. 16th the fifty miles road championship of Ireland was won by E. S. McKay.

## FISH.

## John Muller and the Sharks.

This worthy, genial man, the late manager of the Walton Fishing Club, owns a duck preserve down at Alviso, and on Sunday last took a prospecting trip down to see to things being put in proper form for the coming season. It appears the flats of that part of the bay are infested with sharks of all sizes, where they gather together in large numbers after food, and at such times afford good fun for those who are courageous enough to tackle them. Among those who occasionally enjoy the sport of spearing them are Judges Rix and Dick Brooks, and they both tell marvellous tales of the dangers incurred. On Sunday friend Muller was leisurely rowing along in his skiff alone when suddenly his dog set up a fearful howl without warning, and he found himself in the midst of a large number of sharks, ranging from three to six feet long, and the experience of the next few moments will last him a lifetime. Some were under the boat, some before, some behind, some on each side, all reging mad and fighting like devils. His danger was imminent and his fright terrible. What with trying to keep his dog from jumping overboard, and his boat from upsetting, he passed a few minutes that can never be forgotten. For yards around the boat the water was lashed into foam and dark with fins and tails rushing furiously about in every direction. The boat was oftentimes struck with great force, and once the oar was seized by a shark apparently, he declares, as big as himself, and John is no chicken, and pulled clean out of the rowlock like lightning. This, of course, increased his danger, as it left him powerless to manage the skiff. In dire distress he bethought him of his gun, which he immediately loaded and discharged both barrels among the brutes, when they swam away and left him victor. As the season closes big fish yarns of course are in order and always appear, but there is no romance in this one. Other people have had the same experience as Muller, though not quite so bad. In a spirit of vengeance Muller has organized a party to go down to this shark resort, properly equipped and armed for battle, and as we shall be one of the party, we will furnish the results in full.

## A New Invention.

It is strange how men will sometime exercise their mind for evil, when with half the mental labor for honest purposes they could acquire station and wealth for themselves and their families. We copy the following as a new idea, and hope it will be duly punished:

"A summons has been issued against Lonow Drullard, of Dog Point, for fishing without a license. The manner in which Drullard breaks the fishing law is rather curious. Instead of taking a net and fishing, he has a flock of thirty geese. To the legs of these fowls he has a line and baited hooks attached. The flock are driven into the water and are followed by Drullard's two sons, who drive them up stream, thus making them troll. As soon as a goose gets a bite it becomes frightened, and with a great flapping of wings and squawking flies to the shore, where the fish is taken from the hook."—*Lockport Journal*.

As we have always contended, it is better for a people to have plenty of a second-class fish than no fish at all. We are always ready to record cases of success in carp raising. In this case Mr. Smelser's head is perfectly level:

"Isaiah Smelser, who has a cattle ranch at Summit Springs, twenty-eight miles south of Golconda, built a reservoir to store water for irrigating purposes, which covers some fourteen acres of land. A year ago last Winter he procured about five dozen carp from California, and planted them in his artificial lake. He says there are millions of young fish in this artificial lake at present, and those hatched out a year ago last Spring weigh from a pound and a half to two pounds each. He says carp is an excellent food fish, especially in the cool mountain waters of Nevada, and resembles perch somewhat in appearance and flavor."—*Silver State*.

At a late meeting of the American Fish Cultural Association, Professor Livingston Stone declared in favor of restrictive legislation as regards the killing of salmon in the Columbia river. Why the Professor should limit restrictive legislation to the Columbia river we cannot see. No indigenous or foreign stock of fish or game can be maintained in any country without restrictive and protective legislation. As a proof of the spread of this idea among ourselves, our local Italian fishermen, in a body and of their own accord, strictly observed the August ordinance, as the best thing for their own pockets, and the only way to preserve our stock of salmon in the Sacramento river. We have labored earnestly and long for restrictive legislation, and we have no doubt of its final adoption by the American people.

The Walton Fishing Club held their annual meeting last week, at Clem Dixon's rooms, and elected the following officers for the ensuing year: H. H. Pitcher, President; Dr. C. B. Hughes, Secretary, and Major A. T. Klose, Manager. These are all good men, but with Major Klose as manager we do not quite see what is to become of our B. C. and T. tipples when we join their parties. At the close of the meeting, the members presented Mr. John Muller, late manager, with a very handsome \$25 gold ring, for his long and faithful services in that capacity. Mr. Muller well deserved this tribute of respect, for he has long been one of the chief pillars and bright spirits of the club.

The California Sportsman's Club, undaunted by their ill-success in propagating black bass at Temescal, again seized the lake last week with good success. The fish of the two evenings have been successfully transferred to Lake Merced. The club are determined to have good fishing reserves, and for their energy and perseverance we hope they will succeed at Merced. Speaking of black bass it is said one weighing 23 lbs. was recently caught in New York State. This is about three times larger than we supposed they grew.

The Fish Commissioners meet next week, on the 16th we believe. People are getting very anxious to know about the promised distribution of those 50,000 Tahoe trout. Much good may their anxiety do them. The ruling powers care very little about public anxiety, public opinion, or public good. That's where the trouble lies.

Gustave Mahe, A. Konig and George Rageman had a fine day's sport Sunday at Monterey. They caught over 500 trout in the Carmel river, all good-sized brook trout, averaging about eight inches in length. They fished on the banks of the mouth of the river.

a bitter pill to swallow, it is better to have things as they are than to send an unreliable team with the certainty of ignominious defeat. We shall have more to say next week.

The best performance on Sunday was that of Sergeant Hovey, who was out shooting with Messrs. Waltham, Robertson and Moore, who attest its correctness. The dailies credit him with nine straight bull's-eyes, instead of nine bull's-eyes out of ten consecutive shots; he only scored four on the fourth shot at the 500 yard range. His score was remarkable.

Hovey.....200 yards 4 5 4 5 4 4 5 5 5 4-45  
500 yards 5 5 5 4 5 5 5 5 5 49-94

Forty-nine out of a possible 50, and 94 out of a possible 100 is indeed pretty good for what one four dailies, in its supercilious grandiloquence, calls an ordinary marksman. If the journal in question was as able in intellect as Mr. Hovey is with his rifle, it would be a different institution. Mr. Hovey said if he could have had his best ten shots, at each range counted together he would have made 98 out of a possible 100. The proper thing, however, in such cases is to count the first score at each range. Still ninety-four is pretty good for an ordinary marksman.

The German Fusileers were also out with their Mauser rifles and showed the improvement practice and a better knowledge of the gun have produced. We have at different times spoke in terms of praise of Captain Stettin's efforts end what they seek to reach, and may accomplish in the end. Already from 60 and 70 he has raised the score to 80 and 88 per cent, with the prospect of a speedy increase. On Sunday the best scores made at 200 yards were 18 and 17 out of a possible 20.

Capt. Stettin.....5 4 5 4-18  
Major Klose.....3 4 5 5-17

Others in the company made 15 and 16 out of a possible 20.

A Test.

On Sunday Colonel Ranlett, Lieutenant Kellogg and Sergeant Nick Williams, for the sake of demonstrating the capacity of the Springfield rifle furnished to the members of the Fifth Infantry, tried a string of ten shots each at 200 yards, with the following result. For some time hence, at least until we have seen the gentlemen, we shall carry our huldlog, as we expect to be assaulted for publishing the score, so far below their record is it. These guns were condemned when given to the Fifth on its organization, and yet to such arms there are some who think it best to confine the militia in service and inter-State matches. We may remark the shooting was honest and the rifles picked promisciously from the rack as they lay at the range. The score speaks volumes in behalf of progress only to be had by using the very best firearms:

Ranlett.....3 3 3 4 4 3 3 3-35  
Williams.....3 5 3 4 3 4 3 3 3-34  
Kellogg.....4 3 3 4 0 0 4 3 2-27

At Schuetzen Park.

The Schuetzen Verein held its annual festival on Sunday and Monday last which in every respect was a brilliant success. The Schuetzen Verein are the owners of the Schuetzen Park property, and the oldest rifle military organization in the State, having this week celebrated their 25th anniversary. The Swiss Rifle Club comes next, which is 25 years old next year. We intend to give a detailed account of the Schuetzen Verein festival, but as the prizes were only distributed on Wednesday evening, we cannot do so this week as the first division of our paper goes to press early on Thursday and this includes the rifle column. We may state here the shooting of the members was at the 25-ring target 200 yards, off-hand, and in many cases was so good as to reach from 60 to 64 out a possible 75. The Schuetzen used every kind of rifle.

At Carson.

We copy from the Weekly Bee the competitive rifle shooting, at Carson and Virginia, on Sunday week, for places in the Inter-State team. As we said elsewhere, owing to irreconcilable differences among our local authorities the match is off, but the shooting of the Nevada men for all that is interesting for its excellence.

Table with 3 columns: Name, 200 yds., 500 yds., Total. Lists names like Burke, Thaxter, Galueba, etc.

Average: For ten men, 90; thirteen, 90; the entire 25 men, 87 1-5. The Carson Tribune claims that this "eclipses anything ever recorded in the United States," and adds: "The shooting is considered all the more remarkable from the fact that all were first scores. Ten men from one company—the Carson Guard—made a total of 881, beating the record made by the Nevada team last year in the inter-State match by three points. Our citizens feel greatly elated over yesterday's work, and have every reason to hope that victory will again perch upon the banner of the Nevada team this year.

It is doubtless a cracking record, and sustains the good sense of our men in declining to meet such marksmen with inferior rifles, some of which probably were condemned by the government and lay rusting at Benicia for years before delivered to our local military.

The Austrian Military Company had a prize shoot on Sunday, and did good execution. As the prizes were only distributed last night, we shall not have details until next week.

A Little Mistake.

We copy the following in full from the Denver Daily News, because it makes a slight mistake in the title given the Denver riflemen. We do not wish to be egotistical about our local sharpshooters, but the Denver men need not wait for our friend Capt. Farrow to come along and undecieve them about their ability. If they only read the BREEDER AND SPORTSMAN, they would see Capt. Farrow's own score is beaten at Shell Mound every Sunday, and all the rest eclipsed by second and third-rate California marksmen. The idea of the best riflemen in the world making from 40 to 42 out of a possible 50, is rather amusing. We guess Capt. Farrow, who really knows what a record is, must have had a sly laugh over such pretensions.

"Fine Shots.—Some of the best Rifle-Men in the World at Jewell Park.

"A generous reception was accorded Captain Farrow, the celebrated rifle shot, at the range yesterday, by Company E Rifle team, and others of the Colorado National Guard. The day was not well calculated for fine shooting, as the glaring sun and the intense radiation in front of the target made it extremely difficult to find the dancing bull's-eye through the sights. The team were armed with their Sbarp's military rifles and hoped to give the champion a close contest. Captain Farrow shot with the new Bullard magazine rifle, with re-loaded ammunition, and made some wonderful scores considering the unfavorable circumstances. The following are the scores of the first round of ten shots each:

Table with 2 columns: Name, Score. Lists names like Captain Farrow, J. M. Anderson, W. M. Anderson, etc.

"At the conclusion of the string it was suggested that as Captain Farrow was using peep and globe sights on his Bullard rifle that the regular handicap of two points should be allowed to the military sights, and be added to each score. This the champion agreed to and another string was shot, the captain not cleaning after each shot, which is always done at Creedmoor when handicap is allowed the military rifles. The following is the score, same distance:

Table with 2 columns: Name, Score. Lists names like Captain Farrow, T. Stone, W. M. Anderson, etc.

The Fall meeting of the National Rifle Association, to be held on the Creedmoor range from September 9th to 13th, promises to be the most successful held in many years. The Board of Directors have made special efforts to make this meeting an interesting one; the number of matches has been increased, while the prize list will aggregate over \$7,500. The regular army will be well represented; New York State will send an increased number of teams, while Michigan, the victor of 1883, will send a picked twelve to again compete with her Eastern neighbors. Pennsylvania, New Jersey, Massachusetts and probably Connecticut will be represented. As soon as we receive the returns we shall give them for the benefit of our readers.

Comparative Records.

England, Ireland and Scotland recently met at the Wimbledon target to contest for the Elcho shield, a trophy much coveted by the British riflemen. Ireland won. The score was:

Table with 2 columns: Country, Score. Lists Ireland, Scotland, England.

Allowing for the difference in some of the distances, which we suppose may exist, the record is still below that made by members of the two teams of the Fifth Infantry in July last, at Shell Mound, and by members of the "Big Six" out of a possible 2,000. The scores are:

Table with 2 columns: Team, Score. Lists Field and Staff, Company A, Big Six.

The comparison speaks well for California and her riflemen.

VIRGINIA, Nev., Sept. 3, 1884.

DAILY ALTA CALIFORNIA:—On behalf of the First Regiment, N. G. N., I except Lieutenant-Colonel Ranlett's challenge, published in your paper of the 1st inst. E. D. BOYLE, Lieutenant-Colonel Commanding.

From this acceptance of Col. Ranlett's challenge, we shall doubtless have an inter-State match after all. It would be a graceful act if the Nevada men allowed the bronze horse to be contested for, which now becomes their property by default.

The San Francisco Fusileers will hold its annual picnic and prize shoot at Shell Mound on the 21st instant. The prizes for marksmen, both for the company and at the public target, will be many and valuable.

The California Rifle Association will hold its Fall meeting in October.

CRICKET.

The Merions Win the Trophy.

A large and enthusiastic audience many of whom were ladies, assembled at the grounds last Saturday to witness the final match for the Harrison Trophy. Never in the history of California cricket has a match created so much excitement as the one played last Saturday. Both clubs did their utmost to bring their strongest team in the field and in a great measure were successful. The Occident captain won the toss and decided to take the field. Ben and Barney Benjamin were the first to appear for the Merions. Waterman led off the bowling from the grand stand end and sent down a maiden. Barney Benjamin was bowled in Cookson's first over. Burnett, the new comer, allowed one of Waterman's to get by his defense. Two for six. With the score at 16 Benjamin was badly run out. After one more run had been added to the score, G. Theobald was also run out. John Theobald now partnered Jacobs but the latter was howled by Waterman with the score stationary.

Miller made a couple of hits for two pieces when he was given out. b. w. to Cookson. Spiro and J. Theobald brought the score from 21 to 41 before the former was unfortunately run out. Theobald was bowled with the score at 46 after playing a very careful innings of 11. Gibson and Banner were rapidly dispatched, leaving Webster, who was beginning to hit pretty lively, not out for 4, the innings closing for 50 runs. The opinion prevailed even among their most ardent admirers that the Merions could not get the Occidents out for under 50.

Carr and De Golia were to the first to wield the willow for the veterans while the bowling was entrusted to Banner and Webster. De Golia was caught at point by Jacobs. Purdy started in by sending a high one to cover point which Spiro let fall. Miller relieved Webster with the ball and the third ball of his first over proved fatal to Carr. Carke joined Purdy but was dismissed by Banner after making one. Waterman was not at the creases very long when Miller bowled Purdy. Bristowe was splendidly caught at point by Jacobs and the board showed 5 for 24. Sanderson was bowled first ball he received and Campbell joined Waterman. The partnership was productive of nine runs, bringing the score up to 36. The greatest excitement prevailed at this point of the game and every stroke was keenly watched by the spectators. Four wickets to fall and 17 runs to get to win was the condition of the game when Miller sent down bis eight over. Campbell hit the first one for two, but the next one took bis middle stump—a magnificent ball. Seven for 36. Immediately upon the advent of Gray, Waterman was caught at point by Jacobs. Eight for thirty-six. Cookson came in and put three together before his leg stump was lowered by one of Banner's shooters. Kuox, the last man, now came in and the Occidents needed 11 runs for victory, but Banner, the hero of many an uphill game, displaced the leg hail and the Merions won the most important match ever played on the Pacific slope. Seven weeks ago the Occidents had three games to their credit while the Merions had only one, and at that stage of the games it looked black indeed for the Merions, and that they have pulled the trophy out of the fire is deserving of every credit. Banner and Miller bowled in splendid form, and were well backed up by excellent fielding, Jacobs at point particularly distinguishing himself. The Occidents fielded very well, Cookson showing up well, while De Golia was a tower of strength at long stop. The President of the Merions, W. G. Harrison, has signified his intention of offering hats to the hatsmen and bowlers who show up best in another series of matches which will come off towards the end of the season. The following is a complete score:

Table with 2 columns: Name, Score. Lists Merions and Occidents players like Barney Benjamin, Cookson, De Golia, etc.

Table with 4 columns: Name, Balls, Runs, Maidens, Wickets. Lists players like Waterman, Cookson, Purdy, Campbell, Banner, Webster, Miller, etc.

Caught in the Act.

At St. Louis, on the 1st, detectives at the Cote Brillante race track arrested Thomas Redmond, alias Tom, a hanger-on about the stables, on the charge of poisoning R. C. Pate's horses, Boatman and Ascender, Col. Hunt's cap horse, John Davis, Ed. Beardslee's Manito, and attempting to poison Sam Bryant's fleet two-year-old filly, Lady of the Lake. The arrest caused a sensation in sporting circles, and it is rumored that several others will follow. Last Thursday evening Redmond went to Bryant's stable and asked William Whalen, one of the stable boys, if he was still attending to Lady of the Lake. The boy replied that he was, and Redmond said: "Do you want to make some money?"

"Certainly," answered Whalen.

"Well, then, I'll give you \$500 if you give Lady of the Lake the medicine in this bottle."

"I'll go you," replied Whalen, and, receiving the bottle, put it in his pocket. Instead of poisoning the filly he took the bottle to Sam Bryant, the owner, who had it analyzed. The bottle contained laudanum and other poisons, and upon ascertaining this fact Bryant swore out a warrant for Redmond's arrest. He was locked up at the Four Courts, and at first refused to say a word. The detectives worked with him, and at last he gave up the entire plot. He confessed to poisoning John Davis and Rhadama in Chicago, Boatman and Ascender at Pittsburg, Carson and three of W. T. Cassidy's thoroughbreds at Chicago. He also stated that he had bribed jockeys to dose Troubadour and Ike Murphy at Chicago but failed; Carrigan's stables was too well watched. The poisoning was done at the instigation of a half-dozen bookmakers, whose names the authorities would not make public until they get more evidence. The scheme was to dose Lady of the Lake, who was favorite in the Coquet Stakes—a sweepstake for 3-year-old fillies, with \$500 added money. It was also desired to dose Belle Pate, second choice, and allow Nodaway and Rhadama, the short horses, to carry off the money. In such an event the bookmakers would reap a rich harvest. If any of the fillies won except the favorite the revenue would have been large, as Bryant's filly sold even against them all. An attempt was made to dose Manito, the favorite in a selling race, but the bottle was turned over to Mr. Beardslee. It is said a number of horse-owners are implicated with the bookmakers in poisoning the thoroughbreds. Pate and Col. Hunt are up in arms, and want the whole matter to come out in court. The Humane Society have taken the case in hand, and Redmond's trial is set for Wednesday. Boatman and Davis are suffering, and Ascender is full of fever.

The total value of the National Breeders' Association Stakes, trotted for at the grounds of the New York Driving Club, Sept. 9th to 11th, inclusive, was \$20,000. The average value of each stake was \$1,500.

The sulky used by Jay-Eye-See at Belmont Park, 400 lbs. is the lightest one ever constructed.

# THE Breeder and Sportsman.

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J Street.

## ADVERTISING RATES.

Displayed, \$1 50 per inch each insertion or pro rata for less space. Reading Notices set in brevity type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, -- Saturday, Sept. 13, 1884.

## Dates Claimed.

State Fair, Sacramento, Sept. 11th to 20th.  
Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.  
San Joaquin District Fair, Stockton, September 22d to 27th.  
Santa Clara District Fair, San Jose, September 29th to October 4th.  
Monterey Agricultural Association, Salinas, Oct. 7th to 11th.  
Fresno Fair Association, Fresno, October 7th to 11th.  
Los Angeles Fair Association, Los Angeles, October 18th to 18th.

## Climatic Distinctions in the Game Laws.

In the gun department of this week's issue will be found a complaint from the Sierra Valley Leader, about the quail leaving the higher sections of the mountains, or preparing to leave, which, when accomplished will deprive the citizens of those sections without a quail to shoot when the open season arrives on the 1st of next month. On principle we have not a word of dissent to utter against the complaint itself, because we know this want of sectionality in our game laws works injuriously to many important counties, and offensively to many influential sportsmen, who on every consideration of justice, are as much entitled to a share of the public game, as those living in the more favored central and southern counties. At the same time there is a slight error in the statement of the complaint, so far as the State Sportsman's Association is concerned, which we think fairly deserves a more prominent correction than given in our gun department, and so we transfer the question to our editorial pages. In principle it has been the aim of every civilized country, as the most efficacious system, to have its laws uniform in object and application, and centuries of experience have proved the wisdom of the system. At the time the game laws of this State were made uniform in application throughout its boundaries, there were many reasons for such uniformity, and they were acknowledged by every true sportsman and every loyal citizen, who desired to see the public game of the country preserved, as well as by the leading members of the State Association, who were chiefly instrumental in procuring legislative authority for such uniformity. At that time we all know, a general disposition prevailed, sometimes in quarters which made it all the more iniquitous, to slaughter our public game, whether animals, birds, or fish, at all times of the year with a reckless disregard to law, justice, common sense, or decency. At that time sectional exceptions as to counties or districts prevailed, and those inclined to evil who claimed to be a law unto themselves as to when and where they might kill game, made the the privilege of one section the means of marauding with impunity on another, and so the game of the whole State was threatened with annihilation. The State Sportsman's Association, with that wisdom which has ever marked its policy, bestirred itself and obtained uniformity in regard to all sections, and good men outside the Association were willing to try the experiment for the general good, though they knew it would work hardship, if it can be so called, on certain individual sections. That it has worked good, in fact immense good, there can be no doubt, for to that enactment may be distinctly traced a more general understanding of the object of game laws and a more general desire to obey them. It is now only the low, the debased, the dishonest market-hunter, some such as we still find at

Oakland, who say they do not care a d--- for the game laws, that they will kill quail whenever or wherever they find them, and who claim to be a law to themselves. This increased favor to game laws in and a desire to enforce them by the just and true citizen, we hold can be distinctly traced to uniformity in our law. Thus it may have fulfilled its mission and brought back the time when climatic distinctions may again be adopted for those in one section who do not enjoy the advantages of those in a more favored section. This is certainly the opinion of the leading members of the State Association, and at its last annual meeting a committee was appointed to take immediate steps towards an arrangement for a change in the law, which shall suit all districts. In the discharge of their duties the committee have issued a circular in connection with this paper, calling upon all parties to give whatever information they can on the migration of game birds, and on that information they will formulate the change to be asked of the next Legislature. The editor of the Sierra Valley Leader we know to be a true, earnest man, and if he so chooses can give much assistance in the matter. We recognize many ways in which a change to climatic differences instead of uniformity, would be beneficial, especially in obtaining a more general obedience to the laws. No doubt it would remove much of that feeling of injustice prevailing in many sections, and thus make its citizens more active and more earnest in obeying and enforcing the laws, from selfishness, if from no higher motive. We freely admit the justice of basing our game laws on climatic difference, for it is true republicanism that every man should have a share of that which his money helps to make public property. But while we admit this, we strongly deny the wisdom of leaving the power of shooting or hunting in any county in the hands of the County Supervisors. That has been tried and found to work infinite mischief. As a general thing the average Supervisor is the last man to understand this matter properly, and then if he chooses to be dishonest, this power, of which he was deprived by the County Government Bill of the last Legislature, enables him to be dishonest and sell the privilege. We have had enough of the Supervisorial discretion in all conscience, and we shall oppose its revival bitterly to the last. We advise harmony of action in this matter. If the counties asking climatic distinction will meet and aid the State Association, the question can be settled next session of the Legislature with satisfaction to themselves and benefit to the whole State. The scheme is well worth trying, for it may bring all sections into harmony and peace.

## Live Stock Diseases.

The appearance of contagious pleuro-pneumonia in herds of valuable thoroughbred cattle is agitating the farmers and stock-breeders of the Mississippi valley. The presence of the disease was first discovered in Illinois, but it has been traced into Ohio. Its existence in all the States of the central group is very probable. Veterinarians are actively at work to prevent the spread of the contagion and to stamp it out. What their success will be is problematical. The experience of the breeders of Great Britain is not encouraging to the hope of getting rid of the trouble entirely. Cattlemen must quarantine against the disease most rigidly. It is to be hoped that the Pacific Coast may be kept clear, and if proper preventive measures are taken perhaps we shall not have any difficulty, but the means used must be the best known and the application thorough. It will be unsafe to import any cattle from the infected districts for at least a year, even if the plague is checked now. For six months at the nearest it will be dangerous to import any Eastern cattle at all. Just how widespread the infection is, is not known. Government veterinarians, both State and National, are engaged in determining the geographical limits. As noted above, they have followed the trail into Ohio, and where the boundary line is cannot now be even presumed with any certainty. It will be some time before the full extent of the contagion will be established through the work of these inspectors and by the action of the disease itself. Until that is done there will be great risk in importing any cattle, and it is better that all traffic of that kind cease for the time being. There will no doubt be a strong temptation to some to take the risk. If the disease makes headway in the prairie region cattle will be cheap. Breeders will be found who will not be averse to turning a diseased animal into cash if a purchaser can be found, and there are buyers who would take the chance at the prospect of large gains. Such business can only be prevented by a strict State quarantine, and such a measure is proper and necessary under the circumstances. In the meantime the stockmen of this Coast may not unprofitably give careful attention to the stock they have. An inspection of their condition will be a wise caution. Nothing induces disease or furnishes material to hand for contagions and epidemics like a low physical condition and variable health. The rule applies to all animals, low and high. There is an inclination with the happy-go-lucky people of this west Coast to rely much on the blind goddess. If their cattle die they

ascribe it mainly to "bad luck." Luck is an inconsiderable factor in the matter. It is a simple question of cause and effect. If a man eats foul food or drinks foul-water he is not surprised if he is sick. Cattle fed upon impure or insufficient food or water suffer precisely the same consequences as the *genus homo*. They cannot be healthy without good food and pure water. In some parts of the San Joaquin Valley lately there has been a heavy mortality among swine, and the cry of "hog cholera" was raised. Investigation showed that there was no cholera but simply quinzy. The cause was bad food and stagnant water. Prevention is easy and a cure within reach of every owner, but this incident illustrates how diseases are incubated by natural processes. A vigorous, healthy condition will ward off disease and the reverse invites it. We do not think these things are sufficiently considered by our stockmen. They have not been annoyed with severe epidemics or contagions among their herds and flocks, and have given the subject but little attention. But changes are going on in the climatic and all other conditions and stockmen if they would have their prosperity continue will need to go a little deeper into the incidental advantages and disadvantages than has been their custom in times past. The pleuro-pneumonia outbreak in the East calls for their immediate attention and for all the preventive measures possible.

## At the Fair.

The absence of Mr. Simpson's vigorous treatment of editorial subjects will be noticed from our columns this week. It is explained by his absence from the city, as he is attending the State Fair at Sacramento. He had an extra interest in the Fair this year, for the reason that his three-year-old colt Antevolo was entered in the Occident stake, trotted on Thursday, and, as is generally known, Mr. Simpson trains and drives his own horses. Consequently, in order to be "on deck" in due season, he went to the Capitol City with his outfit on Monday. As will be seen by the report in another column, he won the race handily, carrying off the gold cup and a considerable stake. Antevolo is a handsome brown colt, full brother to Anteeo, by Electioneer from Columbine, by A. W. Richmond, son of Simpson's Blackbird. He appears to have had an easy race, the fastest heat being 2:29 $\frac{3}{4}$  and the fastest half-mile 1:13 $\frac{3}{4}$ . We call this average only in California, but it appears fast in comparison to the Eastern colt stakes. The Juvenile stakes for three-year-olds, trotted at the meeting of the National Association of Trotting-Horse Breeders at New York last Wednesday, was won in 2:53 $\frac{3}{4}$ . Antevolo is engaged in the three-year-old stake at Stockton, and the purse for the same class at San Jose.

## Open Purses at Greenville.

The Fair Association of the 11th District, whose meeting will be held this year at Greenville, Plumas county, has reopened three purses which did not fill when the regular programme closed. They are \$200 for the 2:40 class; \$300 for the 2:34 class and \$600 for the free for all. These purses are open to the State. Greenville is in a beautiful mountain country with a delightful climate and an enterprising, prosperous population. All the other races on the programme have filled well and that they will have a good meeting there is no doubt. The meetings so far held in the circuit have developed many out-classed horses and the Plumas fair is an open field for them. They will meet new people, new money, hospitable treatment and fair play. Entries close on the 23d, and particulars will be found in the advertising department.

The green horse James H., whose life has been such a fitful experience, won a great victory at Sacramento on Thursday, defeating Sister, Magdallah and Louis D. in a five-heat race, and making a record of 2:21. He is a speedy and game trotter, and another season will probably see him entirely free from the bad habits which have been characteristic in the past. These disagreeable traits appear to be not the result of bad disposition, but of circumstances. His breeding has never been traced, but we expect ere long to have it established. From the information so far obtained, it appears that he is a son of George M. Patehen, Jr., but no facts regarding his dam have been secured.

At Stockton, on the 23d inst., during the fair Killip & Co. will sell at auction fifty head of mules by order of J. T. Sims. These mules are a likely lot and will be sold without reserve.

## The Blood of Jersey Belle.

Mr. A. J. Fish, in the *Breeders' Gazette*, to show that the memory of such cows as Bomba and Coomassie does not perish, recites a list of famous performers: Jersey Belle of Scituate, 25 lbs., 3 oz. Her daughters, Belle of Scituate, 18 lbs.; Lass of Scituate, 15 lbs., 14 oz.; granddaughter, Minnie of Scituate, 14 lbs., 4 oz.; grand granddaughter, Pauline Vivienne, 15 lbs., 15 oz.; and Dalton's Pet in one day, 2 lbs., 3 $\frac{1}{2}$  oz. Thus it will be seen that the fame of these old cows, instead of growing less, increases as the years go by. Mr. Henry Pierce, owner of the Yerba Buena ranch, owns the only living son, one of the two daughters and the controlling interest of the blood descendant of Jersey Belle of Scituate, above referred to. A fine cut, a perfect portrait of the old cow will be found in our advertising column. William of Scituate, on exhibition at the Golden Gate Fair, at Oakland is deep in the blood of Jersey Belle. He was imported from Henry Pierce's eastern herd and sold to Wm. D. Bliss, of Petaluma, for \$1,000. He is a prize winner wherever shown and worth looking at by those interested in Jersey cattle.

The \$10,000 Purse at Hartford.

The following is the report of the New York Spirit's correspondent of the 2:20 race at Hartford, on the 2d.

Next comes the great event of the season, a purse of \$10,000, for horses of the 2:20 class, divided into four moneys, as customary. Of the thirteen entries, eight fully qualified, but Onward did not start. Three of the horses had recently made records of 2:16 1/2, and all the others, except King Almont, had reduced their records this season. Such an enormous number of people were present that one cannot move about and get the news; but here and there I pick up an incident. Just before the action the talk was all of the chances of the different horses. In the morning sees Harry Wilkes brought \$275; Maud Messenger, \$65; King Almont, \$40; Phil Thompson, \$25; Felix, \$25; Adelaide, \$10; Captain Emmons, \$5; but at the hour of decision the large investors were clamoring for Wilkes at odds of 2 to 1 over the field. What amount of money changed hands I cannot say, but judge about \$30,000 passed through the pool-box. There was a whole covey of ehred observers who rarely buy a pool, and I noticed them hiding with great confidence at both Herdic and Armstrong's stands. The result shows they were amply justified. Doc Appleby said, "I'll stick to one horse to-day, for yesterday I was up a tree, hopping from limb to limb, always lighting on a rotten branch. First I backed Butterfly; then the field against her and King Wilkes; next Judge Davis, after he won a heat; and lost everything, as Wilkes won it."

As the horses appeared the excitement was intense. The favorite nodded a little, owing to cracked heels. He acted unsteady in eoring, and Van Ness put on a little heavier toe-weight. King Almont scored up in advance of the others. On being cautioned, he said, "I'm in a hurry." All the others seemed to be of the same mind, and the horses came up either straggling or on a break. On the ninth attempt, Starter Loomie caught them going level, but not bunched. Felix had the pole, Adelaide second, Wilkes third, Almont and Phil Thompson on the outside. Felix broke shortly after the word was given. Thompson trotted fast, and ranged alongside of Wilkes on rounding first turn, and, in the struggle for the lead, both broke badly. This was Felix's opportunity, and he sent King Almont for the lead, capturing it from Adelaide, and leading her a length to the quarter in 35 1/2 seconds, with Captain Emmons a good third, Maud Messenger working slowly in fourth place. This was the order to the half, in 1:10. Adelaide drew up almost even with Almont on third turn, and remained there to the three-quarter pole, at which point they were three lengths in advance of Captain Emmons, Maud moving well in fourth place, Felix fifth, and Wilkes sixth, with Thompson trotting very fast to save his distance. Down the homestretch Felix gave Almont no rest, and he out-finished Adelaide, heating her a length. Maud Messenger was outfooting Emmons for third place, but broke at the distance stand, and finished fourth. Time, 2:21 1/2, which is a repetition of the winner's previous record.

As I happened to be near the weighing-room when the drivers dismounted I found each had something to say to me. Van Ness said: "I would have tried for the heat after Harry settled; they kept breaking and running in front of me." Rood said: "I thought I would beat Almont coming home, but he made me trot a long mile." Nelson's inquiry: "How fast was it?" "Am I shnt out?" was Snyder's momentous question.

Second heat—The time being so slow in the first heat, a large amount of money continued to be laid on Wilkes at odds of 2 to 1. A good start was given. Maud, moving very fast, quickly dispossessed Almont of the pole, and Wilkes made play for the lead. He reached the leader's wheel at the quarter in 33 seconds, and Thompson joined him with a rush. Going up the homestretch they drew up almost even with Maud, and the excitement of the spectators was intense as the three horses trotted like a Roman chariot team until a length or two of the half in 1:06 1/2; then Wilkes drew away a length. Phil and Maud continued the struggle for second place until rounding the third turn; then Phil led her by two lengths, and Wilkes was an equal distance ahead of him. So they came into the homestretch, but Maud rallied near the distance, passed Phil and finished within a length of Wilkes. The others were out of the contest. Time, 2:17.

Third heat—An indifferent start, Almont having the best of it; but Wilkes held the pole around the turn, pressed by Maud to the quarter in 34 1/2 seconds; then Thompson came with a rush and ranged alongside of Wilkes, giving him quite a race to the half in 1:08, and clung to his wheel as far as the third turn; then he gave up the chase and simply paid attention to beating Maud. She broke badly on the heckstretch, but drew up a good third on last quarter. Wilkes jogged in away ahead of all the others. Time, 2:19 1/2.

Fourth heat—Phil would not score steady in second place, and was allowed to chassee in front of the others, and finally caromed against King Almont. Phil's snlky careened, the outside wheel doubled under, but Snyder, with great presence of mind, threw his weight in the opposite direction, and it righted. McCarthy now took Haight's place behind Felix. After very tiresome scoring the word was given. Wilkes led the party, and Maud was on his wheel to the quarter in 34 1/2 seconds; they were joined by Thompson, who could not maintain the clip, being three lengths behind Maud, and she two lengths behind Wilkes, at the half in 1:09 1/2. Felix began to pnt in his claims for a position, and was a good third at the three-quarter pole. Maud surrendered in the stretch, and it looked as if Felix had second place, but he broke above the distance and Captain Emmons came with a rush on the inside of Wilkes, finishing second within two lengths of him, King Almont third, and Felix fourth, Maud a good fifth, Adelaide and Phil the laggards. Time, 2:21 1/2.

Same day—Purse \$10,000; 2:20 class. Harry Wilkes, b g, by George Wilkes—W. R. Armstrong 6 1 1 1 King Almont, b g—A. J. Feek.....F. Van Ness 6 1 1 1 Maud Messenger, b m—R. A. Compton.....C. Davis 4 2 3 5 Captain Emmons, ch g—J. H. Temple.....I. Nelson 3 4 5 2 Phil Thompson, g g—J. D. Bipley.....W. H. Snyder 7 3 2 7 Adelaide, h m—E. E. Rood..... 2 7 4 6 Felix, b g—P. Schatz.....F. Haight and McCarthy 5 3 6 4 Time, 2:21 1/2, 2:17, 2:19 1/2, 2:21 1/2.

The winner is a long, etailing-gaited horse, a constant trotter, and one that will undoubtedly prove a free-for-all performer of rare merit. He was bred by Jas. W. Hendrew, of Speedwell, Madison Co., Ky. Mr. W. R. Letcher purchased him as a two-year-old for \$500, who sold him to Mr. W. C. France, June 20th of the present year, for \$6,000. His course this year has been an unbroken series of victories, except at Rochester, where Catchly was awarded first money through a mistake of the driver, but Wilkes showed that he was master of the race. He was foaled in 1876, got by George Wilkes, out of Mollie Walker (dam of General Garfield, 2:21), by Captain Walker.

Opening of the State Fair—The First Day's Racing.

The opening day of the Fair of the State Agricultural Society was very successful in every point of view. There was a larger attendance than ever before on a first day, and the show of stock is certainly superior to that of former years. The new track receives encomiums from all; drivers grow enthusiastic when speaking of it, and the spectators are satisfied with seeing faster time than could have been made on the old track by the same classes of horses. The arrangements of the grounds are far superior to what they were before the late improvements were made, and everything is compact. The cattle stalls surround the first turn, but the space being inadequate, others had to be built on the west side of the homestretch. The amphitheatre for the show of stock is near the entrance gate, while before it was on the other side of the course. The forenoon was taken up with making entries, and the exhibition stock were still coming. For the afternoon three races were on the bill. The first race was the Occident stake for trotting, 3-year-olds, the nominations to which are made the 1st of January of each year when the colts are two years old. The stake is \$100 each, \$25 to be paid when the nominations are made, \$25 on the 1st of January following, and \$50 thirty days preceding the day fixed for trotting. The Association add a gold cup of the value of \$400, and as there were thirty nominations, ten of which made the second payment and three the third; the money value was \$1,175 besides the cup. The race was heats of a mile, best two in three, in harness. The starters were Antevolo, Griselda and Robert Lee; The placing was in the order their names are written. In the pools Antevolo was so much the favorite that little was done in that line. He won the race so easily that little description is necessary, excepting what the summary will furnish. He trotted the last half of the first heat in 1:13 1/2.

State Agricultural Society, Sacramento, Sept. 11th.—Occident stake, for three-year-olds; mile heats. Antevolo, br c, by Electioneer, dam Columbine, by A. W. Richmond—Jos. Cairn Simpson..... 1 1 Robert Lee, ch c, by Nutwood—Rancho del Paso..... 2 2 Griselda, g f, by A. W. Richmond—L. D. Toddner..... dis. Time, 2:29 1/2, 2:31 1/2.

The second race was for the 2:25 class for pacers for a purse of \$1,000, the starters being Maud B., Shaker, Ackerman and Prince. The night before and on the grounds previous to the race, Maud B. was the favorite, Shaker pressing her close for the position, and quite a large amount of money was risked. The first heat upset the calculations of the knowing ones, Shaker taking the lead at the first furlong and never surrendering it, though Prince was lapped on him when half way down the stretch. Ackerman gained second position, Prince third and Maud B., who did not make a move for the heat, fourth. Time, 2:25 1/2. After this the betting was changed so that Shaker was the favorite at \$100. Maud bringing \$30 and the field \$20. The second heat proved that the long price on Shaker had not been fairly earned, as Maud took the lead, passing the quarter in 34 1/2 seconds, and at the half in 1:10 1/2 she was still leading by two open lengths. From that point Shaker gained a trife, but was never able to jeopardize the chances of Maud, who won in 2:21 1/2. Shaker was now the favorite, bringing \$50 to \$35 on Maud and \$23 on the field. The third heat brought another revulsion, Maud B. winning it in 2:23, Shaker several lengths in the rear, so that the betters were fain to put \$30 on her to \$40 on Shaker, and \$15 on the field. The fourth heat of the pacing race (which was preceded by the first in the 2:25 class, a description at which will follow the close of the pecing), was won handily by Maud, the placing being the same as before, and the time 2:23.

Same day—Purse \$1,000; free for all; pacers. Maud B., b m, by Bertrand Black Hawk—H. J. Agnew..... 4 1 1 1 Shaker, b g—M. F. Odell..... 1 2 2 2 Fred Ackerman, h g—J. T. McIntosh..... 2 4 4 4 Prince, b g—S. C. Irons..... 3 3 3 3 Time, 2:23 1/2, 2:21 1/2, 2:22, 2:23.

There was a good deal of speculating on the trotting race, Sister being a strong favorite all through. Some time was occupied in scoring, but when the word was given the horses were nearly level; James H. had the pole, Magdallah second, Sister third, and Louis D. on the outside. James H. working very steadily took the lead on the turn, with Magdallah second, Sister third, and in this order the quarter-pole was passed in 35 1/2 seconds. There was no change at the half, before reaching which Magdallah broke, Sister taking second place on the turn, but she could not reach James H., as he kept up his flight of speed, winting with two lengths to spare in 2:21; Sister second, Magdallah third, and Louis D. fourth.

Soon after the start for the second heat Sister broke, losing so much ground that it appeared as though all her chances for winning the heat were ended. James H. broke when near the quarter, and Magdallah took the lead, passing the quarter in 36 1/2. At that point she was a length in the lead of James H., but at the half in 1:11 1/2 there was but little difference, and Sister had closed some of the long gap. Rounding the turn all three were close together, and a very fine struggle down the stretch between James H. and Sister was the result. James H. broke at the northern end of the grand stand, which gave Sister the heat without further competition in 2:23, with Magdallah second, James H. third, and Louis D. distanced.

The betting after the first heat was \$160 on Sister to \$130 on the field, and after the second there was a return of the old favoritism, so that Sister brought \$110 to \$20 on all the others. The third heat was somewhat varied by Magdallah taking the first place, and though she broke before reaching the quarter, she was first past the post in 36 1/2 seconds and at the half, in 1:10, she led by two lengths but Sister closed up on her and out-trotted her coming home, winning in 2:23 1/2; James H. taking it easy coming in.

Pool-selling was at an end before the start for the fourth heat, as it was generally conceded that nothing but an accident would prevent Sister from winning, but this estimate was not sustained by the heat. Magdallah took the lead on the first turn, James H. in the second position, Sister third. The quarter was reached in 37 seconds, the leaders flying down the backstretch in 34 seconds, 1:11 to the half. Magdallah and James H. were parallel with and Sister three lengths behind. Closing the gap a trife around the further turn, James H. had the heat safe apparently, though it was short led, as he only beat Magdallah by a length in 2:25. It was somewhat dnek when the harnessing bell rang, and at the expiration of five minutes, had it not been for the white background of the track fence, it would have been difficult for the judges to determine what the horses were doing.

Sister was evidently tired, and the tactics of Goldsmith were to work for a postponement, but it did not avail. The signal was given, and so emphatically that James H. broke; the others opened a wide gap, but it was evident, as they fitted down the track, that he was closing. Men huddled in crowde on the stretch to catch a glimpse. They were all

together a furlong from home. James H. had the lead at the forty-yard mark. He increased it in the last few strides, and came under the wire winner of what can be termed a truly sensational race in 2:26 1/2. The "high rollers" had a heavy fall, the fielders were jubilant; \$30 had won nearly \$300, and the horse with the snakey experiences had gained a grand victory.

Same Day.—Purse, \$1,200; 2:26 class. James H., b g, pedigree not traced—Geo. Bayliss..... 1 3 3 1 Sister, b m, by Admiral—M. Salsbury..... 2 1 1 3 Magdallah, ch m, by Primus—J. Dexter..... 3 2 2 2 Louis D., b g, by King William—L. Duncan..... 4 dis. Time, 2:21, 2:22 1/2, 2:23 1/2, 2:25, 2:26 1/2.

Saratoga.

Aug. 28th—Handicap sweepstakes, for all ages, at \$15 each, with \$500 added, of which \$100 to the second, the third to receive \$50 out of the stakes; four entries; one mile and a furlong. Preakness Stable's ch g Enclid, 4, by Imp. Gleneig, dam The Nun, 108 lbs.....Fisher 1 B. J. Coglin's b m Easter, 5, by Enquirer, dam Mallie W., 101 lbs..... 2 E. J. Baldwin's br c Shenandoah, 3, by Shannon, dam Demirep, 103 lbs. (carried 106 lbs.)..... 3 J. Carter's ch g Beechenbrook, 4, by Imp. Bonnie Scotland, dam Moselle, 95 lbs.....Rivers 4 Time, 1:58 1/2.

Betting in pools: Enclid, \$130; Shenandoah, \$60; and the field, \$35. In the books: 5 to 3 on Enclid, 2 to 1 against Beechenbrook, 5 to 2 against Shenandoah, and 6 to 1 against Easter. Mutuels paid, \$9.

Easter was the first away, Beechenbrook second. At the stand Enclid took the lead attended by Shenandoah, Enclid soon drew away and won handily by two lengths in 1:58 1/2. Easter beat Shenandoah a length for the place.

Aug. 29—Handicap sweepstakes; for all ages; at \$20 each, with \$700 added, of which \$150 to the second, and \$50 to the third; four entries; mile and five furlongs. L. Curran's h g Sovereign Pat, 4, by Pat Malloy, dam Nora, 108 lbs..... 1 E. J. Baldwin's blk f Freda, 3, by Wildside, dam Frolic, 102 lbs..... 2 P. J. Flynn's ch g Glenarm, 5, by Imp. Glengary, dam Arizona, 110 lbs..... 3 O. Bowe's br g Compensation, 6, by Catesby, dam Australia, 113 lbs..... 4 Time, 2:52 1/2.

Betting in pools: Freda, \$100; Compensation, \$50 Sovereign Pat, \$35, and Glenarm, \$20. Betting: 10 to 9 on Freda, 3 to 1 each against Sovereign Pat and Compensation, and 8 to 1 against Glenarm. Mutuels paid, \$21.70.

Compensation was first to show, Freda took the lead as the horses ran out of the chute, and held it to the last furlong, where Sovereign Pat challenged, followed by Glenarm. After a beautiful finish Sovereign Pat won by a head in 2:52 1/2. Freda beating Glenarm a head for the place.

The exhibition of trotting stallions at the recent Lexington Fair was pronounced the finest ever seen in Kentucky. The list included Hambletonian Mambrino, Ahdalbrino, Paladine, Alexander Sherman, Lord Russell, Chichester, Harold, Belmont, Dictator, Greenfield, Black's Hsmbletonian, King Rene, Enfield, Flaco, Sherman's Hambletonian, Wildwood, Simmons, Lysander, Post Boy and Sir Walter.

THE KENNEL.

A Despicable Act.

It is with extreme regret that we are compelled to chronicle the death of the Llewellyn setter dog, Macgregor, owned by Ike N. Aldrich, of Marysville. "Gregg," as the dog was familiarly called by his master, always accompanied Mr. Aldrich (who is under-sheriff of Yuba county) to and from his office. Some miserable creature in hmen form threw poison into the court-house yard and the dog ate it and soon died from its effects. Macgregor was imported from the kennels of Arnold Barges, at Hillsdale, Michigan, and was most royally bred, being by Chsmption Rob Roy (Fred, ex Rhoehel), his dam being Champion Queen Mah (Dan, ex Nellie). Rob Roy won at five English field trials, among the different events being the Shrewsbury championship. Queen Mah was never exhibited but that she won first prize, and was probably the finest-formed female setter ever shown in America. "Gregg" was in color black, white and tan, and was an elegant specimen of the setter from nose to tip of tail. He could have won upon the bench in the very hottest company. He never ran in public, but would have run in the all-aged stake at the Pacific Field Trial Club's trials next November. It was claimed for him that he had a rare nose, was perfectly staunch, fast, tractable, and—as his form would indicate—possessed of remarkable endurance. Mr. Aldrich's affection for his favorite dog was remarkable, and only those who have experienced the loss of a faithful field companion can understand and comprehend his keen sorrow at Macgregor's death. His loss is a great one to the breeding interests of California. We hope the vile creature who destroyed "Gregg" will be discovered, and that an indignant community will give him one hundred lashes on his back and then tar and feather him.—Sunday Capital.

"Can dogs find their way home from a distance?" is a question frequently asked. An exchange answers the query thus: "It's according to the dog. If it's one you want to get rid of, he can find his way back from California. If it is a good one, he's apt to get lost if he goes around the corner."

No less than forty important coursing events are announced to take place in England from about the middle of September to the end of December. The great coursing events, however, of world-wide interest, take place in Winter and Spring.

Sportsmen requiring a hunting dog of undoubted pedigree and careful selection in breeding, can find what they want by attending Mr. Leavesley's annual sale on Sept. 23d, 24th and 25th, at J. W. Morshead's livery stable, 25 Washington Street.

A new coursing club is in process of organization at Stockton, to be called the San Joaquin Valley Coursing Club. Some fifty lovers of the sport have signified their intention of joining.

Greyhound fanciers will find something of interest in the advertisement of H. W. Huntington, of Brooklyn, N. Y. in another column.

## Premiums at Oakland.

Thoroughbred stallion, 3 years old—Joseph Cairn Simpson's Sir Thad.

Thoroughbred mare, 3 years old—Joseph Cairn Simpson's Lady Viva.

Families, other than thoroughbred—B. Boorman, Julia and five colts.

Horses of all work—Irwin Ayres, 3-year-old stallion Alpheus, first; J. J. Fairbanks, 3-year-old stallion Setoyomi, second. Two-year-olds—W. H. Lee, stallion Washington, first. Colt under one year—B. Boorman's J. G. Blaine. Horses of all work, 3 years and over—Ben E. Harris' mare, Frankie Eaton.

Roadster stallions, over 4 years—H. A. Van Amringe's Washington, first; Ben E. Harris' Adventure, second.

Three-year-old stallion—J. H. Tennant, Alert.

Two-year-old stallion—C. H. Bowers' Waterford, first; S. Scott's Ironclad, Jr., second. Yearlings—Ben E. Harris' Sir Whipple.

Roadsters—Sucking horse colt—Ben E. Harris' Relief.

Roadsters—Mare or gelding 4 years old and over—J. H. Tennant's Twinkle, first; Irwin Ayres' Gns Wilkes, second.

Three-year-olds—J. H. Tennant's Pinole, Jr. Two-year-old—J. H. Tennant's Parthena.

Matched span—Dr. Cowper's Draper and Roscoe, first; P. Pumpyea's Lew and Pete, second.

Draft stallions, 3 years and over—E. R. Charles' Pointsmen, first; B. Boorman's Gladiator, second. Two-year-olds—Timothy Keegan's Napoleon. One-year-old—B. Boorman's Sir Julian.

Draft mare, 3 years and over—B. Boorman's Clara Bell.

Jacks, 2 years and over—Sylvester Scott's Blackhawk.

Jennies, two years and over—Sylvester Scott's Fannie.

Carriage horses—Ben E. Harris' Colonel and Elmo, first. Moses Hopkin's Lucy H. and Mollie H., second.

Saddle horses—Ben E. Harris' Leo, first; F. Lapham's Richard, second.

Sweepstakes, stallions—L. J. Rose's Sultan, first; Sabe Harris' Orient, second.

## CATTLE.

Durham—Bull, three years, Forest King, first; entered by Colonel Younger; Royal Oxford, second, entered by Sylvester Scott.

Bull, 2 years—Spring, first by A. Lilienskrantz, Kinkleington; Forest Home, second, entered by Ed. Younger.

Bull, 1 year—Fifth Forest King, entered by Colonel Younger.

Bull calf—Sixth Forest King, entered by Colonel Younger.

Durham—Cow, 3 years, Nevada Bell 2d, first; entered by Colonel Younger. Lady Maynard second; entered by Sylvester Scott.

Cow, 2 years, 14th Red Dolly, first, entered by Colonel Younger. 10th Rose of Forest Home, second; entered by Edward Younger.

Cow, 1 year, Lady Oxford, entered by Sylvester Scott.

Heifer calf, 7th Sprightly, entered by Col. Younger.

Ayshire cattle, Bull, 3 years—Archie, first; Melanethon, second; entered by George Bement.

Bull, 2 years—Hector; entered by George Bement.

Bull, 1 year—San Mateo; entered by George Bement.

Bull calf—Clipper; entered by George Bement.

Cow, 3 years—Highland Mary, first; Lady Faxon, second; entered by George Bement.

Cow, 2 years—Sybill; entered by George Bement.

Cow, 1 year—Marian; entered by George Bement.

Heifer calf—Sybil; entered by George Bement.

Jerseys, Alderneys or Guernseys, Bull, 3 years—William of Scituate, entered by W. D. Bliss.

Bull, 2 years—William, first, entered by Thomas Ward; La Hiras Boy, entered by James McCue.

Bull, 1 year—Bismarck, first, entered by F. Delger; John S., second, entered by A. Martiu.

Bull calf—Oakland Chief, entered by Thomas Ward.

Cow, three years—Bonita, first, entered by Thomas Ward; Flora Fourth, entered by A. Martin.

Cow, 2 years—Oakland Queen, first, entered by Thomas Ward; Corday, second, entered by F. Delger.

Cow, 1 year—Lady Wilson, entered by Thomas Ward.

Heifer calf—Bonita Second, entered by Thomas Ward.

Hereford, Bull, 1 year—Count Tredegar, first, entered by Wm. Kohl.

Bull calf—Duke of Normandy, entered by Wm. Kohl.

Cow, 3 years—Violetta Second, first; Tidy Tenth, second; entered by Wm. Kohl.

Cow, 2 years—Temptress First, first; Triumph Theora, second; entered by Wm. Kohl.

Heifer calf—May Third, entered by Wm. Kohl.

Holstein bull, 3 years—Anson, entered by Mrs. E. D. Knott.

Bull, 1 year—Juror First, entered by H. W. Meek.

Bull calf—Brutus, entered by H. W. Meek.

Cow, 2 years—Lady Bertha, first; Syracuse Maid, second; entered by H. W. Meek.

Heifer calf—Alameda Maid, entered by H. W. Meek.

Sweepstakes, Durham—Best bull, Forest King, first, entered by Colonel Younger; Royal Oxford, second, entered by Sylvester Scott.

Best cow—Jessie Maynard, first; Nevada Belle, second; entered by Colonel Younger.

Sweepstakes, Jersey, Alderney, Ayrshire, etc.—Best bull, Archie, first, entered by George Bement; William of Scituate, second, entered by W. D. Bliss.

Best cow—Bonita, first, entered by Thomas Ward; Elaine, second, entered by George Bement.

Polled Angus—Special premium.

Herds of cattle, Durham—Best herd over 2 years; bull, Forest King; cows, Nevada Belle, Second Rose of Forest Home, Jessie Maynard and Fourteenth Red Dolly, entered by Colonel Younger.

Best herd under 2 years—Bull, Sixth Forest King. Cows, Fourth Oxford Rose, Twelfth Rose of Forest Home, Red Dolly, Fifteenth and Fourteenth Rose of Forest Home, entered by Colonel Younger.

Herds of cattle, Jerseys—Best herd over 2 years; bull, William; cows, Oakland Queen, Lucy Second, Bonita and Lady Wickham, entered by Thomas Ward.

Best herd under 2 years; bull, Oakland Chief; cows, Mand, Lady Wilson, Jennie and Bonita Second, entered by Thomas Ward.

Holstein and Hereford herds—Best herd over 2 years; bull, Archie; cows, Elaine, Nydia Second, Lady Faron and Highland Mary, entered by George Bement.

Best herd under 2 years Holstein—Bull, Jrnor, Cows, Lady Bertha, Aggie Lizzie, Aggie Miller and Rigoletto, entered by H. W. Meek.

Hereford—The judges recommended a special premium for the Herefords.

Graded cattle—Widow, 3 years, first prize, entered by Colonel Younger, Devon, 2 years, entered by Thomas Ward.

## HERD AND SWINE.

## Contagious Pleuro-Pneumonia.

[N. H. Paaren, M. D., in Prairie Farmer.]

At last this dreaded scourge has made its appearance in the West for certain, and the cattle interests of this and other western States and Territories have received a shock, from which recovery will be slow.

A number of animals having died in certain valuable herds under circumstances which were sufficiently obscure to arouse suspicion. Investigations were commenced cautiously by the chief of the National Bureau of Animal Industry, Dr. D. E. Salmon, who soon ascertained that the losses were due to the existence of contagious pleuro-pneumonia. The first authentic case was discovered in the Jersey herd owned by John Boyd, Esq., of Elmhurst, Ill.; and by careful inquiry it was soon found that other herds were similarly affected.

The origin of the disease has been traced to Virginia, Cass Co., Illinois, where a sale of Jersey cattle was held by A. G. Epler, on February 21st. Accessions to this sale were received from Ohio, by way of Indianapolis and Bloomington. Three of the animals sold at Epler's auction went to M. G. Clarke, Geneva, Ill., who soon thereafter lost six animals out of his herd, four of which undoubtedly died from contagious pleuro-pneumonia. Mr. Clarke sold one animal to Mr. Boyd, and one to Mr. Coggs, at Elmhurst, and the story of the disease here is already known. Mr. Boyd has lost three, and has at present nine more down with the disease, most of which diseased animals averaged in value about \$1,000 each. At the same sale one cow went to Mr. Keefer at Sterling, and another to Rushville, Ill. Other cases of contagious pleuro-pneumonia have been discovered in the Jersey herds of D. H. and S. T. Tripp, and of O. J. Bailey, near Peoria, Ill. During the past three months, several trausers by sale have been made from infected herds in Illinois to neighboring States.

Dr. Paaren, the Illinois State Veterinarian, and Dr. Salmon, chief of the Federal Bureau of Animal Industry, on Aug. 22d had an official conference with Governor Hamilton, at Springfield, Ill., at which it was decided that after more information has been obtained, the said State Veterinarian should make a formal report, upon which the Governor would base the issuance of a proclamation of quarantine. Meanwhile the State Veterinarian has issued temporary orders of quarantine to all persons who have either diseased or sufficiently exposed cattle in their possession.

For the information of all interested, we hereby reproduce a concise description of the symptoms of contagious pleuro-pneumonia, as contained in circular No. 1, issued by the State Veterinarian:

Symptoms.—In the course of from three weeks to three months, or more, after exposure to infection, the first indication of the presence of the disease will be a rise of the temperature of the body, which may be definitely ascertained by inserting the bulb of a clinical thermometer into the rectum. The normal temperature of horned cattle varies from 100-2.5 deg. Fahr. to 102 deg. Fahr. When it rises above 102 deg. Fahr. or 103 deg. Fahr., the animal is diseased. In the beginning of the disease there is a tendency to isolation from the rest of the herd, when in the field; also slight listlessness, unequal external temperature, a less keen appetite, irregularity in rumination, slightly diminished milk secretion, occasional erection of the hair and slight shivering. Then there is occasionally a slight, dry, short and single cough, especially after rising, drinking or emerging from the stable. Gradually the cough becomes more frequent, harsh, and accompanied with more or less painful efforts, such as arching of the back, and extension of the neck and head. The coat becomes unhealthy looking, the hairs staring, especially along the back and loins. Pinching or pressure applied along the back, may cause the animal to shrink more than usually. The muzzle is alternately dry and moist, and the limbs, horns and ears variably cold or warm. The bowels become costive, the urine scanty, and of darker color; the breathing becomes quickened, the pulse more frequent, and there is more or less slimy or sticky discharge from the nose. The animal becomes sensitive to damp and chilly weather, and seeks shelter under trees, stacks or in ditches, away from the rest of the herd. A physical examination of the chest, by means of percussion and auscultation, will reveal more or less extensive organic changes and lesions, which, however, can only be properly appreciated by the professional observer. The pulse varies from 60 to 70 or 80 per minute, and the temperature rises to 104 deg. Fahr. or 107 deg. Fahr. The animal becomes more sensitive to pressure applied along the back, and especially to striking the ribs with the knuckles. The peculiar short, sharp cough is emitted with the head and neck outstretched, the mouth open and the tongue protruding, while the body assumes a crouched position.

The symptoms named, which greatly vary in prominence or intensity, and, in fact, may be so apparently trifling as to attract only passing notice by the owner or attendant, and which constitute the first stage of pleuro-pneumonia, may continue for many weeks, when, often suddenly, the second stage makes its appearance. This is ushered in by more or less intense febrile symptoms. The pulse becomes quicker, even as high as a hundred beats per minute, at the same time the breathing becomes more accelerated and labored, more or less constantly accompanied with a grunt, especially if the pleura is affected. There is more or less shivering, with alternate temperature of the horns, ears, and limbs; the skin lies tight to the body; the muzzle is dry; appetite is lost; the bowels are very costive; the urine more scanty and high colored, and the milk secretion ceases. The animal evinces disinclination to move, and does so with more or less stiffness. The act of swallowing liquids or solids excites coughing, which becomes more and more frequent, painful, and accompanied with groans and moans. Pressure applied between the ribs and along the back causes the animal to crouch and grunt. The temperature rises to 107 deg. F., or more. The animal now almost constantly stands in a fixed position, with the back arched, limbs extended, the elbows turned outward as far as possible from the chest, and the head protruding. With difficulty it is made to move, breathes rapidly and laborious with expanded nostrils, from which latter, as well as from the eyes, a thick, purulent fluid emanates. There is constant moaning and grinding of the teeth. Gradually the breath becomes very offensive; saliva flows from the partially open mouth, and there may be occasional twitching of the muscles of the flanks; the limbs, horns and ears are cold, and more or less dropsical swelling appears between the jaws and under the chest. When, from emaciation and exhaustion the animal lies down, it prefers to rest on the brisket, or on the affected side, to facilitate the motions of the chest; in either position the head being extended as far as possible. More or less floating and a very fetid diarrhoea appear in the

last stage, and death may ensue in from one to three weeks from the beginning of the second stage.

The above symptoms may prevail with more or less intensity, or with more or less rapidity of development. The disease does not, however, always terminate fatally. Recovery may occur during the first or second stages; but as the normal condition of the organs is rarely regained, the recovery can only be regarded as incomplete, and is very slow, extending over many months, while the animal is constantly capable of disseminating the disease among others.

## Three Systems of Milk Setting.

The *Milch Zeitung* gives an account of careful tests of three experts of the keeping and other qualities of fifty samples of butter, made at different places, from cream separated from the milk in different ways, and especially by the centrifugal machine, by the ice-cooling or Swartz system, and by the ordinary Holstein method, where the milk, without special cooling, is set at once in shallow pans in a cellar and kept at about 56 deg. or 57 deg. Fahr. Readers engaged in dairying will read this experience with interest, and perhaps he led to do a little testing on their own account.

In respect to quality at the outset, the samples of butter from cream gathered by the oldest methods of simple cool setting took the lead: 50 per cent. of these samples were rated as fine or very fine, against 30 per cent. of those by the ice-cooling system, and 35 per cent. by the centrifugal; 50 per cent. of the samples from centrifugal cream were rated as simply good against 29 per cent. by the ice-cooling system, and 22 per cent. by the simple cool setting. This difference in favor of the older systems against the centrifugal is attributed by the writer rather to the greater care taken in the manufacture of the butter in the long-established dairies than to any real defect in the centrifugal cream, and that this greater care appears to be actually necessary in order to secure such good results appears to be indicated by the fact that 11 per cent. of the samples from cream gathered by the simple cooling system were either bad or only tolerably, while none of the samples from the other methods were rated lower than moderately good.

Comparing different modes of treatment of the centrifugal cream, it was clearly shown that for making the best butter by this system the cream should be cooled immediately on drawing it from the separator, and that the lower the temperature to which it is cooled, the better the product. On comparing the two methods practiced of souring the cream to prepare it for the churn—one by adding sour milk, cream or buttermilk to the sweet cream; the other, by warming the cream—a decided result was found in favor of the latter method so far as concerned cream separated either by the cooling system or the ice-cooling system; 62 per cent. of samples from cream soured by the latter method were rated as superior in quality, against 33 per cent. of the samples from cream soured in the other way. But, singularly enough, when butter from centrifugal cream was subjected to a like comparison, it appeared that the best results were obtained when the cream was soured by the addition of sour milk or cream.

After this preliminary testing, the samples of butter were stored in a cool, airy room, especially for the comparison of the keeping qualities of butter from centrifugal cream with that from cream separated by the two other methods; the result showed little difference in favor of the one system or the other; as a whole, the butter from the centrifugal cream kept as well and no better than that from the other cream, but with this interesting exception, that the butters of superior quality from centrifugal cream retained their fine quality better than did butters of like quality from cream obtained by the other methods; hence the conclusion that the quicker the cream is separated from the milk and the fresher its condition, or the less time there is for any changes to take place in the milk while the cream is being removed, the better are the chances for getting fine butter that will hold its good qualities.

Comparing the system of simple cool setting with the ice-cold setting, the butter from the latter showed better keeping qualities; of the samples from this system, 50 per cent. kept either well or very well, against 43 per cent. of the samples from the cool setting; and, what was worse for the cool setting, it was found that 31 per cent. of the samples kept badly or very badly, against 20 per cent. of the samples from the ice-cooling system, and against 10 per cent. from centrifugal cream. As to the effect of the manner of souring the cream on the keeping quality, the same difference was observed as in respect to quality at the outset; cream from either of the older systems, soured by warming, gave the best butter for keeping, while centrifugal cream, prepared by the addition of souring material, gave the best result in this respect.

## The Cattle Plague.

Prof. James Law, the celebrated veterinary professor of Cornell University, says concerning the pleuro-pneumonia:

First.—The plague having been allowed to reach the West, it is no longer safe to purchase stock cattle that have been carried by rail or other public conveyance, which have been in public sales, markets, fairs or other assemblages of cattle, or that have been in contact with cattle so exposed.

Second.—Stock cattle should be taken only from well-known herds that have had no deaths nor sickness for six months nor any additions made to their number in that length of time, nor any contact with adjacent or passing herds.

Third.—Stock cattle should not be carried home by rail or other public conveyance unless these shall have been first thoroughly cleansed and disinfected, and unless the train has carried no other cattle on that trip.

Fourth.—Any stock cattle carried home by rail as above, even when this is done under disinfectant precautions, should be carefully secluded in quarantine under separate attendance for three months, until they are found non-infecting.

Fifth.—Butchers and dealers handling fat stock destined for slaughter should on no account allow them or their products to come in contact with stock cattle.

Sixth.—All public carrying companies should cleanse all cattle-carrying cars and boats, and disinfect them with a lime whitewash containing four ounces chloride of lime to each gallon of water.

Seventh.—These precautions should be kept up until by Federal and State action the plague shall have been stamped out, should this still be possible.

Teaching a Calf to Drink.

Many a reader, man as well as boy, will recognize the truthfulness and enjoy the humor of the following description of experience in giving the calf its first lessons of how to drink properly. We take it from the Irish Farmers' Gazette: Those who have had the mournful experience know that there is nothing more trying to the temper than the operation of teaching a young calf to drink. The process is familiar to every man who has brought up a calf from infancy. You seize a pail of warm milk, go into the stable, catch the calf by the ears, back him into a corner, and bestride his neck. The idiot rather likes this, and while you are reaching for the pail he employs his time in slobbering the lower corners of your jacket. You discover what the blockhead is about, and box his ears. You can't help it. You feel that way, and let him have it. But the calf can't tell for the life of him why he has been struck, and he gives a sudden and unexpected "fionnee." He believes he will go and stay on the other side of the stable, but he doesn't announce this beforehand. He starts on the impulse of the moment, and you can't tell just when he arrives there. You ride along with him a little way. But the laws of gravitation are always about the same. Your legs, one on each side of the critter, keeps up with the calf for about a second, but your body doesn't. You slide over the calf, and your back kisses the floor. Your head is soaking in the pail of milk. When you feel you are mad—uncommonly so. Milk runs from your hair, and imprecations out of your mouth, and you solemnly declare that you will teach that calf to drink or break his neck. The calf doesn't know of this resolve, and he glares at you in a stupid fright across the stable. He was not aware that he was the cause of your downfall, and wonders ignorantly what is the matter. You don't try to explain it to him, but furiously catch him by the ears, look back over your shoulder at the milk pail, and back up toward it, dragging the calf after you. The calf is out of wind, and you haven't a particle of grace left in your heart. You are astride the calf's neck, and jamming the fingers of one hand into his mouth, you place the other on the back of his head and shove his nose into the pail, fully resolved to strangle him if he don't drink. The calf holds perfectly still—ominously so—and there is silence for the space of half a minute, at the end of which time the blockhead, who hasn't drunk a drop, suddenly makes a splurge, knocks the pail over; you are again reduced to a horizontal from a perpendicular, and when you rise the excitement is intense. You have been soaked with milk, "slobbered" on, and hurt. Not a drop of milk has gone down the brute's throat, and there he stands glaring at you, ready to finish you with another free ride whenever you want to go. With an affidavit you seize the empty pail, and hobble out of the pen, fully resolved to let the four-footed fool starve; and thus endeth the first lesson.

National Owners' and Drivers' Association.

The following declaration of principles is being circulated for signature among the owners and drivers of the Eastern States:

Owners and drivers of trotting and pacing horses throughout this country have felt the want of concerted action, particularly when questions arise affecting their interests in public racing.

Now, it is a well-known principle in all governments that the greatest security a class of men can have is to be obtained by placing their interests in the keeping of a representative number of their own body, directly responsible to them, with a common interest at stake.

The affairs of owners and drivers are now so vast and far-reaching, that the time is ripe for them to form a protective association, its objects being:

First.—To maintain a more perfect understanding with driving associations, in good standing, by conferring as to purses, classes, entrance fees, conditions, and like matters, in which owners are as deeply interested as the associations.

Second.—To secure a voice or attentive hearing in the Councils of the Congress and Board of Review of the National Trotting Association, which body is now solely composed of the driving associations. Little argument is called for on this point. As owners and drivers are mutually interested with the association in the success of a meeting, and we essentially to it, they naturally feel the necessity of having a regularly authorized Board of Representatives to speak for them.

The National Trotting Association is doing good service in the promotion of turf interests, and is a valuable aid to the various associations which have called it into being. It can, therefore, extend its power and influence by working hand in hand with the National Owners' and Drivers' Association, which is in course of establishment, to further strengthen and support legitimate racing on a fair basis, to censure and punish any dishonorable act of owner or driver, to shelter and defend the innocent, and to uphold and protect the rights of all concerned.

For these reasons the undersigned agree to become members of the National Owners' and Drivers' Association, and to pay to the duly-appointed Treasurer of said Association a membership fee of not more than \$25 for an owner, and \$15 for a driver. This amount shall become due immediately after its organization, pursuant to a call by the provisional President for a meeting of the subscribers, to be held on or before Jan. 1, 1885, when the aims and objects of the Association will be fully discussed, the constitution and by-laws adopted, and other steps taken to render it a powerful spokesman for the owners and drivers of the United States and Canada.

W. C. FRANCE, President, } Pro Tem.
E. C. WALKER, Secretary, }

Dated at Hartford, Conn., Aug. 25, 1884.

Harry Wilkes, 2:16, one of the great trotters of the year, is eight years old and owned by Wm. Frauce, of Jersey City. He was purchased before he was two years old, for \$500. Last season he obtained a record of 2:23. Mr. Frauce bought him last June for \$6,000, and put him in the hands of his old employee, Frank VanNess, who formerly drove France's Alexander.

Fred Archer, the English jockey, has had 377 mounts, winning 170 to 207 lost. C. Wood is second with 323 mounts, 83 firsts and 240 losses.

Maud S. wears a 15 oz. shoe forward and also carries a 4 oz. toe weight in her races. Jay-Eye-See wears a 10 oz. shoe and no weights.

The Fair at Chico.

The attendance on the opening day was somewhat less than the average, but very good. The first race on the programme was mile heats for two-year-old trotters. Belle A. was favorite in the betting, selling for as much as all the others, and she won both heats in a jog.

Table with race results for Chico, Sept. 2d. Includes entries for Belle A., Secretary, Paeba, California, Geo. Wapple, Starlight, and time 3:04, 3:01.

The 2:30 class only showing two starters, the race was declared off and the entrance money divided between Bell Spencer and Telegraph, the two that appeared when the race was called. As a substitute a special was given for Telegraph and Fawn, with the following result:

Table with race results for Chico, Sept. 2d. Includes entries for Telegraph, Fawn, and time 2:43, 2:48, 2:46, 2:47.

On the second day the race was a dash of a mile for yearlings, with positions at the start in this order: Climax, Maud Sherman and St. James. Climax favorite at \$10 to \$6 for the field.

Table with race results for Chico, Sept. 3d. Includes entries for Maud Sherman, Climax, St. James, and time 8:32.

Table with race results for Chico, Sept. 3d. Includes entries for Chevalier, Sally McKim, Bob Ingersoll, and time 3:00, 2:52, 3:00.

The next race was a free for all pacers and trotters, for a purse of \$400, with Bell Spencer, trotter, and Fred Ackerman, Prince and Robert E., pacers, engaged.

In the pools Belle sold for \$10, Ackerman for \$5 and the field brought \$3. Spencer acted badly in scoring and in consequence it took thirteen trials before they got the word to a splendid start. Spencer broke at the tanks and everything passed her. She got squared in the backstretch and trotted very fast around the far turn, Prince in the lead and in rounding in homestretch, she was about a neck ahead of him, Ackerman a good third; but another wild break by Spencer and all chances for her to win the heat was lost. Prince first, Ackerman second, Belle third, Robert E. distanced. The second heat was much the same as the first, Spencer acting badly but trotting in spots like a wild horse. Prince first, Ackerman bang up; the third heat was a repetition of the second.

Table with race results for Chico, Sept. 3d. Includes entries for Prince, Fred Ackerman, Belle Spencer, Robert E., and time 2:36, 2:29, 2:25.

Table with race results for Chico, Sept. 4th. Includes entries for Baby Mine, Happy Jim, Telegraph, Fawn, and time 2:36, 2:36, 2:34, 2:35, 2:36.

Table with race results for Chico, Sept. 4th. Includes entries for May Queen, Lady Clark, Verona, and time 2:39, 2:49, 2:48, 2:48.

Table with race results for Chico, Sept. 5th. Includes entries for Apex, Belle A., George Wapple, and time 2:56, 2:42.

Table with race results for Chico, Sept. 5th. Includes entries for Secretary, Paeba, Starlight, and time not given.

Table with race results for Chico, Sept. 6th. Includes entries for Prince, Fred Ackerman, Robert E., and time 2:29, 2:29, 2:30.

OCCASIONALLY.

The Record in Montana.

For one year the record for the fastest mile trotted in Montana, by any horse, stood at 2:30, and was captured by Mambrino Diamond. On July 4th of this year, this record was lowered to 2:29 by Tempest, an Oregon horse. The poor horse held it but for twenty-four hours, when Ranchero, owned by Sam Scott, of Deer Lodge, trotted a full mile, July 5th, over the same track, in 2:25. Ranchero thus held the "brass collar" as king of the Montana turf until Saturday, August 16, 1884, when Ben Lomond, Jr., owned by Hundley & Clarke, of Riverside Stock Farm, came off with the Territorial honors, and to-day stands the fastest trotting horse in Montana. On August 16th Ben trotted a full mile, in a race of mile heats 3-in-5 with Tempest, without a skip or a break, and came under the wire in 2:23, as per the official record. However, the horsemen and spectators on the ground timed the mile from 2:26 to 2:27. The horse was held from the three-quarter pole to the wire, and it was the general opinion among the horsemen at the track, that had the horse been driven the entire mile he would have crossed the wire in 2:23 or 2:24.

The track at Helena being very slow, partly on account of the high altitude, and it being more of a running track than trotting track, Messrs. Hundley & Clarke are to be complimented on owning a stallion that could turn the Providence or Buffalo track in about 2:19, as there is at least five seconds difference between our track and the two just mentioned.—Husbandman.

Buggy Race at the Stockton Fair.

A business man of Stockton having offered a set of harness as a prize for a buggy race to trotted during the fair and under the direction of the association Secretary La Rue has received the following entries:

Table with race results for Stockton Fair. Includes entries for Blaine, Jeuny Lind, Maude W. W. W., and Roberto.

Roberto, ch g, by Gen. McClellan—Dr. R. W. Henderson.

Three stallions were shipped from this city to Japan by the last steamer, to be used for stock purposes. One of these was Duroc, by Nephew, dam by David Hill, bred by Capt. W. G. Phelps, of Stockton. Of the others one was by Admiral from a Belmont mare, and the other a grade Norman draft stallion bred by Lux & Miller.

Mr. Bonner's List.

I asked Mr. Bonner if he wouldn't give me an idea of what he had in his stables, in such language as would be of interest to the general reader. He laughingly assented, and with characteristic modesty began. He said, "In the first place we have Dexter, with what is technically called a record of 2:17, made on Buffalo Park when it was 27 feet 8 inches over a mile. It has since been reduced to an exact mile, so some of its managers inform me, and is now at least three seconds faster than it was then. Five thousand people saw him trot on another slow track, (Fashion), in 2:16, without a break or a skip. Then follow Grafton, who was timed at Cleveland by a large number of well-known gentlemen, in 2:15; Joe Elliott, who trotted a public trial in Mystic Park, Boston, in 2:15; Startle, who four days before he was five years old, with Commodore Dodge, Robert Fletcher and Simon Hoagland in the judges' stand, trotted a previously advertised trial in 2:13; he afterwards repeatedly trotted in 2:19 in Fleetwood Park; Pocahontas, the only horse besides Startle that has ever trotted on Fleetwood in 2:19; she has since then trotted in 2:17 on the three-quarter exercising track on my farm; Wellesley Boy, who has a record as a five-year-old of 2:26, and who when seven years old trotted on my track in 2:19; Peerless, who carried the great trainer and honest driver, the late Hiram Woodruff, in 2:23 to wagon, the fastest mile he ever drove any horse in public or private; Molsey, with a record of 2:21 and trial in 2:18; Music, with a record of 2:21 in a fourth mile, and a trial in 2:20 on a three-quarter track, which is not adapted to her long stride; John Taylor, with a record on Fleetwood of 2:25; Walton, the four-year-old, by Berger, that trotted a trial last August, several months before I bought him, at Poughkeepsie, in 2:27; Eric, who has the fastest four-year-old record, 2:28, and Lady Stout, who has the fastest three-year-old record, 2:29. In addition to the above are the following who have trotted in 2:30 or better: Astoria, fall sister to Dexter; Mamie B., by Edward Everett; Lady Hughes, by Jupiter; Ada Duroc, by Messenger Duroc; Uncle Sam, old Lady Moscow's grandson; Malice, by Woodford Mambrino, dam by Alexander's Abdallah; Billy Button, by Edward Everett, dam the dam of Lottery; Bruno, by Hambletonia, and Prince Imperial, Flora Temple's colt."

Mr. J. D. Ridley, the new owner of Pbil Thompson, is said to have suffered severely in pocket at Hartford where his horse was beaten in straight heats by the rising star, Maud Messenger. This mare is a daughter of Messenger Chief, he by Abdallah Pilot, he by Alexander's Abdallah, son of Rysdyk's Hambletonian. The dam of Messenger Chief was by Mambrino Messenger, a son of Mambrino Paymaster. The dam of Abdallah Pilot was Blandina, by Mambrino Chief. His name indicates a Pilot cross, which, however, he does not possess. Blandina was also the dam of Swiger, sire of Winnie Wick and several others in the 2:30 list. Another of Blandina's colts is King Rene, sire of Fugae (2:27), and still another is the stallion Redwood, owned by Mr. Edgcomb of Cornish, Oxford Co., Me.

The new Los Angeles Agricultural Association is gaining strength, and \$700 has already been subscribed to guarantee its success. The fair will be held at Downey some time the coming Fall, and will be devoted to the exhibit of live stock, horticultural and agricultural produce, etc. The premium list will amount to about \$1,000. The public will be admitted free, but an entry fee will be charged for all articles exhibited. No pool selling or gambling will be allowed on the grounds, and the sale of liquor will also be prohibited.—Mirror.

Sam Hill, by Electioneer, one of the \$15,000 team owned by Mr. Charles Schwartz, of Chicago, was drawn from his race at the Buffalo meeting because he persisted in coming to the wire on a pace instead of a trot. It is thought that he will be allowed to pace all the time.

Firebrand, the noted running mate, cost Campbell, his owner, just \$350 in Philadelphia. The horse promises to be a profitable investment. He has recently closed an engagement of seven exhibitions as mate to the pacer Westmont, which netted Campbell \$1,750.

The Bellfounder stallion, Dexter, trotted against time at Portland on the 31st ult., to beat B. B.'s record of 2:23 but failed to do it. He made the first trial in 2:24, the second in 2:25, and the third in 2:28. Only the second trial was officially timed.

Chimera, one of Mr. P. Lorillard's Mortemer two-year-olds has been trotted out with the expectations that she will develop into a first-class three-year-old. Her winnings so far amount to \$4,075.

Ben Patchen, sire of France's Alexander, died at Jersey ville, Mo., on the 16th. He was 24 years old, and the property of W. T. Dickson, of St. Louis.

Mr. Acker has returned to Oregon without B. B., having sold the horse to Jas. McCord for \$5,000.

STABLE AND PADDOCK.

During this hot, dry weather colts and young horses will need some special attention. The pasture is not as nutritious as it was earlier in the season, and there is danger of the water they have to drink becoming stagnated, which is not good for them. A small feed of new shaf oats once or twice a day will do them much good and assist in their growth.

No one who has had the handling of work horses can have failed to see with what relish they enjoy rolling, especially after a day's labor in hot weather. People used to say that no harm could come to a mule from over-work if given a chance for a dirt bath. It is noticeable, too, that this class of animals always select, if within their reach, a sand patch, or freshly plowed soil. I think there is no question as to the propriety of letting the animals follow their own instinct in matters of this kind. I know that those having the care of stable stock dialike to have them roll in "duety dirt" as it adds to the labor of polishing the coat, but where clean, pure sand is used this objection is removed.

I have never seen a rolling shed arranged, but have a plan that I think would answer well. I call it a shed, although it should be protected so that rain or snow can be excluded at all times. Have a space any twelve to twenty feet square to give sufficient room for the horse to tumble about in. Let the bed be raised to prevent water from running into the enclosure, and keep a good body of clean sharp sand on this bed or bottom, not allowing any filth to mix with the sand. This will furnish a desirable place, both in winter and summer, and one satisfactory to both animal and owner.

THE DRAMA.

Vienna Gardens.

Politics are now boiling hot in our midst, and this, with the presence of the circus, of course, plays havoc with both first class and second class houses. While the streets are crowded during the fine nights of late, from one end to the other with political clubs parading in fine uniforms with bands of music before them, the theatres must suffer, and it's most likely will be so until the campaign ends. The honsees have been small all round this week and notably so at the Vienna. We have already indorsed the performance of the Nashville Students, and still hold they give a true, faithful, and very interesting performance, but it is too similar in dress, design, and incident to be attractive to an exacting, change-loving people like ours. This similarity of performance, at times tiresome, always prejudicial, and against which we cautioned the troupe last week, combined with politics and lovely nights, has had much to do with the poor houses during the week. It matters not how clever a troupe may be, if they repeat themselves every night, or appear to do so, they cannot succeed in San Francisco, at least for any length of time. We have had several notable instances during the last two years of specialty troupes, even of greater pretensions than the Nashville Students failing through repetition. The essence of theatrical success is variety of merit, and except in rare cases, the one cannot be had without the other. We again assert the Nashville Students are good, but they kill themselves by sameness. Last week we made a mistake in the name of the comedienne of the party. It should have been Miss Bell instead of Miss Walker. We speak thus in a kindly spirit of advice, for from the first we have enjoyed their singing and acting very much. Many others have done the same.

John Turner had an argument with the judges during the trotting of the 2.28 race at the Hartford meeting, and "Veritas" thus describes it in the Spirit: "I don't think Lily is fast enough to beat the stallion," Turner remarked to me, as we canvassed Young Rolfe's chances. "You see, if there was a horse like Nellie L. or Montgomery to carry him fast the first end of it, I might trim him up." The judges were of the opinion Lily could do it alone, and called Turner before them after the second heat. He said: "You can put any one you like; I can't beat him." "No," was the answer; "you must win the next beat or it will be called no beat, if your mare appears as speedy and steady as she did the last one." "Here's the whip now," replied the General, "for I can't win it." This reminds me of one of the best speeches ever made in a judge's stand. Some years ago, at this very park, Turner was driving Lucille Goldnst for Charlie Green, who was sick abed. The judges thought she was not doing her best, and remonstrated with Turner, who advanced toward Russell, the spokesman, with outstretched whip, and in an earnest tone of injured innocence spoke as follows: "Take this whip; I'll drive her no more. I may have driven races that looked suspicious, but when three gentlemen like yourselves think I'm so base as to pull a horse on a brother driver lying sick and helpless, I beg to be relieved," and he laid down the whip, which was handed back to him with an expression of confidence.

Westmont, having abandoned the running mate show business appeared in the free-for-all pacing race at Hampden Park, Springfield, Mass., on the 4th, winning the race in straight heats. Time, 2:14, 2:16, 2:18. Jewett and Billy S. started against him.

The gross value of the Twin City Handicap Sweepstakes at Sbeepshead Bay, Sept. 2, was \$6,050, of which Tom Martin, the winner, received \$4,485, Ferg Kyle \$1,210, and King-like \$355.

FOR SALE.

FIFTH ANNUAL MEETING OF PLUMAS, LASSEN, SIERRA and MODOC AGRICULTURAL ASSOCIATION

District No. 14, at

GREENVILLE,

Plumas Co., Cal.,

Commencing on MONDAY, Sept. 29th, 1884, and Continuing Five Days.

SPEED PROGRAMME.

SPECIAL NOTICE.

THE FOLLOWING PURSES HAVING FAILED to fill have been reopened to close

TUESDAY, Sept. 23d, at 9 o'clock P. M.

SECOND DAY.

Trotting—Class 2:40; mile heats, 3 in 5; purse \$200. 1st horse, \$120; 2d, \$60; 3d, \$20. Free for all.

THIRD DAY.

Trotting—Class 2:34; 3 in 5, mile heats; purse \$300. 1st horse, \$180; 2d, \$90; 3d, \$30. Free for all.

FOURTH DAY.

Trotting—Free for all; 3 in 5, mile heats; purse \$600. 1st horse, \$360; 2d, \$180; 3d, \$60.

CONDITIONS.

Entries to all trotting and running races to close with the Secretary at 9 o'clock P. M., Monday, Sept. 1st, 1884.

All entries to be made in writing, to give sex, color and marks of horse, Also name and residence of owner, and in running races colors to be worn by rider, and in any others particulars that will enable the audience to distinguish the horses in the race.

Write "Entries to Races" on outside of envelope, seal and accompany by entrance fee.

Entrance fee, ten per cent. of purse. No entries will be received unless accompanied by the fee.

In all races three or more to enter and two or more to start.

National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between the heats.

Rules of the State Agricultural Society to govern running races, except where conditions named or otherwise.

Any person not intending to start his horse must notify the Secretary in writing on or before 8 o'clock the evening previous to the day of the race.

Horses entered in races can only be drawn by consent of the judges.

For a walk over in any race a horse shall only be entitled to his own entrance fee and one-quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

The attention of all parties interested is particularly called to the rules of the National Trotting Association, under the provisions of which, except as otherwise specified, all matters appertaining to the trotting races will be conducted.

Races to begin each day at one o'clock P. M., sharp.

JOHN HARDGRAVE, President.

J. R. MURRAY, Secretary.

# JERSEYS, GUERNSEYS,

Registered in the A. J. C. C. and A. G. C. C., of New York, the only standard register.

Jersey Belle of Seitate that made 25 lbs 4 1-2 ozs. of butter in one week.

A grandson of above cow is now in use in the Yerbe Buena. This herd won all the herd prizes for 1882. Since then have been added young animals from Mr. Pierce's valuable herds East. He now has Jersey Belle of Seitate, Comassie, Mary Ann of St. Lambert, Silver Cloud and Euros strains; also large selections from the Islands, without regard to cost.

He has interest in Eastern herds of 200, at the head of which stand only living son of Jersey Belle, Romeo de Bonair, (87 1/2 per cent. Mary Ann's blood), and Pierson, the best show bull in America. These bulls are valued at \$10,000 each.

HENRY PIERCE, San Francisco.

# IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

The above cut represents the body-piece, the patent also covering the improvements in the hood. The following are the claims granted:

1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
2. The blanket or covering A, having the flap C, and the extensions B, to fit the fore and hind legs of the animal, front fastenings F G, and the permanent straps or bands E, substantially as and for the purpose herein described.
3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings F G, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.

4. The blanket A and hood J in combination with the elastic connecting-strip I, substantially as described and for the purpose set forth.
5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as herein described.
6. The improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands E, fixed to it to secure it around the body, whereby the use of loose surcingle is avoided, substantially as herein described.

The right to make clothing in the United States will be sold on a royalty. Apply to the patentee,

JOS. CAIRN SIMPSON,  
SAN FRANCISCO, CAL.

Horses to be owned in District June 1, 1884.

## REMARKS AND CONDITIONS.

All trotting races are heat three in five; five to enter and three to start. The Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nominations.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternating if necessary, to finish any day's racing, and to trot a special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 60% to first, 30% to second.

In all races, entries not declared out by 5 p. m. of the day preceding the race shall be required to start.

Where there is more than one entry by one person, or in one interest, the particular horse they are to start must be named at 5 p. m. of the day preceding the race. No added money paid for a walkover.

Rules of the State Agricultural Society to govern running races, except where conditions named at other wise.

Non-starters in running races will be held for entrance under Rule 3.

Racing colors to be named in their entries.

In trotting races, drivers shall be required to wear caps of distinct colors, which must be named in their entries.

Entrance fee, ten per cent.

Entries to all the above races to close with the Secretary on Friday, Aug. 1, 1884.

Write "Entries to Races" on outside of the envelope.

W. T. ADLER, President.

J. HINMAN, Secretary.

IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.

Having thus described my invention, what I claim as new, and desire to secure my letters patent, is: 1. The part D supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially as herein described. 2. In a bridle, in combination with the extensions D, the curved blinds F, secured to such extensions, and as shaped, to give full freedom and ventilation to the eye while circumscribing the vision, substantially as herein described. 3. In a bridle, and in combination with the extensions D, blinds F, and side straps A, the screw, nut and washer E, to secure the blind and allow it to be set, substantially as herein described. 4. In a bridle, and in combination with the checkpieces D and blinds F, as shown, the straps or bands G and H, connecting the branches or extensions above and below the eyes, and having the adjusting slides or buckles, substantially as an for the purpose herein described. 5. In a bridle, and in combination with the blinds F, supported and pivoted to the bridle so as to be movable about the point of support, the adjustable front straps or bands G and H, and the rear band I and the throat-latch or lash connected with the blinds, and adjustable, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood. It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision. By throwing the lower portion of the blind up something of the same effect on the action follows as is induced by toe-weights. This is especially the case when young colts are the pupils, teaching them to bend the knee without the strain of weights on the feet.

For bridle of all descriptions apply to JOHN A. MCKERRON, No. 230 and 232 Ellis St., San Francisco.

Thoroughbred SETTER PUPPIES.

ENGLISH SETTERS, FINEST BREED IMPORTED. Irish Setters, from Champion stock imported by R. W. Hill of Oregon. Pedigrees guaranteed, \$25.00 each at six weeks old. Apply to E. LEAVESLEY, Gilroy.

232 Ellis St., opp. Fashion Stable, San Francisco.

DIETZ'S PATENT

For Sundays only, good for return same day.

For Saturday, good for return until following Monday, day, inclusive, at the following rates:

Table with columns: Round Trip from San Francisco to, Sun. Tkt., Sat. Mon. Tkt., Round Trip from San Francisco to, Sun. Tkt., Sat. Mon. Tkt.

CHECK HOOK. Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind.

There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook. Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

W. H. Woodruff,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY is noted for its extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pomplio, Spanish Mackerel, and Flounder.

The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED, having a MAGNIFICENT BEACH of pure white sand for surf bathing. THE BATH-HOUSE contains SPAECIOUS SWIMMING TANKS (50x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ IS VIA THE Southern Pacific Railroad.

(Broad Gauge). The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety.

Notably Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANTONIO are reached by this line. Stages connect with trains daily at San Mateo for those well-known resorts, PURISIMA, SAN GREGORIO and ESCADERO. We would particularly call attention to the unexcelled extent of range and about SAN BRUNO and McMAHON for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE. Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Bagmen. Train Bagmen are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and sent in packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES—Passenger Depot, Townsend street, Valencia Station, and No. 613 Market st., Grand Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt. Agt.

FOR SALE. Thoroughbreds OF ALL AGES. ENQUIRE OF HENRY WALSH, Sup't Running Horse Dep't Palo Alto Stock Farm

LINES OF TRAVEL.

## CRICKET.

The first match of the series of five between those unceasing rivals, the Occidents and the Merions, for the bats offered by that also unceasing supporter of this rivalry at the "noble game," Mr. W. G. Harrison, came off last Saturday at the Oakland Grounds, and resulted in a close and interesting game, and a victory for the senior club by 18 runs. Neither side was entirely representative, the O. C. C. team containing but 8 first eleven men and the Merion only 6; in the latter especially was the want of their two bowlers and Captain and Vice-Captain severely felt. The Captainty, however, was very efficiently filled by George Theobald. The Merions were the first to bat, Spiro and Miller, the "brace of sloggers" (as they are affectionately alluded to by an esteemed weekly contemporary), being the first to face the attack of Waterman and Cookson. The bowling was good, that of the latter being at times brilliant. The "sloggers" played carefully and well, Miller hitting out lively for 5 when he was retired by the left-handed bowler, and Spiro seeing six of his side sent back to the dressing-room, while he compiled 8 in good style, being finally clean-bowled by a good one from Waterman. The remainder of the team now indulged in a procession to and from the wickets, Burnett's 1 standing out brilliantly on the score-sheets in the midst of an avalanche of zeros. Hill went in tenth man and knocked up 8 speedily, chiefly owing to an energetic but unscientific "leg-hit" over the pavilion for 5; he was not out, Miel, the last man, showing good defense, but being bowled by a beauty from the invincible Cookson after having made a single. The essay closed for 40, extras being chief contributor with 17, and Merion stock being rather low.

The Occident men started in well in their turn, Gray and Bristowe opening to the bowling of Miller and Benjamin. Bristowe was dismissed on a beautiful left-handed catch by Jacobs, off Benjamin, his partner being soon after retired by the same bowler. Clarke and Carr further encouraged the fielding team by a speedy collapse. Waterman was given run out, when getting well set, opinion being divided on both sides as to the correctness of the decision. Kip played carefully and showed good defense for his seven. Sanderson varied the monotony of his recent innings by a well-played 13, and, in fact, the "tail" fully proved equal to winning the match by pluck, if not science, Shinn and De Golia batting heavily *a la* baseball, for 9 and 10 respectively, the latter not out. For the outside, Miller and Barney Benjamin carried off the bowling honors, as the analysis will show. The fielding was far below the ordinary, no less than five more or less easy catches being missed. Creighton and Gibson did some good fielding. The Merions were in hard luck to get out the good men for a few runs, and then allow such players as Shinn, De Golia and others to score so heavily. Score:

## Australia vs. South of England.

This match resulted in a splendid victory for the Australians by an innings and 107 runs. The Australians scored 358 in their first inning, while the South of England only totaled 178 and 73. After the heavy score made by the Australians it was certain enough that this could not be beaten; but it was pretty generally anticipated that the Englishmen, if unable to turn the tide of fortune in their favor, would, considering their batting strength, be able to score a large number of runs. But these anticipations were not realized, for the Southern batsmen were unable to offer any resistance to the magnificent bowling of the Australians. Spofforth

bowled grandly, taking throughout the match twelve wickets at a cost of 128 runs—a splendid analysis. It is questionable whether Spofforth has ever been seen to such advantage—great as have been his previous performances—as during the week just drawing towards its close. At Brighton and Gravesend together, twenty-five wickets fell to his bowling for 213 runs, which gives an average of as nearly as possible 8½ runs per wicket. Considering the quality of the batting which was opposed to him, Spofforth's performance this week is almost unparalleled in cricket annals.

Between twelve o'clock yesterday and twelve minutes to six p. m. twenty English wickets fell for 251 runs. In the first innings of 178 there were eight double figures, but the highest score was Lucas' 28. Only one change in the bowling was made, and that was caused by the last pair of batsmen. In the innings Spofforth took six wickets for 105, Boyle three for 59, and Giffen one for 2. The Australians' innings having been finished off for 358, the South of England were consequently 180 runs to the bad, and of course had to follow on. On the English team going in a second time an utter collapse ensued. The wicket had suffered a good deal of wear and tear, and was considerable cut up, and this enabled the bowlers to get a great amount of work on the ball. Yet this does not account for so complete a break down of the English batsmen as was witnessed. In an hour and twenty minutes Spofforth and Giffen finished off the innings for the paltry total of 73, Giffen taking four wickets for 30 runs, and Spofforth six for 23. The English team was composed of A. P. Lucas, W. C. Kemp, W. W. Read, Lord Harris, T. C. O'Brien, J. Hide, W. E. Roller, H. V. Page, Humphreys, S. Christopherson and Wooton.

## YACHTING.

### The Aggie-Lurline Negotiations.

The race talk between the Lurline and Aggie again shook the yachting world to the centre last week. Mr. Macdonough, owner of the Aggie, returned to town last Monday and sent a communication to Mr. Adolph Spreckels of the Lurline, which was substantially as follows: Mr. Macdonough expressed his willingness to race Mr. Spreckels for some nominal prize, such as a basket of wine or a box of cigars, around either the north or south Farallones, under the rules of the Pacific Yacht Club, which rules admit of time allowance and bar every sail that will not set on the wind, to wit: square sails and spinnals and also made a stipulation that the foretopmast of each vessel should be housed and not used at all during the race; and named his date as to-day, and furthermore insisted that no water sails should be used. Mr. Spreckels in reply stated that while he was perfectly willing to allow time allowance and abide by the yacht club rules, he would not be restricted as to what fore and aft canvas he should carry, a perfectly proper view to take of the case.

Mr. Macdonough's idea of these stipulations was this, The Lurline foretopmast can be housed or set up from the deck in a comparatively short space of time and while under way, whereas the Aggie from the faulty construction of her rigging is unable to do this, unless while lying at anchor and then only after a couple of hours' work. Mr. Macdonough profiting from his Monterey experience does not desire to carry his foretopmast while on the wind and backing into a heavy head sea, such as he would be liable to meet when going over the bar on the way out. The cutwater of his yacht is made of pine and not of oak, and as the Aggie's bow falls away very rapidly, the strain from the bobstay does not lead fairly and he consequently fears pulling the bolts out of her cutwater bodily, not a very elevated position to take when racing for, as we have previously maintained, speed in a yacht under favorable circumstances only, is not the only thing requisite in a gentleman's pleasure vessel, for a true yacht should be able to meet any weather and as this practically was to be a test of builder against builder and yacht against yacht, Mr. Macdonough's objections are untenable.

Again, his desire to bar water sails is somewhat illogical, for the same reason, as he maintains, that because the Lurline has water sails expressly made to fit her booms, and that he has not, she (the Lurline) should not be allowed to carry hers. Mr. Spreckel's objection to the provision barring foretopmasts is perfectly correct on technical grounds, but it would not do him much injury to accept this condition, for the reason that the course named is dead to windward and dead to leeward; that is to say, if the wind would hold in its regular Summer quarter, which ten chances to one it will at

this time of the year, and in that case a jib topsail or baloon jib would be to all intents and purposes useless, as it would not set on the wind to be of a benefit to the yacht going out, and it would be an idle sail coming home, as it would be in the lee, occasioned by the mainsail and foresail.

Mr. Macdonough also proposed that both Mr. Spreckels and himself should sail their own yachts, which proposition was also declined by Mr. Spreckels, and so in spite of the efforts of well-meaning friends who have endeavored to smooth down the differences and bring the yachts together, the race has again come to naught, and it now looks as if the event was not to come off till next season, if then.

### A Lucky Craft.

The remarkable little sloop, Fleetwing, has had almost numberless brushes with craft of similar dimensions but in none of them has she had such a streak of good luck as in the regatta of the San Francisco Club recently. The yacht on this occasion was put in perfect order and previous to the start bets were freely made that she would carry off the prize offered for her class. On getting under way however, it was discovered that a bungling job had been made in the cutting of the new sails that were up for the first time. The mainsail bagged out astonishingly on the leach and instead of carrying her helm amidstships it was almost impossible to steer her. When this was ascertained hope of getting in ahead of the speedy Lively was almost given up. Everything was done that could be to get the craft over the course. When off Meiggs' Wharf on the way to the Presidio stake-boat the luck of the boat showed up. The competing sloop failed to keep inside of the Emerald as the rules dictated and the captain of the Fleetwing, seeing the blunder, went over the course, and upon claiming the prize on a protest received it. No class of sports believe in luck as much as do yachtsmen.

To-day the Pacific Club gives an informal dance, and at the same time the prizes won at the last regatta will be distributed. No tickets have been issued for this affair, but guests will be admitted when accompanied by a club member. Arrangements will also be made for the closing cruise, which will probably come off a week from to-day.

The following order has been issued in regard to this event: Order No. 1—Yachts will assemble off the club house, Old Sausalito, on Saturday, Sept. 20th, and will dress ships on coming to anchor.

W. R. MELVILLE,  
Sec'y Pacific Yacht Club.

The Dawn returned from Rio Vista last Sunday and her crew report a very enjoyable trip, barring the light weather, as they escaped entirely the ravages of the tule mosquito, the pest of those regions. The Chispa was to go to Sacramento this week, a troublesome trip at this time of the year for a craft of her size.

The yachting season of 1884 is rapidly drawing to a close. Since the annual regatta of both clubs have come off yachtsmen seem to lose their interest and to allow matters to go by default. Of course there is still in anticipation the closing cruises of both clubs, which as a rule are well attended.

The weather last Saturday and Sunday was very light some of the smaller crafts that tried to make Sausalito on Saturday night drifting out as far as Point Diablo before the flood time came to their relief.

The Aggie went to Benicia and was put on the ways and cleaned preparatory to the race, which has fallen through.

W. C. France, the owner of Harry Wilkes, claims to be the only owner, except Alden Goldsmith, who has had three trotters with records better than 2:20. Mr. France is mistaken. The first place on the list belongs to Governor Stanford, with Occident 2:16½, Bouita 2:18½, Hinda Rosa 2:19, Elaine 2:20. These are all public records, and if the Palo Alto stable had not been retired for this season, the number would now be nearer ten than three.

According to the reports from the various county, town and State fairs in the West, the farmers turn out largely on race days. At Columbus, O., September 4th, 25,000 people were present. At Rochester, Minn., 5,000, and the same number at Lexington, Ky.

The Dwyer Broa. offered H. O. Bernard \$15,000 for the two-year-old colt, Goano, by Springbrook, dam Geneva, but it was not accepted.

**TURF AND TRACK.**

**Lord Falmouth's Brood Mares.**

Being of its sort, the sale of the century, and such as shall not look upon again, at considerable personal inconvenience, and in broiling hot weather, I made it my business to attend the dispersion of Lord Falmouth's famous stud of brood mares. Such continuous and unerring success upon the turf as his would appear never to have been known, and it would appear yet to have been scarcely at its zenith when his lordship determined, so much to the astonishment and disappointment of the outside world, to end his famous career, and sever his connection with racing. For such unprecedented good fortune there must have been one argued, rational ground; such success does not come by accident. Many were the attempts to explain it years since. It was the water the youngsters drank as foals. It was the extraordinary quality of the herbage in the undulating park where they were reared that made them the stock they turned out. Limestone, no doubt, has much to do with the formation of bone in young animals, but it was not that Lord Falmouth's winners were built large or extraordinarily big, as Gladiateur, grown in France, was. An occasional tall one may stride over the ground in a way that is resistless and unapproachable. Both human and equine giants may occasionally, it is true, but only occasionally, be able to heat all comers. But the race has most oftentimes fallen to the middle-sized, if not positively small ones. The most famous rowing champion of England, Robert Coombes, was quite a little fellow, all wire, and muscle, and endurance; but a little one at last. Some of the highest jumpers will walk under the leap they subsequently take. I was not, therefore, satisfied with any such explanation as I had given me, but determined to go and look for myself, and see if I could not read with my own eyes some reasonable solution for an extraordinary fact. There are always laws underlying fact, which, with care and study, are discernible to the student, as the points and lines of feature are apparent to the painter.

With this recollection, and with these feelings, I entered Lord Falmouth's paddocks at Newmarket, to find myself all but alone. It wanted some hours till the sale, and so I went from box to box, and paddock to paddock, finding the attendants as obliging as the mares were docile and quiet. They had clearly all been petted. No vice, no laying back of ears, no pointing of the heels, but all and each stood as gentle as lambs, with their foals beside them, allowing you to pat and pet them as much as you pleased. The first thing that struck me was the extreme beauty of their heads and their full, lustrous eyes. Their necks, too, bent with the droop of a ripening wheat stem. This particular formation, associated, as it is, with a "good mouth," is said, for some mysterious reason, to be conducive to "roaring," cases of which undoubtedly existed in this famous establishment. But still head and neck would not give the propelling power which I was here to seek the cause of. We must look further. The more one studies them, the more evident is the prevalence of a certain marked type throughout the lot. What can be the reason of this stud's exceptional excellence and success, I ask another famous breeder, who has entered the box beside me, and with whom I happen to be intimate. "Oh, the training," is the quick reply; "all Mat Dawson, the best trainer in the world." One can scarcely think that. There may be much in training, but it cannot be all. So I devote myself to keener study. I look them over and over again, travelling from box to box, then seeing the barren ones upon the pasture, and carefully marking each one in mind from hoof to ear, a decided result, as it always will do, finally rewarded my patience. There was no doubt that some of the most famous mares, as Spinaway, Jannette, Cantinier, and others, looked at first glance little ones, but when you came to study them, they were little big ones with a vengeance. Such breadth of loin they had, and massy accumulated muscle! such immense quarters, somewhat rounded, perhaps, and strong thighs! They had not, as I expected they would have, long thighs, with straight galloping hocks well let down, as it is termed, and short cannon bone, as is the formation of the greyhound. It was quite an ordinary hunter-like style they had, only their action was so quick and bright. They lifted and moved leg and hoof as though they were all alive, with a suppressed and concentrated energy; and, as they walked, the hind hoof was set down covering the place of the front one many inches, so that they gathered additional space with every stride in the gallop. Then the fore leg was not what one has looked to as the perfection of shape. The inside line was not continuous from elbow to fetlock, without tie or indentation, as one delights to see. The arm, as a rule, was not extraordinarily developed. It was good and strong, and there was plenty of bone beneath the knee, which was very marked; so much so as almost to give a false idea of the girth of bone beneath it. Wonderfully clean from splint and curb and spavin, were the whole lot. The shoulders were decidedly straight and short (there was some exception, but such was the rule), and apparently loaded. This was an outward indication of cramped action. But when you came to see them move, there was no restraint then. They moved their forelegs with the freedom of the hind ones. There was, in fact, a formation very similar to that of the fallow deer. The bone formation of the shoulder may seem and actually be steep, but it is thickly covered with muscle, and the whole mass seems to move freely to and fro with every step. This is very peculiar, and shows that really a steep shoulder does not necessarily mean cramped action. It is consistent with the freest galloping, but whether in such cases as these mares it may cause stumbling, I cannot tell. If you approach a herd of deer feeding, and gently start them into motion, you will see the whole of the loaded shoulder work freely to and fro, whether in trot or gallop. Such were the main characteristics of this marvelous stud. There were many exquisitely beautiful among them, as, for instance, Mavis. There were some, as, for instance, Silver Ring, that might have passed for hunters, but they were all remarkable for their quick, lively action, their broad loins, large quarters, and general development of muscle. A strong, uniform type pervaded the lot.

A most important characteristic of Lord Falmouth's stock is their great depth of forequarter and width through the region of the heart. This gives constitution and room for the lungs to play. I have looked at numbers of thoroughbred mares since this sale, and note the majority of them to be decidedly wanting in strength of loin and muscular quarter. That their legs are hairless and their quality "Thoroughbred," seems to suffice many breeders, who, therefore can scarcely be disappointed when the produce fails to win. Considering how many of the matrons of his establishment were bought by Lord Falmouth, it would appear that he worked with a model in his eye; and perfect in all these respects was the yearling filly Rattlewing, own sister to Galliard, by Galopin, out of Mavis, secured by the Duke of

Portland, at 2,100 gs. The following mares, for instance, were bought by Lord Falmouth: Hurricane, out of a mare of Lord Exeter's; Queen Bertha, from the Middle Park stud; as also Silverhair. Mavis was purchased from Lord Cavdor, Palmflower from Mr. Gerard; Chevasance and Lady Coventry were also bought.

It is curious that two celebrated Welsh pony racers of the last generation, one Col. Vaughan's "Apricot," a household word in North Wales, got by a small Thoroughbred horse out of a pure Mountain Pony, and another, "Polly Brown," equally well known in South Wales, having two thoroughbred crosses on the Welsh pony, both invincible in their day, are represented by paintings of them as being exactly of the build I have described of Lord Falmouth's mares.—*Colonus, in Live Stock Journal.*

**Drake Carter Breaks the Three-Mile Record.**

At Coney Island, on the 5th, Drake Carter won the Autumn Cup over a strong field, reducing the three-mile record to 5:24. The following is the *World's* report:

The Autumn Cup, a handicap sweepstakes for all ages at \$150 each, \$50 forfeit and only \$25 for those declared out by Sept. 1st, for entries made by Jan. 1, 1884; horses entered by Aug. 15th, when the stake closed, to pay \$75 forfeit; the club to add \$2,500, of which \$500 and 20 per cent of the stakes to the second, and 10 per cent of the stakes to the third; closed with 26 entries on Jan. 1st and on Aug. 15th, of which 15 paid \$25 and 5 paid \$75, three miles:  
 P. Lorillard's b g Drake Carter, 4, by Ten Brock—Platina, 115 lbs. W. Hayward 1  
 E. J. McElmeel's b h Gen. Monroe, 6, 123 lbs. Blaylock 2  
 P. M. West's h g Levant, 4, 104 lbs. Walker 3  
 W. L. Scott's ch f Blue Grass Belle, 4, 100 lbs. Higgs 0  
 Louisiana S's h g Fosteral, 6, 100 lbs. Arnold 0  
 Davis & Hall's h m Ella Warfield, aged, 90 lbs. Rivers 0  
 Oden Bowle's h g Compensation, 6, 97 (carried 101) lbs. Garrison 0  
 G. E. Bryson's b g Bushwhacker, aged, 85 lbs. Cowal 0  
 Time, 5:24.

Betting: 6 to 5 against Gen. Monroe, 5 to 1 against Drake Carter, 9 to 2 against Blue Grass Belle, 7 to 1 against Levant, 10 to 1 each against Compensation and Fosteral, 15 to 1 against Ella Warfield, and 30 to 1 against Bushwhacker. Pools: Gen. Monroe, \$450; Drake Carter, \$240; Blue Grass Belle, \$90; Levant, \$75; Compensation, \$60, and the field, \$140. Mutuels paid, \$25.80.

In addition to the seven horses named on the cards for the Autumn Cup, Blue Grass Belle was announced to start early in the afternoon, which was five more than the race had last year and the same as in 1882. All the candidates were early in the paddock, and attracted considerable attention, the favorite, Gen. Monroe, being much liked, as also was Ella Warfield and the "crack" from Brighton Beach, Levant. Many thought Drake Carter too light for such a journey, and some were willing to bet that he would not go the distance. But as the bell rang its second call they all appeared at the post. The race was fixed for 4 P. M., and within a few minutes after the flag was dropped with Drake Carter a trifle in front of Blue Grass Belle, followed by Gen. Monroe, Compensation, Bushwhacker, Levant, Fosteral and Ella Warfield. Before they had run fifty yards Blue Grass Belle took the track, and with a lead of nearly a dozen lengths she showed the way round the lower turn to and past the stand back to the starting point, where she was followed by Drake Carter, a trifle in front of the others, lapped by Fosteral, Compensation and Gen. Monroe, with Levant, Ella Warfield and Bushwhacker bringing up the rear. As they reached the stables on the lower turn Blue Grass Belle increased her lead to a dozen lengths, which advantage she held back nearly to the stand, which she passed, going with so much ease that the backers of Gen. Monroe and Drake Carter became very uneasy, and the claim could be heard at all points, "They'll never reach her." Half-way round the Ocean avenue turn she tired badly, and as they began the last mile she only led by half a length from Levant, he a length in front of Gen. Monroe and he a length and a half in front of Drake Carter, with the others virtually out of the race. Blue Grass Belle held on well, but as they reached the starting point the second time (six furlongs from the end), Levant took the lead and being joined almost instantly by Gen. Monroe the two made it a hot race down the back stretch, with Drake Carter a good six lengths back. But as they in turn reached the stables, half a mile from the end, they began to tire and, in dropping back, they had Drake Carter for company. The three ran at about necks apart until the last quarter, when Drake Carter headed them, and amid a great shout, "Darke Carter wins," Hayward brought the Rancocas horse away with the greatest ease, and keeping right on, won by a good eight lengths, followed by Gen. Monroe, the same distance in front of Levant. Blue Grass Belle was well up fourth, and was followed at some distance by Fosteral, Ella Warfield, Compensation and Bushwhacker. Time, 5:24, which is the best on record for the distance, beating as it does the 5:25 of Lida Stanhope, with 102 pounds, run at Saratoga in 1882. It is also better than Eole's race last year by three seconds, and in 1882 by two seconds and a half, but Eole carried 120 pounds in 1882, and 127 pounds last year, while to show that Blue Grass Belle did her duty well, she ran the first mile in 1:47 and the two miles in 3:34, which gives 1:52 for the last mile.

**Entries at Greenville.**

The purses of the District fair to be held at Greenville, commencing Sept. 29th, closed on the 1st with the following nominations:

- Running, purse \$225, mile heats, 3 in 5, for district horses: Nell Banta, Snuff Box, Overland Pat, Lige Clark.
- Running, purse \$100, quarter mile heats: Dollie C., Nell Banta, Snuff Box, Nellie.
- Running, purse \$140, three-quarter mile heats: Panama, Nell Banta, Snuff Box, Jubilee.
- Running, purse \$75, quarter mile heats: Dollie C., Johnny More, Butcher Boy, Nellie.
- Running, purse \$150, mile dash: Panama, Nell Banta, Lige Clark, Jubilee, Nellie.
- Trotting, purse \$200, for three-year-olds: Isaac M., Garret, Maxwell.
- Running, purse \$500, two mile heats: Panama, Snuff Box, Overland Pat, Jubilee.
- Trotting, purse \$125, for double teams, mile heats: D. McIntyre's Plumaz and Ione, D. D. Neuman's Kate and Mollie, E. P. Smith's Tom and Blue.

At public auction in Philadelphia, last week, the black gelding Scotland, record 2:22, by imp. Bonnie Scotland, dam Waterwith, by Pilot, Jr., was sold for \$500 to A. H. Hobart, of Frankfort, a suburb of Philadelphia.

J. W. Owens, of Ashland, Ill., has been permanently ruled off the turf by the St. Louis Jockey Club for attempted fraud.

**State Fair Races.**

On Friday the 12th, the clerk of the weather must have been in a mood to assist the directors of the State Agricultural Society in carrying out the programme, by vouchsafing a temperature that was all that could be desired. In place of the anticipated scorching sun, there was a pleasant breeze, and though the morning might be a trifle chilly, it would be a hypercritical person who could find fault with the rest of the day. The ladies' grand tournament was to have taken place in the forenoon, but owing to a misunderstanding, only three appeared, and it was postponed. The bill was entirely running—four races being on the card. The first race was the Introduction stakes for two-year-olds, a dash of three-quarters of a mile. There were seven entries, three of which staid in. These were, Mischief, Arthur H. and Estill. The latter was so great a favorite that in the pool sales Thursday night he brought \$50 to \$14. This was mainly owing to his fine races at Santa Rosa, Petaluma and Oakland, and being a big strapping colt, he is better able to handle the weights than his lighter competitors. There was some letting on second place, but not enough to determine which of the three had the warmest supporters. Arthur H. looked much better than he did at Santa Rosa, and Mischief appeared more racing-like, having lost some of the adipose which hindered her in her previous run. In the lottery for positions Mischief drew the pole, Arthur H. second, and the favorite outside. The start was from the quarter pole, which being at the commencement of the back stretch, there was straight work to begin with. A good deal of time was occupied in getting them off, though when the flag fell all were closely together. Mischief had a trifle the best of the start, and she retained the lead for a furlong, when Arthur H. moved up; Estill two lengths behind at the quarter, in 25 seconds, but in the next three hundred yards he closed the gap, and at the half-mile pole all were abreast. From thence home Estill had it all his own way, winning by several lengths in the fast time of 1:54; Arthur H. second, and Mischief at least four lengths behind him.

September 12th, 1884.—Introduction stake for two-year-olds; \$25 entrance, \$10 forfeit, \$200 added, \$50 to second horse, \$25 to third; three-quarters of a mile. Value to the winner, \$240.  
 W. M. Murry's ch c Estill, by Norfolk—Lady Jane, 100 lbs. Duffy 1  
 Hill & Grier's b c Arthur H., by Hockhocking—Maid of the Mist, 110 lbs. Appley 2  
 James Mee's ch f Mischief, by Thad Stevens—Katy Pease, 107 lbs. Ross 3  
 Time, 1:54.

The second race was inaptly named the "California Derby," and of eleven nominations only two came to the post. These were Prince of Norfolk and Philip S. The former was so much the favorite as to bring \$50 to \$10, and even at these long odds speculation was languid. The Prince of Norfolk drew the inside, and from some incomprehensible cause to the lookers-on the start was delayed, although both came to the line together several times. When the flag fell there was no perceptible difference and they ran together, Prince only leading a head at the half mile in 32½ seconds. When the three-quarters had been run Philip S. took the lead, opening a long gap. As the mile was completed in 1:46 it was supposed that this was only on sufferance and that the hitherto unbeaten colt could close any sort of a space whenever he chose to, but it was evident to those who had glasses that the favorite was in trouble, and the most that he could do was a lumbering, slow gallop, twenty or more lengths behind Philip S., who won in the slow time of 2:45. Such an exhibition could only be caused by a lamentable lack of condition or absolute sickness. On other grounds, in place of rating as the peer of any 3-year-old in the United States, Prince of Norfolk must be considered an arrant impostor.

Same Day.—California Derby, for three-year-olds; \$50 p. p., \$30 added, \$100 to second, \$50 to third; dash of one mile and one-half. Value to winner, \$950.  
 P. Siblethaler's b c Philip S., by Leinster—Lily Simpson, 118 lbs. Duffy 1  
 M. M. Allen's ch c Prince of Norfolk, by Norfolk—Marion, 118 lbs. Johnson 2  
 Time, 2:45.

The next race gave promise of more sport. It was termed the Del Paso stake for all ages, heats of three-quarters of a mile, in which there were nine nominations, but four were scratched, leaving Jou Jou, Forest King, Jim Douglass, Bryant W. and Beaconsfield to start. The allotment of positions was in the above order, but the placing in the pools was different. In the pool rooms Thursday evening the rates were: Forest King, \$50, Jim Douglass, \$40, Beaconsfield, \$31, Bryant W., \$22, and Jou Jou, \$14. Before they started the betting rated: Douglass, \$36, Forest King, \$30; the others grouped in the field, \$32. Again the horses were marshalled at the quarter pole and owing to the complete obscuration of the starting point by the cumbersome judges' stand, which is directly in front of the reporters' quarters, the incidents of the start were hidden effectually. It was by crowding into the northern corner that the knights of the pencil could catch a glimpse of the horses. When the white flag was dropped all were in a bunch, and they ran so evenly for the first quarter that it was extremely difficult to place them at the half-mile pole further than to note that Jim Douglass and Jou Jou were in the lead of the others, with Jou Jou slightly in advance. Around the turn there was a dropping back of the others, Jim and Jou Jou reaching the three-quarter pole in close proximity. At that point Jou Jou gave up, and Forest King came with a rush. The big horse was running easily, however, and came from the seven furlong well in hand, winning a very good race, the pace being fast from the start to finish, in 1:15; Forest King second, Beaconsfield third, Jou Jou fourth, and Bryant W. distanced.

The Second Heat—After the heat there was some very heavy betting. Forest King was slightly the favorite, bringing \$330, Jim Douglass \$300, the field \$200. This was accounted for when Howson mounted Douglass, when, on trotting him, he was seen to be lame so as to make his winning extremely doubtful. This was fully proved as soon after the start, all being in a line, when the flag fell, he fell in the rear, Forest King and Jou Jou going past the half-mile pole so nearly together that it was hard to separate them. Beaconsfield was two lengths in the rear, going easily, however, and half away around the lower turn he moved up, until within one hundred and fifty yards from home, it was a pretty contest between Forest King and Beaconsfield. But from there the fine-looking son of Hockhocking left his competitors, winning by two lengths in 1:15; Forest King second, Jou Jou third, Jim Douglass fourth.

By a forced interpretation of rule 50 of the code lately adopted by the society, all of the horses which participated in the second heat were declared eligible to start again. That this was contrary to the spirit of their own rule is so evident that it is a waste of space to argue. Nevertheless the decision was adhered to with a pertinacity that was flavored

trougly with ignorance and obstinacy. Taking the rule as a guide and justly thinking that only winners of heats could start, the betting was \$30 on Beaconsfield to \$75 on the field. It was heartless to start Douglass on another heat, as he could only hobble. When the word was given Beaconsfield and Jon Jon were some two lengths in advance of Forest King, who took the place of Jon Jon coming down the home stretch, but could not get nearer than four lengths of Beaconsfield, who was hailed winner of the heat and race in 1:16 1/2.

Same Day—Del Paso stake; for all ages; \$50 entrance, \$15 forfeit \$250 added; \$75 to second, third saves stakes; three-quarter-mile heats Value to winner, \$500. E. J. Baldwin's b c Beaconsfield, 3 years, by Hockhocking—Appleby 3 1 1 Aileen Allannab, 109 lbs. S. J. Jones' b c Forest King, 5 years, by Monday—Abbie W., 113 lbs. Howson & Densdale's h h Jim Douglass, by Wildside—Yolone, 113 lbs. W. Kelly's h g Jon Jon, 3 years, by Monday—Plything, 108 lbs. T. H. Williams, Jr.'s blk b Bryant W., 4 years, by Monday—Bebe, 113 lbs. Time, 1:15, 1:15 1/2, 1:16 1/2.

Then came a selling race for a purse of \$200, one and one-eighth miles. The conditions were that horses priced at \$1,000 should carry the rule weight, with two pounds added for each \$100 of a higher valuation, and one pound subtracted for each \$100 of a lower valuation. The starters were Belshaw, value \$400, 103 pounds; Certiorari, \$500, 105 pounds; Ronfo, \$350, 102 pounds; Duke of Monday, \$500, 111 pounds; Nick of the Woods, \$1,000, 118 pounds; Bessie, \$400, 103 pounds; Jocko, \$1,000, 118 pounds; Ariola, \$400, 93 pounds; and Balboa, \$1,000, 118 pounds. The above is the order they were awarded positions. Belshaw was the favorite, bringing \$150, Duke of Monday \$100, field \$140. There was a hubbub at the starting point. The flags fell and away went the horses. Ronfo led like a wild horse with something under a red jacket close on him. The field was straggled over a hundred yards. As they strung along the back stretch Duke of Monday came with a rush from some point. He was two lengths in front of Belshaw when he run under the wire, and his backers were jubilant over money won. The watches marked 1:58 1/2. There was a terrible muddle. The jockeys were not allowed to dismount, but what the trouble was there was no means of finding out in the reporter's stand. Again the horses were taken to the starting point. The claim was that the starter had not dropped his emblem of authority and his assistants had lowered that in his charge without authority. This time all of them fell and Ariola rushed away with the lead, his stable companion, Bessie, next. There was a wide gap at the half-mile pole. Then Bessie closed and again Duke of Monday repeated his tactics. He was first under the wire, with Bessie second, Jocko third. Time, 2:01.

Same Day.—Selling, purse \$200, entrance free; second horse \$50 Fixed valuation \$1,000; two pounds off for each \$100 below, and two pounds added for each \$100 above fixed value. One mile and one eighth. Rancho del Paso's h g Duke of Monday, by Monday—Demirep, aged, \$800, 111 lbs. Wm. Boots' b m Bessie, by Hercules—Unknown, aged, \$400, 103 lbs. M. M. Allen's b h Jocko, by Carlton—Reply, aged, \$1,000, 118 lbs. Geo. Howson's ch g Ronfo, aged, \$350, 102 lbs. G. W. Trabern's ch g Certiorari, 4 years, \$500, 105 lbs. A. A. Pinney's b c Nick of the Woods, 5 years, \$1,000, 118 lbs. Wm. Boots' b c Ariola, 3 years, \$400, 93 lbs. O. E. Thomas' ch b Balboa, 4 years, \$1,000, 118 lbs. E. B. Johnston's b g Belshaw, aged, \$400, 103 lbs. Time, 2:01.

On Saturday the parade was a very fine display of stock, and, though thoroughbreds and roadsters were not in great force, as in preceding years, the deficiency was amply made up by the fine show of draught and carriage stock and cattle. Among the roadsters were some fine specimens and though fewer in number than in former years, the quality was good. The cattle were remarkably fine, and the line of animals extended a mile and a quarter. The weather was beautiful, and the afternoon very pleasant. The first race on the card was for a purse of \$1,000 for four-year-olds. The starters were Happy Jim, Ha Ha, Regina and Thapsin. The placing was in the above order. In the pools Thapsin was so largely the favorite as to bring \$50 to \$15 on all the others. There were four ineffectual scores, but the fifth resulted in a good start. Thapsin broke where the carriages had made a line across the track, and Regina took the lead, with Ha Ha next. In this position the quarter was passed in 40 seconds. Just before reaching the half-mile pole Ha Ha broke and Thapsin came second in 1:16. Rounding the turn Thapsin overhauled Regina, Ha Ha also passing her on the stretch. Thapsin won the heat with comparative ease in 2:30 1/2, Ha Ha second, Regina third, Happy Jim distanced. A good start was made for the second heat. At the second score Thapsin led, and thereafter all the way round—Regina second—to the head of the stretch, when Ha Ha passed her; that being the order in which the heat was finished. Time, 2:30. It was apparent that barring accidents Thapsin must win, and this was shown on the deciding heat, Thapsin being first all around, passing the quarter in 39 1/2, half in 1:14 1/2, mile in 2:28 1/2; Ha Ha pressing him at the finish.

September 13th—Purse \$1,000; four-year-old class. Thapsin, blk g, by Berlin—E. H. Miller, Jr., W. F. Smith 1 2 1 Ha Ha, br s, by Nephew—Fred Arnold, Parker 2 2 2 Regina, br m, by Electioneer—Jas. Garland, Goldsmith 3 3 3 Happy Jim, ch c, by Brigadier—J. F. Shaffer, Trefry dis. Time, 2:30 1/2—2:30—2:28 1/2.

The second race was for the annual two-year-old stake. The starters were Lohengrin, Addie E. and Stamboul. Lohengrin was the favorite at odds of \$50, \$40 and \$25. When the word was given all were together. Immediately after Lohengrin broke, Stamboul taking a strong lead at the quarter in 40 seconds. Lohengrin made several breaks. Stamboul broke before reaching the half mile, but was so far in advance that it did not jeopardize his chances for the heat, which was won in 2:37 1/2, Addie E. distanced. Pools sold at \$240 on Stamboul, \$65 on Lohengrin. The heat and race was won on the next trial by Stamboul in 2:37 1/2.

Same day—Annual two-year-old stake, \$675 with \$500 added. Stamboul, h c, by Sultan—L. J. Rose, Mayhurn 1 1 1 Lohengrin, b c, by Echo—Rancho del Paso, Dewan 2 2 2 Addie E., ch f, by Algona—J. N. Ayres, Ayres dis. Time, 2:37 1/2—2:37 1/2.

The great event of the day was the 2:27 class for a purse of \$1,200, and in which were fourteen entries. This brought out some heavy betting. Friday night pools ranged from \$200 to \$800, and there was a great deal of speculation on the ground. When the bell summoned them the rates were: Sister \$250, B. B. \$85, Adair \$50, the others grouped in the field at \$65. The pacing was: B. B. first, Olivette second, Tump Winston third, Adair fourth, Huntress eighth and Sister ninth. This large field was difficult to manage, coming up again and again, not only straggling, but some of them galloping. After scoring five times an order was given to score by the pole horse, and then it took three trials to get

them off. The start was very good for the number, all of them trotting, though there was quite a difference between the leaders and those behind. Adair pushed to the front at once, followed by Olivette, and was at the quarter in 37 seconds, several lengths in front of Olivette. The others were steering out and when opposite the half-mile mark in 1:11 1/2, Adair was four lengths in front of Olivette, Sister third, Scandinavian fourth, the balance far behind. Rounding the upper turn, Sister passed Olivette, but Adair was so far in the lead that it was beyond expectation that he could lose the heat. Goldsmith, too, appeared to be contented to obtain a good place for the next heat, and wisely restrained his mare after he saw that he could not win. Adair was driven in leisurely, winning in 2:23; the others in the order named—Sister, Olivette, Scandinavian, Tump Winston, Huntress, B. B., Anteo, Adair.

The pools now ranged: Sister, \$100; B. B., \$57; Adair \$55; the field, \$30. At the sixth score they were off, Adair leading, closely pressed by Sister, and Olivette some lengths behind. The quarter was passed in 37 seconds. At the half-mile in 1:10 1/2, Adair and Sister were locked, and with the disadvantage of the outside position, she came within a neck of him. When they straightened into the run home at the seven furlong, Adair broke, losing so much ground that he was passed by Sister, B. B. and Olivette, Sister winning with something to spare in 2:23 1/2; B. B. second, Olivette third, Adair fourth, Scandinavian fifth, Huntress sixth, Adrien seventh, Anteo eighth, and Tump Winston ninth.

In the pools now Sister brought \$100; B. B., \$60; the field, \$35. At the twelfth score the start was given, when Sister took the lead, followed by B. B., with Olivette close behind, the others straggling. B. B. reached the quarter first in 36 1/2 seconds, and all the way down the backstretch there was an animated struggle between B. B. and Sister. He had taken the track, compelling her to pull to the outside and reaching the half-mile first in 1:11. From thence Sister improved her position, and at the seven furlongs post carried B. B. to a break. This ended the fight, the position at the finish being: Sister first, B. B. second, Olivette third, Tump Winston fourth, Adrien fifth, Huntress sixth, Adair seventh, Scandinavian eighth, Anteo distanced.

With two heats to her credit Sister was still more of a favorite, and unless she "came back" it was evident that the race was hers. Adair had shot his bolt in the first and second heats; B. B. could not keep up his rate as well as the mare, and none of the others had speed enough, so the fourth heat brought the race to a close. Sister was too much for B. B. by the time the homestretch was gained, and though Scandinavian came with a rush toward the finish, the pace carried him off his feet, and though he was second under the wire he was placed third.

Same Day.—Purse, \$1,200; 2:27 class. Sister, b m, by Admiral—M. Salisbury, Goldsmith 2 1 1 Adair, b g, by Electioneer—E. H. Miller, Jr., Smith 1 4 7 B. B., blk g, by Millman's Bellfounder—Jas. McCord, 113 lbs. Olivette, br m, by Whipple's Hambletonian—A. C. Dietz, 113 lbs. Scandinavian, blk g, by Black Hawk Morgan—P. Johnson, 113 lbs. Tump Winston, ch g, by Primms—E. Downer, 113 lbs. Adrien, b s, by Electioneer—J. M. Learned, 113 lbs. Huntress, ch m, by Admiral—W. F. Carter, 113 lbs. Anteo, b s, by Reliance—L. de Turk, 113 lbs. Rollins and McGregor 8 8 dis. Time, 2:23, 2:23 1/2, 2:25, 2:24.

On Monday, the 15th, the track was in the best possible condition when the first race was called, which was the Maturity stake for four-year-olds, a dash of three miles. For this William Boots' colt Padre had a walkover—Lucky B, Gano and Augusta E. paying forfeit.

September 15, 1884—Maturity stake, for four-year-olds; \$100 entrance, \$25 forfeit; \$300 added; three-mile dash; 4 nominations. Wm. Boots' b c Padre, by Thad Stevens, dam Gypsy, 118 lbs. w. o.

The second event was the Premium stake for all ages, three-quarters of a mile. There were ten nominations, three of which appeared—Dotty Dimple, Blue Mountain Belle and Premium. Premium brought \$100, Blue Mountain Belle \$50, Dotty Dimple \$27, in the pools before the start. There was a delay at the start and six breakaways before the flag fell. Premium was a length behind, but the pace was so slow that it was no great disadvantage. They did the first quarter in 25 1/2 seconds, all being abreast, and rounding the further turn it was impossible to tell which had the best of it. At the seven furlongs Premium was slightly in advance, Blue Mountain Belle dropping back. From there the race was between Dotty Dimple and Premium, the latter winning in the slow time of 1:17 1/2, the Oregon mare far in the rear.

Same day.—Premium stake for all ages; \$25 entrance, \$10 forfeit; \$200 added; \$50 to second and \$25 to third; three-quarters of a mile; 10 nominations. Rancho del Paso's ch m Premium, aged, by Castor, dam by Flying Child, 115 lbs. Hill & Gries' blk m Dotty Dimple, 4 years, by Ben Wade, dam unknown, 115 lbs. S. J. Jones' br m Blue Mountain Belle, aged, 115 lbs. Carter 3 Time, 1:17.

The California stake was the next event for decision. This was for 2-year-olds, and of 13 nominations 3 came to the post—Mistletoe, Mischief and Harry Peyton, placed in the order named. Peyton was the favorite at \$150 to \$50 for each of the others. They were off at the first attempt, Mistletoe going away with a strong lead, Mischief second, until near the quarter pole, when Peyton moved into second place. The pace was slow, the quarter being passed in 29 1/2 seconds and the half in 56 1/2. They were all together rounding the upper turn, but when fairly in the stretch the favorite came away and won very easily in 1:43 1/2, Mischief second.

Same day.—California annual stake for two-year-olds; \$100 entrance; \$25 forfeit; \$250 added; \$100 to second and \$50 to third; one mile; 13 nominations. C. Underhill's h c Harry Peyton, by Shannon, dam Miss Peyton, 110 lbs. James Mee's ch f Mischief, by Thad Stevens, dam Katie Pease, 107 lbs. James Mee's ch f Mistletoe, by Thad Stevens, dam Mistake, by Wildside—Long 3 Time, 1:43 1/2.

Then came the handicap \$50 stake, \$25 forfeit, two and a quarter miles. The starters were Birdcatcher, who was the favorite at \$250, Billy the Kid at \$150 and Bachelor at \$40. Again there was a delay at the post, and immediately after the flag fell Billy the Kid rushed to the front, followed by Bachelor, Birdcatcher trailing. The stand was passed in the above order in 27 seconds, the half mile in 55 1/2, the three-quarters in 1:22 1/2, still without change of positions. At the stand the second time, in 2:18, Bachelor had closed a trifle in the lead, and when about half way around the turn Birdcatcher made his run. He followed and fell back again, endeavoring to reach the leaders on the backstretch. The mile and three-quarters was made in 3:11 1/2, Billy about a length in front of Bachelor, who was a trifle more than that in front of Birdcatcher. There was a closing up on the northern semi-circle and a volume of cheers from stand and stretch when it seemed that there was a likelihood of a race home. Bachelor, however, was unable to concede eleven pounds to Billy, and though he ran gamely was beaten by

two lengths, and there were four between him and Birdcatcher. Time, 4:03 1/2.

Same day—Free handicap stake; \$50 entrance; \$25 forfeit; \$15 declaration; \$30 added; \$75 to second horse and third to save stake; two and one-quarter miles; 4 nominations. G. L. Richardson's b g Billy the Kid, aged, by Leinster, dam Lily Simpson, 108 lbs. Hill & Gries' b c Bachelor, 3 years, by Hockhocking, dam Maid of the Mist, 105 lbs. Caleb Dorsey's br h Birdcatcher, 5 years, by Specter, dam Fel, 110 lbs. Time, 4:03 1/2.

Heats of a mile was next on the programme. The starters were Amanda L, Patsy Duffy, Jon-Jon and Philip S. The positions were in the above order. Patsy was the favorite at the rate of \$90 on him to \$72 on the others. Time enough was frittered away before the start to try the patience of the spectators, and there were six false starts before the flag fell. Then Amanda L had the advantage, retaining the lead at the quarter in 27 1/2 seconds and the half in 54 seconds. Patsy Duffy had been running in second place one length behind Amanda, with Philip S. on his quarter and Jon-Jon bringing up the rear. All were bunched when coming around the turn, and at the entrance to the home-stretch it was impossible to tell which was leading. At the seven furlongs Jon-Jon shot in front, and from there had it all his own way, crossing the score two lengths in front of Philip S., Patsy three lengths further back, and Amanda just inside the distance. Time, 1:45 1/2.

Jon-Jon's victory had little effect on changing the rates, Patsy bringing \$100 to \$57 on the others. When the start was given Patsy Duffy cut across Jon-Jon and took the lead, Philip S. running into second position. The pace was faster than before as the quarter was made in 26 seconds. Down the back stretch Patsy and Philip S. ran locked, Jon-Jon some lengths behind. The half mile was passed in 51 1/2 seconds. Looking through the glass, it was evident that Jon-Jon was running easily, and this was fully proved when they reached the seven furlong mark, as from there he galloped in in the fast time of 1:43, Patsy Duffy second.

Same day. Free purse, \$300, for all ages; \$50 to second and \$25 to third; one mile and repeat. W. Kelly's b g Jon-Jon, 3 years, by Monday, dam Plything, 100 lbs. M. M. Allen's b b Patsy Duffy, aged, by Leinster, dam Ada A., 113 lbs. P. Siebenthaler's b b Philip S., 3 years, by Leinster, dam Lily Simpson, 103 lbs. G. Harrison's br m Amanda L, 4 years, by Shannon, dam Eva Astton, 110 lbs. Time, 1:43 1/2, 1:43.

Tuesday was a grand morning, the sun breaking over the top of the Sierras and bathing the valley in radiance, while the sides of the mountains were in shadow. There was not a breath of air, though as the day progressed there was a light breeze which tempered the atmosphere so that the most fastidious could not find fault. There was a large attendance at the Park in the morning and a very large one in the afternoon. The morning attraction was a grand stock parade, and the people were unanimous in pronouncing it the finest exhibition of cattle ever seen in California, and it is doubtful if it could be surpassed in the United States for rarity. There were Shorthorns, Herefords, Devons, Holsteins, Ayrshires and Jerseys, and then came the polled Angus, which were admired by all butchers for evidences of their prime beef qualities, by stockmen for their general adaptability to all countries, while the masses admired them for their unequalled beauty. Draft horses were well represented, and there were a few fine animals among the thoroughbreds and trotters.

The first race in the afternoon was a purse of \$1,000 for three-year-olds. The starters were Robert Lee, Antevolo, Leleap, Pope Leo and Voucher. Antevolo was a great favorite, bringing the night previous \$100 to \$30 on all the others, and after winning the first heat it was \$100 to \$9 on him, but the loss of the second heat to Voucher brought the field up to \$40 against \$100 on the favorite. With the exception of the second heat, description of the race is unnecessary, further than reference to the summary, as Antevolo took the lead at the start and never lost it, coming home at his ease. In the second heat Leleap took the inside position on the first turn until near the half-mile post, Antevolo going along leisurely behind. He went to the front at the half mile, Voucher coming up at the three-quarters and fairly out-trotted Antevolo home.

September 16th—Trotting; purse, \$1,000; three-year-old class. Antevolo, br c, by Electioneer—J. C. Simpson, Simpson 1 2 1 Voucher, br c, by Nephew—G. W. Trabern, 113 lbs. Leleap, ch f, by Nutwood—H. C. Smith, 113 lbs. Robert Lee, ch c, by Nutwood—Rancho del Paso, Dewan 4 4 3 Pope Leo, g c, by Romero—Charles Thomas, Goldsmith 5 dis. Time, 2:37 1/2, 2:37 1/2, 2:34, 2:34.

The second race was the three-minute class, for a purse of \$1,200. The starters were Col. Hawkins, Le Grange, Menlo, Guy Wilkes and Blanche, and the order of starting was as written. Guy Wilkes was an immense favorite, bringing \$360 to \$30 on all the others. After the first heat, which was won by Guy Wilkes in 2:23, it was so evident that the race was all in his favor that he was left out of the pools, the issue being on second place, and then Blanche and Menlo together brought \$300, Col. Hawkins \$105 and Le Grange \$100. As Guy Wilkes won the second heat in 2:23 1/2, fully as easily as the first, there was little interest in which would win, but as Le Grange came in second wagering on positions became somewhat complicated, but the third heat ended the trouble, as Guy Wilkes won as handily as before. Though there was a sharp struggle for second place, Le Grange apparently had it safe until he broke, and Colonel Hawkins beat him in. This gave Le Grange second money, Blanche third and Colonel Hawkins fourth.

Same day—Purse \$1,200; three-minute class. Guy Wilkes, b s, by Guy Wilkes—Wm. Corbett, Goldsmith 1 1 1 Le Grange, blk g, by Sultan—L. J. Rose, Mayhurn 4 2 3 Blanche, b m, by Grey McClellan—Win. Bither, Crandall 2 4 5 Col. Hawkins, br g, pedigree unknown—J. D. Young, P. Williams 5 5 2 Menlo, b s, by Nutwood—R. T. Carroll, Farrell 3 3 4 Time, 2:23—2:23 1/2—2:24.

To complete the afternoon's sport, a pacing purse of \$500 was offered for Prince, Fred. Ackerman and Nevada. It proved a very spirited contest, the finish of the first heat being so close as to evoke rousing cheers from the spectators. Time, 2:27. The second heat Prince won with greater ease in 2:24, and the third in 2:30 1/2.

Same day—Pacing; purse \$500. Prince, b g—S. C. Tryon, Tryon 1 1 1 Fred. Ackerman, b g—J. T. McIntosh, Goldsmith 2 2 2 Nevada, b s—W. B. Todhunter, Lyon 3 3 3 Time, 2:27—2:27 1/2—2:30 1/2.

A continuation of glorious weather and an increased attendance were the salient features of Wednesday at Agricultural Park, outside of the races. It was a running day, and there was the buzz of life in the stands long before the hour fixed for starting. The poolsellers were busy, and as the sleek-coated animals took their preliminary gallop, the glasses were turned on them, and the clinking of watches was heard on every side at anticipation breakfast furlong. The first race was the Orange Stakes, for two

for where they have been once formed the callous and the short root surface will throw out new roots with the greatest ease.

Cultivating is one of the necessities for the growing of abundant crops, and if properly performed, all the moisture in a soil will be retained for the use of the crop to be grown. Cultivation acts beneficially too, in other directions, for by loosening the soil it allows the air and warmth to penetrate more readily to the roots.

Rain as it falls is taken up by the soil and is gradually carried down by the power of gravitation. This continual movement of the water is more or less active, in proportion to the quantity held by a soil for there is a saturating point, varying in differing soils, when the water moves with reluctance.

There is, however, another power, the very opposite to gravitation, the tendency to go down, namely, capillary attraction—the power for liquids to raise themselves in hair-like spaces or tubes. You can see this power by taking a cube of sugar and dipping the tip of it in your coffee, when the liquid will rapidly rise to every part of the sugar until filled to its saturating point, when there will be no farther movement. Again the same thing occurs when you take the wick of a lamp and as soon as one end touches the oil, the oil at once rises in the wick, filling all the tubes or spaces, and to that extent diminishing the oil in the lamp; but when saturated to the capacity of the wick, all movement ceases. Light, however, the end of the wick, when oil will be consumed to feed the flame and a movement of the oil in the wick will begin, which will continue as long as the light burns, until all the oil in the lamp is exhausted.

This is the way water is removed from the soil. The sun is the lamp, a hard surface soil with unbroken tubes and spaces, or growing plants, are the wicks, and the soil to a number of feet in depth, is the reservoir. As long as these wicks (the crust of the soil and plants) remain, evaporation will continue until the soil is exhausted of its water to several feet in depth. Thus water being removed from the soil near the surface, the soil below yields up part of its moisture to make both equal.

This being a fact, it becomes a study how to stop this evaporation; and we find we can do very much in that direction, for there are certain conditions which almost cut off evaporation entirely, as you can easily test for yourself. We find that capillary attraction goes on very easily through hard but porous substances like brick, loaf sugar, hard or compact earth, etc., but with difficulty in loose substances, where spaces are wide apart or broken up. For instance: Take a dry brick, place it on a wet sponge; and it will draw the moisture out of the sponge; and if placed in the sun will evaporate the water in both in a short time. Reverse the order, put a dry sponge on a wet brick and no water will be taken up by the sponge, and if placed in the sun, the sponge will protect the water in the brick from being evaporated. Thus it is, that by plowing we break up the hard crust (a favorable condition for capillary attraction), with its tubes and small continuous spaces, changing it to a loose earth (without continuous spaces for the water to climb in), which acts like the sponge and forms a mulch to protect the moisture from the sun and stops evaporation, for there is no water to evaporate—the wick is cut off. That lands cultivated, but not planted in any crops, retain their moisture all summer, many of you have observed. The conditions, however, are quickly changed when such ground is growing weeds, or is planted in some crop. The reason for this is very simple—moisture and sunshine or warmth are a necessity for the growth of all plants.

It would be an interesting study to look into the processes of plant life, observe how they grow, and the different roles that water plays in the growth of plants; but a paper of this kind will not permit of this, and for our purpose it is sufficient to state that water is taken from the soil by the roots of plants, and is carried to every part of the plant where it is exposed to the sun, and most actively evaporated by the leaves; and this movement continues as in the lamp until the soil is exhausted of its water, when growth ceases.

This teaches us that we should keep our grounds clean from weeds, for to allow them to grow robs the soil of the water necessary for their crop. As I said before, all growth is at the expense of water from the soil grown in, and the adage holds here as in everything else: "You can't eat your cake and still have it." It follows, therefore, that the larger the plants, trees, or vines are, the more leaves there will be, and consequently more evaporating surface for the sun to act on, and the more water will be required and evaporated. You will readily see that if you raise weeds you will only have additional wicks to draw water from your soil, and rob the crop which you wish to raise. Therefore, plowing and cultivating the soil accomplishes both purposes by keeping your soil loose and in a favorable condition to prevent capillary action on the surface where the sun can get at it, and by destroying the not wanted vegetation with their connecting wicks of stems and roots in the soil to pump it up.

Cultivation should be as often as a hard surface or crust forms. This may be sooner or later, for different kinds of soils differ in this respect. Rain and irrigation will form it as soon as the surface dries, and for this reason light cultivation should follow every rain or irrigation, when possible, as soon as the soil will work kindly; and it will be found that such rain or irrigation, when followed by stirring the top soil, will do twice the good, and the ground will remain moist twice as long than when it is neglected. Even when there has been no rain or irrigation and the top soil is so dry that weeds do not sprout any more, yet if there is a crust on the ground it should be broken up to form a thin coat of loose soil, and your vines or crops will show the benefit in no doubtful manner by renewed growth and vigor.

What to plant becomes a very serious question, and I regret that there is so little information which are known to be facts. Most vineyardists and winemakers are agreed about a few varieties not to plant—as the Mission, Black Malvoisie and the Muecat of Alexandria, for wine. I would say that for the present we have enough Zinfandel. The reason for my saying so is because we are finding among the new varieties that are now being introduced, grapes that make a much better red wine. And to find a grape that is uniformly productive, that will make a good red wine, of dark color and good keeping qualities—a wine which will be called good by the Englishman and the Frenchman—will solve the viticultural problem in California; for then we can all raise grapes and be happy, for we will not be able to overdo the planting of vines. The Zinfandel wine, of some of the best localities is fair, but the bulk of that wine made in this State has too much acidity.

Much of it may be used with other wines for "blending," but that word blending always has a suspicious sound to me, and nine times out of ten it means that the wine to be blended has a grave fault or defect, generally excessive acidity; and much good wine is spoiled by trying to make a bad wine passable. I do not wish to say that blending may not

be done, to the benefit of two or more kinds, for one wine may have too little color, or not enough stringency; while another may have an excess of either, or both, unfitting it to be drunk as it is; or one wine may be almost neutral in flavor and bouquet, while another may have too much. Such blends are of utility in the hands of a man who understands his calling. It is quite likely that one locality may not be able to produce a wine of such quality as will fill all the requirements of a good wine. The cold, wet coast counties may make wine of too low spirit, lacking in color or body, when the interior counties, where there is a longer and hotter season, may be able only to raise heavy-bodied wines, strong in spirit and dark in color. If these should be actual conditions, then both sections would be benefited by an interchange. This is a fact in France, and doubtless will be so here.

California has made great progress in experimenting with many varieties—especially French varieties—of grapes in the last three or four years. In fact, more has been done in that direction in that time than in all time before, and we have already results in this experimental stage to show that we shall succeed and find the grape that we need. It is not certain that the same grape will be the desired grape for all sections of California; in fact, it is almost certain that every marked difference in climate will have a different variety which may be especially suited to such climate; but there is a great variety of grapes coming from different countries with different climates, as different as the climate of our State and similar to ours. As yet experience is too limited to recommend with confidence any varieties for special localities. I wish I knew what to recommend to each locality, for I would like to be good even to myself. I can, however, tell you some general characteristics of some of the noted new kinds, as I have had probably better opportunities of seeing than many of you and have heard the opinions of some of our most prominent growers and wine-makers. The variety which stands, perhaps, the highest of all the new ones, is the

*Malato*—It is claimed by those who have worked it up that it is a true claret grape, making a wine of dark color, somewhat rough to the taste when new, but improving with age—a wine that carries well and is almost impossible to spoil. I have seen it growing and bearing both in Los Angeles and Napa, and it is a good grower and heavy bearer. *Grosse Blau* is another of the grapes of very high promise. It is very rich in tannin, making a dark, bright red wine of fine quality. The vine is healthy and a good bearer. *Carrignou* makes a smooth, pleasant red wine from the beginning, but it is claimed does not improve much by age. A heavy bearer, but is liable to mildew.

*Trousseau* makes a fair to dark colored wine of the highest quality for flavor and bouquet, and makes in the Southern counties the best port wine yet made. It makes, too, a superior red, dry wine, if the grapes are gathered when not over-ripe. It is free from mildew; a good grower, perhaps medium bearer. I consider it valuable, and have had some experience with it.

*Cabernet*, the *Shiraz* and *Malbec* are grapes which make in Europe the finest of all wines, but where I have seen them growing (Napa valley in 1883) they are very shy bearers; and for that reason, of doubtful value, and would recommend them for experiment only.

*Pri de Pedrix* and *Gauvny Trincurier* are two varieties of grapes whose juice, even before fermentation, is dark red, and when fermented make a wine of intense color—so dark that mixing one gallon of this wine with two of white wine, would make a dark red wine, and I have much faith that red wines could thus be made of superior quality. Both of these grapes are heavy bearers, and I am very sure that such dark wines will always be in demand for mixing with wines that are deficient in color, and I intend to plant largely of both.

*Petit Penot* or *Black Burgundy* is also a grape of much promise as a red wine grape, and a good bearer. *Ploussard* has a good reputation about San Jose, the only place where it has yet been tried.

There are some varieties of American origin which I think may be very valuable for the warm localities in this State. I have no actual experience with them, and some of the wine men do not share in some of the beliefs I entertain. I speak of three varieties—

*Lenoir*, *Cynthiana* and *Norton's Virginia*—We all agree that they are phylloxera proof; that the *Lenoir* makes a wine of intense dark color and valuable for mixing purposes; but when I claim that the *Cynthiana* and the *Norton* makes a very superior wine, then we differ. I have drunk the wine at different times, and I like it better than any other red wine. It is held, too, in high esteem East, selling for the highest price, fifteen dollars per case. This high price, no doubt, is partly owing to the limited supply. It is agreed that the wine has a most beautiful color and that it might be valuable for blending with others, and it is said that they all are good bearers. Another very valuable quality these grapes have for warm localities is that the vines retain their leaves under all trying and hot conditions of climate, and that no sunshine can scorch them, and that their large, dark green surface remains intact until winter, fully protecting the grapes. Their drawbacks is that all root from cuttings with difficulty, and have to be rooted in nursery before planting in vineyard. I feel very safe, however, in recommending their extensive planting, for should my belief in their good qualities for wine purposes be erroneous, then they could be used for grafting upon, and being phylloxera proof, would be very valuable.

As regards grapes for the making of white wine, I can speak with much more confidence, for our white wines, especially in the South, are much more satisfactory than our red wines, excepting our sweet wine, whether white or red, which are always satisfactory.

For warm localities I can with confidence recommend the *Burger*. I have had it now for over ten years. It is the heaviest of all bearers, and makes a wine of good quality, which can be drunk without tiring the palate day after day in generous quantity, and with pleasant effect to mind and body. It is a wine which will always be popular on account of its neutral flavor and aroma and mild, pleasant acid. It also makes a superior brandy.

*Blau* *Elben* makes a good white wine, is a good bearer, and usually healthy, but is not quite so desirable as *Burger* and some others.

*Semillon* and *Sauvignon Vert* are two very valuable grapes for making superior and excellent Sauterne, which will always bring the highest price in market. Both are very heavy bearers.

*Sultana* may be regarded as a grape which promises well, for it has as yet been used only for wine-making to a limited extent. What I have seen of a very good Sauterne type. It is, perhaps, the largest bearer of all the grapes.

There are, of course, many more varieties, some of which are known to be valuable, and some are in a stage of experiment; but I have given enough varieties, and those which are likely to be of great value. To give more would be only confusing, and many of them had better be left for a time in

the hands of those who follow experimenting, and true be approved or condemned as time will teach.

There are many more points that suggest themselves which would be of interest for me to discuss. One thought suggests another and it becomes difficult to stop; but I would tire you with these prosy details, and I will bring my remarks to a close. I cannot do so without a word of praise to the liberal people of Sacramento, in doing the lion's share in giving the people of this State this grand and beautiful Agricultural Hall. Our Legislators are entitled, too, to the thanks of the agricultural community for the wisdom and liberality which they have ever shown in extending aid to our State Fair and the different District Fairs; for the appropriation to help build this building; and last, but not least, for the generous aid to the viticultural interest of this State, and for the maintenance of the Board of Viticulture. And this is as it should be. A land that is so favored by Nature should also have sons to aid it in the rapid march of development. I may say with confidence, that from every dollar so expended, a hundred fold benefit has been derived.

The Board of Commissioners have all been educators, and also been educated, and viticultural people have learned more in the last three years about planting and caring for vines, about wine-making, fermentation, curing raisins, grafting, remedies for vine pests and other subjects pertaining to viticulture, than all their knowledge of previous years. I believe that Californians are the best posted people, and are freer from prejudice on these subjects, than any other people on the globe.

All the Commissioners have done something to this end, and they have done it because they wish to help on the good work of making California in fact, as well as by nature, the favored vine land of the world—not for price, but for love of country and mankind. Very much, however, has been due to its chief officer, Charles A. Wetmore, for he has devoted his entire time and mind to the study and teaching about every branch of this subject. It is a hobby with him, and fortunately for us, his very nature impels him to be always busy in reading and observing. He seems to acquire knowledge intuitively and gather facts on the fly.

Mr. Arpad Haraszthy, the President, also has done much by his writing and speaking, and combine with his practical experience deep study and thinking. He is a hard worker and good educator.

Mr. Mathew Cooke has helped very materially in pushing the good work along, with experiments and in devising remedies for the various diseases of plants and insect pests.

But I wish to call particular attention to the work done by Professor Hilgard and his assistants, Messrs. Rising and Morse. They are doing work of incalculable benefit to the wine interest of the State, in their analysis of soils of wines from different parts of the State, in his experimental wine-making from grapes of the same varieties grown in various portions and climates of the State, teaching how the same grape differs in different sections and under different climatic conditions, and how to obtain the best results in different localities. Such experiments make facts for the guidance of wine-makers and grape-growers throughout the land—saving incalculable sums to all, and aiding and benefiting the grape interest of the State to an extent that may be counted by millions.

I do not speak of this matter to eulogize these gentlemen, although they richly deserve it, but to draw attention to the work they are doing with limited means, and to urge that when the next Legislature convenes, larger appropriations should be made to enlarge these fields of useful information, which are of such great benefit to our State. It will be like bread cast upon the waters, returning to this State in a thousand fold.

I have no doubt that this is a matter which requires only to be brought to the notice of the next Legislature, for former bodies have shown an appreciation in aiding all industries which tend to the public good. They have ever shown by their acts that they recognize that the farming, the producing interest, underlies all other prosperity; that when this flourishes all trade and labor is happy. We all feel and know that California is the specially favored land of the world, and that every man or woman who lives on its productive soil is ambitious to add to its beauty and prosperity. We all see the day in the future when every part will blossom as the rose; when almost its entire length and breadth will be densely settled by a prosperous, refined, intelligent people; when our long line of sea-coast will be dotted by cottages, where the ceaseless waves dash themselves in thundering tones against the cliff-bound coast, mingling with the weird and cheerful sound of the sea-birds' cry; or again, lapping their curly heads over the golden sands of some delightful beach. Or these habitations will creep up the sides of our snow-capped mountains, where the air is made invigorating by the cool breeze from the snow-capped peaks, and made fragrant by the odor of the pines; where the eagle soars in lazy circles around some eyrie, occupied by his mate; where mountain streams, with their cool and dancing waters, flash and sparkle their ripples and spray with ever-changing beauty in sunshine and shade. Such homes will be surrounded by vineyards, through whose dark foliage will peep the purple clusters of the grape; or by trees laden with fruit of various beautiful forms and shades of color, and there, man, when his light day's labor is over, will lingeringly approach his home as he listens to the last song of birds to closing day, and be wooed by the fragrance of the rose and jasmine to his evening meal.

The old-time race-horse Wildmoor, that has campaigned in his time pretty much all over the country, met his death in rather uproarious style at Brighton Beach last week. He had been got into pretty good shape by his trainer, and was taking a strong gallop in preparation for a race in which he was engaged, when suddenly a buggy horse belonging to starter Caldwell ran upon the track and collided with Wildmoor, the latter turning a summersault and breaking his neck.

In view of the recent misfortune of Mr. W. H. Wilson, the burning of his stables at Cynthiana, Ky., his friends have induced him to allow his famous mare, Lady de Jarrette, to be raffled, 500 chances at \$10 each. The raffle will be held at the Louisville exposition as soon as the chances are taken.

A man named Jamieson was badly bitten by the stallion Napa Chief at Petaluma a few days ago, and is threatened with lock jaw. His hands were terribly crushed and mangled by the vicious brute, and it was necessary to choke the animal almost to death before it would let go its hold.

Belle Echo seems to be recovering her form as at Racine, Wisconsin, on the 5th, on a half mile track she won the free for all in straight heats; time 2:24, 2:23, 2:23. Stranger finished second and Will Colender third.

Mr. Haggin's stallion Kyrle Daly was exhibited on the track at the State Fair last Wednesday and elicited the most flattering comments from experts and admirers of the finished thoroughbred.

## THE RIFLE.

### The Schuetzen Verein at Schuetzen Park.

A week ago last Sunday this distinguished body of rifle-men, the oldest in the State, celebrated its twenty-fifth anniversary, which continued two days. It is needless to say it was an occasion of joy, merriment, and fraternal feeling to those who participated, for of all the people in the world, on such occasions, the Germans are the most kindly disposed. The festival is two-fold in its object—a meeting of the families of the members, and a trial of skill with the rifle for the annual prizes of the club by the members. The occasion of the festival is not a common one in our history, for it not only takes us back almost to the earliest period of our existence as a State, but the Schuetzen Verein, besides being with the Swiss Rifle Club of this city the authors and promoters of rifle shooting in California, the club itself has been associated with many of the most stirring events of the State's history either in its individual or military capacity. We shall not, therefore, be content with merely giving the shooting records of the two days, but we shall also give a brief history of the club, the same as we have already given a history of the San Francisco Swiss Rifle, and the Eintracht clubs, in conformity with our original intention of making the BREEDER AND SPORTSMAN the representative organ of all nationalities at the target and trap, as it is already the representative organ of all legitimate sports, and thus deal in the most liberal and honest manner with our local citizens of foreign birth. These citizens, in every capacity, require an English speaking organ to represent them in their festivals of recreation and skill, and while we know none so well suited for the work as the BREEDER AND SPORTSMAN, we can safely say that it will always be a pleasure to us to deal with them in the most just and liberal spirit.

The Schuetzen Verein of this city was organized as far back as 1859, which makes it now just twenty-five years old. In spirit, object, and principle it comes direct from a citizen military organization of German speaking people of over 1,000 years old. At that distant period, and for many centuries after, the people of Europe suffered great wrongs and hardships from the nobles who were in the habit of making periodical raids, in the true spirit of the irresponsible highway-men and robbers, upon their homes, persons, and property. As no organized armies then existed, the municipal governments of cities, as well as the people in their private relations were also raided and put under tribute, until the manhood and spirit of independence of the people could endure such a condition of things no longer. To resist and punish such outrageous aggressions, existing to-day in too great a degree, only sugar-coated like the patent pills to make them more readily swallowed, came the Schuetzen Verein, a citizen-military organization which has done the world much good service, though confined in its works for many ages to Europe exclusively. In each city and district of the continent, where the German language is spoken, the Schuetzen Verein still exists, still imparting, as in the days of old, a love of social recreation, military ardor, and rifle shooting. Every three years, on the continent, the universal brotherhood meets by arrangement, and indulges in those rifle contests which have become so celebrated all over the world, in which several of our California sharpshooters, Kuhnle, Jacoby, Giannini and others have distinguished themselves, and to which our local clubs always contribute a prize worth winning. This year, at Leipzig, dressed in their handsome green uniform, 30,000 of these grand men meet to celebrate the national festival, the California Schuetzen being too late in receiving their official invitation either to send a delegation or a prize. Such is the origin of the Schuetzen Verein. Brief and imperfect as it must necessarily be in an article like this, it nevertheless contains enough to excite the admiration of the American freeman, and to cause him in future to give more attention to the Schuetzen Verein festivals.

As we have said our local club was formed in 1859, and from its origin has always been influential and prominent in good works and noble deeds. Its first president was F. B. Mayerhofer, a practicing physician of this city, and who, assisted by Frederick Seidenstricker, its first captain for several terms of service, and at that time if we recollect rightly the proprietor of the Hayes Valley pavilion, did much to give the Order the life and vigor it has ever shown since. W. Reichel, the first secretary and afterwards president, was member of a wealthy and prominent liquor firm in this city, and also did much for the success of the club. The first practice was held at the Hayes Park range, at that time the only one we had, twenty-seven members being present, using rifles which a day or two previously had arrived from Germany round the Horn. To-day the Order numbers 160 earnest, well-to-do members. The entrance fee is \$5, the monthly dues 50 cents each, and in case of need the treasury is always ready to meet the demands upon it. The first rifle shooting festival was held at the old Russ Gardens, Sixth and Harrison streets, which have long been wiped out of existence by subsequent improvements grand as they were in their time, on Oct. 17, 1859, and thirty-five members in uniform paraded the city, stopping on the way at the old Oriental Hotel, to pay their respects to Gen. Scott, the great soldier of the republic, who was on his way to British Columbia, to settle the controversy of the San Juan Island boundary and which he did settle with so much honor and satisfaction to the Government and people of the United States. The General made a complimentary speech in return and congratulated the Schuetzen Verein on being the first citizen-military organization of the Pacific Coast, an honor the club has well sustained up to the present. As years rolled on such men as John Wieland, the millionaire brewer, Captain Wulzen, insurance broker, P. Liecnfeld, the celebrated billiard-table manufacturer, and others of their standing and wealth became members, most of whom still living like Captain Wulzen, the present captain, retaining the connection up to date. Unfortunately no record of the early shooting of the club can be found, or we would have compared it with the present to see the difference existing. This much, however, we may say, that many members now prominent for their skill at the target, in those days, scarcely knew which end of the gun to hold to their shoulder, a fact which at once proves the influence the Schuetzen Verein have had in perfecting the grand sharpshooting of California, the present California Schuetzen and the Eintracht Rifle Club, in a measure, coming from them. We have said the organization has a dual character, semi-military and social. The greatest credit to be given it in its former connection, was gained in 1861. At that time the doctrine of secession was pretty strong in this city, and its advocates threatened to take the State out of the Union. Personally believing secession, as a principle of government, to be the most absurd ever adopted by man, we never believed in their ability to do so, but others did,

and excitement ran strong. In this emergency, to their eternal credit be it said, the Schuetzen Verein, as a military body, offered their services to the Governor in that grand spirit of devotion to order and right that marked the formation of the parent society 1,000 years ago, and the offer being accepted, they went into camp at Platt's Hall for the time being. Those still living well remember the salutary influence those faithful bayonets of the Schuetzen had upon the peace of the city, if not on the integrity of the State, and the circumstance could not be justly omitted in this sketch. On December 31, 1859, in its social character it held its first ball, which was largely attended and a great financial success. In 1862, they gave a benefit for the wounded on the national side of the dispute, at the old Metropolitan Theater, the net receipts of which amounted to \$508.50. In 1864 they sent a solid silver bar to Bremen, as a trophy to be shot for at the tri-annual festival, and which, we believe, ranked as third in value. In February, 1868, the club bought the property in Alameda, known as Schuetzen Park, embracing eight acres in the park and thirty-six in tide land. Up to present time the park has cost the society \$20,000, but the investment has been a success, and improves in value every year. The prime mover in this matter was Mr. Alexander Gerdes, the present President, who has been honored by that distinction several terms in succession. The society at present numbers 160 members, and is in fine financial condition.

The list of officers is as follows: Alex. Gerdes, President; Henry Schroder, Vice-President; C. Hildebrandt, Secretary; A. Bahrs, Financial Secretary; H. Seyden, Treasurer; John Mengel, F. Freese, Shooting Masters; John Wulzen, Captain; A. Browning, First Lieutenant; John Bolts, Second Lieutenant; H. Tennis, Third Lieutenant; L. Haake, Fourth Lieutenant; J. L. Meyer, Orderly Sergeant; C. Hadenfeldt, Guide; H. Prien, H. B. Fritschen, Color Bearers.

The record of the local shooting at the last festival is as follows: There were 85 prizes altogether, not fifty as stated by the dailies, and were of every variety. The range was 200 yards with rifles not over 44 calibre, all sights except telescopic allowed. Throughout the shooting was good, and the contestants exerted themselves to the utmost. The best number of shots was made by Charles Rapp, who scored 64 out of a possible 75. The following is a list of the others who took prizes, together with the record which they made: F. A. Knbls 63 rings, F. Freese 62, F. Krohmann 62, F. Brandt 62, F. Bockmann 61, John A. Baner 61, Eibe H. Fit 60, J. H. Seyden 60, August Browning 58, F. Hageman 58, H. Schroeder 57, K. Westheimer 57, John Mengel 57, H. Bischoff 57, George Helms 56, H. Zecher 56, C. Scheurer 55, William Ehrenpfort 54, F. Greiner 54, H. F. Burmeister 53, Henry Plagemann 53, L. Haacke 53, C. Hiseuseberg 50, Henry Thode 49, J. C. Waller 49, Peter Mober 45, Henry Fincke 47, A. Meyer 46, H. F. Fortman 46, John Plath 45, D. Vosbrinck 44, Wm. F. Ganes 43, H. Prien 43, John L. Koster 42, C. Hartmann 41, Henry Fietzen 41, C. Hadenfeldt 41, J. C. Bitterman 41, F. W. Appiaris 41, C. Hildebrandt 40, O. W. Lilkendey 40, V. Ebrman 39, F. Martens 38, H. Huppert 37, J. N. Petersen 36, H. Monsees 36, H. Evers 36, F. G. Witt 35, H. Koeber 34.

After the match for members of the Schuetzen Verein there was a public shooting match for twenty-eight prizes, valued at \$300. The leading prize was \$40 in cash. In this match there were over a hundred participants. There was also a ladies' match in which many of the fair sex contested with each other to see who could direct a swinging pin nearest to the center of a target. Mrs. H. Bode made the highest number of points—making 34 out of a possible 36. The first prize was a fine gold watch and chain. The pleasure of the day was considerably marred in the latter part of the afternoon by a drizzling rain which commenced to fall, and many of the ladies and their escorts forsook the dancing hall to seek the seclusion of the cars which were to bear them to their homes.

Captain Wulzen, commander of the Verein, received many congratulations, as this was not only the twenty-fifth anniversary of the Verein, but also the twenty-fifth anniversary of his membership, he being one of the pioneers of the organization.

The second day was kept up with great spirit, but the attendance of course was not as large as on the opening day. The principal attraction was the bird shooting. Fritz Hageman carried off first prize.

After the day's games were over, the members of the society met in the shooting gallery, where F. Brunt distinguished himself, making a score of 72 out of a possible 75, in three trials, Messrs. Helms and Heith coming next with 70 each.

The following prizes were awarded for the day:

Gentlemen's target.—First, Fritz Hageman, king shot and gold medal; second, William Appiaris, crown; third, F. Greiner, apple; fourth, H. Stevens, scepter; seventh, L. Haake, neck; eighth, J. Plath, right wing; ninth, George Schaffer, left wing; eleventh, George Seydin, left leg; sixth and tenth to target.

Ladies' target.—First, Mrs. J. Browning; second, Mrs. J. Thode; third, Miss L. Rapp; fourth, Mrs. Niedemeyer; fifth, Mrs. Alldrack; sixth, Mrs. Grave; seventh, Mrs. A. Gerdis; eighth, Mrs. Struckmeyer; ninth, Mrs. J. H. Winter; tenth, Mrs. Schultzen; eleventh, Miss Segelkin; twelfth, Miss A. Spreckels; thirteenth, Mrs. F. Hageman; fourteenth, Miss H. Spreckels; fifteenth, Miss N. Cooke.

The numbers securing gate prizes on Sunday are as follows: 537, 1091, 677, 454, 37, 813, 816, 162, 1588, 1180, 1160, 513, 537, 182, 1098, 460, 1025, 318, 443, 889, 53, 8, 341, 1021, 336, 275, 558, 534, 851, 388, 294, 630, 618, 252, 833, 790, 503, 213, 7, 371, 406, 12, 747, 522, 828, 844, 849, 544, 874, 1037, 1163, 541, 1013, 1141, 612, 570, 662, 1070, 433, 811.

Ladies' target.—First, Mrs. H. Spreckels; second, Mrs. H. Bode; third, Mrs. H. F. Maase; fourth, Miss N. Cooke; fifth, Mrs. Struckmeyer; sixth, Mrs. J. Thode; seventh, Miss T. Salbat; eighth, Miss Fautz; ninth, Mrs. P. Mohr; tenth, Mrs. Gerdow; eleventh, Mrs. Sandow; twelfth, Miss Neidemeyer; thirteenth, Mrs. J. Limkan; fourteenth, Miss A. Nuster; fifteenth, Mrs. Linkendey. Total value of prizes, \$300.

This little sketch would scarcely be complete or consistent with our design, if we omitted the history of Mr. Alexander Gerdes, the President. He was born in Oldenburg, Germany, with the fire and principle of a true Schuetzen in his nature, which developed itself at an early age. He was first elected President in 1867, and off and on from that time has held the office four times, two years in succession generally. This shows his importance in, and usefulness to the Order, and how thoroughly both are appreciated by his fellow Schuetzens. He was born in 1830, and is now 54 years old, but a man of grand vitality and vigor. He came to New York in 1853, and to California in 1860. Though not strictly speaking a good shot, he has always been associated with rifle-men, and is a promoter of rifle shooting. His deficiency in shooting lies in a deficiency of eight. Mr. Gerdes occupies the responsible position of hook-keeper to the Coos Bay State and Lumber Company, whose city office is 323 First street.

The celebration was closed with a ball at Saratoga Hall on the 10th inst. The President, A. Gerdes, presented a gold medal and silver water-pitcher to Fritz Hagemann, who was crowned king the previous Sunday in the crack shooting match at Sbell Mound.

### At Shell Mound.

The attendance at this popular range was much increased last Sunday. The day was excellent for good shooting, and so, as might be expected, some fine scores were made, one especially by Lieutenant Mangels, who is rapidly rising in the ranks of our rifle-men, his score being 95 out of a possible 100. This we believe, speaking from recollection, stands at the head of rifle records, 95 never having been made. This was made by the dashing young Lieutenant in three friendly matches with Sergeant Marcs, Company C, Second Artillery, Mangela giving his opponent five points in each match. Mangels used a Sharps-Borchardt, Marcus a Springfield. It will be seen by the figures below that Lieut. Mengel's score were remarkable all through.

First match.....	200 yards—	5	4	4	5	4	5	5	5	3—45
	500 yards—	5	4	5	5	5	5	5	5	4—49—93
Second match.....	200 yards—	5	5	5	5	4	4	4	4	4—45
	500 yards—	5	5	5	5	5	5	5	5	5—95
Third match.....	200 yards—	4	5	5	5	4	5	4	4	5—46
	500 yards—	4	5	5	5	5	5	4	4	5—92
Sergeant Geo. Marcs.....	200 yards—	3	4	2	4	3	4	3	3	5—35
	500 yards—	3	4	4	5	3	5	3	5	5—42—77
	200 yards—	4	4	4	3	5	4	4	4	4—40
	500 yards—	5	5	5	5	5	4	4	4	2—36—76
	200 yards—	4	4	4	4	5	3	5	4	4—42
	500 yards—	2	4	4	4	4	4	5	5	4—40—82

The score of Sergeant Marcus is not what he can do, but without it the record would be incomplete.

In looking over our files we find Lieut. Klein, in the week ending Aug. 30th last, also made 95 out of a possible 100, his score at 200 yards being 45, at 500 yards a full possible of 50. Total 95.

The Lafayette Guard were present to hold their annual medal shoot. By some mistake the cartridges provided did not fit the company rifles and a couple of borrowed Springfields had to be used. Considering the men were not familiar with the arm, though we supposed all the militia had to use the Springfield, the shooting was considered good. The average reached 60 per cent.; in some cases 75 and 80 per cent. were made. We failed on Tuesday to get the detailed score, otherwise we should have been pleased to publish them.

The Fifth Battalion under the tutelage of Col. Ranlett also were at the range as usual, and had several matches for position in its two teams. These matches were as follows:

Lt. Kellogg, No. 5, versus Priv. Waltham, No. 4.

Kellogg.....	200 yards—	4	5	5	5	5	4	4	5	4	5—70
	500 yards—	5	4	4	4	4	3	4	5	4	5—55

90 per cent. 135

Waltham.....	200 yards—	4	5	4	5	4	5	4	4	4	5—67
	500 yards—	5	4	4	5	2	3	5	4	5	5—64

The possible was 150, which gives Kellogg 90-70 per cent. 131

Williams, No. 10, against Gallagher, No. 9 (absent).											
Williams.....	200 yards—	5	4	4	4	4	3	4	4	4	5—61
	500 yards—	5	3	5	4	5	5	3	5	4	5—58

85.73 per cent. 129

Hovey, No. 12, against Moore, No. 11 (absent).											
Hovey.....	200 yards—	5	4	4	4	4	5	4	5	4	5—68
	500 yards—	5	5	3	5	4	5	2	5	2	5—64

88.70 per cent. 133

All this is good shooting, ranging as it does over the regimental 85 record for sharpshooters. After his match, Sergt. Hovey of the Fifth, again distinguished himself at the 200 yard range by making 10 bull's-eyes in succession, or 50 points out of a possible 50. Still some of our dailies are pleased to call the little sergeant an ordinary marksman.

Colonel Ranlett's challenge has been accepted by the Nevada militiamen, and he is now in correspondence with the commanding officers, to have the match, if possible, come off at Sacramento, in October next, as that is the most central range to be had. The idea is a good one and will no doubt be accepted by the spirited Nevadians. Whether Col. Sontag selects his team to-day (Tuesday) or whether money can be raised to take it over the mountains or not, we shall have a chance of seeing the best sharpshooters in America, if not the world, come together in a national but fraternal competition. The match will draw a great crowd of spectators.

Talking of the Fifth Infantry, what has become of the genial Major Parsons? He seldom appears at the range now-a-days, and in spite of his rank is getting obscured by the brilliant shooting of his comrades.

### At Schuetzen Park.

At the regular monthly prize-shooting of the California Schuetzen Club, held on Sunday at Schuetzen Park, Alameda, the champion prize was won by H. C. Smith, with 414 rings (finally); the first class prize by John Utschig, with 420; the second class prize by McLoughlan, with 416; the third class prize by Heeth, with 380; and the fourth class prize by H.G. Schneider, with 356 rings. All of which is great shooting.

The German Fusileers, Captain Stettin commanding, hold their annual picnic at Shell Mound, on Sunday, 23th inst. A long list of cash prizes will be given from \$20 down. We hope the picnic will be a success for the German Fusileers are an admirable body of men and good shooters.

The Eintracht Rifle Club, some twenty-six in number, held their annual picnic last Sunday, in the classic shades of Berkeley. The great feature of the day was the amount of liquor consumed with no one intoxicated. Four half-barrels of beer, two gallons of cognac in bottles, four caes of light wine, with two dozen bottles in each, besides extras, is a pretty liberal allowance for twenty-six men. Beside an old farmer living in the neighborhood, who joined the party and has not since been heard of, no one had a mishap except the commanding officer, our good old friend Fred Kuhls. He had a sunstroke late in the afternoon, and suddenly disappeared. A delegation of his comrades out hunting him found him, we hear, in the Oakland cemetery, rambling about in a dazed condition hunting mushrooms. Last inquires report him convalescent.

At the Presidio.

On Monday early, 7.30, there was a very interesting match between the Regulars and the Police Teams, selected to represent the Pacific Division at Leavenworth, Kansas, at the coming army shoot. Both are proverbially strong teams, and have been practicing steadily of late. General Kelton, commanding the Regulars, was desirous of testing the strength of his team before they went East on Tuesday, and so got up the match. The shooting was at 200, 300 and 600 yards, but the Police had not practiced much at 300 yards—held to be the most difficult distance of all to shoot over—but they, nevertheless, at once accepted the challenge. The Police were beaten, as they expected, at the 300-yard range, for though they came out there four points ahead, they left off at 300 yards 33 points behind. At 600 yards they shot stronger than the Regulars, but the best they could do was to improve their score 22 points, which left them losers 11 points. The score:

Table with 4 columns: Name, 200 yds., 300 yds., 600 yds., Total. Rows include Sergeant Lloyd, Sergeant Anderson, Lieut. Brant, Sergeant Brede, Sergeant Leonard, Corporal Hopkins, Sergeant Sanders, Sergeant Wille, Corporal Bonton, Corporal Casey, and Aggregates.

Table with 4 columns: Name, 200 yds., 300 yds., 600 yds., Total. Rows include A. S. Field, Sergt. Charles Nash, Officer Peckinph, Sergeant Gans, Officer Geary, Officer McCarthy, N. J. Field, Officer H. Hook, Sergeant Fleming, Officer Linville, and Aggregates.

As the Police are not much used to praying, the kneeling position at 300 yards killed them but they shot well for all that.

The percentages of the winners were: 200-yard and 300-yard targets, 82, the latter being exceptionally good; 600-yard target, 75 1-7; average, 79 5-7. The percentages of the losers were: At the 200-yard target, 83 1-7; 300-yard target, 71 3-7; 600-yard target, 81 3-7; average, 78 3-7.

The first three individual prizes were won by A. S. Field, Sergeant Nash and Officer Peckinph in the order named, Sergeant Lloyd of the Regulars getting the fourth.

The Army team used the regulation Springfield, and the Police used the Sharp-Borchard.

The Police team are doing good work, too good to be kept secret as a record. Officer McCarthy, recently put himself ahead by equaling the grand scores of Lieutenants Mangels and Klein, 95 out of a possible 100; 46 at 200, 49 at 300 yards. One unlucky 4 kept him from the grand honor of making 46—the unmade score—but the same may be said in favor of Mangels and Klein. Linville recently made 92, that is 46 at each range. We are always willing to render unto Caesar the things that are his, if people will only allow us to do so by eschewing all funny business in legitimate sport. As a people we must now avoid all that thing most scrupulously.

THE GUN.

BIOGRAPHICAL SKETCHES.

M. M. Estee, Esq.

As President of the State Sportsmen's Association, as well as from his individual predilection for field sports, Mr. Estee is entitled to a prominent place in our sketches of those who have distinguished themselves in our State, although the reputation he has earned has been earned in private rather than public life. Few beyond a limited circle of intimate friends, who have shared his pleasures on the field and enjoyed his hospitality, have any idea of the extent and earnestness of his labors to preserve our game—fish, birds, and animals, or how worthy he was of the honor conferred upon him by the State Sportsman's Association, at their last convention, in making him President for the two-year term.

Mr. Estee was born in the town of Frelhold, Warren county, Pennsylvania, November 23, 1833, which makes him 51 years old, and in his mental and physical condition shows the fruits of a well-spent life. At an early period of childhood his father's family removed to Concord, Erie county, Pennsylvania, where he remained until 1853, and where he grew to manhood and received his education. In the Summer of 1853 he imbibed the desire of coming to California and reached the State in September, when, like thousands of other good men amongst us, he went to the mines, locating at Volcano, Amador county, at that time, and for years after, well known for its rich placer and promising quartz mines. Here he remained until 1855, but to a man of his ambition and intellectual qualities, mining had not much attraction, and so he abandoned the occupation, and like all our great men of national repute and power, engaged in teaching school, in the meantime studying law and preparing himself for that proud position he holds amongst us at present. In the Winter of 1857-8, he left the mountains and went to Sacramento, where he continued his legal studies vigorously for a year, and was admitted to practice in the Supreme Court. On commencing his professional life he soon laid the foundation of a lucrative business, and remained at the capital, gaining daily in public esteem and influence until 1862, when he was elected to the Assembly from Sacramento county. Our readers will recollect without our explaining the names, that this session of the Legislature was a memorable one in our history, as being composed of many of our very ablest men, and as the one in which Hon. John Conness, the wily storekeeper of Georgetown, was elected to the Senate of the United States. In the Fall of 1863, he was elected District Attorney of Sacramento county, which position he held until 1866. At this period, following the example of many leading men, he located in San Francisco, as the field for his future life, where he soon increased his professional practice and reputation, and made for himself a name in our history that he may well be proud of. We do not desire to be tedious in this division of our subject, and so Mr. Estee's success as a lawyer; his influence as a man; his election to the Assembly again in 1875, this time from San Francisco, in which session he was chosen as Speaker;

his membership of the Constitutional Convention; his nomination for Governor in 1882, by the Republican party—we shall pass over with simply mentioning, as they are all familiar to our readers, and proceed to other divisions of his life more pertinent to our purpose.

Although it was necessary to refer to these events to make our sketch complete, we have more pleasure in drawing attention to other leading characteristics and labors of the man. In addition to the attention he has given to his profession and public affairs, he has become, in theory and practice, one of the leading horticulturists in the State. Especially has he studied the peculiarities in the cultivation of the grape, and his vineyard of three hundred acres or more in Napa Valley is a model in its way, and famous for its produce. It would seem from all we have said that the time of Mr. Estee, with his business, politics, and farming, must be pretty well occupied, and so it is. But there are some men so gifted that they can find time to do everything and yet do everything well, and Mr. Estee is one of these fortunate men, for he is not only an earnest supporter of the game laws, an earnest laborer in propagating game, fish, birds, and animals, but he is a devoted lover of field sports, in their legitimate form, and an enthusiastic member of the true sportsman's fraternity. During his earlier residence in Sacramento he was a frequent visitor to the tule marshes in search of water fowl, and to the uplands in search of quail. Of later years his pleasure has been more with the rifle, in pursuit of deer in the mountains round his beautiful home, and as a deer-hunter and rifleman he is quite a success. The opening days of the season always find him, with a party of congenial friends, ready for a day's sport with trout, quail, or deer, and his expertness in fishing and shooting, as well as his activity in traveling for so large a man, have often been matters of wonder and admiration to those friends accompanying him on his hunting expeditions. Few amateurs in the State, if any, are more skillful in the use of the rod, gun, or rifle, or more devoted to their use than Mr. Estee, and the larder of his home is always well supplied at the proper time with the produce of his skill in the field.

In regard to the propagation and preservation of game, fish, birds, and animals, we have no more earnest man in the State, none more ready with his purse to accomplish that desirable object, than Mr. Estee, and what is still better, he is thoroughly practical and sensible in his views on the subject. As might be expected of such a man, he never loses an opportunity to exert his influence for good in this way, whether alone or in conjunction with other men of similar conviction. As a legislator and as a man, his exertions are always for good laws, and his sympathies with true sportsmen. In his own district he has done very much good in aiding the prosecution of local offenders against the law, but his purse is always open also for the prosecution of similar offenders elsewhere. Some years since, at considerable expense, he imported a lot of Bob White quail, and turned them out on his farm. He took every possible care of them afterwards, but like the efforts of other gentlemen in other districts, unfortunately from some cause the experiment failed. We know personally that while certain men in Napa Valley, who all the year round violate the trout law with the most shameless effrontery, were prosecuted this Summer, no one was more liberal with his money or efforts to have them punished than Mr. Estee, but the prosecution was robbed of that success which would have made it very useful in future by the conduct of two local lawyers, whose position in the community should have taught them better.

It was eminently proper, with such qualifications, that the State Sportsman's Association should elect Mr. Estee president, at their last annual convention at Gilroy. Under his leadership, as might be expected, the association has prospered. We only hope his successor may be a man of the same composition.

Personally Mr. Estee is frank, open-hearted, industrious, and loyal to his friends and the lovers of order and law. It is a matter of congratulation that he belongs to the fraternity of sportsmen in the true sense of the term. His example may safely be followed by other gentlemen of means. As a people become wealthy they must and will have recreation. Of the value of field sports, of the pleasure they give, of the health they impart, we would point out Mr. Estee as a sample, who though immersed in the cares of business finds time to enjoy them. Without health, life is of no use. Where can this precious boon, which millions cannot buy, be secured so soon and so effectually as in the enjoyment of field sports? Mr. Estee's life has been a useful one, but it was never more useful than when he showed his peers the wisdom of being a true sportsman.

At San Bruno.

The final match of the California Wing Club, at San Bruno on Sunday, presented some of the most remarkable shooting ever seen in California, or perhaps in any other country. The main match, for the possession of the medals, on the usual conditions, was a grand exhibition of skill, but it was nothing with the shooting afterwards in the pools and final freeze-out. In the opening shoot it was not only the champions, Messrs. Robinson and Fay, who displayed such wonderful quickness and accuracy, but they were followed up to their heart's content by Golcher, Slade, Jellett and Walsh, who, but for mere accidents, might have tied them on clean scores. With eight men contending, the score with two twelves, four elevens and one nine is something very unusual, especially when the birds, over an average lot, almost in every case were killed with the first barrel. Mr. Fay's shooting was again as deadly as in his match with Pearson. In the long shots with the second barrel, several of which were very fine, he took first place. A lively in-comer came upon him which he missed at close quarters. The bird then flew low down over the heads of the assembled spectators and he had to wait until it got beyond them. Then he fired and killed it, as usual, without a flutter, the distance being fully seventy yards. Kerrigan had a bad case of dead-out-of-bounds, which shows how much shot a pigeon will sometimes pack away. On being plucked for inspection we saw where five or six shot had centered in a straight line from the neck to the tail, just under the backbone. It was shot enough to bring a man down and yet he lost it. Such cases are very provoking. The attendance was not as large as expected, either in shooters or visitors, but it was a day's sport as close to the season that the club may well and long be proud of. The day was fine but slightly in favor of the guns. We have again personally to acknowledge the civilities and attentions of Mr. Cunningham, proprietor of the grounds. He certainly makes things very pleasant. The score:

Table with 2 columns: Name, Score. Rows include Robinson, Fay, Jellett, Walsh, Golcher, Slade, Kerrigan, and Rice.

The best average of the season gave Mr. Robinson first medal, Walsh taking second. Golcher and Fay, then shot-off at three singles for third medal, when Golcher with his usual fatality lost his one requisite bird. As we have often said, Mr. Golcher can kill eleven birds out of twelve oftener than any man we know. The score:

Table with 2 columns: Name, Score. Rows include Fay, Golcher, Robinson, Slade, and Kerrigan.

After this came a pool, \$5 entrance, 12 birds each, with five entries in which—and the freeze-out afterwards—Dr. Jallett's shooting was really wonderful for its steadiness, accuracy and effect. The score:

Table with 2 columns: Name, Score. Rows include Robinson, Slade, Fay, and Kerrigan.

As there seemed no possibility of reaching a decision at this kind of shooting, it was stopped and changed to a freeze-out, in which, after a desperate struggle, Dr. Jallett came out victor. The score:

Table with 2 columns: Name, Score. Rows include Robinson, Walsh, Fay, Elton, Lachman, Precht, Graham, Golcher, Thompson, Bryant, Jellett, Brand, Kerrigan, Derwick, Lauenstein, Knowles, G. W. Watson, Spencer, Rice, and Betzman.

At Sacramento.

The Tournament at the State Fair, Sacramento, last week, was not what it was expected to be, and not what it ought to have been. It is said it was not sufficiently advertised. Certainly we know of one or two in this city who did not get particulars in time to attend. The birds were an average lot though nothing to boast of. The accounts reaching us are very meagre. The scores: First match, 12 birds, single barrel; \$10 each; prizes, \$48, \$36, \$24 and \$12:

Table with 2 columns: Name, Score. Rows include H. Gerber, H. Bassford, G. Routier, J. H. Parrott, F. Lopez, N. S. Decker, F. Lastreto, E. Wentworth, G. W. Watson, and W. J. Boss.

H. McCullough and J. Jones withdrew with four birds. This match was followed by another, 12 birds, 30 yards rise, double barrels, \$10 each, divided into prizes of \$40, \$20 and \$10.

Table with 2 columns: Name, Score. Rows include Bassford, Decker, Gerber, Lopez, Zaver, Lastreto, and Watson.

Gerber and Lopez divided third money. A match at double birds, three pair, \$10 entrance, 18 yards rise, divided into \$25 and \$15:

Table with 2 columns: Name, Score. Rows include Lopez, McCullough, Routier, and Bassford.

McCullough and Routier divided second money. A similar match at \$5 each resulted thus:

Table with 2 columns: Name, Score. Rows include Lopez, Routier, Bassford, Zaver, and Glatz.

The shooting is said to have been very good and very hard, the best being done by Messrs. H. Gerber, Henry Bassford, Geo. Routier, Parrot, Lopez, and Lastreto, all of whom did themselves great credit. Henry Bassford's new gun was much admired for its workmanship and power. In a letter received from him since, he informs us it is a beauty, 10 1/2 pounds weight, 32-inch barrel, and cost \$225. He tells us he is so pleased with its execution that he will have to come down soon and give Mr. Fay a trial. We know Henry Bassford is a hard man to beat at the trap, but if he aspires to clip Mr. Fay's wings, he had better bring Brother Tucker along to help him. But in all earnestness we should like to see a match between the gentlemen. Mr. Bassford, at the tournament, killed thirty birds in succession; that's good work. At San Bruno last Sunday Dr. Jallett, out of 33 birds, never missed one all day, and Messrs. Robinson and Fay altogether only missed two each out of 48 birds; that's better work. The shooting in California for this season has really been wonderful, and will bear comparison with any in the world—if indeed, it is equalled in the world.

At Six-Mile House.

The Occidental Wing Club had their regular meeting on Sunday, at which some excellent shooting was done, Walsh leaving San Bruno early to be present. The contest for championship was between Rojas and P. Funke, which, after a brilliant fight, was left undecided. We regret our crowded columns this week prevents us saying all the pleasant things about the Occidentals we desired. The score:

Table with 2 columns: Name, Score. Rows include J. M. Rojas, P. Funke, D. B. Todd, E. Dunabee, J. Hedley, W. Games, E. Funke, T. Hedley, B. Rowan, P. Funke, O. Jones, H. Planken, W. Dunbee, G. Burnot, J. Ford, P. Walsh, and Perata.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

Stock at the Fairs.

California claims first place among the States of the Union and the nations of the earth as the natural home of the horse. She is proving that claim by her works, and ere many years will leave the field behind the flag. Where the horse finds the fitness of things existing in such perfection all other domestic animals may and do partake of the advantage. We have thought that our farmers and stock raisers were slow to realize that fact, but the exhibit of fine stock at the fairs this year indicates the contrary, and is a matter for congratulation. The number of exhibitors is increased and new varieties in all lines have been added to our stock, until there is no breed of value or standing in the world that is not represented in the show ring. Of the new exhibits, the most sensational has been the herd of black polls shown by Messrs. Paige & Johnston, of Ela Hills Stock Farm, Los Angeles. The cattle are the first of their kind that have been seen here, and aside from being new to most Californians their hornless heads and uniform jet black coats gave them such a striking appearance that they monopolized the lion's share of attention. As a rule none but butchers or persons experienced as slaughters can classify beef cattle intelligently, but there are certain leading points that may be observed by the veriest novice. The parallelogram form of body, the tendency of weight to the hind quarters, which are the most valuable for beef, smallness of the head, neck and other parts that are either waste material or indifferent meat, these may be seen at a glance, and were so prominent in these Scotch polls as to be generally noted and favorably commented upon by all classes of visitors. The special merit claimed for the polls is that they are range cattle, nursed to high feeding or special attention, and able to take care of themselves under all circumstances where life is possible. That these qualities commend them to the beef breeders of this Coast, need hardly be said. Another new-comer in the field is Capt. A. J. Hutchinson, of the Cienega ranch, Los Angeles county, who shows a herd of imported Devons. The Devons are not new to California, but have never before been chaperoned by such an enthusiastic and energetic gentleman as Capt. Hutchinson. The Captain expects to demonstrate practically to the stock men of this Coast that the red Devonshires will give more and better beef from grass alone than any other class of cattle in existence. The Herefords were also seen for the first time at the fairs this year. They were exhibited by Capt. Kohl, of San Mateo, and the New Zealand Stud and Stock Company, represented in this city by Mr. Hugh Craig. They were much admired by connoisseurs, and were handsome animals. Like the Aberdeen Angus tribe above mentioned, the Herefords are strictly a beef breed, adapted to range feeding, and good travelers. They are bred in Australia, and New Zealand probably in greater perfection than in any other part of the world. Mr. H. W. Meek, of San Lorenzo, was also in

the ring this year with a fine herd of imported Holsteins. All other varieties of cattle, as well as sheep, swine, poultry, etc., were well represented in the ring, and the exhibits were large, fine and very interesting. The Jersey class was incomplete without a delegation from the Yerba Buena herd, but Mr. Pierce's business engagements were such that he could not make the tour with his cattle this Fall. Jersey Belle was represented at Santa Rosa, Petaluma and Oakland by William of Scituate, now owned by W. D. Bliss of Petaluma. Altogether there has been a material advance, and the process of evolution has fairly set in whereby the "common cow" and all the native tribes of chance and inferior animals will be replaced by better stock and mere certain heredity. The effect of this movement is already visible, and will be more marked with each succeeding year.

State Sportsman's Convention.

We have much pleasure in calling attention to the fourth annual convention of the State Sportsman's Association, which opens at Los Angeles on Thursday, Oct. 2d, next, and to which we beg to acknowledge a cordial invitation from the managing committee. The association never had, and perhaps never will have, a convention of such importance to its vitality as the present one, and it is to be hoped, in spite of the distance to be travelled, every delegate of every subordinate club in the State belonging to the parent association will throw aside all personal considerations and endeavor by every means to be present. We do not say authoritatively that commutation tickets will be given by the railroad and steamboat companies, but, we believe, efforts have already been or will be made in due time to have them given, and with reasonable hopes of success. But whether these efforts are successful or not, we hope there will be general effort made by delegates to be present, for at this season of the year, apart from the great object in view, and the important questions to be discussed at the Convention, the trip taken only as a vacation will be very enjoyable, and more than compensate all who make it.

The importance of the present Convention to all true sportsmen in every section of the State, whether connected officially with the Association or not, lies in the importance of the questions to be discussed—questions which for the welfare and benefit of all sportsmen and the preservation of our public game, must be settled one way or the other. The value and wisdom of the settlement will depend, of course, in a great measure upon the extent of the attendance. One of the most important of these questions is the alteration in our present laws, so as to make them sectional in their application to particular counties, instead of uniform in their relation to the whole State. Many leading counties, separated far apart in this grand State of ours, demand this change imperatively if they are to be considered amenable to the operation of the laws. The members of the Association generally coincide in the necessity of this change on principle, and for the sake of harmony in the great fraternity of sportsmen, but it should at the same time be remembered there are serious difficulties in the way of legislating in favor of sectional distinctions and exemptions, based upon the gestative periods of birds and animals and their migrations from place to place. Of course, the true spirit of legislation on this point would be to consult the pleasure and convenience of the citizens of every county demanding the change, but if there were no other difficulties in the way of making the change, the Constitution requires all our laws separately to be uniform in character and application. This is the great obstacle. Like all the leading members of the Association, we believe the change should be made if possible, and perhaps the precedent of the old fence law, in which different counties were granted exemptions from its application by the Legislature, will aid us to obtain the change. The people may rest assured the State Association will do all that can be done in the future, as in the past, to obtain the greatest liberty and convenience to the citizen, in whatever portion of the State he may reside, compatible with a due preservation of our public game. All we ask is moderation in the outside counties, support by all true sportsmen, and wisdom in debate, and then we feel assured an ultimatum will be reached satisfactory to all concerned.

So far as the pleasure of the trip is concerned there can be no question. The convention will be held under the auspices of the Los Angeles Recreation Club—a splendid body of sportsmen—who are making the most extensive and generous preparations for the comfort and pleasure of those who may attend. Perhaps, at this time of the year, no section of the State could be more pleasant to visit than Los Angeles, and the provisions made by the local club for a drive through the vineyards, and going into camp for a quail shoot, so far as pleasure is concerned, should be attractions enough of themselves

to induce every one to go who possibly can. We do not know we can do more to induce attendance than to publish the programme of the proceedings:

Thursday, October 2d.

Committee on Reception will meet delegates on the train and escort them into Los Angeles, arriving at 1:00 P. M.  
3:00 P. M.—Drive through city, orchards and vineyards.  
8:00 P. M.—Meeting of Convention. Address of Welcome.

Friday, October 3d.

9:30 A. M.—Pigeon shooting.

FIRST MATCH.

12 Single rises, 21 yards; entrance, \$2.50.

SECOND MATCH.

12 Birds, Hurlingham rules; entrance, \$5.00.

THIRD MATCH.

2:00 P. M.—6 Double rises, 18 yards; entrance, \$10.00.

FOURTH MATCH.

12 Birds, Hurlingham rules; entrance, \$5.00.

All Prizes to be divided into 40, 30, 20 and 10 per cent., open to all members of the State Association. California State Sportsman's Association Rules to govern.

8:00 P. M.—Convention.

Saturday, October 4th.

Convention will go into camp for a quail shoot as guests of the Recreation Gun Team. Returning Monday evening.

7:00 P. M.—Sportsman's Game Supper.

Not Good-bye, but only Adieu for the Present.

Then, for those who can afford to extend the time of attendance, there is another great attraction, that of the County Agricultural Fair, which opens during the following week. To all interested in the progress of the State, the annual fair of this far-famed county ought indeed to be worth seeing, for its natural productions in horses, cattle, fruits, cereals, vegetables and flowers are to-day the pride of the nation as well as the State. We re-assert, therefore, that the Convention of the Association never imposed so many obligations, or offered so many attractions to attend as the present, and we hope both will have due influence with the delegates-elect.

The Inter-State Team.

We have endeavored up to writing, Friday morning, to ascertain the exact chances of a team from California going to Nevada at the time appointed, or of one going at all. We regret to say the prospects for us do not look very promising, and we form this opinion from conversations during the last two days with the leading men who would constitute the team, supposing one goes. Colonel Sontag, it is true, selected a team, but we personally know that was only because he was required from official position to do so, and to relieve himself from responsibility. The selection of a team, without the funds to take them to Nevada, amounts to nothing, and that is just where the great trouble lies. As nearly as we can get at the truth, after much trouble to learn the real facts, we may put the case as follows: The whole burden of the expedition rests entirely upon the First and Second Regiments, who have to furnish the men and the money to take them to Nevada. The First Regiment is acting very nobly in the matter, and covering itself with honor. Five, if not six, men of the team, as it stands, belong to the First Regiment, and the officers are willing to supply ample means for its own men, but they decline, we understand, and very properly, too, to do more. Of the intentions of the Second Regiment, we are not so well informed, but we fully believe, from what we hear, they will respond with the same generous and liberal spirit of their brothers of the First Regiment. As the case appears to us, a fair, good team may be gotten together, if funds are provided for their expenses. The example set by the military should cause a blush of shame to all private citizens of means who stand back with their purse strings drawn close, when the honor and dignity of the State are so seriously involved. Without the means, about \$600, the team cannot go. Six thousand dollars a week are now spent in politics, and there the patriotism and liberality of our wealthy citizens seem to end, and we doubt if a dose of dynamite would shake them from their selfishness. This is not right, but it is the truth. Of the cause of all this trouble we have nothing to say at present, for we still hope we may come out all right, and we have no desire to increase the difficulty. But we do feel, like thousands of others, that if no team goes to Nevada to fight the battle out like men, a deep, burning disgrace will be inflicted upon us which through all time can never be wiped out. We anxiously await the results of the meeting to night (Friday), though we confess with much foreboding.

The report in the daily papers of the fire at Governor Stanford's farm was greatly exaggerated, and in some respects erroneous. It was to the effect that the racing stables at Matadero had been burned, involving a loss of \$6,000. The fire was at Palo Alto, and started, it is supposed by tramps, in an old building of little value used for storing straw. The straw shed and contents and a row of colt stables that stood near were all that were destroyed. The stalls are being rebuilt, and the total loss was less than \$2,000.

The Game and Fish Circulars.

The State Sportman's Association, through the Committee on Game and Fish, desires us to urge all who may have received a circular of questions bearing on game interests, to answer the queries and mail the answers to the Secretary of the Committee, Mr. H. H. Briggs, at 609 Sacramento street, San Francisco, without delay.

We cheerfully comply with this request for several reasons. The information asked for is needed to enable legislators to frame a game law which shall not unjustly prevent those in the mountain counties from sharing in the pleasures of the field.

It is the only way in which the needs of all sections can be met. Then, too, it will enable scientists to more accurately locate and describe the varied game birds which make California the longed-for ultima among sportsmen the world over.

While the report of the committee will be a perfect chart of the shooting and fishing possibilities of the State, which will be most useful to intending visitors from abroad, as well as to Californians who may desire to spend vacations in field sport, other reasons might be urged; but the plan adopted by the committee recommends itself to all, and there is nothing to be said against it.

We pointedly urge those who may receive the circulars to answer them, and would suggest that any who may have knowledge on the subject should write the committee, even though they do not receive a copy of the circular. The committee is encouraged by the interest already shown, but desires to reach every portion of the State and to have information from all portions of each county. We shall publish the report when completed, and expect to find among the authorities quoted in it the names of all shooting and fishing friends of the Breeder and Sportsman.

BICYCLING.

A twenty-miles professional championship race took place at Leicester on August 23d, and resulted in a victory for Fred Wood, with Howell second and Lees third. Howell led toward the end of the race, but about 200 yards from home Wood came with a terrible burst of speed and won the race amidst great excitement. Time, 59m. 13s. The quickest mile was made in 2m. 44s., the slowest in 3m. 12s. The last mile was made in 2m. 45s.

Henry Clark, a young Canadian who is just eighteen years old, and who has only been a rider for one year, has just accomplished some wonderful performances, at an athletic meeting in Toronto. He won the mile race with the greatest ease in 2m. 59s. He also secured the five-mile race in the magnificent time of 16m. 6s., or 1 minute and 8 seconds better than the previous best on record for Canada, made by W. G. Ross.

A lady tricyclist recently made the trip from Chicago to Geneva Lake, Wis., in two days' time; the distance is 85 miles. She was accompanied by her brother and other members of the C. B. Club. Probably some of our Montgomery tricyclists would like to take an excursion. Where are our gallant young men? Echo answers, where!—The Bicycle, Montgomery, Ala.

A. Dolph, at the bicycle tournament at New London, Ohio is reported to have ridden a half mile in 1m. 17 1/2-5s., and the mile in 2m. 40s. If investigation shall sustain the accuracy of all details, the times of Dolph for the half-mile and mile become the best on record in the world.

The Bay City Wheelman Club has been organized with the following officers: President, E. Mohrig; Vice-President, Geo. F. Day; Captain, R. F. Cook; Secretary, W. J. Munro; First Lieutenant, George Butler; Second Lieutenant, S. F. Booth; Engler, Thomas Hill.

The Bay City Wheelman Club held an informal run to the Park last Sunday. To-morrow the club will take a run through the Presidio.

THE KENNEL.

The Pacific Coast Field Trial Club's field trials for 1884 will be run at Walltown timber, El Dorado county, commencing Tuesday, December 2d next.

The Club now numbers fifty-two members, distributed over the State from San Diego to Shasta, and is strong in every way.

Dieterman has killed many pups that would have started this year, but there are more than thirty nominations already made and the trials promise to be most interesting. We are glad to see this Club doing well. It was organized by excellent men, who have held in view the shoals on which such Clubs are too often wrecked, and have made it the authority on all dog matters on the Pacific slope. The purses are large and should induce the many quiet owners of good dogs—and they are many—to enter them and assist in a matter of such general usefulness and profit.

The Club will provide suitable entertainment for visiting gentlemen and has reason to believe that many will attend. The date is a good one. It gives dog owners two months of open season in which to handle and condition their dogs, and insures cool, pleasant weather for the trials.

Entry blanks and all desired information may be had from either Mr. Thos. Bennett, of San Francisco, the President, or Mr. N. E. White, of Sacramento, the Secretary.

Mr. Roht, H. Neill, the Vice-President, and Mr. H. H. Briggs, Chairman of the Executive Committee, both in San Francisco, will also take pleasure in answering questions and providing blanks, etc.

Entrance to both all-aged and puppy stakes closes on November 10th. Those desiring to enter dogs should procure blanks, fill them out and send them, together with three dollars, to the Secretary.

If the dog is started, a further payment of seven dollars must be made. Readers will find the Club advertisement on another page.

Coney Island.

Sept. 6th.—Purse \$500; all ages; entrance 5 per cent. of purse (\$25 each) to the second; the winner of the first race on the first day, (Eachus), or of the first race on the second day, (Little Minch), to carry 5 lbs. extra; ten entries; seven furlongs. Dwyer Bros.' h f Miss Woodford, 4, by Bilett, dam Fancy Jane, 115 lbs. Hayden & Co.'s ch Gleaner, 5, 115 lbs. D. D. Wither's h k Buckstone, 4, 118 lbs. R. O. Owings' h g Mammonist, aged, 115 lbs. W. C. Daly's h f Preciani, 2, 84 lbs. E. J. Baldwin's ch Gano, 4, 118 lbs. T. Bryan's h g Torpedo, 4, 115 lbs. G. R. Buchanan's ch g Jim Renwick, aged, 115 lbs. Ed. Corrigan's h c Swiney, 3, 112 lbs. Time, 1:28 3/4.

Betting: 100 to 55 on Miss Woodford; 7 to 1 against Jim Renwick; 10 to 1 each against Buckstone, Gleaner and Mammonist; 15 to 1 against Swiney; 25 to 1 against Gano; 40 to 1 against Preciani and 50 to 1 against Torpedo. Pools: Miss Woodford, \$200; Jim Renwick, \$40; Gleaner, \$30; Mammonist, \$30; Buckstone, \$25; Swiney \$20, and the field, \$10. Mutuels paid, \$7.30.

All the horses named on the card were promptly at the post with the exception of Mr. Walton's Hopeful, and as no request had been made to withdraw him, the Executive Committee fined Mr. Walton \$200 for the neglect. An excellent start was made by Mr. Caldwell and the first to show was Preciani, followed by Swiney, Jim Renwick and Mammonist, with the others close up. As soon as they were well away Jim Renwick took the lead and at the end of the quarter and half he led by a neck, with Preciani second, a trifle in front of Miss Woodford, she having gradually improved her position in the run down the back stretch. As they reached the stables at the turn into the homestretch Miss Woodford showed in front and at the end of the three-quarters she led by a good two lengths, followed by Gleaner and Buckstone, both of which had passed Jim Renwick on the turn. Neither Gleaner nor Buckstone had a ghost of a chance to reach the favorite, who in an easy gallop kept on amidst considerable applause, winning by four lengths in 1:28 3/4, with Gleaner the same distance in front of Buckstone, who was followed by Mammonist, Preciani, Gano, Torpedo, Jim Renwick and Swiney in the order named. The time, although not quite as good as the record, (Sweetbrier having run the distance in 1:25 in California), is equal with the record in the East and is the best at the weights, Little Phil carrying 111 pounds when he ran it in 1:28 3/4 at Monmouth Park in 1882.

Same Day.—A sweepstakes for two-year-olds at \$20 each, play or pay, with \$600 added, of which \$100 to the second; winners of two races of the value of \$2,000, to carry 118 lbs.; of two of \$1,000 or one of \$2,000, 115 lbs.; of one of \$1,000, 110 lbs.; other winners to carry 105 lbs.; maidens to carry 98 lbs., with six allowances; 19 entries; three-quarters of a mile.

P. H. McMahon's br c Eachus, by Reform, dam Nemesis, 106 (carried 108) lbs. H. D. Markstone's h k f Florence H., 100 lbs. P. Lorillard's h c Exile, 103 lbs. E. J. Baldwin's ch g Rapido, 100 lbs. W. L. Withers' ch f Barbara, 95 lbs. Appleby & Co.'s gr f Cricket, 100 lbs. Excelsior Stable's ch f Bahama, 100 lbs. J. E. Kelly's Heliotrope colt, 98 lbs. R. W. Walden's ch g Hart, 100 lbs. Preakness S.'s ch f Bonnie Bess, 95 lbs. Clipsman S.'s ch f East Lynne, 100 (carried 102) lbs. W. L. Cassidy's h g Reed, 100 (carried 101) lbs. G. L. Lorillard's h c St. Augustine, 103 lbs. Time, 1:26.

Betting: 4 to 1 each against Exile and East Lynne, 5 to 1 each against Rapido, Eachus and Florence M., 8 to 1 each against Barbara and St. Augustine, 10 to 1 against the Heliotrope colt, 12 to 1 each against Bahama and Hart, 15 to 1 each against Cricket and Reed, and 20 to 1 against Bonnie Bess. Pools: East Lynne, \$75; Eachus, \$65; Rapido, \$60; Exile, \$50; Florence, \$45; Heliotrope colt, \$40; Bahama, \$30; St. Augustine, \$30; the field, \$55. Mutuels paid, \$33.20.

Thirteen out of the nineteen on the cards showed at the starting-point, from whence they were sent with St. Augustine in front, followed by Florence M., Exile and Rapido in front of the others, which were led by Eachus, with East Lynne away behind. Before they had covered a furlong Exile headed St. Augustine, but in turn was passed by Rapido, and who in turn was passed by Eachus, he leading at half the distance by half a length, followed by the Heliotrope colt, Bahama, Rapido and St. Augustine on nearly even terms, with Exile and Florence M. both close up. There was no change until they were well round the turn, when young Donahue again got up with St. Augustine and at the beginning of the last furlong he was a trifle in front, lapped on the inside by Eachus and on the outside by Florence M., Rapido and Exile. Soon after passing the post St. Augustine drew out nearly clear, but swerving into the rails he forced McLaughlin to almost pull Eachus's best off to save a collision. The advantage gained gave St. Augustine a clear lead and he finished in front with a lead of two lengths over Eachus, he a length in front of Florence M., with Exile, Rapido and Barbara close up and the others tailed out, of which East Lynne and Reed were last. Time 1:16. As soon as McLaughlin had weighed, he promptly claimed a foul against St. Augustine and the judge as promptly gave him the race and at the same time exonerated young Donahue from making an intentional foul, as it was plainly an accident.

Mr. Ryan Discloses Himself.

EDITOR BREEDER AND SPORTSMAN.—Noticing a query in your valuable paper in regard to my whereabouts and intentions, hastens me to reply. I comprehend full well that personal acquaintance and many others of the sporting fraternity are patiently and anxiously awaiting results of my location, etc., although there is a little time to spare yet, I intended to be down before this, although the repairing of my small fleet of boats has caused me delay, and I will be busy on them a couple of days more, then shall make a call on my city friends and return to locate my ark, in good shooting quarters if possible. I have not made my selection as to my location as yet. Duck feed is better than last season; more wild celery in places. No feed of importance on the lower end of Sherman Island, except the extreme lower end of lakes, and that contains more or less good, small, gray duck feed and a small quantity of wild celery, although the feed from Mayhew Slough to the upper end of Sherman is better than last season. However, there are few ducks to be seen anywhere here, as the fact is evident that they have found superior feed elsewhere, and I don't look or expect good shooting can be had on the Lower Lake country for some little time yet. The shooting was crippled last year in many places by superior feed being found by the wild duck, and I predict the same result for the present season. Mud hens may be seen in numbers feeding busily. I saw ten English snipe on July 29th; also twelve gray geese on Sept. 6th. I killed a fine pair of mallard on the 9th inst., on the lower end of Sherman Island. I shall call and see you when I come down. WAR. RYAN. ANTIOCH, Sept. 17, 1884.

The St. Leger Won by Lambkin—Scott Free Fails to Get a Place.

The Doncaster St. Leger, run on the 10th, was not reported by the Associated Press of this Coast, probably because the wires were too heavily charged with political matters. The following is the New York World's cable report:

London, Sept. 10th.—The winning of the Doncaster St. Leger to-day by The Lambkin was in a measure quite a surprise, as but few since his easy defeat for the Grand Prix de Paris, by Little Duck, believed that he possessed speed enough to get away from Scott Free or Spheria. Matthew Dawson, however, sent him from Newmarket in fine condition, and, although he was deprived of the services of Archer, who rode him both at Sandown and Paris, he had Watts up, who rode the winner (Ossian) last year. As usual, the letting was heavy, the closing price averaging as follows: 7 to 2 against Scott Free, 5 to 1 against Spheria, 6 to 1 against Sir Renhen, 7 to 1 against Harvester, 8 to 1 against The Lambkin, 15 to 1 against Queen Adelaide, 20 to 1 each against Camhmsmore and Cormelle, 40 to 1 each against Hermitage and Sandiway, and 100 to 1 each against Royal Fern, Crim Tartar and Doncaster Cup.

The conditions and starters were as follows:

The 109th renewal of the St. Leger Stakes, for three-year-olds, at £25 each, play or pay, the owner of the second to receive £200, and of the third £100 out of the stakes; colts to carry 126 lbs.; fillies, 125 lbs.; old course, about one mile, six furlongs and 132 yards; closed with 185 subscribers.

Mr. R. C. Vyner's h c The Lambkin, by Camballo, dam Mint Sauce, 126 lbs. Duke of Westminster's ch f Sandiway, by Doncaster, dam Clemence, 123 lbs. Mr. R. Peck's h f Saphia, by Sterling, dam Highland Fling, 123 lbs. Mr. J. Foy's h c Scot Free, by Macgregor, dam Celliacy, 126 lbs. Lord Mansers' ch c Sir Reuben, by Doncaster, dam Bells Agnes, 126 lbs. Sir J. Willoughby's h c Harvester, by Sterling, dam Wheat Ear, 126 lbs. Sir J. Willoughby's ch f Queen Adelaide, by Hermit, dam Adelaide, 123 lbs. W. J. Leigh's ch c Cormelle, by Macgregor, dam Narcisse, 126 lbs. Duke of Westminster's h c Camhmsmore, by Doncaster, dam Strath-sleet, 126 lbs. C. J. Lafevre's h c Hermitages, by Hermit, dam Doll Tearsheet, 126 lbs. J. H. Houldsworth's h c Royal Fern, by Springfield, dam Wood Anemone, 126 lbs. M. T. Green's ch c Grim Tartar, by Camballo, dam Memoria, 126 lbs. Mr. E. Bird's h c or h c Doncaster Cup, by Doncaster, dam Crucible, 126 lbs.

The Lambkin was bred by the late Mr. H. F. Clare Vyner and is the property of his brother, R. C. Vyner, and on the occasion of his debut at Doncaster just a year ago, when he started the favorite over the field for the Rons Plate, three-quarters of a mile straight, not a few of the Newmarket divisions present freely proclaimed him the winner of the "next Selenger." Their confidence he well sustained, for although his career has not been altogether successful, he has done well. As to the Rons Plate he won that very easily, but for the Chesterfield Nursery Handicap at Derby he was uplaced with 117 pounds in a field of twenty-one. As a three-year-old he was first seen in the City and Shurban, when with 84 pounds he was beaten way off. But on the next day at Sandown Park he won the Esher Stakes at a mile with Fred Archer up and carrying 119 pounds. This was a performance considered so good that Matthew Dawson was at once instructed to give him a preparation for the Grand Prix de Paris, and Archer was specially retained to ride him, but Little Duck, with Tom Cannon in the saddle, proved the better and Mr. Vyner's horse was second, five lengths away. The Lambkin was next seen during the July meeting at Newmarket, when he won the Summer Cup over the Rond Course (3 miles, 4 furlongs and 139 yards), carrying 103 pounds, beating My Lind ten lengths at 99 pounds. Those controlling Corrie Roy expected to get an easy gallop for the Summer Cup, but when they discovered that Mr. Vyner really meant to start The Lambkin they declined the contest. That was the last race the colt ran until he won the St. Leger as above. In breeding he has all the qualifications for a Leger winner, being specially bred to stay, although his sire—Camballo, by Camhuscan—never did anything but win the 2,000 Guineas for Mr. H. C. Vyner in 1875. On the dam's side, Mint Sauce is by Liddington out of Lamb Hill, by Voltiger, her grandson being by Touchstone. The Lambkin's success as above will naturally bring him forward for the Cesarewitch, for which he was handicapped at 110 pounds but for which he will now have to carry 116 pounds, while for the Cambridgeshire his weight will be raised from 116 pounds to 122 pounds.

The running of the Duke of Westminster's Sandiway into second place must also have been a big surprise, for, although by Doncaster, she has always been looked upon as a trifle soft, notwithstanding that she won the Coronation Stakes at Ascot and the Nassau Stakes at Goodwood, while the defeat of Spheria must have been a big disappointment.

Large French Pools.

The largest amount ever won in a French mutuel pool of \$5 each was won on Nickajack, bay gelding (4), by Rogers, dam Capitola, by imp. Alhion, when he won the Free Handicap Sweepstakes, one and one-eighth miles, at Jerome Park, Oct. 12, 1872, defeating Fanchou, Elsie and six others in 1:59 1/2. Nickajack carried only 75 lbs. French mutuels paid, \$1,178 each. The next largest was at Saratoga, July 17, 1882, on Wapakonita, bay colt (3), by War Dance, dam Miss Grey, by Revell, when he won, three-quarters of a mile, defeating Lntestring, Morgan Spy and nine others. Time, 1:17. French mutuel paid, \$1,080.80 each. The third largest was on Mr. J. J. Bovins' Hattie F., chestnut mare (6), by imp. Leamington, dam Bonnie Doon, by imp. Barlowie, at Baltimore, Md., May 21, 1879. Hattie F., 109 lbs., won the Rancocas Handicap, one and one-eighth miles, defeating Ferida, Bushwhacker and nine others in 2:00. Track heavy. French mutuels paid, \$648.85 for each \$5 invested. Hattie F. was a great mare that day, as she demonstrated by winning over such an excellent field by two lengths. Mr. Bovins thought so well of his mare that he backed her to win little less than \$10,000. It was a big day for Mr. Bovins.

Roy S. Clnke, h c (4), by Bullion, dam Lida Gaines, by War Dance, won the Twin City Handicap Sweepstakes, at Brighton Beach, on the 8th inst., defeating Ferg Kyle, Lntestring, Gleaner, Checkmate and five others in 2:09 1/2. Clnke only carried 80 lbs., and has performed so poorly that no one thought he had a ghost of a chance. He got away well, however, and was never headed. The pace was terrific; the first half-mile was run in 47 seconds—the mile in 1:42 1/2. French mutuel pools paid, \$622.75 for each \$5 invested. This is the fourth largest paying mutuel pool ever. Turf, Field and Farm.

## HERD AND SWINE.

### Milking Qualities of the Black Polls.

I see by recent correspondence that the Polled Aberdeens are being somewhat summarily declared no milkers—to be indeed outside the narrow cordon of dairy breeds. It has certainly, as is pretty well known, been to the attainment of an undisputed pre-eminence in the production of the most juicy, most finely mixed and most richly flavored beefness—the entire accomplishment of which has made these cattle, to a large and constantly increasing number of admirers, the *beau ideal* of beauty, symmetry and quality—that “improvement” has been so energetically directed. To that attainment has been surrendered the milking property. A milking fame they had, and a very high one we claim for them. The property is inherent if it does seem latent. It was the foundation of improvement towards the beefy supremacy. It is still the foundation of its proclivity to precocious maturity. It has been this struggle towards the attainment of this one pre-eminence that has succeeded. It was not, it may be faithfully said, the preference of the improvers. It was not, it is an historical fact, the sole property of the unimproved stocks. The beef precocity apparently proved to those who were best qualified to discover and take advantage of it, the quickest, easiest and surest means of profit. The two properties were there, the inducement to the exertion of improvement was the largest gain. That was soon decided, and the decision proved a revolution in the character of the agriculture of those districts wherein these polled had origin. The people of these particular districts have always been famed for their shrewd aptness in regard to the main chance. They had the insight to see that, in their locality, meat and beef would pay them better than milk and butter. The dairy interest was wrecked and beef was king.

The race we are commenting on is the only polled race of remote antiquity in Scotland. It partook thus of the milking frame of the other ancient polled races in Britain, which are supposed to have been the original cattle. A noted contributor to the London *Agricultural Gazette* describes these ancient polled natives (which he believes also to have been white) as being deep milkers. Now any one who has consulted Youatt and the others authorities from which he compiled his work, must have become speedily convinced that the claim we make is no myth. The old natives were pre-eminently famous as dairy stock. They were, in fact, recognized as superior to the Ayrshire in quantity, and as unsurpassed in quality. The famous agricultural exponent, Sir John Sinclair, sent into Aberdeenshire to procure specimens to go into his native Caithness to free the dairy. The dairy interest of Aberdeenshire and the associated counties had been of vast and growing interest. Mr. Alex. Ramsay, of Banff, in his “History of the Highland and Agricultural Society,” and in other places, has shown this conclusively. My uncle informed me that he remembered some of the most eminent English salesmen, who attended the big fairs of those olden times, used to pick out a few of the most beautiful, sleek, sealy-skinned, white-uddered cows (what choice specimens they must have been!) to be “villa” milk and butter machines for their friends in the London suburbs. Charles Stevenson, the first editor of the *North British Agriculturist*, also knew these antique polls to be quite celebrated in the milky way. He also declared them, from personal test, equal to the Ayrshire in quantity and superior in quality. In an article requested from me by the editor of the *Agricultural Gazette*, entitled “What is a Polled Aberdeen?” I gave facts to prove my claims. I quoted data, which I had obtained in an old agricultural periodical, the *Scottish Farmer*, published in Aberdeenshire, of the yields of milk from the prize cows of the late Robert Walker’s herd at Portlethen (still maintained by his son, I. G. Walker, of Aberdeen). I have not that article by me, but it is referred to. The late Lord Airliie, too, we therein showed, was a convert to the faith. He, in fact, was known to have discarded the favored “red, white and roan,” for the now “royal blacks.” He was a dairyman, and made the milk vein his peculiar test. Often his judgment was rather discounted for preferring the milky features to the heefy. But he persisted, and had entire satisfaction in producing a dairy and a beef herd out of one and the same material. His published dairy records and his special show-yard successes eloquently assert his accurate judgment. Mr. Geo. Wilken, I understand, is also collecting facts in regard to dairy records; and they will, like his success in the show yard, be emphatic. I have owned an old cow purchased from Mr. Stevenson, Blairshinnock, which is such a suckling wonder that she must have been in her more heyday period a milking treasure, and makes me regret I did not own her earlier. Were it not for her somewhat marked evidences of age, I would be inclined to pit her against any milky-breed individual going.

Then as to the quality—that is acknowledged to be of the richest. John Thornton once described to me the cream of a sample Short-horn. This cream was so thick that it would float a penny piece if placed on the surface. This I used to regard as the acme of creameries, and I used to retail the item of the great John to my farmer friends. At last it was totally eclipsed by the experience of a small farmer, who, on hearing the above, burst out: “Ach! that’s naething; I have a cowie, ay, she’s bit a cowie, hit I can fling an awl’ penny-piece on the ream (cream) an’ it’ll swim (swim) on’ no sink!” What he stated was afterwards thoroughly substantiated. The Breton cow has always been regarded, in the best informed circles, as the richest butter producer. Baron de Fontenay, who made a special study of Scotch cattle, declared the milk of the Aberdeens to be equal, if not superior, to the Breton—the cattle of his native country.

Among the numberless class of smaller farmers in the localities where the purest descendants of the original antique race are still to be found in robust prolificness, the cow is more regarded as a milk producer. The good wives have to depend on the yield of their cows to defray household expenses and meet incidental wants. These cows are as fine a looking and proving dairy-beef kind as any breeder of a favorite stock would desire.

These facts, drawn from undoubted history, authority, and the common incidents of every-day life, ought to prove that the milking property and faculty is not to be denied the polled cattle (*i. e.* Aberdeen-Angus), and is not to be written aside by an *ad hoc* ignorance. It is likely that the grand heefing propensities of this favorite race will probably always and more generally commend themselves to breeders who pride themselves on having animals of the most perfect symmetry and beauty. But the inherent milking property is still strong. It is like the water that comes in a favored spot that has not far to be dug for. To those whom the comeliness of our blacks captivate, and who desire milk capability, it may be had. American milkmen should remember that there has been no “call for” any special dual propensities farther than has been indicated above, among the old country polled men.—R. C. Auld.

### Value of Observation.

A clear perception of facts is often of great value, even when no immediate application is to be made of the observation. It is said that the forcible ejection of steam from the spout of a tea-kettle led to the invention of the steam engine. There are facts constantly occurring before the eyes of farmers that, if noted, would be of great service in their future emergencies. But they do not seem to make much impression unless needed for instant use. They do not often store up for future use experiments which they have made, or seen made; they seldom reason from one fact to another of kindred nature. A neighbor, who had concluded to make butter in Winter as well as Summer, and had half of his cows come in in October and November, found, after his Fall cows came in, and the cream from the fresh milk came to the churn, the butter would come very quick, but he did not get more than half of the butter he expected from the cream.

We said to him: “You probably only get the butter from the cream of the fresh cows, but you ought to know what remedy to apply, from your experiment of last year, in heating the milk of your farrow cows, to make it churn quicker. If you heat the milk of your cows that have given milk the longest to 130 degrees, the cream will all churn alike, and you will get all the butter.” Well, he had not thought of that, but now he believed it would help him; and, on test, it doubled his amount of butter, as the amount of milk from the fresh cows was about the same as from those long in milk.

An event occurred with our tenant last Winter that well illustrates the value of an experiment which we tried some years ago. We had some half-dozen cows that had been long in milk, and their cream was very difficult to churn to butter, and we fed them turnips in hope that it would remedy this, and it proved to have a modifying effect but not quite satisfactory. We then tried heating the fresh milk, for the purpose of improving the cream in churning. This succeeded perfectly; and, besides this, we learned another important fact—that heating milk to 130 degrees wholly dissipated the flavor of turnips. We afterwards found that heating dissipated the flavor of cabbage and tomatoe, and we formed the opinion that it would probably dissipate the flavor of leeks and other bad flavors.

Last year our tenant put fifty tons of green clover into the silo without running it through a cutter, and when opened, in December, for feeding to milch cows, it was found to be in good order. But after the first section was cut down, it was found that the air would penetrate the edge of this uncut clover, and cause it to mould. Still the cows were very fond of it, but the mould tainted the milk and butter made from it. The tenant came to us in great trouble, and said all this good clover would be lost, as the value of the butter was ruined by the taint. We said to him, as he had heated milk often, he should know what would dissipate this taint in the milk. He replied that heating old milk would make the cream rise and churn quicker, but he did not know it would take out taint. He found, however, that heating the new milk to 130 degrees dissipated the taint wholly, and made butter entirely satisfactory to very particular customers. This fact, he said, was worth \$150 to him. Had this clover been run through the cutter, it would have packed so solid that the air could not penetrate to cause mould. The farmer’s eyes should be open, and his mind receptive.—*Live Stock Journal*.

### Points for the Dairy.

1. In making butter, good, sound, wholesome food is indispensable. To make a good article from poor material is as impossible in dairying as in any manufacturing industry.
2. In making cheese, the full heat in scalding should be reached very gradually. To suddenly heat a cube of curd is to contract the pores so that the whey and gas of the interior are not fully liberated, and going into the cheese cause bad effects.
3. Excessive acidity in cream before churning causes a partial separation of the butter fats, and the acid also develops glycerine from one of the oils composing these fats. Souring cream does not add to the quality of butter; it simply creates a stronger flavor, in contrast to the delicate flavor of unsoured cream, which is the true flavor of aroma.
4. Natural vegetable acids do not harm milk, but the artificial acid of fermenting food introduces an element into the consumption that it is not possible for nature to neutralize, and hence affects the milk. The amount of ferment may be small and do little injury, but if carried beyond a certain point will have a deleterious effect, which experiment, time and again, has demonstrated.
5. Butter should always be churned several degrees colder in Summer than in Winter. The reason is that the caseinous matter of milk more readily attaches itself to the butter globules in Summer than in Winter, and that this adhesion can best be prevented by a cooler temperature of the cream when churning is a fact.
6. Sudden changes in the color of butter, unless caused by sudden changes in food, say from oat and corn meal to bran of poor quality, or rye meal, is caused by churning too warm and loading the butter with casein. Soft and white butter are both due to one cause—too highly charged with the solid matter of buttermilk.
7. Butter is a very difficult article to keep, unless a very low, uniform temperature can be secured. Where butter is needed for long keeping, the best way is to make in small and somewhat oblong rolls; wrap closely in well brine-washed muslin cloths, and immerse them in brine made from boiled water. These should be kept beneath the surface so that the air will not get to them. A small quantity can thus be had at any time.
8. Crockets of butter to be kept for several months should never be placed upon the cellar bottom. This causes two degrees of temperature in the crock, which will be at the expense of the quality of the butter near the top. The crocks will keep their contents far better if placed at least a foot from the cellar bottom, upon a bench, and a thick woolen cloth thrown over it.
9. Guess-work about cheese and butter making should never be tolerated. It is impossible to guess, with the finger, within eight or ten degrees of the actual temperature of a churning of cream; besides, it is always some trouble to wash the finger before testing the cream. Four or five degrees, even, make all the difference between good and poor butter.
10. Washing butter with brine has two effects. If the fine-grained butter is allowed to stand for some time in the brine the latter will, by the natural laws of gravity, cause the solid or cheesy matter in buttermilk to assume a lower strata, and can thus be drawn out from under the butter. The added water has also an affinity for the sugar of milk, and takes it with it when drawn off. The brine also causes a slight contraction of the butter globules, which causes increased firmness.

### Ripening Grass-Fed Pigs in Fall.

Pigs that have had abundance of grass through the Summer, with little other feed, should, in September, be fed moderately upon grain, so as to ripen the grass-made growth during the mild Fall weather. It is well known that the growth made by grass upon cattle or pigs is more sappy, or contains more water, than that made from grain, and, when these grass cattle or hogs are fed upon grain, they do not gain in weight for a short time, because the grain produces fat, to take the place of the redundant water. This may be considered as ripening up the growth made on grass. When the pigs are fed a small amount of grain with pasture, the flesh is solid and less waxy. The effect of turning a fat hog or steer to grass in Spring, is just the opposite; the solid flesh is soon permeated with a larger proportion of water, which adds considerably to the weight, but very little to the value, as the pig will dress away the principal part of this additional weight put on by the grass. This effect must be calculated upon, and it should be known that the first grain fed in Fall will be used to ripen up the Summer growth, without adding to the weight; yet it adds to the value of the carcass as much as any like amount of grain fed afterwards.

The grass is none the less valuable in the growth of young pigs, because the growth takes on this condition. The food is all utilized to the best advantage, and produces a profit both in health and growth. The addition to the weight is often very rapid, and then when grain is added to the grass the feeder is disappointed because it does not increase the growth rapidly; he quite misunderstands the philosophy of the case. This is the true reason for the different reports made by those who pasture pigs, feeding some grain, and those who pasture without grain. It has led to the opinion that grain was thrown away on pigs at pasture. But, from our point of view, it will be seen that the grass and the grain are each doing duty for their whole value in the growth of the pigs. And it is better that grain should be fed in small quantity, with pasture, and then the growth will be ripened as fast as put on.

We think pigs pastured through the Summer should be well fed in Fall, so as not only to ripen up the Summer growth, but to add to it largely before the cold season. It is getting to be generally believed that pigs are most profitable when ripened and sold at ten months; that when well fed they may be brought to three hundred pounds weight at three hundred days old, and all that is put on beyond that is produced at a loss—that is that pigs farrowed March 1st should be ready for sale January 1st. This requires good feeding from the first to the last. But this weight can be produced upon pasture and eighteen bushels of corn; and when twenty dollars can be realized for the pig the transaction should be profitable. It would be better and often cheaper to feed some middlings with the corn. But if the pasture was good the corn would not injure the pigs, although the middlings or ships would be healthier, as part of the food, especially when the pigs were very young or just weaned. If the best profit is to be realized the pigs must be pushed judiciously every day of their lives—and this grass diet will make it safe to do this.—*Live Stock Journal*.

### A Big Cattle Scheme.

Lieut. Fred Schwatka, U. S. A., has resigned his commission for the reason, as intimated, that he was about to enter “foreign service.” This latter supposed intent of the Lieutenant is pertinent with the anecdote relating to a young lady who complained to an acquaintance about the detrimental gossip of some of her neighbors. She exclaimed: “Why, they even say I’ve nine beaus!” The visitor remarked soothingly: “I never believe more than half I hear.” So in respect to the Lieutenant—he is not intending to embark in a change of flag, but he is about to enter the Scotch service in this wise: Last year he was deported by the Government to lead an expedition up the Yukon River in Northwestern Alaska, to explore its channel, resources, etc. He crossed to the river 1,200 miles above its mouth and descended to the sea, making accurate record, in full compliance with his instructions, but in the meantime he attended to a little side show of his own. In addition to what he was specially instructed to examine and report upon in the Aleutian Islands group, he discovered and mapped out the central channel of the noted Japan current and its thermal effect upon the temperature of the several islands in the track.

These islands are said to aggregate about two thousand square miles, with a perennial climate of about 60 degrees Fahr. the entire year, and covered with grasses and verdure adapted for indefinite grazing, and having no parallel on the planet for stock ranges. On the Lieutenant’s return from the Yukon expedition he stopped in Portland and entered into confidential terms with “Scotch” Reid in respect to goshing those perennial islands for cattle ranches, to be conducted under the auspices of a corporation to be organized in Scotland with “slathers” of capital to back the enterprise.

Lieut. Schwatka is to take special superintendence of the business there, with a due ratio of non-assessable stock, of course; and at the next session of Congress (*Deo Volente*) we may expect to see Schwatka’s Yukon report placed before that body in “ship shape and British fashion,” with maps, charts, etc., minus the Aleutian Islands in the Japan current, to be probably supplemented by a modest little bill to “civilize” a part of the Aleutian group by a long lease similar to that conferred upon Hutchinson, Kohl & Co., for fur-sealing privileges in the Ounalaska region. If this programme is carried into due effect, Schwatka, in lieu of being rated a mere lieutenant, will be *de facto* the Major-General “cow boy” of the world.

## STABLE AND PADDOCK.

A chronic form of indigestion, or a kind of dyspepsia, sometimes attacks horses, and greatly impairs their strength and reduces their condition. A horse affected by it either has little appetite or a very irregular one; he passes a large portion of the materials of his food in an unassimilated condition, or not in a very different one from that in which they are eaten; and, in the advanced stages of his illness he has a dry and staring coat, and exhibits the peculiar appearance of being hide-bound. The immediate causes of these symptoms are some morbid change in the stomach, some imperfection of its secretions, or the pressure in it of some improper and disturbing matter; and the originating cause may be a filthy, ill-ventilated stable, the use of musty hay or grain, the continued use of catch-penny nostrums, the heating of the body with too much clothing, the presence of intestinal worms, or any one or more of a hundred other unhealthy influences. The cure, like that of dyspepsia in the human subject, is determined by the nature of the cause, and must be such as to bring the digestive system under a totally different set of in-

fineness from those which have accompanied the disease. If worms be present, anthelmintics must be given; if the organic powers of the stomach be diminished, tonics must be given; if good air, proper exercise, and sufficient grooming have been wanting, these requisites of health must be supplied; and, in any event good, restorative food of a different kind from what this animal has been recently accustomed to, must be supplied.

### Feeding Colts.

Early maturity for swine and cattle has been advised as to the best farm practice for the largest return in pork and beef. But there is a difference, as the *Home Farm* reminds us, between the objects in view in raising pigs and horses. In the one case weight alone is wanted, and fat-forming foods (the chief of which is corn) are used. In the other it is muscles that is wanted, and about the poorest food that can be given a young colt is corn. Of course you can, with corn, shove it forward and make astonishing weights and possibly sell at a big price; but let this practice become universal, as it threatens to be, and the people who use horses will soon refuse your stock at any price. Cattle and hogs are bought for fat, horses for muscles. This difference is as wide as it can possibly be.

There must be different feed and different treatment. What the colt wants is plenty of exercise, a clean place to sleep, shelter from the bitter storms, plenty of good grass of different varieties, good, clean hay without dust, and good, sound oats. Colts raised in this way will not look so well nor win as many premiums, nor sell to fools for as much money, but they will be sound limbed and eyes, great endurance and weight, speed enough for their various purposes, and they will last.

A Missouri correspondent of the *Mark Lane, London, Express*, writing on the subject of draft horses for America, says: Let all work horses be tested for work, at work, as shrewdly and diligently as fast horses are tested for speed, at speed, and the desired results would at once be produced. No man thinks of bringing a fat, green, pampered horse upon the race course; and no man would bring a racehorse into a draft-horse contest equally severe. For centuries, prizes have been offered and rigid tests applied, to show the speed of horses, and the results are manifest. Now, let equally severe and trying tests, backed by ample purses, be applied to the strength of horses, and the results will be invaluable. In selecting horses to travel for district premiums, if those otherwise eligible were tested as to what they could do, they would be shown with solid flesh and developed muscles, and in firm health. Horses fit only for soap grease would be kept away; horses of bone and muscle, pluck and prowess, would be brought to the front, made known and patronized, greatly to the benefit of all who raise or use these noble animals.

A correspondent of the *New York Tribune* is the author of the following sensible paragraph: Farmers go into the stable in the morning and the pungent odor makes them sneeze, but they never think of preventing it. Some horses are so saturated with this smell from urine dried in their skin as to be smelled from quite a distance on the road. Men carefully protect their carriages from this odor lest the varnish should be spoiled, but never think how much more sensitive are the nostrils, eyes and lungs of the horses. And when these animals have the "pink-eye," a disease of all these organs, and often caused by this overpowering, filthy and pungent atmosphere, they think they are badly used by fate. It would be all stopped if the stable floor were drenched with a few pails of water and brushed with a street-sweeper's broom, and now and then thickly dusted with plaster. Moreover, the legs and bellies of the horses would be much the better for a washing at least every other day.

While the whip seems indispensable in the handling and working of some horses, there is no question in regard to its misuse in many cases, and the greatest trouble about having one of these instruments of torture too convenient is that it is generally used when the use of it is least needed. Unfortunately the handling of horses is done often by a class of men who have less sense and judgment and sense of propriety than the horses themselves. Such men, on the least provocation, are ready at once to take out their spite and revenge on whatever comes handiest, which is generally the poor horses in their charge. Were whips always in proper hands the charges of cruelty laid upon this seemingly necessary implement would not be so great nor so grievous.

A correspondent of an exchange thus relates his experience with heaves: My brother-in-law had a horse that had the heaves so bad that he thought it could not live. A friend said to him, take a quart of new milk, stir into it a teaspoonful of aqua fortis; this will thicken the milk; stir this into the oats. Give it each noon for three days, then stop three days, then repeat. This will effectually cure the heaves. He tried it, kept his horse at work what it could during the time he gave it. Soon no trace of the heaves could be detected.

The man who goes to Sheephead Bay with a return ticket paid for, a silver dollar in his pocket to settle for a modest dinner at the beach, and a five-dollar bill to invest on the race, sees great possibilities rise before him. He came home dead broke on Saturday, and to drive off a fit of the blues sat down and figured it thus after he had pondered over the winners marked on his score card: Miss Woodford \$5, wins \$3. Invest \$3 on Eachus at 4 to 1, \$32, or with investment back, \$40, which on All-Hands-Round, at 10 to 1, yields \$440, including investment. Put this on Drake Carter at 3 to 1 and win, with investment back, \$1,760. Enloy 8 to 1 swells the capital to \$15,840. And now we begin to paralyze the bookmakers. Riek the whole sum on Jack of Hearts at 6 to 1, and we cash tickets to the tune of \$110,520. Invest this on Charlemagne at 4 to 1 and we rake down, including the investment, \$554,400. This is better than being cashier of a bank. If nothing goes wrong, if no miscalculation is made, we can enjoy the little fortune without securing lodgings in Canada. Great indeed are the possible winnings in a day's racing at Sheephead Bay, but for some reason the bookmakers continue to flourish while the fellows who scrape five or ten dollars together in the morning are kept on the anxious seat.—*Turf, Field and Farm.*

M. T. Grattan's stallion Herod last week trotted the Rochester, Minn., track in 2:24, beating Von Arnim's time of last year, the fastest ever made on the track, by a quarter of a second. Herod is 18 years old.

### OUR NEW YORK LETTER.

#### Champion Three-Year-Olds of the Year—Great Racing at Sheephead Bay—The Twin City Handicap—General Gossip—News, Etc.

This conviction grows afresh that the three-year-olds of 1884, especially the stake winners, are an ordinary lot, lacking in class, and possessing none of the distinguishing characteristics of Harry Bassett, Tom Bowling, Springhook, Spendthrift, Falsetto, Luks Blackburn, Hindoo, and other famous colts of the last decade. Take the case of Palimurus, for instance. This three-year-old wins the Foxhall Stakes at Saratoga and runs a creditable second in the Keener to Powhatan, but fails to beat a lot of second class horses at Brighton. The son of Glsnelg and Crownist may, however, have redeemed himself somewhat in the September Stakes, ran to-day (Thursday) at Sheephead Bay. Trus, the Mini colt and Rataplan have each performed well at times, but neither comes up to a first-class standard as yet. Panique has degenerated sadly; Knight of Ellerslie's ailments have again placed him on the shelf; St. Saviour will not be seen on the turf again in 1884; Rencocas does not possess a good one in its lot; Isip ditto among its colts, though Lonisette is fast lifting herself to the top of the filly class; Himalaya, the Preakness champion, still struggles against his unlucky destiny; Fallen Leaf, the Western wonder, will not stand training again, and General Harding, thought to be the best of the Great Toms, is at home apparently over short courses only. Powhatan bid fair to take up the battle where his stable-companion Loftin left off, but he is not likely to run East this Fall, unless at Baltimore, where he is engaged in the Dixie and Breckenridge.

And so the list might be prolonged indefinitely, winding up with the same unsatisfactory conclusions noted above. As the matter now stands, the best of the colts are the Mini colt, Rataplan, and Powhatan, with Duchess, Louise, and Modesty the foremost of the opposites.

That Sheephead Bay will contribute its part toward setting the status of several of these would-be champions is certain, and at present the most highly esteemed three-year-olds outside of the stake contestants are Swiney, by Ten Broeck, and Tom Martin, by Longfellow. The ease with which these two colts won their respective handicaps on Tuesday, even at the light imposts carried by each, stamp them as worthy antagonists for even some of their more pretentious opponents of a similar age.

Swiney won his race so easily, and with so much evident reserve power, that he is evidently one of the best Ten Broecks of his age, not excepting even Bob Cook or Woodward. True, old Monitor is in the sers and yellow leaf, and Kosciusko, he of the unpronounceable (to many) name, was giving Swiney 11 pounds, but he beat Kosciusko more than that difference, cleverly.

As regards the Twin City victor, he is a phenomenon, for when size and general appearance is considered, no one would at first glance take him for a racehorse. At two years old he was so small that he never faced the starter, a fortunate contingency, probably, in view of his recently-developed merit. Tom Martin, if he had been hammered away at in his younger days, might never have credited his owner with any special honors, let alone so valuable and important a contest as the Twin City Handicap. He is now, to all outward appearances, sound in wind and limb, and though perhaps not of size and class enough to show to advantage over longer courses and with heavier weights, is bound to be a useful bread winner to Mr. P. C. Fox.

Viewed now, calmly and dispassionately after the turmoil and excitement of the race is over, the late struggle for the Twin City prize presented many incidents of interest to racegoers. Leaving out what Aranza might have done had she got off with the others, there is little doubt that the best animal, at the weight, was the victor, Tom Martin. And yet had Jack of Hearts and several others that we can mention, experienced the same good luck as did Martin and Ferg Kyles, of being always well in front from start to finish, the victor would have had to run faster to beat them. Jack of Hearts' trainer did not quite like his charge's condition prior to the race—so much so that he left it optional with Hayward as to whether Mr. Appleby should hack Kinglike or Jack of Hearts, but finally supported the latter. Beginning the last half-mile, Jack of Hearts made his run for the front, only to be closed in upon by Checkmate and Miss Brewster, who were in front of him. The time lost here by the interference did not help him any, and was fatal to his chances, which were good, as shown by his bold bid at the finish. Plunger was knocked to his knees on the backstretch when in the front rank, and cut, though not very badly. Gen. Monroe went off very slowly in the rear division, and his forward position at the end shows what he might have done had he got away well and under full headway. Bleylock rode him very carefully and judiciously to get him where he was at the finish, for had he hustled or hurried him in the first furlong he would have been beaten much worse than he was. Ferg Kyle was kicked so hard by Jack of Hearts at the post, that the blow was plainly audible in the inner field. Jack of Hearts' faculty for disabing, if possible, his chief antagonists seems to be uppermost with him, for he tried to make a meal of War Eagle last Spring, in the Suburban start. As War Eagle only beat him a head on that occasion, and Ferg Kye two heads on this one, Jack of Hearts is a better judge of his most-to-be-feared antagonists than many men are. Ferg Kyle, Kinglike, and Gleaner appeared light and too finely drawn, as far as looks go. The last-named, who has earned the sobriquet of "Chang," looked "ragged" to an extreme, but for a mile he ran well. Ferg Kyle's reported trials, his prolonged preliminary, more so than any of the other contestants, and his hard knocks at the hoofs of little Jack, may have militated against him, as certain it is his party were very confident of his ability to win, and he is likely to very nearly capture the renewal at Brighton on Monday next. Checkmate ran much better than he has done this year. At the beginning of the last quarter he was right in the front rank.

Therefore, the renewal of the Twin City at Brighton Beach on Monday is likely to be a great contest. The twenty entries, handicapped in the same weights as they were allotted in the Sheephead Bay race, are reduced to nineteen by the disqualification of the winner, Tom Martin, according to the conditions of the stake. Ferg Kyle will also have 5 lbs. more, making his weight 108 lbs., also one of the conditions. With the light of recent events before us, we think the horses liable to be met dangerous on Monday next are Ferg Kyle, 108; Fond du Lac, 106; Gleaner, 108; Monroe, 107; Checkmate, 112; and Farewell, 90. Miss Woodford may or may not start, but Monroe is very likely to, and to take a deal of beating, in spite of his weight. If, however, Ferg Kyle retains his present form, he is certain to beat more than will beat him. Our Suburban dreamer was again in the visions of futurity

this night before the Twin City. He saw (in his mind) the race run from an elevation, at a distance which was against his making out the colors plainly. All he could distinguish was that a dark jockey won. As the Withers, Baldwin, Appleby, and Fox colors all answer to this description, the solution of the probable winner was as much "in the dark" after his dream as before, and none to whom he related his vision backed the winner, most of them to a man being on Kinglike. Yours, PACIFIC.

New York, Sept. 2, 1884.

### Queer Names for Trotters.

The subject of turf nomenclature is one that has attracted the attention of literary people who "go racing" ever since the sport was first introduced, and in England and some other European countries a successful effort has been made to compel at least some little attempt at fitness among those who have the naming of animals that are to take part in public contests, one result of this being that a few years ago when an otherwise estimable gentleman entered a horse under the name of Tommy-Up-a-Fear-Tres he was attacked so savagely in the public prints as to be only too willing to make a change which common sense imperatively demanded, and thereafter the colt was known by some more euphonious if less striking title. But in America not even an attempt at reform in this direction has been made, and as a natural consequence the trotting turf is overrun with animals whose names are in the most execrably bad taste. A glance at the *Trotting Register* will soon convince any doubter of the truth of this assertion. Among those that come under the first letter of the alphabet are Adam's Boy, Any Other Kate, All Spots, Archer's Orphan and Ace of Diamonds—Another Boy being probably so called because of a recent addition to the family of his owner, although why a man of ordinary sense should desire to celebrate a domestic event of so interesting a character by bestowing a curious name upon a trotter is not clear. Baby Jumper was perhaps so called for a similar reason, but the cause of Bloody Nathan's appellation will probably forever remain in doubt. Bluffer was no doubt owned by an unsuccessful poker player, and Bock Beer by a Teutonic gentleman who desired to immortalize his favorite beverage. Bony Ford may have been so designated because of the emaciated appearance of his owner, but Brigitty Dick is past even a guess. Calamity is appropriate enough for a trotter, as many an owner has discovered to his cost, and I Can't Tell is not so far out of the way, especially if he had a near cross of thoroughblood, or was obliged to wear six-ounce toe-weights. Calico Jane never got a fast record, and Castles in the Air had not at latest accounts materialized sufficiently to get a record of 2:40. Choptank Chief must have been prettier than his name, but Carboic was never known to bite or perform any other action making him worthy of the title bestowed. Centennial Tom will not, it is safe to say, be remembered at the next centennial, because his best efforts thus far have only resulted in his getting a record of 3:01. Columbus Navigator seems to tell the story fully, although a comma between the words would not have been inappropriate, and Coroner K., despite his gloomy name, went a pretty merry clip, as his record, 2:30, attests. Cranky Jake and Creeping Kitty should be hitched together, and if Cream Pitcher were put in the wagon behind them there would likely be some spilled milk. Dad comes ahead of Daniel the Prophet in the Register, and Don't Kuow very naturally follow them. Fenian Sister was doubtless the property of a Land Leagner, and the man who named his mare Folly knew what he was about. Forbidden Frait doesn't seem to have been touched, her record thus far being 2:38, and Fourth of July is still in the 2:40 class. Whether the owner of Fun realized his expectations is not known, but the man whose money was invested in Gay Deceiver had only himself to blame if he backed her when she lost. Good Beer, Go Softly and Grab-all are not bad names in their way, but Get There Eli savors strongly of the wild west. Hard Work, Heavy Boy and Homely Jim come just ahead of Honest Lawyer, the chances being that the last-named animal was so-called in a spirit of delicate but none the less cutting satire. Humpty probably humped herself to get there first at the finish of a close heat, and if she could have only been put in a race with Hunky Dear, Hundred Dollar Note and Hydrophosphites, a large crowd would no doubt have been present. Ice Cream was mayhap the property of some young man whose beet girl always had her appetite for the delicate mixture with her; and right behind her in the list come In and Out, India Rubber Ben and Irishman's Daughter. Johnny Come Up is the only animal in the "J's" with a noticeable name; Little Editor, Lovely B., Lucky Look and Lunky being prominent in the next letter of the alphabet. Then we have Monument Girl, Mile End Boy, Mother Ann Lee and Mr. E., the last-named being just ahead of One-Eyed Riley, that historic character being immediately in advance of Peanuts and Rate. Royal Mike and Scientific Maid are next noticed, Slouch Slow Come and Stubtoe being right on their wheel, with Sunday Sam, Ten-Pin Johnny and Ugly Dutchman bringing up the rear.—*Breeders' Gazette.*

### The Cesarewitch and Cambridgehire.

The *Racing Calendar* of the 28th ult. contains the weights for the Cesarewitch and Cambridgehire handicaps. Corrie Roy is, as expected, the top weight in the former at 129 pounds, with Mr. Hammond's Florence second at 128 pounds, both of which will probably accept so as to prevent the weight having to be raised on the others, for Mr. Hammond's St. Gation, one of the "dead heats" for the Derby, is third in the list at 122 pounds, which is two pounds below the limit. Thus if St. Simon is ten pounds better than St. Gation, what the Messrs. Weatherly would have put on him had he been entered for the Cesarewitch is a question that will cause considerable discussion in the English sporting press. The next of the three-year-olds is Archduke at 117 pounds, and the next are Scott-Free, the favorite for the St. Leger, and Harvester, the other dead-beater for the Derby, each at 114 pounds. The American-breds in the Cesarewitch are Mr. Stanford's Blue Grass at 113 pounds and Mr. Abington's Schem at 98 pounds. For the Cambridgehire, Mr. Gerard's Sweetbread, Lord Arlington's Geheimnis and Lord Zeland's Prism are the top weights, each at 133 pounds, with Mr. Manton's Tobias and Clairvaux the next at 132 and 129 pounds, after which are Flourace and St. Gation at 127 pounds and 125 pounds, with the Duke of Westminster's Duke of Richmond held to be equal to St. Gation at 125 pounds, while Tonans, the second for the Cambridgehire last year, is the next at 124 pounds. Lower down the list is Archduke at 121 pounds, with Harvester at 120 pounds, Scott-Free at 119 and The Lambkin at 116 pounds. Blue Grass is in at 115 pounds, with Bendigo, last year's winner, at 113 pounds, an increase of 19 pounds: Late advices show that much dissatisfaction existed about the Cesarewitch, while in the betting Scott-Free and Quickline were equal favorites at 100 to 6 against with 20 to 1 offered each against The Lambkin and St. Gation.

**ATHLETICS.**

Amateur Athletic Association.

A meeting of amateur athletes was held on Thursday evening of last week, at the rooms of the Olympic Club. It was the unanimous opinion of the meeting that the time had arrived when a Pacific Coast association of amateur athletes would be of incalculable benefit to the advancement of amateur athletic sports. All athletic clubs on the Coast are invited to send two delegates to a meeting which is to be held in this city on the 10th of next month, when a permanent organization will be effected. Considering that this paper was the first to advocate the formation of an association, it is rather inexplicable why a notice that a meeting was to be held was not sent to this office. An explanation would not be out of place.

In conversation with a friend who has been abroad, says the writer of Brieflets in the *Amateur Athlete*, we learned a few facts about Hntchens, the great English professional sprinter. In starting he stands almost straight on his mark, and never moves a muscle till the report. Then he travels, no one knows how. He simply gets off and dusts in such a manner that it is almost an impossibility to explain how he does it. He actually gets down on his hands and knees on the mark, and J. M. Cowie, the amateur champion, stands erect, ready for the start. At the signal Cowie runs as fast as he can; Hntchens jumps up, runs after him, and catches him in 100 yards. It is said he does the same with Meyers. The latter runs 122½ yards in 11½ which is about 12½ for 131½ yards. Hntchens knocks half a second off of that. His 300 yards in 30 seconds is something phenomenal. It is said he can run a quarter in 47, but that is making a desperate attempt to get into the responsibility without doing it. If correct, the greatest piece of sprint running ever accomplished in the world was done in England, by W. Johnson, the professional 20 years ago, when he ran 130 yards in 12½ seconds.

A few hints to young athletes: Do not drink any more liquid than you can help; do not eat too much meat; beans, potatoes, hominy and oatmeal are excellent, except on the day of race, the two former must be avoided as they generate gas in the stomach; do not weaken yourself by too hard work this hot weather; walkers should wear a blinder for the eyes if the sun is glaring, also distance runners; cold tea is an excellent article for quenching the thirst; if taken without milk it is better so; the more you drink the more you will sweat; but do not go to extremes and train too fine; study yourself carefully and discover what is right and wrong for yourself.

The one-mile professional swimming championship of England was decided on Saturday, August 23d, at the Lambeth Baths. The contest was between J. Finney and J. J. Collier, and after a well-contested match, victory rested with Collier. The quarter was made in 6m 32e, the half in 13m 49½, the three-quarters in 21m 5½, and the mile in 28m 19½, which is the best time on record for still water. It will be remembered that Finney beat Collier last year in 29m 27½e. John James Collier was born in 1860, stands 5 feet 6 inches high and weighs 144 pounds. James Finney was born in 1862, stands 5 feet 6 inches high, and weighs 130 pounds.

The temperature at the Merion Games at Stockton was about 110 degrees in the sun. Many of the contestants ran and walked with no covering on the head. This is dangerous; all contestants in the sun should be walked or run with a handkerchief, or what is better, a cap with a rim on the head to shield the eyes.—*Amateur Athlete.*

Fred Cook has once again asserted his superiority over all Coast swimmers, and his victory last Saturday entitles him to the handsome medal, which is emblematic of the one-half mile Amateur Coast championship. The time for the half-mile was 17 m. 30e.

The steamer Oregon has just made the journey from New York to Queenstown in 6 d. 11 h. and 9 min. This is the greatest Eastern passage on record.

Mr. L. E. Myere has, since his return, severed his connection with the *New York Sportsman*.

The gross receipts of the Petaluma fair amounted to \$10,850, \$1,889 in excess of last year, and the society is out of debt and has a cash surplus of \$5,000, in the treasury.

**The Washington Park Club,**  
CHICAGO, ILL.

Announce the following Stakes, to close Oct. 15th, 1884, and to be run at their second meeting, beginning the last week in June, and ending the second Saturday in July, 1885:—

**\$5,000. The American Derby. \$5,000.**  
A SWEEPSTAKES for three-year-olds (foals of 1882), at \$200 each, h. f.; or only \$20 if declared out on or before Feb. 1st, 1885; or \$30, April 1st, 1885; or \$40, if on May 15th, 1885. All declarations void unless accompanied with the money; with \$5,000 added, the second to receive \$750, and the third \$250, out of the stakes. Winner of any three-year-old stake race of the value of \$1,000 to carry 3 lbs., of three or more three-year-old stakes of any value, 7 lbs. extra. Maidens allowed 5 lbs. To be run on the first day of the meeting. One mile and a half.

**THE LAKE SIDE STAKE.**  
A Sweepstake for fillies two years old (foals of 1883); \$50 entrance, p. p.; or only \$10 if declared out on or before February 1st; or \$15 by April 1st; or \$20, if on or before May 15th, 1885. All declarations void unless accompanied with the money; with \$1,000 added, the second to receive \$200, and the third \$100 out of the stake. Winners of any stake race of the value of \$750 to carry 3 lbs.; of \$1,200, 5 lbs.; of three or more races of any value, 10 lbs. extra. Five furlongs.

**THE KENWOOD STAKE.**  
A Sweepstake for colts two years old (foals of 1883); \$50 entrance, p. p.; or only \$10 if declared out on or before February 1st; or \$15 by April 1st; or \$20 if on May 15th, 1885. All declarations void unless accompanied with the money; with \$1,000 added, the second to receive \$200, and the third, \$100 out of the stake. Winners of any stake race of the value of \$750 to carry 3 lbs.; of \$1,200, 5 lbs.; of three or more stakes of any value, 10 lbs. extra. Five furlongs.

**THE HYDE PARK STAKE.**  
A Sweepstake for two-year-olds (foals of 1883); \$50 entrance, p. p.; or only \$10 if declared out on or before February 1st, or \$15 by April 1st, or \$25 on May 15th, 1885. All declarations void unless accompanied with the money; with \$1,200 added, the second to receive \$300, and the third, \$100 out of the stake. Winners of any stake race of the value of \$1,000 to carry 6 lbs.; of \$1,500, 7 lbs.; of three or more stakes of any value, 10 lbs. extra. Three-quarters of a mile.

In addition to the above, other Stakes, including the Washington Park Cup, the Great Western and Oakwood Handicaps, will be advertised in due time, to close January 15th, 1885.

A Programme will be arranged for ten or more days' racing, and five or more races will be given each day. A Programme will also be arranged for a Fall Meeting to be held early in September, for which Stakes will be advertised, to close in March, 1885.

Please observe that in the above stakes, declarations are permitted for a small forfeit. Turfmen failing to receive entry blanks, can obtain them by applying to the Secretary.

Nominations and all communications to be addressed to the Secretary, Palmer House, Chicago, Ill.

**J. E. BREWSTER,** Secretary.  
**P. H. SHERIDAN,** Lieut.-Gen. U. S. A., President.

**FIFTH ANNUAL MEETING OF PLUMAS.**  
LASSEN, SIERRA and MODOC  
**AGRICULTURAL ASSOCIATION**  
District No. 11, at  
**GREENVILLE,**  
Plumas Co., Cal.,  
Commencing on MONDAY, Sept. 29th,  
1884, and Continuing Five Days.

**SPEED PROGRAMME.**  
**SPECIAL NOTICE.**  
THE FOLLOWING PURSES HAVING FAILED to fill have been reopened to close  
**TUESDAY, Sept. 23d, at 9 o'clock P. M.**  
**SECOND DAY.**  
Trotting—Class 240; mile heats, 3 in 5; purse \$200. 1st horse, \$120; 2d, \$60; 3d, \$20. Free for all.  
**THIRD DAY.**  
Trotting—Class 234; 3 in 5, mile heats; purse \$300. 1st horse, \$180; 2d, \$90; 3d, \$30. Free for all.  
**FOURTH DAY.**  
Trotting—Free for all; 3 in 5, mile heats; purse \$600. 1st horse, \$360; 2d, \$180; 3d, \$60.

**CONDITIONS.**  
Entries to all trotting and running races to close with the Secretary at 9 o'clock P. M., Monday, Sept. 1st, 1884.  
All entries to be made in writing, to give sex, color and marks of horse, Also name and residence of owner, and in running races colors to be worn by rider, and in any others particulars that will enable the audience to distinguish the horses in the race.  
Write "Entries to Races" on outside of envelope, seal and accompany by entrance fee.  
Entrance fee, ten per cent. of purse. No entries will be received unless accompanied by the fees.  
In all races three or more to enter and two or more to start.  
National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between the heats.  
Rules of the State Agricultural Society to govern running races, except where conditions named or otherwise.  
Any person not intending to start his horse must notify the Secretary in writing on or before 8 o'clock the evening previous to the day of the race.  
Horses entered in races can only be drawn by consent of the judges.  
For a walk over in any race a horse shall only be entitled to his own entrance fee and one-quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.  
The attention of all parties interested is particularly called to the rules of the National Trotting Association, under the provisions of which, except as otherwise specified, all matters appertaining to the trotting races will be conducted.  
Races to begin each day at one o'clock P. M., sharp.  
**JOHN HARDGRAVE, President.**  
**J. R. MURRAY, Secretary.**

**HARNES AND SADDLERY.**  
Linen Sheets and Hoods,

and Halter Bridle,  
AND CELEBRATED  
Stick Fast Toe Weights.  
**HORSE BOOTS AND TRACK WORK**  
A Specialty.  
232 Ellis St., opp. Fashion Stable, San Francisco.

**DIETZ'S PATENT**  
  
**CHECK HOOK.**  
Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check-Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook.  
Orders sent to  
**A. C. DIETZ,**  
No. 9 Front St., San Francisco, Cal.  
Will receive prompt attention.  
When ordering state whether gold or silver plate required.

**W. H. Woodruff,**  
  
**VETERINARY DENTIST.**

# JERSEYS, GUERNSEYS,

Registered in the A. J. C. C. and A. G. C. C., of New York, the only standard register.

Jersey Belle of Seituate that made 25 lbs 4 1-2 ozs. of butter in one week.

A grandson of above cow is now in use in the Yerba Buena. This herd won all the herd prizes for 1882. Since then have been added young animals from Mr. Pierce's valuable herds East. He now has Jersey Belle of Seituate, Comasie, Mary Ann of St. Lambert, Silver Cloud and Eurotas strains; also large selections from the Islands, without regard to cost.

He has interest in Eastern herds of 200, at the head of which stand only living son of Jersey Belle, Romeo de Bonair, (87 per cent. Mary Ann's blood), and Pierion, the best show bull in America. These bulls are valued at \$10,000 each.

HENRY PIERCE, San Francisco.

Horses to be owned in District June 1, 1884.

**REMARKS AND CONDITIONS.**  
All trotting races are best three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination.  
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternating if necessary, to finish any day's race, or to start special races between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear they may contest for the entrance money, to be divided as follows: 66% to first, 33% to second.  
In all races, entries not declared out by 6 p. m. of the day preceding the race shall be required to start.  
Where there is more than one entry by one person, or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walkover.  
Rules of the State Agricultural Society to govern running races, except where conditions named or otherwise.  
Non-starters in running races will be held for entrance under the same conditions.  
Racing colors to be named in their entries.  
In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.  
Entrance fee, ten per cent.  
Entries to all the above races to close with the Secretary on Friday, Aug. 1, 1884.  
Entries to "Entries to Races," on outside of the envelope.  
W. T. ADEL, President.  
J. HINMAN, Secretary.

# IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

The above cut represents the body-piece, the patent also covering the improvements in the hood. The following are the claims granted:

- 1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
- 2. The blanket or covering A, having the flap C, and the extensions B, to fit the fore and hind legs of the animal, front fastenings E, G, and the permanent straps or bands E, substantially as and for the purpose herein described.
- 3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings E, G, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.
- 4. The blanket A and hood J in combination with the elastic connecting-strip I, substantially as described and for the purpose set forth.
- 5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as herein described.
- 6. The improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands fixed to it to secure it around the body, where by the use of loose arcingles is avoided, substantially as herein described.

The right to make clothing in the United States will be sold on a royalty. Apply to the patentee,  
**JOS. CAIRN SIMPSON,**  
SAN FRANCISCO, CAL.

# VULCANIZED FIBRE AXLE WASHERS.

Far Superior to Leather. Warranted Not Affected by Oil or Grease

One Set Will Outwear Three or Four Sets of the Best Pressed Leather Washers. Ask Dealers for the "Vulcanized Fibre Washers."

HAVING CONDUCTED SOME OF THE MOST  
successful sales, notably those of Messrs. Whip-  
ple, Colgrove, Dietz, Counts, Dougherty, Newland &  
Hammond, Daniel Cook and others, we feel assured  
our ability to give satisfaction in all business in-  
terested to our care. Sales will be made in all cities  
and counties in the State. We have in contemplation  
a series of combination or "breakers" sales, similar to  
those so successfully held at the East. We will be  
pleased to enter into correspondence with parties de-  
siring to participate in such sales. Private purchases  
and sales of improved live stock of all descriptions  
will be made on commission and stock shipped with  
most care. Several fine ranches at private sale.  
Purchases and sales made of land of every descrip-  
tion.

KILLIP & CO., 116 Montgomery street.

## ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.

H. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR  
though training is done, it is only for the stock be-  
longing to the place, or those purchased from the  
proprietor. The proprietor of Ashland Park has no pet  
trotting family; his aim is to secure and have at all  
times for sale choice representatives of each of the  
leading families, these being the Hambletonians,  
Mambrino Chiefs, Clays, Pilots, Black Hawke, At  
Ashland Park may now be seen splendid specimens  
of the set of such stallions as George White, Almont,  
Mambrino Patchen, Clark Chief, Edwin Forrest,  
Blackwood, Sentinel, American Clay, Administrator,  
North Star Mambrino, Bonbrun Chief, Regular, Bal-  
sora, Howard's Mambrino and Homer. The stud  
aim is to possess nothing that does not trace through  
the best class of speed-producing trotting crosses,  
along all the blood lines, right to the thoroughbred.  
For catalogues or further particulars address

Suspensory Bandages. A perfect fit guaranteed. Support, Relief, Comfort. Automatically Adjustable. DISPLACEMENT IMPOSSIBLE.

IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.

Having thus described my invention, what I claim as new, and desire to secure by letters patent, is: 1. The part D, supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood.

For bridles of all descriptions apply to J. H. McKERRON, No. 230 and 232 Ellis St., San Francisco.

Table with columns: LEAVE (S.F.), DESTINATION, ARRIVE (S.F.). Lists routes to San Mateo, Redwood and Menlo Park; Santa Clara, San Jose and Principal Way Stations; Gilroy, Pajaro, Castroville, Salinas and Monterey; Hollister and Tres Pinos; Watsonville, Camp Goodall Aptos, New Brighton, Soquel (Camp Capitola) & Santa Cruz; Soledad and Way Stations; Monterey and Santa Cruz (Sunday Excursion).

\*Sundays excepted. †Sundays only. ‡Theatre train Saturdays only. STAGE CONNECTIONS are made with the 10:40 A. M. Train, except Pescadero Stages via San Mateo and Redwood, and Pacific Congress Springs Stage via Santa Clara, which connect with 8:30 A. M. Train.

SPECIAL ROUND-TRIP TICKETS, at reduced rates to Monterey, Gilroy, Soquel, Santa Cruz and Pescadero; also to Aptos, Paraiso and Paso Robles Springs.

Table with columns: Round Trip from San Francisco, Sun. Tkt., Sat. Tkt., Round Trip from San Francisco, Sun. Tkt., Sat. Tkt. Lists destinations like San Bruno, Millbrae, Oak Grove, San Mateo, Belmont, Redwood, Fair Oaks, Menlo Park, Mayfield.

TICKET OFFICES - Passenger Depot, Townsend street, Valencia-street station, and No. 613 Market street, Grand Hotel. H. R. JUDAH, Asst. Pass. & Tkt. Agt.

SPORTSMEN & PLEASURE-SEEKERS.

SOUTHERN PACIFIC R. R. CO. RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING STATE FOR SEA BATHING, SHOOTING AND FISHING.

MONTEREY, THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED, having a MAGNIFICENT BEACH of pure white sand for surf bathing. The BATH-HOUSE contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ IS VIA THE Southern Pacific Railroad, (Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREA are reached by this line. Stages connect with trains daily at San Mateo for those well-known Resorts, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE. Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES - Passenger Depot, Townsend street, Valencia Station, and No. 613 Market st., Grand Hotel. A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt. Agt.

LINES OF TRAVEL.

NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, SEPTEMBER 27, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

## THE KENNEL.

### Judge Leavesley's List.

The following is a list of the sporting dogs offered for sale by Judge Leavesley.

Dogs thoroughly broke: Jnno. Blue Belton, 2½ years, by Aldrich's McGregor ex Judge Gale's Lulu Laverack. McGregor by Burgess' Roy Roy ex-Queen Mah. \$100.

Cap. Lemon and white, bred by Horton of Gilroy, by Connt Warwick ex Fanny. Cap won in all age and puppy stakes, at Gilroy Field Trials, 1883. \$150.

Dan. Black and white ticked, 4 years, by Belton ex Belle. \$75.

Brant. Blue Belton, 16 mo., by Barlett's Roh ex Farmer's Queen—both first prize winners on the Bench. \$100.

Shot. Pointer. Fawn color, from Windtjin's kennel. \$50.

Sport. Blue Belton, 2½ years, by Knox's Belton ex Nellie. Ran in Gilroy Field Trials. \$100. Fine dnck dog.

Jim. 4 years, Gordon Setter by Newell's Roy ex ——. Ran in Gilroy Field Trials, 1881—Fine dnck dog. \$72.

Dogs 11 mos., partly or yard broke, (good retrievers and not gun shy). By Hedeman's Sport ex. Leavesley's Dora, Sport by Belton, and Nellie and Dora by Bennett's Regent ex. Leavesley's Jnno—a double prize winner at 15 mo.

Sbylock, black, white and tan; Tabal, black, white and tan; Gobho, black, white and tan; Portia, black, white and tan; Jessica, liver and white; Antonio, liver and white; \$50 each.

Two hitches 9 mos., by A. B. Forbes' Archie (pure Laverack), ex. Hilderbrand's Duck. Archie by Roderick Dne, ex. Dimity. Dnck by Miller's Drake, ex. Farmer's Queen.

Irish setter puppies, whelped Feb. 17th, Elcho—Rose stock, imported by R. W. Hill, Oregon, by Nemo, ex. Nida. Pat, Pete, Tim and Mike, \$40 each.

English setter puppies, whelped June 30, '84, by Connt Warwick, ex. Dora. Connt Warwick by Gauze's Warwick, one of the most noted field dogs in the East, and son of Leicester, winner of 1st prize in N. Y., 1881. Dora by Bennett's Regent, ex. Leavesley's Jnno. \$25 to \$35, according to marking.

### Teaching Dogs to Point.

In the London, Eng., *Shooting Times*, edited by Mr. Lewis Clement, (Wildfowler), we find the following reference to a controversy lately held through these columns regarding the pointing quality in dogs:

We observe in the San Francisco BREEDER AND SPORTSMAN, a letter from Mr. Leavesley, of Gilroy, in reply to a correspondent, "X," in which he says:

"X" mutilates a quotation from Hutchinson, "Pointing is only a natural pause," but he omits the context, "prolonged by art." In fact, so far from his distinguishing authority, Hutchinson, supporting his theory, all his "First Lessons in Autumn," contain directions for teaching a dog to point, and when to point, and how long to remain on point. Yet in spite of an authority like this, "X," with his limited experience of dogs, will again assert, "That you can no more teach a dog to point than you can teach a deaf man to hear." "X" also quotes Stonehenge in support of his theory, and then, with singular inconsistency, says that Stonehenge is no better authority than Sbow, Hutchinson, Clement, Rowe and Dorr. Shaw is merely a compiler of a handsome and well got-up book on dogs. Hutchinson, a writer on dog-breaking, Clement and Rowe, editors of sporting papers, and Dorr—well, I never heard of him as an authority upon anything, and question whether anybody else ever did, except, perhaps, his over credulous friend, "X."

Now, evidently, there is something wrong in the above as far as we are concerned, for we have distinctly stated many times that any dog can be taught to point, and in our little hook on dog-breaking, we explain how readily one can attain this result. So we hope our esteemed cotemporary will note this, and give it due publicity, as we do not wish to be accused of such rank heresy as to say, "that a dog cannot be taught to point."

The Common Council of Salinas City has offered a reward of \$25 for the conviction of any person or persons distributing poison within the corporate limits of Salinas City, for the purpose of poisoning dogs.

The attention of sportsmen is called to the advertisement of auction sale of Leavesley's dogs, at 25 Washington street, Monday, at 3 P. M.

The Gilroy Record says that Judge Leavesley has forty dogs in his canine college on the Uvas.

## TURF AND TRACK.

### Entries At Los Angeles.

Entries and nominations for the Los Angeles Fair Meeting which opens Oct. 13th, closed on the 6th inst., with the following list:

### Track Regulations.

The following extracts from the track rules of the Louisville Jockey Club are very suggestive of hnsiness and order:

First—All persons claiming to belong to a stable, and not registered as above, will be arrested as vagrants.

Second—No touts or hangers-on to stables allowed on these grounds.

Third—Grazing will only be allowed by permission of the superintendent.

Track rules and orders will be posted at the judge's stand.

Fourth—No women allowed to stay at or frequent the stables, kitchens or grounds.

Fifth—No gambling, craps, disturbance or unseemly noise or swearing allowed on grounds.

Sixth—Trainers will be held liable for the good conduct of their boys.

Seventh—During race meetings no exercising after 10 o'clock in the morning and previous to and after race meetings, after 12 o'clock.

Eighth—During races, at 10:30 o'clock, the roll-call at stables will be made, and all attendants must be at their respective stables and show their badges, which are not good for entrance at the gates, and must be worn conspicuously.

Ninth—Any trainer or stable boy transferring or loaning his badge will be ruled off. At the first ringing of the bell, or bangle call, trainers must have their riders weighed in and horses upon track. The second bell, or hagle call, is to saddle and go to starter, and any violation of these rules will be punished by fine in the first instance and suspension afterwards.

Mr. J. G. Morgan, who came to California from the East this season with high credentials as a trainer and handler of young stock, has taken charge of Mr. Alvinza Hayward's stock at San Mateo. Mr. Hayward has paid but little attention to horses since the days of Lady Blanchard, but Mr. Morgan says there are some good young ones on the farm which he will endeavor to do full justice to.

Krik's Guide to the Turf issued semi-monthly by H. G. Crickmore, "The World," New York, contains record of all the running races of the United States from Jan. 1st up to the date of publication. The September edition is 514 pages of closely printed matter. We hardly see how horsemen can do without it.

As may be supposed Pat. Farrol shipped from Sacramento in a very happy frame of mind. It is not unheard of to distance the field in slow classes of green horses, but we think Pat is the only driver that ever accomplished it in a free-for-all.

One of the particular things that is said of the late Stato fair races is that the fastest beat trotted was 2:21, and four horses reached that precise figure during the meeting, Adair, Sister, Vanderlyn and James H.

Mr. J. T. Dale, owner of Hubbard, has changed his residence from Mountain View to Visalia, and the brother to Katio Pease will be located in Tulare county hereafter.

Two attempts were made to burn the stables at the Stockton track last Saturday night but were frustrated by the watchman on duty.

Robert Allen, lessee of Agricultural Park, Sacramento, proposes to have a race meeting at the Park some time in November.

The State Fair—Closing Races—Live Stock Premiums Awarded.

Never before since its erection was the grand stand so packed as it was Friday when the hour came for the ladies' tournament. In places the crowd was so dense that there was no room for another person to stand, and as a large majority were ladies, the gay colors in the dresses, bonnets, hats and parasols brightened the effect. There is a decided charm to visitors from the hay in the light Summer habiliments which are worn here, and the evident appropriateness for the climate adds to the attraction. The field contained a great number of carriages, while the inner track was crowded with spectators. Seven equestriennes competed, among them being some very good riders. They were designated by numbers, the names being unknown to the judges. The awards were as follows: First premium, Miss Mary McFadyn, Dixon; second, Mrs. E. G. Missner; third, Mrs. F. S. George; fourth, Miss Mamie Best; fifth, Miss Nellie Ryan; sixth, Miss Minnie Elliot; and seventh, Mrs. Jackson, all of Sacramento.

The first race was the Sunny Slope Stake, for two-year-olds, one mile, with a five-pound penalty on the winner of the Introduction Stake. The starters were Alta, Arthur H. and Estill. After the riders were mounted, the judges ordered the marshal to take Alta in charge and in place of the jockey put up by his trainer George Howson was substituted. At the first of the pool selling Estill was the favorite at \$100 on Alta, and \$12 on Arthur H. A good deal of time was occupied in transferring the charge of Alta, and as evidence that there was some ground for the charge, Alta advanced in the pools, at one time selling for as much as Estill. The race was an exceptionally good one. The colts were given a splendid start, not a week difference when the flag fell. Duffy on Estill made the running from his outside position, though Howson kept Alta moving, and the favorite could not take the track. At the quarter, in 25 1/2 seconds, they were even and on the backstretch the pace was very fast. Alta had a neck the advantage when passing the half-mile post, in 50 seconds, and from thence home he had a comparatively easy task. Duffy was driving Estill as he could at the seven furlong, Howson sitting quietly, though still opening the gap. Alta reached the score first by two lengths, in the very fast time of 1:42; Arthur H., a fair third.

September 19th—The Sunny Slope Stake; for two-year-olds; \$50 entrance; \$10 forfeit; \$200 added. \$75 to second; third to save stake. Winner of introduction Stake penalized 5 lbs. Winner of Cal. Annual Stake penalized 5 lbs. Winner of both penalized 10 lbs. One mile. Four nominations. Value to winner \$235. Todbunter and Allen's b c Alta, by Norfolk, dam Ballinette, 110 lbs. 1 Wm. Murray's b c Estill, by Norfolk, dam Lady Jane, 115 lbs. 2 Hill & Gries' b c Arthur H., by Hockbocking, dam Maid of the Mist, 110 lbs. 3 Time, 1:42.

The second race was the Shenandoah Stake for 3-year-olds, one and a quarter miles. The starters were Bachelor, Jon Jon and Beaconsfield. They had positions in the above order. The pools sold \$200 on Jon Jon, \$140 on Beaconsfield and \$37.50 on Bachelor. Again the start was first-rate and without any delay. As they swept past the stand Bachelor and Beaconsfield were even, Jon Jon a length behind, Bachelor had the lead at the quarter-pole in 53 seconds, but going down the backstretch Beaconsfield closed on him and was first at the end of the three-quarters in 1:19. Jon Jon was trailing about three lengths behind, but closed the interval on the turn, and he and Beaconsfield were parallel at the seven-furlong at which point Jon Jon gained the advantage, winning a very good race by two lengths from Beaconsfield, Bachelor third. Time, 2:09.

The Shenandoah Stake.—For three-year-olds; \$50 entrance; \$15 forfeit; \$230 added; \$75 to second; third to save stake. Winner of Derby Stake penalized 5 lbs.; winner of Breeders' Stake penalized 5 lbs.; winner of both penalized 10 lbs.; one mile and a quarter; six nominations. Value to winner, \$320. W. Kelly's b g Jon Jon, by Monday, dam Plaything, 115 lbs. 1 E. J. Baldwin's b c Beaconsfield, by Hockbocking, dam Aileen Alannah, 118 lbs. 2 Hill & Gries' b c Bachelor, by Hockbocking, dam Maid of the Mist, 118 lbs. 3 Time, 2:09.

The third race was the Nighthawk Stake, one mile. There were eleven nominations, three of which weighed in, Aunt Betsy, Patsy Duffy, and Forest King, with positions at starting as above. The pools were \$100 on Duffy, \$85 on Forest King and \$10 on Aunt Betsy. The start was very good. Away went Forest King and Duffy on his shoulder, the rider of Aunt Betsy pulling her back. There was little difference at the quarter-pole in 27 seconds between Duffy and Forest King, Duffy was in front at the one-eighth of a mile in 52 1/2 seconds. Betsy was three lengths behind Forest King, but moved up at the three-quarter pole, and for a time there was a very fine tussle between the two, Forest King getting the best of his competitor, and galloping in an easy manner, by three lengths. The race for second place was sharp, Aunt Betsy coming up on the inside, beating the favorite half a length. Time, 1:43.

The Nighthawk Stake; for all ages; \$50 entrance; \$15 forfeit; \$200 added. Second, \$75; third, \$50; two hundred dollars additional, if the best time, (1:43), in the State is beaten. Stake to be named after winner, if Nighthawk's time, (1:42), is beaten; one mile; eleven nominations; value to winner, \$345. S. J. Jones' b b Forest King, by Monday, dam Abbie W., 118 lbs. 1 James Adams' b m Aunt Betsy, by Hardwood, dam Peggy Ringold, 115 lbs. 2 M. M. Allen's b b Patsy Duffy, by Leinster, dam Addie A., 118 lbs. 3 Time, 1:43.

The fourth race was a special purse of \$200, dash of a mile. The starters were Bessie, Quebec, Belshaw and Rondo. In the pools Belshaw brought \$150, Bessie and Rondo \$120, Quebec \$27.50. When the flag fell to a good start, all made the running, and were abreast one hundred yards away. Rondo led at the quarter-pole in 26 1/2 seconds, at the half in 51 1/2 seconds, and came home five lengths in the lead of Quebec, who was as much in front of Bessie; Belshaw last.

Same Day.—Purse, \$200, for named horses; one mile. Geo. Howson's c h g Rondo, by Norfolk, dam by Belmont, aged, 115 lbs. 1 G. L. Richardson's c h g Quebec, by Norfolk, dam by Rifleman, aged, 115 lbs. 2 Wm. Booth's b m Bessie, by Hercules, dam unknown, 4 years, 115 lbs. 3 E. B. Johnston's b g Belshaw, by Wildfire, dam Sissie W., aged, 115 lbs. 4 Time, 1:45.

The special trot that was left unfinished on Thursday evening was then called up. It was for a purse of \$360, with Ed, Fred B, Twinkle, Nellie Burns, and Ned engaged. Three heats were disposed of before the postponement.

First heat—The start was given on the third score, Nellie Burns and Ed evidently having the foot of the party. Nellie broke on the backstretch, when Ed passed her and she could not recover the lost ground or get a better place than second. Fred B. was third, Ned fourth and Twinkle last. Time, 2:32. Before the start Twinkle was the favorite at odds of \$50 to

\$25 on Nellie Burns and \$27 on the field. After the heat the field sold for \$50, Nellie Burns \$50, and Twinkle \$22. Second heat.—There was a long delay to repair the harness of Twinkle, and when the word was given Nellie Burns took the lead, retaining it until half way of the homestretch, when she broke and Ed passed her. He came to the score first, Twinkle second, Nellie Burns third, Ned fourth, Fred B. last. Time, 2:32. After this heat the pools sold, field \$50, Twinkle \$16, Nellie Burns \$13. Third heat.—Nellie Burns took the lead, but broke on the backstretch, when Twinkle went past her. On the further turn Burns came up, but could not reach Twinkle, who won the heat, with Nellie Burns second, Ed third, Ned fourth, Fred B. last. Time, 2:30.

Fourth heat—When the field was called out on Friday the pools sold: The field, E1, Ned and Fred B., \$500, Twinkle, \$50, Nellie Burns, \$27.50. Twinkle took the lead, Burns breaking when a hundred yards, but Twinkle opened a gap, leading at the quarter and half, with Nellie second. The latter broke on the upper turn, and the heat seemed safe for Twinkle, but Ned came fast down the homestretch, overtook Twinkle, carried her to a break opposite the distance post, but then broke himself, and the mare catching quickly won the heat in 2:31, Ned second, Ed, third, Fred B. fourth, and Nellie Burns last.

Fifth heat—In the betting Twinkle brought \$200, the field, \$55, Nellie Burns, \$20. The heat showed a change, Twinkle led past the quarter, when she broke and Ned went by her. He trotted very steady, making the half mile in 1:15, and from the turn he had it all to himself, winning in 2:31; Ed, second; Twinkle, third; Fred B., fourth, Nellie Burns, distanced. Under the rules only winners of heats could start in the sixth heat, which put Nellie Burns and Fred B. out of the race. In the pools Twinkle brought \$200, the field, \$205, with an anxious crowd around the poolstand eager to invest.

The sixth heat was a very close thing between Ned and Twinkle until a short distance beyond the quarter pole. The mare broke and lost a deal of ground, Ned winning by a long way, with Ed, second, Twinkle, third. Time, 2:29.

Seventh heat—The field uow brought \$240, Twinkle, \$95. Twinkle was tired and Ned appeared to be getting better as the race progressed. Ned made a bad break on the turn, and Twinkle took the lead going down the back stretch, there being a long gap at the half mile and three-quarters, and came home for in the lead, in 2:35; Ed, second, Ned, third.

Sept. 18 and 19—Special purse, \$360; for named horses. Twinkle, b m, by Echo—J. H. Tennent..... 5 2 1 1 3 3 3 Ed, br g—A. T. Jackson..... 1 1 3 3 2 1 1 Ned, b g, by Overland—Joe Edge..... 4 4 5 1 2 2 Fred B., b b—W. B. Todbunter..... 3 5 4 4 4 4 4 Nellie Burns, b m, by Millman's Belfounder—R. E. Burns..... 2 3 2 5 do Time, 2:32, 2:32, 2:30, 2:31, 2:31, 2:29, 2:35.

The closing day brought a continuation of the remarkably fine weather that had prevailed from the commencement. The attendance was fair, though smaller than the preceding days, many visitors having left on the Saturday train. In the morning occurred the stock parade, in which were displayed the premium ribbons. In the afternoon the first on the programme was a yearling trot, in which started Transit, Trovato, Senator and Rajah. The positions were as above, and in the pool sales Transit brought \$80, Rajah \$40 and the field \$24. The start was even, the favorite taking the lead and retaining it until after passing the half mile in 1:27. Soon afterward he broke, when Senator passed him, and at the three quarters Rajah had the lead. From thence the strife was between Transit and Rajah, but Transit breaking at the distance, Rajah came away and won by three lengths; Transit second, Senator third, Trovato last. Time, 2:55, which is the fastest record ever made by a yearling in an actual race.

Sept. 20th—Purse \$200; yearling class; one mile. Rajah, b c, by Sultan, dam by Geo. Wilkes—L. J. Rose..... Mayburn 1 Transit, b c, by Prompter, dam by California Doss—M. Toomey 2 Senator, b c, by Echo, dam by Young Morrill—Rancho del Paso 3 Trovato, c b c, by Sterling, dam by Flaxtail—C. F. Taylor..... Smith 4 Time, 2:55.

The second race was for two-year-olds, heats of a mile. The only starters were Lohengrin and Kismet. Kismet was so greatly the choice as to bring \$200 to \$24 on Lohengrin. Kismet had a slight advantage when the bell sounded, while Lohengrin made up and took the lead on the turn, and notwithstanding a couple of breaks, he was two lengths in the lead at the quarter-pole, in 40 seconds, but making a bad break Kismet was at the half-mile first, in 1:17. From thence Kismet never lost the advantage, winning by three lengths, in 2:36. The second heat Kismet was driven to heat the two-year-old stallion record, 2:32, which stood to the credit of Stienway. This he succeeded in accomplishing very handsomely, going to the quarter in 39 seconds, to the half in 1:16, and the mile in 2:30.

Same Day.—Purse, \$1,000; two-year-old class; mile heats. Kismet, b c, by Sultan, dam Saucbox, by a son of Hambletonian—J. L. Rose..... Mayburn 1 Lohengrin, b c, by Echo, dam Vixen, by Geo. M. Patchen, Jr.—Rancho del Paso..... Dewan 2 Time, 2:36, 2:30.

One of the most attractive races in the meeting was the 2:30 class. There were fourteen entries, but owing to casualties a majority of them were unable to participate; and besides accidents and a lack of condition, there was a terror to owners in the form of Guy Wilkes, who had shown great speed, endurance and reliability in an eminent degree. This narrowed the field of starters to five, drawing the following positions: Olivette first, Guy Wilkes second, Adair third, Colonel Hawkins fourth, and Adrian on the outside. Owing to his conceded superiority Guy Wilkes was left out of the pools, the second or better place in the race governing the winner. The rates were Adair \$50, Olivette \$16, the field \$5.

First heat—It is seldom that a better heat is seen than the first heat proved. The horses were bunched as they got off, Olivette and Col. Hawkins leading, with Wilkes partly pocketed, and Adair a short distance in the rear. Passing the quarter, Olivette, Guy Wilkes and Adair were close together, and for part of the way down the backstretch it was as pretty a race between the trio as could be desired. Finally Olivette broke and Guy Wilkes and Adair went by the half-mile post head and head in 1:11. Rounding the turn Guy Wilkes drew away from Adair and came into the homestretch with a lead of two lengths. He seemed to have the heat safe at the seven-furlong pole, but Adair was coming fast, and one of the most exciting trotting finishes of the meeting was witnessed. Goldsmith found it necessary to use every art to increase his speed, and Smith, behind Adair, was not idle. Forty yards from the winning score Adair's head was on the hip of Guy Wilkes; at twenty yards his nose was at the girth of the leader, and under the wire a short neck was all that the stallion led him. Olivette was third, Col. Hawkins fourth, Adrian distanced. Time, 2:23.

Second heat—As no one anticipated that Guy Wilkes could be brought to a drive to win, the second heat was looked for with more anxiety and a few were sufficiently sanguine to predict that Adair would win one game in the long rubber, and

the result showed that these were not very far wide in their calculations. At the third score a very good send off was had, Adair slightly leading when the bell sounded. Guy Wilkes led him by a neck at the quarter-pole in 36 1/2 seconds and increased his lead at the half in 1:10 to a length. Going around the turn he gained still more, and at the head of the homestretch looked all over a winner, but again Adair came up. Wilkes made a slight hobble when half way home, and after that there was a repetition of the finish in the former heat, excepting that Adair got his nose in front as the goal was reached. Both broke when within a length of home, and Olivette came in a good third in the fast time of 2:21.

Third heat—Speculation was laggard after the first heat, and when a few pools were sold the only wagering was in the mutuel box. At the start in the third heat Guy Wilkes rushed off at a very rapid pace, taking the lead on the first turn and never losing it to the finish. Adair made a bad break after passing the half-mile post, destroying all his chances for the heat. Wilkes was at the quarter in 36 1/2, at the half in 1:10 1/2 and the mile in 2:24; Adair second, Olivette third and Colonel Hawkins last.

The fourth heat put an end to the controversy, as Wilkes again went to the front and kept it from start to finish, passing the quarter in 37 seconds, the half in 1:11, and the mile in 2:23, Adair second, Olivette third, and Colonel Hawkins fourth.

Same Day.—Purse, \$1,200; 2:30 class. Guy Wilkes, b h, by Geo. Wilkes, dam Lady Bunker—Wm. Corbett..... Goldsmith 1 2 1 1 Adair, b g, by Electioneer, dam Addie Lee—E. H. Miller, Jr. .... Smith 2 1 2 2 Olivette, b m, by Whipple's Hambletonian, dam Bell—A. C. Dietz..... Johnson 3 3 3 3 Col. Hawkins, br g, by Echo, dam unknown—J. D. Young ..... P. Williams 4 4 4 4 Adrian, b s, by Reliance, dam Adrianna—J. M. Learned ..... Learned dis. Time, 2:23, 2:21, 2:24, 2:23.

The free-for-all purse, \$1,500, was the concluding race of the series. There were five entries, three of which came to the post—Vanderlynn, Albert W. and Bay Frank. In the pools Vanderlynn brought \$50, Bay Frank \$45, Albert W., \$20. There was a good deal of time taken up in scoring, and when the word was given all were nearly abreast. Albert W. broke before going fifty yards, and Vanderlynn at the furlong mark. This enabled Bay Frank to take the lead, getting to the quarter two lengths in front of Vanderlynn, in 30 1/2 seconds. There was more difference at the half in 1:10 1/2, but from there Vanderlynn closed on the leader, and came home with something to spare, in 2:22.

The second heat was disastrous to all except Vanderlynn. Albert W. broke, then Bay Frank, neither of which could recover in time to save their distance, giving Vanderlynn first, second and third money. Time, 2:21.

Same Day.—Purse, \$1,500; free for all. Director to wagon. Vanderlynn, b g, by Geo. M. Patchen, Jr., dam by Joseph—W. W. Stow..... Farrell 1 Bay Frank, b g, by Tornado—B. M. Richmond..... Lyndon 2 dis Albert W., b b, by Electioneer—A. Waldstein..... McConnell 3 dis Time, 2:22, 2:21.

List of Premiums Awarded.

Society's gold medal for best display of Live Stock to Leland Stanford.

THOROUGHBRED HORSES.

Stallions—Best four-year-old, and over, H. R. Potter, Stockton, Kelpie, by Claude Duval, dam Imagination; second, P. M. Warn's Clifton Bell, by Leinster, dam Tibbie Dunbar.

Best three-year-old, F. DePoister's Jo Wheatly, by Wheatly, dam Mary Gibbons.

Best one-year-old, W. B. Todbunter's King of Norfolk, by Norfolk, dam Marion.

Mares—Best three-year-old, Charles Scott, Napa, Esmeralda, by Shannon, dam Rnth Ryan; second, C. Halverson, Routers, Emma B., by Bayswater, dam Lady Fashion.

HORSES OF ALL WORK.

Stallions—Best four year old and over, George Hack, Freeport, Young Peacock; second, A. D. Oakley, Folsom, Selim. Best three-year-old, John McEute, Gonzales, Henry Clay.

Best two-year-old, W. E. Comstock, Pleasant Grove, Major; second, M. Wick, Orville, Arlington.

Best one-year-old, F. Davis, Plymouth, Geo. Howson; second, A. D. Miller, Walsh's Station, Modoc.

Best under one year old, G. W. Hancock, Sacramento. Mares—Best four years old and over, with colt, W. R. Cunningham, Nicolaus, Lucy; second, A. D. Miller, Walsh, Eureka.

Best four-year-old and over, A. D. Miller, Walsh, Lucy Gray; second, John Adams, Monticello.

Best three-year-old, George Hack, Freeport, Mollie; second, J. H. Allen, Sacramento, Nellie C.

Best two-year-old, W. E. Comstock, Pleasant Grove, Queen. Best one-year-old, A. D. Miller, Juno.

Best sucking colt, W. R. Cunningham, Maggie.

ROADSTERS.

Stallions—Best four-year-old and over, Wm. Billups, Colusa, Tilton Almont; second, L. J. Rose's Sultan.

Best three-year-old, A. L. Frost's Roscoe; second, J. H. Tennant's Alert.

Best two-year-old, S. K. Trefry's Apex; second, J. Gardner's Black Diamond.

Best one-year-old, J. B. Haggin's Tanhauser; second, W. Merrill's Climax. Best sucking colt, H. Klemp's Prompter, Jr.; second, B. Harris' Relief.

Best roadster gelding, Ed. Younger's Whisper; second, S. Trefry's Dick Brown.

Mares—Best four-year-old and over, P. Dudley's Magdalene; second, M. W. Hicks' Empress.

Best three-year-old, A. T. Hatch's Fremero; second, D. E. Knight's Nighthawk.

Best two-year-old, W. R. Merrill's Belle A.; second best, L. Whitmore's Skip.

Best one-year-old, M. W. Hicks' Beauty; second, J. B. Haggin.

Best sucking colt, A. D. Hunter's Lily; second, M. W. Hicks.

CARRIAGE HORSES.

Best matched span carriage horses, owned and used as such by one person, W. M. Coward, Woodland, Keutuck and Prince; second, B. E. Harris, San Francisco, Colonel and Elmo.

Roadster teams—Best double team roadsters, owned and used as such by one person, L. U. Shippee, Stockton, Mollie and Nellie.

STANDARD TROTTERS.

Stallions—Best four-year-olds and over, L. U. Shippee Stockton, Hawthorne; second, H. S. Beals, Sacramento Berliu.

Best three-year-old, G. Valensin, Arno, Sydney; second, J. A. McClood, Stockton, Mt. Vernon.

Best one-year-old, J. B. Haggin, Sacramento; second, L. U. Shippee, Stockton.  
 Best suckling colt, L. U. Shippee, Stockton, by Hawthorn.  
 Mares—Best four-year-old and over, Dr. M. W. Hicks, Sacramento, Pearl; second, L. U. Shippee, Stockton, Ryan mare.  
 Best three-year-old—W. F. Smith, Sacramento, Pansy.  
 Best one-year-old, G. Valensin, Arno, Hour; second, J. B. Haggin, Sacramento, by Echo.  
 Saddle Horses—Best saddle horse, mare or gelding, B. E. Harris, San Francisco, Hector; second, Ben E. Harris, San Francisco, Leo.

DRAFT HORSES.

Stallions—Best four-year-old and over, A. B. McCrea, Roseville, Vendee; second, J. R. Jones, Madison, Dantan.  
 Best three-year-old, J. T. Whitney, Rocklin, British Oak; second, G. L. Meadows, Elk Grove, Scotch Ontory.  
 Best two-year-old, C. K. Bailey, Stockton, Roysl Tom; second, C. K. Bailey, Stockton, White King.  
 Best one-year-old, C. K. Bailey, Stockton, George Washington; second, McEntee Bros., Gonzales, Farmers' Glory.  
 Best under one year old, W. E. Comstock, Pleasant Grove, Prince; second, C. K. Bailey, Waterloo.  
 Mares—Best four year-old and over, with colt, R. J. Merkley, Sacramento, Fanchon; second, C. K. Bailey, Cotata.  
 Best four-year-old and over, R. J. Merkley, Nellie; second, J. T. Whitney, Rocklin, Welcome.  
 Best three-year-old, J. T. Whitney, Catch.  
 Best two-year-old, R. J. Merkley, Juanita.  
 Best one-year-old, C. K. Bailey, Maggie Taylor; second, W. E. Comstock, Pleasant Grove, Belle.  
 Best suckling colt, R. J. Merkley, Emma; second, C. K. Bailey, Moss Rose.

SWEETSTAKES.

Best stallion, L. J. Rose's Sultan.  
 Best mare, James Adams's mare.

JACKS.

Best four-year-old and over, A. Munion's Black Sampson; second, L. U. Shippee's Castalian.  
 Best two-year-old, Henry Klemp, Pleasant Grove, Jumbo, Jr.; second, L. U. Shippee's Major Kent.  
 Best suckling, L. U. Shippee, Stockton.

JENNIES.

Best four-year-old and over, W. A. Munion's Black Fannie; second, L. U. Shippee.  
 Best two-year-olds, L. U. Shippee.  
 Best one-year-old, L. U. Shippee.  
 Best suckling, L. U. Shippee.

MULES.

Best span of any age, California bred, W. L. Pritchard.

CATTLE.

Durhams, Bulls—Best three-year-old and over, C. Younger's Forest King.  
 Best two-year-old, Ed. Younger's Kirklevington of Forest Home; second, C. M. Stetson's Louans Duke.  
 Best one-year-old—C. Younger's Second Forest King; second, Charles Scott's Oxford Duke.  
 Best calf—C. Younger's Sixth Forest King; second, M. Wick's Master Mazurk.  
 Cows—Best three-year-old and over, C. Younger's Jessie Maynard; second, M. Wick's Gem.  
 Best two-year-old, Colonel Younger's Red Dolly Fourteenth; second, Ed. Younger's Thirteenth Red Dolly.  
 Best one-year-old—Colonel Younger's Oxford Rose; second, Colonel Younger's Fourteenth Rose of Forest Home.  
 Best calf—Colonel Younger's Sprightly; second, Colonel Younger's Seventeenth Rose of Forest Home.  
 Jersey Bulls—Best three-year-olds and over, T. Waite's Jersey Prince; second, James Askew's Duke of El Dorado.  
 Best two-year-olds—T. Waite's William; second, William Hook's Gilroy.  
 Best one-year-old—R. Noell, Grass Valley, Jersey Duke; second, T. Waite's John Rooney.  
 Best calf—James Askew's Fourth Duke of El Dorado; second, A. L. Nichols' Banquo.  
 Cows—Best three-year-old and over, R. Noell's Katie; second, Robert Beck's Pauline.  
 Best two-year-old, G. W. Hancock, Sacramento; second, A. L. Nichols' Almet.  
 Best one-year-old, R. Noell's Jersey Belle; second, T. Waite's Topsy.  
 Best calf, Robert Beck's Amanda; second, R. Noell's Duchess of Grass Valley.  
 Devon bulls—Best three-year-old and over, Captain Hutchinson's Burnett Third.  
 Best two-year-old, Captain Hutchinson's Columbus P.  
 Best one-year-old, Captain Hutchinson's Hugo Second; second, Captain Hutchinson's Eros.  
 Best calf, Captain Hutchinson's Bideford.  
 Cows—Best three-year-old and over, Captain Hutchinson's Lovely 34th; second, Captain Hutchinson's Wonder 3d.  
 Best two-year-old, Captain Hutchinson's Helena 36th; second, Captain Hutchinson's Lovely 36th.  
 Best one-year-old, Captain Hutchinson's Lovely 37th; second, Captain Hutchinson's Lovely 41st.  
 Best calf, Captain Hutchinson's Maid of Torridge.  
 Ayrshire bulls—Best three-year-old and over, L. Stanford's Alexis; second, George Bement's Archie.  
 Best two-year-old, L. Stanford's Menlo; second, George Bement's Hector.  
 Best one-year-old, George Bement's San Mateo.  
 Best calf, George Bement's Clipper; second, L. Stanford's Benton.  
 Cows—Best three-year-old and over, George Bement's Elaine; second, L. Stanford's Florence.  
 Best two-year-old, George Bement's Sybil; second, L. Stanford's Sadie.  
 Best one-year-old, George Bement's Marion.  
 Best calf, George Bement's Sybil; second, L. Stanford's Alenia.  
 Hereford bulls—Best one-year-old, Captain Kohl's Count Tndegar; second, Captain Kohl's Vanguard.  
 Best calf, Captain Kohl's Duke of Normandy.  
 Cows—Best three-year-old and over, Captain Kohl's Viollette 2d; second, Captain Kohl's Tidy 10th.  
 Best two-year-old, Captain Kohl's Temptress; second, Captain Kohl's Triumph Theora.  
 Best calf, Captain Kohl's Kate 1st; second, Captain Kohl's Queen of the Pacific.  
 Herds, etc.—Best herd of thoroughbred Durham cattle, over two years old, to consist of one male and four females, owned by one person, Colonel Younger.  
 Best herd of thoroughbred Durham cattle, over two years, same conditions as above, Col. Younger.  
 Best herd of thoroughbred Jersey cattle, over two years old, R. Noell, Grass Valley.

Best herd of thoroughbred Jersey cattle, under two years old, R. Beck, San Francisco.  
 Best herd of thoroughbred Devons of any age, Captain J. A. Hutchinson, Los Angeles.  
 Best herd of Ayrshires of any age, L. Stanford.  
 Best herd of Herefords of any age, Captain Kohl.  
 Best herd of Holstein or Holderness of any age, W. H. Meek, San Lorenzo.  
 Graded Cattle—Cows—Best three-year-old and over, C. Younger's Widow. Best two-year-old, R. J. Merkley's Nellie. Best one-year-old, R. J. Merkley's May Queen. Best calf, P. H. Murphy's Daisy.

SWEETSTAKES.

Best bull of any age or breed, Colonel Younger.  
 Best cow of any age or breed, Paige & Johnston, Los Angeles.  
 Best bull and three of his calves under one year old, Edward Younger.  
 Fattest cow, Colonel Younger.  
 The judges recommended that a special premium be awarded to the Polled Aberdeen-Angus cattle.

SHEEP.

French Merinos—Best ram, two-year-old and over, J. Roberts' Gamester Third. Best ram, one-year-old, J. Roberts' Fernando. Best three ram lambs, J. Roberts. Best pen of not less than five ewes, two-year-old and over, J. Roberts. Best pen of not less than five ewes, one-year-old, J. Roberts. Best pen of not less than five ewe lambs, J. Roberts. Best ram and five of his lambs, J. Roberts' Gamester Third.  
 Spanish Merinos—Best ram, two-year-old and over, F. Bullard's Vermont. Best ram, one-year-old, F. Bullard's Long Wood, Jr. Best three ram lambs, F. Bullard. Best pen of not less than five ewes, two-year-olds and over, F. Bullard. Best pen of not less than five ewes, one-year-olds, F. Bullard. Best pen of not less than five ewe lambs, F. Bullard. Best ram and five of his lambs, F. Bullard's Vermont.

Cotswold—Best ram, Ed. Younger's Early Morn. Best pen of ewes, not less than five, Ed. Younger.  
 Southdowns—Best ram, Geo. Bement's Sonoma. Best pen of ewes, not less than five, Geo. Bement.  
 Sweetstakes—Best ram of any age or breed, and five of his lambs, F. Bullard's Vermont.

GOATS.

Thoroughbreds—Best buck, two years old and over, Julius Weyand, Little Stoney, Harris. Best buck under two years old, Julius Weyand's Sultan. Best pen of not less than three does, two years old and over, Julius Weyand. Best pen of not less than three does, under two years, J. Weyand.  
 Graded—Best pen of not less than three does, two years old and over, J. Weyand.  
 Herd—Best herd of not less than ten of any age or breed, Julius Weyand.

SWINE.

Berkshire—Best boar, two years old and over, San Mateo Stock Farm, Abraham; second, John Kennedy's Prince.  
 Best boar, under two years old, John Rider's Royal Bismarck.  
 Best boar, six months old and under one year, San Mateo Stock Farm's Airlie; second, San Mateo Stock Farm's Aleck.  
 Best breeding sow, San Mateo Stock Farm's Hopton Lass second; second, John Rider's Peerless C.  
 Best sow, six months old and under one year, San Mateo Stock Farm's Beauty; second, San Mateo Stock Farm's Princess.  
 Best pair of pigs, under six months, San Mateo Stock Farm; second, San Mateo Stock Farm.  
 Essex—Best boar, two years old and over, T. Beach's Tarbox.  
 Best sow, six months old and under one year, Taylor Beach's Blonde.  
 Poland-China—Best two-year-old and over, Jos. Melvin's Tom Dallas.  
 Best boar under two years, Jos. Melvin's Arthur; second, M. Wickes' Frank.  
 Best boar six months old and under one year, Jos. Melvin's Tom Duke.  
 Best breeding sow, Jos. Melvin's Bessie; second, Jos. Melvin's Daisy.  
 Best pair under six months, Jos. Melvin.  
 Sweetstakes—Best boar, of any age or breed, San Mateo Stock Farm, Abraham (Berkshire).  
 Best sow of any age or breed, John Rider's Peerless C. (Berkshire).  
 Best pen of six pigs, under six months, San Mateo Stock Farm's (Berkshires).  
 Best family, all of same breed, consisting of one boar, two sows and six pigs, San Mateo Stock Farm's Abraham, Hopton Lass Second, Beauty and six pigs (Berkshires).

POULTRY.

Best old pair Light Brahmans, R. G. Head, Napa; second, T. Waite, Brighton.  
 Best young pair Light Brahmans, R. G. Head; second T. Waite.  
 Best pair Langhan's, cock and hen, R. G. Head; second, T. Waite.  
 Best pair Langhan's cockerel and pullet, R. G. Head; second, Thos. Waite.  
 Best pair Buff Cochins, cock and hen, Thomas Waite.  
 Best pair Buff Cochins, cockerel and pullet, Thomas Waite; second, R. G. Head.  
 Best pair Plymouth Rocks, cock and hen, Thomas Waite; second, R. G. Head.  
 Best pair Plymouth Rocks, cockerel and pullet, E. I. Robinson, Sacramento; second, Thomas Waite.  
 Best pair Black Leghorns, cock and hen, R. G. Head.  
 Best pair Black Leghorns, cockerel and pullet, R. G. Head; second, T. Waite.  
 Best pair Brown Leghorns, cock and hen, T. Waite; second, R. G. Head.  
 Best pair Brown Leghorns, cockerel and pullet, T. Waite; second, R. G. Head.  
 Best pair White Leghorns, cock and hen, R. G. Head; second, T. Waite.  
 Best pair White Leghorns, cockerel and pullet, R. G. Head; second, T. Waite.  
 Best pair Black Spanish, cock and hen, F. S. George; second, E. I. Robinson.  
 Best pair Black Spanish, cockerel and pullet, F. S. George; second, E. I. Robinson.  
 Best pair Hondans, cock and hen, T. Waite.  
 Best pair Hondans, cockerel and pullet, T. Waite; second, R. G. Head.  
 Best pair Silverspangled Hamburgs, cock and hen, T. Waite; second, R. G. Head.  
 Best pair Game chickens, R. G. Head; second, A. L. Nichols.

Best pair Bronze turkeys, R. G. Head; second, T. Waite.  
 Best pair Wild turkeys, R. G. Head; second, T. Waite.  
 Best pair Toulouse geese, R. G. Head; second, R. G. Head.  
 Best pair Ronen ducks, R. G. Head; second, T. Waite.  
 Best pair Pekin ducks, R. G. Head; second, T. Waite.  
 Best pair Black Cochins, A. L. Nichols.  
 Best Partridge Cochins, cock and hen, T. Waite; second, R. G. Head.  
 Best Partridge Cochins, cockerel and pullet, G. Waite; second, R. G. Head.  
 The committee recommended a special premium for a coop of young Seagrigh Bantams to T. Waite and a coop of Emden geese to R. G. Head.

Coney Island.

Sept. 9th.—Purse \$500, for three-year-olds and upward; entrance, 5 per cent. (\$25 each) to the second; winners of any one race during the meeting to carry weight for age, or if of the first race on the second or first race of the fourth day (Little Minch and Miss Woodford), or of any two races during the meeting, to carry 5 lbs. extra; other horses allowed 7 lbs.; non-winners in 1884 allowed 15 lbs.; 18 entries; three-quarters of a mile.  
 Ed. Corrigan's b m, Pearl Jennings, 5, by Lelapa, dam Mary Howard, 108 lbs. .... West 1  
 Mr. Kelso's b m, Rica, 5, 108 lbs. .... Meaton 2  
 E. J. Baldwin's b c, Shenandoah, 3, 105 lbs. .... J. Donahue 3

 G. H. Herne's b g, Burch, 4, 100 (carried 104) lbs. .... W. Donahue 10  
 W. L. Cassidy's c b g, Saunterer, 6, 108 (carried 109) lbs. .... Blaylock 11  
 P. Lorillard's Nimrod, 4 1/2 (carried 112) lbs. .... Fitzpatrick 12  
 Weidman & Co.'s b f, Eva S., 3, 94 lbs. .... Higgs 13  
 Time, 1:54.

Betting: 3 to 1 against Followlay, 6 to 1 each against Rica and Pearl Jennings, 7 to 1 each against Eva S. and Saunterer, 10 to 1 each against Burch and Itaska, 15 to 1 against Marsh Redon, 20 to 1 each against Charley Kempland, Nimrod Ben Thompson and Caramel, and 25 to 1 against Shenandoah. Pools: Followlay, \$100; Rica, \$50; Marsh Redon, Itaska, Eva S., and Pearl Jennings, \$40 each; the field, \$60. Mutuels paid, \$47.80.

After a long delay the flag was dropped, with Rica in front, followed by Ben Thompson, Eva S., Caramel, and Saunterer, with the others well up. Before they had run a furlong Itaska and Followlay joined Rica, and between them they held the lead to the turn, where Followlay showed quite prominently, while of the others Pearl Jennings and Shenandoah were both well up. As they came round the turn in the stretch Rica again took the lead, which advantage she retained until reaching the lower end of the stand, when Pearl Jennings with a rush took the lead and, holding it to the end, won by two lengths, followed by Rica, Shenandoah, and Charley Kempland on nearly even terms, with Caramel, Ben Thompson and the others as above: Eva S. fell.

Same day—Champlon Time Handicap, sweepstakes, for all ages, at \$20 each, play or pay, with \$1,000 added, the second to receive the stakes, \$250; 5 entries; one mile; the winner to receive \$1,000 additional if the mile is run in better time than 1:40.  
 P. Lorillard's b m Aranza, 6, by Bonnie Scotland, dam Arizona, 8, 110 lbs. .... Onley 1  
 R. R. Owing's b g Mammonist, 6, 95 (carried 100) lbs. .... Conkling 2  
 Blohm & Co.'s b c Little Minch, 4, 108 lbs. .... Garrison 3  
 E. J. Baldwin's b c Gano, 4, 100 lbs. .... J. Donahue 4  
 Time, 1:41.

Betting—10 to 9 on Aranza, 3 to 1 each against Little Minch and Mammonist and 10 to 1 against Gano. Pools: Aranza, \$240; Mammonist, \$160; Little Minch, \$150, and Gano, \$60. Mutuels paid, \$10.80.

There was another long delay at the post, but when they did get the flag Little Minch was a trifle in front, followed by Aranza, Mammonist and Gano. Before they reached the main track Aranza headed Little Minch and at the end of the first quarter led by three parts of a length, with Little Minch a length and a half in front of Mammonist and Gano. There was no relative change of positions until the end of the race other than before they run half the distance Gano was out of it, while Aranza led by two lengths at the end of the half mile. In the run round the turn Little Minch gained on Aranz very considerably, so that at the end of six furlongs she only led by a neck. The effort, however, settled Little Minch, for in the stretch Aranza again came away and won by two lengths, while Little Minch was unable to stave off Mammonist's challenge and be secured the second honors by a good neck. Gano was fast, fully fifty yards back. Time, 1:41, of which the quarter was run in 25 1/2 seconds, the half in 49 1/2 seconds and the three-quarters in 1:15.

Same Day—Purse, \$600, for three-year-old fillies; entrance, 5 per cent. of the purse (\$30 each), to the second; winners of any race, exclusively for three-year-olds, of more than \$500 (handicaps excepted) to carry 5 lbs.; of two or more such races, 10 lbs.; extra; non-winners in 1884 allowed 10 lbs.; maidens allowed 20 lbs.; 4 entries; mile and a furlong.  
 Mr. Kelso's b f Water Lily, by King Alfonso, dam Lily Duke, 105 lbs. .... Meaton 1  
 E. L. Lorillard's b f Economy, 115 lbs. .... Blaylock 2  
 E. J. Baldwin's h k f Freda, 120 lbs. .... J. McLaughlin 3  
 D. D. Withers' Bijou filly, 95 (carried 96) lbs. .... McKenny 4  
 Time, 1:59.

Betting: 100 to 55 on Water Lily, 11 to 2 against the Bijou filly and 5 to 1 each against Freda and Economy. Pools: Water Lily, \$500; Bijou filly, \$120; Freda and Economy, \$100 each. Mutuels paid \$5.95.

Water Lily was in front at the start, but quickly gave place to the Bijou filly, who at the end of the first quarter led by a length, followed by Economy, Water Lily and Freda all well up. Mr. Withers' filly retained the lead for five furlongs, when she gave place to Water Lily, and very soon after was in turn passed by the others. As they ran round the far turn Freda closed up rapidly on Water Lily, but failing to stay in the stretch Economy took second place, but was unable to reach Water Lily, who, keeping right on, won easily by three parts of a length, Economy second, ten lengths in front of Freda, she five in front of the Bijou filly.

Sept. 11th.—Handicap sweepstakes, for all ages, at \$20 each; only \$10 if declared; with \$600 added; the second to receive \$100 out of the stakes; closed with 19 entries, of which 9 were declared; mile and a furlong.  
 D. D. Withers' c h g Duplex, 4 years, by King Ernest of Mevroun, dam Echo, 116 lbs. .... W. Donahue 1  
 G. Cook's b c Ferg Kyle, 4 years, 114 lbs. .... J. McLaughlin 2  
 W. C. Daly's c h g Ligan, 3 years, 85 lbs. .... Moran 3  
 Hayden & Co.'s b m Gleanarine, 5 years, 100 lbs. .... West 4  
 E. J. Baldwin's b c Shenandoah, 3 years, 104 lbs. .... J. Donahue 5  
 W. L. Scott's c h f All-Hands-Around, 4, 102 lbs. .... Lewis 6  
 P. H. McMahon's b g Lytton, 4, 102 lbs. .... Sheridan 7  
 P. Lorillard's h c Endymion, 3, 100 lbs. .... Onley 8  
 W. L. Cassidy's c g Saunterer, 6, 100 (carried 105) lbs. .... Garrison 9  
 Time, 1:54.

Betting: 3 to 1 against Ferg Kyle, 5 to 1 against Gleanarine, 6 to 1 each against Ligan, Saunterer and Duplex, 7 to 1 against Shenandoah, 8 to 1 each against All-Hands-Around and Endymion and 15 to 1 against Lytton. Pools.—Ferg Kyle, \$50; Duplex, \$30; Ligan, Gleanarine, All-Hands-Around Saunterer, \$20 each; the field \$50. Mutuels paid \$34.7

After a long delay, much of which was caused by Duplex, the flag was dropped, with Glengarine a length or two in front of Ferg Kyle, Shenandoah and Endymion, with Duplex and Saunterer leading the second division. Before they reached the turn Shenandoah and Glengarine, with Ferg Kyle close up with them, they forced the pace to the turn for the backstretch. At the end of the quarter Shenandoah headed Glengarine, but was unable to sustain the position against Ferg Kyle, who, with a lead of nearly half of length, showed the way to the end of the half mile, closely pressed by Glengarine, Shenandoah and Duplex. Half way down the backstretch Ferg Kyle again headed the field, and with a lead of half a length he showed the way round the big turn and into the homestretch, where he was followed by Glengarine and Duplex, with all the others, led by Ligan, fully four lengths away. The instant they were in the straight Duplex headed Ferg Kyle, and coming right away won with the greatest ease by five lengths, followed by Ferg Kyle, four lengths in front of Ligan, who was lapped by Glengarine, with the others well tailed out. Time, 1:55 1/2, the fastest time that the full course has been run in since it was made a mile and a furlong.

Same day.—The Bridge Handicap, a sweepstakes for three-year-olds at \$100 each for starters; only \$25 forfeit for horses entered by Jan. 1, 1884, and \$10 only if struck out by Sept. 1st; horses entered by Aug. 15th, when the stake closed, to pay \$50 forfeit; the club add \$250, which \$50 and 20 per cent. of the stakes to the second, and 10 per cent. of the stakes to the third; closed with 73 subscribers on Jan. 1st, and 19 on Aug. 1st, of which \$74 paid \$10, 17 paid \$25 and 14 paid \$50; mile and a half.  C. J. Claplana's stable's ch c Sandoval, 95 lbs..... Donnelly 0  
 Blagrawe Stable's b c Burgomaster, 95 lbs..... Bergan 0  
 P. Lorillard's b c Leo, 95 lbs..... Olney 0  
 Time, 2:38.

Betting: 3 to 1 each against Louise and Water Lily. 5 to 1 against Freda, 8 to 1 each against Greystone and Tolu, 10 to 1 each against Leo and Blue Bell, 12 to 1 each against Blast, Burgomaster and Palmurus, 15 to 1 against Sandoval, and 25 to 1 each against Hopeful and Vinton. Pools: Water Lily and Louise, \$150 each; Freda and Greystone, \$60 each; Blast, \$45; Leo and Blue Bell, \$40 each; Tolu, \$35; Burgomaster, \$20, and the field, \$80. Mutuels paid, \$35.50.

An excellent start was effected the first time of trying, with Tolu, Sandoval and Leo in front, followed by Freda, Louise and Blue Bell, with the others haunched. The only change in the run round the turn was that Sandoval took the lead, and at the stand showed three parts of a length in front of Leo, who was lapped by Hopeful, Blue Bell, Freda and Burgomaster running nearly even, with Louise leading the others, of which Palmurus was last. As they ended the first half mile Sandoval, attended by Hopeful, drew clear, and with Leo third and Louise fourth they kept on nearly to the little grove, half way down the backstretch, where Hopeful and Louise headed Sandoval. The imported colt's lead was brief, for as they ran out the seven furlongs Louise showed in front, but so well did Hopeful hang on that at the end of the mile Louise, Hopeful and Greystone were running on even terms, five lengths in front of Water Lily, she a length and a half in front of Vinton. The run from the mile-post to the starting-point was sharp and fast, and Hopeful again showed in front, he leading by half a length, with Greystone second, a neck in front of Louise, she a length and a half in front of Water Lily. Meaton continued to wait with the latter until reaching the turn, when as the others ran out wide he brought Water Lily through next the rails, and at the beginning of the last furlong she was leading by nearly a length, and so easily that the race was really over, all hnt the shouting, and, keeping right on, she won with the greatest ease by two lengths, with Louise second, a length in front of Blast, he a length in front of Tolu, who was followed by Palmurus, Greystone, Blue Bell, Hopeful, Vinton, Freda, Sandoval, Burgomaster and Leo in that order. Time, 2:38. Value of stake to winner, \$3,996.50.

Sept. 13th.—Purse \$500, for horses that had run and not won during the meeting; entrance 5 per cent. of the purse (\$25 each) to the second; horses not having been placed second allowed 5 lbs; non-winners in 1884 allowed 10 lbs; 10 entries; mile and a furlong.  
 D. T. Walton's b c Torpedo, 101 lbs..... Dalton 0  
 E. J. Baldwin's b c Markland, 4 years, by Springbok, dam Lorena, 113 lbs..... J. McLaughlin 1

 Blagrawe Stable's br c Burgomaster, 3, 108 lbs..... Garrison 0  
 F. T. Walton's bh Mr. Pickwick, 6, 113 lbs..... Evans 0  
 Time, 1:56 1/2.

Betting—2 to 1 against Mammonist, 5 to 1 against Buckstone, 6 to 1 against Gleaner, 7 to 1 against Markland, 8 to 1 against Jim Renwick, 10 to 1 against Burgomaster, 12 to 1 against Free Gold and 30 to 1 each against Torpedo and Mr. Pickwick. Pools: Buckstone, \$40; Mammonist, \$35; Gleaner, \$20; Jim Renwick, \$15; Markland, \$15, and the field, \$20. Mutuels paid, \$51.20.

After several breakaways an excellent start was effected, with Gleaner, Buckstone, Jim Renwick and Markland all together, followed by Mammonist, Free Gold and the others. Before they reached the turn Buckstone took a decided lead, with Jim Renwick second, but they only retained these positions to the turn for the backstretch, where Gleaner and Torpedo passed them, and with a clear lead they held the track to the end of the half mile, where Burgomaster showed in front, followed by Gleaner, Torpedo, Free Gold, Jim Renwick and Buckstone, all in a close bunch. There was no change until the big turn by the orchard, where Gleaner again got up, and with Burgomaster second and Gleaner third they ran lapped to the turn into the homestretch, where they were joined by Jim Renwick and Markland. The former showed in front at the beginning of the last furlong, but he was almost instantly passed by Markland, who, running right out, won by three good lengths, followed by Jim Renwick and Mammonist, the latter coming very quick after he had got clear of Gleaner, Torpedo and Burgomaster, who in a measure had him pocketed at the betting enclosure. Once clear he made up a lot of lost ground and was only beaten for the place money by Jim Renwick by a few inches. A length or more away was Free Gold, followed by Buckstone, Torpedo, Gleaner, Burgomaster and Mr. Pickwick, the last named away off.

Same Day.—The Flatbush Stakes; for two-year-olds; at \$100 each for starters; \$25 forfeit, with \$125 added; with \$250 to the second; the third to save its stake; to carry 110 lbs.; winners of \$2,000 after August 15 to carry 115 lbs.; maidens to carry 100 lbs.; usual sex allowances; closed with thirty-two subscribers; seven furlongs.  
 E. Lorillard's ch f Wanda, by King Alfonso, dam Lily Duke, 107 lbs 0  
 E. Corrihan's ch f Lizzie Dwyer, 107 lbs..... West 2  
 W. L. Scott's b c Florio, 107 lbs..... Dalton 0

 Mr. Kelso's ch c Goano, 115 lbs..... Dalton 0  
 C. J. Claplana's stable's b c Brookwood, 101 lbs..... Feikes 0  
 W. Donahue's ch c Elgin, 100 lbs..... Owner 0  
 Suffolk S.'s b c Skookum, 97 lbs..... Higgs 0  
 E. J. Baldwin's b c Volante, 110 lbs..... Holloway 0  
 L. Lorillard's b c St. Augustine, 110 lbs..... Blaylock 0

G. L. Lorillard's ch f Souci, 107 lbs..... Donohue 0  
 N. W. Kittson's b c St. Louis, 109 lbs..... Sheridan 0  
 Time 1:31.

Betting: 8 to 5 against Wanda, 6 to 1 against Goano, 7 to 1 each against Brookwood and Florio, 10 to 1 each against St. Augustine and Lizzie Dwyer, 12 to 1 each against Souci, Volante and Verano, 15 to 1 against Skookum, 20 to 1 against Thomas, and 25 to 1 against Elgin. Pools: Wanda, \$320; Goano, \$260; George Lorillard's pair, \$260; Brookwood, \$180; Baldwin's pair, \$181; Florio, \$140; Lizzie Dwyer, \$100; and the field, \$920. Mutuels paid, \$14.20.

Assuming that the Autumn Stakes for two-year-olds run on the first day of the meeting ranks with the Middle Park Plate as run in England, then the Flatbush Stakes run yesterday will take rank with the Dewhurst Plate, the distance for both being seven furlongs. No two-year-old race that has been run since the Champion Stallion Stakes at Mounmouth Park have attracted as much attention. All the several candidates were early on the track. There was a large crowd in the paddock, while a crowd of some five or six hundred assembled at the starting point, where the finishing touches were given to Wanda, Lizzie Dwyer and Goano. The last named, however, attracted the most attention, as his owner and rider, Jimmy McLaughlin, was present. Considering that Wanda was the favorite, she was badly neglected, which probably pleased Byrne, as he was able to keep the filly very quiet, as was also the case with Lizzie Dwyer. The Californians, after cantering around the course twice, were also early at the post, and they naturally attracted much attention. The general opinion of those who saw them at Mounmouth was that they did not look near so well. They were not as high in flesh and looked somewhat overdone, which was also the opinion of some in regard to Wanda, while of the others Goano looked well, as also did Brookwood and the Westbrook pair.

With the third bell Starter Caldwell took them in hand, but there was a long delay, during which a majority of the youngsters, especially Brookwood and Goano, showed considerable temper in rearing and buckjumping about. But when they did get the flag it was to a fairly good start, with Wanda, Elgin, St. Augustine and Skookum a trifle in front of Florio, Souci and the California pair, who were followed by Brookwood and Goano. Before they had run a hundred yards Skookum headed the field, and, with Goano second, he having run through his horses like a flash, they reached the three-quarter starting point half a length in front of Elgin and Wanda, who were lapped by Florio. At the end of the first quarter Skookum led by a length, and with Goano second, they held the lead until nearly the end of the three furlongs, when Volante showed in front, and, being almost instantly joined by Verano, the Californians were first and second at the end of half a mile, with Goano third, nearly two lengths in front of Wanda, who had Skookum and Florio for attendants. The Californians held the lead between them nearly to the turn into the homestretch, when both were passed by Goano who, with a clear lead, showed the way into the homestretch, which started the stable boys shouting. But as Verano again headed Goano at the beginning of the last furlong, the crowd in the stand in turn became much excited, although it remained passively quiet until the horses were nearly half way up the stretch, when, as Lizzie Dwyer, Wanda and finally Florio in turn passed both Verano and Goano, the excitement became intense, which ended in loud cheering as Wanda, with the greatest ease, took the lead when fifty yards from the post, and, running out like a flash, won by two lengths, followed by Lizzie Dwyer, the same distance in front of Florio, who was followed by Verano fourth. Goano and Brookwood came next, with Elgin, Skookum, Volante, St. Augustine, Souci and St. Louis all pulled up. Time, 1:31, which is somewhat slower than expected, but the race was run fast and slow in places—somewhat fast at the beginning and decidedly fast at the finish.

Sept. 16th.—Purse \$500, for two-year-olds, entrance 5 per cent. of the purse (\$25 each) to the second; horses entered to be sold for \$2,500 to carry full weight; those entered not to be sold to carry 3 lbs. extra; if entered to be sold for \$2,000, allowed 5 lbs.; if to be sold for less to be allowed 2 lbs. for each \$100 down to \$1,000, the minimum selling price; 7 entries; three-quarters of a mile.  
 W. Lakeland's b c Contessa, by H.C. Used, dam Countess, \$1,100, 80 lbs..... Rayford 1  
 E. J. Baldwin's ch g Rapido, \$1,600, 99 lbs..... Miller 2  
 E. Corrihan's br g J. W. Rodgers, \$1,500, 97 lbs..... West 3  
 W. C. Daley's h f Miss Daley, \$1,600, 87 lbs..... Morsn 0  
 O. Bowie's ch f Joybell, \$1,000, 87 lbs..... Arnold 0  
 Appleby & Co.'s b f Error, \$1,000, 87 (carried 88) lbs..... J. Hyslop 0  
 C.F. McLaughlin's b c Leonidas, \$1,500, 96 lbs..... J. Donahue 0  
 Time, 1:36.

Betting: 7 to 5 against J. W. Rodgers, 3 to 1 against Rapido, 5 to 1 against Joybell, 7 to 1 against Error, 8 to 1 against Miss Daley, 10 to 1 against Contessa and 12 to 1 against Leonidas. Pools: Rapido, \$100; J. W. Rodgers, \$90; Joybell, Error and Contessa, \$40 each; Miss Daley, \$30, and Leonidas, \$20. Mutuels paid, \$65.65. No bid for the winner.

After a long delay and half a dozen breakaways they were started with Leonidas in the lead, followed by Joybell and Contessa and with J. W. Rogers and Miss Daley in front of Error and Rapido. Before they had run a furlong Joybell and Rapido took up the running and they held it between them to and partially round the big turn, where Rapido took the lead, and with J. W. Rogers second they made the turn into the homestretch, closely followed by Contessa, Joybell, Miss Daley and Error, several lengths in front of Leonidas. After they made the turn Miss Daley headed Contessa, but at the beginning of the last furlong only Rapido and J. W. Rogers were really in the race, they having a lead of two lengths from Miss Daley, Joybell and Contessa. But both tired so quickly that Contessa, under Rayford's whip, was not only able to overtake them but to beat them out by a neck with Rapido second, a neck in front of J. W. Rogers, who was followed by Miss Daley, Joybell, Error and Leonidas.

We have received from Mr. J. J. Miller, Melbourne, Australia, a copy of his *Sporting Pamphlet and Official Trotting Record for the Colonies for the season of 1883-4*, a valuable compilation with features not seen in works of that character in this country.

SAN FRANCISCO, July 28, 1884.

My wife has been a great sufferer for several years from nervous debility, with frequent painful attacks arising from nervous disorder. A change of climate was recommended and I sent her to Sacramento under the idea that her malady was due to the cold winds of our city. Though somewhat improved by the change of scene, her ailments still cling to her and her attacks were so severe as to require a physician from time to time. On a friend's recommendation I carried her a half-case Dr. Henley's Celery, Beef and Iron, which being tested by her physician, was endorsed by him as exactly what she needed. She used it all, commenced to strengthen from the beginning, and is now as perfect a specimen of female health as can be found in a day's travel.

A. B. VENABLE, 1316 Polk Street,

OUR NEW YORK LETTER.

Torrid September Weather—The Racing at Sheephead Bay—California Horses in Bad Luck—Drake Carter's Great Three-Mile Race—Aranza's Mile in 1:41—General Notes, Etc.

Such a prolonged hot spell as we have just had in this vicinity for the past ten days surpasses the memory of the proverbial oldest inhabitant, especially at this season of the year. Day after day the festive mercury has been soaring to an nnwonted altitude, and yesterday it marked ninety-five degrees, to the great discomfort of man and beast. In Gotham the latter have suffered terribly. Some of our thoroughfares at sunset last evening reminded one forcibly of the battlefields in the late war, so many were the poor brutes that had fallen by the wayside in the line of every car and stage route.

This Sahara like temperature is, however, at an end for the present and to-night New Yorkers rejoice in a lively breeze and the mercury at sixty-four degrees. Among the race horses the hot spell has also made itself felt, with adverse effects. Many of the fleet-footed equines have been unable to take their accustomed work, the consequent enervation, loss of appetite and the like has made the trainers sigh for more reasonable weather. To-night, however, it is much cooler.

At Sheephead Bay the greatest meeting of a great racing year has been in successful progress for two weeks. On Saturday last nearly one hundred horses started in the seven races of the day, an unexampled showing in American turf records and large fields have been the rule, and not the exception on each day of the meeting. After the Twin City handicap, won last week by Tom Martin, the "big little" son of Longfellow, Drake Carter's great race at three miles for the Autumn Cup has attracted the most attention. The average turf-gor delights in nothing so much as to see the time record broken, consequently there was much enthusiasm at Drake Carter's slaughter of his sire's record. The field he beat was a good one at handicap weights. Gen. Monroe, 103; Drake Carter, 115; Levant, 105; Bine Grass Belle, 100; Fosteral 100, and three others, including the venerable Bushwacker, who, in 1882, accomplished the double event of the great Long Island Stakes and the Bowie Stakes, each four-mile heats. To-day, however, the veteran cannot run fast enough to tire himself, though had it been a ten-mile race he would probably have been with them at the end. The pace of the Autumn Cup was 3:34 for the first two miles, Blue Grass Belle getting the best of her jockey and breaking away a long way in advance. In the last mile, however, she was done, and half a mile from home there were only three in it—Levant, Monroe and Drake Carter. Monroe finally got the best of Levant, but at the lower turn Drake Carter shot up alongside of him much the freshest of the two at this stage of the game, which he showed by coming away in the stretch and winning by eight lengths in 5:24, the best three-mile time on record. Probably no horse here has improved in the same ratio as Drake Carter has, and Pierre Lorillard to-day matched him against the Dwyer's four-year-old mare, Miss Woodford, to run two miles and a half, 115 pounds each, for \$10,000, the race to come off at Sheephead Bay, on the 18th. This will draw an immense crowd to the course, and it seems to be the general impression among those best informed on the subject that Carter will beat the mare. She has never yet gone as long a trip, and has not been doing as well of late as her trainer could wish. This was shown on the same day as the great three-mile race. She then beat a field of fast horses seven furlongs in 1:28 1/2—a fast race—but Gleaner gave her about all she wanted to do to beat him.

On Tuesday last, the Rancocas mare, Aranza, 110 pounds, was started against Little Minch, 103, Mammonist, 97, and Gano, 100, in a mile dash, extra money to be given if 1:40 was beaten. The quartet started off at a tremendous pace, running the first half in 49 seconds, but after that Aranza had the race in hand and was not pushed at the end. As it was she did the mile in 1:41, showing what she can do when in the notion.

The Pacific slopers here have had a bad streak of luck of late. Renwick has not won a race since he was brought down from Saratoga and some of the Baldwin stable have been ailing. Freda has been sick and yesterday finished last in the great race for the Bridge handicap, one mile and a half. Shenandoah ran a strong third in a three-quarter mile dash on Tuesday last, while Rapido and Gano have both failed thus far. Perhaps, however, Verano and Volante may do well in the Flatbush Stakes for two-year-olds run tomorrow. It is seven furlongs, and their principal antagonists are Wanda, Florio and Goano.

At Lexington a California two-year-old has been running creditably though he did not win. J. D. Christy's Bonanza, by Joe Hooker, out of Mattie Glenn, was, if my memory serves me right, sold at the Winter's sale in your State last June for something like \$2,000. To-day, at the last day's racing of the Kentucky Association's meeting, at Lexington, he ran in the Thames Stakes, one mile, and was second to Favor, the crack colt of that section, heated less than a length in 1:45 1/2. Bonanza bids fair to be a good bread winner for his owner.

The Baldwin stable will probably remain East until November as they have made entries at Baltimore and Washington. The present poor vein of luck they are in, should take a change before that time and I hope to chronicle some winning brackets for the "black and red Maltese cross." Cooper and Holloway have some good material to work on and "everything comes to those who wait." As for Jim Renwick the parties controlling him are under a close supervision from a race which he lost last week to Little Minch, and if the horse is not run straight somebody will get into hot water before long.

Rarely have the Dwyers had a worse run of luck than has fallen to their lot during the last month. George Kinney and Barnes laid up for repairs, most all of their long string of two-year-olds, ditto or badly troubled with the slow, leaving Miss Woodford, Hartford and Checkmate about all the members of their once powerful stable to be depended on. This is hard lines for a stable that opened the campaign so brilliantly last Juu, but it has thrown some of the money into the pockets of many smaller owners. The Islip stable of Geo. Lorillard has weathered its ill wind, and Louise, Monitor, Souci and others are in a winning vein. Louise is probably the best three-year-old now running, as the Mimi colt and Rataplan are under a cloud. Waterily heat Louise yesterday in the Bridge Handicap, but was in receipt of 18 lbs. from the latter. Accidents have greatly reduced the ranks of good three-year-olds. PACIFIC. N. Y., Sept. 12, 1884.

Blood Will Tell.

It is hardly expected that any one entirely uninterested in that branch of stock raising would grow enthusiastic over so unpoetic a subject as a hog. But there are exceptional cases. During the State fair, after witnessing one of the great stock parades, the writer met a lady acquaintance and asked her what she thought of the show. Her answer was: "I have been all around the Park and the most beautiful animals here are Mr. Corbett's pigs." This compliment to the San Mateo Stock Farm Berkshires was well deserved, for no finer exhibit was ever seen at any fair. Mr. Corbett carried off all the prizes and was overwhelmed with offers to purchase even his breeding stock. He declined the last proposition, however, as his breeders were imported from England, and he could not easily replace them.

The fair and races, at San Jose, opens next Tuesday. The Garden City is in the best trim, and the outlook is that 1884 will be one of the most successful exhibitions ever held there. On the speed programme the fields are large, and good racing is sure to be one of the attractions.

We have received notice from Captain N. T. Smith, Treasurer of the Stanford Stakes, that the only nomination upon which the last payment was made, due on the 18th, was J. C. Simpson's Antevolo. This reduces the race to a walk over for this year.

BICYCLING.

Springfield Bicycle Tournament—Records Broken.

The third annual bicycle tournament of the Springfield Club began September 16th, at Springfield, Mass. Public and private buildings were covered with hunting and the streets arched with flags of all nations. The parade in the morning was a grand sight. Over three hundred bicycles, ridden by natty costumed youths, were propelled noiselessly over the macadamized roadways, their nickel spokes glittering in the sun. The sidewalks were crowded by people who cheered the riders of "the silent steeds." The line of parade took the riders through the principal streets. Bands were stationed at different positions of the city and rendered excellent music during the progress of the parade. It is estimated that at least thirty-five thousand people viewed the parade.

At the Park, where the races took place, a crowd estimated at 12,000 assembled. The track was very smooth and in perfect condition, but a strong wind was blowing up the homestretch. Summary of the chief events:

FIRST DAY, SEPTEMBER 16TH.

One Mile Professional Handicap—C. W. Ashington, (10 seconds start), 1st, time, 2 min. 53 sec.; C. J. Young, (10 seconds start), 2d; R. Howell (England), 3d.

Ten Mile Amateur Race—Sellers (England), 1st; Lewis Hamilton (America), 2d, time, 31 min. 4 1/2 sec., which beat the best American record, 28 seconds.

Five Mile Amateur Tricycle—E. P. Burnham (America), 1st; R. Chambers (England), 2d. The race between Burnham and Chambers was of a most exciting character, and the finish was so close that it appeared to many like a dead heat. Time, 6 min. 27 sec. This beats the American record made a few days previous by five seconds.

Three Mile Professional Race—R. Howell (England), 1st; Robert James (England), 2d; John S. Prince (America), 3d. Won by twenty yards. Time, 8 min. 36 3/4 sec. This beat previous American record (professional), held by Woodside, by almost a minute.

SECOND DAY, SEPTEMBER 17TH.

Thousands of people witnessed the most remarkable record-smashing in the history of cycling in America. With glorious weather and a perfect track both amateur and professional riders seemed to have reached the acme of speed. The greatest enthusiasm was manifested throughout the entire programme.

Ten Mile Professional Race—R. Howell (England), 1st; Robert James (England), 2d; Woodside, 3d; John S. Prince, 0. On the last lap Howell spurred ahead and won easily. Prince's defeat by Woodside for third position was a great surprise to many. Howell's time, 30 min. 7 1/2 sec., supplants Woodside's American record of 31 min. 49 3/4 sec.

Two Mile Amateur Race—S. Sellers (England), 1st; G. M. Hendee (Springfield), 2d; Frazier, 0; Illston, 0; Dolph, 0; Gaskell, 0; Brooks, 0; Roberts, 0. The interest centred on Hendee and Sellers. They held second and third positions throughout a waiting race, Sellers shot to the front on the last lap, with Hendee close behind, Frazier third, and the field scattered. As they entered the homestretch Hendee seemed about to pass the Englishman who, however, showed his wonderful speeding power and passed the wire in the lead by two yards. No betting was allowed in public, but the Springfielders staked large sums of money on the hitherto invincible favorite. Time, 6 min. 3 sec., which supplants the American record of 6 min. 14 sec., held by Moore. The last half mile of the race was won in 1 min. 22 sec.

Mile Race Without Hands—H. Wollison, of Pittsfield, won in the remarkable time of 3 min. 2 1/2 sec.

Five Mile Tricycle Race—Chambers (England), 1st; Burnham (America), 2d; Johnson, 0; Illston, 0. This was Chambers' third attempt to beat the American champion, and he succeeded Burnham, giving up exhausted before reaching the wire. The time, 17 min. 14 sec., again lowers the record.

Half Mile Dash—S. Sellers (England), 1st; Gaskell (England), 2d; Frazier, 3d. A hotly contested event, Gaskell pushing Sellers right up to the finish. Time, 1 min. 19 2/5 sec., which lowers the record.

One Mile Professional Race—John S. Prince (America), 1st; James (England), 2d; R. Howell (England), 3d. The three-fourths of a mile was made by Howell in the fastest recorded time, and he led till the homestretch was reached when Prince pedaled furiously to the front and won a grand race in the unprecedented professional time of 2 min. 39 sec. Prince received an ovation lasting several minutes on the conclusion of the race.

Five Mile Amateur Record Race—Gaskell (England), 1st. Records were lowered at intermediate distances throughout the race. Time, 14 min. 51 sec.

Breaking Records At Hartford.

The wheel meeting held Sept. 10, under the auspices of the Connecticut Bicycle Club, was an immense success, 174 uniformed riders paraded the streets. The races were held at Charter Oak Park and long before the hour of starting the spectators crowded the grounds to their utmost capacity. The day was beautiful and the track in perfect condition. Appended is the result of the principal events:

Two Mile Tricycle Race—E. P. Burnham, (American) 1st; R. Chambers, (England), 2d. Burnham won right near the finish after a hard struggle. Time, 6m 32s. Best previous time, 7m 5 1/2s.

One Mile Race—S. Sellers, (England), 1st; Asa Dolph, (Ohio), 2d; Elliot Norton, 0; Cbes. Frazier, 0. From start to finish a race of intense excitement. Dolph dashed off with the lead. The first quarter was made 40 1/2s., and with Dolph still in the lead the half was reached in 1m 20s. At the three-quarter post Sellers by a most remarkable burst of speed assumed the lead and came down the stretch at a terrific pace, finishing the mile in the unprecedented time of 2m 39s. Dolph strained every nerve. The previous best time made in England was 2m 41 3/5s.

Five Mile Race—S. Sellers, (England), 1st; R. Chambers, (England), 2d; G. H. Illston, 3d; C. A. Smith, (America), C. A. Frazier, (America), 0; George Webber, 0.

Little racing was done till within half a mile from home, when Sellers again proved his superiority. Time, 15m 48s.

A Warning to Amateurs.

F. W. Gibson has written a letter to several papers concerning an article which appeared in the last issue of this paper. We would reply that we never published the statement that F. W. Gibson claimed the ten mile championship of the Pacific Coast. We simply stated the fact that the "getter up" of the Grand Athletic Tournament at Woodward's Gardens advertised F. W. Gibson as the amateur champion. It would have only been justice to the better riders of our city if Gibson had written to the papers denying the soft impeachment. It was nothing but the truth when we wrote that the time was slow. We are also aware that F. W. Gibson can do much better. Mr. Gibson is anxious that we arrange a match between himself and the gentlemen whom we stated could so easily defeat him. This is impracticable, inasmuch as Gibson by taking part in the Grand Athletic Tournament at Woodward's Gardens is no longer an amateur.

All racing amateurs should procure from Mr. Geo. D. Gideon, 17 North 7th St., Philadelphia, a copy of the Racing Rules of the L. A. W., and become thoroughly familiar therewith. Neglect to do so will not avail as an excuse as rule 21 provides that "ignorance of any of the foregoing (rules) will not be considered a valid excuse."

The Bay City wheelmen held their second run last Sunday. Fifteen riders under the command of Fred R. Cook proceeded to the Cliff House, thence down the Cliff House road through the Presidio Reservation to Fort Point, where the Club gave the ladies and officers of the Fort a specimen of bicycle drill which was thoroughly enjoyed by the spectators. To-morrow the Club will take the eight o'clock boat to Hayward's, when another delightful ride will be indulged in by the wheelmen. It is expected that the Club will appear in their new uniform of hotte green to-morrow evening for the first time.

The mile race for amateur wheelmen at the Connecticut Bicycle Meeting for riders who have never beaten 3m 20s developed a fast rider in C. H. Parsons, of Springfield, who made the mile in 2m 49 1/2s.

13,000 people were present at the International Bicycle meeting, held at Sydney, Australia, on the 2d of August. The times made in the different competitions were slow, owing to the dampness of the track.

On Saturday evening, Aug. 30th, the twenty-five mile professional championship race was run off at the Aylestone Grounds, Leicester. Battensbury won, with Lees second and Wood third. Time, 1h. 20m. 39 1/5s.

It is said that a resident of Myerstown, Penn., has received \$25,000 for a patent of a new style of bicycle which, it is claimed, will work a revolution in the present manufacture of the bicycle.

Five riders of the "silent steed" were out for a run last Sunday week at Sacramento, under the command of Captain Flint.

Lewis A. Miller, of Meridin, Conn., entered for the 3m 20s class at the Springfield tournament, made the mile in 2m 43 2/5s.

CRICKET.

An Extraordinary Game.

The match played last Saturday resulted in a great surprise. The Bachelors, under the captaincy of Purdy, were the first to occupy the debatable ground, and the score book showed 63 runs at the fall of the tenth wicket. We were very much pleased to see Bristowe, the top scorer, with 20. Purdy compiled 10, including a drive out of the grounds, off Waterman, for 5. Goewey carried out his hat with seven runs to his name—a very creditable showing. The Benedicts, with W. G. Harriett as Captain, now essayed, but the whole team were rapidly disposed by Purdy and Miller, for the insignificant total of four runs. The howling of Purdy and Miller was excellent, particularly the latter, who secured no less than seven wickets. Neither side was very representative; nevertheless, there were a large number of our best cricketers on both sides, and the utter collapse of the Benedicts is altogether inexplicable. The score:

Table with columns BENEDICTS and BACHELORS, listing players and their scores.

This afternoon the Merions and Occidents once again try conclusions.

ATHLETICS.

Great Swimming Feat.

The excellent feat of swimming from Southsea to Ryde and back was successfully accomplished by Mr. Horace Davenport, ex-amateur long distance and mile champion of England. Mr. Davenport a few days ago swam across the Solent to Ryde, a feat attempted by Captain Matthew Webb and others, but previously only performed by George White, ex-senior champion, and Captain Portsmouth, swimming club. Davenport dived into the water at East Southsea, at thirty-five minutes past eight, reaching Ryde in good condition. Here he partook some of refreshments, in the water, and made a fresh start to Southsea. There he landed at two, (5h. 24m. from the start). Davenport's only complaint was that his eyes were sore through the sunbline. The feat is all the more creditable as there was a nasty, choppy sea, and a stiff breeze from the southeast. Davenport was piloted by F. Hape, of Portsmouth, and was accompanied by representatives of the Press and others in a boat.

The following interesting items concerning the approaching championship games, are culled from the New York World:

The New York Athletic Club will hold its full meeting Oct. 4th, at Mott Haven.—The American A. C. will make a bold bid for a place in the mile walk with Austin.—"Josh" Hart, of the M. A. C., is training for the seven-mile walk on the 27th inst.—Jack White and Sam Derickson have pulled on the spiked shoes again, and will face the starter on the 27th.—"Arty" Waldron's left leg is still "bad," and it is probable that he will not start in the championship sprints.—With Delancy out of the five-mile run, a good race should ensue between Skillman, of the Manhattan, and "Tom" Noonan.—The Williamsburg Athletic Club offers the use of its track, free of charge, to athletes training for the championship meeting.—J. E. Sullivan, of the Pastime A. C., will probably be the only athlete from this city who will compete at the Canadian Championship Meeting.—Oscar Bodelsen, of the M. A. C., who recently broke his arm while practicing over hurdles, will probably be enabled to start in the championship meeting.—The Canadian Athletic Championship Meeting will be held on the same day as that of the N. A. A., Sept. 27th. They are evidently not anxious for another incursion of New York athletes.—The championship meeting will not have any competitors from California, Canada or England, as the men from those places who competed on former occasions were out time and money, and went home generally defeated.

Exhibition Run to Beat the American 100-yard Record.—H. M. Johnson, formerly a New York amateur, but for several years a professional sprinter, made two attempts, running the distance the first time in 10 seconds, thus equaling the accepted American record, and at the next trial he did it in 10 1/5 seconds. Johnson claims to have twice previously run the distance in less than 10 seconds, but the performance was not in either case properly authenticated. The attempt could hardly have been made under conditions more favorable than on Saturday, and Johnson's failure they would seem to go far toward disproving the correctness of former alleged achievements at a distance and under less experienced management.—N. Y. Clipper.

A new lawn tennis club has been organized, with the following officers: President, Mrs. Joseph Austin; Treasurer, Raoul Martinez; Secretary, H. Gaylord Wilford; Executive Committee, Sidney M. Smith, Mountford S. Wilson and Chauncey R. Winslow. Two macadamized courts have been prepared on the lot at the corner of Van Ness avenue and Sutter street.

A large assemblage, composed in great part of ladies, witnessed the Fall games of the Staten Island Athletic Club. The track was in excellent condition and the performances were generally good. L. E. Myers, amateur, and H. M. Johnson, professional, each ran 100 yards in 10 seconds. C. M. Smith won the mile in 4m 45 1/5s. Malcolm Ford with 6 yards start beat Myers in the 220 yards in 23 1/5s.

The Sydney Mail says that in the South coast of New South Wales there is a long distance runner named Backhouse, who, it is said, can easily do eleven miles within the hour. He can leave his trade and do ten miles easily. There is a ton of money in Bega and Cuddeledo to back him against any long distance man that cares to visit those parts.

The Normal Athletic Association, of San Jose, met last week and elected the following officers, after forming with twenty-seven charter members: President, J. V. Van Eaton; Vice-President, Charles Adams; Captain of B. B. C., N. W. Locke; Secretary, Bert Babcock; Treasurer, H. B. Hunsaker; Sergeant-at-Arms, W. O. Peck.

Geo. Smith, the celebrated sprinter, of Pittsburg, has issued a challenge for a foot race of from 125 to 150 yards, for \$500 a side, to H. M. Johnson, Fred Rogers, M. K. Kittleman, Weinberger and Boyd, the world-champion, or Gibson, of England, or any other man living, harring Hutchins, of Putney, Eng.

"E. M. Johnston, the famous Caledonian athlete of the E. at, says, "I am forty-two years old and have probably seen my best days and I will probably retire at the end of this season." As a jumper, runner, and wrestler, Johnson has earned much money.

All the medals and trophies will be presented to the winners at the entertainment of the Merion Club, on Friday night, Oct. 17th, at Saratoga Hall.

R. B. Jones and Barney Benjamin will this afternoon jump off the tie made in the high jump at the Stockton Games of the Merion Club.

R. Gibson and A. B. Tenent will represent the Merion Club at the meeting of Athletic clubs on the 10th of next month.

Joe Gorevan, the exchampion mile runner who met with such a serious accident, is rapidly convalescing.

At Honolulu, on Sept. 1st, Jacob Sims defeated J. in a 100-yard run for a purse of \$60.

THE RIFLE.

BIOGRAPHICAL SKETCHES.

P. A. Giannini.

Among those who have taken a deep personal interest in the rifle shooting of this State, and exerted himself to advance it to its present high state of excellence, few have been more earnest and liberal than the subject of this sketch, P. A. Giannini, President of the San Francisco Swiss Rifle Club.

Mr. Giannini, as we have intimated, was born in Switzerland, in 1829, which makes him 55 years of age, but he is a well-preserved man, and still capable, as our weekly rifle reports show, of making bull's-eyes with all the sharpshooters of his generation, and with many of the younger ones growing up among us to-day.

The Inter-State Match.

After all the heart-burnings, squabblings, and doubts it is pleasant to record that a team will go to Nevada, and that the expenses are ensured beyond question. The conduct of Colonels Smedburg, Tobin, Dickenson, and Sontag, in coming to the relief in money matters, is much commended and certainly does them much credit.

work by six of the team, the others not having their rifles as they did not expect to shoot. The best scores, ten shots each, with a possible 100 were:

Table with 3 columns: Name, 200 yds., 500 yds., Total. Includes names like Kuhl, Waltham, Johnson, Laufenburg, Carson, Cummings.

If the shooting in the match averages as good a percentage we shall not be far behind. Of course the boys go with our very best wishes for their success.

A Private Shoot.

On the 20th of this month Col. Beaver, Fred Kuhls, Lieut. Mangels, Sergt. Howard Carr, and A. C. Smith had a private practice, which on account of the high scores made by different rifles, we have thought proper to publish in detail.

Table with 3 columns: Name, Rifle, Score. Includes names like Col. Beaver, Fred A. Kuhls, H. C. Smith, Lieut. H. J. Mangels, Sergt. Howard Carr, H. J. Mangels, Fred A. Kuhls, H. J. Mangels.

Speaking of the great score of 95 out of a possible 100, we were under the impression that it stood unrivaled as a record. On inquiry during the week, we find it was not. In a competition shoot for a place in the Nevada team, Mr. Cowing made 97 and took the champion prize, a \$30 pair of sleeve buttons.

At Schuetzen Park.

On Sunday last the Eintracht Rifle Club had their regular monthly prize shoot at which the attendance, though fairly good, did not reach the usual average. We spoke, a week or two ago, about the wonderful improvement in the shooting of Mr. Klotz, a member who only recently took to rifle shooting in earnest.

Table with 2 columns: Name, Score. Includes names like Klotz, Kaufung, Streuber, Stamer, Gumbel, Schneider.

At Shell Mound.

On Sunday, Company C, S. F. Fusileers, Second Artillery, held their annual picnic and prize shoot. Both were a splendid success. The shooting at the target by the members, though good in some cases, was not generally up to expectation.

Table with 2 columns: Name, Score. Includes names like Fred Kuhls, Lieut. Mangels, C. Theisbach, E. P. Robertson, Capt. John Bruer.

During the recent encampment of the First Regiment, at Santa Rosa, the best score was made by Captain Townsend, on the afternoon of the 12th inst. The Captain had 5 shots at 200 yards and came within one of a full count, making 24 out of a possible 25.

Captain Townsend, of the First Infantry, is determined to have a match with Colonel Ranlett, of the Fifth. Ranlett has refused a money match, as that is contrary to his practice.

The California Schuetzen Club will hold its regular monthly prize shoot, at Schuetzen Park, to-morrow.

An Inter-County Match.

The rifle teams of Humboldt county have recently had an interesting match, which we should like to see more generally imitated. The scores promise well. In one shoot during the day Mr. Ferrier made 24 out of a possible 25.

Table with 2 columns: Name, Score. Includes names like Dave Ferrier, Wm. Crichton, J. T. Keleher, C. G. Taylor, W. H. Pratt.

Table with 2 columns: Name, Score. Includes names like P. Quinn, G. W. Smith, Wm. Roberts, Latherow, Chapin.

Table with 2 columns: Name, Score. Includes names like P. Fulmore, J. Roberts, Y. Gupfth, Dent, Dnnn.

Howard Carr.

This well-known rifleman has recently been doing some good shooting. On August 29th at Shell Mound he made the following score, 4 strings of 10 shots at 200 yards:

Table with 2 columns: Name, Score. Includes name Carr.

This on the average is 92 per cent.

Still Better.

On August 30th, next day he claims he made at the distance, 200 yards, the best shooting of his life, and it seems so. The bull's-eye was eight inches in diameter, and out of 50 shots 25 were bull's-eyes, the best being 3 1/4 inches from the centre.

Table with 2 columns: Name, Score. Includes name Carr.

This 226 out of a possible 250, though not equal by nine or ten points to Lieutenant Kellogg's record, is still fine shooting and requires a good man to beat it.

THE GUN.

The Game Law.

Table with 2 columns: Game Name, Season. Includes names like Quail, Partridge, Rail, Grouse, Doves, Male Deer, Female Deer, Spotted Fawn, Antelope, Elk, Salmon, Trout.

A Zephyr from the South.

EDITOR BREEDER AND SPORTSMAN:—As the time for the meeting of the State Sportsman's Convention approaches the interest increases and spreads into channels other than that of sportsmen. Even some of our old staid and grave seniors seem to have caught the inspiration and now regale us with the exploits of their sporting days, and while rebearing their happy experiences of the past, their eyes seem to rekindle with the fire of youth and for the time they live in the retrospect and are boys again.

Los Angeles, September 22d, 1884.

At Colma.

The Lincoln Gun Club held its last monthly medal shoot, at Colma, on Sunday, and to determine the final ownership of the trophies called forth a good attendance and a spirited competition. The club used clay pigeons, 15 birds each, 13 yards rise. All day the contest was very close on both

the men and the classes. In this case the second class made almost as good a record as the first, nine men out of fourteen in the former getting into double figures, to nine out of ten in the former. During the season no two men won the medals for the second time, until the fifth shoot, when that honor fell to Edler of the first and Christie of the second class. In the first class, on Sunday, Heino and Drinkhouse made clean scores, and in the shoot-off at three doubles victory fell to Drinkhouse, who again made a clean score. In the second class Christie and Cohen tied on 14 birds each, when Christie finally defeated Cohen. Mr. Edler takes first medal, Mr. Christie the second. Next season, if the Lincoln Club keeps together, we expect to see some grand records made. The score:

Table with 2 columns: Name and Score. Includes Heino, Drinkhouse, Edler, etc.

Table with 2 columns: Name and Score. Includes Christie, Cohen, Frisch, etc.

Table with 2 columns: Name and Score. Includes Drinkhouse, Heino, Cohen, etc.

At Sacramento.

The Foresters Gun Club met at Agricultural Park, on Sunday, and held their monthly shoot, but whether it will be the last of the season or not we are not informed. The attendance was better than the shooting. The score:

Table with 2 columns: Name and Score. Includes H. Gerber, Scroth, Zaver, etc.

The tie on 11 was shot off at double birds, Henry Gerber winning with a clean score.

The Pacific Sportsman's Club held a medal shoot at Sacramento on Sunday, with the following result:

Table with 2 columns: Name and Score. Includes Routier, Pedler, Naughton, etc.

In shooting off the ties Pedler won the gold medal with a clean score at four birds, Bronner the second medal.

Notes.

Last week we gave the last shoot of the California Wing Club at San Bruno, but from not having the figures at hand we were compelled to omit the friendly but interesting match between our champions, Messrs. Robinson and Fay, which closed the day's sport. They commenced at twelve birds each and ended thus:

Table with 2 columns: Name and Score. Includes Robinson, Fay.

Which gave Robinson the victory. In this match Robinson shot at 34 birds altogether, and killed 32; Fay at 34 and killed 31. The birds in this match were better than those used in the earlier part of the day, which makes the record better. Why we return to this matter particularly is to show the performance of the champions during the entire day. By footing the total number shot at by these two gentlemen we find the result as follows:

Table with 2 columns: Name and Score. Includes Birds shot at, Robinson killed, Fay killed.

We had no intention of violating the secrecy of private correspondence when we mentioned that, owing to the excellence of his new gun, Mr. Henry Bassford felt like giving Mr. Fay a trial. It may have only been said in fun by Mr. Bassford, but we hope there is some earnestness, for we should of all things like to see a match between him and Mr. Fay. From what we learnt during the week, we think Mr. Fay would change his mind, and shoot a match with Mr. Bassford. We take it upon ourselves to say any proposition leading to such an event will be favorably received by Mr. Fay. It would be no mean honor to beat him, no disgrace to be beaten by him. We hope the gentlemen may come together.

The State Sportsman's Convention at Los Angeles, we think, will be well attended. Mr. A. L. Thiel, of Chico, will be one of the delegates from the Butte County Club. We are glad to find an increasing interest in the association itself. Six gentlemen of Vacaville, led no doubt in the good work by the Messrs. Bassford, have recently applied for admission as private individuals.

We wish to state such admissions are compatible with the laws of the Association, and we hope to see the Vacaville example largely followed. The State cannot do without the Association, and it is the duty of all true sportsmen to join at once as individuals, whether the clubs to which they belong seek admission or not.

A Great Improvement.

Happening at Oakland, during the week, we called as usual on the Messrs. Pierce and were astonished at the improvements recently made in their already magnificent store. Some thirty feet have been added to the rear of the main store, which will be devoted to an elegant office for themselves, and a fine, large, handsomely furnished club room for the members of the Alameda Sportsman's Club, or any members of the brotherhood who may happen to be in Oakland. On the south side of the office and leading from it, is a large yard securely walled round, which these liberal and enterprising young merchants intend partially to cover and convert into comfortable kennels for the dogs of all who may be out on an expedition and who may have to stay at Oakland over night. This consideration, liberality and foresight on the part of the Messrs. Pierce, we are sure will be only appreciated by the sportsmen of all sections, for it will be no slight convenience and comfort to those who may happen to lay over at Oakland for the night, to know their dogs are safely guarded and comfortably housed at the same time. We have so often spoken of the merits of these young men in terms of praise, that we hesitate to say all we desire of the present arrangement, lest our motives should be misinterpreted. Apart from their strict integrity in business, it is by such considerate acts and foresight for others that they have gained their present high positions as merchants so rapidly, and it is by such acts, for it is their nature to do them, that they will die, if their lives are spared a few years, among the richest men in Oakland.

The Sunday Capital says: "How would it do for that certain poacher who was so anxious last year to 'cinch' some Sacramento sportsmen, to set about capturing some of the parties from his town who are now killing quails in all directions about Rocklin? Perhaps he is himself at his old game, however."

We guess Brother White drew an arrow that shot that went straight home to its mark. It is, however, what is the Roseville Club, so much praised for its energy, thinking about to let such crimes exist around them? Have the club nothing else to do, no other obligations to discharge, than to secure convenient preserves for their season's shooting?

Again the same paper says: "Every year we hear unpleasant rumors of the poaching proclivities of a certain well-known market hunter whose headquarters are at Georgetown, or Greenwood, El Dorado county. We are told that he kills deer at any and all seasons, and that in the last close season he and a comrade killed seventy on one man's ranch. It is not the first time this party has been complained of, and he had better look a little on it."

For four years we have been exposing this vagabond crowd of Georgetown thieves by name though they do call themselves Colonels, Majors and Captains and the devil knows what. The vicinity of Georgetown is the best in the State for poaching and these unprincipled, dirty fellows have for years poached it for all it is worth. Before another season rolls round, however, they will be in the hands of the State Sportsmen's Association, and then go to the County Goal, where they belong.

Good Advice.

A writer in one of the New York papers, speaking of the quail prospects for the season speaks thus:

"The birds paired early, and scarcely had the dandelion flecked the newly-made green, when the joyous, guttural chuckle of the mother and the peep! peep! of the nervous little 'Bob Whites' was heard the meadows over far and wide. And so they thrived and grew fat and plump, and the sportsman's heart has been light by the realization of grand sport, a well filled bag and juicy quail, browned to the nicety of a Christmas pudding, steaming with all its delicious aromatic goodness."

"Fellow-sportsmen, be thoughtful, be moderate, be humane, for that time, proscribed by 'Frank Forrester' and 'J. Cypress, Jr.', is fast approaching when the finding of a quail in its native covert will be a novelty classed among the 'rare aves, now supposed to be extinct.'"

The concluding paragraph is all righteous talk. The quail season is now also upon ourselves, and we say to our sportsmen be thoughtful, be moderate, be humane. Simply remember you are only trustees of the public game, not owners in fee simply, generous as your government is to you, and that unnecessary slaughter, therefore, is a stain on your manhood. Remember your fellow-citizens have a claim on the public game, as well as you, and then, if you are not a brute by nature, you will be moderate, thoughtful and humane, whatever you may be hunting.

Keeping It Up.

A Rochester, N. Y., correspondent of the Forest and Stream furnishes this account of a singular shooting match: "Of the many remarkable and interesting shooting matches that are recorded in your pages, there can be but few, if any, surpassing in some of its features one that took place in this city some days ago. The contestants were James Palmer and George W. Crouch, Jr., who sustain the relations of grandfather and grandson. The match was shot on Mr. Palmer's eighty-eighth birthday, and his score was six clay pigeons out of ten. The shoot took place in the evening, after the parties had hunted a woodcock cover in the vicinity of Mr. Palmer's residence. Among the spectators at the contest were the son, and grandson and great-grandson of the hale old sportsman, who still enjoys a day in the brush with as much zest as do younger men. In the above contest, which Mr. Palmer lost by two birds, one of his shots was challenged, and he broke another bird, and then had the first one picked up, when it, too, was found fractured."

Very Good.

The citizens of Bloomfield, Sonoma Co., have subscribed \$100 towards a two days' shooting tournament, to be held there about the middle of October next. The tournament will be under the able supervision of Mr. John Burnett, of Bloomfield, a well-known and able man at the trap, and will be duly advertised.

Mr. J. K. Orr has made up his party for the opening day of the quail season. It will consist of Messrs Ewing, Babcock, Butler, McShane and himself. These are all good men and true, who will not abate the privileges they enjoy. They will leave for Bear Valley on the 30th inst.

There is no chance of a return match this season between Messrs. Fay and Pearson.

The Wing Club.

The California Wing Club held its regular weekly meeting last week, C. Robinson presiding and S. E. Knowles, Secretary. At the conclusion of the regular business the following gentlemen were elected members of the Club: Dr. Christensen, E. C. Graff and F. Cassaway. C. Robinson and Ed. Fay were elected delegates to the Sportsmen's Convention, at Los Angeles.

"Captain Bob," writes a correspondent to the American Field from Tinscarora, Nev., and four or five other Indians went over into Bruneau valley, and in a few days killed fifty-six deer. Their principal object was the skin, most of the meat being left for the coyotes. Such slaughter should be put a stop to in some manner. A waste of so much food for an inch little gain is a crime against the country at large. These same Indians, very likely, will be crying for food before Spring.

Who is the more to blame in this matter, the Indian who commits the shameful slaughter, or the white man who allows it? For our part if these Indians do starve we shall have no pity for them. Willful waste will make woful want.

M. Coleman, of Virginia City, was arrested at Washoe Lake yesterday, for violating the game law. Two ducks were found in his possession. The Carson Sportsman's Club will see that he is fully prosecuted. The statutes provide \$25 as the least fine that can be imposed for violating the game law.—Carson Appeal, September 1st.

It is consoling anyhow that other legislatures are not composed of the selfish, short-sighted fools that at times compose our legislature.

"In eleven days a Napa boy captured 5,943 squirrels. The scalp bounty amounted to \$27 a day. This frightened the Supervisors and they proceeded to repeal that scalp ordinance without a dissenting voice." If it had been the San Francisco Supervisors who took such mean action we should not have been surprised. We are afraid that boy will turn out a poacher.

A local paper says: Game of all kinds, except bear, seem to be on the increase in the Santa Cruz mountains. Deer are being killed in considerable numbers. A hunter living near the summit has killed seventeen already this season. Quail, in consequence of the destruction of coyotes, are getting more numerous every year.

An English breeder of rabbits reports that he bred a lop-eared rabbit which, when killed at eighteen months of age, weighed twenty-three pounds. We are surprised these rabbits are not more extensively used. Apart from the great weight they reach they are better than any other rabbits for the table.

The Vallejo Chronicle says that a party of Vallejo sportsmen visited the Petalums flats Sunday and bagged 160 plover and eight ducks. A few ducks are reported to have been killed in the tule south of Napa, but as yet the number of ducks in this vicinity is small.

Grouse and deer are reported plentiful in and about Victoria, B. C. But to get them in perfection we always found Leech river, about twelve miles from the city, the best place for both. The blue grouse abounds there.

Quails are reported as plentiful throughout the foothills, and sportsmen who delight in shooting that kind of game are anticipating rare sport after the first rains. Until it does rain there won't be much pleasure in hunting quails.

Geo. Routier publishes a challenge in Sacramento to Jas. Parrott, to shoot a match at live pigeons, single or double, for from \$100 to \$300 a side, the contest to take place at any time from three to thirty days from date.

The O'Neill Gun Club have elected the following officers for the ensuing season: L. L. Huntley, President; C. A. Merrill, vice-president and treasurer; J. P. Spooner, secretary.

Preparations are rapidly and fully made for the coming duck season. With other things the duck hunter is already on the marshes.

The Financial Exhibit.

The following are the figures of the Treasurer of the State Agricultural Society of the receipts for admission during the fair of 1884. The pavilion was opened on Monday the 8th, three days before exercises began at the park.

Table with 3 columns: Day, Park, Pavilion. Includes First week, Second week, and Grand total for twelve days.

During the State Fair H. S. Hogboom sold at auction, through Killip & Co., two daughters of Millmau's Bell-founder, Sweet Home, 2304, and Walla Walla Maid, 2355. They were both purchased by John Mackey for Rancho del Paso, prices being respectively \$760 and \$600.

Harry Wilkos and Westmont made the fastest two heats ever recorded at Hampden Park. Harry Wilkos trotted a mile in 2:15 which was equaled by St. Julien in 1880. Westmont made the first mile in the free-for-all pacing race in 2:14.

At Sheepshead Bay, on the 16th, Pearl Jennings ran the fastest mile of the year, 1:40. Her weight was 105 pounds but she carried 106, and the fractions of time were, quarter 25, half, 49, three-quarters, 1:14.

The Charles A. Vogeler Company, of San Francisco, received a special award from the Board of Directors of the Agricultural Society of a silver medal for St. Jacob's

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## Editorial Correspondence.

[NOTE.— The following observations were intended for last week's issue, but failed to reach us in time.]

SACRAMENTO, Sept. 18th, 1884.

It has been out of the question for me to do more than write reports of the races, and then the scribbling is limited to the actual time the horses were engaged. There are so many men and horses to see, so many friends to talk with about old and new events, that writing was out of the question. Then, too, Antevolo had to be looked after. The injury to his foot at Oakland was supplemented with about as bad a case of cracked heels as I ever saw. Trotting in the Occident Cup aggravated the difficulty, and in the second race it appeared cruel to start him. But as hereafter the whole history of his training will be given, and the result of different experiments copied from the daily journal, it is sufficient to state that the metal on all of his feet only weighed nine ounces, and the tips were worn away so much to time of the trotting that it is safe to assert that there was less than half a pound.

The parades have been a grand feature of the fair. Not so many thoroughbreds as at some former exhibitions, and trotters and roadsters, perhaps lacking in numbers, though many animals of great excellence in both of these departments. Carriage and draft horses were in full force, especially those for heavy draft. Clydesdales, Normans, Shire horses and some mingled blood. Some idea of the number on exhibition can be obtained from the fact that when the head of the column had reached the seven furlong pole the rear was opposite the judges' stand, and to make room for the cattle they had to pressed together in ranks of four or more abreast.

Nothing like the display of cattle has ever been seen at a California fair, and it is doubtful if any State exhibition in the East can vie with this in point of variety of race and individual excellence. The "lordly Durham" are out in full force, the "white-faced" Herefords are here to contend for a first position, Holsteins, with their striking combination of black and white, Ayrshires, which attract crowds of dairymen, handsome Devons, so uniform in color, and of such high finish that anyone with a particle of esthetic taste cannot fail to admire their beauty of form and rich color. There is a grand turnout of Jerseys of the most fashionable blood, and which would sell for fabulous sums in an Eastern market and with escutcheons that would delight a Guenon. The Polled Angus compel admiration from all who see them. Their queer appearance fastens the eyes of those who have never seen them before, while practical men see advantage in them and their part-bred progeny which will add greatly to their value.

Sheep, swine, Angora goats and poultry are fully up to the standard of former years, and the judges of these classes had an arduous task to award premiums. In many instances about the only way to get out of the

difficulty is to toss up which shall have the first, and then, perhaps, there may be others equally as well entitled to the preference.

I do not intend at present to add to the reports of races, or further criticize what was reprehensible until there is plenty of time to treat the points fully. As was predicted in the *Breeder and Sportsman*, the racing rules have proved utterly defective for the government of races, especially those which relate to starting. With even the small fields which have started, there has been trouble; had there been as many horses as in former years, the racing could not have been brought to a conclusion. In a field of seven, to have only three run the course, is somewhat unusual; when eight make a false start, and run the whole course, one and an eighth miles, and one is left, is another singular occurrence. That the ruling in the Beaconsfield-Jim Douglas race was not in accordance with the jumbled Code, is also beyond question, and this will be clearly shown in the future.

It is pleasant, indeed, to turn to the brighter side. The track, beyond question, is as good as there is in the United States. For racing and trotting, I do not think it can be equal. Thoroughly watered—as has been the case—it "harrows up" as nicely as can be desired, giving a soft coating which cannot hurt the feet of race horses, and yet so firm underneath as to give a good hold. Less water and the harrow, gauged to a shallower cut, gives a velvety surface, coaxing the horses to an extended stride, while the friction of the wheels is reduced to as little as can be on a surface which is not smooth and hard. The Superintendent of the Park is well worthy of the high encomiums which come from every quarter, as he has supplemented the engineer's work with constant attention, in person, and not an effort spared to keep it in perfect order.

Taking the park as a whole it is beyond unfavorable criticism; in detail, there is little to find fault with. The most reprehensible thing is the uncouth structure which is termed the judges' stand. It is scarcely possible to conceive a worse specimen for the purpose intended—a three-story concern, the lower floor crowded with boys. The second is for timers, and a huge black-board on the side next the course effectually shuts out the view from the reporters' stand of all that is occurring near the quarter pole. On the upper story are perched the judges, elevated so far above the level of the track that a very poor view of the horses is obtained. As it stands inside of the training track for race horses, at such a distance from the stands that even the stentorian voice of Mr. La Rue cannot be heard distinctly, and the others who have essayed speaking from it might just as well confine themselves to pautomine, as scarcely a word could be made out. Apart from the obstruction of view by the judges' stand, that for reporters could not be improved, as it is in a position from which all the rest of the course is distinctly seen.

If every page of the *Breeder and Sportsman* were filled for a month with a description of the pavilion and contents, the space would prove inadequate to do it justice. Of all the buildings I ever saw it can be awarded the preference. Commodious and complete, architecturally beautiful and combining all that the most prosy utilitarian could desire, it is an honor to the State, a structure which every citizen can take an honest pride in. One Department alone will fully recoup California for every cent it has cost. This one exhibit showing the resources of a few counties is a more effective argument in substantiating the wonderful fertility of soil and advantages of climate than volumes of printed matter, and as that portion which will bear transportation will be sent to the New Orleans exhibition it cannot fail to attract the eyes of thousands to this State, as a country superior to any other for natural advantages.

Ponoma Grange, Sonoma county, was the originator of the movement. The exhibits of that and Butte county are, simply stated, astonishing. Such a display of cereals, vegetables, fruits, wines, etc., is beyond what all the States on the other side of the mountains can make. And men who have lived in California since the days of the Argonauts were astonished at what they saw. This came from seeing the collection, and familiar as they were with such of the portions of the exhibit, segregation spoiled the effect, which could only be brought out fully by judicious arrangement.

There were very many handsome exhibits by firms and individuals. Scarcely anything lacking in mechanics or industries, and an art display which proves that years are not necessary to reach a high standard, and a country which was almost unknown a half a century ago can

now challenge the oldest commonwealths of the Union, and not dread competition.

But the "calling out" bell has sounded, and this brief communication will have to be brought to a close.

J. C. S.

## A Hint to Horse Buyers.

Readers have noticed in our columns the announcements of Palo Alto Stock Farm of horses for sale, both thoroughbred and trotting-bred, but we question if many who have scanned those advertisements fully realized the opportunities they offer for the purchase of high class animals. The breeding stock at the farm is all of the choicest description. Not a stallion or brood mare is quartered on the broad acres of Palo Alto or Matadero but what came with the highest credentials as to blood, form and capacity. It was never any part of Gov. Stanford's plans to breed for the market. He purchased Palo Alto for a country seat and from an innate love of the following established there an equine experiment station, whose lessons of success and failure should be in effect a public educator. He brought to the work his wealth, which placed all facilities within his reach, a judgement that has since been a thousand times justified and an enthusiastic spirit, which, gathering volume from its own success, has led him on further and further from year to year. The consequence has been that the stock has increased in numbers until the limit of possible accommodations at the farm has been reached and more than reached. When the inconvenience was first felt at Palo Alto, Matadero was purchased from Mr. Coutts. With it came some thoroughbreds, a few trotters and goodly herds of Holstein and Ayrshire cattle. The cattle were shipped off to Tehama county and Matadero was made the headquarters of the thoroughbred division. This lightened the pressure somewhat, but the relief was only temporary. Some idea may be had of the demand for space at the farm when we consider that in the two departments three hundred and ten mares were bred this year. A regiment of youngsters will thus be added to the equine army next Spring. The over-population of the paddocks not only interferes with the proper care and education of the horses, but the establishment becomes cumbersome and its size tends to obstruct the system of procedure which Governor Stanford desires to maintain there. There are accommodations on the farms for six hundred head, surely quite enough for any private breeding farm or training stable and it has been decided to keep the stock down to that number by sales. There is an impression abroad that there is some sort of exclusiveness at Palo Alto. Some people believe or affect to believe that because Governor Stanford has not conducted the farm as a business operation, and is not compelled by any financial reasons to sell his stock, the prices are "fancy" or higher than would be asked by a breeder who was regularly in the trade. There is also an impression that no horse would be sold from the place unless wanting in capacity. These peculiar notions have no foundation and are very far from the fact. There is no stallion in the stable from Electioneer down whose service may not be had by any breeder for a stated price. With the exception of a few stallions and brood mares there is no animal on the ranch, however phenomenal or famous, but what can be bought for as reasonable a figure as the same class would be rated on any breeding farm in the world. As to the quality of the horses sold, it may be fairly inferred from the performances of Forest King, Jou Jou, and Harry Peyton in the circuit this year. They have all been winners in good company and were purchased from Palo Alto at prices that many horsemen would call nominal. A few weeks ago note was made in these columns of the purchase of four head of thoroughbreds by M. de Gingue, a French gentleman, residing in the Dutch Indies. When they reached Hong Kong they were greatly admired, and M. de Gingue was offered \$10,000 for the lot. He was satisfied with his purchase however, and declined the offer, although it was more than three times what the horses cost him at Palo Alto. The thoroughbreds at the farm are the get of Monday, Wildidle, Shannon and Flood, from choice mares. In the trotting division the same opportunities offer. There are numbers of geldings, three, four and five-year-olds, the get of Electioneer, Gen. Benton, Mohawk Chief and Don Victor, that would grace any private gentleman's stable as roadsters or road teams. They are high bred, represent sires and dams that cost small fortunes, but the price list is not made up from that standpoint. They are rated according to proven quality and prevailing prices in the general market. The very absence of any speculative element in the business makes moderation possible, and the necessity of reducing the surplus stock makes elasticity in prices good policy. As a depot of supply for liverymen and road drivers,

there is nothing in the whole length and breadth of the country that approaches Palo Alto. There are also at the ranch trotters for sale that would be an acquisition to almost any racing establishment. They may not all come up to the Palo Alto standard. Where yearlings show a 40-gait, two-year-olds trot better than 2:30, three-year-olds drop into the teens, and still the word is "a little faster," it is not strange that some fall behind. Their blood is of the best, but they fail to secure admission to the inner circle. Grand, good horses many of them are, and any where else but at Palo Alto they would be regarded as treasures. But where there are so many Imperial Princes, Dukes and Earls are a drug. They are sold for less than their real value, as their room is held to be more desirable than their company. We have written somewhat at length on this subject because we dislike to see so much valuable material go to waste, as it will if these unused horses are turned out on the plains at Vina. They will live away their lives in luxurious idleness, when they might do the racing and breeding interests of the country great service if permitted. We hope to see the blood of the horses of Palo Alto, like the fame of their achievements, radiate to the uttermost parts of the earth.

The annual address delivered at the late State Fair by Mr. L. J. Rose, of Sunny Slope, was a notable exception to the commonality of such efforts. From the circumstances of time and place, it would be expected to be in the nature of an oration, but Mr. Rose avoided all rhetorical display, and from the opening to the close was intensely practical. He is a successful wine grower of large experience, whose intelligent and exhaustive experiments have brought him to firm ground in every branch of his business. The address was constructed of proven facts and suggestions based thereon, and for the value of its matter and directness of its manner, Mr. Rose's essay has no equal in the literature of the grape-growing industry. The opening address of President Finigan, though more general in character, was of the utilitarian stamp, and filled with thoughts and suggestions that are worthy of digestion by the agriculturists of the State.

The Fair at Stockton.

The exhibition of the San Joaquin Valley Association opened at Stockton, last Tuesday, with fine weather, and with an attendance fully up to the opening day of previous years.

The first race was running, for district 2-year-olds. The starters were Laura T., Joe Walker, Henrietta and Jack Frost, all by Joe Daniels. There was an increased interest taken in the performance of the youngsters, consequent on their being owned in the neighborhood. At the fourth trial a very good start was given, Laura T. having the inside, and making the running with Henrietta next, and in this position they passed the quarter-pole in 27 1/2 seconds. At the half-mile in 54 seconds, Laura T. had a lead of two lengths, Henrietta still second, but rounding the turn Joe Walker moved up, and he and Laura T. had a close fight all the way down the stretch. They were even forty yards from home, and ran head and head until the last stride, when Joe Walker got his nose in front, winning by a short head in 1:49 1/2. Jack Frost was third, and Henrietta last.

STOCKTON, Sept. 23d.—Running; purse \$100; for district two-year-olds, one mile.
A. T. Lowery's cb c Joe Walker, by Joe Daniels, 81 lbs. 1
G. W. Trabern's cb f Laura T., by Joe Daniels, 78 lbs. 2
A. T. Lowery's cb c Jack Frost, by Joe Daniels, 81 lbs. 3
A. Miller's b f Henrietta, by Joe Daniels, 78 lbs. 4
Time, 1:49 1/2.

The second race was the 2:30 class, for a purse of \$1,000. There were six starters, the favorite being Guy Wilkes, who was so greatly fancied that he was barred in the auction pool. The next choice was the field, which brought \$80, and in it were Blanche and Colonel Hawkins. Le Grange brought \$55 and James H. \$32. Speculation was quite brisk, and, as the selling progressed, there were variations, the general average being as above. The positions awarded were Blanche first, Menlo second, James H. third, Guy Wilkes fourth, Le Grange fifth, Colonel Hawkins outside. First heat—There were nine false starts, but at the tenth score they were sent off very evenly, excepting that Blanche was three lengths behind. James H. was trotting fast and led past the quarter in 35 seconds, Le Grange second. The pace was still faster going down the backstretch, James H. still retaining the lead, Blanche moving into second place. The half mile was made in 1:09, but soon after James H. broke, and Blanche took the lead, Guy Wilkes in second place, several lengths behind. Blanche was tiring, and Wilkes overhauled her rapidly. He took the lead at the seven-eighths post, and Le Grange also went by, and Colonel Hawkins trotted into third position. Guy Wilkes came home on a jog in 2:25, with Le Grange second, Colonel Hawkins third, Blanche fourth, Menlo fifth, and James H. declared distanced.

After the heat pools sold, Le Grange \$25, field \$12. Second heat.—A start was effected at the third score, all being even excepting that Blanche was a trifle behind. Guy Wilkes and Le Grange went at a clipping pace around the first turn, Le Grange first at the quarter pole, in 35 1/2 seconds. At the half-mile pole Wilkes had the advantage of a length, the time there being 1:10 1/2, and after that the whole interest centred in which would get second place. Colonel Hawkins was closing on Le Grange, and although several lengths behind at the three-quarter pole, he overtook Le Grange when forty yards from home and carried him to a break, both going under the wire so nearly together that it was difficult to tell which had the advantage, outsiders generally giving the position to Colonel Hawkins. The judges thought otherwise, and placed Guy Wilkes first, Le Grange second, Colonel Hawkins third, Blanche fourth, and Menlo fifth. Time, 2:24 1/2.

Third heat.—Le Grange was in the lead when the flag fell, and was the first at the quarter in 36 seconds. Wilkes was in front at the half-mile post in 1:11, and, as in the preceding heat, the struggle was between Hawkins and Le Grange for second place. This resulted in favor of Hawkins, Le Grange third, Blanche fourth, and Menlo fifth. Time, 2:26.

Same day.—Trotting; purse, \$1,000; 2:30 class.
Guy Wilkes, b b, by Geo. Wilkes—Wm. Corbett. 1 2 1
Le Grange, blk g, by Sultan—L. J. Rose. 2 1 3
l. Hawkins, b g, by Echo—J. D. Young. 3 3 2
Blanche, b m, by Grey McClellan—Wm. Bihler. 4 4 4
Menlo, b s, by Nutwood—R. T. Carroll. 5 5 5
James H., b g. 6 6 6
Time, 2:25, 2:24 1/2, 2:26.

The third race was for district 4-year-olds. The starters were Jim Mulvenna, Ha Ha and Baby Mine. Mulvenna was largely the favorite in the pools, at one time bringing \$100 to \$42 on the others. First heat—The start was prolonged, Mulvenna being unable to get his stride as soon as the others, and there were twelve ineffectual scores before the word was given. Then Mulvenna had the worst of it, but he was so much faster that he took the lead in a hundred yards, was far in advance at the quarter in 37 seconds, still further in the lead at the half in 1:13, and jogged home in 2:30 1/2; Ha Ha second, Baby Mine third.

The second heat was so near a repetition of the first that all that is necessary is to state that they were off at the fifth score. Mulvenna was at the quarter in 36 1/2, at the half in 1:12 1/2, and home in 2:27 1/2; Ha Ha second, Baby Mine third.

The third heat brought dismay to the backers of Mulvenna. What few pools were sold after the second heat were at \$50 on Mulvenna to \$10 on both the others, and there were more supporters of the favorite than backers for the short one. A good start was given on the third score. Shortly after, Mulvenna broke, losing at least twenty lengths. Ha Ha passed the quarter in 37 1/2 seconds, Baby Mine close to him. Going down the backstretch Mulvenna was lapped on Baby Mine when he broke again. Ha Ha was at the half mile in 1:15 1/2. Again Mulvenna broke, and once again coming down the homestretch, Ha Ha winning by eighty yards in 2:31 1/2 over Mulvenna, who was fifty yards behind Baby Mine. The first pools sold were \$100 on the field to \$117 on Mulvenna, but it being learned that the favorite had lost a shoe, the betting ruled more in his favor.

The fourth heat was also disastrous to the fanciers of Mulvenna. While leading on the backstretch he broke, and Baby Mine was first at the half in 1:15. Mulvenna broke on the homestretch, Ha Ha and Baby Mine having a close fight for first position. The filly broke when within forty feet of the wire and galloped under it head and head with Ha Ha, who was awarded the heat. Time, 2:31 1/2.

The fifth heat decided the contest in favor of Ha Ha. Mulvenna broke on both stretches, Ha Ha winning in 2:34 1/2.

Same day.—Trotting; purse \$400; district four-year-old class.
Ha Ha, br s, by Nephew—Fred Arnold. 2 2 1 1 1
Jim Mulvenna, gr s, by Nutwood—Sargen Bros. 1 1 3 3 3
Baby Mine, blk m, by Nephew—P. W. Dudley. 3 3 2 2 2
Time, 2:30, 2:27 1/2, 2:31 1/2, 2:34 1/2.

The second day of the fair was marked by a fine weather as could be desired, and a very fair attendance for so early in the meeting. The stock parade in the morning was an attractive feature, the show of cattle especially being very praiseworthy.

In the afternoon there were three races. The first was a selling race for a purse of \$600, in which started Duke of Monday, Phillip S. and Certiorari. The Duke was the favorite in the pools bringing \$70 to \$37 on Phillip S. and \$6 on Certiorari. The race is easily described, as Phillip S. took the lead at the start, winning both heats, the time being 1:44 1/2, 1:43 1/2, the Duke, second in each.

Sept. 24.—Running; selling purse, \$600; mile heats.
P. Siebenthaler's b b Phillip S., by Leinster, dam Lily Simpson, 3 years, \$1,000, 103 lbs. 1
Rancho del Paso's b g Duke of Monday, by Monday, dam Demaree, aged, \$800, 108 lbs. 2
G. W. Trabern's cb g Certiorari, by Joe Daniels, dam by Norfolk, 4 years, \$500, 103 lbs. 3
Time, 1:44 1/2, 1:43 1/2.

The second race was for a purse of \$1,000, for 3-year-olds, with five starters—Tabbie Rosenbaum, Mount Vernon, Lelaps, Voucher and Antevolo. The positions were as above, but in the pools Antevolo was an immense favorite, so much so that it was evident that all the florid views were based on his victory over Voucher at Sacramento, when it was well known that since his return home to Stockton he had shown great improvement, so much so as to show a trial of 2:26 on Monday last.

In the first heat Lelaps took the lead and retained it for three-quarters of a mile, when he was passed by Antevolo, and Voucher came with a rush and also gave Lelaps the go-by. The race from there was as stubbornly a fought contest between Voucher and Antevolo as is often seen. There was not an inch of the homestretch that was not hotly contested. A few lengths from the score Voucher wobbled, made one lunge, and the colts went under the wire so closely together that it was difficult to tell which had won. The judges decided that Voucher had a few inches the best of it, though a majority of the spectators were of a contrary opinion. As the judges were in the best position to see, their judgment was doubtless correct. The time of the heat was 2:33 1/2, Lelaps third, Mount Vernon and Tabbie Rosenbaum distanced. In scoring for the next heat the sulky of Mt. Vernon broke down, and his driver, entangled in the reins, was drawn for at least fifty feet. It seemed that he would receive fatal injuries, but with rare presence of mind he managed to disentangle himself and escaped. The horse ran with the broken sulky, but was stopped on the backstretch.

In the second heat Antevolo took the lead and was several lengths ahead at the half-mile in 1:15, but from that point Voucher gained, and, though forced to trot on the extreme outside of the course, the inner being very soft, and Antevolo going inside on the turns, he gained inch by inch and had a clear lead of a length at the wire in 2:30 1/2; Lelaps third.

Before the start for the third heat Antevolo showed lame in the left hind ankle, and though he led to the half and struggled to the finish, Voucher had the best of him for that day, winning the heat which gave him the race in 2:32 1/2. The winner is a very promising colt, and with a year or two to fill out his large frame will surely prove one of the best.

Same day.—Trotting; purse, \$1,000; three-year-old class.
Voucher, b g, by Nephew, dam by Patchen Vernon—G. W. Trabern. 1 1 1
Antevolo, br s, by Electioneer—C. Simpson. 2 2 2
Le Grange, cb c, by Nutwood—H. C. Smith. 3 3 3
Tabbie Rosenbaum, br f, by Nutwood—D. S. Rosenbaum. dis
Ml. Vernon, bc, by Nutwood—J. A. McDonald. dis
Time, 2:33 1/2, 2:30 1/2, 2:32 1/2.

The third race was the 2:22 class for a purse of \$1,200, in which started Manon, Brigadier, Vanderlynn and Allen Roy. It was so generally conceded that Manon would win that she was left out of the pools, and the winning tickets were governed by which would obtain second place in the race. For this Brigadier was the favorite at long odds. This was soon decided, as Brigadier got second place in the first and second heats, which entitled him to second money unless one of the others could win a heat or make a dead heat. The most notable feature in the race was the first half mile of the third heat. In that Manon got a way very rapidly, reaching the quarter in 35 seconds, and with a rare flight of speed went down the backstretch in 32 1/2 seconds, so that the half mile was made in 1:07 1/2. From there she took it leisurely, though Vanderlynn and Brigadier had an animated brush for second place, Vanderlynn succeeding in getting it. The time of the three heats was 2:25, 2:22 1/2, 2:22 1/2. Owing to the inside of the track being harrowed deeply for the running, it was comparatively slow.

Same day.—Trotting; purse \$1,200; 2:22 class.
Manon, b m, by Nutwood—E. M. Hallton. 1 1 1
Brigadier, b s, by Happy Medium—J. B. McDonald. 2 2 3

Vanderlynn, b g, by George M. Patchen, Jr.—W. W. Slow. 3 3 2
Allen Roy, gr g, by Patchen Vernon—Jas. McCord. 4 4 4
Time, 2:25, 2:22 1/2, 2:22 1/2.

The third day of the fair was marked by a largely increased attendance over the preceding days, there being many carriages in the field and the stands were well filled. The first race on the programme was heats of a mile for district horses. The starters were Certiorari, Amanda L., Nealie and Birdcatcher, placed as above. Birdcatcher was the favorite in the pools, bringing \$60 to \$13 on Amanda L., and \$6 on the other two. The start was very good, Certiorari and Birdcatcher taking the lead around the turn, and were locked at the quarter, which was run in 25 1/2 seconds. From that point, Birdcatcher drew away from his competitor, and Amanda L. took second place. At the half in 52 seconds, she was close on the haunches of Birdcatcher, and all the way around the next semi-circle they were head to head. Both jockeys were driving down the stretch, Amanda L. getting the advantage, and winning by two lengths from Birdcatcher, the others dropping in with Certiorari in third place. Time, 1:46. After this heat, Amanda was the favorite at odds of \$60 to \$25, but the second heat was a stunner to those who were so sanguine. Amanda L. took the lead, closely preseed by Birdcatcher around the first turn. She drew away from him at the half-mile, which was run in 52 1/2 seconds, and still lead at the head of the homestretch. From that point Certiorari occupied a prominent position, winning the heat quite handily in 1:46 1/2. Under the rules only Amanda L. and Certiorari could start, the others not having won a heat or made a dead heat. The third heat was scarcely more than a gallop for Certiorari, who was the favorite at odds of \$100 to \$27. The quarter was made in 28 seconds, the half-mile in 55 and the mile in 1:50 1/2, Certiorari winning by several lengths.

Sept. 25th.—Running; purse \$800, for all ages; mile heats.
G. W. Trabern's cb g Certiorari, by Joe Daniels, dam by Norfolk, 4 years, 110 lbs. 3 1 1
Geo. Howson's br m Amanda L., by Shannon, dam Eva Ashton, 4 years, 110 lbs. 1 2 2
C. Dorsey's br h Birdcatcher, by Specter, dam by Young Melbourne, 3 years, 113 lbs. 2 3 ro.
Time, 1:46, 1:47 1/2, 1:50 1/2.

The next race was termed "The Novelty," being a dash of one and a half miles, for a purse of \$500; \$100 to the horse leading at the end of the half mile; \$100 to the leader at the end of a mile, and the balance to the winner. The starters were Beaconsfield, Dottie Dimple, Phillip S. and Bachelor, the positions awarded being in the above order. In the pools Beaconsfield brought \$100, Phillip S. \$75, the field \$42. Speculation was brisk and there was no cessation in the betting until the flag fell. Dottie Dimple cut out the work, though the pace was very slow, and she won the first half in 57 1/2 seconds; Beaconsfield being second, Phillip S. third, and Bachelor fourth, as they passed the stand the first time. The running was faster from thence, Beaconsfield reaching the mile-post first, in 1:50 1/2. There was a hot struggle between Beaconsfield and Phillip S. all the way down the homestretch. There were volumes of cheers, the partisans of each shouting themselves hoarse as one or the other seemed likely to become victorious. A short neck was all the difference as they ran under the wire, and that in favor of Phillip S. Time, 2:43.

Same Day.—Running; novelty purse, \$500; one mile and a half; \$100 to each half mile; balance to winner of last half.
P. Siebenthaler's b c Phillip S., by Leinster, dam Lily Simpson, 3 years, 106 lbs. 2 2 1
Hill & Gries' blk f Dottie Dimple, by Ben Wade, dam unknown, 4 years, 115 lbs. 1 3 4
E. J. Baldwin's b c Beaconsfield, by Hockhocking, dam Allen Alannah, 3 years, 106 lbs. 3 1 2
Hill & Gries' b c Bachelor, by Hockhocking, dam Maid of the Mist, 3 years, 106 lbs. 4 4 3
Time, 2:43, 1:50 1/2, 2:43.

After the running came the ladies' tournament, in which six convalesced, designated by numbers. There were the usual manœuvres, and very graceful they appeared galloping up and down the stretch. Miss Ida Rogers, of San Jose, was awarded the first prize. The business delayed the start of the 2:27 class until after four o'clock, the trotters having been on the track for a long time waiting the conclusion of the equestrianism. The reporters' quarters were so crowded with a noisy lot of men that it was impossible to see only glimpses of the race, and hearing among the babble of voices was out of question. The placing gave Adair, first, B. B., second, Sister, third, Tump Winston, fourth, Olivette, fifth, Scandianavin, sixth, and Blanche outside. Sister was a great favorite in the pools at first, bring \$100 to \$87 on all the others, the odds increasing to \$100 to \$40.

First heat—Sister had rather the best of the start, though Adair was trotting fast, securing the lead and was first all of the way around. The quarter was made in 36 seconds, the half in 1:10, the mile in 2:21 1/2, and the placing by the judges was as follows: Adair, Sister, B. B., Blanche, Olivette, Tump Winston, Scandianavin distanced. The ease in which Adair won the heat made a revulsion in the feelings of pool buyers. Sister, though still a favorite, was brought to \$150, Adair, \$100, field, \$15.

The start for the second heat was detrimental to Sister. Olivette and B. B. were two lengths in front of her, Adair also behind, but in a better position than Sister. Adair took the lead, and at the quarter, in 36 1/2 seconds, the order was Adair, B. B., Olivette, Sister, Blanche, Tump Winston. Going down the backstretch Sister took second place, but was two lengths behind Adair at the half mile in 1:11. Although she closed on the leader, it was beyond her capacity to beat him, and there was half a length between them at the score in 2:21; B. B. third, Olivette fourth, Blanche fifth, and Tump Winston last. The pools were sold: Adair \$110, Sister \$75, field \$5.

The third heat raised a commotion. Adair led, and at the quarter, in 36 1/2 seconds, he had a lead of two lengths, B. B. was second, but at the half, in 1:10 1/2, Sister was in second position, but far behind Adair. Yet when they came into the homestretch it seemed as though he had the race won, but unfortunately he made a break when within 200 yards of the score and lost so much ground that Sister won by a length, in 2:23 1/2; B. B. third, Olivette fourth, Blanche fifth, Tump Winston last. The pools were now \$60 on Adair and \$45 on Sister.

When the horses were called for the fourth heat it was growing dark. There were numerous scores and eight false starts, but at the ninth they were off. Sister was a little in the lead on the inside, B. B. even with her in the third position, Adair behind, but trotting faster than either. He closed on B. B. and the ankles came together with a crash, the spokes flying. Adair then ran into a mad gallop, and he was a long way back at the quarter pole, but he had caught his trot, rapidly outstretching the leaders and beating Sister handily in the contest home. The time was 2:24, the positions as in the preceding heats.

Same day.—Trotting; purse, \$1,000; 2:27 class.
Adair, b g, by Electioneer—E. M. Hallton. 1 1 2 1
Sister, b m, by Admiral—M. Sullivan. 2 2 1 2

Time, 2:24, 2:21, 2:23 1/2, 2:24.

### Leaves from the Diary of the Trainer of Maud S.

Although turf literature has teemed with information concerning this unequalled trotting mare, yet everything of interest that is novel is hailed with pleasure by students of the horse. For this reason I propose to present these leaves from the diary of her trainer, Mr. W. W. Bair.

The science of training the trotter has become quite complicated. Appliances have been devised for changing either his front or hind action, in both height and length of stride. Methods have been ascertained either to quicken his speed or to develop his endurance. The flighty have been made comparatively level-headed, and the slow scorer has been taught to turn and come to the starting-line with the speed of the wind. But just how much work and how much feed, just when to jog slowly and when to force the trotting horse up to his best efforts, in order to develop his greatest capacity for speed, is a fine art that the ordinary reader interested in horse lore, or even the intelligent roadite scarcely ever understands. Maud S. was a peculiar exception to the general average of swift horses. She was wilful, even to insubordination, when a colt. Mixed gaited, yet impatient of restraint, she would plunge along with mouth wide open and inflamed nostrils, shaking her resolute head in open rebellion, as if to plainly indicate that, like many other high-bred, high-strung trotters, her gift of speed was destined to be lost in her unmanageable ambition and irascibility of temperament; yet all these incongruous elements were combined with a quickness of intelligence that was almost human. Beyond a peradventure, if Maud S. had fallen in her colthood, in the hands of many trainers, who conquer the horses under their charge by the mere persistency of brute force, she would never have become queen of the turf, for in the battle for supremacy her temper would have been ruined and her movements forever destroyed. She needed patience, kindness, and gentleness, combined with a quiet determination to conquer her rebellious elements of character through daily-repeated appeals to her intelligence. She fortunately found such a trainer in Mr. Bair. In his hands she is obedient machinery. In the hands of equally skillful trainers, but with different methods of subduing insubordination—whether that trainer was field-marshal Dan Mace, or the great kindergarten colt-trainer of America, Mr. Carl Burr—she was not the victor, but in the bad sense that her gait, speed, and temper were all in imminent danger of being ruined.

In order to give your readers the benefit of the peculiar treatment Maud S. has received from Mr. Bair, I have solicited these leaves from his diary pertaining to her since she was sent to him by her erratic owner, late in the past Autumn.

Her shoes were removed, and she was allowed to run out on pleasant days till the last week in January of this year. On the 26th day of January her shoes were tacked on, and she was then jogged daily on the road in quite a substantial road cart. At no time was she speeded faster than a four-minute gait. This disciplined patience is very trying when we remember the many provocations of road horses rushing by her every afternoon, challenging her and her driver to a brush along the smooth, level stretches; but the challenge was never accepted, no matter how eagerly the mare seized the bit for the contest. Regularly she was fed four quarts of oats, three times a day, with a painful of water, and an abundance of hay always in her manger.

Mr. Bair believes this to be the best treatment. If the water and hay are always within reach, in a short time the most greedy eater and drinker will touch both daintily, though more often, during the day. Within a week such a horse will cease to distend his stomach with water, or to gorge himself with hay till he swells out and resembles an animated hay bag. From his experience, such treatment is positively economical, for the most voracious feeder will actually average less water and hay per day when thus abundantly supplied than when given to them only at stated intervals. This must prove, not only a decided comfort to the horse, for it is his nature to graze or feed a little at a time during both day and night, but by giving him employment in the stall, must be a preventive of weaving, cribbing, and eating up the boards of his manger, rubbing out his mane and tail, and kicking as if he would bring down his stable in ruins upon his own head, and the many other stable evils that are the prolific results of his stable idleness. With Maud S. this treatment has worked to perfection, for she has none of these evil habits incident to stabled horsehood.

On the 5th day of April began her exercising upon the track, preparatory to the restoration of her speed. As soon as she entered the gates of Chester Park she was full of ambition to speed up to her full capacity, but this ruinous practice was at once prohibited. All through the Winter she had received little acts of kindness, such as apples and generous lumps of sugar, from the hands of her considerate trainer, and she yielded all the more willingly to his restraint; yet, at intervals, she would attempt to "break away," as if she was determined to be ruled only by her own strong will. But this was not the method of her careful trainer. He knew that she must be made to be not only perfectly obedient, but that she must regard the race-track with the same complacency as she did the legion of victors that thronged her stall. Every day, on entering the race grounds, she was, therefore, compelled to walk half a mile. This completely broke her of her restless, hasty, rushing disposition to start at once up to her full speed as soon as she stepped upon the course. Only those who have had practical experience appreciate the benefit of this preliminary walk. It is the safest method to prevent pulling, which is one of the great obstacles to speed in many over-ambitious horses. Moreover, it is in many instances a decided cure for flightiness. It is recorded of the dam of the mighty Lexington that she was a first-class race-mare at home, but when she neared a public race course her excitement became so intense that she refused her feed and fretted herself into worthlessness. If she had been taught to walk several times every day around the course, in the presence of other horses taking their galloping exercise, and before the throngs of spectators, then, probably, like the equally ambitious Maud S., she would have become more composed, and have taken her work with the same complacency as she ate her daily rations. This preliminary walk argues patience, coolness, and a thoughtful purpose to gain perfect control over the horse which few young trainers practice. They nally mount the sulky and start on a brisk trot from the entrance gate of the driving park, and if the impetuosity of their horses is as great as their own, they pull, break, and run, till the remedy of punishing whips and the more savagely-cruel bits are resorted to in order to conquer their unruliness, which might be done more readily and effectually by the patient, preliminary walk.

This is the first great victory Mr. Bair gained over Maud S. In her colthood, and every time she has been returned

to him, he has been forced to win this same victory over her headstrong submission. It may seem trifling to the novice, but undoubtedly it is the initial secret of his success with her over all other trainers who have endeavored to speed her. Every time she has been returned to him he has been compelled to force her to walk, as if she was an unruly colt, for every time she came from other hands she was violently impatient of restraint and tried to rush away at her marvelous speed from the start. Indulgence in such flights of speed invariably resulted in her over-trotting herself, and in wild, uncontrollable breaks.

This season she was more obedient than ever before, simply because the walking discipline was more rigidly enforced. So complete was her obedience that she would not only walk the first half-mile on the course of her own free will, but would take it almost as an insult if forced from the start into a slow jog. The spectators and turf press have alike wondered at her composure amid the excitements of the race course, but they little dreamed of the many hours of patient discipline that her trainer had thus expended to bring her to that state when she could walk among other horses, or calmly survey the assembled multitude amidst the clanging of musical instruments, as if they were nothing more than the sighing of the idle winds. All the subsequent leaves of her trainer's diary attest the force of these observations. On the 5th day of April she was trotted three miles, the first mile in 3:05, the second mile in 2:51½, the third mile in 2:48. She could have beaten 2:30, but her muscles were comparatively relaxed, and the time required to condition a first-class trotter almost equals the patience that builds the pyramids. Many horse owners are impatient at the slow progress first-class trainers make with their horses. Even Mr. Vanderbilt became so importunate about Maud S., that in her late trial she was started before the perfect work of conditioning her was completed. If Mr. Bair had been permitted to wait till, in his own best judgment, she was thoroughly ready, he is satisfied that 2:09½ would not have been the measure of her record.

From April 5th to 9th she was slowly jogged on both track and road; and this method was kept up, as the following, taken from the diary of her trainer instructively shows: April 9th she was given two miles, the first mile in 3:10, the second mile in 2:42½. Then she was slowly jogged for three days. April 12th she was driven mile heats on the track, the first mile in 2:40½, the second mile in 2:35½. She was then carefully jogged for the four succeeding days. April 16th she was driven mile heats, the first mile was trotted in 2:46, the second mile in 2:37. Then she was subjected to jogging for six days. April 22d she was driven on the course, mile heats, the first mile in 2:39, the second mile in 2:34. Again she was returned to jogging for six days. April 28th she was given two miles, the first mile in 2:30½, the second mile in 2:27½. Then she was jogged not faster than a four-minute gait from start to finish, without even the indulgence of a brush of speed on the stretches of the course, for four days more. Then she was tested, as to wind and endurance, a trial of mile heats for three miles, but the miles were slower than she had been allowed to trot when the number of heats was less. May 2d the first mile was turned in 2:37, the second mile in 2:29, the third mile in 2:31. After this performance it was deemed advisable to give her from eight to twelve miles of jogging on both road and track for twelve days. Then she was returned to fast work on the track; but with cautious moderation. May 14th, mile heats, the first mile in 2:38, the second mile in 2:32. She was then made to jog for three days. May 17th, mile heats; the first mile in 2:40½, the second mile in 2:31. For four days the jogging was again resumed. May 21st, mile heats, the first mile in 2:30½, the second mile in 2:28.

Then came more jogging for four days. The slow work was always given in the mornings, after the sun had warmed and rarefied the atmosphere, while the speeding was done in the afternoons, about the time when races are trotted. This, too, may seem insignificant to inexperienced horsemen, but it is nevertheless an important item in the thoughtful methods of her able trainer. It served to fix in her mind the time for great speed, and in the horse, perhaps more than in man, the power of habit is simply irresistible. But we resume the diary: May 25th, she was trotted two miles, the first mile in 2:27, the second mile in 2:24½. This course closed her training at Chester Park. It was not deemed prudent for her to speed faster on a half-mile course, and her speed was now coming to her very rapidly. Mr. Bair was made sensible of this by her rushes of speed whenever, by the least inattention, the reins were for an instant slackened, and she watched him every step to seize upon these seconds of time when even the weasel-like vigilance of her trainer was napping.

She was then taken to Fleetwood Park, where her speed was indulged, June 10th, two miles. The first mile was finished in 2:21½, the second mile in 2:19½; but the jogging was not abandoned. For four days she slowly trotted around the course. June 14th, two miles, the first mile in 2:29, the second mile in 2:16½. Then four more days of careful jogging prepared her for the next trial, on June 18th. One mile in 2:18; June 20th, one mile in 2:13½. At last the fastest record of slow Fleetwood had been broken by the slowly-prepared Maud S. She was then removed to the more favorable course at Cleveland, where her work, with the purpose of eclipsing her greatest record, was begun in earnest. July 6th she was trotted a preparatory mile in 2:30, and repeated in 2:14½. Then she was jogged for four days, preparatory to a faster mile on July 10th. The first mile was trotted in 2:26½, the second mile in 2:12½. After three more days of slow work, she was again speeded, July 13th. The first mile was made in 2:25, the second mile in 2:15½. Then came four days of slow jogging, after which she was called upon for still greater exertions, July 17th, two miles, the first mile in 2:45, the second mile in 2:11½. Then came three more days of careful jogging. July 20th she was driven three miles, the first mile in 2:21, the second mile in 2:20, the third mile in 2:18½. This was followed by three more days of long, steady, slow exercise, preparatory to her wonderful display of speed and endurance on July 23d, when she was given three heats, the first mile in 2:25½, the second mile in 2:12½, the third mile also in 2:12½.

The time of her being wrested from the hands of her patient trainer, by her impatient owner, was drawing near. Letters and telegrams from her unreasonably importunate owner succeeded each other with the rapidity of flashes of lightning. Lowering clouds had recently drunched the course with heavy rains. On one of the fastest tracks, under the favorable conditions of fine weather, the incitement of a running horse near him, and the bracing patience of a more reasonable owner, her dangerous rival, the wonderful Jay-Eye-See, had shattered her best record and dethroned her as the queen of the turf. In vain Mr. Bair pleaded for a little more time. Her owner was all the more sarcastically inexorable. The trial must be

made at once or Maud S. would be taken without delay to pander to the vanity and the luxury of her princely owner, at Saratoga. Almost in a moment of desperation it was determined to make one supreme effort to regain her supremacy. On the morning of the 2d day of August she was given, in turf phrase, "a blowing out mile" in 2:19. Then she was taken to the stable, and after being thoroughly dried, she was bathed in warm sprays, from her ears to her shoes, till she lathered under the friction of busy hands. She was rubbed dry, till she fairly glowed with renewed vitality. Everything looked propitious for a grand achievement till the treacherous rain clouds, that rise so suddenly from the bosom of the lake, again blackened the sky, and poured copious sheets of water upon the course. But the track partakes of a sandy loam subsoil, which rapidly distributed the water beneath, while the warm sun dried off the surface, before the evening hell tapped for the eventful start.

Maud S. was brought out, calm and composed as a conscious queen upon the lyric stage. She walked with high, proud, measured step to the distance stand, then stopped to make a dignified survey of the surroundings, then turned and came with a rapidly-increasing step for the "warming up" mile, which she finished with ease in 2:25. After the usual interval she was again brought out for the greatest effort in the lives of all trotting horses in turf history. The plaudits of admirers only made her large, shapely ears work more sprightly, and her step appear the more stately. Again she walked, and then trotted, till the glow of perspiration made every joint and muscle supple. Then she turned and came for the signal, as if the undue haste of her owner could not vanquish her any more than could the clinging shadow of the sable form of Jay-Eye-See. Onward flew her whied feet with the speed of the wind, and she trotted the most wonderful mile that had ever been compassed on the trotting turf. Her diadem had scarcely been removed before it was again replaced with even greater honor than she had worn it before.

Now we have told the story. How much of her success will this careful reader conclude belongs to her patient, skillful trainer, the leaves of whose diary, that we have printed, are, indeed, imprinted with the seal of genius. —S. T. H. in *Live Stock Journal*.

I called on Robert Bonner yesterday to see about some perishable verse I had committed to his tender mercies. As I was withdrawing I asked about "Maud S." "She is an admirable creature," he said, "I am going to see how fast she can trot. By the way, the papers this morning didn't get the fact that she made her mile in 2:14½ yesterday. I went up to Hartford to see her do it. She will be speeded there about twice a week, probably lowering her record each time. She is being well trained and cared for. I like fast trotters, and while I will never encourage gambling on them, it does not hurt a fast horse to go fast any more than it hurts a slow horse to go slow. It doesn't hurt Maud S. to make a quick mile more than it hurts a hitching-post to stand still." I asked Mr. Bonner how he happened to select Hartford for training his horses. "I am pretty well acquainted there," he said. "My first newspaper work was done there. I was an apprentice on the Hartford *Courant*—now Joe Hawley's paper—in 1839, at \$25 a year and my board and clothes. After that when I came here I was the paper's New York correspondent for a year, until 1844, when I got too busy to attend to it. I scarcely thought, when I was office-boy in Hartford, that I should ever send a \$40,000 horse up there to be trained."—*N. Y. World*.

Another hurdler came to grief, at Brighton Beach, on the 12th, the chestnut gelding Beverwyck who fell and broke his neck. The mortality among the jumpers has been great this year. Beverwyck was foaled in 1879, being a son of Enquire and originally known as Chance. His first public appearance was at Saratoga in 1882, when he was known as Light Horse Harry, the property of Milton Young. During the same season he was purchased by P. J. Flynn for \$525, and has since jumped with considerable success for his latest owner.

Capt. Hutchinson has sold his bay colt Beaconfield, by Hockbocking, dam Aileen Allannah, by Norfolk, from Eva Coombs by Billy Cheatham, to James Garland for \$1,750. The transfer took place at Sacramento last Saturday, the colt being sold with his engagements.

## HERD AND SWINE.

### The Hog of Hats.

Texas has within her borders a beast into whose narrow skull fear never enters. It is the peccary—the Havilnah of the Mexicans, the *Dicotyles torquatus* of zoologists. Bravery is a notable attribute of man, and it is discovered in birds, beasts and fishes. I don't claim the quality of the brute I am about to describe. I believe bravery cannot be said to exist in senses devoid of fears. I conceive that an appreciation of danger is a necessary menstrum to the nobler courage. It is not the man of dogged indifference that I admire; it is the man who refuses to fly when duty bids him stand, and though he fears death, fears dishonour more.

Now the peccary has no particle of fear on account of any show of odds, and appears to live only for the purpose of madly dying when opportunity offers. The game cock fights with heroic valor, but one sees in his swimming eyes, when gaffed and bleeding in the pit, glances of regret and nameless fear. He shudders out his life beneath his crowing conqueror, and his tiny heart, perhaps, swells with woe at its last throbs. At least he looks that way to me. The dying pachyderm of the Texas forest dies in "a matter of course" manner as if he was meant to end that way and was glad of it. He looks up in the tree where the man sits who abot him (few men of experience ever shoot them from any other standpoint) and anon he holds up his cloven hoof and glances at it. If the peccary regrets anything in the hour of dissolution it is that he was not made like a squirrel—to climb.

Roaming the glade, searching for mast, a drove of peccaries resemble a drove of tame hogs. They never begin a war, but when one is assailed the entire drove rush to the attack as men rush when martial valor urges them. Each head-like eye is a fire-spark; tusks are protruded, the echniated spine atraitened, and woe to the wretch who falls in their path. Gored, bitten, torn, trampled upon, and eaten up, to the last shred of his clothing—such is the fate of the man caught by a drove of angry peccaries. With the same fury they assail a wolf or attack a bull; neither the wolf nor the bull can stand up against a charge of half a dozen peccaries. Both know this and fly in terror from the field.

Lately, on the Wichita river, I attacked a drove of peccaries. I was safely perched in a tree, armed with a

Winchester rifle, and accompanied by Sergt. Platt, of the Frontier battalion, who occupied a hough beneath me.

We waited until the drove approached within thirty yards of our tree and then we fired simultaneously, killing one and wounding another. The roar of our carbines brought them upon us with that strange slaricity that suggested their having waited from sucklings for just that occasion, and kept perfectly ready for it. When they arrived at the tree they bit it each in turn, and then glancing up, squatted and fixed upon us a dozen pair of eyes, small as peas, and blazing with fierce purpose and fury intense.

One by one we shot them, and they fell, one by one, and died—each willing and ready to go, and accepting his fate as pleasantly as schoolboys accept apples. Not a groan or a squeal betrayed pain or dismay. Squatting on their hams, they gazed at us and took the bullets as if we were tossing them acorns. Presently only one was left alive amid a dozen corpses, and there he sat, brown, bristling, furious, foaming with raging life, courting death; unmindful of the blood that dampened the grass about him; indifferent of the fate of comrades—a very epitome of hate.

"Don't shoot yet," I said to Sergt. Platt; "I want to study him."

Grim, voiceless, horrible—the hog sat and gave me hack glance for glance. The spot he squatted upon was within the radius of a red ant bed. The insects crawled over him and stung his thick hide; they wasted their formic acid, blunted their lancets in vain. As well might they have stung the cactus plant growing beside their bed. After a time the old boer grew weary of gazing, and he got up and went round, smelling the bodies of his late companions. Then he ate a few acorns that had fallen from the live oak tree we were perched in, and after that he deliberately stretched himself at the root of the tree, intending to remain a sentry and prevent our slipping away without his permission; or without doing by him as we had done by the others.

We did not keep him waiting much longer. Platt aimed at his heart and pierced it with a forty-four caliber bullet; with a single glance upward from a sinister eye, the hog died gently, and with his life ended his one emotion—hate.

Texas Pacific and Fort Worth and Denver City locomotive engineers often encounter droves of pecararies, as I suppose do all engineers who operate on the Western Texas railroads. No whistle is sounded to frighten them. The engineers know that pecararies cannot be frightened. The engine rushes into the midst of the drove and those not killed on tright die madly, charging and biting at the wheels that crush them.

A pecary is in all respects a hog. He looks, smells, tastes like a hog—and is a hog, but for a thing of indomitable courage of the lower type, for a hater of quenchless fury, and for a fighter to the last throeb of his heart, commend me to the fierce Dicotyles torquatus, the indigenous Texas hog, a brute that would, if he could, while riding in the midst of a cyclone, bite at the zig-zag flashes of the death-dealing lightning.—*Detroit Free Press*.

### Grade Jersey Herds.

"In your issue of August 1st, you say: 'We have said in these columns that the most extended usefulness of the Jersey breed of cattle must ramify and spread through the numerous dairies of the country by means of breeding the Jersey bulls on the common cows.'

"It is with the object of demonstrating to the farming community, in a practical way, the value of the Jersey grades, that my brother, Mr. H. H. Fuller, and I are establishing a Grade Jersey Herd. It is our purpose to purchase from twenty-five to thirty half bred Jersey cows; place them on a farm secured for that especial purpose; treat them as any intelligent dairyman would do, and keep an accurate and strict account of all expenses connected therewith, and of the profit from their product. We will not be able to give any results therefrom for two years, as it will, in many cases, take nearly a year to have the cows come in right. We are endeavoring to purchase the daughters and granddaughters of Stoke Pogis 3d as far as we can, out of common cows, but we find it a difficult matter to procure them, as those owning them estimate their dairy qualities too highly to sell them at a reasonable price, and we find we could, with very little additional expenditure purchase in United States pure registered stock in place of these grades. That would not, however, accomplish our object. We think we have demonstrated the value of the pure Jersey as a butter maker to the satisfaction of the Canadian community, but we now wish to show the value of a Grade Jersey Herd, and if we live long enough, a three-fourth Jersey herd, and then a four-fifth. In my searches for these grade daughters of Stoke Pogis 3d, I am more than ever convinced of the prepotency of the old bull and his sons, as I have seen as uniform a lot of daughters and granddaughters of Stoke Pogis 3d out of common cows as I could desire. They have the same well rounded full udders his daughters carry; well placed teats, and are heavy milkers.

"Should we meet with success, we consider we will advance the Jersey interest very considerably in Canada, and we deem we are making no mistake in the blood we are choosing.

"This herd which is in no way connected with our existing herd will be run on strict business principles."

Thus writes Valancey E. Fuller, in the *Jersey Bulletin*, but he is behind his day and time. Hundreds of dairymen and farmers have for many years been engaged in making the same experiment and have satisfactorily demonstrated, at least to their own satisfaction, that the Jersey on the native or the Holstein on the same will make a wonderful change in the product in the course of a very few years.

The American farmers are annually producing a race of graded Jerseys or of Holsteins that will in a few years show as good an average as will the foundation Stock; and dropped on better pastures than are afforded by the island of Jersey, under favorable climatic influences will eventually produce a race of dairy cattle that will surpass the best herd of in sire or dam.—*Rural World*.

One important advantage in growing cows on a farm is that they lose nothing in becoming wanted to the place, will always eat well and be quiet. It is true the farmer can often buy cows cheaper than he can grow them, but he cannot be so sure of their quality as when he raises a heifer calf from a good milking strain on both sides. A heifer will pay her way and something more after she has her first calf, and for several years will increase in value, especially if she prove desirable as a cow.

We notice many cures for sucking and kicking cows, but we would recommend as the only "safe cure" to turn them into heef as soon as possible.

Wyoming has 800,000 head of cattle, valued at \$30,000,000. Seven companies own over one-third of all the cattle in the Territory.

Fresh and somewhat severe outbreaks of the hog cholera are reported from some parts of Illinois and other States.

The Illinois veterinary authorities are giving the pleuropneumonia trouble the attention it merits.

## STABLE AND PADDOCK.

### Bare Hoofs.

[E. P. Savage, in Live Stock Journal.]

The above subject is attracting considerable attention in the stock papers of late, and the only wonder is that it has not done so long ago, and been thoroughly and systematically tested. A more than useless "universal custom," that is costing the horse owners of this country hundreds of thousands of dollars annually, will bear attention.

It is a subject that I have given much thought to for twenty-five years, and it has been tried and thoroughly demonstrated to my satisfaction, that not only the horse but the owners of horses are the best off who patronize the shoeing shops the least.

I have had but little experience in large towns with macadamized or paved streets, but have had much in small towns, and with all kinds of Western roads, in every condition. My first marked experience was with three animals well known to you, viz.: A large bay team of holtail horses, owned by the late Geo. B. Sargent, of Davenport, Iowa, that were used many years by him as carriage and saddle horses on the macadamized streets, and the large hay mare, Mary Blaine, better known as the Tom Mottley mare. The former were kept shod constantly and carefully by the best smiths of that day and country until the Spring of 1860, when they were taken to the farm, twenty miles west of Davenport, with badly-crippled sore feet. Their shoes were removed, and they were used on the farm that Summer. By Fall, there were no signs of soreness in their feet, after which they were used at all kinds of work, often making the drive to or from Davenport in from three to four hours. They were never shod after the Spring of 1860, and died of old age, or worn out—one in 1863, the other in 1868—with good, sound feet.

The mare, as is well known, was used for track work as well as the hardest kind of road work, having been kept shod. She had a good, tough foot, and would have stood any amount of road work without shoes, as she afterwards did. When I bought her, her feet were more or less contracted with bad corns. I used her for a number of years, always on the road, and never had her shod. When I parted with her her feet were larger than when I bought her and perfectly sound.

My next was a span of bay mares, one of which I raised, (from a thoroughbred mare, and sired by the noted pacing stallion, St. Clair). She had remarkably good feet; the other I bought when five years old. She was "jayhawked" in the South in 1861, and was supposed to be a thoroughbred. She had been kept for track work, (running), for two years, and had been kept constantly shod. Her feet were naturally small, inclining to be hard and brittle, perceptibly contracted and became sore when she was ridden or driven on the hard streets. On removing her shoes I found had corns, which I carefully cut out, and replaced the shoes for a short time. I used this team for seven years, on all kinds of streets and roads, and they were never shod, except occasionally when the ice on the river would be very smooth, and I wanted to have a little fun with the boys who drove fast horses. The one I raised was shod but three times up to twelve years of age, and was never lame, nor were her feet ever worn down so much that I did not have to use a rasp occasionally to keep them in due bounds. She is yet doing duty as a family horse in Cedar Rapids, Iowa; still owned by the same man I sold her to in 1872, who told me, only a short time since, that he had followed my advice, and never had her in a blacksmith's shop. Her feet are perfectly sound.

The other was a famous saddle animal, and was much used as such, which is more trying to the feet than being used to harness. She is yet being used, (mostly to saddle); is twenty-five years old, with feet as sound as those of a colt.

Again, in 1850 and '51, I was engaged on a "star route" in the West, using sixty horses. My shoeing bill amounted to \$13.50 per year, and that for setting shoes on some part-blood Normans that never had a foot to go barefoot with, and scarcely one to nail a shoe to. These were the only ones that went lame, and this, by the way, I believe was oftener caused by their stepping on themselves, and on each other, and from kicking, than from any other reason.

I am now using about twenty teams on the farm of the Nebraska Agricultural College and the roads, and have had but four shoes set in the past six months, and those on a span of four-year-olds I bought last Spring, that were kept sharpshod during the Winter. They cut their hoofs in a number of places at the coronet, and as they had grown down, and began to break irregularly, I had flat shoes put on until these defects can grow out, after which they will be removed.

I consider shoes with sharp calks one of the most serious objections to shoeing, while with flat shoes, horses will slip worse on all sorts of wet or frozen ground than when barefoot, if their feet are properly cared for.

I have handled over a thousand horses in the past twenty-five years, and during the past twenty, have paid less than \$50 for shoeing, and very rarely have had a lame one, which I believe is mainly owing to having kept them out of the hands of the blacksmiths. I do not advocate the abolishment of shoes, as I have seen a few horses whose feet were of such a nature as to render them almost useless without shoes, that made quite serviceable animals when kept shod. There are so many that do not require shoeing and are equally as good in all other respects that I can not afford to keep one that does.

I am sure that far more shoeing is done (to a great detriment), in order to follow that established custom, or "universally accepted practice," than for actual utility. "Nothing but the inevitable necessity of their employment makes us tolerate their use."

A French authority states that carrots give horses new blood, which seems to restore them, and they may be justly claimed as the regenerator of worn-out horses. Carrots are justly considered among the richest vegetables, and their feeding qualities cannot be over-estimated for all kinds of stock, and especially for milch cows. No one need complain of light-colored butter if they have plenty of carrots to feed their cows. One feed of them often makes a marked difference in the color of the butter. A plentiful supply of them insures a good yellow article.

In the selection of horses for work it is not a bad idea to keep the longevity of the different breeds in view. Some men may be skeptical in regard to the matter of one breed of horses being longer lived than another, yet it would not be hard to convince such men that one family of people are pre-disposed to longevity, while another is not, and if such a fact exists in regard to the human family, why will it not hold good among the lower animals? Taking it for granted that such is the case, then the advantages of procuring horses that are likely to live to a ripe old age and retain their vitality until they are well up in years, are very evident. The horse that will do good service on the farm for six years longer than another horse of the same power is worth at least one-third more, because six years is generally more than one-third of the average duration of active service of horses. Another advantage is they are more quiet and steady, and are not so liable to mishaps during the last few years of their service as they are during the first few years. They are easier handled and generally are easier kept and are often able to do more in a day than young horses. While there may be some objection to them for some purposes, it must be borne in mind that it is the old standbys that do the bulk of the hard work on the farms. It is a noticeable fact that horses that live to a good old age and retain their vigor are generally or always well-bred or have some improved blood flowing through their veins. Being better bred than the common stock, they inherit better constitutions and are able to perform the same labor that a common-bred horse does while young much easier and with less fatigue, thus being enabled to reserve this strength until later in life.

Very often the reason why a horse rubs off his blanket at night, is, the girth hurts him. Have it padded, buckle loosely, and fasten the blanket partly under the breast. If the stable is comfortably warm, use plenty of bedding, the brush frequently, and leave the blanket off.

## POULTRY.

### Feeding.

Feeding is the art of supplying the proper food, not so much in quantity as in quality. If we watch the fowls they will easily tell us what they desire. If you are feeding corn throw down a few handfuls of oats. If they greedily take the oats and leave the corn it indicates that they require something else. Try grass, meat, ground bone, pounded oyster shells, cooked vegetables, all of which they will accept or reject according to their requirements. Feed regularly, and never feed more than they will eat up clean. They will walk away from the food as soon as they have enough. Never leave it on the ground. Feed early and late, and let them get hungry, that is, have regular intervals between meals. The practice of keeping feed by them all the time promotes an excess of fat. Allow as much exercise as possible. Throw hay upon the floor or in the yard, place in it a few handfuls of some kind of grain that they do not receive often, and let them hunt and scratch for it. Feed growing chicks liberally, avoiding too much corn. Oats ground and fed warm in the morning is one of the best feeds that can be given. Always give whole grains at night. In Summer give no corn except once or twice a week. Vegetables and grass is much better for them. Laying hens must have meat or milk. Eggs cannot be produced without nitrogenous material in some shape. Bones are almost absolutely essential. Above all, however, give pure, clean, fresh, drinking water.

### Loss of Feathers.

This disease, which is common to confined fowls, is by no means to be confounded with natural process of moulting. In the annual healthy moult the fall of the feathers is occasioned by the protrusion of new feathers from the skin. In the diseased state, which we now consider, where the feathers fall on new ones come to replace them, but the fowl is left bald and naked. A sort of roughness appears also on the skin.

Remedy—This affection is probably constitutional rather than local. External remedies, therefore, may not always be sufficient. Stimulants, applied externally, will serve to assist the operation of what medicine may be given. Sulphur may be thus applied, mixed with lard. Sulphur and cayenne, in the proportion of one quarter each, mixed with fresh butter, is good to be given internally, and will act as a powerful alterative. The diet should be changed, and cleanliness and fresh air are indispensable.—*Dr. Bennett's Poultry Book*.

Lime is necessary for poultry, and should be supplied in generous quantities. When hens begin to lay soft shelled eggs it is an obvious indication that lime is lacking in their food, and it must be supplied by giving broken bones and oyster shells, and finely pulverized egg shells. Air-slaked lime should also be placed where the hens may wallow and scratch in it at their pleasure, as it is a preventive of vermin, and disease among poultry. And it is a good deal easier to prevent than it is to cure the numerous complications that may affect poultry.

Poultry Books and Papers.—Good ones are among the indispensable tools that the poultry keeper needs to work with; they are to him what medical publications are to the doctor, theological works to the minister, or law books to the lawyer. Quite often a single item in a poultry paper is worth more to some poultry raiser than the subscription price of the paper for the whole year.

People who have hens must be distinguished from those who keep fowls. Most of what is written is intended for the latter class, and these are encouraged to become fanciers—a poor plan as a rule. The beginner should learn to keep fowls with profit; then he may adopt a breed which he likes and becomes a fancier, but into case out of ten there will be no profit in it.

As a prevention of disease and to destroy the bad odors about henneries, remove the droppings carefully, and put in an abundant supply of clean, fresh dirt.

Poultry allowed the run of orchards are a great benefit to them in destroying worms and insects.

Cooked food, says an expert, answers as well for poultry as for stock, but should not be fed exclusively.

Have the quarters for your fowls clean, airy and dry. Dampness produces miasma among poultry.

**YACHTING.**

**Martinez Cruise.**

The Pacific Yacht Club to-day have a cruise to Martinez. This was arranged at the gathering of the Club at the Club house last Saturday. The probabilities are that the following yachts will participate: schooners, Lurline, Halcyon, Ariel, Aggie, Fleur de Lis, Nellie and Rambler, and sloops, Annie, Nellie and Spray, with a prospect of one or two more, outsiders. As the tide will be high both ways an enjoyable trip is looked forward to. The sailing rules are published herewith.

The Pacific Yacht Club squadron will assemble off Front Street Wharf on Saturday, September 27th, 1884, at 12 o'clock, M.

At 12:45 a preparatory gun will be fired from flagship; at 1 o'clock a second gun will be fired, at which signal the yachts will get under way and proceed direct to Martinez.

Yachts will return on Sunday, September 28th, at 12 M.

At 11:45 A. M. a preparatory gun will be fired. At 12 M. a second gun will be fired, when the yachts will get under way. The fleet will then try rate of sailing to Saucelito, passing home stake boat, off the entrance of Raccoon Straits, on port hand.

Time will be taken on passing Grangers' Wharf. The time for hauling down and hoisting colors on the yachts at sundown and at 8 A. M. will be taken from signal gun from flagship.

Yachts will carry Club flag. Other vessels accompanying the fleet are respectfully requested to comply with these orders.

Last Saturday, as was published in this paper, the Pacific Yacht Club held an informal gathering at the Club house, on which occasion the prizes won in the recent regatta were distributed. Ballenberg had charge of the music and President Menzies presented the prizes.

The following yachts were anchored in the cove: Lurline, Halcyon, Ariel, Nellie, Fleur de Lis, Virginia, Rambler, Annie and Azalee, all with the exception of the latter being gaudily decorated with flags.

Conviviality was the order of the day. The first prize presented was to the Lurline for the fastest time over the course. Mr. Spreckels delegated Mr. Leon Weil to respond which he did quite humorously. Mr. Donahue, of the Nellie, on the receipt of the first prize and the Champion Flag of the year, responded for himself.

Mr. Cobn did the honors for Captain White, of the Fleur de Lis.

Commodore Caduc, of the Annie, received two prizes, one for the first prize in his class, and one for the fastest time over the course in the second class.

Mr. E. Potter, President of the Lotus Club, received the second prize in the second class, on behalf of the Eve.

In regard to the special prize for the fastest time in the second class considerable curiosity was excited, for the reason that no mention was made of this prize before the race; a peculiar condition of affairs, to award a prize that had not been placed for competition after the race had been decided.

Last Monday night or Tuesday morning a party of bay ratters broke open the cabin of the Spray, and after helping themselves with the pick of the yachting clothes on board, departed, taking the small boat with them. Something must have occurred to frighten them away, as they left several pairs of blankets and other valuables, which lay in open sight in the cabin. A search warrant was obtained, and after some time the small boat was discovered at the fish wharf on Kershaw's Point. The people in charge claimed that they found the boat upset and towed her in there, a queer statement to say the least, when the bottom boards, haling can, and such other loose articles were found in her. The clothes were not recovered, but if the perpetrator can be caught, they will probably suffer the full penalty of the law. This is the second time this yacht has been robbed, and one other time the pirates were discovered before they had quite succeeded in effecting an entrance.

Last Sunday, although a heavenly day for yachting, was seemingly not appreciated to any remarkable extent. The Lurline got under way from the club house about noon, and went out about as far as the nine-fathom buoy, and returned early. The Ariel and Chispa went up the bay and did not get to Saucelito until nearly nightfall.

**Eastern Y. C. Sloops and Cutter Races.**

Two prizes of \$300 and \$200 were offered by Commodore Hovey, of the Eastern Y. C., for a race for first and second class sloop and cutter, and seven yachts met at Marblehead on Monday, Sept. 6th, to sail for them. The on-tries included Ileen, extreme cutter; Anron and Isis, wide cutters; Oriva and Maggie, medium cutters; Valkyr, compromise, and Shadow, deep sloop, a representation of all the competing types except the shoal sloop.

The wind was light from southwest for a greater portion of the day with a flat calm thrown in for a while, making anything but a "cutter day," and the results are interesting. Ileen beats all, allowing them time; Oriva heats Huron by 8 min. 37 sec, on corrected time, and Valkyr 31 min. 40 sec, corrected, while Maggie not only beats her old rival, Shadow, by 26 min. 6 sec., but comes in next to Oriva and ahead of Huron, Valkyr and Isis, the latter making but a poor showing in

seventh place. Beam was evidently at a discount, and lead, though low down, at a premium.

The course was from Marblehead Rock to Halfway rock, thence around Harding's Bell buoy, thence around Egg Rock to start, 28 miles. At 11 A. M. the gun was fired and the yachts crossed with Huron ahead at 11:22:20, Ileen 11:22:49, Valkyr 11:24:03, Maggie, 11:24:08, Oriva 11:24:24, Isis 11:24:58, Shadow 11:25:17. Ileen soon took first place, and Oriva soon worked up to third, but the wind died out entirely for some time. When it came it blew harder than in the morning, making fine sport to the finish. Ileen rounded Bell buoy at 2:31:25, Oriva 1:45:15, Huron 2:46:45, and Maggie a little after 3 P. M., the rest not being timed as they were for astern. Down the wind Ileen left the others. Huron and Oriva had a close fight for the entire 11 miles, and Maggie kept on bravely. The full times were:

Name of Vessel.	Finish.	Actual time.	Corrected Time.
Ileen.....	H. M. S.	H. M. S.	H. M. S.
Oriva.....	4 29 45	4 47 51	4 47 61
Huron.....	4 30 33	5 08 13	5 05 32
Valkyr.....	5 00 24	5 35 21	5 28 35
Isis.....	5 25 16	6 00 17	5 54 10
Maggie.....	4 42 59	5 18 42	5 03 55
Shadow.....	5 14 53	5 49 53	5 30 11

The Regatta Committee was as follows: Daniel Appleton, George A. Goddard, H. B. Jackson, E. H. Haven and F. E. Peabody.—*Forest and Stream.*

**FISH.**

The Barnecl Club, of twenty years' standing, held one of its season's fishing and picnic parties lately, and will be out probably again to-morrow or the following Sunday. We regret absence from the city prevented us accepting Mr. Lohse's kind invitation to join the party. If ever a jolly lot of wags gathered together in one society, it is the Barnecl, and it takes a 2:30 man to trot with them. The fishing did not amount to much; just enough to make a chowder, well all aimed at, but the champagne was a grand success, or at least the manner in which it disappeared as if under the manipulation of the very smartest magician. For some days after the party several of the members did not appear at their accustomed places, and commerce had to plod along the best she could without their assistance. Mending fishing tackle was their excuse. If in the city, we hope to join you, friend Lohse, next time, so don't forget us.

Point Bluff, off Angel Island, is reported as offering good fishing of late. It may be so, but it requires good boats and staunch stomachs to stand the half off that point. The old quarry of the Island, if properly worked, will oftener give as good or better fishing, but it also is uncertain. For the change that has come to our old good fishing points on the bay, we blame the slum from the mines, which has covered the rocks. We know many places where, ten years ago, we could catch more and larger fish in half a day than can be caught at the same places now in a month. If not as we state, what has caused the change? Wherever the rocks are bare is the best place in our bay to fish, though one is apt to lose some tackle. The reason, to us, is obvious. The food of fish accumulates there quicker than elsewhere, and the small fish, in a great measure, find shelter from the attacks of the large ones. The bay fishing has not been overly good of late.

Fish Commissioner Buckingham reports a serious falling off in the salmon canning business during the current year, notwithstanding a great improvement in the police protection of the fish during the same period. Drive out the nets of the thieving Chinese, and stop the depredations of the voracious sea-lions, and the supply will again soon be restored to its original figure. If not, it will decrease every year. The Commissioners, by a little determination in the right way, could soon rid us of both evils. It is hard to say which is the more destructive to our salmon stock, the Chinese or the sea-lions.

Let the helle ring. Although the meeting of the Fish Commissioners, at Sacramento, was postponed a week ago last Monday for a month, owing to the official report not being ready, nine cans of young trout, about an inch long, were sent from the Shelley Hatchery week before last, to be placed in the Yuba river, near Chico. Things are improving. A large number of young trout must still be on hand, according to their own accounts.

The attaches of the postoffice go down on a fishing excursion to-day to the Farallones. Recent trips have not been successful, and in one case, the fishing ground was lost altogether. What should we do if we had no fog to blame for everything? We hope the trip to-day will be a success.

Young salmon, weighing six pounds and more, have recently been caught off Tiburon Point. Is it not early for such fish?

**THE DRAMA.**

**Vienna Gardens.**

For a few days during the week this favorite piece of entertainment has been closed to make preparations for the production of the Spanish Opera, the ability and extent of which are certain to make it still more popular and attractive. There will be a combination of thirty able and accomplished singers, and it is intended to give the operas rendered in such a manner that the lovers of classical music will be pleased and the most fastidious satisfied. This, in our opinion, is a departure in the right direction, and the result, we feel sure, will be to Mr. Welters' benefit and honor. The audiences attending the Vienna come from all the better classes of society, who delight in patronizing what he gives worthy of patronage. The Spanish Opera Troupe is well known in San Francisco to be composed of merit and talent, and the Vienna is a good place for them.

Frank Van Nees thinks that Harry Wilkes can trot a mile in 2:12 or better if specially prepared for an exhibition of speed. In view of these facts the owner of the horse has expressed a willingness to match him for two races against Jay-Eye-See, the same to be trotted in Chicago or New York.

The record of 2:17 made by Harry Wilkes in the fifth heat of his race at Providence is the fastest fifth mile ever trotted, and shows him to be a horse of extraordinary endurance as well as phenomenal speed.

For the removal of warts on a horse use has been made of the white foam from the horse's mouth instead of blood, in the same way and with the same result. One was on the eyelid, and the eye did not suffer at all.

Both George Kinney and Barnes have been turned out for the season, and will not make their reappearance on the course before 1885, at Jerome Park. Neither of them are broken down, but if persisted with it was feared such might be the case.

Goodwin's Turf Guide, issued weekly, monthly and annually, by Goodwin Bros., 241 Broadway, New York, reaches us with the regularity of a newspaper. It is admirably arranged and a great convenience.

**EASTON & ELDRIDGE,**  
Stock & General Auctioneers,  
Office and Salesroom, 22 Montgomery Street, San Francisco.

**SPECIAL Auction Sale**

BY ORDER OF HENRY W. SEALE, Esq., we will sell from his Home Farm, Rancho San Francisco, in Santa Clara County, a selected

M. SALISBURY, 320 Sansome street,  
San Francisco, Cal.

# The Washington Park Club, CHICAGO, ILL.

Announce the following Stakes, to close Oct. 15th, 1884, and to be run at  
their second meeting, beginning the last week in June, and ending the second  
Saturday in July, 1885:—

**\$5,000. The American Derby. \$5,000.**

**SWEEPSTAKES** for three-year-olds (foals of 1882), at \$200 each, h. f.; or only \$20 if declared out  
on or before Feb. 1st, 1885; or \$30, April 1st, 1885; or \$40, if on May 15th, 1885. All declarations void  
unless accompanied with the money; with \$5,000 added, the second to receive \$750, and the third \$250,  
out of the stakes. Winner of any three-year-old stake race of the value of \$1,000 to carry 3 lbs.; of  
\$1,500, 5 lbs.; of three or more three-year-old stake races of any value, 7 lbs. extra. Maidens allowed  
5 lbs. To be run on the first day of the meeting. One mile and a half.

### THE LAKE SIDE STAKE.

A Sweepstake for fillies two years old (foals of 1883);  
\$50 entrance, p. p.; or only \$10 if declared out on or  
before February 1st; or \$15 by April 1st; or \$20, if on  
or before May 15th, 1885. All declarations void,  
unless accompanied with the money; with \$1,000  
added, the second to receive \$200, and the third \$100  
out of the stake. Winner of any stake race of the  
value of \$750 to carry 3 lbs., of \$1,200, 5 lbs.; of  
three or more races of any value, 10 lbs. extra. Five  
furlongs.

### THE KENWOOD STAKE.

A Sweepstake for colts two years old (foals of 1883);  
\$50 entrance, p. p.; or only \$10 if declared out on or  
before February 1st; or \$15 by April 1st; or \$20 if on  
May 15th, 1885. All declarations void unless accom-  
panied with the money; with \$1,000 added, the second  
to receive \$200, and the third, \$100 out of the stake.  
Winner of any stake race of the value of \$750 to  
carry 3 lbs.; of \$1,200, 5 lbs.; of three or more stakes  
of any value, 10 lbs. extra. Five furlongs.

### THE HYDE PARK STAKE.

A Sweepstake for two-year-olds (foals of 1823); \$50  
entrance, p. p.; or only \$10 if declared out on or  
before February 1st, or \$15 by April 1st, or \$25 on May  
15th, 1885. All declarations void unless accompanied  
with the money; with \$1,200 added, the second to  
receive \$200, and the third, \$100 out of the stake.  
Winner of any stake race of the value of \$1,000, to  
carry 5 lbs.; of \$1,500, 7 lbs.; of three or more stake  
races of any value, 10 lbs. extra. Three-quarters of a  
mile.

In addition to the above, other Stakes, including the Washington Park Cup, the Great Western and Oak-  
wood Handicaps, will be advertised in due time, to close January 15th, 1885.  
A Programme will be arranged for ten or more days' racing, and five or more races will be given each day.  
A Programme will also be arranged for a Fall Meeting to be held early in September, for which Stakes will  
be advertised, to close in March, 1885.  
Please observe that in the above stakes, declarations are permitted for a small forfeit.  
Turfmen failing to receive entry blanks, can obtain them by applying to the Secretary.  
Nominations and all communications to be addressed to the Secretary, Palmer House, Chicago, Ill.

J. E. BREWSTER,  
Secretary.

### THE ENGLEWOOD STAKE.

A Sweepstake for fillies three years old (foals of  
1882); \$100 entrance, h. f.; or only \$10 if declared out  
on or before February 1st; or \$20 April 1st; or \$30 if on  
May 15th, 1885. All declarations void, unless accom-  
panied with the money; with \$1,000 added, the second  
to receive \$200, and the third, \$100, out of the stakes.  
Winner of any three-year-old stake race of the value  
of \$1,000, to carry 3 lbs.; of \$1,500, 5 lbs.; of three or  
more three-year-old stake races of any value, 7 lbs.  
extra. Maidens allowed 5 lbs. One mile.

### THE DRENEL STAKE.

A Sweepstake for colts three years old (foals of 1882);

HAVING CONDUCTED SOME OF THE MOST  
successful sales, notably those of Messrs. Whip-  
ple, Colgrove, Dietz, Courts, Dougherty, Newland &  
Hammond, Daniel Cook and others, we feel assured  
our ability to give satisfaction in all business in-  
trusted to our care. Sales will be made in all cities  
and towns in the State. We have in contemplation  
a series of combination or breeders' sales, similar to  
those so successfully held at the East. We will be  
pleased to enter into correspondence with parties de-  
siring to participate in such sales. Private purchases  
and sales of improved live stock of all descriptions  
will be made on commission and stock shipped with  
utmost care. Several fine ranches at private sale.  
Purchases and sales made of land of every descrip-  
tion.

## DIETZ'S PATENT

## CHECK HOOK.

Simple in its Structure and Prac-  
tical in its Use.

The horse never loosens the check-rein when this  
Check-Hook is used.  
Horsemen can appreciate the value of a Check-  
Hook of this kind.  
There being no springs or hinges to break connected  
with it, makes it serviceable and easily appended, as  
the check-rein passes through a solid ring attached to  
the front of the hook.  
Orders sent to

A. C. DIETZ,  
No. 9 Front St., San Francisco, Cal.

Will receive prompt attention.  
When ordering state whether gold or silver plate  
required.

ENQUIRE OF  
HENRY WALSH,  
Sup't Raising Horse Dept  
Palo Alto Stock Farm

# JERSEYS, GUERNSEYS,

Registered in the A. J. C. C. and A. G. C. C., of New York, the only standard register.

Jersey Belle of Seltuate that made 25 lbs 4 1-2 ozs. of butter in one week.

A grandson of above cow is now in use in the Yerba Buena. This herd won all the herd prizes for 1882. Since then have added young animals from Mr. Pierce's valuable herd East. He now has Jersey Bells of Scituate, Coomassie, Mary Ann of St Lambert, Silver Cloud and Eurotas strains; also large selections from the Islands, without regard to cost.

He has interest in Eastern herds of 200, at the head of which stand only living son of Jersey Belle, Romeo de Bonair, (87 1/2 per cent. Mary Ann's blood), and Pier-sou, the best show bull in America. These bulls are valued at \$10,000 each.

HENRY PIERCE, San Francisco.

# IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

The above cut represents the body-piece, the patent also covering the improvements in the hood. The following are the claims granted:

1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
2. The blanket or covering A, having the flap C, and the extensions B, to fit the fore and hind legs of the animal, front fastenings F G, and the permanent straps or bands E, substantially as and for the purpose herein described.
3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings F G, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.
4. The blanket A and hood J in combination with the elastic connecting-strip I, substantially as described and for the purpose set forth.
5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as herein described.
6. This improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands fixed to it to secure it around the body, whereby the use of loose surcingles is avoided, substantially as herein described.

The right to make clothing in the United States will be sold on a royalty. Apply to the patentee,

JOS. CAIRN SIMPSON,  
SAN FRANCISCO, CAL.

- W. H. Voget's g Aleck by Patchen, dam unknown.

Horse to be owned in District June 1, 1884.

### REMARKS AND CONDITIONS.

All trotting races are best three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nominations.

National Association Rules to govern trotting; but the Board reserves the right to treat heats of any two classes, alternating if necessary, to finish any day's racing, or to treat a special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 65% to first, 33% to second.

In all races, entries not declared out by 6 P. M. of the day preceding the race shall be required to start.

Where there is more than one entry by one person, or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money shall be paid for a walkover.

Rules of the State Agricultural Society to govern running races, except where conditions named are otherwise.

Non-starters in running races will be held for entrance under Rule 3.

Racing colors to be named in their entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entrance fee, ten per cent.

Entries to all the above races to close with the Secretary on Friday, August 18th.

Write "Entries to Races" on outside of the envelope. W. T. ADEL, President.

J. HENMAN, Secretary.

**DR. PIERCE'S MAGNETIC ELASTIC TRUSS**

Address, M. J. O'LEARY, San Buena Ventura, Cal.

HUNTING DOGS.

Private sale of English bred hunting dogs from the kennel of E. Leavelley, Gilroy, consisting of dogs thoroughly broke, partly broke, and puppies. No more stock in California. At J. W. Norwood, Livery Stable, 25 Washington St. On Sept. 2d, 9th and 26th.

RAWSON'S U. S. ARMY

Suspensory Bandages. A perfect fit guaranteed. Support, Relief, Comfort. Automatically Adjustable. DISPLACEMENT IMPOSSIBLE.

IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882. Having thus described my invention, what I claim as new, and desire to secure my letters patent, is: 1. The part D supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood. It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision.

Thoroughbred SETTER PUPPIES.

ENGLISH SETTERS, FIN est breed imported. Irish Setters, from Champion stock imported by R. W. Hill of Oregon. Pedigrees guaranteed. \$25.00 each at six weeks old.

CALIFORNIA Electro-Plating Works, 657 MISSION STREET, Gold, Silver and Nickel Plating on all Metals. SPECIAL ATTENTION PAID TO Plating Carriage Hardware and Harness Trimmings of All Kinds.

TABLEWARE and BAR FIXTURES REPAIRED and plated at the lowest rates. Copper plates silver-plated for saving gold. All work in our line guaranteed. KEATING & FAGAN, Proprietors.

The Weekly Breeder and Sportsman. THE TURF -AND- SPORTING AUTHORITY Of the Pacific Coast.

# BREEDER AND SPORTSMAN

Vol. V. No. 14.  
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, OCTOBER 4, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

ADAIR.

### Adair, 2:21.

Nearly two years ago the above cut graced the first page of the *Breeder and Sportsman*. Then Adair was the winner of the first Stanford stake, ranking as a three-year-old. Though two years has increased his stature and rounded his form, the likeness is still so marked that no one can mistake it for another. He was a grand colt then; he is a grand horse now. The promise of his colthood has been fully carried out, and a record of 2:21 is a good mark for a five-year-old. He has trotted every race better since his first efforts for the Fall season on the Bay

District course, and his time, fast as it is, could certainly have lowered a couple of seconds at Stockton had this driver so willed. His race at Stockton was so good that it elicited encomiums on all sides, and the desire became general to see Adair and Guy Wilkes come together again in a "single-handed" contest. This is very likely to be arranged as both owners have signified their willingness to enter into an engagement, and the managers of the Bay District course will add an amount which will be a further inducement. It certainly will be as attractive as anything in the trotting line and "draw" one of the largest assemblages of the season.

### Clays and Pilots.

Elsewhere will be found an interesting communication from Randolph Huntington, of Rochester, N. Y., in which he corrects errors, and draws a good picture of his favorite breeds of horses. Mr. Huntington is somewhat enthusiastic in his admiration, and though we cannot agree with him in all of his claims, there is a good deal of hard sense as well as enthusiasm in what he writes. That errors will creep into the columns of papers is certain, and we will be greatly obliged to any of our readers who will call attention to those which appear in the *Breeder and Sportsman*.

The Stockton Fair.

The fourth day of the San Joaquin Fair was successful in point of attendance, and though somewhat short of the day preceding there was a large concourse in the afternoon. By actual count, and that made before the carriages stopped arriving, there were six hundred and fifty inside the grounds and in this enumeration were not included hacks and other vehicles which were carrying passengers. The stock parade in the forenoon was very good the animals encircling the track, and in quality rather beyond the display of former years.

The first race was a special trotting race, best three in five, for a purse of \$400. The starters were A. L. Hinds' Setting Sun, A. T. Jackson's Ed, James Edge's Ned and R. E. Burns' Nellie Burns.

Ned sold favorite in the pools for \$30, Nellie Burns second for \$16 and the field for \$13. In the choice of positions Ned drew the pole, Ed, second, Setting Sun third and Nellie Burns outside.

After the third attempt to start the horses were given the word, with Nellie slightly in the lead. Setting Sun broke badly on the start, and could not be pulled down until he had rounded the turn. Nellie kept the lead, and passed the half mile in 1:15, with Ed, second. Nellie came under the wire with a slack rein in 2:32, Ed, second, Setting Sun third, and Ned, the favorite, fourth.

On the second heat Nellie led off with Ed, alongside. Setting Sun broke badly and fell behind.

At the half mile Nellie and Ed. were together, in 1:12. From that point Ed. took the lead to the three-quarter post, and went under the wire in a jog, in 2:33, with Nellie about six lengths behind, and Setting Sun and Ned in the order named.

There being some dissatisfaction at the manner Ned was driven, the judges supplanted Edge with Houser, but the change did not bring improvement as the heat was won by Ed. in 2:33 with Nellie second, Setting Sun third, Ned a long way back. With Edge again behind Ned there was a change, as he won the heat in 2:33, Ed. second, Nellie third and Setting Sun last. For the fifth heat Goldsmith took the place of Jackson behind Ned, and the race was brought to a conclusion by Ed. winning the heat in 2:34, the other positions being as in the following:

SUMMARY.

Table with 5 columns: Name, Purse, Time, Position 1, Position 2, Position 3, Position 4. Includes entries for San Joaquin Agricultural Society, A. T. Jackson's Ed, R. E. Burns' Nellie Burns, Jas. Edge's Ned, and A. L. Hinds' Setting Sun.

The next race was the District trotting race, 2:36 class, for a purse of \$400. The starters were W. D. Hamilton's Wormwood, Fred Arnold's Ha Ha and D. C. Horton's Magdalene.

At the top of the bell Wormwood took the lead and kept it during the heat. Magdalene came in second, about half a length ahead of Ha Ha, who was third. Time, 2:41.

In the second heat Ha Ha took the lead and was slightly in advance of Wormwood until the half-mile post was passed, when the latter made a spurt and came up to the brown horse. Both horses came down the homestretch in good shape, Ha Ha passing under the wire a length ahead of Wormwood. Magdalene far behind at the end of the heat. Time, 2:34.

A good start was given for the third heat, with Ha Ha somewhat in the lead. Wormwood crowded him closely from the three-quarter post, but broke on the finish. Ha Ha won the heat in 2:31; Wormwood, second, and Magdalene, third.

On the fourth heat the horses started nearly even, with Wormwood, under the charge of Donathan, in the lead and Ha Ha close behind. When turning into the homestretch Ha Ha took the lead and kept it to the finish, winning the heat and first money in 2:32; Wormwood received second money, and Magdalene third.

SUMMARY.

Table with 5 columns: Name, Purse, Time, Position 1, Position 2, Position 3. Includes entries for Fred Arnold's Ha Ha, W. D. Hamilton's Wormwood, and D. C. Horton's Magdalene.

The last day of the fair was like the others in one respect as the second and third races brought disaster to the favorites, and this meeting will be long remembered as one which brought grief to the big bettors, and corresponding joy to those which gave support to the short end. A list of favorites "downed" was posted on the blackboard at the poolrooms, Friday night, and it extended from top to bottom of the slate. The first race was in the morning, at 10 o'clock, the conditions being that buggies were to be hauled, the starters Jenny Lind and J. G. Blaine. The songstress had no difficulty in defeating the statesman by distancing him in the first heat in 2:43. In the afternoon the first race was Pacific Coast Running, heats of a mile for a purse of \$800. The starters were Forest King, Billy the Kid, Bachelor and Birdcatcher. At the poolrooms the night before Forest King was favorite, Billy the Kid pressing him closely, but on the ground before the start there was a change. Billy brought \$50 to \$25 on Forest King, and \$6 on the field.

The first heat a good start was effected, Forest King leading, and though Billy ran close upon him at the finish King won by a head in 1:43. Pools after the heat were \$50 on King to \$40 on Billy, field \$10. After the start for second heat Bachelor took the lead, and with Birdcatcher second the first division of the mile were made. Billy endeavored to close at the finish, but Bachelor had it all his own way, winning by two lengths in 1:46. There was lively work among the bettors. Forest King brought \$100, Bachelor \$90, and as under the State Fair rules these were the only ones which could start, there was no chance for the backers of Billy excepting to "plunge" on the approaching duel. There was a claim of foul by the rider of Forest King which was not allowed and Bachelor crossing the score at least thirty yards in the lead in 1:48.

SUMMARY.

Table with 5 columns: Name, Purse, Time, Position 1, Position 2, Position 3. Includes entries for San Joaquin Fair, Hill & Gries' b c Bachelor, G. L. Jones' b h Forest King, S. J. Richardson's b h Billy the Kid, and Caleb Dorsey's b h Birdcatcher.

The two-year-old trotting race resulted, anomalous as it may appear, in a walkover for Apex and Luella, the conditions requiring three starters. The windup was a pacing race for 2:25 class, purse \$500, in which started Shaker, Mand and Prince, positions as starting as above.

In the pools Shaker sold for \$50, against \$40 for Mand, and \$10 for Prince. On the first heat Prince broke some after the start off. Mand went ahead to the quarter, with Shaker close behind. Mand broke at the half-mile and

Shaker forged ahead, coming under the wire in 2:26, Mand four lengths behind, and Prince barely inside of the distance flag. The pools now sold at \$100 for Shaker against \$50 for the field. The horses got a good send off on the second heat, Mand leading to the first turn, with Prince close to her. Mand led to the half-mile in 1:09. Prince went off his feet and Shaker paced up to the mare, but could not pass her. Mand went under the wire easily in 2:23, Shaker second and Prince third.

On the third heat the horses got a good start, but Mand broke badly on the first turn and Prince and Shaker went by her, reaching the half mile in 1:14. At the three-quarter post Shaker and Prince were together, but the former reached the finish half a length ahead of Prince in 2:27.

On the fourth heat the horses went off well together, but Prince fell back at the half mile. Shaker broke on the homestretch, and Mand won the heat in 2:24 by a length, Prince second.

The horses were sent off in good shape, Prince leading. Mand passed him at the three-quarter post and won the heat by a length in 2:26, Prince second and Shaker third.

SUMMARY.

Table with 5 columns: Name, Purse, Time, Position 1, Position 2, Position 3. Includes entries for H. J. Agnew's Mand, M. F. Odell's Shaker, and S. C. Tryon's Prince.

And thus closed the speed department of the San Joaquin Fair for 1884. That it was a successful exhibition notwithstanding that many of the purses offered failed on account of casualties to the horses engaged is conceded on all hands. In the main everything was satisfactory and there was a pleasant week for all save those who were so "badly left" in supporting favorites.

Phallas the King of Stallions.

Mr. H. D. McKinney, "Mambrino," furnishes the New York Spirit with the following historical sketch of Phallas:

In the Spring of 1879 the writer, in company with Mr. J. I. Case, visited the breeding establishments of Kentucky. Among other noted breeders we paid a visit to Major H. C. McDowell's Woodlake Farm. A number of young animals were brought out for inspection, among them a plain-looking two-year-old colt, head and ears liberally endowed, but true to his lineage; good length of neck, a good, deep shoulder, excellent middle piece, good width of well rounded hips, good stifle, deep quarters, legs and feet excellent. A negro boy was put upon his back, and he showed a clean, open 3:30 gait. He was sired by Dictator, dam by Clark Chief, son of Mambrino Chief; grandam by Ericsson, another son of Mambrino Chief, and on thoroughbred lines. The writer is well known as being extremely fond of what he believes to be the stoniest blood ever infused into a trotter; certainly turf history has for years demonstrated that position. Then, with the coveted Mambrino Chief blood, he found a sire full brother to a horse that he has ever believed to be the equal of any horse ever foaled, the mighty Dexter. Dictator, then to fame comparatively unknown—by the way, a party, who writes much, has written of him "that he couldn't trot a little bit." No doubt he intended to be honest in his statement, but his statement is absolutely false. Dictator could trot, and fast. For authority I would respectfully refer to Colonel John W. Conly, of Chicago, who had the pleasure of not only watching his development as a young horse, but has often driven him personally. I have seen him ridden at speed, and pronounce him a horse of perfect action and balance. So we found in Phallas the blood of Hambletonian (the greatest and grandest trotting progenitor that ever lived) on American Star, with double lines to Mambrino Chief, an individual of strongly-marked character, but plain Phallas and a full sister to Romance, called Novel, by Princeps, were selected. The later, we believe, will make a grand broodmare and possibly a trotter. In justification of this selection, we will say she subsequently became the property of that astute gentleman and fine judge of a horse, David Bonner, Esq., who purchased Novel in foal to the Dictator-King-Phallas. Novel produced him a filly (?) foal; if you wish to learn his appreciation of it, ask his price. As Novel has become one of the noted broodmares of Woodburn, the selection may be considered a good one. For Phallas and Novel Mr. Case paid \$1,000, and as above stated, subsequently sold Novel for \$1,000, so you now know the price of Phallas. Why named Phallas? I give it up, but would myself like to know the origin of the euphonious title.

As Phallas was engaged in the Lexington Stakes, Mr. Case concluded to leave the colt, with Colonel West, in charge of George Brasfield, who had been successful in developing phenomenal youngsters. The colt acted so well after breaking that Brasfield paid the second installment in his stake; but later on he became stale in his work, and Mr. Brasfield wisely advised Mr. Case to let up in his development, as he was a "growthy" colt. Mr. Case had him brought to his home in Racine. Since then he has been in the hands of Edwin Bither, and how successfully he has developed him, and also Jay-Eye-See, the records attest. While making a record for his horses, what driver has made for himself such an enviable record as Edwin Bither?

In his three-year-old form he was worked but little for speed. The same may be said as a four-year-old, but he showed conclusively that he would, when called upon, develop great speed. As a five-year-old, he made a limited season in the stud, and then his development really commenced in earnest. He exhibited such a fine turn of speed that Mr. Case concluded to exhibit him in September at the great Horse Show in Chicago.

In the early Spring Phallas had a very severe attack of the prevailing pink-eye, or scarlatina. The skin became badly diseased, and, as a sequence, we now find him with innumerable small spots all over his body, denuded of hair, giving him a spotted appearance.

We next find him Chicago for exhibition in what is termed a "ring show." Attending the show was Mr. Corbitt, the extensive breeder from California. He had been spending several weeks searching for a first-class stallion to take to California. On our way to the track in the morning I called his attention to Phallas, stating he would be shown in the ring. In due time the stallion appeared. They were a grand lot of the Blackwood, Jr., style, and he, driven by friend Wilson, was among the lot. Many of your readers, who have seen Phallas in his ungaily jog, will smile when they read of Phallas as a "dress parade" horse. As he moved up and down the stretch, a competitor of the blue ribbon winners, I must say I felt "a little sick," as the boys have it. Ribbons and diplomas were distributed, but none for Ed and his pet. Going around to the stable I found Ed somewhat dejected. Says I, "Ed, how fast can Phallas trot this track?"

"In 2:24 or 2:25," responded Ed.

"Can he do it to-morrow?" "Yes, snare," was his decided answer. I then remarked: "If you will show him a mile to-morrow, Ed, we will make these dress-parade-blue-ribbon-door-vedy chaps take some notice of a good horse." Finding Ed as anxious as Case or myself, I went to Mr. Hall and secured his permission to show him between heats the next day. Returning in the evening with Mr. Corbitt, I remarked, "How did you like Phallas?" "What? Do you mean that spotted-colored horse? He color kills him."

I explained the spots, remarking, "After he trots to-morrow the spots won't show as plain."

At the appointed time Ed was out with the "spotted colt." He takes the word. Without skip or break he passes under the wire in 2:22. Ten thousand people are now loudly applauding the neglected spotted colt. Mr. Case is radiant with smiles. Ed makes his acknowledgment to the crowd, and possibly the writer smiled audibly.

Returning again in the evening, Mr. Corbitt had evidently found the color not quite so objectionable, and asked for price, which was promised him after seeing Mr. Case. Ten thousand Mr. Case finally agreed to take. Meeting Mr. Corbitt, I remarked to him, "You like Phallas, and you are right. Ten thousand will buy him now, and I suggest if you intend to buy, close at once, as Mr. Case is a peculiar man."

Mr. Corbitt replied, "I think I will take him, but would prefer not to close until morning."

Very early next morning I was down stairs intending an early visit to the track. The first man I met was Mr. Case. After the morning salutation I was not surprised as he remarked, "I don't believe I had better sell Phalles. I could honorably withdraw my proposition now, couldn't I?" "Certainly," I replied, "your offer was made yesterday." Directly down stairs came Mr. Corbitt, his pleasant face radiant with smiles.

"Well," said he, "I believe I will take Phallas if I can buy him for \$8,000."

"Too late; you cannot buy him at all. Mr. Case, as I warned you last night, has withdrawn, at least until after he consults Mr. Bither, his driver."

Says Corbitt, "I have been two months running about looking for a good horse—and everywhere some driver, rabber, or commission man has interfered with my purchase."

Mr. Case kept his spotted colt, and has the honor and pleasure of owning to-day the fastest gelding, and fastest, and possibly best, trotting-bred stallion in America. Phallas is now seven years old, 15 1/2 hands high, and in etnd form will weigh over eleven hundred pounds. As a campaigner he is remarkable. He never shrinks in his races, and is always ready for his oats. His disposition is perfect. For two years past not only has he had the skillful handling of Mr. Bither but he has had with him as a groom one of the best men that ever cared for the conditioning of a first-class horse—Billy Conley. When others have feared defeat Billy has said, "He'll do."

Pendragon on Vanderbilt.

From the following, which is cut from The Referee of Sept. 7th, it is manifest that the views expressed in this paper some time ago are similar to those on the other side of the Atlantic.

Had the former owner of Mand S. been contented with declining all offers of matches without casting approbrium on those who made propositions, and offensively implying that all owners of trotters who snuffed them to perform in public, were of low character, no one could have taken exception. As it stands his conree has awakened contempt, and brought deserved rebukes from all sides.

After Mand S. had trotted in all of her public races while he owned her, the absurdity was heightened and he could not with consistency, occupy the position of high morality without forcing better evidence of a "change of heart." Taking the whole case into consideration "Pendragon" is not a whit too severe in his strictures, and such will be nearly the unanimous verdict of our readers.

Doubtless readers are by this time pretty well tired of the Mand S. and Jay-Eye-See rivalry. I am. Nevertheless, there are one or two further notes on the subject which it is necessary to make; at the same time there is no compulsion put on anybody, who doesn't like, to read them. A week or two back information as to the sale of Mand S., by W. H. Vanderbilt to Robert Bonner was given on this page. At the time I remarked on the peculiar fact that the price, \$40,000, or \$8,000 sterling, though large, was about half that at which the mare had been previously valued by her owner. Some time back the American Press stated that Vanderbilt had been offered, and had refused, more money for Mand S. than had ever been paid for any horse, trotter or galloper. It now appears that the amount turned away was no less than £20,000 of our currency. Says the paper which professes to be in the millionaire's confidence, and which has been bearing up very strongly for him of late, "That Mr. Vanderbilt was actuated by no ulterior motives in thus suddenly disposing of his favorite horse will readily be understood when the fact that he had refused from responsible parties an offer of \$100,000, for Mand is considered." Those who know Vanderbilt best, those who have had anything to do with the various gambling attacks he so deftly manipulates, may be amused at what follows. "He loved her as a father loved his child, and though parting with her to escape from importunities and annoyances, he was careful to place her in the hands of kind and watchful friends, and in Mr. Bonner the queen of the turf will find a master who fully admires her beauty and appreciates her great qualities." Quite pathetic—except where it is pathetic—I declare!

Further on we come to a letter from Vanderbilt himself, in which he states that he has sold Mand S. "for less than one half of what he was offered by other parties." The vendor thought that if he sold Mand S. to anybody other than Mr. Bonner the public would still consider he had an interest in her. A message was sent to Mr. Bonner that he might if he liked have her at the reduced price, and Mr. Bonner at once accepted the offer. This is a delicacy of feeling and a deference to public opinion which has been singularly absent from Vanderbilt's non-sporting transactions. The real and undoubted reason for Mand S.'s sale was Vanderbilt's horror of anything in the way of betting, and the fear that he would be dragged into that detestable vice if he retained possession of the wondrous trotter. He complains bitterly about being "importuned," the complaint being directed against Mr. Case and the others who are so anxious to match Jay-Eye-See against Mand S. No one can accuse me of any overweening affection for betting or betting men; therefore, perhaps, am the better qualified to give an opinion with regard to Vander

hilt's hue of action. Honestly, then, I think that when the greatest and as some say, the most daring manipulator of speculative stock the world possesses—when a man whose "operations" either as a bull or as a bear are conducted on a scale of magnitude that has no comparison in this country—when such a man as this trembles lest he should be led into the sins of match-making and betting, he is playing the game a trifle too low down, and must be laughing in his sleeve at such as believe in his protestations. Prejudice against betting could not go further than this, if Vanderbilt is sincere in what he says; but it would be paying his acumen a very poor compliment to suppose that he really does subscribe to the narrow-minded and straitlaced doctrine which actuates some of his evasions of the Jay-Eye-See "impertinities."

Whenever I hear men who do not mind how much they gamble on the Stock Exchange reviling betting men and thanking God aloud that they have never participated in such villianry, I am reminded of a vastly satiric picture I saw once in a foreign gallery. A hired bravo has committed a cruel and dastardly murder. At the moment that he withdraws the poniard reeking with the blood of his victim the bell of a neighboring church tolls out the hour, and the assassin sinks upon his knees and says, "Jesus be praised; I have kept the fast!" This apologue is capable of application to a variety of circumstances wherein prejudice strains at the gnat and swallows the camel. I must confess it never seems so appropriate as when applied to the leviathan gamblers of the city who never cease to affect horror and loathing for the wickedness of turf speculation.

Miss Woodford's Two-Mile Heats.

At Sheepshead Bay, September 20th, Miss Woodford broke the record at two-mile heats. The following are the details of the race:

September 20th.—Fifth renewal of the Great Long Island Stakes, for all ages at \$250 each for starters, with \$2,500 added, of which \$500 to the second, the winner also to have a claim on the Woodlawn Vase presented by the Dwyer Bros. to the C. I. J. C. and which will become the property of the subscriber winning the race two years in succession; horses entered by January 1st to pay \$50 forfeit; those entered Sept. 1st, when the stake closed, half forfeit; three-year-olds to carry 95 lbs.; four-year-olds, 108 lbs.; five-year-olds and upward, 114 lbs.; closed with 14 subscribers on January 1st and 4 on September 1st, of which 13 paid \$50 and 2 paid \$25; two-mile heats.

Notes.—Mr. F. Gebhard has a claim on the Woodlawn Vase, having won the race in 1883 with Eole. Dwyer Bros., br f Miss Woodford, 4, by Billet, dam Fancy Jane, 105 (carried 107) lbs. J. McLaughlin 1 1 P. Lorillard's b g Drake Carter, 4, 105 lbs. Olney 2 2 E. Corrigan's ch f Modesty, 3, 92 lbs. West 3 3 Time, 3:33, 3:31.

Betting.—Before the first heat: 100 to 35 on Miss Woodford, 4 to 1 against Modesty and 6 to 1 against Drake Carter. After first heat: 100 to 20 on Miss Woodford, 8 to 1 against Drake Carter and 12 to 1 against Modesty. Pools.—Before the race: Miss Woodford, \$600; Drake Carter and Modesty, \$110 each. After the first heat: Miss Woodford, \$200; the field, \$130 Mutuels paid \$6.35 and \$5.75.

Rarely has a race of the importance of the Great Long Island Stakes been attended with so many rumors as that of yesterday. At first it was said that Miss Woodford would not start, and that Gen. Mourne had been "scratched." The latter was true and so was the first in a measure. From the many stories afloat about Miss Woodford it was learned that Roe, the trainer for the Dwyers, was so opposed to running her in a heat race that he threatened to resign at once. In this it is said, he was sustained by Mr. M. F. Dwyer, on the strength of which Roe gave the filly a light noontide feed. Afterwards Mr. Philip Dwyer ordered Roe to get the filly ready for the race, which Roe declined to do and left the stable. Frank McCabe, who has been Roe's assistant, then took her in charge both before and after the first heat. The stories had no effect on the betting for the crowd could see no other horse in the race, and they literally threw their money into the boxes, content with any odds they could get, many at the same time backing Modesty for a place.

First Heat.—Drake Carter took the lead with the flag, and was followed by Miss Woodford and Modesty at about two lengths apart from the whole of the first mile. After they had passed the starting point in the second mile Modesty gradually closed upon Miss Woodford, and at the end of a mile and a half the Corrigan "green" showed a trifle in front of McLaughlin, both running very easily a length behind Drake Carter. As they began the last half mile McLaughlin touched Miss Woodford with the spur, to which she responded, and very soon after again showed second, and laying at Drake Carter's saddle skirts they began the last quarter with Carter leading by three parts of a length. There was no change until they were well past the last furlong post, when McLaughlin gave Miss Woodford her head and amid loud applause she won the heat under an easy pull by three lengths, with Drake Carter, second, seven lengths in front of Modesty. Time, 3:33. The best on record for the first heat in a race of two mile heats, Willie D.'s first heat at Prospect Park, in 1879, being beaten by a second and a half. For, although Bradamante was credited with winning a first heat in 3:32, and the second in 3:29 at Jackson, Miss., in 1877, the accuracy of that time made and the measurement of the track have always been disputed.

Second heat.—After the first heat Miss Woodford was taken over to the Dwyer stables, where she cooled out under the charge of McCabe, Drake Carter doing the same near the starting point under Byrne's charge, while Modesty was attended to on the paddock by Rogers. At the third bell the three horses went promptly to the post, from whence they were sent without delay. As in the first heat Drake Carter took the lead, and opening a gap of from two to three lengths he led the two fillies lapped for the whole of the first mile and until they had run nearly three furlongs in the second mile, McLaughlin then moved up with Miss Woodford, and as Modesty had had enough she gradually dropped back. At the end of the mile and a half Carter only led by a length, which so rapidly decreased that just before they began the last quarter Olney went to the whip and Miss Woodford took the lead, seeing which the crowd began shouting and they continued to do so until she was well past the post, she winning the heat and race by four lengths, with Drake Carter, second, with Modesty just opposite, if she was really not outside, the distance stand. Time, 3:31, which makes it the best race on record for both heats. The fractional time was officially taken as follows:

Table with 4 columns: Quarters, Running Time, Quarters, Running Time. Values include 25, 0:50, 1:17, 1:47, 2:14, 2:40, 2:56, 3:06, 3:33, 27, 0:53, 1:19, 1:45, 2:12, 2:38, 3:04, 3:31.

Value of the race to the winner, \$3,400, and to second, \$250, the entrance money being deducted in both cases.

The Coney Island Jockey Club.

[New York World.]

Few of those present at the running meeting given at Prospect Park, Long Island, in June, 1879, by some of the younger members of the American Jockey Club, imagined that the temporary association then formed would bloom into what is now the Coney Island Jockey Club. But the business energy and the thrift which made that meeting a success, have been the pre-eminent causes of the club's present popularity. The Winter following the meeting mentioned above saw the organization of the Coney Island Jockey Club, with Leonard W. Jerome, J. G. K. Lawrence, John G. Hecksher, Gen. Butterfield and others actively at work pushing its interests at all points. Land was obtained at Sheepshead Bay, at first, in small quantities, which has been added to from time to time until there are now 150 acres within the gray and cerise-painted fence that divides the club's estate from the innumerable "truck" farms that make one enormous vegetable garden for the twin cities of New York and Brooklyn. From the turning of the first sod for the new racing estate in 1880 until the present time, the work by the Coney Island Jockey Club has been done in a business-like manner by business-like people. The stables, stables and other buildings were built to stay. And right here it may be said that during the senseless panic a few days ago, those who thought the stand was falling were never more mistaken. It is the most substantial in this section of the country, and its roof could be utilized to accommodate a crowd, as the stands in England are, without for one instant endangering the safety of the structure.

Nor have the public been anyway backward in their support of racing at Sheepshead Bay. Every dollar spent by the club for the benefit of racing has been met by an additional dollar being brought in at the gate; and to-day the stock of the club is held so high that at the last public sale shares, the value of which are \$100, sold for over \$160, and that in face of the fact that the club spent over \$70,000 in improvements last Spring, one of which was the enlarging of the track from a mile to a mile and a furlong, which from a public standpoint cannot be said, by the test of two race meetings, to have been an improvement worth the money expended. Of the other improvements, such as the betting ring, the new stables, the increased accommodations in the saddling paddock, too much praise cannot be given.

But perhaps the most pronounced reason for the great success of the club with the public has been due to the fact that the club's racing officials remain nearly the same from year to year. They have become expert in their duties, have a thorough knowledge of all those they have to deal with, and therefore the work asked of each is done not only with skill and promptness, but in such a way as to inspire public confidence, and is the nearest to that of the paid employee system in vogue in England, which at least for some years to come will not be acceptable to the American race-going public. Of the occupants of the judges' stand, Messrs. J. H. Bradford, Lawrence Kip and J. G. K. Lawrence, are gentlemen of means, and are well known in business circles both in Boston and New York. Mr. Bradford, the presiding judge, is connected with several prominent railroads in and around Boston, which is really his home. Mr. Kip is more of a New Yorker, and except during the Summer, when he and his family make their home at Richfield Springs, there are but few fine days that he does not drive up the road either single or double with a "turn-out" able to get away from almost anybody's dust.

As to Mr. Lawrence, who is the secretary of the Club and its handicapper, there are but few men with a better knowledge of racing laws and usages, or with a quicker eye to detect a horse that is only out for an airing, and whose backward position in a race is due to a wish on the part of his owner to get the weight off in some coming handicap, which it is among Mr. Lawrence's duties to assign. Thus the three gentlemen are eminently fitted for the position of judges, and although they have judged some close finishes, beyond a few discounts, the hoisting of the numbers has been received with a shout of public approval.

In the timing stand are found Capt. William M. Conner and Mr. Cornelius Fellowes, whose skill with the watch in splitting seconds and timing fractional parts of races is accepted as correct by the stanchest believers that time is the true test of racing. Both gentlemen are well-known in New York, where Mr. Fellowes is one of a firm of well-known brokers, while Mr. Conner has been more or less identified with the turf, both as owner and correspondent since he was just about able to climb into the saddle, and that he not only knows a good horse but is a graphic race writer, his letters years ago to the Spirit of the Times over the signature of Marius are proof in point. But in laying down the pen he took up the watch, and as mine host of the St. James Hotel, of this city, he has made a home there for all the prominent turfmen visiting New York. Of the other positions, that of dismounting judge is filled by Mr. H. Skipwith Gordon, of Baltimore. It is not an arduous position, but it is necessary to the proper finish to all races that all riders shall dismount under the eye of an official and carry their weight direct to the scales, so that all interested may be confident that the full weight was carried by each and every competitor in the race. Another position that is not over-arduous is that of starting judge, which Mr. A. Wright Sanford "doubles," being one of the Executive Committee, he having charge of the police arrangements. Few gentlemen in New York are better known than Mr. Sanford, or are more active during the racing. With the second bell he goes to the starting point with the starter, and is the judge as between him, the owners and riders of horses about to contend, and the general public, and his report to the presiding judge, at the end of each race, that the start was good, bad or indifferent, settles all complaints. As to the starter, Mr. J. F. Caldwell, he has filled the position for two years with much satisfaction, as he also has at many other places. That he has made some bad starts no one will deny, but that they were accidental and not intentional is believed by all, with very few exceptions. Mr. Caldwell's connection with the turf dates back for a good many years in Tennessee, where both as owner and trainer of trotters and runners he has had considerable experience. In fact it may be said that he has grown gray in the business.

Another position involving thorough integrity, with quickness and dispatch, and of which the public has no other knowledge than the hoisting of the numbers of the starters and names of the riders, is the clerk of the scales, which is filled at Sheepshead Bay by Mr. F. A. Lovercraft, who, as Assistant Secretary and Treasurer, has been connected with the Coney Island Jockey Club ever since its first organization. Mr. Lovercraft is also Secretary of the Jerome Park Villa Site Company, which owns the Jerome Park racecourse, and is also Mr. Wallack's business manager of the Star Theater in this city, all the books of which are not only well kept, but to the admirers of clean work they are simply perfection.

Coney Island.

Sept. 18th—Great Eastern Handicap Sweepstakes, for two-year-olds at \$150 each for starters; \$30 forfeit for horses entered by Jan. 1, 1884, or \$15 only if declared by Sept. 1, 1883; horses entered by Aug. 15th, when the stake closed, to pay \$15 forfeit; the C. I. J. C. to add \$5,000, of which \$1,000 and 20 per cent of the stakes to the second, and \$800 and 10 per cent to the third; closed with 97 subscribers on Jan. 1st, and 20 on Aug. 15th, of which 64 paid \$15, 16 paid \$30, and 13 paid \$75; three-quarters of a mile.

Sept. 18th—Great Eastern Handicap Sweepstakes, for two-year-olds at \$150 each for starters; \$30 forfeit for horses entered by Jan. 1, 1884, or \$15 only if declared by Sept. 1, 1883; horses entered by Aug. 15th, when the stake closed, to pay \$15 forfeit; the C. I. J. C. to add \$5,000, of which \$1,000 and 20 per cent of the stakes to the second, and \$800 and 10 per cent to the third; closed with 97 subscribers on Jan. 1st, and 20 on Aug. 15th, of which 64 paid \$15, 16 paid \$30, and 13 paid \$75; three-quarters of a mile.

Excitement had not begun to die away when a new impetus was given to it by the announcement that there were twenty-four starters for the Great Eastern Handicap, and long before the track could be cleared the youngsters were being given the necessary warming-up gallop while so great was the crowd at the starting point that when the horses did assemble there but little more could be seen than a great mass of color over the heads of the assembled crowd. Probably Starter Caldwell never had a more difficult task than in getting the twenty-four starters in shape for an even start. Finally, after twenty minutes' delay, during which there were half a dozen or more breakaways, in nearly all of which Adolph was always prominent, the flag was dropped, with Adolph leading followed by Lizzie Dwyer, Goano, Ten Stone and East Lynne, with the others all well up and in a bunch. Before they had run a furlong Ten Stone took the lead, and lapped by Goano and Lizzie Dwyer they ran out so far clear of the others that there was a gap of several lengths between them and Skookum, who with one of the Californians led the others. Nor was there any change in the run round the turn, and at half the distance Ten Stone led by fully two lengths. As they came to the turn Goano gradually closed up, leaving Lizzie Dwyer, who in dropping back was joined by Mission Belle and Eachus, nearly all of the others being lost in a dense cloud of dust. Ten Stone retained his lead with ease to the beginning of the last furlong, when, as McLaughlin closed up on him with Goano, Caldwell began riding, while soon after Fitzpatrick got out of the rack with Pardee and, coming like a whirlwind, he forced both McLaughlin and Caldwell to do their best, and the result was a very exciting finish, in which Ten Stone retained the lead, winning by a neck from Goano, he a short head in front of Pardee. Several lengths away came Florio, followed by Eachus, Harefoot, Mission Belle, the Julietta colt, Lizzie Dwyer, and the others, of which Vigilance, Radha and the Heliotrope colt brought up the rear. Time, 1:16, or half a second faster than Dutch Roller won the same race in last year. Fortunately, as far as known, the race was run without accident, and Rayford, the rider of Adolph, was the only jockey guilty of willful disobedience, and he was only suspended for one day. Value of the stake to winner, \$7,560.50, to the second, \$2,553, and to the third, \$951.50, their own entrance in each case being deducted.

Sept. 18th—Great Eastern Handicap Sweepstakes, for two-year-olds at \$150 each for starters; \$30 forfeit for horses entered by Jan. 1, 1884, or \$15 only if declared by Sept. 1, 1883; horses entered by Aug. 15th, when the stake closed, to pay \$15 forfeit; the C. I. J. C. to add \$5,000, of which \$1,000 and 20 per cent of the stakes to the second, and \$800 and 10 per cent to the third; closed with 97 subscribers on Jan. 1st, and 20 on Aug. 15th, of which 64 paid \$15, 16 paid \$30, and 13 paid \$75; three-quarters of a mile.

Racing at the Grass Valley Fair.

The notes taken by our commissioners to the Grass Valley Fair having been lost by accident, requiring the material to be collected from other sources, the following report of the racing is three weeks behind time. Acknowledgments are due to George Fletcher, Esq., Secretary for courtesies extended in connection herewith.

The exercises opened, at Watt Park, on Tuesday, September 2d, with fine weather, and a large attendance of spectators for the first day. The weather held unexceptionable throughout the meeting, and the number of visitors was greatly augmented on the second day, holding from that time to the close at the maximum. The farmers were well represented, and Nevada City and the towns on the ridge turned out largely to enjoy the sport. The racing was interesting and satisfactory, but one unpleasant incident marred the entire meeting, and this was not unpleasant because it created any disagreeable jar, but because it called for the administration of a mild corrective from the stand. It was, in the case of the half-mile dash on the programme as the third event of the opening day. The horses were called and started in due time, but the judges not being satisfied with the appearance of things declared the run void, declared the pools off, and ordered the race to be run over again the following day. The following are the summaries transcribed from the secretary's record:

WATT PARK, GRASS VALLEY, CAL., September 2d, 1884.—Running: purse, \$250; for all ages; district horses; half mile heats.

Same Day—Trotting: purse, \$200; 2:55 class.

Sept. 3d—Purse, \$60; for all ages; half a mile.

Same Day—Running Stake; \$25 each; \$10 forfeit; \$100 added; three-quarter mile heats.

San Mateo and Santa Clara Fair.

The fourth annual exhibition of the San Mateo and Santa Clara County Agricultural Association opened under the most favorable auspices. From present indications the exhibit of stock will be greater than ever before. Fifty new stalls have been provided, and more are in course of construction. Every inch of space in the pavilion has been engaged. All the hotels are filled with visitors to the fair, and the city is crowded. The races commenced at 1 o'clock Monday afternoon with a running race, three-quarters of a mile dash, free for all, entrance \$25, forfeit \$10, with \$150 added, and \$50 to the second horse. The following entries were made: Quebec, Forest King, Dottie Dimple, Jou Jou, and Beaconsfield. The race was won by Forest King, Jon Jon coming in second. Time, 1:15. The second race was a running one-mile dash, and the entries were: Arthur H. and Mischief. It was won by Arthur H. Time, 1:47. The third and last race was a two-mile handicap, contested for by Garfield and Bachelor. The horses sold about even in the pools. Bachelor carried 103 pounds and Garfield 110. It was won by Garfield. Time, 3:37. The following are the summaries:

SAN JOSE, September 29th.—Running Stake for all ages; \$26 each; \$10 forfeit; \$150 added; \$50 to second horse; three-quarters of a mile.

S. J. Jones' b b Forest King, by Monday—Abbie W., 5 years, 118 lbs. 1  
 Hill & Gries' blk f Dotty Dimple, by Ben Wade, unknown, 3 years, 105 lbs..... 2  
 H. Stover's cb g Quebec, by Norfolk—by Belmont, aged, 115 lbs..... 3  
 W. Kelly's b g Jou Jou, by Monday—Plaything, 3 years, 105 lbs..... 0  
 E. J. Baldwin's b c Beaconsfield, by Hockbocking—Aileen Allannah, 3 years, 108 lbs..... 0  
 Time, 1:15.

Same Day.—Running Stake; for two-year-olds; \$25 each; \$10 forfeit \$150 added; \$50 to second horse; one mile.

Hill & Gries' b c Arthur H., by Hockbocking—Maid of the Mist, 110 lbs..... 1  
 James Mees' Mischief, by Thad Stevens—Katie Pease, 107 lbs..... 2  
 Time, 1:46½.

Same Day—Running Handicap Stake; \$50 each; \$25 forfeit; \$15 declaration; \$250 added; \$100 to second; third horse to save stake; two miles.

G. Pacheco's br g Garfield, by Langford—Lodi, aged, 110 lbs..... 1  
 Hill & Gries' b c Bachelor, by Hockbocking—Maid of the Mist, 3 years, 108 lbs..... 2  
 Time, 3:37.

The second day of the fair was unfavorably affected by high winds and slight dashes of rain during the afternoon that caused the attendance to be much smaller than it would have been under more fortunate circumstances. The number of people in the park exceeded that of Monday and they made a fair showing.

The first race was for the trotting 2:22 class for a purse of \$750. The starters were J. A. Goldsmith's Manon, J. B. McDonald's Brigadier, and P. Farrell's Vanderlyn. Manon was such a high favorite as to prevent betting on the first place, and she was not sold in the pools. For second place Brigadier had the call at \$50 to \$20 for Vanderlyn. In the first heat, which was won by Manon in 2:26½, Brigadier first in front of Vanderlyn very handily, the pace being slow. In the second heat, won by Manon in 2:22, they all went away well together, Vanderlyn being last at the quarter and half. In the trot home he outfooted Brigadier easily and finished close to the leader. This caused a movement toward the pool-box, and a lively business was done, with Vanderlyn for favorite, at \$40 to \$15 for Brigadier; but the final heat, taken by Manon in 2:24½, again reversed the order, Vanderlyn breaking badly on the first turn and never getting dangerously near afterward. Brigadier was awarded second money and Vanderlyn third.

SAN MATEO AND SANTA CLARA AGRICULTURAL SOCIETY, September 30th, 1884. Trotting; purse, \$750; 2:22 class.

Manon, b m, by Nutwood—J. H. Goldsmith..... 1 1 1  
 Brigadier, b s, by Happy Medium—J. B. McDonald..... 2 3 2  
 Vanderlyn, b g, by Geo. M. Patchen Jr.—P. Farrell..... 3 2 3  
 Time, 2:20½, 2:22, 2:24½.

The second race was for the 2:30 class, for a purse of \$600. I. DeTurk's Anteeo, E. H. Miller's, Jr., Thapsin, and J. M. Learned's Adrian started. In the betting Anteeo headed the pool, selling for \$50 to \$30 for Thapsin and \$10 Adrian. In the first heat they got away even, Anteeo broke a short distance from the wire and lost fifteen lengths. Adrian was first at the quarter and half, Thapsin passing him on the hackstretch, but breaking badly and losing his advantage. The lower turn appeared to be Anteeo's favorite ground, for after passing the half-mile pole he cloaed the gap with a rnsn, and came into the last quarter with a lead that enabled him to finish first, with something to spare; Thapsin second, Adrian thrd. Time 2:28. The odds were now, Anteeo \$60, Thapsin \$17, Adrian \$10. In the second heat Anteeo broke in the same spot as before, but did not lose so much; Thapsin had a good lead at the quarter, with Adrian second. In the hackstretch Anteeo broke again, but caught quickly and settled into a steady trot that brought him first to the wire in 2:26½. He trotted from the half-mile pole to the score in 1:08½, heating Thapsin and Adrian to the stand. Still in the stretch Adrian finished second and Thapsin third, both running. In the third heat Anteeo broke at his chosen place again, but came to his trot again quickly and was second to Thapsin at the half-mile mark, and he repeated his tactics in the third quarter, beating the field, Adrian finishing close up, Thapsin third. Time, 2:31.

Same day—Trotting; purse \$600; 2:30 class class.

Anteeo, b s, by Electioneer—I. De Turk..... 1 1 1  
 Adrian, b s, by Reliance—J. M. Learned..... 2 3 2  
 Thapsin, blk g, by Berlin—E. H. Miller, Jr..... 3 2 3  
 Time, 2:28, 2:26½, 2:31.

The fair and races drew a large crowd of visitors on Wednesday. The weather was quite cold but clear. The stock parade in the forenoon was one of the finest exhibitions of live stock ever seen here for the number of animals shown, and the high quality of all classes. At 2 o'clock the unfinished special trot was called up. When it was postponed Tuesday night Ed, Setting Sun and Ned each had a heat. Before the start Ned had the call in the betting, the pools going Ned \$30, Setting Sun \$10, the field \$10. Ned won the fourth heat with something to spare, Ed second, Setting Sun third, Sorrel Ben distanced. Time, 2:39½. There was a change of drivers behind both Setting Sun and Ed, by order of the judges, and the horses were sent away for the third heat, Ned the favorite at \$20, \$5 over the field. At the start Ned broke and lost ground, Setting Sun leading to the quarter and half. Ed went with a mixed gait between a trot and a run from the start, and at the three-quarter pole staggered a few strides and fell, carrying the inside fence down with him. Ned got squared about the half-way mark and rapidly overhauled Setting Sun, heating him home by three lengths; Ed distanced. Time, 2:35. Ed was choked down, but his driver let go of his head in time to save his life, and beyond a slight bleeding at the nose, the horse did not seem to be injured by the fall.

Oct. 1st—Special trot for named borses.

Ned, b g, by Overland—J. Edge..... 2 3 1 1 1  
 Setting Sun, cb g, by Billy Hayward—A. L. Hinds..... 3 1 2 2 2  
 Ed, b g—A. T. Jackson..... 1 1 3 3 dis.  
 Sorrel Ben, cb g—Tim Kennedy..... 4 4 4 dis.  
 Time, 2:42, 2:36, 2:38½, 2:39½, 2:35.

The first race on the regular programme of the day was running, half-mile heats. The starters were Hill & Gries' Dotty Dimple, J. W. Adams' Anut Betsy, and H. Storer's Quebec. In the pools Dotty Dimple was the favorite, the odds being Dimple \$50, Anut Betsy \$24, Quebec \$16. For the first heat they got a good start, the favorite making the running from the dropping of the flag. She reached the three-quarter pole a length in front of Anut Betsy, Quebec waiting two lengths farther back. Up the stretch Anut Betsy drove hard for the heat, but Dotty Dimple was first to the wire by a neck, Quebec third, two lengths behind. Time, 49½ seconds. When the pool selling opened after the heat, Dotty Dimple still sold first choice, at \$30 to \$25 for the field, but the odds steered around to Dimple, \$14, the field \$24. Before the start for the second heat, it was rumored on the track that an arrangement had been effected whereby "the field" was to win the race. If there was any such arrangement it miscarried. Quebec had a little the best of the start, but the three were all lapped at the head of the stretch. From there, Dimple came in steadily, winning the heat and race by half a length from Anut Betsy, Quebec third, and a length farther off. Time, 49½ seconds.

Oct. 1st—Running stake; \$25 each, \$10 forfeit, \$200 added; \$75 to second horse; half mile heats.

Hill & Gries, blk f, Dottie Dimple, by Ben Wade, dam unknown, 4 years, 110 lbs..... 1  
 J. W. Adams, b f, Anut Betsy, by Hardwood, dam Peggy Ringold, 4 years, 110 lbs..... 1  
 H. Stover's cb g Quebec, by Norfolk, dam by Belmont, aged, 110 lbs..... Long 3  
 Time, 0:49½, 0:49.

The second event was a dash of a mile and a half, with G. L. Richardson's Billy the Kid, E. J. Baldwin's Beaconsfield, and W. Kelly's Jon Jon at the post. In the betting Billy the Kid was rated at \$50, Jon Jon \$40, and Beaconsfield \$27.50. When the flag fell Beaconsfield made the running, with Billy the Kid at his girth, and Jon Jon a length behind. They ran the first half in this order in 51 seconds. A little further on Beaconsfield drew ahead gradually, and when half the distance had been run he had a length of daylight behind him. This gap was never closed, and Beaconsfield won with a good bit left; Billy the Kid second, Jon Jon five lengths off. The second half was won in 53 seconds, and the third in 53½. Total for the mile and a half, 2:37½.

Same day.—Running stake; \$25 each; \$15 forfeit; \$200 added; \$75 to second horse; one mile and a half.

E. J. Baldwin's b c Beaconsfield, by Hockbocking, dam Aileen Allannah, 3 years, 107 lbs..... 1  
 G. L. Richardson's b g Billy the Kid, by Leinster, dam Little Sophie, aged, 117 lbs..... 2  
 W. Kelly's b g Jou Jou, by Monday, dam Plaything, 3 years, 104 lbs..... Long 3  
 Time, 2:37½.

The third race was a selling purse, mile heats. The starters were Duke of Monday, George Howson's Rondo, E. B. Johnson's Belshaw, and Wm. Boot's Ariola. In the pools the rates were: Duke of Monday, \$50, Rondo \$35, the field \$10. In the first heat the flag fell on an even start, Rondo going to the front in a few strides, Belshaw lapped on Duke of Monday, third, and Ariola last. They ran in this order to the half-mile pole, but from there Rondo drew ahead and won the heat at a gallop, Belshaw second, Duke of Monday third, Ariola fourth. Time, 1:45. The pools now sold: the field \$50, Rondo \$55. At the start for the second heat Rondo was a length behind. Ariola rushed ahead around the turn, but in the backstretch they were all bunched, Duke of Monday making to the front. At the half Ariola fell back and from

there the Dnke commenced to string the field and heating Rondo to the wire by three lengths; Belshaw third, and three lengths further off, Ariola fourth. Time, 1:47. Belshaw and Ariola were retired, and when the horses were called for the finish it was almost dark, and the little light left was used up by the rider of Rondo in manœuvring. The judges fined him for the trick and postponed the finish till to-morrow, and all pools and bets were declared off.

The fourth day of the San Jose Fair brought out the largest attendance of the week, and the prospects are that Friday and Saturday will bring a furthermore increase. The first race on the hills was the postponed race of Wednesday between the Duke of Monday and Rondo, Belshaw and Ariola having been rnsed out, as neither of them won a heat. The first heat and race was won by Duke of Monday, on Thursday. Time, 1:44½.

The next was a trotting race, 2:40 class, for \$500, between Guy Wilkes, James H. and Menlo. Guy Wilkes was harred in the pools, and Menlo was the favorite against James H. Guy Wilkes won in three straight heats; Menlo second. Time, 2:29, 2:27½, 2:29½. The next was a trotting race for three-year-olds. W. F. Smith's black filly Pansy was the only one brought on, and she jogged around the track and took one half of the entrance money. A pacing race, mile heats, three in five, to harness, for a purse of \$300, was the next, and the struggle was between Mande, Shaker and Prince. Mande was the favorite at big odds, but she broke badly and was shut out in the first heat. Shaker won the race in three straight heats, taking first and third money. Time, 2:23½, 2:25, 2:26½.

SAN JOSE, Oct. 2d.—Running; selling race; one mile and repeat, for all ages; purse \$270; entrance free; \$50 to second horse; fixed valuation, \$1,000; two pounds off for each \$100 below, and two pounds added for each \$100 above fixed valuation.

YACHTING.

The Pacific Yacht Club Martinez Cruise.

This event took place last Saturday and Sunday, and barring the light and baffling character of the wind, was very enjoyable. At 12:45 p. m. on Saturday the Commander fired the preparatory gun and the following yachts hoisted their after sails and hove short: Lurline, Aggie, Fleur de Lis, Annie and Eva; and at 1 p. m. got under way. The Nellie was anchored off Front Street wharf, but did not start until some time after the balance of the fleet. The flood tide had been making about an hour previous to the start, and a moderate breeze from the north-westward was blowing in the channel.

The Fleur de Lie was the first vessel to get moving and got quite a lead, from her advantageous position, Annie next, and Aggie and Fleur de Lis together, the former being directly to windward of her black opponent. On getting out in the channel Aggie soon drew ahead of Lurline, when the latter endeavored to huff up and get on Aggie's weather quarter, but was prevented by Macdonough putting his tiller down and maintaining the weather gage. The result, however, showed that this jockeying benefited neither yacht as to leeward of Angel Island, all the vessels ran into a flat calm. Eva and Fleur de Lie had kept off to leeward, a good move, as it afterwards proved, as the two vessels, particularly the latter, picked up the wind from over the top of the Island and led the fleet. Lurline and Aggie still remained in close company drifting up with the flood tide, but when about off California City the former, without any palpable cause, forged rapidly ahead and at Red Rock was nearly a mile to the good, which advantage she maintained throughout the run up. From the Brothers to Martinez the wind continued light but steady and without any occurrence to note, the vessels arrived as follows: Lurline, Eva, Fleur de Lis, Annie and Aggie, being quite a space of time between the first and last yachts.

The Fleur de Lis dressed with Chinese lanterns, a relic of the Santa Cruz trip, and made a very beautiful appearance. The evening was spent in paying visits and in rambling about the classical one street of Martinez. The fleet was augmented during the night by the arrival of the Halcyon and Chispa, and during the morning by the Ripple, Nellie and Rambler, the two latter being compelled to anchor over night in San Pablo Bay during the ebb tide.

Sunday morning broke clear and windy, and prognostications were made for a good breeze home, but before the start, 12 m. Old Boreas seemed as though he had blown himself out, as the wind quieted down until there was just sufficient movement to the air to give the vessels good steerage way. The time was taken from a line between the Grangers' wharf and the old sheds of the Pacific Mail S. S. Co. at Benicia.

The Whitewing, which had just returned from a cruise up River led the way and directly after her came the Lurline, followed by Aggie, Fleur de Lis, Eva, Halcyon, Annie, Nellie and Ripple. The Virginia had passed down from Suisun Bay about 10 o'clock without stopping, and the Rambler got under way about half an hour later. The tide at the time of starting had run out about three hours.

Whitewing maintained her lead until near Port Costa, when she surrendered first place to Lurline, while Fleur de Lis, after the first tack, had passed Aggie and it was not until Wheatport was reached that Aggie got ahead.

On getting clear of Carquinez Straits the vessels soon separated, Lurline, Halcyon, Chispa, Nellie and Annie, making long legs on the port tack in the direction of Sonoma creek, while the balance of the fleet worked down the south shore. Off Pinole the Lurline was overtaken by Aggie and Fleur de Lis and all ran into almost a dead calm and these yachts were kept company by the Virginia, which latter had not been able to get any further, owing to the light weather.

Off here the wind was very baffling and variable and ere long the balance of the fleet, with the exception of the Ripple, which was hopelessly in the rear, kept the wind and got even with the leaders.

The latter carried staysail and flying jib and rushing through the water well to leeward of Lurline, and although having to jam close on the wind passed her to leeward and then ran to windward and took in her staysail, whereupon Lurline hoisted hers and then held her own.

Aggie slowly overhauled Nellie and pointed up so as to weather her, when Murphy on the Nellie, sheeted home and attempted to prevent this.

Macdonough thereupon luffed his vessel and both yachts ran a good deal farther in shore than was necessary. Nellie seeing that Aggie had the "heels of her" put her tiller up and fell off to leeward, allowing Aggie to pass to windward.

The latter soon overhauled Chispa and also left her to leeward and took the leading place in the fleet.

It now seemed certain that she would cross the line first but when about two hundred yards from the stakeboat, the wind left the windward vessels entirely and meeting the strong flood-tide from Raccoon Straits came to a standstill while Halcyon, Lurline and Fleur de Lis, to leeward, held the wind, the two former crossing the line ahead of her by a few seconds.

The time-keeper at the finishing point had become tired and had gone home and every vessel was informed by a figure arrayed a la cricketer and who gave motive power to a small boat, that they must take their own time, a most unsatisfactory state of affairs as each and every yacht owner had his own ideas of when he was over the line.

All the larger vessels crossed the line within a few minutes of each other, but as the official start was not telegraphed from Martinez, and as there was no official time taken at the finish it is impossible to give the exact result. The Annie is generally credited with the race with time allowance, and Nellie with the fastest time over the course.

The Aggie while coming to Front street from Saucelito, Friday week, to be ready to start on the Martinez cruise hoisted her jib topsail, and in consequence carried away her foretopmast, breaking the spar in half. No other damage, however, resulted from the accident.

The Halcyon has had a new foremast put in her, and judging by her fine performance with the Lurline, last Sunday, with good results. The original stick was too light, and in any kind of weather buckled so much that it spoiled the set of the foresail.

A stiff norther blew in Richardson's Bay, on Tuesday night, making the Spray drag her moorings and go foul of the Chispa. No material damage was done either boat, but the smaller vessels was injured the most.

The Spray will lay up for the season, at Stone's yard, tomorrow.

ATHLETICS.

Open Letter to F. W. Gibson.

In reply to your letter to me of September 16th, I will state that you have transgressed the laws of the National Association of Amateur Athletes, and also of the League of American Wheelman by competing in a race for a prize offered by an individual, which event did not take place under the auspices of either a recognized athletic or bicycle club.

I take this means of replying to your letter, as a fit opportunity to give warning to amateurs in general that they must be very careful as to what competitions they enter into. With the permanent establishment of the Pacific Coast Amateur Athletic Association, great good will no doubt result, as then no amateur will have reason to unwittingly overstep the lines drawn by said Association.

Very Truly, WM. C. BROWN.

W. G. George having expressed a wish to complete his career—it being his intention to retire from the track for good at the end of the present season—by further culling some of the present records, the London Athletic Club has made the following arrangements to enable him to make the attempt: George will run in the 1,000 yard open handicap at Stamford Bridge, at the first autumn meeting of the club, to be held on the 27th inst., where he will endeavor to beat the present record for that distance.

Bob Carlisle, the English long-distance pedestrian, recently completed the unprecedented feat of walking 5,100 miles in 100 days. At the conclusion of the journey Carlisle, it is reported by our English contemporaries, looked wonderfully well for a man who had walked over fifty miles a day throughout one of the hottest Summers experienced in London for years. Carlisle is willing to repeat the performance.

A Great Performance—Records Lowered.

On Sept. 11th, at Sydenham, Eng., the fifteen mile challenge cup was won by R. H. English, in the unprecedented time (amateur) of 44 m. 29 3-5 s. English continued on his journey for the purpose of making a record, and it will be seen by the appended table that he accomplished the wonderful performance of lowering all records from two to twenty miles inclusive, in the same ride.

1 mile, 2 m. 42 s.; 2 miles, 5 m. 33 2-5 s.; 3 miles, 8 m. 33 a.; 4 miles, 11 m. 33 s.; 5 miles, 14 m. 33 2-5 s.; 6 miles, 17 m. 33 s.; 7 miles, 20 m. 30 s.; 8 miles, 23 m. 28 4-5 s.; 9 miles, 26 m. 22 2-5 s.; 10 miles, 29 m. 19 2-5 s.; 11 miles, 32 m. 19 2-5 s.; 12 miles, 35 m. 15 s.; 13 miles, 38 m. 16 a.; 14 miles, 41 m. 26 s.; 15 miles, 44 m. 29 3-5 s.; 16 miles, 47 m. 26 s.; 17 miles, 50 m. 22 s.; 18 miles, 53 m. 20 s.; 19 miles, 56 m. 15 s.; 20 miles, 59 m. 6 3-5 s.

The half mile swimming match last Saturday resulted in a victory for F. R. Cook for the third time. The record made in the competition is as follows: Sept. 6th, 17m; Sept. 20th, 15m 50s; Sept. 27th, 15m 43s. These times have never been beaten on this Coast by any amateur.

At the Williamsburg Athletic meeting, held on Sept. 20th, the principal event of the day was the magnificent running of L. E. Myers. The finish of the 250-yard race was a grand one, Meyers being beaten by the width of his body. The time made in the race, 26 1-5s., is only a fifth worse than the best on record, made by Meyers June 3d, 1882, and proves conclusively that he is running in nearly as good form as he has ever shown.

The Brooklyn Athletic Club has elected the following officers for the term ending March 27, 1885: President, C. G. Dodge; Vice-President, C. P. Hardenburgh; Treasurer, John J. Gilligan; Secretary, Charles H. O'Connor; Sergeant-at-Arms, C. Hawthorne; Instructor, George M. Marshall; Board of Trustees—C. G. Dodge, T. Carroll, J. C. Downey, C. P. Hardenburgh, H. W. Martin, J. H. Downey and Joseph Foute.

It is rumored that another one of our best amateurs will shortly join the professional ranks. We trust that he will think twice before taking the decisive step. The gentleman in question is not nearly good enough to compete against the professionals who have tarried on this coast for the last two or three years, besides there is little money to be made except by job races.

Barney Benjamin and R. B. Jones jumped off the tie, made in the high jump at Stockton on the 4th of July, last Saturday afternoon, after the conclusion of the cricket match. Jones failed to clear the bar at 4 ft. 10 in., so Benjamin was declared the winner of the medal. The take off was very soft. G. V. Fittock officiated as judge.

The wrestling match, last week, between Cannon and Bauer, was of a very interesting character. Cannon won the contest, have gained the necessary falls inside of the stipulated time. The Frenchman was altogether too corpulent. The match was thoroughly enjoyed by the few spectators.

A large crowd assembled at Beacon Hill, Victoria, B. C., to witness a mile foot race between Watson and Switzer for \$100 a side. Watson won after a good race. No time taken. The British Colonist says that if the winner sticks to training he will make it interesting to all comers in future events.

The I. X. L. Baseball Club has been organized with the following officers: President, T. P. Mulligan; Treasurer, A. M. Johnson; Captain, A. Wohlfarth. The members are all employees of the I. X. L. store.

J. A. Hammersmith, the popular leader of the Olympic Club, will offer a \$50 gold medal for a quarter-mile scratch run. It must be won three times.

To-morrow a swimming match of a half mile will take place along the South Pacific mole, between J. P. Flemming and E. J. Armstrong, for \$250 a side.

Chas. Slater, the well-known amateur all-round athlete, has returned to this city. A competition between him and Lucas is now in order.

Thomas Carrol and J. C. Downey will represent the Brooklyn Athletic Club at the meeting of amateur clubs next Friday evening.

The best developed and strongest man in the Harvard University is Sam Foster, a native of this city.

The next out-door meeting of the Olympic Athletic Club will be held on Thanksgiving Day.

BICYCLING.

The Springfield Meeting.

The following is a summary of the principal events of the last two days of the meeting. The weather throughout was fine, and the attendance fully up to the expectations of the management:

Three mile record race, professional.—Richard Howell, 1st; Woodside, 2d; Robert James, 3d; Ashinger, 0; Neilson, 0. An easy victory. Time, 8 min, 55 sec.

One mile amateur.—Sanders Sellers, 1st, in 2 min. 45 2-5 sec; G. M. Hendee, 2d, in 2 min 45 3-5 sec; J. Brooks, 3d, in 2 min. 46 sec.; H. W. Gaskell, 4th; E. Norton, 0; G. H. Illston, 0; Chas. Frazier, 0; George Weber, 0; Asa Dolph, 0; J. W. Lord, 0; T. W. Roberts, 0.

Hendee reached the quarter first in 46 seconds, Sellers drew up to Hendee, and they raced together a few hundred yards, but were both passed by Weber who finished the half-mile in 1 minute 25 seconds. Hendee and Sellers repassed each other a great many times, and coming down the homestretch Hendee was leading, but Sellers spurred by in splendid style and won by three yards.

Five miles, 16 minutes 40 seconds, class.—C. H. Parsona, 1st, in 15 min. 46 2-5 sec.; L. A. Miller, 2d, 15 min. 47 sec. Five miles, professional.—Richard Howell, 1st, in 15 min. 42 3-5 sec.; Robert James, 2d; Woodside, 3d; C. A. Ashinger, 0; R. A. Neilson, 0. Another easy victory for Howell.

Ten mile record race amateur.—John Brooks, 1st, in 31 min. 54 sec.; H. W. Gaskell, 2d, in 31 min. 55 sec. Hamil-

ton having led oftenest at the end of the half-mile was awarded first prize.

One mile tricycle.—R. Chambers, 1st, in 3 min. 13 1-5 sec.; G. H. Illston, 2d; L. H. Johnson, 3d. The winner led throughout.

FOURTH DAY, SEPTEMBER 19TH.

Five mile, amateur.—S. Sellers, 1st, in 16 min. 6 2-5 sec.; Chas. Frazier, 2d, in 16 min. 6 3-5 sec.; John Brooks, 3d; others started. A slow race and easily won by Sellers.

Five miles, professional.—R. Howell, 1st, in 15 min. 32 2-5 sec.; John S. Prince, 2d, in 15 min. 35 1-5 sec.; Woodside, 3d, in 15 min. 35 3-5 sec. An uninteresting race, easily secured by Howell.

Half mile, 1 min. 32 sec. class.—Wm. Wait, 1st, in 1 min. 20 3-5 sec.; D. E. Hunter, 2d, in 1 min 20 4-5 sec.

Three mile record race.—H. W. Gaskell, 1st, in 9 min. 2 4-5 sec.; Chas. Frazier, 2d, in 9 min. 3 1-5 sec.; John Brooks, 3d.

Five mile record race, professional.—R. Howell, 1st, in 15 min. 2 2-5 sec.; W. M. Woodside, 2d, in 15 min. 11 3-5 sec.

Three mile race amateur.—George M. Hendee, 1st, in 9 min. 25 4-5 sec.; John Brooks, 2d, in 9 min. 26 sec.; G. H. Gaskell, 3d, in 9 min. 26 1-5 sec. Brooks and Gaskell made it hot for Hendee throughout.

New Haven Bicycle Meet—International Complications.

The New Haven Meeting began at Hamilton Park on Sept. 23d. Hendee beat Sellers in a mile race in 3m 1 1/2s. Chambers won the five mile bicycle race in 21m 46s. Sellers won the ten mile scratch race in 33m 32 1/2s. Gaskell pressed him closely throughout. The principal event on the second day was the five mile scratch race. S. Sellers, the Englishman, had the pole. His competitors were Illston of England and Hendee of Springfield. At 2 1/2 miles Hendee led in 9m 6 1/2s, and at four and a half miles he was still in front in 15m 40s, but before reaching the wire, Sellers shot ahead of Hendee and won in 16m 54s. Westervelt, Hendee's backer, claimed a foul on the ground that Sellers had cut Hendee off at the pole. The judges admitted the claim and gave the race to Hendee. This created a scene of confusion and the cry of "foul" went up from Sellers' friends and from all parts of the ground. Howell, the English professional, said that if the Americans could not beat Sellers fairly they would find some way to cheat him out of his victories. The crowd cheered this opinion and the judges were hissed. Sellers, who claims to have won the race fairly, says he will never race in this country again. All the Englishmen at the ground were terribly excited, and it is likely that the last has not been heard concerning the matter. Chambers won the 20 mile scratch race with the greatest of ease.

New American Bicycle Records.

Table with columns for distance, rider name, date, and time. Divided into Amateur and Professional sections.

Last Saturday afternoon F. R. Cook, W. J. Munro, W. K. Slack, W. Meeker, George Day and S. F. Booth, of the Bay City wheelmen proceeded to San Jose and cycled around the Garden city during Sunday. The run to Alum Rock, over a hill about three miles in length, (our Corey hill), was thoroughly enjoyed.

George Day and Fred R. Cook have been appointed the delegates for the Bay City Wheelmen to the meeting of Amateur Clubs next Friday evening.

The first annual meet of the Omaha Wheel Club will be held at Omaha on Oct. 11th, when \$200 will be given in prizes.

On Thursday evening a number of the B. C. W. participated in a moonlight ride through the park to the Cliff.

The Alms House road near 17th St. should be avoided by Cyclists after the mishaps of last week.

W. Day and Riddell, Jr., are recovering from "beaders." Finkler, it is said, has retired from the racing path.

Mrs. Belva Lockwood rides a tricycle.

CRICKET.

The Australians beat the I. Zingari at Scarborough, on September 6th, by eight wickets, with a score of 239-139 to 229-140. Spofforth played havoc with the wickets.—The cricket team that represented Victoria in the Portland tournament played a match last week against a team captained by E. M. Bovill. Mr. Bovill's team scored 50, and the representative Victorian team, 55.—The annual match, all Philadelphia against all New York, takes place on October 3d and 4th, at Tomkinsville, S. I. Both cities are well represented, and a close contest is expected.—J. W. McEwen, bowling recently for the Corn Exchange, against the Hon. Artillery Company at Finsbury, England, took all ten wickets in the first innings for two runs, and seven in the second for four, or altogether, seventeen wickets for six runs. He twice did the hat trick.

This afternoon a team of our local cricketers of Australian birth or residence will play a team of All Comers, at the Olympic Grounds, Oakland. The All Comers are the favorites at 2 to 1. Great interest is centred on this match.

W. H. Richardson, an enthusiastic cricketer and sportsman, left this week for Honolulu. We hope success will crown his efforts on the island.

The Australians left for home on the P. and O. steamer Merzapore on the 25th of September.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.).

Inter-State Rifle Match.

It is always a poor apology for defeat to ascribe the loss of victory to some other cause than being overmatched, but that our riflemen labored under greater disadvantages than their competitors is conceded.

NEVADA TEAM.

Table showing scores for Nevada Team members (Parker, Curnow, Burke, etc.) in 200 yds and 500 yds categories.

CALIFORNIA TEAM.

Table showing scores for California Team members (Waltham, Mangels, Strong, etc.) in 200 yds and 500 yds categories.

Perkins' and Cummings' scores made the grand total, \$39.

A Good Idea.

J. M. Cummings, of Tucson, is about traveling through Mexico alone, and for his protection he has had made one of the most formidable weapons we ever looked at.

A True Sportsman.

A writer in the Toronto Globe, speaking of running deer with hounds, says:

"Personally, although I am very fond of hunting with dogs, I am of opinion that the hounding of deer is a most destructive process, and I am quite ready, as all true sportsmen should be, to give up the sport, if by doing so the game be preserved."

This gentleman is not only right in his ideas, but he is evidently a true sportsman. Any man who will give up his favorite pursuit for the public good is a true man in every respect.

A Handsome Gun.

Mr. Edward Goodall's new hammerless gun has arrived, and it is really a beauty. It was made in London, by Scott & Son, and cost \$300.

Our hunters who went out last week and killed a lot of quail are now regretting the trip, as they violated the game law. However, they did so unintentionally, having mistaken the dove law for the quail law.

Wild geese are becoming quite plentiful in the valley, and the stubble fields look black with them.

Some of the hunters are getting disgusted with Nevada shooting. They say the birds there are wild and scarce.

Advice to Young Sportsmen.

Always bear in mind that it is the muzzle of a gun that is dangerous, therefore, never allow the muzzle to point toward yourself or any other person.

Never put your hand over the muzzle of your gun, nor allow another person to handle your gun while it is loaded. Use a breech-loading gun with rebounding hammers.

Hammerless guns are beautiful and convenient weapons, but they are not fit for boys to use, especially boys who are just beginning to shoot.

If you are hunting in company with others, be careful and courteous, always refraining from shooting at birds that are flushed nearer to your companion than to you.

Open your gun at the breech and take out both shells before climbing over a fence, getting into a wagon, going into a house or handing a gun to a person not used to firearms.

Never drag a gun towards you muzzle foremost. Treat an unloaded gun with the same care that you would use in handling a loaded one.

It is best to thoroughly clean and dry a gun after it has been used all day, and when not in use it should be kept in a wooden or leather case.

Never shoot at harmless or worthless birds "just to try your hand." Most small birds are pretty, some of them sing sweetly, and nearly all of them are useful as insect destroyers.

When out hunting observe everything so as to remember the minutest details of visible nature. Knowledge thus gathered is invaluable.

Boys, when hunting together, should be very cautious in thick cover; as there one may be quite near another and not see him.

The Successful Finish of the State Shoot at Buffalo.

The shooting at the New York State Shoot at Buffalo was continued Sept. 4th. On Thursday a remarkable clay pigeon contest occurred. There were forty-two competitors in the match, at ten pigeons.

Necessity for Game Wardens.

There is no use talking—we must have Game Wardens in this State. The ruthless slaughter of deer goes on at all seasons of the year in many parts of the State, and there is no official who seems to regard it as his duty to enforce the law passed for the protection of game.

Probably the finest deer park in America is a portion of the famous Belle Meade farm, owned by General Harding, about six miles from Nashville, Tenn.

Deer are being killed quite extensively in the surrounding hills. We hear of two, three, and even five being killed in a day by a single hunter.

A queer fish came ashore at Camp Goodall, last week. It had neither fins nor scales, and in many ways resembled a seal.

James Parrot has accepted George Routier's challenge to a pigeon shooting match, at 100 birds, for \$100 a side.

The Grass Valley Sportsman's Club have elected A. B. Dibble and George Fletcher, as representatives to the State Sportsman's Convention.

H. C. Brown, who returned to Sacramento from Hope Valley, reports trout and small game plentiful, but deer rather scarce.

The Wing Club, of California, elected C. Robinson and Ed. Fay as delegates to the Sportsman's Convention.

The Reno Journal reports quail plentiful about Peavine.

Carson Sportsman's Club.

The following letter which is taken from the last issue of the American Field will show our readers the good work that is being done by the Carson Sportsman's Club:

"CARSON, CITY, NEV.—Editor American Field.—Owing to the vigilance of the Carson Sportsman's Club and individuals in Washoe county and Douglas county, parties in the habit of slaughtering the young ducks were this year prevented, due notice having been given through the local papers; and I wish to especially mention the Carson Evening Tribune and Carson Daily Appeal, as through their efforts the violators were given timely warning.

THE RIFLE.

The Stockton Guard held their annual target practice on Sept. 17th, at the William Tell grounds. The shooting was done at the 200 yard range. The following is the official score:

Table listing names and scores for the Stockton Guard target practice, including Captain E. Lehe, Lieut. J. B. Douglass, etc.

The Marquis at the Shooting Gallery.—It is related of the Marquis de Louville that, being lately at Atlantic City, he stopped at the counter of a man with an air-gun, took a dozen shots, and inevitably got into a wrangle over the amount to be paid.

The following are the best scores made by Company C, Third Infantry, at Shell Mound Park, last Sunday:

Table showing scores for Company C, Third Infantry members (Private A. C. Macalpin, Private George Yager, etc.).

At the monthly meeting of the Turner Schuetzen, at Schuetzen Park last Sunday, the prizes were won by John Utschig, C. H. Sagehorn, D. Schoufeldt, O. Burmeister, D. Worth, A. Utschig, A. Finkling and F. Acker.

We expect to give in our next issue the complete score of the shoot of the German Fusilier Guard.

## HERD AND SWINE.

## Guernsey Cattle.

L. W. Ledyard, of Cazenovia, New York, has been making a list of his Guernsey cows, and a seven-day trial resulted as follows: Kathleen, 19 lbs. 1 oz.; Lady Mary, 18 lbs. 6 oz.; Polly of Fernwood, 19 lbs. 1 1/2 oz., the latter being worked dry and weighed unsalted in each instance. In a lately issued catalogue Mr. Ledyard discourses very pleasantly of his favorite breed.

"The Guernsey man was and is a more conservative breeder, and perchance it is well that something like solidity formed a strong anchor in his character. His faith in his cow with a golden skin, with gilding in her ears, on and around her horns, and end of her tail, was his main belief; she was a farmer's cow, with gentle face and quiet temper, full of affection and abundant in pretty ways of showing it; her milk flowed freely, and her butter had the sunshine that gilds the Spring flowers, and it held it through the long, dark Winter of the latitude of Labrador. His cow was sought to enrich the milk of English dairies, where it was well-known that the color that comes with the milk has flavor accompanying it, which is not the case with color that results from stains; and he saw no reason, and does not to-day, to breed for qualities other than the practical ones his favorite cow has inherited from unknown generations of pure ancestry. Few farmers, even the wealthiest, own a dozen acres of fair Guernsey, and three or four cows form an average herd. They are family pets. Little children lead them along the narrow lanes to water, lanes bounded with old stone walls that are lovely with mosses and ferns that grow in the crannies of the rocks. The women milk and tend them, so they know only gentleness and learn no other lesson. Indeed, no prettier pictures of animal life, coupled with picturesque rural surroundings, can be seen than one meets at every point in driving through the narrow roads at Guernsey, or on the headlands that receive, on bold and weather-worn crags, the waves that roll in from the broad Atlantic.

The general character of the cattle on the Island is much the same, but there are individuals that show a tendency to dark colors, and it is quite probable that by selecting from these a race could in time be formed that would change in the same gradations that have been noticed in the Jersey. This is, however, an experiment not at all likely to be tried; for, as far as any matters of taste are having influence, the tendency is to orange-red, orange-fawn, and lemon-fawn, with white markings. These colors are warm, bright and attractive, and show charmingly in the green landscape with dark hedgerows. The cows having abundant white markings are also the best fitted to show the golden tints that glow under the hair, and it may be a fancy of the writer, who imagines that cows with more or less white are the most free milkers and best butter cows.

The ordinary methods of butter making on the Island are as follows: The cows are milked three times a day, and the milk is set in earthenware jars; it remains in them till quite solid, and then the whole mass is churned, leaving only the very sour milk and buttermilk for the calves. Golden butter results, that commands the highest price, exceeding very materially that obtained for the butter made on the sister islands. In all the gardens may be seen the tall stems of the Guernsey cabbage, with a few leaves remaining on the top. As the plant grows the lower broad leaves are plucked, and in them, as dark, green wraps, cool and dewy, the Guernsey matrons bear their butter prints to the handsome stone market in St. Peterport, and there await their customers. The young calves are ordinarily kept in dark pens until turned out to nip grass, and it cannot be said that they are pampered; indeed, a more liberal feeding would doubtless give them a more desirable early growth, as is quite evident when the young animals of the few generous feeders are inspected. The cattle on almost all the little farms are tethered; the pins are moved three or four times a day in a regular manner until the line of cattle feed over the field, and are then taken back to crop it again in the same way.

Pasturage endures for many months, and the grasses are extremely nutritious, enabling the farmers to produce from their cows an expected average of a Guernsey pound of butter (18 oz.) for each day of the year without high feeding. Little is known or heard of forcing or feeding for great butter records, the average yield of the cattle being extremely satisfactory to the owners. The butter tests made in the United States have been as yet very few, and none, so far as known, based on the rich food that is ordinarily used in these experiments, such as oil or cottonseed meal, or, as a recent writer says, "on very light food, only twelve quarts of cornmeal morning and night." Cows yielding 14 pounds of butter per week are very common, and much larger records are authenticated. A test made by the writer gave 3 1/2 pounds of butter per day from the imported Guernsey Elegante, on eight quarts in all of feed (half bran), as the butter was weighed when taken from the churn and drained, but not salted; this was worked until hard and dry, and then again weighed, unsalted, giving a result of 2 1/2 pounds per day, and in this form only it was published. It might have been deemed fair to have published the figures of the first weight, and perchance some of the many records made public are thus estimated. If so, new safeguards should surround all comparative tests to render them absolutely fair.

## Holstein Cattle.

The fine display of Holstein cattle at the State Fair led many to make inquiries regarding the breed, so that the following, cut from the London *Mark Lane Express* of September 1st, will be interesting reading to those who saw and admired the peculiarly marked animals:

A visit to the International Exhibition at Amsterdam last week afforded an opportunity of seeing the stock of the country on their native pastures. The country carries a very large quantity of stock, the pastures being very full, independently of the sheep, which also appear to be quite thick on the ground. The Dutch cattle and their so-called varieties are referred to fully in our report of the show, which appears on another page, as also the letter from J. Rosel, of *The Hague*, on the same subject, and from the latter source—apparently a duplicate of a letter sent to the *National Live Stock Journal*, (in which periodical, however, so far as we know, it has not been published.) We extract the following: "The term of Friesian cattle is just now giving a great deal of trouble both in this country and in America. What is understood by Friesian cattle? Is it the black and white piebald breed? But all Friesian cattle are not black and white; other varieties are also found in Friesland.

Even German cattle dealers are wont to buy in Friesland all kinds or colors, though they give preference to red and white; but, as for some years the importation into Germany has been stopped, the farmers in Friesland could no longer dispose of their red cattle, so they soon applied themselves, under the guidance of one Kuperus, to change their livestock as rapidly as they could into black and white piebald, to suit the American market. This, however, was only a matter of policy, and has nothing to do with the purity of blood, there being among the red and other varieties quite as good milk kine as among the black and white, and even better. On the map you will see that Friesland is only a small part of Netherland; it is, in fact, only one province, and the good black and white cattle are by no means confined to this province; nor could Friesland alone supply all the countries, as America, France, Germany, Belgium, Russia, in all which places, however, Dutch white and black cattle are found, though of course not exclusively from Friesland. In Holland even the Friesian cattle are not considered superior; the reverse is rather the case, the Friesian animals being considered rather bony and poor of flesh. Wherever his black and white piebald cattle come from originally, nobody can tell; they are merely classed in the Netherlands Herd Book as black and white, horn in such or such a province, either North Holland or such other province as they are born in.

\* \* \* Surely the Dutch dairymen, or butter, cheese and milk producers, are no such fools as not to see that, if by taking the black and white stock they would secure a higher production of everything, and that if the white and black cattle were the only good cattle in existence, they would only have to stick to such cattle, and then nothing but this breed could be registered, as being the most profitable kind. \* \* \* There are thousands and thousands of good cattle in Netherlands beside the white and black. Only look on the following figures. In the year 1882 there were in Netherland 1,427,936 head of cattle; of these Friesland had 199,330, including all kinds and colors; of these 199,330, the Dutch Friesian Association in America heard from an officer of the Friesian Herd Book in Netherland, that by the 1st of May, 1884, there would be in this Friesian Herd Book, 2,500 registered cows and bulls, heifers and calves, not reported; so that 2,500 cows and bulls, and say 4,000 to 5,000 heifers and calves make only about 7,000 head of cattle of the 199,330 cattle in Friesland in 1882. This is only to show that not all the Friesian cattle are pure black-and-white, but, as all over Netherland, of all kinds of color."

Mr. J. Rosel shows his point very well, and from what we saw in Holland there is nothing whatever in the differences of color; let them be marked how they may, they are all of the same stamp, and that stamp is a good one.

Elsewhere the same number of the *M. L. Express* says of Mr. Rosel's letter:

"The object of the writer is clearly to show that, whatever the colors may be on the Dutch or Friesland cattle, the material underneath is essentially the same. It will be seen that he makes rather much of the influence of the "American demand" on the stock-breeding industry of the entire district in which these "Dutch" cattle are bred, call it by any name or define it by any imaginary boundary. America has not yet taken enough cattle from the breeding-ground to cause anything like a determination of fancy points; but if America says she wants black and white cattle only, and would like to have them called by some particular name, then our Dutch friends are quite ready and willing to oblige them. That is really all there is in it, and the stolid Dutchmen know the "colored ones" are quite as good, and will "do well enough to keep at home." These are meat-and-milk-producing cattle, combining the two properties to a degree which must have impressed on-lookers with the idea that the Short-Horns are not the only breed of cattle which can lay claim to this specialty. But then, are not these cattle merely a race which has been differentiated from the common stock out of which the Short-Horns have sprung?"

## A Great Cow

From the *Breeders' Gazette* of the 25th ult., we cut the following:

Just as our forms are ready for the press we have the result of the official test of this Jersey cow, Ida of St. Lambert, property of Valeucey E. Fuller, Esq., Hamilton, Ont., showing the unprecedented yield of thirty pounds two ounces of butter in seven days. This was an official test, conducted by the A. J. C. C., and may be considered as strictly reliable. This cow was bred by R. H. Stephens, of St. Lambert, P. Q., Can., and was dropped Feb. 18, 1873; got by Stoke Pogis 3d, out of Kathleen of St. Lambert, 5122, by Lord Lisgar, 1066. Mr. Fuller is to be congratulated on this newly-developed gem in his grand Jersey herd.

It would add greatly to the value of such tests if the amount and kind of feed was given as well as the butter product. It is common, however, no matter how rich the food or what the quantity was, and the faculty of turning any amount of meal, oilcake, fodder, etc., into butter can be appreciated.

## POULTRY.

## Poultry Notes.

"Fanny Field" has always something interesting to write about when poultry is the subject, and though the following notes written for an eastern longitude are not entirely applicable in this more genial climate, there are hints which will prove worthy of consideration in all countries, even in those sections of California where the mercury rarely falls below the freezing point, a comfortable domicile will add largely to the production of eggs, and brooding hens in such quarters will rear more and stronger chicks.

Poultry Houses—How to make hens lay in Winter, when eggs bring the highest price, is one of the things that any one who keeps poultry for profit wants to know, but how many farmers ever stop to think that a comfortable poultry house goes a long way toward inducing hens to lay when the mercury gets below the freezing point? By a comfortable house I do not mean one that can be warmed artificially, but one so constructed that the temperature inside will be above the freezing point, even when it is several degrees below zero outside. Such houses need not be expensive; cheap building materials of some kind—stones, rocks, straw, prairie hay, or rough lumber and building paper—are within the reach of the poorest farmer, and any man or boy of average strength and "gumption" can do the work. Now is the time to build. Don't put it off. You should have the house done and the fowls in it before the cold, rainy days and nights of late Fall get along.

And now is the time for those who have poultry houses that need repairing to fix them up for winter. If the roof leaks in spots, mend it; if it is poor all over, put on a new coat of good shingles. I say good shingles, because a good shingle roof pays. It costs as much to lay poor shingles as good ones, and they will not last half as long. But if you really cannot afford good shingles for the roof, do the best you can. Get some of the tared roofing felt; it answers very well, much better than poor shingles. Also, mend the broken windows, and stop up the cracks where the wind blows right through on the fowls when on the roost. Roosting in a draft of air is the way that a good many fowls get colds that end in roup. Some of the farmers in our vicinity, who put up cheap poultry houses—just rough boarded, with the cracks hatted—last season, are now fixing them over and making them more comfortable by ripping off the battens, covering the house with building paper, and then rough-boarding over that. All this, because one may build that way to begin with and his neighbors saw last Winter that his house was much more comfortable, and that his hens laid better than theirs.

Build a Shed.—But whether you build a new house or fix over an old one, put up a shed adjoining—unless the poultry house is situated so that the fowls can have the run of the stable yard or barn cellar in Winter. It is the nature of hens to scratch whenever they can get a chance, and hens that are cooped up in a house in Winter without any chance to scratch will take to all manner of mischief. Build the shed, put in a foot or so of dry earth, and on top of that scatter dry leaves, sweepings from the barn, etc., then scatter grains among the litter and let the hens scratch to their hearts' content. It pays.

Weed Them Out.—I mean the hens that are over a year and a half old, the poorest layers, and all that for any reason you deem it unprofitable to keep longer. Generally speaking it is better to fatten such fowls right up and send them to market at once than to wait until later.

Sell the Surplus Cockerels.—If you have a lot of surplus cockerels that will dress three pounds, or more, apiece, get them to market as rapidly as possible. If put into market in good shape during the first cool weather of Fall, such poultry will bring more than it would if kept till midwinter. It is a pretty good plan to market all kinds of poultry products just as soon as they are ready for selling. We have sold 3-lb. cockerels in August for 75 cents and 6-lb. cockerels brought no more at Thanksgiving.

Save the Best Pullets.—Of course that is what you mean to do, but I know how it is in a good many cases. Those big, plump, early pullets that ought to be laying by the first of October will bring more money than those hatched later, and so a good many of them go to market. And it sometimes happens that a poultry buyer comes along in the middle of the day, when the fowls, old and young, are scattered all over the place, and the farmer, his boys, the hired man, and the poultry man "run down" and catch the fowls, until the buyer has as many as he wants, or as many as the farmer cares to sell; when the race is over and the frightened fowls that are left get together again, the farmer's wife finds that somehow the boys managed to catch most of the biggest pullets. That is no way to manage. Select the pullets that you want to keep over and keep them apart from those you intend to sell; then when a poultry buyer comes along there will be no mistakes.

Buy Now—If you are short of pullets for laying stock, buy now. Later in the Fall, after the poultry buyers begin to scour the country, it will be a hard matter to find such pullets as you want, and when you do find them you will have to pay a good price if you get them.

## SHEEP.

## Decline in Price of Wool.

It is poor comfort to advise California wool growers to turn their attention to mutton qualities and early maturity, as the market will not warrant the course. A higher tariff seems to be the only way of removing the trouble of short prices, and without such protection there is little hope. As both of the great political parties favor increasing the duties on foreign wool there are hopes of a speedy relief. From the annexed matter copied from the *Breeder's Gazette* the trouble is not confined to this country.

It appears that the sheep-rearing industry is suffering even a greater depression in Great Britain than in the United States, and for the same reason—that is the serious decline in the price of wool. There is of course added to this, as mentioned in a speech of Sir Kenneth Mackenzie at the late Wool Fair at Inverness, the higher wages, higher rates and taxes, and generally increased expenses, requiring larger capital; but it was said that what was really at the root of the present depression was the relative fall in the price of wool, and it was mentioned that until the last twelve or fourteen years wool followed the variations of other commodities, rising and falling according to times and circumstances, and that as long as this was the case there was a margin of profit, and sheep-farming was a prosperous industry; that it was only since the introduction of colonial wool of a class to compete with the domestic that this condition of things has been changed. And so it is in the United States, though we have the advantage of ten and twelve cents per pound of duty in our favor, while the British wool-grower has free trade. The system of ranch sheep-raising prevailing in Australia and South America is certainly entitled to no encouragement in this country, and however true it may be that as respects the ordinary projects of agriculture American farmers are able to compete with those of other civilized countries, it is certain that we cannot compete with the wool grown upon the comparatively valueless lands of these countries, with a labor system that costs but little and a climate where the flocks require so little attention and care. It is indeed plain that unless we have adequate protection under a permanent tariff wool-growing cannot be carried on to any extent.

It would seem from the experience of British farmers that it will not do to rely alone upon the returns from the sale of mutton, even where the best mutton breeds are reared and with the high prices paid in English markets; for, as Sir Kenneth Mackenzie mentions in his speech, "many people are under the impression that the immense rise in mutton has compensated for the fall in the value of wool, but when you remember that you clip four or five sheep for every one that comes to the butcher, and that the expenses of sheep-farming are rising, you are led to a different conclusion." He, therefore, suggests to the Scotch sheep-farmers that instead of the slow-maturing breeds they must select breeds of medium size that will come early to maturity.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE BREEDER AND SPORTSMAN PUBLISHING CO. THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET P. O. Box 2693

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brevier type and having no foot marks, 20 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 50 cents each insertion.

San Francisco, - - Saturday, October 4, 1884

Dates Claimed.

Monterey Agricultural Association, Salinas, Oct. 7th to 11th. Fresno Fair Association, Fresno, October 7th to 11th. Los Angeles Fair Association, Los Angeles, October 13th to 18th.

Barefooted and Tip-Shod Horses.

As will be remembered by those who read the controversy between this paper and the Turf, Field and Farm on the tip question, we were taken to task for driving Antevolo barefooted and the claim entered that "tips were a failure" on that account. It was manifestly a wrong charge as tips are much nearer a natural standard than full shoes, and so every one acknowledged who was not hopelessly prejudiced. In our experience with Antevolo, and other colts, we are thoroughly satisfied that there are cases when benefits will follow the abrogation of metal, and that even so slight an incumbrance as a tip is injurious—at times. In order to show that as clearly as we can, the history of Antevolo will be given from the date of foaling to the close of the year, and the results which followed changes in work and treatment of his feet portrayed. As a daily record has been kept there is no danger of mis-statements, or a dependence upon unaided memory to supply information.

Practices which have resulted in a great degree of success can be given faithfully, and though there may be differences of opinion regarding deductions, when theory is sustained by actual trials there is a good basis to build upon. Thus when a colt that was pronounced hopelessly crippled is enabled to show 3:01 as a yearling, 2:41 as a two-year-old and 2:29 3/4 when three years old, in actual races, it is not an unfair inference that gives a part of the credit to the system of training and general treatment pursued.

Hundreds of questions have been asked in relation to Antevolo, and in order to answer them as fully as possible his whole history will be published. It may appear egotistical to write of our own horses, and expatiate on systems, so widely at variance with the opinions of others, which we have followed and, in a measure, introduced. The importance of the matter, however, justifies giving it prominence, irrespective of personal feelings, and being restricted to horses which we have bred in trying experiments, we are forced to give these or none. Incidentally we learn of others who have tried tips and who have become convinced that the substitution of them for shoes has resulted favorably in many cases. But in every instance there has been a lack of exactness, a want of definite information that can only be supplied by pursuing the course we have followed. There is scarcely an omission where the work given was faster than a jog, and though "trials" were infrequent whenever a watch was held the time was entered in the journal. When tips were put on or reset, the weight was noted to a fraction of an ounce, and when barefooted there is a complete record of what he did.

In "tips and toe-weights" the history of Anteco and Antevolo was carried to January, 1883. Since that date a few articles have been published, mainly in relation to the wonderful improvement of Anteco in November and December of last year, and which induced his present owners to pay \$10,000 for him. His failure to keep up the promise is, to say the least, partially due to a change of treatment, so radically different that it will afford a good opportunity for comparison. His recent victory at

San Jose shows that he is "rounding to" and we hope to chronicle a resumption of his form before the season closes.

The articles will appear first in the columns of this paper, and when completed will be annexed to the volume already published. In this connection it may be as well to state that we will be much pleased to hear what others have learned from their use of tips. Adverse opinions will be published as cheerfully as those which favor the system, though the obligation will be increased by giving as full account as possible, so that in cases of failure we may be able to show the causes which led to a want of success.

In-Breeding.

When diligent search is made, Stud Books and Racing Calendars thoroughly examined, many notable instances of the value of proper in-breeding will be discovered. Even though consanguinity be so near as to be doubly incestuous according to human ideas the result has been different from what is so confidently predicted, and, taking the numbers bred in this way as data to form an estimate upon, the result is astonishing. From the almost universal prejudice existing against coupling those of near kin, few have been bred in comparison with the "outcrossed," and thus there has been the drawback of a restricted choice.

Sir Archy was so popular that in two instances, at least, he was bred to his daughters. The produce in one case was Janet, afterwards called Virginia Lafayette, a great race mare, having defeated Henry, Flirtilla, Arah, Marion, and other celebrities of her day. Her dam was Coquette, and she was by odds the best of the produce although her dam had ten foals. Flirtilla, Jr., by Sir Archy from Flirtilla, by Sir Archy, was a fine race mare and superior to her mother as a broodmare, her daughter Cassandra being considered the equal in speed of any horse of her day up to two miles, and was so fast as to be termed the "flying filly." She was by imported Priam, and her best colt, in a progeny of six, was Prophet, by Monarch, a son of Priam. The dam of Fashion was a "double Archy," and so was George Martin who ran four miles in 7:33, when that was only half a second behind the "best on record."

The Kentucky Sunday School scholar's definition of well-bred to be two crosses of Lexington must have been grounded on a proper appreciation of the value of in-breeding to that great horse, and as the crack Santa Anita filly, Fallen Leaf, has the double infusion, and if the dam of Alta is by Monday, which is the general opinion, there is another illustration. Nearly all of the Santa Anita broodmares have Lexington blood, and as the best success has been with Grinstead the two crosses have shown heir potency.

Priority of Claim.

The paragraph copied is from the Turf, Field and Farm, of Sept. 25th, and in one respect it is correct. That proper "registration" can only be depended upon when the hirths, sex and marks of foals are sent directly to the compiler of the American stud-book is beyond dispute; but that "priority of names" compels "claiming" through the same channel is not in accordance with present usages. Were it embodied in racing rules that names should be given at hirth and then forwarded to the compiler of the stud-book, the trouble arising from duplication would be avoided, but as many breeders are adverse to compulsory christening it is out of the question at present. There are so many advantages, however, which would follow a rule of this kind that the objections of a few should not be allowed to stand in the way. We would like to see a still more radical change, viz: that no animal should rank as thoroughbred which was not registered in the S. B., provided that it was foaled at a period before the publication of last volume, which would give sufficient time for registration. Such a rule would lighten the labors of the compiler and be an advantage in the long run to breeders of thoroughbreds:

"It has been repeatedly announced in these columns that all stud news and nomenclature of thoroughbreds in order to secure correct registration and priority of names must be sent to the author of the American Stud Book. The moment a foal is dropped, the color, sex and marks, with day of the month it was foaled, should be at once reported to S. D. Bruce, at this office. This course will prevent confusion and errors. The information thus furnished is at once published, so that if there is any mistake it can be corrected. We recognize no priority of names unless claimed through the author of the Stud Book. The book is issued every four years and the manuscript copy of the fifth volume is now in shape to register the foals and names as reported and claimed. It is absolutely necessary that some definite rule be adopted to prevent fraud and confusion and this is the only plan which can be carried out by us. The fact that these reports are published in the columns of the Turf, Field and Farm, and then filed carefully away, must commend itself to all breeders. If a question arises as to the identification of an animal, the knowledge that the color, sex, marks and age are on file with the author of the Stud-Book will enable those interested to speedily settle the same. Those owning and breeding thoroughbreds will recognize the correctness of our position. Second-hand news, as a rule, is full of errors."

PROGRAMME Pacific Blood Horse Association. Fall Meeting, 1884.

First Day, Saturday, Nov. 15th.

No. 1. LADIES' STAKE.—For two-year-old fillies; \$50 entrance; \$25 forfeit; \$20 added; three-quarters of a mile; second to save entrance.

- Nominations for 1884: 1. Theo. Winters' cb f, by Hooker—Puss. 2. Theo. Winters' b f, by Hooker—Abby W. 3. Theo. Winters' h f, by Hooker—Countess Zeika. 4. Theo. Winters' h f, by Hooker—Illusion. 5. Theo. Winters' h f, by Hooker—Ellen. 6. G. Pacheco's cb f, by Wheatley—Lodi. 7. James Mee's cb f Mischief, by Thad Stevens—Katie Pease. 8. James Mee's cb f Mistletoe, by Thad Stevens—Mistake. 9. E. J. Baldwin's br f, by Grinstead—Blossom. 10. E. J. Baldwin's h f, by Rutherford—Glenita. 11. Palo Alto's b f, by Shannon—Lizzie Whips. 12. Palo Alto's h f, by Monday—Flarthing. 13. Palo Alto's b f, by Shannon—Patharion.

No. 2. Sweepstakes of \$50 each; \$25 forfeit; \$250 added; for two-year-olds; three-quarters of a mile; Palo Alto to carry rule weights; one hundred pounds on all others, with three pounds allowance to fillies and geldings. Second to save stake.

- No. 3. SAME DAY—THE VESTAL STAKE; for three-year-old fillies; one and a quarter miles; \$25 p; \$300 added; second to receive \$100; third to save stake. Closed with the following nominations for 1884. 1. J. K. Gries' h f Nettie Hill, by Joe Daniels, dam Mary Wade. 2. E. J. Baldwin's b f, by Rutherford, dam Glenita. 3. E. J. Baldwin's cb f, by Grinstead, dam sister to Clara D. 4. E. J. Baldwin's cb f, by Grinstead, dam Josie C. 5. E. J. Baldwin's br f, by Grinstead, dam Mollie McCarthy. 6. Theo. Winters' cb f Callie Smart, by Norfolk, dam Mattie A. 7. P. J. Shaffer's b f Bonita, by Shannon, dam Napa Queen. 8. Palo Alto's br f, by Monday, dam Rignin. 9. Palo Alto's s f, by Norfolk, dam Glendew. 10. Palo Alto's bl f, by Wild Idle, dam Froll. 11. Palo Alto's b f, by Norfolk, dam Lizzie Whips. 12. Palo Alto's s f, by Norfolk, dam Fron Fron. 13. W. L. Pritchard's cb f, by Bazaar, dam Tibbie Dunbar. 14. W. L. Pritchard's cb f, by Leinster, or Bazaar, dam Minerva. 15. W. L. Pritchard's cb f, by Leinster, dam Flush.

No. 4. Selling race; one and one-eighth miles; purse, \$250; free entrance; second to receive \$75; horses entered to be sold for \$1,000 to carry regular weight, with two pounds deducted for each \$100 below \$1,000, and three pounds added for each \$100 above.

No. 5. Purse —; amount and distance to be announced Thursday, Nov. 13th; and entries made at Secretary's office at or before 4 P. M., Friday.

Second Day, Tuesday, Nov. 18th.

No. 6. Purse, \$300; \$75 to second; beats of three-quarters of a mile; for all ages.

No. 7. Sweepstakes of \$50 each; \$25 forfeit; \$250 added; one and one-eighth miles; for three-year-olds; second to save stake.

No. 8. Sweepstakes of \$50 each; \$25 forfeit; \$250 added; one mile; same conditions as to weights as No. 2; winner of No. 2 to carry seven pounds extra on second four pounds extra.

No. 9. Purse —; amount and distance to be announced on opening day; entries to close at Secretary's office, Monday, Nov. 17th, at 4 P. M.

No. 10. Purse, —; same as No. 9.

Extra Day, Thursday, Nov. 20th.

No. 11. Sweepstakes; for three-year-olds; \$50 each; \$25 forfeit; \$250 added; one and one-half miles; second to save stake; winner of No. 7 to carry five pounds extra.

No. 12. Purse, \$400; heats of a mile; for all ages; second to receive \$100; ten pounds deducted from regular weights.

No. 13. Purse, —; amount and distance to be announced on second day of meeting; entries to close at Secretary's office, Wednesday, Nov. 19th, at 4 P. M.

No. 14. Purse, —; same as No. 13.

Third Day, Saturday, Nov. 22d.

No. 15. THE FINGAN STAKE; for two-year-olds; dash of a mile; \$50 each; \$25 forfeit; \$250 added; second to save stake. Nominations for 1884:

- 1. Theo. Winters' cb c, by Norfolk—Lady Jans. 2. Theo. Winters' h c, by Norfolk—Balliette. 3. Theo. Winters' cb f, by Hooker—Puss. 4. Theo. Winters' b f, by Hooker—Abby W. 5. Theo. Winters' b f, by Hooker—Countess Zeika. 6. Theo. Winters' h f, by Hooker—Illusion. 7. Theo. Winters' b f, by Hooker—Kitten. 8. J. B. Chase's blk c Hidalgo, by Joe Daniels—Electra. 9. G. Pacheco's cb f, by Wheatley—by Lodi. 10. J. W. Adams' br c Common Sense, by Hardwood—Cousin Peggy. 11. James Mee's cb f Mischief, by Thad Stevens—Katie Pease. 12. James Mee's cb f Mistletoe, by Thad Stevens—Mistake. 13. E. J. Baldwin's cb g, by Grinstead—Jennie. 14. E. J. Baldwin's br c, by Lexington—Mollie McCarthy. 15. E. J. Baldwin's h f, by Rutherford—Glenita. 16. E. J. Baldwin's br f, by Grinstead—Blossom. 17. Palo Alto's h c, by Shannon—Robin Girl. 18. Palo Alto's h c, by Shannon—Sallie Gardner. 19. Palo Alto's b c, by Shannon—Miss Peyton. 20. Palo Alto's s c, by Flood—Planetia. 21. Palo Alto's c c, by Shannon—Bettie Bishop. 22. Palo Alto's br c, by Shannon—Rignin. 23. Palo Alto's b f, by Monday—Flarthing. 24. Hill & Gries' b c Arthur H., by Hockbocking—Maid of the Mist.

No. 16. SAME DAY—FAME STAKE.—For three-year-olds; dash of two miles; \$100 each; \$25 forfeit; \$300 added; second to have \$150, third to save stake. Closed with the following nominations for 1884:

- 1. J. K. Gries' br f Nettie Hill, by Joe Daniels, dam Mary Wade. 2. E. J. Baldwin's h c, by Rutherford, dam Maggie Emerson. 3. E. J. Baldwin's h f, by Rutherford, dam Glenita. 4. E. J. Baldwin's cb f, by Grinstead, dam sister to Clara D. 5. E. J. Baldwin's cb f, by Grinstead, dam Josie C. 6. E. J. Baldwin's br f, by Grinstead, dam Mollie McCarthy. 7. Theo. Winters' cb f Prince of Norfolk, by Norfolk, dam Marion. 8. Theo. Winters' cb f Callie Smart, by Norfolk, dam Mattie A. 9. Jos. Cairn Simpson's h c Sir Thad, by Norfolk or Thad Stevens, dam Lady Amanda. 10. P. J. Shaffer's b f Bonita, by Shannon, dam Napa Queen. 11. Palo Alto's b c, by Norfolk, dam Boydana. 12. Palo Alto's h c, by Norfolk, dam Nova Zembla. 13. Palo Alto's b c, by Shannon, dam Dempsey. 14. Palo Alto's br f, by Monday, dam Rignin. 15. Palo Alto's s f, by Norfolk, dam Glendew. 16. Palo Alto's bl f, by Wild Idle, dam Froll. 17. Palo Alto's br f, by Norfolk, dam Lizzie Whips. 18. Palo Alto's s f, by Norfolk, dam Fron Fron. 19. George Hawson, Sacramento, br f, Augusta E., by Monday, dam by Norfolk. 20. W. L. Pritchard's cb c, by Bazaar, dam Avall. 21. W. L. Pritchard's cb c, by Bazaar, dam Minerva. 22. W. L. Pritchard's cb c, by Leinster, dam Lottie Lee. 23. W. L. Pritchard's cb c Ed Smith, by Leinster, dam Tibbie Dunbar. 24. J. B. Haggin's cb f Young Flush, by Leinster, dam Flush. 25. John A. Cardinell's br f Nibia, by Leinster, dam Adie A. 26. John A. Cardinell's bl c John A., by Monday, dam Lady Clare.

No. 17. BALDWIN STAKE; a post stake for all ages; \$250 each, p. p., \$1,000 added; second to receive \$400, third to save stake; dash of four miles. Subscribers: J. D. Christie, St. Louis, Mo. M. M. Allen, Sacramento, Cal. A. J. Stember, Sacramento, Cal.

No. 18. HANDICAP; 1 1/2 miles; stake \$50 each; \$25 forfeit; \$10 declaration. Weights announced second day of meeting at 1 P. M. from judges stand. Declaration following day at secretary's office at 1 P. M. Second \$75, third to save stake.

No. 19. CONSOLATION PURSE; \$200; \$50 to second; one mile, for non-winners at this meeting. Horses beaten once allowed 5 lbs., twice 10 lbs., three times 20 lbs.; entries to close five minutes after the finish of last race.

Nominations to stakes and entries to prizes to close with Secretary, Saturday, November 1, 1884.

The above is the programme fixed upon by the committee having the business in charge, and so far as we can judge it will prove satisfactory to owners and trainers

There is a feature somewhat different from what has been tried heretofore in this country, though the practice has prevailed in the East, and years ago was nearly universal when purses were given. That is to await the arrival of horses before specifying what several of the purses will be, distance and other conditions being held in abeyance until a better estimate can be formed of what will participate. When the animals are on the ground it will be easier to "bring them together," and in place of small fields of contestants there will be numerous starters. Apart from the "fixed events" the stakes and purses offered are such as to induce a hearty response.

The stake for two-year-olds is wisely framed as without a concession by Alta and Estill there will be a certain lack of subscribers. That the two crack two-year-olds can give ten pounds to all others which have run here this season is beyond question, and there is no expectation that there are any dark ones which will upset the calculation. There will be a lively interest taken in the race, as many are of the opinion that the five pounds which Estill gave his competitors was the cause of his defeat. It is manifestly premature to enter into a discussion of their respective powers at present, and, in fact, we have no desire to anticipate the verdict. That the coming meeting will be a very good one we prophesy without fear, and have little hesitation in predicting one of the best ever held in the State. The date fixed upon will give the horses plenty of time to recover from the racing at the fairs, and the extension of time from that originally fixed will be beneficial to the horses, and ensure a better attendance by getting further away from the turmoil of election. By the 15th of November the winner of the great race for the Presidency will be known, and the excitement and fatigues of the campaign overcome.

#### Washington Park Club.—Closing of Stakes.

To call attention in a few words to the advertisement of the Washington Park Club, Chicago, would appear sufficient to ensure a liberal number of nominations from this side of the continent. But there are a few who argue that California-bred colts should be kept at home, in order to increase the racing attractions of the Autumnal fairs, though we are satisfied this view is incorrect, and when placed on a broader basis, in place of aiding is detrimental to the turf interests of the State. That these advantages in this climate for breeding and rearing race-horses above almost any section of the country is so generally conceded that it may be taken as already proved.

In order to make the most of the equable climate and generous soil it is necessary that breeding be carried to a greater extent than if confined to animals for home use. Even at the present time there are a far greater number of thoroughbreds bred in California than can profitably be run here, and without other markets the price would fall far short of adequate remunerative producers.

That nominations in stakes, especially the large stakes of the East, quadruples the value of well-bred colts is so palpable as not to require argument, and when present prestige is increased, as it surely will be, there will be plenty of purchasers for every California colt engaged.

Washington Park Club presents inducements which are not exceeded by any club in the country. The amounts added are large and the risks small. Take the American Derby as an illustration. The club adds \$5,000, and the amount required to be paid up to February 1st, \$20; \$30 to April, and \$40 to May 1st. If we had been intrusted with the framing of conditions, and ordered to make them as favorable as possible for California bred colts, this could not be improved. From the time the yearlings are broken, there need not be a cessation of work until the last named time for declaring out. At this time enough has been shown to form a fair idea in regard to speed, by the 1st of May next they can be tried so far as to give a knowledge of what it is reasonable to expect in the future. Then there are two-year-old stakes, and others for three-year-olds in 1885, so that there are plenty of chances. The closing day is Tuesday, the 15 inst.

#### Great Sale at Bantas.

One of the largest horsebreeding establishments in the world was located at Bantas, the property of the late Charles McLanghlin. As will be seen by an advertisement, the executrix of the estate has ordered a sale which is to come off the latter part of this month. The management of the sale has been awarded to S. C. Bowley, Fiddes & Co., a new firm, consisting of Henry Fromberg, George Fiddes, and S. C. Bowley, 33, 35, and 37 New Montgomery street. The catalogues will be published soon, and which can be obtained of the auctioneers or of the executrix, 16 Montgomery Ave., or Green Lamb, Bantas.

#### Auction Sale of Fine Horses.

Two weeks from to-day, Saturday, October 18th, H. W. Seale, of Mayfield, will offer at auction thirty-eight horses and colts. Taken together they are as fine a lot as can be found in any country, and with individual claims that enhance the value. Our opinion of Elmo is well known, and that is that he is one of the most desirable animals to breed from in the country. His blood is peculiarly well adapted to combine with that of Hambletonian, or Mambriño Chief, and Overman has shown that the commingling with that of Vermont Black Hawk has been an exceedingly "happy nick." We are well satisfied that if the get of Elmo had been trained, he would rank very high in the trotting calendar, and from what we have seen of his progeny feel confident that with proper handling there would have been many as good as Overman. In fact, so far as our personal knowledge goes, Overman is the only one that can be said to have received a trotting education, though in our visits to Rancho del San Francisquita, we have seen youngsters exhibit natural trotting action that could not be surpassed.

Beside Elmo and his get there are a number of very valuable animals in the Sale Catalogue, and of such a variety of blood that purchasers can have an opportunity for choice. The sale will be held at the railway station in Mayfield, commencing after arrival of 10:40 A. M. train from San Francisco. Easton & Eldridge, 22 Montgomery street, are the auctioneers, and of whom catalogues can be obtained.

#### The Fairs.

We have oftentimes extolled the California fairs. Every succeeding year proves that still more florid praises are justified than has yet been given, and no matter how fervid the encomiums they are well deserved. There is not a State in the Union that offers grounds for comparison. Take all of the State exhibitions together and then ours will outshine them all. There is not a district fair which we have attended that is not worthy of a high place in the calendar of modern expositions; and Santa Rosa, Petaluma, Golden Gate, Sacramento and Stockton have reasons to be gratified with the showing made, and the San Jose, which is in progress as we write, is fully up to the exhibitions of former years. In the hurry incidental to returning home, after an absence of several weeks, there is not time to even write an opening chapter, but fortunately the "matter will keep," and during the comparatively leisure season of Winter there will be a better opportunity to treat the subject properly.

#### Correction.

We are indebted to the Captain of the California team, A. F. Klose, for the correct score of the late Inter-State match. The scores which appear in our columns this week are from telegraphic accounts and are not wholly correct. The score of Little, of the Nevada team, should be 43 and 40 and Mangels' 42 and 45. Perkins scored 40 and 43 and Cummings 43 and 35.

#### A Great Stallion.

From the following telegram it will be learned that there has been another dethronement, and the "king of stallions," Phallas, has been forced to resign in favor of the son of Happy Medinn. There has been a good deal of sparring in the New York papers in relation to a match between Maxey Cobb and Phallas, and now that the former wears the crown there will be an increased desire to see them come together.

PROVIDENCE, R. I., Sept. 30th.—The October meeting of the Narragansett Driving Park Association opened to-day. The attendance was small but the sport was good. The favorites won in both classes. The most interesting event of the day was the breaking of the stallion record of 2:13½ made by Phallas last Summer. Maxey Cobb was brought out, John Murphy driving, and after a couple of warming up heats was sent for a fast mile. The weather was raw and unfavorable but the track was in excellent shape. The stallion made the mile without a skip in the following time: Quarter 33 seconds, half 1:04½, three-quarters 1:35, mile 2:13½, lowering the record half a second.

#### Challenge from Jim Mulvenna.

Our special at San Jose sends the following challenge: Since the four-year-old race at Stockton won by Ha Ha there has been some talk about the relative merits of the winner, and the Nutwood stallion Jim Mulvenna, one of the beaten ones in that race. The owners of Mulvenna request as in their behalf to make Ha Ha and his friends this proposition: They will match Mulvenna against Ha Ha for a three in five race for \$5,000 a side, the race to be trotted over either the Bay District or Oakland Park tracks not more than thirty days after this challenge is accepted, and the money put up. An acceptance addressed to the BREEDER AND SPORTSMAN office will receive prompt attention from the parties interested. The track and date will then be mutually agreed on and the articles signed.

#### San Jose.

The following notes are from our "special" who is attending the San Jose Fair, and so form a welcome addition to the regular reports. That Beaconsfield is a rattling good colt was fully exemplified by his races "ap country," and his defeats can be fairly attributed to the causes given. In the "novelty race" at Stockton the first half mile was run in 57½ seconds, and sluggish as Beaconsfield it was necessary to "saw" him all about to reconcile him to the slow pace. A change of tactics at San Jose resulted in a win and that some six seconds faster. When beaten by Jon Joa at Sacramento, the mile and a quarter was run in 2:09½, a good race.

Up to the time of writing, Wednesday night, the current of events has been quiet, the sensations few and of a minor order.

On Monday in the first race of the meeting, a dash of three-quarters of a mile, Forest King sold in the field, the report being current that his feet were so tender that he could not keep in the company. His thin soles seemed to improve suddenly after the money was got on for he run the race in a gallop in 1:13, too fast to be consistent with the story of his ill condition.

The same day Garfield beat Bachelor a good race of two miles in 3:37. He was favored by the handicap carrying 110 pounds against 105 on his three-year-old competitor. Howson's riding on the winner was a great deal criticised by the Garfield party, who accused him of riding all over the track and managing the horse as if he wanted to lose with him. The fact was that both jockeys went away with orders to make the running. They both began riding from the fall of the flag and it was a desperate struggle for a mile and three-quarters. At the finish Bachelor surrendered but Garfield was so groggy from exhaustion that he could not be kept straight and staggered to the post.

In connection with this race a question of law came up. It was a stake with added money and one of the conditions was, "third horse to save his stake." No third horse started and Mr. Pacheco contended that he was entitled to all the money except that apportioned to the second horse. The association ruled differently and returned one stake to the treasury. As no third horse had paid any stake it had to be taken from the added money. The races are run under the State Agricultural Society rules and Mr. Pacheco proposes to take an appeal to the State Board.

On Wednesday Dottie Dimple won a race of half-mile heats, contrary to the expectations of the talent. She was kept favorite in the pools and Quebec waited in the first heat to give Annt Betsy a chance to lay out the favorite if she could, but the black mare beat her by a neck. After the heat Annt Betsy and Quebec were sold together as the field and the money went in pretty lively. Dottie started as first choice, but the fielders were so anxious that their stock rose steadily, and at the close the field sold for 2 to 1 over the whilom favorite. But if the black filly had no pedigree aba had some racing qualities. The chestnut selling plater could not get near her, and Annt Betsy could do no better than finish half a length behind. The two heats were run in the same notch, 49½.

The second event on Wednesday's card was a run of a mile and a half, with Billy the Kid, Joa Joa, and Beaconsfield engaged. The success of the son of Hock-Hocking was a surprise to many, a pleasurable experience to some particular individuals. Captain Hutchison has always regarded Beaconsfield as a good one, and he sold him to Goldsmith & Garland he gave the colt a good character. The first thing that happened after the sale was a mile and a half run at Stockton, in which Beaconsfield was beaten by Philip S. in slow time. Both sellers and buyers were badly cut up by the catastrophe and were melted for a considerable sum of money put on the race. Captain Hutchison contended that the horse was badly ridden, inasmuch as he did not have the quarter horse quality of spurring, but needed to be rated along at a steady pace. On Wednesday Appleby was secured for the mount and the Captain's idea laid before him. It was thought that Billy the Kid, would be a hard one to beat in the race, but the Captain was so confident that his colt was better than Jon Joa, that a \$500 bet was made between these two. Beaconsfield started as the short end, his per cent. of a \$100 pool being about \$25. The race demonstrated both the correctness of the Captain's theory, and the ability of Appleby as a rider. Beaconsfield made the pace from the start, running the first half in 51, the second in 53 and the third in 53½. The mile in 1:44 foand Billy the Kid, three lengths behind, and be never got nearer, Jon Joa further off. The party won back some of their lost money, and had confidence in their horse restored.

Among the trotters there has been no startling happenings. Manon, as expected, won her race easily, skimming along like a bird. She is now owned by Mr. Goldsmith and R. B. Milroy, and the present plan is to campaign her in the East next year along with Director, Sister, and possibly Guy Wilkes.

The change in Anteeo since Goldsmith took him in charge is very great. He won the 2:30 race in time that was no gauge of his speed. Mr. Goldsmith says that he found the horse sore and feverish when he took him in charge and he has improved under treatment considerably already.

Jackson's Ed choked down and fell in the finish of the special trot, Wednesday, but did not, as is the rule in such cases, give up the ghost. The judges took Jackson out and put up Jas. Rogers to drive, but Ed would not trot. He lunged up on the bit until he choked, but Rogers let him go in time to save him. He bled a little at the nose but did not seem to be much the worse for the tumble. Jackson thinks he is entitled to some kind of recap on the Association but cannot arrive at what it should be.

The stock parade on Wednesday was fine and delighted all admirers of choice animals. The park, extensive as it is and embowered in trees, is the finest in the State, and as all the exhibits, pavilion included, are within the one enclosure, visitors are enabled to spend the day in the grounds pleasantly visiting the pavilion and inspecting the stock in the morning and seeing the races in the afternoon. Despite the general complaint of dull trade and low prices for grain, the attendance is good and the fair shows a considerable advance over former years.

#### Bonanza.

This son of Joe Hooker and Mattie Glen has already gained distinction in the East, having beaten the Kentucky crack two-year-old Favor. Dwyer Brothers offered \$10,000 for Favor, which was declined. J. D. Christy, of St. Louis, purchased Bonanza, at Mr. Wm. Ter's sale, last July, paying \$1,850 for him.

## STABLE AND PADDOCK.

## Clays and Pilots.

EDITOR BREEDER AND SPORTSMAN.—In your issue of September 6th last, on page 146, is an extract from one of your exchanges entitled, "Clays and Pilots." The article first appeared in the Rochester, N. Y., *Democrat and Chronicle*, during the Grand Central Trotting Circuit Meeting here. My attention was called to it, when I detected serious errors, but as the piece was evidently written with kindly feeling towards myself and horses, I refrained from criticism. Since that time (August last), I have seen the same article in several papers, with every time the same mistakes; but believing some informed journalistic horseman would yet correct the errors, I kept still, until I now feel it my duty to point them (the errors) out, before they become fastened as truth through repeated publications. It is not possible so astute and able a horseman journalist as Mr. J. Cairn Simpson noticed them in the exchange from which his journal copied. It is through such recorded errors many foolish-hets are made to be decided through the queries and answers' columns of future sporting papers, by future generations of men. Permit me then, my dear sir, to quote the errors as they stand in print, then to correct them as they should go upon record. I quote: "Mr. Huntington also showed upon the track his two prominent sires, Clay Pilot, by Neave's Clay, and Spink and Andy Johnson, by Henry Clay.

(One too many ands is sometimes like a flea in a man's pantaloons). The above should read thus:

Mr. Huntington showed upon the track his two prominent sires, Clay Pilot, by Neave's Clay, by Cassins M. Clay, by Henry Clay, and Spink, by Andy Johnson, by Henry Clay.

There is a double reason for correction in the matter of Spink, which I will explain. Mr. Silas W. Spink, of Yates county, N. Y., bred a Tormentor mare to Henry Clay in 1852, and got a dark chestnut colt, which was kept as a stallion by him for many years, and was known as the Spink Horse, by Henry Clay. After he had sold him, his name was changed to Andy Johnson but up to the day of his death, the majority of men knew him as the Spink Horse, by Henry Clay. One of his youngest entire sons was called Johnny W., or Little Johnny, and under that name got colts. His first ree was when he was four years old, and Mr. Spink, who was present, suggested changing his name, which was done as he came up for the word go. The colt won the race as Silas W. Spink, which was shortened in time to Spink, and now that old Andy is dead, this son of his is more frequently called the Spink Horse, than plain Spink, and that is the way I presume the error got into the paper, Spink, by Henry Clay, Spink is by Andy Johnson, by Henry Clay. Both sire and son were dark chestnut; both trotted and both got and get trotters, but as they had different dams, the distinction is important.

Again, the paper reads: "Sayers or Cummings Henry Clay as the sire of the dams of St. Julian, Electioneer, Elane." It should read: Sayers, or Corning's Harry Clay, the sire of the dams of St. Julian, Electioneer, Elane, etc.; and this Harry Clay should never be confounded with the young horse so called in Ohio and Kentucky, which I notice is common with lads and young men. Corning's Harry Clay is the Harry that aired the dams of so many prominently fast horses, and a double duty is due in this matter: First, to the Hon. Erastus Corning, of Albany, N. Y., who bought Harry Clay nearly twenty years ago, when the prejudice William M. Rysdyk had excited against the horse in Orange county, N. Y., run him out of that county. Mr. Corning purchased him, silently fighting prejudice for years; but with care, preserving the life of the stallion, firm in his belief that it was only a question of time before the breeders of the entire country would recognize to appreciation his great stud value; and that day came, when Orange county was anxious to buy him back. Mr. Corning believed that the prominence of Wm. M. Rysdyk's Abdallah horse, Hambletonian, was due to the blood of Harry Clay and his grandsire, Henry Clay, without which Rysdyk's horse would never have reached the degree of prominence which he did. But as I have said, Orange county was glad to buy "old Harry" back at a good price in his old age, in hopes the fast-fading light of Hambletonian might receive fresh oil, or new leaven. But for Mr. Corning, Harry Clay would have been killed in fact many years ago, as he was all his life in the stud, by prejudice through Mr. Rysdyk's influence, and the want of information on the part of the people (farming community). To the Hon. Mr. Corning, then, is due public recognition by the breeding journals of the country, for the preservation of the life of Harry Clay during all the years of mad prejudice against the horse. It should also be borne in mind that after the sale of Harry Clay, Mr. Corning promptly filled his place upon his stock farm at Albany, by the purchase of Harry Clay's best young stallion son Shawmut, out of Lady Patriot, the dam of Goldsmith's Volunteer.

Having intruded upon your column with these corrections, it may be proper to give my reasons for making a small exhibit of some of my horses during the event of our Grand Central Trotting Meeting here. My nature is against parade of anything I may myself have and think well of. My years of experience and observation at agricultural fairs is that they are purely in the interest of the lords of creation, who are the farming community in any land. As such, they are devoted to agricultural productions, agricultural implements, and to fat hogs, cattle, sheep, and heavy grades of draught horses; while the finer types of horses, intended for the road, the saddle, or city coaches, are hardly appreciated; hence, as a rule, the awards are not satisfactory. I have myself received first premiums upon the poorest animals I had entered, and have repeatedly seen awards so made to others. An educated, refined, expert man to act in such places as a judge, is too sensitive to fill the position at any agricultural fair; and yet there are plenty of men to be had who can pass judgment upon fat steers, or horse beef in the hide, in a most masterly off-hand manner, agreeable to the farmers and satisfactorily to the institutions.

When judgment and awards upon fine bred horses shall be based upon blood and breeding as the standard, high-toned, educated gentlemen can be found who will conscientiously act to a degree of satisfaction at present unknown. But that day cannot come until horse fairs are made a specialty with blood and breeding the standard.

Such being my feelings and opinions, I have declined to make entries of my horses at any agricultural fairs, and although it is well known I am a strong advocate of these great yearly agricultural events, Madam Gossip had noised it about that "Huntington would not show his horses."

Our annual trotting circuit brings together the most intelligent, critical class of horsemen in the land, with from one hundred to one hundred and fifty of the best bred, best

groomed and best conditioned animals to be found for money, selected from Maine to California. To make an exhibit at such a gathering I felt would be crucial for horses not at the edge through weeks of preparation, with the lining results of weekly engagements; but my faith in blood and breeding is that it will always show, hence I am willing at any time to compete with the best the land can produce, and the more critical the inspectors, the better am I pleased; hence I preferred this critical exposition before practical men capable of an opinion, even at considerable trouble and expense to myself, rather than the agricultural parade with an assured large stock in premium awards, where competition must be with grade mongrels, called "standard bred."

With the wealth, cultured taste and refinement of our American people, the present fickleness of public opinion will wear away for the more solid characteristics of the English nation, or character; and as the different civilized nations of the earth can be somewhat rated by the standard of their horses, so we shall be, and the special horse fairs I have repeatedly suggested will become a fixed yearly event. Our great grass lands invite such an institution entirely separate from the all important agricultural associations, when that time comes, which it is certain to do, the present proper and mechanical constructed, standard bred nuisance, will have given place to the more intelligent one of blood and breeding; and I trust I shall live to see the day when every illiterate horse jockey or innocent country boy will not be shoving under your nose a dirty paper pedigree, saying his hull heef colt is "standard bred," or the gagged up, hooted up, old broken down mare is "standard bred, and if you don't believe it just read that ere pedigree; she's a Hambletonian, standard bred," this for the jockey, while the poor country hoy, with his great, fat, lszy, hull-beef colt, is unable to see why his colt, having been awarded a premium as standard bred, is not worth a house end lot without a word.

But to revert to my exhibit. I made it, as I have said and you have published, nor was I ashamed, impromptu as it was. I showed Clay inbred, the produce of a son of Henry Clay, from a daughter of Henry Clay; also the removes from Henry Clay in Spink and Clay Pilot, together with my young Clay-Arabian bred stallions.

To me it was a success, for the expert horsemen were well pleased. Mr. Gordon and President Edwards of Cleveland, Mr. W. C. France, Mr. Hickok and Mr. Turner, with many expert judges I cannot call to mind, made careful and capable inspection. Mr. France was one of the two men who had placed three young horses in the free-for-all class, which means to-day, able to go anywhere from 2:17 down to 2:03. In Mr. France's case it was a singular feature that all his horses went down below 2:20 quickly, and each one had the Clay leaven, the fastest, Hattie Woodward, being out of a daughter of old Henry Clay. The next one, Harry Wilkes, showing up old Henry Clay in his sire's dam, and the everlasting Kentucky pacing blood in his own dam, while Alexander, still further removed from Henry Clay, made the gamest race of seven heats that has ever been trotted in any country. Of course Mr. France believes in Clay, for he never comes through without a winner, and that winner proves to be Clay, close as he can get it. Mr. Turner remarked that it was worth one hundred dollars to see the sire of Captain Lewis, and pronounced Little Spink a good one. As Mr. Hickok looked down at Clay Pilot's knees, he fairly groaned, thinking of the weary hours he worked over Pilot's front legs twenty years ago; when as a three-year-old, Colonel Morgan used to drive him upon the principle that there would be more horses after he (Morgan) was dead; and as for the colt, "he was only a Clay." Mr. Hickok remarked that no gamer or faster colt lived twenty years ago, than this same Clay Pilot, and but for him there would have been no Beautiful Bells and Hindo Rose, no Eva and Sweetheart, no Ruby and Aloise, no Sultan and Del Sur, with a lot more rapid inbred Clays on the way. The western drivers, too, were glad to see old Clay Pilot; and when strangers would notice the sprung knees, the old horse seemed almost to understand it and beg with eyes, (as large as tea saucers), to step into Mr. Hickok's stable and look at the splendid and fast young mares Eva, Ruby and Aloise, his grand and great grand daughters. I gave the opportunity for every horseman who may have condemned me for my strong defense of Clay blood, to find fault if they could. Every day each horse was shown at work upon the track, and twice was one Arab called for the second time that they might see him move again; and while Captain Lewis was trying in the field to make people believe his game leg was better, his sire Spink stood in his stall ready at a moment's notice to beat the ten mile record should opportunity present between the races; but heats were broken so badly each day as to preclude the possibility of the opportunity. Gossip can no longer say I will not show any of my horses. Early in the Spring of 1884 the papers called me a "Clay miser" because my stallions were reserved. I promptly offered them all for public service.

Now with regard to my defense of old Henry Clay blood, I have been greatly misunderstood, because men did not know what I did, consequently could not look through my glasses.

For forty years the public have been deceived in the matter of blood and breeding of old Henry Clay. It has been admitted through my defense, that Clay trots; but adds prejudice, "Clay is soft," implying cold breeding. Why! old Henry Clay was one of the finest and hottest bred horses ever foaled in America. This false prejudice began when John Weaver presumed to send Andrew Jackson on to the stud grounds of Abdallah, at Long Island. Andrew Jackson was the brickmaker's colt, hence a plebeian, Abdallah belonged to the Treadwell's, of L. I., and was an aristocrat. I will give a fact or two upon the blood and breeding of Henry Clay, also speak of his dam, facts never before in print, and are unknown to the young of to-day. Allow me to prefix my statements with comparative analogy. If you had a mare of known or unknown mongrel breeding, but as a horse had excellent, valuable qualities, so great indeed as to induce you to breed a colt from her, but knew nothing about the stallion to be sought, and should ask some friend, who was a great fancier of the thoroughbred racehorse, he would enthusiastically urge you to breed her to a thoroughbred racehorse stallion as the sure way to ensure a valuable colt. Very well, this was just the case with Jacob S. Platt and Lady Surry. Platt had considerable wealth made from real estate, inherited. Platt street, in New York City, cut through from John to Beekman, (an old stamping ground of mine forty years ago), was cut through by him, and named after him. Lady Surry had for several years been a famous road mare, in New York City, one of the game, everlasting roaders. She came into Platt's hands when the two horses Henry and Eclipse were world beaters as thoroughbred race or running horses. Platt was induced to think it would be a great thing to breed a foal from Lady Surry, by the great Henry, and as he never did things by halves, he bought two more French Canadian mares, called Bet and Rose. These three French Canadian mares he bred to Henry and Eclipse, getting a hay

filly, by Henry, out of Surry, a chestnut sorrel colt, out of Bet, by Henry, and a bay brown filly, out of Rose, by Eclipse. When these three foals were three years old, they were broken, at Jamaica, L. I.; Van Cott broke Surry's colt, also the one by Eclipse, out of Rose; and two more worthless mares were never bred anywhere, except by the same process of mongrelization. Bet's colt was still worse, because as a horse colt, he made more trouble. He was sold to go to N. J., and as he was by the great Henry, did quite a business in the stand under the name of May Day. Platt was sick and disgusted with horse raising. His ardent racehorse friends assured him Lady Surry was a dunghill, or she could never have thrown such a brute of a mare to the great Henry, but nothing was said about the mare, by Eclipse, out of Rose, still worse. Prejudice is cunning, and plays upon the equally ignorant. The colt by Henry, out of Bet, covered the best of Messenger mares in New Jersey and Philadelphia, getting now and then a good one to credit of May Day, a horse that could neither trot or run as May Day, because prominent through the mares he covered, and Lady Surry's mare colt, sunk out of sight a noted dunghill, Mr. Platt and all his friends decided Lady Surry was a dunghill, although she had been noted as the gamest mare on the road, in New York, which neither Bet or Rose were, although all three were some Kanck blood. Here then we have in connection with the Treadwell influence, another cause for calling Henry Clay dunghill bred. Please put a mark here, and take up for the present another point.

The English thoroughbred racehorse is reputed to have been deduced from the thoroughbred Arabian; and the turf history of England reasons strongly that way; but having reached a certain stage of individuality after years of repeated infusions of Arabian blood, it became self-sustaining, when resolutions were passed by the English Jockey Club, demanding the English thoroughbred should be eight times consecutively inbred to itself, to be eligible to the Derby Event. Concluding that King Solomon's great stud of horses were pure Arabian, and that the English race horse was a legitimate descendant from King Solomon's horses, then England has a right to feel proud of the lineage of her thoroughbred running horses.

When Grand Bashaw was imported into Philadelphia in 1820, he was believed to be the highest bred Arab brought to America to that date. His height, color, sad general characteristics supported the imported statement, how he covered Pearl by the thoroughbred race horse First Consul; the dam of Pearl being by imported Messenger, and grand dam by the imported thoroughbred race horse Rockingbism. Messenger is conceded as the father of trot in America, and his dam was inbred to Godolphin Arabian. Here then, in Young Bashaw by the Arabian Grand Bashaw, we have the highest type of English thoroughbred race horse blood, also the still finer, purer form from the Arab which made the English horse, certainly Young Bashaw was bred to a Queen's taste, and he, covering a mare inbred to imported Messenger, gets Andrew Jackson, the only stallion that was never beaten a heat or a race at the trotting gait; and this Andrew Jackson gets Henry Clay from Lady Surry, which mare could produce only a worthless dunghill to the great race horse Henry. I am aware that prejudice is ignorance, but when snorted by pride, envy, and malice, it can kill the best of men or horses; prejudice never tries to suppress men or animals of low degree, but jumps quickly to destroy any and all things that stand in its way. I have stood in its way and it has hurt me; but so long as it does not cut my tongue out, and my hands off, I shall speak and write the truth in the interest of blood and breedings as relates to the horse.

I have promised to publish my "Clay history," in which I can give facts and arguments there is not room for in papers. That there is cause for effect, we all know. Men are too apt to jump at conclusions without having thoroughly investigated cause. Clay blood and Pilot bloods are similar and easily assimilated. The English thoroughbred running horse will not assimilate with a blood of a different instinct. The thoroughbred running horse crossed upon a blood pre-disposed to trot, is like trying to mix oil and water. A constant trituration may suspend them and the influence temporarily under one head, but they will not stay. Men interested in horse breeding are deceived by prejudice, also deceive themselves. It should not be so. Concentrated thought with close application is the only way to learn. Few men are inclined that way; they prefer to work easy in harmony with public opinion; but no man ever accomplished anything yet without work, and that against obstacles. If he wins, prejudice calls him a mean man, concocting all manner of false reports to his injury.

Intelligence comes of slow growth with experience. Cultured intelligence reasons, working out difficult problems; but prejudice is lazy, is ignorant, speaks lies, ruptures friendships, is the focus of gossip, has a horror of reason, and means death to all progress. Respectfully yours,

RANDOLPH HUNTINGTON.  
ROCHESTER, N. Y., September 19, 1884.

## Shetland Ponies.

"Magnus Flaw" in *Coleman's Rural World* corrects an error in regard to Shetland ponies which has been generally accepted. One of our clearest recollections is of droves of these diminutive equines, on their way to England, though at that period, fifty years ago, they were intended for riding ponies and not for use in mines. They were too sprightly to be as old as the *World's* correspondent represents, and our greatest ambition at that time would have been gratified by the possession of one of them. Being a favorite of our maternal grandfather he would have indulged the desire but mother placed an interdiction on the purchase.

The first animal we ever owned was a donkey, a present from an invalid English lady, who rode it daily to the Spa and back, and was so docile that even a six-year-old boy could be trusted on its back.

Not contented with a whip, spurs were improvised by putting long tacks in the heels of our shoes, and the result was a scratched face and many black and blue spots. If so much danger in riding a donkey, a wild Sheltie was not to be thought of, notwithstanding the pleadings of both.

## SHETLAND PONIES.—HOW REARED.

Editor *Rural World*: I noticed an article in your issue of September 4th, on the Shetland pony, in which it is stated that there was a certain pony imported to this country which had been reared so exclusively on fish that he only learned to graze by imitating its new companions. I was born in the Shetland Islands, and lived in them until I was fifteen years old, and I never heard of such a case, although they will walk into the kitchen and partake of whatever may happen to be on the

table, and will eat the sea-weed along the seashore in Winter time, but I have never saw one that would eat fish. And while we are at it a little sketch of how they are bred and raised in their native clime might not be out of place.

In the first place, I am sorry to say that the real breed of "Shelties" are gradually being obliterated by crossing them with larger horses, as the inhabitants want a horse that will do heavier work for them, such as plowing, which heretofore has been done by the people with spades. The ponies are very strong for their size, and are admirably suited for the work they have to perform, which consists principally of carrying "peat" fuel in straw baskets placed on either side of their backs, and with these on they have to jump rocks and bogs, followed generally by their female driver; oats, manure, and nearly everything else are carried in the same style.

They are very tame and docile, considering that they spend the first three years of their lives in the wild and rugged hills without being touched. They are broken at the age of three, but never do any herd work until they are four, unless the family are so poor that they are forced to use them, which too often is the case. When they are fifteen years and over, they are as a rule bought up by buyers for \$5 to \$20, and sent to English and Scotch coal mines, where they become totally blind, and die at the age of about from twenty to twenty-five; but some are so attached to them that they turn them loose and let them roam at their pleasure (which very often means falling over the precipices into the sea) rather than have them end their existence in such a cruel style.

I think the fish story must be a mistake, somehow, as the Shetland Isles are not so bleak and storm-beaten but that they can support all the vegetable-eating animals on them.

Very respectfully yours,  
MAGNUS FLAWS.

### Contagious Pleuro-Pneumonia.

We are creditably informed that the above disease is unknown in this State, but even in that case it may be well to know something in relation to it, so that should it make its appearance prompt methods may be taken to extirpate before becoming so widely spread as it is in the East. The following is from the *Ohio Farmer*:

The outbreak of this disease in the West is a calamity that has long been feared by thoughtful men, and efforts have been made yearly, to secure national regulations whereby its introduction and spread could be in some measure controlled, along with other diseases of a contagious or infectious nature. Prof. Law, of Connell, N. Y., has given this malady much study, and has published a valuable report upon it. The name—pleuro-pneumonia—he regards as unfortunate. The malady is always the result of contagion or infection, and is never caused by exposure, inclement weather, changes of climate, etc. He has adopted the name of "contagious lung plague." His definition of the disease is this: "A specific contagious disease peculiar to cattle, and manifested by a long period of incubation (ten days to three months), by a slow, insidious onset, by a low type of fever, and by the occurrence of inflammation in the air passages, lungs, and their coverings, with an extensive exudation into the lungs and pleurae."

One of the peculiarly dangerous features of the disease is its long period of incubation. It will sometimes exist in a latent or semi-dormant state, for months, especially in the cooler seasons of the year, and the disease in this form is just as contagious or infectious as in the violent or acute form. Thus a single animal may communicate the disease to a hundred before the owner knows what is the matter. Prof. Law says on this point: "A beast purchased in October passes a bad Winter and dies in February, after having infected several others. She has had a long period of incubation, and when the disease supervenes actively, she has passed through a chronic form of illness, so that when others sicken, people fail to connect the new cases with the infected purchase. Then again, in an ordinary herd of ten or twenty head, the deaths do not follow in rapid succession, but at intervals of a fortnight, a month, or even more, and those unacquainted with the nature of the disease suppose that it cannot be infectious, or all would be prostrated at once."

In regard to the means of communicating the disease, Prof. Law says, it may be by immediate contact, through the atmosphere for some considerable distance, by the inhalation of pulmonary exudation when placed in the nostrils, from impregnated clothing of attendants, through infected buildings, infected manure, pastures, fodder, etc. How long the germs of the contagion will retain vitality is a question, but healthy cattle have taken it from being lodged in a stable occupied by diseased cattle three or four months before. Pastures grazed by infected cattle have given the disease three months afterwards, and hay mused over by sick animals has communicated the contagion a long time after. Dr. Law says he has seen a sick herd separated from a healthy one by not more than 15 yards, and a moderately close board fence seven feet high, and in the absence of all inter-communication of attendants, the exposed herd kept free from the disease for six months; but at other times infection will take place at much greater distances without any known means of conveyance on solid objects. The suggestion is made that the virus had dried on light objects, as feathers, paper, straw, etc., and was borne by the wind.

In regard to the symptoms of the disease, they vary considerably. They are more severe in hot climates and in hot weather, and are milder in higher altitudes than on the plains; they are more severe, also, in the large, heavy breeds than in others. Sometimes it elicits itself abruptly and violently, and without premonitory warning. But generally the symptoms come on most insidiously, and for a time are not at all alarming. For some days, a week or even a month or more, a slight cough is heard at rare intervals—perhaps when the animal first rises, or leaves the stable, or drinks cold water, and hence attracts little or no attention. The cough is usually small, weak, short and husky, but sometimes painful and attended by some arching of the back, extension of the head, or protrusion of the tongue. This may continue for weeks without any noticeable deviation from natural temperature, breathing, pulse, appetite, etc. In some cases the disease does not advance further, and its true nature is only detected by other animals becoming affected. In a majority of cases, however, it goes further. The animal becomes dull, more sluggish than natural, does not keep constantly with the herd, but may be found lying alone; breaths more quickly (20 to 30 times a minute instead of 10 to 15); retracts the margins of the nostrils more than usual; the hair, especially along the neck, shoulders and back, stands erect and is dry; the muzzle has intervals of dryness, and the milk is diminished. The eye loses its prominence and lustre, the eyelids and ears droop slightly, and the roots of the horns, ears and limbs are hot and cold alternately. The tempera-

ture goes up to 103 degrees and even to 108 degrees in more acute or severe cases, and auscultation and percussion reveal decided changes in the lung tissues.

As seen in America, in Winter, the great majority of cases fail to show the violence described in the books. The animals fall off rapidly in condition, show a high fever for a few days, lie always on one side (the diseased one) or on the breast, and have a great portion of one lung consolidated by exudation and encysted as a dead mass; and yet the muzzle is rarely devoid of moisture, and the milk is never entirely suspended. During the Summer, however, the symptoms are more violent, and the mortality high and early. The breathing becomes short, rapid and labored and each expiration is accompanied with a deep moan or grunt. The nostrils and corners of the mouth are strongly retracted. The animal stands most of the time, its fore legs, set apart, its elbows turned out. The head is extended on the neck, the eyes prominent and glassy, the muzzle dry, a clear or frothy liquid distils from the nose and mouth, the hack is slightly raised, the secretion of milk is entirely arrested, the skin becomes harsh, tightly adherent to the parts beneath, and covered with scurf; there is no appetite or rumination; bloating follows, and later, a profuse, watery diarrhea in which food is passed in an undigested condition. The tongue is furred, and the breath of a heavy, feverish or mawkish odor, but rarely fetid. Abortion is a common result in pregnant cows. Death ensues in a few days after these violent symptoms set in. Loss of flesh is sometimes so rapid as to be surprising, one-third of the entire weight in a single week, often.

We have given the symptoms as described by Dr. Law, somewhat in detail, as most of our readers never saw a case of the disease. They are now facing the possibility of seeing it, and should understand something of its nature and symptoms.

### Unshod Horses.

There is scarcely a paper of the agricultural classes which has not, of late, articles in reference to using horses barefooted. In most cases the experiments tried have proved satisfactory, and when there was failure there were good reasons for lack of success.

The proper treatment of the feet of horses is, without doubt, the most important subject in relation to stable management, and everything pertaining of great interest. The following is from the *Rural World* of Sept. 11th:

My daughter has a fine mare, kept for her own driving, probably about 8 years old. When first obtained she stumbled frequently, both in harness and under the saddle; was afflicted with corns, and was nearly always lame after shoeing. About 13 months ago we decided to remove the shoes, and we have used her unshod ever since. She was driven almost daily all Winter, over both snow and ice roads, with so much safety that a man who one evening drove her attached to a cutter, up a small hill so smooth and icy that it was very difficult for a man to walk up, it said: "After this you may say she can climb a tree." While she is still lame at times, there is much less of it than when she was shod, and under present circumstances I should be unwilling to put on shoes again. We are in a mountainous region, and the roads are more or less covered with small round stones.

In taking shoes off a horse long accustomed to them, tread will be awkward until the animal gets used to going unshod. To get the full benefit of the change will require probably a year at least, but with a young horse it would be different. I would never put shoes on them. When shoes are first taken off, the horse's hoofs will require careful attention, until they are grown so that the marks of the nails are all removed and the hoof becomes healthy. It is well, as the hoof grows, to rasp off the edges with a file, so as to avoid exposing a sharp edge to the ground, which would be apt to chip off. I derived much valuable information on the subject from Mr. Robert Martiu, of Westport, Conn., who has used his horses unshod for about six years; also from a little work entitled "Horses and Roads," by Free Lance.

### How They Were Created.

Harold, the sire of Maud S., has no harness record, and his physical lines are opposed to a great flight of speed. He has the trotting disposition, but not record-breaking conformation. His sire, Rysdyk's Hambletonian, never did anything remarkable in harness, and he was from the loins of Abdallah, son of thoroughbred Mambrino. The dam of Harold was also a daughter of Abdallah, and possibly in-breeding had something to do with his shape. Miss Russel, the dam of Maud S., was broken to harness, but no attempt was made to develop her speed. She has much of the racing form which she transmitted to her distinguished daughter, and Filot, Jr., her sire, was got by a Canadian horse, out of Nancy Pope, a daughter of thoroughbred Havoc. The second dam of Maud S. was strictly thoroughbred. By virtue of her great performances in light harness, 2:15½ double, and 2:09½ single, Maud S. reigns an undisputed trotting queen. She is the highest type of a fast driving horse, and students of breeding take a lively interest in analyzing her blood. From whence came the qualities which have made her superior to all horses ever bred? Trotting disposition is essential to success, but disposition without speedy form is common-places. The country used to be full of blocky-built Morgans, that knew nothing but trot, but it was the kind of trot which required three minutes to the mile. If our breeders had intensified this disposition, stubbornly closing their eyes to form, they would actually have shortened instead of lengthened the stride, and 2:10 would still be a rosy dream of the future in the place of an accomplished fact. For nerve force and racing form we have gone to the horse which possesses these qualities in the highest degree, the thoroughbred, and the record has been lowered with startling rapidity. The lesson is plain to intelligent men, but the pettifoggers try to obscure the issue, and they delight in working upon the prejudices of the ignorant. They gravely state that thoroughbred strains are detrimental to the trotter, because it is the disposition of the thoroughbred to break into a run; but when referred to the thorough blood in Maud S. and Jay-Eye-See, they face about with the peculiar logic that this running blood has trotted, and that, therefore, it is trotting-bred. If Boston blood is trotting blood in Maud S. and Jay-Eye-See, why should the same proportion of it in an untrotted light harness horse be strictly running blood, and a positive injury to the animal possessing it? And why should every American breeder be so dogmatically told to get as far away from the thoroughbred foundation as possible? The pettifoggers, who so glibly use the phrases, trotting-bred and running-bred, do not really know where to draw the dividing line. They rail at the thoroughbred foundation without seeming to be aware that it was by joining the nerve force and high form of the running horse to the trotting disposition, that we created the queen and the king of the turf, Maud S. and Jay-Eye-See.—*Turf, Field and Farm.*

### Good Mouth.

The following, copied from *Coleman's Rural World*, is in the main correct, and the suggestions are valuable. There is the old-time error, however, in giving the "bars" as the most sensitive portion of the horse's mouth. In a great majority of cases "hard pullers" through the tongue over the bit in order to obtain relief from the pressure which is far more painful than when the point of resistance is the bars. It is rare that the bars are "calloused," the angles of the lips being the seat of thickening. The trouble from "pulling" usually comes from "heavy hands," the constant pressure making the tongue sore when it is thrown over the bit. Sensation is numbed by a stoppage of circulation and the animal bears on the iron in order to produce the desired result. "Bitting riggings" have a good deal to do with teaching the habit, but the governing cause is the hard hand of the driver. Many horses which are nearly uncontrollable when driven by men who depend upon strength, are pleasant when a woman handles the reins, the delicacy of touch accounting for the change.

As in either riding or driving the master is constantly in communication with the horse through the medium of his mouth, it becomes a matter of the highest importance that we understand more fully than most persons do the philosophy of the action of the bit and rein, and their relation to the position of the head and neck, in motion, as well as the mode of junction of head to neck and neck to shoulder. It is said of a horse that he has a good mouth or a bad mouth, the term being understood differently by different persons. Thus, if a horse is what is usually termed very easy on the bit—that is, bears very lightly on the hand of the driver—he is by many considered to have a good mouth; while perhaps most persons, in speaking of a good mouth, mean a horse that pulls pretty strongly against the bit; in other words, that a good mouth is somewhat of a hard mouth. But, properly considered, a good mouth can only be one which bears moderately firm pressure from the bit, being at the same time sensitive to whatever directions the rider or driver aims to convey through handling the reins. Some horses early show a tractability, through responding promptly to directions conveyed through the lines to the bridle bit, such as others never acquire, no matter how much or how careful training they receive.

Yet the bars of the mouth on which the bit rests are as amenable to culture as are the fingers amenable to improvement in sensitiveness of touch. This is a matter of training, which can only be carried on successfully by gentleness from a delicate hand, the lessons being repeatedly given, and all the time alike. The idea that the horse can be made to mind the bit and become tractable under it by jerking and roughly forcing him to whirl round, or go from side to side under strong pressure from the lines, is an error. Such treatment causes callousness, thickening of the delicate gums upon which the bit bears, and, in proportion as this rough treatment is persisted in, does the mouth part with its sensitiveness and the horse pass beyond a reasonably fair stage of susceptibility to training.

The sensitiveness of the bars upon which the bit bears is very great. Covered with a delicate velvet-like mucous membrane, with a highly sensitive structure beneath this and over the bone, we are admonished that we have in this sensitive structure an efficient agency in bringing the horse under our rule. To get the full benefit of these sensitive bars we must preserve their sensitiveness. This is done by using a bit that can be borne easily and without injury, and by using gentle force. When these precautions are neglected, thickened, indurated bars are the result, and as this condition increases the horse loses his tractability, and if he be naturally headstrong, then the calloused mouth will render him doubly so, because in proportion to the thickening and hardening of the parts upon which the bit bears, in that proportion is he able readily to resist the driver's will, asserting his own. This condition is sometimes produced upon one side of the mouth, the other side not being callous. Where this occurs the horse will be addicted to pulling upon the rein of that side, and his power to resist turning to the right, if the thickening be upon the right side, or to the left if it be on that side, will be great, and all this may be and often is, attributed to having what men see fit to call a stiff neck. All efforts to change and improve the forward carriage of the horse by manipulation through the bit and lines, should be put into force very gradually, and in place of doing violence to the horse's natural formation, as is too commonly done, the utmost ingenuity and judgment should be exercised, looking to improvement rather than to violent change.—*Live Stock Journal.*

### Order on the Quarter-Stretch.

No gentleman who bets on horses will manifest displeasure over his losses, even though he honestly believes his money has been taken away from him by a wrong decision of the judges. Hissing and howling at the men who are chosen to decide races are not the part of gentlemen or of those who would be regarded as thoroughbred. The true blue blood will take pride in hearing his losses without showing a trace of vexation, no matter how hard the result hurts him internally. The racing at Brighton Beach has been exceptionally good this year. The fields of horses are unprecedentedly large, the betting correspondingly great and the dividends almost always rich. The starter, Mr. James F. Caldwell, has probably no equal in the world in performing the difficult and delicate duties of his office and in treating all that face his flag with impartiality and justice. The judges are experienced in their profession, and their honor is above the shadow of suspicion. Yet in close finishes, before the horses' numbers have been hung out, it is not unusual for a crowd to gather around the judges' stand and attempt what looks like intimidation by shouting out the names of the horses they happen to have backed, and after the numbers have been displayed, continue the unseemly exhibition by howling and hissing. This has been carried so far as to have been observed even in the grand stand. Even women there have screamed and bled on such occasions. To impress on anyone the bad taste of this sort of exhibition needs no argument. Everybody knows or ought to know that, in a case of a close finish it is impossible for any but the judges to tell which horse is in front as the post is passed. Everybody knows, or ought to know, that to persons only a few inches from the line the apparent finish of horses is not the real finish, but that to such there is a real optical illusion, which can be easily shown. The time has not yet arrived when determination of the winner of a race will be by a popular vote taken in the grand stand.—*Brooklyn Eagle.*

**Working Capacity of Unshod Horses.**

If it shall be found to be universally true that those horses which are raised on flat, soft soils, have bones and hoofs less solid and capable of resisting wear than those of horses grown on hilly, dry, and rocky land, the fact may have a tendency to greatly encourage the raising of horses on the plains and in the mountains of the West, where some attention has been directed to that industry already. The ponies of Texas and the plains certainly present evidence showing that the horse of those regions is far more solid in hoof and bone and more enduring in muscle and strength, than his fellow of the moister districts east of the Missouri. The amount and the severity of the service the pony of the plains is required to perform, seems to the Eastern man altogether beyond the powers of any horse. Weighing scarcely 800 pounds, the pony is expected to carry a saddle of some forty-five pounds weight, and on top of that a rider of, it may be, 200 pounds or more, over soft sod, up steep and stony hills and down slippery places, to swim streams, and to make a distance of a full hundred miles on demand in twenty-four hours, and in an emergency to repeat the feat the next day. Should a buffalo weighing anywhere from 800 pounds to a ton, chance to cross the cowboy's path, his much-enduring pony is expected, knows that he is expected, to hold by the lesser the struggling heast until it is choked into insensibility, or gives up the ghost entirely for the want of wind. Seldom, if ever shod, these ponies have hoofs which, for long service, usefulness, and solid, fine texture, are equaled by few, if any, of those of horses which have borne the inflictions of the blacksmith's art.

In a carefully considered article in Land and Water, the writer says: "In Africa a horse working in a post-cart does, barefoot, over bad ground, twenty-four miles in two hours. In New Mexico horses are ridden barefoot forty miles day after day, and perhaps twenty miles of this will be over a rough mountain track. In Brazil little horses (they seldom exceed fourteen hands) carry, slung across pack-saddles, barefoot—for they have never been shod—some thirty-two stone. Thus loaded, or overloaded, they do twenty to thirty miles per day. Their journey may be some 300 miles, and they load heck the same. In England even race-horses are shod. To gallop over a race-course, which no doubt may be herd at times, it is actually thought necessary to shoe a horse! Here, where weight is of the very utmost consequence, the heels of the English race-horse must be weighted with plates! The fact that Marden, when he ran barefoot in the Sandown Derby, June 2, 1882, heat, in the deciding heat, his two shod opponents by three lengths (though in his first race with them that day, Marden, with his plates on, could only dead-heat them), such a fact as this weighs little with the horse Englishman, who will still he found to set his thoughts or opinions against facts! After all that can be said as far as argument goes, he will still be found to prefer mere assertion; it will still be the 'I think this' and 'I don't think the other,' with him! But then is not the horse (and for the most part untraveled) Englishman, as a rule, in the language of 'Freelance' in 'Horses and Roads,' 'energetically conservative'?"

"But many of our countrymen connected with horses, deeming themselves practical men, are too apt to think that they have," as Mr. Ransom ('Freelance') says, 'gone into everything,' and they may consider their knowledge as to the real capability of the horse's hoof complete. Now, is it complete? Is not shoeing horses very much a matter of routine with us? I will give two instances in order to prove this:

"Some weeks ago I received a letter in which the writer said that he had been told by a veterinary surgeon that if a horse were worked barefoot his hoofs 'would wear down to the quick in a few hours.' Now, I saw the other day a horse which has been doing the work of his mester, a doctor, barefoot, not for 'a few hours,' but for over five years! During this time the horse must have traveled, shoeless as he is, some 13,000 miles over the not too good roads of the east of London, and often with a heavy hrougham behind him. The hoofs of this horse are the admiration of veterinary surgeons, and they show no signs of undue wear. This horse was unshod when 8 years old.

"I recently saw a pony 17 or 18 years old never shod, except for a short time when in the breaker's hands. This breaker shod the pony. This was done against the master's wish and without his knowledge. The breaker was, I dare say, practical enough in other details of his calling, but, like the majority of his countrymen, he 'had always seen horses shod, and he thought they always must be shod.' The pony was shod without shoes, but with them she nearly fell with her master as he rode her home from the breaker's. The shoes were taken off, and the pony did her work admirably without them for years. She has done plenty of work, for her owner tell me that he has frequently driven her, and also ridden her, over forty miles in a day. The saying, 'One horse can wear out four sets of legs,' does not, of course, apply to this pony. The application of this saying is to the shod horse, whose every step is made upon iron. As a writer has well said, 'It is the shoe, not the road, that hurts the horse.' Now, we see that both veterinarian and breaker mistook the nail-lacerated, contracted, unused foot for the natural healthy

foot. The former used off the ground with an iron ring called a shoe, and with the insensitive sole and frog pared away, is not (when the shoe is first pulled off) fit for contact with the ground. In such a case time must be given for the foot to recover before the unshod horse can be asked to work barefoot.

"I have a cast of the off fore-foot of a mare belonging to Mr. Whitmore Baker. This cast was taken in December, 1882, after the mare had worked barefoot on stony, hilly Devon roads for two years. She was unshod in December, 1880, being then seven years old. This foot shows no signs of undue wear, and I shall be happy to show this cast to any one."

Writers who favor using horses unshod overlook one circumstance. While upon dry roads, and in dry weather, the hoofs unshod, may and probably will, stand wear well, and the horse travel more safely and easily than if shod, the case might be quite different in wet seasons and in places where the hoof would be wet much of the time. On the moist soil of the Middle States, for example, and in the cities where the streets are regularly sprinkled, the hoof would be kept almost constantly softened, and it certainly seems reasonable to suppose, would wear out much more quickly than it would if hard and dry.—Chicago Tribune.

**Sellers, the Champion Amateur.**

Sellers is the son of a magistrate and member of the firm of Irving & Sellers, of Preston, England. He disclaims any connection with the manufacturers of the machine he rides, and races only for amusement and to gain the championship to the world. His prominence on the path dates only a few months back, and was a great surprise to his countrymen before he sailed. His poor time in past performances was mainly due to poor tracks, and that the races were usually waiting ones. He has won every scratch race he has entered except one. He has no other a good "stayer," but is improving greatly in that respect. One mile is his best distance, and on the last quarter he is capable of putting on a wonderful spurt. He is said to have covered a quarter mile in 33 1/2 seconds in private. Sellers speaks three or four languages, and has a college course in Germany as well as England. He began racing last year, winning thirteen first and one second prize out of fifteen races, nearly all being handicaps. This year he won one out of two races at Belfast, in April, was disabled by sickness for nine weeks, and then entering several races was badly beaten. August 1st he easily won a two-mile race at Preston, as well as a one-mile handicap, starting from the scratch, in 2:51, which was the best time made by him until he came to this country. From then on his performances astonished the "knowing ones," though no very fast time was made in public. He won the one and five-mile championships of the North at Huddersfield on the grass track, Aug. 2d. August 5th, at Harrowgate, he was beaten by the Scottish champion, Emy, but the next day he succeeded in beating all the most noted English amateurs, excepting Liles and English, in one and a five-mile scratch race on a soft track. In the last race he came in forty yards ahead of the field, among whom was Geekell. On the 10th he beat Emy in a two-mile scratch race, and won a one-mile handicap. His last race before coming to this country was at Liverpool, where he won the North of England thirty-guinea cup in a two-mile race.—Mirror of American Sports.

The "Fete Velocepedique" which began at Turin, Italy, on the 24th of Aug., is reported to have been the most elaborate meeting ever held in connection with the sport, throughout the world of wheels. The Cycling Championship of Italy was secured by G. Loretz of Milan, and the great International Professional Bicycle race by H. O. Duncan, with P. Medinger second, F. De Civry third, and G. Loreutz fourth. H. R. H. Prince Amedeo (brother to King Humbert) and his three sons were present every day.

**THE DRAMA.**

Vienna Gardens.

The Royal Spanish Opera Company, who have lately arrived in this city, via Havana and Mexico, have been delighting large and critical audiences throughout the week at the Vienna Gardens. No performance will be given this evening, but to-morrow evening the Company will present the well known Spanish Opera, Mariana. This Opera will close the engagement of the Royal Opera Company. On Monday evening and throughout the week a carefully selected specialty company will appear.

**HOLSTEIN CATTLE.**

WE EXPECT A CONSIGNMENT OF 50 HEAD about the last of November. For particulars address H. & W. PIERCE, 728 Montgomery street.

MANY VALUABLE DOGS DIE IN DISTEMP. per. Cure guaranteed or money returned. Address C. B., BREEDER AND SPORTSMAN Office.

**AUCTION SALE  
Of Horses.**

**GREAT SALE OF**

**Thoroughbreds & Work Horses,  
STALLIONS  
—AND—  
BROOD MARES,  
Consisting of 800 Head of  
Horses, the Finest Lot  
ever Offered on the  
Pacific Coast.**

Belonging to the late Chas. McLaughlin, and sold by order of the Executrix of the Estate.

At 12 o'clock M.,

—ON—

Wednesday, and Continuing  
Thursday and Friday, Oct.  
29th, 30th, and 31st, 1884,

AT THE

**PESCADERO RANCH,**

Bantas Railroad Station, San Joaquin Co.

Terms of Sale: All sums of \$500 or under, cash; all sums over 30 and 60 days good indorsed notes drawing 10 per cent. per annum.

The above stock is all the property of the late Chas. McLaughlin, and will be sold without reserve.

For catalogues apply at the office of the Executrix, No. 16 Montgomery Ave., to Green Lamb, at Bantas, or to the San Francisco Horse Market, 33, 35 and 37 New Montgomery St.

**S. C. BOWLEY, FIDDES & CO.,  
Auctioneers.**

Henry Fromberg, Geo. Feddes, S. C. Bowley.

**EASTON & ELDRIDGE,  
Stock & General Auctioneers,**

Office and Salesroom, 22 Montgomery Street, San Francisco.

**SPECIAL  
Auction Sale**

BY ORDER OF

HENRY W. SEALE, Esq., we will sell from his Home Farm, Rancho San Francisco, in Santa Clara County, a selected

Band of Fifty Horses,

Comprising the Well Known Trotting Stallion,

**ELMO,**

And his Progeny, also

**THOROUGHbred BROOD MARES,  
Colts and yearlings.**

Also a Number of Work Horses. The Sale will include a Choice Band of Breed, big Stock, Matched Coupe and Carriage Teams, Driving Teams and Roadsters. Sale Positive, and will be held in the Town of

Mayfield; Santa Clara Co.,

At the Station of Southern Pacific R. R.

Saturday, Oct. 18, 1884.

At 12 O'clock M.

Trains will leave San Francisco on the day of Sale at 8:30 and 10:40 A. M. from Fourth and Townsend Sts., to return after the sale.

Catalogues, with full description and pedigree now ready, and will be mailed to any address on application. Stock can be seen at any time before the day of sale at the ranch at Mayfield.

**EASTON & ELDRIDGE,  
Auctioneers.**

**AMUSEMENTS.**

**Mechanics' Pavilion  
SKATING RINK**

Larkin Street near Market.

DAILY SESSIONS (Sundays excepted) commencing Monday, September 22d, from 10 to 12 A. M. and from 2 to 5 P. M., and evenings from 7:30 to 10 o'clock.

On Tuesday evenings the Pacific Skating Club has the exclusive use of the rink. Terms—Mornings and Afternoons 25c. for Admission and use of Skates. Evenings, when Boys under 15 cannot skate, 25c. for admission and 15c. for skates. All improper persons and features interdicted. Full Band in attendance. J. L. WALTON, Actuary.

**The Vienna Gardens,  
Cor. of Sutter and Stockton Sts.,  
THE POPULAR  
FAMILY RESORT  
OF THE CITY.**

The Ladies' Orchestra, composed of accomplished musicians is the feature of the Entertainments, with the talented Miss Bertha Neuber as leader. Refreshments of all kinds the best the market affords.

G. F. WALTER,  
Sole Proprietor.

ADMISSION FREE.

**OPIUM.**

**DRUNKENNESS:**

THE OPIUM AND MORPHINE HABIT AND drunkenness cured. The habit and necessity wholly removed and health improved by DR. L. E. KEELEY'S Chloride of Gold Remedies. Send for references and pamphlets, mailed free. Opium smoking cured in two weeks when under my special care. Dr. C. G. STRONG, Sole Agent for the Pacific Coast. Office, 21 Third street, San Francisco, Cal.

**TIPS AND TOE  
WEIGHTS.**

A Natural and Plain Method

**Horse Shoeing,  
With an Appendix,**

Treating of the Action of the Race Horse and Trotter as shown by instantaneous photography.

BY JOS. CAIRN SIMPSON,  
AUTHOR OF HORSE PORTRAITURE.

Round-hoof d, short-jointed, fetlocks shag and long. Shakespear.

PRICE RETAIL:  
In Paper Covers.....\$1.00  
In Cloth..... 1.50

TRADE SUPPLIED ON USUAL TERMS. Mailed to any part of the United States or Canada on receipt of price.

Send orders to  
**SAN FRANCISCO NEWS CO., or  
BREEDER AND SPORTSMAN,  
San Francisco.**

THE BREEDER AND SPORTSMAN, a weekly journal devoted to the interests of breeders of domestic animals and the advancement of all legitimate sport. Subscription price, \$5 per year.

JOS. CAIRN SIMPSON, Editor.

The above treatise, 200 pages, will be sent free to yearly subscribers who send orders direct to the office.

San Francisco

**ASHLAND PARK  
TROTTING STUD**

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no petting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Belmont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Ball-sora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address  
2 171  
B. J. TREACY, Lexington, Ky.

**Hunting Dogs.**

AUCTION SALE, Monday, Sept. 29th, a 3 P. M. at 25 Washington St., from Ken- ncl of Leavesly, Gilroy.

**DEER HOUNDS.**

WANTED TWO YOUNG DEER HOUNDS, DOGS. Address with price and other particulars, 123 California Street, S. F., Room 9.

FOURTH ANNUAL EXHIBITION

OF THE

SAN MATEO

AND

Santa Clara County AGRICULTURAL ASSOCIATION.

No. 5,

TO BE HELD AT

San Jose, Cal.

ON

JERSEYS, GUERNSEYS,

Registered in the A. J. C. C. and A. G. C. C., of New York, the only standard register.

Jersey Belle of Scituate that made 25 lbs 4 1-2 ozs. of butter in one week.

A grandson of above cow is now in use in the Yerba Buena. This herd won all the herd prizes for 1882. Since then have been added young animals from Mr. Pierce's valuable herds East. He now has Jersey Belle of Scituate, Coomassie, Mary Ann of St. Lambert, Silver Cloud and Euphras strains; also large selections from the Islands, without regard to cost.

He has interest in Eastern herds of 200, at the head of which stand only living son of Jersey Belle, Romeo de Bonair, (87 1/2 per cent. Mary Ann's blood), and Pier-sou, the best show bull in America. These hulls are valued at \$10,000 each.

HENRY PIERCE, San Francisco.

IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

The above cut represents the body-piece, the patent also covering the improvements in the hood. The following are the claims granted:

- 1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
2. The blanket or covering A, having the flap C, and the extensions B, to fit the fore and hind legs of the animal, front fastenings FG, and the permanent straps or bands E, substantially as and for the purpose herein described.
3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings F G, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.
4. The blanket A and hood J in combination with the elastic connecting-strip I, substantially as described and for the purpose set forth.
5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as herein described.
6. The improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands fixed to it to secure it around the body, whereby the use of loose surcingle is avoided, substantially as herein described.

The right to make clothing in the United States will be sold on a royalty. Apply to the patentee,

JOS. CAIRN SIMPSON, SAN FRANCISCO, CAL.

## HARNESS AND SADDLERY.

Linen Sheets and Hoods, SWEAT AND COOLING BLANKETS. THE LARGEST STOCK, FINEST Goods, and Lowest Prices. WHOLESALE & RETAIL. J. O'KANE, 767 Market Street. —Just received, a large stock of— ENGLISH JOCKEY GOODS. AGENTS FOR STICK-FAST TOE WEIGHTS.

## John A. McKerron,

## FINE HARNESS

AGENT FOR Famous Whitman Saddle and Halter Bridle, AND CELEBRATED Stick Fast Toe Weights. HORSE BOOTS AND TRACK WORK A Specialty. 232 Ellis St., opp. Fashion Stable, San Francisco.

## DIETZ'S PATENT

## CHECK HOOK.

Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check-Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook. Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

## ROWING.

### Beach and Hanlan.—The Story of the Race.

[From our own Correspondent.]

SYDNEY, Sept. 10th, 1884.

EDITOR BREEDER AND SPORTSMAN: I send you by the City of Sydney papers with the account of the great race last month for the aquatic championship of the world, Hanlan vs. Beach, and also some interesting correspondence about the race, and the feeling manifest here in regard to a renewal of another match here by the same men at an early day, and which has been finally decided to come off May, 1885. The newspaper report of the match is very correct. I saw the race from the finish to start from the bridge of the steamer Fairlight and never more than 200 yards away from the rowers.

In addition to the foul, which Hanlan admits was his fault alone, and which could be seen by every one watching the race, Hanlan tried to stave Beach's boat by pushing his paddle at her and only failed for want of being nearer, and the fact that Beach recovered his stroke so quick which shot him ahead causing Hanlan's paddle to slip harmlessly off Beach's boat. At the time of the foul Hanlan was undoubtedly "used up," and pulled over to Beach's water deliberately for the foul, as he was at the time fully a boat and a half's length in the lead, and of course could see Beach and his position to him. Hanlan's plan (and by which he has won all his races), of rowing his man down in 1½ miles, failed this match, and was the plan which Beach had determined to upset. Hanlan, had taken his defeat fairly, well knowing he was beaten by a better man. But he thinks he should have another show immediately as he brought the championship here. In all similar cases Hanlan has been a stickler for the rules, and now finds the tables turned.

SHORT STOP.

The following description of the race is from the Sydney Sportsman:

Very little time was wasted after once getting into position, and at 4:27 commenced the race. For the first hundred yards or so, the two boats were exactly level, propelled at the rate of 33 strokes to the minute, Hanlan pulling, perhaps, a trifle nearer stroke than Beach. This rate was kept up for fully a quarter of a mile, those on board the Tomki being unable to say which was leading, the race being to this point, a very close one. It was here observed that Beach, however, was a few feet astern, but pulling two or three vigorous strokes, he came up almost level, and, at half a mile, was on equal terms, or nearly, with Hanlan. On board the Tomki all was excitement as they saw Beach so gallantly holding his own. The feeling was intensified when it was observed the steamer was going over right across to the two scullers, and it was feared an accident would occur, as Hanlan was only a few feet from the bows of the vessel. He saw his danger, however, and the captain did also, so that by a mutual effort the danger was averted. Hanlan had put on a great spurt to get clear of the steamer, and perhaps of Beach also, who was hanging on to him far too tenaciously to be pleasant, so, putting on all the power and science he could bring to bear on the contest, he soon took a clear lead, and as the water was, from this point to the mile, pretty rough, he made a strenuous effort, as he knew it was the current report that Beach could not live in rough water. There seemed a probability of this theory being proved, as Hanlan got fairly in front, Beach appearing to labour a little, and for a moment had an anxious look. The Canadian secured a lead of two lengths, and looked as though he was going to defeat his opponent, as he had others, by setting them in the first mile. Even Beach's supporters, with one or two exceptions, thought their men was beaten, so easily did Hanlan appear to be going, and with a smile on his face. There were one or two, however, who thought differently, and even at the juncture declared their belief that Beach would yet win, for they felt convinced the Canadian was rowing himself to a standstill, to secure the usual advantage he got over his opponents in the first mile, thereby, in most cases, breaking their hearts. But in this he reckoned without his host, for Beach has too much of the lion in him to be dismayed by such tactics, while as for the smile which he observed on turning his head once, it appeared to him to have more ghostliness than joy about it, and though those on board the Tomki shouted out that Hanlan was laughing at him, playing with him, and could leave him as he liked, Beach thought otherwise, and notwithstanding the fact that Hanlan held a clear lead, he settled down to a steady, long, sweeping stroke of 36, and gradually but surely gained on his man. By the time Putney Point was reached, a mile and a half from the

start, Beach had got the bow of his boat across Hanlan's stern, hanging on like a terrible shadow to the Canadian, and do what he could he could not get away from him, though he was making supreme efforts to do so. At last the collapse came, like a thunderbolt to some, and the mighty Canadian, the hero of a thousand fights, the petted darling of the aquatic world, was a hopelessly beaten man. Evidently paralyzed at this terrible defeat, he fairly stopped rowing so exhausted was he, and having, either deliberately or helplessly, got into Beach's water, the latter came into him so that their skulls overlapped and a foul occurred. Hanlan had no effort left to get clear, while Beach, as fresh as could be, soon got away again, Hanlan feebly holding up his hand to claim the race. Beach got away several lengths before Hanlan could recover himself, and, going along steadily, kept sufficiently in front to warrant a victory. Hanlan set off again after looking round at Beach, and managed to pick up a little of his lost ground. Beach appeared to steer a bad course, and getting amongst some rollers, did not get away so well, and some began to think that Hanlan might yet snatch the victory out of the fire. At every few strokes the latter took a look round at his great rival, expecting, perhaps, to see him give out some indications of exhaustion, and thereby enable him yet to avert defeat. Vain hope; those masses of muscle were still working backwards and forwards at every motion of his splendid limbs, and though Hanlan persevered, it was a hopeless case, for, pulling well within himself, the Dapto oarsman rowed past the winning post an easy winner by fully six lengths, in 20 min. 28 sec., defeating the most celebrated aquatic champion the world ever saw, and making his name immortal by the great victory.

The result of the race proved, I think, conclusively that the best man won, and though the collapse of Hanlan, after going a mile and a half, may be looked upon as not his true form, the explanation can be found in this—that in every one of his contests he has been so far ahead at the end of a mile and a half that he has had his men dead beat, so that he was enabled to take a breather, and when any of his opponents attempted to continue the struggle with the least show of pluck, or determination, the relaxation from his high rate of speed gave him sufficient energy to draw away again, and secure once more a long lead, that, eventually the hindmost man either gave up helplessly, or merely mechanically continued the struggle, so as not to appear to be demoralized. I do not think that Hanlan will ever beat Beach, for, in him, he meets a man that has great pace, nearly, if not equal to himself, and has undoubtedly more endurance, has any amount of indomitable pluck, and can row a whole champion course from start to finish, and, though astern, never ceases to do his utmost, the very man to set at defiance and overthrow Hanlan's tactics, and when they meet again, which they will most assuredly, Beach will have all the best of the knowledge gained in the late match, while Hanlan will have the bitter sting of a crushing defeat weighing on his mind, that, both fit and well the odds should certainly be in favor of the man who was the first to humble the hitherto invincible Canadian. As regards the action of the steamer Tomki, it was impossible to avoid going from the northern shore, which only prevented her from grounding, and I do not think, after impartially considering the matter, that it affected Hanlan's chance half a length, for he must have seen her before he came up to her bows, and could have kept as far from her as he liked, so that the horror he was reported to have felt at her close proximity to him, had little cause to affect so clever a performer in a boat. My opinion is that the powerful form of Beach, so doggedly sticking to him, in spite of his superhuman efforts to get away, affected him more than the Tomki, as it was so different to what he had invariably found in his other contests, where his men were at his mercy, helplessly and helplessly beaten, and when Beach finally got level with him, Hanlan was just as helpless, if not more so, than his numerous opponents had been before in his hands, from sheer exhaustion, caused by his great efforts to get away from Beach, that he was glad to take a rest. The foul, of which something was made by Hanlan's supporters, was entirely his own seeking, as he confessed to Mr. Deeble and Beach himself, on Saturday night, at Mr. Frank Smith's, and though he vainly endeavored to explain it on Monday evening, when the stakes were paid over, it was too palpably evident at the time to be the least doubted. It is hardly generous on Hanlan's part to vilify the champion course on the Parramatta River, to intimate, by innuendo, that the captain of Beach's steamer, the Tomki, wilfully shaped a course to impede his progress, and to insinuate under a thin veil that Beach is afraid to meet him. The action of the captain was to avert a serious accident that might have occurred had he kept on his course, while Beach, I am confident, will only be too glad to meet him

again after a proper relaxation from the months of hard work he has undergone, for he has nothing to fear, but now that he has achieved such a splendid victory, let him wear for a time the honors that were predicted by the writer, and in due time he will ably defend the proud title of Champion of the World.

### Teemer Defeats Wallace Ross.

Two thousand people witnessed the five mile race between Teemer and Ross, at the Point of Pines, Mass. The conditions of the race were that Ross should have five seconds start over a mile and a quarter course. The start gave Ross an advantage of two and a half lengths. Ross lost half his advantage by a poor turn. Teemer gained rapidly in the last quarter of a mile and won the race by a few feet. The official time was thirty-five minutes, though outside watches made it about twenty seconds slower.

The Gandaur-Hoamer match, on September 28th, the most exciting race that ever took place on Western waters took place on the Creve Cœur lakes, near St. Louis, between Hosmer and Gandaur. Attendance large. The course was three miles with a turn. Hosmer led on suzerance till within a half mile of the winning point, when Gandaur spurred by in splendid style and won easily in twenty minutes fifteen seconds. The stakes were \$500 a side. Gandaur was greeted with deafening cheers.

## BICYCLING.

Lest Sunday an unattached rider attracted a considerable amount of attention owing to his loud uniform of bright red. These are the huffoons who help to bring the sport into disrepute, but we suppose there is no way of suppressing them. The kind of riders we have reference to generally cycle around the thickly inhabited streets for show and not for exercise; sometimes we are told that they venture out as far as the Park conservatory.

### Championship of France.

This annual event was decided on the road at Neuilly, near Paris, on Sept. 7th, the distance being 6½ miles. The race was declared a dead heat between DeCivry, (holder), and Medinger, notwithstanding the fact that the former was a couple of feet ahead.

The following new uniform will probably be adopted by the San Francisco Bicycle Club: Dark blue single-breasted coat, with collar buttoned high, and knee breeches, black stockings, black helmet and black shoes.

The Bay City Wheelmen announce an excursion to Santa Rosa. They will go up with their machines on the Republican train this afternoon. Sunday will be devoted to wheeling around the town.

Elliot Norton is a tall, spare, flat-chested, sallow-looking youth that does anything but impress the spectator with his fearful speed.

C. J. Schuster has become a convert to the bicycle. We think he will make it sultry for most of our riders of the present time.

The members of the drill corps of the B. C. W. were put through a number of manoeuvres early last Sunday morning.

The feat of riding a tricycle from Sydney, to Melbourne, by James Copeland, has just been accomplished for the first time.

The Bay City Wheelmen will shortly offer for competition a medal emblematic of the club championship.

It is reported that Illetoe, the English amateur, is to make his permanent residence in this country.

H. C. Finkler will shortly leave on an extended business trip to Los Angeles.

F. W. Gibson left last week to attend the dental college of Philadelphia, Penn.

There are over 100 men and boys in Denver who ride the "silent steed."

San Francisco can now boast of eight tricycles.

George M. Hendee is only eighteen years of age.

TURF AND TRACK.

The San Jose Fair.

For attendance Friday was the best day of the meeting. The stands were crowded and the carriage park was fully occupied, a triple line of vehicles extending on either side, clear down to the seven furlong pole. In the morning the final parade of stock took place and the award of ribbons was made.

The first race on the card was a mile dash for two-year-olds. There were three nominations but only Mischief appeared and she walked over for the entrance money of the other two and her own.

Oct. 3d—Running; purse \$200 for two-year-olds; one mile. Jas. Mee's ch f Mischief, by Thad Stevens, dam Katie Pease, 1 1 1 1

The second race was mile heats, for a purse of \$250. The starters were Billy the Kid, Jon Jon and Garfield. In the betting Billy the Kid had the call at \$60, Jon Jon \$40, Garfield \$20.

In the first heat they got an even start and ran an eighth of a mile head and head. Billy the Kid moved along from that point and at the quarter, in 26 3/4 seconds, was a length in front.

He held the place to the half in 52, and to the wire in 1:45 1/4, Garfield struggling, and Jon Jon well in hand. In the second heat Garfield made the pace fast at the start, and at the half-mile pole was three lengths ahead of the favorite, who was half a length in front of Jon Jon.

Around the turn they closed in a hunch, but in the finish Billy the Kid was pulled back and Jon Jon led Garfield easily. Time, 1:45 1/4. Garfield retired and betting was, Billy the Kid \$80, Jon Jon \$30.

In the deciding heat the favorite had half a length the advantage at the quarter, in 25 1/4, but at the half, in 50 1/4 the two were even. On the lower turn Jon Jon came away a length, but the favorite beat him home in a big gallop. Time, 1:45 1/4.

Same day—Running; purse, \$250; for all ages; \$50 to second, \$25 to third; mile heats.

G. L. Richardson's h g Billy the Kid, by Leinster, dam Lily Simpson, aged, 110 lbs. .... 1 1 1 1  
W. Kelly's h g Jon Jon, by Monday, dam Plaything, 3 years, 101 lbs. .... 1 1 1 1  
G. Paebeco's, br g Garfield, by Langford, dam by Lodi, aged, 110 lbs. .... 2 2 2 2

The third race was a novelty affair, a dash of one mile, with \$50 for the horse first at each quarter, and \$200 to the winner of the full mile. The starters were Beaconsfield and Jim Douglas at seven weights.

In the betting, Thursday night Beaconsfield was a slight favorite at the track, before the race, the horses sold even. The run to the quarter was done in 24 1/4, Douglas three parts of a length ahead; at the half, in 49 1/4, he was a length the best.

Around the turn Beaconsfield moved np, and at the three-quarter pole, in 1:15, Douglas was only a head in advance. They made a rattling finish, Douglas winning by half a length, with a little left. Time, 1:42, the fastest mile ever run on the San Jose track.

Same Day—Novelty; running; for all ages; purse, \$350; \$50 to the first horse at each quarter pole, and \$200 to the first horse at the finish. One mile.

Geo. Howson's h b Jim Douglas, by Wildidle, dam Yolone, 108 lbs. .... 1 1 1 1  
E. J. Baldwin's b c Beaconsfield, by Hockhocking, dam Aileen Allanch, 108 lbs. .... 2 2 2 2

The fourth race was a special of half-mile heats for a purse of \$150. The horses at the post were Mischief, Tom Paine, Robin and George. Mischief was a strong favorite in the betting at \$180 to \$60 for the field.

In the first heat the start was not of the best, Tom Paine getting a lead of four lengths; the favorite last. In the stretch Paine attempted to bolt, and George won the heat; Paine second, Robin third, Mischief last. Time, :50. Mischief still held the first place in the pools, selling for \$40 against \$33 for the field.

In the second heat the start was good. The favorite showed in front at once and strung the field out in the stretch, winning the heat under a strong pull; Robin second, George third. Paine bolted again and was distanced. Robin was sent to the stable under the rule.

In the deciding heat Mischief won as she liked; George second. Time of the second and third heats, :51 1/4, :51 1/4.

Same day.—Special purse, \$150; half mile heats. Jas. Mee's ch f Mischief, by Thad Stevens, dam Katie Pease, 87 lbs. .... 4 1 1 1  
T. Simpson's ch g George, by Echo (h, dam unknown, 110 lbs. 1 3 2  
W. L. Appleby's br c Tom Paine, by Ben Wade, dam unknown, 90 lbs. .... 2 2 2 2  
Wm. Boothe's h g Robin, by Bob Wooding, dam Lizzie Marshall, 110 lbs. .... 3 2 2 2

A match pacing race between Terra Cotta and Bruce, reported to be for a stake of \$350 a side was started, and two heats disposed of before dark. Bruce won the first in 2:33 1/2, and Terra Cotta the second in 2:38 1/2.

On Saturday the day was delightful, but the attendance was lighter as many visitors had left for home. At one o'clock the postponed pacing race was ordered np and finished by Bruce winning straight heats. There was but little betting, Bruce being first choice.

Oct. 4th—Match Pacing Race. Bruce, g, by Billy Hayward—A. L. Hinds, 1 2 1 1  
Terra Cotta, g—E. B. Johnson, 2 1 2 2

The first number on the day's programme was the 2:26 class of trotters and it excited more interest than any other race of the week, as Sister and Adair were to contest. These two and B. B. were the only starters.

In the betting rooms Friday evening but little was done, Adair having the call at \$50 to \$40 for Sister, and \$4 for B. B. On the track, before the race, the odds were longer on the favorite, the average pools being Adair \$50, Sister \$25, B. B. \$4.

On the second score they got the word on an even start. Sister broke badly at the sound of the bell and came almost to a standstill. Adair led around the turn three lengths ahead of B. B., Sister forty yards back.

At the quarter in :38, and the half in 1:13, the positions were unchanged. In the last quarter Sister closed up somewhat, and B. B. breaking, the mare took second place, Adair winning in a jog. Time, 2:27 1/4.

After the heat lotting was, Adair \$50, the field \$20. In the second heat they got the word on the first trial, and for an eighth of a mile they were in a hunch, when B. B. fell back a length and Adair moved to the front half a length, and in this position they reached the quarter in :36 1/4 and the half in 1:10 1/4.

There was no change till within 200 yards of home, when Sister began to move up. The fight was fierce from there to the wire, Adair winning by a nose, B. B. a good third. Time, 2:21 1/4.

The betting now stopped altogether. For the third heat they got away even, Adair showing to the front slightly on the first turn. Before they reached the quarter B. B. had got into second place, and they went down the backstretch in a string, Adair first and Sister last.

Near the half the favorite made a tumbling break and lost ten lengths, Sister coming to the fore and beating B. B. easily. The driver of B. B. was adjudged guilty of impeding Sister, and the black horse was

placed last. Time, 2:23 1/4. Pool selling was now resumed; Adair \$50, the field \$20.

For the fourth heat they got away well. Sister was half a length ahead on the first turn, where B. B. skipped and fell back. She held the front, passing the quarter in :36 1/4 and the half in 1:10 1/4, Adair clinging to her wheel like a shadow. In the last quarter Adair began to creep up. Sister struggled to hold her vantage, but the favorite continued to come on, winning one of the closest and gamest heats ever trotted on any track by half a head; B. B. third. Time, 2:21 1/4.

Same day—Purse \$500; 2:26 class; Adair, b g, by Electioneer, dam Addie Lee—E. H. Miller, Jr. 1 1 2 1  
Sister, b m, by Admiral, dam Flora—M. Salisbury, 2 2 1 2  
B. B., blk g, by Milliman's Bellfounder—Jas. McCord, 3 3 3 3

The next race was a special trot for Tump Winston, Scandinavian and Hunter. There was considerable money lost and won on the race through the failure of Scandinavian to meet the expectation of his friends, the grooms and stable attendes, who hecked him to win a sack full, if he had behaved better.

Before the start pools were Winston, \$40; Scandinavian, \$20; Hunter, \$20. The Hunter money was probably one extremity of a double ender for he never looked like a winner or anything approaching it.

In the first heat Winston ran most of the way, and Scandinavian got the heat to his credit; Winston, second; Hunter, third. Time, 2:27 1/4. Donathan now got up behind old Tump Winston and although Scandinavian hed much the most speed he was a bad breaker and between Tump Winston and Hunter they managed to worry the black horse off his feet once or twice in every mile.

Five heats gave the race and money to Winston; Scandinavian, second money; Hunter, third.

Same Day—Special purse, \$250; for named horses. Tump Winston, ch g, by Primus—E. Dwyer, 2 1 2 1 1  
Scandinavian, blk g, by Black Hawk Morgan—P. Johnson 1 2 1 2 2  
Hunter, br g—S. Sperry, 3 3 3 3 3

The last race was for roadsters for a \$250 purse. Lottery, Patchen and Whisper started, and before the five heats that it took to decide the matter were trotted it was too dark to see the color of a horse twenty feet away, but it was the last day of the meeting and Saturday night at that, so there could be no thought of postponement.

Whisper was played smooth in the race, for what purposes is not quite clear, for if they was any money staked outside of the purse it was not visible. No pools were sold, neither did any one openly offer to lay the price of a dinner on the result. Patchen was distanced for foul in the fourth heat.

Same Day.—Purse, \$250; for buggy horses. Whisper, br g—Younger, 3 2 1 1 1  
Lottery, ch s—Garrett, 2 3 3 2 2  
Patchen, b g—Haves, 1 1 2 dis

A Literary Fellow in the Sulky. Mr. M. T. Gratian was out in the Minnesota circuit this season with his eighteen-year-old Morgan stallion, Herod, and had an eventful and interesting experience. Here is his account of his first race:

It was with fear and trembling that I made an entry of my eighteen-year-old stud in the \$500 free-to-all at Mankato. With his public performances in view, a let-up for years, and his lameness, how presumptuous it seems? A letter from Secretary Vail brings a full realization of it. He says: "Mr. Shaffer had poor luck with the horse that season. I may mention that he gained no better than third place at Milwaukee, June 8, 1880, in a stake race wherein he was beaten by Kentucky Wilkes and Edwin B., and that he was last horse in the 2:26 class at East Saginaw, June 15, 1880—time, 2:32 1/2, 2:26, 2:27—at both of which places he was entered by said Shaffer; and in September, 1880, at Helena, Mont., he was second in the free-for-all; time, 2:36, 2:39 1/2, 2:39 1/2."

What sort of a horse was this to be found in a free-for-all with Von Arnim, Mollie Middleton, Baybrino, Hancock and Lulu Judd? Mollie and Von Arnim did not start. Hancock and Lulu sold alternately as favorite at \$10, Herod bringing up the rear for \$2. My friends pitied and my enemies sneered; the old horse ran away in warming up, and then betas were freely offered that he would get the flag. The track is a new half-mile one, which will in time be fast, if properly worked, but it is far from fast now. Herod went off like a clock, answered every call I made on him, and won the first heat in 2:27 1/2 by the most reliable watches. No outside timer made it slower than 2:28. But the solitary timer in the judges' stand, with a rattle-trap of a timer, obstinately defended its accuracy against the assurances of dozens of good and honorable men with costly and accurate watches. No one disputes, however, that this was the fastest mile ever trotted in Mankato. The second heat was a repetition of the first, won, as I supposed, by a clear lead; but the judges said, "Dead heat." Everybody said, "Now the old horse will quit," but I borrowed a whip from Price Smith and won again. Here were three heats under 2:30, the first time that figure had been beaten in the State on a half-mile track in two years, save by Herod last June. But of course he could not hold out any longer. Yet he did, and finished ahead the fourth time. This would never do. The speculators and their messengers swarmed into the judges' stand, which, contrary to rule, always contained a lot of people. Herod was set back to last for a foul upon Hancock, whom I had never seen or heard in the heat. Interested parties clamored for the foul, but honorable men, with not a cent on the race, who stood where it was claimed to have been committed, say it is a myth. The heat was given to Lulu Judd. In the fifth heat Baybrino made one of his swerving jumps into Herod, right at the stand, jostling the old horse off his feet, his only break in the race.

He recovered from it almost instantly, went along and again finished first, but the pool box and judges' stand were now desperate, so the heat was taken from me for the break. Feeling that I stood no show for justice and that the race was a cruel abuse of my old horse I begged Spencer to let me win the sixth heat easy and divide. No, but he would divide if Lulu could win. Neither would yield, and so we went out for battle. As usual the word was given with Herod a little back, but he hung right there like the game old hulk dog that he is. Always responding to the whip, always striving a little more at each shift of the hit, just keeping his place at the mare's shoulder until we reached the middle of the home-stretch, when I caught my lincs with one hand after a vigorous shift of the bit and called with the whole body for a last supreme effort. Spencer's whip was hissing through the air like lightning, but the mare was dying. Slowly the old horse worked to her head, and, with an effort neted by every on-looker, threw himself a half length ahead under the wire in 2:30 1/2. The betting men were appalled; minute after minute passed while their friends, the judges, earnestly consulted. Impatient of the wrong done me, regardless of rules and restraint, I called upon every lover of justice to help me main-

tain the right. Such an angry roar went up from the crowd as speedily brought a finale. "Herod wins this heat and race."

The president afterwards regretted that the judge had not fined me for this demonstration and complained that my voice alone could be heard during the disturbance. If it is never raised in a worse cause than to get a game and honest old trotter three heats after winning six, there will be no cause for shame, and I am sure the judges have no right to complain of any lack of courtesy from me, for did I not respectfully salute them after their final decision, and with cep in hand meet politely assure them of my distinguished consideration, thanking them for their just and impartial rulings, without which I could not possibly have won the race? Holders of Herod pools could not get them cashed. The backers of Lulu Judd and Hancock with credit at the box were unable to square up their lossee, and the box was bankrupt, which is a pointer as to the need of winning six heats to get three.

Racing at Baker City, Oregon.

BAKER CITY, Sept. 9th, 1884.

EDITOR BREEDER AND SPORTSMAN: The Baker City Agricultural Society's fair opened to-day with very unfavorable prospects. It has been raining and snowing almost every day for the last ten days and of course our roads and tracks are very muddy. The first race on the programme was a dash of a quarter for a purse of \$50. Monroe Johnson was the favorite in the betting and won it easily.

BAKER CITY, OGN., Sept. 9th—Purse, \$50, of which \$10 to second; dash of a quarter of a mile. W. Leight's b g Monroe Johnson, 1 1 1 1  
N. Carnaban's b g Ingomar, 2 2 2 2  
Owner's b g Bay Prince, 3 3 3 3

The second race was a saddle horse purse of \$50; for horses that had never started for public money; three-quarters of a mile. There were six starters, namely: Ianthe, Clincher, Monroe Johnson, Slim Jim, Boss Toney, and Crockett. Monroe Johnson was the favorite. The track was very muddy. They got the word on the first attempt with a splendid start and finished in the order named, after a close contest between Ianthe and Clincher, in the fast time, for the track, of 1:20 1/4. Ianthe is a three-year-old by Osceola and she was saddled for the first time just five weeks ago, so after a few months more we expect to see her do wonders. It rained in the morning and a light shower after noon, and in consequence the attendance was light.

Sept. 10th.—To-day there was to have been two races, but it began to rain at 5 A. M., and up to the time I jot down these notes, 8 P. M., it has not ceased. The sport has been postponed to the 13th, the other three days to follow on the 15th, 16th and 17th.

Sept. 13th.—The second day's races came off to-day, although we have had some rain every day and it rained to-day in the morning and again before the second heat of the first race. The first race was heats of five-eighths of a mile. Starters were Echo, Repetta, Dundrum and Major Anderson. They came up for the word very even but the starter did not see fit to send them off and called them back. The riders of Repetta and Dundrum did not respond, and the two ran a very pretty heat in 1:03, Repetta winning. As the word had not been given they were called on to try it again which they did, very disastrously to the pool buyers. This time they got the word to a good start when Echo went to the front and won very handily, Anderson second, Repetta and Dundrum distanced. Time, 1:04. The next heat was won by Echo without a struggle, Anderson second. Time, 1:05. Betting before the start, Repetta \$20, field \$8.

Sept. 13.—Purse \$120; heats of five-eighths of a mile. J. Gentry's ch g Echo, by Osceola, 1 1 1 1  
F. Gleason's b g Major Anderson, by Geo. Wilkes, 2 2 2 2  
W. Leight's b m Repetta, by Alarm or Reform, 3 3 3 3  
C. Marsh's b g Dundrum, by Melbourne, Jr., 4 4 4 4

The second race was a trotting purse for all two-year-olds. Starters: Leona, Pluto, and Eva H. Mr. J. W. Wisdom's bay colt, by Challenger, dam by Bay Pilot, was named in the race, but did not start. There was considerable betting, Leona being the favorite, at \$20 to \$16 for the field, and it was justifiable for she took the lead and won with but one skip, distancing the field. The time was 3:10 1/2, fast for the day and track.

Same Day—Trotting; purse, \$120; for two-year-olds. D. A. McAllister's h f Leona, by Lenont, dam by Administrator, 1 1 1 1  
J. F. Ferguson's b c Pluto, by Black Stranger, dam unknown, 2 2 2 2  
Neil Hogoboom's ch f Eva H., by Mt. Vernon, dam unknown, 3 3 3 3

Sept. 15th.—The track was good and the weather fine. For this day there was to have been a four-year-old trot and a three-year-old running race, but the trotters were off and the day's sport was short. The three-year-old race was so one-sided that there was no betting. Echo won in a canter in the slow time of 2:04.

Sept. 15th.—Purse \$120; for three-year-olds; one mile. J. Gentry's ch g Echo, by Osceola, 1 1 1 1  
F. Toney's ch f Ianthe, by Osceola, 2 2 2 2  
F. Gleason's b g Ingomar, 3 3 3 3

Sept. 16th.—This was the fourth day and after so much distancing and easy wins we expected to see a good race, but it was the same thing over. The first race was trotting, half mile heats for a purse of \$120, first horse to take all. Mark Twain and Black Bess started. After a little warming up they got the word to a good start. Mark Twain shot ahead and won the heat, distancing the mare in a walk. Time, 1:29 1/2. Black Bess broke and began prancing, never striking a trot again. There was considerable money changed hands as the mare was favorite 2 to 1.

Sept. 16th.—Trotting; purse, \$120; half-mile heats. Mark Twain, b g, by Milliman's Bellfounder—F. Spicer, 1 1 1 1  
Black Bess, blk m, by Mt. Vernon, 2 2 2 2

Sept. 17th.—The fifth and last day was the best race of the meeting, and a race that would be a good one in any country. It was seven eighths of a mile and repeat with Repetta, Echo and Policy in. They were all favorite by turns at one time but Repetta finally settled into first choice at \$20 to \$14 for the field. The first heat they got the word with Repetta in the lead, which she kept apparently without distress, winning by half a length, Echo second, at a length ahead of Policy. Time, 1:31 1/4. There were many false starts in the second heat, each one trying to get the best of the other. They finally got the word with a fair send off, Repetta having a slight advantage. Echo seemed tangled and did not get to work until too late to win. Repetta kept the lead to the half, where Policy ran to her and showed his nose in front; but in the straight Repetta drew away and won by two lengths, Policy second, four lengths ahead of Echo. Time, 1:30 1/2.

Sept. 17th.—Purse, \$120; beats of seven-eighths of a mile.  
 Wm. Leigh's b f Repetta, by Alamo or Reform—Long Nine..... 1 1  
 Carman & Gentry's ch g Echo, by Osceola—Sunshine, by Dasher. 2 3  
 Jos. Kinney's b g Policy, by Osceola—unknown..... 3 2  
 Time, 1:31, 1:30.

This closed the meeting and no more aggravated case of "Oregon weather" ever occurred in the whole history of racing in this country. LONESS.

### Fillies in the St. Leger.

If Eleanor, the dual winner of the Derby and Oaks in 1801, is excepted, there was no remarkable winning filly of our classic race for several years, as after Paulina Altisidora was the next St. Leger winner in 1813, when the big field of seventeen came to the post, and Mr. Watt's Altisidora, spoken of as a beautiful filly, started first favorite at 11 to 5, and won, after a tremendous race with Cameleopard, by half a head. There was a little question at the time that the next year's St. Leger should also have gone to a filly, as Eborina was a hot favorite, and, although beaten, she showed form enough the next day to prove that she should have won. Fillies were getting more to the fore about this time, as in 1816 Sir B. R. Grabame's The Duchess won the St. Leger when starting at the nice price of 12 to 1, and at the same time a sister competitor, called Maritornes, was the favorite. Beggar Girl was made a hot favorite for the St. Leger in 1818, but she was never dangerous. In the year that the grey colt, Gnstavns, won the Derby he was made a great favorite for the St. Leger, though curious reports were about, and he never figured prominently in the race, which was at last desperately fought out between old John Day on the filly, Fortuna, and Bill Scott on Jack Spigot, the colt winning by half a length. The next year's St. Leger was very similar, as Swap was hacked as if it was over at 7 to 4, the next in demand being the filly, Muta, who ran pretty well, but the crack was never in it, and in a fine race home between the two rank outsiders, Theodore and Violet, the colt won by half a length. Several years elapsed before another filly took as prominent a part in the St. Leger, but in 1827 Mr. Petrie's fine filly, Matilde, who was second, and should have won by all accounts if he had not shown temper at the post. Second to a Derby dead heater was a filly the next year, as Major Yarburgh's Belinda ran up to The Colonial, though beaten easily by three lengths. In Chorister's year fillies had a good deal to do with the St. Leger finish, as La Fille Mal Gardee led at the distance, when The Saddler headed her, to be almost immediately challenged by Chorister, the two running home locked together, and the last mentioned won by a head, La Fille Mal Gardee being close up third, and Lady Elizabeth was fourth. It was for Queen of Trumps, in 1835, to be the first dual winner of both Oaks and St. Leger, and there can be no question that the Hon. E. L. Mostyn's filly was one of the most femons ever seen on the turf. She was only beaten once, and that was through an accident, and it was thought that a bigger, finer filly had never been bred up to the time of her appearance. Another very famous filly ran in the next St. Leger, but she could only get third to Elis Scroggins, though only beaten a head by the latter for second honors. This was Beawing, a mare that has been longer associated with the St. Leger than any other to be found in the *Stud Book*, as her son, Newminster, won it in 1851, her grandson, Lord Clifden, in 1863, her great grandsons, Hawthornden Wenlock, and Petrarch in the respective years of 1870, 72, 76, and it would be very remarkable if her great granddaughter, Busybody, were to win the coming St. Leger, as according to Herrington's pictures, she resembles Beawing in an extraordinary degree. To judge by coincidences Busybody should win the St. Leger, as her sire and grandsire were both under the same cloud as she is, and being about right on the day they were nursed home by superior jockeys, and sorely discomfited those who had opposed them.

To return, however, to past heroines of the St. Leger. Several notable ones, such as Crucifix, Miss Letty, and Industry, were not entered in the Great Northern race at times when their performances in the south would have made them very dangerous for St. Leger honors; but in 1842 there was a surprise in store, as it was thought a pretty good year, Atilla having won the Derby for Scott's stable, and Our Nell the Oaks for the Dawsons, with the well-named Meal, by Bran second. Lord Eglington had a filly called Blue Bonnet, by Tonchstone, out of Maid of Melrose, by Brutandorf, that had been amiss all the Spring, and so did not keep her engagement in the Oaks, and as she had some slight accident when being sent to Goodwood as a two-year-old, and did not start, she was quite a dark one on the eve of the St. Leger, when her owner took 4,000 to 100 three times about her, and this brought her amongst the favorites at start. In a well run race Atilla was beaten to nothing, and Blue Bonnet, having only Sea Horae to settle from the distance, won by a length. Harry Hall was then beginning to draw the portraits for *Bell's Life*, and the numbers for the 18th and 25th of September, 1842, contained well-drawn likenesses of Blue Bonnet and Beawing. In 1844 the Princess made a bold bid to repeat the Queen of Trumps coup of landing Oaks and St. Leger, for she won the Epsom race with the greatest of ease, and her friends stood her for the St. Leger, her price at start being 4 to 1, whilst The Cure was favorite at 5 to 4, and they took 7 to 2 about Fanch a Ballagh. The finish was between the three, the Irish colt beating The Cure by a length, and half a length only divided the latter from the Oaks winner. In 1845 Miss Sarah, who was third in the Oaks with 30 to 1 against her, was thought to possess a better form than all the colts engaged in the St. Leger, as between Epsom and Doncaster she had won the Great Yorkshire Stakes, beating the Goodwood Cup heroine, Miss Elis, and a large field. She was therefore served up very warm for the St. Leger, her party backing her down to 5 to 2, and so chagrined was her owner, Major Yarburgh, when The Baron beat her by an easy length, that he laid a protest against the stakes being paid over until the winner's mouth had been examined. The famous filly, Mendicant, did not figure in the St. Leger, and it was not again until 1848 that colt was seen fighting against filly in Doncaster Moor. There it was that the Derby winner, Surplice, upset the hopes of Malton, Lord Stanley's Canezon, after a memorable finish. Canezon had been carrying all before her, winning the One Thousand Guineas, the Nassau Stakes at Goodwood, and the Ebor St. Leger, at York, and Scott's stable stood her at 7 to 4 for the St. Leger, and got beaten a neck. A good mare was Canezon, as she won the Goodwood Cup two years in succession, as a four-year-old and a five. No filly took any part in the Flying Dutchman's St. Leger, and the same remark is applicable to Voltigeur's year, but when Newminster won hopes were very strong that a filly of tried merit would pull through, as Aphrodite had won the One Thousand Guineas, beating the subsequent Oaks winner, Iris, and after a special preparation was backed down to 2 to 1 for the St. Leger, at a shade better odds than the favorite, Hernandez, and the filly flattered her backers until very near home, when Newminster proved too

herd a nut to crack, and he beat her by two lengths. The Oaks filly, Songstress, was thought after her Epsom victory to have a great St. Leger chance, but the winner of the Two Thousand, Stockwell, was the hero of the northern race that year, and the filly was never dangerous. The Osbornes' mare, Lady Tatton, ran a pretty good third in the year Saucebox bowled over the hot favourite, Rifleman; but the greatest filly year of all might well be considered 1857, when Blink Bonny won both the Derby and Oaks, and, when backed for the St. Leger at 5 to 4, she failed to get nearer than fourth, the winner being Imperieuse, who had won the One Thousand Guineas and ran fourth in the Oaks. The next year saw the St. Leger carried off again by a filly in Mr. Merry's Sunbeam, and that gentleman was within an ace of running first and second with two fillies, as the Hadji only separated Blanche of Middleby from her companion by a neck.

Fillies have played very conspicuous parts in the St. Leger since that day, as Caller On was a famous winner in 1861, and the great Gladiator was stretched in 1865 to beat Regalia, the victress that year of the Oaks. Then in the next five years fillies won it three times, namely, Achievement, Formosa and Hannah, and after one year's interval Marie Stuart and Apology, both Oak winners, took it two years in succession, and Jannette, another Oaks winner, also achieved the double event; whilst the memorable year of 1882 must be ranked with Blink Bonny's year, but in a still greater degree, all the classic events falling to fillies, as Shotover won the Two Thousand and Derby, and for the St. Leger Dutch Oven, Geheimiss and Shotover were first, second and third.

### OUR NEW YORK LETTER.

#### Miss Woodford's Great Race at Sheepshead Bay—Defeat of Baldwin's Horses in the Great Eastern Handicap—General News, Etc.

NEW YORK, Sept 20, 1884.

To-day the Autumn meeting, at Sheepshead Bay, closed with some of the best sport of the entire series, and the Dwyer's great mare, Miss Woodford, set the seal of her great reputation, by winning the best two-mile heat race on record in hollow style. Prior to her great performances this week the fame of this famous daughter of Billet rested chiefly on her races at shorter and intermediate distances, one mile and three-quarters being as far as she had gone in public before Thursday. This was a strong argument in the mouths of the backers of Carter in the match race, for the performance three miles was so recent and fresh in remembrance, as to leave no doubt of his staying abilities. The day of the match, Thursday, saw the greatest crowd, at the Coney Island Jockey Club Grounds, that has ever been inside of the enclosure. Perhaps 20,000 persons is a low estimate of the crowd of people that came through the gates from early in the forenoon, up to 2:30 P. M., when the start was made. And of this great body of race-goers, over three-fourths were the holiday crowd, who do not go to a race for betting purposes, but for the excitement of the racing alone. The bettors and speculators outside of the betting pavilion proper were absorbed and swallowed up completely by this vast mass of humanity. More ladies were present than the stand has ever held before, and the scene of the crowded grand stand and lawns viewed from the inner field as the horses went to the post was an enlivening one. The day was not of the pleasantest, being dull and hazy with clouds of dust from the track, but the people were too full of the great race to care for atmospheric conditions. In the betting Miss Woodford was the choice, at \$1,000 to \$600, and at these figures an immense amount of money was wagered. The start was made amid suppressed excitement, the crowd being wrought up now to a tension of expectation and when the starter's flag dropped there was a subdued roar like the dash of the waves on the shore. With Carter in the lead the racers dashed past the wire, the pace being slow for such cracks, and they were 1:52 in running the first mile, a state of affairs not conducive to Carter's chances, whose policy it was to force the pace. But the famous gelding, like other racers that could be named, will not exert himself to his utmost, except there are horses ahead of him, and it was the policy of the Dwyers and their shrewd jockey therefore to stay behind Drake Carter. Passing the stand however the second time, when a mile and three furlongs had been run, Hayward realized that he must get his horse to extend himself or the race would be lost to a certainty, and "hitting her up" to a terrific rate of speed, under the influence of the spur, Drake Carter quickened his strides a mile from home. But the brown beauty shadowing him two lengths away, followed suit without any persuaders, and try as Carter might, he could not gain a yard on Woodford, who was galloping along with her mouth wide open and switching her tail as if she was at exercise. On the lower turn she closed up to Carter's tail amid shouts from her backers and rounding into the stretch less than a quarter of a mile from home she pulled up even in a fair stride, Carter now got the whip in heavy doses and ran gamely under the persuasion, but Miss Woodford left him easily and galloped home under a pull a ten lengths winner, covering the two miles and a half in 4:28. She ran the last mile and a half in 2:36, the last two miles in 3:31 and finished so fresh that beyond a doubt she could have gone on and broken all the long distance records had she been required. The Great Eastern Handicap run the same day was a handsome spectacle of 24 youngsters at the post the largest field of horses ever in a race in this country. But as a race it was no test at all, for five-sixths of the lot got hemmed in behind the leaders at the start and could not get out. Baldwin's three, Verano, Volante and Mission Belle were hot favorites in the betting, but the filly, Mission Belle was the only one to experience any luck at the start and her handicap weight, 116 lbs. was so unreasonably heavy, as compared with Goano and others, that though she was third at the end of the first half mile, she flied badly in the run into the stretch. Ten Stone the winner had only 105 lbs and got away in front staying there throughout. To-day the meeting closed with the Great Long Island stakes, two mile heats, and Miss Woodford's 3:33, 3:31 is likely to remain at the head of the record for some time to come. As in the match race Drake Carter made the pace from Woodford and Modesty in each heat until a quarter of a mile from home, when the Dwyer's great mare closed up and won in a canter. Jerome Park begins its fall meeting next Saturday. Baldwin's horses have no engagements there, their nearest being at Baltimore. It seems to be the general impression here that his two-year-olds are a trifle overdone, but they may do better at the southern meetings.

Sept. 30, 1884.

Contrary to general expectation the Baldwin string of race-horses are at Jerome Park where the American Jockey Club's Fall meeting began on Saturday last. I had a talk with Albert Cooper, the well-known colored trainer, and he expresses an opinion that his charges will win races yet before snow flies. Mission Belle threw her boy on the boulevard road leading to the race track and fell, cutting her knee quite severely, but Cooper thinks it not serious. The stable will go to Baltimore and Washington, and start for home about November. During the first two days they started Gabo and Savanna in two purse races, the horse running third on Saturday to Markland and Aranza, and the filly second to Valley Forge to-day, with eight others behind the pair. Rapido will be started on Saturday next in a two-year-old sweep. I handed Cooper the BREEDER AND SPORTSMAN of Sept. 20th, containing an account of the racing at our Sacramento State Fair, and it was a treat to see his pleasure at sight of the paper from home, which he had not seen for a long time. He is very anxious to get back to the sunny slopes of the Pacific again. Jim Renwick was expected to be a starter in the Manhattan Handicap on Saturday, but he has not made his appearance at the post yet, and Buchanan does not say when he will start him now. He also is likely to make the southern campaign, at least as far as the monumental and capital cities. As if to compensate for the failure of the Pacific slopers here, the telegraph to-night informs us of the victory of the California-bred gelding, Bonanza at Louisville to-day. He captured the Sanford Stakes, one mile for two-year-olds, and as he beat Favor, Pegasus and other crack youngsters of the Blue Grass section, Bonanza is evidently a coming horse. Sold last Spring at the Winter sale at Sacramento, this son of Joe Hooker and Mattie Glenn was worth every dollar of the price paid for him by G. D. Christy, his present owner.

Aranza is a name forever calculated to impress itself upon turf-goers of the present generation, many of whom will resolve afresh, after her races of last Saturday and Tuesday, to cease trusting her with their shekels. Not since a year ago this Fall, at Sheepshead, when she was beaten out of a place by Bred, in a mile and a quarter race, only to come out two days afterward and beat Strathspey, a mile on a wet track, in 1:42, have the backers of Aranza been so disgusted as on the recent occasion. Mainly because her form of two weeks since at Sheepshead Bay was the highest she has ever shown, three races there at a mile, a win in 1:41, and two head defeats in 1:40 and 1:41, being an exhibition of steady ability to repeat her performance in the same notch, that was proof positive to the general public that good judgment in the saddle had erred most, if not all, of the mare's former shiftiness, unreliability and eccentricities. When, then, as said before, fresh from the glamour of her three great races at Coney Island, Aranza, with a man in the saddle, is beaten a mile at Jerome, on Saturday, by Markland, in 1:47, only to come out on Tuesday, with a boy on her back, and fairly romp home in front of horses generally believed to be better than Markland, doing the first mile of the dash close to 1:45, people looked askance at each other, and marvelled greatly at such diametrically opposite results. True, the Aranza of Saturday had no blinkers. The Aranza of Tuesday wore them with good effect. The Aranza of Saturday trailed slyly behind for six furlongs, only to fail of victory in the straight run in. The Aranza of Tuesday was off in front like a shot as soon as the flag fell, and never giving the others a chance to get near her, had them beaten long before she struck the straight. What the public would like to see in the management of this fast mare is the exercise of a little more consistency in the tactics employed with her. If she runs best in blinkers, run her *always* in blinkers, and if she runs best in the lead, place her *always* there if possible. But this latter surmise was thought to have been exploded, for Aranza has, on several occasions, won after making a waiting race of it. The mare's good form at Sheepshead, which savored greatly of a high standard of consistency had regained her many of her lost admirers. Her latest exhibitions at Jerome have lost her all these, together with the few that had adhered to her through thick and thin. No such in-and-outer has ever run in America in the memory of the proverbial oldest inhabitant.

Mr. Pincus' starting has been the subject of much favorable comment during the opening days at Jerome. He has dispatched his fields thus far with uniform good judgment and success, Lizzie Mack's *fiasco* on Tuesday being the only case of a horse getting left. Promptly on time each race has been disposed of, and people were sent home in good season. Mr. Pincus' progress is a source of congratulation, for we believe that none of the starters we have try harder to get all the horses well away than he does.

After Aranza, Heel-and-Toe must take rank as another in-and-outer and champion woodwinker of handicappers. To win a big handicap in the Spring at 100 lbs., and to get in another one in the Fall at the same weight, is a feat that the sister to Glen Dudley, Gen. Phillips (Postward), and Strathspey would not have accomplished in the old country where no such allowance is made for supposed loss of form, especially in one season at least. Take the case of Tannus, for instance, who won the Lincolnshire, one mile, last March, from a strong field, carrying 116 lbs. Since then he has done nothing, and yet in the Fall handicaps the horse has been well looked after, getting 124 lbs. in the Cambridgehire, which is 20 yards over nine furlongs. Heel-and-Toe's build is, of course, essentially not that of a great weight carrier, but it must not be forgotten that with 106 lbs. up, she beat Drake Carter, 123 lbs., a mile and a half in fast time on a slow track, and we do not believe that her party will succeed in again misleading racing men as to her real abilities, which are above the average.

St. Saviour, now regarded as in all probability the best of his year, is all right on his pine again. The sprain received in his last race at Monmouth Park, when coming down the hill by the three-quarter pole, has yielded gradually to treatment, but in view of the lateness of the season, and his lack of engagements, it has been decided to retire him until next year. By that time, if nothing occurs to mar his prospects, the brother to Eole may naturally be expected to onto the deeds of his spirited-away relative, than whom he was beyond a doubt a faster three-year-old. As regards the whereabouts of Eole, whether he is abroad or at Garden City, is as much of a mystery as ever, not that it makes any material difference, as whether he is in Albion or on the Island of Shells he is certain to be in good hands, and to be well cared for. At the same time the horse has been so long and favorably before the American public that if he is expatriated and an alien in a strange land, they would like to know it.

A singular complication in the matter of horses' pedigrees has arisen in Chicago the last week, where one Joseph Raside of Waukegan, Ill., was held for examination on a question of extradition for forgery, the complaint being made by the Clydesdale Association of Scotland. It is charged that the alleged offender in this case forged spurious pedigrees and sold thereby in the West some inferior-bred Clydesdales.

horse that he had imported. The application of the Scotland Association was presented to the Washington authorities by the British Minister, and at last accounts Raside was to have been delivered to the British Vice-Consul at Philadelphia. The crime is rather a novel one, and as applied to racing stock, would probably fall short of the mark, for the reason that the importers of thoroughbreds are naturally most particular regarding the authenticity and genuineness of each animal's certificate. Still such a thing might happen, and a detection of this sort of work should entail severe penalties on the offender.

Louise's runaway win for the Hunter Stakes on Tuesday confirmed the good opinions of her admirers, who reasoned that though a trifle deficient in speed apparently, on Saturday in the Manhattan Handicap, she would show to good advantage in the single handed duel with Duchesse over the longer course, especially with the later giving her 4 lbs., Duchesse carrying the extreme penalty. No little surprise was felt at Water Lily's dodging the issue, a test that would have settled definitely the question of which is the best three-year-old filly of the year, and in view of Water Lily's recent good form, the fact that her party did not care to meet Louise at even weights, 118 lbs., looks as if they are content to leave Louise the honors of superiority. Duchesse is a game and fast little filly, and with weights more suited to her size would do better. The fact that she carried 120 lbs. at Monmouth, and beat Louise, 113 lbs., a mile and a half, is no criterion as to what she can do with the Islip filly now, for the latter is pounds better now than then.

The youngsters that composed the Nursery field on Saturday were the poorest lot that have contested this time-honored stake of late years, and a fair class two-year-old would have made a show of them. This was evidenced on Tuesday in the Champagne Stakes, when St Augustine, the second in, but virtual winner of the Nursery, was easily beaten by Eachus, the Erlenheim cast-off. The son of Reform and Nemesis is a very promising youngster, and will, her accident, turn out a useful three-year-old.

Unless the full equestrian course at Jerome Park has been materially changed the race of last Saturday, won by disturbance, is the fastest ever run over it by several seconds. The nearest to it this season was six seconds slower. The disastrous hurdle race on Tuesday, however, did not tend to elevate the class of sport in the minds of true lovers of the sport. It is too dangerous a pastime as carried on at present, the speed with which the horses rush at the jumps constantly inviting fatal accidents.

Yours, PACIFIC.

### The St. Leger.

The story of a great race gets thrashed out a few days after the race has been run, and the secrets of the late St. Leger are now the common property of well-informed racing men. There can be little doubt that Superba would have won had she not been interrupted in her preparation. It was the general idea that Peck's beautiful mare could not stay the Leger course, and I promulgated this view of the case to a connection of the stable a few days before the eventful day. He smiled.

"Can Hackness stay, do you think?" he asked me. Hackness, you may remember, ran second for last year's Cesarewitch, two miles and a quarter, so that there was no doubt on that head, and I said as much.

"Then don't you be nervous about Superba failing to stay!" my friend replied. A few days before the race the mare hit her leg; she had to be eased in consequence, and the injury developed itself again in the course of the struggle. Nevertheless Superba finished within a length and a half of The Lambkin, from which you may judge what would have happened had all gone well with her, and had she been at her best. My tip, Scot Free, given months ago, failed most unaccountably, though he was first favorite to the end (he was not so when I told you that I fancied him), and touched as high as 9 to 4. I was influenced in his favor by the confidence his owner, John Foy, reposed in the Two Thousand Guineas winner. Foy has had a long experience of racing. Years ago he used to do commissions for the Danebury stable, when the Marquis of Hastings was at the height of his career. If I remember correctly, Foy quarreled with the late John Day because he thought Day did not tell him as much as Foy wanted to know about Lady Elizabeth, the mare that created so much sensation in the Spring of 1865. I forget the details of the case, and besides do not want to write you a long story of the past. At Ascot, however, when there was a disposition to lay against Scot Free, Foy met Montagu Williams, the well-known barister, and asked him whether he had backed the colt. Montagu Williams replied in the negative.

"Then go and do so," Foy said. "Never mind what you hear. Scot Free is fit and well, I fancy him very much for the Leger." On his arrival at Doncaster he went a rattling good two-mile gallop, but the change of quarters did not suit him. He sweated and looked altogether out of sorts as he went to the post, nervously blundered onto his head when the flag fell, and never seemed to be in it. Condition got The Lambkin home. Moderate as he is, he was sound and fit, and several of his opponents were neither. The surprise of the race was the fight made by the Duke of Westminster's game little mare Sandiway. The Duke started her to make a pace for Cambusmore, which Archer had chosen to ride, the choice having been left to him. She finished second, and, it was in my opinion, all out of The Lambkin, while Cambusmore never showed in front from start to finish. Of course, it is now debated whether Sandiway would have won with Archer on her back. These questions are difficult to answer. I should certainly be inclined to say that Archer was more than a length better than Barrett, over the St. Leger course. Of Barrett's riding I am no admirer. He's bold enough, but is sadly deficient in judgment and delicacy. He has, in fact, no pretensions to be called a horseman, which Archer now has. Porter, the Duke's trainer, thought that Sandiway would heat her stable companion; why Archer thought otherwise I cannot understand, but there is no doubt he did.

Captain Machell's objection to The Lambkin's running is only to be accounted for on the ground that his health is bad. He had no *locus standi*, in the first place, for, though it is, of course, well-known that he manages Sir John Willoughby's and Lord Manners' horses, the laws of racing do not recognize his position. In the second place, The Lambkin's nomination was perfectly correct in every way. Coming after his equally frivolous objection to St. Gation for the Derby, Machell's conduct in this affair has led to some very severe strictures. I forget whether I told you the story of that famous dead heat (?). Another journey over the hard ground at Epsom would almost certainly have broken down Harvester, and so in saying to Sir John Willoughby: "Whatever you like, Sir John!" when asked what he would do, Mr. Hammond practically gave Sir John Willoughby half the Derby stake and allowed him to win instead of losing heavily in the ring. To

object after this, on the flimsy ground on which Captain Machell did object (or cause an objection to be made) to St. Gation was the height of bad taste, you will allow. Of the three Machell superintends Sir Reuben was the best, because he was the fittest. He carried a tremendous lot of money, but Cannon could only get him fourth. A suspicion that Scot Free could not stay was abroad, though Foy thought otherwise. "Superba and Sir Reuben are the only two horses in the race that one had a good excuse for backing," the Duke of Beaufort remarked after the race.—*London Correspondent N. Y. Spirit.*

### Abolishing the Books.

Racing without betting is the dream of some good but rather impractical people, for the one without the other is impossible as long as human nature is what it is. We may go even a step further, and say that we believe in betting, for, apart from its admittedly demoralizing tendency in causing men to lose sight of the real value of money, it gives an additional interest and excitement to racing. But betting should be kept within bounds. Ned Harrigan may tell us "it's old chestnut," and that he has "heard it before," when we repeat a sentiment we have often expressed in these columns, that betting is only the incident of racing, and should always be held subservient to it. The rapid growth of bookmaking within the past five or six years has brought it to a point where it is capable of doing grievous injury to the sport, and the gentlemen who maintain large stakes are beginning to ask themselves if it is not time to take additional measures of protection against the evils of the system. It is admitted on all hands that bookmaking is the best form of betting, but, unhappily, it is susceptible of gross abuse, and the bookmakers are becoming more influential than is consistent with a healthy state of affairs. The bookmaker has to wage a general battle with the public, and of course he has to employ every means in his power. Already there is too much talk about jockeys and trainers being under the influence of bookmakers. Much of it is imaginary, but it is possible there exists such cases. But even a single case is one too many, and it should be repressed. If it is not the leading owners will eventually give up racing, as they did in 1850, and if they do the public will stop coming. We happen to know that at the Turf Congress, at Louisville, in November last, a motion to abolish bookmaking from all the courses represented, met with almost unanimous approval, and it was only through the efforts of Mr. J. E. Brewster, that it was withdrawn.

We are in a position to state that members of the Monmouth Park Association are awakening to the necessity of protective measures. It is likely that they will take shape in the abolition of bookmaking from the grounds and the substitution of auction and French pools. The French system could be put under the management of the club, with \$5, \$10, \$50 and \$100 pools, and the public would be much better pleased, while the percentages could go toward swelling the racing fund and relieve the Club of the charge that it is the money paid by the bookmakers for betting privileges that makes the racing fund. That the measure would be popular with the public there can be no doubt, as it would protect them as well as the owners. If the Monmouth Park Association take the step they have the assurance of the endorsement and co-operation of the Coney Island Jockey Club.—*N. Y. Spirit.*

### Bonanza's Race.

The race won by Bonanza at Louisville, on Sept. 30th, was a performance of merit. The time seems slow to our Californian ideas of a good race but this one was run over a very heavy track and in bad weather. The cracks Favor and Pegasus were among the beaten horses and the result was a regular header for the bettors. The following are the details.

Sept. 30—Sanford Stakes; for two-year-olds; at \$50 each b. f., with \$500 added; of which \$100 to the second; winners of \$1,500 to carry 3 lbs.; of \$2,000, 5 lbs.; of \$2,500 and upwards, 7 lbs. extra; maidens allowed 7 lbs.; thirty entries; one mile.

G. D. Christy's ch. g. Bonanza, by Joe Hooker—Mattie Glenn, 107 lbs. G. D. Favor's ch. f. Favor, by Fat Malley—Favorite, 110 lbs. Brennan 1 Randall & Co.'s br. f. Anna Woodcock, by Billet—Calomet, 107 lbs. Richardson 0 M. Young's br. g. Pegasus, by Rhadamanthus—Highland Vintage, 110 lbs. Stoval 0 M. Young's ch. f. Doubt, by St. Martin—Perhaps, 110 lbs. Ellis 0 J. E. Clark's ch. f. Retinue, by Monarch—Return, 100 lbs. Tankersley 0 P. Maghuen's br. g. Orlando, by Billet—Acolla, 112 lbs. Riley 0 C. R. James' b. f. Princess Chuck, by Aristides—Crescent, 100 lbs. Kelly 0 Time, 1:49.

Pools: Favor, \$50; Milton Young's pair, \$50, the field, \$75. Betting: 5 to 1 against Bonanza. Mutuels paid, \$41.10. Bonanza led off and at once opening up a big gap was never headed, winning by a length, same between second and third.

### Bonita's Record Beaten.

At Cleveland, Sept. 23d, during the heats of the 2:40 race, the four-year-old filly Elvira, by Cuyler, owned by J. C. McFerran, of the Gleuview Stock Farm, Louisville, Ky., and winner of the 2:27 race on Wednesday, made two trips, accompanied by a thoroughbred running mate, Zero, driven by Ed. Bither, for a purse and to beat the four-year-old record, Bonita's 2:18½. In the first trial she failed, going in 2:19½. A break on the stretch was all that heat her. On the second trip she beat the record by a quarter of a second, making a break on the stretch that cost her a half second more. She went the second trip by quarters in 0:35½, 1:09, 1:45, 2:18½.

Later in the day the yearling son of Nutwood—Nutbreaker—bred by J. C. McFerran, and owned by J. W. Fisher, of Quincy, Ill., was sent a mile against his own fastest yearling record, 2:49½, accompanied by Zero. He beat the record by 3½ seconds, making the mile by quarters in 0:43½, 1:24, 2:05½, 2:46. This is the fastest yearling record east of the Rockies and is only second to one on this side, that of Hinda Rose, 2:36½.

Red Boy seems to have won every race he has started for in Montana this season. On September 17th at Helena, with 118 pounds up, he won at mile heats in 1:47, 1:49, beating Monarch, 110 pounds, and Retort, 105 pounds.

Meetings have been in progress, this week, at Fresno and Salinas, but the telegraphic reports have been for the most part only half way intelligible.

The grand stand at the Stockton track is to be moved back twenty feet and raised six feet before the next fair is held.

### Some Arizona Horses.

[Prescott Courier.]

A trip to the driving park is really a treat to a lover of horseflesh. We find Mr. Wilbur kindly treating and developing a string of valuable young horses. Our attention was called first to examine the four-year-old colt, Bolt, the property of Col. C. P. Head; he is by A. W. Richmond, dam Lady Hunter. Mr. Wilbur claims him to be one of the best bred horses in the West, having been familiar with the family of horses for several years. We then come to Arizona, John Ellis' three-year-old roadster, once very vicious, but from the kind treatment of Mr. Wilbur and his men, she has become manageable and docile. She is very speedy for a three-year-old. We next come to Gumbo, a four-year-old, brought here by Mr. Wilbur. He is by Mambrino Champion, and is very large, handsome and quite a trotter. We next come to Mr. C. B. Rush's three-year-old, which is being broke. He is very large and powerful, but Mr. W. tells us that his gait and speed is wonderful. We next come to Frank Murphy, a four-year-old pacer and trotter, the property of Murphy Bros. He is a Hambletonian, and does credit to his family. With four weeks' training he is pacing in 2:40. We next come to Tridle, a three-year-old pacer, the property of Mr. Hale. He has named him after our worthy Governor, and he does honor to his name, as he is pacing in 2:40, with only four weeks' development. We were then escorted to the stall of the little wonder, Comanche Boy. As we approach him he looks as if he was going to say some welcome to us. His expression is wonderful, and Mr. Wilbur says he knows more tricks about the race track than most of the men Mr. W. brought him with him. He is eight years old and has a record of 2:35½. He has won every purse Mr. Wilbur has started him for this year. We concluded our visit by admiring Mr. Wilbur's pet colt, Maude. The mother is an inbred Hambletonian. The colt is only four months old and has already commenced taking lessons.

### Sale of Oregon's Champion.

The bay stallion Dexter, by Millman's Bellfounder, was sold during the recent meeting at Helena, Montana, and it is reported that the horse has been shipped to Chicago, in charge of Geo. Leiby. Regarding this transfer the *Oregonian* says:

The sale of the Oregon trotting stallion, Dexter, the joint property of Van Buren DeLashmatt and the Misner Brothers, took place on the day on which the free-for-all trot was to come off. The price paid was \$2,500, which was no extravagant figure for a horse nearly 17 hands high and having a record of 2:24, with ability to trot in 2:21 when in condition. He is 13 years old and has made but five public seasons, and hence is a very fresh horse. And while the price seems comparatively small, yet it was good judgment to sell him for the reason that the State is flooded with entire horses, none of which are making any great money for their owners, and some of them do not clear their grooming. On most of the farms throughout the Willamette valley a stallion is kept, and in many instances the farmer loses money by doing so, as he can never see his own horse's defects, but keeps on breeding from him and producing horses that are inferior to those of his neighbors. Many of these men begin breeding from their stud colts at two years old, and by the time the horse is six, he is all out of shape. The Montana purchasers of Dexter (to return to the subject) can congratulate themselves on the possession of one of the fastest and finest looking horses yet foaled on the Pacific Coast.

### They'll Find It So.

The absurd practice of loading a horse's feet with metal prevents many a capable trotter from making a reputation. Some if not most of the advocates of the theory of "balancing" by means of weight in the shoes, make the encumbrance cumulative. If a twelve-ounce shoe does not have the desired effect they put on an eighteen ounce, if that fails a twenty-four ounce, and so they go until the horse is handicapped out of his speed or breaks down from the effort of carrying the masses of metal. The benefit of weight is not in the quantity, but in the application, the manner of its putting on and the place. Even where heavy weight seems to be necessary to correct imperfect gaits, there are very few cases where, after the faults have been remedied, and the new movement sufficiently established to be habitual, that the weight may not be gradually decreased until it has been altogether removed. The appended incident from the *Portland Rural Spirit* is a case in point:

Good judges have reported to us that Mr. Joe Buchtel's mare Florence E., could have trotted in 2:28 or 2:29 last Saturday. The first time we met Joe we asked him what on earth got the matter with Florence E. that she trotted so fast. "Nothing at all," said he "except I took part of an iron foundry off of her feet, and before she trots again I shall take the balance off."

At Doncaster, Eng., the St. Leger day was the busiest ever known in the telegraph department at Doncaster or elsewhere, for no fewer than ten thousand telegrams were dispatched, and these it is estimated, contained over fifty thousand words. The passenger railway traffic also was something extraordinary, as over three hundred and fifty trains passed to and fro, and when it is stated that not a single hitch occurred in any respect, it only shows what perfection matters have arrived at. Would that we could say as much for American railroads.

Mr. V. B. de Lashmett, of Portland, Oregon, has purchased from Raymond Bros, Fullers' Springs, Montana, a very promising two-year-old in the bay colt, Fowler, by Commodore Belmont, dam Gracie H., by Fancy Goldst. Fowler won the two-year-old race at the Helena Fair very easily, in 2:59½, and was sold for \$750.

Judge Mee, of this city, and Mr. G. Pacheco, of Nicasio, indulged in a horse trade a few days since, wherein the Judge exchanged the chestnut filly Mistletoe, by Thad Stevens, dam Mistake, by Wildidle, from Katie Pease, by Planet, for Mr. Pacheco's well known brown gelding, Garfield, by Langford, dam by Lodi.

H. C. Judson, of Wildidle Farm, Santa Clara, has sold to W. M. Murry, for other parties, the two-year-old colt, Billy Ayres, by Shannon, dam Lady Clare, by Norfolk, from Versailles, by imp. Sovereign. Price, \$1,000.

Belle Echo won the free-for-all, at Kansas City, Mo., on Sept. 19th, beating Deck Wright in straight heats. Time, 2:24, 2:26½, 2:29½.

Phallas Deposed.

At Narragansett Park, Providence, R. I., September 30th, Maxey Cobb attacked Phallas' record and deposed the erst-while King. The following is the Turf, Field and Farm's account:

Two or three hundred people witnessed a wonderful performance at Narragansett Park to-day. It was the opening of an extra meeting, which had been poorly advertised, and hence drew a small attendance. There were two regular races, but the great event proved to be a trial of Mr. I. Cohnfeld's stallion, Maxey Cobb, against time. In order to secure a technical record, a bet of \$25 was made that he would beat his own record of 2:15. It was the first race of the afternoon, and few of the small number present realized what was being done. About two o'clock John Murphy appeared behind the stallion, while Thomas Foster held the reins over a runner hitched to a sulky. The day was fine, and Griffins's work had made the track near the pole as smooth as a billiard table, while it was as elastic as one of the cushions of the same. The word was given and away Maxey sped as light as a bird. While the ostensible contest was to beat 2:15, the real struggle was against the 2:13 3/4 of Phallas. Going true as a die, the grand horse sped to the quarter-pole in 33 seconds, while the straight second quarter was trotted at a 2:06 gait, bringing him to the half in 1:04 1/4. After such a tremendous flight of speed, the pace was necessarily slackened somewhat, and the third quarter was made in 33 1/2, bringing him to the three-quarter pole in 1:38, which left him 35 1/2 seconds to beat Phallas with. He was driven out to the utmost, getting the whip near the finish of the mile, and swept under the wire, tired, but triumphant, in 2:13 3/4. Outside watches as a rule made the mile 2:13. Mr. Cohnfeld announced after the heat had been trotted that he had been offered \$40,000 for Maxey Cobb, but would not sell him for \$100,000. Several old trotting men pronounced him the most valuable horse in the country.

Bnsyboddy, that is admitted to be the best three-year-old in England, was a hot favorite for the St. Leger, and considerable talk and scandal has been caused by the fact that her owner, a rich young man named Baird, did not strike her name from the list of entries until long after he knew the mare had no possible chance of starting. The natural result of this was that the gullible public went on backing the mare on the strength of her previous performances, while certain friends of the owner are reported to have made a nice stake by laying against her at any odds.

We are advised that the challenge issued last week to match Jim Mulvenna against Ha Ha has been withdrawn.

YACHTING.

The yachting season of 1884 is on the wane, several of the yachts already having gone into winter quarters. The summer winds are practically over and yachtsmen who have business to attend to do not like to take any trip far from home for fear that light weather will delay them longer than is consistent with their mercantile engagements.

Last Sunday the day was pleasant, but there was hardly sufficient wind to satisfy the larger yachts. Lurline, Fleur de Lis, Annie, Eva and Whiting went out about as far as Point Bonita, but as the ebb tide began to make and as the wind was lightening up they squared away for home.

The Spray went to Stone's yard last Sunday and took out her ballast preparatory to going on the ways, where she will remain until Spring again comes round.

Stone has just turned out another vessel about 28 feet long over all. Her bottom is somewhat like a cutter except that she is not extreme. She is sparred somewhat similarly to this rig, that is to say her fore stay leads directly to the cutwater, and so instead of the typical sloop jib she will carry a fore-stay-sail and a working jib outside of that, and, moreover, she is only half decked over, having her open amidships. She will be used for fishing purposes.

The Lotus Club took their last sail for the season of 1884 on the Eva, last Saturday, on which date their charter for the yacht expired. This club was organized thirteen years ago, and has sailed as a club with only about two seasons' intermission throughout its existence. It is mainly composed of business men and clerks who find that an outing on Saturday afternoon and Sundays is a welcome change from the confinement of the office. This is a very economical way to enjoy yachting and it is to be regretted that more such clubs are not organized and kept up, as such bodies of men lend spirit to this noble sport. We speak of such clubs as this in contradistinction to those so-called clubs which hire a plunger on Sunday and make accordeona and beer the principal features of the trip.

The Fleur de Lis, after the closing exercises of the Pacific Yacht Club, on the 1st prox., will proceed to Antioch and Winter there.

In Our Wake at Last.

Although the propriety of fixed ballast and limited areas, for which Forest and Stream has so long contended, is now admitted by the majority of thinking and intelligent yachtsmen, there is one source from which we did not expect an indorsement. It is amusing to contrast the remarks in the Spirit of the Times of less than four months ago, apropos of the action of the New Jersey Y. C., with the following comment on a similar move of the Larchmont Y. C., which we copy from the same paper of Sept. 13. The fall is eased by parenthetical remarks as to the extra speed of the sand-baggers and difficulty of securing crews for them, but it is none the less a come down from the position held so long and stubbornly. Common sense has triumphed at last over prejudice and obstinacy, the last friend of the overspurred, dangerous traps has gone back on them, and what will the poor sandbagger do now?

"Of course, as all men who are familiar with open-boat sailing know, the greatest amount of speed can be obtained with the ballast on the weather gunwhale; but, then, this involves the carrying of a certain number of men to place it on the opposite gunwhale when required, and if these are not forthcoming the boat can't go in the race. It may be that there are individuals who regard the tossing of sand bags as a pleasant pastime, just as there may be men who are fond of being at sea in a gale; but we think these are exceptional cases, and that the average club man dislikes both of these things, and for this reason we regard the rule forbidding the shifting of ballast as a good one for such a club as the Larchmont, and simply on the ground of necessity. It has been found extremely difficult to obtain crews to toss the sandbags, hence it is better to make a rule that sandbags shall not be tossed. We would, however, advise the fitting of the boats with air tanks, for, of course, if the ballast is to be carried on both sides of the boat instead of on one there must be more of it carried to insure the same amount of stability, and in the event of a capsize, the boat would sink, a condition of things peculiarly unpleasant in the middle of Long Island Sound. With the air-tank precaution, however, lead ballast may be carried under the floor, and there need be but little more of it in weight than has been used as sandbag ballast, so that the boat will have only a trifle more of displacement and quite as much stability, and under proper regulations, we think that this change will be found satisfactory. It has been tried for several years in the New Jersey Club and always in the Seawanahaka, and no one that we know of has ever complained of it in either organization. It renders the owner independent of crew, and he can sail alone, as the owner of the Fairy actually did in this regatta of Sept. 6th. True, the boats won't make as good time, but, if it is a rule, it bears equally on all."

Cut down your spars and sails, gentlemen; throw overboard your sandbags, put in stone, iron or lead, as your pockets admit, stowed low down and well secured; do not forget the very sensible suggestions as to the air-tanks; leave ashore the "gang" and the "growler;" ship a small crew of earnest sailor men, and let us see whether a few seasons of experiment and improvement will not bring the speed of our little ships almost up to that of the old-time racing machine.—Forest and Stream.

We have as yet been unable to learn the date fixed by the San Francisco Yacht Club for their closing day, or indeed whether they intend celebrating the close of the season at all. In respect to cruises and gatherings, this club seems to lack the spirit and enthusiasm of its younger rival, the Pacific Club, which latter lays out a plan of action for the whole yachting season, and adheres thereto with only such small changes as circumstances may warrant; and when a change is to be made members receive due notification of the fact, thus giving them time to alter any private arrangements that they may have had.

Quite a large volume, has made its appearance, giving an account from the boys of all the vessels which participated in the recent Santa Cruz trip of the Pacific Yacht Club. It is profusely illustrated in colors, and as the drawings were all made by Denny, they are very exact. Anyone interested in local yachting matters will find this volume very interesting reading.

Denny, the marine artist, has just finished a life-like picture of the Aggie, under full canvas. The scene is laid to windward of the Farralones, and is true to the minutest particular. The Aggie will also winter at Antioch, where she may be used sometimes by her owner and his friends as a stopping place during the hunting season.

One of the least used boats during this season has been the Startled Fawn which has been on the ways throughout the year, with the exception of one week, during which time she accompanied the San Francisco Yacht Club Fleet to Napa, on the Fourth of July.

When the Spray collided with the Chispa recently, of which mention was made in our last issue, the boat keepers on board the latter vessel showed undue zeal in cutting nearly all the running rigging of the sloop.

The Ariel went up the bay, last Saturday night, with a jolly crowd on board, and returned the following day.

The Livejy is kept at North Beach, and her owners intend to keep her in commission throughout the winter.

CRICKET.

Australia vs. All Comers.

This match resulted in a crushing defeat for the All Comers last Saturday afternoon. Clark captained the team of Australian nativity, while Gray did similar service for the All Comers. About 15 players came over to the grounds to do battle for the latter team, and as only eleven were required it was necessary to leave four out. By some incomprehensible arrangement, Miller and Carr were included in the four that were left out, and, as all cricketers are aware, not from their lack of cricketing ability. This arrangement spoilt the

chances of the All Comers to a considerable extent. With Miller bowling at one end the total of the Australians would have been reduced by at least 25 runs. The Australians were deputed to defend the wickets, and notwithstanding the efforts of Waterman, Purdy, Cookson, and Gray, the respectable score of 80 was realized. Gray was the most successful bowler. Benjamin (18), Spiro (13), Jacobs (11), Bloomfield (10), and J. Sanderson (not out 7) were the heaviest scorers. The All Comers were rapidly disposed of one after another, and were all out for the insignificant total of 21, 8 of which is credited to L. Burnett. The fielding on both sides was moderately good. George Theobald, the wicket keeper, was instrumental in getting rid of no less than three of the Antipodeans—the dismissal of Clark being unusually good. Score:

Table with columns for AUSTRALIANS and ALL COMERS, listing players and their scores.

Table with columns for B. M. B. Wks. and BOWLING ANALYSIS, listing bowlers and their statistics.

The Match For the Bats.

[Played Sept. 27th.]

G. Gray, the Occident captain, won the toss and sent the Merions into bat. B. S. Benjamin, Hill, Miller, G. Theobald, Jacobs and Burnett were out with the score at 22. Barney Benjamin and Spiro, by vigorous play, brought the score up to 35, Fittock made 11 in fine shape before Waterman disturbed his timbers. The innings closing for 74 runs Waterman and Cookson, the first representative of the Occidents, started in auspiciously. Cookson, after making seven in two hits, was bowled by Miller. De Golia was run out through the fault of his vis a vis. Clark played one of Miller's on his wicket. Waterman was bowled by Jacobs. Gray succumbed to Miller. Another stand was made by Bristowe and R. B. Jones. The latter, who played for the first time this year, hit out in his usually effective style and made 5 before he was nicely caught by Mathieu Bristowe, who appears to be coming back into his old form, scored 16. The innings closed for 47, or 27 runs behind their opponents. The Occidents were very poorly represented, a great many of their best players being absent. Jones and Gibson of the Merions played for the Occidents, owing to the non-appearance of two of their men. Score:

Table with columns for MERIONS and OCCIDENTS, listing players and their scores.

The Averages of the Australians in England

From the tables which we append, giving batting and bowling analysis, it will seem that Murdoch and Spofforth are ahead of their respective departments. The former's average is almost the same as in 1882, when it was 30.31; and Spofforth's also is almost identical with that of two years ago, when he averaged 12.36. This year, however, the wickets were much more favorable for batting, so his performance is certainly better.

Table with columns for INNINGS, RNS., Most in an Innings, Not out, Averages and BATTING AVERAGES, listing players and their statistics.

Table with columns for Overs, Rns., Wks. and BOWLING ANALYSIS, listing bowlers and their statistics.

The annual match between All New York and All Philadelphia resulted in a magnificent victory for the New York team. Philadelphia, 125 and 43; New York, 150 and 22 for two wickets. The bowling of Lane for the New Yorkers was simply unplayable, while Cyril Wilson batted in great

A team of English cricketers composed as follows left for land for Australia on the 19th ult.: Shaw, Shrewsbury, white, Ulyett, Barnes, Bates, Scott, Flowers, Bright, Hunter, Maurice, Read, and Attwell, all professional

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

Notes From the Tule.

EDITOR BREEDER AND SPORTSMAN: When I was in the city I called at your office but found it closed. As it was between 6 and 7 o'clock on Friday evening perhaps it was partially my fault that I failed to see you.

How to Handle a Gun.

Robert Bardette, in recording a chapter of his varied experience with the dog and gun, thus instructs young America on how (not) to handle a gun: "The first thing you do when you go hunting with another boy, is to guard yourself against accident."

The Marysville Appeal states that Frank Manning, of that city, has invented a rifle cartridge that cleans the gun at every shot. It was urged as an objection to his invention that any bullet that cleaned the rifle as it went through the barrel would not go accurately to the mark at which it was aimed.

The following challenge appears in the Dutch Flat Times: Phillip C. Byrne will shoot a pigeon match with any man in Dutch Flat for from \$20 to \$50 a side, and will shoot a match with A. Archer, of Sacramento, for \$50 or \$100 a side, one-half of the stake to be put up as a forfeit.

Several of the local sportsmen availed themselves of the opportunity to go out quail shooting on the 1st inst. The weather was not favorable, but they report the birds as numerous and the young ones well grown.—Grass Valley Union.

There are more quail in the foothills this season than we ever saw; and most of them are only about two-thirds grown. This would indicate that some quails do have two broods in one season.—Sunday Capital.

One day last week Mr. Crane bagged 60 quail, 27 curlew, 6 English snipe, and 18 doves, at Bolinas. The bag of English snipe at this time of year is rather remarkable, inasmuch as it is so early in the season.

That excellent paper, the Shooting Times, of London, has entered upon its third year of publication. The Shooting Times has been successful from the very start.

A California lion was seen last week on David Maltinell's place below Crystal Springs. A party of hunters started in pursuit but could find no trace of the animal.

The Arizona Gazette says that the valley now affords fine sport for nimrods, quail being plentiful, fat and easily flushed.

Will Curry and George Bill, of Oregon, bagged one duck, two geese and 102 snipe on an expedition to Wapato Lake.

Twenty-five of the most prominent citizens of Denver have organized the Standard Shooting Club.

To-morrow the Forrester Gun Club, of Sacramento, will hold a medal shoot.

Shooting is reported to be splendid around Suisun.

THE RIFLE.

Knights of the Red Branch.

The principal event at the picnic of the Knights of the Red Branch, which took place at Schuetzen Park last Sunday, was the rifle contest for a silver pitcher and goblets, open to teams of five men, to each of the six companies of the Third Regiment.

Table showing scores for various companies (COMPANY C, E, D, F, B, A) and individuals in a rifle contest.

The Ferndale, Table Bluff and Eureka rifle teams met at Table Bluff, Humboldt county, on the 21st of last month, to contest for the championship medal. The rules governing the winning of the medal were that one team should win three times. It will be remembered that the first contest at Ferndale was won by the Table Bluff team and the next two at Field's Landing and Eureka by the Eureka team.

Table showing scores for Eureka, Ferndale, and Table Bluff rifle teams.

The following scores were made at the practice of the Fifth Infantry Battalion, at Shell Mound, last Sunday. The shooting was from the five hundred yard mark.

Table showing scores for various individuals at the Fifth Infantry Battalion practice.

The twentieth annual target shoot of Company D, Second Artillery Regiment, took place at Shell Mound Park last Sunday. The following were the highest scores made:

Table showing highest scores for Company D, Second Artillery Regiment.

At a target practice at Sacramento, of Company G, the following scores were made at the 200-yard range:

Table showing scores for Company G at a target practice.

"Republicans," of Carson, writing to the Lyon County Times, winds up his article on the late Inter-State rifle match as follows, "Why don't you Dayton cow-shooters challenge the Californian pop-gun boys? I am sure you could get away with them."

The Verein Shooting Club will hold a regular medal and prize shoot to-morrow at Schuetzen Park.

HERD AND SWINE.

Effects of Stagnant Water Upon Live Stock.

Few farmers can have forgotten the disastrous ravages wrought in the Western States, a few years ago, by the disease known as the hog cholera, swine plague, typhus of pigs, and by various scientific terms. During the last two or three years the country has seemed to be almost free from the plague but within a few months the malady has appeared in several localities, showing all the virulence that marked its appearance in former years.

For several years the Department of Agriculture has been investigating the disorder mentioned, and the scientists who have been employed in the researches seem to have come to the conclusion that the cause has been found in bacilli, which swarm in almost inconceivable multitudes in the blood of the afflicted animals, damming up the arteries and the veins, deranging the action of the nerves, and finally causing death. It has long been known that the disease is virulently contagious, very minute quantities of the excrement of an affected animal being enough to convey the poison to a healthy herd.

ingly so suddenly fatal, is caused by bacteria which swarm in prodigious numbers in the system of the victim. Milk sickness is another ailment that has caused the death of thousands of human beings, cattle, swine, dogs, and other animals. Milk, butter, and the flesh of animals having this disease convey the poison to those who drink or eat thereof.

There seems to be reasons for believing that these disorders have their origin, or their favorite habitat, at least, beside sluggish streams flowing through rich low lands where stagnant pools lie, amid rotting vegetation, under a sun almost tropical in its fervent heat. Thence the germs have been carried by suffering animals, and probably by birds also, to be scattered in their voidings and otherwise, in new and more or less favorable places, there to make new centers of cultivation and of contagion.

In the course of his investigation into the nature and origin of milk sickness, Dr. Joseph Gardner, of Indiana, found in the blood of man, of cattle, of pigs, and of other animals prodigious swarms of bacteria, identical with those that thronged the stagnant water from which these all drank, and with those in the milk used by human beings attacked by the disease. He clearly traced the deadly ailment to the use of water or milk from these poisoned sources, the like of which are found on too many farms, particularly in the valleys of the Ohio, the Mississippi and the Missouri.

In the course of investigations undertaken by the Department of Agriculture, to determine the nature of the disease known as lomber, or worms in sheep, it was learned that the chief source of the malady was in stagnant pools from which the sheep were compelled to drink. The eggs of the worm *Strongylus contortus*, which causes the trouble, are deposited on the ground, where they retain life, if a certain degree of warmth and moisture are present, until a heavy rain washes them into some pond or water-hole, or a low, wet, muddy place, in which they can pass their embryonic stage, either in the water or on aquatic plants. Lambs or sheep drinking the water or eating the plants take into their stomachs the young worms, which attach themselves to the walls of the fourth stomach, and suck the life from tender young lambs and from the weaker among the older sheep. The water from which the affected animals drank was found to be alive with swarms of young worms, and with other germs of disease.

In the course of investigations where anthrax had killed a large number of sheep, it was learned that as long as the flock continued to drink from a pool on the range, the deaths numbered from twelve to fifteen per day, but stopped as soon as the flock was removed to a range where the water was not polluted. Microscopic examination showed that the pools were alive with spirilla, micrococci and bacilli, the latter undoubtedly the bacillus anthracis. Many theories have been advanced to account for the prevalence of swine-plague, the most popular being that the feeding of corn, as an almost exclusive diet in fattening, is the chief predisposing cause. If the use of water from foul and stagnant pools has been suggested as the principal source of the contagion, the fact has not been made generally public. Yet it seems more than probable that if a supply of pure water could be always at hand, and access to stagnant pools and foul water could be prevented, losses from the malady named would be much less in frequency and extent than they are now. Clearly, it is better to be safe than to be sorry, and no one will have cause to regret using all available means for removing the probable causes of disease, even though there may be doubts in his mind as to the correctness of the conclusions reached by the scientists.

Some Points on Calves.

M. C. Weld thus tells, in the *American Agriculturist*, "How to recognize a twenty-quart cow": When she is only six weeks old, I think this is not so very difficult to do. I do not know that I can tell how. I like a thrifty calf, with a good-sized head, which is narrow and long, broad in the muzzle and between the eyes, and narrow between the horns. I do not care if the limbs are "strong," as they say in Jerseys and perhaps coarse, but they must be straight; and the tail may be even quite coarse at its setting—this indicates constitution. Then, from the withers to the hip there should be a straight, upward slope, so marked that if you see the front half of the calf, you will think she is a small one, while if you see only the hind quarters and loin, you will think her very large. In fact, in point of symmetry, the front and hind quarters ought not to match, and the latter should be by far the larger. I prefer long bodied, open ribbed, flat sided, deep bodied calves. The skin should be loose and flexible all over the body, so that one can grasp a handful almost anywhere. The coat must either be long and silky, a little rough perhaps, but not bare, or it should be soft and furry. With all this, you should find the teats of good size, well-spread, and all the skin about them, before and behind, that which will cover the udder, loose, soft and elastic, showing, as the Scotch say, "plenty of leather." Such a calf will make a good milker if she is bred at a year to fifteen months old, and after her first calf goes farrow, (but not long dry), for a year, or nearly that time, to allow her to grow. I say nothing about the escutcheon, because I do not know very much about it, and do not believe in half that is said and written about it. Still I must say that I would prefer a good broad, well-winged escutcheon of the Flandrine type, for if the escutcheon shows anything, it indicates staying power, which is perhaps the greatest merit a cow can have. Many a twelve and fourteen-quart cow will heat a twenty-quart one in the long run, especially in her butter record, the true test of a cow's value. The amount of butter that a cow will give is indicated by no tell-tale marks that I know of. That must be judged by the pedigree and dam's record, if a calf or by the scales. The unctuous feel of the hide, its pliability, the abundance of yolk, (the yellow, soapy oil at the roots of the hair, inside the ear and in the "butter ball" in the end of the tail), indicate health, and perhaps a tendency to fat secretion, either as hater or fat. But some of the poorest butter yielders I have ever known showed the most of these qualities and some of the best had very little to boast of, just enough of oil in the skin to indicate good health, and that the skin was performing all its important functions well.

The breeding of high-class milch cows should be a profitable business, in these days of such rapid development of dairy interests in this country. Heifers produced from well-known milking stock, and which show that the qualities desirable in the dairy have been transmitted, are certainly a kind of property which should always be able to command ready sale. Thoroughbreds of special dairy breeds are generally too high-priced for use in this way, but could undoubtedly be used to breed from to great advantage. High-grade heifers which can be sold at a reasonable figure should meet a good market anywhere.

The Jersey Breeders.

In the midst of the hurricane of excitement which the commission and the journals that report their sayings and doings have created in connection with pleuro-pneumonia, the breeders of Jersey cattle have suffered a serious and irritating injustice. The natural conclusion to be arrived at from what has been said is that Jersey cattle are more liable to the disease than other breeds. There is scarcely a feature about this matter that does not make a sensible man mad clean through, but there is no worse one than this terrible injustice which has been done Jersey cattle and their owners. Some of the journals that have contributed to this result have seen the effect of it upon themselves, and are cautioning the public against forming an opinion which they not only aided in making possible, but inevitable. The horse is stolen, and it is all too foolery to lock the stable door now. There was no need of making the fact that the outbreak was among Jersey cattle so conspicuous. It was quite enough to say that the disease was among us, and to urge watchfulness. There was no need to say more, for with that information the public would be cautious until all possible danger had passed. Any breed is as liable to the disease as the Jersey is. Any cow that is exposed will be liable to contract the disease. Everybody knows that, but the Jersey will feel the effect of the virtual slander upon her long after there is no suspicion at all of any other breed. At present all expect that the cattle business will be dull. People will not buy, and nobody will lose anything in the end. There will be just as many cattle change hands in the next two years—if the disease is stamped out, and it will be unless those who are interested in propagating it neglect to do their duty—as there would have been, if there never had been an outbreak. All that will be necessary is to wait patiently and advertise as persistently as if nothing had happened. No one thing will do more to allay the excitement than for our breeders to pursue the even tenor of their ways, keeping their advertisements steadily before the people and acting generally as if they were not aware that there was any trouble or cause of excitement. When the danger is passed, the people will begin to buy, and buy only the most vigorous.—*Western Rural*.

A Cheap Silo.

The *Nasbua Telegraph* says: Last year a farmer improvised a small silo by sinking a molasses bogshead into the ground in his barn cellar. He cut up all corn fodder with a hay cutter, supposing he had enough to fill about four bogsheads, but on packing it he found it wouldn't fill one. He then bought of a neighbor as much more as one horse could draw, and still there was room. He then cut up the stalks from a piece of sweet corn, and with a lot of rowen managed to fill his bogshead. He made a close-fitting cover, and with a jackscrew set under one of the floor timbers pressed it down as tight as possible. In the middle of December he opened his silo, and found the corn as sweet and fragrant as when put in. From the bogshead he fed one cow half a bushel of ensilage morning and night for two months, and considers it the best producing food that can be fed. This year he proposes to fill the bogshead with oats cut just as they are in the milk. If a silo on so simple a plan is practicable, there is certainly no reason why everybody should not have one and satisfy himself of the value of the ensilage system.

The Hereford cattle sent to this State, by the New Zealand Stock Company, have all been disposed of through R. P. Saxe. The last of the consignment were sold at San Jose, last week, to Murphy Bros. The lot consisted of six calves, and the Messrs. Murphy paid \$300 apiece for them.

An exchange gives the following as a sure cure for bog cholera: Throw oats, or other small grain, on the ground, and scatter wood ashes over it and let the pigs pick it up and the ashes will get into their nostrils and head. It is said to be an infallible cure.

The number of imported thoroughbred cattle landed in Baltimore in the year ending June 1st was 1,109, which, with 68 calves dropped in quarantine, makes 1,177. Of these 293 were black Polled-Angus cattle, 196 Galloway, 553 Herefords, 31 Sborthorns, 23 Sussex and 13 Jerseys.

During the San Jose fair Captain Hutchinson sold to T. E. Snell, a dairyman and stock raiser, of the Santa Clara valley, two yearling bulls, from his fine herd of Devons.

It is said that cheese greased with butter in which a red pepper has been stewed will not be molested by flies.

POULTRY.

An Improved Incubator.

The *American Agriculturist* gives a very good plan for a simple and cheap incubator: "The incubator is made of three boxes six inches deep. The first, or bottom box, has no top, and the floor is perforated with ten or twelve half inch holes, in which are inserted tin tubes to admit air. This is called the ventilator. The second box, the egg drawer, has no top or bottom, but a piece running lengthwise on the bottom, on which the eggs are placed. The third box has a zinc bottom, the top and sides being of wood. This is called the heater. At the rear of this box is a tin elbow, up bending into it, but extending downwards outside. The three boxes being placed one on the other, first the ventilator, then the egg drawer, and last the heater, we now have an incubator of three divisions, the top one being heated with a lamp inserted in the elbow. The draught from the lamp is caused by two or three tubes extending from within half an inch of the zinc upwards through the top of the incubator and at the opposite end from the lamp. The whole is covered with a large box, eight inches larger in every direction, top, bottom and sides filled with sawdust. The heat, smoke and impurities enter the heater, warm the zinc, and pass out at the top of the tubes. The eggs in the drawer underneath are kept at a temperature of 102 degrees."

An exchange gives the following treatment for pullets that are intended to be kept for laying hens: As long as an early pullet is growing, she may be fed highly, but the comb must be noticed in order to be watchful of the first sight of the scarlet color which indicates that she is about to begin laying. At this period she will become too fat if fed on much grain, and if very fat she will not lay. After she has commenced to lay, however, she will receive all she desires. The critical period is that between the maturity of the pulp and the beginning of egg production.

The keeping of poultry may be made a source of profit or a decided disadvantage, according to the treatment bestowed on the fowls. As an authority says, the best of layers will not yield a large supply of eggs, unless they have the proper kind of food, and be might have added with equal truth the provision of suitable housing, for it is an incontrovertible fact that hens will not lay, no difference how much or what kind of food may be furnished them, unless they have good warm shelter. Nor does it make any difference how well they are sheltered without the proper food, they will not produce the expected quantity of eggs. The one follows the other as a natural sequence. Not only in Winter do they require attention, but equal care must be given in Summer. Then their houses must be kept perfectly clean and ventilated, and a good lot to run in, with plenty of shade to furnish them a cool biding place during the hot weather, is a necessity. By a proper attention to their necessities poultry may be made one of the most profitable perquisites of the farm.

The turkey is one of the most difficult fowls to raise, being very susceptible of disease. It can not become inured to confinement, but must be allowed almost unlimited range. Do not attempt to fatten turkeys until the weather becomes cool. The best place for them now is on the range, and they only need a small allowance of food when they come up at night. An exchange says: To fatten them too early is not beneficial. They can be made serviceable in tobacco fields, as they destroy all the large green worms they can get, and if allowed the run of the farm will destroy innumerable quantities of grasshoppers, etc.

Racing at the Oregon State Fair.

STATE FAIR GROUNDS, SALEM, Sept. 15th.—Purse, \$300; \$200, \$70, \$30; for Oregon raised stallions; one mile.  
G. G. Glenn's b b Glennbrook, by Delaware, Jr.—Naptha, by Napa, aged, 118 lbs. Purver 1

Time, 2:40, 2:43, 2:38.

Foxhall's Acot Cup.

After much wordy debate by the Treasury officials and Mr. James R. Keene's legal advisers, the custodians of the national exchequer have at last directed the Custom House people in this city to surrender to its owner the handsome trophy so gallantly won by Foxhall at Ascot a year ago last June. That our government officials should have been so long arriving at this decision is hardly in accordance with the general reputation accorded Americans the world over for clear-headed native wit, and had the Cup been allowed to go back to its donors, as the first decision of the people at Washington so ordered, it would have been an exhibition of stupidity entirely at variance with our national leaning towards turf sports, their honors and trophies. As the Cup was, however, delivered to Mr. Keene's representatives on Tuesday of this week, the matter is now finally adjusted as it should be, though the damaged condition of the handsome gold trophy does not speak very well for the care taken of it during its long detention by the Custom House authorities.—*Sportsman*.

Golden, who drove the Michigan stallion Montgomery in his winning heat at Providence, says that he could have done the last mile in 2:17 or better, and \$10,000 was refused for the horse after the race. He is by Inhoritor, out of a mare by Kentucky Chief. Inhoritor by Jay Gould, dam Lady Thorne.

Fred Gehhard's colt, St. Saviour, has been turned out, having developed a weakness in one of his front legs. He was about the fastest horse in training for anything in the mile, and Suedeckor claim to have run him the last year in distance in 1:40.

## Palo Alto.

A friend requested us to accompany him to Palo Alto last Wednesday, as he thought of purchasing a young trotting stallion, and though all out of sorts consequent upon a severe cold captured in the genial climate of Sacramento, we could not refuse. A resident of the southern country he had never visited the world-renowned breeding farm, and so there was a double purpose in his visit. It was a grand morning. The sun was shining with Summer brilliancy as early as seven o'clock, and the whole day was nearly a counterpart of the glorious weather which so greatly added to the pleasure of the prolonged visit to Sacramento during the State fair. Had there been the warm haze of the Indian Summer of the East, it would have been a reminder of that enchanting season of the Orient, as the trees which border the drives at Palo Alto were showing a brighter livery, and the lawns more variegated by fallen leaves fleecing the green carpet with spots of bright color.

There was a carriage awaiting us at the depot, and our friend was much pleased with what he saw on the route to the trotting stables. The first horse exhibited was the king of the department, Electioneer, and among the many times we have seen him, in the eight years of his California life, he never looked better, not appearing a day older than when first domiciled on the banks of the San Francisco, not a shrunk muscle in the mass that clothes him from nose to knees and hocks, his eyes still as lustrous and his coat as blooming. Though, of course, receiving the best care he is not pampered. Plenty of good hay and oats, plenty of exercise, and it would only require a few weeks to "point" him for a race, and from what we have witnessed in the way of "hushes," were that course taken, he would make a mark that would astonish lookers-on nearly as much as the marvelous performances of his progeny. After Electioneer came his sons, Ansel and General Scofield. The first is from Annette, by Lexington, General Scofield from Lizzie Whipps, by Enquirer. Both are foals of 1880, and two finer specimens of the highly bred trotter it would be difficult to find in any country. Each has shown better than 2:30, and their education has not been as thorough as some of their companions of the same age. Piedmont was looking wonderfully well, and we were not surprised that our friend preferred his form to that of Electioneer. Piedmont strikes the eye at the first glance, he impresses the most critical observer with the general harmony of proportion. His "pose" is grander than that of Electioneer and in any position he is stylish. Electioneer has to be more carefully scrutinized. He does not put on any airs when led out by the bridle, and though he stands squarely on all of his feet, there is a passivity which misleads. Though the first look of an observer may disclose a shadow of disappointment, if the inspector be a good judge of form, he is sure to linger, and in most instances follow him to the stable to complete the analysis. The immense muscular development gives an appearance of "cloddishness," and the first idea is that there must be lots of adipose matter to swell the covering of quarters, loin and shoulders, but this

idea is dispelled when he moves and there is seen the gliding motion imparted by the contraction and lengthening of muscular fibres, and which fat would hide from the view. The touch, too, reveals the quality, and in place of the flabby sinking away from pressure there is firmness and elasticity.

The "breaking stable" was filled with youngsters, a large majority of them yearlings, and such yearlings as was never seen, even at Palo Alto, before, size and substance, of grand form and high breeding. There are so many to look at, and the time limited, so that about all the remembrance there is of a succession of bays, browns and chestnuts, Electioneers, General Bentons, and Piedmonts. The get of the former is invariably bays or browns, there are a number of chestnuts by General Benton, while the Piedmonts are generally of the rich color of their sire, many of them with a roseate tinge in foretops and manes which heighten the effect of the main color. The colts in training are numerous, and though there are sixteen at the Bay District course, under the charge of Marvin, there are so many left that their absence would not be noted were it not that division away from home contains the "flowers of the flock." We are much pleased to learn that our old favorite, the Electioneer colt from Dame Winnie, is leading the band, and half miles in 1:10 and 1:11 is a good report for a two-year-old. Those who have asserted, with such dogged obstinacy, that the experiment of Governor Stanford in breeding trotters from thoroughbred mares is a failure have nothing to base their absurd stories upon. We doubt if there is a breeding farm in the East that can select say six colts of any breeding that can cope with the same number at Palo Alto from thoroughbred mares, there is not a two-year-old between the western boundary of California and the eastern limit of Maine that the Dame Winnie colt cannot beat. There is little time to examine any particular division, and hurriedly we visit the weanling fillies in the large paddock that adjoins the stable.

Fifty of them in the bunch, and if the short tails did not corroborate the statue age, it would be thought that there was a mistake of a year in the age claimed. The colts of the same age are in an alfalfa field, the practice being to alternate in turning out the sexes, each division being allowed to run out part of the day, all being stabled at night. One weanling deserves more than passing attention. This is a brown filly, by Electioneer, from Lula, which has been very appropriately named Lulaneer. In order to have a still earlier test of training than has yet been followed at Palo Alto, it was decided to break her to harness as soon as she was weaned. When between seven and eight months old Marvin drove her a furlong in 28 seconds, restraining her the whole of the distance so that she "went on her courage," and evidently could have made it faster. Hinda Rose was put in harness for the first time in June, of her yearling form trotting the following November in 2:36½. And from that it was decided to commence the trotting education, at a time when heretofore the miniature course was the school-ground.

There are such a number of promising young trotting stallions offered for sale at Palo Alto that it is something of a bother to select. Those shown were priced at a reasonable figure, in our opinion, much lower than animals of the same quality could be bought for from a breeder who was not so largely engaged in the business. When a breeder fully realizes that he is "overstocked" he is willing to make concessions from "fancy prices," and thus when so many are produced there is corresponding cheapness. There were few minutes to give to the racing department. The train we were to return on was due at Menlo at 2:36, and it was after "high twelve" when the stables were reached. That was dinner time for the boys, but soon after they were at their posts. The building in which the racing colts are kept has been remodeled from a cattle barn built by Peter Coutts, and admirably it was arranged for that purpose. The transformation to a residence for the equine aristocracy has resulted in just as admirable quarters for them, and, in fact, it would be difficult to improve upon it if entirely new. It is lighted from above, and so completely that every portion of it is as cheery and bright as anyone could desire. It is unnecessary to state to those who know Henry Walsh that everything is in order, and that his force of men and boys are so well disciplined that the machinery moves without a jar. We are always prepared to see well-grown colts, trotters and thoroughbreds at Palo Alto, but at this visit there were occasions for surprise. Yearlings, when lead out, had the appearance of two-year-olds and those foaled in 1882 were "finished" like four-year-olds. All appeared to be in rugged health, and though the resolve not to run anything during the present season made it unnecessary to keep them in active training, it was apparent that they had been given work enough to insure all the condition that is required for the

situation. Our friend is thoroughly conversant with English and American horses, especially the former, and he was fervent in his praises so far as looks are a criterion. Quite a part of his life he held a commission in the British army, and the military training made him more keenly appreciative of the system which is the most potent cause of the smooth working of every department at Palo Alto. Order and neatness are everywhere apparent, not a trace of ammonia in any of the stables, not a straw or piece of paper disfiguring yards and paddocks.

## The Four-Year-Old Record.

A great filly has come to the front in Elvira by Cuyler, her dam Mary Mambrino, by Mambrino Patchen, grandam Belle Wagner, by Emhry's Wagner. According to the *Turf, Field and Farm*—good authority—Belle Wagner is stated to be thoroughbred, so that there is another example of the "pernicious influence," and the list of noted performers from thoroughbred grandams augmented by still another best on record. The name of Maud S., Jay-Eye-See, Elvira, now stand out in bold relief, a more potent argument than volumes of theory, and these animals are strongly reinforced with other near thoroughbred strains. The value of the blood is made still more apparent from the fact that 2:18½ was made by Elvira in a second heat the first having been trotted in 2:19½, and in both of them with drawbacks of breaks. We are not sorry that Kentucky has wrenched the septre from California in one of the stages of colt trotting. Time and time again we have called attention to the importance of continued efforts in order to retain supremacy, and that Kentuckians, especially, would leave nothing undone to recover lost prestige. Though one-quarter of a second measures the difference between Bonita and Elvira that almost infinitesimal fraction of time is worth thousand of dollars to Kentucky-bred stock. With the yearlings, two and three year-old record still to our credit there is still sufficient ground for claiming superiority, and defeat, in the last year of colthood, does not entirely obliterate the bright marks of the past. But it must be accepted as a warning and supineness will surely result in further disaster. Owing to the retirement of the Palo Alto forces this season, our accredited champions have been debarred from the contest. The fight must not be left to them, and California breeders throughout the State, must join in the enterprise. Kentucky has profited by the tactics which Palo Alto and Sunny Slope have given publicity to, and our folk must also benefit by the lesson and unite in an endeavor to recover lost ground, and put still more rapid flights of speed to the credit of the Pacific Coast.

## Guy Wilkes—Adair.

The meeting of the great young horses, Guy Wilkes and Adair on the Bay District Course to-day, is exciting a vast deal of interest. This is shared by the general public as well as the "trotting fraternity" as it is doubtful if there are two horses in California which are "nearer together." From what we have seen we consider Adair a trifle the fastest, but his competitor is as reliable as a chronometer and will hang on with the pertinacity of a bull terrier that has secured a good grip. So nearly are these horses "balanced" that it would be idle to predict victory on either side, and when so much depends on Dame Fortune mathematical calculations, based on time heretofore made, cannot be relied upon. The least mishap in a heat will change the whole feature for that game in the rubber, and even the lottery which awards position in the start be an element to consider that it will be one of the notable trotting events of the season we firmly believe, and that there will be a large assemblage to witness it is assured.

## Bay District Trotting Meeting.

As will be learned from the advertisement a trotting meeting will be held on the Bay District Course, commencing on Wednesday, November 5th. Four days will be occupied on each of which a good bill is offered. The very liberal purse of \$1,000—for named four-year-olds, with a chance for Voucher and Antevolo to compete should meet with a hearty response. If the owners of Voucher, and Antevolo deem that their colts cannot give away a year to such a strong field, it should receive more than the requisite number of entries. Mulvenna, Thapsin, Regina, Ha Ha, Baby Mine, Madaline, Center and Lucille are all so "close together" that if all be engaged it will be "anybody's race" until the finish of the final heat. The 2:27 and 2:24 classes are well calculated to bring out entries, and the 2:21 with the horses in which have come into, or so near, that notch will be one of the most exciting contests of the season.

Improved Horse Clothing.

Arrangements have been made whereby L. D. Stone & Co., of San Francisco, will manufacture and sell the improved horse-clothing, a cut of a portion of which will be found in the advertising column.

The Coming Race Meeting.

All the indications are favorable for the Fall Race Meeting of the Pacific Coast Blood-Horse Association, and there is scarcely a doubt that it will prove one of the best ever held on the coast.

Breaking Down.

[Dr. R. A. Finlay, in N. Y. Sportsman.]

The term breaking down is one used by racehorse men, and the impression meant to be conveyed is that a rupture of the suspensory ligaments (check ligaments, so-called, because these ligaments serve as a check or stay on the back tendons, thereby preventing an over-extension of the foot upon the leg) has taken place, whereby the principal means of support of the foot and leg has been sundered, partially or completely; and owing to this the animal is unable to support the weight of the body upon the leg, and the toe is turned up, and the fetlock descends to the ground.

seat of injury. The nature of the lesion is next to be determined—whether the rupture has taken place above or below the fetlock joint, whether it is complete or partial, and also whether it has taken place through the thick portion of the ligament of though one of the lateral subdivisions at the lower throw of the ligament, or at its point of origin or place of insertion.

Manipulation with the fingers, the other hand rotating the foot, will readily determine this. For if the rupture is complete and the dense part of the ligament, or if the ligament is torn away from either its point of origin or insertion, the increased motion by flexion and extension readily demonstrates it, and as a further proof if the weight of the animal is brought to bear upon the foot, the support of the foot is seen to be lost, as the toe is turned up in air and the animal rests on the fetlock.

Jerome Park.

Although Mr. Baldwin had no engagements in the stakes of the American Jockey Club's Fall meeting, the horses are quartered at Jerome Park, and have started occasionally in purses and specials. The record reads:

- Sept. 27th.—Purse, \$500, for three-year-olds and upward; winners in 1884 (not counting handicaps or selling races when carrying less than legal weight): of \$1,250, to carry 3 lbs.; of \$1,500, 5 lbs.; of \$2,000, 7 lbs.; or if not more than \$750, 3 lbs.; or if not more than \$500, 7 lbs.; maidens allowed, if three years, 15 lbs.; if four years or more, 25 lbs.; one mile.

Betting: 100 to 75 on Aranza, 2 to 1 against Markland, 8 to 1 against Pampero, 15 to 1 against Gano, and 25 to 1 against Albia. Gano was quickest away, Markland second, the others close up. Gano opened up a gap before reaching the turn, and at the quarter he led two lengths, Pampero second, Markland and Aranza next.

- Sept. 30.—Purse \$500, for all ages; entrance 3 per cent. of the purse (\$15 each) to the second; two-year-olds to carry 5 lbs. above weight for age; horses entered to be sold for \$2,000 to carry full weight; if to be sold for less, allowed 1 lb. for each \$100 down to \$1,500; for less allowed 2 lbs. for each \$125 down to \$1,000, and if for less allowed 3 lbs. for each \$100 less; 12 entries; three-quarters of a mile.

- It. Pett ngill's b m Constantina, 6 years, by Abd-el-Kader—Sun-beam, 90 lbs. Church
- Morris & Co.'s ch g Apollo, 5 years, by Lever or Ashlee—Rebecca T. Price, 87 lbs. Martin
- W. R. Babcock's ch m Lizzie Mac, 4 years, by Alarm—Lady Motley, 102 lbs. Conklin

Betting: 2 to 1 against Weasel, 9 to 1 against Apollo, 3 to 1 against Lizzie Mac, 7 to 1 against Constantina, 12 to 1 each against Hannah D. and Musk, 15 to 1 each against Valley Forge and Savannah, 20 to 1 against Marmaduke, and 35 to 1 against Alfred. After a long delay at the post the start was very straggling, with Lizzie Mac left. In running to the turners' stand Valley Forge led nearly a length from Weasel, Hannah D. third, Savannah next. In the run round the north field Valley Forge always held his own, and he was never headed, winning easily at the end by two lengths, Savannah a head in front of Weasel, Hannah D. and Marmaduke close up.

- Oct. 24.—Purse, \$500, for three-year-olds and upward; entrance, 3 per cent. of the purse (\$15 ea. m); to the second; horses entered to be sold for \$2,500 to carry weight for age; if for less, to be allowed 2 lbs. for each \$250 down to \$2,000; if for less, allowed 3 lbs. for each \$250 down to \$1,500; if for less, allowed 2 lbs. for each \$125 down to \$1,000, and if for less, allowed 3 lbs. for each \$100 less; eight entries; one mile.

Betting—8 to 5 against Lytton, 7 to 2 against Lizzie Mack, 4 to 1 against Sara na, 5 to 1 against Musk, 3 to 1 against Marmaduke, 12 to 1 against Wandering and 20 to 1 against Eldorado. No bid for the winner.

After some ten or fifteen minutes of circus business, in which Wandering was very conspicuous, the flag was dropped to a straggling start, with Lytton and Musk in front, and with Eldorado and Lizzie Mack bringing up the rear. As they reached the turn Wandering joined the leaders, and with Lytton a trifle in front the three ran a sharp race to the quarter and thence to and around the club-house turn. At the beginning of the turn for the south field Lytton drew out nearly clear, but was soon after again joined by Wandering and Musk. They continued well together in their run to the three-quarters and thence into the homestretch. In the mean time Meaton had worked his way up to the front with Lizzie Mack, and as Lytton quit at the seven-furlong pole Lizzie Mack joined Wandering and the two made a close and exciting finish with Lizzie Mack a trifle in front, with Wandering second, a length in front of Marmaduke, and the others as above. Time, 1:47. The rider of Wandering claimed a foul, which the judges refused to allow. The track was very muddy.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

A. J. Z., Healdsburg:

In the next issue of your valuable paper please answer the following questions. 1st—What does a man have to do to change the name of a trotting horse? 2d—Did a certain horse named Vanderlyn change his name before trotting at Petaluma in 1853 to the name of Johnny? 3d—Did the Board of Appeals sustain the judges' decision, at Petaluma, 1853, in declaring the pools off in the race of Johnny, Buck Foster and Sperry? Answer: 1st—Under the National Rules every horse shall be named and the name correctly and plainly written in the entry, and after entering or trotting a public race such name shall not be changed without procuring a record thereof, to be made in the office of the Secretary of the National Association, for which there shall be paid a recording fee of \$50. 2d—He did not. 3d—The case never came before the Board of Appeals to our knowledge.

H. W. P., Healdsburg, Cal.:

A friend and myself have made a wager and agreed to leave it to you. I claim that the time made by Blue Mountain Belle, at Santa Rosa, viz: :49, :48, was the fastest half-mile and repeat race ever run, and second, that :48 is the fastest half-mile heat ever made in an actual race. My friend claims the reverse. If I am wrong, state name of horse that beat :48, and how much was it beaten. Answer—You are right in both propositions.

National, Quincy, Cal.:

At Greenview a race of three-quarter mile heats was run under Pacific Blood Horse Rules. Panama won the first heat; Conquest won the second heat; Snuff Box won the third heat. 1st, Had Jubilee a right to start in the fourth heat? 2d.—Had Snuff Box a right to start in the third heat? Answer—1st.—No. 2d.—No.

L. H., Pleasanton, Cal.:

Please give me the breeding of the horse Novato Chief. Answer—Novato Chief, by Old Vermont Black Hawk, dam by Sir Charles, son of Duroc.

J. S. B., Greenville, Cal.:

Races advertised by District No. 11, Track 80 feet short. Do horses trotting in mile heats, 3 in 5, make a record? Answer—Not a record, but the time recorded does constitute a bar.

Butter Blood at Yerba Buena.

EDITOR BREEDER AND SPORTSMAN:—It may be of interest to the readers of your valuable paper to know that the Jersey bull, Romeo de Bonair, spoken of in my advertisement in your columns, is not only 87 per cent. of the blood of Mary Ann of St. Lambert, that made over twenty-seven pounds of butter in one week, but is also as deep in the blood of Ida of St. Lambert, spoken of in your last paper. As I have had one Jersey cow on my Yerba Buena ranch that made 20 pounds and 1 ounce of butter one week, also one that made 17 1/2 pounds, four others that made upwards of 14 pounds per week, it is my desire to have a band of 100 head, 50 Jersey and 50 Guernsey, that will make 14 pounds per week each, and to that end I shall work. Truly yours, HENRY PIERCE.

The Doncaster Cup for 1884 is an imitation of a pilgrim's bottle, in the Italian Renaissance style, with mask handle. On the front side is inscribed the name of the race, a space being left wherein to insert the name of the winning horse. On the back, beautifully modelled, are figures of cupids, cherubs, and females. The neck of the bottle is richly embossed with representations of fruit and elaborate festoons of drapery. The bottle rests on a massive block of ebony.

Jay-Eye-See and Phyllis have been retired for the season.

## STABLE AND PADDOCK.

## Sense in Shoeing.

Prof. Slade, of Harvard College, expresses some good common sense views in regard to shoeing horses, in the following: Horse-shoeing has given rise to much controversy, yet it is a matter which in itself, so far at least as regards the principal object in view, is extremely simple and easily understood. The object of the shoe is the protection of the ground surface of the outer wall of the hoof against excessive wear. In the wild horse the balance between the growth and the wear of the horn of the hoof, is equally maintained, but when civilization subjects the animal to hard and rapid labor upon paved and macadamized roads, then this balance is destroyed—the wear exceeds the growth. Hence the aim of the farrier is to ward against this condition of things by attaching a rim of iron or steel to the circumference of the foot. The moment this is done, however, the balance is again destroyed; the growth will exceed the wear, necessitating in time the removal of this metallic rim, and the reduction of the horn by artificial means. Although the growth of the horn downward is equal over the entire surface of the wall, it will usually be found that in the healthy foot more must be removed from the toe than from heels or quarters. This is because the shoe is firmly fastened to the toe, whereas, in the other regions, especially at the heels, there is a certain amount of motion allowed by the absence of nails, and consequently more or less wear takes place. This may be readily seen on examination of a shoe that has been worn for three or more weeks, the burnished line on the foot surface of the shoe showing distinctly the outline of contact. It may be asked whether it is not practicable in many cases to dispense with shoeing. We answer most unhesitatingly yes, with great benefit to the animal as well as to the owner. There are many country districts where the roads are of turf, or are sandy, and where shoes are unnecessary. If the colt is never subjected to this process, the foot acquires that natural firmness and hardness which will serve the animal under ordinary circumstances. In winter, when roads are very slippery, and the horse is called upon for heavy draft, in many cases we must provide means by which he can gain a firm foothold; and this, in the present state of our knowledge, can only be done by shoes furnished with calks. We do but follow a blind and foolish custom where we apply shoes without the necessity. When shoes have been constantly worn, and it is desirable to dispense with them, great care must be exercised in gradually accustoming the foot to this new condition, and no long or severe labor should be at once demanded of the animal. Calks are detrimental under any circumstances, and should always be avoided if possible. There can be no reason or excuse for their use on road horses of light draft in summer, even on pavements. When actually required, it is very essential that they should have an equal bearing on all sides, at the toe as well as at the heels. Any unequal distribution of the weight of the animal is sure to bring about strains of the ligaments, sinews and muscles. The fashionable heel of the modern helle is not more sure to lay the foundation for future suffering. No shoe should be allowed to remain upon the foot more than four or five weeks. Many horsemen patronize the farrier who nails on the shoes so that they will remain more than double this time, with the idea that such a proceeding is economical, whereas, it is the furthest possible remove from economy. As the growth of the horn is constantly downward and outward, the shoe, which when applied weeks before, was fitted to the foot, has now become altogether too small, and consequently there is constant pressure upon the sensitive portions at the quarters, causing corns and other affections. On the removal of the shoe, if again to be applied, the ground surface of the wall of the hoof must be reduced by the rasp to a perfect level, which can be attained by the eye accustomed to good work. The level of the untouched sole forms a ready and practical guide for the amount of reduction. Neither the sole nor the frog should undergo the least mutilation, since nature removes by constant exfoliation all superfluous horn; neither should the natural barrier at the heels, provided for the express purpose of keeping the foot expanded, ever be cut into, as is the almost universal custom, under the insane idea that it "opens out" the foot. No greater folly or barbarity can be committed, and no surer way could be devised for producing contraction with its attendant evils. The walls of the hoof should never be rasped. It is by this process that the external fibres of the horn are destroyed, the beautiful polish removed, and the internal surface exposed, whereby the entire structure is rendered more brittle and unfit to perform its functions. Let the intelligent horseman who has hitherto given little or no thought to this important subject, follow the above instructions, and satisfy himself of their correctness, and tell them to his neighbors.

## How to Manage a Broken-Winded Horse.

In the peculiar state of the lungs of a broken-winded horse, the great labor of the abdominal muscles is absolutely necessary to bring about the proper arterialization of the blood; hence, under certain states of atmosphere, where there is less oxygen in a given space, or from, perhaps, some other peculiar changes in its electrical condition, which we cannot fathom, the difficulty of effecting the oxygenizing of the blood is greatly increased. If we urge a badly broken-winded horse into exertion, he will drop; he is thrown into a state of asphyxia, in which, if he should die, his blood will be found quite black. Indeed, in had cases, as the disease advances to a fatal termination, we find the lining membrane of the nose and mouth turning purple, evincing the condition of his system. According to our present knowledge, nothing can be done to effect a cure, though happily it is in our power readily to alleviate the distressing symptoms.

If we suppose the difficulty of breathing to arise from a gorged condition of lung, (which is generally the case in any presumed cause of the disease), it is evident that any pressure against the diaphragm will increase the difficulty of breathing. Although the morbid appearance of emphysema of the lungs has not been found practically such a constant attendant cause of the complaint as is often supposed, yet the carrying out of certain principles has proved correct in the treatment; indeed the practice of regulating the giving of food and water so the horse is not obliged to work on a full stomach, has its advantages in preventing broken wind.

The palliative treatment of this disease consists principally in a proper system of dieting. The stomach must always be kept unloaded prior to work. Hay, which appears to have exerted a harmful influence in producing the disease, is to be given sparingly, and little at a time; and always of the best quality. Give the greatest supply at night, dampening it; for a middle-sized horse, seven pounds are quite sufficient.

It may be asked, "Why give hay at all?" to which we can

only answer, "Necessity obliges us to do so." It is a fact, we believe, well known in physiology, that concentrated food will not alone support life. The stomach must have a certain quantity or bulk to act on; and were we to substitute some sort of straw, we should only increase the mischief, since it would be found we must give more straw in proportion, than hay, the former containing less nutriment in the ratio of three to one.

Whatever manner of food is given it is to be either damped, or contain a portion of bran mash; and it ought to be of the most nutritious description, at the same time readily digestible in kind and form, in order to keep the dung in a softened state. A manger food, such as the following, seems very applicable: one part ground corn, and two parts ground oats, with the addition of sliced carrots when they can be readily procured, they seeming to act beneficially in preventing the collection of flatus, which is so distressing to the animal.

The quantity of food and the proportions mainly depend on the size of the horse and the work he is to perform. If carrots are used in any quantity, a proportion of hay may be dispensed with, according to the relative nutritious value. The horse ought to be fed at least four times a day, but nothing for two hours before work. The broken-winded horse, like the roarer, is always eager for water; but give it sparingly, very often, and only a little at a time, the greatest quantity in the evening, and debar him from it for some time before his work. If fed on carrots or any succulent food, he will require less water.

## Live Stock Premiums At Stockton.

## THOROUGHBREDS.

Best stallion 3 years old or over, to Joe Daniels by Imported Australian, owned by San Joaquin Stock Breeders' Association, Stockton; second, to Jim Douglass by Wild-Idle, owned by George Howson, Sacramento.

Best sucking colt, to Eotherford, by Rutherford, owned by J. W. Adams, Los Angeles.

Best mare 3 years old or over, to Aunt Betsy by Hardwood, owned by J. W. Adams, Los Angeles; second, to Fannie D., by Woodburn, owned by J. W. Adams, Los Angeles.

Best mare 2 years old, to Heurietta, by Joe Daniels, owned by N. W. Randall, Stockton.

## ROADSTERS.

Best stallion 4 years old or over, to Adventure, by Venture, owned by Captain Ben E. Harris, San Francisco.

Best stallion 3 years old, to Alert, by Artherton, owned by J. H. Tennent, Pinole.

Best mare or gelding 4 years old and upwards, to Twinkle, by Echo, owned by J. H. Tennent, Pinole; second, to Whisper, by Young Consternation, owned by E. Younger, San Jose.

Best mare or gelding 2 years old, to Arthens, by Artherton, owned by J. H. Tennent, Pinole.

Best span of matched roadsters, to Joe and Herrie, by Old Patchen, owned by D. J. McCarty, San Francisco; second, to 5-year-old hays, L. U. Shippee, Stockton.

Best trotting sucking colt, to Black Al, by Ha He, owned by C. W. Turner, Stockton; second, to Relief, by Reliance, owned by Ben E. Harris, San Francisco.

Best trotting sucking filly, to hay —, by Mt. Vernon, owned by R. E. Stowe, Stockton; second, to black —, by Mt. Vernon, owned by W. H. McKee, Stockton.

## HORSES FOR ALL PURPOSES.

Best stallion, 3 years old and upwards, to Tesso, by Hildreth's horse, owned by A. Starkweather, Farmington; second, to Nephew, Jr., by Nephew, owned by S. A. Curley, Stockton.

Best stallion, 2 years old, to Nelson Nutwood, by Old Nutwood, owned by F. S. Hatch, Stockton; second, to Comet, by Ben Allen, owned by Edwin Thomas, French Camp.

Best stallion, 1 year old, to Fred, by Reliance, owned by Frank Seivers, Stockton; second, to Sir Whipple, by Whippleton, owned by Ben E. Harris, San Francisco.

Best sucking colt, to Billy, by Phill., owned by Perry Yaples, Ripon.

Best mare 3 years old and upwards, to Finafore, by Winthrop, owned by R. E. Stowe, Stockton; second, to Lady May, owned by G. W. Brandon, Capay.

Best mare 1 year old, to Daisy, by Ben Allen, owned by George Thrust, Stockton; second, to Echolo, by Echo, owned by Ban. E. Harris, San Francisco.

Best sucking filly to ch —, by Hambletonian, owned by E. H. Perry, Lockeford.

Best stallion other than thoroughbred, with thirteen of his colts, to Eureka, owned by C. K. Bailey, Stockton.

Best mare other than thoroughbred, with four of her colts, to Ryan mare, owned by L. U. Shippee, Stockton.

## DRAFT HORSES.

Best stallion 3 years old and over to Eureka, sire an imported Perchon, owned by C. K. Bailey, Stockton; second to French Lyon, sire imported, owned by M. Ross, Galt.

Best stallion 2 years old to Royal Tom, by Eureka, owned by C. K. Bailey, Stockton; second to Hector, by Eureka, owned by E. Wilkins, Stockton.

Best stallion 1 year old to George Washington, by Eureka, owned by C. K. Bailey, Stockton.

Best sucking colt to Waterloo, by Eureka, owned by C. K. Bailey, Stockton.

Best mare 3 years old and over to Cantata Queen, by Duke de Chartes, owned by C. K. Bailey, Stockton.

Best mare 1 year old to Maggie Traylor, by Enraka, owned by C. K. Bailey, Stockton.

Best sucking filly to Moss Rose, by Enraka, owned by C. K. Bailey, Stockton.

## CARRIAGE TEAMS.

Best carriage team sixteen hands high and over, owned and used as such by the exhibitor, to Colonial and Elmo, by Elmo, owned by Ben E. Harris, San Francisco.

Best single carriage animal owned and used as such, shown to huggy or carriage, to Tommy, by Patchen, owned by Thomas Sedgwick, Stockton.

## MULES.

Best span of mules owned by exhibitor to Mollie and Collin, owned by L. U. Shippee, Stockton.

## JACKS AND JENNETS.

Best Jack 3 years old and over to Castilian, sire unknown, owned by L. U. Shippee, Stockton; second, to Prince, by Brigham Young, owned by J. D. Patton, Lodi.

Best Jack 2 years old to Napoleon, by Napoleon, owned by W. K. Walker, Stockton.

Best Jack 1 year old to Major Kent, owned by L. U. Shippee, Stockton.

Best sucking Jack to black —, owned by L. U. Shippee, Stockton.

Best Jennet 3 years old and over to Topsy, by imported sire, owned by L. U. Shippee, Stockton; second to Mag, owned by L. U. Shippee, Stockton.

Best Jennet 2 years old to Native, by Behrmoth, owned by W. F. Freeman, Stockton; second, to Bleck Jane, owned by L. U. Shippee, Stockton.

Best Jennet 1 year old, to Black Beck, owned by L. U. Shippee, Stockton.

Best sucking jennet to Young Topsy by Castilian, owned by L. U. Shippee, Stockton.

## CATTLE—DURHAMS.

All premiums to Col. Younger of San Jose.

## DEVONS.

All premiums to Geo. Bement, Redwood City.

## HEREFORDS.

All premiums to Capt. Wm. Kohl, San Mateo.

## JERSEYS.

Best bull, three years old or over, to Jessie Prince, owned by Thomas Wait, Brighton, Sacramento county. Second to Tamalpais, by Silver Cloud, owned by Williams & Bixler, Undine.

Best bull, two years old, to La Hiras Boy, by Menlo Park, owned by J. S. McCue, Marin county.

Best bull, one year old, to R. G. Sneath, owned by Wm. A. French, Stockton. Second to John Rooney, owned by Thomas Waite, Brighton.

Best calf, under one year, to H. M. La Rue, owned by Thomas Waite, Brighton.

Best cow, three years old or over, to Nora Fourth, by Monarch, owned by Williams & Bixler, Undine. Second to Ida W., owned by Thos. Waite, Brighton.

Best cow, two years old, to Lilac Fourth, owned by H. S. Sargent, Stockton. Second to Ella B., owned by Williams & Bixler, Undine.

Best cow, over one year old, to Topsy the Third, owned by Thos. Waite, Brighton. Second, to Nonie Second, owned by Wm. A. French, Stockton.

Best heifer, under one year, to Queenie, owned by H. S. Sargent, Stockton.

## HOLSTEINS.

Best bull 3 years old or over to Anson, by Amato, owned by Mrs. E. D. Knott, La Honda, San Mateo county.

Best bull 1 year old to Juror 2295, by Empire 538, owned by H. W. Meek, San Lorenzo.

Best calf under 1 year to Cassius, by Prince Imperial, owned by H. W. Meek, San Lorenzo.

Best cow 2 years old or over, to Rigoletti, No. 287½, by District Bull of Biemster, owned by H. W. Meek, San Lorenzo.

Best heifer calf under one year old, to Alameda Maid by Netherland Marquis, owned by H. W. Meek, San Lorenzo.

## GRADED CATTLE.

Best cow 3 years old or over, to The Widow, owned by C. Younger, San Jose; second, to Jersey Belle, owned by Wm. A. French, Stockton.

Best cow 2 years old, to Gray, owned by H. S. Sargent, Stockton; second, to Bessie F., owned by Wm. A. French, Stockton.

## HERDS OF CATTLE.

Best Durham herd, C. Younger, San Jose.

Best Devon herd, Captain A. J. Hutchinson, Los Angeles.

Best Ayrshire herd, George Bement, Redwood, San Mateo county.

Best herd Herefords, Wm. Kohl, San Mateo.

Best herd Holsteins, H. W. Meek, San Lorenzo.

## SHEEP.

Best Cotswold ram, Early Morn, owned by Ed. Younger, San Jose.

Best Southdown ram, Sonoma, owned by George Bement, Redwood, San Mateo county.

Best pen of five Cotswold ewes to Ed. Younger, San Jose.

Best pen of five Southdown ewes to Geo. Bement, Redwood City.

## SWINE.

Best boar to Early, owned by San Mateo Stock Farm, San Mateo; second, Tarbox, owned by Tyler Beech, San Jose.

Best Berkshire sow to Beauty, owned by San Mateo Stock Farm, San Mateo; second, Hopton Lass, owned by San Mateo Stock Farm, San Mateo.

Best Berkshire sow and four pigs to San Mateo Stock Farm, San Mateo.

Best Jersey red boar, —, to I. S. Shippee, French Camp.

Best Jersey red sow, I. S. Shippee, French Camp.

Best Jersey red sow and pigs, I. S. Shippee, French Camp.

## POULTRY.

Best lot Langshans, Thomas Waite, Brighton.

Best lot Light Bramahs, Thomas Waite, Brighton.

Best lot Cochins, Thomas Waite, Brighton.

Best lot Houdans, Thomas Waite, Brighton.

Best lot Leghorns, Thomas Waite, Brighton.

Best lot gama, George Bement, Redwood City.

Best lot Silver Spangled Hamburg, Thomas Waite, Brighton.

## TURKEYS.

Best lot Bronzed, Thomas Waite, Brighton.

## DUCKS.

Best lot Rouen, Thomas Waite, Brighton.

Best lot Pekiu, Thomas Waite, Brighton.

## Foals by Hubbard.

The following foals, by Hubbard, are reported by Mr. J. T. Dala, and were according to his statement forwarded for registration in the fourth volume of the American Stud Book, but for some unexplained reason they do not appear there:

Mary Hubbard, bay filly, foaled March 15th, 1882, dam Mary Watson.

Rosewood, bay colt, both hind feet white, foaled March 4th, 1883, dam Mary Watson.

Hub Watson, chestnut colt, strip in face, little white on right hind foot, foaled April 15th, 1884, dam Mary Watson.

Daisy H., chestnut filly, some white in face, both ankles, white half way to hocks, foaled April 5th, 1883, dam Santa Clara Belle.

William H., chestnut colt, little white in face, foaled April 4th, 1884, dam Santa Clara Belle.

Mary Watson, by imp. Hercules, first dam Peri, by Independence, (Boston Jr.); second dam, by Belmont; third dam, by Red Bill; fourth dam, by Stockholder; fifth dam, by imp. Bluster.

Santa Clara Belle, by Woodburn; first dam Cricket, by Rifleman; second dam Lady Belle, by Belmont; third dam Puss, by Lance; fourth dam by Randolph's Janne.

## ATHLETICS.

## Laws of Athletics.

As there have been frequent enquiries in relation to laws governing athletics, the following, which is the latest code of the National Association of Amateur Athletics of America, will answer all the queries:

## Laws of Athletics.

## I.

## OFFICERS.

The officers of an athletic meeting shall be: One Referee.  
Three Judges at the finish.  
Three Measurers.  
Three Time-keepers.  
One Judge of Walking, with assistants, if necessary.  
One Starter.  
One Clerk of the Course, with assistants, if necessary.  
One Scorer, with assistants, if necessary.

## II.

## CLERK OF THE COURSE.

He shall record the name of each competitor who shall report to him.  
He shall give him his number for each game in which he is entered, and notify him before he starts of every event in which he is engaged. The assistants shall do such portions of his work as he may assign them.

## III.

## STARTER.

He shall have entire control of competitors at their marks, and shall be the sole judge of act as to whether or no any man has gone over his mark.  
His decision in such cases shall be final and without appeal.

## IV.

## JUDGE OF WALKING.

He shall have entire control of competitors during the race, and his decision as to unfair walking shall be final and without appeal.  
The assistants shall do such portions of his work as he may assign to them.

## V.

## SCORER.

He shall record the laps made by each competitor, and call them aloud, when tallied, for the information of the contestants.  
He shall record the order of finishing and the times of the competitors in walking and running races.

The assistants shall do such portions of his work as he may assign to them.

## VI.

## TIME-KEEPERS.

Each of the three time-keepers, after comparing their watches, shall time every event; and in case of disagreement, the average of the three shall be the official time.

Time shall be taken from the flash of the pistol.

## VII.

## JUDGES AT THE FINISH.

Two shall stand at one end of the tape, and the third at the other. One shall take the winner, another the second man, and the other the third man; they shall also note the distances between the first three as they finish.

In case of disagreement, the majority shall decide.

Their decision as to the order in which the men finish shall be final and without appeal.

## VIII.

## MEASURERS.

They shall measure, judge and record each trial of each competitor in all games whose record is one of distance or height.

Their decision as to the performance of each man shall be final and without appeal.

In case of disagreement the majority shall decide.

## IX.

## REFEREE.

He shall, when appealed to, decide all questions whose settlement is not otherwise provided for in these rules.

His decision shall be final and without appeal.

## X.

## COMPETITORS.

Immediately on arriving at the grounds, each competitor shall report to the Clerk of the Course, and obtain his number for the game in which he is entered.

He shall inform himself of the times at which he must compete, and will report promptly at the start, without waiting to be notified.

No competitor shall be allowed to start without his proper number.

## XI.

## PROTESTS.

Verbal protests can be made at or before any Athletic meeting, against a competitor or team, by any competitor or club competing; but such protests must be subsequently and before action thereon, made in writing and duly presented to the Club under whose auspices the meeting is held.

## XII.

## INNER GROUNDS.

No person whatever shall be allowed inside the track, except the officials and properly accredited representatives of the Press.

Authorized persons shall wear a badge.

Competitors not engaged in the game actually taking place shall not be allowed inside or upon the track.

## XIII.

## TRACK.

The measurement of tracks shall be eighteen inches from the inner edge, which edge shall be a solid curb raised three inches above the level of the track.

## XIV.

## ATTENDANTS.

No attendants shall accompany a competitor on the scratch or in the race.

## XV.

## STARTING SIGNALS.

All races, (except time handicaps), shall be started by report of pistol—the pistol to be fired that its flash may be visible to the time keepers. A snap cap shall be no start.

There shall be no recall after the pistol is fired except in case of a foul provided for in Rule XXXII.

Time handicaps shall be started by the word "go."

## XVI.

## STARTING.

When the starter receives a signal from the judges at the finish that everything is in readiness, he shall direct the competitors to get on their marks.

Any competitor starting before the signal, shall be put back one yard.

For the second offense another yard.

And for the third shall be disqualified.

He shall be held to have started when any portion of his body touches the ground in front of his mark.

Stations count from the inside.

## XVII.

## KEEPING PROPER COURSE.

In all races on a straight track, each competitor shall keep his own position on the course from start to finish.

## XVIII.

## CHANGE OF COURSE.

In all races on other than a straight track, a competitor may change towards the inside whenever he is two strides ahead of the man whose path he crosses.

## XIX.

## FOULING.

Any competitor may be disqualified by the referee for jostling, running across, or in any way impeding another.

## XX.

## FINISH.

A thread shall be stretched across the track at the finish, four feet above the ground. It shall not be held by the judges, but fastened to the finish posts on either side, so that it may always be at right angles to the course and parallel to the ground. The finish line is not this thread, but the line on the ground drawn across the track from post to post, and the thread is intended merely to assist the judges in their decision.

The men shall be placed in the order in which they cross the finish line.

## XXI.

## WALKING.

The judge shall caution for any unfair walking, and the third caution shall disqualify the offender.

On the last 1-8 of the last mile an unfair walker shall be disqualified without previous caution.

## XXII.

## HURDLES.

120 yards hurdle race shall be over ten hurdles, each 3 feet 6 inches high.

The first hurdle shall be placed 15 yards from the scratch, and there shall be ten yards between each hurdle.

Hurdle races of different distances and with different number and height of hurdles may be given.

No record shall be made in a hurdle race unless each of the hurdles, at the time the competitor jumps the same, is standing.

## XXIII.

## JUMPING.

No weights or artificial aid will be allowed in any jumping contest except by special agreement or announcement.

When weights are allowed, there shall be no restriction as to size, shape, or material.

## XXIV.

## RUNNING HIGH JUMP AND POLE LEAPING.

The height of the bar at starting and at each successive elevation, shall be determined by the measurers.

Three trials allowed at each height. Each competitor shall make one attempt in the order of his name on the programme; then those that have failed, if any, shall have a second trial in regular order, and those failing on this trial shall then take their final trial.

Displacing the bar counts as a "try." A line shall be drawn six feet in front of the pole and parallel therewith in pole leaping, and three feet in front of the bar and parallel therewith in high jumping, and running over such line, to be known as the balk line, in an attempt, shall count as a balk.

Three balks shall count as a "try." A competitor may omit his trials at any height, but if he fail at the next height, he shall not be allowed to go back and try the height which he omitted.

Each competitor shall be credited with the best of all his jumps or leaps.

## XXV.

## STANDING HIGH JUMP.

The competitors may stand as they please, but must jump from the first spring.

The height of the bar at starting and at each successive elevation, shall be determined by the measurers.

Three trials allowed at each height. Each competitor shall make one attempt in the order of his name on the programme; then those who have failed, if any, shall have a second trial in regular order, and those failing on this trial shall then take their final trial.

Displacing the bar and nothing else, counts as a "try."

A competitor may omit his trials at any height, but if he fail at the next height, he shall not be allowed to go back and try the height which he omitted.

## XXVI.

## RUNNING BROAD JUMP.

The competitors shall have unlimited run, but must take off from or behind the scratch.

The scratch line shall be a joist five inches wide, the ground in front of which shall be removed to the depth of three and the width of six inches.

Running over the scratch in an attempt shall be "no jump," but shall count as a "try."

Each competitor allowed three trials, and the best three men have three more trials each.

Each competitor shall be credited with the best of all his jumps.

The measurement shall be from the outer edge of the joist to the nearest break of the ground made by any part of his person.

A line shall be drawn six feet in front of the scratch line, and stepping over such line in an attempt shall count as a balk.

Three balks shall count as a "try."

## XXVII.

## STANDING BROAD JUMP.

Competitors must jump from the first spring.

Stepping any part of the foot over the scratch in an attempt shall be "no jump," but shall count as a "try."

Each competitor allowed three trials, and the best three men have three more trials each.

Each competitor shall be credited with the best of all his jumps.

The measurement shall be from the scratch line in front of the jumper's feet to the nearest break of the ground made by any part of his person.

## XXVIII.

## PUTTING THE SHOT.

The shot shall be a solid iron sphere weighing 16 lbs.

It shall be put from the shoulder with one hand, from between two parallel lines 7 feet apart.

Touching the ground outside either line with any part of the person, before the shot alights, shall make the attempt "no put," which counts as a "try."

Each competitor allowed three trials, and the best three men have three more trials each.

Each competitor shall be credited with the best of all his puts.

The measurement shall be from the nearest break of the ground made by the ball, perpendicularly to the scratch line, extended if necessary to meet this perpendicular.

## XXIX.

## THROWING THE HAMMER.

The hammer head shall be an iron sphere weighing sixteen pounds, the handle shall be of hickory wood, and the length of hammer and handle over all shall be 3 feet 5 inches.

Touching the ground in front of the scratch with any portion of the person before the hammer alights shall make the attempt "no throw," which counts as a "try."

Letting go of the hammer in an attempt counts as a "try." Each competitor allowed three trials, and the best three men have three more trials each. Each competitor shall be credited with the best of all his throws.

If the head strike first the measurement shall be from the nearest break of the ground made by it.

If the handle strike first, one length of the handle shall be allowed from the mark made by the end of the handle towards the mark made by the head of the hammer, and the measurement shall be from this point.

The scratch line shall be six feet long at and behind which the competitors shall stand. Said scratch line shall be extended on both sides twenty-seven feet and lines at right angles to the scratch line thus extended and at each end thereof shall be drawn out indefinitely and shall be known as foul lines.

The measurement shall be to the scratch line half way between the thrower's feet on any throw made inside of the foul lines.

## XXX.

## THROWING FIFTY-SIX POUND WEIGHT.

The weight shall be of solid iron and round in shape and shall measure with the handle sixteen inches in length and the whole shall weigh fifty-six pounds.

The competitor shall stand at and behind the scratch, facing as he please, grasping the weight by the handle, and shall throw it with one hand.

Touching the ground in front of the scratch with any portion of the person before the weight alights, shall make the attempt "no throw," which counts as a "try."

Letting go of the weight in an attempt shall count as a "try."

Each competitor allowed three trials, and

the best three men have three more trials each.

Each competitor shall be credited with the best of all his throws.

The measurement shall be from the scratch line in front of the thrower's foot, nearest the scratch, line to the nearest break of the ground made by the weight, exclusive of handle.

## XXXI.

## TUG OF WAR.

1. The ground shall be loosened to the width of three feet, and to a depth of not less than six inches.

2. The side crease shall be twelve feet from the centre.

3. The mark on the rope must be over the centre crease when the signal is given, and the team hauling that mark over the crease on its own side, shall win.

4. No footing holes shall be made before the start.

5. The contestants shall not wear spikes.

6. The rope shall be one and one-half inches in diameter.

7. Immediately before the contest the captains of all the contesting teams shall draw their numbers.

8. Not less than five minutes shall be allowed each team between heats.

9. Captains shall toss for choice of sides before each pull, but if the same two teams pull more than once during any meeting, they shall change ends at each successive pull.

10. Competitors shall not be allowed to use any belt other than one to protect the body, and no ring, chain or fastening of any kind shall be allowed.

11. With two teams they shall pull best two in three. With three teams, one and two shall pull, then two and three, and three and one.

With four teams, one and two shall pull, then three and four, and the winners pull the final.

With five teams—first round, one and two, three and four, five has a bye; second round, winner of first heat pulls with five, and the winner of this heat pulls the final with the winner of second heat of first round.

With six teams—first round, one and two, three and four, five and six; second round, winner of first and second heats. Winner of this heat pulls the final with winner of third heat, first round.

Where more than six teams are entered, the arrangement of trials shall be on the same principle as in the above example.

12. No man shall be substituted for another who has already pulled in one trial, nor shall any man be allowed to pull with more than one team, in any of the trials for the same prize.

13. A time limit may be made.

14. The weight in tug-of-war shall be:

Feather weight, 125 lbs. and under.

Light weight, 150 lbs. and under.

Middle weight, 175 lbs. and under.

Heavy weight, over 175 lbs.

15. All weights shall be stripped.

## XXXII.

## BICYCLING.

When ordered into a position for a start the men shall mount their machines, and one assistant for each competitor will hold his machine with its front wheel at the mark; at the starting signal the attendants are allowed to push the machine forward, but not to follow it up. In case of a foul resulting in a fall within ten feet of the scratch line the contestants shall be recalled by the Referee and the race started over again.

Riders must pass each other on the outside, and be a clear length of the bicycle in front before taking the inside; the inside man must allow room on the outside for other competitors to pass. Any competitor infringing this rule or who is guilty of foul riding shall be disqualified by the Referee.

In a race without using the handles, competitors must ride with the arms folded, or the hands and arms otherwise kept quiet of the machine. Any competitor touching any part of this machine with his hands or arms will be disqualified.

Competitors may change machines during a race, but must do so without interfering with other competitors.

## XXXIII.

Associate clubs shall have entire charge of the entries of their own members in athletic meetings, provided, always, that no member shall enter, compete, or take part in any event at any athletic meeting, the entries to which event shall not be limited to amateur athletes, or when the event or events shall not be governed by the laws of this association.

This rule, however, shall not prevent this association or its Executive Committee from prohibiting entries to any event or events.

## XXXIV.

No person competing at any meeting or in any event other than those enumerated in Rule 33, shall be allowed to compete at meetings governed by this association or at the championship meeting.

## XXXV.

In all class or limit events, competitors shall not be debarred by reason of having made a better record after the closing of entries for such event.

## XXXVI.

All cases of dispute and any questions that may arise not provided for in these laws, and the interpretation of these laws, shall be referred to the Executive Committee of this association.

XXXVII.  
RECORD RULES.

This association shall from time to time give its approval to all records made in standard games, and when so desired shall in its discretion inquire into and give its approval to all other athletic distances and games.

No record in running, walking or bicycle riding shall be given unless the same shall be timed by at least two official timekeepers or by assistant timekeepers appointed by the Referee.

No record shall be given in the high standing or broad jump, pole leaping, putting the shot, throwing the hammer and 56 lbs. weight unless the same shall be measured by at least two official measurers.

Said timers and measurers, shall be regularly appointed by the Club or Association giving games or by the Referee.

## The Championship Meeting.

The ninth annual championship meeting took place at the Williamsburg grounds, Brooklyn, on Saturday, Sept. 27. Attendance large; competitions very poor indeed. The track was accounted slow.

100 Yard Run—Final heat: M. W. Ford, N. Y. A. C., 1st; Alfred Ing, W. S. A. C., 2nd; S. Derrickson, M. A. C., 3rd; B. W. McIntosh, P. C. C., 0. Weldon was defeated in his heat. A wretched start. Ing got at least 3 yards ahead of the pistol and was only beaten by a few inches. Derrickson and McIntosh were close up. Time, 10 4-5 s.

Seven Mile Walk—E. F. McDonald, W. S. A. C., 56 m. 28 s.; T. M. Buckley, W. A. C., 57 m. 32 2-5 s.

One Mile Run—Percy C. Madeira, Philadelphia, 4 m. 36 4-5 s., C. M. Smith, N. Y. A. C., 2d. Won by two yards. Smith made a plucky struggle.

One Mile Walk—F. P. Murray, W. A. C., 6 m. 54 2-5 s., E. D. Lange, M. A. C., 7 m. 2 s., G. D. Baird, 3d. Won easily.

Two Mile Bicycle—L. P. Hamilton, 6 m. 58 s., William Wait, 7 m. 2 s., A. B. Ritch, 3d. 2200 Yard Run—L. E. Meyers, 24 1-5 s., S. Derrickson second by 2 yards; B. W. McIntosh 3d by a yard.

5 Mile Run—Geo. Stonebridge, W. S. A. C., 27 m. 45 s.; P. D. Skillman, M. A. C., second by five yards.

440 Yard Run—L. E. Myers, 55 4-5 s.; S. Derrickson second by two yards, L. Lee Myers third by one yard. Simply a canter for Myers.

3 Mile Walk—F. P. Murray, 23 m. 15 s.; E. D. Lange, 23 m. 45 s.; G. D. Baird, 24 m. 15 s. A procession.

Five Mile Bicycle Race—L. P. Hamilton, 18 m. 36 s.; William Wait, 18 m. 36 1-5 s. Hamilton won easily.

Half Mile Run—L. E. Meyers, 1st, C. Lee Meyers 2d by 2 yards. Time, 2 m. 9 4-5 s.

Hurdle Race—S. A. Sanford, 1st; J. G. Mason, 2d. A great many struck the hurdles and consequently were put out of their strides. Time, 18 1-5 s.

Throwing 56-lb. Weight—C. A. J. Queckheiner, 26 ft. 3 1/2 in.; F. L. Lambrecht, 23 ft. 9 in.

Running High Jump—J. T. Rhinehart, 5 ft. 8 in.; M. W. Ford, 5 ft. 8 in.

Throwing the Hammer—F. L. Lambrecht, 92 ft. 5 in.; C. A. J. Queckheiner, 92 ft. 2 in.

Pole Vault—H. H. Baxter, 10 ft. 6 in.; J. J. Van Honten, 9 ft. 6 in.

Running Broad Jump—M. W. Ford, 20 ft. 1 1/2 in.; A. A. Jordan, 19 ft. 6 in.

Putting the Shot—F. L. Lambrecht, 39 ft. 10 in.; C. A. J. Queckheiner, 39 ft. 6 3-4 in.

## Myers Coming to California.

The negotiation which have of late been pending between the Olympic Club, of this city, and the Manhattan Club, of New York, whereby Myers was to come to this city and take part in meetings under the auspices of both clubs, are now almost concluded and there is every reason to believe that Myers will arrive in this city in the early part of next month, and that the first meeting will probably take place on Thanksgiving Day. For this arrangement the new Board of the Olympic Club are deserving of every praise, and that it will result in popularizing amateur athletics there is little doubt. Thousands of people will attend these meetings with Myers as the attraction, and a great many of them will find out the splendid manner in which amateur contests are conducted in this city, for the first time. It is to be hoped that all our athletes will get out and train conscientiously in order to show to their best advantage during the visit of the phenomenal athlete, L. E. Myers.

"Papa, what do professional pedestrians walk for?" "For more, my son." "Isn't a man's walk called his gait?" "Yes, I believe so." "Then that's why they call it gait money, isn't it?" Papa maintains a dignified silence, while the small boy watches the cat make a hundred laps a minute from the pitcher of milk on the breakfast table.

The 100 yards Amateur Swimming Championship of England was decided at the Lambeth Baths, Sept. 15th, and resulted in a victory for J. L. Mayer, in 1 m. 11 1-5 e., which is only 1-5 s. slower than the best previous record.

G. D. Baird was re-elected to fill the official handicapped position for the ensuing year.

The new gymnasium of the Y. M. C. A., of Portland, was thrown open to the young men of that city, last Monday evening. The Rev. G. L. Lee addressed the audience on the advantages of physical culture. During the evening musical selections were rendered by Prof. E. A. Smith.

The attention of our readers is called to the rules and regulations governing amateur athletics, which are published in another column of this paper. We are under obligation to W. C. Brown, of the Olympic Club, for the copy of the rules.

On Sept. 26th, George ran 1,000 yards in 2 m. 16 s., which best his own record 1-5 second. Meyer's record for the distance is 2 m. 13 s. The track was not in good condition, being soft.

There were no less than 168 entries for a Sheffield Handicap, which was to have taken place at Sydney, N. S. W., on the 16th, 17th and 18th of Sept. Ninety "peds" paid their acceptance money. Malone is on the scratch.

The presentation of medals won at the Merion Club games, will take place next Friday evening, at Saratoga Hall. A fine programme has been arranged for the occasion.

The half-mile swimming match between Fleming and Armstrong, resulted in a victory for the former, but, strange to relate, the judge declared the race a dead heat.

The Olympic A. C. of San Francisco, the Montreal A. A. A., and the Long Island A. C., have resigned from the National Association.

At the Canadian Championship games, Sept. 27th, the hundred yard run was won by J. T. Belcher, in 10 3-8 s., and the 220 yards in 24 1/2 s.

## FISH.

## What Is It?

A party of gentlemen a week ago last Sunday met with a most peculiar experience at Ross Landing. They hooked altogether seven fish but lost every one. Mr. Lindsay played with one no less than one hour and three-quarters only to lose him. Several gentlemen who have since been over have met with exactly the same experience, hooking but invariably losing them. Mr. Dunne was over last week with the heaviest kind of tackle but the first grab broke both rod and line, (the rod was a very heavy bamboo one). Mr. Conness tried his luck with the same success (or rather non-success), as his predecessors. A prominent member of the Academy of Science went out last Wednesday only to hook one and lose it again. He also had a very heavy drop line tied to a stake driven deep in the ground and while he was attending to the fish on the other rod, one of these unknown fish pulled the stake clear out of the ground, besides breaking the hook. The all-absorbing question is what kind of fish is this that has played so much havoc with the peace of mind of so many disciples of Isaac Walton? A great many incline to the belief that they are salmon trout, while a number more say they are either sturgeon or bass. The fish, whatever kind they may be, are very heavy, weighing all the way from 30 to 60 lbs. They have been hooked with all kinds of tackle and it appears strange that no one has yet accomplished the feat of landing one and thus solving the mystery. We shall thoroughly inquire into this strange case throughout the week, and will give our readers the result of our investigations.

The N. Y. Sun says: "A prominent member of the Rod and Reel Association, whose name is withheld from motives of pure charity, went fishing the other day. He caught nothing, and started home with a heavy heart. He dreaded the jeers of his friends, and especially the gentle taps of his better half; but, recollecting the power of wealth, he proceeded straight to Fulton Market, where he purchased a large bass, which he carried home in triumph. Next day that bass appeared against him at table. It was high, very high. The evidence was overwhelming. The guilty angler looked at his wife just as a criminal looks at the judge that is about to pass sentence upon him. With a queasily air she motioned to a waiter and waved the venerable fish out of sight. Then the culprit received his sentence. It was as follows: 'My dear, when you go fishing again I would advise you to examine your fish before you catch it.'"

Captain Lapham launched his schooner last Tuesday, near Gleubrook, Lake Tahoe, and named it Lilly Van, for Miss Lillie Van Sickle, a miss of 10 years, a daughter of Peter Van Sickle, of Carson Valley. It is seventy-five feet long and twenty feet wide, and is provided with a fishing room—a room through which the line passes under the vessel, instead of being thrown over the side—parlor, dining-room, storeroom, and private saloons. The schooner will not be confined to regular rules, but will go at will for fishing parties at any point on the lake.—*Virginia Enterprise*.

*Truckee Republican*: "Mike Leuhau brought in ten fine trout from Donner Lake yesterday, that he caught while trolling. They were larger than the average caught there, and formed a satisfactory day's sport. The chancee are in favor of a good haul any day now."

A trout weighing 14 lb. 1 oz., and measuring 30 in. in length, with a girth of no less than 21 in., has just been taken in the Avon, at Salisbury. This is the largest fish ever recollect to have been taken in that river.

A party of gentlemen were out fishing last Sunday below the Tabor drawbridge. Their catch only amounted to four salmon trout, the largest weighing two pounds. It is rather early in the season for this kind of fishing.

One W. H. Marlatt, while fishing on the Gila with giant powder, accidentally had his hand taken off by the explosion.—*Kingston Clipper*.

It is reported that a gentleman a short time since caught a mackerel off the bridge at Fort Point. If the report is correct, this is probably the first mackerel caught in the bay.

Flounders are biting again at Saucelito bridge. A gentleman caught one on Sunday weighing four pounds. Smelt fishing is also reported good at the same point.

A few gentlemen of this city have leased Lake Espinosa, near Carville, and will shortly stock it with trout.

## KENNEL.

## National Bench Show Association.

There was quite an enthusiastic meeting at the rooms of Philadelphia Kennel Club, in response to the call for the formation of a National Bench Show Association, where forty gentlemen represented different sections of the country. Mr. Elliot Smith, who called the meeting to order, was chosen temporary chairman, and Mr. Samuel G. Dixon, secretary. After a lengthy discussion as to the desirability of a national association and its object, the delegates from the several clubs resolved themselves into a National Association and the chair named Messrs. C. M. Munnhall, G. N. Appold, and S. G. Dixon a committee on credentials. After consultation they reported the list of clubs represented, with the names of their delegates or proxies:

Illinois Kennel Club, Chicago, Ill.—Major J. M. Taylor.

St. Louis Gnn Club, St. Louis, Mo.—Mr. J. W. Minson.

Philadelphia Kennel Club, Philadelphia, Pa.—Mr. Samuel G. Dixon.

Cincinnati Sportsman's Association, Cincinnati, O.—Major J. M. Taylor.

Westminster Kennel Club, New York—Mr. Elliot Smith.

Montreal Kennel Club—Mr. James Watson.

New England Kennel Club, Boston, Mass.—Mr. J. A. Nickerson.

New Haven Kennel Club, New Haven, Ct.—Mr. G. Edward Osborn.

Louisville Kennel Club, Louisville, Ky.—Major J. M. Taylor.

Baltimore Bench Show Association, Baltimore, Md.—Mr. George Norbury Appold.

Cleveland Bench Show Association—Mr. C. M. Munnhall.

New Brunswick Poultry and Pet Stock Association, St. John, N. B.—Mr. Elliot Smith.

London Kennel Club, London, Out.—Mr. James Watson.

The report was accepted and Mr. Smith was made permanent chairman. It was then voted that a committee of five, of which the chairman should be one, should be appointed to draft a resolution and by-laws, to be submitted to the Association at a meeting to be held in New York, on Oct. 22d, at 8 p. m., at which time officers will be chosen. Following is the committee: Mr. Elliot Smith, New York; Major J. M. Taylor, Lexington, Ky.; Gen. W. S. Shattuck, Cincinnati, O.; Mr. James A. Nickerson, Boston, Mass., and Mr. Samuel G. Dixon, Philadelphia, Pa. The meeting then adjourned with a vote of thanks to the Philadelphia Kennel Club for the courtesies extended.—*Forest and Stream*.

At the regular meeting of the Pacific Coast Conorsing Club, held Thursday evening, the following new members were elected: Harry Moore, Martinez; J. C. Talbot, Napa; M. McDonald, Port Costa; Thos. Ford, W. A. Biddeman, James McCarthy and D. Sexton, San Francisco. The Club leaves for Merced on the 11th day of November to hold their Fall Meeting.

The bench show of dogs, to be held in conjunction with the World's Exhibition at New Orleans, will begin January 10th., 1885. Mr. Charles Lincoln will be the superintendent.

The third volume of the Greyhound Stud Book has just been issued in England.

Wire-haired fox terriers have become the rage in England.

Perhaps the finest colt in Big Valley is owned by T. M. Harvey of this town. The colt was dropped on April 8th, and therefore is a few days over five months old; stands 13 hands 2 1/2 inches, and weighs 590. She is symmetrical and in perfect proportion. The colt was sired by Cooper's Juanito Almont, an illustrious son of Tiltou Almont.—*Adin Argus*.

During the late fair at Medina, N. Y., the four-year-old colt Oliver K., by King Wilkes, trotted a trial mile in 2:22 1/2. The dam of Oliver K. was by Virgilius, a thoroughbred descendant of Diomed.

The success of The Lambkin in the recent Doncaster St. Leger will strengthen the popular impression that the male line of Toubek stone, crossed upon mares of the Melbourne male line, is the keystone to success in the breeding of racehorses. The Lambkin is a bay colt, by Camballo, from Mint Sauce, by Yonn; Melbourne; 2d dam Sycee, by Marysas; 3d dam Rose of Kent, by Kingston; 4th dam England's Beauty, by Birdcatcher. His sire Camballo, was a horse of amazing beauty, who won the Two Thousand Guineas in 1875. He was by Cambuscan (son of Newminster), from Little Lady, by Orlando. Hence it follows that The Lambkin is a most intensely inbred horse, tracing direct to Touchstone through all his lines. The maternal line of The Lambkin is a very strong one. Matador, recently owned by Mr. Belmont, of the Nursery Stud, descended from this family, his dam being a daughter of England's Beauty, while Athlete, the stallion now doing service at the Kinloch Stud (Mr. J. Lucas Turner's), in Missonri, is out of Rose of Kent, the great grandam of The Lambkin.

It is asserted on the authority of persons who have recently visited Mariette Lake, that the prodigious increase of trout in its waters has overstocked the lake. At times they can be seen massing themselves in the small streams which are tributary to the lake, and on these occasions they have been crowded out on the grass growing on the borders of the streams. Thousands could be thrown out with a pitchfork. A piece of bark thrown into the lake will cause a dozen or more trout to leap for it. The coyotes have caught the knack of fishing, and sit by the shore watching for leaves to fall into the water. The instant a leaf touches the water the fish rise, and like a fish the coyote bounds into the thick of the fish, and is certain to bring out one or two in his mouth. The coyotes are shot whenever any of the lumbermen see them, but by stealing up in the underbrush they manage to escape observation.—*Carson Appeal*.

Mr. W. H. Wilson, of Cynthiana, Ky., who lately lost his stables and several valuable horses by fire, has lately lost two more valuable horses, which escaped from their paddock and were killed by a freight train.

William H. Vanderbilt's account with Mand S. shows a profit of \$19,000, nearly 95 per cent., leaving out the expense of keeping Mand and her driver.

Mand S. is to have a new snky, which when completed will weigh but 3 1/2 pounds. That of Jay-Eye-See weighs 39 1/2 pounds.

BAY DISTRICT  
AssociationRaces! Races!  
FALL MEETING.

1884. — 1884.

## Entries for Trotting Season:

WEDNESDAY, Nov. 5th.

Purse of \$1,000, for the following named four-year-olds and under: Jim Mulvena, Ha Ha, Madaline, Baby Mine, Regina, Thapsin, Lucille, Center, Autovolo, Happy Jim, Voucher, and Twinkle.

Every race five or more must enter, and three or more horses start.

The Association reserves the right to hold a less number than five to fill, by withholding a proportionate amount of the purse.

Entries close with the Secretary,

THURSDAY, Oct. 30th, 1884.

T. W. HINCHMAN, Secretary.

1435 California Street.

The fact that Lord Falmouth appeared at the Doncaster sales, and purchased the broodmare Darnaway, as well as several promising yearlings, has been generally taken up in England, and made to serve as the subject of articles congratulating the turf upon his return to racing. It has been frequently hinted that Lord Falmouth's retirement resulted from a hastily-formed resolution, conceived in a fit of pique at Galliard's failure in the Derby, in which he thought Archer might have finished out more determinedly.

Jimmy Roe continues to be on the most friendly terms with the Dywys, and with McLaughlin, but it is not likely that he will resume his connection with the stable, as the best informed say that he will go into the business of breeding and racing. From the fact that Miss Woodford has been under treatment ever since Roe resigned, it would seem that the trainer was right.

AMUSEMENTS.

Mechanics' Pavilion  
SKATING RINK  
Larkin Street near Market.

JERSEYS and GUERNSEYS,

Registered in the A. J. C. C. and A. G. C. C., of New York, the only standard register.

Jersey Belle of Scituate that made 25 lbs 4 1-2 ozs. of butter in one week.

A grandson of above cow is now in use in the Yerba Buena. This herd won all the herd prizes for 1882. Since then have been added young animals from Mr. Pierce's valuable herds East. He now has Jersey Belle of Scituate, Comassie, Mary Ann of St. Lambert, Silver Cloud and Eurotas strains; also large selections from the Islands, without regard to cost.

He has interest in Eastern herds of 200, at the head of which stand only living son of Jersey Belle, Romeo de Bonair, (87 1/2 per cent. Mary Ann's blood), and Pierston, the best show bull in America. These bulls are valued at \$10,000 each.

HENRY PIERCE, San Francisco.

IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

The above cut represents the body-piece, the patent also covering the improvements in the hood. The following are the claims granted:

1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
2. The blanket or covering A, having the flap C, and the extensions B, to fit the fore and hind legs of the animal, front fastenings E, G, and the permanent straps or bands E, substantially as and for the purpose herein described.
3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings F, O, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.
4. The blanket A and hood J in combination with the elastic connecting-strip I, substantially as described and for the purpose set forth.
5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as herein described.
6. The improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands fixed to it to secure it around the body, whereby the use of loose surcingles is avoided, substantially as herein described.

## ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.  
**B. J. TREACY, PROPRIETOR.**

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock he- longing to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks, At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address  
**2 1751 B. J. TREACY, Lexington, Ky.**

## Embryo Stakes.

NOTICE TO SUBSCRIBERS.  
IN THE EMBRYO STAKES, FOR FOALS OF 1882, to be trotted on Saturday, Nov. 1st, 1884, a declaration fee of \$10 for each (not starting) nomination will be due on the 1st day of September. If the above named declaration fee of \$10 be not then paid, a forfeit of \$25 on each nomination will become due on the 23rd day of October following, and in case of failure to pay the forfeit on that day the whole amount of the Stake, (\$100), for each nomination, will be held against the subscriber.

# The Washington Park Club, CHICAGO, ILL.

Announce the following Stakes, to close Oct. 15th, 1884, and to be run at their second meeting, beginning the last week in June, and ending the second Saturday in July, 1885:—

## \$5,000. The American Derby. \$5,000.

**SWEEPSTAKES** for three-year-olds (foals of 1882), at \$200 each, b. f.; or only \$20 if declared out on or before Feb. 1st, 1885; or \$30, April 1st, 1885; or \$40, if on May 15th, 1885. All declarations void unless accompanied with the money; with \$5,000 added, the second to receive \$750, and the third \$250, out of the stakes. Winner of any three-year-old stake race of the value of \$1,000 to carry 3 lbs.; of \$1,500, 5 lbs.; of three or more three-year-old stake races of any value, 7 lbs. extra. Maidens allowed 5 lbs. To be run on the first day of the meeting. One mile and a half.

### THE LAKE SIDE STAKE.

A Sweepstake for fillies two years old (foals of 1883); \$50 entrance, p. p.; or only \$10 if declared out on or before February 1st; or \$15 by April 1st; or \$20, if on or before May 15th, 1885. All declarations void, unless accompanied with the money; with \$1,000 added, the second to receive \$200, and the third \$100 out of the stake. Winners of any stake race of the value of \$750 to carry 3 lbs.; of \$1,200, 5 lbs.; of three or more stakes of any value, 10 lbs. extra. Five furlongs.

### THE KENWOOD STAKE.

A Sweepstake for colts two years old (foals of 1883); \$50 entrance, p. p.; or only \$10 if declared out on or before February 1st; or \$15 by April 1st; or \$20 if on May 15th, 1885. All declarations void unless accompanied with the money; with \$1,000 added, the second to receive \$200, and the third, \$100 out of the stake. Winners of any stake race of the value of \$750 to carry 3 lbs.; of \$1,200, 5 lbs.; of three or more stakes of any value, 10 lbs. extra. Five furlongs.

### THE HYDE PARK STAKE.

A Sweepstake for two-year-olds (foals of 1883); \$50 entrance, p. p.; or only \$10 if declared out on or before February 1st, or \$15 by April 1st, or \$25 on May 15th, 1885. All declarations void unless accompanied with the money; with \$1,200 added, the second to receive \$200, and the third, \$100 out of the stake. Winners of any stake race of the value of \$1,000, to carry 3 lbs.; of \$1,500, 5 lbs.; of three or more stakes of any value, 10 lbs. extra. Three-quarters of a mile.

In addition to the above, other Stakes, including the Washington Park Cup, the Great Western and Oakwood Handicaps, will be advertised in due time, to close January 15th, 1885. A Programme will be arranged for ten or more days' racing, and five or more races will be given each day. A Programme will also be arranged for a Fall Meeting to be held early in September, for which Stakes will be advertised, to close in March, 1885.

Please observe that in the above stakes, declarations are permitted for a small forfeit. Turfmen failing to receive entry blanks, can obtain them by applying to the Secretary. Nominations and all communications to be addressed to the Secretary, Palmer House, Chicago, Ill.

## DIETZ'S PATENT

**CHECK HOOK.**  
Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check-Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook.  
Orders sent to  
**A. C. DIETZ,**  
No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

IMPROVED  
Blind Bridle & Winkers  
FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.  
Having thus described my invention, what I claim as new, and desire to secure by letters patent, is:  
1. The part D, supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially, as herein described.  
2. In a bridle, in combination with the extensions D, the curved blinds F, secured to such extensions, and as shaped, to give full freedom and ventilation to the eye while circumscribing the vision, substantially as herein described.  
3. In a bridle, and in combination with the extensions D, blinds F, and side straps A, the screw, nut and washer E, to secure the blind and allow it to be set, substantially as herein described.  
4. In a bridle, and in combination with the checkpieces D and blinds F, as shown, the straps or bands G and H, connecting the branches or extensions above and below the eyes, and having the adjusting slides or buckles, substantially as an I for the purpose herein described.  
5. In a bridle, and in combination with the blinds F, supported and pivoted to the bridle so as to be movable about the point of support, the adjustable front straps or bands G and H, and the rear band I, and the throatlatch or lash connected with the blinds, and adjustable, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood.  
It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision. By throwing the lower portion of the blind up something of the same effect on the action follows as is induced by toe-weights. This is especially the case when young colts are the pupils, teaching them to bend the knee without the strain of weights on the feet.  
For bridles of all descriptions apply to

TO  
Sportsmen & Pleasure-Seekers.  
THE  
SOUTHERN PACIFIC R. R. CO.  
RESPECTFULLY CALLS ATTENTION TO THE  
SUPERIOR FACILITIES  
AFFORDED BY ITS LINE FOR REACHING  
A with speed and comfort the best places in the State for  
Sea Bathing, Shooting and Fishing.  
TRAINS LEAVE SAN FRANCISCO DAILY FOR  
MONTEREY,  
THE MOST CHARMING  
Summer and Winter Resort of the  
Pacific Coast.

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several stores in the vicinity of Monterey, and the best of shooting may be had in season.  
THE BAY OF MONTEREY  
Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES  
AT THE  
"HOTEL DEL MONTE,"  
ARE UNSURPASSED,  
having a MAGNIFICENT BEACH of pure white sand for surf bathing. The BATH-HOUSE contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.  
THE FAVORITE ROUTE to those well-known Watering Places,  
APTOS, SOQUEL AND SANTA CRUZ  
IS VIA THE  
Southern Pacific Railroad,  
(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, San Geronimo, Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably  
Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.  
Lakes PILGRIMOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.  
These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.  
Sportsmen and others presenting Passage Tickets will be entitled to  
FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.  
In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.  
TICKET OFFICES.—Passenger Depot, Townsend street, Valencia Station, and No. 613 Market St., Grand Hotel.

## ATHLETICS.

### Coast Records.

We have compiled after a great amount of labor and research the following list of performances, which we think are the best that have been made on the Coast. Athletic sports a few years back were reported in such an unintelligible manner that it is very hard to arrive at satisfactory conclusions concerning many events, so we would be greatly obliged if any of our readers would notify us of any properly authenticated performance they may know of that is not given in this list. A great many of the performances given in the list are very mediocre, principally owing to the fact that many kinds of the contests are now omitted from the programmes, consequently a great many of the present athletes only lack opportunity in order to wipe out many of the present Coast records. We have received valuable assistance from C. B. Hill, Secretary of the Merion C. C., in preparing this list:

75 Yards—7 4-5 seconds, J. Masterson, O. A. C. games, Oakland Grounds, Nov. 30th, 1883.

100 Yards—10 seconds, R. S. Haley, O. A. C. games, Oakland Grounds, Sept. 23d, 1882.

[The watches of the time-keepers in this race showed 9 3/4, 9 4-5, and 10s. respectively. R. B. Jones is credited with having run 100 yards in 10s., at Placerville, Sept. 8th, 1881, but as the track was not properly measured the time made in that race cannot go on record. W. C. Lubbock was also timed in running a hundred yards in 10s., at the Olympic games, Nov. 30th, 1883, but through the fault of the starter Lubbock got at least four yards ahead of the pistol.]

200 Yards—20 1/2 seconds, R. S. Haley, O. A. C. games, Bay District Race Track, Nov. 30th, 1881.

250 Yards—23 seconds, W. R. Stewart, O. A. C. games, Oakland Grounds, July 4th, 1883.

[A. E. Verrinder, in a match race, ran 250 yards in 27 4-5s., with a flying start, at the O. A. C. games, Nov. 30th, 1883.]

300 Yards—32 1/2 seconds, R. S. Haley.

350 Yards—33 1/2 seconds, R. S. Haley.

440 yards—50 3-5 seconds, J. T. Belcher, Oct. 9th, 1880.

1 Mile—4 minutes 45 seconds, Thos. Jennings, M. C. C. games, Stockton Race Track, July 4th, 1884.

2 Miles—10 minutes 46 seconds, R. Locke, O. A. C. games, Oakland, May 30th, 1884.

Pole Vault—9 feet 1 1/2 inches, C. H. Slater, O. A. C. games, Oakland Grounds, Nov. 30th, 1883.

Kicking Football—156 1/2 feet, F. B. Petersen, M. C. C. games, Feb. 22d, 1883.

One Mile Walk—7m. 45s., J. B. Benjamin, O. A. C. games, Oakland grounds, May 30th, 1884.

One-half Mile Bicycle—1m. 29 1/2s., F. R. Cook, O. A. C. games, Oakland grounds, May 30th, 1884.

Mile Bicycle—3m. 15 1/2s., H. E. Eggers, Garfield Monument sports, Bay District Race Track, Nov. 30th, 1881.

Five Miles—17m., H. C. Finkler, O. A. C. games, Oakland grounds, May 30th, 1884.

Standing High Jump—4ft. 2 1/2 in., H. Powers, University games, Nov. 17th, 1883.

Running Wide Jump—19ft. 10 1/2 in., R. S. Haley, May 30th 1882.

Running High Jump—5 feet 5 inches, J. T. McGillivray, University games.

120 yards Hurdle—19 3/4s., R. B. Jones, M. C. C. games, Oakland grounds, Dec. 8th, 1883.

Standing Wide Jump—W. A. C. Lawton, 12ft. 6 1/2 in., using 22 lb. dumb bells, May 13th, 1876.

### The New York Athletic Club Games.

The invitation games of the N. Y. A. C. took place on Saturday afternoon, Oct. 4th. Attendance large. Weather splendid. Competitions spirited. Queckberner broke the record at hammer throwing, while Ford was returned in winning a heat of the hundred in 10s through getting ahead of the pistol. Result:

One Hundred Yard Run—W. H. Cammeyer, W. A. C., 8 1/2 yds., 1st; L. P. Smith, W. A. C., 5 yds., 2d. Time, 9 4-5s.

Throwing the Hammer—H. H. Baxter, N. Y. A. C., threw 16 ft. 10 in., which included his handicap of 25 ft.; C. A. J. Queckberner, scratch 96 ft. 1 1/2 in., 2d. In an exhibition throw immediately afterwards Queckberner threw 93 ft. 8 in.

Half Mile Run—F. A. Gilmore, W. A. C., 37 yds., 1st; F. Cunningham, Brooklyn, 65 yds., 2d. Myers started from the scratch. Time, 1m 56s.

One Hundred Yard Run, club, Travers medal—H. E.

Tonssaint, 11 yds., first, in 10 1-5s.; M. W. Ford, scratch, second.

Hurdle Race, 220 yards—First heat: C. F. Bostwick, Crescent A. C., 14 yds., first, in 27 3-5s. Second heat: F. R. Halstead, Williamsburg A. C., 22 yds., first, in 29 3-5s. Final heat: J. J. Bioren, Eureka A. C., 15 yds., first, in 27 3-5s.; Bostwick second.

Quarter-Mile Run, club, Oelrichs bronze—H. E. Tonssaint, 30 yds., first, in 54 4-5s.; T. H. Romaine, 35 yds., second.

One-Mile Walk—Frank P. Murray, Williamsburg A. C., scratch, first, in 6m. 45s.; Ed. Lang, Manhattan A. C., 15s., second; easily beaten.

Quarter-Mile Run—William Halpin, American A. C., 35 yds., first, in 49 2-5s.; C. S. Basse, Pastime A. C., 45 yds., second.

Putting the Shot—C. W. Fowler Yonkers, allowed 6 ft., first, 41 ft., including allowance; C. A. J. Queckberner, N. Y. A. C., scratch, second, 40 ft. 11 in.

One-Mile Run, club, Atlanta Prize—E. M. Yeomans, scratch, first, in 4m. 56 2-5s.

Bicycle Race, two miles—E. A. Hoffman, Jr., N. Y. A. C., 175 yds., first, in 6m. 32 2-5s.; J. W. Powers, Jr., 150 yds., second.

Running Long Jump—D. Campbell, American A. C., allowed 3 ft. 6 in., first, 19 ft. 2 in., including handicap; S. Russell, Jr., Williamsburg A. C., 3 ft. 6 in., second 18 ft. 6 in.

One-Mile Run—George Y. Gilbert, Orion R. and A. C., 70 yds., first, in 4m. 37 4-5s.; R. Turner, Northside A. C., 50 yds., second.

Obstacle Race, one-fifth mile—W. M. Hoffman, Columbia College, first, in 1m. 9 1-5s.; C. M. Smith, N. Y. A. C., second.

### The Central Park.

There was great rejoicing among the athletes when it became known that the vacant lot on the corner of Market and Eighth streets was to be converted into an athletic ground. San Francisco has less facilities for indulging in out-door exercise than probably any city of importance in America. And yet there are not four cities of America that can boast of more followers of legitimate pastimes. Almost everyone will admit that with a properly conducted ground for athletic games, conveniently situated, there would be a boom in sports of all descriptions, unknown on this coast. We would see football clubs springing up in all directions, and there is every reason to believe that this game would lead all others, as it is the most interesting to the spectator. That excellent game, Lacrosse, would be revived. Cricketers would gain many new players, and the clubs would then have every opportunity to develop their young talent—a very necessary procedure. Athletics would advance in popularity. Records would be made that would bear favorable comparison with the Eastern ones. Scores of bicyclists would join the racing path. In a few short seasons we would be able to boast of more and better athletes than any other city in the Union except New York. Money would flow in the treasury of the city and all would be satisfied.

But the managers do not intend to fix up an athletic ground in accordance with the popular desire. We have been told that a six-lap track will be put down. Now all those connected with athletic sports know very well that a six-lap track is not the right kind of a track to hold an important athletic meeting on. The man at the pole has such a decided advantage that the best man will at times be shut out of the race and more particularly does this refer to the bicyclist. Again we understand that this track will be so arranged as to curtail the very limited space in the centre of the ground to a considerable extent. This will practically shut out cricket, football, and Lacrosse. If the management of Central Park do not alter their present plans they certainly cannot hope for the support of athletes, who are always willing to pay for their amusement, and without which support it is extremely problematical whether the grounds will ever repay the money invested. In conclusion we would strongly urge the management of the Central Park to put down a much larger track, even if it should crowd outside arrangement, and leave as much space in the centre of the ground as possible. If the management of Central Park do not alter their present plans, it will be absolutely necessary for some organization of this city to secure a ground which shall be constructed so as to contain the facilities for holding all kind of sports thereon. We cannot quite understand why the management of Central Park, after having secured the finest location in the city, will not fix up the ground so as to suit all classes of sportsmen.

At the Convention of the athletic clubs last Friday evening the following clubs were represented: Olyurpic by C. L. Ebner and V. C. Driffield; Merion by R. Gibson and A. B. Tennent; Nemean by Morrison and W. E. Nacbtel; Bay City Wheelman by F. R. Cook and George Day; Acme by A. M. Campbell and A. Scanlan; Brooklyn by T. D. Carrol and J. C. Downey. The Pacific Coast Amateur Athletic Association was then organized by the election of the following officers: President, C. L. Ebner; Vice-President, J. C. Downey; Treasurer, V. C. Duffield; Secretary, R. Gibson; Directors, A. B. Tennent, F. R. Cook, George Day, T. D. Carrol and A. M. Campbell.

The University games were announced to take place this afternoon at their grounds, Berkeley. But owing to late rains it is more than likely that the games will be postponed to next Saturday as it takes a considerable amount of sun to dry their mud track. The open events are, 120 yards, 220 yards, running high jump and running long jump.

Last week's issue contains the latest code of the Law of athletics, as adopted by the National Association of Amateur Athletes of America. No athlete can very well afford to be without that copy of the BREEDER AND SPORTSMAN.

A great many runners started in training last Saturday. Some good work was done, particularly by the distance men.

## FOOTBALL.

### Rugby Union Footballers.

At a meeting of football players, with G. V. Fittock in the chair, held at Mr. Creighton's office, 606 Montgomery street, on Thursday evening, the "Fireflies Football Club was organized. The uniform adopted is quite gorgeous, viz: Black cap, with red tassel, scarlet jersey, scarlet stockings and white knickerbockers. The initiation fee was fixed at \$1, with a monthly subscription of fifty cents during the season. Quite a number of the old Wanderer and Phoenix players have joined the new club. The team will shortly go into hard work preparatory to meeting the University, who it will be remembered proved so formidable last year. A meeting of the new club is called for half-past four on Monday afternoon, at Mr. Creighton's office. All Rugby Union players are cordially invited to attend.

## BICYCLING.

### Active Wheelmen.

The excursion of the Bay City Wheelmen to Santa Rosa, last week, was a success in every way. The following riders participated: Lo-ey, J. Nash, Ed. Mohrig, F. R. Cook, W. C. Hull, S. Booth, Kelly, W. Day, W. Meeker, C. Plum, Sbelton, Lawton, H. Honsewort, F. Harriman, W. Munro, W. Slack, Mellendy, Ezekiel, Gambetts, Ed. Slack and Melton. Sunday morning was occupied in wheeling around the pretty town, and the rain in the afternoon unfortunately prevented the anticipated journey through the surrounding country. A run to Hayward was arranged for to-morrow, but the late rain will probably interfere with the programme.

Geo. Webber, of Smithville, N. J., won the 100-mile road championship of the Boston Bicycle Club on Saturday last, in 9h. 20 m.; J. E. Wood, of Beverly, second. Time, 9h. 41 1/2 m.

We have not heard from the once active San Francisco Club for a considerable time. Why this lethargy?

Mr. E. J. Baldwin, of California, seems determined to open "an aggressive campaign" in 1885, and is busily casting about among the trainers and jockeys with a view to securing the best to handle and ride for the "black and red Maltese cross" of Santa Anita. At Sheepshead Bay, Mr. Baldwin endeavored to engage James Lee, who was disinclined to go so far from home. He has since sought Hughes as a jockey, but the latter prefers to stay East. Tuesday he offered Mr. J. B. Pryor, Jr., \$3,500 per annum, and Garrison \$2,500 to train and ride for him, but the (Clipsiana trainer and jockey declined the offer and remained loyal to the "orange and purple," endeared to them by Goano's victories.—N. Y. Spirit.

The telegraph announces that Mr. Baldwin has given up his intention to run at Washington and Baltimore, and that horses were to start for home last Wednesday.

## STABLE AND PADDOCK.

### Unshod Hoofs.

This question is being so extensively agitated both abroad and in this country, that we return to it, for the purpose of noting the more recent claims of its advocates.

Hitherto it has been asserted that the system of bare hoofs worked only to entire satisfaction in cases where the hoofs had not been made tender or injured in shape by paring and rasping. More recently, it has been asserted that all hoofs, whether formerly shod or not, if given sufficient time on soft or pasture land to recover their normal strength and toughness of texture, and full contour, can be made to withstand travel on macadamized turnpikes without being subjected to greater wear than the recuperative growth of new horn will warrant. Indeed, it is now claimed that the increased growth invariably keeps pace with the increased wear, so that the hoof can be safely used on the hardest and roughest roads, provided it is properly shaped and pared.

An elaborate article in the BREEDER AND SPORTSMAN, on the contrary, claims that in horses that do not get much exercise, the growth far exceeds the wear, and there is danger of the horn breaking away in large pieces, while the horn is replaced with still greater rapidity when the feet are unshod.

One conclusion is inevitable, if this assertion is borne out by the facts. If the waste or wear of the hoof, in all climates and upon all roads, is more than compensated for by the increased growth of new hoof, so as to preserve, in farrier's phrase, plenty of hoof to keep the foot sound and well protected, then the general-purpose horse does not require the iron shoe for its protection. But if this waste is not fully repaired by the recuperative growth of new horn, but becomes so worn down that the internal structure is brought so near to the ground as to be liable to bruises, and inflammation; if the horse moves, under these conditions, with a feeling, painful step, then manifestly the hoof needs the protection of the iron plate, or an adequate substitute.

The BREEDER AND SPORTSMAN insists that all the precaution required to make the bare hoof adequate to daily use on all kinds of roads is, to remove the excess of growth of horn at the heels of the front feet, and lower the inside branch of the wall on the hind feet, while, in every case, it is imperative that the edges be kept rounded, to guard against breaking.

These precautions are as old as the water cure in medicine. It is within the daily observation of every farmer that his colt's feet will wear off at the toes, and grow low, like the prongs of a molar tooth, at the heels. The short toe, and the long, upright heel are fraught with untold injuries. They force the strain entirely upon the column of bones, and relieve the flexors of their requisite amount of tension. They elevate the coffin-joint out of position, so that its articulation is seriously diminished. They force the lower coronal bone against the coronet in front, and rapidly induce ring bone, while the lower edge of the coffin-bone, tilted into a more upright position, is forced unduly downwards against the sensitive floor of the hoof, and "sore toes" are invariably induced. Instead of this being an argument against shoeing, it is directly in its favor, for the reason that when the iron plate is fastened to the hoof, the toes and heels grow alike, and there is no such unshapeliness as too often occurs in the unshod foot.

The direction to keep the edges of the hoof well rounded has been followed by careful horsemen ever since horses have had their shoes removed for a run at large, either on grass in the summer, or for a winter's vacation. But if the heels are kept low, and the wall is carefully rounded, and the hoof is made level by reducing whichever side grows the more rapidly, then the practical question arises, Will the horse's foot withstand the ordinary wear of daily use upon paved and unpaved roads alike? If it will, then shoes are an expensive superfluity; and, on the contrary, if it will not, then they are an absolute necessity. The whole question is thus reduced to this practical test.

There are several ways of reaching an intelligent and conclusive finality on this subject. For many years the thrifty farmer in the great corn-growing regions of this country has been in the habit of economizing his expenses by working his horses in the soft, ploughed land of his cornfields in their bare feet. As long as this work lasts, indeed as long as he is not compelled to drive his team off of the farm, he can work his horses without shoes, provided occasional rains keep the surface of the earth comparatively yielding. But when the rains are not frequent, and the ground becomes baked and hard, then it is the experience of nearly every farmer in the great valleys and prairie of the West, that just in proportion to the dryness and hardness of the ground is the wear on his horse's feet in excess of their capacity to overcome the wear by recuperative growth. They refrain from shoeing them, even then, so frequently that the short, painful step admonishes them that unless they are protected by shoes they will soon be unable to perform ordinary service.

The testimony, not only of city farriers, but of country shoeing smiths, goes further in the resolution of this subject. Very frequently colts are brought to them that have never worn a shoe. It matters not whether they are brought early in the Spring, after a winter's run on the hard, frozen ground, or in the early Fall, after grazing upon pastures that are burnt brown and hard by the long drought of Summer, the conditions are generally the same. Their hoofs are worn so short and so painfully bare of horn, that not only can nothing be cut or rasped from them, even to put the hoof in a better shape, but there is scarcely substance enough to drive and clinch the nails. Frequently old shoes, or even tipes, are used, that are merely tacked on lightly till the protected hoof has an opportunity to grow before it can be properly shaped, with reference to leveling and balancing the foot. Now, this fact is of such constant and daily repetition that it ought to settle the question of working horses without shoes forever.

There has been much stress placed upon having the horn kept dry and hard, as a necessary condition to shoeless success. The article quoted from the BREEDER AND SPORTSMAN makes this condition *a sine qua non*. Our contemporary says:

Every time the feet are soaked there is a wasting of the life-giving fluid (the viscid matter secreted by the coronary band which fills the small tubes of the hoof), driven out by the water, and as water is readily evaporated, the tubes collapse.

How strangely this position strikes the mind of the horse breeder. He well knows that natural moisture is the life of the hoof. When the young colt, as well as the matured horse, runs out in lowland pastures, where there is constant moisture and the ground is soft, their hoofs grow very abundantly, but when they are confined to the harder ground of an upland pasture, their feet become dense and shrunken. If moisture in judicious quantity is such an enemy to the healthful growth and preservation of the horse's feet, how

comes it that they do so remarkably well when they run out in the long grasses of the Spring and early Summer months, when they are thoroughly soaked by the abundant, penetrating dews of the nights and mornings? Their clean, healthy appearance, together with the sharply defined rings of new growth, and their tough, yet elastic texture, all disprove the theory that water, judiciously applied to the hoof, but of course not to the extent of maceration, is not only not injurious, but a necessary condition of its health and vigorous growth. Nothing else like these penetrating dews will reduce inflammation and prevent the shrinkage of the wall, thus removing the cause of osseous formations, like ring-bones and side-bones. Nothing will so certainly preserve the natural elasticity of the hoof as these same penetrating dews.

If the horse's feet, therefore, have this natural stimulant of growth and expansion and elasticity, he can withstand more barefooted service than if his feet are kept dry and hard on stable floors and upland pastures in seasons of drought. But even then they cannot supply the waste, by friction, upon hard roads and paved highways. The foot was never designed by Nature for such usage. Its place is upon the turf, and then to be used only as the volition of the animal, not the will and service of man, may dictate. Take the instances of the semi-wild horses of the prairies. When the dry season wears off their hoofs almost down to the flesh, and they move with crippled sluggishness, they take only as few steps as their necessities and safety demand. But when the rainy seasons return, and the earth becomes yielding to their tread, and their feet grow faster than they are worn away, then new life returns to them. Then, and not till then, are they full of activity in the free use of their feet.

Now add to these natural conditions, and to this natural volition of the horse, the imperative, unceasing demands of man upon his movements; superadd to his own weight the burden of his rider, and the greater burden of the draft to be overcome, imposed upon him by his new master, over paved roads, and you have vastly increased friction upon his feet, and an astonishingly greater wear upon their ground-bearing surfaces.

Take the instance of our heavy draft horses. Notice how desperately they dig their toes into the ground, or crevices of the pavement, to catch a foothold, from which, as a purchase, to throw securely the weight of their massive bodies into the collar, and strain their great muscles of locomotion to overcome the load. What service could they perform without shoes? Indeed, how crippled would he that service if their shoes were not armed with heel and toe calkins.

The writer propounded this question in a direct form to a veteran teamster, whose four-horse team of half-bred Normans were straining every muscle to haul a heavy load of iron ore up the steep ascent of a levee. "Well," he gruffly responded, after looking at the propounder of such a question as a sentimental imbecile, "do you see the off wheeler? He has lost one of his fore shoes. He can get no foothold on that foot, and he has fallen down twice in the attempt. That accounts for his broken knee."

Let the advocates of bare feet submit their theory to any intelligent teamster on our highways, and they will receive a negative protest, more forcible than polite. Let them reason with the most humane teamsters. Let them insist that all they need to do is, to rasp the feet level, and bluntly round off the edges of the walls, and keep the feet perfectly free from water, and then they can get a foothold upon the hardest and smoothest of roads, and then the growth of the foot will still be in excess of the grinding pressure caused by overcoming their ponderous draft burdens. The laconic reply, in all instances, will be, that such a theorist never had any experience in handling a team, or he would never have dreamed of such an absolute impossibility.

But it is not necessary to rely upon the case of the draft horse. All light-harness horses would be subjected to the same inconveniences. No matter how abnormal might prove the growth of the frog to prevent slipping when he lands upon the ground, what protection has he against slipping when he springs from the ground? His unshod toes are already rounded by the rasp to prevent their chipping, and this very rounding process would deprive him of what little check he might have had in the unrasped toe to prevent his falling upon his knees. But there is more to be thought of than simply the ability to stand up on his feet on ascending and descending grades. If it is the ordinary harness horse that moves faster than a walk, his forward limbs and feet are frequently out of balance with the hind limbs and feet, and his movement, in consequence, is unbalanced. He forges and clicks his bare feet till it is painful to ride behind him. When his trotting movement is accelerated, his improvement is so frequently rendered impossible by reason of having too much action behind, or too little in front, or *vice versa*, that his movement can only be reduced to harmony by the application of shoes of different weights and patterns, on the front and hind pairs of feet. Still more, the front action may be awry. He may stride higher and further with one front foot than with the other, and then they can only be reduced to harmony by the application of front shoes of different weight, or of toe weights that vary in avoirdupoise. No balancing of the foot, or rounding of the toes, or total deprivation of moisture will remedy the legion demands for curiously-constructed iron shoes that arise in the development of the trotting horse. They may be reduced in weight, in many cases, till they are merely the slight tip that resembles the racing plate, but no daring experimenter who has had any experience in training the trotting horse has ever ventured to claim that he can be developed barefooted. The writer has seen this experiment tried, with no less favorable a subject than the thoroughly-developed, perfectly-gaited trotting stallion Ethan Allen. After a winter's run, during which his feet were intelligently cared for, he was taken up in the Spring and harnessed barefooted for an exhibition exercise before visiting guests of his skillful master, the late B. F. Akera, of Lawrence, Kansas. The royal old horse would break when forced faster than a four minute gait, but when his front shoes were tacked on, although they weighed only eight ounces, he was then himself again, and could speed away on a trot with the velocity of the wind. To any horseman who has had experience with trotting horses, the same experience has been repeated. Neither Mand S. nor Jay-Eye-See, nor any other first-class trotter, can be forced up to their speed barefooted in front. They can not be made to bear up the carcases and the tremendous burden of their momentum upon their unprotected front feet. They will break into the gallop, in every instance, simply because both front feet then bear the burden almost simultaneously, which, in the trot, is concentrated upon each one at a time. Even the thoroughbred must be protected with racing plates. They are made heavier for his ordinary exercise, and exceedingly light for his racing performance. Yet they are never dispensed with, although the running turf is made soft and yielding, simply because the experience of trainers has settled the question beyond controversy that, barefooted, he will not only bolt, but absolutely refuse to go up to his full speed.

Thus, there are many insurmountable objections to dis-

pening with horse-shoes, aside from the main question of the more perfect conservation of the hoof. It seems strange at this advanced age of human civilization, when the more than calcium light of material science has been focused upon everything that pertains to economizing labor and perfecting human methods, that the senselessness of arming horses' feet with iron shoes has never been convincingly demonstrated by those who claim that it is a tenable proposition.

Untold millions of men and money have been devoted to the business of shoeing horses. The demand has been so great within the past few years that men can not forge nails or shoes fast enough for its supply. Ingenious machinery has been constructed, not only to forge the nails, but to make the shoes, with fabulous rapidity. Yet, this ever-increasing demand, it is now claimed by a few theorists, is erroneous. The horse really needs no shoes. All this ponderous machinery and amazing expenditure of life and means to arm the horse's foot has been a stupendous blunder, say these theorists, since the use of the horse began; and, in response, come the aggregated experience of scientific and practical men, all over the world, that, despite their expense and injurious results, the practice of arming the horse's feet with iron shoes is a necessary evil. There have been rare instances in the history of material progress where the experience of the overwhelming majority was an error, and the protesting voices of the despised few were ringing with words of wisdom and truth, but the daily experience of every practical horseman will cause him to deny that the barefooted theorists are correct when their doctrine is applied to the hoof of the horse.

Sooner will come the consummation of the mundane millennium, when horses and railways are no longer necessities of transportation, and perfectly manageable balloons and flying machines take their places as demonstrated possibilities.—*Live Stock Journal*.

### Haw in Horse's Eyes.

There is a variation between the horse's and the human eye of a very important and peculiar character. At the inner angle of the eye there is found a dark membrane that apparently at the pleasure of the animal, is shot rapidly over the eye like a veil; it is instantly withdrawn, and in its rapid transit cleans the eyeballs of dust or foreign particles that have been accidentally lodged upon it. This membrane is called the "haw." It is not muscular, but its action is curiously explained. It is projected from its place by the expression or rather depression of the eyeball in its socket, occasioned by the retractor muscle.

When the eye is depressed by the play of this muscle, elasticity of the fatty substance behind the eye ball causes the haw to extend itself from the corner of the eye over the visible surface. When the retractor ceases to act the eyeball resumes its usual position, the fat returns to its place behind, and the haw also returns to the socket from which it has been momentarily pushed forward.

I am more particular in thus describing the utility and action of the haw, because such gross ignorance of the majority of farriers that when this membrane has been affected by temporary inflammation of the eye, and thus becomes enlarged and more prominent than usual, it has been regarded as a diseased excrescence, and actually extirpated to the permanent injury of the horse. Instead of endeavoring to subdue the inflammation by the ordinary remedies, it has appeared the simplest way to remove the diseased parts; and thus the eye, though for a time apparently restored to health, has in the end been lost by the casual introduction of impurities, such as dust, flies, etc., which there no longer remains any natural means of removing.

It will scarcely be credited by general readers that so prevalent in this error as to have found a place in that learned work, the "Encyclopedia of Rees," where under the article of "Haw," this membrane is described as a diseased tumor in the eye, and instructions are given for removing it. This may give a useful hint not to confide too readily in the opinions of those farriers whose station in life justifies a suspicion that their knowledge is merely practical and not founded upon scientific instruction.—*Tribune and Farmer*.

"Very few horsemen are," says the *Boston American Cultivator*, "good enough judges to select from a lot of unbroken colts or undeveloped horses, the one which when fitted, will lead all others to the wire. The black gelding Midnight, 2:18 $\frac{1}{2}$ , by Peacemaker, was a very unpromising colt, and as a three-year-old was sold at a ridiculously low price. Early Rose, 2:20 $\frac{1}{2}$ , was sold to a produce dealer, a few years since, for \$400, and those who can tell at once whether an animal is a trotter or not, laughed at the folly of the purchaser. Report says that her present owner paid \$10,000 for her. Some few years since Robert Bonner examined Jay-Eye-See, 2:10 $\frac{1}{2}$ , but the little king of the trotting turf was not promising enough to please the noted horseman, and was finally bought by his present owner for \$350. Report says that Midnight, the dam of Jay-Eye-See, was bought by Colonel West for \$160. It has been stated upon apparently good authority, that the dam of Dexter and Dictator changed hands for less than \$20 before her qualities as a brood mare were discovered."

Most persons feed their horses oats by measure instead of weight, forgetting there is quite a difference in the weight of oats when different lots are measured. Some lots are very heavy and some quite light. Horses that are fed twelve quarts per day of heavy oats will fall off when changed to twelve quarts of light oats, there being from five to ten percent less of nutritious matter in them. It is always best to feed the best oats and hay to horses, but judgment is needed to regulate the quantity so as not to feed too much or too little. Many owners of horses trust the feeding entirely to their farm hands, who have little judgment and no care for the results. Owners of horses should determine the quantity required for their horses, and give strict instructions to have just the required amount fed. In this way horses can be kept in proper condition.

"Stonehenge," discussing the breeding of mares, says: The best time for the admittance of the horse is the tenth day after foaling, leaving nine clear days between the two acts. It often happens, however, that this would be too early, as when the foaling has taken place in January, when if the mare was put to the horse, she could foal the next time in December, a consummation to be avoided, (on account of the dates from which ages are reckoned.) For this reason the visit is postponed, and this is one cause of the constant occurrence of barrenness in the thoroughbred mare, of which about one-third every year are sterile and profitless to their owner.

TURF AND TRACK.

George Wilkes' First Race.

The season of 1884 having brought the name of George Wilkes into such prominence through the brilliant performances of his get, we append an account of his first appearance in public twenty-two years ago.

Wednesday, the 10th, will stand for aye a red-letter day in the calendar, famous for one of the greatest of those events which are recorded above all others in the annals of the trotting turf.

They reminded one of the Yorksire ancient, To talk with whom of other days Seemed converse with old time; He remembered Hambletonian And Diamond in their prime; Stories of great Cockfighter Seemed but yester-yeen from his lips, With tales of Young Bay Walton And the colts got by Eclipse!

This trotting horse of Wednesday, being a descendant of the great lines whose roots spring from the horses of the Desert and the best old English blood antecedent to the earliest importation, has a right to be named with those patriarchs who founded the great breeds of runners and trotters alike, and whose fame will survive the revolution of ages.

"Up in the morning early" and over the track went a large number of people, who either could not sleep from anxiety, or wanted to hear the very latest before they put their money on the competitors.

The prettiness of Ethan Allen was strengthened, and his way of going, as Mace took him up and down the stretch, confirmed the opinion that I and many held that he was able to beat the young one.

First heat—Ethan had the pole, and after several efforts they got away, with Ethan half a length the best of it.

homestretch the clip was too hot for Ethan, who left his legs and the Hambletonian came home first, well in hand. He won as he liked, with his ears pricked, and those who believed in the New England stallion began to have premonitions that the race was a hollow thing.

Second heat.—Ten to one and no takers. They both came to the post in fine order. The brown colt breaks, and Ethan, with a rush, took the pole, leading around the turn five lengths.

Third heat.—Twenty to one and no takers. It was a gold eagle to a counterfeit ship-plaster. The start and heat were like those gone before.

The winner was bred by Mr. Theron Felter, of Orange county, and in consequence of the death of his dam, had to be raised on a bottle. He is uncommonly high in the hips, and in going very fast so straightens out his hind quarters that his feet go away under the axle tree.

Everybody was pleased, and the general verdict was that they had seen the best trotting stallion in the world display some portion of his unrivalled powers.

FASHION PLEASURE GROUND Association Trotting Extraordinary. Wednesday, September 10, 1862. Match for \$10,000; mile heats, three in five, in harness.

Jerome Park.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 10 entries; mile and a furlong.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

Oct. 4th.—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

won somewhat easily by a length and a half, with Ten Stone second, the same distance in front of Pardee, and with the others as above.

Same Day.—Sweepstakes, for three-year-olds, at \$50 each, half forfeit with \$750 added, the second to receive \$150 out of the stakes; those not having won in 1884 more than \$1,000 (not counting handicaps or selling races when carrying less than legal weight), allowed 100 lbs.; non-winners in 1884 allowed 15 lbs.; maidens allowed 20 lbs.; 8 entries; mile and a furlong.

W. Stoop's ch c Tornado, 108 lbs. .... Blaylock 1 N. W. Kittson's ch c Ratanaplan, 118 lbs. .... Fitzpatrick 3 E. J. Baldwin's b c Shenandoah 108 lbs. .... Holloway 0 W. Donohue's ch c Jobu K, 98 lbs. .... Meaton 0 P. Lorillard's imp. blk c Pontiac, 98 lbs. .... Ouley 0 C. Sandoval's ch c Sandoval, 98 lbs. .... Caldwell 0 D. D. Wither's b f Nonage, 100 lbs. .... Conkling 0 Time, 2:04.

Betting: 5 to 3 on Louissette, 8 to 1 each against Tornado, Nonage, Pontiac and Ratanaplan, 10 to 1 each against Shenandoah and John K., and 12 to 1 against Sandoval.

With but little delay the flag was dropped, with Tornado leading, followed by Ratanaplan, Sandoval, Louissette and Pontiac. As they finished the furlong Pontiac took the lead, while the favorite went back last.

Oct. 7th.—Purse \$500, for all ages, entrance 5 per cent. of the purse (\$25 each) to the start; to carry 14 lbs. more than weight for age; horses not having won \$1,000 in 1884 allowed 10 lbs.; or if not more than \$750, 14 lbs.; or if not more than \$500, 21 lbs.; or if non-winners in 1884, 28 lbs.; 12 entries; three-quarters of a mile.

G. R. Buchanan's ch g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 108 lbs. .... Blaylock 1 J. Spellman's b b Strathspey, 6, 111 lbs. .... Spellman 2 E. W. R. H. Loud's ch f Lady Lou, 3, 103 lbs. .... Church 3 D. D. Wither's ch g Pampero, 3, 99 lbs. .... McKenny 0 Appley & Johnson's h g Mammoth, aged, 108 lbs. .... Conkling 0 T. Bryan's b g Torpedo, 4, 101 lbs. .... Coffee 0 H. D. Markstone's b f Florence M., 2, 80 lbs. .... Moran 0 P. H. Ryan's ch c Gano, 4, 108 lbs. .... J. McLaughlin 0 E. J. Baldwin's blk c Pontiac, 3, 99 lbs. .... Challen 0 E. J. Baldwin's b c Gano, 4, 111 lbs. .... Holloway 0 N. W. Kittson's br f Elizabeth, 2, 91 lbs. .... McCarthy 0 Time, 1:18.

Betting: 2 to 1 against Strathspey, 5 to 2 against Jim Renwick, 6 to 1 against Mammoth, 8 to 1 against Florence M., 10 to 1 against Pontiac, 12 to 1 each against Torpedo and Elizabeth, and 15 to 1 each against Lady Lou, Pampero, Gano and Caramel.

After a long delay a start was effected, with Caramel, Elizabeth, Gano and Jim Renwick in the lead, followed closely by Lady Lou, Pontiac, Strathspey and the others. Before they reached the club-house Lady Lou took a decided lead and, with Elizabeth second and Caramel third, showed the way to the turn for the south field.

Same day—Handicap sweepstakes, for all ages, at \$25 each, with \$500 added, the second to receive \$100 out of the stakes; 9 entries; one mile.

Reverse Stable's b g Roy S. Cluke, 4, by Bullion, dam Lida Gaines, 97 lbs. .... Rafferty 1 Freakness Stable's b c Himalaya, 3, 105 lbs. .... W. Donohue 2 E. J. Baldwin's b c Shenandoah, 3, 89 lbs. .... Holloway 3 J. W. & R. H. Loud's b g Richard L., 3, 89 lbs. .... Church 0 W. R. Babcock's ch f Lizzie Mack, 4, 95 lbs. .... J. Donohue 0 Blohm & Co.'s b c Little Minch, 4, 115 lbs. .... Blaylock 0 P. Lorillard's c c Comanche, 4, 90 lbs. .... K. Hyslop 0 J. Spellman's b g Wandering, 4, 86 lbs. .... Claribston 0 W. Stoop's ch m Little B., 5, 106 (car. 108) lbs. .... J. McLaughlin 0 Time, 1:47.

Betting—3 to 1 against Wandering, 4 to 1 against Lizzie Mack, 6 to 1 against Little B., 7 to 1 each against Richard L., Himalaya and Little Minch, and 8 to 1 each against Shenandoah, Comanche and Roy S. Cluke.

After a long delay, during which all the riders from McLaughlin down showed how well they could disobey orders, a ragged start was effected, with Comanche leading, followed by Little Minch, Lillie B. and Wandering, a length or so in front of Roy S. Cluke, Shenandoah and the others. Before they reached the first turn Little Minch took a decided lead, and, followed by Lillie B. and Roy S. Cluke, they showed the way round the north field and round the club-house turn.

Knap McCarthy has won \$18,490 in purses this season, Frank Van Ness \$12,825, John Spinn \$12,325, P. V. Johnston \$11,150, Jim Golden \$9,000, and the other drivers less sums.

Judge Terry's chestnut filly, Nealie, 3 years, by Joe Danforth, while being galloped on the Fresno track one day last fall and broke both shoulders and was shot.

## Gov. Stanford's Importations.

The following is the memorandum of the mares and foals imported from England by Gov. Stanford. They arrived in this city in charge of O. A. Hiekok, last Thursday morning, and were forwarded to Palo Alto.

1. Klirt, bay mare, foaled 1880, by Hermit, dam Romping Girl. English Stud Book, Vol. XIV., page 401.

She is dark bay, 16 hands, long deep barrel, without any white or blemish. Covered by Sterling, sire of Isonomy, but not in foal. Romping Girl, bred by W. T. Osborne in 1864, got by Wild Dayrell, Derby winner, her dam Gay, by Melbourne, out of Princess Alice, by Liverpool. Hermit, winner of the Derby, in 1867, by Newminster, out of Seclusion, bred by W. H. Chaplin, at Middle Park, in 1864, and owned by W. H. Chaplin, covers only the best mares in England, besides his owner's, at 150 guineas and groom's fees. He is the sire of more and greater winners than any other horse in the stud. Among his get are Holy Friar, Trappist, Claron, Ryleston, Devotee, Out of Bounds, Peter (fastest horse in England), Angelina, St. Louis, Zealot, The Abbot, St. Hilda, Thebais, Tristan, Wandering Nnn, Clairvaux, etc. This is the first Hermit mare ever sent to the United States. Covered by Isonomy, April 22d.

2. Amalia, chestnut mare, foaled 1880, by Salvator, dam Thoughtless, by Hermit. E. S. B., Vol. XIV., page 412. Chestnut mare without white, 15.3, a beautiful mare, long, low and deep. In foal to Fiddler. Fiddler, by Preakness, out of Music, dam of Ossian, winner of St. Leger, etc. Fiddler was a great stayer. He beat Foxhall, although Foxhall was giving him 21 pounds, but Petronel and a lot of other good horses were beaten off.

Thoughtless, by Hermit, previously called Crucifix, was bred by W. H. Chaplin in 1875. Her dam was Salamanca, by Student, out of Bravery, by Game Boy. Salamanca is the dam of Pero Gomez, winner of the Criterion, second for the Derby, and winner of the St. Leger at Doncaster. Salvator is by Dollar, by the Flying Dutchman. Salvator's dam, Savigne, by Ion (sire of Wild Dayrell), out of Cuckoo, by Ellis.

Amalia dropped a filly foal, dark chestnut, very large and good looking, on March 7th, 1884, and was bred to Foxhall March 16th.

3. Gonla, bay filly, foaled 1881, by Exminster, dam Goura, by Beadsman, E. S. B., Vol. XIV., page 179. Dark bay filly without white, 15.1 at present, but will be 16 hands. Was covered by Trappist, son of Hermit, but is not in foal.

Goura, bred by Sir J. Hawley in 1868, by Beadsman, her dam Columbia, by Charleston, out of Vexation, by Touchstone. Exminster, by Newminster, dam Stockings, by Stockwell, out of Mowernia, by Touchstone. Bred to Sefton May 14th.

4. Patilla, brown filly, foaled 1881, by Pero Gomez, dam Young Lady. E. S. B., Vol. XIV., page 496. Brown filly, without white, splendid legs and long, deep body. Was covered by Trappist but is not in foal owing to getting cold and in bad condition.

Young Lady was bred at the Bonehill stud in 1872, is by Young Melbourne, her dam My Lady by Lambton, out of Tittle-Lady, by Orlando.

Pero Gomez (St. Leger winner, etc.) by Beadsman, his dam Salamanca, dam of Amalia No 2.

Patilla was bred to Peter May 22d.

5. Amelia, chestnut mare, foaled 1881, by Lowlander, dam Melissa. E. S. B., Vol. XIV., page 297.

Light chestnut mare with white hind legs and small white strips in forehead. About 15.3, very stout and great substance. Covered by Trappist.

Melissa was bred by Sir G. Chomley, in 1868, got by Herbert (be by Stockwell, out of Sister to Newminster), her dam Meg, by King Caradoc, out of Nutmeg, by Nutwith.

Lowlander, by Daleman, by King Tom, out of Lufra, by Windbond, is the sire of Lowland Chief, Lowland Duke, Wild Thyme (Derby favorite), Lowland Lad, among the best horses in England.

Amelia was bred to Macgregor, April 23d.

6. Teardrop, chestnut mare, foaled 1876, by Scottish Chief, dam Niobe. E. S. B., Vol. XIV., page 339. Bright chestnut mare, 15.2, very long and of great power and substance. Slight flat legs, with one white hind foot and little white in face. Covered by Wenlock.

Niobe was bred by Lord Portmouth, in 1861, got by Loupgarou, her dam Misserrina, by Pantaloon, out of Pbyrne, by Touchstone.

Scottish Chief, by Lord of the Isles. Scottish Chief is sire of Childerie, Glegarry, King of the Forest, Lady of Lyons, Marie Stuart (winner of Leger and Oaks), Montrose, Strathfleat, etc.

Teardrop dropped foal to Wenlock, April —, and was bred to Macgregor, April 23d.

7. Outaway, chestnut mare, foaled 1876, by Parmesan, dam Bounceaway. E. S. B., Vol. XIII., page 56. Dark chestnut mare, very thoroughbred looking, 15.2, extremely large barrel and long. Covered by Mask.

Bounceaway, bred by W. B. Ellam, in 1864, got by Zuyder Zee, her dam Press Forward, by Pyrrus the First, out of Vibration, by Sir Hercules. Bounceaway won the Portland Plate in 1868, carrying 119 pounds, and several other great events.

Parmesan, by Sweetmeat, by Vernlam, by Touchstone, by Whisker.

Cutaway foaled March 7, 1884, a large bright chestnut foal by Mask that looks exactly like the sire. Mare bred to Foxhall, March 15th.

8. Goneaway, bay mare, foaled 1877, by North Lincoln, dam Bounceaway. E. S. B., Vol. XIV., page 57.

Large bay mare, 16.1, with white strips in face and two white feet. Of great substance and size. Covered by Balfie. Bounceaway, (see No. 7).

North Lincoln, by Pylades, his dam Chorokey, by Redshanks, and is sire of many winners.

Balfie, by Plaudet, was bred by W. T. Gee in 1872, at the Park Paddock, Newmarket. Balfie won the Cheaterfield Stakes, beating Camballo, Clermont, Craig Miller, etc.; was beaten in the Derby by Galopin, but won the Grand Duke Michael Stakes, etc.

Goneaway dropped foal on April 20th, 1884, was bred to Foxhall, May 1st.

9. Mutiny, chestnut mare, foaled 1879, by Adventurer, dam Muta. E. S. B., Vol. XIV., page 329.

Beautiful, dark chestnut, no white, 15.3, long and very deep. Covered by Prince Charlie, by Bay Middleton. Muta was bred at the Yardley stud in 1874, got by The Duke, her dam, Mirola, by Gemma di Vergy, out of Lady Roden, by West Australian. Adventurer, by Newminster, he by Touchstone.

Mutiny dropped Feb. 20th, 1884, a filly foal, bright chestnut, white face and rear hind leg, by Prince Charlie. Was bred to Foxhall, March 1st, and is in foal.

10. Queen Bess, bay mare, foaled 1880, by Strathconan, dam England's Queen. E. S. B., Vol. XIV., page 138.

Large bay mare, 16 bands, white face and white hind foot. Covered by Fetterlock.

England's Queen, bred by Mr. T. Hewitt in 1872, got by King of Trumps, her dam Gibeide Lady, by Rataplan, out of Lady Hawthorne, by Windhound.

Strathconan, by Newminster, dam Souvenir, the dam of Mysotis, Strathnairn, etc. He was bred by Mr. Watt in 1863 and his produce are famous for great speed over short distances. He is the sire of Cairngorm Ellangowan, Griselda, Niesia, Scot Guard, Strathavon, winner of the Royal Hunt Cup, etc. Queen Bess dropped foal by Fetterlock, April 11, 1885, and was bred to Foxhall, April 22d.

11. Fairy Rose, bay mare, foaled 1880, by Kisber, dam Hippolyta. E. S. B., Vol. XIII., page 186.

Dark bay mare, no white, 15.3, long body on short, flat legs. Covered by Fetterlock.

Hippolyta was bred by Baron Rothschild in 1861, got by King Tom, her dam Daughter of the Star, by Kremlin, out of Evening Star by Touchstone.

Kisber, winner of Derby 1876, by Buccaneer, out of Muical.

Fetterlock, by Parmesan, his dam Silverband, by Kingston, out of England's Beauty, by Birdcatcher.

Fairy Rose, dropped March 4, 1884, a colt foal by Fetterlock, large and very strong looking and was bred to Foxhall, March 13th.

12. Cornelia, bay mare, foaled 1880, by Carnelian, dam Delight. E. S. B., Vol. XIV., page 115.

Dark bay mare, without white, 15.2, and very stout. Delight was bred by Mr. W. T. Sharpe in 1872, her dam was Bay Rosalind, by Orlando, out of Elopement, by Velocipede.

Cornelian, winner of Jockey Club Cup, two and a half miles, was bred by Baron Rothschild and is by Lecturer, out of Tonrmarine, the dam of Cats Eye, Topaz, etc.

Cornelia was bred, April 20th, to Laureate, be by Rosicrucian, out of Laura.

13. Petroleuse, bay mare, foaled 1880, by Plebain, dam Resolution. E. S. B., Vol. XIV., page 397.

Bay mare, 16.1, very stout and large, with white face and two white legs. Splendid forearm and barrel deep and wide. Covered by Fetterlock.

Resolution, bred by Baron Rothschild in 1873, by Lecturer, dam Annexation, by King Tom; grand-dam by Slane, out of Letitia, by Sir Hercules.

Plebain, winner of Middle Park Plate 1874, by Joskin, dam Queen Elizabeth, dam of Joey Ladle, Chawbacon, etc. He only ran once as he was injured but in the Middle Park Plate he beat Galopin, Balfie, Stray Shot, Telescope, Dreadnaught and twenty others.

Petroleuse was bred to Isonomy, April 21st.

14. Laelia, chestnut mare, foaled 1881, by Carnelian, dam Masderalia. E. S. B., Vol. XIV., page 143.

Bright chestnut mare, with white legs, 15.2, and fine looking. She was a winner of five races last year, beating Hedge Priest, now a Derby favorite, Fitzulke and several other good two-year-olds. She is a mare of great speed and gameness, but met with a slight accident and was thrown out of training.

Masderalia, bred by Baroness Rothschild in 1873, by Mandrake or North Lincoln, her dam Evelina, by King Tom; second dam Agnes, by Pantaloon, out of Black Agnee, by Velocipede.

Cornelian, (see Cornelia, No. 12.)

Laelia was bred to Sefton, May 10th.

15. Rosetta, chestnut mare, foaled 1881, by Struan, dam Elegance. Bright chestnut mare, hind feet white, 16 hands, and blood like.

Elegance, by Ely, her dam Nemesis, by Newminster.

Struan, winner of Garry Forward Stakes, 1873, was bred by W. Blenkiron, at Middle Park, got by Blair Athol, out of Terrific, by Touchstone, the dam of Imogene, Catapulta, etc.

Struan is the sire of Brag, Emerson, and The Star.

Rosetta was bred to Peregrine, May 10th.

## The King of Pacers.

"I have taken my time with that horse," said John Splau to a friend at the Chicago Driving Park last Friday, after Johnston had paced a mile in 2:06; "and he has done just what I expected he would—beaten all the records, and done it in a style that shows the timber he is made of. I haven't been in a hurry, and have never split him out as well as he could go, because it has never been my notion that in order to get the very best out of a horse that is in him, he should be worked at all the time for the best rate of speed he possesses."

Splau is certainly entitled to unstinted praise for the manner in which he brought three of Commodore Kitting's horses—Johnston, Minnie K., and Fanny Witherspoon—to the post last Friday. It has been announced that Jobustou was to pace against his own record of 2:10, and as he had done the distance over the Milwaukee track the previous week in 2:10, it was the general opinion among horsemen that he would be successful at Chicago in clipping the wings of time. Nobody, however, looked for such a wonderful mile as the one paced by Johnston proved to be. The day was perfect, a light breeze preventing the air from becoming sultry, and the track, having dried out nicely from the rain of Wednesday night, was very fast. How the work of the day was accomplished is easily told. Between the beats of a race between the trotter Fanny Witherspoon and the pacer Fritz, Johnston was brought out the track by Splau and jogged three miles at about a four-minute gait. Then, after a rest and cooling out, he appeared again and was driven a warming-up mile in 2:13; it being Splau's idea that this would fit him for a final grand effort; and such proved to be the case, as when the gelding came out again he looked in the pink of condition. It had been arranged that Richball was to go a mile at the same time as Johnston, being started some distance behind him, and it was in this order that the greatest mile on record was paced. Splau drove his horse with watch in hand, and sent him easily to the quarter in 32 seconds, which was a winning clip if maintained to the end of the mile. As he struck into the backstretch he moved out stronger under a loosening of the reins, and did the second quarter in 31 1/2 seconds, making his time to the half-mile pole 1:03 1/2. There were those who thought this rate not quite fast enough, as when Peter Johnston drove his namesake in 2:10 over the same track last Fall he went the first half of the journey in 1:03. But Splau was looking at the watch all the time, and rating his horse with the judgment of a master. Around the upper turn there was no diminution in the rate of speed, the third quarter being paced in exactly the same time as the second, so that the time at the three-quarter pole was 1:35. It was now apparent that, barring accident, the record must be beaten; but no one looked for such a wonderful exhibition of speed and gameness as was seen. Entering the homestretch the pacer seemed to be go-

ing faster than ever before, and this was no optical delusion. On and on he came, the stride being as steady and true as when he went away from the wire. At the distance stand Splau called to him and Johnston brushed out like a horse just from the stable. Again was the encouraging cry heard, and again did the pacer respond, spurting under the wire at about the highest rate of speed attained during the mile, and doing the last quarter in 31 1/2 seconds, making the mile 2:06 1/2.

It was a wonderful performance, and one so wholly unprecedented that all the more credit is due the man and horse that made it. Splau is always willing to learn, and is a man who profits by experience. The first very fast horse he had, Rarua, was developed with a care that made him the best horse in the world during his last four years on the turf, and when Splau first assumed charge of him he did not hesitate to ask the advice of Bodd Doble as to how he should be trained, and profit by the experience of the man who had set the mark at 2:14 with Goldsmith Maid—a mark that Rarua was the first horse to lower. When Johnston came into his hands he had a record of 2:10, and there were not wanting people who thought he would never be able to beat it. Peter Johnston, who developed the horse, was never of this opinion. He has always held that Splau would surely drive the great pacer a faster mile than pacer or trotter had ever gone before, and his knowledge of the horse was gained by actual experience. Last year was Johnston's first on the turf, and after coming into Johnston's hands weak and thin from a poor wintering he went on and acquired speed as fast as his strength came to him. But in July a fit of sickness again set him back, so that when he paced in 2:10 he was not what he might have been in point of strength under different conditions. His work last Winter at Cincinnati has before been referred to. Splau gave him mile after mile in about 2:30, never calling on him for a burst of speed, and under this method of treatment the horse became strong and lusty, although not fat. He has never been driven to the utmost limit of his speed this season, and in his work the fastest mile given him was 2:13 1/2. In none of the trials against time were the conditions all favorable until Chicago was reached, and, this being the case, he was never driven out for every iota of speed that was in him. "It was hard to wait," said Splau, "but I knew that some day everything would come just right, and wanted to make one do-or-die effort that would satisfy myself and everybody else that had an interest in the horse. This plan of trying a fast horse every week may be the correct one, but I don't believe it. You can pinch a horse out once in a season or so for everything there is in him and he will forget it by the time the next year arrives, but if you do it every week he will certainly get a little tired of such work and not improve much. We may pace Johnston against time again this year, but not to beat 2:06 1/2. He has done that once, and it is enough for 1884."—Breeder's Gazette.

## Conditioning Driving Horses.

In another column will be found an account of the great performance of the pacer Johnston, at Chicago, on the 3d, with some notes of the preparation the horse received. In the following interview Splau emphasizes all he had said before and goes more into details. After acknowledging his indebtedness to Bodd Doble for suggestions received and acted upon, he says:

"You never see him splitting out a horse as fast as he can go two or three times every week. On the contrary, he always drives them within themselves, and the result is that when the day of the race arrives they are able and willing to go faster and further than he has ever asked them to in their preliminary training.

"That is the system that I adopted in dealing with Johnston, and the result shows that it is the correct one. When I got the horse last Fall he was rather thin, having been sick during the Summer, and my first move was to get him in good flesh, for I never was an advocate of the theory held by some people that a horse, after being reduced to skin and bones by a thorough course of old-fashioned training is then in shape to make a creditable showing. The fact of the matter is that I trained Johnston just the same as I trained Rarua. I took him to Cincinnati and gave him a great number of slow miles. I never asked him to go fast, but kept letting him step along every day a good many miles. Of course I knew that he had speed, but I never kept asking him to show it to me every day as a boy would look at a new jack-knife. What I wanted to do was to beat all the trotting and pacing records with that horse so far that there would be a mark for the rest of them to shoot at that they would not be likely to hit for some time to come. Consequently I was always careful, both in his work and in trials against time, to keep him within his powers. The fastest mile that he has had in his exercise this season was 2:13 1/2. At Cleveland some time ago I drove him a half-mile in 1:03, the last quarter being done in thirty seconds, and the last eight was paced at the rate of a mile in 1:56. This was last June, and it was enough fast work for me. It showed me that my horse had all the speed that was wanted, and that my business lay in preparing him to carry that speed for a mile. When we came to make public trials against the watch I made it my business to never get excited and try to do something wonderful with him when the conditions were not favorable. We never had a really first-class day and track until we came here to Chicago, but I was determined not to drive this horse out for the last inch there was in him until I did so at a place where it would do some good. He seemed to me at Milwaukee last week to be in just about the right trim, but the day and track did not exactly suit me, and although he went in 2:10 there, there was no part of a mile that he was forced or driven out."

"How did you drive the mile at Chicago?"

"Well, it was like this: I made up my mind some time ago that in order to do a mile in phenomenally fast time a horse must rate his speed in such a way as to make the best possible use of his powers. This idea of going away from the wire with a horse at the very best clip he is capable of showing and keeping it up as long as he will go is the wrong one. Consequently I have been training myself for some time to time a horse while I was driving him, and I have got that part of the business down pretty fine. I had a good, strong hold of Johnston all the way to the half-mile pole, and I never began driving him at all until we rounded into the homestretch, and even then I did nothing but rouse him up a little with the lines. It was only after we got inside the distance that I spoke to him, and he went away from it as if he was just from the barn for exercise. Everything was in the horse's favor, and he did just what I expected him to do—that is, pace a mile faster than had ever been done before. His fastest mile this season was the one in 2:10 at Milwaukee, and previous to that he had never gone better than 2:11 1/2. So

you see that a drop from there to 2.06 was quite a job. I didn't know to a certainty that he could do it, because I had not been trying him every week to find out. A horse will stand one grand drive, but when you come to ask him to do his very best every week he will begin to get sick of it, and the minute a trotter or pacer strikes that frame of mind he is not going to beat his record much. And that is why I am not going to drive Johnston another mile this season at the very top of his speed. Next Spring I shall go along easy with him, just as I have done this year, and if no bad luck befalls him, he will go a mile close to two minutes. I know that sounds like pretty big talk, but when you come to look at the matter carefully there is nothing unreasonable or extraordinary about it. The horse can speed a quarter of a mile now at better than a two-minute gait, and as he is young, sound, game, and of the improving kind, I don't see anything in the way of his learning to go a mile at pretty near the rate of speed that he now shows for a quarter."

English Two-Year-Olds.

LONDON, Oct. 8th.—The most important two-year-old race, at Newmarket to-day, was that of the Middle Park Plate. It was won by Lord Hasting's Melton, with M. A. Lupin's French-bred colt, Xaintrailles second. Mr. Childwick's Royal Hampton and Capt. Bowling's Sterling-Casnistry colt made a dead-heat for third place. None others ran. The odds were 9 to 4 against the Casnistry colt, 7 to 1 against Xaintrailles, 10 to 1 against Melton, and 25 to 1 against Royal Hampton. The race was run under the following conditions:

The nineteenth Middle Park Plate of £500 added to a sweepstakes of £30 each for two-year-olds, £20 forfeit; the second to receive £200 and the third \$100 out of the stakes: colts to carry 122 lbs., fillies and geldings 119 lbs.; winners of a stake of the value of £1,000 to carry 7 lbs., of one of the value of £500, 4 lbs. extra; entrance £5, the surplus rentance money to be divided between the second and third; 126 subscribers; Bred by Stakes' course (six furlongs.) Lord Hasting's b c Melton, by Master Kildare, dam Violet Melrose, 129 lbs. Lupin's cb c Xaintrailles, by Flageolet, dam Deliane, 122 lbs. Capt. C. Bowling's b c —, by Sterling, dam Casnistry, 122 lbs. Mr. Childwick's b c Royal Hampton, by Hampton, dam Princess, 129 lbs. Mr. Brymer's b c Crosskeys, by Rosicrucian, dam Chateleine, 129 lbs. Mr. Mainley's b f Cora, by Lucas, dam Gratiniska, 129 lbs. Wood 0 Lord Cadigan's b f Lonely, by Hermit, dam Anonyma, 129 lbs. Lord Hartington's cb c Monolith, by Albert Victor, dam Obelisk, 129 lbs. Mr. K. Gardiner's b c Albert, by Albert Victor, dam Hawthorn Bloom, 129 lbs. Lord Rosebery's b c —, by Macaroni, dam Lynette, 129 lbs. Duke of Beaufort's b f Maria Renata, by Sterling, dam Canceress, 129 lbs. Duke of Portland's b c Langwell, by Springfield, dam Furiosa, 129 lbs. Mr. Manton's cb c Willie Darling, by Hermit, dam Stockwater, 129 lbs.

Melton was bred by Lord Hastings, and is the first of Master Kildare's "get" trained, the Master having only been retired from the turf after running for the Royal Hunt Cup at Ascot in June, 1880, in which year he won the City and Suburban with 125 pounds up. Melton made his debut in the New Stakes at Ascot, when ridden by Archer, and with the odds at 5 to 1 against him he beat a field of eight, including the highly thought of Langwell. For the July Stakes at Newmarket Melton was made the favorite, but he was beaten by a head for it by Luminary, which was probably Melton's last race, as he did not run at Doncaster nor at the recent first October meeting, he having been specially trained for the Middle Park Plate by Matthew Dawson, who has had him in charge ever since he was foaled. The success of Melton as above will naturally bring him at once to the front for the big Three-year-old Stakes, he being among the nominees both for the Derby and St. Leger, although, singular as it may seem, no winner of the Middle Park Plate has yet succeeded in winning the Derby, and only two the St. Leger, viz.: Pero Gomez in 1869 and Petrarch in 1876.

There is an earnest feeling among horsemen in favor of an official starting judge at the various large trotting meetings. We do not wish to reflect upon the services of the gentlemen who have officiated in the past Circuit meetings. Very few mistakes have been made, and only then with the best of motives. Messrs Edwards, Archer, Harbison, Windsor, Robinson and Hunt render their decisions impartially, and give general satisfaction from a usually thankless position. It is to relieve such gentlemen from the tedious and possible embarrassment of a position that is wholly honorary and non-remunerative, that the appointment of an official judge is needed. He must be a man who is thoroughly conversant with the rules, and who is fearless in enforcing them, and who should be well paid for his labor.—Sportsman.

During the Stockton fair W. B. Todhunter, of Sacramento, purchased from W. W. Worthing, of Lodi, the trotting mare Mand W. W. W., by Gen. Reno, dam by Rattler, for \$2,000.

Philip Siebenthaler, of Sacramento, who has been lying dangerously ill with the erysipelas, is reported to be convalescent.

THE KENNEL.

Pacific Coast Field Trials.

All arrangements for these Trials are completed, thanks to the energy and push of the Secretary, Mr. N. E. White, who was made a committee of one on commissary, etc. The Club has leased a comfortable house a mile above the camping place used last year, on very much better ground, which is preserved. December nights are biting and frosty and it is thought that all will prefer warm and comfortable quarters to tent life. The Club will provide a fitting table, beds, bedding and all such essentials, so that visiting gentlemen need bring only their guns, dogs and good will.

Those attending will go to Sacramento on Sunday, November 30th, stay over night, and on Monday, December 1st, will go by rail to White Rock station, on the Placerville Railroad. From the station it is only three and one-half miles to the Club House, and those who desire can hunt over the distance, while the others will be taken in carriages. The ground is beautiful, and on a recent special visit the Secretary found a great many birds. Nothing new remains to insure a good and successful trial, but the starting of a large field of dogs. The entries already are many but there are many more which should be sent to the Secretary before November 10th, on which day entries close. The trials will begin Tuesday morning, December 2d, at 7:30 A. M., and will be run through with as much expedition as a fair regard for the welfare of the dogs will permit. The great success of the Pacific Coast Field Trial Club last year, and its large purse this year,

should induce a free attendance. There is no good reason why there should not be a hundred keenly interested spectators and participants and our knowledge of the Club leads us to believe that twice that number will be gladly welcomed and provided for. Again we urge the owners of fair dogs to help in making this organization what it will surely become, a great club and a credit to the sportsmen of the State. We repeat that entry blanks may be obtained from Mr. N. E. White, at Sacramento, or from Mr. H. H. Brigue, in this city.

The Champion Retriever.

The sagacity of retrievers was being discussed in the presence of Sir Edwin Lendseer, and, as might be expected, some remarkable incidents were related. After a while he remarked, "Not one dog yet mentioned comes up to my dog Trover. Upon a certain occasion I showed him a five-pound note of a well-known county town bank near to which I was residing. I rolled up the note, put it into my pocket, walked into the woods, hid it in the trunk of a tree, then strolled on for a mile or so, the dog at my heels. 'Back, find and bring, Trover,' I said, and the dog was off like a shot. I waited, and waited, and waited for a considerable time, but no Trover. Presently, however, he came, but without the note. 'Hi! back, find, and bring,' I repeated, 'or you shall know what a stick means,' but instead of doing my bidding, the animal came quite close to me, and dropped from his mouth at my feet, one after the other, five brand new golden sovereigns. He had not only found the note, sirs, but had gone to the bank and changed it! His intelligence eclipses even that of the celebrated pointer Mr. Juggle, of Pickwickian renown, once possessed."

CRICKET.

United States vs. Philadelphia.—A Memorable Match.

This match which has long been anxiously looked forward to by cricketers was commenced on Saturday, October 4th, at the Germantown Grounds. Both teams were fairly represented. A large audience was present to witness the first day's play. The United States were the first to handle the willow, and scored 104 runs. Morley and G. Wright showing to the best advantage. Clark was the most successful bowler. The Philadelphians lost no time in sending in their representatives, and at the time of drawing stumps had lost but five wickets for 118 runs. Play was resumed on Monday, and when the telegraph board showed 200 runs at the end of the innings. Morgan, Clark, and Brewster batted in good shape. The United States now essayed for the second innings, and at the time of drawing stumps had compiled 180 with four wickets still to fall. Morley, Lambkin, Tyers, Wood and Stratford were the most effective batsmen. The splendid stand made by the United States in their second innings vested the game with considerable interest, and a large attendance gathered on Tuesday to witness the last day's play. The tail end of the U. S. team only added 12 to the total, which left the score for the second innings at 192. The Philadelphians started in for their second innings to make the 97 runs requisite for victory. This did not prove such an easy task as anticipated, as wicket after wicket fell, and it was not till Law end Brockie became associated that the necessary runs were made, and the Philadelphians won a hard fought battle by one run and three wickets to spare amidst the greatest enthusiasm. Special mention should be made of the splendid bowling of Lane, as well as the stubborn defense displayed by Brockie at the most critical part of the game. The catch made by Thayer, that dismissed Davy, is described as one of the finest running catches ever seen in Philadelphia. The score:

Table with columns: GENTLEMEN OF PHILADELPHIA, FIRST INNING, SECOND INNING, and Grand Total. Lists players like J. A. Scott, Morley, Lane, Wood, Tyers, etc.

Table with columns: UNITED STATES, FIRST INNING, SECOND INNING, and Grand Total. Lists players like Bromhead, Clark, McNutt, Lowry, etc.

Honors to the Philadelphians.

A pleasing feature of the second day's play in the United States vs. Philadelphia match was the presentation of prizes and souvenirs to the Philadelphia team. Robert S. Newhall won the McKean cup—a magnificent and costly trophy—for the largest individual score. J. A. Scott received the Herrick prize for the best batting average—a sterling silver tankard with the figure of a cricketer etched and oxidized on one side, and on the other a suitable inscription. W. C. Lowry was awarded the bowling prize, a silver tablet, suitably inscribed and embellished with a portrait of the winner. Each of the fourteen members of the team also received a small sterling-silver-gash receiver inclosed in a Japanese chamois bag lined with satin, the gifts of lady friends of the Belmont, Germantown, Young America, Philadelphia and Merion Cricket Clubs. J. B. Thayer, Jr., was also presented with an elegant gold watch suitably engraved.

An Easy Victory.

The third match for the "bats" resulted in an easy victory for the Merions. The innings of the Occidents only realized 32 runs, notwithstanding that the first four wickets made 30 runs. Sanderson was the highest scorer with 10. Miller was the most successful bowler. The Merions scored 98. The Occident's bowling department was badly manipulated throughout the innings and which in a great measure accounts for the heavy score of the Merions. Jacobs, 29, Spiro, 10, Theobald, 8, and Ben Benjamin, 24, were the principal scorers. A larger attendance was present than usual. The Occidents were but poorly represented. The score:

Table with columns: MERIONS, OCCIDENTS, and Total. Lists players like G. B. Flitock, Sanderson, G. Gibson, etc.

BOWLING ANALYSIS.

Table with columns: Balls, M, Runs, Wkts. Lists players like Waterman, Gray, Purdy, Miller, Benjamin, Hill.

A few years ago, the genial Thomas Emmet was playing at the oval in a match, in which he was opposed to Mr. Frank Townsend, the Gloucestershire amateur. The latter was pnt on to bowl to the Yorkshire Captain, and the batsman, weary of hitting a tempting lob, to his dismay saw the ball curl into his wicket as he stood determined to leave it alone, with his bat still uplifted. On his way to the player's room, he was accosted by a friend, and the following colloquy took place: "How did you manage that, Tom?" "Don't Tom me," replied Emmet. "Well, then, Mr. Emmet, how did you manage that?" "Don't call me Mr. Emmet; call me Mr. Stupid Fool." And Thomas strode on like Achilles to his tent.—Cricket Chat.

The next issue of the BREEDER AND SPORTSMAN will contain an able article written by H. F. Boyle, of the Australian Eleven, entitled, "A few hints to junior bowlers." All young cricketers will find these hints of great assistance.

This afternoon the second match between the Australian and the All Comers will take place. The All Comers have got together a very strong team.

YACHTING.

The Closing Cruise of the S. F. Y. Club.

This event, which has hung fire for some time, is definitely announced for to-day. The yachts will assemble off the club house, and the usual festivities will be indulged in until the starting hour, when the fleet will get under way for Vallejo.

A feature of this cruise will be the absence of a test of speed such as they usually have, in coming down San Pablo Bay to-morrow, for which they have substituted manoeuvres in squadron, by signals from flag ship. The fleet will be under command of Commodore Harrison, on the Frolic.

We doubt the success of this new departure, as yacht owners are inclined to be independent of the commodores, and will only do as suits their royal convenience. The yachts that will participate will probably be as follows: Larline, Halcyon, Ariel, Fleur de Lis, Nellie, Frolic (flag-ship), Emerald, Chispa, Whitewing and Rambler, and possibly the Argie. We trust that the weather will be favorable and pleasant, and as the tide favors the yachts both ways, we hope nothing may intervene to detract from the pleasure of the cruise.

The sailing orders are published herewith: The yachts of the club and its invited guests will assemble off the club house, at Sancelito, on Saturday, October 18th, before 4 P. M., prepared for a cruise to Vallejo. At 4:30 P. M. the preparatory gun will fire, and five minutes later the starting gun, when the fleet will get under way and proceed to Vallejo, anchoring north of Georgia street wharf and clear of the ferry.

At noon of the next day the preparatory gun will fire, and five minutes later the starting gun, when the fleet will get under way and proceed in squadron to San Francisco. On this trip there will be no trial of speed until so ordered by signal from the flag-ship, but the fleet will remain together, and while in San Pablo bay will perform such evolutions in squadron as directed by the signal from the flag-ship. It is particularly requested that every yacht will see that her signal-book and signals are on board before starting, that no yacht will hoist any canvas until the preparatory gun has fired, and that none will break ground or hoist head sail until the firing of the starting gun.

Last Saturday a pleasant sailing breeze prevailed and several of the yachtsmen, taking advantage of the weather, invited out their lady friends. At one time in the channel were the Nellie, Chispa, Annie and Rambler, all bunched off the Preadio wharf and all of them had ladies on board.

The Thetis, on her way down from the Sacramento river, ran ashore on the reef under Mare Island lighthouse and remained there over a tide, but as it fortunately was calm, she was floated off without damage. This little vessel has been in more trouble the last season than of any other boat we have ever known in these waters. Auent this accident the fact is not generally known to yachtmen that there are three reefs or ledges, that run out from the southern end of Mare Island in a southerly direction, one just to the westward of the lighthouse and two larger ones further westward still. The heads of some of the rocks constituting these are bare at dead low water, and there is another shoal near the magazine wharf on which several yachts have struck their centreboards. Mare Island should be given a wide berth.

The Ripple has been laid up for the season. This vessel was modeled by Hall and great things were expected of her while she was being built, but she turned out to be very cranky and very slow, especially on the wind.

The yachting fleet of this port will be increased next season by the advent of the Cornelia, Mr. Coleman's new yacht, which is expected to arrive during the early Spring.

Sunday, on account of the rain, was spent by the yachtsmen either ashore or in the cabins of their vessels, and there is really very little local matter to report.

Trap at Ogden, Utah.

The following is the score made at the driving park by the Ogden Shooting Club on September 11. The day was pleasant, and the pigeons strong flyers. Some of our new members shot for the first time at the trap. Conditions: Bogardus rules; 25 yards rise; use of one barrel. Owing to the scarcity of birds 9 instead of 10 were shot at:

Table with names and scores: W. D. Howe... 11111111-9, D. McCarty... 11011111-8, Mat Browning... 11111011-8, M. H. Beardsley... 11010111-7, A. C. Smith... 11110111-8, W. C. Carpenter... 11111001-7, H. H. Hurlbut... 11111011-7, F. B. Hurlbut... 11101101-5, J. W. McNatt... 10001111-5, J. Malcom... 061000101-3, J. G. Tyler... 000011101-4, Dr. Sprague... 000001001-2

Howe won first medal; Browning, Smith and McCarty tied for second; H. H. Hurlbut, Beardsley and Carpenter tied for third.

A. M. Cummings experienced good shooting one day last week on the private grounds of Mr. Bray, at Pine Canyon. He reports quail very plentiful. The next time Mr. Cummings goes shooting some of the spoils are to be left at this office in remembrance of the expedition.

The great annual hunt of the Portland Rod and Gun Club, to be followed by a game dinner will shortly take place. The Seattle Rod and Gun Club are expected to join in the hunt.

Dr. Carver is giving shooting exhibitions in Michigan and helping the agricultural fair committees to swell the gate receipts.

[Gun Department concluded on page 252.]

THE RIFLE.

Some Notes on the Late Creedmoor Meeting.

EDITOR BREEDER AND SPORTSMAN: The Creedmoor meeting did not prove a financial success, not from a lack of liberal prizes, for this was made a special point by a prize committee, whose efforts were crowned with a most attractive bill, so attractive in fact that a brother director being sanguine of a net loss, resigned from the association. It is a good thing to have all sore heads voluntarily "git out," when they wish to play the "penny wise and pound foolish" business. The meeting would undoubtedly have been a success if the Assistant Secretary had done his duty in sending the programme out by mail to the addresses of the different riflemen; even at the distances of Boston, Albany, Washington, Hartford, no programmes were received even up to the Sunday just previous to the beginning of the shooting on Tuesday. The conditions to the several matches were very liberal as regards military rifles and sights, any military rifle being allowed of not over 9 lbs. weight, while sights, with apertures, screw wind-gauges, and with permanent screws for raising and lowering the har, were attached with SPIRIT LEVELS of certain dimensions which are now permitted by the revised rules. This point on sights was a great surprise to certain visiting rifle teams, the members of which pluckily entered individual matches at 600 yards, where the use of the spirit level is of far more advantage than apertures or screws for elevation or windage.

Numerous protests were entered against individual scores, especially in the opening match, 7 shots at 200 yards, any military rifle, an obsolete rule of the association provides that "no two competitors shall use the same rifle in any match." This rule has never been enforced and the association has heretofore dealt most liberally with the marksmen in this regard, but protests were put in against four competitors who had infringed this obsolete rule. One was a Director, one an ex-Secretary of the association, one a member of the late defeated American Rifle Team; the last is a noted rifle shot that has lately paid a visit to the Pacific Coast. The protests were all disallowed except the one against the latter marksman, and now the rule is to be amended so to read that it only applies to riflemen that are in disfavour with any of the Directors, who reserve the right to make or break rules at will.

A petition was signed by 75 riflemen, praying for the Executive Committee to reverse their decision, calling it one of "gross injustice." This they refused to do, and it is no wonder that Creedmoor is fast going to decay, and the cry of the riflemen is "give us a rifle association that will be National, that shall have representatives from all the different States in the management, that shall have headquarters at Washington, where no spite or malice can be permitted to sway the decisions of any committee that may be called upon for a verdict." State politics and national rifle associations never will mix with that degree of harmony necessary for the happy prosperity of the art that will be national, that is rifle shooting. To show you the state of perfection we have attained in military rifle shooting for 200 yards, and at what point we value their capabilities, I enclose a programme of a local Fall Meeting of one of our rifle associations. METRO.

New York, Oct. 6th.

Eintracht Rifleman.

The following scores were made last Sunday at the shoot of the Eintracht Rifles at Schutzen Park. Considering the inclemency of the weather, the scoring must be considered quite above the average.

Table with names and scores: Enbels... 382, Schneider... 298, Stammer... 357, Hegerup... 290, Kier... 322, Weisel... 278, Klars... 347, Schbert... 233, Ropke... 361, Schneck... 225, Hartmensen... 291, Yang... 250, Len... 268, Weble... 248, Streiber... 342, Wirtner... 238, Gumbel... 318, Kruger... 202

L. Klotz won the champion medal as well as the 1st class medal with 392 points. E. Streuber won the second class medal with 342 points. M. Schneider won the third class medal with 298 points. M. Schneider also won the medal for the last best shot.

Notwithstanding the very unfavorable weather, last Sunday, some excellent shooting was made by members of Col. Rantlett's Battalion. The scores were as follows:

Table with names and scores: Carr... 200 yards-5 5 5 5 5 4 5 5 4-48, 500 yards-5 5 5 5 3 5 5 5 4-47-95, Hovey... 200 yards-5 5 4 5 5 5 5 4 5-47, 500 yards-5 5 5 4 5 5 4 5 4-46-93, McDonald... 200 yards-4 4 4 4 5 4 4 4 5-48-91, 500 yards-5 5 5 5 5 4 5 4 4-44, Kellogg... 200 yards-4 4 4 5 4 5 5 5 4-44, 500 yards-5 5 4 5 5 5 5 5 4-41, Pierce... 200 yards-4 4 5 4 5 4 5 4 5-44-80, 500 yards-4 4 4 5 4 5 4 5 4-42, Waltham... 200 yards-4 4 4 4 4 4 4 4 5-42, 500 yards-4 5 4 4 4 4 4 5 5-48-87

On account of the showery state of the weather, the regulation practice of fifteen shots at each distance, was only gone

through with by Sergeant Carr and Hovey, and the record made by them is an enviable one, as they beat all previous records on the coast at 200 and 500 yards. The score:

Table with names and scores: Sgt. Carr-200 yds.-5 5 5 5 5 4 5 5 4 5 5 5 5-73, 500 yds.-5 5 5 5 3 5 5 5 4 5 5 4 5 4-70-143, Sgt. Hovey-200 yds.-5 5 4 4 5 5 5 5 4 5 5 5 4 5 5-71, 500 yds.-5 5 4 4 5 4 5 5 4 4 5 5 5 5 5-71-142

Cleaning Brass Shells.—Take strong vinegar and salt, scour them well and rinse in hot water and dry in warm place. They will come out of the pickle bright as new unless badly corroded.

The Nationals will hold their record rifle shooting tomorrow at Shell Mound Park.

Rules and Dates.

A subject that will be likely to elicit no end of discussion will be the meeting of the delegates of the associations racing under the rules known as the "American Racing Rules," who will meet at Chicago on the 21st of November, which meeting is not likely to be quite as unanimous as that which adopted the rules at Louisville last year. So far nothing definite is known as to what business will be done, but it is nearly certain that the effort will be renewed to prohibit bookmaking on the tracks of associate members. A sentiment that has probably gained some adherents during the past Summer, based no doubt on alleged unfair transactions and the reported connections of some of the bookmakers with such "scum of the course" as Texas Tom and others of the same ilk, in which the opponents of bookmaking will find some encouragement in "Vigilant's" announcement in the current issue of the Spirit that the Monmouth Park Association contemplated "the abolition of bookmaking from the grounds and the substitution of auction and French pools," to which "Vigilant" adds: "The French system could be under the management of the club, with \$5, \$10, \$20 and \$100 pools, and the public would be much better pleased, while the percentages could go towards swelling the racing fund and relieve the club of the charge that it is the money paid by the bookmakers for betting privileges that makes the racing fund." The writer has no knowledge from whom "Vigilant" obtained his information, but it was not Mr. Withers, who at Jerome Park on Saturday flatly contracted the statement—for all of which the movement in the West against bookmaking may succeed. If it does it will without doubt alienate one or more clubs now running under the association's rules. As to the rumor that some of the owners who have been racing under the rules this Summer are dissatisfied and claim that there is altogether too much "rule" for the associations and little or no consideration for owners, Col. Robert W. Simmons, the President of the Louisiana Jockey Club and presiding judge at Brighton Beach, recently said "he had not heard anything of the kind. He believed that the rules, as a whole, had worked well, with but little friction, but that it would be expedient to make some slight amendments at the meeting in November to such rules as the changing of names," etc. Parties well posted, however, at Cincinnati and St. Louis allege that the meeting will be anything but satisfactory, especially in the matter of dates. As it stands at present the newly organized St. Louis association is likely to have trouble. The association naturally wishes to race earlier than the middle of June, owing to the intense heat of the weather. But if it is left to the meeting at Chicago to decide they will get dates that follow Latonia, about the third week in June. Owners would be glad to have the meeting earlier, but if it comes early in May, immediately after Nashville, then they will complain that they cannot get their horses ready for the rich stakes to be run at St. Louis. Thus it looks as if there will have to be a conflict between Cincinnati and St. Louis or meetings limited to five or six days.—World.

The Four Grinsteads.

The prospects of a match between Mr. Baldwin's four yearlings by Grinstead, against a similar number of Mr. Lorillard's yearlings by Mortemer, gives them great interest at the present time both at home and abroad, and so this week we give the following description of them, sent us by a gentleman attached to this paper now visiting Los Angeles. The first seen was Bonita, from Maggie Emerson, a rich bay filly 14 1/2 hands, and almost perfect in form. The head, neck, legs and feet are very good. The back short, the coupling perfect, and the quarters immensely strong. The hocks and knees are immense but well formed. The stride is also immense. In disposition she is as gentle as a lamb, but at the same time full of vitality.

Next to Bonita the best of the two fillies, if there is any choice in them, comes Primero, from Jennie B, a bright chestnut colt, 15 hands, with hind feet white and a strong blaze down the face. The grand physical points of Bonita are even improved upon in this wonderful yearling and while he may be set down as a perfect racer in form he may also be set down as the finest colt of his age in the State. He is also gentle in disposition but full of vitality. His stride is immense. Of the four we prefer these two

Next in excellence comes Silver Cloud, a bright bay colt from Experiment, with two white feet and star, 14 1/2 hands, much of the same form as Bonita, and perhaps in the opinion of many would be considered her equal. To us he did not seem to have the same substance and strength. Yet there is a keenness in his eye that bespeaks great courage, and may yet put him on the top of the list for endurance, if not for speed. Next and last is Santa Anita Belle, from Santa Anita, a dark, rich, bay filly, 14 1/2 hands, one white foot and star, and very beautiful, in configuration, with wonderful legs, hocks and knees. She does not, however, impress one as a future racer like Bonita and Primero. The condition and health of the four colts is perfect, and their gentleness bespeaks the kind and wise treatment they have so far received. They are all an honor to Grinstead, Santa Anita Farm, the County, and the State. If good luck attends them, and the contemplated match is made, it will become Mr. Lorillard to look over his stock of Mortemeres very closely to find their match as two-year or three-year-olds. Mr. Baldwin can back his lot with safety. There are many other animals at Santa Anita worth seeing, and before I leave the district I shall pay the place another visit.

During the Stockton fair W. B. Todhunter, of Sacramento, purchased from W. W. Worthing, of Lodi, the trotting mare Maud W. W., by Gen. Reno, dam by Rattler, for \$2,000.

Philip Siebenbaler, of Sacramento, who has been lying dangerously ill with the erysipelas, is reported to be convalescent.

St. Gation Wins the Cesarewitch Handicap.

In the Cesarewitch Handicap, run at Newmarket, England, on the 7th, St. Gation, the dead heater for the Derby, was an easy winner, but the performance, taking into consideration the weight and distance, has never been equalled by a three-year-old on the English turf. The following is the cable report to the New York World:

LONDON, Oct. 7th.—Excellent as was the performance of Robert the Devil when he won the Cesarewitch in 1850 with 118 pounds up, it was completely eclipsed to-day by Mr. Hammond's St. Gation winning at 122 pounds, which is not only the highest weight that a three-year-old has ever won under but it is the highest weight ever carried by a winner of any age and which has only been exceeded or beaten on four occasions by horses running into a place, viz., John Davis (four years, 124 pounds, third), in 1853; Cardinal York (five years, 126 pounds, second), in 1871, and Chippendale when five and six years old, in 1831 and 1832, at 124 pounds both years. There were twenty starters, two more than last year, when the three-year-old Don Juan was the winner at 80 pounds. So certain was the talent that St. Gation would not pull through that 9 to 1 was freely offered against him at the start. He had a comparatively easy task, winning by four lengths from Lord Rosebery's four-year-old Polemic, at 84 pounds, he a neck in front of Mr. C. J. Lefevre's three-year-old French-bred colt Archiduc, at 117 pounds. The starting price was 66 to 1 against Polemic and 9 to 1 against Archiduc. The race is run under the following conditions:

The forty-sixth Cesarewitch Stakes, a handicap for three-year-olds and upward, at £25 each, £15 forfeit, £3 only if declared by Sept. 1st, with £300 added by the Jockey Club; the second to receive £200 and the third £100 out of the stakes; the winner of the Doncaster St. Leger to carry 115 lbs., the winners of a handicap value £300, after the publication of the weights on August 28th, to carry 10 lbs.; of any other handicap, 5 lbs. extra; closed with 95 subscribers, of which 34 declared. Cesarewitch Course; two miles, two furlongs and twenty-eight yards. Mr. Hammond's b c St. Gation, 3, by Rothell or The Rover, dam St. Editha, 122 lbs. 1. Lord Rosebery's b g Polemic, 4, by Speculum, dam Lady Caroline, 84 lbs. 2. Mr. C. J. Lefevre's b c Archiduc, 3, by Consul, dam The Abbess, 117 lbs. (bred in France) 3. Seventeen others ran.

Whatever may be said against St. Gation's breeding, he will now rank among the great stars of the English turf, for he has not only eclipsed the performance of Robert the Devil, but he ran a dead heat for the Derby with Harvester, which he could not have lost had it been "run off" instead of being divided, which performance he almost immediately after followed up by winning the Queen's Vase at Ascot, when he beat such horses as Corrie Roy, Tristan and Kinsky. Unfortunately for Mr. Hammond, but fortunately for those that did win the St. Leger, St. Gation was not entered for the Doncaster event. St. Gation was bred by Col. Bruce, under whose colors he ran on three occasions as a two-year-old, each of which he won, but, as they were small affairs, the combined value being but £469, he was never highly thought of for the Derby, for which he started with the odds at 100 to 8 against him. Between his running as a two and three-year-old St. Gation became Mr. Hammond's property by private sale. His future engagements include the Cambridgeshire, in which he will certainly not start, for with the penalty of fourteen pounds for the Cesarewitch, his weight is now 139 pounds. He is, however, in the great three-year-old handicap "Across the Flat," for which his weight is 122 pounds, which he will be very likely to start for, while his most important future engagement is the Eclipse Stakes, of £10,000 to the winner in 1886, for which St. Simon is also engaged. If the two do not meet before, and both keep well, the race between them will be worth a trip across the Atlantic to witness, but they ought to meet at Ascot next year.

Impressed with the evils of the touting system, the Louisville Jockey Club management has adopted the following new rule, which harring its bad grammar, will commend itself to a good many persons, although it smacks of unusual severity against an objectionable class: "No touts allowed on the grounds, and any one practicing touting, annoying or endeavoring to induce others to bet for them or upon their information will be promptly ejected and ruled off the track. Visitors so annoyed will confer a favor on the management by reporting such practices." The following new rule is also in force there: "No male person is allowed in the grand stand, bar or pooling ground without a badge, which must be worn conspicuously. Persons without badges will be promptly ejected from the grounds. This rule will apply to all alike."

John Murphy issues a sweeping challenge to turfites. He wants to match a trotter and mate against any trotter and mate in the world, or he will match two horses to run to the pole against any other two for any amount.

Mr. Case finds it profitable to own fast horses. In the form of purses and premiums for speed exhibitions his three flyers, Jay-Eye-See, Phallas and Gurgle, have netted him \$50,000 this season.

The annual fair of the Tulare Valley Agricultural Association will open next Wednesday, Oct. 22d, and continue to and include Saturday, the 25th. The speed programme contains three races for each day.

Governor Crosby, of Montana, has recently sold a two-thirds interest in his Diamond Springs breeding establishment to Charles W. Brown, of New Jersey, and E. M. C. Snively, of New York.

It is said that the circuit trotter Felix, by Nutwood, has been sold by Peter Schatz to his driver, W. H. McCarthy (Knapsack), for \$8,000.

H. H. Gross, Esq., 21 New Montgomery Street, City: Dear Sir: We take pleasure in informing you of the good work done by your Hand Grenades at our factory in Alameda yesterday. A fire caught upon the shingle roof of a large frame structure, and burned furiously, and for a time endangered our entire works. The fire was burning over about one hundred feet of surface when the alarm was given, and the men all being on the first floor, seized the Grenades and had to go up three flights of stairs to the top of the building, which is sixty feet high, and there was difficulty in gaining access to the fire on account of the steepness of the roof and the absence of cleats, which occasioned considerable delay. When the men reached the fire they instantly extinguished it by the use of your Hand Grenades, although the angles were well hurried. We believe your Grenades saved the building from total destruction. Please send us an additional supply immediately. Yours very truly, WILLIAM T. COLEMAN & Co., Agents of the Harmony Borax Co. SAN FRANCISCO, August 24, 1884.

NEW YORK AGENCY.

Mr. C. C. Potts at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

ADVERTISING RATES.

Displayed, \$1 50 per inch each insertion or pro rata for less space. Reading Notices set in briefer type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, October 18, 1884

"Unshod Hoofs."

Under the heading of "Stable and Paddock" will be found a very well written article which is copied from the *National Live Stock Journal*, Chicago. We are pleased to present it to our readers on several accounts. In the first place the writer has advanced strong arguments in favor of shoeing. And as has been previously stated we will cheerfully give publicity to views which are contrary to those we offer, and if sustained by proper proof are ready to forego previous opinions. But ably as the writer argues several of his claims are based on false premises, and his deductions therefore are, not correct. It may be proper to state that we do not believe that in all the uses to which horses are put there can be a total abrogation of metallic protection to their feet. There are cases, undoubtedly, when the wear of the horn will be greater than the growth, and then there is an absolute necessity to guard the portion that is found inadequate to perform the allotted task. That barefooted horses can be used far more generally than at present, and with beneficial results, we firmly believe; that full shoes can be dispensed with in a large majority of cases we are certain, and that the substitution of tips will remove the greatest of all causes of diseased feet, is already established in our mind. Furthermore, having tried the "daring experiment" of developing young trotters without shoes, and, in some instances, barefooted, we unhesitatingly claim that good results will follow this treatment, and though there may be exceptional cases the education will progress more favorably than when the feet are loaded with metal. As this part of the subject will be treated fully when the history of Antevolo is given we will not anticipate further than to state that he trotted in a race when a yearling in 3:01, before a nail had been driven in his feet, and his fastest "trials" since have been when barefooted. The account will show that the most serious troubles came when he was encumbered with weight, and that it is not beyond the proof to claim that barefooted work had a good deal to do with enabling him to trot "inside of 2:30" when a three-year-old. We were aware that the position taken in regard to keeping the horn dry would excite antagonism and ridicule. That has been held the great panacea for every ailment, and without further consideration than to follow old practices soaking-tubs and all manner of poultices, are called into requisition. With such a universal concurrence in the merits of maceration; an opposite course is rare. When contrary instances are presented it is generally the case that it arose from what would be considered neglect, and animals which escaped the nearly universal treatment were so little thought of, as to be left without care. Fortunately "horse history" in California presents a practical test of the value of a natural method of keeping the feet in order, and the customs of the inhabitants, before shoeing was inaugurated, resulted in feet and legs of their "mustangs," which were the admiration of every horse fancier who saw them in their primitive condition. The dry Summers after the foals were dropped, a great portion of it without dews, laid the foundation for a good foot, and when the rains came there was density of horn and a natural provision against the inroad of water. The enamel of the horn is as nearly impervious as glass, and the constant friction on the bottom of the wall and sole rounded that almost waterproof. When in use

measures were taken to harden the bottom of the foot. If the horse of the Vacquero became footsore, in place of soaking the bottom was filled with tallow and a red hot iron held in close proximity, so as to char the surface. More trying work on the feet and legs could scarcely be imagined. Galloping over ground baked to adamant hardness, going at full speed down "grades so steep that a shod horse would surely slip and probably fall; a hundred or more miles "between sun and sun," and the still more severe strain of lassoing a wild bull or grizzly bear, undergone with an absence from injury surprising to those who witnessed the great feats. When there were injuries, a large majority of them were the wearing away of the toe, and a few days' rest brought about a cure without poulticing or soaking. The oldtime poultices sustain the theories advanced in the article in this paper, but even unsupported theory would be sufficient to convince an analytical observer that soakings, especially after a part of the enamel is destroyed, and the lower portion of the tubes cut away, must be prejudicial. The natural filling of the tubes does not readily evaporate. When diluted with water and the orifices enlarged this property is destroyed and the tubes collapse. The superior density of the enamel prevents the shrinkage to the same degree and there is a constant pressure from the outside. In such a case the popular remedy is to swell the tubes again and fill them with an evanescent material that is turned into vapor when exposed to the atmosphere. As the writer of the article copied concedes that "the natural moisture is the life of the hoof," it does not require long arguments to show that the substitution of unnatural moisture must be an injury. There are other reasons for "a run to grass" proving beneficial, though, as has been stated, there is a wide difference between that and the ultra-artificial methods in vogue. "Soak well and then daub the horn with one of the many hoof ointments" is the usual advice, and though there may be cases when disease demands abnormal treatment with a natural foot to keep in order there is nothing so good as to follow as closely as possible the teachings of the Good Mother.

It certainly does not prove that all horses cannot trot barefooted to instance the case of Ethan Allen. We have it from good authority that Overman showed a mile in 2:26 when without shoes, and an eye-witness informed us that he saw Director make the first turn of the Bay District course in thirty-five seconds.

Sixteen years ago we accompanied Captain Rynders to his farm on the Passaic. Aberdeen was running in a paddock, from whence he was taken and harnessed to a sulky. Barefooted and rough as he was he showed a clip that surprised those who saw him move, and as at that time we shared in the general belief that weight on the feet was an absolute necessity, when fast trotting was to be done, we thought him the greatest trotter of the day.

Neither is the writer correct in his explanation regarding the causes which lead to the barefooted horse breaking from a trot. He is evidently without experience in the racing gait, and still retains obsolete notions of the action at the fast gallop. In place of both front feet bearing the burden almost simultaneously, "there is quite a space when one of them has the whole burden to sustain, while the square trotter brings hind and fore feet to the ground so nearly together, that neither the eye or ear can detect the difference, though the instantaneous photograph shows that the hind foot probably touches the ground first. He is also wrong that shoes are "never dispensed with," as a majority of intelligent trainers now exercise their horses barefooted, and with much better result than when the regulation training shoes—three-quarters of a pound each—were used. In place of the "question being settled beyond controversy that barefooted he will not only bolt, but absolutely refuse to go up to his full speed." Altogether the fastest trials are made barefooted or with racing plates. After a series of trials, Mr. Winters thought there was a second in the mile in favor of plates over barefooted; the old estimate between shoes and plates was three seconds, and as for bolting, in ninety-nine cases in a hundred it results from other causes than painful feet. Mr. Winters' estimate was formed from faster time being made in races than in previous trials, and though, doubtless, there is a gain from the sharp edge of the plate getting a better hold of the ground, trials are scarcely ever run as desperately as actual races, neither are the horses as carefully "pointed" for the effort.

A "veteran teamster" might gravely inform the questioner that spirits of turpentine, gin, and black pepper, is an infallible cure for "bellyache"; that "hooks" must be cut out or the animal go blind; that the only remedy for "lampers" was a redhot iron; that "opening the hoof" was the sure enough thing to prevent contraction, and a hundred other wise sayings of a century ago, more to be depended upon than the boasted intelligence of the present, and yet conviction not follow. Some of the heaviest truck teams of San Francisco have been working satisfac-

factorily for a long enough time to offer a fair test, with tips in place of heavy shoes with calkins all around.

Notwithstanding the contrary claim of the *Live Stock Journal*, the most trying time to barefooted horses here is that of Winter. All of our experiments have been made in Oakland with occasional trips to San Francisco, and short stays at other courses. The Oakland streets are macadamized, the drives in the vicinity are macadam, gravel-coated and natural soil. By far the largest portion of road-driving is on the macadam, and the top covering is as trying to horseshoes as can be. When X. X. wore shoes three weeks was the longest time that an ordinary front shoe would wear, two weeks would grind away the hind shoe so that the heads of the nails were worn out, and the outer part of the shoe to an edge. That is during the Winter season when the wet added to the cutting properties of the grit, the same as putting water on a grindstone. Barefooted there must necessarily be some softening of the horn and the attrition more rapid. During the dry season there is a superabundance of horn and frequent dressings are necessary; in the wet there has been so far a surplus, but as he is not driven so frequently, a just estimate cannot be formed. It is two years ago last March since X. X. wore any metal on his feet, excepting a trial of malleable iron tips in front to test the wear of that kind of material. These were worn for four and five weeks respectively, being allowed to stay on as long as the nails would hold. This was longer than either steel or iron tips had remained on before, and was probably owing to the trial being made during the early summer when the streets were dry.

Palo Alto Importations.

Not having seen the last consignment of thoroughbred mares to Palo Alto, which were purchased in England in time to couple them with the famous sires of that country, we cannot write of their forms, but from accompanying descriptions they are of proper shape as well as being highly bred. It is certainly a very desirable addition to the blood-stock of California, and the advent of their progeny will be anxiously looked for by the people of all parts of the land. The benefits which have followed the importation of sires have been so pronounced that it is safe to predict satisfactory result from the introduction of dams, and that the mixture of foreign and native strains be equally as successful in producing animals of high caste when the parentage is reversed. We have not the least doubt that this will be made apparent as soon as the progeny are old enough to be put in training, and that the English mares will do well we feel assured. From what we have seen and heard Flood and Shannon are soon to take a prominent position as sires of racehorses. The Shannons are endowed with the first great attributes of a racehorse, speed, and his half-brother, Flood, is likely to be equally as "prepotent." This addition will swell the Palo Alto stud to fifty thoroughbred mares, not counting those which are in the trotting department, and with that number of highly bred dams, it will take a prominent position among the stud farms of America.

The Embryo Stakes.

Two weeks from to-day, viz: Saturday, Nov. 1st, in accordance with the conditions under which nominations were made is the time for the decision of the Embryo Stakes for foals of 1881 and 1882. The track selected by the managers is the Oakland Trotting Park, and under the national rules—the Embryo being a member of the National Trotting Association—the races will commence at 1 p. m. Ten days previous to the time fixed for trotting the forfeit is due and those who did not "declare out" on the first day of September last, must notify the Secretary, Ben E. Harris, 1609 Washington street, on or before that date or they will be held for the whole amount of the stake, \$100, the forfeit being \$25. Those who did not declare out on the 1st. ult., probably intend to trot unless something has happened to their colts since that time. Now that the rain which came so copiously has stopped the chances are favorable for good weather at the time fixed, but if the track is not good then the races will be trotted on the first day thereafter when it is in proper condition.

Dairy Cattle.

The Holstein and Ayrshire bulls for sale at Gov. Stanford's Vina farm, as will be seen by reference to the advertisement, are offered at prices that place it within the reach of every farmer or dairyman to improve his stock by the introduction of these standard cattle. The bulls are all bred from pure stock with pedigrees running in unbroken lines through the Holstein and Ayrshire Herd Books, and as they are both great milk breeds there is room for them in almost every township in the State. The opportunity to secure such stock at the low prices does not occur often.

Reportorial Freshness.

The special San Jose Fair correspondent of the BREEDER AND SPORTSMAN says: "Garfield beat Bachelor a good race of two miles in 3:37. Howson's riding on the winner was a great deal criticized by the Garfield party, who accused him of riding all over the track and managing the horse as if he wanted to lose with him. The fact was that both jockeys went away with orders to make the running. At the finish Bachelor surrendered, but Garfield was so groggy from exhaustion that he could not keep straight, and staggered to the post."

It appears as though the correspondent was groggy when he wrote the above. Anyone who has ever seen Garfield run in a race will admit that he appears tired before the race commences. Two miles in 3:37, and running on the word "go," will be apt to tire most horses. Appleby on Bachelor set the pace (both jockeys ordered to make the running) and both horses were done for when they completed one mile and one-half in 2:40, head and head. The truth of the matter is the Garfield party did not accuse, as is stated, and George's riding was praised by all fair-minded people. The race was the best Garfield ever ran.—*Sacramento Bee*.

There is a story of a Western Member of Congress, who, after spending a night reading "The Gun Maker of Moscow," rose in his place in the House the next morning, and said: "Mr. Speaker: I want to hit somebody." The young man who prepares the turf column for the *Bee* frequently reminds us of that emotional Congressman. He seems to be often attacked with a mania for hitting somebody. Probably he thinks that is the best way to demonstrate his fitness for his journalistic position. It is a matter of opinion, but the self-sufficient way in which he hurls the bridges behind him when he sets out on a wild foray, marks him as callow, if not worse. We cannot but think the young man means well, consequently, we do not, as a rule, notice his war whoops, or seek to disturb that monumental self-complacency that is peculiarly his. But the above extract from the *Bee* is an exception. So much of it as is purely Alexandrian smartness he is welcome to, but one line we cannot but notice from its very oddity. He says: "The truth is the Garfield party did not accuse," etc. The oddity is in this, that while it pretends to proclaim a truth, it is, in fact, very far from it. The representative of the *Breeder and Sportsman*, at the San Jose meeting, had eyes and ears and could see and hear. The Garfield party did to him personally make the charge just so far as was reported in these columns. There is no mistake about it. What we said then was to correct a wrong impression and place Howson right. It was not a matter of much moment, but was referred to because the charge might, at some future time, be raised as collateral matter to Howson's disadvantage. The sooner it was set right the less would be the danger of injustice. It is not in issue now, and we hope it never will be. The incident has been revived in our mind by the above quoted statement, that we had circulated a deliberate untruth. We might retort in kind, but as we do not habitually use hard words, we submit the facts and leave the turf editor of the *Bee* to make the application himself.

Guy Wilkes and Adair.

Elsewhere appears an account of the match which was won by Guy Wilkes on the Bay District Course last Saturday. That it was a good race notwithstanding that the first and second heats were won very easily was generally conceded, and those who lost admitted that their champion had come up to expectations while his victorious competitor did better than they thought he was capable of showing. He is certainly one of the most promising horses that have appeared this season, and is a worthy representative of the great family to which he belongs. Inasmuch as we will soon present his picture, accompanied with description and history, there is no necessity for anticipating it in part at present. Adair made a good showing, especially in the third heat, and though defeated has gained in reputation. He must have trotted from the half mile pole home in the last heat inside of 1:08, and with another year or two to perfect his capacity is likely to be troublesome to the best. He was not more than half a second behind Wilkes in the concluding heat so that his mark must have been inside of 2:20, which is a right good mark for a five year-old.

The Auction Sale To-Day.

The auction sale of horses belonging to H. W. Seale of Mayfield comes off to-day. The 10:40 train from Fourth and Townsend streets, will reach Mayfield in time for the sale, and those who attend can return after the sale is over and reach San Francisco in time for dinner.

The horses offered are of high class, embracing carriage horses, roadsters, trotting colts and finely bred broodmares. That good bargains will be obtained is beyond question, and those who are looking for valuable animals, at a moderate price, should embrace the opportunity offered.

The Baldwin Stake.

By the courtesy of the original subscribers to the Baldwin Stake, who gave their consent to allow others to come in, another name has been added to the list. This is James Mee who has lately become the owner of Garfield, and from the fine two-mile race which Garfield ran in San Jose he is well worthy of being named in the longer distance. As the Baldwin is a poststake, subscribers are not restricted in their choice of representatives, and have until the day before the race, to name what they will run. As the stake is "play or pay" there is nearly a certainty that four horses will start, and that many running four miles will be an attractive feature of the meeting. In fact, four good horses engaged in a race at that distance is about as many as spectators can watch closely. Tactics come into play as well as speed and the management and riding have a great deal to do with success or failure. "Wait and win" may be good advice but it is evident that if these should be the directions to all, without modifications, the benefit would accrue to the animal which could gallop to the head of the stretch and have the "first" of his competitors in a rush of a quarter of a mile. Horses which have the capacity to rate along at a good pace, that can be "placed" without undue fatigue on the part of the jockey, and when "called upon," have a resource of speed for a final rush are the best qualified for a race of four miles. While judgment and a knowledge of pace are essential requisites on the part of the rider, there is an opportunity on American courses, to aid him by giving the time in which fractions of the race are run. Even with that assistance the jockey must be guided by what he discovers, and instructions beforehand may prove a wrong course to follow. There may be peculiar features which demand a reversal of the agreed management, and the jockey who notes occurring circumstances, taking every advantage of the varying changes, has the best qualifications when a long race is on the cards.

Bay District Trotting Meeting.

A slight amendment will be noticed in the advertisement of the Bay District Trotting Meeting this week, harring Manon from the purse for the 2:21 class. This exception will place the purse on a good footing. Guy Wilkes is now ineligibile from his record made last Saturday and the race is brought to that uncertainty as to the result that is essential to a good day's sport. Adair, Sister, Vanderlynn, James H., Magdallah and B. B., would find the pace well suited to them and will probably all enter. In regard to the purse for named four-year-olds and under, the question has been several times asked whether or not the association will require the whole number named, twelve, to fill. On consultation with Mr. Hinchman we are advised that he does not expect so much, but if a reasonable number of those invited, say seven or eight, respond the purse will be given without rebate.

A Valuable Mare for Sale.

On the first day of the trotting meeting, Bay District course, James Garland will offer his four-year-old filly for sale at auction. By Electioneer, from Accident, by Elmo, her blood is of the right sort, and then she is a big, fine looking mare, and a "sure enough trotter." Now that Mr. Garland has made his debut on the "legitimate turf," and is the owner of so good a colt as Beaconsfield, he will dispose of ever so promising a young trotter as Regina, and whoever succeeds in getting her can be congratulated.

Closing of Entries.

On Thursday next the entries to the trotting purses offered by the Bay District Associations close. As will be learned from the advertisement the classes are 2:27, 2:24, 2:21, and for named four and three-year-olds. There are a number of horses still in training, which are eligible, and likely to show well in the classes mentioned, and there should be large fields to engage in what can be termed the last meeting of the season. The dates fixed for trotting are November 5th, 6th, 6th and 8th.

Unauthorized English.

The challenge that was issued to trot the Nutwood colt, Jim Mulvenna, against Fred Arnold's Nephew colt, Ha Ha, for \$5,000 a side, three in five, has been withdrawn as publicly as it was made. The challenge seems to have been an unauthorized bluff.—*Stockton Herald*.

The meaning of the above extract is very far from clear. The proposition to match the horses originated with some, Stockton parties who were at San Jose during the fair there and made the first offer. The owners of Mulvenna were not present, but Mr. J. P. Sargent was seen later by one of his friends and consented to make the race. In the meantime the Stocktonians had disappeared and as they did not show up afterward the challenge was published to inform all whom it might concern that the match could be made. It came to us from Mr. Sargent direct. We do not take him to be a man given to bluffing, but even if he was how he, the owner of the horse, speaking for himself could make an "unauthorized bluff" is too much for the English language as we understand it.

The Guy Wilkes-Adair Match.

This race was trotted at the Bay District Course, last Saturday, and drew a large attendance of turf habitués, but did not seem to stir the blood of the outside world to any appreciable degree. The day was snperb for the race, and the course was in capital order, the homestretch as perfect as the most exacting could desire, although the drivers reported that it was somewhat heavy on the first turn, and a part of the distance on the backstretch. In the pools Guy Wilkes was largely the favorite, bringing \$100 to \$50 on Adair. From the capital race that Adair trotted in Stockton it seemed that the backers of the stallion were rather too sanguine in their estimate, though the race proved that on that day, at least, still longer odds would have been justified. So far, Guy Wilkes has won every race that he has started in, and in his initial effort, made on the Bay District course in August, he gained a record of 2:21. Since then he has been a winner all through the circuit and proved himself a first-class campaigner, as well as a horse of spirit and endurance. He is fashionably bred, being by George Wilkes, his dam by Mambino Patchen, and his granddam by Seeley's American Star. He is of fine shape and immense substance, and is likely to be of great value in the stud. He was foaled in 1878, bred in Kentucky, and was purchased last year by William Corbett of San Mateo. His competitor, Adair, is also a very fine looking animal, one year younger than Wilkes, and was bred by his present owner, E. H. Miller, Jr. He is by Electioneer, his dam, Addie Lee, by a Blackhawk horse. He is a "rangy" big gelding, with a very easy way of going, action that is nearly perfect and of the improving kind. At 3 years old he won the first Stanford Stake, and this Fall he has won at Stockton and San Jose. At Sacramento he beat Wilkes a second heat in 2:21, and from the display made then and his good races of four heats each when he heat Sister and others, influenced the making of the match. It was for \$1,500 a side, heats of a mile, best three in five. Not much time was lost in scoring as at the second attempt a very good start was effected for the first heat. Adair had the pole and the pace was only moderate on the first turn, their being scarcely any difference at the quarter pole in 36 1/2 seconds. All the way along the backstretch the horses were so even that it was out of the question to tell which reached the half-mile in 1:10. Soon after passing that point, Guy Wilkes took the lead and opened a gap of three lengths at the "head" of the homestretch. Adair seemed to be gaining ground, when he broke at the two-mile trotting distance, Guy Wilkes jogging in an easy winner in 2:20. After the heat, pools ranged from four and five to one in favor of Guy Wilkes, and he won the second heat so easily that in the language of the stable boys, it was "a tanyard to a shoestring" that he would gain the victory. He had the advantage of the inside, which he improved by opening a gap of two lengths in a hundred yards, and was still further in the lead at the quarter in 37 1/2 seconds. The half was made in 1:11, when Wilkes had a lead of several lengths, and Adair breaking in his effort to close the gap, all that was required of the favorite was to come in at his leisure, in 2:21. The third heat proved much the best of the series, and for a short time the hopes of the backers of Adair did not appear so gloomy. Wilkes led again from the start, and at the quarter, in 36 1/2 seconds, he was two lengths in advance. He went very fast down the backstretch, reaching the half in 1:10. Adair being six lengths in the rear. From that point both trotted well, Goldsmith keeping his horse moving, and the driver of Adair doing everything in his power to enhance the speed of his horse. He was gaining on the semi-circle, closing the gap rapidly as he came down the stretch. He could not reach the leader, however, Guy Wilkes winning by a good length, in 2:19 1/2.

BAY DISTRICT COURSE, Oct. 11th, 1884—Match for \$3,000.  
Guy Wilkes, b. h., by Geo. Wilkes, dam Lady Bunker, by Mambino Patchen—Wm. Corbett..... Goldsmith 1 1 1  
Adair, b. g., by Electioneer, dam Addie Lee, by Culver's Black Hawk—E. H. Miller Jr..... Smith 2 2 2  
Time, 2:20 1/2, 2:21 1/2, 2:19 1/2.

The Electioneer filly Regina, four years old, owned by mes Garland, will be sold at auction, by Messrs. Killip & Co., at the Bay District Track on Nov. 5th. She will be entered in the purse for named four-year-olds, and under set for that day and will be sold with the engagement. She is by Electioneer, her dam by Elmo, and is the making of a trotter and a good one. She would also be a first-class mare for any breeding farm being well bred, of good size, style and action.

Andy McDowell has returned from the East, and Belle Echo is on the way with the Santa Anita Stable.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

W. G. C., San Francisco:  
Will you kindly advise me, though the columns of your valuable paper, where a communication addressed to Mr. Ryan would reach him. I read a letter from him last week in your paper, but it did not give address. Answer—Mr. Ryan's post office is Bethany, Contra Costa County.

Beginner, San Francisco:  
What date of the BREEDER AND SPORTSMAN contained Myer's article on distance running? Answer—The issue of March 1st, 1884.

W. A. P., San Jose, Cal.  
Is the Nutwood stallion, Jim Mulvenna, entitled to registry in the Trotting Register or Stud Book? Answer—The standard of the Breeder's Stud Book is 2:30; that of the Trotting Register, 2:40. As Mulvenna has a record of 2:27 1/2, he is standard in his own right and is entitled to registry in either or both the books.

H. W. O., Downville, Cal.  
Please answer through your columns and give a summary of Thad Stevens, True Blue, and Joe Daniels race; how many heats, what horses were in, and heats won by each horse, also what heat did True Blue break down in. Answer—

OCEAN VIEW PARK, San Francisco, Nov. 15, 1873.—Purse and stake of \$20,000, for all ages; \$2,000 entrance; post entry; \$13,000 to first horse, \$5,000 to second, \$2,000 to third; four mile heats; eight nominations.  
George Treat's ch. b. Thad Stevens, by Langford, dam Mary Chilton, aged, 11 1/2 lbs..... Ross 3 3 1 1  
G. A. Johnson's ch. b. Joe Daniels, by Imp. Australian, dam Dolly Carter, 4 years, 108 lbs..... Palmer 1 2 2 2  
J. F. Chamberlain's b. h. True Blue, by Lexington, dam Babylon, 4 years, 108 lbs..... Barber 2 1 1 1  
Owner's b. m. Mamie Hall, by Norfolk, dam Miami, aged, 11 1/2 lbs.....  
Time, 7:45, 8:08, 7:57, 8:20.

## Stock Premiums at San Jose.

Horses—Stallions, not thoroughbred—First, Adolph and 7 colts; Robert Welch.

Mares, not thoroughbred—First, Clyde and 3 colts; J. R. Bane.

Clydesdale stallions—First, Duke; James Roberts. Norman stallions—First, Adolph, Robert Welch; second, Marsuli; M. Carter.

Graded draft stallions, 4 years old and over—First, Cognac, I. E. Snell; second, Napoleon, J. Lendrum.

Graded draft stallions, 2 years old and over—First, Secesh, J. R. Bane; second, Lafayette, Manser Brothers.

Graded draft horses, 1-year-old stallions—First, Laurel Wood Chief, M. Jordan; second, Punch, James Lendrum.

Graded draft stallions, under 1 year old—First, Louis, Manser Brothers; second, Parnell, M. Jordan.

Graded draft mares, 4 years old and over—First, Kate, E. Britton; second, Belle, J. Cooney.

Graded draft mares, 3 years old—First, Fan, James Lendrum; second, Lady Nona, T. E. Snell.

Graded draft mares, 2 years old—First, Katie Reynolds, D. Reynolds; second, Topsy, E. Britton.

Graded draft mares, 1 year old—First, Jane, Mauser Bros.; second, Jennie Ribhon, T. E. Snell.

Graded draft mares—Sucking colt—First, Jessie, Robert Welsh; second, Pet, James Lendrum.

Horses of all work—Stallions, 4 years old and over—First, Gus Bare, L. Bare; second, H. G. B., J. R. Weller.

Horses for all work—3 year old, stallions—First, Young St. Lawrence, J. Weatherhead.

Horses for all work—1 year old, stallion—First, Hunter Boy, M. Gregg; second, Electric Light, Ed Younger.

Sucking colts—First, Relief, B. E. Harris.

Mares—4 years old and over—First, Bogus, R. H. Walton; second, Comet, J. R. Bane.

Mares—2 years old—First, Betsy, Wm. Jackson.

Mares—1 year old—First, No Name, Ed Younger.

Roadster mares—4 years old and over—First, Lady Nutwood, E. Topps; second, Jennie B., T. W. Barstow.

Three years old—First, Beauty, T. W. Barston.

Two years old—First, Delia, J. Russell; second, Nellie Jones, J. Barry.

One year old—First, Echola, B. E. Harris.

Gelding roadsters—First, C. H. C., Corey & Roberts; second, Whisper, Ed Younger.

Carriage horses—First, Colonel and Elmo, B. E. Harris; second, Fan and Fancy, B. E. Harris.

Mares—under one year old—First, Dudess, Ed Younger; second, Lily, E. Britton.

Road stallion—four years old and over—First, Grosvenor, Jas. Boyd; second, Nutwood Boy, J. R. Buffington.

Three years old—First, Vernon Boy, Orrin Taber; second, California Nutwood, M. Carter.

Two years old—First, Grand Mogul, M. Mendelhall; second, John Barry, J. Barry.

One year old—First, Sir Whipple, B. E. Harris; second, Argent, R. H. Walton.

Roadster teams—First, Billy and Niagara, T. Gautt; second, Jenny and Fanny, J. Johnston.

Saddle horses—First, Dick, Jas. Boyd.

Jacks—First, King Alfonso, J. Boyd.

Jennies—First, Fanny and colt, J. Boyd.

## CATTLE.

Durham bulls, three years old and over—First, First Duke Alameda, Mary E. Bradley; second, Forest King, C. Younger.

Two years old—First, Kirklington F. H., Ed Younger; second, Fourth Duke Alameda, J. Boyd.

Calves—First, Goliah, Mary E. Bradley; second, Third Kirklington, Ed. Younger.

Durham cow and calf—First, Mahel B. and calf, Mary E. Bradley; second, Second Rose of Forest Home, C. Younger.

Durham cows, one year old and over—First, Lady Howard, Mary E. Bradley; second, Lorena, Mary E. Bradley.

Durham heifer calf—First, Bettie B., Mary E. Bradley; second, Lady Kate, Mary E. Bradley.

Ayrshire bulls, three years old and over—First, Narragansett Chief, J. A. Ozier; second, Archie, Geo. Bement.

One year old—First, Electioneer, Geo. Bement.

Calf—First, Clipper, Geo. Bement.

Ayrshire cow and calf—First, Stellina, Geo. Bement.

Ayrshire cow, three year old or over—First, Anydia Second; second, Highland Mary, Geo. Bement.

Two years old—First, Sihyl, Geo. Bement.

One year old—First, Marion, Geo. Bement.

Ayrshire heifer calf—First, Sybilla, Geo. Bement.

Jersey bull, three years old and over—First, Jersey Boy, C. B. Polhemus; second, Jersey Prince, Thos. Waite.

Two year old—First, David, C. B. Polhemus; second, Fred Gehhardt, C. B. Polhemus.

One year old—First, Billy George, C. B. Polhemus; second, John Rooney, Thos. Waite.

Calf—First, Rajah; second, Buttons, C. B. Polhemus.

Jersey cow and calf—First, Pearl; second, Blackie, C. B. Polhemus.

Three years old and over—First, Mattella, C. B. Polhemus; second, Ida, Thos. Waite.

Two years old—First, Lulu; second, Besie, C. B. Polhemus.

One year old—First, Topsy Third, Thos. Waite; second, Jersey Lily, C. B. Polhemus.

Jersey heifer calf—First, Bessie Fourth; second, Blackie, C. B. Polhemus.

Devon bulls, three-years-old and over—First, Burnett, Capt. Hutchinson.

Two years old—First, Columbia, Capt. Hutchinson.

One year old—First, Hugo Second; second, Eros, Capt. Hutchinson.

Calf—First, Biddeford, Capt. Hutchinson.

Cow and calf—First, Lovely, Capt. Hutchinson.

Devon cows, three years old and over—First, Wanda, Capt. Hutchinson.

Two years old and over—First, Lovely Thirty-sixth; second, Helena, Capt. Hutchinson.

One year old—First, Lovely Thirty-seventh; second, Lovely Forty-first, Capt. Hutchinson.

Hereford bulls, two-years-old—First, Connt Tocdegra, Capt. Kohl.

One year old—First, Vanguard, Capt. Kohl; second, Horace Twenty-sixth, R. P. Saxe.

Calf—First, Duke of Normandy, Capt. Kohl.

Hereford cows, three-years-old and over—First, Vidette; second, Tidy, Capt. Kohl.

Two years old—First, Templar; second, Triump Theora, Capt. Kohl.

Heifer calf—First, Mary 3d, Capt. Kohl; second, Kate 1st, Capt. Kohl.

Holstein bulls—3 years old and over—First, Anson, Mrs. E. D. Kaott; second, Duke B., Tyler Beach.

One year—First, Juror, H. W. Meek.

Bull calf—First, Cassius, H. W. Meek; second, Butler, Mrs. Knott.

Holstein cow and calf—First, Aggie, Lizzie and calf, H. W. Meek.

Holstein cow—3 years or over—First, Sophie, P. Blanchard; second, Nettie, P. Blanchard.

Two years old—First, Lady Bertha, H. W. Meeks; second, Rigolette, H. W. Meeks.

Heifer calf—First, Alameda Maid, H. W. Meeks; second, Marguerite, P. Blanchard.

Graded cows—3 years old and over—First, Mollie, Tyler Beach.

Hereford herd—Best five animals—First, Capt. W. Kohl.

Holstein herds—Best 5 animals—First, H. W. Meeks.

Devon herds—5 animals—First, Capt. A. J. Hutchinson.

Jersey herds—5 animals—First, C. B. Polhemus.

Ayrshire herd—6 animals—First, Geo. Bement.

Sweepstakes—Best any breed or age—First, Forest King, C. Younger.

Cow of any breed or age—First, Nevada Belle 2d, C. Younger.

Best hull and three calves—First, First Duke Alameda, Mary E. Bradley.

Sheep—Merino rams—First, Shron, A. Agnew; second, Moody, A. Agnew; third, Snakey, A. Agnew.

Merino ewes—First, Jenney and Linney, A. Agnew; second, 3 Merino ewes, A. Agnew.

Southdowns—First, Sonoma, of Redwood, best ram, Geo. Bement.

Southdown ewee—Geo. Bement, of Redwood City, first and second premiums.

Southdown sheep—Best pen, 3 rams and lambs—First, Geo. Bement.

Best pen, 5 ewe lambs—First, Geo. Bement.

Cotswold sheep—Rams—First, Early Morn, Ed. Younger.

Ewes—First, Ed. Younger.

Pen of 3 ram lambs—First, Ed. Younger.

Pen of 5 ewes—First, Ed. Younger.

Graded ewes—First, Elaine, A. Agnew.

Goats—Angora bucks—First, Prince of Monterey, C. P. Bailey; second, Mariposa Chief, C. P. Bailey.

Goats—Best 3 does—First, C. P. Bailey.

Best 3 kids—First, C. P. Bailey.

Swine—Berkshire, one-year-old boars—First, Isaac, E. G. Soakey; second, Waldo, Tyler Beach.

Under one year old—First, Early, S. M. Stock Farm; second, Junho, Mary E. Bradley.

Berkshire sow, one year or over—First, Hopton Lass, S. M. Stock Farm; second, Lizzie First, Mary E. Bradley.

Under one year—First, Flora, Tyler Beach; second, Maggie B., Tyler Beach.

Essex boar, under one year—First, Tarbox, Tyler Beach.

Essex sow, one year or over—First, Blonde, Tyler Beach.

Under one year—First, Black Ann, Tyler Beach.

Poland China boar, under one year old—First, Indicator, M. D. Rucker; second, Rattler, M. D. Rucker.

Poland China sows, one year old and over—First, Bessie R.; second, Gallops Bess, W. D. Rucker.

Under one year old—First, Black Idyl; second, California Belle, W. D. Rucker.

Five pigs, any breed, under six months—First, Berkshire, S. M. Stock Farm.

Finest and fattest hog—First, Lizzie, 4, Mary E. Bradley.

Poultry—Plymouth Rocks, Mrs. L. J. Watkins.

Light Brahmas—Thos. Waite.

Buff Cochins—Thos. Waite.

Partridge Cochins—O. J. Albee.

White Leghorns—Mrs. L. J. Watkins.

Brown Leghorns—Thomas Waite.

White-faced Black-Spanish—Mrs. L. J. Watkins.

Langshanes—M. E. Newhall.

White-crested Black Polands—O. J. Albee.

Silver-spangled Hamburgs—Thos. Waite.

Houdans—Mrs. L. J. Watkins.

Black-breasted Red Game Bantams—O. J. Albee.

Black-breasted Red Game Fowls—Geo. Bement.

Duck Wing Bantams—M. E. Newhall.

Bronze turkeys—Thomas Waite.

Bremen geese, best pair—L. J. Watkins.

Rouen ducks—Thomas Waite.

Pekin ducks—Mrs. L. J. Watkins.

Coop of 12 chicks—Mrs. L. J. Watkins.

Best and largest collection—First, Mrs. L. J. Watkins; second, Thomas Waite.

## HERD AND SWINE.

## Why Salt is Beneficial to Live Stock.

It is not generally fully understood why salt is given to live stock, or why it is in any way advantageous when given. After food is taken into the stomach, there is at once a race set up between the digestive powers and the natural tendency to fermentation common to all articles used as food when placed under the influence of warmth and moisture. If the digestive powers are vigorous, and the food taken is within the limit of the powers of the stomach to at once set up the converting process, and continue this with such vigor as to intercept the fermentive process, then the natural powers are equal to every emergency, and condiments may be said not to be needed. If the digestive process goes on with full force, this condition leads us to infer that no artificial aid is needed from salt or anything else; for at best it should only be considered an artificial aid to digestion.

Salt preserves from decay by preventing the fermentive process, whether this be tested within the stomach, or by packing meat or other articles in this material in the usual manner. This power to prevent fermentation after food is taken, prolongs the time in which the stomach has opportunity to complete the digestive process, and hence by the uses of this article food taken in excess may be got rid of without present apparent harm. I say present apparent harm because all such occurrences are an over-tax upon digestion, and time is required to regain the former tone. As a collaborator with salt; I would mention here that glycerine is of late found to have a power, and by no means an uncertain one, to prevent fermentation taken upon after partaking of food. I would therefore suggest that in the case of young stock, calves or pigs, during the first process of artificial feeding, both salt and glycerine, given together or separate, be used moderately in case there be the slightest evidence of indigestion, or if we have reason to suspect that at any time too much food has been taken. Glycerine enters into some of the best combinations in use for preventing decay in meats and other perishable articles of food. Its use upon human subjects proves its great power in preventing the tendency to fermentation above referred to. This, with young calves, is a common cause of scouring; and I venture the opinion that a skillful use of the combination named would lessen our trials

with the digestive apparatus of young calves. Glycerine, at thirty cents per pound, will be found to be a good investment, when its aid is required.

The liability to fermentation when stock is upon a full supply of grass is greater than when they are upon dry food, as usually given, and salt should be within reach at all times. When the fermentive process is set up in the stomach and intestines, there is a demand created for some corrective, and animals so disturbed will eat earth with avidity; this acts as an absorbent, and in a slight degree neutralizes acid generated in the fermentive process. Careful observation will show that when any disturbance occurs in the digestive organs of the kind referred to, animals so affected will eat salt if it is placed within their reach; and it is better to leave Nature to seek the remedy, when needed, than to give at stated intervals free portions of an article which is mainly of use, as stated, to meet specific indications. Authorities speak of salt, as a good laxative, but when cattle are on grass, they need no laxative. In fact, they rarely do at any season of the year. Yet, when the full laxative effect of any article is needed, it can be had by giving a pound of salt, the irritating effect upon the mucous lining of the intestinal tract likely to follow being prevented or abated by giving a somewhat liberal portion of water with the salt. And it is true of the article named as of common salts, so often given as a purgative, that the larger the amount of water given in connection, the less of the other article is required to produce a certain laxative effect.

The fermentation occurring in the digestive apparatus is favorable to the existence of worms in the intestinal canal of animals, even if they are not engendered by this process. The cattle of Brazil are said to be subject to internal parasites, and the owners of herds have long since learned that salt is obnoxious to these intruders; hence they give, twice a year, a pound of salt to each animal, after which a manifest improvement takes place, and for a time there is an absence of the worms. It would undoubtedly be better to maintain a condition of the internal parts antagonistic to the parasites, by keeping salt within reach of the stock at all times, rather than to purge the worms out of them twice a year, leaving a condition to follow, at once, in every way favorable to their reappearance. These thoughts do not apply alone to Brazil, but with equal force to our own country and live stock.—*Live Stock Journal*.

## Tenth Months' Lactation.

This is an appropriate time to discuss the period of lactation. Some dairymen seem to be governed simply by a desire to be relieved from the labor of milking, in drying up their cows before winter sets in; and the result is, that many herds are dried in seven to eight months after coming into milk. And this premature drying up of the milk secretions becomes a confirmed habit of the cows and greatly reduces their value. The object in keeping a herd of dairy cows, is a reasonable profit from the production of milk, and it is the aggregate production of the season that produces the profit.

A cow that yields a full quantity of milk at the flush of the season, and dries at seven to eight months, cannot be a profitable cow, in any such sense as one that has a season of ten months. This drying a cow off to get rid of milking her is very like a man who should husk three-fourths of his corn field, and leave the rest to get rid of the labor of husking. There is little doubt that this indolent habit of dairymen who patronize the cheese factory, is the active cause of the very low average milk yield; for a cow with a short period of lactation will fall away rapidly after three months, and these make her aggregate yield very small. About 3,000 lbs. is the average of herds as shown by factory statistics in the Eastern and Middle States. If any one can figure a profit on 3,000 lbs. of milk for the food, labor and capital invested in a cow per year, he must figure it on very cheap land and cheap labor.

Instead of drying off cows at the end of a short factory season, every effort should be made to lengthen the milking period to ten months. An average of even 15 lbs. per day, for 300 days, give an aggregate of 4,500 lbs. Certainly no dairyman should be satisfied with a less yield than this. Every dairyman who has tested his herd separately, has been surprised to find that some of his cows yielding the largest weight of milk in the flush, are not those that yield the largest amount for the season. Cows that yield moderately at the best, but hold this moderate yield steadily, produce the most milk in the season. The cow with staying qualities is the hopeful one. Some milk a heifer with her first calf a year or over, allowing her to have her second calf fourteen to sixteen months from the time of dropping the first one. This is supposed to fix a long milking habit, and she is more likely to hold out her milk for the period of ten months. Two months is sufficient time to recuperate in, with good feeding, and a dairyman who does not believe in full feeding does not deserve to pay expenses in the business.

We have never known a large yielder of milk or butter with a short period of lactation. Not one of the Jerseys yielding as much as 500 lbs. of butter per year, but has a long period. Of Holsteins yielding even 10,000 lbs. of milk, not one has a short period. Nearly all the great producers are difficult to dry up at all.

It is so plain that every dairymen ought to see that the first requisite to large production is a long period of lactation, and he should test all his cows and discard those not producing at least 4,000 lbs. of milk; and, after feeding with special reference to lengthening the milking period, a cow should be discarded that goes dry at eight to nine months. Good feeding will sometimes lengthen the period, and when this is the case, she may be a few years determining how far she may be improved. But the dairyman should have a standard of production, below which he will not keep a cow in his herd. When he does this and tests each cow, he is in the way of selecting a paying herd.

## The Guernesey and Short-horn.

Mr. Blundell, of Southampton, England, is contributing a series of articles to the *Agricultural Gazette* on the "Improvement of Dairy Stock." One of the best class of cows he finds is a cross of the Guernesey hull on good milking Short-horn cows. In selecting the latter for this purpose, he would not only endeavor to have them as perfect dairy cows as possible, but also of the same colors and shades of the Guernesey; for, he says, such a tick is a happier one than when the colors differ. For example: As I understand, as I would not take a pure red or white, or roan, prismatic, as I suppose, that he would choose broken colors of red and white. I consider this a mere fancy, and that any true color of Short-horn cows would make as good a cross as these he prefers, provided the dairy qualities were equal.

But here is something of which he speaks very decidedly, and I presume he may be very correct in it, as many exp ri-

ments have been made in the south of England of such breeding; that is, that the cross of the Guernsey bull on the Short-horn cow, when both are properly selected, has proved universally successful, whereas the cross of the Short-horn bull on the Guernsey cow has resulted in a failure to make good dairy cows of their offspring. Now, with all due humility, I suggest that this failure did not ensue from their reverse cross, but in consequence of the Short-horn bull not being from a milking family. I see in the cross of this one, both sides are of milking families, in the other, only one probably was—the Guernsey cow.

I do not know of any experiments having been made in America of crossing Guernsey bulls on full-bred Short-horn cows, but some very successful ones have been carried out by crossing him on high-grade Short-horn females, and I am of the opinion that it is a cross which is destined to be highly popular among us. The offspring of such are hardy and of good constitution, generally rather larger than the Guernseys, finer in form, and although their milk may not often prove so rich, there is more of it, and it is of superior quality to that of ordinary native cows. They when dried off these native cows fatten cheaply, and turn out an extra carcass of beef.

Milking.

It is not every dairyman who knows how to milk—some cannot, and others will not, learn. Vast numbers of good cows are ruined every year by carelessness, by neglect, and by brutality of milkers. The manner of milking and the circumstances connected therewith are often not understood, not fully appreciated by dairymen. I heard two farmers recently comparing the yield of milk from their respective herds for the past season. The receipts of one were about a third more than those of the other, and the latter said, "I cannot understand this; my feed, my water supply, and my cows are as good as yours." The reply was, "Yes; but when my milkers go to milk they understand that it means business. I won't have a poor milker around at any price, and I talk this over when I hire him, and he understands what I will have." It was evident the subject had a value which carried conviction. The society for the Prevention of Cruelty to Animals would do well to give some attention to the manner in which cows are milked in some dairies, for I am of the opinion that an investigation in this direction is much needed, and would promote the welfare of the public. The quantity of milk that a cow gives depends much upon the mode, time and regularity of milking. Cows do best that have one regular milker, and the time of milking should be carefully attended to and not be subject to variation from day to day. The udder should be brushed, and in case of any dirt on it should be cleansed by washing with a cloth and water. For if the cow has been driven through any muddy places and thus become besmeared, any dirt accidentally falling in the pail will communicate its taints to the milk. Wiping the hands and teats with the milk before milking is a very bad practice. This should always be avoided, both for the comfort of the animal and the cleanliness of the milk. The milker should have short finger nails for long nails will be sure to hurt the teat and cause irritation to the cow. There are two methods of milking—the one may be called stripping or catching the teat between the finger and thumb and stripping down the whole length of the teat. This plan is not to be recommended. The better way is to grasp the teat, one is each hand, diagonally across the bag, and press on the milk—the second, third and fourth fingers doing the main work, while the upper portion of the hand and first finger prevent the milk from returning to the udder; the milk should be drawn rapidly, and the udder completely emptied of its contents. In the flush of the season, or when cows are yielding the most milk, from eleven to twelve cows per hour will be about the rate for a competent hand.—Canadian Breeder.

Pork from the Clover Fields.

A gentleman writes us as follows: "I have on my farm twenty acres of good clover, with a creek running through the field. Would sows with pigs live on the clover during the Summer without any other food? My object is to raise stock hogs. About how many hogs would twenty acres of good clover keep?" We publish this letter and a reply to it because we know that the subject is one of general interest to farmers. In a pasture field of ten acres of mixed clover and orchard grass, including also a patch of alfalfa, we have kept our brood sows since early in the Spring, with no other feed whatever than the grass and clover that the field afforded. We should say, also, that this field has been closely pastured by a large herd of cattle since early Spring. Upon this exclusive vegetable diet our sows have kept "rolling fat," too fat, in fact. Nevertheless we do not believe that sows with a litter of pigs can do justice to them upon such exclusive vegetable diet. As to the number of hogs the field will carry: This we do not know any more than we know the amount of clover that the field will produce. Our correspondent will find that his twenty acres will keep a surprisingly large drove of hogs, and keep them well, too. To illustrate, on the 10th of May last, we placed fifteen thrifty shoats, averaging nearly one hundred pounds each, in an accurately measured half acre of alfalfa. The alfalfa at that date was about ten inches tall, and wonderfully vigorous. For a month the pigs had no other feed than this alfalfa. At the end of the month the pigs were weighed, and five removed from the field. A small gain has been made; but, evidently, this field had been greatly overstocked. Since that time we have kept the remaining ten shoats upon the half acre of alfalfa, feeding them daily two pounds of corn in the ear. The pigs have been weighed at regular intervals, and the weighings have showed a uniform and rapid gain for each pig. Our correspondent may be able to judge from these facts, something of the number of pigs his twenty-acre clover-fields will carry.—Prof. Shelton, in Industrialist.

English authorities give interesting results of cross breeding between the Merino and the heavy English sheep, which has long been a hobby with many New Zealand flock owners. For this purpose the Leicester and the Lincoln seem to have been the earlier favorites, though the Cotswold is now held in the highest esteem. It is claimed that the cross-bred animal leaves little to be desired by the advocate of wool and mutton on the same animal, the first being long, fine and lustrous, the second well lined, juicy and abundant.

A farmer says he has cured severe cases of thumps in swine with the extract of fox glove (digitalis), by administering one or two drops at a time. One drop is sufficient for a small pig, and it should be given every three hours during the day.

Dairy Farming.

In each and every department of business, men are liable to permit their anxiety to do better and accumulate wealth more easily, to run away with their judgment. This is as true so far as farm enterprise is concerned as in any other, hence many reading men, realizing the fact that money was more easily made by dairy than by grain farming, have too readily jumped at conclusions and made the change from one to the other rashly and without judgment, to realize in a very short time that they knew too little of and had prepared inadequately for the business upon which they were entering.

All changes of this description should be made with deliberation. Not only should a man be thoroughly convinced in his own mind that he was taking the right step, but doing it in the right way. A grain farm is not immediately adapted to the purposes of a dairy farm in the first place, nor are the animals to be used on it immediately available. For the first the land must be seeded down with the proper grasses after being thoroughly and carefully prepared for permanent pasture; for the second the most scrupulous care is required in the selection only of such cows and heifers as are known to be of the best milking qualities. When these are found in sufficient numbers, a first class male having the same family reputation is in order, and as the bull is generally half this herd, equal care must be taken to get the best for the purpose. If these three points are carefully and judiciously guarded; that is, if the land has been well prepared for permanent pasture and seeded to the proper grasses, the milch stock well and carefully selected, and the bull the right animal to add to the productiveness of their produce, then may we expect success to attend the effort and the change result in profit never experienced in the cultivation of grain. Of this we apprehend no successful dispute.

Writing on the preparations necessary to such a change and the disappointments sometimes experienced, an exchange has the following good suggestions:

The disappointment, the trouble, and the failure might all have been saved by taking more time to make the change from grain and meat to milk farming. In about three years' time the condition of the farm might have been changed at very small cost to meet the requirements of the new branch of business. A sod of good, fine grass could have been established. The additional wells needed to supply stock water could have been dug when little labor was required in the fields. Many of the cows required to form a dairy herd should have been raised on the place. Some promising heifer calves could have been bought from farmers who preferred steers to raise for beef. Being brought up on the place they would be attached to it and consequently more docile. By commencing with a smaller number of cows, milkers would be gradually educated in drawing their milk and taking suitable care of it. The entire business of managing a milk farm would have been learned by degrees.

The farm would have continued to be profitable for the production of meat and grain till it was devoted to the production of milk. Dairy farms generally pay much better than grain farms, and are conducted with less labor. The knowledge and experience that one gains in general farming are of comparatively little value, however, in conducting a dairy farm. It is another branch of husbandry that must be learned by itself. Much information can be derived from books, current publications, the reports of dairymen's associations and conversations with dairy farmers. In many parts of the country it is advisable to introduce milk production on farms that have for several years been devoted to grain growing. The change, however, should be made gradually and in accordance with a well formed plan.

At What Age Should Sow Pigs be Bred?

As a rule, young sows should not be bred at an earlier age than eight or ten months. They will then have their first litters when they are twelve or fourteen months old. This general rule is subject to numerous variations, and for obvious reasons.

Many sows are bred when they are quite young because their owners have not the patience to wait until they are better grown. Besides it is troublesome to keep young sows safe from the boar when they are in season. Those, however, of the smaller and earlier maturing breeds may often, without disadvantage, be allowed to breed when younger than others.

Unusually large or coarse sows are sometimes bred at an early age with a view of their becoming finer in form as they approach maturity. But with this fineness there is apt to be an impaired constitution in the sow and a lack of strength and vigor in the pigs.

It is thought by some that the earlier young sows are bred the better milkers they will become. Close observation, however, leads to the belief that no practical good is secured by such a course of management. Early breeding can never bring such marked improvement in the milking qualities of sows as may be secured by careful selection and proper feeding when young. Adopting the latter course we are in line for improvements in other directions, while by the former method serious injury is often done the young sows. Breeding at a very young age certainly retards their growth, and it is doubtful if they ever afterwards reach the size they would otherwise attain.

The time of the year at which it is desired the young pigs should come often determines the age at which sows are bred. For example, those farrowed in October or November are often bred at less than eight months old in order that their pigs may come early as possible the following Fall; for if not thus bred when quite young they must be kept from the boar until twelve months old or over, to avoid their having pigs very late in the Fall or in the midst of Winter.

In selecting sow pigs for breeding we prefer those from early Spring litters. Such will have the advantage of their first summer's growth on grass, while at the same time they are given whatever grain or other feed, according to location, may be thought best for their highest physical development. If well kept until they are nine months old they may then be bred. They will then have their first litters at thirteen months of age, and at a time of the year when the young pigs with their dams can soon be put on grass and have the benefit of this and good weather for rapid and healthy growth.

If the choice for breeding sows must be made from among pigs farrowed later in the Spring, they may be bred at eight months old. Their pigs will then come when the sows are about a year old, bringing them as with the others to about the time grass starts in Spring.

Young sows selected from Summer litters may also be bred when eight or nine months old, but those from Fall litters had better be kept from the boar until they are at least twelve months of age, as above mentioned. This may seem a long time to wait but such sows seldom fail to produce first-class litters and to rear them well. In fact some of the most suc-

cessful breeders prefer that all their young sows, so far as practicable, shall not be bred until they are about a year old, so that they may not farrow until they are about sixteen months of age.—Swine Breeder's Manual.

An authority in breeding insists that "the hull is half the herd," and that breeders can well afford to pay for a breeding bull one-half the value of his entire herd of cows.

Another prominent breeder says: "We cannot exercise too great care in selecting the bull which is to stand at the head of a choice herd of Jerseys; in fact, all our hopes and fears should be concentrated in him. He should be the best and most perfect animal in the herd—far better, if possible, than the best cow. The progeny of this bull may number fifty or more in a single year, while the best cow produces but one calf."

POULTRY.

Chicken Cholera.

We receive letters every day asking for a reliable cure for chicken cholera. To answer all these letters would occupy our entire time. We should be serving as a veterinary physician for the gradent of the thing. We have no license for the purpose, no diploma authorizing us to practice, and no particular ability in that direction if we had. We know, however, a sure recipe for the disease in question. It is no secret, and its use will trench on nobody's vested rights. We take this method of answering the many questions asked us, by stating that the only reliable cure for this disease is to prevent it.

Chicken cholera proper is caused by indigestion, and the malady is not discovered till it becomes practically incurable; but as almost every ailment affecting internal arrangement of our domestic fowls is denominated cholera, we propose to show what produces it and what will prevent it—we confess that we know of no way to cure it, except by chopping off the fowl's head.

This and kindred diseases are produced in some of the following ways:

1. By allowing fowls to become very hungry and then suffering them to gorge themselves on sour or fermenting food.
2. By allowing them to drink stagnant or filthy water.
3. By suffering them to roost in damp and filthy localities.
4. By confining them in large numbers within limited space.
5. By allowing them to gorge themselves upon carrion or other putrid substances.
6. By neglecting to provide pure water to be drunk whenever nature demands.
7. By feeding uncooked corn meal, wet up with a little water and eaten before the water has all been absorbed.
8. By neglecting to provide proper shelter from drenching rains and chilling winds.
9. By feeding unsound grain, unwholesome seeds, or decayed vegetables.
10. By confining them or suffering them to roost in unventilated quarters.

These items do not cover the whole category of causes, but the inquiring housewife can, doubtless, find a reason for her misfortunes. A hen is a hardy fowl. She will endure much hardship and be little the worse for wear, but wholesome food, pure water, and clean quarters she must have, or disease will surely result. Can we reasonably expect a fowl to bear what would kill a human being?

The preventive is obvious. It costs nothing but a little attention to details.

The disease is not contagious, as many suppose, but the same cause which produces it in a single fowl will produce it in a hundred. There is no need buying empirical "dead shots," for they are worse than useless, and the money paid for them is thrown away. Give your fowls a dry yard, food at regular periods, water in abundance, comfortable shelter, with perfect ventilation, and they will laugh at the diseases to which neglected and badly-treated fowls fall easy victims.—Home Journal.

Poultry Notes.

The task of persuading a hen to give up the idea of sitting when her mind is fixed upon that object is generally a difficult one. The following method as given by the *Poultry Monthly* is simple and effective: "Put the hen into an open-slatted coop upon the ground alone. For a week or so feed and water her every day, taking care to place the food and drink on the outside of the coop. Move the coop every day to fresh earth, and if she still persists or shows signs of broodiness after a week of this treatment place a young rooster in the coop with her for a few days when she will be thoroughly cured."

When fowls are kept on hard floors a wart-like substance sometimes appears on the ball of the foot, which if allowed to remain will produce lameness. Place the fowls so afflicted in a coop or yard with soft earth floor. Remove the wart with a sharp knife and touch the cut surface with a stick of lunar caustic, which can be found in any drug store. A single application will effect a cure.

Every poultry run should contain a plot of grass for furnishing the fowls with green food daily. If a portion of the yard is turned up frequently with the spade the fowls will be greatly benefited by voluntary exercise in scratching for worms. Feed but little corn during warm weather.

Don't make perches for fowls too high, nor on an inclined plane. If low down, they will be just as well satisfied and be less liable to injury from flying or falling down. No matter how high the perch is, fowls will not be safe from thieves unless the hen house is locked every night.

D. M. Pyle, Esq.

The sense of duty which impelled us to note biographically the lives of distinguished sportsmen of California...

Mr. Estee, riper in years, developed under the light of friendly interest into the matured sportsman, full of spirit, yet open and gentle as the October sun.

In Vermillion County, Indiana, near the quaintly named Wahash River, on April 20th, 1851, an Easter Sunday, D. M. Pyle, as he commonly styles himself, was born to William and Mary Mack Pyle...

In 1852 Pyle, Senior, came to California to be followed in 1855 by Mrs. Pyle, with Darius Mack, and her daughter, now the wife of J. W. Rea, of Santa Clara.

In such company Pyle worked faithfully, standing well in the University, and being well beloved by his peers. Graduating in course, the sound wisdom of the man showed itself first in his taking to himself as wife, Mary, the adopted daughter of Hon. Theo. Rea...

Dairy farming a thousand acres of rich valley land, and leasing an additional two thousand acres of stock range in the Santa Cruz hills, making over one hundred thousand pounds of cheese yearly...

Devotion to business, however, seems not to have blunted the social and benevolent side of Mr. Pyle's nature, because he has since 1872 passed all the chairs in Odd Fellowship, both in Lodge and Encampment...

Since the fallow days when he herded wild geese from Solano grain fields and hourly faced death "if the imminent deadly breach" of a rickety old muzzled loader...

Robinson fashion. His shooting is deliberately quick, like that of Mr. Henry Bassford, and he owns and uses three good guns.

But our subject has gone deeper into sportsmanship than the mere acquirement of technical skill with gun and dog. His liberal education has enabled him to observe understandingly...

This characteristic, together with the fact that he is determined and fearless in following his convictions to their logical ultimate led his fellow members of the State Association to make him a Director of that body in 1882.

On His Travels.

John P. Borgan, of Milford, is the latest victim of the game worked by the parties having the seemingly decrepit old horse that astonished Patrick O'Keefe in this city (New Haven, Conn.)...

PACIFIC COAST BLOOD HORSE ASSOCIATION.

Fall Meeting, 1884.

PROGRAMME

First Day, Saturday, Nov. 15th.

- No. 1. LADIES' STAKE—For two-year-old fillies; \$50 entrance; \$25 forfeit; \$200 added; three-quarters of a mile; second to save entrance.

CONDITIONS.

Entries to stakes and purses not marked closed will close November 1st, 1884. Races to close will be run under weights adopted at the annual meeting of 1881. Starters in all races must be named at 6 p. m., the day preceding the race. Entrance free for starters in purses. Non-starters can declare out at 6 p. m., the day preceding the race, by paying five per cent. After that time they can only be excused by the presiding judge, and in such case ten per cent. on the amount of purse must be paid. Non-members will be placed on the same footing as members of the Association, in regard to the payment of purses and stakes advertised, and should there be a deficiency, the winners will receive a pro rata dividend. Parties making nominations will be required to record colors at time of making entries, and after record will not be allowed to ride in other colors. This rule will be strictly enforced. All nominations in stakes and entries in purses, (except Nos. 5, 9, 10, 13 and 14), must be in on or before the first day of November next, 1884, directed to Jos. Cairn Simpson, Secretary, 508 Montgomery St., San Francisco. To be valid, they must be delivered to the Secretary personally or plainly postmarked, on or before that day—November 1st. The Association reserves the right to postpone races on account of unfavorable weather or other sufficient cause.

JAS. V. COLEMAN, President.

JOS. CAIRN SIMPSON, Secretary.

CHECK HOOK. Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check-Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook. Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal. Will receive prompt attention. When ordering state whether gold or silver plate required.

IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.

Having thus described my invention, what I claim as new, and desire to secure my letters patent, is: 1. The part D, supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially, as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood.

It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision. By throwing the lower portion of the blind up something of the same effect on the action follows as is induced by toe-weights. This is especially the case when young colts are the pupils, teaching them to bend the knee without the strain of weights on the feet.

For bridles of all descriptions apply to JOHN A. MCKERRON, No. 230 and 232 Ellis St., San Francisco.

Thoroughbred SETTER PUPPIES.

ENGLISH SETTERS, FIN EST BRED IMPORTED, Irish Setters, from Champion stock imported by R. W. Hill of Oregon. Pedigrees guaranteed. \$25.00 each at six weeks old. Apply to E. LEAVESLEY, Gilroy.

Table with columns: LEAVE O. F., DESTINATION, ARRIVE S. F. Lists routes to San Mateo, Redwood and Menlo Park, Santa Clara, San Jose and Principal Way Stations, Gilroy, Pajaro, Castroville, Salinas and Monterey, Hollister and Tres Pinos, Watsonville, Camp Goodall, Aptos, Soquel, Santa Cruz and Pescadero, Soledad and Way Stations, Monterey and Santa Cruz (Sunday Excursion).

\*Sundays excepted. †Sundays only. ‡Theatre train Saturdays only.

STAGE CONNECTIONS are made with the 10:40 A. M. Train, except Pescadero Stages via San Mateo and Redwood, and Pacific Congress Springs Stage via Santa Clara, which connect with 8:30 A. M. Train. SPECIAL ROUND-TRIP TICKETS, at reduced rates to Monterey, Aptos, Soquel, Santa Cruz and Pescadero, also to Gilroy, Paraiso and Paso Robles Springs.

EXCURSION TICKETS.

For Sundays only, † for return same day. For Saturday, ‡ Sold SATURDAY and SUNDAY only. Sunday and † good for return until following Monday, ‡ day, inclusive, at the following rates:

Table with columns: Round Trip from San Francisco to, Sun. Tkt., Satto Mon. Tkt., Round Trip from San Francisco to, Sun. Tkt., Satto Mon. Tkt. Lists destinations like San Bruno, Millbrae, Oak Grove, San Mateo, Belmont, Redwood, Fair Oaks, Menlo Park, Mayfield, Mountain View, Lawrence, Santa Clara, San Jose, Gilroy, Aptos, Soquel, Santa Cruz, Monterey.

TICKET OFFICES - Passenger Depot, Townsend street, Valencia-street station, and No. 613 Market street, Grand Hotel.

H. R. JUDAH, Superintendent. Asst. Pass. & Tkt. Agt. SOUTHERN DIVISIONS, etc.

For points on Southern Divisions and the East, see C. P. R. R. Time Schedule.

SPORTSMEN & PLEASURE-SEEKERS. THE SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE "HOTEL DEL MONTE," ARE UNSURPASSED, having a MAGNIFICENT BEACH of pure white sand for surf bathing. THE BATH-HOUSE contains SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT LOCKERS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ, IS VIA THE

Southern Pacific Railroad,

(Broad Gauge). The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably Quail, Pigeon, Sulphur, Duck, Geese, Deer and Bear.

LAKES PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PULIS-SIMA, SAN OREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for FIELD PRACTICERS connecting for those resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Gunstaken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES - Passenger Depot, Townsend street, Valencia Station, and No. 613 Market st., Grand Hotel. H. R. JUDAH, Superintendent. Asst. Pass. and Tkt. Agt.

LINES OF TRAVEL.

C. P. R. R.

## TURF AND TRACK.

### Racing at the Los Angeles Fair.

Racing at Los Angeles, this year of prosperity for Southern California, had been looked for with much interest. Circumstances had gathered large delegations of the sporting fraternity. With the advent of Messrs. Killip & Co., proclaimed by the clarion notes of friend Whitehead, getting his fair to be more than lively.

But clouds sometimes appear and mar the brightest day. Although the sun arose brighter than usual after a refreshing shower, for some reason obscure, a postponement was declared, the original programme was changed and the horse arrivals from above were delayed, all tending to darken prospects of the pool sellers, the association, and last but not least the people who fully expected a full week of sport.

Tuesday, the 14th, came around with everything overhead favorable and a splendid track. The honorable President of the State Board, Mr. P. A. Finigan, appeared in the judge's stand with Messrs. J. D. Young and Ed. Dupuy as associates, E. A. DeCamp running starter, Oscar Macy, clerk of course, and Messrs. Morford and Eaton as timers.

The first event was a trot for the three-minute class, district horses; purse, \$350; in three monies, \$225, \$75 and \$50. The starters were Alph, by Echo, Hardman, by Echo, Gen. Hewitt, by A. W. Richmond, Silver Heels, by Gibraltar, and Dick C., whose ancestry is undetermined. Auction pools sold before the race \$20 on Hardman, \$10 on Gen. Hewitt, \$5 to \$7 on the field, including Alph, Silver Heels and Dick C. The attraction was towards Hardman, and only at times was any interest pointed to the black Richmond. After one or two scores the bunch was tapped off close together, Hardman at the pole, Silver Heels second, Dick C. third, Gen. Hewitt fourth, Alph outside. The favorite kept the lead, past the quarter, but was crowded off his feet on the backstretch by the black colt. He caught promptly, and was driven under the wire by Williams a half a length in front of Hewitt, Alph, 3 lengths in the rear, Dick C. and Silver Heels distanced, Time, 2:38. Gen. Hewitt showing so much speed in the heat aided the betting; besides the sporting people had become familiar with the French Mutuels (new in our section), and discovered that "long favorites paid well." Second heat. The three remaining horses got off promptly. Hardman broke, just beyond the wire, Hewitt passed him and kept the pole to the head of the stretch, but the little bay worked handsomely and came under the wire, Alph second, Hewitt two lengths in the rear. Time, 2:42.

The third heat was a repetition of the second, except that Hewitt took second place. Time, 2:45. Mutuels paid, \$3.50 and \$3.25.

Oct. 14th.—Trotting; purse \$350; three minute class.  
Hardman, b g, by Echo, dam Phoebe, by Fireman—L. H. Maybury..... 1 1 1  
Gen. Hewitt, blk g, by A. W. Richmond, dam Barbara—Chas. Fickett..... 2 3 2  
Alph, b g, by Echo, dam unknown—N. T. Blair..... 3 2 3  
Silver Heels, br s, by Gibraltar, dam by Belmont—J. Bixby..... dis  
Dick C., b g, pedigree unknown—A. F. McPhail..... dis  
Time, 2:38, 2:42, 2:45.

The second race was for the 2:29 class; purse, \$350; three monies. Entries were Tempest, Dick J. and Kate Bender. Dick J. was favorite at all points of the race, bringing \$20 and \$30 to \$6 and \$3 on the field, and notwithstanding these long odds a great deal of money went into the box in response to the oily words of Whitehead and the fascinating ways of friend Noyes.

On the second attempt the three went flying around the turn, Dick J. at the pole, Bender, second, Tempest third, which positions were kept to the close, being a splendid heat to the finish. Time, 2:41. The contest being so close the friends of Tempest backed her, but the knowing ones stuck to the favorite.

The second heat was the first over again. The third and last was the same excepting that Tempest took second place making in all a nice race, and giving the sports a good impression of what was in store. The mutuels paid, \$4.70 and \$2.95.

Same Day.—Purse, \$350; 2:29 class.  
Dick J., br g, by McClellan, dam unknown—J. N. Johnson..... 1 1 1  
Kate Bender, blk s, by Gibraltar, dam by Belmont—J. Bixby..... 2 2 3  
Tempest, b m, by Sultan, dam Belle Mason—Dr. Wise..... 3 3 2  
Time, 2:41, 2:38, 2:37.

Wednesday, October 15th, was a typical day for this land of sunshine. The attendance was an improvement and enthusiasm nearer the correct standard. First was a special trot for Mayburn's Lady Washington, driven by Durfee, Covarrubias' Charlie D., and Ben Hill's Zero, driven by Wilhame. Purse, \$400. Although Charlie D. was handicapped with over forty-five pounds dead weight he was a

pronounced favorite, but old Zero had friends, which kept up the betting. A good send-off was promptly given these old stagers, Charlie D. at the pole, the mare second, Zero third. It was apparent at a glance that the mare was not in the race as the favorite won cleverly, Zero a good second, and Lady Washington barely saving distance. Second and third heats the same. Mutuels paid, \$3.65 and \$2.90.

Oct. 14th.—Special trotting; purse \$400.  
Charlie D., dn g, by Coyote Patchen, dam Nellie Brea—N. A. Covarrubias..... 1 1 1  
Zero, b g, by imp. Hercules—B. P. Hill..... 2 2 2  
Lady Washington, b m, by Whipple—L. Mayburn..... 3 3 3  
Time, 2:35, 2:36, 2:35.

Next called was a running race, half mile heats. There were six nominations, but Jon Jon had not arrived and Woodbury and Billy Grey were in the hospital. The three starters on the board were John G., Edwrsd B., and Minnie R. Minnie was selected and backed for favorite with even money against the other two. The result was the first blood for the fielders, John G. winning in such a way that the run was without special interest otherwise. Mutuels paid, \$9.15 and \$4.10.

Same Day.—Running; purse \$—; half-mile heats.  
B. P. Hill's g John G., by Shiloh, dam Maggie, by Norfolk, 3 years, 105 lbs..... 1 1 1  
R. J. Anderssen's b f Minnie R., by Sacramento, dam Fannie D., 3 years, 105 lbs..... 2 2 2  
Hill & Gries' b g Edward B., by Ben Wade, dam unknown, 3 years, 105 lbs..... 3 3 3  
Time, 4:03, 4:24.

Next race was \$200 purse for district trotters; two-year-olds, with Wm. Smith's h f Belle Forrest; Chas. Fickett's br g Contractor, and L. G. Rose's b s Kismet entered. Kismet was withdrawn on account of indisposition, and the pools and race confined to the other two. The mare, being started as a favorite, was well backed, being 50 to 30 on the colt. After the usual amount of scoring they were sent off together, the mare at the pole, driven by her owner, and Contractor outside, driven by Williams. At a glance it was plain that the Sultan colt was the speedy animal, and should have won by a dozen lengths, instead of a girl, some dissatisfaction was expressed. Time of heat, 2:54. The result only seemed to strengthen the backers of the filly, and she brought in auction \$50 to \$25.

Second heat—A good start was effected. After some running, the mare was awarded the heat in 3 minutes, the colt almost at her throat latch. The time and circumstances caused loud murmurings, and the judges, at the repeated solicitation of backers, put Walter Mayburn behind the colt, and the crowd was treated to one of the most beautiful contests of the season in the third heat, the colt coming home in 2:49; the mare 6 lengths behind, and was awarded the race and first money. Mutuels paid, \$6.55 and \$4.75.

Same Day.—Trotting; purse, \$200; two-year-old class.  
Contractor, b f, by Sultan, dam by Overland—Chas. Fickett... 1 2 1  
Belle Forrest, b g, by Chief of the Echoes, dam by Ben Wade—Wm. Smith..... 2 1 2  
Time, 2:54, 3:00, 2:49.

The next was a special dash of half-mile for purse of \$100. Hill & Gries enters blk m Dotty Dimple; Lee Shanar enters h g Jon Jon. The latter was a favorite at \$40 to \$10, and plenty of takers, but alas for some things! the fielders again scored a victory. A good start was made, the gallant mare took the pole in 30 yards and led the Monday colt one of the liveliest races to the wire that has ever been viewed in this country. Long rode the colt well, but Appleby had the mare well up and achieved a handsome victory. Mutuels paid, \$6.30.

Same Day.—Special running; purse, \$100; half a mile.  
Hill & Gries' blk m Dottie Dimple, by Ben Wade, dam unknown, 4 years, 110 lbs..... 1 1 1  
L. Shanar's b g Jon Jon, by Monday, dam Plaything, 3 years, 57 lbs..... 2 1 2  
Time, 4:41.

The last race of the day was a mile dash special for Dublin Bay, St. David, and Bachelor; purse \$200; two monies. St. David was backed by our locals, even money against Dublin and Bachelor as a field and takers were plenty. St. David before starting bolted and fell, knocking down the fence and giving McCurdy a close shave, but he quickly made a remount, and after two starts they got off well together. Long quickly took the lead with the Grinstead colt, Dublin Bay, when it was evident that with Appleby trailing with Bachelor, the big sorrel was out of the race. At the head of the homestretch, Appleby came to the front with Bachelor, and at the finish Dublin was two lengths behind, St. David 20 yards behind. Time, 1:45. Mutuels paid, \$5.10.

Same Day.—Special running; purse, \$200; one mile.  
Hill & Gries' b c Bachelor, by Hockbocking, dam Maid of the Mist, 3 years, 118 lbs..... 1 1 1  
F. M. Slangbler's b c Dublin Bay, by Grinstead, dam Amanda Fortune, 3 years, 118 lbs..... 2 2 2  
A. F. Macbado's b c St. David, by Hockbocking, dam Eva Coombs, 3 years, 118 lbs..... 3 3 3  
Time, 1:45.

Thursday, October 16th.—First event was Dist. Trotting for 2:45 horses; purse of \$350; Silver Heels, Tempest, Dick J. and Dimock started. After Dick J.'s splendid performance of a previous day, he was at once a favorite at \$50, to \$15 for Dimock, the others bringing \$7 in the field. It soon became necessary to sell Dimock in the field for odds at all, thereby making at \$30, against \$50 on Dick J. The horses appearing at the call, Dimock in Walter Muburn's hands was a splendid animal, and brought him up in the auction and kept all hands lively at the French, as the citizens of the southern interior had now come to appreciate the beautiful mysteries of the French system. Tempest drew the pole, Silver Heels second, Dimock third and Dick J. outside; the usual amount of scoring took place. When the word was given and away they went, Dick J. and Dimock leading, Tempest three lengths behind at the first turn and Silver Heels at Tempest's wheel. These positions were held almost to the wire, Dimock coming under first by half a neck, Tempest second, Dick J. third, Silver Heels fourth. Time, 2:40. Dimock now was a favorite and bettors were anxious.

The next heat was a handsome performance. Dick J. did some running but was a good second at the finish, Tempest third, Silver Heels fourth. Time, 2:42. The third heat was an interesting one Dick J. scoring a mark coming in first, Dimock second, Tempest third, and Silver Heels distanced in 2:38. The last heat was a fair performance and won in good shape by Dimock, eight lengths ahead, Dick J. second, Tempest third. Time, 2:37. Mutuels paid, \$10.45, \$8.25, \$3.85 and \$7.10, which had the effect of booming the French business considerably.

Oct. 16th.—District trotting; purse \$350; 2:45 class.  
Dimock, br g, by Black Hawk, dam Lola Montez—J. T. Saxby..... 1 1 2 1  
Dick J., blk g, by McClellan, dam unknown—J. N. Johnson 3 2 1 2  
Tempest, b m, by Sultan, dam Belle Mason—Dr. Wise..... 2 3 3 3  
Silver Heels, br s, by Gibraltar, dam by Belmont—J. Bixby.. 4 4 dis.  
Time, 2:40, 2:42, 2:38, 2:37.

Next race called was one and one-fourth dash; free for all; purse, \$300. Kenuietan & Co.'s Idler, Dublin Bay, and Hill & Gries' Arthur H. were named.

Pools sold readily on the Hock Hocking 2-year-old, with light weight, as favorite, same money on the stable. A good start was made at once, Idler inside, Arthur H. second, Dublin Bay third. Around to the three-quarter pole all ran well together, when Dublin Bay dropped back and left his aged stable companion to look after the gallant two-year-old, which he did, taking an immense amount of punishment, and winning by a throat latch. It was apparent that Appleby with 105 pounds should have been on the colt. Time, 2:14. And a fine race. Parie pools paid, \$5.05.

Same Day.—Running; purse, \$300; for all ages; one mile and a quarter.  
Kenuietan & Co.'s b b Idler, by Wildfille, dam Kate Gift, aged, 124 lbs..... Weaver 1  
Hill & Gries' b c Arthur H., by Hock Hocking, dam Maid of the Mist, 2 years, 87 lbs..... 3 2 1 2  
Kenuietan & Co.'s b h Dublin Bay, by Grinstead, dam Amanda Fortune, 3 years, 118 lbs..... Wallace 3  
Time, 2:14.

Then came a trotting, purse \$350, for three-year-olds, Queen of America, Don Tomas and Kismet named, the latter withdrawn. Tomas sold strong favorite at \$20 to \$7. First heat—After much irregular driving both came under the wire, wheels locked, and decided a dead heat. Next two heats won easily by Tomas in 2:37 and 2:35. Darkness made it necessary to postpone the race.

Friday, Oct. 17th.—The first in order was the unfinished trot. Tomas appeared in fine order and won the heat and race with ease in 2:37. Parie pools paid, \$3.50 and \$3.90.

Oct. 17th.—Trotting; purse \$350; three-year-old class.  
Don Tomas, blk g, by Del Sur, dam by Mambrino Patchen—C. A. Durfee..... 0 1 1 1  
Queen of America, b m, by Chief of the Echoes, dam unknown—Wm. Smith..... 0 2 2 2  
Time, 0:50, 2:37, 2:38, 2:37.  
\*First two beats trotted Oct. 16.

A trot was especially arranged with purse of \$400 for Charley D., Ed., Ned, Fred Arnold, and Tump Winston; the latter to roadcart. It seemed to be an understood race that Ned was a winner, and he was heavily backed, but Tump Winston and Charley D. had friends, and it proved to be the betting race of the meeting. After much scoring they were sent off together, Winston at the pole, Charley D. next, Arnold third, Ned fourth, and Ed. outside, they made a splendid heat, Tump winning by a neck, Charley D. second, Ed. third, Ned fourth, Arnold fifth.

Second heat was the same. The third was won by Ned in 2:31. Arnold second, Ed. third, Charley D. fourth, Winston fifth. Some complaint were made as to driving of Winston.

In the fourth heat Ed. won in 2:31, Ned second, Arthur third, Winston fourth, Charley D. fifth.

Fifth heat Ned won handsomely in 2:30, the fastest heat of the season. Arnold second, Winston third, Ed. fourth, Charley D. fifth. Under the rule, Arnold and Charley D. went to the stable.

After putting Walter Maburn in the roadcart, Tump Winston won the sixth and last heat by a dozen lengths in 2:31, Ed. second, Ned third. Mutuels paid, \$9.00, \$8.40, \$5.10, \$8.50.

Same Day.—Special trotting; purse, \$400. Ned Winston, ch g, by Prince—E. Downer, 1 1 5 4 3 1. Tump, b g, by Overland—J. Edge, 4 4 1 2 1 3. Ed., b g, T. Jackson, 5 3 3 1 4 2. Fred Arnold, he g, A. L. Hinds, 3 5 2 3 2 ro. Charles D., blk g, N. A. Covarrubias, 2 2 4 5 5 ro. Time, 2:31, 2:31, 2:31, 2:34, 2:30, 2:31.

Next was a three-quarter dash for runners, two-year-olds, purse \$200, with B. P. Hill's g Triump, Machado Bros.'s ch m Eliza, and Hill & Gries' b f Fanny G. at the post. The bay filly was favorite even against other two; a good start was made and proved the knowing ones to be of good judgement, as the bay filly won hands down in 1:20, Triump second. French mutuels paid, \$3.75.

Same day.—Running for two-year-olds; purse \$200; three-quarters of a mile. Hill & Gries' b f Fanny G., by Jack Goodwin, dam unknown, 110 lbs. 1. B. P. Hill's g Triump, by Reveille, dam unknown, 110 lbs. 2. Machado Bros.'s ch f Eliza, by Monitor, dam unknown, 110 lbs. 3. Time, 1:20.

The next was a mile and repeat for a purse of \$300, between Bachelor, Jou Jou and Idler. Bachelor and Jou Jou alternated as favorites and brought 20 to 30 for the other two respectively. First heat was very close, both Jou Jou and Bachelor coming noses even under the wire; heat to Jou Jou. Hedging was lively, but Bachelor took second beat in 1:47. The third and last heat was won by Jou Jou in 1:48. This was one of the best races of the series. Mutuels paid, \$4.95, \$6.45.

Same day.—Running; purse \$300; for all ages; mile heats. L. S. Shaver's b g Jou Jou, by Monday, dam Plaything, 3 years, 106 lbs. 1. Hill & Gries' b c Bachelor, by Hock Hocking, dam Maid of the Mist, 3 years, 106 lbs. 2. Kennistam & Co.'s b h Idler, by Wildidle, dam Kate Gift, aged, 118 lbs. 3. Time, 1:45, 1:47, 1:49.

The last race was pacing between Blair's Crazy Bill, Lightfoot's Lightfoot and Whitney's Tornado for a \$250 purse. There was but little interest and but few bets were laid on the race. Two heats were paced and won by Lightfoot, Tornado second, Bill third. Time, 2:50, 2:50, and the race was continued to Saturday.

October 18th, Saturday—last day. Everybody was inclined to be satisfied and anxious for a finish. First in order was the unfinished pace, which was a circus, the horses being unmanageable and it was any send-off to answer. The heat and race was awarded to Lightfoot, Tornado second, Crazy Bill third. Time, 2:50.

Oct. 18th.—Pacing; purse \$250. Lightfoot, g ..... 1 1 1. Tornado, rn g ..... 2 2 2. Crazy Bill, b g ..... 3 3 3. Time, 2:50, 2:50, 2:50.

\*First two heats paced Oct. 17th. Next was special trot between L. J. Rose's well-known horse, La Grange, to roadcart and the b g Bullet to sulky. First, driven by Walter Mayburn; latter by C. A. Durfee. Not much interest in this as La Grange was always the favorite. Bullet performed his worst, La Grange winning the straight heats in 2:33, 2:30 and 2:31, respectively. Mutuels paid, \$3.45, \$3.20.

Same Day.—Special trot; purse, \$— La Grange, blk, by Sultan—L. J. Rose, 1 1 1. Bullet, h g, by Echo—C. A. Durfee, 2 2 2. Time, 2:35, 2:30, 2:31.

The next was a running race, three-quarters of a mile for a purse of \$200. Entries were: Fanny G., John G., Dublin Bay and Johnny G. The favorite was Fauny G. and made pools lively, the field bringing even money. The race showed that some things were dangerous as Dublin Bay won handsomely in 1:19, Johnny G. second, Fanny G. third. Parie pools paid, \$14.50, the best odds of any race in the meeting.

Same Day.—Running; purse \$200 for all ages; three-quarters of a mile. Kennistam & Co.'s b Dublin Bay, by Grinstead, dam Amanda Fortune, 3 years, 110 lbs. 1. Wallace B. P. Hill's g Johnny G., by Shiloh, dam Maggie, 2 years, 105 lbs. 2. Hill & Gries' b m Fanny G., by Jack Goodwin, dam unknown, 2 years, 105 lbs. 3. G. G. Arnold's b g John G., pedigree unknown, 2 years, 87 lbs. Time, 1:19.

A mile and one-half dash had been arranged between Idler and Bachelor. As Idler was lame, Minnie Rathburn, a three-year-old Sacramento filly, was substituted. No betting was done of consequence as Bachelor had his own way. Wallace rode the filly with weights up and Appley Bachelor. Bachelor led the entire distance under a strong pull. Time, 2:46. Mutuels paid, \$3.50.

Same day.—Special running; purse \$— one mile and a half. Hill & Gries' b c Bachelor, by Hock Hocking, dam Maid of the Mist, 3 years, 107 lbs. 1. R. J. Anderson's b f Minnie R., by Sacramento, dam Fanny D., 3 years, 104 lbs. 2. Time, 2:46.

The closing event was trotting for the 2:35 class; purse, \$400. Starters were Lady Washington, Dick J. and Hardman. It was apparently arranged that the bay mare was to win this race, but she was not speedy enough. The little bay gelding under Williams' handling came up gallantly, and after much scoring got away and won first beat in 2:35. Second heat was the same; time, 2:31. After much work the third heat was trotted under patrol and won by Dick J. in 2:30, Hardman second. The fourth and fifth heats were a repetition of the last. Time, 2:34 and 2:33. This was the most exciting race, and ended the meeting.

Same Day.—Trotting; purse, \$400; 2:35 class. Dick J., blk g, by McClellan—J. N. Johnson, 2 2 1 1 1. Hardman, b g, by Echo—L. Maybury, 1 1 1 2 2. Lady Washington, b m, by Whipple—C. A. Durfee, 3 3 3 3 3. Time, 2:35, 2:31, 2:30, 2:34, 2:33.

Our people were much pleased with the courteous treatment at the hands of Messrs Whitehead, Tuttle, Noyes and others of Killip & Co's firm, and are loud in praises of their efficient auction and mutual pool system. E. A. D.

The Gilroy Trotting Park Association, of which J. P. Sargent is President and L. Loupe Secretary, will give five days' racing and other sports at the Gilroy Track, commencing next Tuesday, the 25th.

The inaugural races of the Ventura Track were set for Thursday and Friday of this week. Six races were on the card.

A race meeting has been one of the excitements of Reno, Nevada, this week.

The Reigning King of Stallions.

Maxy Cobb, b s, foaled 1875, by Happy Medium, dam Lady Jenkins, by Jupiter, son of Long Island Black Hawk. Happy Medium, by Rysdyk's Hambletonian, out of the famous trotting mare Princess, was bred by R. F. Galloway, of Sufferus, Orange County, New York, who sold him to Robert Steel, of Philadelphia, in February, 1871, for \$25,000, who in turn disposed of him to his present owner, Gen. W. T. Withers, of Fairlawn, Kentucky. This celebrated horse had great speed and was unbeaten on the turf. His last race was in his six-year-old form, after only eight days training he distanced Honesty in 2:34, and Guy Miller in 2:32, at Paterson, N. J. He was then returned to the stud and is among the foremost in keeping his sire's memory green, for he can proudly point to eighteen distinguished performers in the 2:30 list and others knocking loudly for entrance to the circle. Maxy also inherits extreme speed from his paternal granddam Princess, who was taken from the granite hills of her native State to the sunny slopes of California. She scored three remarkable winning performances there in 1858-59, a mile in 2:30, two-mile beats in 5:17, 5:17, and ten miles, to wagon, in 29:10. She was afterwards brought East, and vanquished Flora Temple in a race of two-mile beats, on Long Island. Time, 5:02, 5:05, which created unbounded excitement. She is also credited with trotting in 2:17, privately. Her pedigree traces to undoubtedly good trotting blood. She was got by Andrus' Hambletonian, son of Judson's Hambletonian, he by Bishop's Hambletonian, a most worthy son of imp. Messenger.

Taking up Maxy's dam, she affords strong argument for those who hold to the theory that extreme performers inherit much of their quality through the maternal line. The statement of her pedigree, as above given, is incorrect. Recent investigations, instituted by Mr. Cohnfeld, show that Henry Cole, of Cairo, Green County, N. Y., bred her, and also bred and owned her sire, Prince Noho. He bought the dam of Lady Jenkins near East Durham, on account of her fine size and quality. She was a bay mare, 16 hands high; could trot in 2:40. Her form and gait indicated Messenger ancestry. Prince Noho, commonly called Black Jack, stood 15 1/2 hands high, color black as charcoal. He could show a 2:40 gait when four years old. He was got by the great Long Island Black Hawk, out of a fine big brown mare, with trotting characteristics, bought by Cole from one Olmstead, of East Durham. Her pedigree, as well as that of the dam of Lady Jenkins, is now being traced by Mr. Geo. W. Nelson, and will be published by us when duly authenticated.

Of Long Island Black Hawk we may say that his blood is found in many of the best trotters of the past and present. Martha Washington, Fred Douglas, Josephus, Rose of Washington, General Grant, and other high and mighty scions of Green's Babaw, also California Damsel, the Jupiters, the Mohawks, and the Wofuls, are all direct descendants of Long Island Black Hawk, while from his loins originally came the dams of Alley, 2:19; Sberidan, 2:20; Buzz Medium, 2:20; Young Fullerton, 2:20; May Bird, 2:21; Lumps, 2:21; Bella, 2:22, and others too numerous to mention. It should be borne in mind that Andrew Jackson, the sire of Long Island Black Hawk, also sired the prepotent speed producer Henry Clay, sire of the dam of the wonderful stallion, George Wilkes. We may add that Hiram Woodruff gave Black Hawk great praise. He says, "His dam, Sallie Miller, was a good one as she made Ed. Forrest go in about 2:31, as far back as 1834. Her son, Long Island Black Hawk, was a horse of the finest symmetry, 15 1/2 hands high, and a splendid goer. He was a great weight puller, and the first horse that went in 2:40 to a wagon and driver weighing 390 pounds."

Returning to Maxy's dam, Lady Jenkins. She is described to us by those who knew her well, as a mahogany bay mare, with small star in forehead, and one white hind ankle; 15 1/2 hands, a stylish and truly made mare of unfinishing courage and perfect gait. Mr. Smith secured her through Wellington M. Velle, of Pleasant Valley, N. Y., as a six-year-old, about the year 1860. Mr. Smith sold her to a brother of Wilson Jenkins, then of Bordentown, N. J., but doing business in Philadelphia. We had an interview with Mr. Jenkins lately, and he gives Lady Jenkins an excellent character. He said, "I called her Empress, for she had no equal. My wife could speed her with perfect safety, and I drove her at speed a mile and a half, to road-wagon, the last mile close to 2:40, with ease. She would have been very fast if trained." Mr. Jenkins sold her, in 1862 or 1863, to Harrison Robbins, of 915 Chestnut street, Philadelphia, who drove her on the road a year or two, and then bred her to Rysdyk's Hambletonian twice. Mr. Robbins is a gentleman road-driver of the Quaker City, and, in recent conversation, remarked, "I think the Lady was as fast a horse as I ever saw, mark you, without fitting. She and her mate could draw me to an ordinary road-wagon in 2:30."

She produced two fillies by Hambletonian, which Mr. Robbins sold to Wm. L. Hobart, of California, when they were 4 and 6 years old respectively, for \$13,000 cash. They could trot with ease in 2:30 to the pole.

Her next colt is a stallion by Mambrino Pilot, of fine size and appearance. He is now twelve years old. As a five-year-old he showed a mile in 2:28, and quarters at 34s., but is owned by a gentleman who never cared to put him on the turf. John E. Turner remembers the Lady well. He said to me a few days ago, "What's the good of digging further into her pedigree? Her colts prove it must have been good, and she could not be beat the length of the road when Mr. Jenkins and Mr. Robbins had her."

Without going into detail, we may say that all the important points are good in Maxy Cobb's formation. He stands 16 hands high and has the requisite bone, tendon and muscle for a horse of his size; a clean, bony head, with a prominent hazel eye that expresses determination, tempered by docility; a lively ear, and shapely neck, set on deep shoulders; his withers are high, but broad, and slope gradually into his back; his barrel is capacious; a short back, well coupled to quarters, not broad but deep and sloping. He is a rangy horse and stands true on his legs which are clean and smooth, while his feet are excellent. His color is a bright bay with black points, and he is marked like his sire—two white ankles behind; his face lit up by a small star and snip. His tail and mane are jet black, long and flowing. His action cannot be too highly praised. Whether at a two or three-minute gait, he steps off with a free, open stride, never faltering or changing the regularity of his stroke. He keeps up with the style of a Morgan, and reaches forward at each revolution as far as St. Julian. But it is his way of going behind that strikes the beholder at once with admiration, for he reaches and gathers with the ease of Rarus and the power of Dexter.

After Edward Pyle, driver of Edward, was punished for his connection with the Edwin Forrest job, at Utica, in 1878, he removed from Philadelphia to Humboldt, Neb., taking with him a lot of trotting colts, among them Maxy Cobb. He there developed his speed and brought him out as a six-year-old, in the Fall of 1881. Maxy started in eight races and

won seven of them that season, closing it with a record of 2:30. During this time he was sold to R. S. Maloney, of Lincoln, Neb., for \$2,500. The following year he took part in three races and won two, taking second money in the third, but was not obliged to lower his record. In the Fall of this year Maloney sold him to Mr. A. H. Swan, of Cheyenne, Wyo., for \$7,500, with \$2,500 additional if he showed 2:23. The day set for trial was very unfavorable. He was started too slow, but finished very strong in 2:23. He was then placed in James W. Page's hands. It will be remembered that Page developed the speed of Rarus, and in a sward, practical horseman. He forsook the turf to engage in the cattle business, in which Mr. Swan is very largely interested, but, finding that he had another Rarus, returned to his first love and brought Maxy to New York, in the Winter of 1882, and 1883. He saw us before the season opened and strongly intimated that there was a mine of speed in the young stallion he had in charge. We met him later but while May blossoms were in bloom, and with a triumphant look he said: "They have been working and tearing up Prospect Park track with the Brighton Beach runners. How much slower do you think it is than Fleetwood, the way the latter is kept now?"

"Two to three seconds," was our reply. "Then what would you think of a horse in the 2:30 class that has just trotted Prospect in 2:17?" "He holds a first mortgage bond on his class, if he keeps his form and does not get many such trials."

Maxy's first appearance in the Grand Circuit of 1883 was at Cleveland, July 31st, when he easily defeated a field of ten good horses. After losing the first beat to George V., he won the next three in 2:20, 2:23, 2:21. Page's cattle interests then demanded his immediate presence in Wyoming, and at the last moment Pete Johnston was put behind the horse at Buffalo, and he was never headed, winning in straight heats—time, 2:21, 2:22, 2:20—on a chilly afternoon, with a high wind blowing up the stretch. After this Maxy received uncertain training, but Splan took him at Hartford and won handily, beating George V., Fides, Modoc and other good ones. He started in ten races during 1883, and won three first premiums, as stated, four seconds and three third moneys. At the close of the season Mr. Swan was anxious to fix Page's undivided attention upon the cattle business, and therefore sold the horse to Mr. Isador Cohnfeld for \$15,000.

Last Spring he showed uncommon speed, and turned Fleetwood track in 2:19 more than once, while the best horses there could not approach these figures; but his preparation was hurried, and he lost his form in midsummer. A cessation from work restored his speed, but not his full strength, but Murphy, with rare judgment, nursed his power and gave him an exercising mile in 2:17 at Narragansett Park. The horse remained there, and showed 2:15 1/2 later on. A short time afterwards he was taken to Charter Oak Park, and on the second day of the regular meeting there, viz., Aug. 23th, he was started to beat Smuggler's best record, 2:15, and easily accomplished it by trotting the first half in 1:07, and the mile in 2:15. Twelve days afterwards, viz., Sept. 9th, he won the 2:20 race at Narragansett Park just as he pleased, beating Butterfly, Belle F., and others. Time, 2:20, 2:17, 2:16. Murphy then declared: "This is the first race I ever drove him against other horses. He is a fast and game horse. I know more about him than ever I did, and give me a good day and track we can beat 2:13."

Mr. Cohnfeld was persuaded to leave him at Providence, but the following Sunday evening Murphy was assailed, and unable to give the necessary work to stay him up for a supreme effort. The groom of the horse exercised him in from 2:22 to 2:35 at intervals until the last day of September, when Murphy, as the world knows, drove him in 2:13, saying as he dismounted, "The end is not yet."

A few words as to the origin of his name, and we are done. Mr. Cohnfeld says: "I understand he was called after a friend of Pyle's by the name of Maximilian Cobb. The horse is registered as Maxy Cobb, but appears in the trotting summaries as Maxy and Maxy Cobb. The latter strikes me as most pleasing to the ear, and I've adopted it."

Mr. Cohnfeld tells us that he has not fully decided as to what he will do with the horse next season, but thinks of letting him serve a few mares in Kentucky, early in the season, and then subject him to a brief preparation, with a view to lowering his record. With such a trotting lineage, together with his purity of gait, excellence of form and disposition, and rapid improvement of late, we are free to admit that even 2:09 1/2 is within the reach of this Emperor of Stallions.—N. Y. Spirit.

Good but Irregular.

Some men are born under a lucky star, and of these General W. T. Withers is one. Several years ago he purchased Happy Medium, as a successor to Almont, who has since died at least five years too early. Up to the present year Happy Medium has had many trotters in the 2:30 list, but none below the charmed figure of 2:20. And right on the back of it off goes Maxy Cobb and trots it in 2:13, placing Happy Medium at the head of the list as the sire of the fastest stallion in America. It is likely to remain so for at least a year, as the season is too far advanced for Phallas to round to in time to beat it. We should like to see a stallion sweep-stake of \$2,500 each made up with \$5,000 added to trot in California in February and four entries to fill the stake, all California-bred stallions to be allowed to enter at \$1,000 pay or pay and eastern-bred horses to go in at half-freight. This would probably let in Adair and Romero, and perhaps Albert W. and Anteo. If Maxy Cobb, Phallas and Director would enter for such a race, that alone would draw a thousand visitors from the east to San Francisco. Perhaps some enterprising track-keeper will take hold of the matter and offer a prize of that sort for the three famous horses above named; and another of \$3,000, with \$1,000 entrance added, for Guy Wilkes, Adair, Romero, Vanderlyu, Albert W., Anteo and others that have no better record than 2:19. Both of these horses ought to fill and afford good sport during the Winter months. Everybody knows that the San Francisco tracks are in better order in Winter than in Summer, as was long ago proven by the records of Princess at ten miles and Fillmore at five miles, both being done in the latter part of February.—Portland Oregonian.

The above is a good idea, but how Adair and Romero can be made eligible to a stallion sweepstake is what puzzles us.

A. C. Goodrich, of Jordan Valley, Oregon, has purchased of Gen. W. T. Withers, Fairlawn Farm, Lexington, Ky., the bay colt Almont Medium, 3, by Happy Medium, dam Lady Chiles, by Almont; second dam by Mambrino Patchen; third dam by Alexander's Edwin Forrest; fourth dam by Black Highlander; fifth dam by Lance, son of American Eclipse. Price, \$1,500.

Closing Day at Jerome Park.—Lucky B. Takes a Tumble.

Oct. 11th.—Handicap sweepstakes for all ages, at \$25 each, with \$500 added; the second to receive \$100 out of the stakes; ten entries; one mile.

Betting: 7 to 5 against Little Minch, 9 to 2 against Delilah, 6 to 1 each against Pamparo and Roy S. Cluka, 3 to 1 against Lady Lou, 10 to 1 each against Bella and Shenandoah and 15 to 1 against Torpedo.

Same Day—Handicap sweepstakes for all ages, at \$30 each, with \$600 added; the second to receive \$125 out of the stakes; eleven entries; mile and a quarter.

Betting: 5 to 4 on Topsy, 5 to 1 against Burgomaster, 6 to 1 against Woodflower, 7 to 1 against Economy, 10 to 1 each against Haledon, Richard L., and Lucky B., and 15 to 1 against Lida Stanhope.

At the start, which was a good one, Richard L. took the lead, followed by Woodflower, Economy and Burgomaster, with the others close up. Before they reached the stand Burgomaster took the lead next the rails and as they passed the stand he led by a neck, with Haledon second, followed by Richard L., Economy, Woodflower, close up and in front of Lucky B., Lida Stanhope and Topsy.

The disappearance of four horses from the races, coupled as it was by seeing Lucky B. galloping behind the others riderless, naturally produced the greatest excitement, and in a few minutes hundreds left the stand for the scene of the accident, where they found Economy lying, evidently hurt, with Topsy and Richard L. standing by.

The Secret of the Trotter.

As that fragile but indestructible entity, the trotting record, is constantly broken and restored again, the minds of all sensible turfmen are turned to examine the qualities in a horse that enable so many animals to do it.

The Cleveland Driving Park Association has expelled the black mare Minnie Monitoun, which trotted at the Autumn meeting under the name of "Baby Mine"; also John Goodwin, of Lawrence, Mass., the owner; James H. Keene, alias Pat Hinckley, the driver, and L. B. Goodrich, of Bradford, Pa., who made the entry.

Thoroughbred Sales in the East.

At New York, on the 13th inst., an auction sale of thoroughbreds was held by Mr. Wm. Easton, and we append the result to illustrate the interest taken in such property as indicated by the prices paid:

- THE PROPERTY OF P. LORILLARD.
1. Bay colt Hnron, 3, by Saxon, dam Vanedeite; G. B. Walters, New York City, \$900.
2. Bay colt Lao, 3, by Duke of Magenta, dam The Squaw; G. B. Walters, New York City, \$1,450.
3. Brown filly Gypsy, 3, by Glenlyon, dam Goudola; G. B. Walters, New York City, \$400.
4. Bay colt Choctaw, 3, by Saxon, dam Fanny Ludlow; Wild & McCull, Brooklyn, \$550.
5. Chestnut colt De Soto, 3, by Wanderer, dam Katie Pearce; G. B. Walters, New York City, \$700.
6. Bay colt Comanche, 4, by Virgil or Glenlyon, dam China; P. H. McMahon, Brooklyn, \$1,550.
7. Chestnut horse Herbert, 5, by Glenelg, dam Kate Matingly; J. B. Melville, Boston, \$1,300.
8. Bay gelding Young Duke, 3, by Duke of Magenta, dam Hortense; R. Black, Newport, R. I., \$600.
9. Chestnut gelding Jesse James, 5, by Bailfa, dam Lizzie Grady; Joe Donohue, \$325.
10. Bay horse Nimrod, 4, by Glenlyon, dam Highland Lassie; M. Gaynor, \$700.
11. Chestnut colt Hoder, 2, by Mortemer, dam Beulah; G. F. Johnson, New York City, \$400.
12. Brown gelding Grandel, 2, by Mortemer, dam Gypitis; T. Barrett, Brighton Beach, \$375.

- YEARLINGS.
12. Chestnut filly Talladega, by Mortemer, dam Estalla; Harvey Welch, New York City, \$325.
13. Bay filly Ulida, by Mortemer, dam Letola; J. P. Dawes, Canada, \$425.
14. Chestnut filly Witch, by Mortemer, dam Lady Wallenstein; D. Mace, New York City, \$400.
15. Bay filly, by Mortemar, dam Gypitis; L. Hart, Brighton Beach, \$275.
16. Bay filly, by Sensation, dam Bonnie Doon; J. P. Dawes, Canada, \$325.
17. Bay colt, by Saxon, dam Virginia; G. F. Johnson, New York City, \$225.
18. Bay colt, by Saxon, dam Wyandotte; G. B. Bryson, New York City, \$400.
19. Bay colt, by Saxon, dam Marie Michon; G. B. Walters, New York City, \$550.
20. Bay colt, by Mortemer, dam Beulah; C. F. Perry, Richmond, Va., \$425.
21. Bay colt, by Mortemer, dam Carrie Atherton; R. J. Hancock, Albemarle County, Va., \$425.
22. Bay filly Faience, by Mortemer, dam Felicity; E. Berry Wall, New York City, \$900.
Lots 9 and 22 were the property of Mr. Pierre Lorillard, Jr.

- THE PROPERTY OF THE PREAKNESS STABLE.
23. Bay gelding Paterson, 4, by Pat Malloy, dam Ethel; L. Hart, Brighton Beach, \$1,200.
24. Bay colt Hidalgo, 3, by King Alfonso, dam Ultima; A. Zimma, Rochester, N. Y., \$325.
25. Bay gelding Tarquin, 3, by Great Tom, dam Vocalist; F. C. O'Reilly, \$650.
27. Bay gelding Marengo, 2, by King Alfonso, dam Miranda; G. B. Walters, New York City, \$1,025.
28. Chestnut filly Niobe, 2, by Kyrle Daly or Hurrah, dam Sunrise; W. Mulkey, Missouri, \$400.
29. Bay filly Mistletoe, 2, by King Alfonso, dam Bombazine; J. F. King, Newport, R. I., \$325.
30. Brown colt Speculator, by Billet, dam Good-by; G. B. Bryson, New York City, \$500.
31. Bay gelding Ghost, 3, by Narragansett, dam Phantom; J. Murphy, New York City, \$300.
The hay gelding Atlas (lot 26), having been kicked by Morning Glory, was not offered.

- THE PROPERTY OF M. BYRNES.
32. Bay filly Noxubee, yearling, by Saxon, dam Carrie Mac; J. Smith, New York City, \$450.

- THE PROPERTY OF MR. P. H. HYNES.
34. Bay horse Forager, 6, by Kingfisher, dam Felucca; R. Black, Boston, Mass., \$225.
35. Chestnut filly Queen of Hearts, yearling, by Kingfisher, dam Nellie James; A. Lavalle, New York City, \$500.
The yearling brother of Felucca (lot 36), called Dahabiah, having been injured, was not offered.

- THE PROPERTY OF A GENTLEMAN.
37. Imp. black horse Starlight, 6, by Cock of the Walk, dam Newmoon; A. Lippe, \$250.

- THE PROPERTY OF MRS. BROWN.
38. Brown colt Canonicus, yearling, by Attila, dam The Squaw; C. Littlefield, Eatontown, N. J., \$425.
39. Bay colt Bicycle, yearling, by Attila, dam Bettina; C. Murray, New York City, \$550.

- THE PROPERTY OF A GENTLEMAN.
40. Brown gelding Corsair, 6, by Glenelg, dam Crownlet; W. Mulkey, Missouri, \$350.

- THE PROPERTY OF MR. E. P. JONES.
41. Bay colt Pbenix, 3, by Glenlyon, dam Chigouon; Preston McLaughlin, New York City, \$100.

- THE PROPERTY OF MR. LAKELAND.
42. Chestnut horse Red Fox, 6, by Hurrah, dam by Revolver; F. Essengill, \$50.
43. Bay colt John Ledford, 3, by Glenlyon, dam Minnie Minor; J. Maloney, New York City, \$125.
44. Bay filly Australina, 3, by Alarm, dam Australind; G. F. Johnson, New York City, \$325.
45. Brown colt Mule, 3, by Saxon, dam Mineola; R. Black, \$100.
46. Chestnut colt Polo, 2, by Ill-Used, dam Polanta; J. Maloney, New York City, \$100.

- THE PROPERTY OF MR. A. HERNON.
47. Bay colt Hecker, 2, by Matador, dam Farida; Dr. Cuff, New York City, \$70.
48. Bay gelding, 2, by Baden-Baden, dam Ambassador; J. F. King, Newport, R. I., \$205.
49. Chestnut gelding, 2, by Baden-Baden, dam Lulu; J. F. Evans; Princeton, N. J., \$115.

- THE PROPERTY OF MR. GEO. WRIGHT.
50. Brown mare Baby, aged, by Strachino, dam Eclipse; no hid; reserved price, \$575.
51. Weanling colt, by Judge Murray, dam Emma; no hid; reserved price, \$200.

- THE PROPERTY OF MR. MARTIN CAHILL.
52. Brown gelding Sinbad, 7, by Saxon; R. Black, Boston, Mass., \$310.

- 53. Bay gelding Confusion, 3, by Glenelg, dam Blunder; J. F. King, Newport, R. I., \$425.

- THE PROPERTY OF MR. M. KELLY.
54. Chestnut gelding Pèrilous, 3, by Alarm; dam Delight; J. Keator, Brooklyn, \$175.

- THE PROPERTY OF MR. D. D. DAVIS.
55. Chestnut gelding Flamrix, 4, by Springbok, dam Lucille Western; R. Black, Boston, Mass., \$200.

- THE PROPERTY OF MR. D. G. KLAUBERG.
56. Bay gelding Allanoke, 4, by Aramis, dam Carrie P.; J. F. King, Newport, R. I., \$300.

Racing at Fresno.

FRESNO FAIR GROUND ASSOCIATION FALL MEETING, Oct. 7th.—Running; Purse, \$150; for all ages; three quarters of a mile.
W. Kelly's b g Jon Jon, by Monday, dam Plaything, 3 years, 110 lbs. 1 Hill & Gries' blk m Dottie Dimple, by Ben Wade, dam unknown, 4 years, 115 lbs. .... 2
Time, 1:15 1/2.

Same Day; Running; Purse, \$150; for two-year-olds; one mile. Hill & Gries' b c Arthur H., by Hochhocking, dam Eva Coumbs, 110 lbs. 1 E. T. Lowery's ch c Joe Walker, by Joe Daniels, 110 lbs. .... 2 E. T. Lowery's ch c Jack Frost, by Joe Daniels, 110 lbs. .... 3 J. C. O'Neill's Bayonet. .... 0
Time, 1:50.

Same Day; Trotting; Purse, \$150; —class. Elite, h m—John Hearsly. .... 1 1 1 Bay Rose, h c—E. Gidding. .... 2 2 1 Lulu F.—J. N. Ayers. .... 3 dis
Time, 2:54, 2:49, 2:44 1/2.

Oct. 8th; Running; Purse, \$150; dash of quarter of a mile. Hill & Gries, blk m Dottie Dimple. .... 1 C. Hoffman's Dandy Roan. .... 2 P. D. Bozeman's Confidence. .... 3 Buck Pemberton's Tom Shores. .... 0
Time, 2:28 1/2.

Same Day—Running; Purse, \$150; for all ages; three-quarter mile heats. W. Kelly's h g Jon Jon, by Monday, dam Plaything, 3 years, 110 lbs. .... 1 G. L. Richardson's g Billy the Kid, by Leinster, dam Lily Simpson, aged, 115 lbs. .... 2
Time, 1:20 1/2, 1:15 1/2.

Same Day—Trotting; Purse, \$—; 2:30 class. Adrian h s, by Reliance—J. M. Learned. .... 1 2 1 1 Baby Mine, blk m, by Nephew—P. W. Dudley. .... 2 1 2 2
Time, 2:38, 0:00, 2:32 1/2, 2:36 1/2.

Oct. 9th—Pacing; purse, \$150; 2:40 class. Johnny Wiegler, dn g—F. H. Duvall. .... 3 1 1 1 Bruce, g g—A. L. Hinds. .... 1 2 2 2 Robert L., b g—P. W. Dudley. .... 2 dis
Time, 2:33, 2:29 1/2, 2:30 1/2, 2:36 1/2.

Same Day—Trotting; purse, \$500; 2:27 class. Tump Winston, ch g, by Primus—E. Downer. .... 1 2 1 1 Adrian, h s, by Reliance—J. M. Learned. .... 2 1 2 2
Time, 2:32 1/2, 2:32 1/2, 2:34, 2:32.

Same Day—Special purse, \$250. Ed., b g—A. T. Jackson. .... 2 1 2 1 1 Ned, h g—Joe Edge. .... 1 2 1 3 3 Fred Arnold, br g—A. L. Hinds. .... 3 3 3 2 2
Time, 2:31 1/2, 2:34 1/2, 2:34, 2:36, 2:33 1/2.

Oct. 10th—Running; purse, \$250; for all ages; one and three-quarter miles. W. Kelly's h g Jon Jon, by Monday, dam, Plaything, 3 years, 110 lbs. 1 Hill & Gries' h c Bachelor, by Hochhocking, dam Maid of the Mist, 3 years, 115 lbs. .... 2 Miller & Howson's m Amanda L., by Shannon, dam Eva Ashton, 4 years, 115 lbs. .... 3
Time, 3:07 1/2.

Same Day—Pacing; purse, \$500; 2:22 class. Shaker, h g—M. F. Odell. .... 1 2 1 2 1 Prince, h g—S. C. Tyrone. .... 3 1 2 1 2 Robert L., b g—P. W. Dudley. .... 2 dis
Time, 2:28 1/2, 2:34 1/2, 2:32 1/2, 2:34, 2:27.

Same Day—Running; purse, \$100; half mile heats. H. Stover's ch g Quebec, by Norfolk. .... 1 1 A. A. Finney's ch g A. A. P., by Jordan. .... 2 2
Time, 51, 51.

Oct. 11th—Running; purse, \$300; for all ages; two miles. Hill & Gries' h c Bachelor, by Hochhocking, dam Maid of the Mist, 3 years, 105 lbs. .... 1 Miller & Howson's m Amanda L., by Shannon, dam Eva Ashton, 4 years, 115 lbs. .... 2 H. Stover's ch g Quebec, by Norfolk, dam by Belmont, aged, 117 lbs. 3
Time, 3:37.

Same Day—Running; purse, \$100; dash of a quarter of a mile. P. B. Bozeman's Confidence. .... 1 C. Hoffman's Dandy Roan. .... 2 A. A. Finney's A. A. P. .... 3
Time, 2:31.

The same day a roadster race for a purse of \$100, gentlemen drivers, was trotted. D. S. Terry, Jr.'s Nibsy, W. W. Phillip's Prince, G. H. Bernhard's Balmont, L. A. Blasingame's Dan and W. T. Oden's Kate were the starters. Dan won the first heat in 3:19; Nibsy the second, in 3:09; Dan the third and fourth, in 3:06, 3:00.

The well-known Tennessee mare, Glengarine, has been sold by Hayden & Barry to Dr. Powers, of Brooklyn, who purchases in behalf of parties in Honolulu, Sandwich Islands, whither the mare will be shipped next week. Glengarine is a bay mare, bred by the Peytons, of Tennessee, in 1879, and is by Glengarry (son of Thormanby and Carbine, by Rifleman), dam Romping Girl, by Jack Malone (son of Lexington); 2d dam Fannie McAllister (dam of Muggius), by Omeara; 3d dam by imp. Leviathan; 4th dam Ann Maria (imp.), by Truffle. Racing is growing quite rapidly in Honolulu. During the past week we have received a postal dated Sept. 15th, from our correspondent, stating a match for \$1,500 a side had just been decided. In Glengaria the Hawaiians will have a capital race-mare. She is not a weight carrier, according to her owner's statement, but her speed is tremendous, and, should she go amiss, her owner, who is one of the leading spirits of the hudding Hawaiian turf, will have a superlative broodmare.—N. Y. Spirit.

The Woodland Colt Stake.

The Woodland Driving Park Association's stake for two-year-olds was trotted last Saturday. Of the seven participants only two came to post, Sur Del and Hattie H., and the latter won in straight heats.

Woodland, Oct. 18th—Stake for two-year-olds, \$30 each. Hattie H., b f, by Alexander, dam by Don—C. R. Hopkin. .... 1 1 Sur Del, blk c, by Del Sur, dam by Black Ralph—R. H. Newton. .... 2 2
Time, 3:04 1/2, 3:07.

In the 2:30 class at the Indiana State Fair, three horses trotted, the time ranging from 2:52 to 3:01, and the Western Sportsman, referring to the race, says: "Three such played-out old skins never before started in a 2:30 class. Hoosier Boy was blind, Viro (formerly Don Quixote) is a little less than twenty years old and is a victim of heaves, and Happy Travler doesn't travel very fast and looked anything but happy. Men who have attended races for a quarter of a century will agree with us that such slow time was never before made in a 2:30 class."

Olden Time Trotters and Pacers.

Without being fond of argument, I am sometimes drawn into one, as follows: A party of gentlemen, not remarkable for trotting-horse knowledge, were in conversation the other day upon the merits and demerits of the trotters of the present and past, stating that intelligence, advanced thought, and civilization had brought the trotter to that degree of excellence so superior to olden times, and would continue until not only two minutes were reached but running time closely approximated. Maud S. and Jay-Eye-See being the special objects of their admiration, I simply remarked, "Gentlemen, you are mistaken; horses are no faster to-day than years ago, and I can prove it." They didn't give me a chance to prove it, but merely ridiculed the ideas advanced. Now, I propose to try and prove to those young gentlemen that my assertion was borne out by facts. It were needless for me to call their attention to the Ice Pony, as he flourished before they were born—yes, and could, and did in public, pece a half-mile in 1:00; nor to the little black pony Bull Pnp, who paced from the quarter to the half-mile pole in 29 s., or to Pocahontas doing her mile in 2:17 1/2 to wsgon. There are no doubt plenty of persons living that can vouch for the wonderful speed old Lady Moscow had. She was very fast in spots, but unsteady; so also Mac, he could trot when to himself a quarter in 31 s. or 32 s. What horse of to-day when Mountain Boy was in good shape and felt all right could beat him to the score and take the pole from him to the quarter pole? Not one on the turf, in my opinion. And Fillingham (since George Wilkes), driven by the lamented Horace Jones; there never was a faster horse struck the earth. He could trot a 2:00 gait, and, as McLoughlin informed me showed him a trial of two miles to wagon in 4:40.

Judge Fullerton, I think, has trotted to the half in 1:04 or 1:05. I was a witness to a feat accomplished by Bashaw, Jr., that demonstrated he could trot close to a 2:00 gait. His driver was instructed to speed him a quarter-mile. He started, forgetting that in the quarter he was to trot there lay one of those old-fashioned triangular scrapers. He started at the stand close to the pole. As he made the turn the driver saw the scraper, took his horse perceptibly back, trotted around the scraper, and went to the quarter in 33 seconds, a 2:12 gait, and so I could go on with John Morgan, Lady Palmer, the steady-rated Lady Suffolk, George M. Patchen, etc., but I have mentioned enough to prove that, in my opinion at least, and in that of any conservative mind, as for speed, horses were possessed, 20 to 30 years ago, with quite as much as at this time. I don't propose, for one moment, to say that horses of to-day could not beat the very ones I have named a race. The best of tracks, of just one mile around, and in the acme of condition, sulkies to weigh from 42 lbs. to 50 lbs., and more greater factors, toe-weights and leather in the shape of boots, and straps to cover and protect a horse from any possible injury, thereby giving him absolute confidence in himself to keep up his best efforts for a longer period of time, enables him to trot faster miles, but does not enable him to attain any higher rate of speed than the horses of other days.

If horses of years ago had trotted over the same track, same appliances, weight of sulky, etc., their miles would have been made much faster. I do not attempt to attack the time, labor, intelligence and expense to which breeders have been subjected in determining the best possible strains or crosses to produce with certainty a trotter of greater or less degree, whose breeding may carry him at a high rate of speed, assisted by track, sulky and boots, a much longer distance than horses of former times could hold their rate of speed without the same advantages; but I do attack the proposition that horses are so much faster to-day for speed than of from 20 to 30 years ago; and, after all, why should they? Gentlemen of to-day are building upon foundations of years ago, the same Abdallah blood, through Hambletonian, Mambrino Chief, the Stars, the Clays, the Pilots, the Bashaws, Knox, Champions, etc., with the predominating blood in the trotter of to-day, and with such foundation upon which to build, with track, sulky, toe-weights, and boots to cover his ear, if necessary, our great trotter is enabled to keep up his high rate of speed for a greater distance only than his distinguished ancestry, simply this and nothing more.—Occasional, in N. Y. Spirit.

Sales at San Francisquita.

Messrs. Easton & Eldridge conducted an auction sale of stock at the San Francisquita Ranch, the horse farm of Mr. H. W. Seale, last Saturday. The attendance was fair, but the prevailing depression in business circles made it difficult to obtain remunerative prices, and only a part of the animals catalogued were sold. The following is the record: Darkness, black mare, 3 years, by Elmo, dam Lady Comstock, by Norfolk, out of Mary Butte; J. D. Carr, Salinas, \$335.

Daylight, black mare, 2 years, by Elmo, dam Lady Comstock; J. D. Carr, Salinas, \$335.

Rowdy, bay horse, 7 years, by Herules; O. A. Hickok, San Francisco, \$195.

Fred, bay horse, 6 years, full brother to Rowdy; O. A. Hickok, \$195.

Merchant, bay gelding, 3 years, by Carr's Mambrino, dam Accident, by Elmo; W. J. Bryan, San Francisco, \$240.

Idol, bay horse, 5 years, by Carr's Mambrino, dam Ida May, Jr., by Owen Dale; W. J. Bryan \$280.

Dinah, bay mare, 6 years, by Geo. M. Patchen, Jr.; E. L. Smith, San Francisco, \$150.

Lady, bay mare, 5 years, by Elmo; J. P. Mendonca, Honolulu, H. I., \$175.

Elma, chestnut filly, 3 years, by Elmo, dam Orphan Girl, by a Black Hawk horse; John Schmidt, San Francisco, \$610.

Nelly, chestnut mare, by John Nelson, in foal to Elmo; Alex Zab, \$140.

Constitution, black horse, 8 years; E. L. Smith, \$140.

Columbia, chestnut filly, 3 years, by Elmo, dam Goldfinder mare; Dan McCarthy, \$185.

Marie, chestnut filly, 3 years, by Elmo, dam Lotta; Dan McCarthy, \$195.

Millie, chestnut filly, 3 years, by Elmo, dam by Chieftain, in foal to Eros, by Electioneer; F. G. Newlands, San Francisco, \$160.

Ellis, chestnut horse, 3 years, by Elmo, dam Ella, F. G. Newlands, \$190.

Eliza, bay mare, 3 years, by Elmo; J. P. Mendonca, \$170.

Manzanita, chestnut colt, 2 years, by Elmo, dam Ida May; J. D. Carr, \$240.

Etta, chestnut filly, 2 years, by Elmo, dam Ella; Dan McCarthy, \$95.

Sorrel Belle, chestnut filly, yearling, by Elmo, dam Santa Clara; F. G. Newlands, \$80.

Napoleon, bay gelding, by Elmo; J. S. Spaulding, \$100.

Kentucky Colt Stakes.

The meeting of the Kentucky Trotting Horse Breeders' Association was held at Lexington, on the 13th, 14th, 15th and 16th. The following items are from the Live Stock Record: It is astonishing how poorly the annual meeting of the Kentucky Trotting Horse Breeders' Association is patronized, especially in this section where so many trotters are bred and raised, and the character of the sport is so good. Better trotting or even as good in the younger classes was never witnessed in this country.

On the first day the Lexington Stakes, for two-year-olds, was won by Eagle Bird, by Jay Bird (son of Geo. Wilkes), dam Tansy by Geo. Wilkes, grandam Lady Tansy by Daniel Lambert, great-grandam a thoroughbred mare. We have no hesitancy in saying that this is one of the best, fastest and purest gaited trotters we have ever seen, and can trot a mile in 2:25. Greenlander and Baron Wilkes who each won a heat reflect credit upon their respective sires. Johnston, the pacer, paced in 2:08 quite handsly, and did it so easy it looked like he could have beaten his best record, 2:06 1/2.

On the second day Bedford by Strathmore, dam by Mambrino Patchen, won the Kentucky Stakes, for three-year-olds, at five heats. It was a grand trot, every heat was contested, and a better field of youngsters would be hard to find. The first heat was trotted in 2:23 1/2 by Novelty, the second by C. F. Clay in 2:32 1/2, and the third, fourth and fifth by Bedford in 2:31 1/2, 2:30, 2:30 1/2, showing trifling variation in the five heats.

Alycye by George Wilkes, dam Alma Mater by Mambrino Patchen, trotted a mile in 2:27 1/2, between the two trots, and Prince Wilkes, who behaved badly, and was distanced in the three-year-old stakes, trotted an exhibition mile in 2:34 1/2. The Glenview yearling, Nutbreaker, by Nutwood, 1st dam Bonny Doon, by Aberdeen, 2d dam Ariel, by Ethan Allen; 3d dam by Harris' Hambletonian, trotted a mile without a skip or break in 2:46 1/2. This is a grand, big bay colt, 15 1/2 hands high, and has beautiful action and a pure gait. The day was raw and cold, and a high wind was blowing, which made greatly against fast time, or the Nutbreaker would have trotted two or three seconds faster.

On the third day the Kentucky Stakes for four-year-olds was trotted, and won in straight heats by Early Dawn, in 2:23 1/2, 2:23 1/2, 2:21 1/2. She won quite easily, and can trot below 2:20. The three starters were by George Wilkes, and reflect great credit upon this great sire. Wilkes Boy was second in the second and third heats. Lizzie Wilkes cast a shoe in the second heat, which sent her to a bad break, and in the third heat she got off rather tangled and broke several times. It is seldom you see three colts by the same sire four years old, either of whom can trot below 2:25.

During the afternoon, between heats, there was several exhibition trots. Mr. F. D. Stont's, of Iowa, three-year-old bay filly Alecia, own sister to Alcantara and Alycye, by George Wilkes, dam Alma Mater by Mambrino Patchen, trotted for a breeder's certificate in 2:29. Mr. B. J. Treacy trotted a yearling colt by Red Wilkes, dam Rena, in 3:10 1/2. The Glenview Farm's four-year-old black filly, by Cuyler, dam Mary Mambrino by Mambrino Patchen, trotted to beat Mand S.'s 2:17 1/2, in 2:20. The track was hard and dead, and the air cool and raw, which made greatly against fast time. Pancoast trotted against his own record, 2:21 1/2, in 2:23.

Before the trots the premiums offered by Mr. A. S. McCann for the best yearling and sucking, by Red Wilkes, were awarded. Mr. Blackford, of Keene, Ky., took the yearling premium, and Mr. Charles Williams, of Payne's Depot, Ky., the sucking premium.

There were a number of trials given horses for a Breeders' certificate. Blue Cloud, by Ashland Chief, dam by American Clay, trotted a mile in 2:27 1/2. Lady De Jarrette, the beautiful premium mare, owned by W. H. Wilson, and to be raffled off Saturday week, trotted a mile in 2:24 1/2.

But there were two performances during the afternoon seldom witnessed, and never beaten this side of California. The Glenview yearling Nutbreaker trotted a mile as follows: Quarter 40, half 1:20 1/2, three-quarters 2:02, mile 2:42 1/2, beating his own record of 2:46 three and three-quarter seconds. Mr. Percy Talbot trotted his bay two-year-old filly, Silver One, by Alycye, dam Silverlock, by Mambrino Time, as follows: Quarter 38, half 1:14 1/2, three-quarters 1:51, mile 2:26 1/2, trotting the last half in 1:11 1/2, a grand performance.

The meeting, so far as good trotting is concerned, has been one of the best we ever saw. The great fault is that breeders who derive so much benefit from it, with a few notable exceptions, neither patronize or aid it by their presence, while they derive hundreds of dollars in sales, from parties attracted by the meeting.

SUMMARIES.

Oct. 13th.—Lexington Stakes for two-year-old colts and fillies, foals of 1882. Mile heats, two in three to harness; \$50 entrance, \$25 forfeit, and \$10 declaration if made on or before the 1st day of June, 1884; the Association to add \$100; two-thirds of the whole stake to first, two-thirds of the remainder to second and balance to third. Closed January 1, 1884, with 67 nominations, 34 of whom declared, 3 dead. Value \$1,275. L. E. Simmons' r c Eagle Bird, by Jay Bird, dam Tansy, by George Wilkes..... 1 3 2 1 A. Sharpe's h c Greenlander, by Princeps, dam by Brady's Hambletonian..... 2 2 1 2 R. G. Stoner's b c Baron Wilkes, by George Wilkes, dam Belle Patchen..... 3 2 1 3 B. Mur's c c Charlie Wilkes, by George Wilkes, dam Kate Bradley..... dis. J. T. McMillin's b c Aug. Haverstick, by Strathmore, dam by Clark Chief, Jr..... dis. Time, 2:20 1/2, 2:22 1/2, 2:32 1/2, 2:33 1/2.

Betting: Eagle \$20, Greenlander \$14, field \$2. Second Heat—Eagle Bird, \$20, field \$12. Third Heat—Eagle Bird \$20, field \$10. Fourth Heat—Greenlander \$40, field \$20.

Second Day, Tuesday, October 11th.—The Kentucky Stakes for three-year-olds. Mile heats; 3 in 5 to harness, \$50 entrance, \$25 forfeit, and \$10 declaration, if made on or before the 1st of June, 1884; the Association to add \$100; two-thirds of the whole stake to first, two-thirds of the remainder to second, and balance to third. Closed January 1st, 1884, with 135 nominations, 61 of whom declared, 6 dead. Value \$2,285. R. G. Stoner's b c Bedford, by Strathmore, dam by Mambrino Patchen..... 2 3 1 1 W. S. Buckner's b c O. F. Clay, by Callban, dam Sapano, by Strathmore..... 5 1 2 3 5 W. R. Letcher's c c Egalite, by Egbert, dam Stockbros Bells. 3 4 5 4 6 Macey Bros.' b c O. F. C., by Onward, dam by Blackwood..... 4 2 4 6 R. E. Terrill's c c Gambetta, by George Wilkes, dam by Gill's Vermont..... 5 6 3 2 3 K. Thomas's h f Novelty, by New York, dam Polly, by Tom Hal, Jr..... 1 5 6 4 4 B. J. Treacy's c c Prince Wilkes, by Red Wilkes, dam by Brown Chief..... dis. Time, 2:28 1/2, 2:32 1/2, 2:31 1/2, 2:30, 2:30 1/2.

Betting—Egalite \$30, Novelty \$20, Bedford \$10, O. F. Clay \$10, Gambetta \$10, field \$40. Second Heat—Novelty \$40, field \$30. Third Heat—Novelty \$24, C. F. Clay \$20, field \$20. Fourth Heat—Bedford \$15, Novelty \$15, field \$10. Fifth Heat—Bedford \$30, field \$10.

Oct. 15th.—The Blue Grass Stakes for four-year-olds. Mile heats; 3 in 5 in harness; \$50 entrance, \$25 forfeit and \$10 declared on or before the 1st day of June, 1884; the Association to add \$100; two-thirds of the whole stake to first, two-thirds of the remainder to second and balance to third. Closed January 1st, 1884, with 101 entries, 42 declared, 5 dead or withdrawn. Value, \$1,729. L. E. Simmons' b f Early Dawn, by Geo. Wilkes, dam by Mambrino Patchen..... 1 1 1 1 T. Anglin's b c Wilkes Boy, by Geo. Wilkes, dam by Mambrino Patchen..... 3 2 2

J. T. Shackelford's b f Lizzie Wilkes, by Geo. Wilkes, dam Laura, by Joe Hooker..... 2 3 2 Time, 2:34 1/2, 2:33 1/2, 2:31 1/2.

Betting: Early Dawn \$30, field \$10. Second Heat—Early Dawn barred; Lizzie Wilkes, \$20, Wilkes Boy—\$12. Oct. 16th.—The Red Wilkes Stakes for the get of Red Wilkes, foals of 1882. \$10 entrance, and \$15 additional to start; \$150 added by A. Smith McCann. Six-ninths to first, two-ninths to second, remainder to third; mile heats 2 in 3; 10 entries. Value \$325. F. A. Muir's b c Charlie Wilkes, by Red Wilkes, dam Mike's dam..... 1 2 1 D. Carlisle's b f Lady Mascotte, by Red Wilkes, out of Lida Bassett's dam..... 2 1 2 B. Curry's b c Shedd, by Red Wilkes, dam by 2d Ericsson..... 3 5 3 J. P. McCann's c b Minnie B., by Red Wilkes dam by Harrodsburg Boy..... 4 3 5 A. Smith McCann's b f Lady Wilkes, by Red Wilkes, out of Phil Thompson's dam..... 5 4 4 Time, 2:45, 2:41 1/2, 2:39.

Betting: Charlie Wilkes \$20, field \$12. Second heat—Charlie Wilkes, \$20, field \$12. Third heat—Lady Mascotte \$50, field \$25.

CRICKET.

A Few Hints to Junior Bowlers.

[By H. F. BOYLE, OF THE AUSTRALIAN ELEVEN.]

1. The ball should be held firm but not tight, between the first and second fingers and the thumb, resting on the fourth finger, which should be partially closed or curved. If held in this manner and delivered with a jerk or sudden turn of the wrist, the ball will break or twist, this is, diverge from its course, consequently be more difficult to play.

2. Determine on what style is most suitable to you—fast, slow or medium, having done so (do not alter or vary your mode of delivery) fix upon the height, which in all cases nearly, is on a level or a little higher than the head; this to a great extent is caused by the level and billiard table-like wickets of the present day, also the improvement in batting. The higher the delivery, the more abrupt will be the rise from the pitch, causing great difficulty in playing, also giving the field more chance of a catch.

3. Having determined on style, pace and height (practice only will teach this), next decide upon the distances to run or walk up to the wicket before delivery. For fast bowling, from eight to ten yards will be found sufficient; medium, six to eight; and for slow, from four to six yards. Of course these distances are not to be considered as fixed rules; the bowler will soon learn which is most suitable and least tiring, the latter being of great importance, for no one can put on the same amount of break or twist when tired or over-worked as when fresh.

4. The bowler has now to fix upon which side of the wicket he will bowl from, over or round, the former being preferable on account of the liability to get batsmen leg before wicket. Most bowlers are able to deliver from both sides, which is an advantage and in many instances irritable to batsmen—if the latter all the more credit to the bowler, who has a better chance of getting a wicket.

5. The body on delivery of the ball should be square with the bowling crease, and as upright as possible.

6. Practice often but not too much at a time, from 25 to 30 balls per day will be quite sufficient for a commencement, and be careful not to bowl when tired, for assuredly if you do, it will lead to a careless and inaccurate style, and probably spoil your chance of improving.

7. Direction will be the first part to learn; this can only be gained by constant practice, theory, of course, being out of the question.

8. Having gained direction, that is, being able to bowl tolerably straight, the bowler has to begin his hardest task, viz., to learn the art of pitching. By pitching, I mean the distance the ball shall first strike the ground from a batsman's reach, so that if he play forward the ball may go over the shoulder of his hat, if he play back it may suddenly rise and he may be caught. Of course, the distance will vary according to the height and reach of the batsman, his style of play, pace of ball, height of bowler, height of delivery, and in some cases on the nature of the ground.

Too much importance cannot be attached to this part of bowling, for without pitch, no matter how much a ball may break, it is easily played or hit with safety. Therefore cultivate pitch, which having acquired will enable you to drop a ball just where a batsman least likes it, causing him to feel uncomfortable, lose confidence, perhaps cramp his play, thereby leading him to commit an error, by either bowling or getting him caught or stumped.

The beginner, having acquired direction, pitch or break, must not congratulate himself on being proficient, for, if pitted against a good batsman, he will in all probability find his master. His best deliveries may be played back to him or mid-off, or forward for singles; or the batsman may step out and drive him for 3 to 4. Now is the time for the young bowler to use his head; that is, to vary pace, pitch, height of delivery, and perhaps change to the other side of the wicket. By these means he may cause his opponent to make a mistake. Delivering a slow ball he may get a catch, very likely mid-on or mid-off will be the favored party, or again if the batsman step out and hit, one of the long-fielders may have a chance, or the wicket-keeper stump him. A fast ball may break through the batsman's defence, or short slip or wicket-keeper catch him from a snick. If a fieldsmen or wicket-keeper misses a chance, never lose your temper or show disgust, for by so doing you will most likely lose pitch or direction, and also cause the fielders to become over-anxious, thus leading to other mishaps.

Bowlers of the present day in anything like first-class cricket, do not depend entirely on breaking through the defence of a batsman; so to speak, they bowl with their heads, that is, seeing their bowling is being played or scored from, they alter their length of pitch, put in a slow with the object of getting a catch, or for the wicket-keeper to have a chance of stumping. If that does not succeed, a fast will be sent down, the next perhaps a medium pace, to be followed very likely with a slow ball and more elevation—all done for the purpose of causing the batsman to make a mistake by playing too soon, too late, stepping out and missing it, or giving a chance to the field. Bowlers should never despair of removing a batsman no matter how poor the former or good the latter. The worst of bowlers are just as likely to deliver a ball on the spot a good batsman does not like and get a wicket, as the best bowler that ever handled a ball. The reader will no doubt have noticed that great prominence is given to the cultivation of pitch, and, I think, justly, for this is the most important part of bowling. By being able to drop the ball where it is wanted the bowler can find out the weak points of his opponent, and varying pace, etc., lead to the downfall of the batsman.

I trust that the few hints given above may prove of some little assistance to young bowlers, but at the same time can assure them that they will learn more in twenty minutes' practice than in volumes of theoretical teaching.

Australians vs. All-Comers.—A Well-Contested Game.

The second match between the above teams took place last Saturday afternoon and was unfinished at the time of drawing the stumps. This result was chiefly due to the lateness in starting the game and the late arrival of certain cricketers who have every facility for making their appearance at least one hour earlier. Clark, the skipper of the Antipodeans, won the toss and elected to field first. This proved very costly, as the All-Comers posted the moderate bowling of the Australians to the tune of 95. Purdy (21), Carr (18), Burnett (18), and Benner (10) were the most effective batsmen. Carr's innings was certainly the best display of batting seen on the grounds for a considerable time. Jacobs proved the most successful of the many bowlers tried. The catch made by Jacobs that dismissed Gray was a remarkably clever one. The ball appeared to be travelling very hard over his head, but he jumped up and grabbed the ball with his left hand, to the surprise of everybody. Bristowe and Barney Benjamin each made a fine catch.

Barney Benjamin and Spiro, who started in batting for the "corustake," commenced hostilities very rapidly and after Banner and Waterman had each sent down an over the score showed 12 runs. This was too good to last, however, as Benjamin was bowled and Spiro was soon after run out. Jacobs, after breaking his egg, was bowled off his pad. Clark and Ben Benjamin managed to keep their stumps in tact till time was up, the book showing 3 wickets down for 42 runs. The Australians have got 54 runs to make for victory and 7 wickets to do it with. We hardly think they can manage it if the All-Comers turn up in force. The score:

ALL COMERS.		AUSTRALIANS.	
W. J. Carr, c B. A. Benjamin, b Jacobs.....	18	I. H. Spiro, run out.....	8
G. Theobald, b B. A. Benjamin.....	3	Barney Benjamin, b Waterman.....	10
J. Miller, b B. A. Benjamin.....	0	A. W. Jacobs, b Waterman.....	2
A. Waterman, c Bristowe, b Jacobs.....	5	Ben Benjamin, not out.....	6
J. Purdy, c Bristowe, b Jacobs.....	21	Ben Clark, not out.....	9
G. Gray, c Jacobs, b Ben Benjamin.....	4		
H. H. Cookson, c and b Jacobs.....	1		
G. De Golia, c Jacobs, b Clark.....	1		
L. G. Burnett, b Jacobs.....	18		
C. Banner, c Cross, b Jacobs.....	10		
C. Goewey, not out.....	0		
Extras.....	14	Extras.....	7
Total.....	95	Total for three wickets.....	42

Bowled by Death.

"We are well in for Autumn now. The air is keen of a morning and cold after sundown—our days bright and enjoyable enough in their way, but suggestive of a top coat time coming, and no mistake about Summer lingering or an Indian Summer is to be made. Cricket is about done for, and a melancholy wind up we had to the season, marked by a couple of deaths. On Sunday last Fred Morley died, and a day or two earlier the Rev. A. R. Ward. Morley, three years or less ago, was our best fast bowler and one of the mainstays of Nottinghamshire. In 1882 he was out of sorts, and, while on the voyage to Australia with the Hon. John Bligh's team, got into great trouble through the collision which occurred to the P. and O. mail ship Peshawar. In the first scare he must have been hit hard or fallen heavily, for he was continually complaining afterwards. It was not till four months later though, and after he had been in half a dozen doctor's hands, treated for a variety of ailments, that he found what was really troubling him, viz., a broken rib. He seemed to get round, but was never his own man again, and died of congestion of the lungs. Somehow, the fright so upset him that he could not make an effort to use the "Dombey and Son" language, and gradually went from bad to worse. Our Marylebone Club sent him this season to Harrogate Spa, but nothing could save the poor fellow. He was a kind-hearted, simple-minded fellow, and very popular among our cricketers. The Reverend A. R. Ward, Artemus, as he was somewhat irreverently called, was a fine example of an athletics-loving gentleman. Thirty years ago he was a captain of the Cambridge cricket eleven, and had till the day of his death hardly ever missed being present at a big match. Not two months ago the old gentleman, who weighed over 280 lbs., declared that he could bat as well as ever if only his legs would stand the work, and he was always a boy at heart. His delight was to get hold of distinguished visitors to the 'Varsity, where I should mention he was perpetual President of the Cricket Club, and give them a dinner, for he was a great connoisseur of good eating and drinking. As a raconteur he had very few superiors, and his love of a joke or anecdote gained for him his *soubriquet*, founded on the similarity of his initials with surname to Artemus Ward's.—London Cor. N. Y. Sportsman.

No one will grudge the Nottinghamshire Eleven the honors they have fairly and honestly won this year. The championship of county cricket this Summer is theirs beyond a doubt, and their record is a brilliant series of successes, such as no eleven has been able to claim, certainly of late years. I believe I am correct in my figures, that the Nottinghamshire Eleven scored altogether, in their ten matches, 3,283 runs for 131 wickets, or an average of just under 25 runs, and their opponents' 2,832 runs for 197 wickets, which give an average of under fourteen and a half run. Nine easy victories and one drawn game in their favor, represent a summary of which the supporters of the game in Nottingham have good reason to be proud.—Cricket.

ATHLETICS.

Another Footrace.

The telegraph brings us word that Harmon was defeated in a hundred yard race by Lewis, in 9 3/4 s., at Corvallis, Oregon. There is no man named Lewis that can defeat in Harmon in a square race for that distance. Of course the time is simply nonsense, and no doubt manufactured for the occasion so as to give the race a sort of square appearance. We also learn that \$10,000 changed hands. We will wager a new hat that not a reader of the BREEDER AND SPORTSMAN lost a dollar on the result, as we have so often described professional footraces, and more especially the footraces in which Harmon has been a competitor. If you lose your money on a professional race simply through not being a subscriber of the paper, you have no one to blame but yourself. We have no pity for you.

Olympic Programme.

The following programme has been announced for the Fall meeting of the Olympic Club, which will take place on Thanksgiving Day, November 27th. The programme is open to all amateur athletes. We understand it is the intention of the management to bar a few prominent runners from competing in the 440 yard scratch race:

- One hundred yards handicap.
  - Two hundred and twenty yards handicap.
  - Four hundred and forty yards scratch race for the Hammersmith medal, to be won three times.
  - Half-mile handicap.
  - Two mile handicap, two hundred yards limit.
  - One mile scratch bicycle race.
  - Five mile handicap bicycle race.
  - Burning high jump.
  - Pole Vault.
  - Obstacle race.
  - One mile handicap walk.
- Entries close November 20th, at 9 o'clock P. M., at the Olympic Club. Entrance fee, 50 cents for each event.

How to Start Foot Races.

Mr. L. E. Myers wants to revolutionize the system of starting in vogue at athletic meetings in this country. He says he has studied the English method thoroughly, and is so impressed with the uniform good start effected at the various meetings in England that he is determined, if possible, to introduce the system into this country. This is the way Mr. Myers says it should be done: "First, assign each man his mark and inform them not to get into position until told to do so; the men must not be allowed to walk around hitching their pants, etc., but must stand bolt upright on the mark. Second, tell them to set themselves. Do not fire the pistol as you give the word 'set' but keep your men until they are all as steady as statues. Then let them go. Every starter in this country has a different way of sending off his men, consequently the athletes do not know what to expect." The amateur champion runner is also of the opinion that "there is not a man in or around New York who knows how to fire a pistol," but he recommends John Fraser to the National Association as a man, who, with a little practice, could well fill the position. Mr. Myers' suggestions are worthy of the attention of all who take an interest in amateur athletics.

On Sept. 29th, at Birmingham, Eng., at the Buchfield Harrier sports, W. G. George defeated W. Snook in the 1,500 yard race in 3 m. 52 2-5 s. Subsequently they engaged in a one mile bicycle race, which is thus described by an English paper: "George had a little the best of the start, and went away in front of his opponent, who, however, wrested the lead from him after going a lap. George by a plucky spurt once more got to the head of affairs. Snook, however, passed him again in the last lap, and held the lead until entering the straight for home, when George by a good spurt got up, but, missing his treadle, was thrown out of the race, and Snook won easily by ten yards. Time, 3 m. 32 1-5 s."

The *Call* of last Monday states that among the late arrivals in this city, is Harry Johnson, the 75 yard sprinter, who will shortly issue a challenge to run any man in the world 75 yards. We think the credulous editor of the *Call* has been imposed upon by some outsider, as H. M. Johnson, the sprinter (and the only Johnson of any note in America), was running in New York as late as Oct. 12th. We are also of the opinion that even H. M. Johnson or any other runner in America, would not be particularly anxious to put up any coin for such a match, since Hutchens has signified his intention of coming to America.

An English scientific writer draws attention to a new argument for the development of out-door pastimes, by the remark that "games which require close attention to a flying object, such as tennis, battledore and shuttlecock, and in a less degree cricket, are among the most powerful agencies by which the muscles of the eyes can be strengthened and improved."

At the last regular meeting of the Acme Athletic Club, of Oakland, the following officers were elected to serve during the ensuing year: D. C. Van Court, President; E. L. Merwin, Vice President; R. I. Hepburn, Secretary; G. H. Brown, Treasurer; R. B. Hurd, Jr., Assistant Secretary and Treasurer; A. M. Campbell, Leader.

Fallow '86 is credited with running 100 yards backward in 14 1/2 s. at the Amherst College Games, Oct. 4th. This is the best time ever made in a race of this description. On the same day he also won the quarter in 53 1/2 s, which, if correct, is excellent time for a college boy.

On dit that Harry Hutchens, the fastest man in the world will visit this country, late this month. If he comes, a professional handicap will probably be held in New York City. This will give the boys a chance to learn how to sprint, and to verify the wonderful stories about his startling abilities.—Amateur Athlete.

A large delegation of athletes were present on Saturday, Oct. 12th., at Mott Haven, to witness the 100-yard race between M. W. Ford and W. C. Wilmer for the championship of the New York Athletic Club. Ford won by very little to spare in 10 3/4 s. The race was run in a heavy rain.

Intelligent and systematic attention to physical culture in colleges, instead of permitting the students to continue their sports in an indiscriminate manner, is advocated by President Robinson, of Brown University.

W. R. Stewart, accompanied with a New York friend, started last week for a hunting expedition in Northern California. He will be back in time to take part in the Fall games of the Olympic Club.

The University games have been postponed till next Saturday afternoon. The correct list of open events is as follows: 100 and 220 handicap runs, running high jump and a hop step and jump.

The pupils of Clarence Whistler are arranging a benefit for the "Kansas Demon." It will take place at Platts' Hall, on Oct. 30th.

On Oct. 2d, at the Lambeth Baths, London, H. Davenport plunged 70 ft. 7 in., which wipes out the best previous amateur record of 63 ft. 4 in. made by R. Greer, on July 17, 1879.

By cable we learn that George's attempt, to lower the mile record at Stamford Bridge Athletic Grounds on Oct. 11th, was unsuccessful.

The gymnasium of the Williamsburgh Athletic Club will shortly be refurbished by Prof. Sargeant.

THE KENNEL.

Distemper—Its Treatment.

The disease is a fever, and it has been truly said, "You cannot cure but you may give a fever." Many dogs recover from distemper without being given one single dose of medicine, and strange to say some recover in spite of very many doses. Recoveries also happen under courses of treatment—so far as drugs are concerned—diametrically opposite to each other in their action. The explanation of all this is that there is a natural tendency in the disease to recovery if only the dog be placed in favorable conditions. The disease, unless aggravated, runs a certain debite course, and it is our duty merely to assist nature by keeping the animal's internal economy in good order, and by protecting it from external injury. Remedies given with a view to cut short the disease are always useless, and often injurious. We have no agent which can immediately remove the poison which exists in the blood, or which can at once restore to health the organs deranged by that poison. We can only assist nature to gradually eliminate from the blood through the natural channels of the body all deleterious matters. The indications to be observed in treating a case of distemper are: To guide the fever; to prevent any local complications; to keep up the dog's strength; and to protect him from irritants either within or without his body. The first essential step is to place the dog as soon as distemper is detected in a dry, well ventilated place, which must be kept tight and dry at as even a temperature as possible. In winter a certain amount of artificial warmth is advisable, but a hot room is to be avoided. Too much warmth causes fatigue and predisposes to the advent of nervous affections. A room with a big fire in it generally has cold draughts passing through it, and should the fire go on the fall of temperature is very great. No better place to treat a case of distemper can be found than in a well ventilated stable, if the floor be dry. At the very outset of the disease a mild dose of aperient medicine may be given, but emetics are always unnecessary. The dog vomits very easily, and is quite able to unload his stomach should it be too full. Violent retching only induces weakness, destroys the appetite, and may render the stomach dangerously irritable. Should the feverish symptoms be well marked, a teaspoonful of equal parts of sweet nitre and acetate of ammonia may be given twice a day. During the first day or two of distemper no alarm need be felt at the dog refusing food. He certainly ought not to be forced with soups or beef tea, especially when mixed with wine or spirits. Such a course upsets the stomach. Tempt him with anything he will eat, change the food, and leave none before him. The diet should always include a fair amount of animal food, and it should be remembered that meat is indigestible the more it is cooked; it is more easily digested in its raw state. About the fourth or fifth day small doses of tonics and stimulants may be given, and these should be administered in a form calculated to annoy the dog as little as possible. Bulky drenches and nasty tasting things should be avoided, as they excite and worry the patient to an extent often far in excess of any good they might otherwise do. The compound tincture of cinchona is a rather favorite medicine in distemper; but it is open to two objections—that dogs struggle against its administration, and that it is very apt to cause constipation.

Iron in some of its various medicinal forms is also often prescribed. It should never be given if the stomach is irritable, if any fever be present, or when the appetite is capricious. The best form of medicinal iron is certainly a pill, as it can usually be hidden in a choice morsel of food, and if not easily and rapidly given by force. A good tonic and stimulant pill may be made of quinine, one-half grain; nuxvomica, one-fourth grain; nitrate of potass, 5 grains; ginger, 2 grains. This is for a small dog once daily, for a collie twice a day, and for a St. Bernard, perhaps, two pills twice a day. They should be given after food. When distemper has been neglected, or wrongly treated and very great debility exists, some stimulant is necessary, such as sherry or brandy, and this should always be given mixed with beef tea. When the stomach is irritable, we should avoid milk and all thickened soups. Vomiting is best treated with five-grain doses of nitrate of bismuth three or four times a day, add by limiting the diet entirely to lean raw meat. If expense does not stand in the way, Brand's essence of beef is invaluable in cases of great gastric irritation. So long as the feeding is judiciously regulated, no bowel complications of a serious nature will arise. It must, however, be remembered that different articles of food produce very different effects upon the bowels. Liver and oatmeal have a laxative effect, while bread, rice, arrowroot, etc., have quite an opposite action. So long as the dog is not exposed to the cold or to sudden changes of temperatures, no chest complications need be feared. The discharge from eyes and nose should be removed every morning with a damp sponge, and if the eyelids be anointed with a little oil or common zinc ointment every night, that glueing together which often occurs and annoys the dog will be prevented. Diarrhoea, should it arise, suggests at once some change in the food. It may be met with small doses of port wine and powdered cinnamon. In bad cases tannin, catechu and opium may be necessary. Constipation should be guarded against by changing the food, but when marked must be relieved by mild aperients; the ordinary anti-bilious pills sold by chemists will do; enemas are also useful. When convalescence approaches great care is requisite, as a chill quickly induces a relapse. Pet dogs must not too soon be washed, no matter how dirty they may have become. Exercise must also be recommended very cautiously, as a violent frolic or a long run has frequently been followed by fits or paralysis. If it be known that a dog just affected with distemper is suffering from intestinal worms, an effort should be made to dislodge them before the dogs gets weak from disease. When once debility exists it is very dangerous to use violent worm medicine. The different complications and sequelae of distemper will be fully considered in their places, so we need not here go into their treatment. They seldom appear if the dog be properly treated from the earliest appearance of disease. A simple, uncomplicated case requires no further treatment than we have described, and complications will not arise if the little details of management pointed out be carefully observed. The line of treatment here laid down is in accordance with the theory we have adopted as to the nature of the disease, but was based simply upon it. It is the result of many years' experience, and its success seems to corroborate the truth of the theory.—Wm. Hunting, F. R. C. V. S., in *Land and P.*

The State Sportsman's Convention.

In my last letter I brought the proceedings up to Friday night, on which the official business of the convention ended. This, however, did not terminate the influence of the convention and so far as its pleasures are concerned, they at that point only commenced. Early on Saturday morning the delegates and members of the local club met at the St. Elmo hotel and started off to San Fernando to go into camp for a three days' hunt. About fifteen or twenty gentlemen reached the point selected, close along the railroad, about 11 A. M., and on the banks of a fine, clear, cool stream of water, where four or five large tents were soon pitched and the shooting commenced. Here again I have to commend the liberality and foresight of the Los Angeles Club, for nothing was omitted, nothing left undone that could in any way contribute to the comfort, convenience and pleasure of their guests. Owing to an accident, some years ago, which crippled my right arm, I do not shoot now, and so I was unanimously elected Major Dome of the camp. In this capacity, while the boys were away, I got along first-rate, as the cook and waiters gave no trouble, but when night came and the boys got on the rampage, I trust the Lord will mercifully deliver me from such another ordeal. The range of country selected for the hunt is well supplied with birds, but owing to a small species of cactus supplied with desperate thorns, which hugs the ground, it renders the use of dogs impossible, and thus adds to the labors of the hunter, as he has to retrieve his own birds, a very difficult and arduous work at this particular place. In a few minutes after the party separated it was evident birds were plentiful, for it was hang, bang, bang, in every direction until sun-down, when the tired and hungry shooters straggled into camp for supper and rest. As I checked each man's bag on returning I saw all had tried hard to win the honors of the day, and that the total score would be creditable. I shall not give each man's score separately as it was agreed that the three best of the day only should be given with the total of all. For the first day, ending Sunday noon, the tally stands:

Total birds	235
Hares	3
Cotton tails	12
Total	250

Best bags of the day:

Mr. Wm. Thomas, Chico	33
Mr. Gould, Los Angeles	32
Mr. Taggart, Los Angeles	25

The second day's hunt was not so good as the birds became fewer and wilder, but it was still creditable to those participating. The tally for this day, ending Monday noon was:

Total birds	169
Cotton tails	16
Hares	2
Total	187

As Mr. Taggart returned to town on Sunday, it left only two gentlemen with a chance of first honors, Mr. Thomas and Mr. Gould, and at the close they stood thus:

Mr. Thomas	65
Mr. Gould	55

I may remark that many more cotton tails and hares could have been killed if wanted, than were, but it is no joke carrying a load of them in the heat of the day. So the total of the hunt, which among true sportsman is more for pleasure than slaughter, the tally stands:

Birds	404
Cotton tails	28
Hares	5
Grand total	437

To which a few doves, and one or two other things, including a large rattlesnake by Mr. White, of Los Angeles, and a blue jay by Judge Dibble, of Grass Valley, may be added.

I shall be expected, of course, to say something of the nights in camp, of the fun and devilment going on, for the account would not be complete without my doing so. In some respects I would be glad to draw the veil of obscurity over the proceedings, but as a chronicler of current events the truth must be told. A few of us were decent people, but most were decidedly bad. Generally myself and Crittenden Robinson are quiet and silent in camp, and eschew revelry, sweet, innocent things, resembling the babes in the wood, who in their sad death were covered with flowers and leaves by the robins, Buckingham, the Fish Commissioner, Messrs. Kurtz and Gould, of Los Angeles, are much of the same style, but Hazard, Harry Payne, Taggart, Holbrook, and others of Los Angeles, H. H. Briggs, of San Francisco, George Fletcher and Judge Dibble, of Grass Valley, are perfect demons. Not having recovered from a grand and glorious spell of sea-sickness on the trip down, I was unusually quiet and sedate, and got through the first night pretty well, only that Holbrook, my partner for the night, is decidedly too long in the legs, too fond of turning over and over, and too musical in his snoring for comfort in a bed of small dimensions like that one which fate gave us. But the second night, I am sorry to say, was pandemonium itself, and it is hard to determine who were the chief fiends—Hazard, Taggart, Payne, Holbrook, Briggs, Fletcher, or Judge Dibble. Mr. Stanton, the photographer of Los Angeles, a prominent member of the party, who ran fourth for the chief honors in the shoot, had to return home on Sunday, and kindly left me his head all to myself, and so I rejoiced in the hope of a good night's rest, the first I had since leaving home on the previous Thursday and five nights without sleep will use up most men. There are often mistaken souls who dream of heaven, and this time, I was one of them. After a four hours' Salvation Army Camp Meeting, in which Judge Dibble led four incessant hours with a strange and happy mixture of sacred airs and nigger melodies, the meeting became fearfully

multitudinous and politically democratic, but they could not draw the badger, for having a good bed, I lay still though I could not sleep. It appears they had resolved to get me out, so at midnight Hazard and Taggart jumped on the tables, wrangled like hostile candidates turned somersaults like circus men, shouted like madmen, and then down went tables, men and crockery in a promiscuous mass to the ground. That dodge failed so Briggs conceived the idea of smoking me out with what he called a "disinfectant," for he is awful on words of four syllables. He often reminds me in this respect of Mark Twain, who whenever he wants a powerful stunner always uses the word "fructifies." He confesses he does not know what the word exactly means, but it sounds well and goes a long way and so he always uses it when in a fix for a word. So with Briggs' "disinfectant" of old rage, pork fat and dead cactus—he did not know what it meant, but it sounded well all the same and he hoped would go a long way. Directly a bright, blazing flame, at the end of a long pole, came through the doors of the tent, and great fragments of burning stuff fell among about two hundred loaded cartridges. Kurtz and Gould jumped up and ran off with the cartridges, scared to death, but I lay still determined I'd die a thousand deaths before I would leave my comfortable nest. So the disinfectant dodge failed, but keeping up the attack, Payne gave Fletcher and Judge Dibble a sudden lurch forward when one struck me on the shoulder and the other in the ribs mighty strong and for a time dazed me. In a moment, however, I saw my time to disinfect the crowd had come so I sat up and let out on short range at my prostrate foes a la John L. Sullivan, and for a few moments gave it them right good on the neck and ribs. As blow after blow fell loud and quick, the enemy became paralyzed, and taking advantage of the moment I followed up with my feet and kicked every mother's son of them out of the camp and like Robinson Crusoe in mid-ocean was left monarch of all I surveyed. Then they tried threatening to pull the tent down; fired fusillade after fusillade of blank cartridges close to my head; pelted rocks against the canvas; did every mean thing, in fact, like licked schoolboys, they could think of, but all in vain, for as I have already said, in bed I was going to stay if I had to die for the privilege. After a brief consultation they found they had undertaken too much of a job for that night, so returning to the camp-fire with their empty guns and the remnants of Briggs' "disinfectant," they took a night-cap, sang Auld Lang Syne in twenty different keys, and about two in the morning quietly crept off to roost. This is not a fictitious yarn of the events of that terrible night in camp. It is all through a literal statement of facts as they occurred, and I want the public and the wives of the ring-leaders to know it is so. I feel grateful to a merciful Providence for that night's protection, and am glad to be alive to relate its terrors. If a man does not play even in California before the game is out, the sooner he leaves the country the better. I am on the top this bout.

But notwithstanding the rackets of nights the hunt was a perfect success, and so full of pleasant incidents that I am sure no one participating will ever forget it. It made a mark for the Los Angeles sportsmen that can never be rubbed out. On Monday noon we returned to the city by train, to prepare for the grand game supper in the evening. This, however, was so conspicuously successful, both in itself and in its effects upon the public, that I desire to postpone its account until next week, that I may do both the justice they deserve. H.

The Use of Firearms.

We enjoy upon all sportsmen a careful observance of the following rules in handling guns, which are given by a prominent member of the New York State Sportsman's Association:

1. Never in excitement nor in fun point it towards any human being.
2. Never carry it so, that if accidentally discharged, it would endanger the life of a dog even.
3. Always think, when walking, which way your gun is pointed, and if a companion is in the field with you, no matter how near and how temptingly the game appears, do not shoot until you know just where he is, and that a stray shot may not possibly strike him, for one little pellet is sufficient to destroy an eye for ever.
4. Never get into a wagon without taking the cartridge from the gun.
5. Never get over a fence without either taking the cartridges out, or placing the gun through the fence on the ground, so that if you fall, or the fence breaks, it cannot be discharged.
6. Always carry the gun at half-cock.
7. Never let the hammers rest on the "plungers," or pieces which strike the cap.
8. Never try to close it when the hammers are down.
9. Never get in front of it yourself, if you see you are about to fall, drop the gun so that the muzzle will be from you. Occasionally a cartridge will stick after it has been fired. A stout thin blade of knife will generally extract it, if not remove the other cartridge, and then cut a straight stick and poke it out from the muzzle, but even then don't place your body in front of it, but content yourself with using the hand.
10. After firing one barrel, take the cartridge from the other and examine the wad over the shot to see that it is not loosened by the concussion as it very frequently is, which would produce a heavy recoil, and if it gets up the barrel, will likely burst the gun and likely take a hand off besides.
11. Never take hold of the muzzle to draw it towards you, nor set it up, when, if falling, its muzzle would be towards you. Finally, follow all these suggestions and be self-possessed, and the fields will afford you sport without danger, and I hope without temptation.

The various sporting clubs of Butte county are doing some good work this year in protecting game, and they have me hired for the special purpose of traveling about the country to enforce the laws. They propose to make it warm for the pot-hunters who loaf about the ponds and slaughter in an unsportsmanlike manner hundreds of ducks, and those who go to the woods to bag quail the same way. The club realizes the fact that game is growing scarcer every year, and that something must be done to protect it. Some of the clubs have secured the exclusive right of hunting over several of the large ranches, and therefore all killing will be done "on the square." While this may work a hardship to some hunters, the "poacher" and "pot hunter" will be kept away. —Biggs Policy.

A pigeon match will soon come off at Sutter Creek between Albert Cook and T. Norman, for \$50 a side. The conditions are twenty-five birds at thirty-one yards. Great interest is centered in the match as both gentlemen are acknowledged to be crack shots.

The Sunday Capital refers to Mr. Ryan's letter, which appeared in last week's issue, in the following strain: "A correspondent of the BREEDER AND SPORTSMAN, writing from the ducking grounds in the vicinity of the confluence of the Sacramento and San Joaquin rivers, suggests that the midday nuisance may be overcome by poisoning the fowls. He suggests the placing of vessels filled with poisoned grein in the tube a few feet from the open water in ponds. He claims that the ducks do not enter the tube to feed, but that the mudhens do, and that the latter might be killed by the wholesale without injury to the ducks. We hope that nobody will be deceived into doing anything of the kind, for it is a mistake to say that ducks do not leave the open ponds to feed. We have often found them feeding in the tube at considerable distances from the open water, and have no doubt that almost every person who has hunted ducks will say the same. If one were shooting on a pond and came across a lot of poisoned food close by, we venture to say his sport would end right there; for no man wants to take the chances of bringing home poisoned ducks."

Lacquer for Guns.

To prevent guns rusting in sea air, lacquer them on the outside with a very thin varnish of shellac and alcohol. This should be laid on quickly with a brush, and will also be imperceptible. A dose of the same will not hurt the mountings, but will effectually prevent their rusting, even if the gun is dipped in salt water, and remember no matter how carefully you clean the inside of the barrels after a day's shooting on the coast, you will do well to watch your gun a day or two and remove the rust which is found to form, which, if neglected will set in and leave an ugly mark.

Concerning the duck season in that neighborhood the Stockton Independent says: The late rains, while they have not been of any particular benefit to the farmers of the county, have been hailed with delight by citizens with hunting proclivities as the harbinger of good tidings in relation to large quantities of teal and mallard. The various sloughs in this vicinity were yesterday literally alive with men armed with shotguns, intent upon slaughtering the toothsome duck of every species. The latter, however, were not as plentiful as the hunters anticipated.

It is sheer wantonness to throw away game because it happens to be a little "high," but it is necessary to use permanganate of potash to purify it from the taint, though it is sometimes used successfully if carefully employed. It will generally suffice to cleanse the game thoroughly, and wipe it quite dry with soft cloths, rubbing a little salt into the worst parts. Game which is simply "high," without being putrid, is particularly easy of digestion, and of great value to invalids. —Lancet.

The Los Gatos Mail contains the following: "Last Sunday was a great day for the hunters. Abe Lee, as usual, brought in a huck weighing 123 pounds. Groom got one two pounds larger. Several parties went after quail and brought back as high as six dozen to the man. The best quail hunting last Sunday was between Alma and Wright's Station. Several went as far as the Spanish Ranch. The quail are getting shy. Only an expert at shooting on the wing can get them now."

At a meeting of the Multnomah Rod and Gun Club, held at Portland, Oct. 10th, the following new officers were elected: President, J. W. Waller; Vice-President, E. W. Moore; Secretary, H. C. McDonald; Treasurer, — McIntosh. The following new members joined the Club: E. D. McKee, Geo. Walker, F. T. Dodge, T. Trowbridge, Geo. Bliss, J. W. Keane and W. A. Eberle.

On Sunday, 12th, about sixty sportsmen of Portland boarded the City of Salem for Suaves' Island. J. Mathewa and J. Campbell made the biggest bag, with thirty-nine widgeons, Bodley and Curry also made excellent bags.

The pigeon match, at Dutch Flat, between W. J. Jameson and P. C. Byrne, resulted in a victory for the latter, who killed twelve straight birds.

The Capital says that the crack shots at the hay needn't be a bit surprised if they should receive a general challenge from James Parrot one of these days.

William Scott, of the English firm of W. & C. Scott & Sons, gunmakers, is out in Colorado hunting big game.

To-morrow the Forrester Gun Club, of Sacramento, hold a shoot for medals.

Some campers near Cloverdale killed a deer that weighed 125 pounds.

Local nimrods report quail plentiful on all sides.

THE RIFLE.

A Wonderful Record Made by Howard Carr

Last Saturday, at Shell Mound, the rifle contest between Howard Carr and Col. Sam Beaver, for a purse, proved to be a most remarkable match. The conditions were 100 shots, at the 200 yard target, military rifles, six pounds pull on trigger, off-hand, open sights. Mr. Carr used a Sharp-Burchard rifle, 66 grain of powder and 465-grain bullet. Col. Beaver fired his new Hotchkiss; H. C. Smith was scorer, and Capt. L. Siehe officiated as marker. The score which is given below speaks for itself. Never in the annals of rifle shooting has such a remarkable score been made. The target is to be photographed:

HOWARD CARR.	COLONEL SAM BEAVER.
String 1.... 4 5 5 5 5 4 4 5 5-47	String 1.... 4 5 4 4 5 4 4 4 4-49
2.... 5 5 4 5 5 5 5 5 5-49	2.... 4 4 4 4 5 5 4 4 4-43
3.... 5 5 5 5 5 5 5 4 5-47	3.... 5 5 4 5 5 4 4 4 5-45
4.... 4 4 5 5 5 5 5 5 4-47	4.... 4 5 4 4 4 4 4 4 4 5-43

Total..... 471	Total..... 436

The Alta says that at a recent practice Officer P. D. Linville made 10 bull's-eyes out of 12 shots, at the 600 yard target. A good performance, and if made in a match "for keeps" would be the top record. The entire police team are doing well and show a constant improvement.

Quite a large number of Company C gathered at Shell Mound Range last Sunday to contest for medals. T. E. Carson won the first class medal for September, and Mr. Raye the October medal. Mr. Sumner won the second class medal for both months, Mr. Ruddock won the third class medal for both months. Mr. Palm won the fourth class medal for both months. Following are the best scores:

Table with columns for names, 200 yds., 500 yds., and Total. Includes categories for First-class, Second-class, Third-class, and Fourth-class medals.

The Target at Sacramento.

The following scores were made last Sunday at the target practice of Company G, Sacramento:

Table of target scores for 200 YARDS and 500 YARDS, listing names and scores.

The following excellent scores were made at Shell Mound Range last Sunday, at the 200 yard mark, by Edward Hovey end Smith Carr. A most peculiar fact is that Hovey made 46 at each range:

Table of scores for Edward Hovey and Smith Carr at 200 YARDS and 500 YARDS.

The German Fusileers.

The German Fusileers, Captain Stettin, held their regular monthly prize and medal shoot, at Shell Mound, on Sunday. For the prizes five shots were fired from the 200 yard mark with the following result:

Table of scores for German Fusileers, listing names and scores for various ranges.

Portland Light Battery.

The Light Battery of Portland held their first shoot with military rifles on Sunday, Oct. 12th, at the 200 yard range with the following result:

Table of scores for Portland Light Battery, listing names and scores.

Company C, Third Infantry, of Oakland, Captain Levy, were well represented at Shell Mound last Sunday. The following scores, which show a steady improvement, were made at the 200 yard target:

Table of scores for Company C, Third Infantry, listing names and scores.

The Speed Ring at Faire.

The old question of the value of the speed ring at agricultural fairs always comes up in the Autumn, but each returning year sees it discussed from a broader platform. The faction which urges the abolishment of racing has grown smaller, but it still numbers some active as well as illogical minds. Mr. Daniel Stickney, for instance, writes to the Home Farm: "I know that there are thousands and tens of thousands in Maine who think that horse-trotting trials of the speed of horses are proper and desirable at agricultural shows and fairs. I know that in Maine it is almost, if not quite, universally practiced. And yet, is it not desirable that this matter have some further consideration? Is it not possible that after a while, after it has been talked upon, written about, and discussed some time longer, that we shall come to the conclusion that an Agricultural Show and Fair with the horse trot left out will be better, wiser, and more valuable than with it?"

"A fast trotter is not wanted or is fit for a farm horse, a team horse, a family horse, a roadster, a journey horse nor for any other use except to trot fast, and for that use not one in five thousand wants him. We have laws against cruelty to animals. Does any one believe that a horse can be trained to get out of him the greatest possible amount of speed down to

a quarter of a second of time in a mile without cruelty to the animal? If compelling a horse or an ox to expend his utmost strength in drawing a great load is cruelty, then I do not see why compelling a horse to extend his utmost speed to get over a given distance is not cruelty also."
